SECURITY & MAINTENANCE

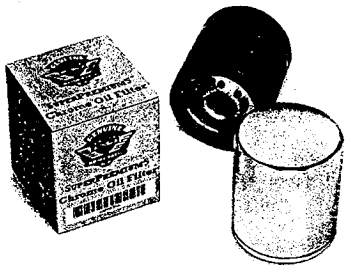
The Art Of Motorcycle Maintenance

Adventure always comes at a price, especially for a motorcycle. The sun, moisture, bugs and road debris can take their toll on the bike's external and internal finishes. But, if you have the right tools for fighting through the miles and miles of the highway's abuse, you'll be more than ready to ride for years.

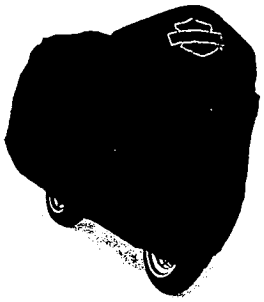
Get Them Before They Get You

A little dust and road grime won't keep you from enjoying the ride, but theft and engine wear will. Made specially for motorcycle use, Harley-Davidson Security and Maintenance Products feature the latest technology available to protect your investment from the rough world around us.

LOCK IT DOWN Our locks and security systems are the first line of defense against theft and vandalism.



CLEAN IT OUT Our Test-Certified lubes and filters protect engine internals from wear and corrosion.



COVER IT UP Our storage covers fight the effects of the elements and hide the bike from curious eyes.

To Clean and Protect

One of the pleasures of owning a motorcycle is the ritual of keeping it clean. The task can range from a simple wash-and-dry to remove the day's dust, to a complete strip-down to prepare the bike for a show or storage. Harley-Davidson offers a complete line of cleaning products formulated to protect your bike from even the harshest riding environment.

Tools You Can Use

Harley-Davidson offers a complete line of tools and supplies that can make life on the road a little easier. Tire gauges with tread depth indicators and compact tool kits are easy to pack and help keep your bike in tune for the next day's ride.

A. Harley-Davidson® Factory Security System

Equip your Harley-Davidson® VRSC™, Sportster®, Dyna™, Softail® or Touring model with the only security system designed and approved by The Harley-Davidson Motor Company.

When armed, the Security System disables the starter and ignition while monitoring the electrical system and vehicle motion with adjustable sensitivity. Minor disturbances trigger a momentary warning; major ones an unbroken thirty-second alarm, after which the Security System returns to monitoring. A distinctive four-way flasher pattern is the alarm signal. An optional self-powered Smart Siren Kit adds a piercing scream that sounds even if the battery cable is cut.

The Security System is armed and disarmed with a remote control waterproof key fob utilizing state-of-the-art rolling code technology. If the key fob is not available, the rider may arm or disarm the system by keying a previously entered personal code on the turn signal switches. A flashing status indicator informs the rider that the Security System is armed or disarmed.

When armed in the Transport Mode, the Security System disables the starter and ignition, but monitors only the electrical system, not vehicle motion. The vehicle may be moved but electrical tampering triggers an alarm.

An Extended Storage Mode keeps the battery from discharging when the Security System is armed for extended periods of time.

The Security System is compatible with FL Touring models equipped with approved TLE/Ultra Sidecars when the system is configured as described in the SIDECAR OWNER'S MANUAL.

Bodyguard in a Bottle

Introducing a breakthrough in powertrain protection – Screamin' Eagle® SYN3™ Synthetic Motorcycle Lubricant. For use in engines, transmissions and primary chaincases, it's just the latest in a line of products formulated specifically to keep your Harley® motorcycle running strong, mile after mile.

Screamin' Eagle® SYN3™ Synthetic Motorcycle Lubricant, SAE 20W50

TESTED-CERTIFIED for use in Harley-Davidson® engine, primary chaincase and transmission applications, Screamin' Eagle SYN3™ Synthetic Lubricant makes changing and topping-off fluids a simple one-product process. Developed with a proprietary three synthetic basestock formula, Screamin' Eagle SYN3 Lubricant is formulated to provide for long-term protection and engine cleanliness requirements, and to provide superior high-temperature protection for high-output engines. SYN3 is formulated to maintain the coefficient of friction for proper clutch operation and to provide the proper lubrication to the primary chain drive. In addition, SYN3 is designed to provide the correct lubricity for the anti-wear requirements of transmission gears and for improved seal protection. This formula is approved by Harley-Davidson for use in all stages of engine life and is not detrimental to the break-in stage of engines.

99824-03/00QT	Formulated for use in Harley-Davidson Engines, Transmissions and the following Primary Chaincase applications: '71-later XL, '83-'84 XR1000, and '84-later Big Twin models with wet-type diaphragm spring clutch.	**$8.95**

What are the key benefits to using SYN3™ Motorcycle Lubricant?

- SYN3 Lubricant can be used in the engine, primary chaincase, and transmission.
- SYN3 Lubricant offers improved film strength for superior wear protection at high temperatures, and improved deposit control for a cleaner engine, transmission, and primary chaincase.
- SYN3 Lubricant is formulated for reduced oil consumption, improved wear protection, high-temperature detergency, and superior overall field performance.

What's the difference between synthetic and petroleum-based lubricants?

Both synthetic and petroleum-based lubricants are derived from the same crude oils. But that's pretty much where the similarities end. Unlike their petroleum-based counterparts, which inherit physical components (including contaminants) of the source crude oil in the refining process, synthetic lubricants are manufactured from base stocks that are custom-designed from scratch to have desired properties for specific purposes, meaning that engineers have complete control of the lubricant from start to finish - at the molecular level.

What does SYN3™ Synthetic Motorcycle Lubricant do for my drivetrain?

SYN3™ Synthetic Motorcycle Lubricant offers all the benefits of Genuine Harley-Davidson® 360 Motorcycle Oil, and:

- Offers superior wear protection at higher temperatures
- Keeps engines, transmissions and primary chaincases cleaner
- Meets the anti-wear lubricity requirements of all transmission gears
- Lubricates all primary chaincase components
- Delivers smooth, sure clutch operation
- Provides long-term protection of all internal components
- Improves seal and gasket performance
- Offers superior performance in high-output engines

What testing was performed on SYN3 synthetic motorcycle lubricant?

During its development, SYN3™ Synthetic Motorcycle Lubricant was subjected to more than three years of laboratory bench testing, dynamometer testing under accelerated conditions, open road vehicle durability testing, closed course durability testing, and wear and deposit rating analysis.

When can I start using SYN3 Synthetic Motorcycle Lubricant?

Right away. SYN3™ Synthetic Motorcycle Lubricant is approved for all stages of engine life, including the first service interval – which means it's not detrimental to engine break-in. You can even use it as a first fill upon delivery of a new motorcycle.

Since SYN3 Synthetic Motorcycle Lubricant is a high-performance lubricant, can I wait longer between changes?

No. As with petroleum-based engine lubricants, you should drain and replace the synthetic motorcycle lubricant in your engine at every 5,000-mile service interval. You should also change your oil filter anytime the engine lubricant is changed. If you ride your motorcycle hard, under dusty conditions, or in cold weather, you should change your SYN3™ Synthetic Motorcycle Lubricant and oil filter more often. You should always change your engine lubricant and filter prior to any extended storage so that your engine is clean and free of any contaminants during this time.

TESTED-CERTIFIED Extended Service Intervals:

Primary Chaincase –
'84-later Big Twin models with wet-type diaphragm spring clutch.
Every 10,000 miles, or prior to winter or extended storage periods.

Transmission –
All Big Twin models.
Every 20,000 miles, or prior to winter or extended storage periods.

Transmission –
'70-earlier XL and K models.
Every 10,000 miles, or prior to winter or extended storage periods.

Primary/Transmission –
'71-later XL and '83-'84 XR1000 models.
Every 10,000 miles, or prior to winter or extended storage periods.

Protect your Harley-Davidson with H-D® 360 Motorcycle Oil

Harley-Davidson Motorcycle Oil is unlike off-the-shelf oils. H-D® 360 is a complex mixture of carefully selected premium quality mineral oil and an exclusive performance additive package. Designed for maximum performance in H-D engines, H-D 360 is a unique oil for a unique application.

Genuine Harley-Davidson® H-D® 360 Motorcycle Oil

Harley-Davidson Genuine H-D 360 Motorcycle Oil is developed and tested for use in Harley-Davidson® motorcycles. Our unique additive package helps prevent engine wear and helps keep your engine cooler, cleaner, free of sludge, varnish and corrosion.

Harley-Davidson V-Twin motorcycles operate at higher temperatures than water-cooled automobiles, thus a specific high temperature additive package is necessary to protect the engine. Be assured, H-D 360 Oil can be trusted in a Harley-Davidson engine.

Available in SAE 10W40, SAE 20W50, SAE 50, and SAE 60. Refer to your Harley-Davidson owner's manual for the proper SAE grade recommendation based on the climate and temperature range you ride in.

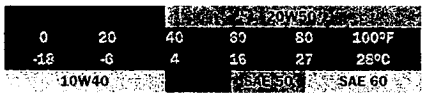
What Does H-D® 360 Mean?

The name Harley-Davidson 360 has its roots in the testing criteria applied to certify this oil. More than just a dynamometer test, it is a designation of an entirely new performance rating system. To earn the name H-D 360, this oil had to outperform all others on a full round of tests. Laboratory bench testing measured viscosity retention and oxidation stability. Next, the oil was run on the open road under high ambient temperatures and high load conditions. After each test, the engineers performed a complete engine tear-down and analysis. Plenty of oils vied to carry the name Harley-Davidson, but only one oil met the challenge: H-D 360.



What viscosity grade should I use in my Harley® Motorcycle?

The recommended viscosity grade for all temperature conditions is SAE 20W50 Harley-Davidson Motor Oil. SAE 10W40 H-D Motorcycle Oil is also available and appropriate for low temperature climates. The SAE 50 H-D Motorcycle Oil is satisfactory in ambient temperatures of 60-80°F, and the SAE 60 H-D Motorcycle Oil in ambient temperatures above 80°F. SAE 20W50 covers the broadest range of operating temperatures.

What does Harley-Davidson Motorcycle Oil do for my engine?

- Protects the engine from rust and corrosion
- Keeps the engine clean
- Cools engine parts
- "Seals in" combustion pressure
- Prevents foaming
- Permits easy starting at a wide range of temperatures
- Provides quick oil circulation
- Reduces friction and power loss

How often should I change my motorcycle engine oil?

You should change your motorcycle engine oil and engine oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter. If you ride your motorcycle hard, under dusty conditions, or in cold weather, the engine oil and filter should be changed more often. You should always change your engine oil and filter prior to winter storage (or any extended storage) so that your engine oil is clean and free of contaminants for this time period.

Can I go longer between oil changes by changing the filter?

NO! The job of the oil filter is to remove dust, soot and other solid matter. But it cannot remove water, gasoline or acids. And, it can't do the job of additives that have been used up. Follow the recommended oil and oil filter changes in your Harley® motorcycle owner's manual.

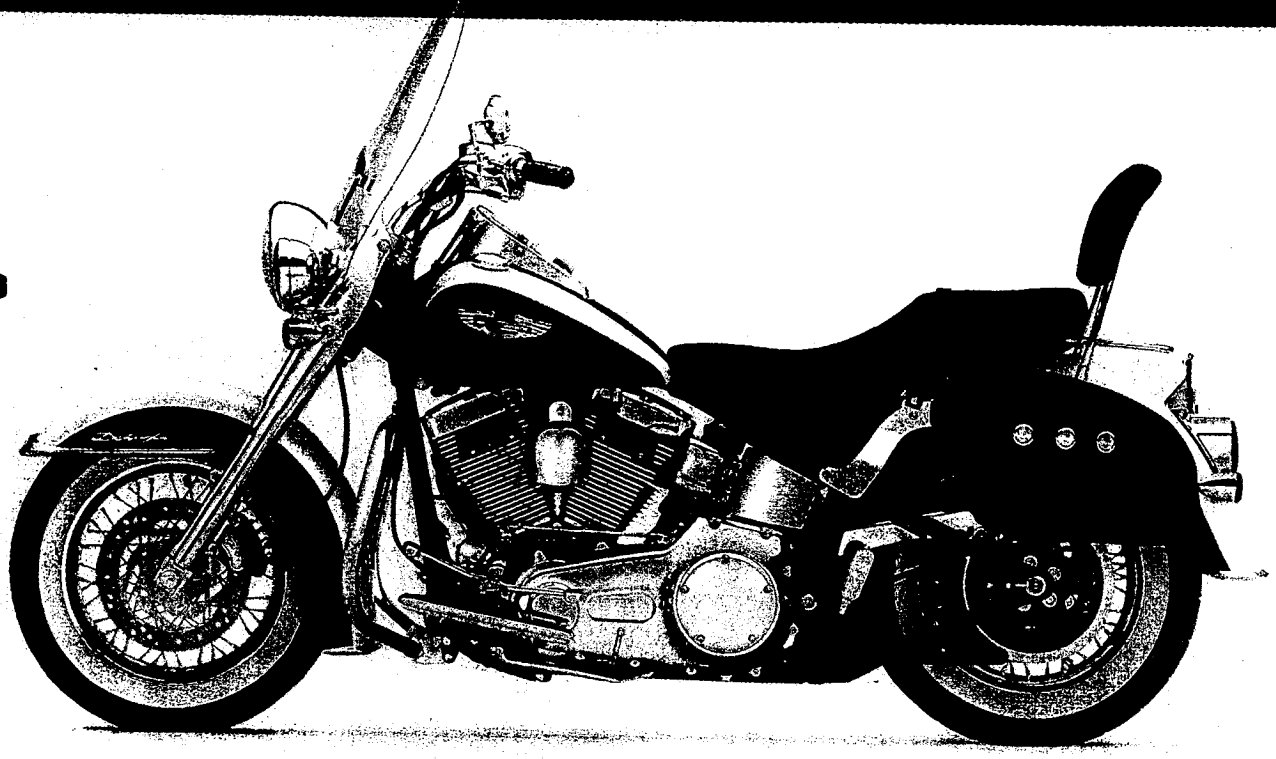
WHEN CUSTOMIZING YOUR MOTORCYCLE YOU
[illegible] ALL THE RIGHT [illegible]
[illegible] THIS SINGLE DECISION WILL IMPACT EVERY [illegible]
[illegible] INTO A STATEMENT, A ROUTE INTO A TRIP AND [illegible]

TOURING

Start by choosing a seat, handlebar and foot control position to match your size, and select a windshield to protect you from the weather. Then, add saddlebags and touring luggage to haul your gear. For the final touch, select from a wide range of comfort and entertainment accessories to help you rack up the miles.

CRUISING

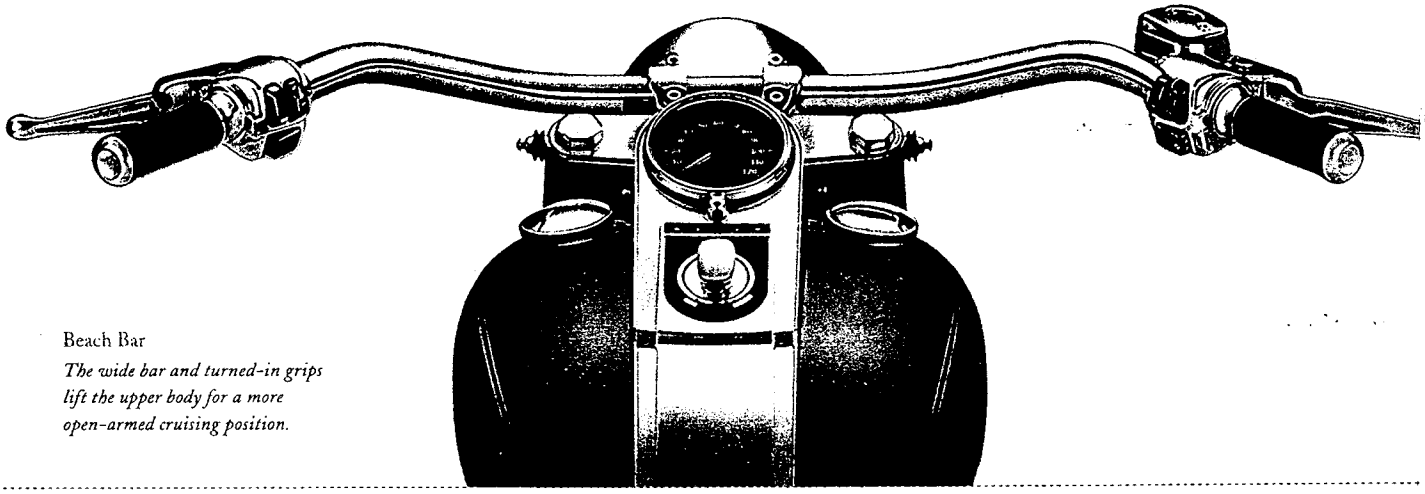
Stripped-down to the bare essentials, with a low-profile riding position and a high-profile attitude, these bikes make the maximum impact when riding across town or cruising the boulevard. The look begins big—paint, chrome, custom wheels—and ends with the smallest details.



ESTABLISH YOUR POSITION

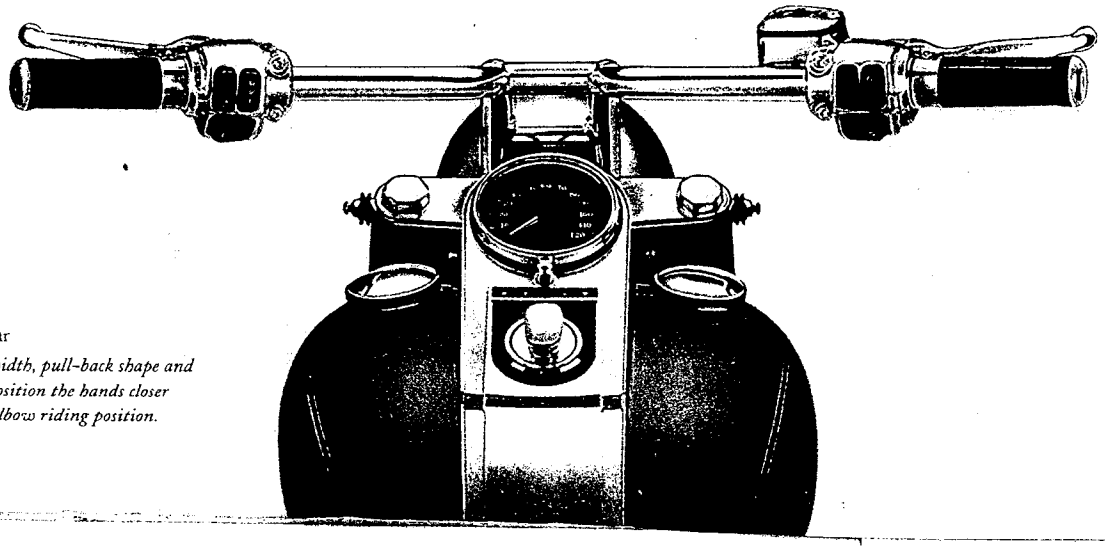
How you fit your motorcycle is a major factor in maximizing riding comfort and enjoyment. The correct riding position can build confidence when you put your feet down at a stop light. It can enhance the feeling of control on a winding road. And it can add a hundred miles to a day's ride. Tailoring your bike to your body is as simple as selecting the right seat, handlebar and ride height.

STEERING YOU IN THE RIGHT DIRECTION Choosing a handlebar is about more than just style, it's about how you approach the road. Where the bar positions your hands, wrists and arms directly affects how you feel on the motorcycle. For every set of bars, there are three factors at work: rise, width and pull-back. These three measurements determine your reach to the hand controls and, therefore, your overall comfort and feeling of control.



Beach Bar

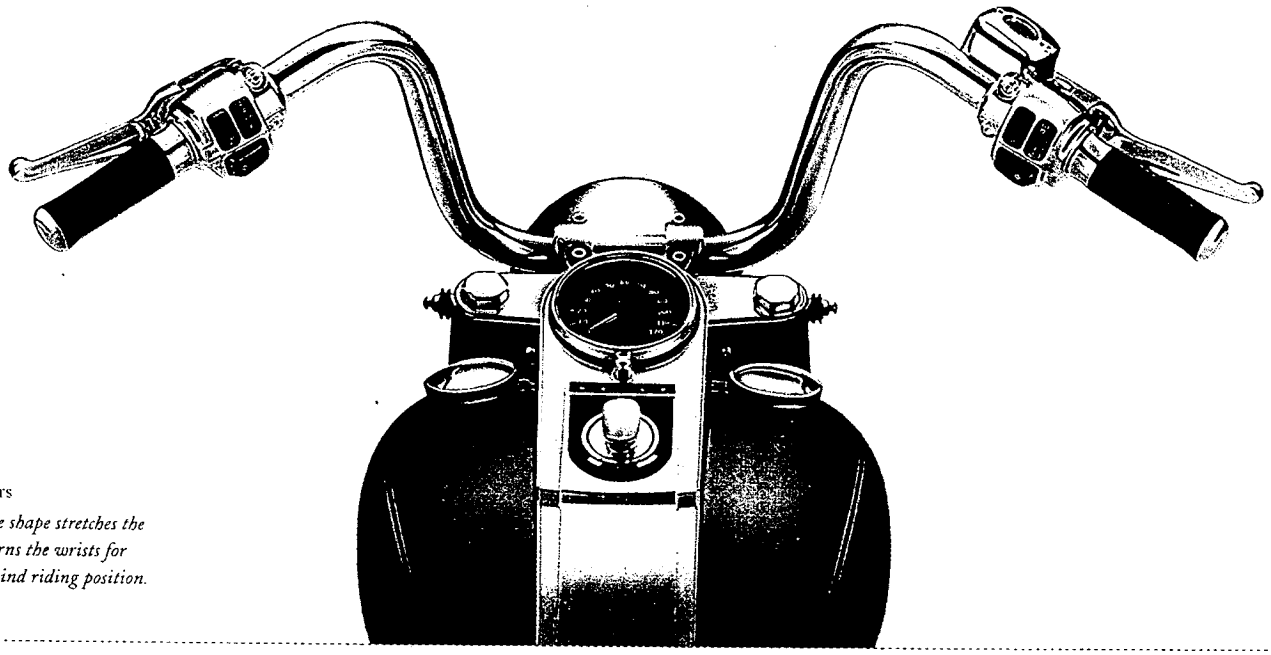
The wide bar and turned-in grips lift the upper body for a more open-armed cruising position.



Swingback Bar

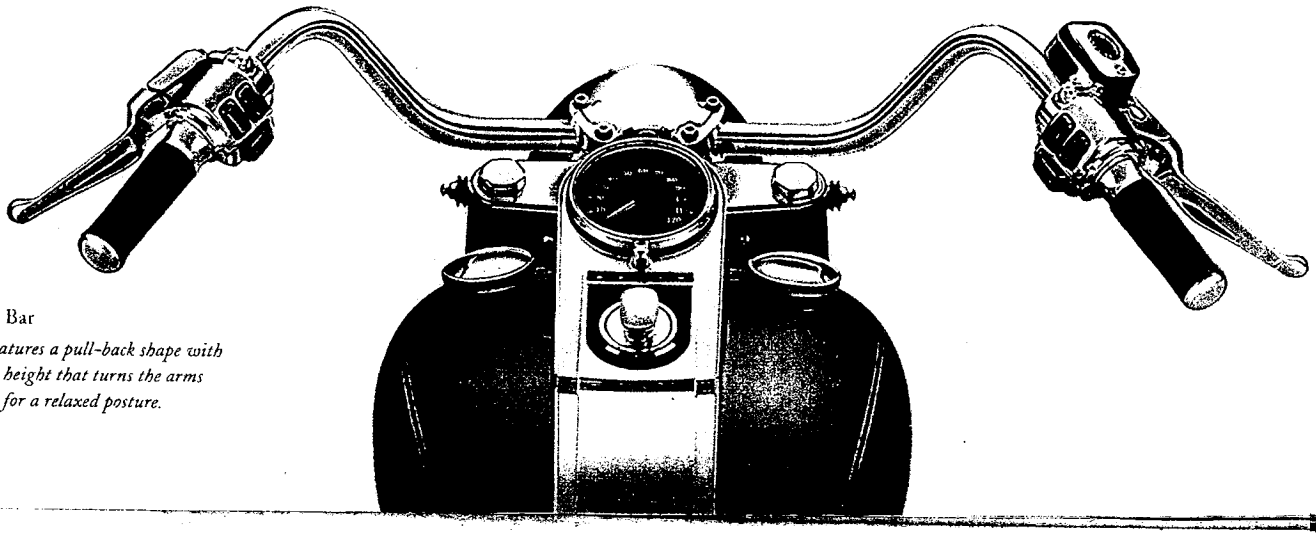
The narrow width, pull-back shape and neutral grip position the hands closer for a relaxed-elbow riding position.

Being sure-footed at a stop or when parking the bike enhances your feeling of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow-width seat may be the easiest way for a shorter rider to fit comfortably on a larger bike.



Ape Hangers

The high rise shape stretches the arms and turns the wrists for an in-the-wind riding position.

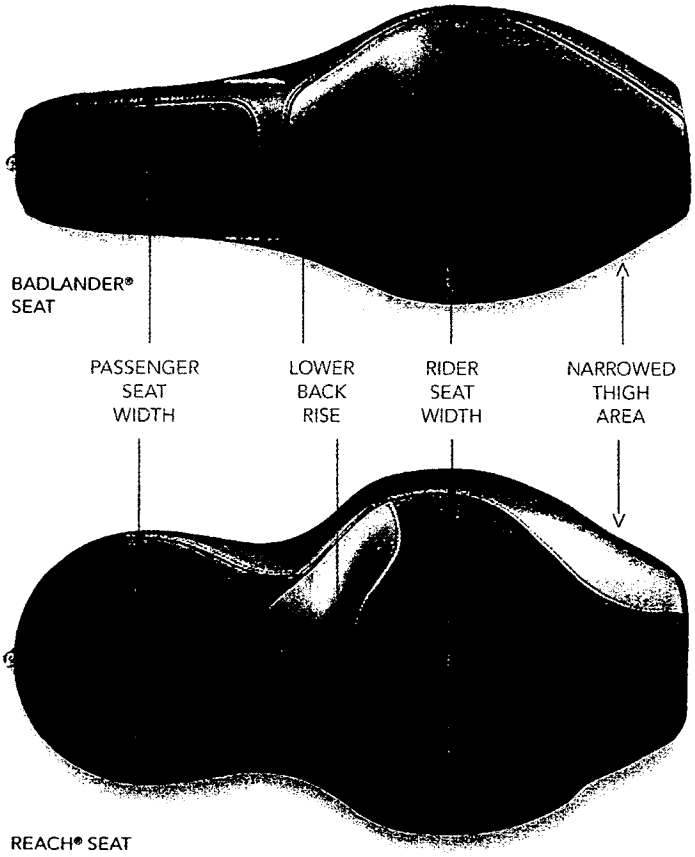


Buckhorn Bar

The bar features a pull-back shape with a mid-rise height that turns the arms and wrists for a relaxed posture.

FIND THE PROPER SUPPORT

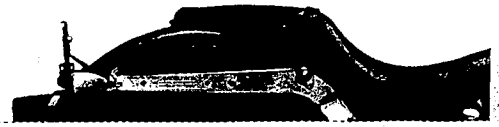
On a long ride, your body can quickly tell whether a seat works for you. For example, does your back still feel relaxed after hours in the saddle? Do your hands fall naturally to the hand controls? Do you feel comfortable putting your feet down at a stop sign? It's a lot to think about, but a Harley-Davidson® dealer can find the seat for the comfort, style and control you want.



THE COMFORT ZONE A seat is more than just leather and foam. For maximum highway comfort, a broad seating surface distributes weight to reduce pressure points. For a short rider, a narrow, tapered thigh zone provides easier reach to the ground. And a stepped seat profile keeps the rider from sliding back during acceleration.

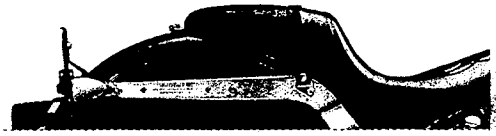
Badlander® Seat

Was it made for 'cruising the boulevard,' or was 'cruising the boulevard' made for it? Long and lean, its custom look brings you lower to the ground than most other seats. Think of it as an attitude adjustment disguised as a posture adjustment.



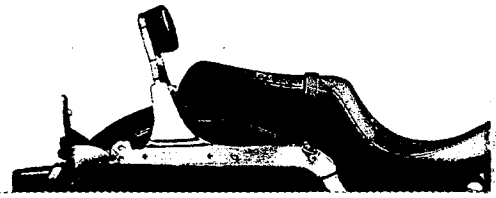
Custom Collection Seats

These saddles combine radical styling with contoured padding for long haul support. Top grain cowhide leathers stretch over the hand-laid fiberglass seat pan for extra durability. Comes in solo, low-profile and mini-touring styles.



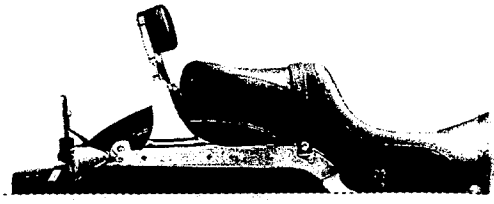
Reach® Forward Position Seat

It's good to have both feet on the ground when you come to a stop. Specially-designed to move riders with a shorter inseam closer to the controls, the Reach Seat also features a low-profile and a narrow thigh zone to bring the legs closer together to minimize leg stretch.



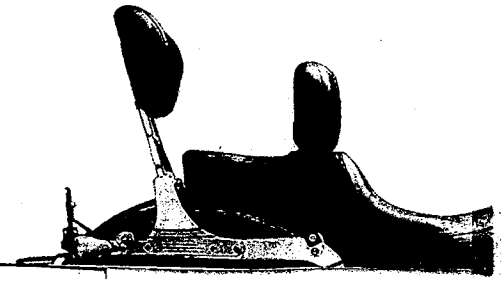
Sundowner® Deep Bucket Seat

Your backside's going to look forward to long trips. The deep bucket design puts you into proper touring position and the thick padding makes it want to stay there. The dish shape holds you in position and provides lower back support.

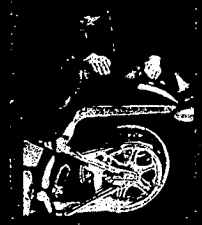


Touring Seat with Rider Backrest

Hit the road with more than the wind at your back. When equipped with a rider backrest, a touring seat adds a whole new level of comfort. A backrest positions the rider in an upright touring posture, and adds adjustable lower back support.



HARLEY-DAVIDSON SEATS FIT A WIDE VARIETY OF RIDERS AND RIDING STYLES. FROM A LOW-PROFILE STREET LOOK TO CROSS-COUNTRY COMFORT, A DETACHABLE SEAT HARDWARE KIT LETS YOU CHANGE AT A MOMENT'S NOTICE.

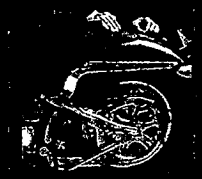


STEP 1

UNFASTEN THE THUMBSCREW AND REMOVE CURRENT SEAT ON THE BIKE.

STEP 2

INSERT SEAT'S FRONT TAB INTO SLOT UNDER THE TANK AND LINE UP TO FASTEN ON FENDER.



STEP 3

FASTEN SEAT BRACKET TO FENDER AND RE-INSTALL THE GRAB STRAP.

KEEP YOURSELF PROTECTED

Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. Choosing from a range of styles, you can find the protection and style you demand. And since Detachable windshields can be installed or removed in seconds, you can tailor your bike to the day's ride.

DIFFERENT TRIPS CALL FOR DIFFERENT WINDSHIELDS. AND SOMETIMES, FOR NONE AT ALL. THAT'S WHY MOST OF OUR SHIELDS HAVE A QUICK-RELEASE MOUNTING SYSTEM.

STEP 1 CHOOSE

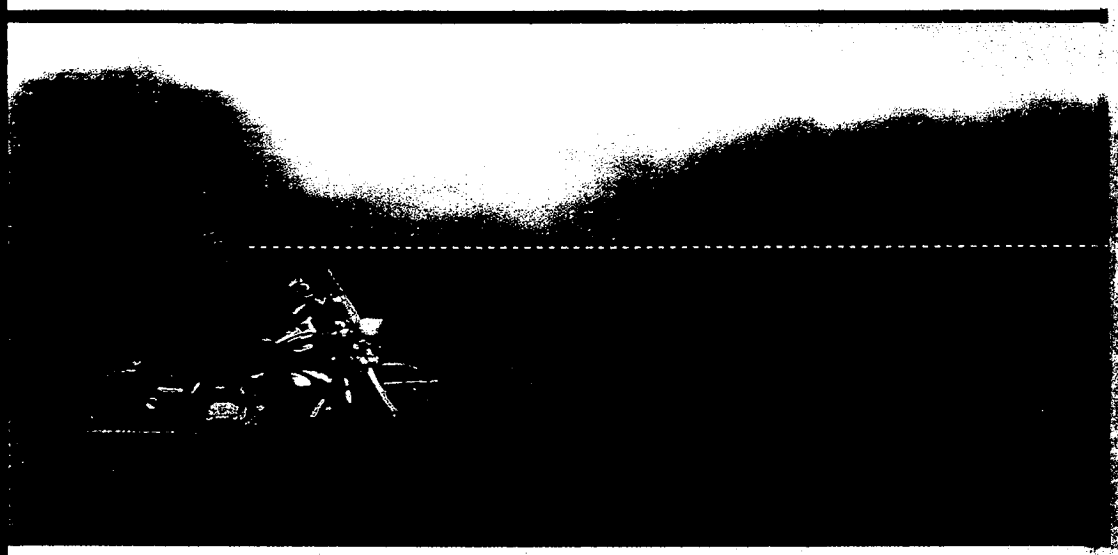
DECIDE WHICH WINDSHIELD IS BEST FOR THE TRIP. CONSIDER HEIGHT, SHAPE AND OVERALL STYLE.

STEP 2 POSITION

WITH THE CLAMPS UNLOCKED, POSITION THE WINDSHIELD ON THE FORK TUBES.

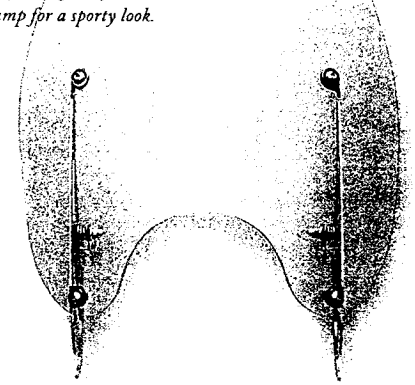
STEP 3 SECURE

SNAP THE CLAMPS CLOSED WITH YOUR FINGERS. NOW YOU'RE READY FOR WHATEVER THE OPEN ROAD THROWS AT YOU.



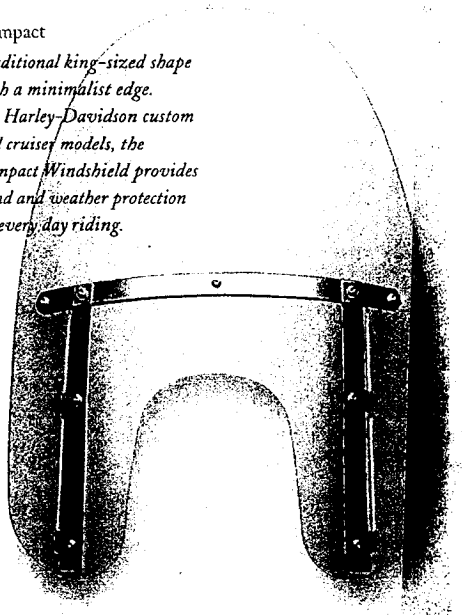
Super Sport

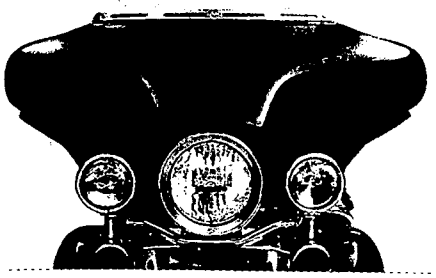
Fights off wind and debris, but keeps the wind-in-the-hair feeling. Ideal for a cool morning ride to the office, the sleek profile hugs the front lamp for a sporty look.



Compact

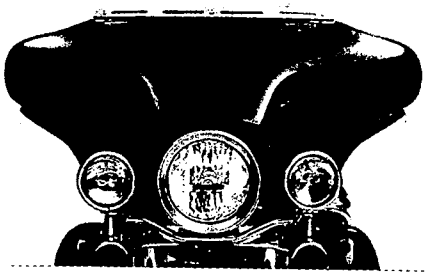
Traditional king-sized shape with a minimalist edge. For Harley-Davidson custom and cruiser models, the Compact Windshield provides wind and weather protection for every day riding.





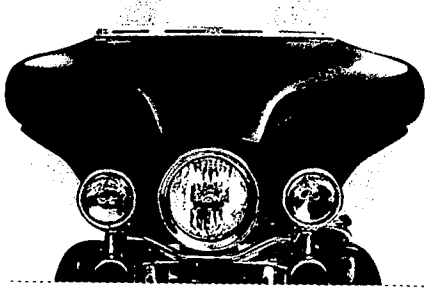
Low-Profile

Made with the shorter rider in mind, this style extends 3 inches below the standard height.



Standard-Height

Designed for a rider about 5 feet 10 inches tall, this style provides weather protection and an over-the-top view.



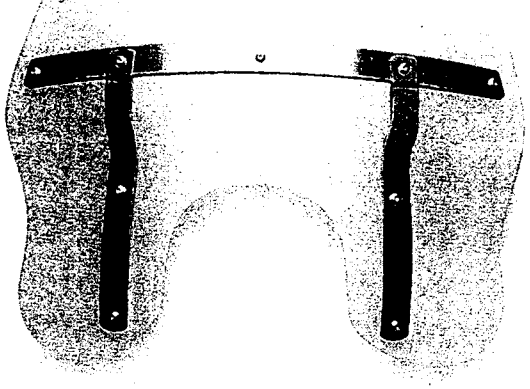
Tall

For the taller rider, this style extends 3 inches above standard while preserving both visibility and protection.

YOUR LINE OF SIGHT By diverting air pressure away from your chest and over your helmet, a windshield can add hours of riding comfort. For maximum protection from wind and weather, select a windshield that tops out just below your line of sight. You avoid looking through rain drops, bug spots and road grime to get a clear view of the highway ahead.

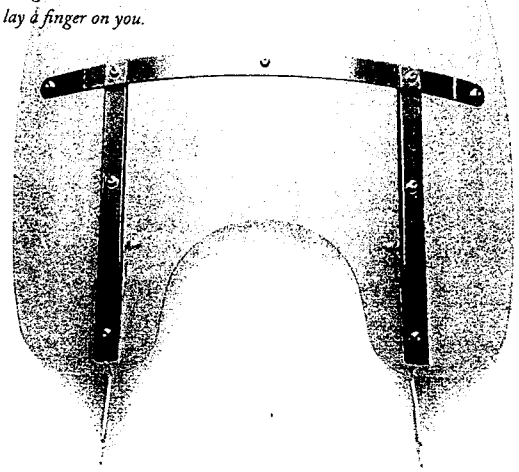
Touring

Add maximum weather protection to your sporting motorcycle. Contoured to divert wind around the rider's helmet and hands, a Touring windshield means long-ride comfort.



King Size

Nothing gets past this one. The King Size windshield is the ultimate in on-road protection. Available in a variety of shield heights, the road can't lay a finger on you.



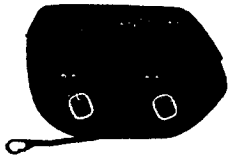
PREPARE FOR THE LONG HAUL

When you're in the middle of a cross-country road trip, turning around isn't an option. You need to be prepared, but not overloaded. You want to travel lightly, but not helplessly. There is a solution: Harley-Davidson® touring accessories. Saddlebags, racks and touring luggage can turn any bike into a long distance runner, and the patented Detachable Accessories let you strip your bike down once you get there.

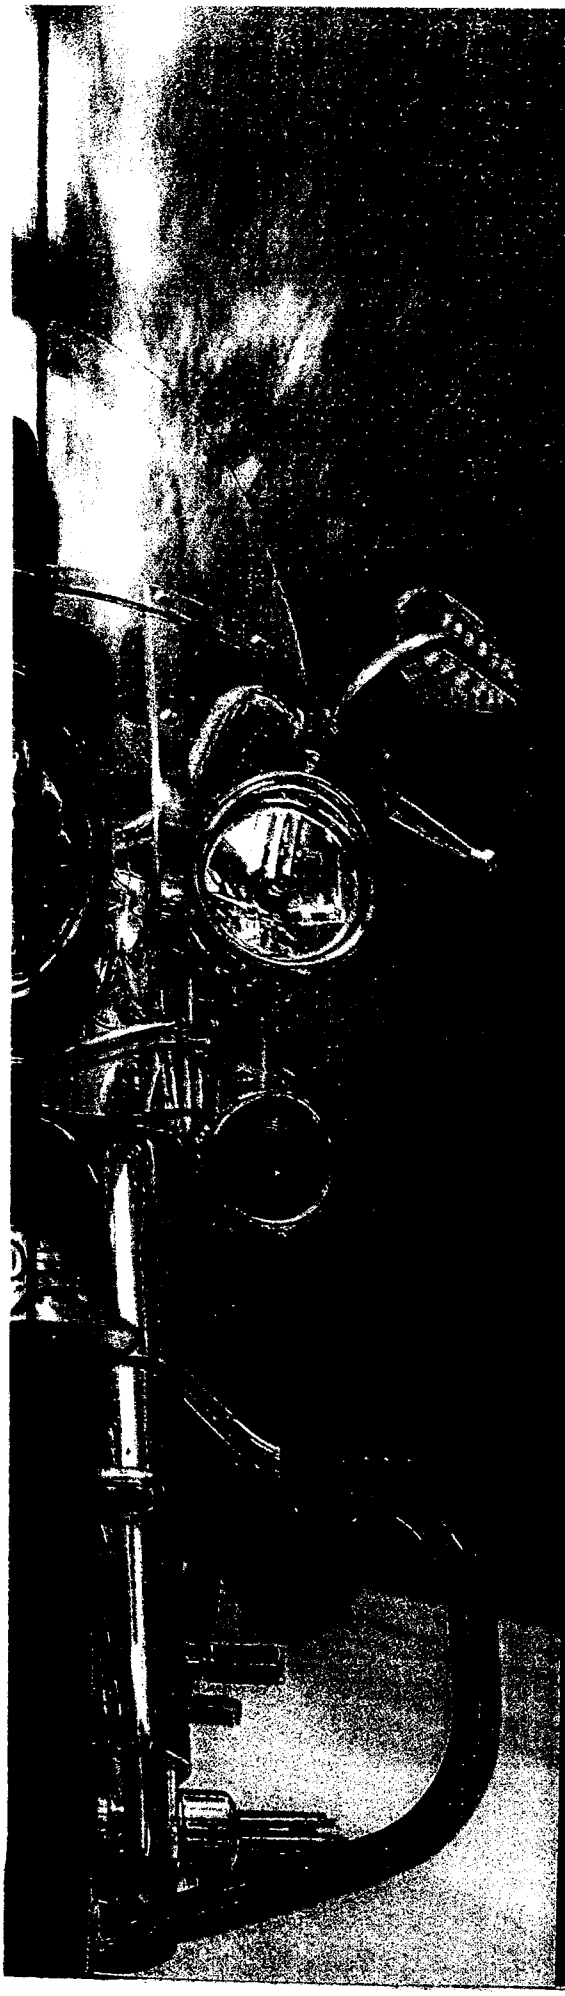
Hard Saddlebags
Lockable, color-matched storage with a sleek, sculpted profile

Covered Rigid Saddlebags
Leather looks with the smooth lines and security of hard bags

Leather Saddlebags
Classic custom storage born on the boulevard



STRETCH YOUR LEGS
Re-positioning your feet during a long ride relieves muscle tension and strain, and reduces rider fatigue. The Mustache Engine Guard with integrated rubber pads offers a comfortable and slip-resistant cushion for your feet while traveling the open road.



A DETACHABLE SISSY BAR UPRIGHT AND PASSENGER BACKREST IS THE STARTING POINT FOR A COMPLETE TOURING MACHINE.

STEP 1 UNLATCH

ROTATE THE CAM-LOCK DETACHABLE LATCH TO RELEASE THE RACK OR SISSY BAR FROM THE DOCKING POINTS.

STEP 2 LIFT

PIVOT THE RACK OR SISSY BAR FORWARD TO CLEAR THE REAR DOCKING POINTS.

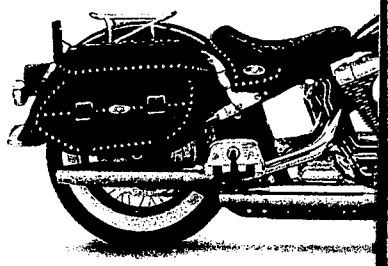
STEP 3 REMOVE

LIFT THE RACK OR SISSY BAR FREE FROM THE FRONT DOCKING POINTS. MISSION ACCOMPLISHED.

CHOOSING TOURING ESSENTIALS A solo commute to work, or a two-up run across the country; different journeys demand different equipment. Harley-Davidson® Detachable Docking Hardware makes the conversion a simple proposition. When selecting the right touring package, you just have two questions to answer: How far are you going and who's going with you?

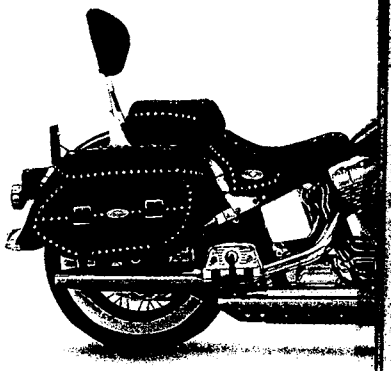
Solo

Go it alone in style. Saddlebags hold a change of clothes, a rain suit and the basic travel gear. A Solo Rack and soft bag can store any souvenirs you pick up along the way.



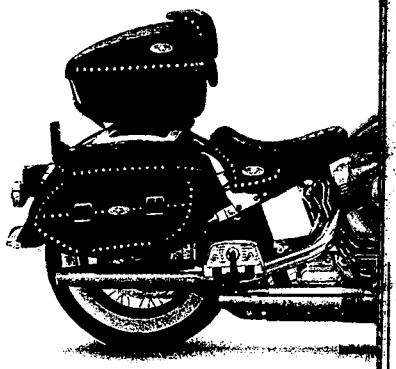
Two-Up

Take a day's ride on a bike built for two. Saddlebags carry clothes and the essentials, while a Sissy Bar Backrest Pad provides hours of passenger comfort on the open road.



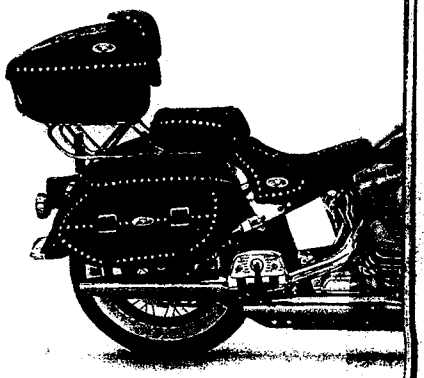
Solo Tour-Pak®

Ride like you're on a mission. The saddlebags and Tour-Pak offer tons of storage space, and the Solo Mounting Rack positions the Tour-Pak Pad for maximum rider back support.



Two-Up Tour-Pak®

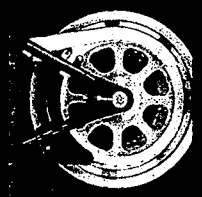
The ultimate road trip. With all this space and comfort, you and one lucky passenger are fully-equipped to go wherever you want, for as long as you want. See you later.



MAKE YOUR STATEMENT

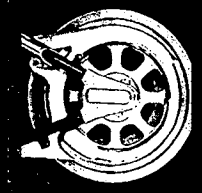
The flash of chrome. It's the first thing that everyone sees. And the one thing that everyone remembers. From a gleaming front fork, through custom hand controls to a mirror-polished swingarm, dressing the bike in chrome is the first step in building a complete custom.

REPLACING ORIGINAL EQUIPMENT PAINTED OR POLISHED PARTS WITH CHROME WILL DRAMATICALLY CHANGE YOUR BIKE'S OVERALL LOOK.



STEP 1

FROM THE FACTORY, QUALITY PAINTED AND POLISHED SURFACES MIX WITH CHROME FOR A GREAT STARTING POINT.

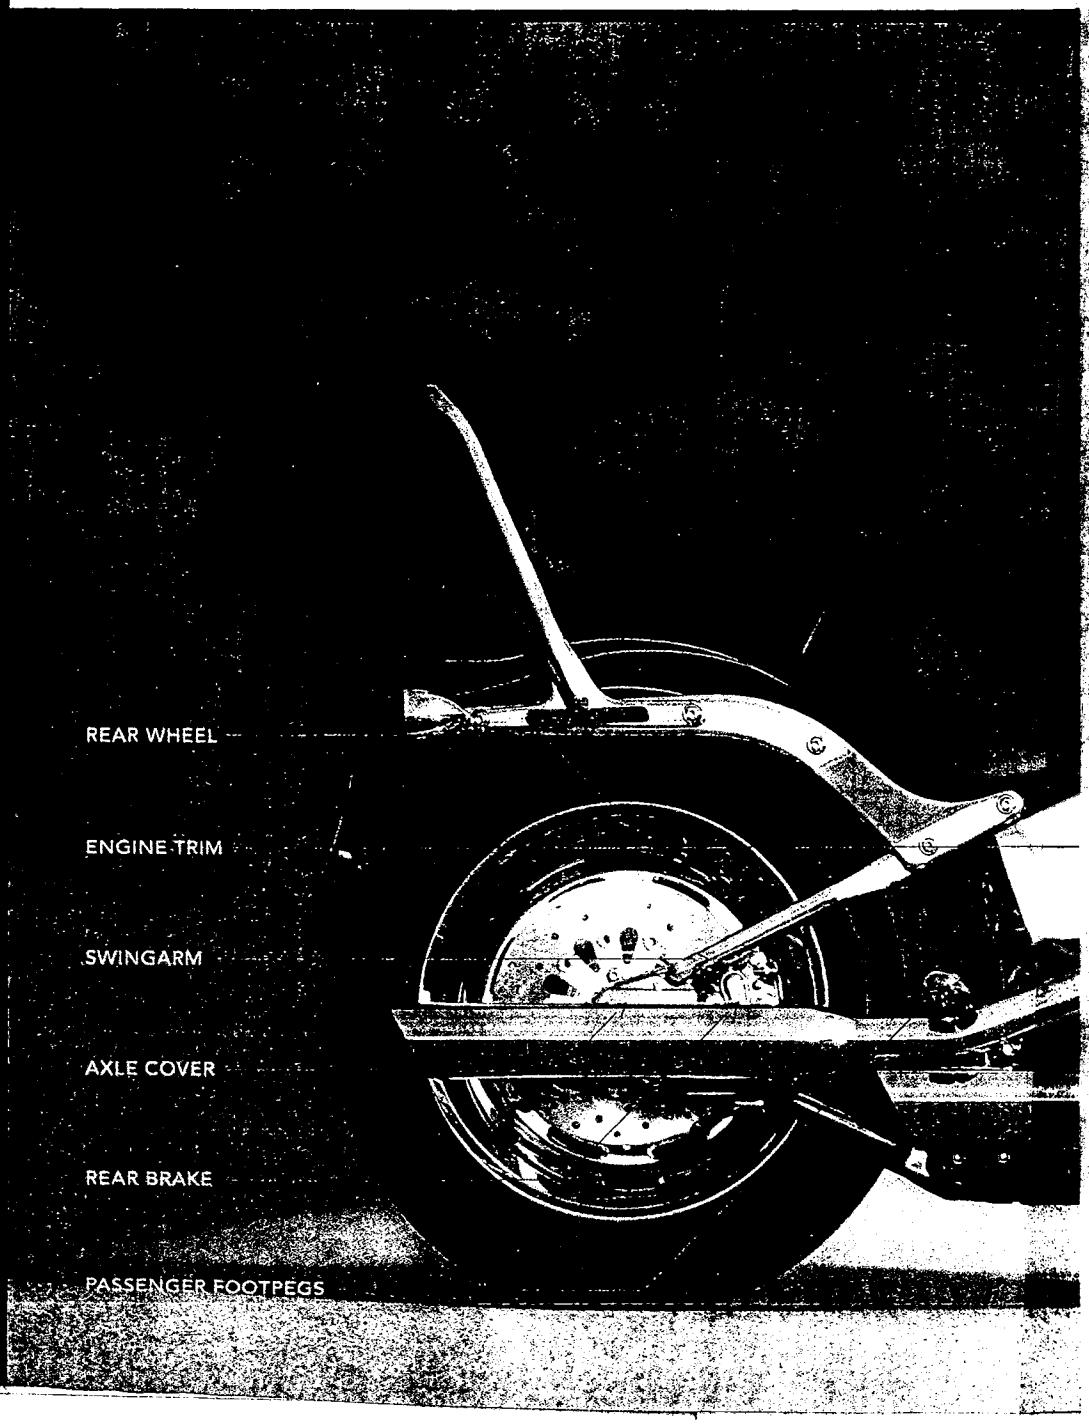


STEP 2

CHROME BELT GUARDS AND SPROCKET, AXLE AND PIVOT COVERS PROVIDE A CUSTOM LOOK FOR A SMALL INVESTMENT.

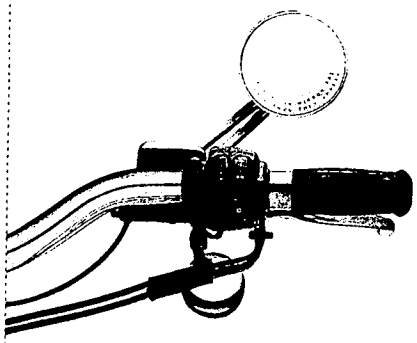
STEP 3

GO ALL IN WITH A CHROME SWINGARM, WHEEL, SPROCKET, PIVOT BOLT, BELT GUARD AND HARDWARE.



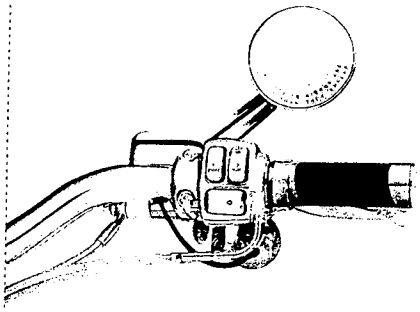
TWO WAYS TO CUSTOMIZE

You can pursue your chrome strategy in two ways: "Cover" or "Custom." The Cover strategy focuses on adding decorative trim to stock components. It's quick, it's convenient and, in many cases, you can handle installation by yourself. The Custom strategy is more in-depth. It focuses on replacing Original Equipment parts with custom versions. This method offers many choices and a true one-of-a-kind look, but may require installation by a certified Harley-Davidson® technician.



Cover

Adding mirrors, grips and a little chrome can go a long way in establishing your personal direction. A chrome master cylinder cover and hand levers complete the look. The focus is on instant gratification, and it takes only an afternoon's worth of time.



Custom

Every aspect is open to change. Combining chrome and custom replacement parts creates a truly unique look and feel. A chrome master cylinder kit, a set of chrome switch housings, custom hand grips and braided control cables finish the custom installation.

WINDSHIELDS

Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. For maximum protection from wind and weather, select a windshield that tops out just below your line of sight. You avoid looking through rain drops, bug spots and road grime to get a clear view of the highway ahead.

A. QUICK-RELEASE DETACHABLE ULTIMATE TOURING WINDSHIELD

The oversized Touring Windshield features an aerodynamic design shaped to provide hours of riding comfort. The additional center width directs airflow past the hand grips, and deflects rain and road debris around the rider. You get quick on-and-off convenience, and a clean, custom look. No tools are required. The tough, hard-coated polycarbonate windshield features a stylish horizontal brace with the "Bar & Shield" logo to accent the long, lean look of the V-Rod® model. CHOOSING A BACKREST

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support, and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a detachable sideplate kit and appropriate Docking Hardware to make adding or removing a Detachable accessory a simple "slide and click" proposition.

A. GENUINE HARLEY-DAVIDSON® SISSY BAR SIDEPLATES

Add your choice of sissy bar uprights, backrest pads and luggage racks when you install rigid or detachable sideplates to your motorcycle. Manufactured and tested to rigorous Harley-Davidson standards, these sideplates are designed to specific model application for exact fit.

CHOOSING A BACKREST

A sissy bar upright and passenger backrest is the starting point to build a complete touring machine. The backrest provides long-range comfort and support, and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a detachable sideplate kit and appropriate Docking Hardware to make adding or removing a Detachable accessory a simple "slide and click" proposition.

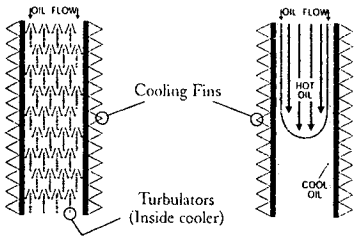
A. PREMIUM OIL COOLER KIT FOR DYNA™ MODELS

This oil cooler was designed specifically for Harley-Davidson to out-perform all other coolers in the industry. The cooler features a unique "Turbulator" system that evenly distributes oil across the cooling chambers. The air fins are designed to efficiently dissipate heat. The oil cooler has been designed to simplify installation and enhance performance. The large heat exchanger provides excellent cooling efficiency. The kit features a one-piece adapter plate with integrated thermostat that allows oil lines to connect to the oil filter bracket. Thermostat activates at 185 degrees F (85°C). Kit comes complete with mounting hardware and precut oil lines. Kit includes Chrome Oil Cooler Cover.

26151-07	Fits '06-later Dyna models (except California models). Does not fit with Chin Spoiler Kits P/N 58042-06xxx or Definitive5 Filtration System P/N 63800-07, 63801-07, or 63802-07. Fits with all H-D Engine Guards.	$298.95

Inside View of Premium Oil Cooler with Turbulators



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Inside View of Conventional Oil Cooler without Turbulators

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.
