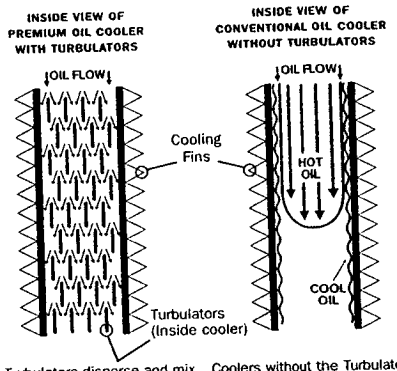
D. PREMIUM OIL COOLER FOR SOFTAIL MODELS

D. PREMIUM OIL COOLER FOR SOFTAIL MODELS

This vertically mounted oil cooler was designed specifically for Harley-Davidson to out-perform the other coolers in the industry. This cooler features a unique "Turbulator" design that efficiently distributes oil across the cooling chambers. The cooler features several louvers to efficiently dissipate heat. The unique and stylish adaptor plate incorporates the thermostat, and simplifies oil line routing for easy installation. Comes complete with mounting hardware.

62913-00	Fits '00-later Softail models. (Will not fit with Oil Filter Cover P/N 62816-98. Will not fit with front spoiler.)	**$279.95**



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

FINISH IT OFF

Here's the deal. We build motorcycles. And because we build bikes, we build the parts that go on them better than anyone else. Before a Harley-Davidson® even rolls off the line, we spend months developing custom parts specifically for it. Which means you get more than the best parts on the planet. You get them first. So while the other guys are scrambling to knock out the chrome, we're already in the shop changing motorcycling forever. The choice is yours: you can bolt somebody else's metal on your ride, or you can trust in products built by the people who brought your bike to life. When you think about it, that's no choice at all.

ENGINE REMANUFACTURING

Your V-Twin® engine has taken you everywhere you've ever wanted to go. And it's been a good friend out on the road. But the miles are adding up, and you fear that your days together may be numbered. Before you get misty, we've got a solution. We can rebuild it. Our Engine Remanufacturing Program is now available for Twin Cam 88® as well as 1340cc Evolution® engines. It's simple, quick and a lot cheaper than buying a new bike or engine. And it just might make your V-Twin even better than it was when it rolled off the showroom floor. Just bring your bike to your Harley-Davidson® dealer. They'll remove the engine and send it to Harley-Davidson's Capitol Drive facility, where your engine will will rebuilt, re-painted and hot-tested. Approximately two weeks later, your engine will come back with a new lease on life and a one-year unlimited mileage warranty. Then your dealer will re-install it. And you and your engine can start all over again.

See your dealer for details.
