IN THE MATTER OF an Opposition by
L'Oreal USA, Inc. and L'Oreal S.A.
to Application Serial No. 76/596,736 filed by
Robert Victor Marcon
for the trademark "L'OREAL PARIS"
(Opposition No. 91184456)

COMMUNICATION - J
DEFENDANT'S NOTICE OF RELIANCE

This communication presents the Defendant's "Notice of Reliance" as mentioned in the Pretrial Disclosures. Said "Notice of Reliance" will include Exhibits 1-29 which are herein detailed below.

Second, the Defendant, as previously mentioned, prematurely submitted his first "Notice of Reliance" on October 30, 2008. This submission should be disregarded. Consequently, a new "Notice of Reliance" will replace the one erroneously sent and it will be the one herein detailed below.

This new "Notice of Reliance" will consist of the following exhibits:

(1) Exhibit-1: Origins of the name "OREAL";
(2) Exhibit-2: Origins of the name "LOREAL";
(3) Exhibit-3: Origins of the name "PARIS";
(4) Exhibit-4: Elision in the French language;
(5) Exhibit-5: Intelius.com printouts of the name "OREAL";
(6) Exhibit-6: Intelius.com printouts of the name "LOREAL";
(7) Exhibit-7: Intelius.com printouts of the name "PARIS";
(8) Exhibit-8: Ancestry.com printouts of the name "OREAL";
(9) Exhibit-9: Wrestling printouts of the famous "Oreal Perras" known professionally as "Ivan Koloff";
(10) Exhibit-10: Geographical references to the name "PARIS";
(11) Exhibit-11: Anatomical references of the word "LOREAL";

(12) Exhibit-12: Current commercial use of the word "OREAL" with variations;
(13) Exhibit-13: Other citations from the internet;
(14) Exhibit-14: USPTO printouts of the Opposers' live trademarks;
(15) Exhibit-15: Roster of various products belonging to the Opposers downloaded from Wal-Mart.com;
(16) Exhibit-16: Opposers' request for Admissions and Responses;
(17) Exhibit-17: Opposers' request for Interrogatories and Responses;
(18) Exhibit-18: Opposers' request for Documents and Responses;
(19) Exhibit-19: List of all of the Defendant's trademark submissions;
(20) Exhibit-20: Past commercial activities regarding the Defendant's "L'OREAL PARIS" trademark;
(21) Exhibit-21: Past commercial activities regarding some of the Defendant's other marks;
(22) Exhibit-22: Various USPTO printouts regarding the mark "OLD DUTCH";
(23) Exhibit-23: Various USPTO printouts regarding the mark "SPITFIRE";
(24) Exhibit-24: Various USPTO printouts regarding the mark "TEMPEST";
(25) Exhibit-25: Various USPTO printouts regarding the mark "VIM";
(26) Exhibit-26: Various USPTO printouts regarding the mark "GREYHOUND";
(27) Exhibit-27: Various USPTO printouts regarding the mark "FINLANDIA";
(28) Exhibit-28: Various USPTO printouts regarding the mark "TRIUMPH"; and
(29) Exhibit-29: Various USPTO printouts regarding the mark "DUTCH BOY".

This concludes the exhibits, submissions and related information of the Defendant's new "Notice of Reliance".

Respectfully submitted,

Robert V. Marcon,
Defendant Pro Se

Remarks: This exhibit details the origins of the name "Oreal". This information has been obtained from books available at local libraries.

Baby Names around the World

Bruce Lansky

Meadowbrook Press
Distributed by Simon & Schuster
New York

Acknowledgments
The lists of the 100 most popular girls' and boys' names in the U.S. were compiled by Michael Shackleford at the Social Security Administration. The lists are based on a 100 percent sample of births through the first nine months of 1998. The names are not grouped by variant spellings. (For example, Hannah and Hanna are treated as two separate names and ranked based on their individual popularity.)

The lists of the 10 most popular names from 1880 to 1990 are based on data compiled by the Social Security Administration and made available by Michael Shackleford. Thank you, Michael, for all your help.

The girl's name **Lorelei** *\(o)-re-lei* is pronounced *LOR-a-lye*. It is of German origin. Place name: a rocky cliff on the Rhine river, dangerous to boat passage, has been poetically personified as the Lorelei, whose singing lures men to destruction. The name has an aura of risky allure. Writer Anita Loos used this when she created blonde bombshell Lorelei Lee in her novel "Gentlemen Prefer Blondes". Marilyn Monroe also added to its image with her portrayal of Lorelei in the 1953 film.

Lorelei has 13 variant forms: Laurelei, Laurelie, Loralee, Loralei, Loralie, Loralyn, Lorilee, Lorilyn, Lura, Lurette, **Lurleen**, Lurlene and Lurline.

Baby names that sound like Lorelei are **Lorelle** and Lorel.

Lorelei is a very common first name for women (#1922 out of 4276) but an uncommon last name for both men and women. (1990 U.S. Census)

Displayed below is the baby name popularity trend for the girl name Lorelei. Compare Lorelei with its variant forms and related girl names.

Baby Names around the World

Bruce Lansky

Meadowbrook Press
Distributed by Simon & Schuster
New York

Acknowledgments
The lists of the 100 most popular girls' and boys' names in the U.S. were compiled by Michael Shackleford at the Social Security Administration. The lists are based on a 100 percent sample of births through the first nine months of 1998. The names are not grouped by variant spellings. (For example, Hannah and Hanna are treated as two separate names and ranked based on their individual popularity.)

The lists of the 10 most popular names from 1880 to 1990 are based on data compiled by the Social Security Administration and made available by Michael Shackleford. Thank you, Michael, for all your help.

toyevsky, who chose his characters' names with great care, must have selected this one ironically, for Parfyon is sexually motivated.

PARIS *(Greek mythology name)* The son of Priam, king of Troy. He was exposed on a mountainside at birth and reared as a shepherd because of a dream his mother had before his birth. But he grew up to be the most beautiful man in Asia Minor, so he was chosen to decide which of three goddesses—Venus, Minerva, or Juno—should be awarded a golden apple inscribed "For the Fairest." As Dorothy Sayers writes in her introduction to Dante's *Inferno,* "Juno offered him riches and Minerva conquest, but Venus promised him the love of the most beautiful woman in the world." He fell for Venus's bait, and the result was the Trojan War, since Venus helped him kidnap Helen from Sparta. Dante places him with the Lustful in Hell, and Homer doesn't have many kind words for him either. Paris is pampered, shameless, and only a competent soldier. Worst, he never apologizes for causing the war that brought down his family and its kingdom. Shakespeare gave his name to Juliet's disregarded fiancé in *Romeo and Juliet.*

PATRICK *(Latin, "noble, well-born")* From the same root that gives us "patrician." The patron saint of Ireland was a missionary bishop of the fifth century who established an organized Christian presence in the face of Druid opposition. Less reliably, he is supposed to have driven the snakes out of the country as well. The name has always been very popular among the Irish. In Maria Edgeworth's *Castle Rackrent,* the narrator Thady Quirk's first employer is Sir Patrick Rackrent, a popular, hard-drinking gentleman who falls down dead at a party.

Stephen Crane's Pat Scully ("The Blue Hotel") comes from a very different kind of fiction. He is the Irish proprietor of the "Palace Hotel" in Fort Rompers, Nebraska. The hotel is blue because he thinks its added visibility will attract business. His relationship to his guests and their difficulties—one of them gets himself killed on the premises—is strictly businesslike.

Paine Lat. "Countryman." Thomas Paine, a political theorist of the 18th century, wrote many political pamphlets that were influential during the American Revolution, and his *The Rights of Man* supported the French Revolution.
Pain, Payne

Paisley Scottish place name: an industrial town west of Glasgow. The name "paisley" referring to a pattern on fabric comes from this town, since shawls with that pattern were made here in the 18th century. The characteristic elongated comma shape, however, is actually Indian, and based on a pine cone.

Paladio Sp. from Gk. "Follower of Pallas" which was another name for the Greek goddess Athena. St. Palladius was the first bishop of the Christians in Ireland, in the middle of the fifth century A.D.
Palladius

Paley OE. Origin unclear: may relate to **Paul**, or may be a place name, with the "-ley" ending indicating a meadow. CBS founder William Paley.

Palmer OE. "One who holds a palm." Usually indicates a pilgrim, who would have carried a palm branch on his pilgrimage.
Pallmer, Palmar, Palmerston

Palomo Sp. "Dove." More popular in the feminine form, **Paloma**.

Paltiel Heb. "God is my deliverance."
Platya, Platyahu

Paquito Sp. Dim. **Francis** (Lat. "From France").
Paco

Paris OE. Place name: "From Paris," the city. Also a key figure in Greek myth. Paris was a young man of staggering beauty, son of King Priam of Troy. He was chosen to judge a beauty contest of the goddesses by awarding to one of them a golden apple which bore the legend, "For the fairest." Hera, the wife of Zeus, promised Paris greatness if he chose her. Athene offered him greatness in war, and Aphrodite the love of the world's most beautiful woman. He chose Aphrodite, who caused Helen of Troy to fall in love with him. The Trojan War was the outcome:

Paris died an ignoble death in it. The Judgment of Paris has frequently been portrayed in European painting, probably as a good excuse to depict three scantily clad beauties. Use of the name is predominantly American and is beginning to cross over to use for girls.

The boy's name **Paris** *\p(a)-ris*, also used as girl's name **Paris**, is pronounced *PARE-iss*. It is of Greek origin. Greek mythology: Paris was the young and beautiful prince of Troy whose love affair with Helen caused the Trojan war. Paris has also been used in English as a surname for immigrants from the capital of France. The city was named after the Gallic tribe that founded it, the Parisii. See also **Parrish**.

Paris has 1 variant form: Parris.

Baby names that sound like Paris are Baris, **Boris**, Parriss, Parwiz and Pears.

Paris is a somewhat common first name for men (#1060 out of 1220) and an even more common last name for both men and women (#2319 out of 88799). (1990 U.S. Census)

Displayed below is the baby name popularity trend for the boy name Paris. Compare Paris with its variant form and related boy names.

Écoute-moi. Donne-m'en quelques-un(e)s.
Listen to me. Give me a few (of them).

Ce livre? Apportez-le-moi.
That book? Bring it to me.

Note that the imperative is an exception only in the *affirmative*. If the imperative verb is negative, the normal position of the pronouns is before the verb.

Ce livre? Ne m'en parle pas!
That book? Don't talk to me about it.

Ne le regardez pas. Ne le leur donnez pas.
Don't look at it. Don't give it to them.

C. The neutral pronoun *it* does not exist in French. When *it* replaces a specific noun, the gender of the noun replaced governs the choice of the pronoun: masculine ***il, le, lui*** (depending on the function) for masculine nouns, and feminine ***elle, la, elle*** (depending on the function) for feminine nouns.

Regardez ce château. Il est très beau.
Look at that castle. It is very beautiful.

Regardez cette maison. Elle est très belle.
Look at that house. It is very beautiful.

If *it* does not replace a specific noun, it may be translated ***ce*** before a form of ***être***, or ***cela*** or ***ça*** before another verb (see §58B, C; §286).

D. The pronouns ***je, me, te, se, le, la*** must be elided when they immediately precede a word (the verb or a second personal pronoun) that begins with a vowel or mute ***h***. Note also the particular case of ***moi*** and ***toi*** in paragraph B, above.

J'attends. Je n'attends pas. Je l'attends.
I'm waiting. I'm not waiting. I'm waiting for him (her).

Elle m'attend. Elle s'habitue à son métier.
She's waiting for me. She is getting used to her job.

E. The English pronouns *they* and *them* serve for masculine and feminine. In the functions where a choice can be made in French between a masculine form and a feminine one, the gender of the noun replaced should be checked and the right pronoun selected.

J'ai vu Jeanne et Élise. J'ai dîné avec elles.
I saw Jeanne and Élise. I had dinner with them.

In the functions where no choice is available, as with ***les, leur, lui***, confusion may result in the French sentence. To avoid this, disjunctive pronouns should be used (see §88G).

J'ai vu Jeanne et Élise. Elles étaient avec Paul et René. Je les ai invitées, elles, mais pas eux.
I saw Jeanne and Élise. They were with Paul and René. I invited them (the girls), but not them (the boys).

It's easier, therefore, to listen for the feminine article **la** because the "a" is not dropped in pronunciation. If you hear the "a", you know that the noun that follows is feminine; if you don't hear the "a", assume that the article is **le** and that the noun following is masculine.

- **Les** indicates that the noun is plural; it does not tell you the gender since **les** is the plural for both masculine and feminine nouns.

les livres	(masc. pl.)	*the books*
les garçons		*the boys*
les tables	(fém. pl.)	*the tables*
les pommes		*the apples*

Here again, there is no problem in seeing the plural when you read these words; however, you will only be able to hear the plural in the plural definite article **les** that comes before the noun.

<< What is a Mute "H"? >>

In English: A **mute** (silent) **"h"** is an "h" that is not pronounced. Compare your pronunciation of:

Column 1	and	*Column 2*
hotel		hour
horse		honor
hat		heir

The "h" is pronounced in the words in Column 1; the "h" is silent in the words in Column 2. When the "h" is not pronounced, it is called a mute "h".

The indefinite article ***an*** (instead of *a*) is used before a mute "h": *an* hour, *an* honor, *an* heir.

In French: The letter "h" exists only in writing; it is never pronounced. In most cases, just ignore the "h" and consider the word as starting with a vowel.

> **Hôtel** and **herbe** are considered as starting with a vowel.

There are two important consequences:

1. In the singular, **le** and **la** change to **l'**. The dropping of a final vowel before a word starting with a vowel is called an **elision**.

*le hôtel	→	l'hôtel	(*the hotel*)
*la herbe	→	l'herbe	(*the grass*)

2. In the plural, the "s" of **les** or **des** is linked in pronunciation with the vowel that follows giving a "z" sound. The linking of a final consonant to the next word which starts with a vowel is called a **liaison**.

les hôtels	des herbes
z sound	*z sound*

NOTE: There are a few cases when the "h" is considered an **"h" aspiré** (an aspirate h). This *aspirate h* means that you must consider the word as if beginning with an invisible consonant. There are two important consequences:

1. In the singular, you do not drop the "e" at the end of **le** or the "a" of **la**; i.e. there is no elision.

le héros	*the hero*
la hâte	*the haste*

2. In the plural, there is no linking between the noun and the preceding word; i.e. there is no liaison.

les héros	*the heros*

There are not many words that start with *an aspirate h.* They are usually identified in dictionaries with a dot under the "h" or with an asterisk in front of the word.

---

*An asterisk means that what follows is incorrect. It is included for the purpose of illustration.

elision

e·li·sion [i lí'n] (*plural* e·li·sions *or* e·li·sion)

noun

Definition:

1. omission of element of word: the omission of a vowel, consonant, or syllable while pronouncing or writing something, sometimes as a natural shortening, as in "he's," sometimes for literary or poetic effect, as in "'tis"

2. any omission or deletion: the suppression, omission, or deletion of something, or what has been suppressed, omitted, or deleted (*formal*)

[Late 16th century. < Latin *elision*-< *elidere* "strike out" (see elide)]

Elision (French)

From Wikipedia, the free encyclopedia
(Redirected from Elision in the French language)

In French, **elision** refers to the suppression of a final unstressed vowel (usually [ə]) immediately before another word beginning with a vowel. The term also refers to the orthographic convention by which the deletion of a vowel is reflected in writing, and indicated with an apostrophe.

This article is part of the series on:

Written French

In written French, elision (both phonetic and orthographic) is obligatory for the following words:

- the definite articles *le* and *la*
  - **le** garçon ("the boy"), **la** fille ("the girl")
  - **le** + arbre → l'arbre ("the tree"), **la** + église → l'église ("the church")
- the subject pronouns *je* and *ce* (when they occur before the verb)
  - **Je** dors. ("I sleep") C**e** serait génial. ("That would be great.")
  - J'ai dormi. ("I slept.") C'était génial. ("It was great.")
  - but: Ai-**je** imaginé? ("Did I imagine?"), Est-**ce** utile? ("Is that useful?")
- the object pronouns *me*, *te*, *se*, *le*, and *la* (when they occur before the verb)
  - Jean **se** rase, **la** voit, **me** téléphone. ("Jean shaves himself, sees her, phones me.")
  - Jean s'est rasé, l'a vue, m'a téléphoné. ("Jean shaved himself, saw her, phoned me.")
  - but: Regarde-**le** encore une fois. ("Look at him one more time.")
- the object pronouns *le*, *la*, *moi*, *toi* when they occur after an imperative verb and before the pronoun *en* or *y*:
  - Mettez-**le**, donne-les-**moi**, casse-**toi**. ("Put it, give me them, scram.")
  - Mettez-l'y, donne-m'en, va-t'en. ("Put it there, give me some, leave.")
- the negative marker *ne*
  - Elle n**e** parle plus. ("She isn't talking anymore.")
  - Elle n'arrête pas de parler. ("She won't stop talking.")

- the preposition *de*
  - Le père d**e** Jean vient d**e** partir. ("Jean's father just left.")
  - Le père d'Albert vient d'arriver. ("Albert's father just arrived.")
- *que* (which has many different functions)
  - Qu**e** dis-tu ? Qu**e** Jean ne fait qu**e** manger. ("What are you saying? That Jean does nothing but eat.")
  - Qu'as-tu dit ? Qu'il ne nous restait plus qu'une semaine. ("What did you say? That we only had one more week left.")
- The conjunction *si* plus the pronouns *il* and *ils*
  - s**i** elle aime les chats ("if she likes cats")
  - s'il(s) aime(nt) les chats ("if he/they like cats")

Elision is indicated in the spelling of some compound words, such as *presqu'île* "peninsula", *aujourd'hui* "today", and *quelqu'un* "someone".

At the beginnings of words, the aspirated h denies elision. Example: *Le Havre*. The mute h, however, requires elision. Example: *l'homme*. Both types of 'aitch' are silent regardless.

Informal French

Elision of the second-person singular subject pronoun *tu*, before the verbs *avoir* "to have" and *être* "to be", is very common in informal speech, but is avoided in careful speech and never used in formal writing:

- T**u** as décidé de lui rendre visite, t**u** es allé voir le film, t**u** **n'**étais pas là. ("You decided to visit him/her, you went to see the film, you were not there" in careful speech)
- T'as décidé de lui rendre visite, t'es allé voir le film, t'étais pas là. (In informal speech.)

Note in the third example that the particle of negation *ne* has been dropped as well, a typical feature of casual speech.

Language Use and English-Speaking Ability: 2000

Issued October 2003

C2KBR-29

By
Hyon B. Shin
with
Rosalind Bruno

The ability to communicate with government and private service providers, schools, businesses, emergency personnel, and many other people in the United States depends greatly on the ability to speak English.[1] In Census 2000, as in the two previous censuses, the U.S. Census Bureau asked people aged 5 and over if they spoke a language other than English at home. Among the 262.4 million people aged 5 and over, 47.0 million (18 percent) spoke a language other than English at home.

Figure 1.
Reproduction of the Questions on Language From Census 2000

11 a. Does this person speak a language other than English at home?

- ☐ Yes
- ☐ No → *Skip to 12*

b. What is this language?

(For example: Korean, Italian, Spanish, Vietnamese)

c. How well does this person speak English?

- ☐ Very well
- ☐ Well
- ☐ Not well
- ☐ Not at all

Source: U.S. Census Bureau, Census 2000 questionnaire.

This report, part of a series that presents population and housing data collected in Census 2000, presents data on language spoken at home and the ability to speak English of people aged 5 and over. It describes population distributions and characteristics for the United States, including regions, states, counties, and selected places with populations of 100,000 or more.

The questions illustrated in Figure 1 were asked in the census in 1980, 1990, and 2000. Various questions on language were asked in the censuses from 1890 to 1970, including a question on "mother tongue" (the language spoken in the person's home when he or she was a child).

The first language question in Census 2000 asked respondents whether they spoke a language other than English at home. Those who responded "Yes" to Question 11a were asked what language they spoke. The write-in answers to Question 11b (specific language spoken) were optically scanned and coded. Although linguists recognize several thousand languages in the world, the coding operation used by the Census Bureau put the reported languages into

[1] The text of this report discusses data for the United States, including the 50 states and the District of Columbia. Data for the Commonwealth of Puerto Rico are shown in Table 2 and Figure 5.

U C NS SBU E U
Helping You Make Informed Decisions

U.S. Department of Commerce
Economics and Statistics Administration
U.S. CENSUS BUREAU

United States Census 2000

about 380 categories of single languages or language families.[2]

For people who answered "Yes" to Question 11a, Question 11c asked respondents to indicate how well they spoke English. Respondents who said they spoke English "Very well" were considered to have no difficulty with English. Those who indicated they spoke English "Well," "Not well," or "Not at all" were considered to have difficulty with English — identified also as people who spoke English less than "Very well."

The number and percentage of people in the United States who spoke a language other than English at home increased between 1990 and 2000.

In 2000, 18 percent of the total population aged 5 and over, or 47.0 million people, reported they spoke a language other than English at home.[3] These figures were up from 14 percent (31.8 million) in 1990 and 11 percent (23.1 million) in 1980. The number of people who spoke a language other than English at home grew by 38 percent in the 1980s and by 47 percent in the 1990s. While the population aged 5 and over grew by one-fourth from 1980 to 2000, the number who spoke a language other than English at home more than doubled.

In 2000, most people who spoke a language other than English at home reported they spoke English "Very well" (55 percent or

Figure 2.
Speakers of Languages Other Than English at Home and English Ability by Language Group: 2000

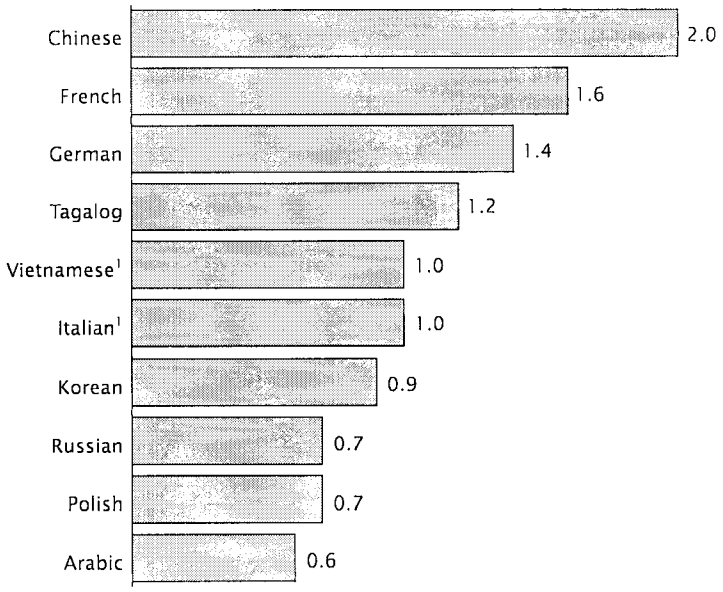
Figure 3.
Ten Languages Most Frequently Spoken at Home Other Than English and Spanish: 2000

(Population 5 years and over, in millions. Data based on sample. For information on confidentiality protection, nonsampling error, sampling error, and definitions, see *www.census.gov/prod/cen2000/doc/sf3.pdf*)



[1] The number of Vietnamese speakers and the number of Italian speakers were not statistically different from one another.

Note: The estimates in this figure vary from actual values due to sampling errors. As a result, the number of speakers of some languages shown in this figure may not be statistically different from the number of speakers of languages not shown in this figure.

Source: U.S. Census Bureau, Census 2000 Summary File 3.

[2] More detailed information on languages and language coding can be found in "Summary File 3: 2000 Census of Population and Housing Technical Documentation" issued December 2002 (*www.census.gov/prod/cen2000/doc/sf3.pdf*).

[3] The estimates in this report are based on responses from a sample of the population. As with all surveys, estimates may vary from the actual values because of sampling variation or other factors. All statements made in this report have undergone statistical testing and are significant at the 90-percent confidence level unless otherwise noted.

Four Major Language Groups

Spanish includes those who speak Ladino.

Other Indo-European languages include most languages of Europe and the Indic languages of India. These include the Germanic languages, such as German, Yiddish, and Dutch; the Scandinavian languages, such as Swedish and Norwegian; the Romance languages, such as French, Italian, and Portuguese; the Slavic languages, such as Russian, Polish, and Serbo-Croatian; the Indic languages, such as Hindi, Gujarathi, Punjabi, and Urdu; Celtic languages; Greek; Baltic languages; and Iranian languages.

Asian and Pacific Island languages include Chinese; Korean; Japanese; Vietnamese; Hmong; Khmer; Lao; Thai; Tagalog or Pilipino; the Dravidian languages of India, such as Telegu, Tamil, and Malayalam; and other languages of Asia and the Pacific, including the Philippine, Polynesian, and Micronesian languages.

All other languages include Uralic languages, such as Hungarian; the Semitic languages, such as Arabic and Hebrew; languages of Africa; native North American languages, including the American Indian and Alaska native languages; and some indigenous languages of Central and South America.

25.6 million people). When they are combined with those who spoke only English at home, 92 percent of the population aged 5 and over had no difficulty speaking English. The proportion of the population aged 5 and over who spoke English less than "Very well" grew from 4.8 percent in 1980, to 6.1 percent in 1990, and to 8.1 percent in 2000.

In Figure 2, the number of speakers of the four major language groups (Spanish, Other Indo-European languages, Asian and Pacific Island languages, and All other languages) are shown by how well they spoke English (see text box above). Spanish was the largest of the four major language groups, and just over half of the 28.1 million Spanish speakers spoke English "Very well."

Other Indo-European language speakers composed the second largest group, with 10.0 million speakers, almost two-thirds of whom spoke English "Very well." Slightly less than half of the 7.0 million Asian and Pacific Island-language speakers spoke English "Very well" (3.4 million). Of the 1.9 million people who composed the All other language category, 1.3 million spoke English "Very well."

After English and Spanish, Chinese was the language most commonly spoken at home (2.0 million speakers), followed by French (1.6 million speakers) and German (1.4 million speakers, see Figure 3). Reflecting historical patterns of immigration, the numbers of Italian, Polish, and German speakers fell between 1990 and 2000, while the number of speakers of many other languages increased.

Spanish speakers grew by about 60 percent and Spanish continued to be the non-English language most frequently spoken at home in the United States. The Chinese language, however, jumped from the fifth to the second most widely spoken non-English language, as the number of Chinese speakers rose from 1.2 to 2.0 million people (see Table 1).[4] The number of Vietnamese speakers doubled over the decade, from about 507,000 speakers to just over 1 million speakers.

Of the 20 non-English languages most frequently spoken at home shown in Table 1, the largest proportional increase was for Russian speakers, who nearly tripled from 242,000 to 706,000. The second largest increase was for French Creole speakers (the language group that includes Haitian Creoles), whose numbers more than doubled from 188,000 to 453,000.

THE GEOGRAPHIC DISTRIBUTION OF PEOPLE WHO SPOKE A LANGUAGE OTHER THAN ENGLISH AT HOME

This section discusses the geographic distribution of the population aged 5 and over who stated in Census 2000 that they spoke a language other than English at home.

The West had the greatest number and proportion of non-English-language speakers.[5]

People who spoke languages other than English at home were not distributed equally across or within regions in 2000.[6] While the West

[4] The changes in ranks between 1990 and 2000 have not been tested and may not be statistically significant.

[5] Hereafter, this report uses the term "non-English-language speakers" to refer to people who spoke a language other than English at home, regardless of their ability to speak English (see Table 1).

[6] The Northeast region includes the states of Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont. The Midwest region includes the states of Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin. The South region includes the states of Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia, and the District of Columbia, a state equivalent. The West region includes the states of Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

Table 1.
Twenty Languages Most Frequently Spoken at Home by English Ability for the Population 5 Years and Over: 1990 and 2000

(Data based on sample. For information on confidentiality protection, sampling error, nonsampling error, and definitions, see *www.census.gov/prod/cen2000/doc/sf3.pdf)*

[1] In 2000, the number of Vietnamese speakers and the number of Italian speakers were not statistically different from one another.
[2] In 1990, the number of Portuguese speakers and the number of Japanese speakers were not statistically different from one another.
[3] In 1990, Hindi included those who spoke Urdu.

Note: The estimates in this table vary from actual values due to sampling errors. As a result, the number of speakers of some languages shown in this table may not be statistically different from the number of speakers of languages not shown in this table.

Source: U.S. Census Bureau, Census 2000 Summary File 3.

had only slightly more than one-fifth of the U.S. population aged 5 and over, it was home to more than one-third (37 percent) of all non-English-language speakers, the highest proportion of any region (see Table 2). Within regions, the proportion who spoke a non-English language at home was 29 percent in the West, 20 percent in the Northeast, 15 percent in the South, and only 9 percent in the Midwest.

Reflecting the higher proportion of speakers of non-English languages in the West, people in that region were more likely than those in the other regions to have difficulty with English. In 2000, 14 percent of all people aged 5 and over in the West spoke English less than "Very well" — compared with 9 percent in the Northeast, 7 percent in the South, and 4 percent in the Midwest.

Figure 4 illustrates the prevalence of the four major non-English-language groups spoken in each region. Spanish was spoken more than any other language group in all regions. The West and the South combined had about three times the number of Spanish speakers (21.0 million) as the Northeast and the Midwest combined (7.1 million). In the Northeast and the Midwest, Spanish speakers composed slightly less than half of all non-English-language speakers, while in the South and the West, they represented around two-thirds (71 percent and 64 percent, respectively), in large part because of the geographic proximity to Mexico and other Spanish-speaking countries.

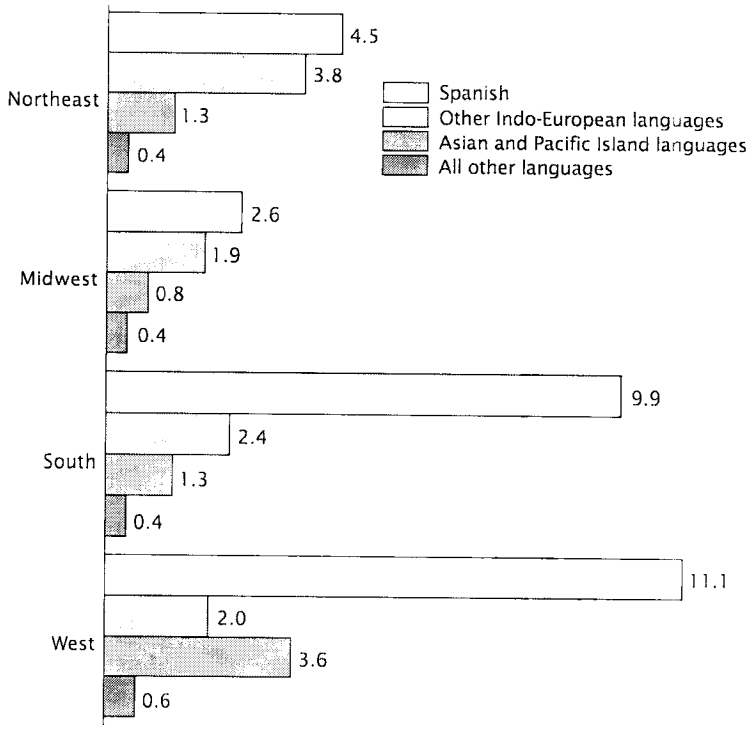
Source: U.S. Census Bureau, Census 2000 Summary File 3 and 1990 Census Summary Tape File 3.

In the Northeast, the Midwest, and the South, speakers of Other Indo-European languages made up the second largest non-English-language speaking group, while in the West, the second largest group was speakers of Asian and Pacific Island languages. Half of Asian and Pacific Island-language speakers lived in the West in 2000.

Table 3 shows the change in the number of speakers of Spanish, Other Indo-European languages, Asian and Pacific Island languages, and All other languages between 1990 and 2000. The largest percentage increase of Spanish speakers was in the Midwest. Asian and Pacific Island-language speakers increased most rapidly in the South and the Midwest. Although the number of Spanish speakers grew in all regions, more than three-fourths of that growth was in the West and the South. The number of Asian and Pacific Island-language speakers grew substantially in all regions, with the greatest numerical increase in the West, which was home to more than half of all Asian and Pacific Island-language speakers in both years.

Figure 4.
Non-English Languages Spoken at Home, by Region: 2000

(Population 5 years and over, in millions. Data based on sample. For information on confidentiality protection, nonsampling error, sampling error, and definitions, see *www.census.gov/prod/cen2000/doc/sf3.pdf*)



Source: U.S. Census Bureau, Census 2000 Summary File 3.

More than one-quarter of the population in seven states spoke a language other than English at home in 2000.

California had the largest percentage of non-English-language speakers (39 percent), followed by New Mexico (37 percent), Texas (31 percent), New York (28 percent), Hawaii (27 percent), Arizona, and New Jersey (each about 26 percent, see Table 2). The five states with fewer than 5 percent of the population who spoke a language other than English at home were all in the South — Tennessee (4.8 percent), Alabama and Kentucky (each 3.9 percent), Mississippi (3.6 percent), and West Virginia (2.7 percent).

Eight states had over 1 million non-English-language speakers in 2000, led by California (12.4 million) with more than twice the number of any other state. Texas had the second largest number of non-English-language speakers (6.0 million), followed by New York (5.0 million), Florida (3.5 million), Illinois (2.2 million), New Jersey (2.0 million), Arizona (1.2 million), and Massachusetts (1.1 million).

During the 1990s, California surpassed New Mexico as the state with the largest proportion of non-English-language speakers. While the proportion of non-English-language speakers in New Mexico increased slightly from 36 percent to 37 percent, the proportion in California jumped from 31 percent to 39 percent.

The number of non-English-language speakers at least doubled in six states from 1990 to 2000. The largest percentage increase occurred in Nevada, where the number increased by 193 percent. Nevada also had the highest rate of population increase during the decade. Georgia's non-English-language-speaking residents

increased by 164 percent, followed by North Carolina (151 percent), Utah (110 percent), Arkansas (104 percent), and Oregon (103 percent).[7]

Since 1990, the proportion of people who spoke a language other than English at home decreased in three states. North Dakota had the largest decrease (19 percent), followed by Maine (11 percent) and Louisiana (2 percent). These three states also had low rates of population growth from 1990 to 2000.

Counties with a large proportion of the population who spoke a language other than English at home were concentrated in border states.

Figure 5 illustrates the high proportions of people who spoke a language other than English at home in 2000 in the states that border Mexico, the Pacific Ocean, or the Atlantic Ocean. Some of these "border states" were entry points for many immigrants.

In 2000, in about 1 percent of the 3,141 counties in the United States, more than 60 percent of the population spoke a language other than English at home. In seven counties, more than 80 percent of the population spoke a non-English language at home — Maverick, Webb, Starr, Kenedy, Zavala, Presidio, and Hidalgo — all in Texas. All but one of the 20 counties with the highest proportions of non-English-language speakers were located in Texas (Santa Cruz County, Arizona being the exception).

Figure 5 shows the high proportion of non-English-language speakers in counties with large cities, such as Atlanta, Chicago, Miami, and New York City. Other counties with relatively high proportions of non-English-language speakers included concentrations of people who spoke Native American languages.[8] For example, in Bethel Census Area, Alaska, 66 percent of the population spoke a language other than English at home, and 97 percent of the non-English-language speakers spoke a Native North American language. The Navajo speakers in the Navajo Nation Indian Reservation, which spanned several counties throughout Arizona, New Mexico, and Utah, accounted for a large proportion of the population who spoke a language other than English at home in these counties.

In some counties, relatively high proportions of non-English-language speakers are found in small, rural populations. For example, the proportions of non-English-language speakers were 25 percent in Logan County and 36 percent in McIntosh County in North Dakota and 33 percent in McPherson County in South Dakota.[9] In these three counties, each with a population of fewer than 4,000, German speakers were predominant among non-English-language speakers: 95.3 percent, 98.1 percent, and 99.6 percent, respectively.[10]

Among all counties, the median percentage of the population who spoke a language other than English at home was 4.6 percent.[11] The fact that the proportion was

[7] The percentage increases between Arkansas and Utah and between Arkansas and Oregon were not statistically different from one another.

[8] For more detailed information on language use and English-speaking ability, see Summary File 3.

[9] The proportions of non-English-language speakers in McIntosh County, North Dakota, and McPherson County, South Dakota, were not statistically different from each other.

[10] The proportions of German speakers among non-English-language speakers in Logan County and McIntosh County, North Dakota, were not statistically different from each other.

[11] The median percentage is a point estimate based on a sample.

[1] East Los Angeles, CA, is a census designated place and is not legally incorporated.

Note: Because of sampling error, the estimates in this table may not be significantly different from one another or from rates for other places not listed in this table.

Source: U.S. Census Bureau, Census 2000 Summary File 3.

below 4.6 percent in one-half of all counties, while the national average was 17.9 percent, reflects the large number of counties (primarily nonmetropolitan counties in the Midwest and the South) with relatively small populations and with low proportions of non-English-language speakers.

Figure 5 illustrates the low proportions of non-English-language speakers in many counties in the South and the Midwest, including Alabama, Arkansas, Iowa, Kentucky, Michigan, Mississippi, Missouri, Tennessee, West Virginia, and Wisconsin. In West Virginia, all but 2 of the 55 counties had a proportion of non-English-language speakers below 4.6 percent.

Places with the highest percentages of non-English-language speakers, Spanish speakers, and people who spoke English less than "Very well" were concentrated in California, Florida, and Texas.

Of the 245 places with 100,000 or more population in 2000, Hialeah, Florida, topped the list with 93 percent of the population aged 5 and over who spoke a language other than English at home in 2000.[12] In addition, 92 percent spoke Spanish and 59 percent spoke English less than "Very well" in Hialeah (see Table 4).[13] Six additional places were included in all three categories in Table 4: Laredo and Brownsville, Texas; East Los Angeles, El Monte, and Santa Ana, California; and Miami, Florida.

McAllen and El Paso, Texas, and Elizabeth, New Jersey, were included in two of the three categories. Pomona, Garden Grove, and Salinas, all in California, were included in one of the three categories.

ADDITIONAL FINDINGS

How many people were linguistically isolated?

In the United States, the ability to speak English plays a large role in how well people can perform daily activities. How well a person speaks English may indicate how well he or she communicates with public officials, medical personnel, and other service providers. It

[12] Census 2000 showed 245 places in the United States with 100,000 or more population. They included 238 incorporated places (including 4 city-county consolidations) and 7 census designated places that were not legally incorporated. For a list of these places by state, see *www.census.gov/population/www/cen2000/phc-t6.html.*

[13] The percentages of people who spoke English less than "Very well" in Hialeah, Florida, and Laredo, Texas, were not statistically different from each other. The percentages of people who spoke Spanish in Hialeah, Florida, and Laredo, Texas, were also not statistically different from each other.

Linguistically Isolated Households

A linguistically isolated household is one in which no person aged 14 or over speaks English at least "Very well." That is, no person aged 14 or over speaks only English at home, or speaks another language at home and speaks English "Very well."

A linguistically isolated person is any person living in a linguistically isolated household. All the members of a linguistically isolated household are tabulated as linguistically isolated, including members under 14 years old who may speak only English.

could also affect other activities outside the home, such as grocery shopping or banking. People who do not have a strong command of English and who do not have someone in their household to help them on a regular basis are at even more of a disadvantage. They are defined here as "linguistically isolated" (see text box above).

In 2000, 4.4 million households encompassing 11.9 million people were linguistically isolated. These numbers were significantly higher than in 1990, when 2.9 million households and 7.7 million people lived in those households.

ABOUT CENSUS 2000

Why Census 2000 Asked About Language Use and English-Speaking Ability

The question on language use and English-speaking ability provides government agencies with information for programs that serve the needs of people who have difficulty speaking English. Under the Voting Rights Act, information about language ability is needed to meet statutory requirements for making voting materials available in minority languages.

The Bilingual Education Program uses data on language to allocate grants to school districts for children with limited English proficiency. These data also are needed for local agencies developing services for the elderly under the Older Americans Act.

Accuracy of the Estimates

The data contained in this report are based on the sample of households who responded to the Census 2000 long form. Nationally, approximately 1 out of every 6 housing units was included in this sample. As a result, the sample estimates may differ somewhat from the 100-percent figures that would have been obtained if all housing units, people within those housing units, and people living in group quarters had been enumerated using the same questionnaires, instructions, enumerators, and so forth. The sample estimates also differ from the values that would have been obtained from different samples of housing units, people within those housing units, and people living in group quarters. The deviation of a sample estimate from the average of all possible samples is called the sampling error.

In addition to the variability that arises from the sampling procedures, both sample data and 100-percent data are subject to nonsampling error. Nonsampling error may be introduced during any of the various complex operations used to collect and process data. Such errors may include: not enumerating every household or every person in the population, failing to obtain all required information from the respondents, obtaining incorrect or inconsistent information, and recording information incorrectly. In addition, errors can occur during the field review of the enumerators' work, during clerical handling of the census questionnaires, or during the electronic processing of the questionnaires.

Nonsampling error may affect the data in two ways: (1) errors that are introduced randomly will increase the variability of the data and, therefore, should be reflected in the standard errors; and (2) errors that tend to be consistent in one direction will bias both sample and 100-percent data in that direction. For example, if respondents consistently tend to underreport their incomes, then the resulting estimates of households or families by income category will tend to be understated for the higher income categories and overstated for the lower income categories. Such biases are not reflected in the standard errors.

While it is impossible to completely eliminate error from an operation as large and complex as the decennial census, the Census Bureau attempts to control the sources of such error during the data collection and processing operations. The primary sources of error and the programs instituted to control error in Census 2000 are described in detail in *Summary File 3 Technical Documentation* under Chapter 8, "Accuracy of the Data," located at *www.census.gov /prod/cen2000/doc/sf3.pdf*.

All statements in this Census 2000 Brief have undergone statistical testing and all comparisons are significant at the 90-percent confidence level, unless otherwise noted. The estimates in tables, maps, and other figures may vary

from actual values due to sampling and nonsampling errors. As a result, estimates in one category may not be significantly different from estimates assigned to a different category. Further information on the accuracy of the data is located at *www.census.gov /prod/cen2000/doc/sf3.pdf*. For further information on the computation and use of standard errors, contact the Decennial Statistical Studies Division at 301-763-4242.

For More Information

The Census 2000 Summary File 3 data are available from the American FactFinder on the Internet (*factfinder.census.gov*). They were released on a state-by-state basis during 2002. For information on confidentiality protection, nonsampling error, sampling error, and definitions, also see *www.census.gov/prod/cen2000 /doc/sf3.pdf* or contact the Customer Services Center at 301-763-INFO (4636).

Information on population and housing topics is presented in the Census 2000 Brief series, located on the Census Bureau's Web site at *www.census.gov/population/www /cen2000/briefs.html*. This series presents information on race, Hispanic origin, age, sex, household type, housing tenure, and social, economic, and housing characteristics, such as ancestry, income, and housing costs.

For additional information on language use and English-speaking ability, including reports and survey data, visit the Census Bureau's Internet site at *www.census.gov /population/www/socdemo /lang_use.html*. To find information about the availability of data products, including reports, CD-ROMs, and DVDs, call the Customer Services Center at 301-763-INFO (4636), or e-mail *webmaster@census.gov*.

Ivan Koloff

Real name: Oreal Perras

The "Russian Bear" who was really from Quebec. WWWF champion who ended Bruno Sammartino's 7+-year reign in 1971 with a kneedrop off the turnbuckle. Lost the belt three weeks later to Pedro Morales. Began wrestling in the early 1960s as Jim Parris and Red McNulty. Originally trained in Hamilton by **Jack Wentworth**.

Became Ivan Koloff in 1967 and the next year defeated Johnny Rougeau for the International title in Montreal. Initially billed as the nephew of Dan Koloff, a wrestler from the 1920s and 30s, just as Ivan would later be billed as the uncle of Nikita Koloff. Made his Maple Leaf Gardens debut in June 1968 and was wrestling main events three months later. Challenged Dory Funk Jr. for the NWA title in a Toronto main event in 1969. Went to the WWWF in 1970 and wrestled Sammartino for the title at Madison Square Garden. Won the belt the following year. Repeatedly challenged Verne Gagne for the AWA title in 1972. Had additional MSG main event matches against Sammartino in 1975.

Held the Indianapolis-based WWA world title in 1977 and won the Florida tag title four times that year, including one reign with Pat Patterson. Came back to main event at Madison Square Garden against Bob Backlund in 1978.

Improved his conditioning and physique considerably as a middle-aged wrestler.

After a successful stay in Georgia, wrestled for Jim Crockett's Mid-Atlantic promotion, winning the NWA World tag belts with Ray Stevens (1981), Don Kernodle (1984), and Nikita Koloff (1985). He was also announced as Rick Rude's replacement as Manny Fernandez's partner when Rude & Fernandez held the NWA tag title in 1987, but that was abandoned when Fernandez left the promotion.

Won the Toronto-based Canadian title in a 1984 tournament and dropped the belt a few weeks later in his final match at Maple Leaf Gardens.

Continued to wrestle for Crockett and WCW through the 1980s. Wrestled on independent shows into the 2000s. Lives in North Carolina.

"Koloff, a 6-1, 298 pounder, pinned the 265 pound Sammartino in mid-ring, to leave no doubt regarding his achievement. Referee Dick Kroll, a former NYU matman, counted out the victimized champion. The time was 14 minutes, 55 seconds. The end came with startling suddenness as Koloff hurdled off the top rope and hit Sammartino full force in the neck area. The defeat came amid Sammartino's 111th title defence in a Madison

Square Garden ring. *(From Scranton, PA newspaper, Jan. 19, 1971)*

"Morales, although 47 pounds lighter at 241, pinned Ivan Koloff, 288, Russia, in midring in 23 minutes and 18 seconds, Monday night to end the shortest reign of any titleholder in history, 21 days since Koloff surprised by conquering seven-year champion Bruno Sammartino in the same Madison Square Garden ring. The all-time record gathering of 21,812 paid $86,885." *(From Scranton, PA newspaper, Feb. 9, 1971)*

Prominent Titles:

- 2-time International champion (Montreal), 1968-69
- WWWF champion, 1971
- IWA World tag champion (Japan), with Mad Dog Vachon, 1973
- WWA World champion (Indiana), 1977
- 4-time NWA Florida tag champion, 1977
- 5-time NWA Georgia tag champion, with Ole Anderson, 1978-79
- 2-time NWA Georgia tag champion, with Alexi Smirnoff, 1980
- 4-time NWA World tag champion, 1981-86
- 3-time NWA Mid-Atlantic champion, 1981-84
- 2-time NWA Mid-Atlantic TV champion, 1981-82
- NWA Canadian champion (Toronto), 1984
- 2-time NWA 6-Man tag champion, 1984-88
- 2-time NWA U.S. tag champion, 1986-87
- WWC Puerto Rican champion, 1989

Early life

Perras was raised on a dairy farm in the rural community of Crysler, Ontario, Canada, along with his six brothers and three sisters.

Since first watching professional wrestling on TV at the age of eight, he wanted to become a wrestler, and would often wrestle with his brothers growing up. At age 18, he left high school and joined Jack Wentworth's wrestling school in Hamilton, Ontario, where he would lift weights and learn wrestling holds.

Professional wrestling career

Early career

Perras debuted as an Irish rogue heel character named Red McNulty, billed from Dublin, Ireland and wrestling with an eyepatch. For the next three years, he wrestled around the Toronto area, eventually

quitting his regular job to wrestle in the north-western area of Canada. There, Parris acquired much wrestling experience, and from there he made his first trip to Japan.

The Russian Bear

In 1967, Jim Perras became "The Russian Bear" Ivan Koloff, a bearded villainous character billed from Moscow, and debuted with the International Wrestling Association in Montreal, Québec. He defeated Johnny Rougeau for the IWA International Heavyweight Title the following year. Ivan Koloff debuted in the World Wide Wrestling Federation in 1970, managed by Capt. Lou Albano He soon started a feud with then-WWWF World Heavyweight Champion Bruno Sammartino. On January 18, 1971, "The Russian Bear" Ivan Koloff defeated Sammartino in Madison Square Garden for the WWWF World Heavyweight Championship by pinfall after a kneedrop from the top rope, ending Sammartino's seven and two-third years reign on top. Koloff lost the title only 21 days later to Pedro Morales, essentially being used as a "transitional" champion (as he was used to move the title from Sammartino to Morales without having the two faces work against each other), much like Stan Stasiak and the Iron Sheik would be in later years. After the loss, Koloff remained a contender for the title, but never reclaimed it, and left the WWWF in 1972.

During his time in the WWWF, Ivan Koloff wrestled WWWF title matches against Bruno Sammartino, Pedro Morales, Superstar Billy Graham and Bob Backlund, holding the distinction, with fellow villain Stan Stasiak, as one of only two men to challenge all four of these popular champions.

During the 1970s and 80s, Koloff found success in the NWA, winning many regional tag and singles titles in the Georgia, Florida, and Mid-Atlantic territories. In February 1981, he teamed with Ray Stevens to defeat Paul Jones and Masked Superstar and capture the NWA World Tag Team Championship. This would be the first of his four reigns as a World Tag Team champion, later winning the belts with Don Kernodle and twice with his "nephew" (kayfabe), Nikita Koloff as **The Russians**.

The Russians (which also included Krusher Kruschev) were a top heel stable from 1984 to 1986, and Nikita, under Perras' training and mentoring, and by association, became a hated heel in his own right, and would go on to have a successful singles career of his own. After Nikita turned face on Ivan to join their enemy Dusty Rhodes in 1986, Ivan teamed with Vladimir Petrov and Dick Murdoch to get revenge. Ivan Koloff's biggest NWA feuds were against Rhodes, the Road Warriors, the Rock 'n' Roll Express (Ricky Morton and Robert Gibson) and Magnum T.A..

Koloff spent time in Paul Jones' stable, the Paul Jones Army in 1988, where he was a "coach" of sorts for the Powers of Pain, The Barbarian and The Warlord. He later split with Jones, reunited with Nikita, and feuded with Jones' team, the Russian Assassins, before leaving Jim Crockett Promotions in January 1989. He also spent time in Eastern Championship Wrestling, appearing on the very first ECW card in 1992.

Retirement

Currently, Parris lives in Winterville, North Carolina with his wife, Renae and has four adult children. He remains active in various charities. He has written a book, titled *Is That Wrestling Fake? The Bare Facts*.

Parris became a born again Christian in 1995. He travels to churches to share his testimony.

Legacy

"The Russian Bear" was mentioned in the lyrics of the Ramones' song "The Crusher", from their final album, "Adios Amigos."

In the second season of the anime Code Geass, the name "Ivan Koloff" was spotted in episode 19, amongst the millions killed by the weapon F.L.E.I.J.A.

Ivan Koloff was mentiond in the lyrics of the song "The Chase" by RZA

Cleveland Bay
Sally Anne Thompson

century it was greatly admired as a British cavalry mount, and it became one of the most common draft and coach horses in Britain and the United States. It is now kept as a harness horse for ceremony or competition, and it is crossed with other breeds (most prominently, the Thoroughbred) to produce horses for hunting, driving, jumping, and the three-day event.

Cleveland Bay horses stand 16 to 17 hands (64 to 68 inches, or 163 to 173 cm) and weigh 1,400 to 1,500 pounds (635 to 680 kg). They are always a rich bay colour with black mane, legs, and tail. Stud books are kept by the British Cleveland Bay Horse Society (founded 1883) and the Cleveland Bay Horse Society of America (founded 1885).

Cleveland Heights, city, eastern residential suburb of Cleveland, Cuyahoga county, northeastern Ohio, U.S. Incorporated as a village in 1903, Cleveland Heights remained a wooded area until it became a city in 1921. It is zoned only for homes and retail businesses and has no industry. The city's Cain Park has an outdoor summer theatre in a natural amphitheatre setting. Pop. (1994 est.) 51,477.

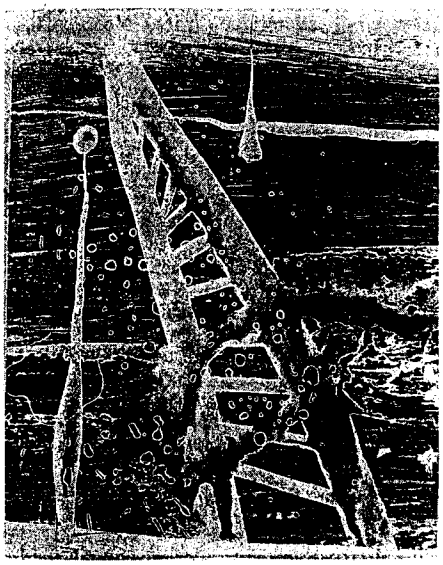
Cleveland Museum of Art, in Cleveland, major American museum that houses one of the United States' finest art collections. The museum's more than 45,000 art objects represent virtually all major cultures and periods. It holds items from ancient Egypt, Greece, and Rome; early and contemporary America; Europe, East Asia and the Middle East, India, and Africa, as well as pre-Columbian Mexico and Central America. It was incorporated in 1913 and opened in 1916. The Guelph treasure, 11th- and 12th-century sacred objects from Brunswick, Ger., was added to the museum's holdings in 1931. An addition to the building was opened in 1958, and an education wing with auditorium and lecture halls was opened in 1971.

Clianthus, genus of flowering shrubs of the pea family (Fabaceae). Its two species, *C. puniceus* and *C. formosus,* are native to New Zealand and Australia, respectively. They grow to 1–2 m (3–6 feet) tall and in the spring bear brilliant red flowers (whence the name, from Greek, *kleios,* "glory," and *anthos,* "flower"). The flowers, 7.5–10 cm (3–4 inches) or more long, are downward-turning with one standard, or upturned, petal. Leaves are pinnate, with one to two dozen short leaflets alternating along the stem.

C. puniceus, the parrot's bill, or red kowhai, grows outdoors in warm, dry climates and sandy, well-drained soils. It can be trained as a vine to grow on a wall or trellis. The shoots are pruned once flowering is over.

C. formosus, the glory pea, or Sturt's desert pea, is the floral emblem of South Australia. It does poorly away from its native semidesert environment. In less favourable climates it is grown in hanging baskets in sunny, well-ventilated greenhouses. Often it is grafted as a seedling onto the bladder senna (*Colutea arborescens*), a more vigorous shrub of the pea family. Its flowers are scarlet with large purple-black blotches at the base of the standard petal.

cliché-verre, also called GLASS PRINT, print made by placing photographic paper beneath a glass plate on which a design has been scratched through a coating of an opaque substance and then exposing it to light. The fluid lines possible with *cliché-verre* prints are reminiscent of etched lines.



"Monuments," gelatin-silver *cliché-verre* print by Gyorgy Kepes, 1939
The Museum of Modern Art, New York City, gift of the photographer; copy print © 1996 The Museum of Modern Art, New York City

The technique was popular in the 1850s with such French artists as Camille Corot, Jean-François Millet, Théodore Rousseau, and Eugène Delacroix. The most prominent 20th-century exponent of *cliché-verre* was the Hungarian-American designer Gyorgy Kepes, who carried out many innovations in the medium, such as painting the glass with mutually repellent substances to achieve infinitely variable effects.

Clichy, in full CLICHY-LA-GARENNE, northern industrial suburb of Paris, France, Hauts-de-Seine *département,* Paris *région.* It is served by a subway line from the Porte de Clichy, by an arterial highway surrounding Paris, and by suburban train service. The Beaujon Hospital, one of the largest and most modern in the Paris region, is located in the town. The Church of Saint-Vincent-de-Paul, built when the saint was village priest at Clichy (1612–25), is on the boulevard Jean-Jaurès. The suburb's manufactures include mechanical, electrical, and chemical products. Pop. (1990) 48,204.

click, in phonetics, a suction sound made in the mouth. Click sounds occur in a number of African languages and are often used as interjections in other languages—*e.g.,* the sound of disapproval represented in English by *tsk, tsk.* That sound is an example of a dental click; to make it, the back of the tongue contacts the soft palate and the sides and tip of the tongue touch the teeth. The click noise occurs when the tip of the tongue is lowered. Other click sounds differ in the positions of the tip and blade of the tongue and in the manner of the release of air into the mouth cavity.

Clicks are a regular part of the consonant system in the Nguni languages of southern Africa, which include Zulu and Xhosa; these languages have dental clicks as described above, lateral clicks (like the clucking sound made to horses), and alveolar clicks, in which the tip of the tongue is on the ridge behind the upper

FOREWORD

AN AUTHORITATIVE AND SERIOUS REFERENCE WORK, the Oxford *Atlas of the World* is one of the finest atlases available anywhere in the world. The atlas incorporates computer-derived maps which have been produced using the very latest in digital cartographic techniques.

The Oxford *Atlas of the World* has been devised with the help of a panel of specialist geography consultants from the United Kingdom and the United States, whose specialties range from the history of cartography, urban and social geography, epidemiology, and the European Union to biogeography and applied geomorphology. The result of their valuable input can be seen in the wealth of maps and data contained in the "*World Geography*" section of this atlas.

Country names are shown in conventional English form and are those that are in common usage. They are the forms used by publications such as *Newsweek* and *The Washington Post*, and by the BBC and the British Foreign Office. Alternative country names appear in brackets on the maps where space permits – for example, Burma (Myanmar) – and are cross-referenced in the index, for example, Côte d'Ivoire = Ivory Coast.

HOW TO USE THE ATLAS

The atlas is divided into a number of sections which are explained below.

WORLD STATISTICS AND IMAGES OF EARTH

World statistics on topics such as area and population for every country in the world, and physical dimensions – including the largest islands, lakes and seas, the highest mountains and the longest rivers, by continent. Also included in this section is a listing of the world's largest cities by population, arranged in country alphabetical order. This section is followed by a beautifully illustrated satellite section showing 16 of the world's major regions and cities in the Americas, Europe, Africa, Asia, and Australasia.

GAZETTEER OF NATIONS

A comprehensive A–Z reference providing concise profiles of every country's geography, climate, history, politics, and economy, together with ready-reference tables, and illustrated with flags and locator maps.

WORLD GEOGRAPHY

A richly informative section comprising 48 pages of maps, charts, graphs, and diagrams that explain key themes about the world in which we live. The topics covered include the Solar System, oceans, climate, the natural world, energy, and trade. Explanatory text on each spread describes the patterns shown by the data.

CITY MAPS

A detailed selection of maps for 69 urban areas around the world. These are useful for planning trips abroad as well as for comparative studies of cities worldwide.

WORLD MAPS

An outstanding collection of 179 pages of distinctive Philip's cartography. The highly acclaimed physical world maps combine relief shading with layer-colored contours to give a striking visual picture of the Earth's surface. Roads, railroads, canals, and airports are accurately depicted on the maps, and towns and cities are clearly marked. More information on the key features employed in the construction and presentation of the maps is given on the facing page.

GEOGRAPHICAL GLOSSARY, REGIONS IN THE NEWS, AND INDEX

The 83,000-name index to the world maps includes geographical features as well as towns and cities, with both latitude/longitude and letter/figure grid references. Preceding the index is a list of geographical terms from various foreign languages that may be found in the place names on the maps and also in the index, together with their meanings. Finally, completing the Atlas is a selection of detailed, up-to-date maps highlighting regions around the world that are currently in the news, such as Iraq, the Near East, Sudan, Kashmir, and Afghanistan.

SPECIALIST GEOGRAPHY CONSULTANTS

THE EDITORS are grateful to the following for acting as specialist geography consultants on the '*World Geography*' front section:
Professor D. Brunsden Kings College, University of London, UK
Dr C. Clarke Oxford University, UK
Professor P. Haggett University of Bristol, UK
Professor M-L. Hsu University of Minnesota, Minnesota, USA
Professor K. McLachlan School of Oriental and African Studies, University of London, UK
Professor M. Monmonier Syracuse University, New York, USA
Professor M. J. Tooley University of St Andrews, UK
Dr T. Unwin Royal Holloway, University of London, UK

THE EDITORS would also like to thank
Dr Dibyesh Anand
John Burden
Peter Grego
Keith Lye
Garrett Nagle
Ross Reynolds
Robin Scagell

Description: The Getty Research Institute is an operating program of the J. Paul Getty Trust. Its goals are to promote innovative scholarship in the arts and humanities, to bridge traditional academic boundaries, and to provide a unique environment for research, critical inquiry, and debate. Integral to its interdisciplinary approach is the concept that visual arts and artifacts should be assessed within the broad historical and cultural contexts in which they were created. The Institute's Research Library - accessible to both on-site and remote users - supports scholars and researchers around the world.

sory structures in these animals also can be influenced by temperature, but their primary functions appear to be chemoreceptive or mechanoreceptive.

THERMORECEPTORS IN VERTEBRATES

Fish. Many species of modern bony fish (teleosts) are sensitive to very small changes of temperature of the water in which they live. Various marine teleosts, such as the cod (*Gadus gadus*), have been trained to swim half out of water up a long sloping trough in response to changes of as little as 0.03° to 0.07° C (0.05° to 0.13° F) in the temperature of the water flowing over them.

More detailed conditioning experiments with freshwater fish show that they can distinguish warm from cold, discrimination being made on the basis of thermal change rather than on absolute temperature. Temperature sensitivity persists in these animals when the nerve supplying the lateral line (see *Mechanoreception* above) is cut but is abolished after transection of the spinal cord. When freshwater fish are trained to seek food in response to a change in water temperature, they are found to discriminate differences of less than 0.1° C (0.2° F). Goldfish (*Carassius*) have been trained to discriminate between warm and cold metal rods that have been placed in their tanks. Consistent responses are obtained only when the rod is at least 2° C (3.5° F) colder or warmer than the water. Practically the whole surface of the fish, including the fins, is found to be thermosensitive.

Temperature discrimination in goldfish

This mode of temperature discrimination need not be ascribed to the function of specific thermoreceptors; it could depend on skin receptors that are sensitive to combined mechanical and thermal stimulation. Indeed, electrophysiological recordings from nerve fibres originating in the skin of fish support the latter view. Changes in the electrical activity of these fibres are elicited only when the skin is touched by some solid object; yet the frequency of this mechanically elicited neural discharge is heavily influenced by the temperature of the object used in touching the fish.

From *Journal of Physiology* (1956)

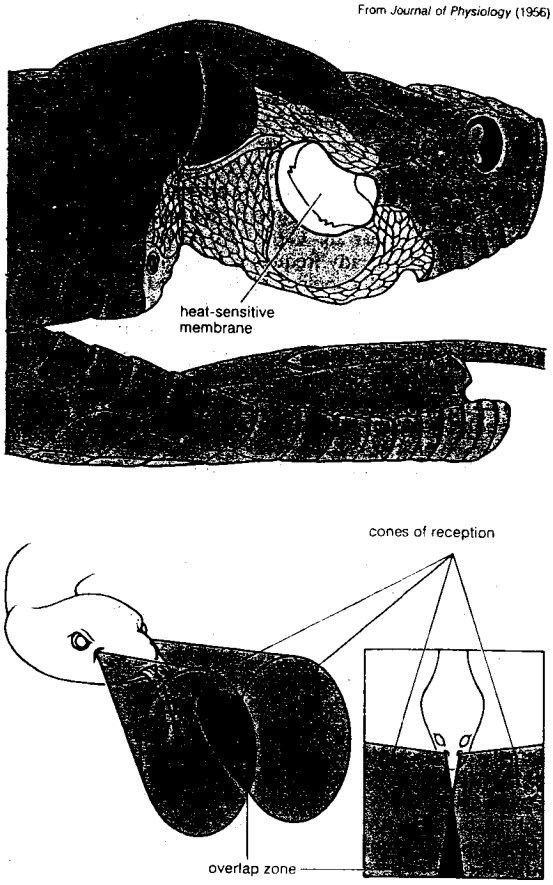

Figure 6: (Top) Partially dissected head of rattlesnake showing heat-sensitive membrane inside pit organ. (Bottom) Cones of reception, directions from which heat energy can be detected (see text).

Elasmobranchs, such as rays and sharks, have distinctive sense organs, called ampullae of Lorenzini, that are highly sensitive to cooling. These organs consist of small capsules within the animal's head that have canals ending at the skin surface. The capsules and their canals are filled with a jellylike substance, sensory-receptor cells being situated within each capsule. Recordings of impulses from single nerve fibres supplying the ampullae of Lorenzini in rays (*Raja*) and dogfish (*Scyliorhinus*) reveal steady activity of the receptors at constant temperatures between 0° and 30° C (32° and 86° F), the average frequency maximum appearing near 19° C (66° F). Rapid cooling causes transient overshooting of the stabilized discharge frequency, while rapid warming produces transient inhibition of the impulses. In some single fibres, cooling by 3° C (5.5° F) leads the frequency to overshoot by about 100 impulses per second. It remains an open question, however, whether the ampullae of Lorenzini are to be called specific thermoreceptors, since they also respond to mechanical stimuli and to weak electrical currents.

Amphibians and reptiles. Rattlesnakes (*Crot alus*) and related species of pit vipers (Viperidae) have a pair of facial pits (Figure 6), sense organs on the head below and in front of the eyes, which are most sensitive thermoreceptors indeed. The pit organs act as directional distance receptors and make it possible for the reptile to strike at warm prey even when the snake's eyes and nose are covered and its tongue has been cut off. Each pit is a cavity about five millimetres deep, equally as wide at the bottom, and narrowing toward the opening at the surface of the head. Inside and separated from the bottom by a narrow air space is a densely innervated membrane of about 10 microns thickness stretching between the walls of the pit. A direct connection between the air space beneath the membrane and the open air maintains equal pressure on both sides of the membrane. Warm-sensitive receptors distributed over the membrane consist of treelike structures of uninsulated (unmyelinated) nerve fibres. Infrared radiation (heat energy) reaches the membrane from an external source through the narrow opening of the pit, permitting the snake not only to detect heat but also to localize coarsely the position of the stimulus. The fields of direction (cones of reception) from which each pit can receive infrared radiation from the environment extend to the front and sides of the head, with a narrow zone of overlap in the middle, as shown in Figure 6.

Under resting conditions, there is an irregular, steady discharge of nerve impulses from the pit organ. Rapid warming by as little as 0.002° C (0.004° F) at the nerve endings elicits a significant increase in impulse frequency; cooling produces an inhibition of the resting discharge. In contrast to the warmth receptors in mammals, the reptile's pit receptors are practically insensitive to steady temperatures, despite their high sensitivity to rate of thermal change. The distinctive consequence in the snake's adaptive behaviour is that gradual variations in air temperature tend to occur without detection, only the more rapid changes in infrared radiation being discriminated. Sensitivity to rapid temperature changes is enhanced by the very limited heat capacity of the receptive membrane (since it is so thin). When an animal that is 10° C (18° F) warmer than the environmental background appears for half a second at a distance of 40 centimetres (about 16 inches) in front of the snake, the heat energy radiated is enough to elevate significantly the frequency of receptor discharge in the pit organ. Indeed, behavioral experiments show that under these conditions the snake is able to discover warm prey through the victim's infrared radiations.

As poikilotherms, reptiles have practically no internal neural or metabolic mechanisms for maintaining their body temperature within physiologically safe limits. Nevertheless, such reptiles as snakes and lizards are able to keep their body temperature near these safe levels through behavioral regulation (*i.e.*, by moving to cooler or warmer places as necessary). The body temperatures of two samples of lizards (*Sceloporus magister* and *Cnemidophorus tesselatus*), for example, were found to be 34.9° ± 0.6°

*Anniellidae: the Californias
Xenosauridae: southeastern China, Central America
Helodermatidae: North America
Varanidae: Africa, southern Asia, Australia
Lanthonotidae: North Borneo

Serpentes

Snakes (**Figs. 5** and **6**) are basically specialized, limbless lizards which probably evolved from burrowing forms but have now returned from subterranean habitats to occupy terrestrial, arboreal, and aquatic situations. In addition to those features already mentioned as distinguishing the snakes from lizards, the following characteristics are typical of all serpents. There is no temporal arch so that the lower jaw and quadrate are very loosely attached to the skull. This gives the jaw even greater motility than is the case in lizards. The body is elongate with 100–200 or more vertebrae, and the internal organs are elongate and reduced. A spectacle covers the eye, and there is no tail autotomy. In most features of their biology, serpents resemble lizards; the two groups are closely related.

The largest living snake is the Indian python (*Python reticulatus*), which reaches 30 ft (9 m) in length and a weight of 250 lb (113 kg). The largest venomous snake is the king cobra (*Ophiophagus hannah*) of southern Asia, which is known to attain a length of 18 ft (5.5 m). A number of small tropical burrowing snakes are vastly smaller by comparison, being about 5 in. (12.5 cm) in length when fully grown. The longevity of snakes is not well known, but one captive cobra lived 28 years and many of the larger snakes probably live at least 25 years.

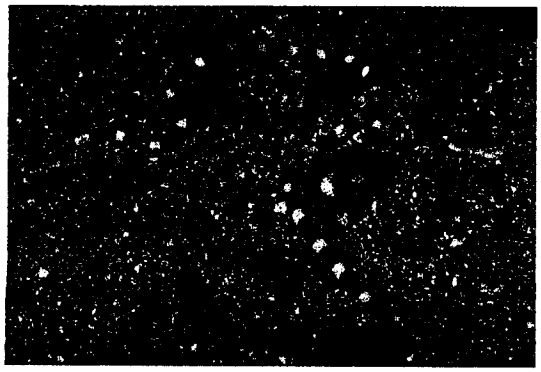

Fig. 5. Western coral snake (*Micruroides euryxanthus*). (*Photo by NPS/Tonto National Monument, Arizona*)

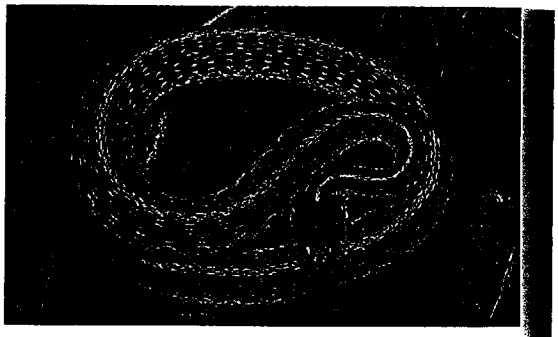

Fig. 6. Eastern ribbon snake (*Thamnophis sauritus*). (*Photo by NPS/Little River Canyon National Preserve, Alabama*)

Physiology. The senses of snakes are fundamentally similar to those of lizards. Great dependence is placed upon olfaction and the Jacobson's organs. The tongue of all snakes is elongate and deeply bifurcated. When not in use it can be retracted into a sheath located just anterior to the glottis, but it is protrusible and is constantly being projected to pick up samples for the organs of Jacobson from the surrounding environment. Snakes are deaf to airborne sounds and receive auditory stimuli only through the substratum via the bones of the head. The eyes are greatly modified from those in lizards, and there is no color vision. Some groups are totally blind and have vestigial eyes covered by scales or skin.

Thermoreception. Specialized thermoreceptors, not found in any other vertebrates, are present in many boas and pythons (family Boidae, and in all pit vipers) (subfamily Crotalinae). In the boids, these receptors form a series of depressions in the lip scales and are called labial pits. In the crotalids, there is a single large loreal pit located about midway between the eye and nostril and somewhat below them on the side of the head. These organs are sensitive to temperature differences of about 2°F (1.1°C) and are apparently used to locate prey whose temperature may be higher or lower than that of the surrounding environment.

Locomotion. Four basic patterns of locomotion are found in snakes, and several may be used by a particular individual at different times. The most familiar type is serpentine curvilinear (lateral undulatory). In this pattern, the snake moves forward by throwing out lateral undulations of the body and pushing them against any irregularity in the surface. Snakes using rectilinear locomotion move forward in a straight line, without any lateral undulations, by producing wavelike movements in the belly plates. Laterolinear locomotion, or sidewinding, is used primarily on smooth or yielding surfaces and is very complex. In essence, the snake anchors a portion of the body in the substratum and lifts the rest out laterally to a new

INTRODUCTION

In this book I have set out to describe and explain, in a readable way, the lives of snakes. In doing so, I hope that it will introduce the reader to the same sense of fascination and wonderment that I have felt when watching and studying them, whether in the field or in captivity.

The information has been obtained in a number of ways. Although I have drawn on personal experiences where I felt it appropriate, a book of this type is not the place for original observations. Rather, it is a means of communicating information that numerous professional and amateur herpetologists have accumulated over the years. Many such observations have appeared in scientific journals and society publications that are not widely read by the general public and so the information they contain is often overlooked; I have attempted to extract those pieces of knowledge that are most likely to be of interest to amateur herpetologists, as well as to general naturalists who may wish to know more about snakes. In doing so, I acknowledge the massive contribution that has been made by innumerable researchers and writers upon whose efforts I have relied and whose findings I have plundered. I have given references in places, but only where a specific piece of information has been used or where I have drawn heavily from major review articles. I feel that the insertion of too many references disrupts the text to an unacceptable degree and often serves no useful purpose in a book of this type.

Some of the material consists of interesting 'snippets' relating to some of the more unusual or spectacular species or to their behaviour. Most of it, though, concerns underlying principles and generalisations that apply to all snakes, bearing in mind that it is not always possible to give simple, hard-and-fast rules about how snakes live; this reflects their diversity as well as the lack of knowledge about certain aspects of their lives.

Throughout the book, I have tried to adopt an evolutionary approach. Snakes have been moulded by natural selection.

The array of shapes, sizes, colours and behaviour patterns that we see are the end products of this process and I believe that it is not possible to produce an account of them without continual reference to evolutionary forces and pressures; understanding these allows us to answer many of the questions about why snakes look and behave the way they do. I apologise in advance if some of

▲ The horns over the eyes of the North African desert horned viper, *Cerastes cerastes*, are modified scales. Their function is uncertain but some other desert vipers also have horns or raised scales over their eyes.

◀ Hognose snakes, of which this is the southern species, *Heterodon simus*, have a modified rostral scale that they use for digging.

are rare because the material is brittle and the tip, including the button, is usually broken off, leaving only the most recently formed rings. The purpose of the rattle is discussed in Chapter 6.

Types of scales

Snakes' scales are not all of the same type. There is variation between species and between different parts of the same species. In some families of snakes, notably the colubrids and elapids, large plate-like scales cover the head and these are arranged in a more or less consistent pattern and are easily identifiable. They are therefore of value in helping to identify species.

These head scales are given names by which they can be recognized. The diagram shows the position of these for a typical example. One of the most conspicuous is the rostral scale; this is a single large scale positioned on the end of the snout and in many species it is enlarged or modified to provide a tool for burrowing, as in the shovel-nosed snakes, *Chionactis*, and the hognose snakes, *Heterodon*. Other specialised scales found on the head of snakes include the horns over the eyes of some species. These may comprise a single, thorn-like scale as in the African desert horned viper, *Cerastes cerastes*, and the horned adder, *Bitis caudalis*, a cluster of pointed scales as in the many-horned adder, *Bitis cornuta*, and the eyelash viper, *Bothriechis schlegelii*, or they may be formed from a single raised scale, as in the American sidewinder, *Crotalus cerastes*, or a group of them, as in *Pseudocerastes*, from the Middle East.

Other species, most notably the rhinoceros viper, *Bitis nasicornis*, have a cluster of enlarged, pointed scales on their snouts, while in other species, the snout is extended into an upturned rostral appendage, or nose horn comprising numerous small scales over a bony or fleshy protuberance; this feature is especially frequent among, but not restricted to, the vipers, notably the European nose-horned viper, *Vipera ammodytes*, and its relatives. The fishing snake, *Erpeton tentaculatum*, of Southeast Asia is unique in possessing a pair of 'tentacles' attached to the end of its snout. For many years these were thought to perform as lures since the snake is aquatic and feeds exclusively on fish. It has since been shown, however, that the structures could not be wriggled about in the way that would be necessary for a successful lure. Neither can they be used as organs of touch as they have no nerve endings.

▶ The arrangement of the scales on the heads of snakes tends to be fairly constant within species and can be used as an aid to identification.

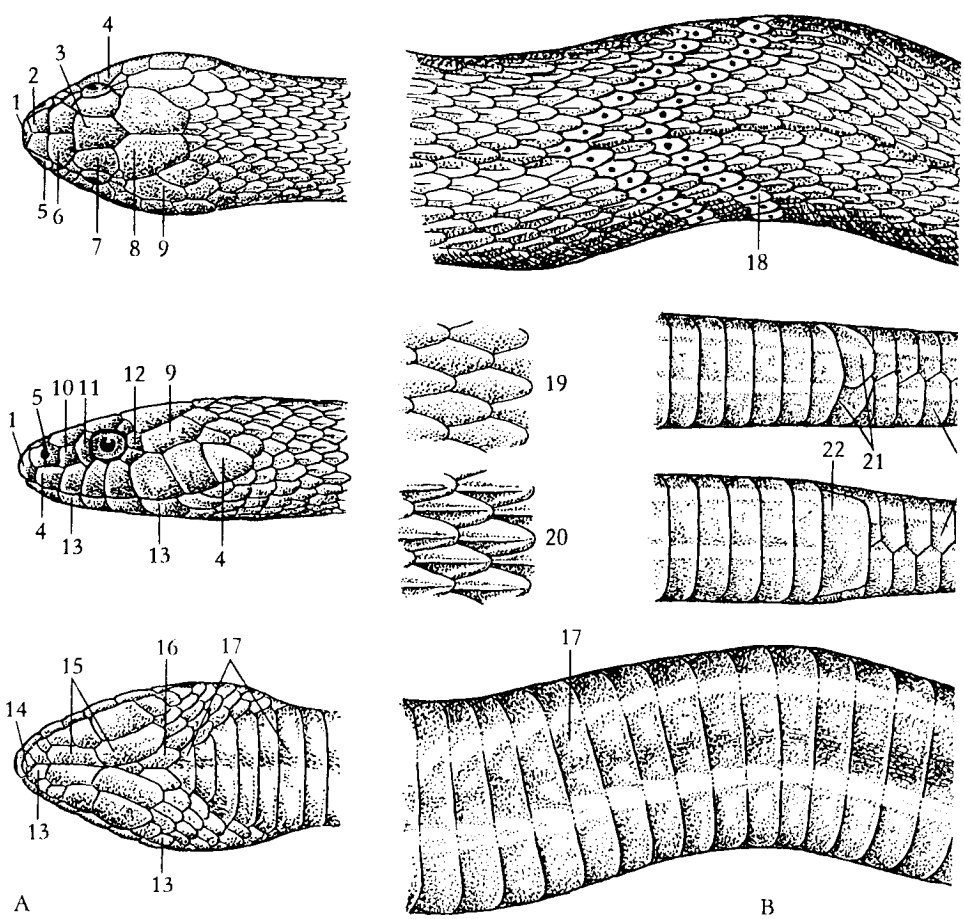
We need think only of those groups of lizards which, because of their similarity to snakes are still today misjudged by the layman and which have even been wrongly classified by scholars at certain periods in the history of herpetology. Notwithstanding these reservations, all easily recognised external characters still play an important part today in the classification of snakes.

It is obvious that a comparison of general body-form in a relatively unimorphous group of animals will not yield many points of reference. It soon became necessary to look at closer details. In its scalation, the body of the snake provides just such a useful feature, and one which can be studied without requiring any specialized equipment or preparation. Pholidosis, the arrangement of the scales, their number and description provides an extremely useful recognition character for systematic work. The pattern of the scales of the head is particularly important. They represent a characteristic feature of certai groups, and from them it is quite ofte to make a rapid classification of the sp question. In addition, the scalation of provides useful information. It is frequ sible to distinguish easily between close groups and species by variations in th of rows of scales across the back or by number of ventral shields. And the r shields on the underside of the tail of as a useful means of distinguishing the general, males have a longer tail tha and therefore a greater number of scales.

The high esteem in which the study tion was held at one time among her also affected their method of preparing They sometimes considered that the was adequate for their purposes and could dispense with the entire body of



A Diagram of head plates of a snake.
The head scales are often a rapid and reliable guide to the identification of a snake.
B Diagram for counting dorsal scales of a snake in oblique transverse series. Studying the number and arrangement of scales (pholidosis) is an essential feature of work on the taxonomy of snakes. Not only are the oblique rows of dorsal scales counted but also the longitudinal rows of those scales, the number or ventral plates and the subcaudal plates.

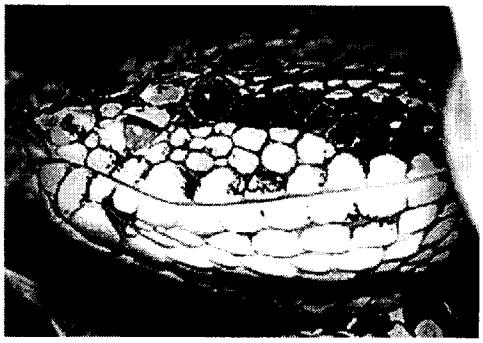
Loreal pit

From Wikipedia, the free encyclopedia

The **Loreal pit** is the deep depression, or fossa, in the loreal area on either side of the head in crotaline snakes (pitvipers). It is located behind the nostril and in front of the eye, but below the line that runs between the centers of each. It is the external opening to an extremely sensitive infrared detecting organ. The loreal pit is bordered by lacunal scales.[1]



Bothriechis nigroviridis

Rattlesnakes

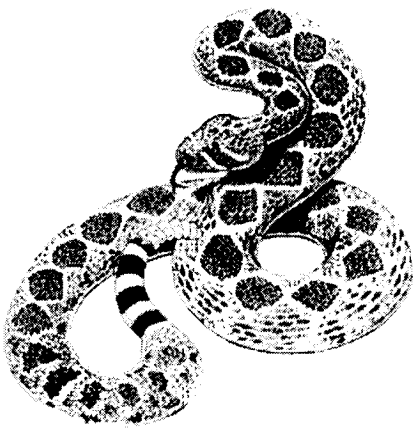
Craig Ivanyi

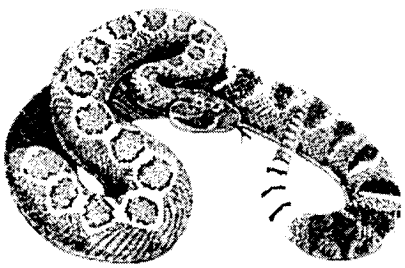
Almost everyone is fascinated by rattlesnakes. The fascination is most often caused by fear of these animals, which are legendarily perceived to be aggressive and deadly. Although their threat to humans is grossly exaggerated, these snakes are fascinating for another compelling reason: rattlesnakes are among the most highly specialized organisms on the planet.

Their venom—in fact a toxic saliva—is among the most complex substances known: a mixture of enzymes unique to pit vipers that destroys blood or paralyzes nerves. And the delivery system is equally amazing—the snakes' fangs are movable hypodermic syringes. Rattlesnakes are also among the few animal groups with dual visual systems. In addition to their eyes, they have sensory organs in their upper jaws which can actually "see"infrared images. They can detect the heat from a candle flame 30 feet (9 m) away. These animals merit admiration more than fear.



Western diamondback

While other areas have larger rattlesnakes, the Sonoran Desert region is blessed (no, that isn't a misprint) with more species of rattlesnakes than is any other region in the world—and many of them will bite large beasts like us if we are perceived to be a threat. Rather than seeking to eradicate these animals, we have more to gain by finding ways for all of us to coexist. Why? Because these animals are the natural predators of a suite of other animals (e.g., mice and rats) that can cause plant damage, carry diseases, and so on. Besides, trying to kill rattlesnakes actually puts us at greater risk than does leaving them alone.



Mohave rattlesnake

Knowledge of "who" these creatures are—that is, what they do for a living, where they live and when they are active—will help us coexist without harm to either snakes or humans.

Most rattlesnakes avoid contact with humans. They tend to avoid wide open spaces that offer little protection from predators, so they usually spend their time in and under low-growing shrubs, natural and artificial debris, rocks and the like.

They are most active in the warmer times of the year—spring through early fall—and many of them are nocturnal during the summer months. When favorable temperatures occur, many rattlesnakes are marginally active even during the winter. You are most likely to see them when the air temperature is between 70° and 90°F (21° to 32°C), regardless of the time of day—be it June or January.

Venom

Rattlesnakes may be among nature's best examples of efficiency and econ-omy of motion. The use of venom to capture prey conserves considerable energy that would otherwise be needed to capture and subdue an animal.

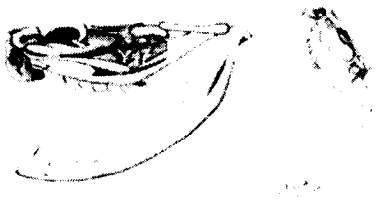
Rattlesnakes have very long, curved fangs that lie parallel to the jaw line when not in use. When rattlesnakes strike, the fangs are rotated by muscular contraction to an erect position, somewhat perpendicular to the jaw line. The fangs are hollow, which allows the snake to inject venom through the tooth into its victim. Each fang is connected to a venom gland (located toward the back of the head on the upper side) by a venom duct. Baby rattlesnakes (born live from mid-summer to early autumn) arrive fully equipped with teeth and toxins!

Rattlesnake venom functions primarily to help the animals feed, facilitating capture and partial

digestion of prey. It is not believed to have originated as a defensive weapon to avoid predation or molestation (though it can be very effective in this regard).

Approximately 20 percent of defensive strikes are "dry;" that is, no venom is injected. This has led to the common belief that rattlesnakes can "choose" not to envenomate, although it is unknown why rattlesnakes elect to control venom injection in this defensive context.

Snake venoms are extremely complex; there is no "standard" rattlesnake venom. They consist of combinations of proteins that range from hemotoxins, which break down cells and tissues, to anticoagulants and neurotoxins that may cause circulatory arrest or respiratory paralysis.

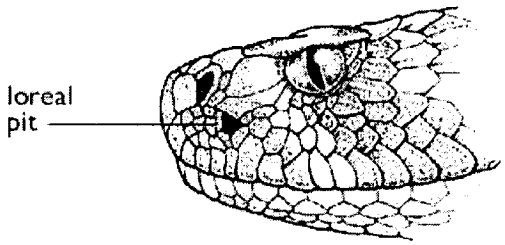


Rattlesnake skull showing fang position when mouth is closed (left) and during strike (right).

Heat Vision

Rattlesnakes and other pit vipers have remarkable heat-sensing pits. Located behind each nostril, below a straight line that would directly connect the nostril to the eye, is a loreal pit (called this because it is a depression in the loreal scale). These pits are highly effective in detecting differences in temperature even several yards away. At short ranges within a foot or so, minute differences (of perhaps fractions of a degree) may be perceived.

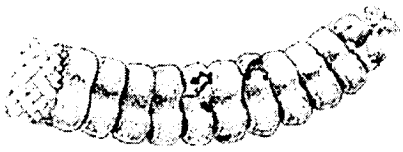
Heat given off by an animal creates a heat image; therefore, rattlesnakes have "heat vision." The heat images are integrated with visual ones in the brain. This type of vision is helpful for nocturnal predators, for it enables them to hunt effectively even in total darkness. It may also help distinguish predator from prey, allowing rattlesnakes to determine whether they are at risk themselves. Larger, non-prey animals give off larger heat images, signaling the snakes to avoid potential encounters with these animals.



If It Rattles . . .

The best way to distinguish rattlesnakes from other kinds of snakes is by the rattle. Most other characteristics are either too subjective or inconsistent, or else they require one to get too close to the animal for safety. Even at birth, rattlesnakes have the first segment of a rattle, which is called a "prebutton."The prebutton is lost the first time the snake sheds its skin and is replaced by a button. Each shedding episode that follows adds another segment to the rattle, and rattlesnakes may shed one to four or more times each year. Only when there is more than one segment can the rattle produce sound. There isn't anything inside the rattle; the various segments merely bump against each other to produce the sound. The tremendous amount of sound produced results from movement of the rattle back and forth 60 or more times per second!

The rattle is composed of fibrous protein called keratin—as are your fingernails—and segments can easily break off. Because segments are added at various rates, and because they break off, it is not possible to tell a snake's age by counting the segments.



In addition to the change in structure from small scales to large rattle segments, rattlesnake tails look stumpy, almost as though their tips had been snipped off. Other snakes have tails that come to smooth tapering points, much like pencil points.

Motherly Love

Few reptiles exhibit parental care of their young. However, there are notable exceptions —mother American alligators may watch over their young for periods of up to four years. Without evidence to the contrary, scientists take a conservative approach and assume that parental care is absent in most reptiles.

Sometimes scientists may make premature judgments based on incomplete information. For years it was assumed that rattlesnakes do not care for their young after birth. Yet, Dr. Harry Greene of the University of California, Berkeley, has found that female black-tailed rattlesnakes stay with their young until they complete their first shed, about a week's time. Similar observations have been made

by herpetologist Hugh McCrystal with other species of rattlesnakes such as the rock rattlesnake. In the future, we may find that most rattlesnake species exhibit parental care.

L'ORÉAL FROM1909 TO 2009

INTERVIEW WITH SIR LINDSAY OWEN-JONES, CHAIRMAN OF L'ORÉAL

THE CAREER

Lindsay Owen-Jones was born on 17th March 1946 in Great Britain. He earned a Bachelor of Arts Degree at Oxford University and an MBA at INSEAD (European Institute of Business Administration).

After joining L'Oréal in 1969, he pursued an international career with the company. He began as a Product Manager, and was quickly offered a position in Belgium. In 1974 he returned to France where he became the Marketing Director of the Consumer Products Division in 1976.

In 1978, Sir Lindsay Owen-Jones took over as General Manager of L'Oréal's Italian subsidiary where he orchestrated a remarkable financial recovery and converted the business into one of Europe's most dynamic companies.

In 1981, he was named Chairman and CEO of Cosmair Inc, which at that time was L'Oréal's exclusive agent in the United States. He spearheaded the American company's expansion and established its leadership in several branches of the cosmetic industry including make-up and hair colour.

In January 1984, he returned to L'Oréal headquarters in Paris as Executive Vice President, Vice Chairman of the Executive Committee and Member of the Board of Directors.

In 1988, Lindsay Owen-Jones was appointed President and Chief Executive Officer of L'Oréal. He was 42 years old

Since April 2006, Lindsay Owen-Jones has served as Chairman of the Board for L'Oréal and since

Mark: L'OREAL PARIS

L'ORÉAL S.A. and L'ORÉAL USA, INC., Opposer, v. ROBERT VICTOR MARCON, Applicant.	Opposition No. 91184456

OPPOSER'S FIRST SET OF REQUESTS FOR ADMISSIONS

Pursuant to Rule 36 of the Federal Rules of Civil Procedure and 37 C.F.R. 2.120, Opposer L'Oréal S.A. and L'Oréal USA, Inc. (collectively, "L'Oréal" or "Opposer") hereby requests that Applicant Robert Victor Marcon ("Marcon" or "Applicant") respond to the following requests for admissions by serving written responses on the offices of Paul, Hastings, Janofsky & Walker LLP, 75 East 55th Street, New York, NY 10022, within thirty (30) days from the date of service. These requests are continuing and impose upon Applicant the obligations stated in Fed. R. Civ. P. 26, including Applicant's obligation to correct and supplement its responses in a timely manner if Applicant learns that any response is incorrect or incomplete.

For the convenience of the Board and the parties, Opposer requests that each request be quoted in full immediately preceding the response.

DEFINITIONS AND INSTRUCTIONS

1. The terms "Applicant" and "you" refer to Robert Victor Marcon, and Marcon's partners, joint venturers, agents, attorneys, successors-in-interest, predecessors-in-interest, employees and any others acting on behalf of Marcon or over whom Marcon has control.

2. The term "Opposer" or "L'Oréal" shall mean, except where otherwise stated, Opposer L'Oréal S.A. and L'Oréal USA, Inc., L'Oréal S.A.'s and L'Oréal USA, Inc.'s parents, subsidiaries, partners, joint venturers, affiliates, agents, attorneys, successors-in-interest, predecessors-in-interest, employees and any others acting on behalf of L'Oréal S.A. and/or L'Oréal USA, Inc., or over whom L'Oréal S.A. and/or L'Oréal USA, Inc. have control.

3. The term "Applicant's Mark" shall mean the L'ORÉAL PARIS mark that is the subject of U.S. Application Serial No. 76/596,736, and that is the subject of this Opposition proceeding.

4. The term "Applicant's Marks" shall mean any and all marks for which the Applicant has filed applications before the U.S. Patent and Trademark Office, regardless of whether those applications are currently pending, have been registered, or have been abandoned.

5. The term "Opposer's L'ORÉAL PARIS Mark" shall mean L'Oréal's rights in the mark L'ORÉAL PARIS, whether at common law or registered.

6. The term "Opposer's L'ORÉAL Mark" shall mean L'Oréal's rights in the mark L'ORÉAL, including as the subject of U.S. Registration Nos. 661,746 and 540,541, as well as common law rights.

7. The term "document" shall mean, without limitation, every writing or record of every type and description that is or has been in the possession, control or custody of Applicant or of which Applicant has knowledge, whether handwritten, photocopied, telecopied, printed,

electronic or in any other media, including without limitation: correspondence, including e-mail correspondence, invoices, contracts, purchase orders, memoranda, tapes, stenographic or handwritten notes, studies, publications, books, pamphlets, pictures, films, voice recordings, artwork, sketches, drawings, labels, maps, graphs, reports, surveys, minutes, or statistical compilations; every copy of such writing or record where the original is not in the possession, custody or control of Applicant and every copy of every such writing or record where such copy is not an identical copy of an original or where such copy contains any commentary or notation whatsoever that does not appear on the original.

8. The term "date" means the exact day, month and year, if ascertainable; if not ascertainable, the closest approximation that can be made by means of relationship to other events or matters.

9. The term "and" as well as "or" shall be construed both disjunctively and conjunctively, as necessary, to bring within the scope of this request those documents which might otherwise be construed to be outside its scope.

10. Wherever a singular form appears, it also shall be construed as plural, and vice versa, as necessary, to bring within the scope of this request all documents or responses which might otherwise be construed to be outside its scope.

11. The terms "concerning" or "regarding" means reflecting, referring to, incorporating, comprising, touching upon, indicating, evidencing, affirming, denying, or relevant to, in addition to its other customary and usual meaning, and includes, but is not limited to, discussing, constituting, pertaining to, describing, evidencing, identifying, touching upon and/or summarizing.

12. As used herein, "identify" or to "state the identity of" means:

(a) In the case of a person who is an individual: to state the full name, present or last known residence or address (designating which) and present or last known position or business affiliation (designating which); job title; employment address; business and residence telephone numbers of each individual;

(b) In the case of a company, partnership, corporation, proprietorship, association, or other organization or entity, to state: the full name and present or last known address and telephone number; the legal form of such entity or organization; if incorporated; the identity of the person or persons having knowledge of the matter with respect to which the company is named; and the identity of its chief executive officer;

(c) In the case of an act or omission, to state: a description of that act or omission; when it occurred; where it occurred; the identity of the person or persons performing said act (or in the case of an omission, the identity of the person or persons failing to act); the identity of all persons who have knowledge, information or belief about the act or omission; when the act or omission first became known; and the circumstances and manner in which such knowledge was first obtained;

(d) In the case of an oral communication, to state: the date, subject matter, communicator, communicatee, nature of communication, whether it was recorded, and the identity of any witness thereto;

(e) In the case of a document, to state: the identity of the person or persons who prepared it, the sender and recipient, if any; the title or a description of the general nature of its subject; the date of preparation; the date and manner of distribution and publication, if any; the location of each copy and the identity of the present custodian; the identity of the person or

persons who can identify it; the contents of the document verbatim; and if privilege is claimed, the specific basis therefor. In lieu of the foregoing, a copy of the document may be supplied.

13. Each interrogatory or request shall be read to be inclusive rather than exclusive. Accordingly, "including" means "including without limitation." The word "all" includes "any" and vice versa. The past tense includes the present tense and vice versa. The masculine form of any word includes the feminine form and vice versa.

14. Each person responding to interrogatories or requests for admission is required to furnish responsive information within that person's knowledge or the personal knowledge of its, his or her attorneys, agents, employees or other representatives.

15. Each person responding to the document requests is required to furnish responsive documents within that person's possession, custody or control or within the possession, custody or control of its, his or her attorneys, agents, employees or other representatives.

16. Each objection, if any, shall be set forth with specificity and shall include a statement of the grounds for the objection.

17. If any document requested to be identified or produced has been destroyed, provide the following additional information as to each such document:

(a) the date of destruction;

(b) the reason for the destruction;

(c) the identification of the person who destroyed the document; and

(d) the identification of any person who directed that the document be destroyed.

18. If any of these interrogatories cannot be answered in full, respond to the extent possible, specifying the reasons for the inability to respond to the remainder of the interrogatory, and state whatever information or knowledge is available concerning the unanswered portion.

19. In responding to requests for admissions, if a matter is not admitted, the answer must specifically deny it or state in detail why the answering party cannot truthfully admit or deny it. A denial must fairly respond to the substance of the matter, and when good faith requires that a party qualify an answer or deny only part of the matter, the answer must specify the part admitted and qualify or deny the rest. The answering party may assert lack of knowledge or information as a reason for failing to admit or deny only if the party states that it has made reasonable inquiry and that the information it knows or can readily obtain is insufficient to enable it to admit or deny.

20. If any responsive information, communication or document is withheld on the basis of any claim of privilege, identify such information, communication or document withheld, state the privilege being relied upon or claimed and the basis for the claim, and identify all persons or entities who have had access to such information, communication or document.

21. Applicant must supplement its responses to all discovery requests as required by Fed. R. Civ. P. 26(e).

REQUESTS FOR ADMISSIONS

1. Each document that Applicant has produced or will produce in response to Opposer's discovery requests is genuine and authentic for purposes of admission into evidence during the testimony periods in this opposition proceeding.

2. Opposer's rights in Opposer's L'ORÉAL Mark and in Opposer's L'ORÉAL PARIS Mark predate the filing by Applicant of the subject application for Applicant's Mark.

3. Applicant has not used Applicant's Mark in commerce.

4. Applicant's Mark is identical to Opposer's L'ORÉAL PARIS Mark.

5. The first term in Applicant's Mark is identical to Opposer's L'ORÉAL Mark.

6. The first term in Applicant's Mark is identical to Opposer's trade name.

7. "L'ORÉAL" is the dominant term of the two terms comprising Applicant's Mark.

8. L'Oréal is one of the largest cosmetics and personal care products companies in the world and in the U.S.

9. L'Oréal is one of the best known cosmetics and personal care products companies in the world and in the U.S.

10. L'ORÉAL is one of the best known and widely recognized brands in the world and in the U.S.

11. Opposer's L'ORÉAL Mark is famous.

12. Opposer's L'ORÉAL PARIS Mark is famous.

13. Opposer's L'ORÉAL Mark and Opposer's L'ORÉAL PARIS Mark are famous in connection with cosmetics and personal care.

14. Opposer's L'ORÉAL Mark is widely recognized by the general public.

15. Opposer's L'ORÉAL PARIS Mark is widely recognized by the general public.

16. Opposer's L'ORÉAL Mark and Opposer's L'ORÉAL PARIS Mark are widely recognized in connection with cosmetics and personal care.

17. The L'Oréal trade name, Opposer's L'ORÉAL Mark, and Opposer's L'ORÉAL PARIS Mark are and for a long time have been widely marketed and promoted to a broad class of consumers through television advertisements, print media, and on the Internet.

18. Products bearing Opposer's L'ORÉAL Mark and Opposer's L'ORÉAL PARIS Mark are available through several channels of trade, including but not limited to drug stores, supermarkets, cosmetics stores and beauty care establishments, and on the Internet.

19. Products bearing Opposer's L'ORÉAL Mark and Opposer's L'ORÉAL PARIS Mark are available at stores where other personal care goods are sold.

20. Products bearing Opposer's L'ORÉAL Mark and Opposer's L'ORÉAL PARIS Mark are available at stores where herbal, mineral, and botanical products (such as vitamins and supplements, health foods, and health drinks) are sold.

21. Applicant was aware of Opposer prior to applying for Applicant's Mark.

22. Applicant was aware of Opposer's L'ORÉAL PARIS Mark prior to applying for federal registration of Applicant's Mark.

23. Applicant was aware of Opposer's L'ORÉAL Mark prior to applying for federal registration of Applicant's Mark.

24. Applicant selected Applicant's Mark at least in part because of the wide-spread recognition of Opposer's L'ORÉAL Mark and/or Opposer's L'ORÉAL PARIS Mark.

25. Applicant selected Applicant's Mark because of the wide-spread recognition of Opposer's L'ORÉAL Mark and/or Opposer's L'ORÉAL PARIS Mark.

26. Applicant has filed several other applications with the U.S. Patent and Trademark Office ("PTO") for marks that he knows are, or he intends to be, identical to previously-registered famous or well-known marks.

27. Applicant filed an intent-to-use trademark application with the PTO for NESTLE for "over the counter medications, namely, analgesics; sleep aids; cold and flu medications" (Application Serial No. 76/596,738).

28. Prior to filing his application to register NESTLE, Applicant was aware of the prior registrations for and/or the extensive trademark use of NESTLE by the owner of that mark in connection with flavored milk and milk-based beverages, water, infant formula, chocolates and candies, ice-cream bars, dietary supplements, and/or bottled water.

29. Applicant filed an intent-to-use trademark application with the PTO for BUDWEISER for various types of beverages, including "water, still water, mineral water, spring water ... sparkling water ... juices, flavored drinks ... non-alcoholic beverages, preparations for making beverages, syrups" (Application Serial No. 78/288,361).

30. Prior to filing his application to register BUDWEISER, Applicant was aware of the prior registrations for and/or the extensive trademark use of BUDWEISER by the owner of that mark in connection with beer, drinking vessels and/or other products.

31. Applicant filed an intent-to-use trademark application with the PTO for EVIAN for "ice cream; sherbet; and frozen confections" (Application Serial No. 76/577,011).

32. Prior to filing his application to register EVIAN, Applicant was aware of the prior registrations for and/or the extensive trademark use of EVIAN by the owner of that mark in connection with, among other things, natural mineral waters; "skin care lotion sold in an atomizer preparation" and various other personal care products including creams, lotions, perfumery, and cosmetics; dietary food supplements; water-based mineral supplements; and a variety of beverages including fruit and vegetable juices, lemonade, ginger beer, and sorbet drinks.

33. Applicant has also filed intent-to-use applications with the PTO for, among other things, HEINEKEN for "meat juices" (Ser. No. 78/288,366); ABSOLUT for various beverages including beer, mineral water, sparkling water, and juices (Ser. No. 78/288,367); FINLANDIA for various beverages including water, juices, and flavored drinks (Ser. No. 78/288,365); COORS for "meat juices, and meat juice concentrates" (Ser. No. 78/288,364); JACK DANIEL'S for "cigars, cigarettes, and chewing tobacco" (Ser. No. 76/596,734); DOM PERIGNON for "meat juices, and broth comprising meat juices" (Ser. No. 78/288,358); BAYER for "non-medicated breath fresheners delivered via aerosol spray; non-medicated mouthwash and gargle" (Ser. No. 76/596,737); NESCAFÉ for ""distilled spirits; liqueurs; cordials; and alcoholic coolers, namely; distilled spirit based and malt based" (Ser. No. 76/596,735); and CHANEL for "scented stationery and greeting cards" (Ser. No. 76/596,733).

34. Prior to filing each and every application identified in Request for Admissions No. 33, Applicant was aware of the prior registrations for and/or the extensive trademark use of the subject mark by a large or well-known company, and of the fame or general public recognition of such mark.

35. Applicant's decision to apply for each of Applicant's Marks, including each of the marks identified in Requests for Admissions Nos. 27-33 and Applicant's Mark at issue in this proceeding, was based at least in part on Applicant's awareness of the prior existence of an identical famous or well-known mark.

36. Applicant's decision to apply for each of Applicant's Marks, including each of the marks identified in Requests for Admissions Nos. 27-33 and Applicant's Mark at issue in this proceeding, was based on Applicant's awareness of the prior existence of an identical famous or well-known mark.

37. Applicant did not have a bona fide intent to use each of Applicant's Marks in commerce at the time that he filed an application for each of Applicant's Marks with the PTO.

38. Applicant does not have a bona fide intent to use Applicant's L'ORÉAL PARIS Mark in commerce, and did not have such intent at the time of filing the application that is the subject of this proceeding.

39. Applicant's purpose in applying for Applicant's L'ORÉAL PARIS MARK and/or other of Applicant's Marks is to make a philosophical point about trademark protection.

40. Applicant initially applied to use Applicant's Mark in connection with several products, including perfumes and fragrances; vitamin, mineral and herbal supplements and

combinations thereof; aloe vera drinks; shaving balms, lotions, creams, and soaps; topical skin balms, namely sunscreens, tanning balms, lotions, creams, and combinations thereof; candles; and shaving implements.

41. At the time of filing the application for Applicant's Mark, Applicant was aware that Applicant's Mark as used in connection with perfumes and fragrances; shaving balms, lotions, creams, and soaps; and sunscreens and tanning balms would create a likelihood of confusion with Opposer's L'ORÉAL Mark and Opposer's L'ORÉAL PARIS Mark, and specifically that it would create a likelihood of confusion with Opposer's L'ORÉAL mark that is the subject of Registration No. 540,541 for "rouge, face cream, hair lotion, hand cream, eye shadow, face lotion, perfume, cologne, nail polish, suntan oil and face powder."

42. At the time of filing the application for Applicant's Mark, Applicant signed a declaration stating that "to the best of his/her knowledge and belief no other person, firm, corporation, or association has the right to use the mark in commerce, either in identical form thereto or in such new [sic] resemblance thereto as to be likely, when used on or in connection with the goods/services of such other person, to cause confusion, or to cause mistake, or to deceive...."

43. Applicant signed such declaration despite being aware of Opposer's existing registrations for L'ORÉAL and common law use of L'ORÉAL and L'ORÉAL PARIS in connection with cosmetics in general, and specifically despite being aware of Opposer's registration for L'ORÉAL for goods that are identical or very closely related to goods identified in Applicant's application, namely, perfume and cologne, face cream, face lotion, and hand cream; and suntan oil.

44. On or about July 14, 2005, in response to an Office Action that issued from the PTO, Applicant amended his application to (a) state that "the wares or goods herein associated with

the mark 'L'ORÉAL PARIS' will not be manufactured or produced in, or will have any other connection with, the geographic location named in the mark," and (b) cancel all goods other than "aloe vera drinks."

45. Applicant has never manufactured or sold aloe vera drinks.

46. Applicant has no capacity and/or intention to manufacture or sell aloe vera drinks.

47. To the extent that Applicant intends to offer aloe vera drinks under Applicant's Mark, Applicant chose the name L'ORÉAL PARIS because consumers associate that mark with Opposer's L'Oréal name and Opposer's L'ORÉAL Mark and Opposer's L'ORÉAL PARIS Mark.

48. To the extent that Applicant intendd to offer aloe vera drinks under Applicant's Mark, Applicant intends to trade on the goodwill and brand awareness developed by L'Oréal in Opposer's L'ORÉAL Mark and Opposer's L'ORÉAL PARIS Mark.

49. Aloe vera is an ingredient commonly used in and associated with personal care products, such as but not limited to body lotions, skin creams, after-tanning creams and lotions, hair care products and/or cosmetics.

50. Aloe vera is more commonly associated with skin care products than with beverages.

51. Prior to applying for Applicant's Mark, Applicant was aware that Opposer sells personal care products, including but not limited to skin creams and cosmetics.

52. Prior to applying for Applicant's Mark, Applicant was aware that aloe vera is used in personal care products, including but not limited to skin creams and cosmetics.

53. Prior to applying for Applicant's Mark, Applicant was aware that aloe vera is used in the types of products sold under Opposer's L'ORÉAL Mark and Opposer's L'ORÉAL PARIS Mark.

54. Prior to applying for Applicant's Mark, Applicant was aware that L'Oréal uses herbal, mineral, and botanical ingredients in products offered under Opposer's L'ORÉAL Mark and Opposer's L'ORÉAL PARIS Mark.

55. Personal care products and herbal, mineral, and botanical products, such as but not limited to herbal supplements or beverages, often emanate from the same source.

56. Personal care products and herbal, mineral, and botanical products, such as but not limited to supplements or beverages, often move through the same channels of trade.

57. Products offered under Opposer's L'ORÉAL Mark and/or Opposer's L'ORÉAL PARIS Mark are sold at stores that also carry herbal, mineral, and botanical products, such as but not limited to supplements or beverages.

58. Drugstores and supermarkets offer both beverages and personal care products such as skin creams.

59. Consumers encountering Applicant's Mark in the marketplace are likely to associate the mark with Opposer, with Opposer's L'ORÉAL PARIS Mark and/or with Opposer's L'ORÉAL Mark.

60. Prior to applying for Applicant's Mark, Applicant was aware that consumers would be likely to believe that aloe vera products offered under Applicant's Mark emanate from the same

source as personal care products offered under Opposer's L'ORÉAL Mark or Opposer's L'ORÉAL PARIS Mark, or are approved by or affiliated with L'Oréal.

61. Applicant is not aware of any other well-known mark utilizing L'ORÉAL.

62. Applicant is not aware of trademark use of the mark L'ORÉAL PARIS by any entity other than L'Oréal.

63. L'Oreal is listed as a surname for fewer than ten individuals or families in the United States, according to a "people search" on the 411.com Internet site.

64. Oreal is listed as a surname for fewer than thirty five (35) individuals or families in the United States, according to a "people search" on the 411.com Internet site.

65. Kodak is a famous trademark.

66. Kodak is listed as a surname for at least 100 individuals or families in the United States, according to a "people search" on the 411.com Internet site.

67. Kodak is a more commonly listed surname than L'Oreal or Oreal in the United States.

68. Buick is a famous trademark.

69. Buick is listed as a surname for approximately 300 individuals or families in the United States, according to a "people search" on the 411.com Internet site.

70. Buick is a more commonly listed surname than L'Oreal or Oreal in the United States.

71. DuPont is a famous trademark.

72. DuPont or Du Pont is listed as a surname hundreds of individuals or families in the United States, according to a "people search" on the 411.com Internet site. According to that site, DuPont or Du Pont is listed as a surname for more than 300 individuals or families in the state of California alone, approximately another 300 individuals or families in the state of Texas alone, and approximately another 300 individuals or families in the state of New York alone.

73. DuPont or Du Pont is a more commonly listed surname than L'Oreal or Oreal in the United States.

74. The word PARIS as used in connection with Applicant's goods is geographically misdescriptive.

CERTIFICATE OF SERVICE

The undersigned hereby certifies that a copy of the OPPOSER'S FIRST SET OF REQUESTS FOR ADMISSIONS has been served upon Robert Victor Marcon, 3471 Sinnicks Avenue, Niagara Falls, Ontario, CANADA, by depositing a true copy of the same with UPS, postage prepaid, on September 29, 2008.

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE TRADEMARK TRIAL AND APPEAL BOARD

In the Matter of Application Serial No. 76/596,736
Published in the Official Gazette on May 6, 2008
Mark: L'OREAL PARIS

L'ORÉAL S.A. and L'ORÉAL USA, INC., Opposer, v. ROBERT VICTOR MARCON, Applicant.	Opposition No. 91184456

OPPOSER'S FIRST SET OF INTERROGATORIES

Pursuant to Rule 33 of the Federal Rules of Civil Procedure and 37 C.F.R. 2.120, Opposer L'Oréal S.A. and L'Oréal USA, Inc. (collectively, "L'Oréal" or "Opposer") hereby requests that Applicant Robert Victor Marcon ("Marcon" or "Applicant") answer the following interrogatories, in writing and under oath, by serving written responses on the offices of Paul, Hastings, Janofsky & Walker LLP, 75 East 55th Street, New York, NY 10022, within thirty (30) days from the date of service. These interrogatories are continuing and impose upon Applicant the obligations stated in Fed. R. Civ. P. 26, including Applicant's obligation to correct and supplement its responses in a timely manner if Applicant learns that any response is incorrect or incomplete.

For the convenience of the Board and the parties, Opposer requests that each request be quoted in full immediately preceding the response.

DEFINITIONS AND INSTRUCTIONS

The Definitions and Instructions contained in Applicant's First Set Of Requests for Admissions served herewith are incorporated by reference and shall apply to these requests.

INTERROGATORIES

1. State the date of and describe the reasons for the selection of Applicant's Mark, including the consideration of any other marks and/or any other goods or services, and identify the person(s) with the most knowledge of the selection of Applicant's Mark and goods.

2. State the date and describe the circumstances under which Applicant first became aware of Opposer, of Opposer's L'ORÉAL Mark and of Opposer's L'ORÉAL PARIS Mark, and identify the person most knowledgeable of the foregoing.

3. Identify all investigations, surveys, research, polls, focus groups, or opinions that Applicant has ever conducted, received, or seen concerning confusion or the likelihood of confusion between Applicant's Mark and Opposer's L'ORÉAL Mark or Opposer's L'OREAL PARIS Mark, between Applicant and Opposer, and/or between Applicant's products and Opposer's products.

4. Identify all investigations, research, searches, studies, focus groups, and polls that Applicant has ever conducted, received, or seen concerning the availability for use and/or registration of Applicant's Mark or variations thereof.

5. State all facts that support and evidence Applicant's alleged bona fide intent to use Applicant's Mark in commerce on or in connection with aloe vera drinks as of the filing date of Application Serial No. 76/596,736 and continuing to date.

6. State the actual or intended date of first use anywhere and date of first use in the United States commerce of Applicant's Mark in connection with aloe vera drinks.

7. Describe the types or classes of purchasers to whom Applicant has marketed or intends to market aloe vera drinks in connection with Applicant's Mark.

8. Describe the channels of trade through which Applicant has marketed or intends to market aloe vera drinks in connection with Applicant's Mark.

9. Identify all third parties of which Applicant is aware that advertise, promote, offer or sell both personal care products and herbal, mineral, or botanical products, such as but not limited to supplements or beverages.

10. Identify the persons most familiar with Applicant's Mark, Applicant's aloe vera products, Applicant's actual or intended advertising, promotion, and marketing of aloe vera drinks in connection with Applicant's Mark, and Applicant's actual or intended channels of trade and class of consumers for aloe vera drinks.

11. Identify and describe all agreements between Applicant and any third party concerning the use and/or registration of Applicant's Mark (or any feature, portion, part, element, or component of Applicant's Mark), including but not limited to, license agreements, consent agreements, coexistence agreements, assignments, and settlement agreements.

12. Identify all of Applicant's related companies, including predecessors-in-interest, successors-in-interest, parent, subsidiary, and sister corporations, or other persons and state whether any of them intends to use Applicant's Mark, or intends to manufacture, distribute, or sell any products in connection with Applicant's Mark.

13. Identify each expert witness from whom Applicant intends to introduce testimony during its testimony period in this proceeding and provide the information required in Fed. R. Civ. P. 26(a)(2)(B)

L'ORÉAL S.A. and L'ORÉAL USA, INC., Opposer, v. ROBERT VICTOR MARCON, Applicant.	Opposition No. 91184456

OPPOSER'S FIRST SET OF DOCUMENT REQUESTS

Pursuant to Rule 34 of the Federal Rules of Civil Procedure and 37 C.F.R. 2.120, Opposer L'Oréal S.A. and L'Oréal USA, Inc. (collectively, "L'Oréal" or "Opposer") hereby requests that Applicant Robert Victor Marcon ("Marcon" or "Applicant") produce the documents and things requested below for inspection and copying to L'Oréal at the offices of Paul, Hastings, Janofsky & Walker LLP, 75 East 55th Street, New York, NY 10022, or at such other place as agreed to by the parties within thirty (30) days from the date of service. These document requests are continuing and impose upon Applicant the obligations stated in Fed. R. Civ. P. 26, including Applicant's obligation to supplement documents in a timely manner if Applicant discovers that its production is incomplete.

For the convenience of the Board and the parties, Opposer requests that each request be quoted in full immediately preceding the response.

DEFINITIONS AND INSTRUCTIONS

The Definitions and Instructions contained in Applicant's First Set Of Requests for Admissions served herewith are incorporated by reference and shall apply to these requests.

REQUESTS FOR DOCUMENTS AND THINGS

REQUEST NO. 1:

All documents and tangible things identified or requested to be identified or comprising the information used, referenced or otherwise incorporated in response to Opposer's First Set Of Interrogatories.

REQUEST NO. 2:

All documents referring or relating to Applicant's consideration of marks and selection and clearance of Applicant's Mark, including but not limited to, searches, investigations, surveys, studies, research, polls, reports and opinions that Applicant has ever conducted, received, or seen concerning the availability for use and/or registration of L'ORÉAL PARIS or variations thereof.

REQUEST NO. 3:

All documents referring or relating to Applicant's consideration of goods or services to be offered in connection with the L'ORÉAL PARIS Mark, including but not limited to, searches, investigations, surveys, studies, research, polls, reports and opinions.

REQUEST NO. 4:

All documents evidencing Applicant's bona fide intent to use Applicant's Mark in the United States on or in connection with aloe vera drinks.

REQUEST NO. 5:

All market surveys, studies or other reports concerning U.S. consumers of products intended to be sold in connection with Applicant's Mark.

REQUEST NO. 6:

Documents sufficient to identify the classes or types of consumers of products intended to be offered, sold, advertised and/or promoted in connection with Applicant's Mark.

REQUEST NO. 7:

Documents sufficient to identify the channels of trade for products intended to be offered, sold, advertised and/or promoted in connection with Applicant's Mark.

REQUEST NO. 8:

Documents sufficient to identify all retail locations, including but not limited to drug stores, salons, and supermarkets, where Applicant intends to offer, sell, advertise, or promote products in connection with Applicant's Mark.

REQUEST NO. 9:

Documents sufficient to identify all types of media (including but not limited to newspapers, magazines, trade journals, direct mail advertising, radio, television, and the Internet) in which Applicant intends to advertise, promote, offer, feature, display, or sell aloe vera drinks under Applicant's Mark.

REQUEST NO. 10:

Documents sufficient to show all forms and all manners of appearance in which Applicant has depicted, displayed, and/or used, or intends to depict, display and/or use Applicant's Mark, including but not limited to all designs, logos, and stylizations.

REQUEST NO. 11:

Documents showing, referring or relating to all third parties of which Applicant is aware that advertise, promote, offer, or sell both cosmetics or personal care goods and herbal, botanical, or mineral products.

REQUEST NO. 12:

All documents referring or relating to the date when and circumstances under which Applicant first became aware of Opposer and Opposer's L'ORÉAL Mark and Opposer's L'ORÉAL PARIS Mark.

REQUEST NO. 13:

All documents comprising, referring, or relating to investigations, surveys, research, polls, focus groups, or opinions that Applicant has ever conducted, received, or seen concerning confusion or the likelihood of confusion between Applicant's Mark and Opposer's L'ORÉAL PARIS Mark or Opposer's L'ORÉAL Mark, between Applicant and Opposer, and/or between Applicant's products and Opposer's products.

REQUEST NO. 14:

All documents comprising, referring, or relating to investigations, surveys, research, polls, focus groups, or opinions that Applicant has ever conducted, received, or seen concerning dilution or the likelihood of dilution of Opposer's L'ORÉAL Mark or Opposer's L'ORÉAL PARIS Mark due to Applicant's use or intended use of Applicant's Mark.

REQUEST NO. 15:

All documents comprising, referring, or relating to investigations, surveys, research, polls, focus groups, or opinions concerning the level of fame or recognition of L'Oréal's trade name or

Opposer's L'ORÉAL Mark or Opposer's L'ORÉAL PARIS Mark, or any other mark associated with L'Oréal.

REQUEST NO. 16:

All documents comprising, referring, or relating to communications, inquiries, or comments to or from any person referring or relating to Opposer or Opposer's L'ORÉAL Mark or Opposer's L'ORÉAL PARIS Mark.

REQUEST NO. 17:

Documents referring or relating to judicial and/or administrative proceedings in any forum referring or relating to Applicant's Mark or any portion, part, feature, element, or component of Applicant's Mark.

REQUEST NO. 18:

Documents sufficient to identify all names and marks comprised of or containing a mark previously-registered or widely used by another that Applicant has registered, currently uses, intends to use, or has sought to register as a trademark, service mark, or domain name.

REQUEST NO. 19:

Documents comprising, referring, or relating to agreements between Applicant and any third party concerning the use and/or registration of Applicant's Mark, including but not limited to, license agreements, consent agreements, coexistences agreements, assignments, and settlement agreements.

REQUEST NO. 20:

Documents sufficient to identify any and all of Applicant's related companies, including predecessors-in-interest, succcessors-in-interest, parent, subsidiary, and sister corporations, and sufficient to indicate whether any of those related companies uses Applicant's Mark.

REQUEST NO. 21:

All documents referring or relating to each expert witness from whom Applicant intends to introduce testimony during its testimony period in this proceeding, and all documents pertaining to the information required to be disclosed under Fed. R. Civ. P. 26(a)(2)(B), including all communications to or from the expert witness and all final and draft reports prepared by or for the expert witness.

REQUEST NO. 22:

All documents relating to the term L'ORÉAL or L'ORÉAL PARIS or to Opposer L'Oréal not produced in response to any of Opposer's other requests for documents and things.

REQUEST NO. 23:

A copy of the complete file history of Application Serial No. 76/596,736.

REQUEST NO. 24:

A copy of the complete file history of Applicant's Canadian application and opposition proceeding regarding Applicant's Mark.

Dated: September 29, 2008

IN THE MATTER OF an Opposition by
L'Oreal USA, Inc. and L'Oreal S.A.
to Application Serial No. 76/596,736 filed by
Robert Victor Marcon
for the trademark "L'OREAL PARIS"
(Opposition No. 91184456)

COMMUNICATION - B
RESPONSE TO OPPOSERS' REQUESTS

This is a response to the letter mailed (September 29, 2008) by the Opposers' Attorney, namely, Robert L. Sherman of Paul, Hastings, Janofsky & Walker LLP to the Applicant herein, namely, Robert Victor Marcon. Said letter consists of three (3) requests which include:

(1) Opposer's First Set of Requests for Admissions (1-74);
(2) Opposer's First Set of Interrogatories (1-13); and
(3) Opposer's First Set of Document Requests (1-24).

Therefore, in accordance with current trademark protocols and procedures the Applicant will provide the requested information to the Opposers' Attorney and the U.S. Patent and Trademark Office, Trademark Trial and Appeal Board. Note also, that the Applicant will respond to each request made by the Opposers' Attorney in the same sequence and order as was presented in his letter thereby avoiding unnecessary paperwork and duplication (a copy of the Attorney's letter is also include as reference).

Included in this communication are the following five (5) items totalling two hundred and sixty-eight (268) pages:

(1) Applicant's response to the Opposer's First Set of Requests for Admissions

(1-74);

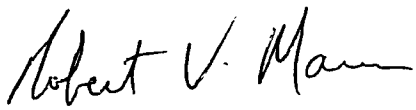
(2) Applicant's response to the Opposer's First Set of Interrogatories (1-13);

(3) Applicant's response to the Opposer's First Set of Document Requests (1-24);

(4) A copy of the aforesaid Attorney letter mailed September 29, 2008; and

(5) Applicant's Notice of Reliance (Applicant's Evidence).

Respectfully submitted,



Robert V. Marcon,
Applicant Pro Se
30 October 2008

Opposer's First Set of Requests for Admissions (1-74)

1. The Applicant acknowledges said statement.

2. The Applicant disagrees with said claim.

First, the USPTO trademark database shows that the Opposers do not own or control any "LIVE" trademarks consisting of the words "L'OREAL PARIS".

Second, trademarks must be considered in their entirety and not as dissected items. The Opposer other marks do not consist of the words "L'OREAL PARIS".

Third, the fundamental concept of a trade-mark being granted in relation to certain wares would be rendered meaningless if the wares were not taken into account. The Opposer's wares are not even remotely similar to the Applicant's sole remaining ware.

Consequently, the Applicant thereby concludes that the Opposers' rights do not predate those of the Applicant.

3. The Applicant acknowledges said statement.

4. The Applicant disagrees with said claim. According to the USPTO database the Opposers do not own or control any "LIVE" trademarks consisting of the words "L'OREAL PARIS".

5. The Applicant acknowledges said statement.

6. The Applicant acknowledges said statement.

7. Applicant disagrees with said statement.

8. The Applicant is without knowledge or information sufficient to form a belief as

to the validity of the Opposers' statement.

9. The Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

10. The Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

11. The Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

12. The Applicant disagrees with said claim. According to the USPTO trademark database the Opposers do not own or control any "LIVE" trademarks consisting of the words "L'OREAL PARIS". As may regard any common law or any other rights claimed by the Opposer -- the Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

13. The Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

14. The Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

15. The Applicant disagrees with said claim. According to the USPTO trademark database the Opposers do not own or control any "LIVE" trademarks consisting of the words "L'OREAL PARIS". As may regard any common law or any other rights claimed by the Opposer -- the Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

16. The Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

17. The Applicant is without knowledge or information sufficient to form a belief as

to the validity of the Opposer's statement.

18. In regards to the mark "L'OREAL PARIS" -- the Opposers do not own or control any live marks consisting of the words "L'OREAL PARIS" according to the USPTO trademark database. As such, the Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposer's statement.

In regards to the mark "L'OREAL" -- the Applicant has seen various products bearing the mark "L'OREAL" in drug stores and supermarkets. However, this is not an unusual situation for drug stores, supermarkets, and large big box stores normally sell tens of thousands of different products from a multitude of different companies some of which employ identical marks for similar wares.

19. In regards to the mark "L'OREAL PARIS" -- the Opposers do not own or control any live marks consisting of the words "L'OREAL PARIS" according to the USPTO trademark database. As such, the Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposer's statement.

In regards to the mark "L'OREAL" -- the Applicant has seen other personal care products sold in the same stores. However, this is not an unusual situation for large retail stores normally sell tens of thousands of different products from a multitude of different companies some of which employ identical marks for similar wares.

20. In regards to the mark "L'OREAL PARIS" -- the Opposers do not own or control any live marks consisting of the words "L'OREAL PARIS" according to the USPTO trademark database. As such, the Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

In regards to the mark "L'OREAL" -- the Applicant has seen other said products sold in the same stores. However, this is not an unusual situation for large stores normally sell tens of thousands of different products from a multitude of different companies some of which employ identical marks for similar wares.

21. The Applicant acknowledges said statement.

22. According to the USPTO database the Opposers do not own or control any "LIVE" trademarks consisting of the words "L'OREAL PARIS". Applicant, however, was aware of previous "DEAD" marks consisting of the words "L'OREAL PARIS" which belonged to the Opposers.

23. The Applicant acknowledges said statement.

24. The Applicant disagrees with said statement.

25. The Applicant disagrees with said statement.

26. The question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve only to cloud the important issues which are truly relevant. Consequently, such questions being irrelevant and immaterial need not be answered.

27. The question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve only to cloud the important issues which are truly relevant. Consequently, such questions being irrelevant and immaterial need not be answered.

28. The question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these

opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve only to cloud the important issues which are truly relevant. Consequently, such questions being irrelevant and immaterial need not be answered.

29. The question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve only to cloud the important issues which are truly relevant. Consequently, such questions being irrelevant and immaterial need not be answered.

30. The question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve only to cloud the important issues which are truly relevant. Consequently, such questions being irrelevant and immaterial need not be answered.

31. The question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve only to cloud the important issues which are truly relevant. Consequently, such questions being irrelevant and immaterial need not be answered.

32. The question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve only to cloud the important issues which are truly relevant. Consequently, such questions being irrelevant and immaterial need not be answered.

33. The question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve only to cloud the important issues which are truly relevant. Consequently, such questions being irrelevant and immaterial need not be answered.

34. The question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve only to cloud the important issues which are truly relevant. Consequently, such questions being irrelevant and immaterial need not be answered.

35. The question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve

only to cloud the important issues which are truly relevant. Consequently, such questions being irrelevant and immaterial need not be answered.

36. The question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve only to cloud the important issues which are truly relevant. Such questions being irrelevant and immaterial need not be answered.

In regards to the Applicant's application for the mark "L'OREAL PARIS" the Applicant disagrees with the Opposers. Moreover, the Opposers do not own or control any "LIVE" trademarks consisting of the words "L'OREAL PARIS" according to the USPTO database.

37. The Applicant disagrees with the Opposers. The Applicant has always had a bona fide intent to use the mark "L'OREAL PARIS" in commerce.

As for the Applicant's other applications -- the question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve only to cloud the important issues which are truly relevant. Consequently, such questions being irrelevant and immaterial need not be answered.

38. The Applicant disagrees with the Opposers. The Applicant has always had a bona fide intent to use the mark "L'OREAL PARIS" in commerce.

As for the Applicant's other applications -- the question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve only to cloud the important issues which are truly relevant. Consequently, such questions being irrelevant and immaterial need not be answered.

39. The Applicant disagrees with the Opposers. The Applicant has always had a bona fide intent to use the mark "L'OREAL PARIS" in commerce and not to make a philosophical point about trademark protection.

As for the Applicant's other applications -- the question is irrelevant and immaterial in that it does not deal with the subject matter at hand. That is because what is important and cardinal in these opposition proceedings is not whether the Applicant's other applications should or should not be allowed but whether or not the Applicant's mark "L'OREAL PARIS" should or should not be allowed. Superfluous references to unrelated and independent trade-marks applications which have no bearing on this case serve only to cloud the important issues which are truly relevant. Consequently, such questions being irrelevant and immaterial need not be answered.

40. The Applicant acknowledges said statement.

41 The Applicant acknowledges the wares so named therein.

The Applicant, however, disagrees with the Opposers in that the Applicant did not believe that confusion would occur between the Applicant's mark "L'OREAL PARIS" and those of the Opposers since the USPTO trademark database had not revealed any conflicting wares with the Applicant's mark "L'OREAL PARIS".

In addition, according to the USPTO database the Opposers do not own or control any "LIVE" trademarks consisting of the words "L'OREAL PARIS".

42. The Applicant acknowledges said statement.

43. The Applicant, however, disagrees with the Opposers in that the Applicant did not believe that confusion would occur between the Applicant's mark "L'OREAL PARIS" and those of the Opposers since the USPTO trademark database had not revealed any conflicting wares with the Applicant's mark "L'OREAL PARIS".

Second, according to the USPTO database the Opposers do not own or control any "LIVE" trademarks consisting of the words "L'OREAL PARIS".

Third, it should be realized that when determining prospective confusion between trademarks the trademarks must be considered in their entirety and not as dissected items. The Opposers' marks do not consist solely of the words "L'OREAL PARIS" and the Opposers' marks "L'OREAL" do not include the word "PARIS" in their constituencies.

Fourth, the fundamental concept of a trademark being granted in relation to certain wares would be rendered meaningless if the nature of wares were not taken into account. This concept is born out by the very fact that the USPTO trademark database contains many identical trademarks that have been and continue to be allowed because they list wares sufficiently different to overt confusion. The Applicant's "L'OREAL PARIS" mark would be no different.

Fifth, the purpose of the U.S. Patent and Trademark Office, as well as any other similar office, is to safeguard existing trademarks. As such, all applications are thoroughly examined and reviewed for that purpose. Thus, if an application is flawed or the applicant erred, in any manner, those errors will be corrected accordingly in a manner specified by the rules and regulation currently existing. No trademark application will be permitted to be approved if it has not met all the legal requirements stipulated in law.

Thus, the Applicant, in prosecuting his application, has deleted or otherwise removed all wares but one. That one remaining ware is "aloe vera drinks". Thus, what is truly in dispute is not the Applicant deleted wares but is sole remaining wares or "aloe vera drinks". With this in mind, the Applicant suggest that the Opposers' Attorney focus on said remaining ware and not upon wares long since cancelled.

44. The Applicant acknowledges said statement.

45. The Applicant acknowledges said statement.

46. The Applicant disagrees with the Opposers. The Applicant has always had a bona fide intent to use the mark "L'OREAL PARIS" in commerce. In todays business world the capacity to manufacture, distribute and sell does not always rest on a persons actual physical facilities. Such things can be rented, joint ventured or procured via outsourcing. Moreover, licensing is also a practical means of business and just as viable a means of business as creating such companies from scratch.

47. Applicant disagrees with the Opposers' statement. The Opposers' marks have never been associated, even remotely, with "aloe vera drinks".

48. Applicant disagrees with the Opposers' statement.

Second, according to the USPTO database the Opposers do not own or control any "LIVE" trademarks consisting of the words "L'OREAL PARIS".

Third, it should be realized that when determining prospective confusion between trademarks the trademarks must be considered in their entirety and not as dissected items. The Opposers' marks do not consist solely of the words "L'OREAL PARIS" and the Opposers' marks "L'OREAL" do not include the word "PARIS" in their constituencies.

Fourth, the fundamental concept of a trademark being granted in relation to certain wares would be rendered meaningless if the nature of wares were not taken into account. This concept is born out by the very fact that the USPTO trademark database contains many identical trademarks that have been and continue to be allowed because they list wares sufficiently different to overt confusion. The Applicant's mark "L'OREAL PARIS" would be no different.

49. The Applicant acknowledges said statement. However, the Opposers, while they may present wares whose compositions contain aloe vera, such examples would be very poor at best for the simple reason that any mark is only associated with the final product itself and not the individual ingredients or constituents that make up those products. After all, products such as milk may contain vitamin D, orange juice may be supplemented with calcium, and cereal fortified with multiple vitamins. Many other unrelated products also employ vitamins, minerals and even herbs but it would be clearly unreasonable to conclude that L'OREAL would also be associated with milk, juice, cereal or even herbs just because some of their cosmetics, skin creams or lotions contained traces of milk, vitamins, minerals or herbs. After all, a person seeking hair dye, cosmetics or skin cream does not contemplate nor go looking for aloe vera drinks (and vice versa). This same analogy also applies to all of the wares evidenced in these opposition proceedings be they the Opposers' or that of others. That is, the final wares themselves are what may or may not be found confusing and not the individual ingredients composing or constituting those wares.

50. Applicant disagrees with the Opposers' statement. In todays business environment beverages containing aloe vera are not uncommon. As to which is the dominant sector, the Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

51. Applicant acknowledges the Opposers' statement as it regards the Opposers' "L'OREAL" marks only.

52. Applicant acknowledges the Opposers' statement.

53. Applicant acknowledges the Opposers' statement.

54. Applicant acknowledges the Opposers' statement.

55. The Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

56. The term "often" is open ended. As far as the Applicant is aware personal care products such as hair dye, cosmetics, and skin creams are not sold through restaurants, clubs, and bars thereby demonstrating that the channels of trade of different. As such, the Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement in regards to all channels of trade.

57. The only remaining ware left to the Applicant is "Aloe Vera Drinks". The Applicant is aware of such products being sold in some establishments that also sell wares under the Opposers' marks and some establishments like restaurants, clubs, and bars that do not. However, the Opposers, while they may present wares whose compositions contain aloe vera, such examples would be very poor at best for the simple reason that any mark is only associated with the final product itself and not the individual ingredients or constituents that make up those products. After all, products such as milk may contain vitamin D, orange juice may be supplemented with calcium, and cereal fortified with multiple vitamins. Many other unrelated products also employ vitamins, minerals and even herbs but it would be clearly unreasonable to conclude that L'OREAL would also be associated with milk, juice, cereal or even herbs just because some of their cosmetics, skin creams or lotions contained traces of milk, vitamins, minerals or herbs. After all, a person seeking hair dye, cosmetics or skin cream does not contemplate nor go looking for aloe vera drinks (and vice versa). This same analogy also applies to all of the wares evidenced in these opposition proceedings be they the Opposers' or that of others. That is, the final wares themselves are what may or may not be found confusing and not the individual ingredients composing or constituting those wares.

Moreover, it is not an unusual situation for drug stores, supermarkets, and large big box stores to sell tens of thousands of different products from a multitude of different companies some of which employ identical marks for similar wares.

58. Applicant acknowledges said statement.

59. Applicant disagrees with said statement.

60. Applicant disagrees with said statement.

61. Applicant acknowledges said statement.

62. Applicant disagrees with said statement because the Opposers do not own or control any live marks consisting of the words "L'OREAL PARIS" according to the USPTO trademark database.

63. The Applicant acknowledges said statement. However, the Applicant has provide further information in regards to the name "L'Oreal" in his "NOTICE OF RELIANCE (APPLICANT'S EVIDENCE)" also submitted herein. Second, a better result would have been garnered if something like "LEXIS NEXIS" were used.

64. The Applicant acknowledges said statement. However, the Applicant has provide further information in regards to the name "Oreal" in his "NOTICE OF RELIANCE (APPLICANT'S EVIDENCE)" also submitted herein. Second, a better result would have been garnered if something like "LEXIS NEXIS" were used.

65. The Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

66. The Applicant acknowledges said statement.

67. The Applicant disagrees with said statement in that the name "L'Oreal" and "Oreal" mean the same thing. That is, in the French language L'Oreal means "The

Oreal" and "Oreal" remains "Oreal". As such, if one considers this fact then the name "Oreal" is more common (see Applicant "NOTICE OF RELIANCE (APPLICANT'S EVIDENCE)" submitted herein).

68. The Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

69. The Applicant acknowledges said statement.

70. The Applicant disagrees with said statement in that the name "L'Oreal" and "Oreal" mean the same thing. That is, in the French language L'Oreal means "The Oreal" and "Oreal" remains "Oreal". As such, if one considers this fact then the name "Oreal" is more common (see Applicant "NOTICE OF RELIANCE (APPLICANT'S EVIDENCE)" submitted herein).

71. The Applicant is without knowledge or information sufficient to form a belief as to the validity of the Opposers' statement.

72. The Applicant acknowledges said statement.

73. The Applicant acknowledges said statement.

74. The Applicant disagrees with said statement in that the name "Paris" is not only considered to be a geographical reference but a proper name and a surname as well. In this respect any mark containing the word "PARIS" would, in the Attorney's view, always be considered as geographically misdescriptive if not from that local. The Applicant believes this not to be the case.

Opposer's First Set of Interrogatories (1-13)

1. The Opposers' question is irrelevant and immaterial in that it does not deal with the subject matter at hand, namely, whether or not the Applicant's mark is

registrable. Superfluous questions regarding trademark origins or genesis are questions non-critical to the outcome of the present case and serve only to cloud the important issues which are truly relevant.

Applicant maintains that questions important to the outcome of this case can be summed up in the following five points. They are:

(a) the inherent distinctiveness of the trade-names and the extent to which they have become known;
(b) the length of time the trade-marks or trade-names have been in use;
(c) the nature of the wares, services or business;
(d) the nature of the trade; and
(e) the degree of resemblance between the trade-marks or trade-names in appearance or sound or in the ideas suggested by them.

These five questions, the Applicant believes, determine whether the Applicant's mark would be found confusing with the Opposers' marks. Questions unrelated to these fundamental principles are unwarranted and thus need not be answered.

2. The Opposers' question is irrelevant and immaterial in that it does not deal with the subject matter at hand, namely, whether or not the Applicant's mark is registrable. Superfluous questions regarding trademark origins or genesis are questions non-critical to the outcome of the present case and serve only to cloud the important issues which are truly relevant.

Applicant maintains that questions important to the outcome of this case can be summed up in the following five points. They are:

(a) the inherent distinctiveness of the trade-names and the extent to which they have become known;
(b) the length of time the trade-marks or trade-names have been in use;
(c) the nature of the wares, services or business;
(d) the nature of the trade; and

(e) the degree of resemblance between the trade-marks or trade-names in appearance or sound or in the ideas suggested by them.

These five questions, the Applicant believes, determine whether the Applicant's mark would be found confusing with the Opposers' marks. Questions unrelated to these fundamental principles are unwarranted and thus need not be answered.

3. The question is undefined in that the question asks for information extraterritorial to the U.S.A. and is thus not within the scope or mandate of these opposition proceedings. In regards to the U.S.A. -- the Applicant has not conducted, received nor seen any investigations, surveys, research, polls, focus groups, or opinions concerning confusion or the likelihood of confusion between the Applicant's mark and/or wares and those belonging to the Opposers.

4. The question is undefined in that the question asks for information extraterritorial to the U.S.A. and is thus not within the scope or mandate of these opposition proceedings. In regards to the U.S.A. -- the Applicant has not conducted, received nor seen any investigations, surveys, research, polls, focus groups, or opinions concerning the availability for use and/or registration of Applicant's mark or variations thereof.

5. The Applicant has always had a bona fide intent to use the mark "L'OREAL PARIS" in commerce.

In todays business world the capacity to manufacture, distribute and sell does not always rest on a persons actual physical facilities. Such things can be rented, joint ventured or procured via outsourcing. Moreover, licensing is also a practical means of business and just as viable a means of business as creating such companies from scratch. Thus, upon allowance of the Applicant's mark the Applicant will adjudicate and review prevailing market conditions and finally pursue one or more of options stated above as is his right. Thus, by the Applicant's reasoning, the Applicant has shown bona fide intent as the business methods herein stated offer viable options regarding commercial implementation.

Moreover, the Applicant wishes to inquire as to the definition of "bona fide intent" for many successful people have made fortunes in businesses begun from humble beginnings or were contrary to expert opinion. Microsoft, Dell, and Federal Express were all such companies yet against all odds not only prevailed but triumphed. In this same light the Applicant, for example, has successfully filed, prosecuted, and appealed his mark in the U.S.A., and is now currently engaged in these opposition proceedings without the obvious benefits and insight afforded by a seasoned trademark attorney. Thus, is this not a reasonable example of "bona fide intent." for if it is not the Applicant has truly squandered many years foolishly. The Applicant believes that he genuinely possesses "bona fide intent" and will employ this same zeal in his efforts to successfully commercialized his trademark and product once approved.

6. The Applicant's application for the mark "L'OREAL PARIS" was submitted to the USPTO for the United States of America. In this regards there has been no "date of first use" in the U.S.A.. Since the Applicant's mark regards an "intent to use mark" the Applicant believes he has met the letter of the law as the law does not require a "first use" before a trademark application can be made. Questions regarding countries other than the U.S.A. are not within the scope or mandate of these opposition proceedings and thus need not be answered.

7. The type of purchasers that the Applicant intends to market aloe vera drinks includes both male and female encompassing all age groups. The Applicant envisions the product to be a competitor to other beverages such as orange juice, apple juice, lemonade, coffee, tea and other such products.

8. The Applicant intends to market aloe vera drinks primarily to restaurants, clubs and bars and secondarily to grocery stores and other such outlets.

9. In regards to said question -- the Applicant does not know of any such company that markets wares similar to those of the Opposer and also sells aloe vera drinks. In the prosecution of this application even the Examiner could not find any such companies. However, even if such companies could be found it does not set a

precedent for the USPTO trademark roster currently lists many companies utilizing identical marks while selling similar wares without confusion.

10. The Applicant is the only person most familiar with the Applicant's mark, the person most familiar with the Applicant's aloe vera products, the person most familiar with the Applicant's actual or intended advertising, promotion, and marketing of aloe vera drinks in connections with the Applicant's mark, and the person most familiar with the Applicant's actual or intended channels of trade and class of consumers for aloe vera drinks.

However, the Applicant contends that such questions are all irrelevant. That is, the questions are not directed at finding out whether or not the Applicant's mark is confusing with those of the Opposers but rather is directing a gathering extraneous information from the Applicant. Moreover, the questions are also undefined in that the questions asks for information extraterritorial to the U.S.A. and is thus not within the scope or mandate of these opposition proceedings. As such, they need not be answered.

11. The questions are not directed at finding out whether or not the Applicant's mark is confusing with those of the Opposers but rather is directing a gathering extraneous information from the Applicant. Moreover, the questions are also undefined in that the questions asks for information extraterritorial to the U.S.A. and is thus not within the scope or mandate of these opposition proceedings. As such, they need not be answered.

12. The questions are not directed at finding out whether or not the Applicant's mark is confusing with those of the Opposers but rather is directing a gathering extraneous information from the Applicant. Moreover, the questions are also undefined in that the questions asks for information extraterritorial to the U.S.A. and is thus not within the scope or mandate of these opposition proceedings. As such, they need not be answered.

Opposer's First Set of Document Requests (1-24)

1. No such documents exist.

2. No such U.S. documents exist. Second, the request is undefined in that the request asks for information extraterritorial to the U.S.A. and is thus not within the scope or mandate of these opposition proceedings. As such, non-U.S. references need not be provided.

3. No such documents exist. Second, the request is undefined in that the request asks for information extraterritorial to the U.S.A. and is thus not within the scope or mandate of these opposition proceedings. As such, non-U.S. references need not be provided.

4. No such documents exist, however, the Applicant is unaware of any current USPTO trademark rules and regulations or legal precedent defining what is and what is not "bona fide intent". As such, the Applicant will restate that he has always had a bona fide intent to use the mark "L'OREAL PARIS" in commerce.

   Second, the Applicant believes that in todays business world the capacity to manufacture, distribute and sell does not always rest on a persons actual physical facilities. Such things can be rented, joint ventured or procured via outsourcing. Moreover, licensing is also a practical means of business and just as viable a means of business as creating such companies from scratch. Thus, upon allowance of the Applicant's mark the Applicant will adjudicate and review prevailing market conditions and finally pursue one or more of options stated above as is his right. Thus, by the Applicant's reasoning, the Applicant has shown bona fide intent as the business methods herein stated offer viable options regarding commercial implementation.

   Third, the request is undefined in that the request asks for information extraterritorial to the U.S.A. and is thus not within the scope or mandate of these opposition proceedings. As such, non-U.S. references need not be provided.

5. No such surveys, studies or reports exist.

6. No such documents exist.

7. No such documents exist.

8. No such documents exist.

9. No such documents exist.

10. No such documents exist.

11. No such documents exist. That is, the Applicant does not know of any such company that markets wares similar to those of the Opposers and also sells aloe vera drinks. In the prosecution of this application even the Examiner could not find any such companies. However, even if such companies could be found it does not set a precedent for the USPTO trademark roster currently lists many companies with identical names selling similar wares without confusion.

12. No such documents exist. Applicant is uncertain as to the date of awareness referred to but it predates the Applicant's filing for the mark "L'OREAL PARIS".

13. No such U.S. documents exist. Second, the request is undefined in that the request asks for information extraterritorial to the U.S.A. and is thus not within the scope or mandate of these opposition proceedings. As such, non-U.S. references need not be provided.

14. No such U.S. documents exist. Second, the request is undefined in that the request asks for information extraterritorial to the U.S.A. and is thus not within the scope or mandate of these opposition proceedings. As such, non-U.S. references need not be provided.

15. No U.S. documents, other than the documents sent to the Applicant by the
