ZYRTEC(R) is available over-the-counter in 10mg tablets, 5mg and 10mg chewable tablets, and 1mg/mL syrup to relieve allergy symptoms of sneezing, runny nose and watery eyes for 24 hours. ...Allergy Treatment ZYRTEC(R) Now Available Without a Prescription Allergies McNeil Consumer Healthcare, a division of McNEIL-PPC, Inc., announced that ZYRTEC(R) (cetirizine HCl), the number one prescribed allergy treatment in the U.S.*, and ZYRTEC-D(R) 12-HOUR(R), are now available without a prescription in stores nationwide*. Allergy sufferers can now find ZYRTEC-D(R) 12-HOUR(R) and ZYRTEC(R) in stores in the original prescription strength. ZYRTEC(R) is a once-a-day medication for adults and children that provides 24 hour relief from the worst symptoms due to perennial and seasonal allergic rhinitis, commonly referred to as indoor and outdoor upper respiratory allergies. ZYRTEC(R) also relieves itching due to hives (see also Allergies "Physicians have been prescribing ZYRTEC(R) for the last decade to help patients manage their worst indoor and outdoor allergy symptoms," said Ashley McEvoy, President ...

...the number one prescribed allergy medicine in the U.S. with a loyal patient base of nine million people. Now that ZYRTEC(R) is stocked on store shelves, these allergy sufferers can easily get the 24 hour effective allergy relief they need, and for many, ZYRTEC(R) will cost up to one-third less than prescription ZYRTEC(R). ZYRTEC(R) is available over-the-counter in 10mg tablets, 5mg and 10mg chewable tablets, and 1mg/mL syrup to relieve allergy symptoms of sneezing, runny nose and watery eyes for 24 hours. ZYRTEC-D(R) 12-HOUR(R), which is available in stores behind the counter, combines ZYRTEC(R) with a decongestant and provides the added benefit of relieving nasal congestion in a 12-hour extended release tablet. and outdoor upper respiratory allergies. ZYRTEC(R) also relieves itching due to hives. The ZYRTEC(R) approval comes one week after the FDA granted the company approval to market ZYRTEC-D(R) 12 HOUR(R) (cetirizine HCl 5 mg/pseudoephedrine HCl 120 mg), which combines ZYRTEC(R) with a decongestant. ZYRTEC-D(R) and ZYRTEC(R), the number one prescribed allergy medication in the U.S., will be available in stores nationwide in late January 2008 without a prescription in its original-prescription strength. "For a decade, ZYRTEC(R), as a prescription medication, has been alleviating people's symptoms from perennial and seasonal allergies," said Ashley McEvoy, President, McNeil Consumer Healthcare. "By providing ZYRTEC(R) over-the-counter, we're offering allergy sufferers greater access to a convenient, effective and affordable treatment option that helps alleviate their specific allergy symptoms. In fact, for many allergy sufferers, ZYRTEC(R) will cost up to one third less than prescription ZYRTEC(R). ZYRTEC(R) is a once-a-day medication for adults and children that relieves indoor and outdoor allergy symptoms of sneezing, runny nose, and watery eyes for 24 hours. ZYRTEC-D(R) 12 HOUR(R) provides the added benefit of relieving nasal congestion. The FDA approved ZYRTEC(R) in 5mg and 10mg tablets, 5mg and 10mg chewable tablets, and 1mg/mL syrup. ZYRTEC-D(R) 12 HOUR(R) is also approved as an extended release tablet. ZYRTEC(R) also relieves itching due to hives.
