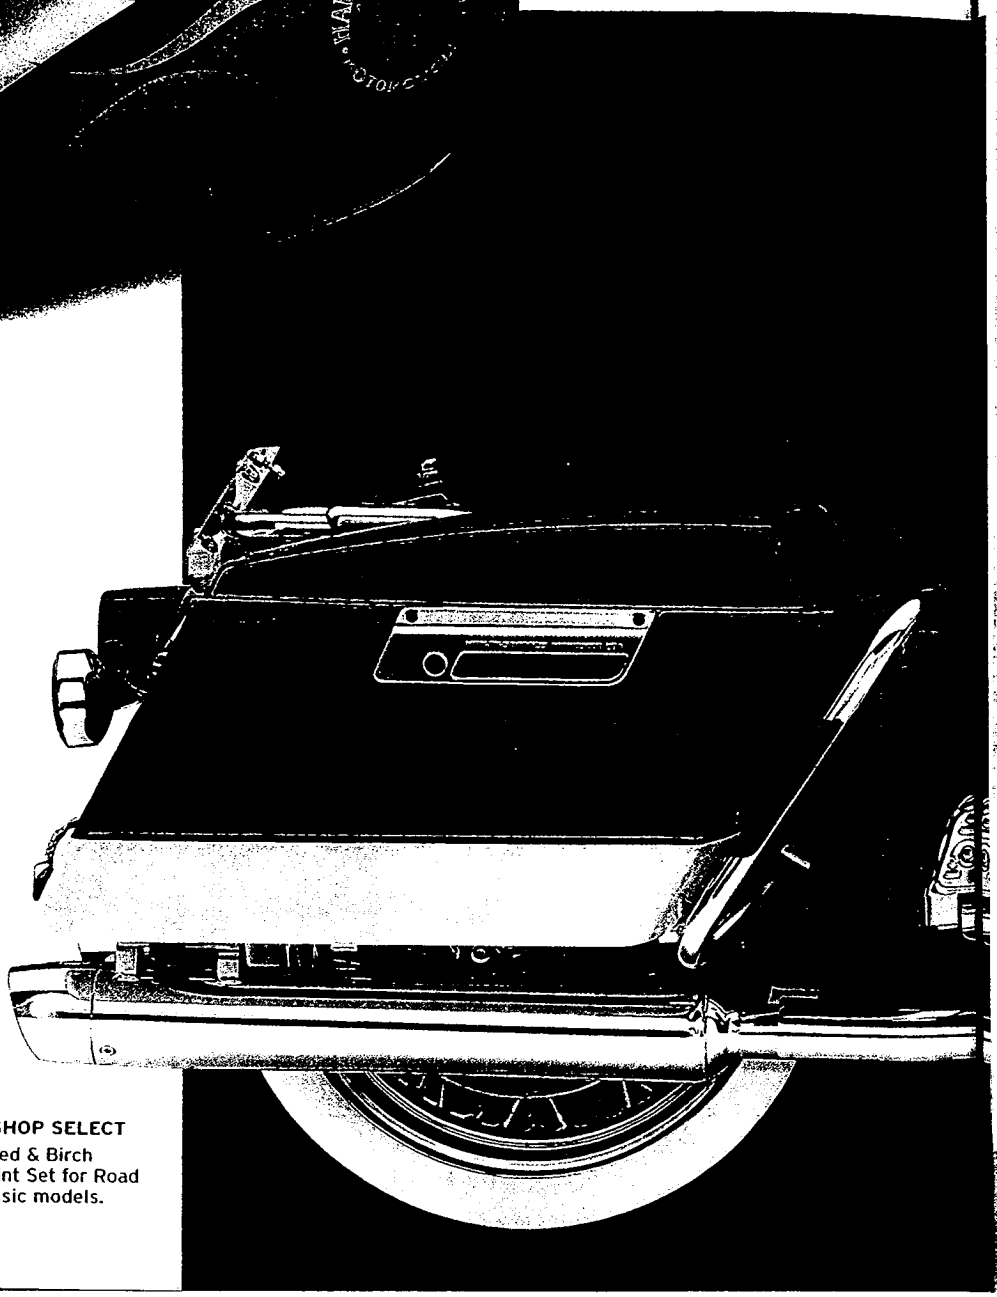
COLOR SHOP

FOUR DIFFERENT PROGRAMS. ONE KIND OF QUALITY. All too often, the thought of custom paint is associated with long delays, big expense and inconsistent quality. With the Color Shop paint programs, those problems are a thing of the past. From the limited-edition Radical Custom Collection to the Accents Custom Color Accessories, you can create the color scheme of your dreams right now, at a reasonable price and with the kind of quality you would expect from Harley Davidson® paint.

01

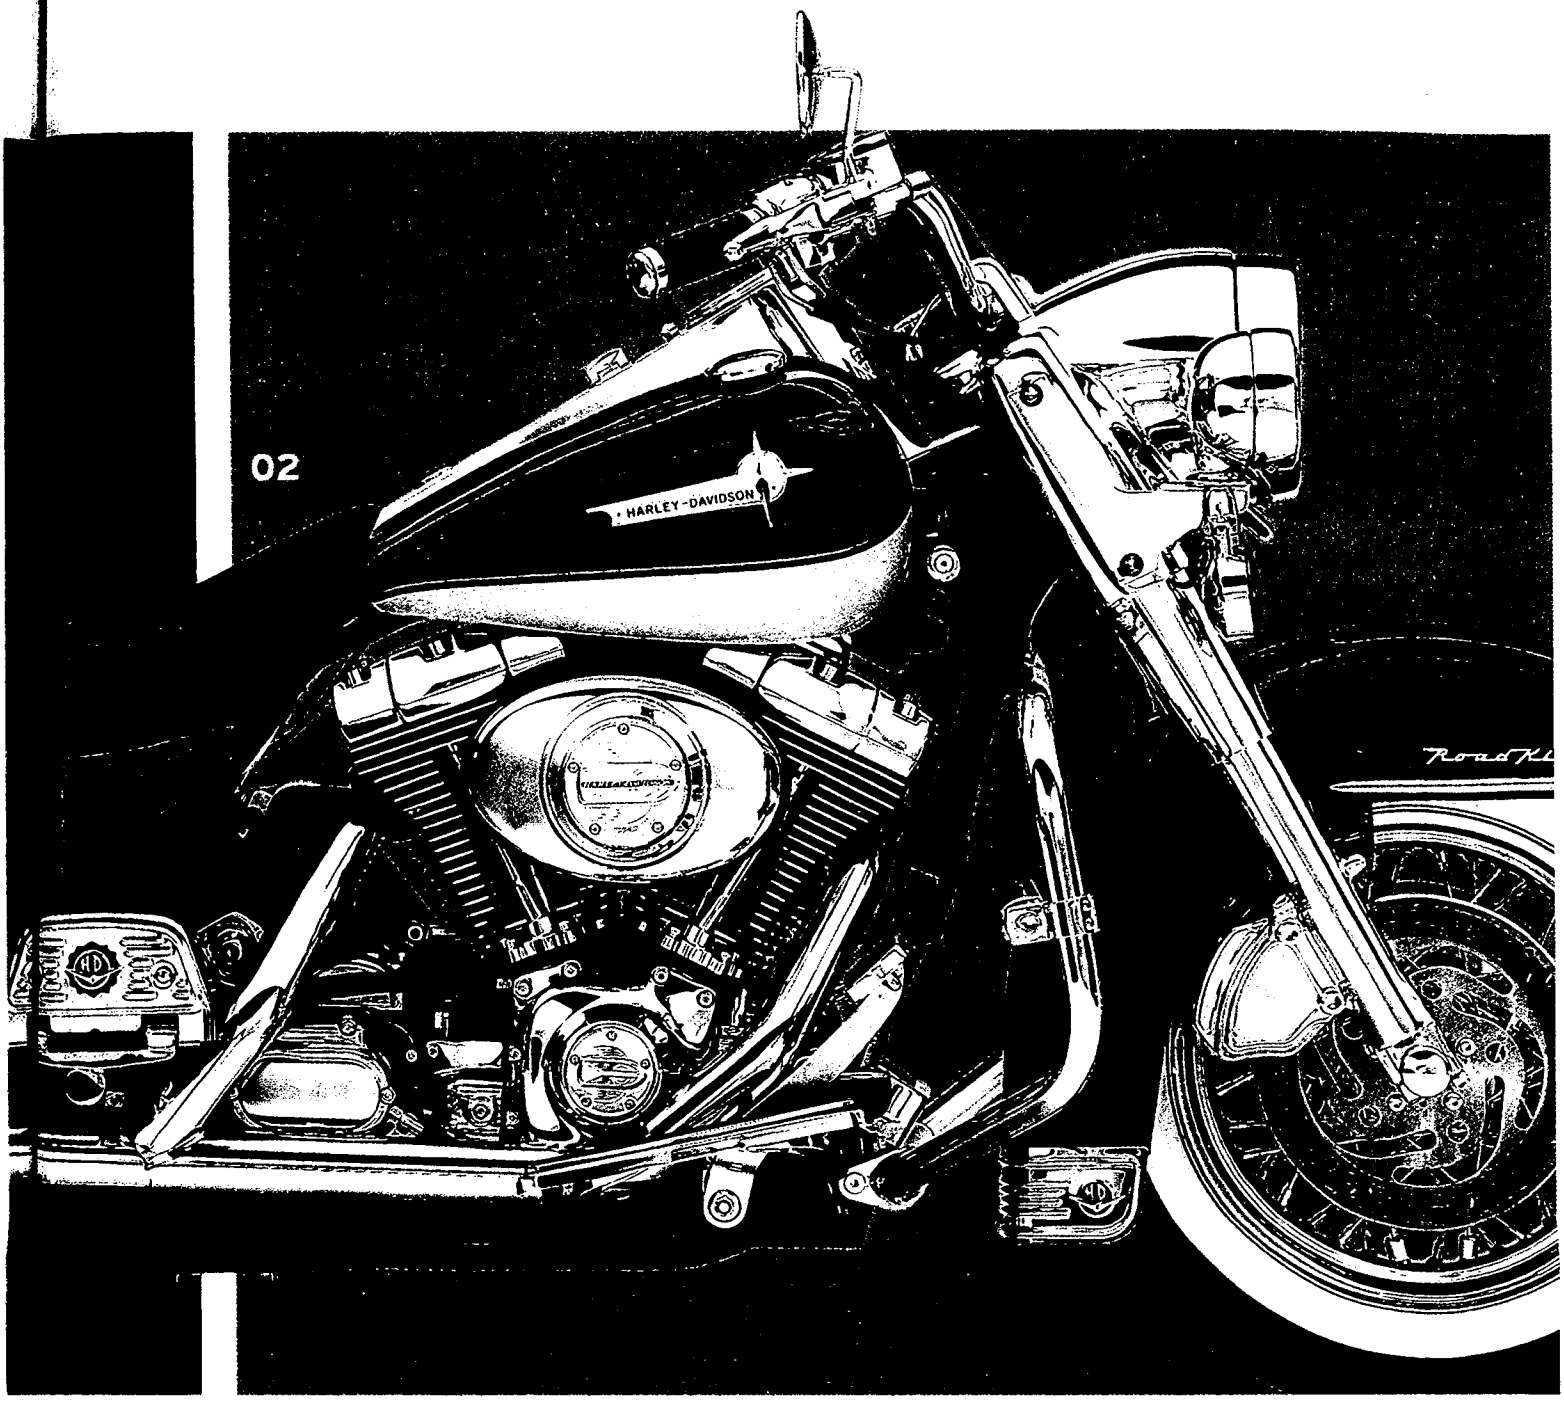


01 COLOR SHOP RADICAL
Gold Hot Rod Flames over Charcoal Metallic Paint Set for Softail® Standard models. PG 667

02 COLOR SHOP SELECT
Patriot Red & Birch White Paint Set for Road King Classic models. PG 674

THE RADICAL CUSTOM COLLECTION.
Featuring hand-crafted, hand-polished show quality paint schemes in limited quantities, the Radical Custom Collection is the fastest, high quality way to custom painted metal. Typically limited to about 150 hand-numbered, limited edition sets, each paint scheme offered will feature a unique, hand-applied design, including three-dimensional graphics, flames, marbleizing, hand-pinstriping or drop shadows. As a replacement for your factory-painted sheet metal, Radical Custom sets offer the exclusivity of a custom paint shop without the hassles.

THE SELECT CUSTOM SERIES.
Taking its inspiration, in great part, from paint schemes of the past, the Select Custom Series combines factory paint quality with a sense of individuality that will make your bike unique. Nostalgic-look paint schemes, such as those based on the '57 Sportster® or '65 Electra Glide,® are offered for a limited time and new designs are introduced periodically. The Select Custom Series is the perfect way to get a high quality, custom look, without the expense and down time of using a local painter.



ACCENTS CUSTOM COLOR ACCESSORIES.
These accessories, including air cleaner covers, spoilers, sport and cafe front fenders, quarter fairings, and air cleaner inserts, are an easy way to give your bike a unique, monochrome look. Painted to match current and recent factory color schemes, custom color accessories are designed to add a splash of color – all with Harley-Davidson® factory color quality.

Color-Matched Quarter Fairing Kit, Front Spoiler and Sport Front Fender

04 COLOR SHOP SPECTRUM
Vivid Black Solid Color Paint Set with Decals for Road King® models
PG 677

SPECTRUM CUSTOM COLOR CREATION.
This program gives you the freedom to select from an unlimited combination of colors. You can color-match to current or discontinued Harley-Davidson® paint schemes or select from an endless number of automotive-style color combinations. Whether you choose a monochrome or two-tone paint scheme with pinstriping, you can supply your own Harley® tank and fenders or buy a replacement set. Either way, you can create your own look and still get the kind of quality you'd expect from a factory-painted Harley.

DIAMOND ICE ACCESSORIES OR SILVER MARBLE FLAMES.
Color Shop has the selection, the quality and the options to help you create a unique custom paint scheme. Just start with a dream, then see your dealer to help you decide which of the four programs is best for you.

THE HARLEY-DAVIDSON® SPECTRUM CUSTOM PAINT PROGRAM

The Spectrum Custom Paint Program allows you to have your Harley® painted to match any color scheme you can imagine. Start with your own sheet metal, or buy a replacement set. You can have individual fenders and tanks painted, or order complete sets, using the part numbers shown below.

You will be able choose your main color, panel color, top coat, and pinstripes. You can specify a "clear", "pearl" or "candy" finish top coat. The top coat is a special paint that will work with the main and panel colors to create different effects.

Shown on these two pages are just a few of the unlimited color options available. Mix & match colors from vintage bikes, classic cars, or any other monochrome or two-tone paint scheme you can think of.

692 SECURITY

NEW

A. HARLEY-DAVIDSON®
FACTORY SECURITY SYSTEM

Equip your 2000 - later Harley-Davidson VRSC, Dyna, Softail® or Touring model with the only security system designed and approved by The Harley-Davidson Motor Company.

When armed, the Security System disables the starter and ignition while monitoring the electrical system and vehicle motion with adjustable sensitivity. Minor disturbances trigger a momentary warning; major ones an unbroken thirty-second alarm after which the Security System returns to monitoring. A distinctive four-way flasher pattern is the alarm signal. An optional self-powered Smart Siren Kit adds a piercing scream, which sounds even if the battery cable is cut.

The Security System is armed and disarmed with a remote control waterproof key fob utilizing state-of-the-art rolling code technology. If the key fob is not available, the rider may disarm the system by keying a previously entered personal code on the turn signal switches. A flashing status indicator informs the rider that the Security System is armed or disarmed.

When armed in the Transport Mode, the Security System disables the starter and ignition, but monitors only the electrical system, not vehicle motion. The vehicle may be moved, but electrical tampering triggers an alarm.

An Extended Storage Mode keeps the battery from discharging when the Security System is armed for extended periods of time.

The Security System is compatible with FL Touring models equipped with approved TLE/Ultra Sidecars when the system is configured as described in the SIDECAR OWNER'S MANUAL.

Unique products developed specifically for Harley-Davidson® transmissions to provide superior lubrication. Consider these unique performance features:

- Maintains Viscosity (doesn't thin out).
- Conventional gear lubes or motor oils can actually be sheared by the high-speed action of the drive gears. The result is a loss of viscosity or thinning out in service and high wear to the gear teeth.
- These products are designed to withstand this shearing action and maintain viscosity between services.
- Superior lubrication over wide temperature ranges. These fluids are not affected by changes in temperature as much as conventional lubes or oils.
- Fights corrosion and wear. H-D's Semi-synthetic Transmission Lube and Sport-Trans Fluid contain special additives to protect against rust and corrosion. They also contain potent high film-strength anti-wear additives to handle heavy loads placed upon the drive gears.

Sport-Trans Fluid (Sportster®)
Special formula gear and chaincase lubricant for use in all '71-later XL and XR models.

Semi-Synthetic Transmission Lube (Big Twin)

PRIMARY CHAINCASE LUBE (not shown)
Designed specifically for use in the primary chaincase on all '84-later FL, FLT, FX, FXR, Softail and Dyna Glide models with the wet type diaphragm-spring clutch.

GENUINE HARLEY-DAVIDSON® MOTORCYCLE OIL
Harley-Davidson's Genuine H-D® 360 Motorcycle Oil is the only oil developed and tested exclusively for use in Harley-Davidson motorcycles. Our unique additive package helps prevent engine wear and helps keep your engine cooler, cleaner, free of sludge, varnish and corrosion.
Harley-Davidson V-Twin motorcycles operate at higher temperatures than water-cooled automobiles, thus a specific high temperature additive package is necessary to protect the engine. Be assured, H-D 360 is the only oil that should be trusted in a Harley-Davidson V-Twin engine.

Available in SAE 10W40, SAE 20W50, SAE 50, and SAE 60. Refer to your Harley-Davidson owner's manual for the proper SAE grade recommendation based on the climate and temperature range you ride in.

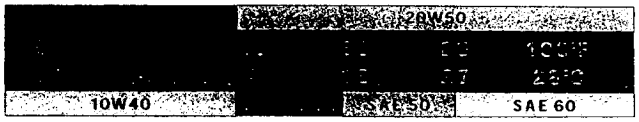
What Goes Into Harley-Davidson® Motorcycle Oil?

Harley-Davidson Motorcycle Oil is unlike off-the-shelf oils. H-D® 360 is a complex mixture of carefully selected premium quality mineral oil and an exclusive performance additive package. Designed for maximum performance in H-D V-Twin engines, H-D 360 is a unique oil for a unique application.

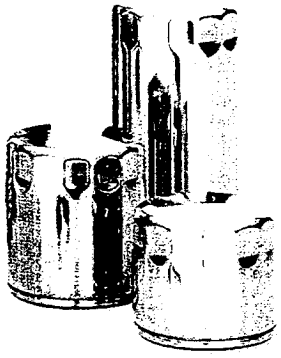
H-D® 360 — More Than a Logo — A Performance Rating System

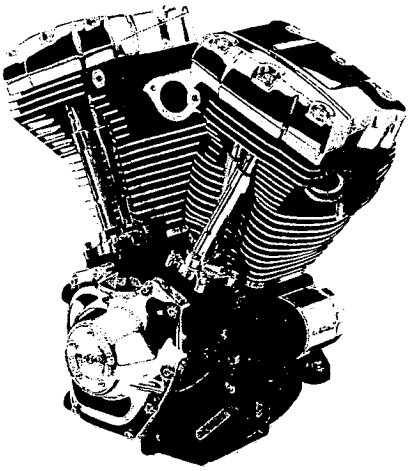
The name Harley-Davidson 360 has its roots in the testing criteria applied to certify this new oil. More than just a dynamometer test, it is a designation of an entirely new performance rating system. To earn the name H-D 360, this oil had to outperform all others on a full round of tests. Laboratory bench testing measured viscosity retention and oxidation stability. Next, the oil was run on the open road under high ambient temperatures and high load conditions. After each test, the engineers performed a complete engine tear-down and analysis. Plenty of oils vied to carry the name Harley-Davidson, but only one oil met the challenge: H-D 360.



What viscosity grade should I use in my Harley®?

The recommended viscosity grade for all temperature conditions is SAE 20W50 Harley-Davidson Motor Oil. SAE 10W40 H-D Motorcycle Oil is also available and appropriate for low temperature climates. The SAE 50 H-D Motorcycle Oil is satisfactory in ambient temperatures of 60-80°F, and the SAE 60 H-D Motorcycle Oil in ambient temperatures above 80°F. SAE 20W50 covers the broadest range of operating temperatures.





What does Harley-Davidson motorcycle oil do for my engine?

It provides the best lubrication you can buy and:

- Protects the engine from rust and corrosion.
- Keeps the engine clean.
- Cools engine parts.
- "Seals in" combustion pressure.
- Prevents foaming.
- Permits easy starting at a wide range of temperatures.
- Provides quick oil circulation.
- Reduces friction and power loss.

How often should I change my motorcycle engine oil?

You should change your motorcycle engine oil and engine oil filter at the first 500 mile service interval and at every 5,000 mile service interval thereafter. If you ride your motorcycle hard, under dusty conditions, or in cold weather, the engine oil and filter should be changed more often. You should always change your engine oil and filter prior to winter storage (or any extended storage) so that your engine oil is clean and free of contaminants for this time period.

Can I go longer between oil changes by changing the filter?

NO! The job of the oil filter is to remove dust, soot and other solid matter. But it cannot remove water, gasoline or acids. And, it can't do the job of additives that have been used up. Follow the recommended oil and oil filter changes in your Harley owner's manual.

ISO 9001

Registered Facility

TUV Rheinland of North America, Inc.

Harley-Davidson Parts and Accessories Division, a facility of Harley-Davidson Motor Company, recently achieved certification to its ISO 9001 International Quality Standard registration.

CAUTION: It is possible to overload your motorcycle's charging system by adding too many electrical accessories. If your combined electrical accessories consume more electrical current than your vehicle's charging system can produce, the electrical consumption can discharge the battery and cause vehicle electrical system damage. Ask your dealer for advice about the amount of current consumed by additional electrical accessories.

IMPORTANT:
To the best knowledge of Harley-Davidson, the specifications, descriptions and illustrative material contained herein are accurate as of the date this catalog was approved for printing (June, 2001). Harley-Davidson reserves the right without prior notice to discontinue at any time at its discretion any of the parts and accessory items depicted herein or change specifications or designs or prices without incurring any obligation to the customer. All parts and accessory items are also subject to availability and to prior sale by our dealers.

Hastings, Loctite, Permatex, S100, Blue Coral Blue Buster, Novus, Lexan, Dunlop, and Lubit-8 are the trademarks of their respective owners.

FINALLY, ONE ACCESSORY THAT COVERS THE WHOLE BIKE.

In the 700-plus pages that precede this, there are thousands of accessories that customize different parts of your bike. Well, here's one that covers the whole thing: a 12-month warranty on accessories ordered before delivery of a new Harley-Davidson® motorcycle.* That's nine months longer than the standard 90-day warranty and it covers your bike from axle to axle. The warranty is great, but customizing your bike before delivery also does a lot more:

The cost of accessorizing can be rolled into your new vehicle financing, so everything is covered by your monthly payment.

You can maintain an accurate, consolidated record of the new accessories for insurance purposes in case your motorcycle is ever stolen or damaged.

Choosing your motorcycle's "look" in advance (rather than over the course of months or years) creates a "theme." Plus, your Harley-Davidson® dealer can ensure that all accessories will work well together.

When you order your new Harley,® customize it with Genuine Motor Accessories and Screamin' Eagle® Performance Parts. It will automatically come with the added bonus of a full year's peace of mind.

* Participating authorized U.S. Harley-Davidson dealers may offer you a 12-month limited warranty on street legal Genuine Motor Accessories (including street legal Screamin' Eagle Performance Parts) installed by the dealer on a new Harley-Davidson motorcycle prior to delivery, subject to certain terms and conditions. Ask your dealer for details.

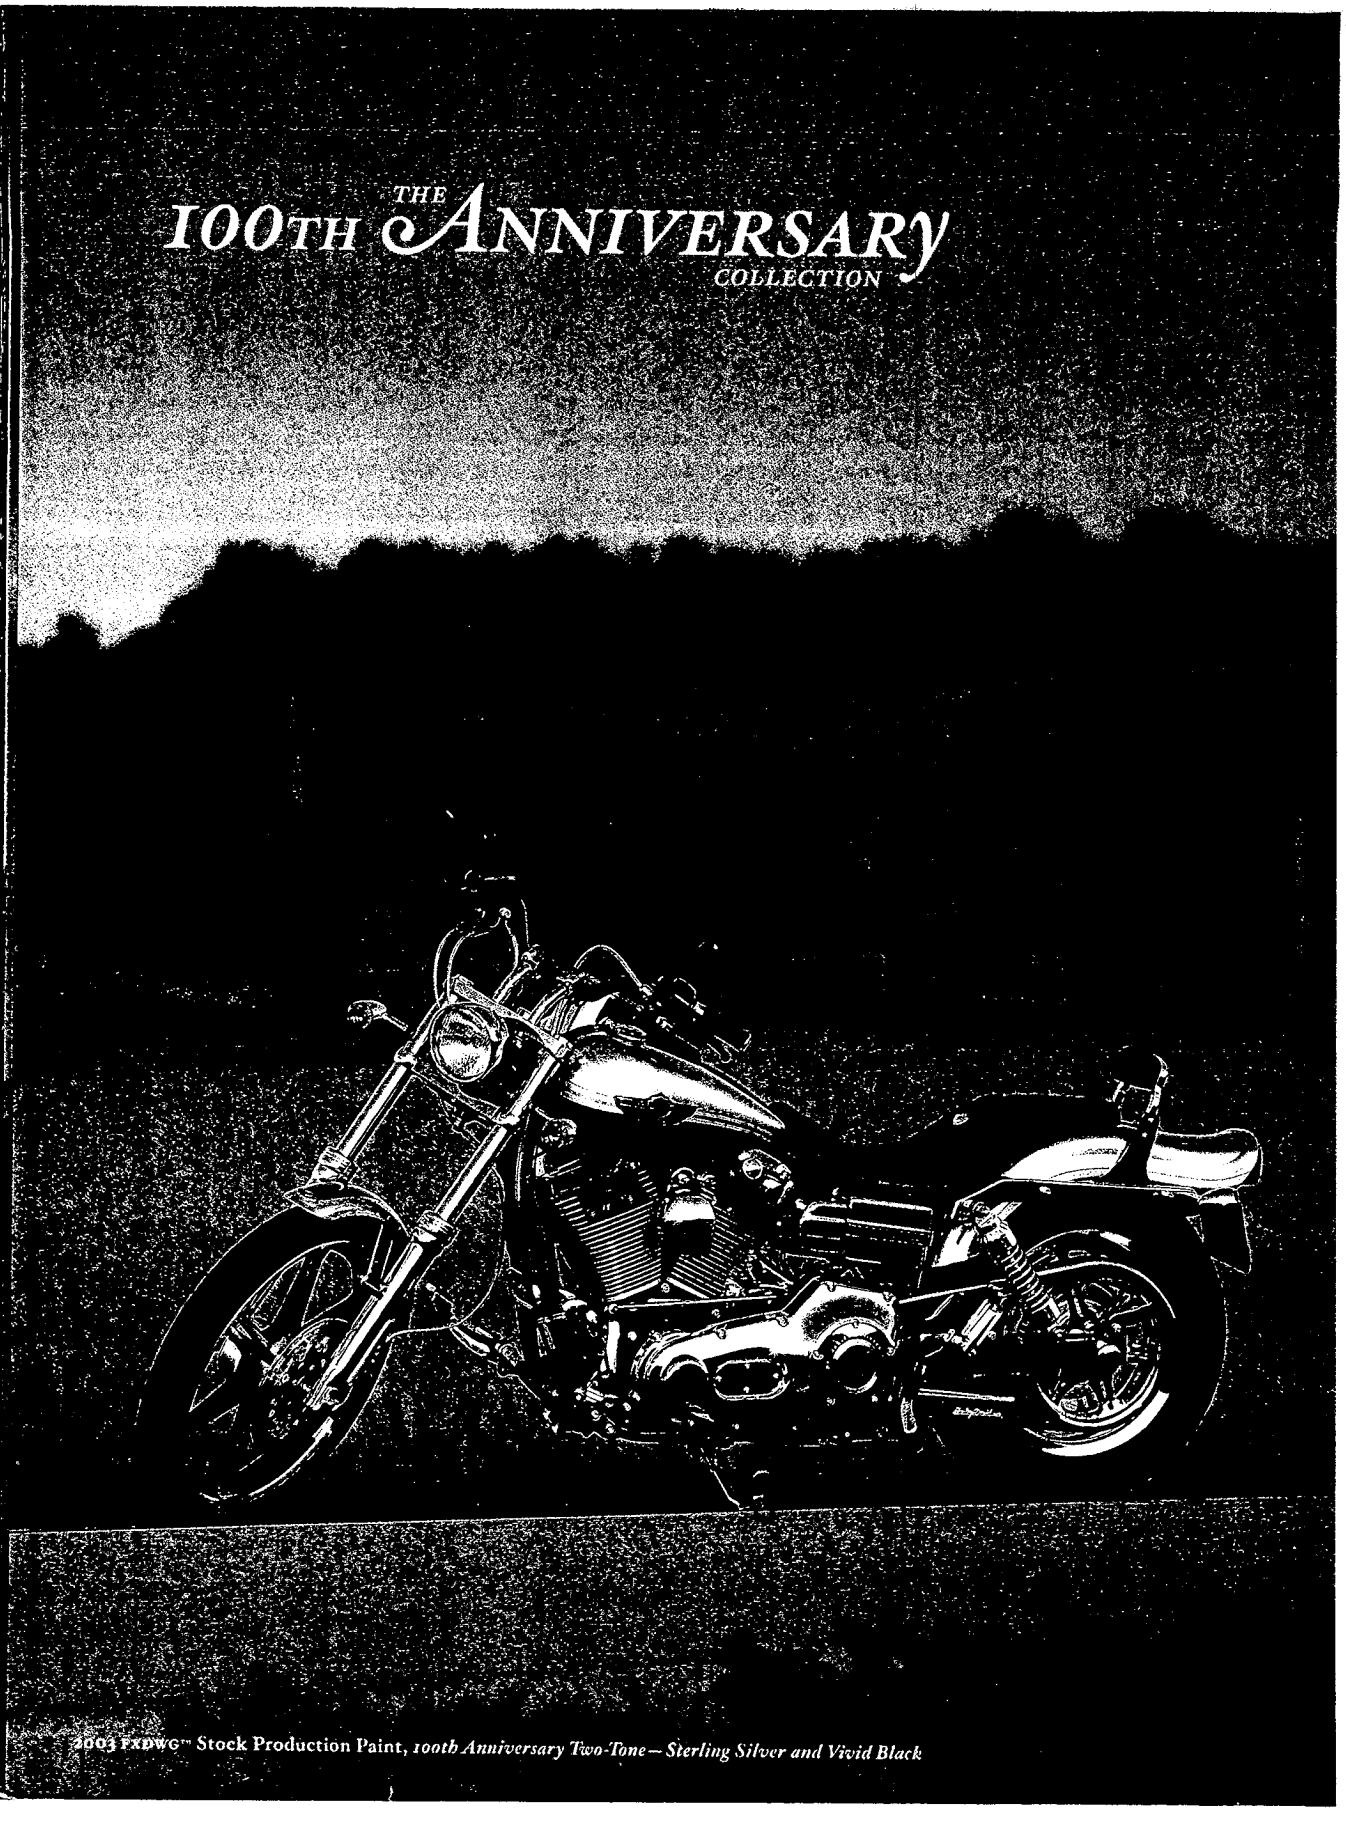
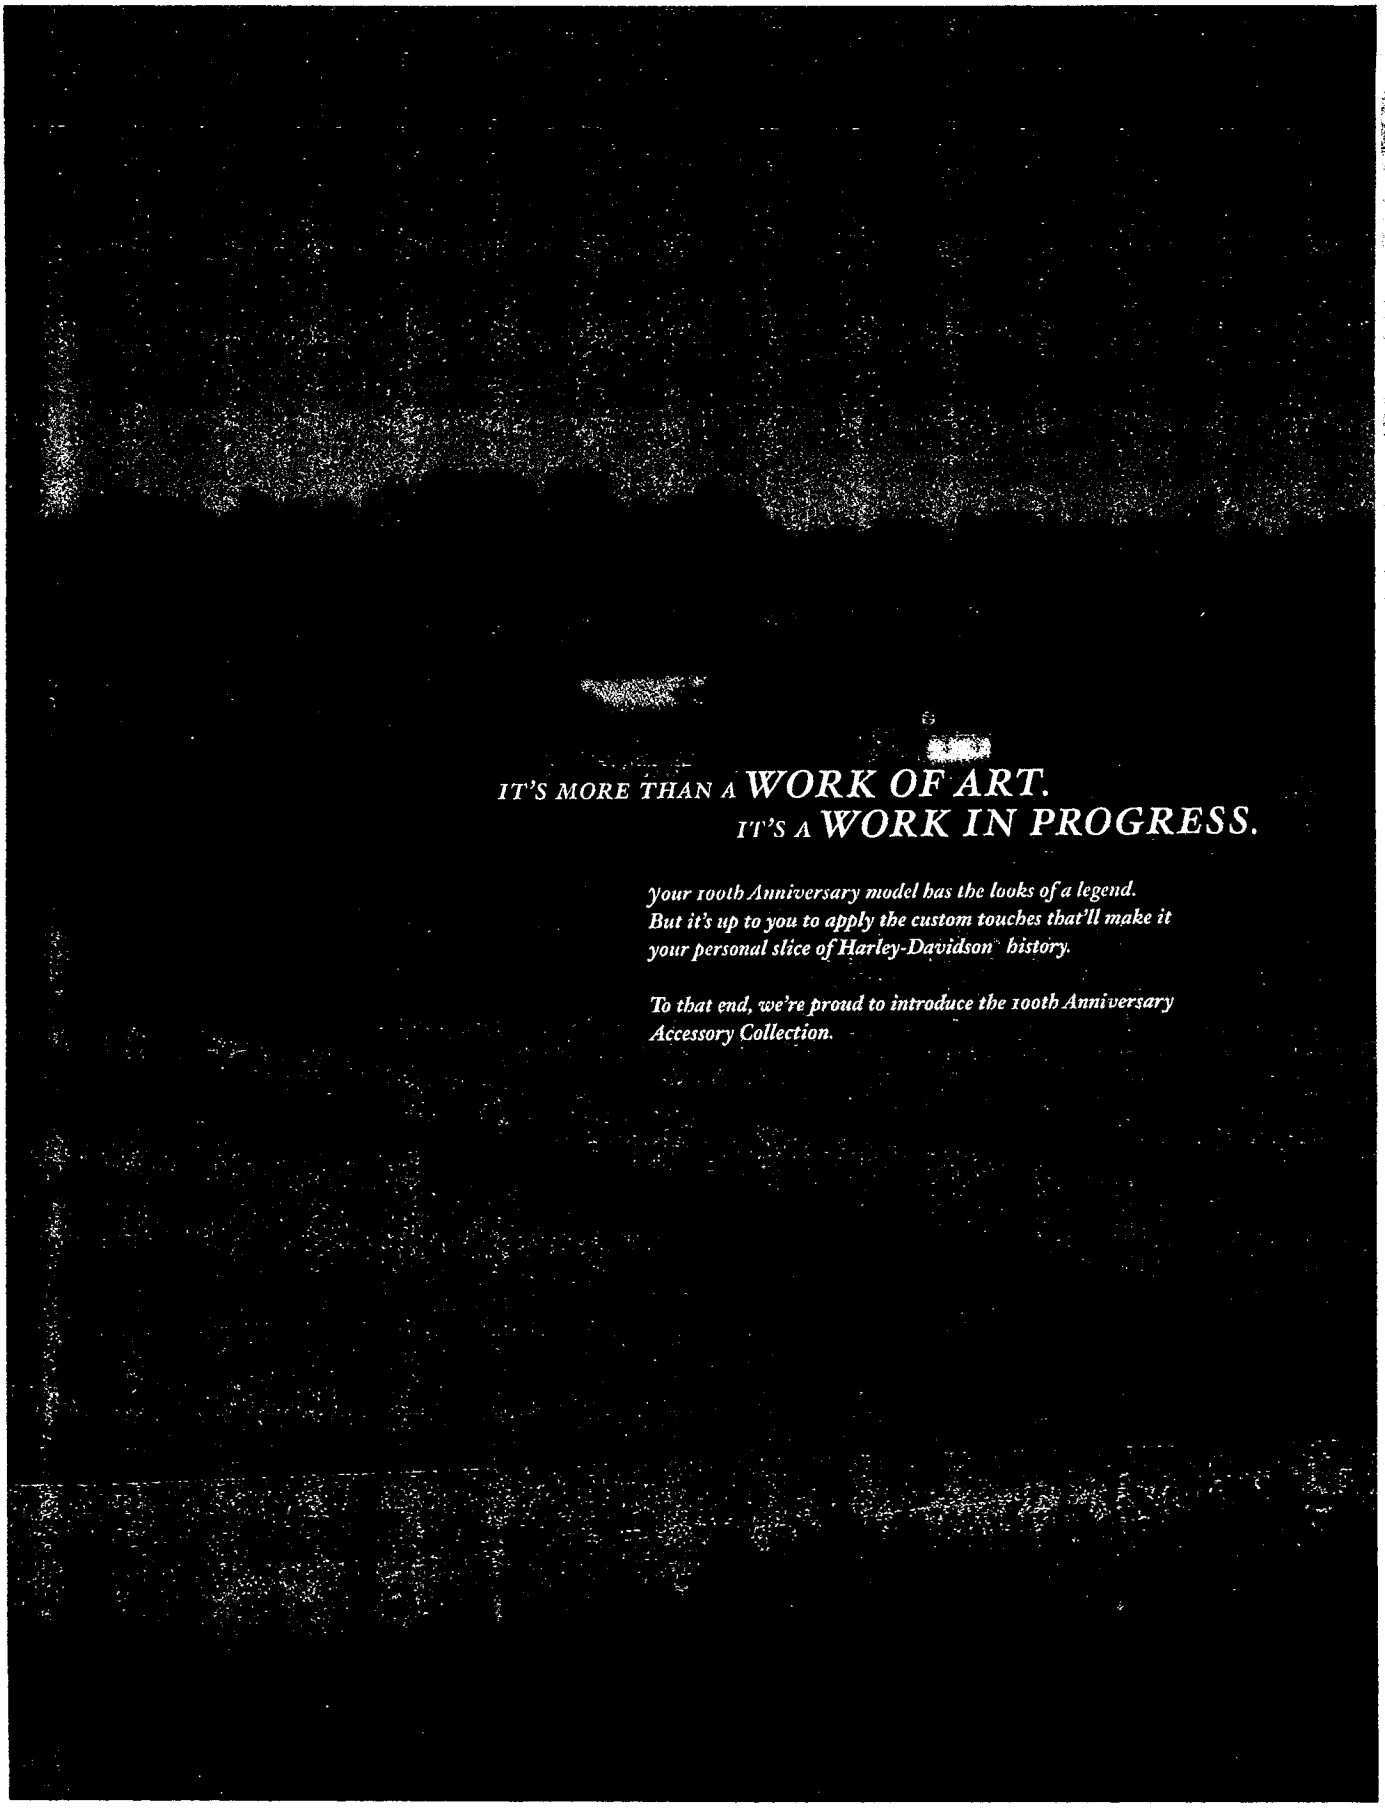
THE 100TH ANNIVERSARY COLLECTION



2003 FXDWG™ Stock Production Paint, *100th Anniversary Two-Tone – Sterling Silver and Vivid Black*



IT'S MORE THAN A WORK OF ART.
IT'S A WORK IN PROGRESS.
your 100th Anniversary model has the looks of a legend.
But it's up to you to apply the custom touches that'll make it
your personal slice of Harley-Davidson® history.
To that end, we're proud to introduce the 100th Anniversary
Accessory Collection.

CENTURY MARK

CREATED TO COMMEMORATE A CENTURY OF HARLEY-DAVIDSON MOTORCYCLES, the 100th Anniversary Accessory Collection includes custom options ranging from windshields and handgrips to derby covers and saddles. The medallions that grace most of these accessories are created with a proprietary, multi-step manufacturing process that produces an astonishing level of detail and a startling prismatic effect worthy of Harley-Davidson's rich heritage. Available as individual pieces or as part of our exclusive 100th Anniversary Gold Key Accessory Packages, these accessories can make any Harley-Davidson model a part of motorcycle history. And with the purchase of a Gold Key Accessory Package, you'll receive a hand-polished 100th Anniversary key cut specifically to fit your motorcycle. Featuring a genuine sterling silver 100th Anniversary logo, these solid brass keys are available only with the purchase of a Gold Key Accessory Package—making them a true collector's item. Contact your dealer for details.

Pre-packaged to deliver coordinated centennial looks without the guesswork, Gold Key 100th Anniversary Accessory Packages feature an assortment of 100th Anniversary Accessories designed to match your 2003 Harley-Davidson® motorcycle. Ordering a Gold Key Accessory Package not only costs less than buying the parts individually—it's also the only way to get your hands on a 100th Anniversary Gold Key. And that should be reason enough.

Special Care Instructions

The 100th Anniversary Medallion is chrome-plated with paint-filled accents and a special hologram surface on the Harley-Davidson "Bar and Shield." To keep the surface in top condition, lightly wipe with a Harley-Davidson Microfiber Detailing Cloth P/N 94663-02 using clear water or a gentle cleaner, such as Sunwash P/N 94659-98, Bug Remover P/N 94657-98 or Harley Gloss P/N 94627-98. To prevent damage to the Medallion surface, do not use any detergents, chemical solvents, polishes or abrasive cleaning agents.

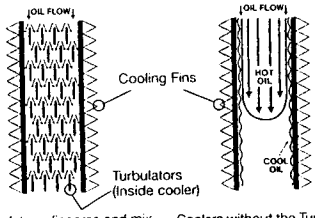
F. SPORTSTER® PREMIUM OIL COOLER
This product brings touring model cooler technology to the Sportster. This cooler features a unique "Turbulator" system that efficiently distributes oil across the cooling chambers. The air fins feature several louvers to efficiently dissipate heat.

62874-99 Fits '82-later XL models.

INSIDE VIEW OF PREMIUM OIL COOLER WITH TURBULATORS

INSIDE VIEW OF CONVENTIONAL OIL COOLER WITHOUT TURBULATORS



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

G. SPORTSTER CHROME OIL COOLER COVER
Add a beautiful accent to your Sportster Premium Oil Cooler. This chrome cover is designed to allow proper air flow through the integrated duct work. Requires Permatex® clear silicon RTV adhesive for installation.

I. THERMOSTAT KIT
This thermostat features an advanced design that makes it smaller so that it can be hidden after installation. Thermostat is designed to allow oil flow to the cooler starting at 180 degrees Fahrenheit, while restricting oil flow to the cooler when oil temperature falls below 180 degrees Fahrenheit. Reliable function provides additional confidence to the rider who adds an oil cooler to their riding application.
