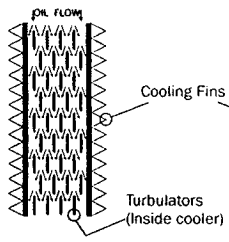
A. Premium Oil Cooler Kit for Touring Models

This cooler was designed specifically for Harley-Davidson to outperform all other coolers in the industry. This cooler features a unique "Turbulator" system that evenly distributes oil across the cooling chambers. The air fins are designed to efficiently dissipate heat. This popular Touring oil cooler has been re-designed to simplify installation and enhance performance. The larger heat exchanger provides additional cooling efficiency. Kit features an adapter plate with integrated thermostat that allows oil lines to connect to the oil filter bracket. Kit comes complete with mounting hardware and precut oil lines.

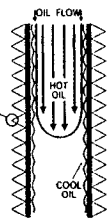
26082-05A	Fits '99-later Touring models. Does not fit with Chrome Display Stand P/N 99002-97A or models equipped with sidecars.	$289.95

Inside View of Premium Oil Cooler with Turbulators



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Inside View of Conventional Oil Cooler without Turbulators



Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

B. Chrome Oil Cooler Cover Kit

Chrome-plated cover hugs the profile of your Premium Oil Cooler. Designed to dress up your oil cooler, this easy-to-install cover does not interfere with air flow across the cooling coils.

I. Custom Auxiliary Lighting Bracket Kit

Shaped by the wind, these Custom Auxiliary Lighting Brackets blend into the curving contours of the Road King® nacelle or the Electra Glide® fairing. Kit includes passing lamp housings, chrome mounting brackets and hardware. Installation requires the re-use of Original Equipment sealed beam lamps and retaining rings. Bullet Turn Signal Kits sold separately.

A. Dual Bulb Halogen Headlamp Kit

The Dual Bulb Halogen Headlamp features advanced reflector optics and separate bulbs for high and low beam functions. The euro-inspired projector beam styling combines a state of the art look with a CAD designed faceted reflector bowl that is optimized for crisp patterns and light cut-off. The single upper bulb functions in low beam, and both upper and lower bulb operate in high beam. The low beam setting produces a wide curb-to-curb light pattern, and the high beam adds focused light down the center of the lane without compromising width. Kit includes housing, 55 watt low beam halogen lamp, 35 watt high beam halogen lamp and all necessary mounting hardware. Does not meet ECE regulations.

67364-04	Fits '94-later Electra Glide® and Road King® models, and '94-later FL Softail® models equipped with Chrome Headlight Nacelle Kit P/N 67907-96. Kit includes mounting ring assembly.	$162.95

B. High Intensity Discharge (HID) Dual Bulb Headlamp Kit

Cut through the darkness. The Harley-Davidson High Intensity Discharge Headlamp Kit features a true HID (Xenon) low beam bulb that projects a curb-to-curb spread of "blue/white" light. Compared to the yellow light of a traditional Halogen bulb, the HID lamp produces a "Daylight Color Impression" that appears more natural to the user.

The HID Dual Bulb Headlamp assembly features unique advanced optics with separate low and high beam reflectors dedicated to focus the light for optimal illumination. The HID low beam is always illuminated, providing a wide pool of light, and the separate Halogen high beam bulb adds a focused shaft of light down the center of the lane.

The HID Dual Bulb Headlamp is not just a high-performance bulb, it's a complete lighting system. The system includes the HID bulb, an electronic starter, and a ballast system. The bulb is a complex tube that replaces the filament with arc-producing electrodes. The starter allows quick ignition of the arc, and the ballast converts incoming power to the high voltage needed to maintain the glow. The Xenon-filled HID bulb is resistant to vibration, and has a life expectancy of up to 10 times that of a Halogen bulb. The headlamp kit is DOT approved for use in all 50 states.

The complete Headlamp Kit includes the shock and vibration resistant housing, HID low beam bulb, halogen high beam bulb, starter, waterproof ballast, and all necessary wiring.

AMA® In the AMA Flat Track Series, Veteran Harley-Davidson® Factory rider Rich King set the bar high for 2005, winning the Springfield Mile on May 29th for the fourth time in five years. As he competes in his fifth season as a Factory rider, King is ready to write the next chapter in Harley-Davidson's legendary 90-year racing history.

A. Screamin' Eagle® 6-Speed Transmission and Gear Set

Now available with your choice of Hydraulic or Cable Clutch Release. Add a Screamin' Eagle 6-Speed Transmission to your Custom Vehicle Operations (CVO) motorcycle with Original Equipment hydraulic clutch, or any models equipped with Harley-Davidson® accessory hydraulic clutch system.

Designed from the ground up, the Screamin' Eagle transmission incorporates many of the best Original Equipment features, like late-style shifting mechanism and a newly designed "shift ring" system to make this the smoothest shifting Harley-Davidson® transmission available. The "shift ring" system is similar to the system used in the V-Rod® transmission, and it slides on the shafts to mate into the gears. This eliminates sliding heavy gears to accomplish the shift, and results in smooth, precise and light effort shifting. Sixth gear is a true overdrive, at a .89:1 ratio, and the first five gears mimic today's proven 5-speed ratios. The overdrive feature allows you to run a lower engine RPM in sixth gear, at any given road speed. Lower RPM can result in lower vibration, longer engine life and smoother cruising. The Screamin' Eagle 6-Speed Transmission is available as a complete transmission, or as a replacement gear set, and can be matched with Hydraulic or Cable-operated clutch controls.

Screamin' Eagle 6-Speed Transmissions feature forged chrome "trap door", forged shifter forks and forged and precisely ground gears. No speedometer or exhaust mount modifications are required. Complete transmissions are ready to install into the chassis, and the 6-Speed Gear Set Kits are designed to replace the stock gear set without removing the transmission. Gear Set Kits require slight modification (template included) to the Original Equipment transmission case, and include all necessary installation hardware.

Installation may require separate purchase of vehicle-specific Hydraulic or Cable-operated Clutch Side Cover Release Kit. The forged side covers feature the "Screamin' Eagle" script and bold "6 Speed" logo laser-etched into the mirror-chrome surface. See page 529 for applications.

A. Screamin' Eagle® Active Performance Muffler Kit

The best of both worlds. This street-legal exhaust system provides the horsepower and torque characteristics of Screamin' Eagle Pro Race-Use Mufflers while maintaining EPA and CARB approved sound and emission levels. The catalyst-equipped exhaust system utilizes an electronic servo-controlled butterfly valve to alter the gas path between the left and right muffler. The integrated on-board computer measures operating conditions, and limits the exhaust flow to the left muffler to optimize performance, sound and emissions. The results are enhanced torque and horsepower throughout the operating range, and the rich, pleasing exhaust note you expect from a Harley-Davidson. The complete system includes left and right catalyst-equipped mufflers, servo motor, cable-operated butterfly valve, plug-in on board computer with service diagnostic capabilities, left-hand heat shield, and all necessary installation hardware. Mufflers are 49 state street-legal when installed on fuel-injected motorcycles. ECM calibration is required, and dealer installation is recommended. ENGINE PROGRAMS

You're Only Born Twice

Your engine is the heart of your Harley-Davidson® motorcycle—the machinery that gives your bike its signature look, feel and sound. So we've developed three affordable engine programs that allow you to have your aging motor remanufactured to original factory specifications, or replaced with a brand new, bona fide Harley-Davidson powerplant with a brilliant factory finish.

Smart Start

FOR EVOLUTION® 1340 ENGINES If you'd rather replace your Evolution motor than get it remanufactured, the Smart Start Engine Program offers brand new, Harley-Davidson built and factory-tested Evolution 1340 engines at an unbeatable price—in the standard Silver and Polished or classic Black and Chrome finish. Black and Chrome or Silver Painted Softail® transmissions are also available.

New Era

FOR TWIN CAM® AND REVOLUTION® ENGINES Through the New Era Engine Program, you can purchase a fresh-off-the-line, factory-built and tested Twin Cam 88, 95 or 103 cubic inch "Stroker" engine, or 1130cc and 1250cc Revolution engines, manufactured to the latest model year specifications. Choose Silver and Polished or Black and Chrome, and add a matching transmission to complete the custom look.

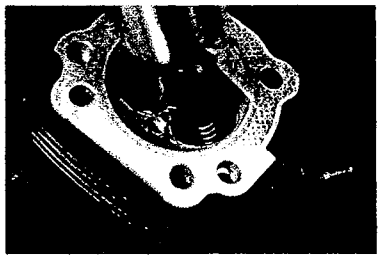
Engine Remanufacturing

FOR EVOLUTION® 1340 AND TWIN CAM® ENGINES When the miles start to add up, the Harley-Davidson® Engine Remanufacturing Program can put the rumble back into your powerplant simply, quickly and affordably. The program is available for the Evolution® 1340, Twin Cam 88,® Twin Cam 88B™ and Twin Cam 95™ engines. Contact your Harley-Davidson® Dealer for more information.

Remanufacturing Process

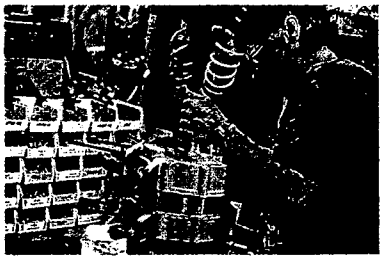
STEP 1: SHIPPING Your Harley-Davidson dealer will remove your engine and then ship it to our Capitol Drive facility, where it will be unpacked and prepped for disassembly.

STEP 2: DISASSEMBLY The engine parts that can be remanufactured to original specs are saved, while others are discarded. All reusable parts are cleaned and powder coated.

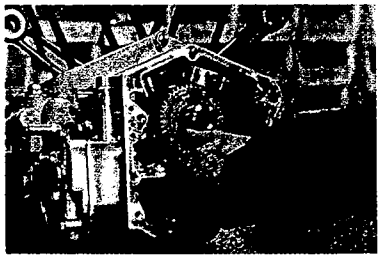


STEP 3: REMANUFACTURING Reusable parts are machined, rehoned and rebored to exact tolerances, and then passed through rigid specification checks.

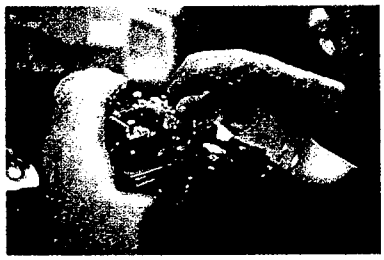
STEP 4: REASSEMBLY Crankcases are set, bearings pressed and parts reassembled. Chromed and polished parts are replaced. And your engine is then upgraded to meet the latest specifications, where possible.*



STEP 5: TESTING AND DETAILING Your engine is hot-tested to Harley-Davidson standards. If it passes, it receives a one-year unlimited mileage factory warranty. Then your engine is cleaned, polished and packed for shipping.



STEP 6: REINSTALLATION About two weeks after it left, your engine—bearing its original Vehicle Identification Number (VIN)—will return to your dealer, who will reinstall it within your motorcycle's chassis.



**For compliance and warranty program, all engines will receive stock camshafts. If you have installed performance cams, you will lose them unless you reinstall the stock versions before your engine is shipped.*

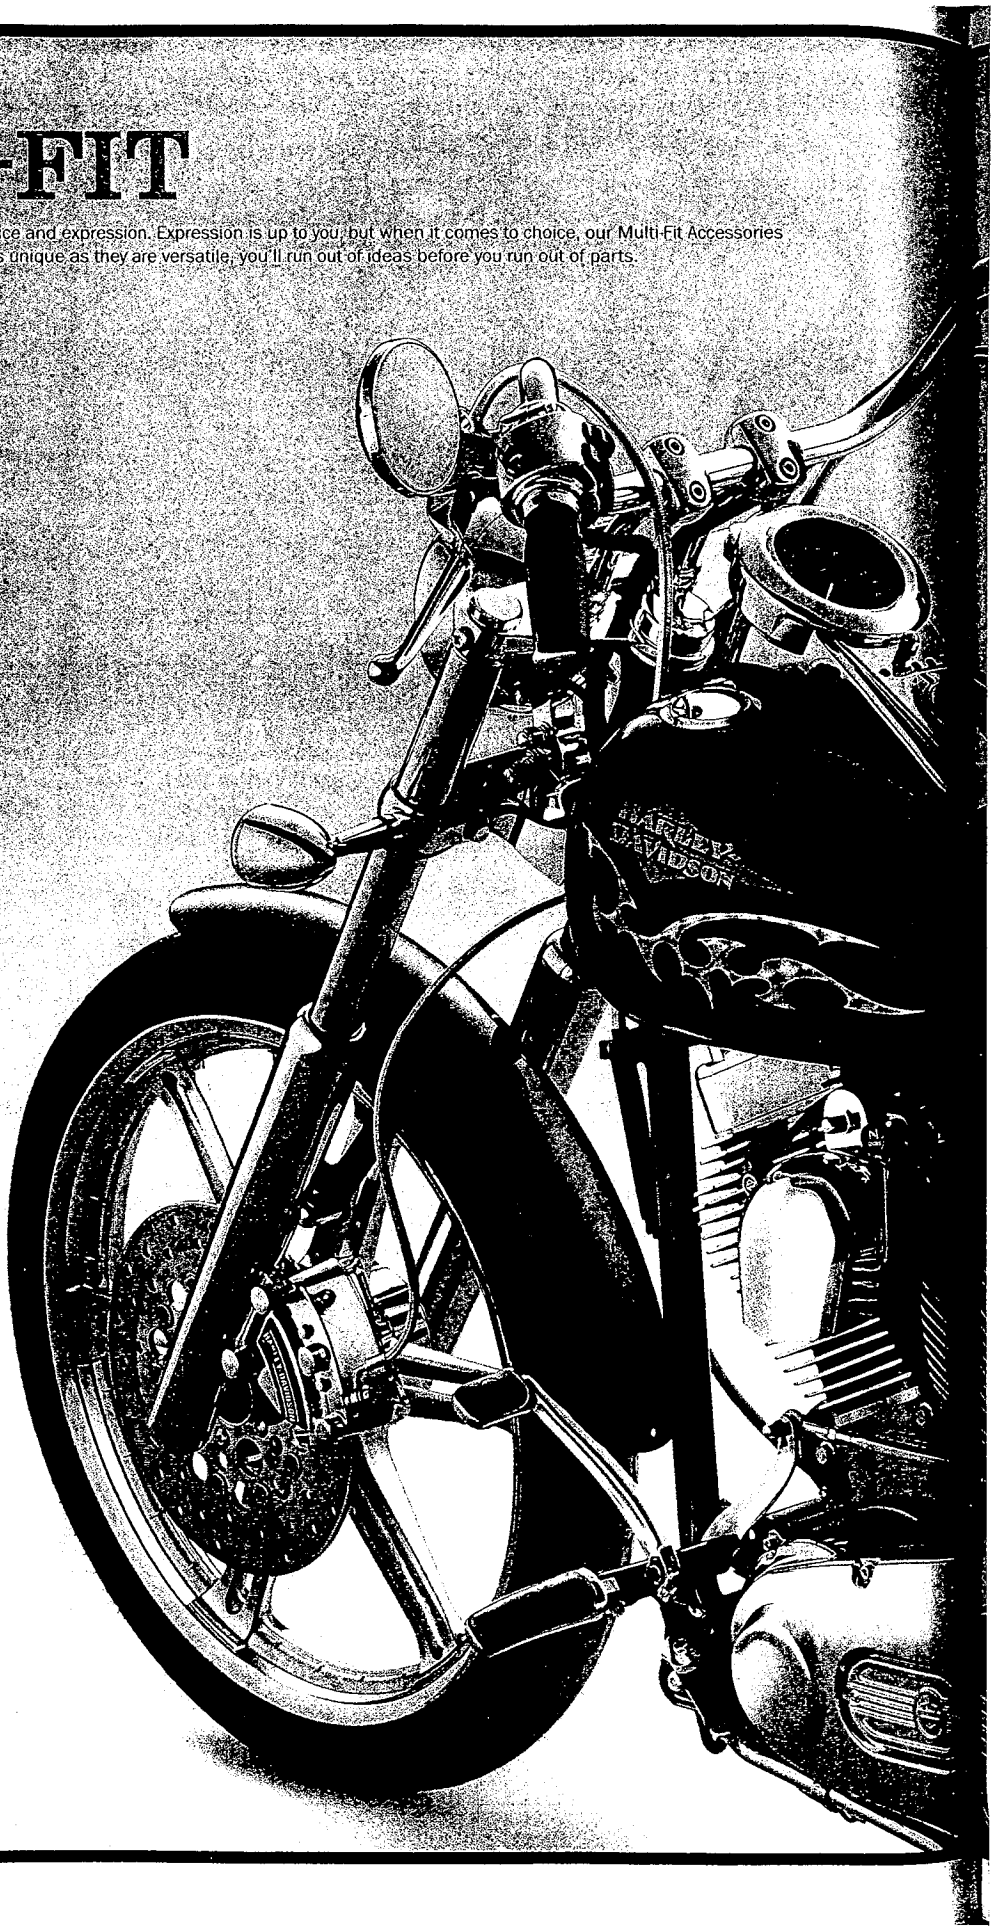
MULTI-FIT

Customization is about freedom, of both choice and expression. Expression is up to you, but when it comes to choice, our Multi-Fit Accessories have you covered. With custom collections as unique as they are versatile, you'll run out of ideas before you run out of parts.



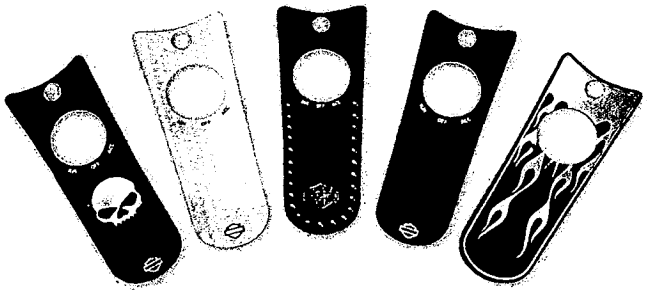
GENUINE
MOTOR ACCE

Covering All The Bases

You've begun the process. You've picked the seat, windshield and touring accessories to create a bike that fits both you and the way you ride. But now, it's time to build a bike that matches your sense of style as well. Developing a "look" for your bike doesn't have to be difficult; before you start, just decide on a theme and stick with it. After adding a few well-chosen covers, a console insert, and complementing hand grips, you'll have a strong style that tells other motorists exactly what you're about.

Complete The Look

Whether it's flames, skulls or classic chrome, installing a complete collection draws the eye from one end of the bike to the other. Installing engine covers, mirrors, foot controls and even hand controls is no problem for the average rider. So, either add them in steps or all at once—for a big visual impact.



Add Your Personal Accents

If you're after a truly unique look, the answer may be right under your nose. With 12 chrome, color, or leather styles to choose from, a Personal Accents Console Insert is a piece of eye candy reserved especially for you.

Heated Hand Grips

Keep comfortable on those cool morning or frigid night rides. Warm hands have a major impact on overall body comfort, and sometimes gloves just aren't enough. These thermostatically controlled grips have variable heat settings and automatic temperature monitoring to adjust to changing ambient temperatures. The grips remain at a constant temperature regardless of changes in outside temperatures. The self-contained control circuit and control knob means you have no additional switches or controller boxes to mount, and the grips are switched on/off with the ignition to avoid draining your battery. The glueless grip design allows grip removal if you change handlebars or motorcycles. Patent pending.

Handlebar Basics*

Bars communicate style and also affect how you handle your bike. You want to select a handlebar that puts your arms in a position that matches both the attitude you want to convey and the kind of riding you expect to do. While every handlebar has its own distinct measurements and characteristics, there are four basic styles to consider in your quest for custom-styled comfort:

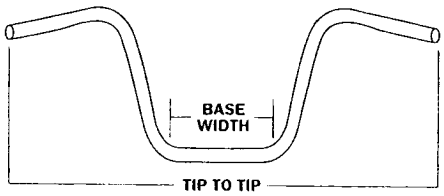
Ape Hangers
Pure custom attitude, best suited for boulevards and long straightaways.

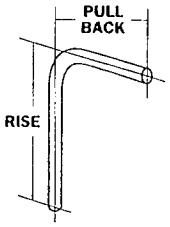
Drag Bar
A flat, no-nonsense handlebar for an aggressive riding style.

Sport Bar
Lower and wider bar for a slightly upright, forward leaning position.

Pull Back
Brings handgrips closer to the body for a more upright riding posture.

Handlebar Measurements





Rise is the vertical distance between a handlebar's tip and its base. Adding risers to bars that sit low can help put hand grips in a higher spot.

Pull Back brings hand controls closer while also lowering grip height. More pullback facilitates an upright posture, and suits riders with a shorter reach.

Width is measured from the tip of one hand grip to the other. Touring calls for a wider bar, while sport riding is best with a narrower tip-to-tip width.

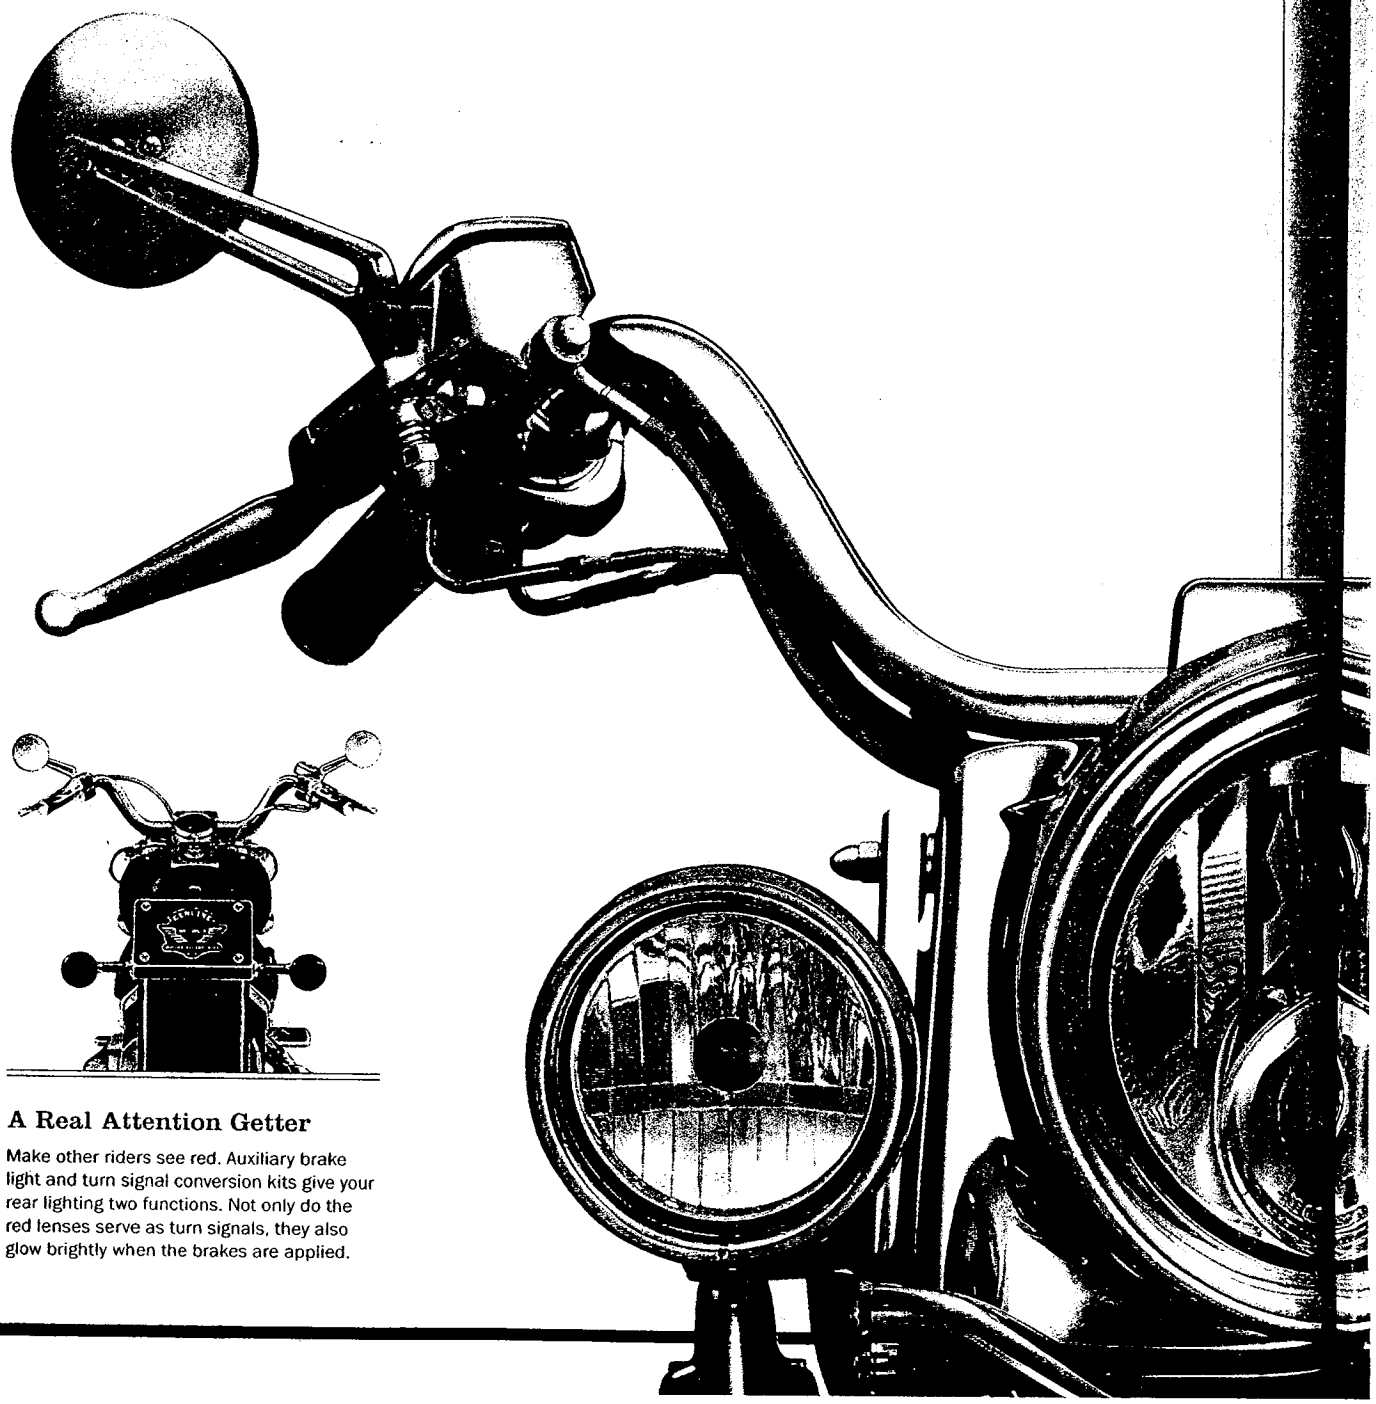
Shine Some Light On The Subject

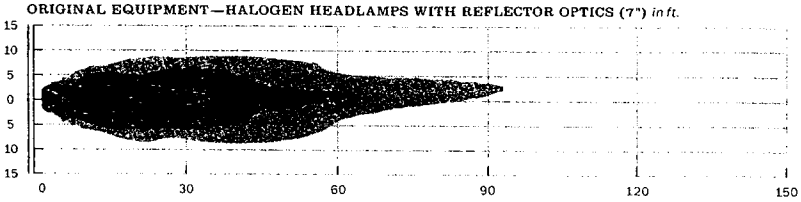
On a purely functional level, motorcycle lighting serves two main purposes: to help you see and to help others see you. In reality, lighting also serves as a design element on your motorcycle. The signature look of a Road King® model is defined by the massive 7" headlamp. The slim profile of a Sportster® motorcycle is mirrored in the compact headlamp and eyebrow. Harley-Davidson® offers a wide variety of Auxiliary Lamp Kits, Headlamp Trim Kits and Turn Signal Kits that provide a great look.



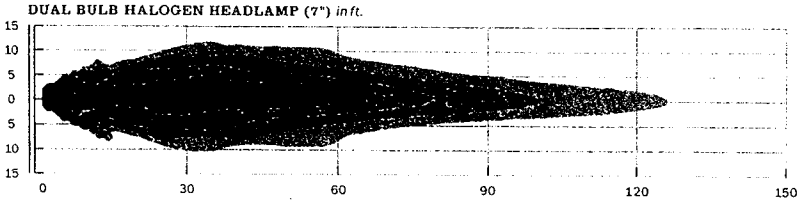
A Real Attention Getter

Make other riders see red. Auxiliary brake light and turn signal conversion kits give your rear lighting two functions. Not only do the red lenses serve as turn signals, they also glow brightly when the brakes are applied.

ORIGINAL EQUIPMENT—HALOGEN HEADLAMPS WITH REFLECTOR OPTICS (7") *in ft.*



DUAL BULB HALOGEN HEADLAMP (7") *in ft.*



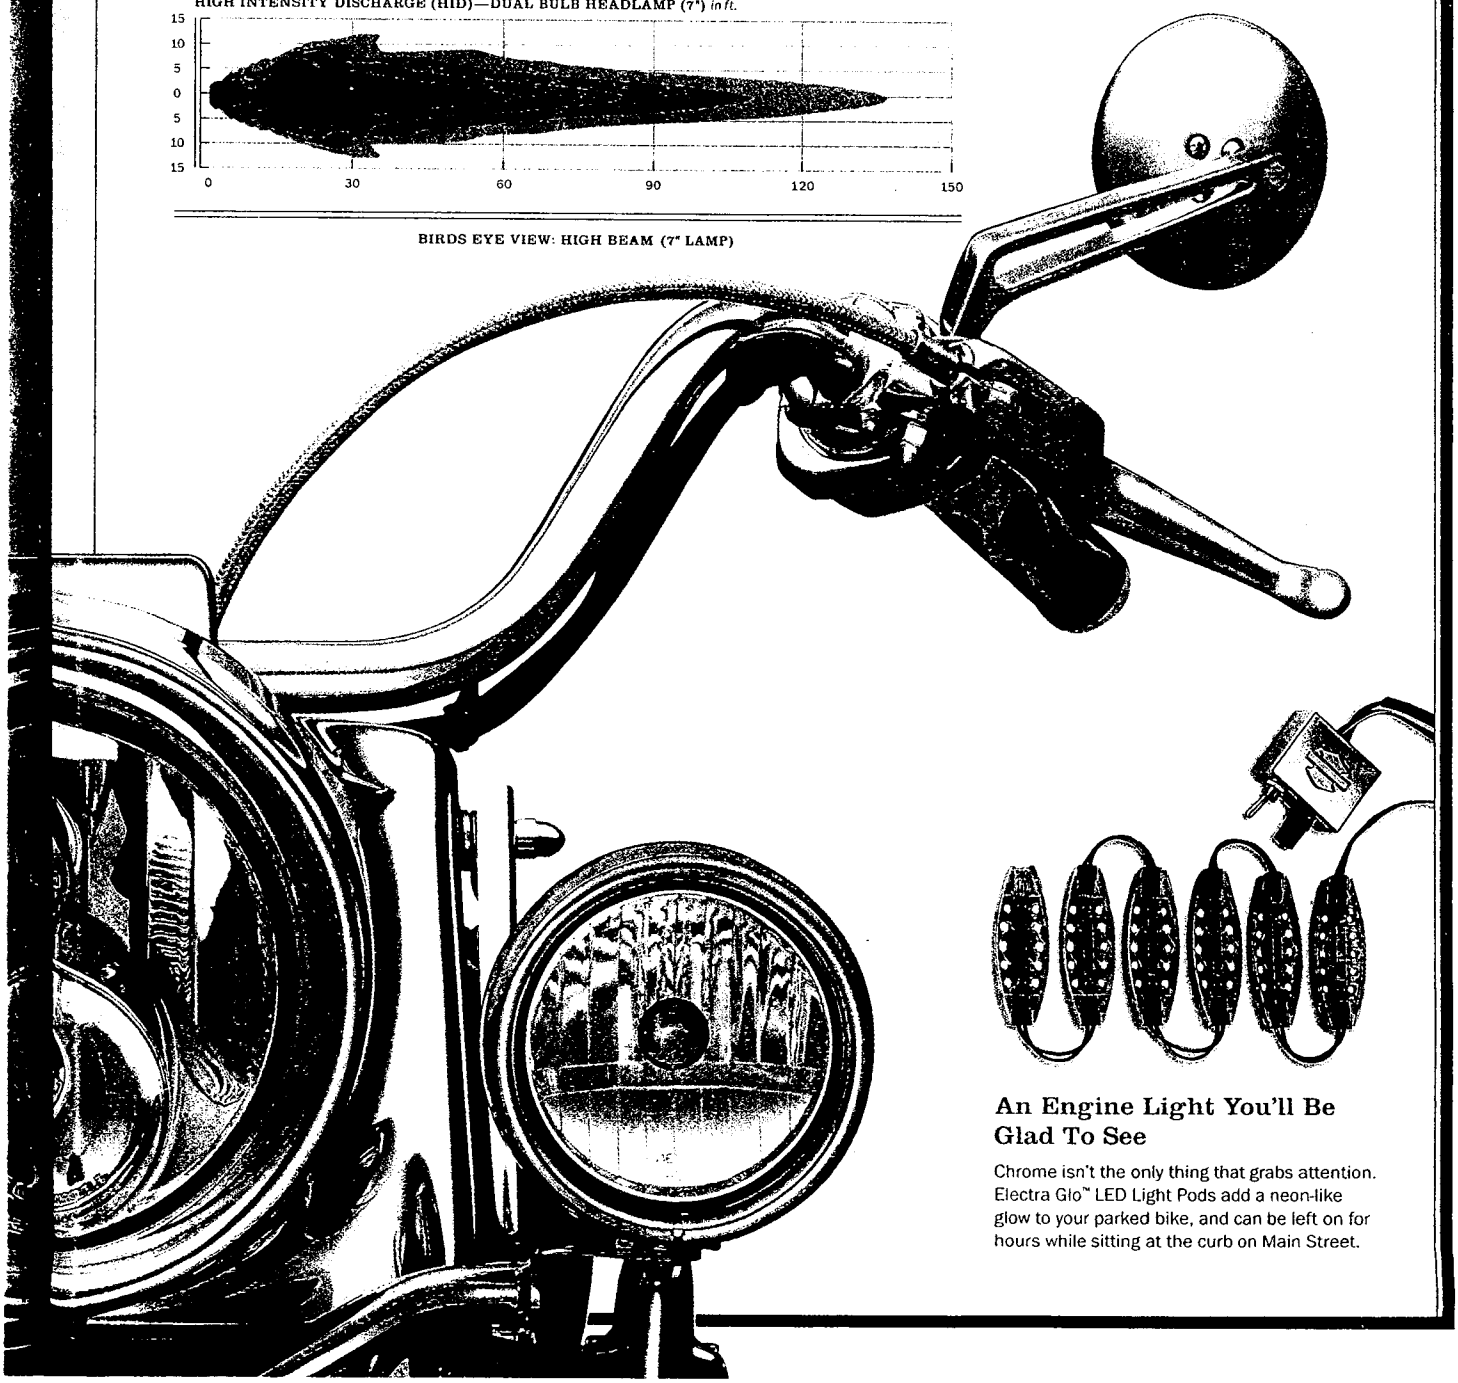
HIGH INTENSITY DISCHARGE (HID)—DUAL BULB HEADLAMP (7") *in ft.*

BIRDS EYE VIEW: HIGH BEAM (7" LAMP)

Let There Be Light

Featuring the latest in reflector optic design, Harley-Davidson® Original Equipment headlamps and accessory Dual Bulb Halogen Headlamps offer low-beam performance that is superior to traditional sealed beam bulbs. The wide curb-to-curb low beam pattern provides a great around-town view.

Cruising down the back roads, Dual Bulb High Intensity Discharge (HID) or Dual Bulb Halogen headlamps add extra punch down the center of the lane, all while maintaining their excellent low-beam performance.



An Engine Light You'll Be Glad To See

Chrome isn't the only thing that grabs attention. Electra Glo™ LED Light Pods add a neon-like glow to your parked bike, and can be left on for hours while sitting at the curb on Main Street.

A. Dual Bulb Halogen Headlamp Kit

The Dual Bulb Halogen Headlamp features advanced reflector optics and separate bulbs for high and low beam functions. The euro-inspired projector beam styling combines a state-of-the-art look with a CAD designed faceted reflector bowl that is optimized for crisp patterns and light cut-off. The single upper bulb functions in low beam, and both upper and lower bulb operate in high beam. The low beam setting produces a wide curb-to-curb light pattern, and the high beam adds focused light down the center of the lane without compromising width. Kit includes housing, 55 watt low beam halogen lamp, 35 watt high beam halogen lamp and all necessary mounting hardware. Does not meet ECE regulations.

67864-04	Fits '94-later Electra Glide® and Road King® models, and '94-later FL Softail® models equipped with Chrome Headlight Nacelle Kit P/N 67907-96. Kit includes mounting ring assembly.	$162.95
67863-04	Fits '91-later FLSTC, FLSTF, and FLSTN models. Does not fit models equipped with Chrome Headlight Nacelle Kit P/N 67907-96.	$129.95

B. High Intensity Discharge (HID) Dual Bulb Headlamp Kit

Cut through the darkness. The Harley-Davidson High Intensity Discharge Headlamp Kit features a true HID (Xenon) low beam bulb that projects a curb-to-curb spread of "blue/white" light. Compared to the yellow light of a traditional Halogen bulb, the HID lamp produces a "Daylight Color Impression" that appears more natural to the user.

The HID Dual Bulb Headlamp assembly features unique advanced optics with separate low and high beam reflectors dedicated to focus the light for optimal illumination. The HID low beam is always illuminated, providing a wide pool of light, and the separate Halogen high beam bulb adds a focused shaft of light down the center of the lane.

The HID Dual Bulb Headlamp is not just a high-performance bulb, it's a complete lighting system. The system includes the HID bulb, an electronic starter, and a ballast system. The bulb is a complex tube that replaces the filament with arc-producing electrodes. The starter allows quick ignition of the arc, and the ballast converts incoming power to the high voltage needed to maintain the glow. The Xenon-filled HID bulb is resistant to vibration, and has a life expectancy of up to 10 times that of a Halogen bulb. The headlamp kit is DOT approved for use in all 50 states.

The complete Headlamp Kit includes the shock and vibration resistant housing HID low beam bulb, halogen high beam bulb, starter, waterproof ballast, and all necessary wiring.

68094-06	Fits '96-later Electra Glide models.	$524.95
68043-06	Fits '02-later Road King models.	$524.95

**NOTE: It is possible to overload your motorcycle's charging system by adding too many electrical accessories. If your combined electrical accessories operating at any one time consume more electrical current than your vehicle's charging system can produce, the electrical consumption can discharge the battery and cause vehicle electrical system damage. Ask your dealer for advice about the amount of current consumed by additional electrical accessories.*

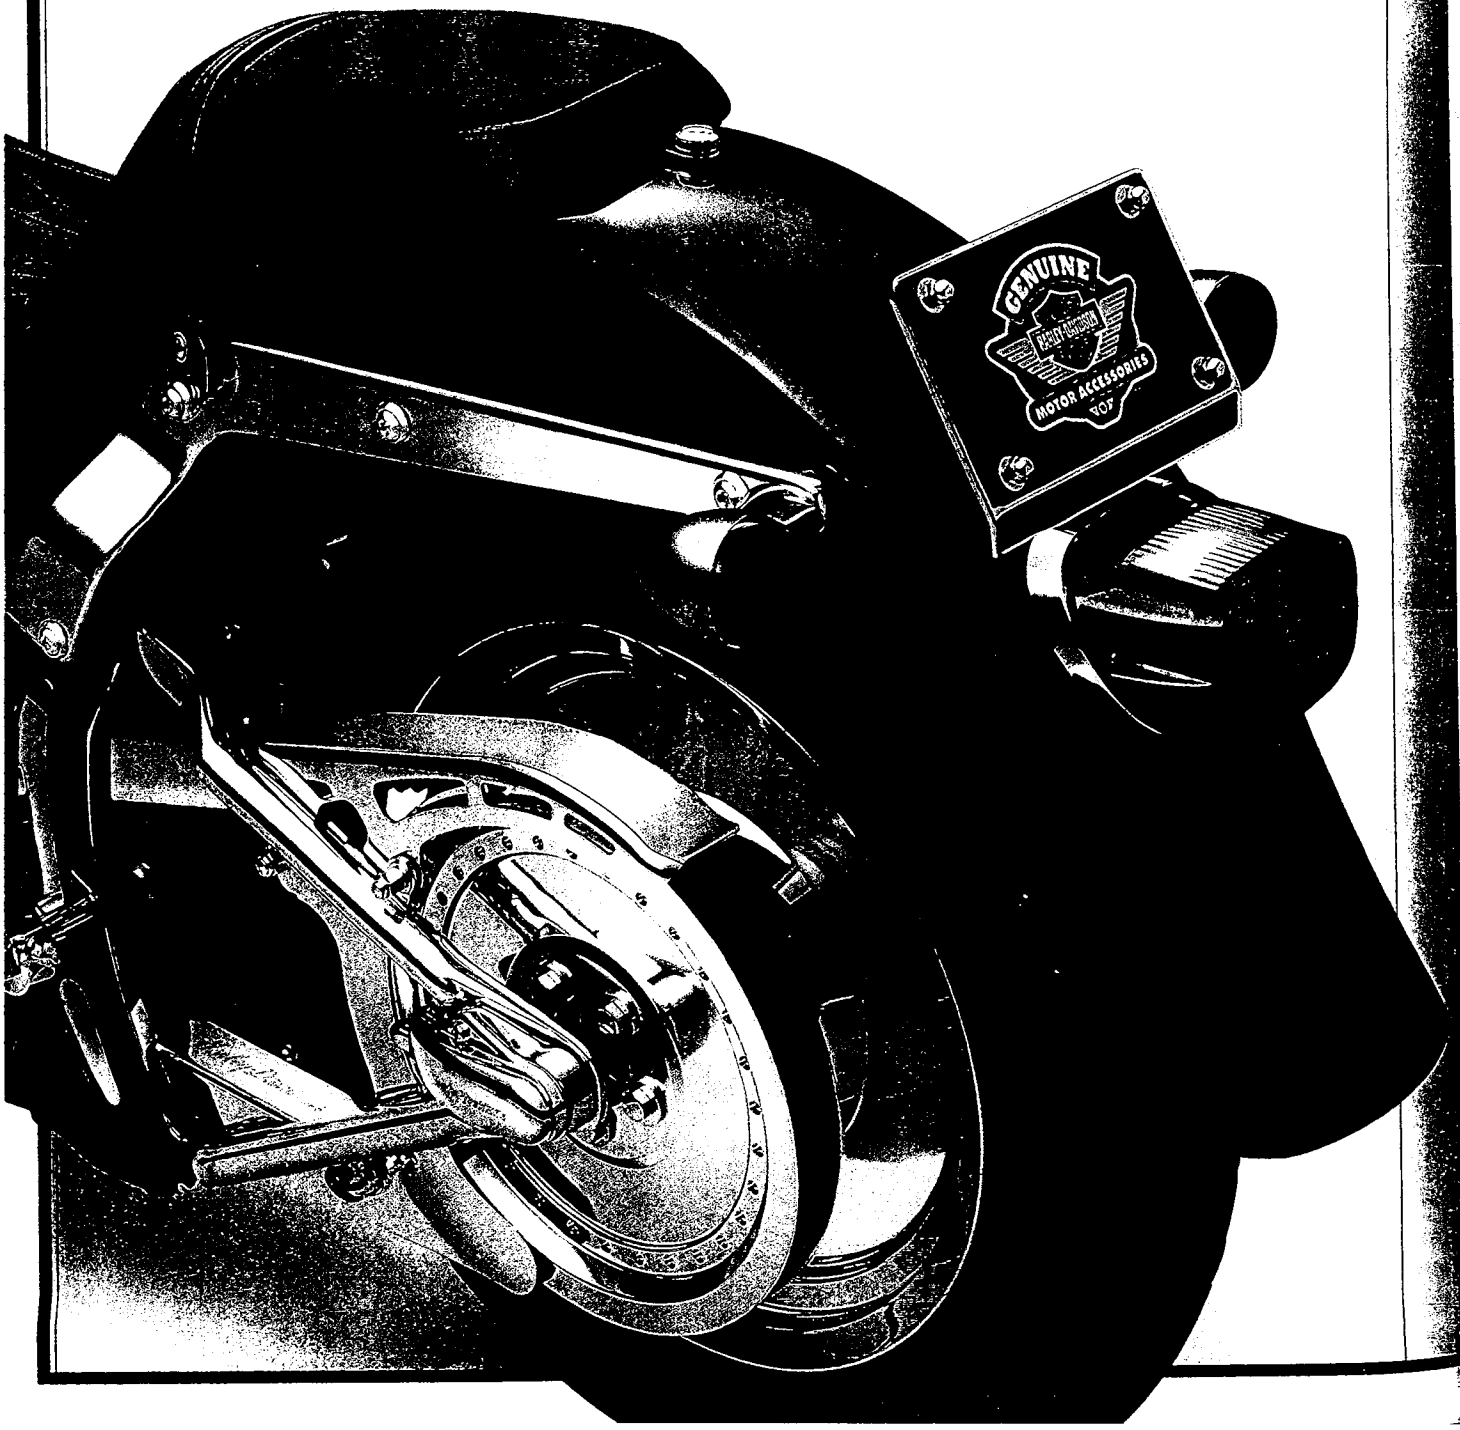
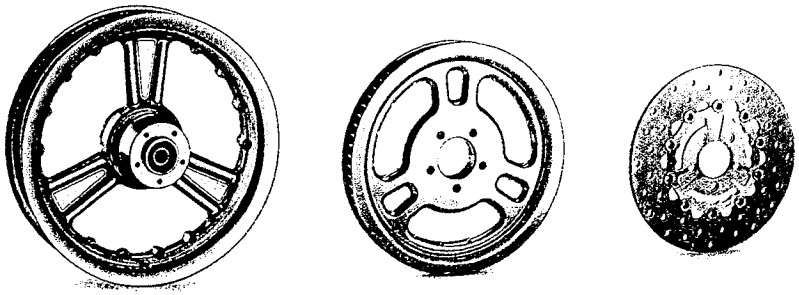
Turn It Over In Your Mind

From a visual perspective, wheels and tires make up almost half of your bike's profile. So, the overall look will rest heavily on how well your wheel choice matches the original design direction. For example, traditional laced wheels add an open and "airy" look to a nostalgic bike. Mirror chrome disc wheels add visual weight to a low, slammed custom. And multi-spoke forged wheels lend a strong, contemporary style to almost any bike.

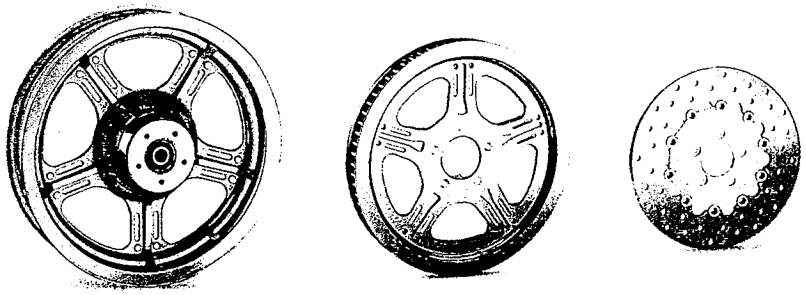


Finding the Right Combination

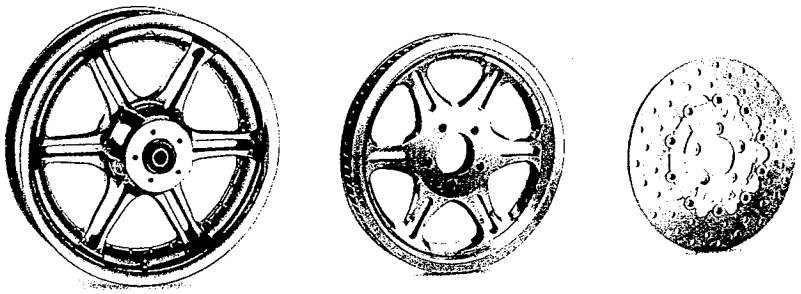
DETONATOR™ COLLECTION The perfect set for the strong, silent type. This thick three-spoke design is a quiet symbol of unbelievable power. Born for the boulevard, this is the weapon of choice for a hard-line cruiser theme.



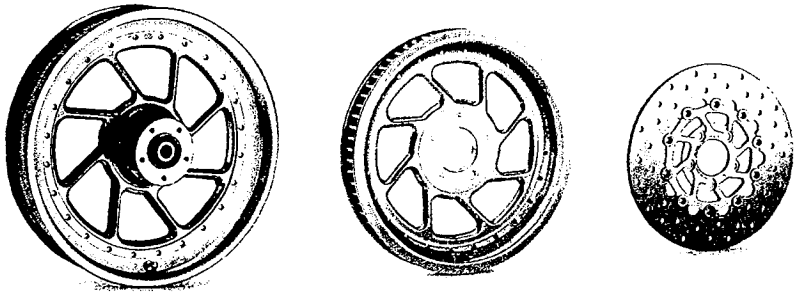
LIGHTNINGSTAR™ COLLECTION Living up to its name, this wheel is the center of attention on a bike. Five machined spokes are visually opened with radial ribs and slots to create interest and flash. A great combination with the big, beefy forks of an FL Softail or Touring model.

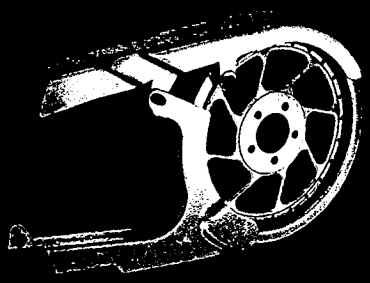


SLOTTED SIX-SPOKE COLLECTION Eye-catching twelve-spoke detail is pulled into a traditional six-spoke design, balancing complexity with simplicity. The open design works to lighten the profile of the disc wheel Fat Boy model, and is a stunning replacement for a laced 21" front wheel.



ROAD WINDER™ COLLECTION Slanted spokes give the effect of constant motion. The naturally aggressive look of this set works well with a stripped down-custom bike, but the open design also works to bring a nostalgic bike into the 21st century.





[illegible]

Once you have chosen a custom direction, you have a few more decisions to make. First, select a brake rotor and drive sprocket that match the wheels. The shared style will pull the bike together visually. Plus, by adding the wheels at the same time as you install chrome fork sliders or a chrome swingarm, you can limit the time your bike is off the road. To finish the custom look, tweak little details like chrome wheel spacers, belt guards, and rotor and sprocket hardware. But before you start making physical changes, talk to your Dealer: he can make helpful recommendations and can coordinate the installation.

Multi-Fit

Custom Wheel Collections

A major custom addition, Harley-Davidson® wheel collections can have an instant impact on your bike. With a combination of head-turning style and road-proven performance, all H-D® wheels bear DOT and JWL markings, ensuring that they passed the tests and meet the requirements of those agencies. Add matching brake rotors and drive sprocket for maximum custom effect. Floating brake rotors feature premium stainless steel outer disc surfaces precision riveted to a chrome-plated steel inner disc, and matching billet sprockets feature mirror finish chrome surfaces and a five-year tooth wear warranty.

A. Revolver Ten-Spoke Custom Wheel

The ten slim spokes and the mirror-finish chrome hub dramatically alter the look of your custom motorcycle. The "ball-milled" spokes radiate from the unique revolver cylinder-shaped hub, and blend with the smooth rim for a light, open look. Forged from 6061 aircraft aluminum, the mirror-finish chrome surfaces resist the elements and are easy to maintain. Complete the custom look by adding complementing Teardrop Brake Rotors and LightningStar™ Sprockets.

B. Road Winder™ Custom Wheel

Take your custom ride in a new direction. The directional spokes of the one-piece Road Winder wheel add the look of forward motion even while standing still. The slim spokes open the wheel visually, and showcase the available matching brake rotors and sprockets. Forged from 6061-aircraft aluminum, the mirror-finish chrome surface and rim-edge details are easy to maintain and offer great resistance to the elements. Matching brake rotors and sprockets are available for a complete custom look.

C. Detonator® Three-Spoke Custom Wheel

Own the open road. The rounded "liquid metal" look of these exclusive three-spoke Detonator Wheels are sure to stop onlookers in their tracks. Created from 6061 aircraft aluminum, the wheel design and the edge details are forged on an 8,000 ton press at Alcoa® Aluminum resulting in a surface that is tight, smooth, and takes a chrome finish like a mirror. Matching brake rotors and sprockets are available for a complete custom look.

Multi-Fit

A. Mirror Chrome ThunderStar™ Custom Wheel

The ultimate reflection of your customization efforts. Featuring the street-proven ThunderStar design, these rims are polished and chrome-plated over 100% of their surface, creating a mirror-like finish that'll throw envious gazes right back where they came from. Just like the original ThunderStar wheels, they come complete with fitted bearings, a chrome hub cap for front wheels, and all required spacers and hardware. All H-D® wheels bear DOT and JWL markings, ensuring that they passed the tests and meet the requirements of those agencies.

B. Chrome Nine-Spoke Cast Wheel

Add a splash of chrome. Now available for Softail® models, these fully polished nine-spoke wheels are styled to match the Original Equipment wheels on many Touring models. More than just a chrome-plated Original Equipment Touring Wheel, these wheels utilize tooling developed specifically for chrome-plating to give a near perfect finish without the "waves" created when polishing the Original Equipment cast wheel. The rib on the Original Equipment wheel spoke has been removed to provide a smooth uninterrupted spoke finish. Special masking was developed to prevent plating corrosion inside bolt holes and bearing sleeve areas. Bearings are factory installed with the same precision as our Original Equipment wheels.

C. Mirror Chrome Solid Disc Wheel

Reflect your good taste in the Mirror Chrome Solid Disc Wheel. The glass-smooth surface shines with the uninterrupted vista of chrome. You'll draw attention because nothing detracts from the flowing curves. The mirror-like surface is almost like glass, with a "see through" look you'll want to reach out and touch. Branded with the signature "Bar & Shield" logo, these wheels bear the DOT and JWL markings, ensuring that they passed the tests and meet the requirements of those agencies.

D. Chrome Skullfire Custom Wheel

Reflect your rebel attitude. This mirror-chrome solid disc wheel has been deep-etched with satin-finish flames and skulls to add a brilliant flash when in motion. Branded with the signature "Bar & Shield" logo, these wheels bear the DOT and JWL markings, ensuring that they passed the tests and meet the requirements of those agencies.

E. Polished Spun Aluminum Disc Wheel

Born at the drag strip, the look of the spun aluminum wheel has been the hot rodders favorite for decades. The flat polished surface and surrounding circle of rivets reflect light and motion and add a subtle mirror effect to the front and back of the bike. Spun aluminum wheels include correct bearings and spacers for the application, and are ready for bolt-on installation.

F. Slotted Fat Boy® Chrome Wheel

Add the brilliance of chrome without changing the distinctive style of the Fat Boy motorcycle. The polished rim and textured disc are divided by a ring of slots that open the wheel for a flash of light. This cast aluminum wheel comes ready to bolt on.

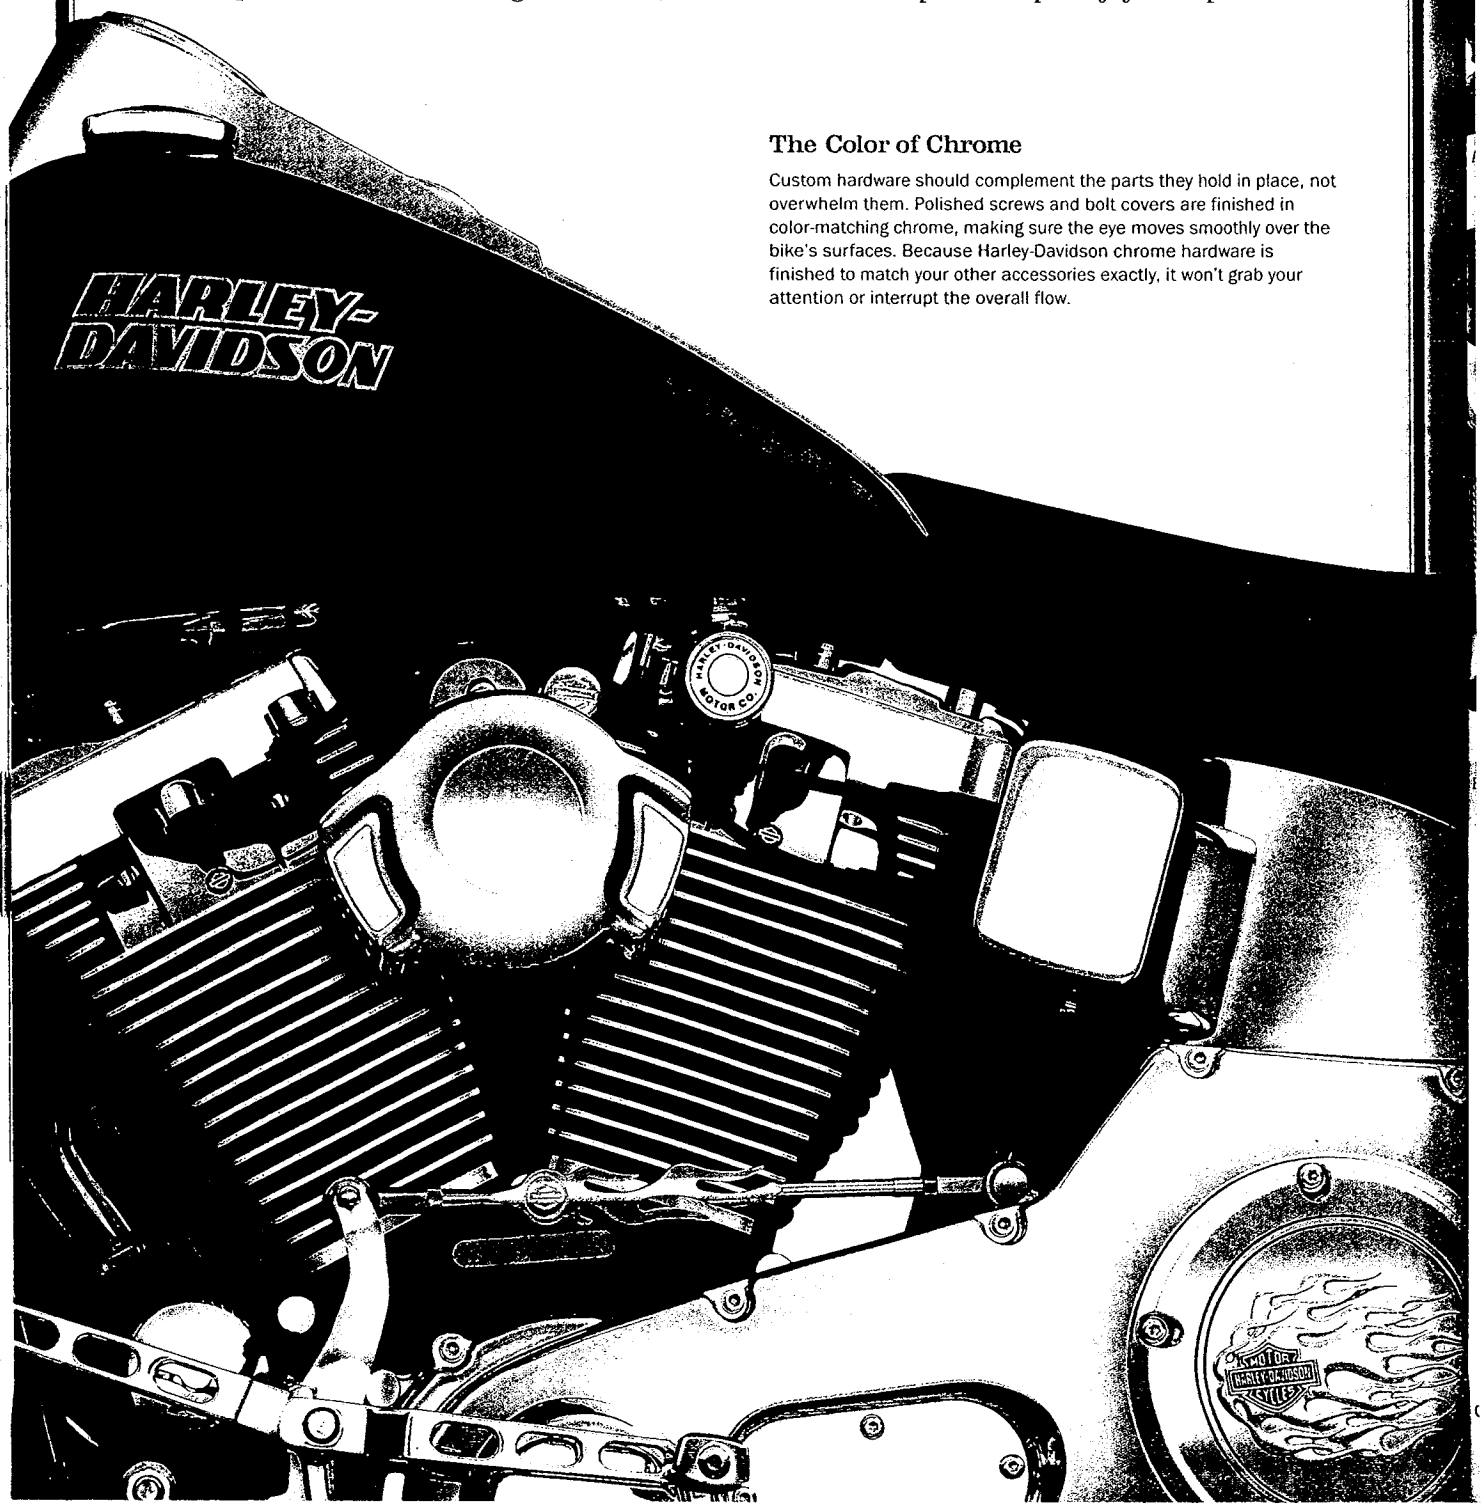
The Not-So-Bare Essentials

It's the details that set a show-winning custom apart from an honorable mention. The most overlooked step in finishing a bike is the hardware—simple bits that can make or break a custom look. But not just any "hardware store" parts will do. Harley-Davidson® Chrome Hardware is manufactured to Original Equipment specifications, ensuring the finish, the fitment and the product quality you expect.



The Color of Chrome

Custom hardware should complement the parts they hold in place, not overwhelm them. Polished screws and bolt covers are finished in color-matching chrome, making sure the eye moves smoothly over the bike's surfaces. Because Harley-Davidson chrome hardware is finished to match your other accessories exactly, it won't grab your attention or interrupt the overall flow.

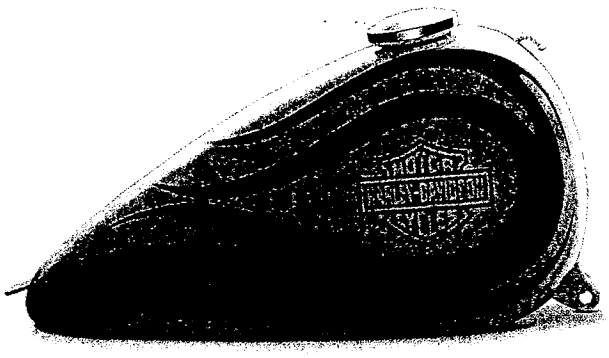
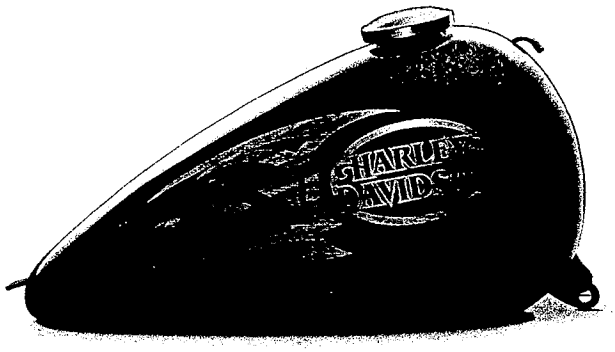
Showing Your True Colors

If chrome is for a motorcycle's body, then paint is for its soul. The most visible piece of any customization strategy, the style, depth and richness of custom paint establishes the tone for the rest of the accessories, and the finish sets your bike apart from the crowd. But selecting custom paint can be a difficult—how do you get the vision that's in your head translated onto sheet metal? That's where Color Shop from Harley-Davidson® comes in. We've developed four reasonably-priced paint programs to fit your style, your budget, and your schedule. And, they're backed by the quality and workmanship that only Harley-Davidson can deliver.



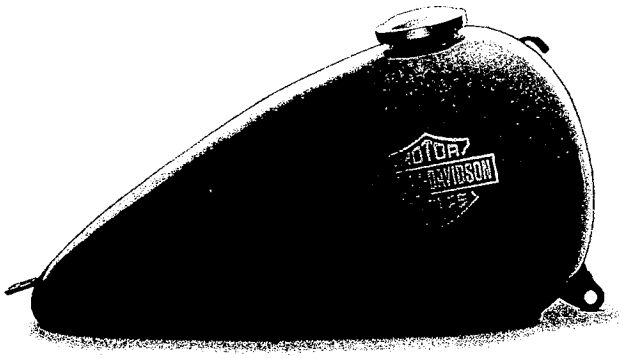
Radical Custom Collection

Building a work of art, literally. Exotic and Radical Custom Paint sets feature exclusive, limited-edition designs, hand-painted to offer superior depth and detail. Styled to complement a specific motorcycle model, the colors and curves work to showcase the lines of the bike. Each show-quality paint scheme is numbered to provide you with the ultimate in exclusivity.



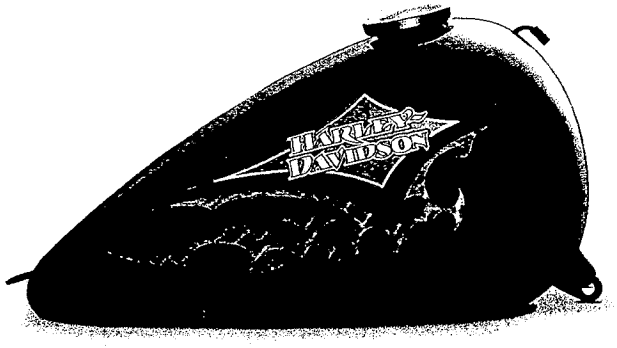
Select Custom Series

A legend in the making. The Select Custom Series features a collection of custom designs styled to complement the heritage of each motorcycle model. Pearl, candy and metallic finishes are combined with exclusive emblems and logos to create a unique statement. Designed for a specific model, Select paint sets are available for a limited period of time.



Ghost Flame Custom Color

Stand out while blending in. The subtle tone-on-tone flames flow from fender tip to fender tip, changing in intensity as the day rolls on. Finished in four different color combinations and available for a wide variety of current Harley-Davidson motorcycles, Ghost Flame sets are popular year-in and year-out.



Personal Accents

Change the look without changing "The Look." Personal Accents Fuel Tanks allow you to add the exclusivity of custom paint without actually painting all the metal. Designed to complement the Original Equipment finish on your bike, a Personal Accents tank features unique graphic elements that add an aggressive edge to the monochromatic style of your bike.

CAUTION: *('84 1/2-'03 Sportster models only.)*
Installation of the Front Spoiler, Chrome Voltage Regulator Cover and Chrome Regulator Relocation Hardware will allow the Chrome Voltage Regulator Cover to contact Stock Front Fenders on some models during full compression of the front suspension. This contact could result in a marred paint surface on the front fender. The installation of a Sport Front Fender will eliminate the possibility of contact between the Chrome Voltage Regulator Cover and the Front Fender.
