WINDSHIELDS

Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. For maximum protection from wind and weather, select a windshield that tops out just below your line of sight. You avoid looking through rain drops, bug spots and road grime to get a clear view of the highway ahead.

CHOOSING A BACKREST

A sissy bar upright and passenger backrest is the starting point to build a complete touring machine. The backrest provides long-range comfort and support, and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a detachable sideplate kit and appropriate Docking Hardware to make adding or removing a Detachable accessory a simple "slide and click" proposition.

A. GENUINE HARLEY-DAVIDSON® SIDEPLATE KITS

Add your choice of sissy bar uprights, backrest pads and luggage racks when you install rigid or detachable sideplates to your motorcycle. Manufactured and tested to rigorous Harley-Davidson standards, these sideplates are designed to specific model application for exact fit.

CHOOSING A BACKREST

A sissy bar upright and passenger backrest is the starting point to build a complete touring machine. The backrest provides long-range comfort and support, and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a detachable sideplate kit and appropriate Docking Hardware to make adding or removing a Detachable accessory a simple "slide and click" proposition.

A. GENUINE HARLEY-DAVIDSON® SISSY BAR UPRIGHTS

Low Sissy Bar Uprights
Give your passenger additional back support with a Low Sissy Bar Upright, designed to accept a wide variety of backrest pads.

Tall Sissy Bar Uprights

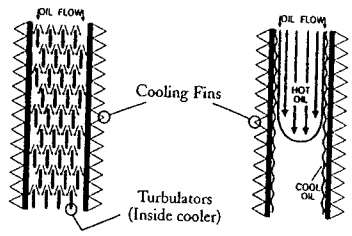
A. PREMIUM OIL COOLER FOR SOFTAIL® MODELS

This oil cooler was designed specifically for Harley-Davidson to out-perform all other coolers in the industry. The cooler features a unique "Turbulator" system that evenly distributes oil across the cooling chambers. The air fins are designed to efficiently dissipate heat. The oil cooler has been designed to simplify installation and enhance performance. The large heat exchanger provides excellent cooling efficiency. The kit features a one-piece adapter plate with integrated thermostat that allows oil lines to connect to the oil filter bracket. The thermostat activates at 185°F (85°C). Kit comes complete with mounting hardware and precut oil lines. Kit includes Chrome Oil Cooler Cover.

26157-07 Fits '00-later Softail models. Does not fit with High Output Horn Kit P/N 69180-02A, Softail Spoiler Kits P/N 57040-YYxxx, or Definitive5 Filtration System P/N 63800-07, 63801-07 or 63802-07. Fits with Bullet Softail Spoiler P/N 57039-YYxxx. Fits with all H-D Engine Guards. **$298.95**

Inside View of Premium Oil Cooler with Turbulators

Inside View of Conventional Oil Cooler without Turbulators



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

WINDSHIELDS

Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. For maximum protection from wind and weather, select a windshield that tops out just below your line of sight. You avoid looking through rain drops, bug spots and road grime to get a clear view of the highway ahead.

A. ROAD KING® DETACHABLE KING-SIZE WINDSHIELD – TALL

Get maximum protection from the wind. This clear Lexan windshield is 2" taller than the standard-height windshield to improve air-flow for taller riders. The Detachable shield can be removed and re-installed in seconds to tailor your bike to different riding conditions.

57995-96	Fits '94-later FLHR models. Will fit '04-later FLHRS models with the additional purchase of Mounting Hardware Kit P/N 58221-04.	$304.95

B. ROAD KING DETACHABLE KING-SIZE WINDSHIELD – MID-LOW PROFILE

This Mid-Low Profile Windshield combines the traditional "King" style with a 2" decrease in height. This drops the windshield edge below the line of sight, while maintaining the envelope of clean air around the rider. Complete assembly features a durable Lexan shield and the stainless steel brackets that mount to the Original Equipment docking points for ease of installation and removal.

Mid-Low Profile, Clear

58325-06	Fits '94-later FLHR models. (Stock on '06-later International FLHR models.) Will fit FLHRS models with separate purchase of Mounting Hardware Kit P/N 58221-04.	$324.95

A. PREMIUM OIL COOLER KIT FOR TOURING MODELS

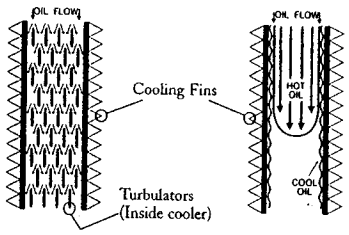
A. PREMIUM OIL COOLER KIT FOR TOURING MODELS

This cooler was designed specifically for Harley-Davidson to out-perform all other coolers in the industry. This cooler features a unique "Turbulator" system that evenly distributes oil across the cooling chambers. The air fins are designed to efficiently dissipate heat. This popular Touring oil cooler has been re-designed to simplify installation and enhance performance. The larger heat exchanger provides additional cooling efficiency. Kit features an adapter plate with integrated thermostat that allows oil lines to connect to the oil filter bracket. The thermostat activates at 185°F (85°C). Kit comes complete with mounting hardware and precut oil lines. Kit includes Chrome Oil Cooler Cover.

26155-07	Fits '07 Touring models. Stock on '07 FLHTCUSE. Does not fit with Chrome Display Stand P/N 99002-97A, Definitive5 Filtration System Kit P/N 63800-07, 63801-07 or 63802-07, or models equipped with a sidecar.	**$298.95**

Inside View of Premium Oil Cooler with Turbulators

Inside View of Conventional Oil Cooler without Turbulators



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

A. DUAL BULB HALOGEN HEADLAMP KIT

The Dual Bulb Halogen Headlamp features advanced reflector optics and separate bulbs for high and low beam functions. The euro-inspired projector beam styling combines a state of the art look with a CAD designed faceted reflector bowl that is optimized for crisp patterns and light cut-off. The single upper bulb functions in low beam, and both upper and lower bulbs operate in high beam. The low beam setting produces a wide curb-to-curb light pattern, and the high beam adds focused light down the center of the lane without compromising width. Kit includes housing, 55-watt low beam halogen lamp, 35-watt high beam halogen lamp and all necessary mounting hardware. Does not meet ECE regulations.

67864-04	Fits '94-later Electra Glide® and Road King® models, and '94-later FL Softail® models equipped with Chrome Headlight Nacelle Kit P/N 67907-96B. Kit includes mounting ring assembly.	$164.95

B. HIGH INTENSITY DISCHARGE (HID) DUAL BULB HEADLAMP KIT*

Cut through the darkness. The Harley-Davidson High Intensity Discharge Headlamp Kit features a true HID (Xenon) low beam bulb that projects a curb-to-curb spread of "blue/white" light. Compared to the yellow light of a traditional Halogen bulb, the HID lamp produces a "Daylight Color Impression" that appears more natural to the user.

The HID Dual Bulb Headlamp assembly features unique advanced optics with separate low and high beam reflectors dedicated to focus the light for optimal illumination. The HID low beam is always illuminated, providing a wide pool of light, and the separate Halogen high beam bulb adds a focused shaft of light down the center of the lane.

The HID Dual Bulb Headlamp is not just a high-performance bulb, it's a complete lighting system. The system includes the HID bulb, an electronic starter, and a ballast system. The bulb is a complex tube that replaces the filament with arc-producing electrodes. The starter allows quick ignition of the arc, and the ballast converts incoming power to the high voltage needed to maintain the glow. The Xenon-filled HID bulb is resistant to vibration, and has a life expectancy of up to 10 times that of a Halogen bulb. The headlamp kit is DOT approved for use in all 50 states.

The complete Headlamp Kit includes the shock and vibration resistant housing, HID low beam bulb, halogen high beam bulb, starter, waterproof ballast, and all necessary wiring.
