THERE ARE OVER 6,000 PARTS IN THIS BOOK.

But each one is more than a number. Every Harley-Davidson® Genuine Motor Part and Accessory we build is manufactured in the spirit of an age-old motorcycling tradition. Designed to deliver uncompromising style, quality, fit and performance. And conceived with one eye firmly on the horizon. Because in the end, customizing isn't about accessories. It's about the ride. And the moments on the road that remind us why a motorcycle is much more than the sum of its parts.

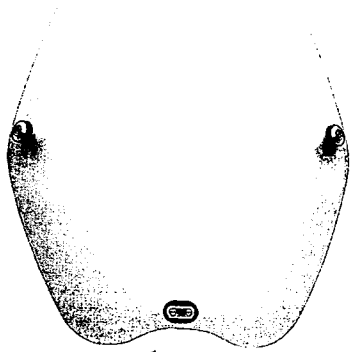
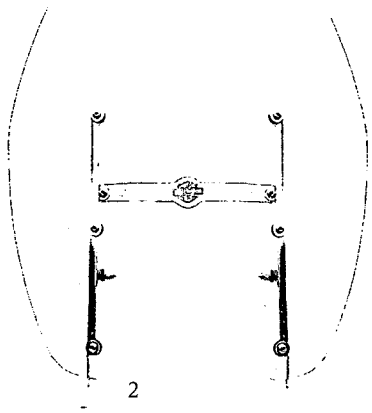
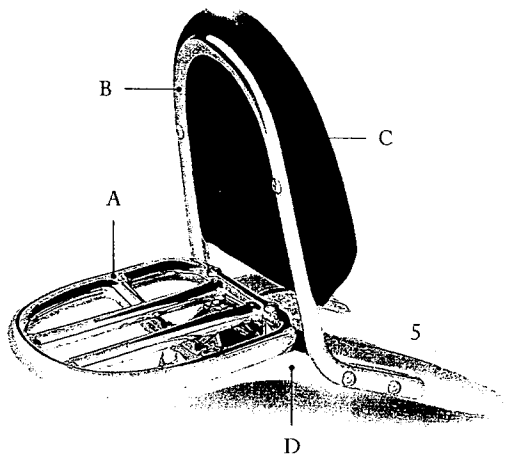
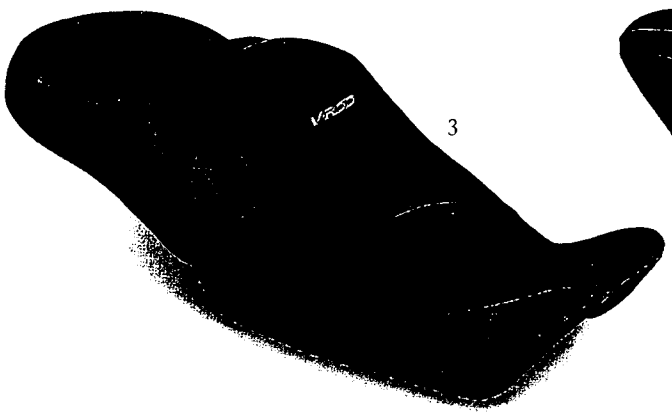
RADICAL, REDEFINED

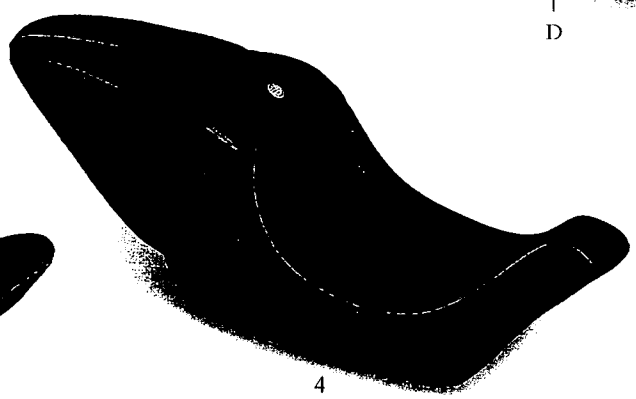
Delivering pulse-pounding horsepower and a jaw-dropping custom profile, the VRSC™ family continues its climb into two-wheeled history, while giving you an ever-expanding array of options to make your mark on a truly radical ride.











WINDOW OF OPPORTUNITY

While the VRSC™models define the performance cruiser category, they can also make mile-shredding sports-touring machines—particularly with the addition of a windshield. From the sleek Sport Wind Deflector for preserving the low-profile look, to the new Detachable Touring Windshield for maximum coverage, the options are there to help reduce rider fatigue and protect you from the elements when your milk run turns into a high-mile ride.

1. Windshield — *Super Sport*
2. Windshield — *Detachable Touring*

SEAT WORTHY

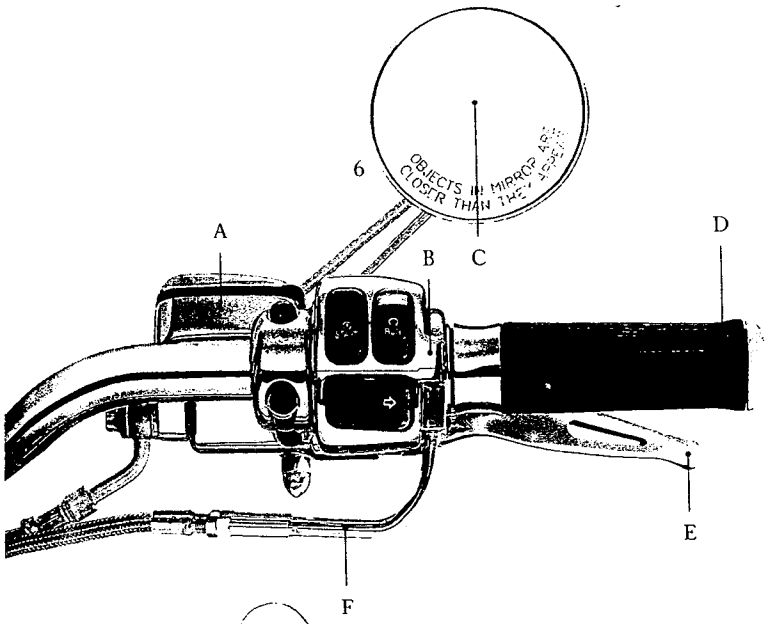
When you're in the saddle of your VRSC model, you know immediately that you're riding a bike that's one of a kind. But with the right custom seat, your machine can start to feel like it was built for you and you alone. Inject some extra boulevard attitude into your ride with a sleek Leather Badlander® saddle. Longer trips may call for a deep-bucket Sundowner™-design, while the forward-position Reach™ seat and Tallboy™ saddles are engineered for riders with inseams at opposite ends of the spectrum.

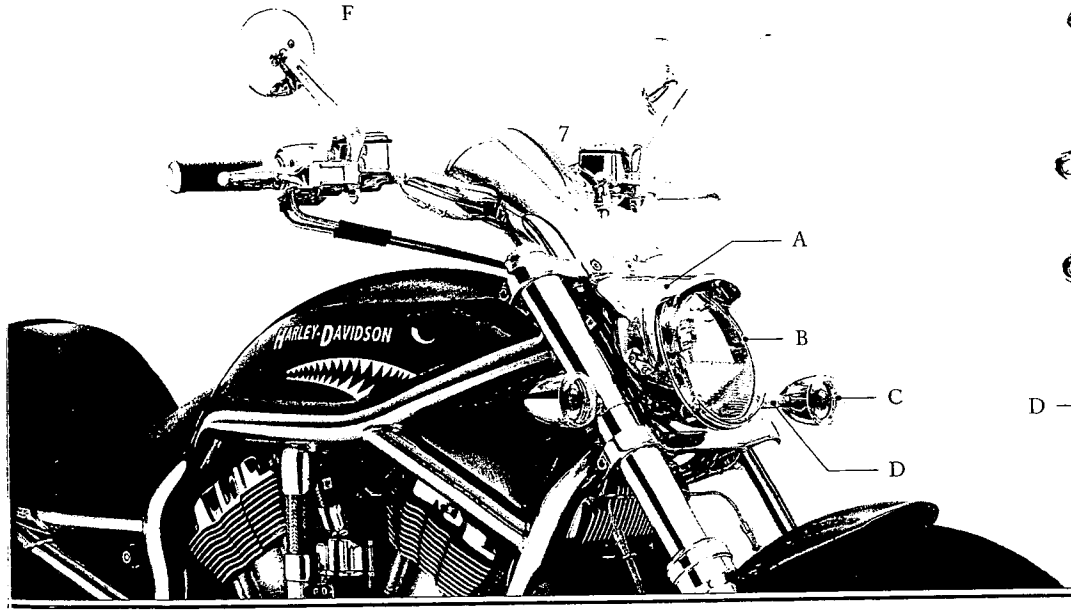
3. Seat — *Sundowner™*
4. Seat — *Leather Badlander®*

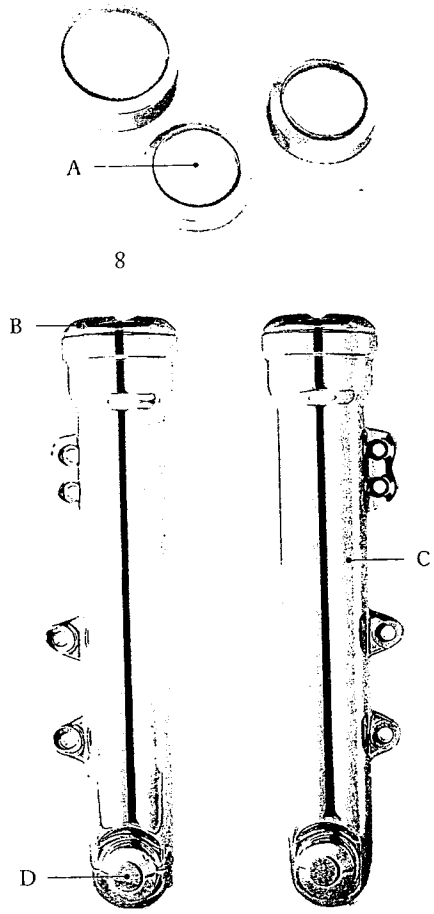
RACKS & RAILS

Equipping your bike for the way you use it should be one of your customization goals. So if you plan to ride a fair amount with a passenger, you should consider adding a Sissy Bar Upright and Backrest Pad to make their journey as comfortable as yours. There's a range of heights to pick from, including the sleek Cast Mini Upright in chrome or gloss black. And you can have the flexibility to bring extra gear along for the ride with a matching new Cast One-Piece Luggage Rack, or another rack of your choice.

5. Two-Up Touring Accessories
   A. Luggage Rack — *Chrome*
   B. Upright — *Low Sissy Bar, Chrome*
   C. Backrest Pad — *Smooth Look*
   D. Fender Base Plate Kit — *Chrome*







MAIN SQUEEZE

In terms of style, there's plenty for people to gawk at on your VRSC™ model. And with the right accessories, the hand control area is one more place where you can turn up the custom dial. Highly visible and packed with custom potential, your hand controls also offer the benefits of simple accessory installation, and immediate satisfaction.

6. Hand Control Area
   A. Chrome Master Cylinder Kit — *Clutch and Brake*
   B. Switch Housing Kit — *Chrome*
   C. Mirror — *Dome Billet*

GIVE THE SIGNAL

With lighting accessories, you can take a different custom turn. Try a new Chrome or Black-Out Headlamp Housing Kit, a Contoured Headlamp Trim Visor or a new Contoured Chrome Headlamp Bracket. And if your aspirations go beyond trim pieces, there's more options on hand—including Smoked Lens Kits and a Turn Signal Relocation Kit that allows you to move your stock turn signals from your handlebar to your front forks for going further down the custom path.

   A. Contoured Headlamp Trim Visor — *Chrome*
   B. Headlamp Housing Kit — *Chrome*
   C. Turn Signal Lens Kit — *Clear*

From more substantial additions like Chrome Front Fork Sliders and Billet Fork Slider Dust Covers, to the finer details like Axle Nut Covers and Upper Fork Stem Covers, you've got the goods to make your front end shine. To help you along, we've created special chrome accessory packages that include everything you need to chrome out your front end, as well as lists for your bike's hand controls and rear end.

HARLEY-DAVIDSON

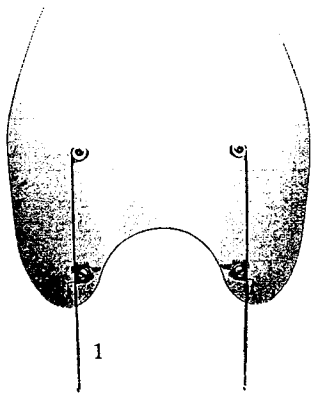
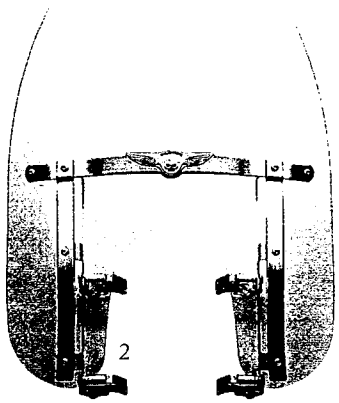
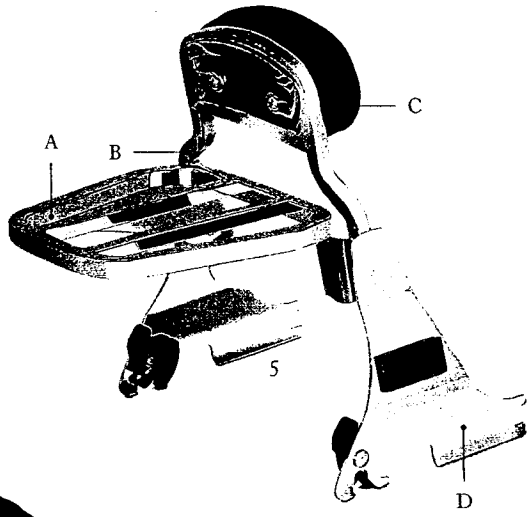
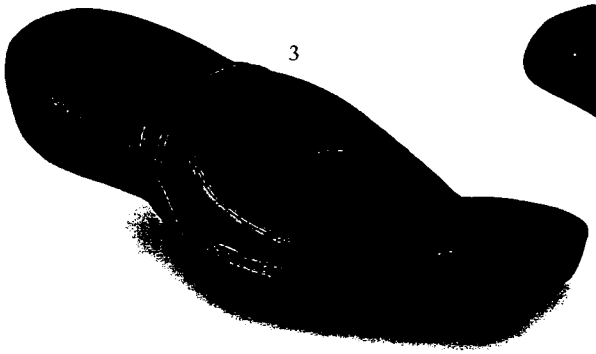
FREEDOM TO GO

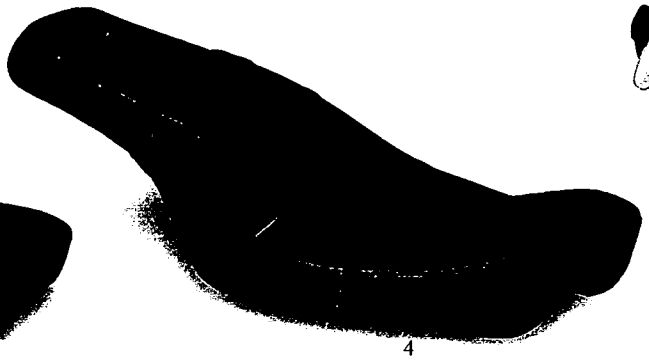
Redesigned, reengineered and reborn, the Sportster® family remains the purest expression of Harley-Davidson® muscle, delivering hard-nosed styling, curve-carving agility and the freedom to customize as you see fit.











CLEAR THE AIR

If your two-wheeled plans include some highway time, a windshield is a must. Besides helping to reduce rider fatigue, windshields also offer protection from the elements—as well as the errant june bug. So whether it's a full-coverage Touring style or a sleeker Super Sport variety, you'll be glad you're not facing the wind alone. Look to Detachable options for quick, on-and-off convenience that gives you the flexibility to equip your bike for the long haul in seconds, while maintaining a low-profile look on the boulevard.

1. Windshield — *Detachable Super Sport*
2. Windshield — *Quick Release Detachable Compact, Skull with Wings*

SADDLE UP

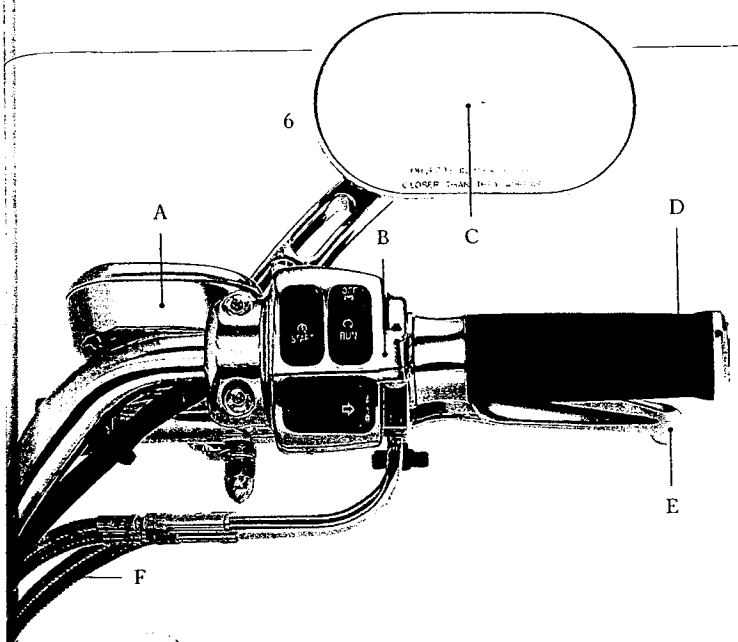
When it comes to seats, style and comfort are equal parts of the equation. While low profile Badlander® and Stripper™ options are designed to maximize street appeal around town, touring-minded Sundowner™ and Pillow-Look styles deliver comfort and support when your odometer is getting a workout. Because all riders are different, we also offer forward-position Reach™ saddles to help you ride in comfort—even if your inseam is on the shorter side. And since seats are easy to change, you can have more than one in your arsenal to match your riding needs.

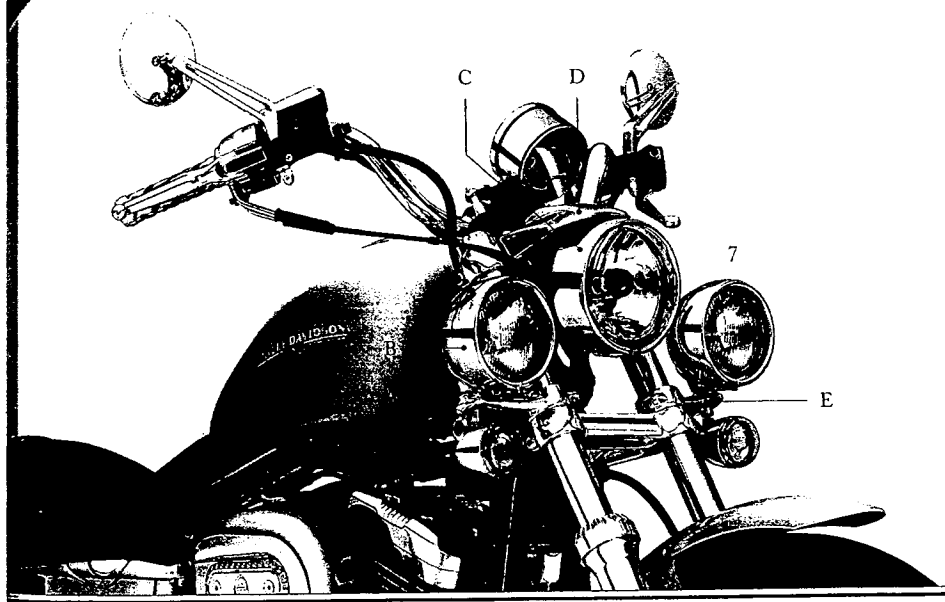
3. Seat — *Sundowner™ Bucket Seat*
4. Seat — *Reach™*

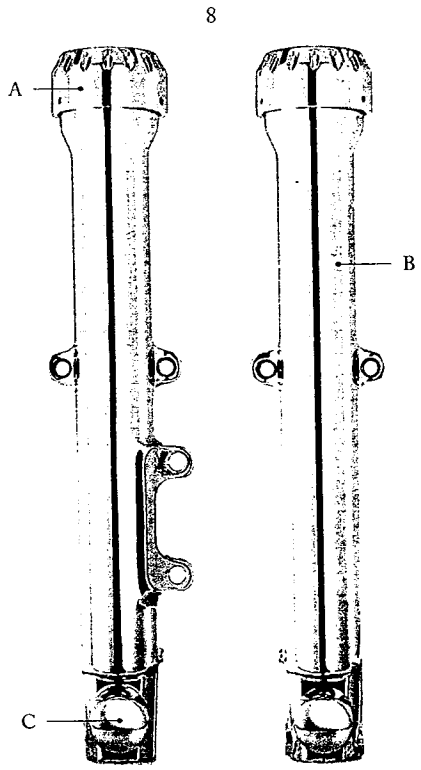
EASY COME, EASY GO

For extra passenger comfort with a touch of curbside style, an upright and backrest pad combination makes an ideal custom addition. And a luggage rack can help you bring more gear along for the ride. Both uprights and racks are anchored to your bike by sideplates—so if you're after the convenience of fast installation and removal, the detachable route is the way to go.

5. Two-Up Touring Accessories
   A. Luggage Rack — *Tapered, Chrome*
   B. Upright — *Mini Rail, Chrome*
   C. Backrest Pad — *Mini Rail*
   D. Sideplates — *Detachable, Chrome*







AT ARM'S LENGTH

Because it's one of the most visible parts of your bike, the hand control area is a prime candidate for customization. What's more, accessory installation is simple and the results are immediate. And if all that weren't enough, the possibilities are nearly limitless. Create your own custom combination and the stares will follow.

6. Hand Control Area
   A. Chrome Master Cylinder Kit — *Clutch and Brake*
   B. Switch Housing Kit — *Chrome*
   C. Mirror — *"Bar & Shield" Billet Style, Oval*
   D. Grips — *Contoured Chrome and Rubber*
   E. Hand Control Lever — *Chrome*
   F. Control Cables — *Braided Stainless Steel*

SEE THE LIGHT

More than illuminating your way down the road less traveled, auxiliary lighting gives you one more way to move your bike past the rest of the custom pack. Besides auxiliary lighting kits in smoked and clear varieties, you've also got front and rear turn signal and lens options to let your custom potential shine through. Other accessories like Trim Rings, Headlight Visors and Chrome Headlamp Housing Kits can add yet another level of custom depth.

7. Accessory Lighting

   B. Passing Lamp Trim Rings — *Chrome*
   C. Headlamp Trim Ring — *Chrome*

FORK IT OVER

No pursuit of custom perfection would be complete without a monster dose of chrome. And your bike's front end was made to be drenched in the shiny stuff—from its upper forks to its axle nut covers. In these pages, you'll find the right tools to lead the way in style, including special accessory packages that contain all the parts you'll need to get the job done. You'll also find lists to help you chrome out your bike's rear end and hand control areas for full-on custom looks that just might bring home a trophy or two.

8. Front End Accessories

   B. Fork Sliders — *Chrome*

THE COMFORT ZONE

Handlebar, seat and suspension choices work together to dictate your riding position. So it's crucial to select accessories based not solely on looks, but also on how they fit your body and riding style. While there's a wide range of postures you can achieve with different accessory combinations, the Reduced Reach and Extended Reach configurations below are designed as a starting point for riders whose inseams and armspans may differ from those of the average person. And because every rider fits their bike differently, remember to consult the professionals at your Harley-Davidson® dealer for additional options.

SEAT OF AUTHORITY

If we've said it once, we've said it plenty. A big part of being comfortable on your Sportster® motorcycle is choosing a saddle that fits your body and your preferred riding position. But as any good customizer knows, the key is balancing comfort considerations with the style factor. At Harley-Davidson,® we've created a far-reaching selection of custom seats that allow you to get exactly what you want and need from a saddle. Which means you owe it to yourself to get familiar with the options, so you make an informed decision. And as always, seats are easily swapped—so you can have any number of seats on hand to match the road that lies ahead.

*WARNING: Installation of any accessory suspension components may affect cornering clearance and jiffy stand operation. This could distract the rider, causing loss of control and death or serious injury.

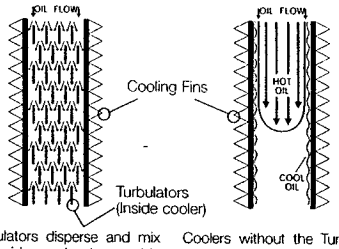
INSIDE VIEW OF PREMIUM OIL COOLER WITH TURBULATORS

INSIDE VIEW OF CONVENTIONAL OIL COOLER WITHOUT TURBULATORS



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

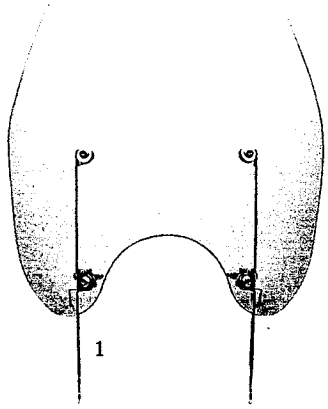
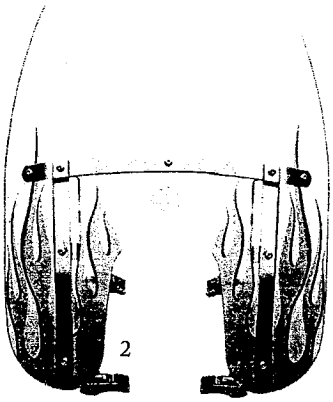
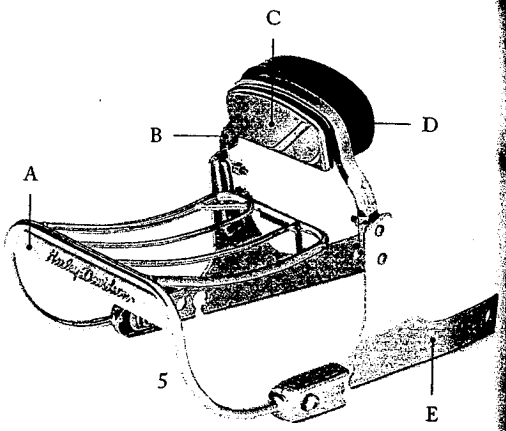
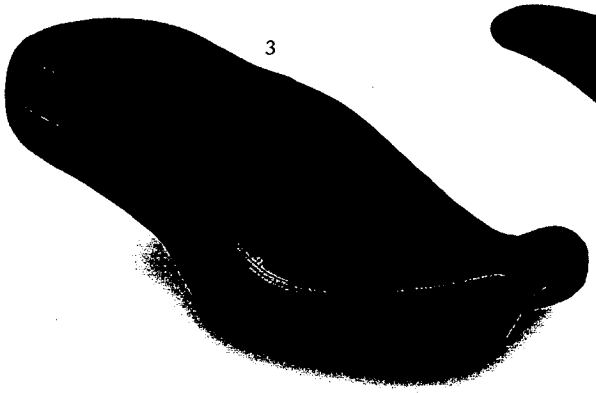
THE LONG AND LOW OF IT

Descended from the first H-D® factory customs, the Dyna family was born and bred to flex its back-alley muscles, with long, low lines that can go in any custom direction—and the performance to take whichever road you choose.









IN THE WIND

If reducing rider fatigue and protecting yourself from the elements—and oncoming insects—sounds like a good idea, a windshield should be in your near future. And there are plenty of detachable designs that give you the freedom to outfit your bike on the spot to meet your two-wheeled needs. From sleek Super Sport styles for maintaining a sportier profile, to king-sized Touring varieties for maximum, long-haul coverage, you've got the options to match the look you want and the riding you do.

1. Windshield — *Detachable Super Sport*
2. Windshield — *Quick Detach Compact, Flamed*

SEATING PLAN

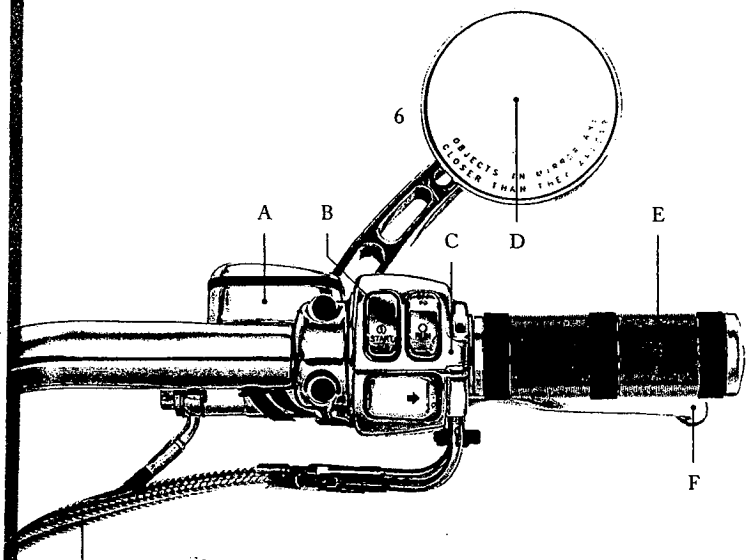
Choosing the right saddle is an essential part of the customizing process, since it can help determine your riding comfort as well as your riding style. Low profile Badlander® and Stripper™ saddles are built for boulevard cruising, while deeper Sundowner™ and Rallyrunner™ seats are designed to provide the comfort and support you'll need over the long haul. And depending on your inseam, you may opt for a Reach™ Forward-Position design. Also keep in mind that seats are easily installed and removed, so it's no sweat to have different saddles for different types of riding.

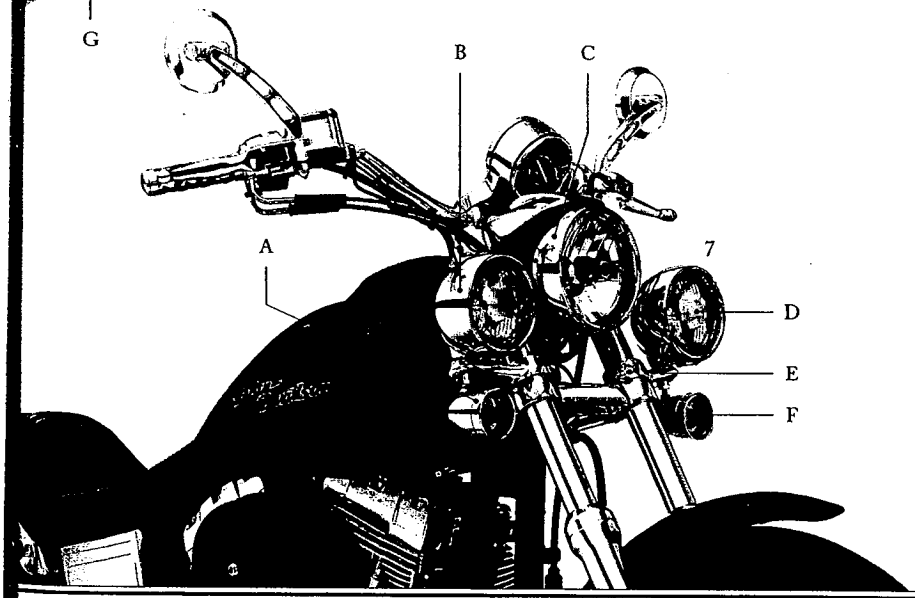
3. Seat — *Sundowner™ Bucket Seat*
4. Seat — *Stripper™ Custom Stitched Seat*

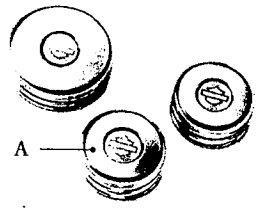
CARRIED AWAY

Equipping your bike based on how you plan to ride is a crucial customizing consideration. If carrying a passenger is in the cards, a sissy bar upright and backrest pad makes serious custom sense—plus, you've got a truckload of styles to choose from. And if that means also taking some extra gear along, add a luggage rack design that works for you. With detachable sideplates, you also get the flexibility to remove or install your uprights and racks in seconds.

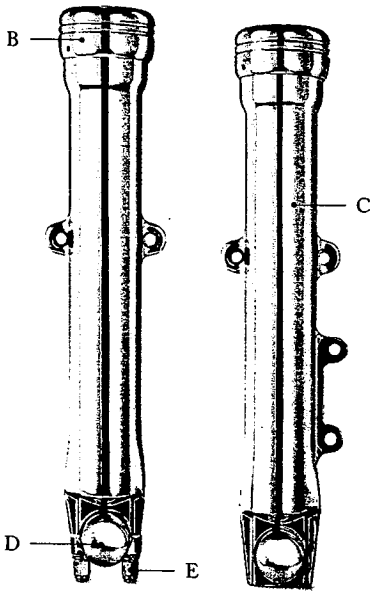
5. Two-Up Touring Accessories
   A. Luggage Rack — *Bobtail, Chrome*
   B. Upright — *Mini Rail, Chrome*
   C. Backrest Mount — *Mini, Chrome*
   D. Backrest Pad — *Mini Rail*
   E. Sideplates — *Rigid, Chrome*







8



CHROME FISTED

Highly visible and packed with custom potential, the hand control area of your bike deserves your attention—and a healthy dose of chrome. In addition to offering simple accessory installation and the added benefit of immediate results, it's an affordable way to make a custom statement that's as unique as you want it to be.

6. Hand Control Area
   A. Chrome Master Cylinder Kit — *Clutch and Brake*
   B. Switch Caps — *Chrome*
   C. Switch Housing Kit — *Chrome*
   D. Mirror — *Aluminator® Billet, Round*
   E. Grips — *Wide Band Billet*
   F. Hand Control Lever — *Chrome*
   G. Control Cables — *Braided Stainless Steel*

RAY MAKERS

Auxiliary lighting does more than illuminate your path of travel—it also offers custom opportunities that often go overlooked by the rest of the crowd. Besides Passing and Fog Lamp kits in smoked and clear varieties, there are front and rear turn signal and lens options that can make your statement even stronger. Go for details like Chrome Trim Rings, Headlight Covers and Headlamp Housing Kits to complete the full-bore custom look.

7. Accessory Lighting
   A. Turn Signal Trim Rings — *Bullet*
   B. Passing Lamp Trim Rings — *Chrome*
   C. Headlamp Trim Ring — *Chrome*
   D. Auxiliary Lamps — *Clear*
   E. Auxiliary Lighting Kit — *Chrome*
   F. Turn Signal Relocation Kit

FRONT RUNNER

Setting the tone for the rest of your bike, the front end immediately tells people that you're one custom customer who knows how to make an impression. Whether it's major chrome additions like lower fork sliders, or smaller details like axle nut covers, you've got the options to take the lead in custom style. To make things easier, we've put together special accessory packages that include all the parts you'll need to chrome out your front end, as well as other lists for your bike's rear end and hand control areas to continue your custom efforts.

8. Front End Accessories
   A. Upper Fork Nut Covers — *Chrome*
   B. Upper Fork Slider Dust Covers — *Billet*
   C. Fork Sliders — *Chrome*
   D. Front Axle Nut Cover Kit — *Chrome*
   E. Fork Axle Retainer Nut Kit — *Chrome*

THE COMFORT ZONE

Handlebar, seat and suspension choices work together to dictate your riding position. While there's a wide range of postures you can achieve with different accessory combinations, the Reduced Reach and Extended Reach configurations below are designed as a starting point for riders whose inseams and armspans may differ from those of the average person. SEAT OF AUTHORITY

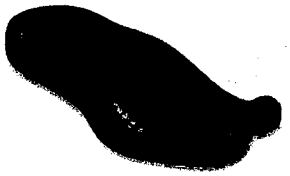
If we've said it once, we've said it plenty. A big part of being comfortable on your Dyna motorcycle is choosing a saddle that fits your body and your preferred riding position. But as any good customizer knows, the key is balancing comfort considerations with the style factor. At Harley-Davidson,® we've created a far-reaching selection of custom seats that allow you to get exactly what you want and need from a saddle. Which means you owe it to yourself to get familiar with the options, so you make an informed decision. And as always, seats are easily swapped—so you can have any number of seats on hand to match the road that lies ahead.

CUSTOM SEATS

For the ultimate in style, and the lowest seating height, choose between Brawler™ Solo, Stripper™ Low Profile, Sidekick™ Two-Up, Badlander® Custom, or Reach™ Forward Position Seats.

TOURING SEATS

Deep-bucket design puts the body in proper touring position and provides generous cushioning for rider and passenger when the miles are adding up. Choose between Rallyrunner,™ Sundowner,™ or Pillow-Look Touring Seats.



*WARNING: Installation of any accessory suspension components may affect cornering clearance and jiffy stand operation. This could distract the rider, causing loss of control and death or serious injury.

EXOTIC SEATS

The very latest from the Harley-Davidson® Exotic Seat Collection, these limited production Custom Stitched saddles combine superior construction with radical styling to give you the ultimate custom accessory. With contoured foam padding for added long-haul comfort, each seat is made from top grain leathers for superior wear and attitude with age.

Decorative custom-stitching and available custom leather inserts leave no doubt about your attention to custom detail. Seat pans are constructed from hand-laid fiberglass for extra durability, and carpeted to protect your paint finish. When it's time to flex your custom muscles, the Harley-Davidson Exotic Seat Collection has the style you're after.

A fine, aged patina and character wrinkles are a sign of the extremely high quality materials used to construct your seat or backrest. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. Please use Harley-Davidson Leather Dressing P/N 98261-91V to protect your investment.

**Note: Two-up seats and seats with passenger pillions require the use of a grab strap. See your Harley-Davidson® dealer for correct grab strap part number if not included in seat kit.*

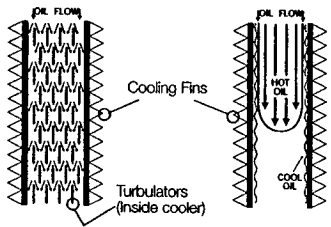
A. PREMIUM OIL COOLER KIT FOR DYNA MODELS

This horizontally-mounted oil cooler was designed specifically for Harley-Davidson to out-perform all other coolers in the industry. This cooler features a unique "Turbulator" system that evenly distributes oil across the cooling chambers. The air fins feature several louvers to efficiently dissipate heat. This popular Dyna oil cooler has been redesigned to simplify installation and enhance performance. The larger heat exchanger provides additional cooling efficiency. Kit features an adapter plate with integrated thermostat that allows oil lines to connect to the oil filter bracket. Kit comes complete with mounting hardware and precut length oil lines.

26081-05	Fits '99-later Dyna models. (Does not fit California models equipped with Evaporative Emissions Canister.) (Does not fit with Chrome Engine Guard P/N 49010-93.)	$289.95

INSIDE VIEW OF PREMIUM OIL COOLER WITH TURBULATORS

INSIDE VIEW OF CONVENTIONAL OIL COOLER WITHOUT TURBULATORS



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

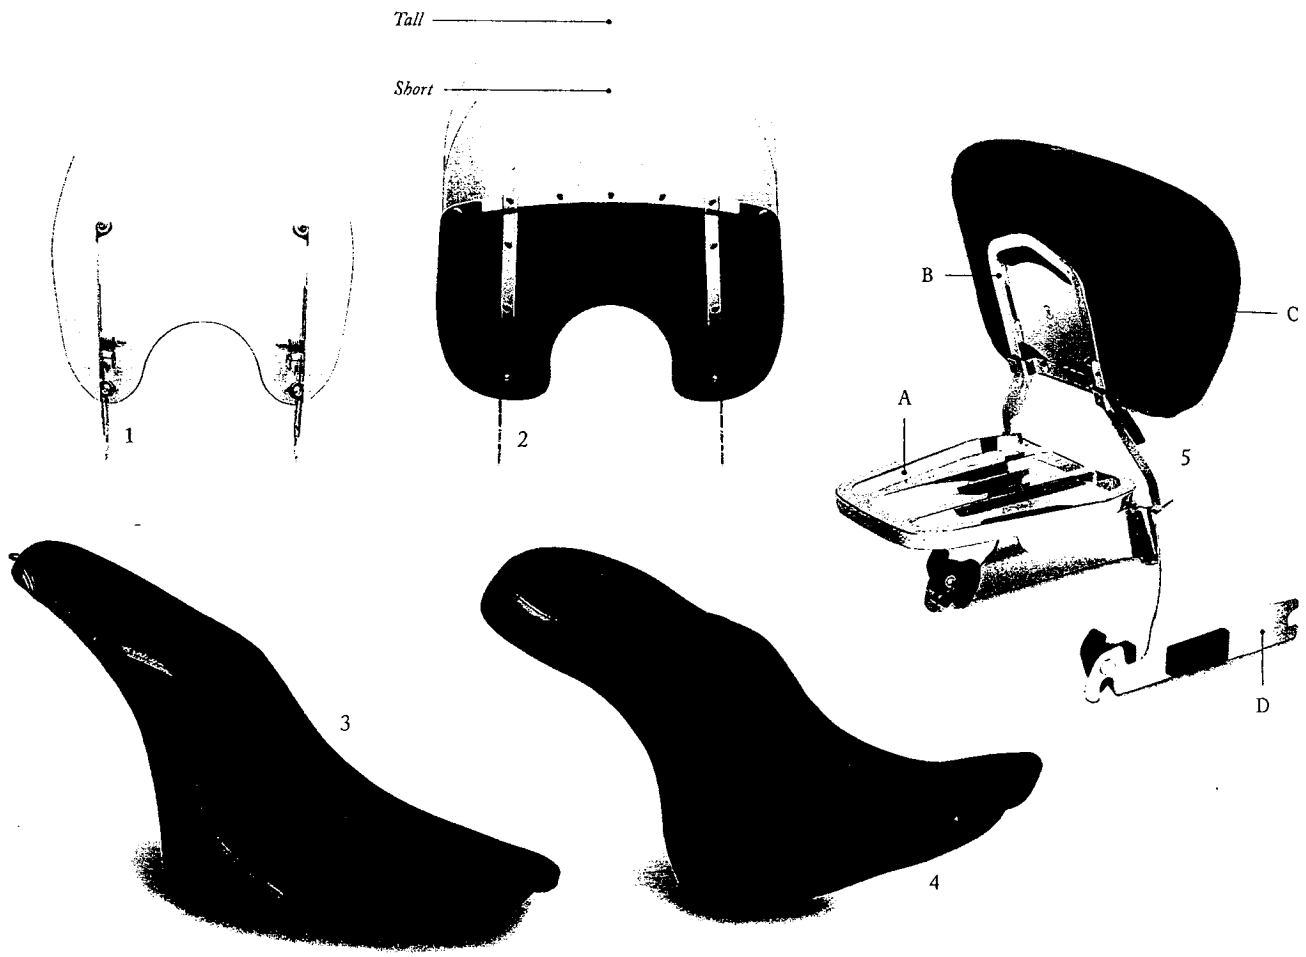
Deluxe

CUSTOM BY THE CRATEFUL

The ultimate marriage of two-wheeled past and present, the Softail® family continues to set the custom standard, with classic, hardtail lines and modern motorcycling technology that add up to a customizing canvas like no other.



WINDS OF CHANGE

Anyone who's ever ridden at highway speeds will tell you what a difference a windshield can make on the road. Besides reducing rider fatigue, windshields can also help protect you from the elements—as well as errant insects. From Super Sport designs that evenly balance looks and function, to specially designed Adjustable Height styles for FL Softail® models that offer more coverage, Harley-Davidson® windshields offer what you're looking for. And including Detachable options that attach or remove in 60 seconds or less.

1. Windshield — *Detachable Super Sport*
2. Windshield — *Detachable Adjustable Height*

DEEP SEATED

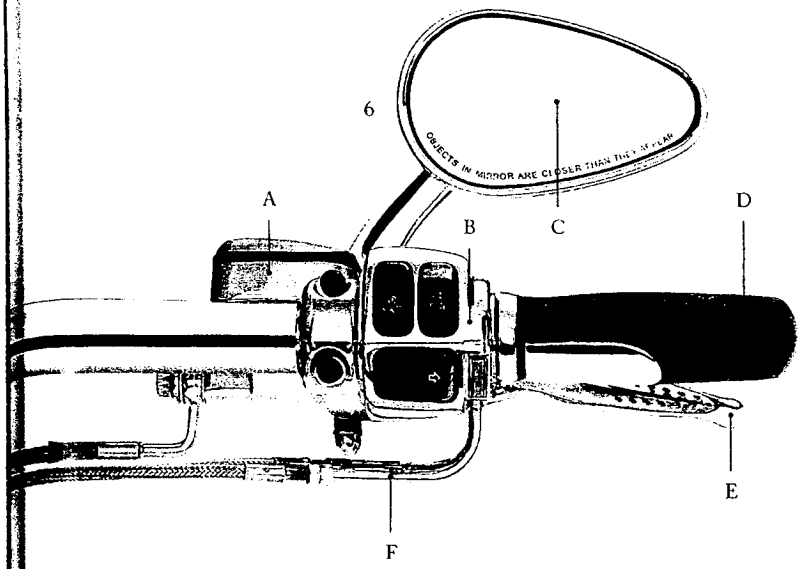
Hit the road for a few hours and you'll know why choosing the right seat for your body type and preferred riding position is an important consideration. But when it comes to seats, maximum comfort isn't everything. While low profile Badlander® and Stripper™ options are designed to increase boulevard attitude, deeper Sundowner™ and Rallyrunner™ styles provide the cushioning and support you'll need over the long haul. There's also forward-position Reach™ and new Tallboy™ saddles for riders of long or short inseams. Seats are a snap to change, so you can have a different one for each type of riding you do.

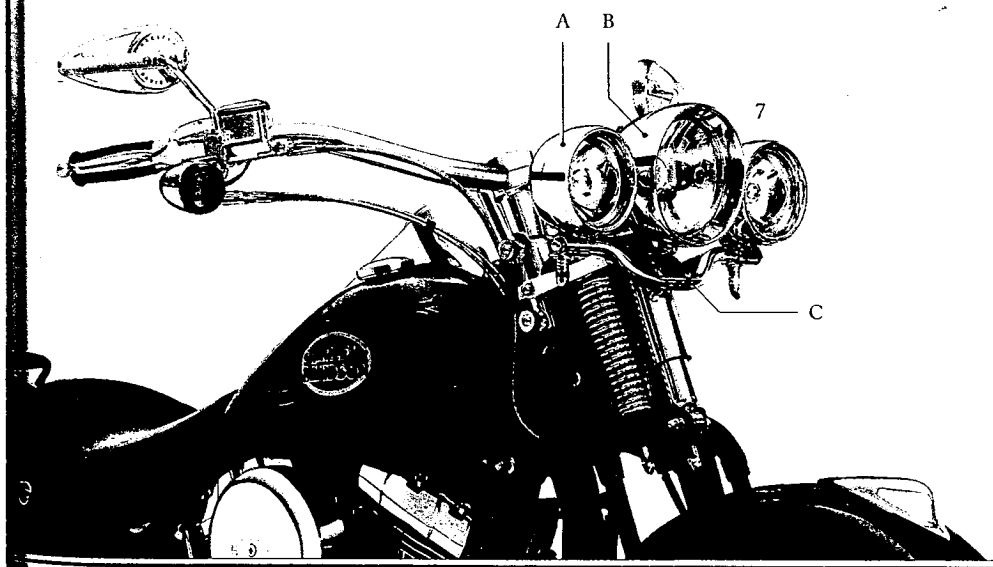
3. Seat — *Badlander®*
4. Seat — *Reach™*

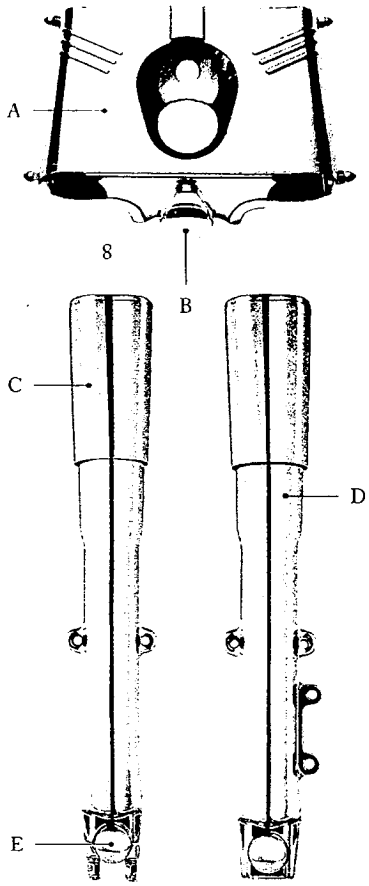
ON AGAIN, OFF AGAIN

Much more than just adding chrome, customization also entails equipping your bike for the ways you plan to use it. For example, if you often find yourself riding with a passenger, adding a sissy bar upright and a backrest pad is a good move—not only will your companion get some extra comfort, but you'll have another place to add a custom detail. While you're at it, you could also increase your touring flexibility with a custom luggage rack. And with detachable sideplates you can install or remove the whole assembly at a moment's notice.

5. Two-Up Touring Accessories
   A. Luggage Rack — *Tapered, Chrome*
   B. Upright — *Medium Low, Medallion Style*
   C. Backrest Pad — *Smooth Bucket*
   D. Sideplates — *Detachable, Chrome*







UNDER HANDED

Your bike's hand control area offers some of the most affordable and quick customization opportunities around. Plus, it's a place you see every time you're in the saddle. Create a combination that speaks to you, and you'll see immediate results that can't be ignored.

6. Hand Control Area
   A. Chrome Master Cylinder Kit — *Clutch and Brake*
   B. Switch Housing Kit — *Chrome*
   C. Mirror — *Bullet*
   D. Grips — *Aileron*
   E. Hand Control Lever — *Buckshot*
   F. Control Cables — *Braided Stainless Steel*

LIGHT THE WAY

Shine more light on the road ahead with custom auxiliary lighting options that deliver not only candlepower, but custom power. Besides Auxiliary Lamp Kits with your choice of smoked or clear lenses, you've got front and rear turn signal and lens options that add plenty of style to the equation. Details like Chrome Trim Rings and Headlight Visors can help you complete the full-on, custom look.

7. Accessory Lighting
   A. Passing Lamp Trim Rings — *Chrome*
   B. Headlamp Trim Ring — *Chrome*
   C. Auxiliary Lighting Kit — *Springer® Models*

FULL FRONTAL

You might think of your front end as just a pair of forks. But there's much more up there than meets the eye. From fork stem caps to axle retainer nuts, the front end of your bike is one big custom playground—and by chroming it out, you can send a serious, one-of-a-kind message. To that end, we've created special accessory packages that include all the parts you'll need to cover your front end in chrome, as well as other lists for your bike's rear end and hand control areas.

8. Front End Accessories
   A. Fork Cover Kit — *Chrome*
   B. Lower Triple Tree Cover — *Chrome*
   C. Upper Fork Slider Covers — *Chrome*
   D. Fork Sliders — *Chrome*
   E. Front Axle Nut Cover Kit — *Chrome*

THE COMFORT ZONE

Handlebar, seat and suspension choices work together to dictate your riding position. So it's crucial to select accessories based not solely on looks, but also on how they fit your body and riding style. While there's a wide range of postures you can achieve with different accessory combinations, the Reduced Reach and Extended Reach configurations below are designed as a starting point for riders whose inseams and armspans may differ from those of the average person. And because every rider fits their bike differently, remember to consult the professionals at your Harley-Davidson® dealer for additional options.

SEAT OF AUTHORITY

If we've said it once, we've said it plenty. A big part of being comfortable on your Softail® model is choosing a saddle that fits your body and your preferred riding position. But as any good customizer knows, the key is balancing comfort considerations with the style factor. At Harley-Davidson,® we've created a far-reaching selection of custom seats that allow you to get exactly what you want and need from a saddle. Which means you owe it to yourself to get familiar with the options, so you make an informed decision. And as always, seats are easily swapped—so you can have any number of seats on hand to match the road that lies ahead.

H. PREMIUM OIL COOLER FOR SOFTAIL® MODELS

This vertically mounted oil cooler was designed specifically for Harley-Davidson to out-perform the other coolers in the industry. This cooler features a unique "Turbulator" design that efficiently distributes oil across the cooling chambers. The cooler features several louvers to efficiently dissipate heat. The unique and stylish adaptor plate incorporates the thermostat, and simplifies oil line routing for easy installation. Comes complete with mounting hardware.

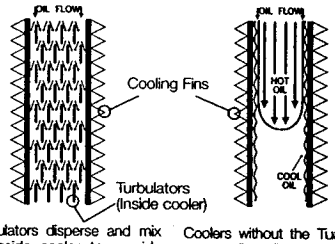
INSIDE VIEW OF PREMIUM OIL COOLER WITH TURBULATORS

INSIDE VIEW OF CONVENTIONAL OIL COOLER WITHOUT TURBULATORS



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

Oil Cooler Adapter Assembly *(not shown)*
This black anodized billet aluminum adapter eliminates the lengthy oil cooler lines required for most aftermarket oil coolers. Standard in the H-D Premium Oil Cooler, this adapter mounts between the filter mount and oil filter. Kit includes thermostat, gaskets, hardware and fittings.
