DYNA™

The soul of the 70's factory custom has found a new home—the totally redesigned 2006 Harley-Davidson® Dyna™ family. With a wider rear tire, 6-speed transmission standard EFI and the all-new FXDB® Street Bob™, the good old days just got better. So throw on some saddlebags, slide on a windshield, and hit the road.

Explore the Versatility of the Dyna™ Family

Inspired by the first generation of Harley-Davidson® factory customs, the Dyna™ model family features the classic stripped-down look you've grown to love. The crisp-handling chassis provides the foundation to build a boulevard or back-road cruiser. And the legendary Twin Cam 88® engine provides the torque to pull a fully-equipped touring bike up a steep mountain grade.

A TOURING

Feel incredible comfort on even the sharpest curves. Windshields, saddlebags and a touring seat let you ride until your spirit says to stop. Fuel up now—you and your Dyna™ motorcycle will spend a lot of quality time together.

B CRUISING

Calm the savage beast with a smoother, more relaxed ride. Build on the family's famous stretched-out feel by installing a rear-lowering kit and forward foot pegs. So lean back and smile as the boulevard flashes past you.

C CUSTOM

With sharp handling and sharp looks, the custom Dyna™ model combines beauty and brawn. Building a decked-out custom is amazing, and with the redesigned Dyna™ model, the possibilities are truly endless.

Seat of Authority

If we've said it once, we've said it plenty. A big part of being comfortable on your Dyna™ motorcycle is choosing a saddle that fits your body and your preferred riding position. But as any good customizer knows, the key is balancing comfort considerations with the style factor. At Harley-Davidson, we've created a far-reaching selection of custom seats that allow you to get exactly what you want and need from a saddle. Which means you owe it to yourself to get familiar with the options, so you make an informed decision. And as always, seats are easily swapped—so you can have any number of seats on hand to match the road that lies ahead.

WARNING: Installation of any accessory suspension components may affect cornering clearance and jiffy stand operation. This could distract the rider, causing loss of control and death or serious injury.

Custom Seat Collection

Custom saddles combine superior construction with radical styling to give you the ultimate custom accessory. With contoured foam padding for added long-haul comfort, each seat is made from top grain leathers for superior wear and attitude with age. Seat pans are constructed from hand-laid fiberglass for extra durability, and carpeted to protect your paint finish. When it's time to flex your custom muscles, the Harley-Davidson Custom Seat Collection has the style you're after.

The Comfort Zone

Handlebar, seat and suspension choices work together to dictate your riding position. So it's crucial to select accessories based not solely on looks, but also on how they fit your body and riding style. While there's a wide range of postures you can achieve with different accessory combinations, the Reduced Reach and Extended Reach configurations below are designed as a starting point for riders whose inseams and armspans may differ from those of the average person. And because every rider fits their bike differently, remember to consult the professionals at your Harley-Davidson® dealer for additional options.

NOTE: Two-up seats and seats with passenger pillions require the use of a grab strap. See your Harley-Davidson dealer for correct grab strap part number if not included in seat kit.

NOTE: Some Harley-Davidson® seats are made of leather. Fine leathers or other natural materials WILL gain "character," such as wrinkles or wear, with age. This is normal. A fine, aged patina and character wrinkles are a sign of the extremely high quality materials used to construct your seat or backrest. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. Please use Harley-Davidson Leather Dressing P/N 98261-91V to protect your investment.

*WARNING: Installation of any accessory suspension components may affect cornering clearance and jiffy stand operation. This could distract the rider, causing loss of control and death or serious injury.

Seat of Authority

If we've said it once, we've said it plenty. A big part of being comfortable on your Softail® motorcycle is choosing a saddle that fits your body and your preferred riding position. But as any good customizer knows, the key is balancing comfort considerations with the style factor. At Harley-Davidson we've created a far-reaching selection of custom seats that allow you to get exactly what you want and need from a saddle. Which means you owe it to yourself to get familiar with the options, so you make an informed decision. And as always, seats are easily swapped—so you can have any number of seats on hand to match the road that lies ahead.

Custom Collection

Style and comfort in one. Premium top-grain leathers and contoured foam padding cover a hand-laid fiberglass seat pan for comfort and durability. Available in solo, low, and mini-touring profiles.

Badlander®

Long and lean custom look that preserves a road-hugging profile and offers reduced seat height. Best for cruising the boulevard with a big, custom chip on your shoulder.

Reach™ Forward Position

Specially designed to move riders with shorter inseams closer to controls, and to bring legs closer together so that feet rest firmly on the asphalt.

Tallboy™

The name says it all. Engineered to give long-limbed riders more room to stretch out and enjoy the ride, with a wide pillion for additional passenger comfort.

Sundowner™

Deep-bucket design puts the body in proper touring position and provides generous cushioning for rider and passenger when the miles are adding up.

Bucket Seat with Rider Backrest

All the long-haul benefits of deep-bucket construction, plus an adjustable rider backrest with a patented, fingertip-adjustable design that lets you tailor the backrest angle to your liking.

Custom Seat Collection

Custom saddles combine superior construction with radical styling to give you the ultimate custom accessory. With contoured foam padding for added long-haul comfort, each seat is made from top grain leathers for superior wear and attitude with age. Seat pans are constructed from hand-laid fiberglass for extra durability, and carpeted to protect your paint finish. When it's time to flex your custom muscles, the Harley-Davidson Custom Seat Collection has the style you're after.

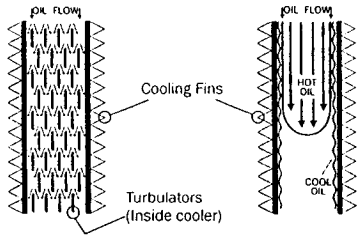
H. Premium Oil Cooler for Softail® Models

This cooler was designed specifically for Harley-Davidson to outperform all other coolers in the industry. This cooler features a unique "Turbulator" system that evenly distributes oil across the cooling chambers. The air fins are designed to efficiently dissipate heat. The oil cooler has been re-designed to simplify installation and enhance performance. The large heat exchanger provides excellent cooling efficiency. Kit features a one-piece adapter plate with integrated thermostat that allows oil lines to connect to the oil filter bracket. Kit comes complete with mounting hardware and precut oil lines.

26136-05	Fits '00-later Softail models. Does not fit with Engine Guards.	$289.00

Inside View of Premium Oil Cooler with Turbulators

Inside View of Conventional Oil Cooler without Turbulators



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

I. LCD Oil Temperature Dipstick

Add function and style by replacing your stock dipstick with this hardworking version, which includes a beautiful chrome cap and LCD (liquid crystal display) oil temperature readout. The read-out is push button operated with an automatic shut-off in five seconds and operates within plus or minus one degree. Designed also to stay on up to 15 minutes if desired. Fahrenheit or Celsius can be changed with a simple push button operation. The read-out is displayed with a rare blue light background for easier operation at night. All LCD dipsticks now incorporate an updated and more heat resistant LCD electronic unit. Twin Cam LCD dipsticks also include an improved twist and pull cam-lock removal feature. Designed to be waterproof with replaceable standard battery. Patented.

The Road Tech riser mount radio features cast aluminum and high impact plastic construction, beefed up circuitry, rugged mounting brackets and waterproof speakers surrounded by a "Bar & Shield" logo leather cover. Add the latest digital audio technology to your radio-equipped Harley-Davidson® motorcycle. The Road Tech Digital Music Player is a custom MP3/WMA™ player designed exclusively for Harley-Davidson by Bantam Interactive Technologies. Hours of music can be stored on the removable Secure Digital (SD®) memory cards, and the electronic design means no moving parts for skip-free operation on rough roads. This unique player is designed for easy fingertip operation, with large back-lit buttons and easy-to-read illuminated LCD display. Four soft-touch buttons control Play, Pause, Stop, Skip Forward, Skip Back, Repeat and Random Play functions. Simplified operation means less distraction, and the oversize controls can be operated while wearing gloves.

The Road Tech Digital Music Player replaces the right hand-control clamp, and connects to the "AUX" input of the Original Equipment fairing mount radio or riser mount Road Tech Radio. Styled to match the Original Equipment hand controls, the player is available in chrome or black finish.

Explore the Versatility of the Touring Family

Long-haul comfort and day-to-day versatility come standard on every Harley-Davidson® Touring model. By adding custom accessories, you can finally build a bike that looks and feels exactly how you want. A low-profile seat and suspension put your feet firmly on the ground, while extended footboards and a Tallboy™ seat let you stretch out in comfort. Add a little chrome and it's time to hit the streets.

A TOURING

It's what this family was born to do. When the windshields and saddlebags are standard equipment, you can focus all your customizing energy on comfort. Switch handlebars. Grab a Sundowner™ seat. Then hit the open road.

B CRUISING

Lose the map and head for Main Street. Laid-back and stripped-down, few motorcycles look better on a cross-town run than a cruiser. A custom profile seat, lowered suspension, and a shot of chrome add the essential touches.

C CUSTOM

There's just more of it to customize. With the right balance of chrome, leather and paint, you can enjoy a touring bike without moving an inch. Mixing comfort with beauty, your bike will feel at home on the highway or at the curb.

A. Adjustable Height Windshield for Road King® Models

This two-piece detachable windshield allows you to tailor the screen height for maximum riding comfort. The simple cam-lever adjustment permits the clear upper section to be raised from 17" to 20" (measured from the headlamp cut-out) to provide maximum weather protection and visibility. The Comfort Zone

Handlebar, seat and suspension choices work together to dictate your riding position. So it's crucial to select accessories based not solely on looks, but also on how they fit your body and riding style. While there's a wide range of postures you can achieve with different accessory combinations, the Reduced Reach and Extended Reach configurations below are designed as a starting point for riders whose inseams and armspans may differ from those of the average person. And because every rider fits their bike differently, remember to consult the professionals at your Harley-Davidson® dealer for additional options.

Seat of Authority

If we've said it once, we've said it plenty. A big part of being comfortable on your Touring model is choosing a saddle that fits your body and your preferred riding position. But as any good customizer knows, the key is balancing comfort considerations with the style factor. At Harley-Davidson, we've created a far-reaching selection of custom seats that allow you to get exactly what you want and need from a saddle. Which means you owe it to yourself to get familiar with the options, so you make an informed decision. And as always, seats are easily swapped—so you can have any number of seats on hand to match the road that lies ahead.

*WARNING: Installation of any accessory suspension components may affect cornering clearance and jiffy stand operation. This could distract the rider, causing loss of control and death or serious injury.

The Options

Custom Collection

Style and comfort in one. Premium top-grain leathers and contoured foam padding cover a hand-laid fiberglass seat pan for comfort and durability. Available in solo, low, and mini-touring profiles.

Badlander®

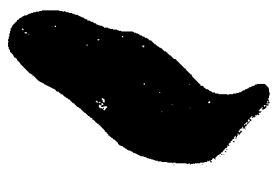
Long and lean custom look that preserves a road-hugging profile and offers reduced seat height. Best for cruising the boulevard with a big, custom chip on your shoulder.

Reach™ Forward Position

Specially designed to move riders with shorter inseams closer to controls, and to bring legs closer together so that feet rest firmly on the asphalt.

Sundowner™

Deep-bucket design puts the body in proper touring position and provides generous cushioning for rider and passenger when the miles are adding up.



Tallboy™

The name says it all. Engineered to give long-limbed riders more room to stretch out and enjoy the ride, with a wide pillion for additional passenger comfort.

Sun Ray™

The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. Harley-Davidson Color-Matched Tour-Pak Luggage

When you're serious about racking up miles, Harley-Davidson Tour-Pak luggage will help you pack for the trip. This color-matched hard luggage provides the capacity to pack for almost any riding condition. Carry the rain gear, clothing, and camping equipment you need for a ride across the country, or pack the groceries on a run to the corner store.

Tour-Pak luggage is available in primed finish, or color-matched to many Factory color combinations. Solid colors, solid colors with complementing pinstripes, and two-tone finishes are available to match most late-model Harley-Davidson color schemes. Choose from the Color-Match options on the following pages, or visit your Harley-Davidson Dealer for color-matching assistance.

Tour-Pak luggage systems are available in two capacities. The Chopped Tour-Pak offers a low-profile shape, styled to complement a long and lean Touring bike, and the King Tour-Pak is sized to provide maximum storage space.

Each Tour-Pak can be installed on Road King, Road Glide, Street Glide or Electra Glide Standard models equipped with a rigid or Detachable Tour-Pak Rack. The Detachable Rack and required docking hardware allow installation and removal of the Tour-Pak in seconds to outfit your bike for the way you'll be riding.

Passenger backrest pads are available to complement Original Equipment or Harley-Davidson accessory seats.

See pages 408-411 for available options.
