APPLICANT: Formax, Inc.

**CORRESPONDENT'S REFERENCE/DOCKET
NO:**

5142800-0002

CORRESPONDENT E-MAIL ADDRESS:

sfifield@lockelord.com

REQUEST FOR RECONSIDERATION DENIED

ISSUE/MAILING DATE: 3/21/2009

Applicant is requesting reconsideration of a final refusal issued/mailed August 24, 2008.

After careful consideration of the law and facts of the case, the examining attorney must deny the

request for reconsideration and adhere to the final action as written since no new facts or reasons have been presented that are significant and compelling with regard to the point at issue.

The applicant argues that an electric food blender is not an industrial food slicer, which the examining attorney agrees. But blenders and food slicers are sold and marketed together. To further evidence the relatedness of the goods, see the attached excerpts from Thomas Register showing commercial food blenders and/or mixers and meat slicers sold together. In addition to the previously attached evidence, attached to this office action are additional copies of third party registrations where "electric food blenders" and "electric meat slicers" or "electric mixers" use are sold under the same mark... Also attached are excerpts from the Internet showing "industrial blenders" and "industrial slicers". The registrant in this case has not limited its channels of trade.

In this case, the registrant's goods are identified broadly and includes commercial or industrial blenders. Therefore, it is presumed that the registration encompasses all goods of the type described, including commercial or industrial goods as identified in applicant's more specific identification, that they move in all normal channels of trade, and that they are available to all potential customers. *In re Elbaum*, 211 USPQ 639, 640 (TTAB 1981); *In re Optica Int'l*, 196 USPQ 775, 778 (TTAB 1977); TMEP §1207.01 (a)(iii). Furthermore, applicant seems to make a distinction between "commercial" and "industrial" and as seen by the evidence attached to this office action, the terms are interchangeable when referring to blenders and slicers.

The following excerpt is attached from an Internet website defining the industrial slicers. Again, the likelihood of confusion analysis is based the on the goods as they are identified in the application and registration.

"The Heavy Duty Industrial Slicers

The Heavy Duty Industrial Slicers start with a blade capacity of 12 inches and can go up to 14 inches. They are manufactured in the United States. These slicers are so manufactured so as to suit the needs of medium to heavy commercial operators like grocery stores, caterers, commissaries, restaurants, delis, meat shops, and for continuous heavy use. For example, the Berkel 827 E 12 inches Light Duty Manual Slicer is eminently suitable for slicing limited amounts of cheese and is priced at around 865\$. Its use would be suited for the cooking needs of small restaurants and diners." See attachment number 44.

Accordingly, applicant's request for reconsideration is *denied*. The time for appeal runs from the date the final action was issued/mailed. 37 C.F.R. Section 2.64(b); TMEP Section 715.03(c). If applicant has already filed a timely notice of appeal, the application will be forwarded to the Trademark Trial and Appeal Board (TTAB).

/Chrisie Brightmire King/
Trademark Attorney
Law Office 109
(571) 272-9179
chrisie.king@uspto.gov

STATUS CHECK: Check the status of the application at least once every six months from the initial filing date using the USPTO Trademark Applications and Registrations Retrieval (TARR) online system at <http://tarr.uspto.gov>. When conducting an online status check, print and maintain a copy of the

complete TARR screen. If the status of your application has not changed for more than six months, please contact the assigned examining attorney.

Mixing Equipment

Mixing Dough is an Art as Well as a Technology.

Great baking starts with a great bakery mixer. Our vertical, stationary, removable bowl and tilt-over spiral mixers have set the standard for the industry in quality, reliability and value. We've engineered every model to make it the strongest, most reliable machine you can own. Let us evaluate your production needs and use our experience to recommend the right size and style to maximize efficiency, reduce operating cost and maximize profits... without sacrificing quality!

[larger image](#)

Standard Features

- Bowl revolves on mobile carriage
- Stainless steel carriage handle
- Stainless steel bowl and mixing tools
- Stainless steel bowl cover with plastic sealing ring
- Automatic bowl locking device with a hydraulic fork locking system
- Hydraulic lifting and lowering of the machine head
- Bowl with reversible rotation
- Control elements in the machine head
- Illuminated push button switches
- Two electric timers: 0 - 12 min.
- Built-in motor protection, hand/automatic switch
- Automatic control
- Two stainless steel feet, adjustable in height
- Ground clearance 6"

Advantages of the new fork system

- High tractive force due to the new fork locking system
- Simple cleaning through ergonomic housing and forks
- No wearing V-Belts due to direct frictional wheel drive
- Simple bowl loading

SLICERS

[> Heavy Duty](#) [> Light Duty](#) [> Medium Duty](#)

WHETHER YOUR NEEDS ARE LIGHT, MEDIUM OR HEAVY-DUTY, WE HAVE THE SLICER FOR YOU.

Hobart offers a full line of slicers, ranging from the light-duty 610 to the completely redesigned 3000 Series, making light work of the heaviest-duty slicing. Hobart slicers support both food retail and foodservice operations across the country with their precision, ease of use and cleaning, and Hobart durability and reliability.

The Hobart 3000 Series has been completely redesigned, based on recommendations from operators, managers and dealers from both the food retail and foodservice industries. The result: a range of new features (including 9 patent-pending innovations) that improve performance across-the-board. The 3000 series is now even easier to use—reducing operator fatigue—easier to clean, while offering more protection for operators. It's your assurance of precision slicing for the most demanding operations.

The popular Hobart 2000 Series has become a stalwart of the industry, featuring a full line of manual and automatic slicers, including models offering Integrated Scale/Portion control by the ounce, pound or count.

THE INDUSTRY'S FAVORITE RECIPE FOR MIX CONSISTENCY FOR MORE THAN 75 YEARS.

Hobart mixers have set the industry standard for more than 75 years, thanks to their reliability, durability, versatility and outstanding performance. Each model—from the diminutive five-quart tabletop version to the colossal 140-quart floor model—also offers several innovative features and an easy-to-clean design.

THE LEGACY® MIXER, WITH ITS EXCLUSIVE SWING-OUT BOWL, IS NOW AVAILABLE IN 20-QUART AND 60-QUART BOWL SIZES.

The first mixer to allow the bowl to swing out, the Legacy makes it easy to add ingredients, take out product, change and mount bowls—inaugurating a new era of productivity in mixing.

The Legacy introduced a great many other changes to improve productivity, food safety and cost management. Yet there is one thing the Legacy didn't change. It maintains the same mixing speeds that chefs rely on for their mix consistency. And that's a legacy we'll always keep in the Hobart family of mixers.

Trial Rentals Available - Over 100 Blenders in Stock - Call 1-800-243-Ross

Standard Design
The standard stainless steel model is available in many sizes from 1 through 515 cu.ft. - many sizes from stock.

Cylindrical Design
Our cylindrical design is often used as a dryer. These models are normally jacketed and designed for vacuum operation.

Vacuum Design
The Vacuum model is designed with heavier walls and cover as well as special stuffing boxes.

Ross is the leading supplier of Ribbon Blenders for dry powder blending in the process industries. Many products including pharmaceuticals, foods, chemicals, fertilizers, plastics, pigments, and cosmetics are manufactured in Ross Ribbon and Paddle Blenders.

Powder blenders from Ross include Ribbon & Paddle designs and range in capacity from 1/2 cu ft. laboratory models to 515 cu. ft. production units. A wide variety of horsepower and speed combinations satisfy the most demanding blending applications.

Optional features such as sanitary designs, vacuum construction, special valves and cover openings can be provided to fine tune the machine to your process.

Laboratory testing is available to qualify your application, and to insure the selection of the best Ross mixer for your requirement. Based on data supplied by our clients or gathered during tests in our Customer Service Laboratory, our engineers assist in selection the most efficient machine for its intended use. The world's largest blender inventory is available for fast shipment. Ross Blenders are also available for purchase or trial rental.

Meat Slicers - Do You Want to Select the Right One?

Meat Slicers are one of the most important pieces of **kitchen equipment** that any user could own. They help in the even and thin slicing of foods like meats and cheeses and are very integral to cooking processes. The various types of meat slicers in the market- be they electric meat slicers, home meat slicers, industrial meat slicers, or used meat slicers -are so manufactured so as to suit varied cooking needs.

Types of Kitchen Appliances Meat Slicers

The meat slicers are of two types namely:

- The Medium Duty or the Economy Slicers and
- The Heavy Duty or the Industrial Slicers.

The Medium Duty of the Economy Slicers

The Medium Duty of the Economy Slicers start at a capacity blade of 8 inches and can go up to 14 inches. They are imported from Italy and are economically priced.. They are manufactured for light to medium use cooking applications, and are commonly designed for home use. For example, the Chef's Choice Electric Food Slicer is the ideal addition for any kitchen. Whether it is being used to prepare food items for a party or for a summer picnic, this appliance is considered to be among the best of electric meat slicers. It has a durable and hardy quality universal motor, precision in slice control, and a multi- purpose stainless steel blade.

The Heavy Duty Industrial Slicers

The Heavy Duty Industrial Slicers start with a blade capacity of 12 inches and can go up to 14 inches. They are manufactured in the United States. These slicers are so manufactured so as to suit the needs of medium to heavy commercial operators like grocers, stores, caterers

XP STYLE ICONS**

as to suit the needs of medium to heavy commercial operators like grocery stores, caterers, commissaries, restaurants, delis, meat shops, and for continuous heavy use. For example, the Berkel 827 E 12 inches Light Duty Manual Slicer is eminently suitable for slicing limited amounts of cheese and is priced at around 865\$. Its use would be suited for the cooking needs of small restaurants and diners.

How to Choose Meat Slicers

The even and thin slicing of meats and other foods gives more flavor and fewer calories. So the right choice of meat slicers can contribute to a healthier way of living. You need to think of your choice of meat slicers - used meat slicers or industrial meat slicers, or home meat slicers - as an investment and not just an expense. Investing in high quality kitchen cutlery would be one of the smartest investment decisions that you could be making; since the returns on your investment would be worth the initial expense. It would be useful to check out the following while making a choice of the ideal meat slicer.

Make sure that your meat slicer comes with a home use warranty

and that the meat slicers that you use in your restaurants or delis also come with full warranty coverage. For example, the Chef's Choice 668 food slicer is a top performing slicing machine, designed for home use, and considered prime among home meat slicers. Its powerful 200 watt motor, large 8 inches blade, and tilt design make it a superior kitchen implement. Its micrometer dial helps in slicing meat from dell -thin to 9/16 inches thick. The cantilever construction allows for open access, and additionally, the slicer's food carriage retracts totally to handle slicing large pieces of meat. This slicer comes with a smooth edged blade, and has a five year warranty, and ten on the motor.

Make sure that the kitchen appliances meat slicers or industrial meat slicers that you buy suit your cooking and kitchen needs.

For example, the Chef's Choice of the 667 food slicer has hardened extra large, stainless steel blades and 180 watt induction motors. Running smoothly and efficiently, these high torque motors make fast and light work of the largest hams and roasts and of even huge quantities of cheese.

While Making A Meat Slicers Comparison, Check out the Type of Steel used in the blade.

There are many choices and preferences for the type of steel used in the manufacture of the blade of the meat slicer, but the common consensus among veteran chefs is that of high carbon stainless steel. This type of steel ranks among the best of stain-resistant steels, and the alloy is popularly used in top quality kitchen cutlery. This steel is easy to maintain, sharpens well, and takes a sharp mean edge.

Food Preparation

Your choice for commercial restaurant equipment should always be made with value in mind. The **food processing equipment** offered here, along with over 5,000 other commercial kitchen equipment items we have available to you, have been selected by **Food Service Equipment** as high value *restaurant equipment*. As such, full warranties on our **industrial food processors**, commercial mixers, commercial slicers and **food choppers** and all of these other restaurant items listed on this website provide you with complete protection.

IMPORTANT NOTICE
USPTO OFFICE ACTION HAS ISSUED ON 3/21/2009 FOR
APPLICATION SERIAL NO. 77298497

Please follow the instructions below to continue the prosecution of your application:

VIEW OFFICE ACTION: Click on this link http://tportal.uspto.gov/external/portal/tow?DDA=Y&serial_number=77298497&doc_type=REC&mail_date=20090321 (or copy and paste this URL into the address field of your browser), or visit <http://tportal.uspto.gov/external/portal/tow> and enter the application serial number to **access** the Office action.

PLEASE NOTE: The Office action may not be immediately available but will be viewable within 24 hours of this notification.

RESPONSE MAY BE REQUIRED: You should carefully review the Office action to determine (1) if a response is required; (2) how to respond; and (3) the applicable **response time period**. Your response deadline will be calculated from **3/21/2009**.

Do NOT hit "Reply" to this e-mail notification, or otherwise attempt to e-mail your response, as the USPTO does NOT accept e-mailed responses. Instead, the USPTO recommends that you respond online using the Trademark Electronic Application System response form at <http://www.uspto.gov/teas/eTEASpageD.htm>.

HELP: For *technical* assistance in accessing the Office action, please e-mail TDR@uspto.gov. Please contact the assigned examining attorney with questions about the Office action.

WARNING

- 1. The USPTO will NOT send a separate e-mail with the Office action attached.**
- 2. Failure to file any required response by the applicable deadline will result in the ABANDONMENT of your application.**
