## Release of Information Services

### ROI Online™ - An efficient ROI Processing Service

ROI Online is designed for healthcare providers to efficiently process Release of Information requests in-house. Facility personnel receive the request, pull the chart, and send the requested information to MRO via the Webscan system. MRO processes the request from there, handling all the time consuming fulfillment requirements such as billing, collections, logging/tracking, requestor relations, and physical distribution of patient information. MRO remits a percentage of the revenue back to the facility on a monthly basis.

This system enables the provider to maintain control of the ROI process, but outsource the time-consuming "back office" processes".

ROI Online includes a state of the art, web-based correspondence management system called **ROI LOG.com™**. This powerful application features a full suite of management reports and enables both clients and requestors to check the status of a request **24 hours a day from any location**.

#### Benefits Include:

- ✓ Better control of the ROI process
- ✓ Saves staff time
- ✓ Reduce processing costs
- ✓ Enhanced turnaround time for requests
- ✓ Provides a detailed, simple to use logging/tracking system for both the facility and the requestor
- ✓ Reduce in-bound record status calls
- ✓ HIPAA Compliant
- ✓ Single turn-key application for ROI processing, facility logging, and request status tracking (by both facility & requestors)

**MRO provides** the necessary training to ensure proper deployment of ROI Online. Our goal is to create a partnership that ensures a cost-effective, long-term and stable solution for your organization's ROI processing.
