 OMB No. xxx-xxxx (Exp. xxxxx)

Request for Reconsideration after Final Action

The table below presents the data as entered.

Input Field	Entered
SERIAL NUMBER	78896551
LAW OFFICE ASSIGNED	LAW OFFICE 101
MARK SECTION (no change)	
ARGUMENT(S)	

There is No Likelihood of Confusion

The Examiner has issued a final refusal to register the instant application under the Trademark Act Section 2(d), 15 U.S.C. § 1052(d), alleging that Applicant's mark, when used in connection with the identified Class 3 goods, is likely to be confused with U.S. Registration No. 3,152,748. Applicant has carefully reviewed the Office Action and respectfully disagrees with the Examiner's conclusions.

The Examiner asserts that the marks are confusingly similar in appearance. The Examiner's conclusion, that the marks are confusingly similar in appearance because of a single shared component, is not the test for establishing confusing similarity.

The points of comparison for a word mark are **appearance, sound, meaning, and commercial impression**. *Palm Bay Imports, Inc. v. Veuve Clicquot Ponsardin Maison Fondée en 1772*, 396 F.3d 1369, 73 USPQ2d 1689, 1691 (Fed. Cir. 2005), citing *In re E. I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973). **Similarity of the marks in one respect – sight, sound or meaning – will not automatically result in a finding of likelihood of confusion even if the goods are identical or closely related.** *In re Lamson Oil Co.*, 6 USPQ2d 1041, 1043 (TTAB 1987). TMEP § 1207.01(b)(i). (*emphasis added*).

The Examiner states that "marks must be compared in their entireties," and that Applicant's argument regarding the visual dissimilarity of the marks "is unpersuasive." The Examiner's analysis does not, however, consider the sound or meaning of the marks and violates the anti-dissection rule.

The Examiner discredits Applicant's evidence of third party registrations containing the term "ION" stating only that prior actions of the Office are not binding. While Applicant agrees that each application is decided on its own facts, third party registrations are persuasive evidence of both the Office's and the various Registrant's implicit agreement that certain terms may coexist on the Federal Register and in the marketplace. Third party registrations that are in use is clear evidence that consumers will be not be confused with respect to the source of the parties' respective products because consumers have been conditioned to distinguish between various marks containing the term "ION" in light of the numerous unrelated marks containing those terms. For example, a search of the Trademark Office TESS database found the following published applications and registrations that currently coexist on the Federal Register (TARR printouts attached)[1], as grouped into relevant categories of goods:

Automotive Goods, Automotive Cleansers or General Cleansers:

Mark	Owner	Goods	Serial or Reg. No.	Website Demonstrating Current Use

Applicant draws the Examiner's attention to the following coexisting marks that are in actual use. First, in the category of non-personal cleansers,

Registrant's "ION" mark (for use on cleaning preparations for automobiles and various surfaces) coexists with Mr. Drazga's "ION" mark for cleaning compositions, Orbeco Inc's "ION" mark for cleaning preparations, and Ashburn Industries Inc.'s "ION" mark for cleaning preparations. Second, in the automotive-related goods category, Registrant's "ION" mark (for use on cleaning preparations for automobiles and various surfaces) coexists with Saturn Corporation's "ION" mark for automobiles, Ionlube Corporation's "ION" mark for automotive lubricant, and CIA Wheel Group's "ION" mark for automotive wheels. Lastly, the Examiner's attention is respectfully directed to similarly coexisting "ION" marks for use on goods in the categories of personal care products and air purifiers.

As mentioned above, the fact that the foregoing marks currently coexist on the Federal Register and are in use demonstrates that consumers, the Trademark Office, and the cited registrants themselves recognize that there is no likelihood of confusion arising from the simultaneous use and registration of "ION" marks and variations thereof that are owned by different entities and used in connection with sufficiently distinguishable goods.

Applicant recognizes that the mark "ION" is commonly used, and as such, Applicant's mark can "come closer to [the cited] mark than would be the case with a strong mark without violating [the parties' respective] rights." *Kenner Park Toys, Inc. v. Rose Art Industries, Inc.*, 963 F.2d 350, 353, 22 USPQ2d 1453, 1456 (Fed. Cir. 1992) (quoting *Sure-Fit Products Company v. Saltzon Drapery Company*, 254 F.2d 158, 160, 117 USPQ 295, 296 (CCPA 1958)).

Finally, it is important to also consider the Examiner's conclusions after reviewing the response that was filed by the cited Registrant to a similar Office Action issued in that case (attached). In arguing against a descriptiveness refusal regarding the term "ION," Registrant cited a list of seven "ION" registrations and applications, and stated:

[e]ven though the circumstances and facts attendant to each of these ION marks differ, Applicant submits that none is likely to be sufficiently compelling to justify the refusal to register Applicant's mark in the face of established Trademark Office precedent approving ION combination marks for registration.

In that case, the Examiner agreed with the cited Registrant that "ION" marks have been found capable of registration, held not to be merely descriptive, and allowed to coexist among other "ION" marks on the Federal Register and in the marketplace.

In conclusion, while Applicant concedes that one term in its mark is identical to one term in the cited registration, that same term is also identical to several other registrations that have been allowed to register and are in use. As such, there is no likelihood of confusion between Applicant's mark and the cited mark, because the public, prior registrants, and the Office have recognized that there is no likelihood of confusion arising from the simultaneous use and registration of "ION" marks and/or variations thereof. The cited mark already co-exists on the Federal Register and in the marketplace with other "ION" marks used in connection with relevant goods.

Conclusion

Applicant believes that it has addressed all outstanding issues, and that the application is now in condition to pass to publication. As this is in response to a final Office Action, Applicant has filed a Notice of Appeal with the Trademark Trial and Appeal Board simultaneously with its response. Should the Examiner wish to address any remaining issues with the application, she is courteously requested to contact the undersigned.

[1] The Examiner has noted that Applicant must attach copies to make registrations part of the record, which are attached hereto.

PTD Form 1960 (Rev. 9/2007)
OMB No. 3222-2222 (Exp. 2/22/02)

Request for Reconsideration after Final Action

To the Commissioner for Trademarks:

Application serial no. 78896551 has been amended as follows:

ARGUMENT(S)

In response to the substantive refusal(s), please note the following:
There is No Likelihood of Confusion

The Examiner has issued a final refusal to register the instant application under the Trademark Act Section 2(d), 15 U.S.C. § 1052(d), alleging that Applicant's mark, when used in connection with the identified Class 3 goods, is likely to be confused with U.S. Registration No. 3,152,748. Applicant has carefully reviewed the Office Action and respectfully disagrees with the Examiner's conclusions.

The Examiner asserts that the marks are confusingly similar in appearance. The Examiner's conclusion, that the marks are confusingly similar in appearance because of a single shared component, is not the test for establishing confusing similarity.

The points of comparison for a word mark are **appearance, sound, meaning, and commercial impression**. *Palm Bay Imports, Inc. v. Veuve Clicquot Ponsardin Maison Fondée en 1772*, 396 F.3d 1369, 73 USPQ2d 1689, 1691 (Fed. Cir. 2005), citing *In re E. I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973). **Similarity of the marks in one respect – sight, sound or meaning – will not automatically result in a finding of likelihood of confusion even if the goods are identical or closely related.** *In re Lamson Oil Co.*, 6 USPQ2d 1041, 1043 (TTAB 1987). TMEP § 1207.01(b)(i). (*emphasis added*).

The Examiner states that "marks must be compared in their entireties," and that Applicant's argument regarding the visual dissimilarity of the marks "is unpersuasive." The Examiner's analysis does not, however, consider the sound or meaning of the marks and violates the anti-dissection rule.

The Examiner discredits Applicant's evidence of third party registrations containing the term "ION" stating only that prior actions of the Office are not binding. While Applicant agrees that each application is decided on its own facts, third party registrations are persuasive evidence of both the Office's and the various Registrant's implicit agreement that certain terms may coexist on the Federal Register and in the marketplace. Third party registrations that are in use is clear evidence that consumers will be not be confused with respect to the source of the parties' respective products because consumers have been conditioned to distinguish between various marks containing the term "ION" in light of the numerous unrelated marks containing those terms. For example, a search of the Trademark Office TESS database found the following published applications and registrations that currently coexist on the Federal Register (TARR printouts attached)[1], as grouped into relevant categories of goods:

Automotive Goods, Automotive Cleansers or General Cleansers:

Applicant draws the Examiner's attention to the following coexisting marks that are in actual use. First, in the category of non-personal cleansers, Registrant's "ION" mark (for use on cleaning preparations for automobiles and various surfaces) coexists with Mr. Drazga's "ION" mark for cleaning compositions, Orbeco Inc's "ION" mark for cleaning preparations, and Ashbum Industries Inc.'s "ION" mark for cleaning preparations. Second, in the automotive-related goods category, Registrant's "ION" mark (for use on cleaning preparations for automobiles and various surfaces) coexists with Saturn Corporation's "ION" mark for automobiles, Ionlube Corporation's "ION" mark for automotive lubricant, and CIA Wheel Group's "ION" mark for automotive wheels. Lastly, the Examiner's attention is respectfully directed to similarly coexisting "ION" marks for use on goods in the categories of personal care products and air purifiers.

As mentioned above, the fact that the foregoing marks currently coexist on the Federal Register and are in use demonstrates that consumers, the Trademark Office, and the cited registrants themselves recognize that there is no likelihood of confusion arising from the simultaneous use and registration of "ION" marks and variations thereof that are owned by different entities and used in connection with sufficiently distinguishable goods.

Applicant recognizes that the mark "ION" is commonly used, and as such, Applicant's mark can "come closer to [the cited] mark than would be the case with a strong mark without violating [the parties' respective] rights." *Kenner Park Toys, Inc. v. Rose Art Industries, Inc.*, 983 F.2d 350, 353, 22 USPQ2d 1453, 1456 (Fed. Cir. 1992) (quoting *Sure-Fit Products Company v. Saitzon Drapery Company*, 254 F.2d 158, 160, 117 USPQ 295, 296 (CCPA 1958)).

Finally, it is important to also consider the Examiner's conclusions after reviewing the response that was filed by the cited Registrant to a similar Office Action issued in that case (attached). In arguing against a descriptiveness refusal regarding the term "ION," Registrant cited a list of seven "ION" registrations and applications, and stated:

[e]ven though the circumstances and facts attendant to each of these ION marks differ, Applicant submits that none is likely to be sufficiently compelling to justify the refusal to register Applicant's mark in the face of established Trademark Office precedent approving ION combination marks for registration.

In that case, the Examiner agreed with the cited Registrant that "ION" marks have been found capable of registration, held not to be merely descriptive, and allowed to coexist among other "ION" marks on the Federal Register and in the marketplace.

In conclusion, while Applicant concedes that one term in its mark is identical to one term in the cited registration, that same term is also identical to several other registrations that have been allowed to register and are in use. As such, there is no likelihood of confusion between Applicant's mark and the cited mark, because the public, prior registrants, and the Office have recognized that there is no likelihood of confusion arising from the simultaneous use

and registration of "ION" marks and/or variations thereof. The cited mark already co-exists on the Federal Register and in the marketplace with other "ION" marks used in connection with relevant goods.

Conclusion

Applicant believes that it has addressed all outstanding issues, and that the application is now in condition to pass to publication. As this is in response to a final Office Action, Applicant has filed a Notice of Appeal with the Trademark Trial and Appeal Board simultaneously with its response. Should the Examiner wish to address any remaining issues with the application, she is courteously requested to contact the undersigned.

[1] The Examiner has noted that Applicant must attach copies to make registrations part of the record, which are attached hereto.

SIGNATURE(S)

Request for Reconsideration Signature

Signature: /ekb/ Date: 11/23/2007

Signatory's Name: Elizabeth K. Brock

Signatory's Position: Attorney for Applicant; attorney with Harness, Dickey & Pierce, PLC

The signatory has confirmed that he/she is an attorney who is a member in good standing of the bar of the highest court of a U.S. state, which includes the District of Columbia, Puerto Rico, and other federal territories and possessions; and he/she is currently the applicant's attorney or an associate thereof; and to the best of his/her knowledge, if prior to his/her appointment another U.S. attorney or a Canadian attorney/agent not currently associated with his/her company/firm previously represented the applicant in this matter: (1) the applicant has filed or is concurrently filing a signed revocation of or substitute power of attorney with the USPTO; (2) the USPTO has granted the request of the prior representative to withdraw; (3) the applicant has filed a power of attorney appointing him/her in this matter, or (4) the applicant's appointed U.S. attorney or Canadian attorney/agent has filed a power of attorney appointing him/her as an associate attorney in this matter.

The applicant is filing a Notice of Appeal in conjunction with this Request for Reconsideration.

Welcome to IONstein Air Technologies

IONstein Air Technologies is the Exclusive Distributor for IONz Products. IONstein Air has the proven solution for removing poor air quality in your homes and businesses.

See our satisfied customer testimonials on the about us page.

You and Your Family Are at Risk

The Environmental Protection Agency (EPA) states that poor Indoor Air Quality is one of the top five environmental health risks in the United States.

What You Can Do Now

Our technology can help neutralize mold, control bacteria and the spread of airborne viruses, and lessens airborne particles and germs.

The IONz ionization equipment creates a measurable and controllable quantity of positively and negatively charged oxygen ions that neutralize contaminants such as mold, fungi, bacteria, VOCs, odors, smoke. (ASHRAE, the Air-Conditioning and Refrigeration Institute (ARI) and International Exposition Company (IEC).

Clean Technology

IONstein Air's products provide proven technology that naturally cleans the air while it destroys dangerous toxins. It produces no measurable ozone or harmful by-products such as ultraviolet light, commonly found in many less effective products, as illustrated in **this article** from Consumer Reports.

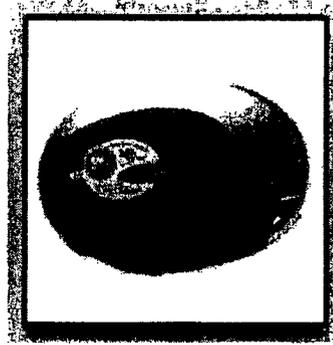

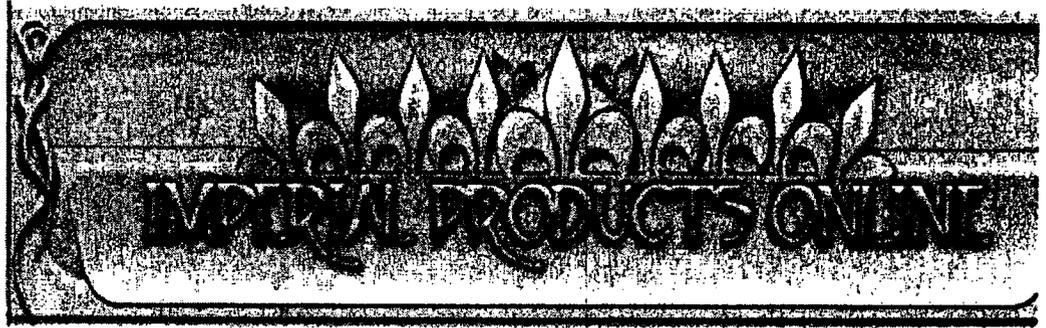

Complete Systems

Beware of Other Air Purifier Advertised Claims. **IONstein Air products clean EVERY CUBIC FOOT OF AIR in your home or business, not just the air surrounding the filtering unit.** Schools, Hospitals, Commercial Office Buildings, Homes, Manufacturing Facilities, Fire Stations, Golf Clubhouses, Convention Centers. No matter where you or your loved ones find yourself each day, all can benefit from having the IONstein Air Technologies Clean Air System working to keep the air you breathe pure and healthy . day after day.

Read this testimonial letter from a satisfied customer.

SITE DESIGN BY: NEW ANGLE MEDIA

Ion Care Ozone Air Purifier w/ 3M Filtrete Air Filter

Ion Care is considered by many to be the premium name in ozone and anion purification. As an authorized Ion Care distributor we are able to offer their air purifier at the lowest possible prices. We are now proud to offer their *flagship GH 2115* at a new before seen low price. To purchase the GH 2115 in our retail stores would cost you **\$274** . You now have the opportunity to pick up one of these fantastic units online at a fraction of that price!

So what makes the GH 2115 different from other quality ozone air purifiers on the market? The secret lies in its *integrated 3M Filtrete air filter* . By matching *negative ion (anion) output with a HEPA like filter* , Ion Care was able to establish the ultimate air purification system. The 3M Filtrete air filter is literally an *electric filter* that goes beyond conventional mechanical capture mechanisms by using permanent electrostatic charges to remove airborne particles. No particles can escape the static electric filter of the GH 2115. Particles are actually drawn to the filter where they are captured and prevented from being released back into your air environment. You simply cannot find better air purify for this price!!

The GH 2115 is literally **4 air purification systems in 1** . All air that enters the GH 2115 must pass through (1) a 3M Filtrete air filter; (2) an active carbon filter; (3) a high powered ionizer; and (4) a fragrance box. The GH 2115 is literally the ultimate purification system. Use this system to remove pollutants and pathogens from your indoor air. Improve your health by improving your indoor air quality.

Pure-Ion® Travel Ionic Air Purifier Travel in a zone of healthier air

Versatile, compact design can be worn around neck, clipped to shirt or placed on your hotel nightstand for cleaner air wherever you go.

Gently blinking blue LED light indicates that your Pure-Ion® is in use. Delivers 40 days of continuous use on a single battery.

Purifier emits a constant stream of negative ions, forcing airborne pollutants away from your personal space.

Pure-Ion® Travel Ionic Air Purifier

Brookstone sku # 446773

Write a Review Read 6 Reviews

Breathe cleaner, healthier air—everywhere you go. Our Pure-Ion® Travel Ionic Air Purifier emits a constant stream of negative ions, forcing airborne pollutants away from your personal space and giving you a zone of cleaner, healthier air to breathe—everywhere you go. No filters to buy—Pure-Ion® Travel requires no maintenance, other than periodic battery replacement. Silent operation—no noisy fans or motors, Pure-Ion® Travel cleans air in complete silence. Versatile, compact design—wear it around your neck (strap included), clip it to your shirt (with built-in clip), or place on a nightstand.

noosapories

A Zone of Healthier Air
Place Pure-Ion® Travel on your bedside table while you sleep. Or clip it to your shirt or wear it around your neck (Fig.1) to create a zone of cleaner healthier air while traveling or in the office.

Pure-Ion® Helps Protect Against Airborne Pollutants
Advanced ionic technology emits a constant stream of negative ions that attach to the pollutants in the air. The pollutants are then forced away from your personal space, giving you a zone of cleaner, healthier air (Fig. 2).

Extremely energy-efficient. Provides close to 40 days of continuous use on a single battery.

'On' indicator light.
Gently blinking blue LED indicates that Pure-Ion® is in use.

Uses one CR2032 button cell battery (included).

[ADD TO WISH LIST](#)

DESCRIPTION

- Ion wheat germ protein ensures stronger, smoother, healthier hair during and after the hair coloring process
- Provides greater client comfort
- Refreshing fragrance

USAGE TIPS

This developer can be mixed with any permanent hair color or lightener when the directions call for 10 volume hydrogen peroxide. The creamy viscosity will allow for either bottle or bowl and brush application. It provides superior color results when used with Ion Color Brilliance Creme or Liquid Permanent Hair Color. Keep cap tightly closed and store in a cool location.

Healing Touch Therapies

Restore Your Health and Vitality Naturally with the *ionSpa*® *

We provide *ionSpa*® footbath services and sales, a holistic way of approaching disease through saturation of the blood, tissues, cells and organs with ions. These naturally stimulating and relaxing sessions are based on ionization of water and osmosis. This process aligns the molecules of the body and allows toxins to freely flow out from the body through the larger pores of the feet.

IonCleanse® vs. Competition	Pricing and Ordering	Beware
Home	How IonCleanse® Works	Why Detoxify
		Research

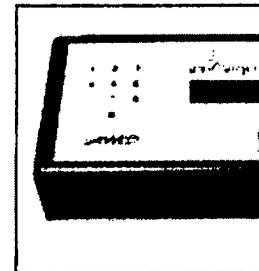

IonCleanse® Premier™

Recall the way your body felt the last time you stood next to a waterfall or a beach with the waves breaking at your feet. You breathed deeper into your abdomen; your brain cleared and the pains in your joints subsided. You found yourself at peace with the world.

These invigorating reactions were caused by the ionization of trillions of molecules as they crashed to earth.

The IonCleanse® Premier™ is a state of the art unit that features

1. Five different session programs
2. Dual Polarity
3. FCC and CE safety approvals
4. Overnight warranty repair service
5. Lifetime Customer Service & Support
6. Made in the USA

Five Different Session Programs

As with any cleansing modality, versatility is extremely important. With the IonCleanse® Premier™ Vitality Enhancement System the user is able to choose from five session programs allowing almost anyone to use the equipment. Most units on the market offer only a single session program. Users of these "mono" units may eventually complain of dizziness, nausea and light-headedness during their sessions. These effects are attributed to using the wrong polarity. Users of the IonCleanse® Premier™ will almost never feel these sensations.

Dual Polarity

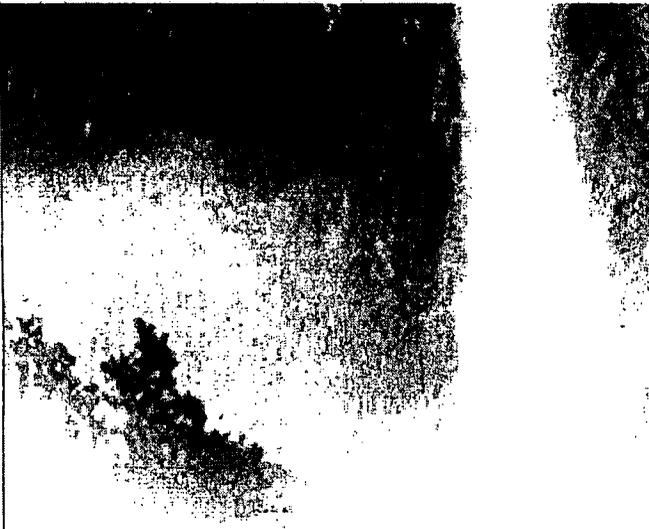

The IonCleanse® Premier™ has the ability to switch from a positive polarity (produces a predominance of negative ions in the water) to a negative polarity (produces a predominance of positive ions in the water) and visa versa. This array configuration is the only one of its kind to produce both positive and negative ions in the water. Click here to read our peer reviewed article published in Exponent Magazine, which describes the IonCleanse® process in detail.

FCC & CE Safety Approvals

The IonCleanse® Premier™ uses a direct current to perform electrolysis. The direct current originates from an alternating current from a wall outlet. IonCleanse® Premier™ is the only foot bath of its type to receive FCC & CE approvals, making it the safest purifying foot bath available on the market. Review these important safety tests.

Overnight warranty repair service

Should you experience a problem with your IonCleanse® Premier™ during

period that is due to a manufacturer's defect, AMD will overnight a temporary (available to US residents only) and provide you with a prepaid return for your malfunctioning unit.

Lifetime Customer Service & Support

The use of ionization devices is far more complicated than simply putting feet in water and turning on the switch. The reason for A Major Difference and success is the clinical support it provides to both practitioner and individual on a continuing basis. We teach you how to use the unit safely and effectively available during business hours to help guide you through your personal challenges and we offer ongoing educational opportunities through seminars and professional training.

Made in the USA 

The IonCleanse® Premier™ is manufactured and assembled in the United States to meet quality control standards, along with a team of engineers with over 100 years of combined experience, ensure that the IonCleanse® Premier™ product is the best line ionic foot bath available on the market today. With a failure rate of less than 1% dating back to March of 2002, the IonCleanse® Premier™ has a proven track record that no one else can match.

The IonCleanse® is not intended to treat, cure, prevent or diagnose any disease.

Opportunities

[Business
Opportunity](#)

As the originator of Waterless Technology, DRI WASH 'n GUARD® continues to DOMINATE the waterless cleaning market, while also taking a prominent place in all aspects of the auto finish maintenance and polishing arena. So, when something is changing in our industry, we at DWG International™ are the first to know about it.

[Distributor
Application](#)

[Waterless Detailing
Business](#)

Since the beginning of the year 2000, major auto manufacturers have begun changing the paint formula they use on their cars and upon learning of these changes in the paint formulation, the DWG International™ research and development team went into action. Nearly three years later DWG International™ is excited to announce the introduction of DWG ULTRA-ION™.

Information

[About Dri Wash](#)

[Demo Videos](#)

Specifically designed for the 21st century paints used on cars manufactured since the year 2000 and using the infusion of ionic technology with our award-winning Polymer technology, DWG ULTRA-ION™ far exceeds all other car care products on the market today.

[FAQ - Dri Wash](#)

[Detailing Tips](#)

The Ionic Technology helps to enhance the performance of the product in all aspects including:

[Favorite Links](#)

1) Being extremely aggressive in emulsifying all organic matter, as well as bugs, bird droppings and tar from surfaces more quickly and easily than anything on the market!

[Fundraising](#)

2) Putting a positive charge on the paints surface thus helping repel dust and dirt from your vehicle!

[Canada](#)

[Spanish](#)

- 3) Helping to reduce and remove existing minor feather scratches as you apply and buff the painted surface!
- 4) Providing UV protection for vehicles surfaces!
- 5) Working incredibly on darker colored cars... even in direct sunlight in temperatures in excess of 100 degrees!

[CLICK HERE ORDER DWG ULTRA-ION™](#)

More on DWG ULTRA- ION™

You already know it: DRI WASH 'n GUARD® is the finest product for vehicle paint cleaning and polishing that has ever been created. In fact, the introduction of DRI WASH 'n GUARD®, - more than a decade ago - ushered in a new technology never known before. Since then, there have been many companies that have tried to "crack the code" of DWG Waterless Technology, but none have succeeded.

As the originator of Waterless Technology, DRI WASH 'n GUARD® continues to DOMINATE the waterless cleaning market, while also taking a prominent place in all aspects of the auto finish maintenance and polishing arena. So, when something is changing in our industry, we at DWG International™ are the first to know about it

So, what is changing...?

The auto industry is changing ...and DWG International is the only company to adapt to these changes and supply you with the technology you need to take full advantage of a new phenomenon in auto paint cleaning, polishing and maintenance.

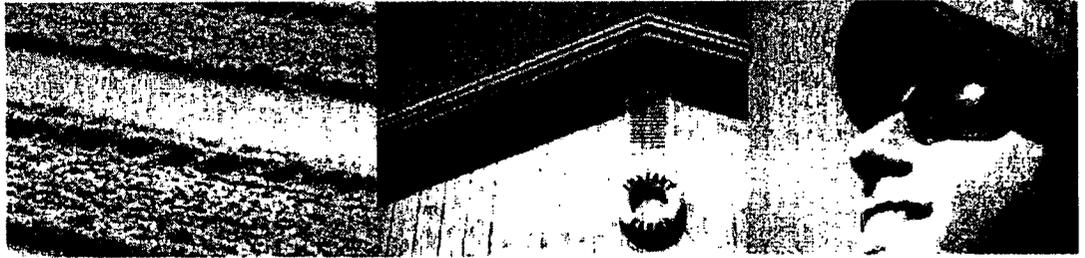

Since the beginning of the year 2000, major auto manufacturers have begun changing the paint formula they use on their cars. After suspecting that something was different in the paint on newer model vehicles, we contacted the major auto manufacturers and asked about these changes. After much investigation and cooperation with the auto industry, we learned that the changes being made were to accommodate new body panel materials being used in the manufacturing process, as well as new environmental protection laws that had gone into effect. These changes have resulted in clear coats that are stronger and more durable, yet more flexible, than before. In essence, the paint will actually flex and yield more. instead of remaining solid and polishing like marble or glass, however, these new high-tech paints are more sensitive to soaps, waxes and polishes. They have a tendency to streak, and because they are more flexible, they feather-scratch very easily.

Two-and-a-Half Years of Research and Development

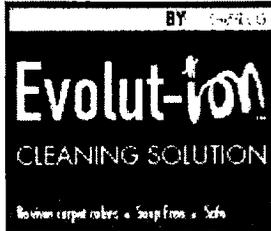

Upon learning of these changes in auto paint formulations, the DWG

- [Why Choose Ionlube?](#)
- [Consumer Applications](#)
- [Commercial Applications](#)
- [Industrial Applications](#)

What can Ionlube do for you?

- Eliminate up to 99% of equipment wear.
- Reduce equipment operating temperature and noise level.
- Eliminate any build-up and keep equipment completely clean.
- Contribute to considerable savings in energy and lubricants consumption.
- May extend maintenance intervals 4 to 7 times, and enable significant reduction in maintenance cost
- In the event of lubricant loss, equipment is protected for a considerable time under any working conditions.
- Performance does not deteriorate in severe operating conditions of dust, dirt and moisture.

IONLUBE, unlike conventional lubricants, is 100% petroleum based: IONLUBE carries no lead, moly, graphite, PTFE or other solids. IONLUBE effectively coats metal surfaces with an ionized micro-layer of oil molecules. When applied, under heat and pressure, some elements of IONLUBE **impregnate metallurgically the crystal structure of the metal itself** at its mating friction surface. As a result of the metallurgical process, a very thin layer of original metal is converted into **a new type of metal that is much harder and has at least 100 times longer wear-life**. This newly formed layer of metal protects the original "softer" metal beneath it from any wear.

Since the protective layer is very thin, it is very flexible. This advanced technology that allows formation of hard, smooth polished-like surfaces from the original friction surfaces, is one of the main features that makes IONLUBE so different from other lubricants on the market today.

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: DWG International

Serial No.: 78/277,716

Trademark: ULTRA-ION

Filing Date: July 23, 2003

Examining Atty.: Barbara A. Gold, Law Office 106

Atty. File No.: 869376

Commissioner for Trademarks
 2900 Crystal Drive
 Arlington, VA 22202-3514

RESPONSE

Dear Sir:

Applicant responds to the Office Action mailed January 20, 2004.

IDENTIFICATION OF GOODS

Please delete the identification of goods in its entirety and substitute:

Coatings in the nature of sealants, polishes and finishes for non-porous surfaces in the automotive, marine and aircraft industries; corrosion inhibiting paint type coatings for use on automobiles, metal surfaces, fiber glass and glass, in Intl. Class 2.

Cleaning preparations and polishes for use on automobiles, metal surfaces, fiber glass and glass, in Intl. Class 3.

A check in the amount of \$335 is attached to this response as payment for the additional class.

07-06-2004

SPECIMEN

A substitute specimen and Declaration Under Section 2.20 are attached to this response.

REFUSAL TO REGISTER

A. Applicant's Mark is Not Merely Descriptive

Registration has been refused on the ground that ULTRA-ION "merely describes the features and functions of applicant's goods." Applicant submits that its mark, when used on or in connection with the goods in the application (as amended above), is not descriptive.

A mark is merely descriptive if it "directly conveys information concerning the function, characteristics, purpose or use of the product." *Towers v. Advent Software, Inc.*, 913 F.2d 942, 944, 16 USPQ2d 1039, 1040 (Fed. Cir. 1990) (emphasis added). A mark is merely descriptive if it immediately conveys information concerning a quality or characteristic of the product or service, *In re MBNA America Bank N.A.*, 67 USPQ2d 1778, 1780 (Fed. Cir. 2003), or if it would immediately convey to one seeing or hearing it the thought of [the] product." *In re Hutchinson Tech. Inc.*, 852 F.2d 552, 555, 7 USPQ 2d 1490, 1492 (Fed. Cir. 1988) (emphases added).

The Board's test was succinctly summarized in *In re Pennzoil Prods. Co.*, 20 USPQ2d 1753, 1755 (TTAB 1991):

It is well settled that a term is considered to be merely descriptive of goods or services, within the meaning of Section 2(e)(1) of the Trademark Act, if it immediately describes an ingredient, quality, characteristic or feature thereof or if it directly conveys information regarding the nature, function, purpose or use of the goods or services.

As these cases make clear, the key component of the "merely descriptive" test is not whether the mark can, in some manner, be considered descriptive, but rather whether the

ingredients, quality, characteristics, etc. of the goods identified by the mark are immediately or directly conveyed by the mark. By using terms such as “immediately” and “directly”, the Federal Circuit and the Board have imposed a high threshold for designating a mark as merely descriptive. Applicant submits that ULTRA-ION does not cross that threshold when used in connection with the goods identified in the application.

Applicant submits that ION is not a term that the purchasing public will associate with coating products and cleaning preparations. “Ion” is defined as “an electrically charged atom, radical, or molecule, formed by the loss or gain of one or more electrons.” (A copy of the dictionary entry for ion is attached to this response.) Neither ION nor Ionic describe Applicant’s goods, nor do these terms suggest in any manner the nature, function, or intended purposes of Applicant’s goods. ION suggests nothing more than the fact that a particular technology was employed to create the product. The use of ION in the trademark is intended to enhance the appeal of the product – not describe it.

Applicant’s use of ION is entirely consistent with the following marks, all registered, or approved for registration, on the Principal Register without a disclaimer of ION:

<u>Mark</u>	<u>Reg. No.</u>	<u>Goods</u>
ION COAT	2,083,249 [canceled]	coating wax, namely, car polish
ION COAT	75/736,079	apparatus and instruments for coating and for use in surface treatment of materials; apparatus and instruments for evaluating and testing materials, surface coatings and surface treatment of materials; computer software and hardware relating to process control systems [services omitted]
ION CRYSTAL	1,996,431	lens and bulb coating for automotive auxiliary lighting

78/277,716

<u>Mark</u>	<u>Reg. No.</u>	<u>Goods</u>
IONLINK	76/108,281 [canceled]	antimicrobial, anti-thrombic, wear-resistant and lubricating coatings and surface treatments sold as an integral component of catheters, stents, shunts, vascular prostheses, pacemaker leads, maxillofacial implants, bone implants, polymeric implants for soft tissue and orthopedic implants
ION-TRACE	1,548,214 [canceled]	kits containing rare earth formulations for applying as a film to the surface of products, the formulations being sensitive to subsequent x-ray spectograph analysis application of coatings to products for the purpose of identification of the products to which the coatings are applied, and the service of identifying such products.
ION•A•CLEAN and Design	76/555,047	all purpose cleaning preparations
ION-417	1,406,408	cleaning compositions for industrial, institutional, or commercial use

Copies of the Patent and Trademark Office records for these marks are attached to this Response.

Applicant's ULTRA-ION mark is no more descriptive than any of these marks. As the Board stated in *In re Styleclick.com Inc.*, 57 USPQ2d 1445, 1447 (TTAB 2000): "Uniform treatment under the Trademark Act is an administrative goal." The Federal Circuit has endorsed this policy: "Needless to say, this court encourages the PTO to achieve a uniform standard for assessing registrability of marks." *In re Nett Designs, Inc.*, 236 F.3d 1339, 1342, 57 USPQ2d 1564, 1566 (Fed. Cir 2001). Even though the circumstances and facts attendant to each of these ION marks differ, Applicant submits that none is likely to be sufficiently compelling to justify the refusal to register Applicant's mark in the face of the established Trademark Office precedent approving ION combination marks for registration.

B. ULTRA-ION is Suggestive

If the mark requires imagination, thought, and perception to arrive at the qualities or characteristics of the goods or services, then the mark is suggestive. *In re MBNA America Bank N.A.*, 67 USPQ2d 1778, 1780 (Fed. Cir. 2003). In *BellSouth Corp. v. Planum Tech. Corp.*, 14 USPQ2d 1555, 1556 (TTAB 1990), the Board stated that a mark is suggestive if it “requires a modicum of imagination or thought before one is able to determine the nature of applicant’s product.” (Emphasis added). (PHONE FORWARD was suggestive of a call forwarding phone service because the “meaning conveyed by applicant’s mark is not immediate or direct.” *Id.*)

BellSouth cited the following examples of marks held to be suggestive:

- NO BURST for liquid antifreeze designed to prevent the bursting of pipes in hot water heating systems, *In re The Noble Co.*, 225 USPQ 749 (TTAB 1985);
- BRAKEKLEEN for brake cleaner, *In re C.J. Webb, Inc.* 182 USPQ 63 (TTAB 1974);
- DRI-FOOT for antiperspirant foot deodorant, *In re Pennwalt Corp.*, 173 USPQ 317 (TTAB 1972).

Other marks found by the Board and the Courts to be suggestive include THE REAL YELLOW PAGES (*U.S. West Inc. v. Bell South Corp.*, 18 USPQ2d 1307 (TTAB 1990)); TENNIS IN THE ROUND (*In re Tennis in the Round Inc.*, 199 USPQ 496 (TTAB 1978)); the registered mark WEIGHT WATCHERS (*Weight Watchers International Inc. v The Stouffer Corp.*; 19 USPQ2d 1064 (D. Ore. 1993)); and the registered mark DIAL-A-MATTRESS (*Dial-A-Mattress Corp. v. Mattress Madness Inc.*, 33 USPQ2d 1961, 1966 (E.D.N.Y. 1994)).

ULTRA-ION, as used in connection with Applicant's goods, is less suggestive and no more descriptive than any of these marks.

C. Competitors' Need for ULTRA-ION

The intent of Section 2(e)(1) is to protect the competitive needs of others, that is "descriptive words must be left free for public use." *In re Styleclick.com Inc.*, 57 USPQ2d at 1448. Manufacturers of cleaning, coating and polishing preparations will not find themselves at a competitive disadvantage if ION is not available as a trademark term. See *Sperry Rand Corp. v. Sunbeam Corp.*, 442 F.2d 979, 170 USPQ 37 (C.C.P.A. 1971). As stated by the Federal Court of Appeals for the Second Circuit in holding that SEASON-ALL was suggestive for storm doors and windows:

The English language has a wealth of synonyms and related words with which to describe the qualities which manufacturers may wish to claim for their products and the ingenuity of the public relations profession supplies new words and slogans as they are needed.

Aluminum Fabricating Co. v. Season-All Window Corp., 259 F.2d 314,317, 119 USPQ 61, 63 (2d Cir. 1958).

Moreover, anyone who believes he or she will be injured by the registration of ULTRA-ION "will have an opportunity to develop a factual record upon which the question of descriptiveness could be adjudicated with more confidence than it can be on the basis of *a priori* assumptions." *In re Waverly Inc.*, 27 USPQ2d 1620, 1624 (TTAB 1993), citing *In re Merrill Lynch, Pierce, Fenner & Smith*, 828 F.2d 1567, 1571, 4 USPQ2d 1141 (Fed. Cir. 1987). When ULTRA-ION is published for opposition, those in the cleaning, polishing and coating products field can decide for themselves whether or not they believe that the registration of this mark will inhibit their right to compete with Applicant. *Id.*

78/277,716

D. Doubt is to be Resolved in Applicant's Favor

Finally, it is the policy of the Patent and Trademark Office to resolve any doubt as to descriptiveness in favor of the applicant. *In re Women's Publishing Co.*, 23 USPQ2d 1876, 1878 (TTAB 1992) (citing *In re Merrill, Lynch, Pierce, Fenner & Smith, Inc.*, 4 USPQ2d at 1144).

Based on the foregoing, Applicant requests that the refusal to register be withdrawn.

Respectfully submitted,

Applicant: DWG International
 Appln. No.: 78/277,716
 Trademark: ULTRA-ION
 Intl. Class 3

DRI WASH 'n GUARD[®]

ULTRA-ION[™]

(Patent Pending)

Waterless Car Wash & Protective Glaze

*With Ionic Technology for the
Ultimate Shine & Dust Repellent!*

Featuring Exclusive PolyGuard-3[™]

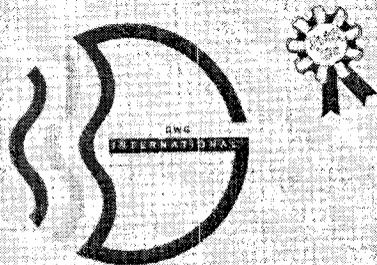

Cleans, Seals, Polishes & Protects
in One Easy Step!

**Nettoyant et Lustré Protecteur
Sans Eau Pour Auto**

*Avec la Technologie Ionique pour un
Brillant Extrême & Repousse la Poussière!*

Employant l'Exclusif PolyGuard-3[™]

Nettoie, Scelle, Polit & Protège
En Une Seule Opération!

UV Protected / Protection Contre Les UV
6 oz. Liq. (472mL) e

**DANGER: HARMFUL OR FATAL IF SWALLOWED
DANGER: NOCIF ET PEUT ETRE MORTEL SI AVALE**

It is extremely important that DRI WASH 'n GUARD[®] ULTRA-ION[™] be applied with a DRI WASH 'n GUARD[®] Car AirRosol pump sprayer only. Use on hard non-porous surfaces only. Pre-test on inconspicuous area before use. Can be used over surfaces moderately covered with dust, road grime or salt.

Refill Procedures:

1. Unscrew collar nut at neck of AirRosol pump sprayer and remove internal spray mechanism.
2. Invert this bottle of product and shake vigorously for 15-20 seconds.
3. Pour contents into AirRosol pump sprayer until 75% full.
4. Re-install spray mechanism and collar nut.

Directions by Hand:

1. Apply product to cool, dry surface in shaded area out of wind, if possible.
2. Use two soft, clean, terry cloth towels - one for applying the product and one for buffing. For best results, use the DWG Buffing Towel for buffing.
3. Invert AirRosol pump sprayer and shake vigorously for 15-20 seconds.
4. Pressurize bottle by pumping cap "up and down" until a strong resistance is felt (approx. 10-15 times).
5. Spray a light coat of DRI WASH 'n GUARD[®] ULTRA-ION[™] on a small section of vehicle (2-3 sq. ft.) spraying with broad, sweeping motions where possible.
6. Using the terry cloth towel, with moderate firm pressure, rub polish thoroughly over the sprayed area until the filmy haze that developed almost totally disappears.
7. Immediately buff remaining haze to a high gloss with the buffing towel.

For Professionals Only: Use a conventional or orbital-type buffer equipped with a foam polishing pad. Do not exceed 1,500 r.p.m. Apply DWG ULTRA-ION[™] as described in steps 3, 4, & 5 above. Immediately buff sprayed area to a high gloss. Continue until all accessible areas have been buffed. Polish any remaining areas by hand, if necessary.

For ultimate surface restoration, use DRI WASH 'n GUARD[®] OxyGone[™] followed by DRI WASH 'n GUARD[®] ULTRA-ION[™].

Caution: Use under well-ventilated conditions. Prevent product from freezing. **DO NOT MIX THIS PRODUCT WITH ANY OTHER CHEMICAL OR WATER.**

FIRST AID TREATMENT: If swallowed, call physician or poison control center immediately. Contains petroleum distillates.

P.O. Box 92567, Las Vegas, NV 89193-3667
 Retail Direct / Detail access direct: 1-800-820-8989
 Made in the U.S.A. / Fabrique aux Etats-Unis
 www.dwginternational.com

Il est extrêmement important que DRI WASH 'n GUARD[®] ULTRA-ION[™] ne soit appliqué qu'avec un vaporisateur AirRosol conçu pour DRI WASH 'n GUARD[®] pour auto. N'utiliser que sur des surfaces dures non-poreuses. Faire un test sur une section non apparente avant de traiter toute la surface. Peut être employé sur des surfaces modérément couvertes de poussière, de saleté, ou de sel.

Remplissage de la bouteille:

1. Dévisser le collet de la bouteille AirRosol et retirer le mécanisme de vaporisation interne.
2. Renverser cette bouteille qui contient le produit et l'agiter vigoureusement pendant 15 à 20 secondes.
3. Verser le contenu dans la bouteille AirRosol jusqu'à ce qu'elle soit pleine à 75%.
4. Replacer le mécanisme de vaporisation et la bague de serrage.

Application à la main:

1. Appliquer le produit sur une surface sèche et fraîche, à l'ombre et, si possible, à l'abri du vent.
2. Employer deux serviettes en terry douce - une pour appliquer le produit et en suite une pour polir. Pour de meilleurs résultats, utiliser la Serviette de Polissage de DWG pour polir.
3. Renverser la bouteille AirRosol et l'agiter vigoureusement pendant 15 à 20 secondes.
4. Pressuriser la bouteille en tirant le bouchon avec un mouvement de va-et-vient jusqu'à ce que ce mouvement devienne ardu (environ 10 à 15 fois).
5. Vaporiser une mince couche de DRI WASH 'n GUARD[®] ULTRA-ION[™] sur une petite section du véhicule (2 à 3 pi²) en exécutant de grands mouvements circulaires, lorsque c'est possible.
6. En utilisant la serviette en terry, frotter assez fermement la surface vaporisée jusqu'à ce que le film brumeux qui s'est produit lors de la vaporisation, disparaisse presque totalement.
7. Avec la serviette de polissage, immédiatement polir la brume qui reste jusqu'à obtenir un brillant lustre.

Seulement Pour Professionnels: Utiliser une brosse ordinaire ou orbitale munie d'un tampon de polissage en mousse. Ne pas dépasser 1,500 tr/min. Appliquer DWG ULTRA-ION[™] en suivant les étapes 3, 4, et 5 ci-dessus. Lustrer immédiatement la surface vaporisée. Continuer à polir jusqu'à ce que toutes les surfaces accessibles soient polies. Au besoin, polir à la main les surfaces qui résistent.

Pour obtenir une restauration supérieure de la surface, utiliser DRI WASH 'n GUARD[®] OxyGone[™] suivi de DRI WASH 'n GUARD[®] ULTRA-ION[™].

Attention: Employer dans un endroit bien aéré. Protéger le produit du gel. **NE PAS MÉLANGER CE PRODUIT AVEC AUCUN AUTRE PRODUIT CHIMIQUE OU AVEC DE L'EAU.**

Premiers Soins: En cas d'ingestion, appeler immédiatement un médecin ou un centre anti-poison. Contient du pétrole distillé.

rolled inward from the edge, as a leaf. 3. Zool. (of shells) having the whorls closely wound. —n. 4. Geom. any curve of which a given curve is the evolute. [t. L.: m.s. involutio, pp., rolled up] —in-vo-lut'ed-ly, adv.

in-vo-lu-tion (in'vəloʊʃən) n. 1. act of involving. 2. state of being involved. 3. something complicated.

4. Bot., etc. a. a rolling up or folding in upon itself. b. a part so formed. involute of a circle upon itself. 5. Biol. retrograde development; degeneration. 6. Physiol. bodily changes involving a lessening of activity, esp. of the sex organs, occurring in late middle age. 7. Gram. complicated construction; the separation of the subject from its predicate by the interjection of matter that should follow the verb or be placed in another sentence. 8. Math. the raising of a quantity or expression to any given power. [t. LL: s. involutio a rolling up]

in-volve (in'vɒlv) v.t. -volved, -volving. 1. to include as a necessary circumstance, condition, or consequence; imply; entail. 2. to affect, as something within the scope of operation. 3. to include, contain, or comprehend within itself or its scope. 4. to bring into an intricate or complicated form or condition. 5. to bring into difficulties (fol. by with): a plot to involve one's government with another. 6. to cause to be inextricably associated or concerned, as in something embarrassing or unfavorable. 7. to combine inextricably (fol. by with). 8. to implicate, as in guilt or crime, or in any matter or affair. 9. to be highly or excessively interested in. 10. to roll, wrap, or shroud, as in something that surrounds. 11. to envelop or in-fold, as the surrounding thing does. 12. to swallow up, engulf, or overwhelm. 13. to roll up on itself; wind spirally, coil, or wreath. 14. Math. to raise to a given power. [ML, t. L.: m.s. involvere roll in or on, enwrap, involve] —in-volve-ment, n. —in-volv'er, n.

—Syn. 6. INVOLVE, ENTANGLE, IMPLICATE imply getting a person connected or bound up with something from which it is difficult for him to extricate himself. TO INVOLVE is to bring more or less deeply into something, esp. of a complicated, embarrassing, or troublesome nature: to involve someone in debt. TO ENTANGLE (usually pass. or reflex.) is to involve so deeply in a tangle as to confuse and make helpless: to entangle oneself in a mass of contradictory statements. TO IMPLICATE is to connect a person with something discreditable or wrong: implicated in a plot. —Ant. 6. extricate.

in-vul-ner-a-ble (in'vʌl'nərəbəl) adj. 1. incapable of being wounded, hurt, or damaged. 2. proof against attack: invulnerable arguments. —in-vul'ner-a-bil'i-ty, in-vul'ner-a-ble-ness, n. —in-vul'ner-a-bly, adv.

in-wall (in'wɔ:l) v.t. to enclose with a wall. in-ward (in'wɔ:d) adv. Also, inwards. 1. toward the inside or interior, as of a place, a space, or a body. 2. into the mind or soul. 3. in the mind or soul, or mentally or spiritually; inwardly. 4. Rare. in the inside or interior. —adj. 5. proceeding or directed toward the inside or interior. 6. situated within; interior; internal: an inward room. 7. pertaining to the inside or inner part. 8. located within the body: the inward parts. 9. pertaining to the inside of the body: inward convulsions. 10. inland: inward passage. 11. intrinsic; inherent; essential: the inward nature of a thing. 12. inner, mental, or spiritual: inward peace. 13. muffled or indistinct, as the voice. 14. Archaic. domestic. 15. Obs. closely personal; intimate; familiar. 16. Obs. private or secret. —n. 17. the inward or internal part; the inside. 18. (pl.) the inward parts of the body. [ME. in(w)ward, OE. in(ne)ward, f. in(ne) in, adv. + -ward -ward]

in-ward-ly (in'wɔ:dlɪ) adv. 1. in or on, or with reference to, the inside or inner part. 2. privately; secretly: laughing inwardly. 3. in low tones; not aloud. 4. Now Rare. toward the inside, interior, or center.

in-ward-ness (in'wɔ:dnɪs) n. 1. the state of being inward or internal. 2. depth of thought or feeling; earnestness. 3. occupation with what concerns man's inner nature; spirituality. 4. the inward or intrinsic character of a thing. 5. inward meaning. 6. Obs. intimacy.

in-wards (in'wɔ:dz) adv. 1. inward. —n. pl. 2. inward (def. 18).

in-weave (in'weɪv) v.t. -wove or -weaved; -woven or -wove or -weaved; -weaving. 1. to weave in or together. 2. to introduce into or as into a fabric in weaving. 3. to combine or diversify with something woven in. Also, enweave.

in-wind (in'waɪnd) v.t. -wound, -winding. enwind. in-wrap (in'rɒp) v.t. -wrapped, -wrapping, enwrap. in-wreath (in'ri:θ) v.t. -wreathed, -wreathing, enwreath.

in-wrought (in'wraʊt) adj. 1. wrought or worked with something by way of decoration. 2. wrought or worked in, as a decorative pattern. 3. worked in or closely combined with something.

I-O (i'ɒ) n. Gk. Legend. the daughter of Inachus of Argos, loved by Zeus and changed by jealous Hera into a white heifer. See Argus (def. 1).

IO (i'ɒ) n., pl. Ios. IO moth. IO, Chem. Ionium.

Io-an-ni-na (i'əʊ'nə'nə' / jə'nə'nə') n. a city in NW Greece. 3231'. (1851). Serbian, Janina or Yanina.

iod-, var. of iodo-, usually before vowels, as in iodic. i-o-date (i'əʊ'deɪt) n., v. -dated, -dating. —n. 1. Chem. a salt of iodic acid, as sodium iodate, NaIO₃. —t. 2. to iodize. —i-o-da'tion, n.

iota

i-od-ic (i'ɒdɪk) adj. Chem. containing iodine, esp. in the pentavalent state (I⁺⁵). [f. iod- + -ic]

i-o-dide (i'əʊ'daɪd, -daɪd) n. Chem. a compound, usually of two elements only, one of which is iodine; a salt of hydriodic acid. Also, i-o-did (i'əʊ'dɪd).

i-o-dim-e-try (i'əʊ'dɪm'etɹɪ) n. Chem. iodometry.

i-o-dine (i'əʊ'dɪn, -daɪn; in Chem. -dɛn/) n. Chem. a nonmetallic element occurring at ordinary temperatures, as a grayish-black crystalline solid, which sublimes to a dense violet vapor when heated; used in medicine as an antiseptic, and in the arts. Symbol: I; at.wt.: 126.92; at.no.: 53; sp. gr.: (solid) 4.93 at 20°C. Also, i-o-din (i'əʊ'dɪn). [f. F. iode iodine (t. Gk.: m. iōdes, prop., rust-colored, but taken to mean violetlike) + -mētr̄] iodine-131, Chem. a radioactive isotope of iodine, of atomic weight 131, used in the diagnosis and treatment of disorders of the thyroid gland.

i-o-dism (i'əʊ'dɪzəm) n. Pathol. a morbid condition due to the use of iodine or its compounds.

i-o-dize (i'əʊ'daɪz) v.t., -dized, -dizing, to treat, impregnate, or affect with iodine. —i-o-dis'er, n.

iodo-, a word element meaning "iodine," as in iodometry. Also, iod-. [comb. form repr. NL iodium]

i-o-do-form (i'əʊ'də'fɔ:m, i'ɒd'ə-) n. Chem. a yellowish crystalline compound, CHI₃, analogous to chloroform: used as an antiseptic. [f. iodo- + form (v.)]

i-o-dol (i'əʊ'dɒl, -dɒl) n. Chem. a crystalline compound, C₆H₄I₂N: used as a substitute for iodoforn.

i-o-dom-e-try (i'əʊ'dɒm'etɹɪ) n. Chem. a volumetric analytical procedure for determining iodine, or materials which will liberate iodine or react with iodine. Also, iodimetry. —i-o-do-met-ric (i'əʊ'dɒ'mɛt'rɪk) adj.

i-o-dous (i'əʊ'dəs, i'ɒd'əs) adj. 1. Chem. containing iodine, esp. in the divalent state (I⁺²). 2. like iodine.

I.O.F., Independent Order of Foresters.

I-o-lan-the (i'əʊ'læn'thi) n. an opera (1882) by Gilbert and Sullivan.

i-o-lite (i'əʊ'lɪt) n. cordierite. [f. Gk. to(n) violet + -litr̄]

I-o moth (i'ɒ) a showy and beautiful moth of North America, Automeris io, of yellow coloration, with prominent pink and bluish eyespots on the hind wings.

ion (i'ɒn, i'ɒn) n. Physics. Chem. 1. an electrically charged atom, radical, or molecule, formed by the loss or gain of one or more electrons. Positive ions, created by electron loss, are called cations and are attracted to the cathode in electrolysis. Negative ions, created by electron gain, are called anions and are attracted to the anode. The valence of an ion is equal to the number of electrons lost or gained and is indicated by a plus sign for cations and minus for anions, thus: Na⁺, Cl⁻, Ca⁺⁺, S⁼⁼. 2. one of the electrically charged particles formed in a gas by the action of an electric discharge, etc. [t. Gk., pp. neut. of iónai go] —i-on-ic (i'ɒnɪk) adj.

-ion, a suffix of nouns denoting action or process, state or condition, or sometimes things or persons, as in al-lusion, communion, flexion, fusion, legion, opinion, sus-picion, union. Also, -tion and -ation. Cf. -ion, -xion. [t. L.: s. -io; suffix forming nouns, esp. from verbs]

I-o-na (i'ɒnə) n. a small island in the Hebrides, off W coast of Scotland: center of early Celtic Christianity.

ion exchange, the process of reciprocal transfer of ions between a solution and a resin.

I-o-ni-a (i'ɒnɪə) n. an ancient region on the W coast of Asia Minor and adjacent islands: colonized by the ancient Greeks.

I-o-ni-an (i'ɒnɪən) adj. 1. pertaining to Ionia. 2. pertaining to a branch of the Greek race named from Ion, the legendary founder. —n. 3. an Ionian Greek.

Ionian Islands, the islands along the W coast of Greece, including Corfu, Levias, Itaca, Cephalonia, and Zante, and Cerigo off the S coast.

Ionian Sea, an arm of the Mediterranean between S Italy, E Sicily, and Greece.

I-on-ic (i'ɒnɪk) adj. 1. Archit. noting or pertaining to one of the three Greek orders, distinguished by its slender proportions, the volutes on the capitals, and the continuous (often figured) frieze. See illus. under order. 2. Pros. noting or employing one of two feet consisting of two long and two short syllables: the greater Ionic, two long and two short syllables, — — —; the lesser Ionic, two short and two long syllables, — — —. 3. pertaining to the Ionians. —n. 4. Pros. an Ionic foot, verse, or meter. 5. (also i.c.) Print. a style of type. 6. a dialect of ancient Greek, including Attic and the language of Homer. [t. L.: s. Ionicus, t. Gk.: m. Ionikós]

i-on-ize (i'əʊ'nɪz) v., -ized, -izing. —t. 1. to separate or change into ions. 2. to produce ions in. —t. 3. to become changed into the form of ions, as by dissolving. Also, esp. Brit., i-on-ise'. —i-on-iza-tion (i'əʊ'nɪzə'shan), n. —i-on-iz'er, n.

i-o-none (i'əʊ'nɒn) n. either one or a mixture of two unsaturated ketones, C₁₁H₂₀O, used in perfumery.

i-on-o-sphere (i'ɒn'əʊ'sfɪr) n. 1. the succession of ionized layers that constitute the outer regions of the earth's atmosphere beyond the stratosphere, considered as beginning with the Heaviside layer at about 60 miles, and extending several hundred miles up. 2. Obsolete. the Heaviside layer.

I.O.O.F., Independent Order of Odd Fellows.

i-o-ta (i'ɒtə) n. 1. the ninth letter (I, i, = English I, D) of the Greek alphabet (the smallest letter). 2. a very small quantity; a tittle; a jot.

ăct, ăble, ădra, ărt; ăbb, ăqual; ăf, ăce; ăt, ăver, ărder, ăll, ăbŏck, ăŏze, ăut; ăp, ăse, ărge; ă = a in alone; ch, chief; g, give; ng, ring; sh, shoe; th, thin; zh, that; zh, vision. See the full key on inside cover.
