REQUEST FOR REMAND/AMENDMENT

Applicant hereby requests that the present appeal (in which an appeal brief is due on February 25, 2006) be suspended and the application be remanded to the Examining Attorney for consideration of an amendment to the identification of goods which should resolve the outstanding issues in this application.

The herein requested amendment to the identification of goods is that deemed acceptable by the Examining Attorney in the correspondence mailed December 6, 2005, in response to applicant's request for reconsideration of a final refusal. It is submitted that the identification of goods, as amended herein, is of sufficient scope to cover the goods as previously identified in this application, such that an appeal is unnecessary.

Please amend the identification of goods as follows:

-- Paints; coatings in the nature of paint for marine and yacht vessels; coatings in the nature of paint for industrial applications; anti-corrosive coatings; preservatives against rust and the deterioration of wood in the form of coatings; and paint thinners in International Class 002--

Respectfully submitted,

Lainie E. Parker  
Attorney for Applicant
