### t-JAYS One Earphones

#### CNET Australia - 8.8/10

September 2010, Australia

8.8

*"The physical speakers in the t-Jays One aren't that big, but we were bowled over by how particularly loud they can get while still retaining audio clarity. That's at least in part due to the physical design, which does an excellent job of blocking out ambient noise and concentrating your listening purely on the music you're listening to."*

### Good Gear Guide - 4.25/5 - Editor's Choice

August 2010, Australia

*"Overall though, it's the sound quality that matters most and we think you can't go wrong with the t-JAYS One; they produce amazing sound and, as long as you select the correct sleeve, they will sit comfortably in your ears and make your music sound louder, clearer and fuller than typical earphones. We heartily recommend them."*

### PC World - 4.5/5, Editors Choice

August 2010, Australia

*"The t-JAYS One earphones are loud, produce excellent clarity and bass, and, best of all, they are very small. Even though they are designed to plug in to your ear, they are very comfortable. However, you have to make sure you use the correct rubber sleeve size. The bottom line is, these earphones should be at the top of your shopping list if you value excellent audio quality and portability."*

### MacGuiden - 5/5

March 2011, Sweden

*"Ljudet i t-JAYS Three är verkligen något alldeles extra. har man lyssnat in sig med de här är det extremt svårt, för att inte säga omöjligt, att gå tillbaka till sina gamla eller än värre Apples standardlurar som medföljer alla iPods och iPhones."*

### Touch My Apps - Grab It

### Good Gear Guide - 4.5/5

November 2010, Australia

*"The t-Jays Three headphones are a real pleasure to listen to. Music sounded extremely clear; there was a lot of bass when needed and the headphones never sounded tinny. When we tested the t-Jays Three with an iPhone 3G, we were amazed to hear some parts of albums we had never heard before. This is evident even at really low volumes, where these headphones really shine."*

RATING ★★★★★

**Gadgetmac - 5/5**

November 2010, USA

*"The t-Jays Three are a perfect blend of style and sound. This kind of performance is hard to find in earphones because the t-Jays Three hit every check mark you ever need to be able to fully enjoy your whole entire music library. Listening to music and movies with the t-Jays Three could not be anymore fun and enjoyable, they deliver such an incredible sound."*

## t-JAYS Four iPhone Earphones

### Apps Magazine - 5/5

April 2012, United Kingdom

*"These phones are impressively light and comfortable, yet still pack an audio punch, with good bass and crisp sound. There's a built-in remote for answering calls as well as a handy carry case and four extra pairs of ear buds in various sizes to give you plenty of opportunities to get the fit just right."*

### GadgetMac - 4/5

January 2012, USA

*"Are the Jays a-Jays One+ earphones a good upgrade for those users who are still on the stock earbuds? Absolutely! At this price point (£39.95 Europe, approx \$60 U.S.) they are an outstanding value. With their warm sound, they are earphones that can easily be listened to for hours on end."*

### Trusted Reviews - Recommended, 8/10

December 2011, United Kingdom

"Jays's latest addition to the a-JAYS range is another winner, bringing the warm sound we admired in the series's previous sets. New to this model is a versatile one-button handsfree kit-come-remote, the right-angle jack of the "high-end" a-JAYS pairs and sound quality that edges out the basic One set with increased clarity. Smooth and easy-going, they provide an enjoyable all-day listen."

### Good Gear Guide - 4/5

December 2011, Australia

"The sound quality of these headphones is excellent. Its 8.5mm speakers supply a deep bass response and are perfect for electronic and hip-hop music. In addition to booming bass, they also do a good job of highlighting intricate bass-lines, and you don't have to be listening at a loud volume to hear these."

"Sound from the headphones' 6.6mm speakers is very impressive, considering the affordable price tag. Bass is rich but not too overpowering, with slick basslines that may sometimes be neglected by other earphones projected loud and clear. Snare drums, smooth synths and fine details in the music were all clearly audible. Mid-tones and treble are well-balanced. For such a little pair of earphones, the a-Jays Two exceeded our expectations when it came to sound quality."
