The history of Chocolate A fairly complete history of how chocolate was developed in the New World and eventually came to Europe.

Articles on chocolate:

1. Cocoa powder has most antioxidants of all forms of chocolate, says study
A study presented at Experimental Biology 2005, an annual meeting of biological scientists, indicates that cocoa powder contains more antioxidants than any other chocolate products, and that processing of chocolate decreases antioxidant content. Researchers associated with the Agricultural Research Service...
www.newstarget.com/006754.html

2. Chocolate is actually good for you, if used in moderation, says new research
New research into flavonoids, which are found in chocolate, has shown that they can be very beneficial for your heart and can reduce your risk of cancer. In fact, the flavonoids in chocolate are actually more effective antioxidants than those in tea, which is also considered a very good source of these...
www.newstarget.com/006556.html

3. Cocoa contains higher antioxidant count than processed chocolate
While all chocolate contains some antioxidants, a study funded by the Agricultural Research Service found that more processed chocolates, such as milk chocolate, contain lower levels of antioxidants. Cocoa, the primary ingredient in chocolate, contains high levels of flavonoids, which are naturally occurring...
