Dealer Dashboard for Contractors

Your car has a dashboard that helps you know what's happening while you drive. Wouldn't you like to know more about your customers and what's happening with your business? Fujitsu has a Dealer Dashboard! A Fujitsu dealer has access to their customer's registration information. You can see what comments they have about the work your people have done in their home and you choose to have those comments listed on our dealer ranking site with your company's name. The better the work you do, the better you will look to prospective buyers!

Benefits

- Sales Lead Management
- "Consumer Referrals" from consumers visiting the website looking for a contractor
- Customer Feedback
- Priority Ranking on Dealer Locator
- Earn elite Halcyon Dealer status
- Product Registrations
- Online Training
- Interactive Troubleshooting Guides
- Product Manuals
- BTU Load Calculator
- Update or Edit Your Company Information

Contractors, Sign Up Here!

Release 3.0.6 - Dealer Sales History and Analysis

Dealer Sales History and Analysis

We are very pleased to announce a new version of FurnishWEB launching just a few weeks after our last release and just in time for the High Point Furniture Market. FurnishWEB now has screens for Dealer Sales Analysis! This type of reporting has been one of the top requests from our clients and their users. We're are very glad to meet these requests and provide yet more value to our customers.

FurnishWEB accumulates and summarizes invoice sales information by customer and product for sales analysis and reporting. We've taken this summarized data and provided several online tools creating a more meaningful understanding of each dealer's sales history.

Dealer Dashboard Updates

On the Dealer Dashboard there are two new pieces of information; Collections

Year-To-Date (YTD) and Top Sellers YTD. The Collections pie chart displays the collections a dealer has purchased most in the current year. The Top Sellers lists the top 10 products the dealer purchased this year.

Dealer Sales Tools

There is also a new link on the Dealer Dashboard to Sales Tools. Sales Tools is deceptively simple but this link conceals some real power! Sales Tools is an interactive, sortable summary of sales information. Sales history can be summarized by product, collection, type, family, class and finish ... each column is sortable providing the ability to find the Best Sellers in each category.

Sales reps should find this area especially useful when preparing a visit with the dealer. We anticipate this tool to quickly become some of the most used web pages in FurnishWEB!

This page shows you:

- LY \$: All Last Year Sales
- LY QTY : All Last Year Quantities
- LYTD \$: Last Year to Date Sales
- LYTD QTY: Last Year to Date Quantities
- YTD \$: Current Year to Date Sales
- YTD QTY : Current Year to Date Quantities

It would be great if FurnishWEB emailed acknowledg...

Other Patches and Fixes

With this release we've also included some minor improvements based on user feedback. There are now links to the Collection, Finish, Family, Class and Types while viewing a Product Detail. This will allow a quick return to the product list for those categories.

We've collapsed the Shipto Locations on the Dealer dashboard so they don't fill up so much screen space and opens up space for the new Sales Analysis charts. The user can reveal the list of Shipto locations by clicking on the Shipto Bar.

Thanks to all of the sales managers, customer service reps, sales reps, and buyers that use FurnishWEB. We hope these new features will help you provide better service and do your jobs more efficiently.

Mayline Releases New "Dealer Dashboard"

We have simplified dealer access to Mayline information.

The Mayline Group has made it easier than ever for dealers to obtain up-to-the-hour information on Inventory, Av. Factory Closeouts and more. We have made it simple to access also avoid possible delays versus calling into customer service.

To access the Dealer Dashboard, one simply goes to the Mayline website and clicks the Dealer Dashboard link from the lefthand menu, and registers.

You need your Mayline account number, city, state, and phone number. Registration is quick and easy and if you are already signed up you can go.

[Siebel Dealer Administration Guide](#) > [Overview of Siebel Dealer](#) >

Changing Types of Activities Displayed in the Dealer Dashboard

The dealer dashboards display the employee's activities for the current day, as described in [Using Siebel Dealer Dashboards \(Dealer\)](#).

There are more than 250 activity types, and dealers would not want to view most of them in the Activities applet of the dashboard.

By default, the dashboard displays the following types of activities:

- Appointment
- Call - Outbound
- Email
- Fax
- Other
- Warranty Service
- Dealership Visit

You can change which activities are displayed in the dashboard by using List of Values view of the Data Administration screen. An activity type is listed in the dashboard if it is included in List of Values view with EAUTO_ACT_SUM_TYPE in the Type field.

To change the types of activities displayed in the dashboard

1. Navigate to the List of Values view of the Data Administration screen.
2. Query to find all records that have EAUTO_ACT_SUM_TYPE.
3. To remove activity types from the dashboard, delete one or more of these records.
4. To add activity types to the dashboard:
 - a. Add one or more records to the List of Values list.
 - b. In the Type field, enter EAUTO_ACT_SUM_TYPE.
 - c. In the Value and Language Independent Code fields, enter exactly the same values used in the Activity record.
