INDEX
Cross-Reference Guide 795
Index 810

The parts and accessories in these pages are made from superior materials and tested to Harley-Davidson's highest standards to ensure proper fit, function and style. A complete product index can be found at the back of this catalog.

YOU'VE COME THIS FAR. NOW FINISH WHAT YOU STARTED.

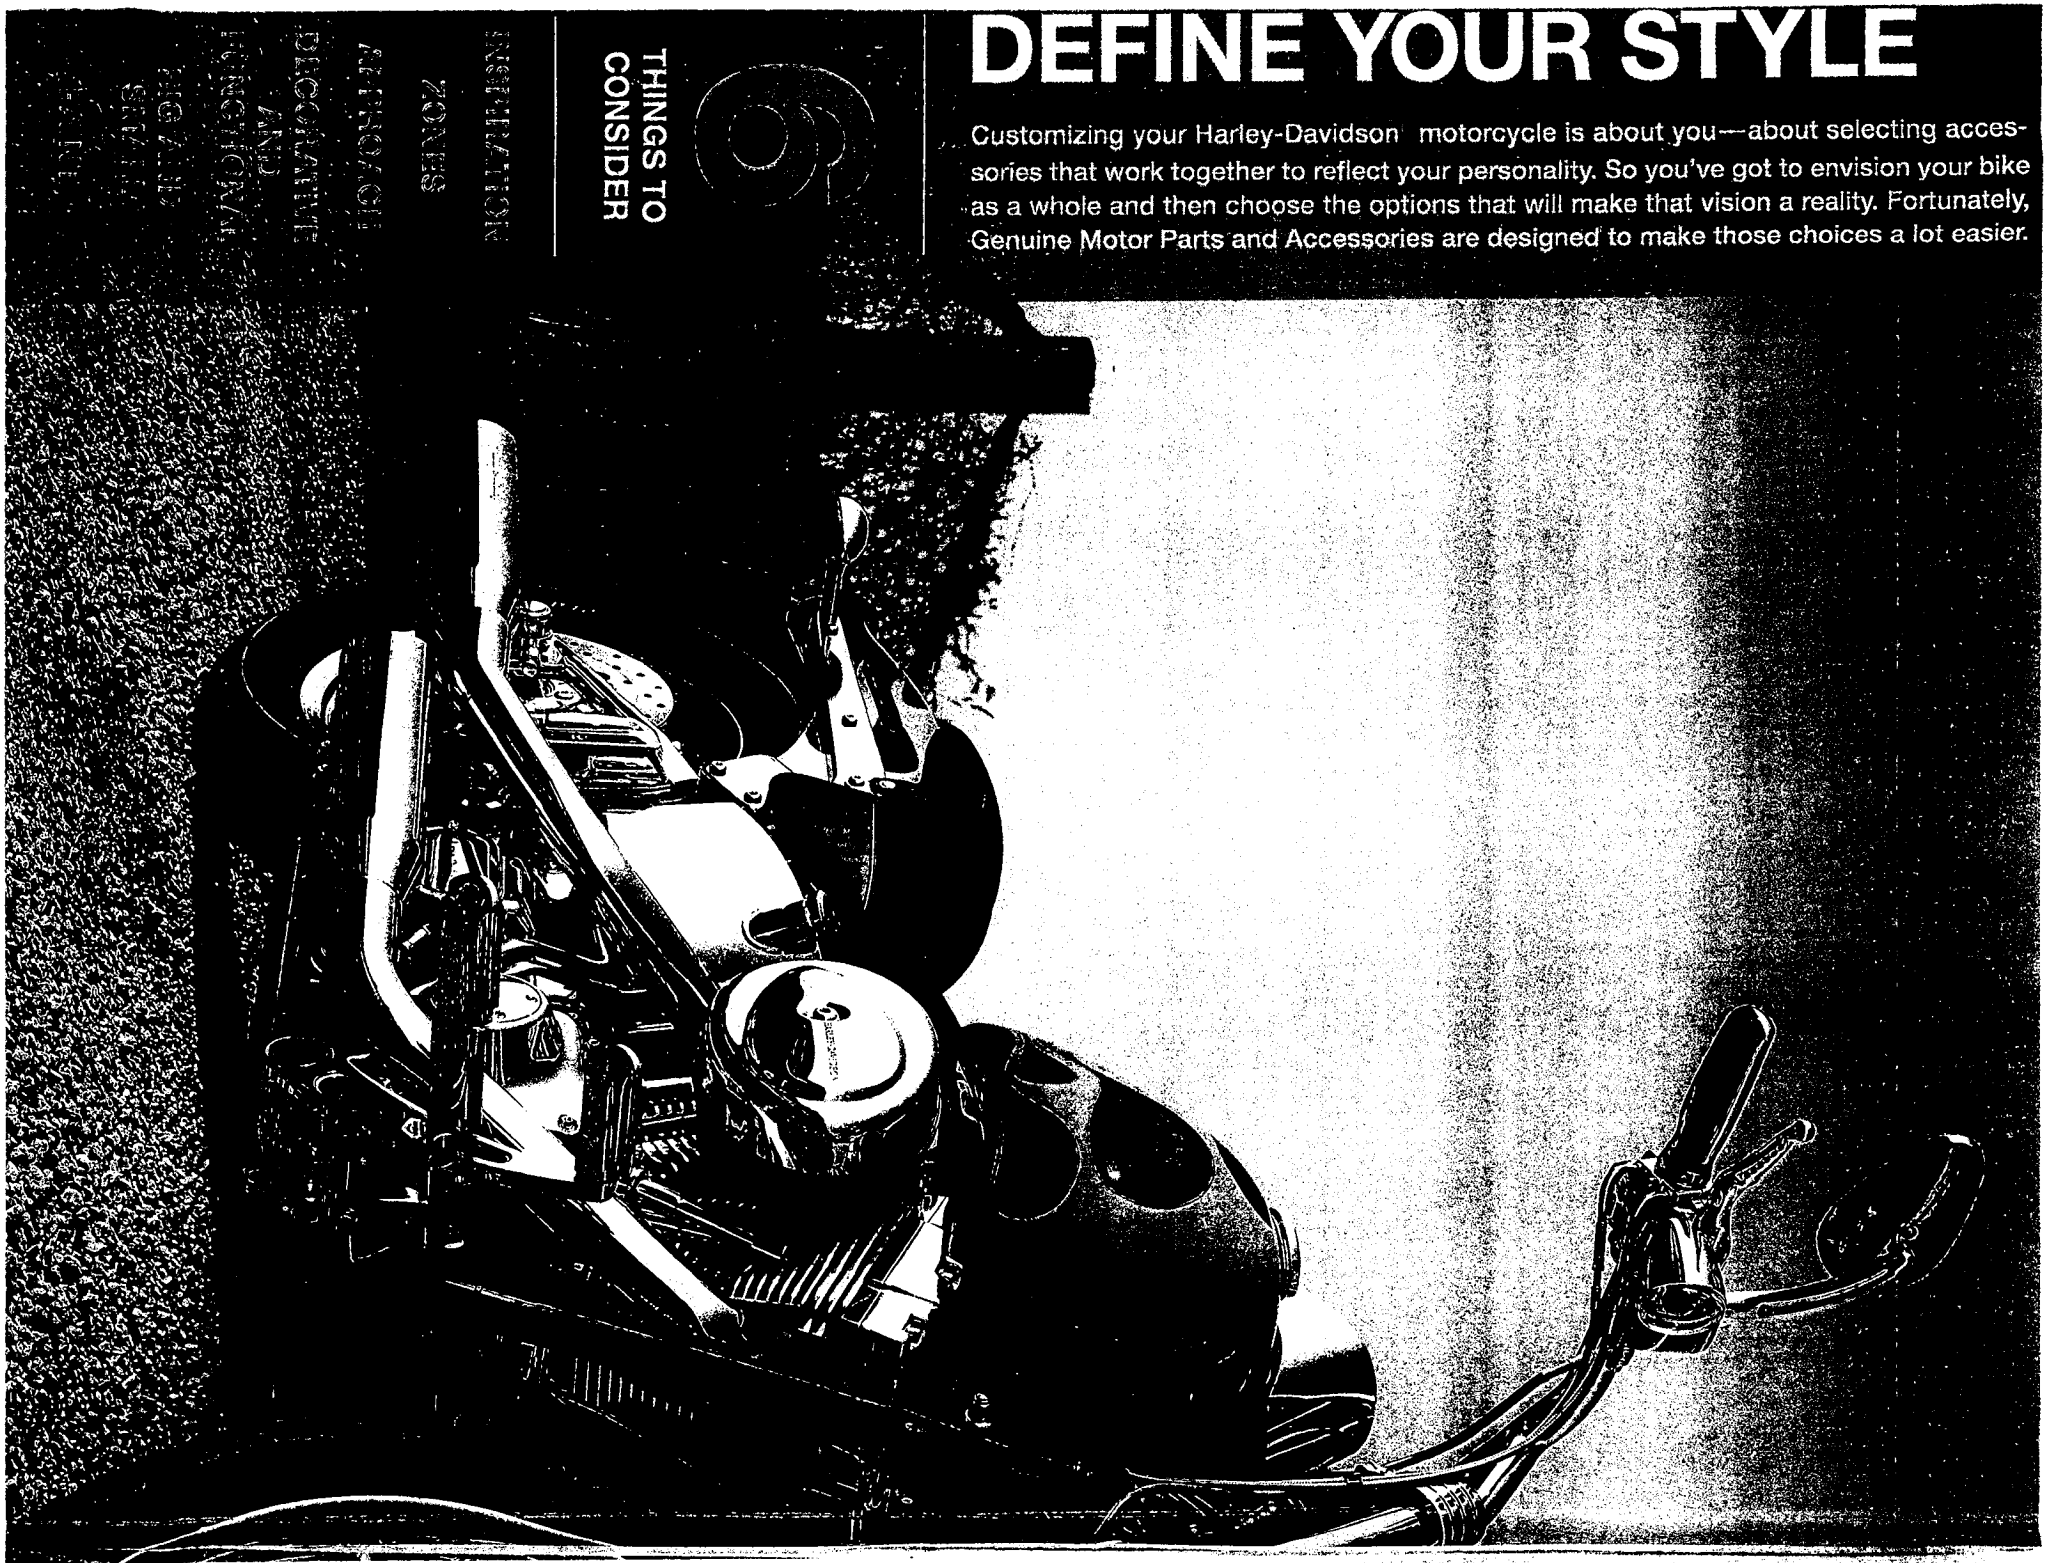
YOU BOUGHT A HARLEY-DAVIDSON® MOTORCYCLE TO OWN A BIKE LIKE NO OTHER. BUT JUST OWNING ONE ISN'T ENOUGH. YOU'VE GOT TO LAY CLAIM TO IT. CUSTOMIZE IT. MAKE IT YOUR OWN.

WHICH IS WHY YOU OPENED THIS BOOK IN THE FIRST PLACE. AND WHAT GENUINE MOTOR PARTS AND ACCESSORIES ARE BUILT FOR. SO GET FAMILIAR WITH YOUR OPTIONS. HAVE A PLAN.

AND NEVER LOOK BACK.

DEFINE YOUR STYLE

Customizing your Harley-Davidson motorcycle is about you—about selecting accessories that work together to reflect your personality. So you've got to envision your bike as a whole and then choose the options that will make that vision a reality. Fortunately, Genuine Motor Parts and Accessories are designed to make those choices a lot easier.



GO WITH YOUR GUT

STYLE ISN'T SOMETHING YOU BUY AT TH DRIVE-THRU. IT'S SOMETHING THAT COME FROM YOUR SOUL—A COMBINATION O YOUR PERSONALITY, RIDING PREFER ENCES AND CREATIVE IMPULSES. TRUST IN YOUR INSTINCTS. THROW CAUTION TO THE WIND. AND LOOK FOR INSPIRATION ALL AROUND YOU, STARTING WITH THE PAGES IN THIS BOOK.

START BIG, END SMALL

A good rule of thumb is to start customizing with larger accessories—the ones that have the biggest and most immediate impact on your bike's appearance—and then work your way down to more subtle details that complement those choices. That way, you can make the most of your selections.

3 ZONES

The possibilities can seem overwhelming at first, but breaking up your bike into zones may help. In addition, you'll get a firm grasp of the elements that comprise your bike's overall look.

CUSTOMIZE

There are two avenues of approach to customization. The first, which involves covering or adding decorative trim to stock components, offers quick, do-it-yourself convenience and a **basic** level of customization. The second entails replacing stock parts with custom versions—an **all-out** custom endeavor that will most likely require the skills of a certified Harley-Davidson technician.

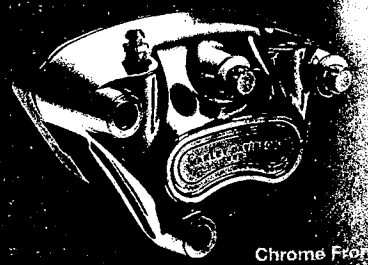
500+ ACCESSORIES TO MAKE YOUR CUSTOM STATEMENT

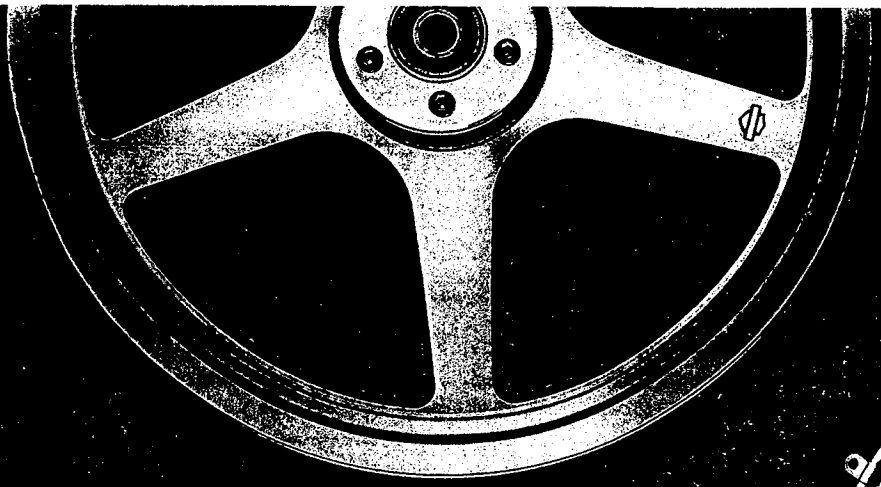
DECORATIVE AND FUNCTIONAL

Brake Caliper Inserts

You've got two kinds of accessories to consider. There are **decorative** accessories, like trim and accessory covers, which are used solely for cosmetic purposes, and there are **functional** accessories—like wheels and fork sliders—which not only add style, but perform vital functions. Whichever type you choose, you can rest assured that Genuine Motor Parts and Accessories are engineered to fit your bike better than any other parts on the road.



Chrome Front Caliper



Black ThunderStar™ Custom Wheel

BIG STUFF

Instant custom gratification can be found in the **major accessories**—the ones you notice on a bike right away, like wheels and swingarms. You'll find that many of these pieces are functional as well as decorative, delivering Original Equipment fit and function in addition to envy-inducing style.

SWEAT THE SMALL STUFF

The **details** are what separate a motorcycle boasting some custom accessories from a one-of-a-kind custom machine that collects trophies as well as compliments. From chrome hardware to engine trim, Genuine Motor Parts and Accessories deliver the details to take your custom journey that extra mile.

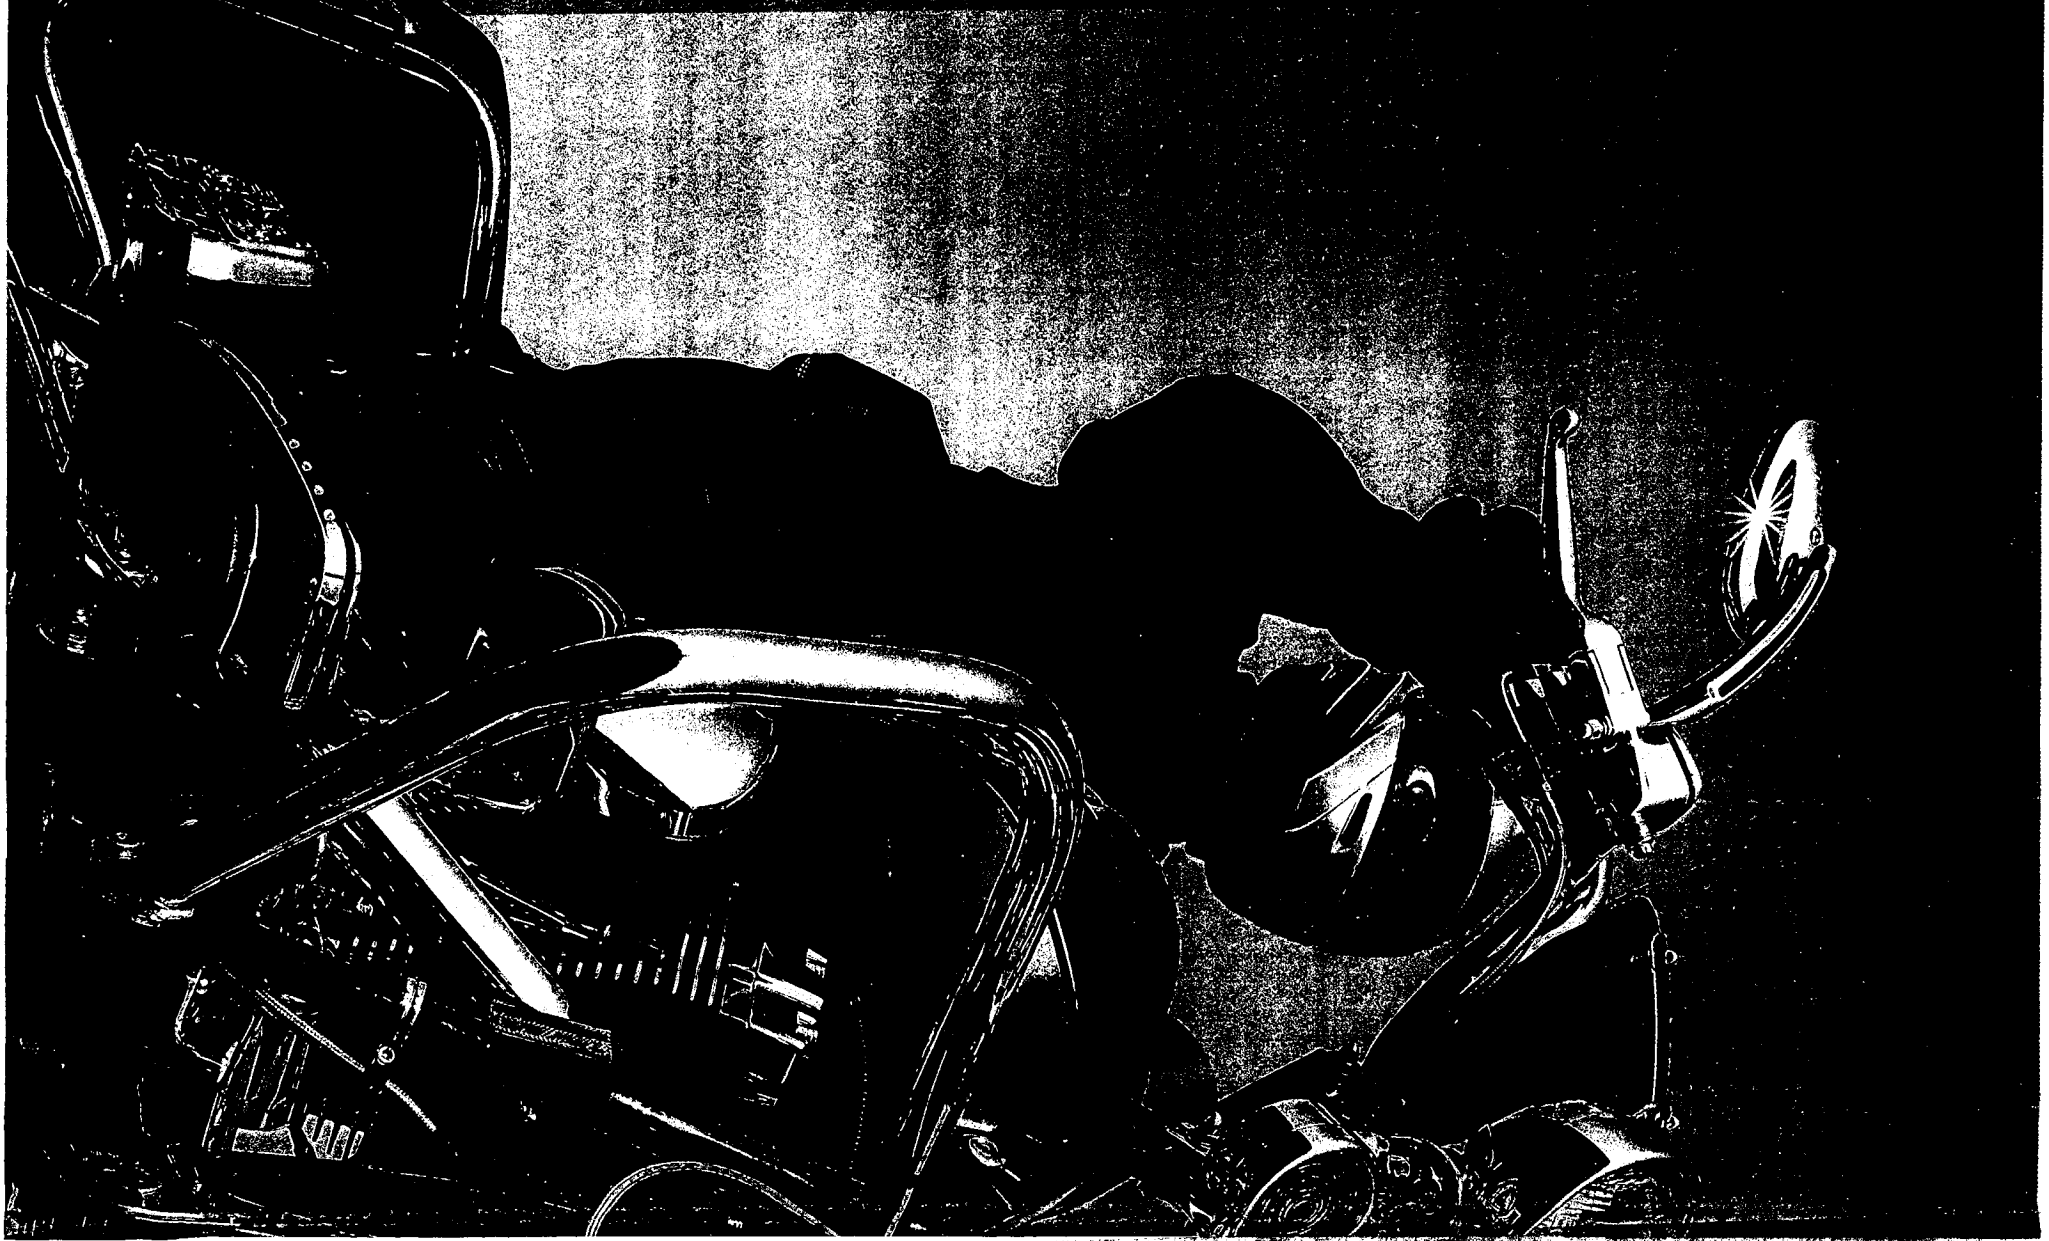
USE YOUR HEAD. Your brain is the most important customizing tool you have. Before choosing any accessories, try to PICTURE THE FINISHED BIKE in your head and DEVELOP A PLAN for achieving that look. And then GO AFTER IT with everything you've got.

ENHANCE YOUR RIDE

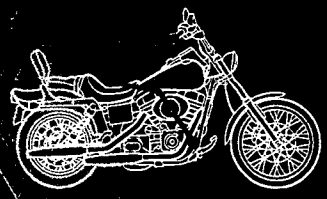
On the road, feeling good is as important as looking good. So you've got to choose accessories that help fit your bike to you. These choices impact not only your riding position, but also how your bike handles. And you can customize with confidence, knowing Genuine Motor Parts and Accessories are engineered to help you find your comfort zone.

AVENUES TO EXPLORE

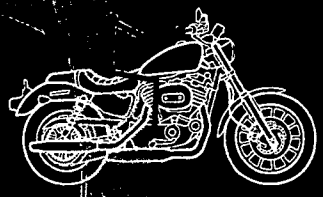


EVERY RIDER FITS THEIR BIKE DIFFERENTLY. THOUGH CHOOSING A MODEL THAT FEELS GOOD FROM THE START MAKES THINGS A LOT EASIER, YOU CAN TAILOR YOUR HARLEY® TO YOUR SPECIFICATIONS WITH THE RIGHT ACCESSORIES.

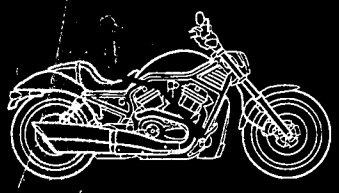
Foot controls, handlebar, seat and suspension dictate riding position. So it's crucial to select accessories based not solely on looks, but also on how they fit your body and riding style. While there's a wide range of postures you can achieve, use the four main riding positions below as a guide.



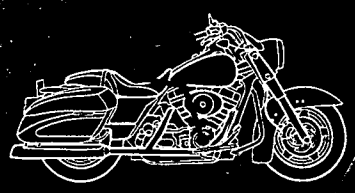
High-style, boulevard-bound posture achieved with an ape-hanger type handlebar, forward foot position, and solo or low profile seat



Upright stance with emphasis on handling, achieved with flat or sport bars, low profile or sport seat, and a mid-range or slightly pulled back foot position



The ultimate fusion of comfort and laid-back style, achieved with a buckhorn or sport handlebar and forward foot position



Natural, upright position for high-mile comfort, achieved with a wide handlebar, a standard foot position with pegs or floorboards, and a deep bucket seat

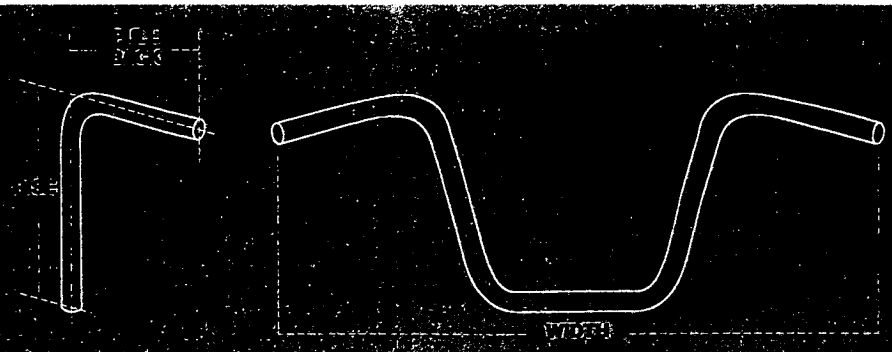
FEET FIRST

Flame Footpeg

Flame Heel Rest Kit.

Riding position and lower-body comfort stem from foot placement, so choose accessories accordingly. If you have the option, forward foot controls promote a more laid-back posture and also fit most taller riders. Heel rests help reduce foot fatigue, as do cushioned footpegs and touring floorboard inserts. Highway pegs let you stretch out your legs on longer rides.

34 DIFFERENT HANDLEBAR CHOICES



RISE is the vertical distance between a handlebar's tip and its base. Adding risers to bars that sit low can help put hand grips in a higher spot.

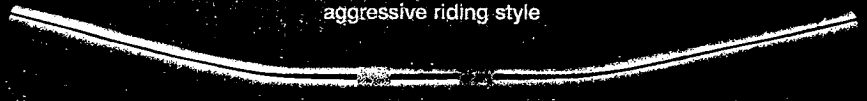
PULL BACK brings hand controls closer while also lowering grip height. More pullback facilitates an upright posture, and suits riders with a shorter reach.

WIDTH is measured from the tip of one hand grip to the other. Touring calls for a wider bar, while sport riding is best with a lower tip-to-tip width.

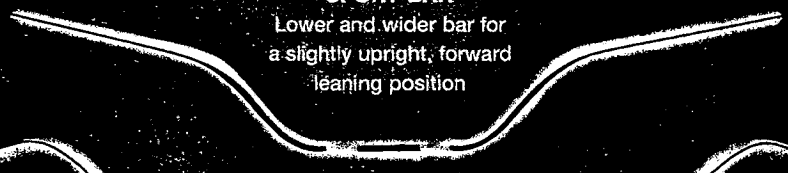
HANDLEBAR BASICS

Bars communicate style and also affect how you handle your bike. You want to select a **handlebar** that puts your arms in a position that matches both the attitude you want to convey and the kind of riding you expect to do. While every handlebar has its own distinct measurements and characteristics, there are four basic styles to consider in your quest for custom-styled comfort:

APE HANGERS
Pure custom attitude, best suited for boulevards and long straightaways



DRAG BAR
A flat, no-nonsense handlebar for an aggressive riding style



SPORT BAR
Lower and wider bar for a slightly upright, forward leaning position

PULL BACK
Brings hand grips closer to the body for a more upright riding posture

TAKE YOUR SEAT

Choosing a saddle isn't just a question of rider comfort. It's also a question of style. Low profile seats offer pure custom attitude for shorter trips, while touring saddles provide the cushioning and support that high-mile pursuits require. Seats are easy to change, so you can have more than one saddle on hand to suit your riding needs.

FORWARD POSITION
Moves rider closer to controls, and brings legs closer together so feet rest more firmly on the ground

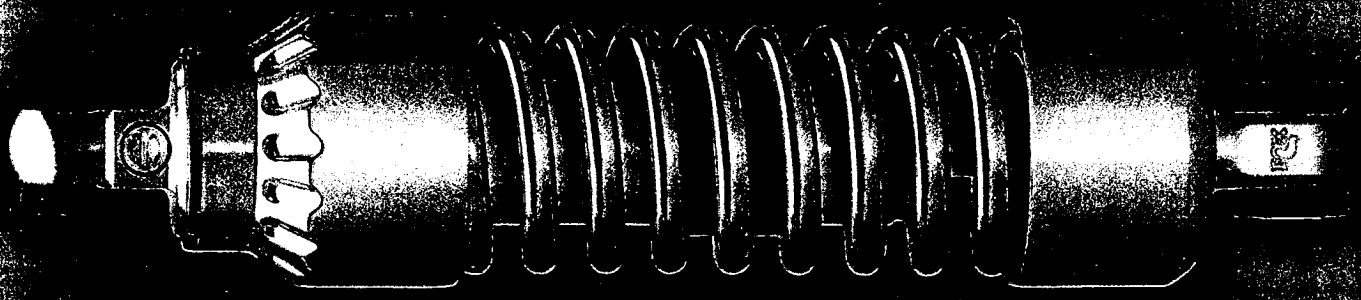
LOW PROFILE
Delivers sleek custom style that preserves low bike lines for cruising the boulevard

DEEP BUCKET
Puts the body in touring position and keeps rider and passenger comfortable with generous amounts of cushioning

TOURING SEAT WITH RIDER BACKREST
Offers deep-bucket cushioning and total back support for the long haul

SUSPENSION

Along with seat thickness, suspension determines your seat height. Harley-Davidson® Profile® Low rear shocks or a complete front and rear lowering kit can drop your seat height up to one inch while preserving ride quality. Keep in mind that lowering your suspension almost always reduces ground clearance as well.



Chrome Profile Low Dyna Rear Suspension

300+ OPTIONS

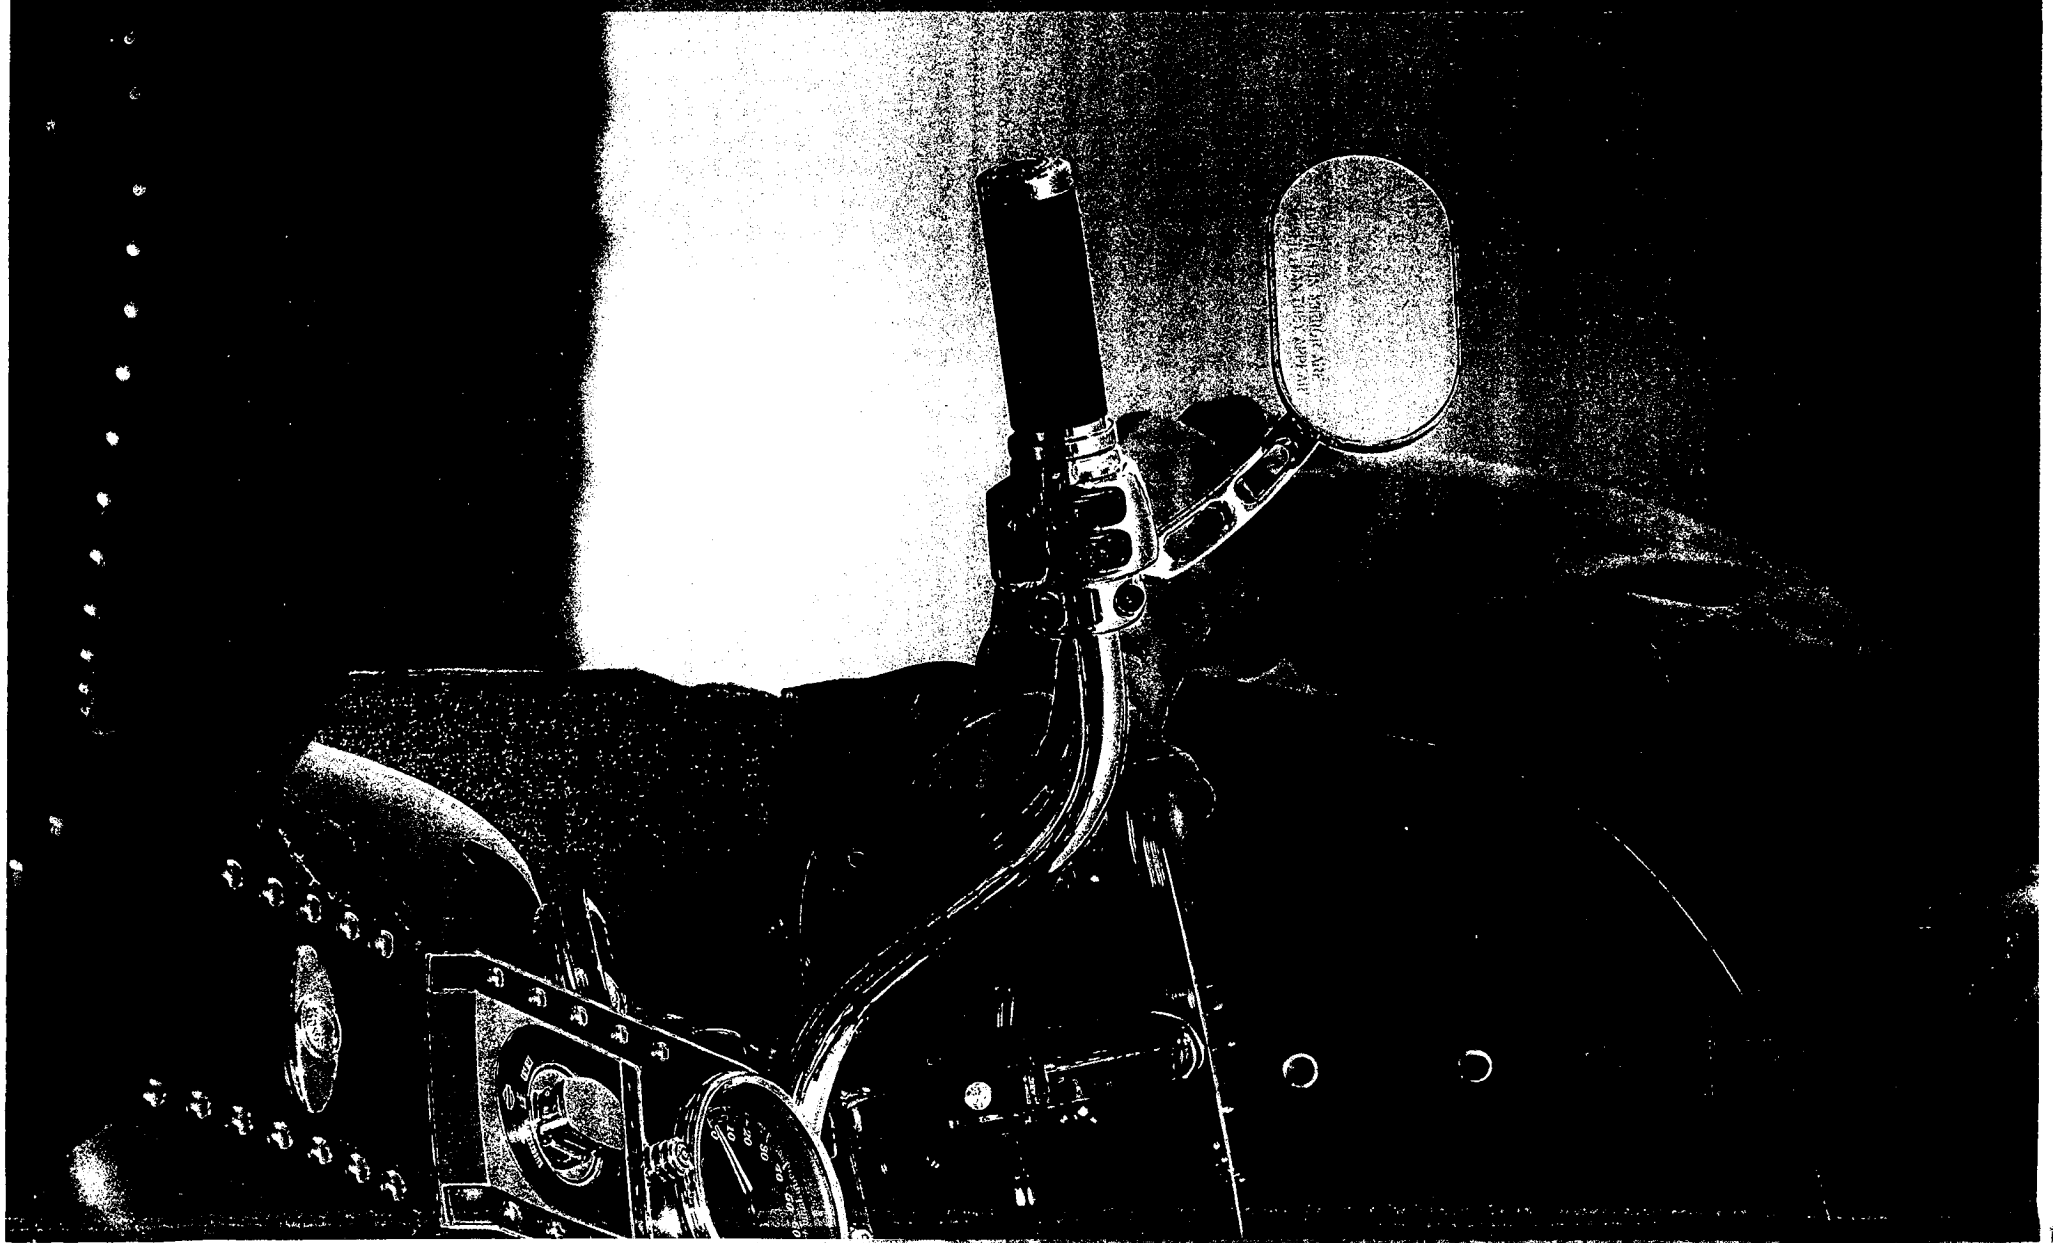
MAKE YOUR RIDE

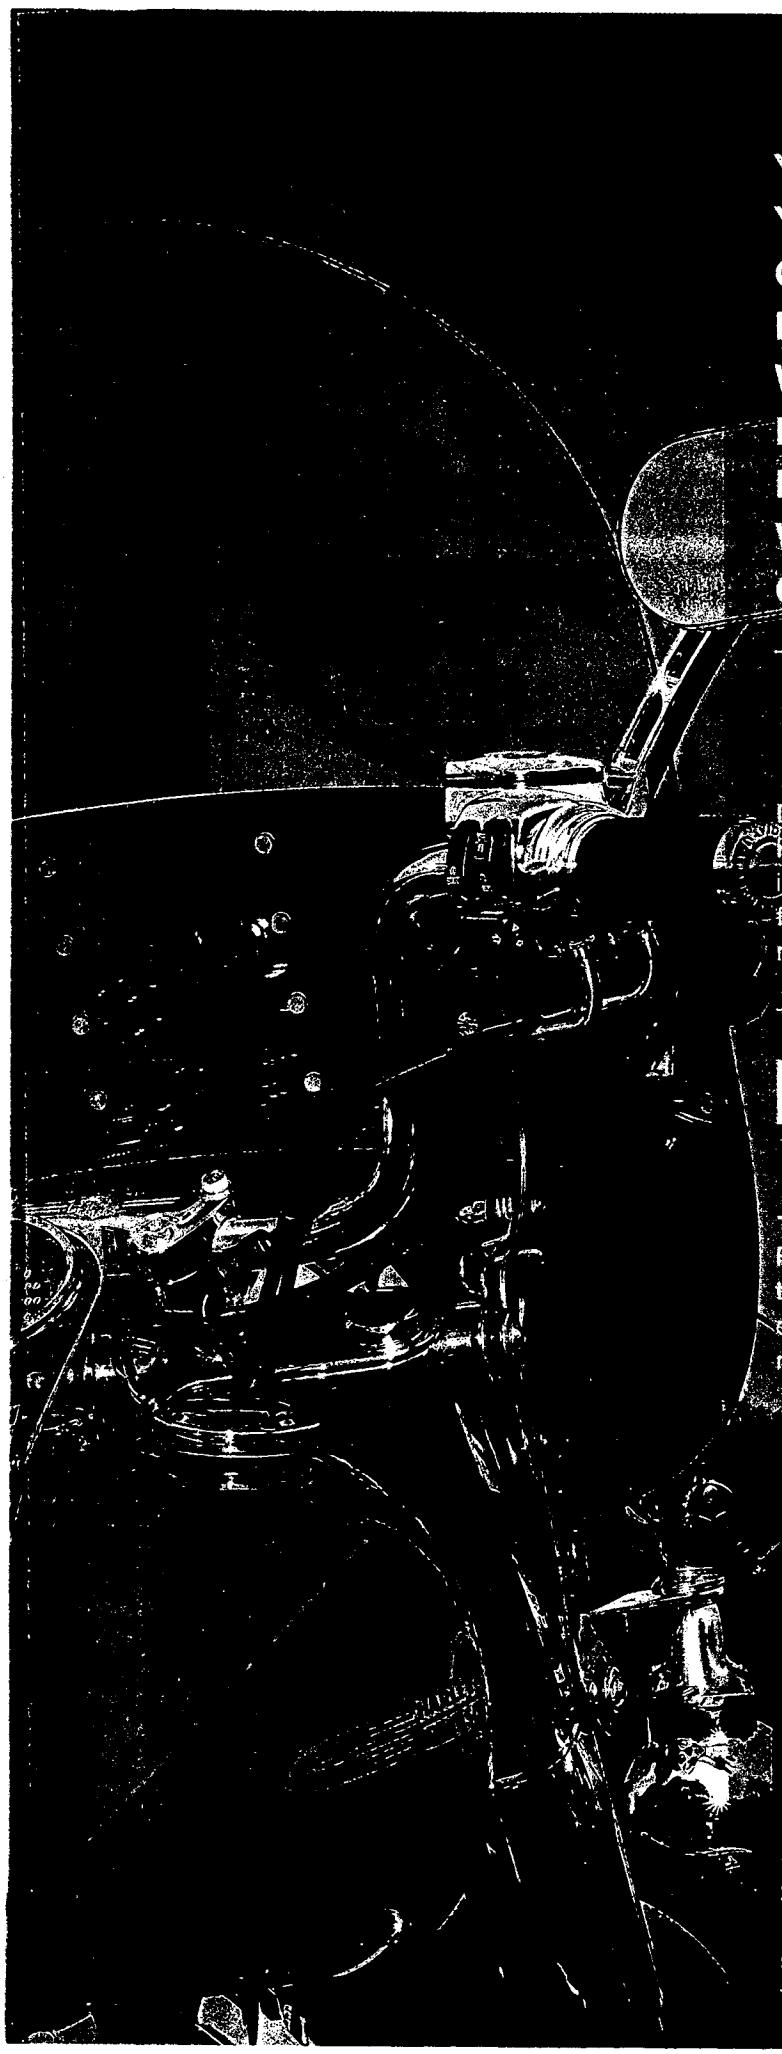
SEE A SPECIALIST. When making decisions that affect both you and your bike, it's best to CONSULT AN EXPERT—someone who can translate what you're looking for into the RIGHT ACCESSORY CHOICES. Your HARLEY-DAVIDSON® DEALER is an invaluable resource for helping you put all the pieces together to ensure YOUR RIDE IS A PERFECT FIT.

ROUTES TO FOLLOW

CHOOSE YOUR ROAD

Considering style and comfort is crucial to your customization efforts. But you should also match your accessories with how you plan to use your bike—whether it's cruising, chasing the horizon, or a little of both. However you ride, Genuine Motor Parts and Accessories provide the flexibility to ensure that your Harley® is always in its element.





YOU'RE NOW AT A CROSSROADS. WILL YOU BE ROLLING CROSS-TOWN OR CROSS-COUNTRY? ALONE OR WITH A PASSENGER? HOW MUCH GEAR DO YOU WANT TO BRING? THE ANSWERS WILL HELP YOU TO BEST EQUIP YOUR BIKE FOR YOUR RIDING NEEDS, AND TO DECIDE WHETHER PERMANENT OR DETACHABLE OPTIONS ARE THE WAY TO GO.

TO

Designed to be installed or removed in 60 seconds or less, Harley-Davidson® Detachables technology gives you the flexibility to outfit your bike on the fly, changing the look and feel of your motorcycle in minutes. To use Detachables, you'll need special docking hardware installed on your bike.

DOCKING POINTS

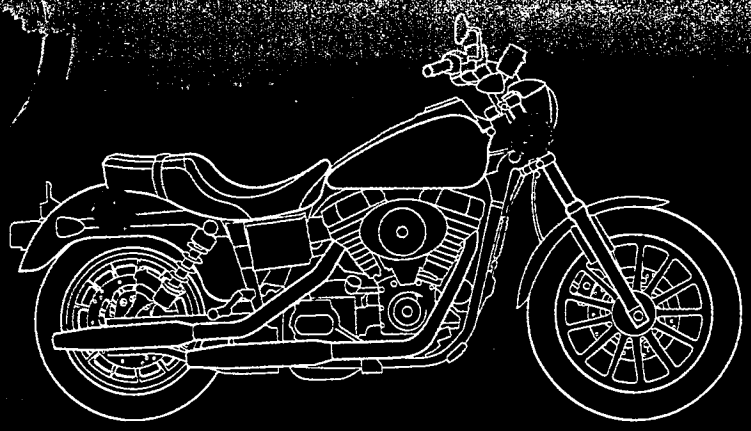
1 SIDEPLATE AND TOUR-PAK® DOCKING

Fender-strut location allows the use of detachable sideplates to which uprights and luggage racks can be attached. Additional docking points can be installed for the use of Tour-Pak components with Detachable Tour-Pak Racks.



2

Four-point system on upper front forks allows windshields to slide on and off easily and lock down tight to take on even the toughest wind blasts.

AGAINST THE WIND

Particularly at highway speeds, a **windshield** offers many benefits, including the reduction of rider fatigue and protection from the elements. Adding a windshield also alters the look of your bike, so you should balance comfort and style when making your selection. Detachable options allow quick removal for preserving the low-profile look.

Oil Cooler, Dipstick and Thermostat Kits

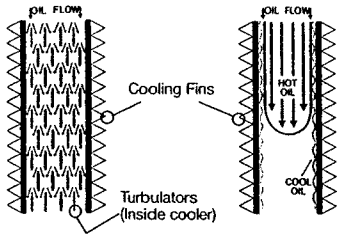
A. SPORTSTER PREMIUM OIL COOLER

This product brings touring model cooler technology to the Sportster. This vertical-mount cooler features a unique "Turbulator" system that efficiently distributes oil across the cooling chambers. The air fins feature several louvers to efficiently dissipate heat. The premium oil cooler has been designed for ease of installation, and features an adapter plate that allows oil lines to connect to the oil filter bracket. Kit includes oil cooler, oil filter mount, oil lines and mounting hardware.

62996-04	Fits '82-later XL models.	**$269.95**

INSIDE VIEW OF PREMIUM OIL COOLER WITH TURBULATORS

INSIDE VIEW OF CONVENTIONAL OIL COOLER WITHOUT TURBULATORS



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

B. SPORTSTER CHROME OIL COOLER COVER

Add a beautiful accent to your Sportster Premium Oil Cooler. This chrome cover is designed to allow proper air flow through the integrated duct work. Requires Permatex® clear silicon RTV adhesive for installation.

Fahrenheit or Celsius can be changed with a simple push button operation. The readout is displayed with a rare blue light background for easier operation at night. All LCD dipsticks now incorporate an updated and more heat resistant LCD electronic unit. Twin Cam 88® LCD dipsticks also include an improved twist and pull cam-lock removal feature. Designed to be waterproof with replaceable standard battery. Patented.

62972-02A	Fits '84-'03 XL models.	**$89.95**

D. THERMOSTAT KIT

Thermostat features an advanced design that makes it smaller so that it can be hidden after installation. Thermostat is designed to allow oil flow to the cooler starting at 180° Fahrenheit, while restricting oil flow to the cooler when oil temperature falls below 180° Fahrenheit. Reliable function provides additional confidence to the rider who adds an oil cooler to their riding application.

62878-99	Fits all models with oil coolers.	**$69.95**

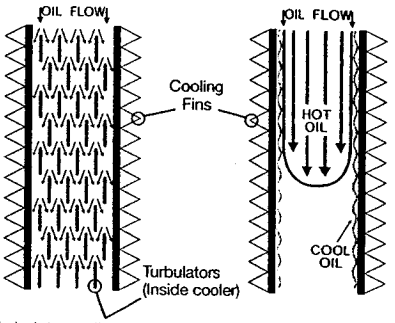
INSIDE VIEW OF PREMIUM OIL COOLER WITH TURBULATORS



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

INSIDE VIEW OF CONVENTIONAL OIL COOLER WITHOUT TURBULATORS

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

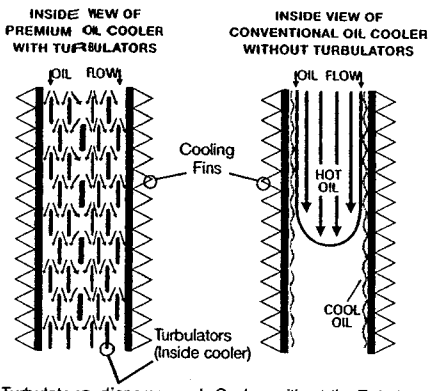
A. PREMIUM OIL COOLER FOR SOFTAIL® MODELS
This vertically mounted oil cooler was designed specifically for Harley-Davidson to out-perform the other coolers in the industry. This cooler features a unique "Turbulator" design that efficiently distributes oil across the cooling chambers. The cooler features several louvers to efficiently dissipate heat. The unique and stylish adaptor plate incorporates the thermostat, and simplifies oil line routing for easy installation. Comes complete with mounting hardware.

62913-00A Fits '00-later Softail models (except FXSTDSE). (Will not fit with Oil Filter Cover P/N 62816-98. Will not fit with front spoiler.) **$279.95**



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

Oil Cooler Adapter Assembly (not shown)
This black anodized billet aluminum adapter eliminates the lengthy oil cooler lines required for most aftermarket oil coolers. Standard in the H-D Premium Oil Cooler Kit, this adapter mounts between the filter mount and oil filter. Kit includes thermostat, gaskets, hardware and fittings.
