POLISHED SPUN ALUMINUM DISC WHEEL
Born at the drag strip, the look of the spun aluminum wheel has been the hot rodders favorite for decades. The flat polished surface and surrounding circle of rivets reflect light and motion and add a subtle mirror effect to the front and back of the bike. Spun aluminum wheels include correct bearings and spacers for the application, and are ready for bolt-on installation.

IMPORTANT INFORMATION ABOUT OPENING A NEW ACCOUNT: To help the government fight the funding of terrorism and money laundering activities, Federal law requires all financial institutions to obtain, verify, and record information that identifies each person who opens an account. What this means for you: When you open an account, we will ask for your name, street address (P.O. Boxes are not allowed under Federal law), date of birth, and other information (including your Social Security or Tax Payer Identification Number) that allow us to identify you. We may also ask to see your driver's license or other identifying documents when appropriate.

1. APPLICANT INFORMATION This offer is not transferable. All sections must be complete for processing.

Individual: I am applying in my own name and relying solely on my income and assets and not on the income or assets of another person as a basis for repayment.* (A married Wisconsin resident applying for credit in his/her own name must complete the required spousal information in the joint applicant section. The Bank may give notice of the opening of any credit account to the applicant's spouse.)
Joint: I am applying with another person who will also be responsible for repayment. Note: If married, you may apply for a separate account in your own name. If you reside in a community property state, such as AZ, CA, ID, LA, NV, NM, TX, WA or WI, the assets of your marital community will be liable in this account even if you apply for a separate account and this application is not signed by your spouse (unless you attach a statement that you wish to apply for a separate account based solely on your separate assets). If you reside in a community property state, credit extended under this account will be incurred for a community benefit. Note: In the case of a joint account, each applicant will have the right to use the account to the extent of the credit limit on the account and will be liable for all credit extended under the account to any Joint Applicant.

A. CHROME NINE SPOKE CAST WHEEL

Add a splash of chrome. Now available for Softail® models, these fully polished nine-spoke wheels are styled to match the Original Equipment wheels on many Touring models. More than just a chrome-plated Original Equipment Touring Wheel, these wheels utilize tooling developed specifically for chrome-plating to give a near perfect finish without the "waves" created when polishing the Original Equipment cast wheel. The rib on the Original Equipment wheel spoke has been removed to provide a smooth uninterrupted spoke finish. Special masking was developed to prevent plating corrosion inside bolt holes and bearing sleeve areas. Bearings are factory installed with the same precision as our Original Equipment wheels.

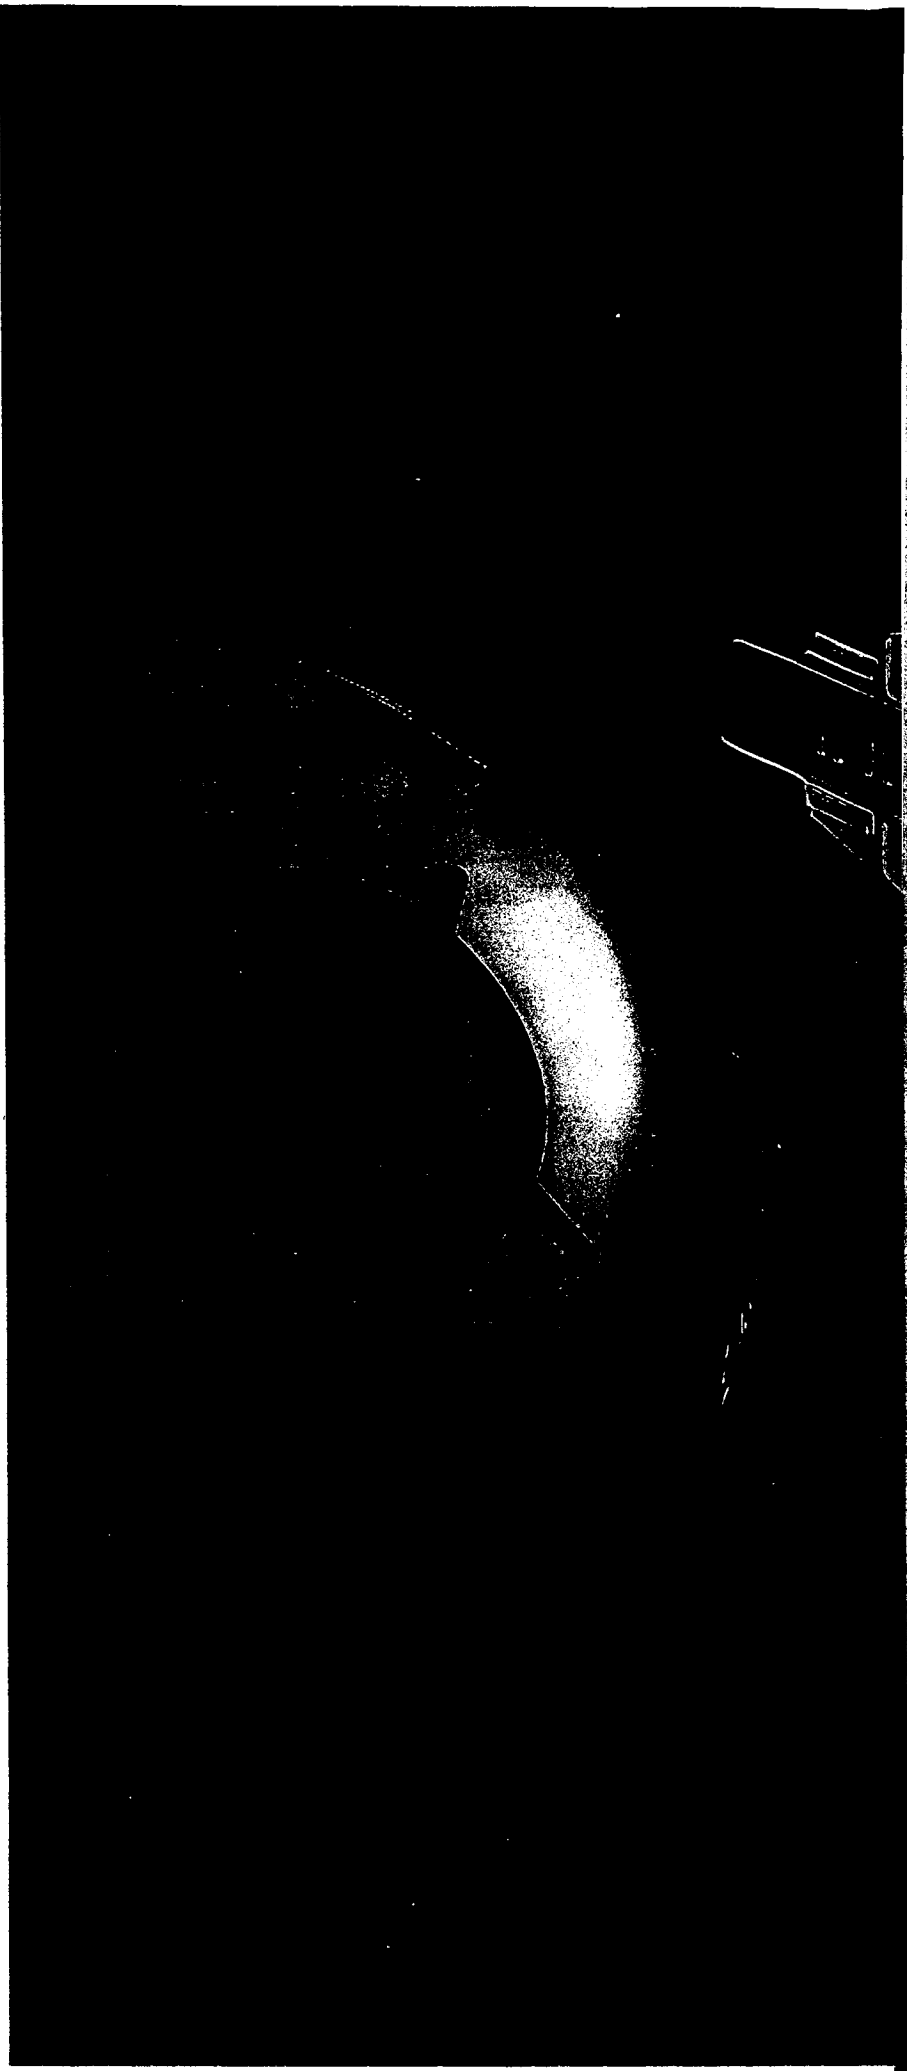
Supply your own sheet metal or buy a replacement set; either way you can create your own look and still get the kind of quality you'd expect from a factory-painted Harley® motorcycle.



THE HARLEY-DAVIDSON® SPECTRUM CUSTOM PAINT PROGRAM*

The Spectrum Custom Paint Program allows you to have your Harley® motorcycle painted to match any color scheme you can imagine. Start with your own sheet metal, or buy a replacement set. You can have individual fenders and tanks painted, or order complete sets, using the part numbers shown below. If the customer's existing sheet metal is being used, it is the customer's responsibility to submit original condition, undamaged parts in a timely manner. See your dealer for details.

You can choose your main color, panel color, top coat, and pinstripes. You can specify a "clear," "pearl" or "candy" finish top coat. The top coat is a special paint that will work with the main and panel colors to create different effects.

Shown on these two pages are just a few of the unlimited color options available. Mix & match colors from vintage bikes, classic cars, or any other monochrome or two-tone paint scheme you can think of.

Color-Matched Spoilers

A. SPORTSTER® COLOR-MATCHED FRONT SPOILER*

The wedge shape of the spoiler accents the lean and narrow look of the new Sportster model. Injection molded from high-impact material and available primed, chrome, or color-matched to original factory applied finishes, the spoiler features a recessed "Bar & Shield" logo. Kit includes all mounting hardware.

Fits '04-later XL models.
Will not fit with Engine Guard P/N 49060-04.

B. SPORTSTER® COLOR-MATCHED FRONT SPOILER*

This spoiler is made from injection-molded, high impact materials and finished with the same paint as all stock H-D® products to match your original factory-applied color. Also available primed or in chrome. Includes all hardware for installation.

Fits all '84-1/2 -'03 XL models. Will fit XL models with Engine Guard P/N 49018-88C. Will not fit with Voltage Regulator Cover P/N 74579-97, unless also equipped with the Sport or Café Front Fender and the additional purchase of Voltage Regulator Hardware Kit P/N 74568-98.

CAUTION: ('84 1/2-'03 Sportster models only.)
Installation of the Front Spoiler, Chrome Voltage Regulator Cover and Chrome Regulator Relocation Hardware will allow the Chrome Voltage Regulator Cover to contact Stock Front Fenders on some models during full compression of the front suspension. This contact could result in a marred paint surface on the front fender. The installation of a Sport Front Fender will eliminate the possibility of contact between the Chrome Voltage Regulator Cover and the Front Fender.

A. HARLEY-DAVIDSON® FACTORY SECURITY SYSTEM

Equip your Harley-Davidson® VRSC, Sportster®, Dyna, Softail® or Touring model with the only security system designed and approved by The Harley-Davidson Motor Company.

When armed, the Security System disables the starter and ignition while monitoring the electrical system and vehicle motion with adjustable sensitivity. Minor disturbances trigger a momentary warning; major ones an unbroken thirty-second alarm, after which the Security System returns to monitoring. A distinctive four-way flasher pattern is the alarm signal. An optional self-powered Smart Siren Kit adds a piercing scream that sounds even if the battery cable is cut.

The Security System is armed and disarmed with a remote control waterproof key fob utilizing state-of-the-art rolling code technology. If the key fob is not available, the rider may arm or disarm the system by keying a previously entered personal code on the turn signal switches. A flashing status indicator informs the rider that the Security System is armed or disarmed.

When armed in the Transport Mode, the Security System disables the starter and ignition, but monitors only the electrical system, not vehicle motion. The vehicle may be moved but electrical tampering triggers an alarm.

An Extended Storage Mode keeps the battery from discharging when the Security System is armed for extended periods of time.

The Security System is compatible with FL Touring models equipped with approved TLE/Ultra Sidecars when the system is configured as described in the SIDECAR OWNER'S MANUAL.

BODYGUARD IN A BOTTLE

Introducing a breakthrough in powertrain protection – Screamin' Eagle® SYN3™ Synthetic Motorcycle Lubricant. For use in engines, transmissions and primary chaincases, it's just the latest in a line of products formulated specifically to keep your Harley® motorcycle running strong, mile after mile.

SCREAMIN' EAGLE® SYN3™ SYNTHETIC MOTORCYCLE LUBRICANT, SAE 20W50

TESTED-CERTIFIED for use in Harley-Davidson® engine, primary chaincase and transmission applications, the new Screamin' Eagle SYN3™ Synthetic Lubricant makes changing and topping-off fluids a simple one-product process. Developed with a proprietary three synthetic basestock formula, Screamin' Eagle SYN3 Lubricant is formulated to provide for long-term protection and engine cleanliness requirements, and to provide superior high-temperature protection for high-output engines. SYN3 is formulated to maintain the coefficient of friction for proper clutch operation and to provide the proper lubrication to the primary chain drive. In addition, SYN3 is designed to provide the correct lubricity for the anti-wear requirements of transmission gears and for improved seal protection. This formula is approved by Harley-Davidson for use in all stages of engine life and is not detrimental to the break-in stage of engines.

Formulated for Harley-Davidson Evolution® XL, Evolution 1340, Twin Cam, V-Rod® Revolution®, and all Buell® models.

99824-03/00QT 1 Quart Bottle. $8.49

WHAT ARE THE KEY BENEFITS TO USING SYN3™ MOTORCYCLE LUBRICANT?

- SYN3 Lubricant can be used in the engine, primary chaincase, and transmission.
- SYN3 Lubricant offers improved film strength for superior wear protection at high temperatures, and improved deposit control for a cleaner engine, transmission, and primary chaincase.
- SYN3 Lubricant is formulated for reduced oil consumption, improved wear protection, high-temperature detergency, and superior overall field performance.

Get Three Kinds of Protection with High-Performance Screamin' Eagle® SYN3™ Synthetic Motorcycle Lubricant

A miracle of modern motorcycle science.
The product of a sophisticated research and development program, SYN3™ is the first synthetic motorcycle lubricant designed, tested and certified by Harley-Davidson Engineering exclusively for use in Harley-Davidson® engines, transmissions and primary chaincases. It's a high-performance proprietary formulation containing special additives and inhibitors that offers the most advanced and complete engine protection available for Harley-Davidson® motorcycles – including those with high-performance engines.

What's the difference between synthetic and petroleum-based lubricants?
Both synthetic and petroleum-based lubricants are derived from the same crude oils. But that's pretty much where the similarities end. Unlike their petroleum-based counterparts, which inherit physical components (including contaminants) of the source crude oil in the refining process, synthetic lubricants are manufactured from base stocks that are custom-designed from scratch to have desired properties for specific purposes, meaning that engineers have complete control of the lubricant from start to finish – at the molecular level.

What does SYN3™ Synthetic Motorcycle Lubricant do for my drivetrain?
SYN3™ Synthetic Motorcycle Lubricant offers all the benefits of Genuine Harley-Davidson® 360 Motorcycle Oil, and:

- Offers superior wear protection at higher temperatures
- Keeps engines, transmissions and primary chaincases cleaner
- Meets the anti-wear lubricity requirements of all transmission gears
- Lubricates all primary chaincase components
- Delivers smooth, sure clutch operation
- Provides long-term protection of all internal components
- Improves seal and gasket performance
- Offers superior performance in high-output engines

What testing was performed on SYN3 Synthetic Motorcycle Lubricant?
During its development, SYN3™ Synthetic Motorcycle Lubricant was subjected to more than three years of laboratory bench testing, dynamometer testing under accelerated conditions, open road vehicle durability testing, closed course durability testing, and wear and deposit rating analysis.

In which motorcycle models can I use SYN3 Synthetic Motorcycle Lubricant?
SYN3™ Synthetic Motorcycle Lubricant is formulated for use in Harley-Davidson Evolution® XL, Evolution 1340, Twin Cam (all displacements) and Revolution®-equipped models, as well as all Buell® models. SYN3™ Synthetic Motorcycle Lubricant should not be used in pre-Evolution® engines, four-speed Big Twin transmissions, or early Shovelhead™ 5-speed transmissions, since it was not tested or developed for those applications.

When can I start using SYN3 Synthetic Motorcycle Lubricant?
Right away. SYN3™ Synthetic Motorcycle Lubricant is approved for all stages of engine life, including the first service interval – which means it's not detrimental to engine break-in. You can even use it as a first fill upon delivery of a new motorcycle.

Since SYN3 Synthetic Motorcycle Lubricant is a high-performance lubricant, can I wait longer between changes?
No. As with petroleum-based engine lubricants, you should drain and replace the synthetic motorcycle lubricant in your engine, transmission and chaincase at every 5,000-mile service interval. You should also change your oil filter anytime the engine lubricant is changed. If you ride your motorcycle hard, under dusty conditions, or in cold weather, you should change your SYN3™ Synthetic Motorcycle Lubricant and oil filter more often. You should always change your engine lubricant and filter prior to any extended storage so that your engine is clean and free of any contaminants during this time.

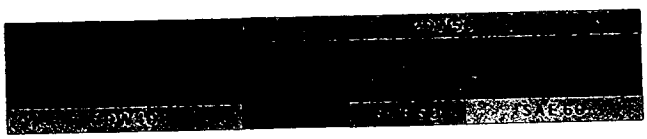
Protect your Harley-Davidson® with H-D® 360 Motorcycle Oil.

What Goes Into Harley-Davidson® Motorcycle Oil?

Harley-Davidson Motorcycle Oil is unlike off-the-shelf oils. H-D® 360 is a complex mixture of carefully selected premium quality mineral oil and an exclusive performance additive package. Designed for maximum performance in H-D engines, H-D 360 is a unique oil for a unique application.

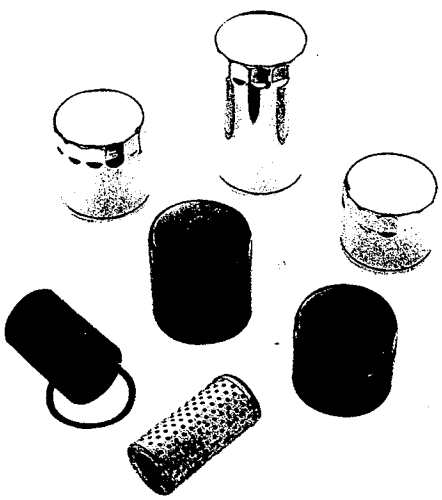
H-D® 360 – More Than a Logo – A Performance Rating System

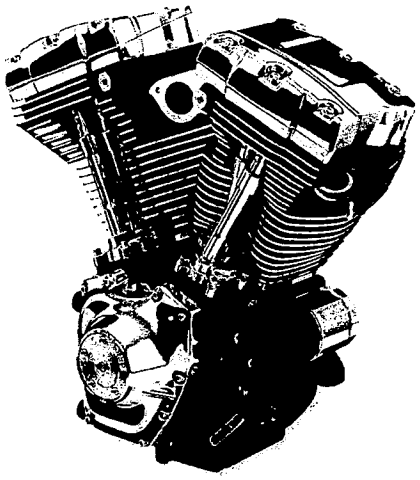
The name Harley-Davidson 360 has its roots in the testing criteria applied to certify this new oil. More than just a dynamometer test, it is a designation of an entirely new performance rating system. To earn the name H-D 360, this oil had to outperform all others on a full round of tests. Laboratory bench testing measured viscosity retention and oxidation stability. Next, the oil was run on the open road under high ambient temperatures and high load conditions. After each test, the engineers performed a complete engine tear-down and analysis. Plenty of oils vied to carry the name Harley-Davidson, but only one oil met the challenge: H-D 360.



What viscosity grade should I use in my Harley?

The recommended viscosity grade for all temperature conditions is SAE 20W50 Harley-Davidson Motor Oil. SAE 10W40 H-D Motorcycle Oil is also available and appropriate for low temperature climates. The SAE 50 H-D Motorcycle Oil is satisfactory in ambient temperatures of 60-80°F, and the SAE 60 H-D Motorcycle Oil in ambient temperatures above 80°F. SAE 20W50 covers the broadest range of operating temperatures.





What does Harley-Davidson Motorcycle Oil do for my engine?

- Protects the engine from rust and corrosion.
- Keeps the engine clean.
- Cools engine parts.
- "Seals in" combustion pressure.
- Prevents foaming.
- Permits easy starting at a wide range of temperatures.
- Provides quick oil circulation.
- Reduces friction and power loss.

How often should I change my motorcycle engine oil?

You should change your motorcycle engine oil and engine oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter. If you ride your motorcycle hard, under dusty conditions, or in cold weather, the engine oil and filter should be changed more often. You should always change your engine oil and filter prior to winter storage (or any extended storage) so that your engine oil is clean and free of contaminants for this time period.

Can I go longer between oil changes by changing the filter?

NO! The job of the oil filter is to remove dust, soot and other solid matter. But it cannot remove water, gasoline or acids. And, it can't do the job of additives that have been used up. Follow the recommended oil and oil filter changes in your Harley® motorcycle owner's manual.

GENUINE HARLEY-DAVIDSON® FLUIDS

Some facts you should know about Genuine Semi-Synthetic Transmission Fluids and Sport-Transmission Fluid:
Unique products developed specifically for Harley-Davidson® transmissions to provide superior lubrication. Consider these unique performance features:

- Maintains viscosity (doesn't thin out).
- Conventional gear lubes or motor oils can actually be sheared by the high-speed action of the drive gears. The result is a loss of viscosity or thinning out in service and high wear to the gear teeth.
- These products are designed to withstand this shearing action and maintain viscosity between services.
- Superior lubrication over wide temperature ranges. These fluids are not affected by changes in temperature as much as conventional lubes or oils.
- Fights corrosion and wear. H-D's Semi-Synthetic Transmission Lube and Sport-Trans Fluid contain special additives to protect against rust and corrosion. They also contain potent high film-strength anti-wear additives to handle heavy loads placed upon the drive gears.

A. HARLEY-DAVIDSON® DOUBLE PLATINUM SPARK PLUGS

Double Platinum spark surfaces offer superior erosion resistance even after millions of sparks. H-D® Double Platinum plugs also feature a patented semiconductor suppressor, a triple-coated shell with special anti-seize coating, copper core center electrode for high thermal capacity and peak performance at all engine speeds, tapered center and platinum side electrodes for maximum combustibility. Special high alumina insulator provides self adjusting temperature for maximum resistance to fouling. Harley-Davidson's longest lasting spark plugs.

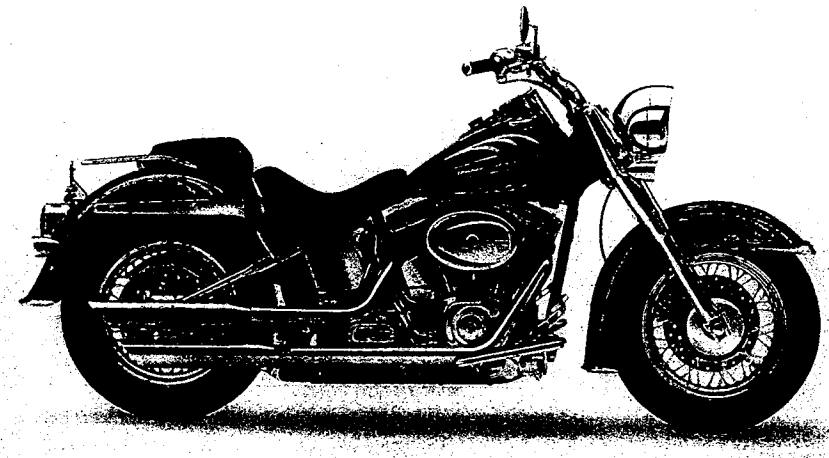
WHAT WILL BE.

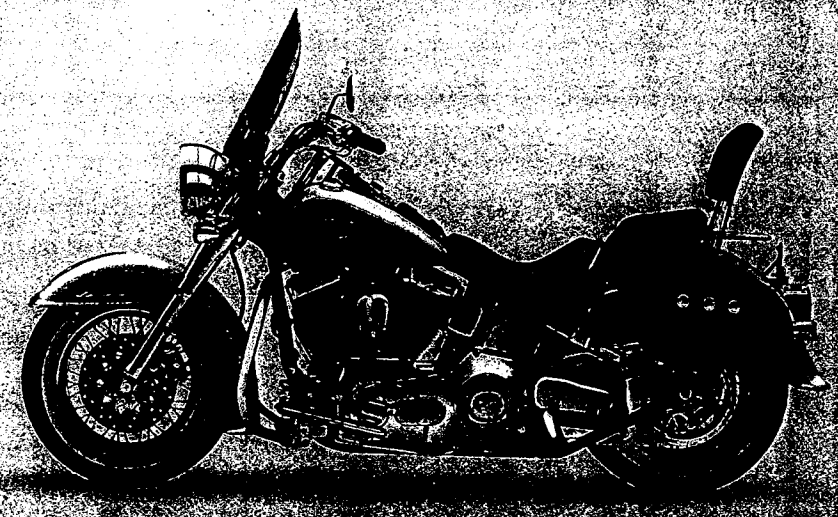
YOU'RE AT THE CROSSROADS. You bought the Harley-Davidson® motorcycle. But that doesn't make it "your" bike just yet. True ownership comes after you start to add the accessories that meld personality with machine, creating a two-wheeled expression of your soul. Use this catalog to determine a path that's right for you. Because riding is about choices. Choices that turn a machine into a statement, a route into a trip, and a dreamer into a rider. Choose well.

Before you look at a single piece of chrome, decide what you want from your bike. Do you want to cruise Main Street or do you want to ride from coast to coast? Each riding style requires different accessories but, with the versatility of a Harley-Davidson® motorcycle, you really can have it both ways.



Cruiser

Make a statement. Stripped-down to the bare essentials, with a low-profile riding position and a high-profile attitude, these bikes make the maximum impact when riding across town or cruising the boulevard. The look begins big—paint, chrome, custom wheels—and ends with the smallest details.



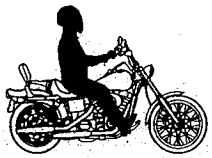
Touring

Lose track of the time zones. Start by choosing a seat, handlebar and foot control position to match your size, and select a windshield to protect you from the weather. Then, add saddlebags and touring luggage to haul your gear. For the final touch, select from a wide range of comfort and entertainment accessories to help you rack up the miles.

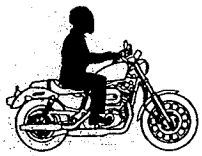
Making Sure Everything Sits Right With You

How you fit to your motorcycle—and how your motorcycle fits to you—is determined by the "control triangle": seat location, foot location and hand location. Each model has certain characteristics that determine how you fit into the control triangle and create four basic riding positions: profiling, sport, cruising and touring. The position you choose will have the greatest impact on the control, appearance and comfort of your ride.

Riding Positions

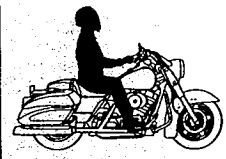


PROFILING A laid-back riding position for style while on the boulevard, with a high handlebar, forward foot position and a low-profile seat that carries the majority of your weight.

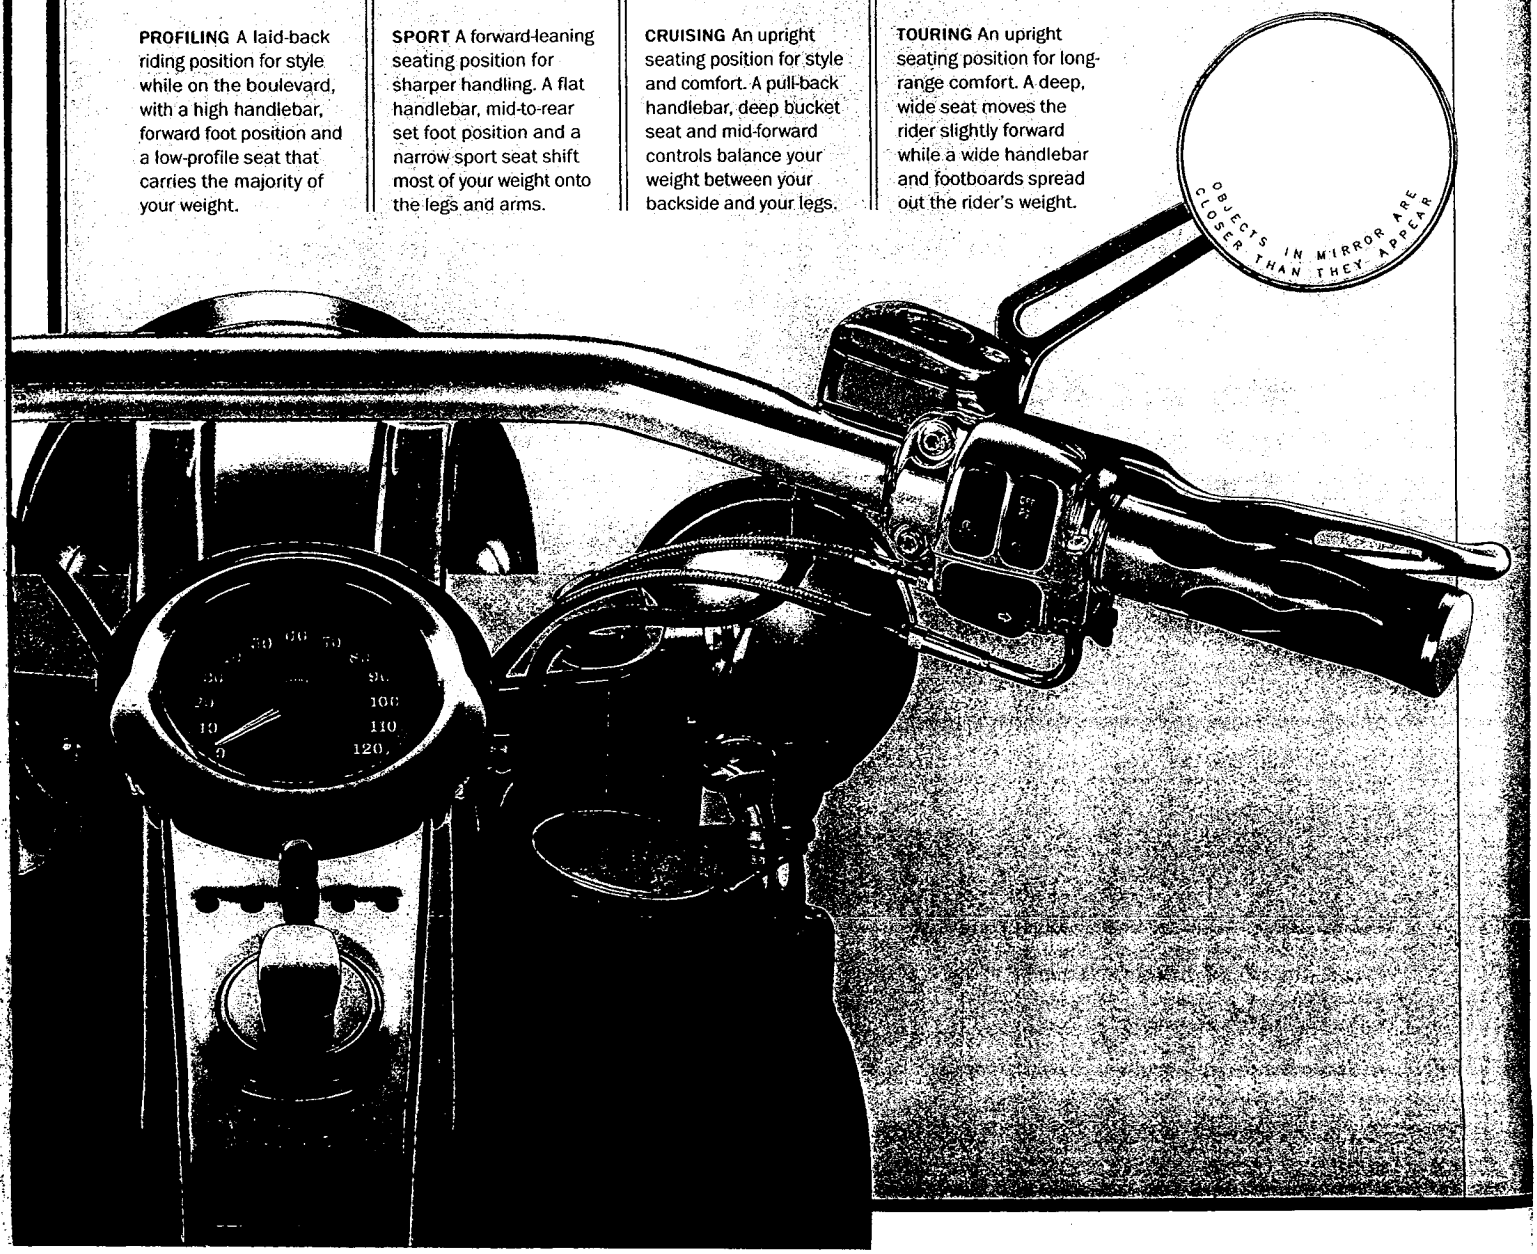


SPORT A forward-leaning seating position for sharper handling. A flat handlebar, mid-to-rear set foot position and a narrow sport seat shift most of your weight onto the legs and arms.

CRUISING An upright seating position for style and comfort. A pull-back handlebar, deep bucket seat and mid-forward controls balance your weight between your backside and your legs.

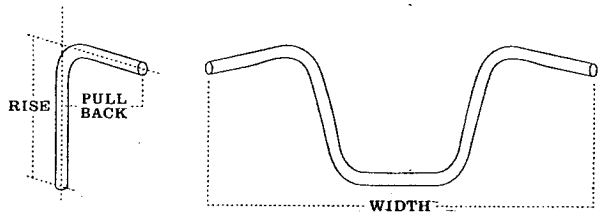


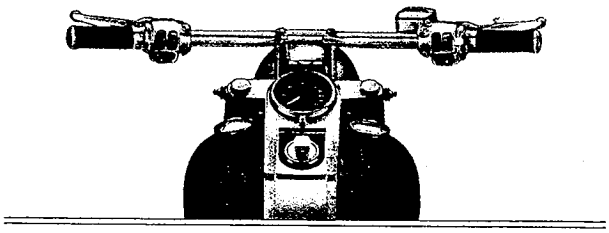
TOURING An upright seating position for long-range comfort. A deep, wide seat moves the rider slightly forward while a wide handlebar and footboards spread out the rider's weight.



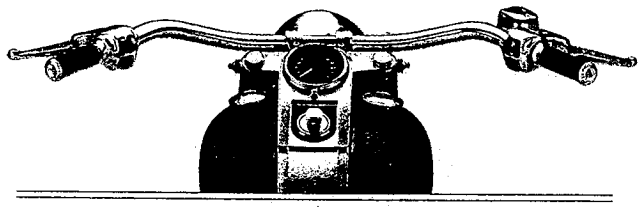
Steering You in the Right Direction

Choosing a bar is about more than just style, it's about how you approach the road. Where the bar positions your hands, wrists, and arms directly affects how you feel on the motorcycle. For every set of bars, there are three factors at work: Rise, Pull-Back and Width. These three measurements determine your reach to the hand controls and, therefore, your overall comfort and feeling of control.

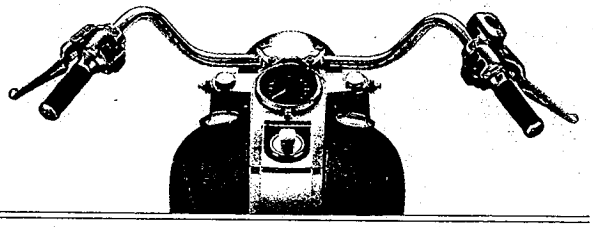




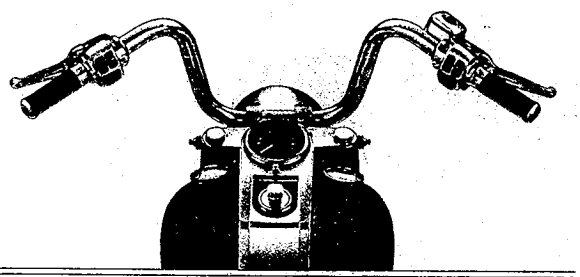
SWING BACK HANDLEBAR The narrow width, pull-back shape and neutral grip position put the hands closer for a relaxed-elbow riding position.



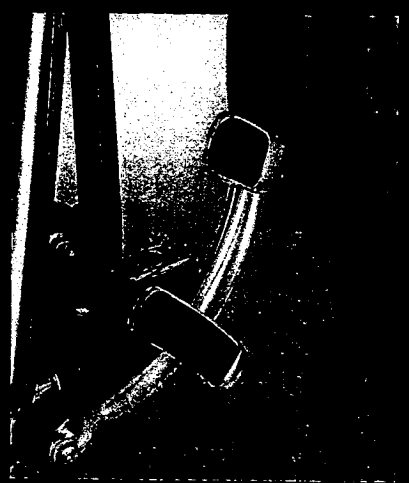
BEACH BAR HANDLEBAR The wide bar and turned-in grips lift the upper body for a more open-armed cruising position.



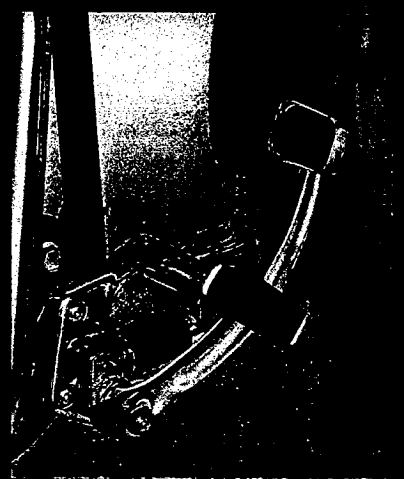
STOCK FAT BOY® BAR The bar features a pull-back shape with a mid-rise height that turns the arms and wrists for a relaxed posture.

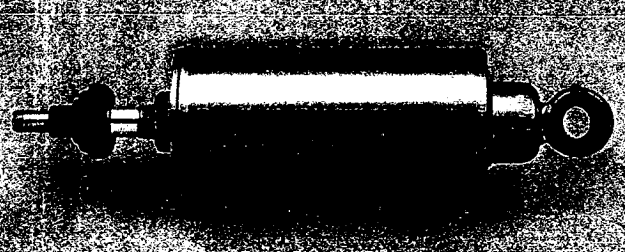


APE HANGERS The high rise, buck-horn shape stretches the arms and turns the wrists for an in-the-wind riding position.



EXTENDED FOOT CONTROLS
Foot placement is a critical part of both style and overall comfort, especially for taller riders. Moving the foot controls a few inches forward of the stock location lets you stretch your legs out for longer trips. On the boulevard, this greater leg extension transforms your riding style into a head-turning 'profiling' or 'cruising' position.





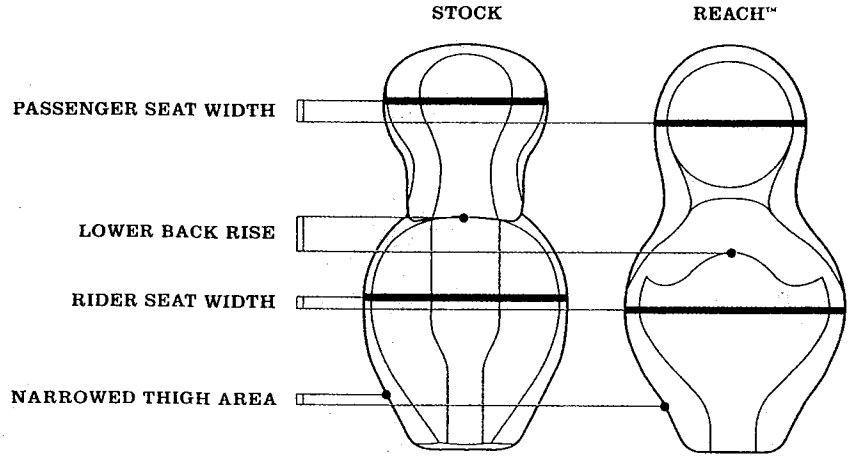
Keeping Your Feet on the Ground

Being sure-footed at a stop or when parking the bike enhances the rider's feel of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow-width seat may be the easiest way for a shorter rider to fit comfortably on a larger bike.

LEFT Profile® Low Rear Suspension

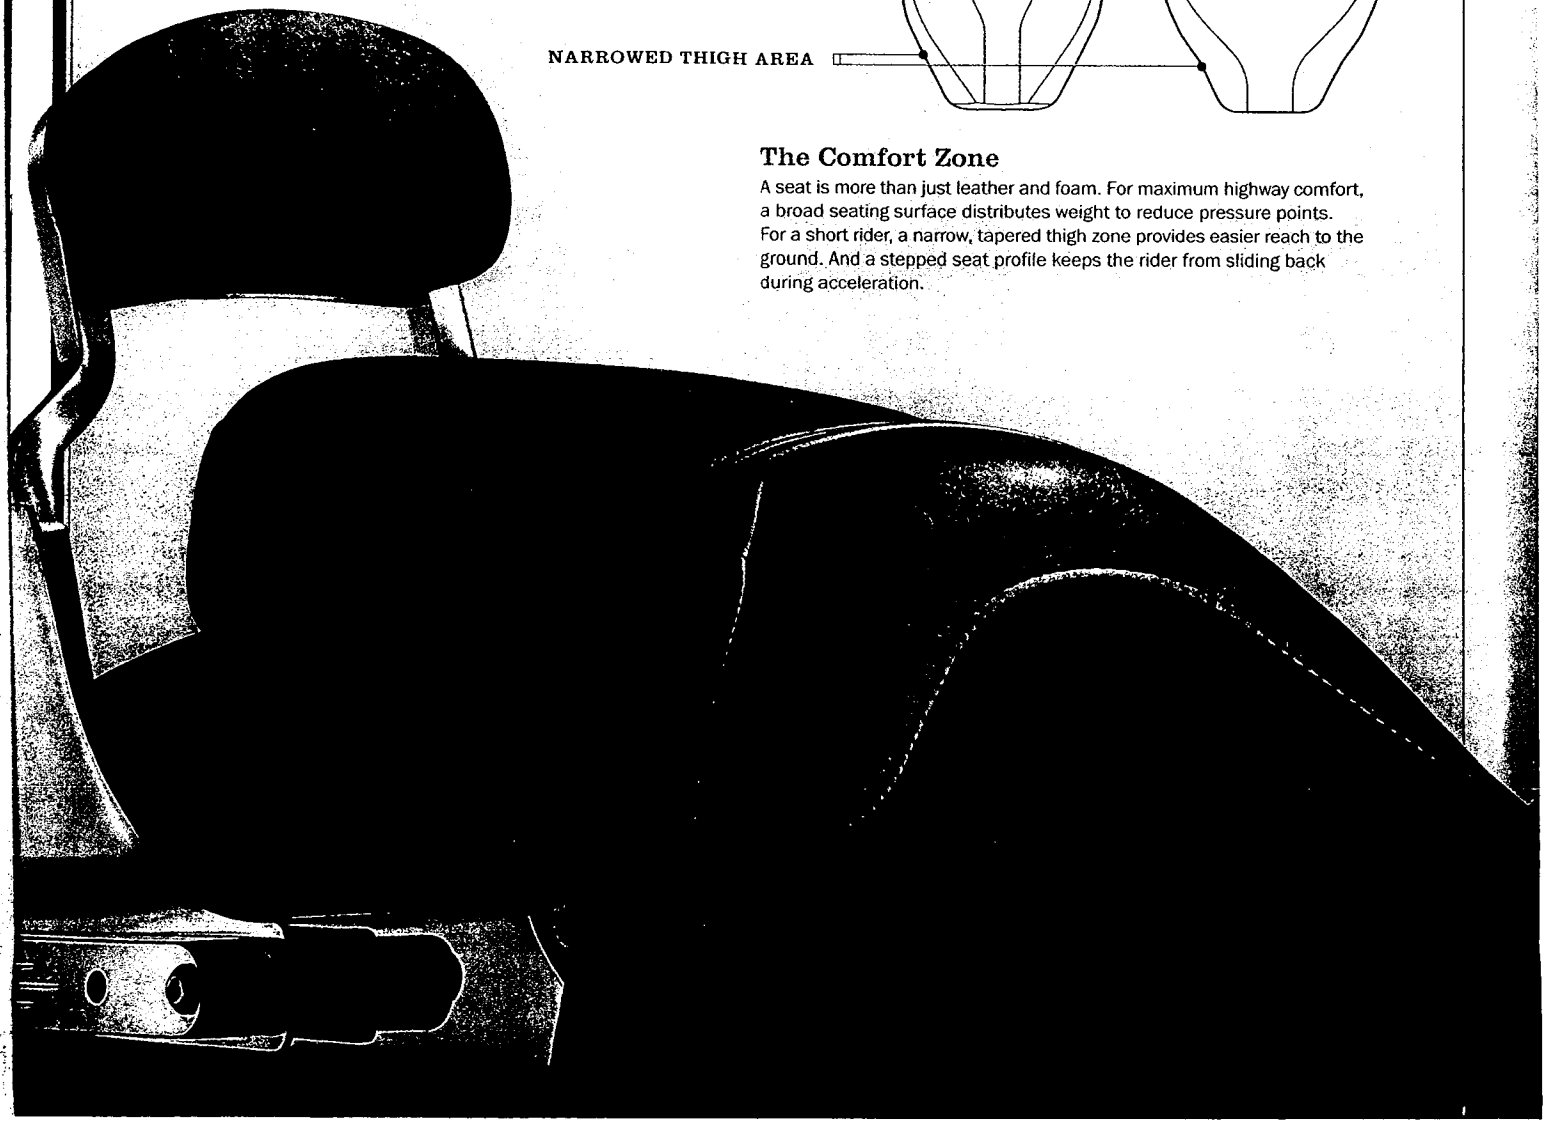
Getting To The Bottom Of It

On a long ride, your body can quickly tell whether a seat works for you. For example, does your back still feel relaxed after hours in the saddle? Do your hands fall naturally to the hand controls? Do you feel comfortable putting your feet down at a stop sign? It's a lot to think about, but a Harley-Davidson dealer can find the seat for the comfort, style, and control you want.



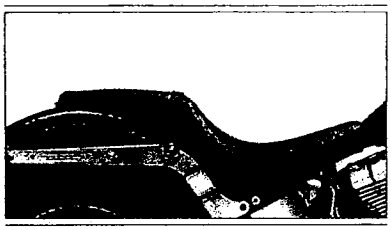
The Comfort Zone

A seat is more than just leather and foam. For maximum highway comfort, a broad seating surface distributes weight to reduce pressure points. For a short rider, a narrow, tapered thigh zone provides easier reach to the ground. And a stepped seat profile keeps the rider from sliding back during acceleration.

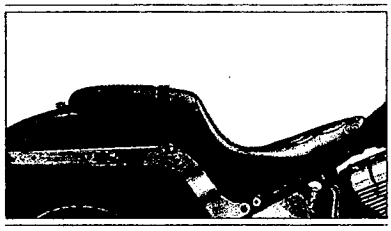


Finding Your Seat

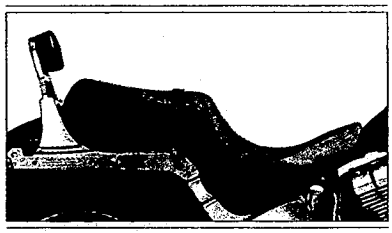
BADLANDER® SEAT Was it made for 'cruising the boulevard,' or was 'cruising the boulevard' made for it? Long and lean, its custom look brings you lower to the ground than any other seat. Think of it as an attitude adjustment disguised as a posture adjustment.



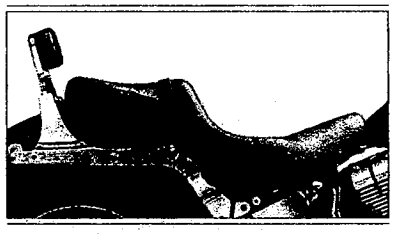
CUSTOM COLLECTION SEATS The best of both worlds. These saddles combine radical styling with contoured padding for long haul support. Top grain cowhide leathers stretch over the hand-laid fiberglass seat pan for extra durability. Comes in solo, low profile and mini-touring styles.

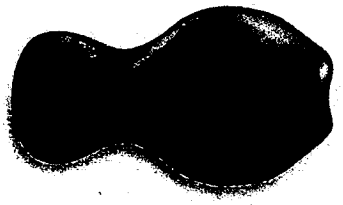


REACH™ SEAT It's good to have both feet on the ground. Specially-designed to move riders with a shorter inseam closer to controls, the Reach™ Seat also features a low profile and a narrow thigh-zone to bring the legs closer together to minimize leg stretch.

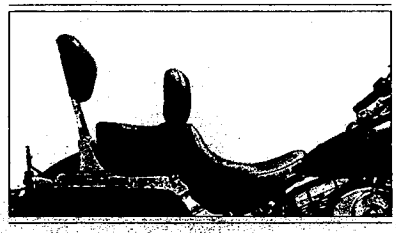


SUNDOWNER™ SEAT Your backside's going to look forward to long trips. The deep bucket design puts your body into proper touring position and the thick padding makes it want to stay there. The dished shape holds you in position and provides lower back support.



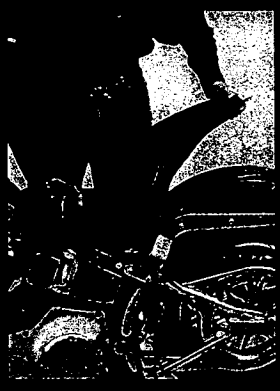


TOURING SEAT WITH RIDER BACKREST Hit the road with more than the wind at your back. When equipped with a rider backrest, a touring seat adds a whole new level of comfort. A backrest positions the rider in an upright touring posture, and adds adjustable lower back support.



SEAT INSTALLATION
Harley-Davidson seats fit a wide variety of riders and riding styles. From a low-profile street look to cross-country comfort, a Detachable Seat Hardware Kit lets you change at a moment's notice.

Unfasten the thumbscrew and remove current seat on the bike.

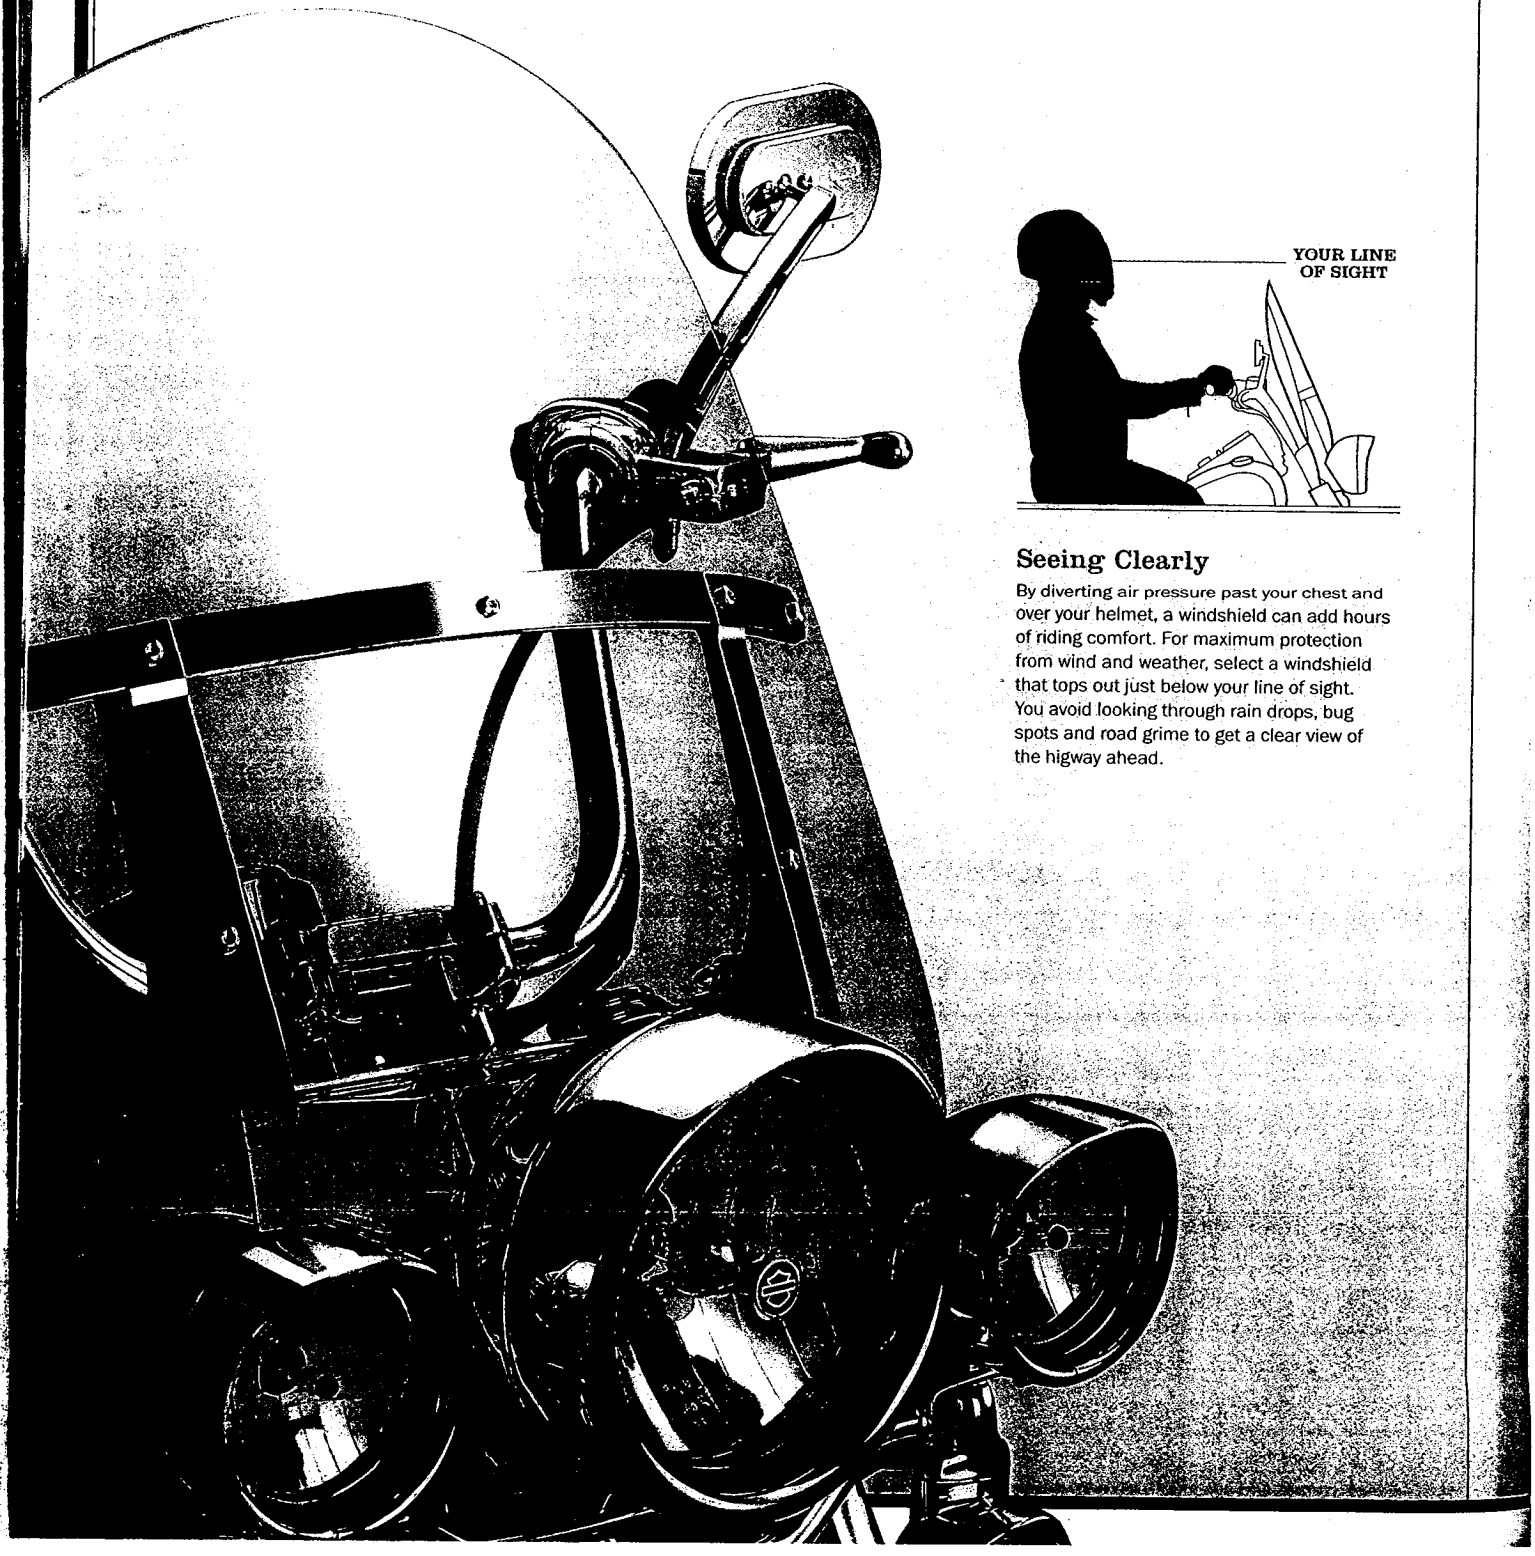


Seat's front tab into slot under the gas tank and line-up to fasten on fender.

Fasten seat bracket to fender and re-install the grab strap.

Looking Further Down The Road

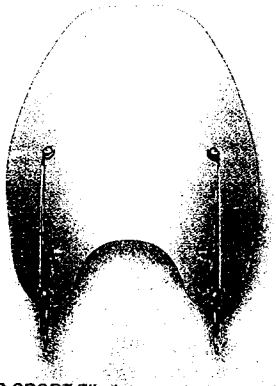
Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. Choosing from a range of styles, you can find the protection and style you demand. And since Detachable windshields come on and off in seconds, you can tailor your bike to the day's ride.



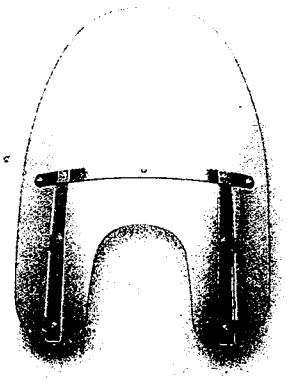
Seeing Clearly

By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. For maximum protection from wind and weather, select a windshield that tops out just below your line of sight. You avoid looking through rain drops, bug spots and road grime to get a clear view of the higway ahead.

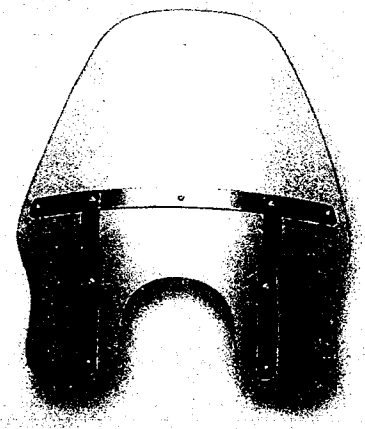
Keeping You Covered



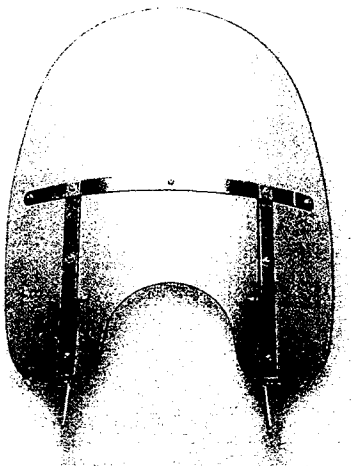
SUPER SPORT Eliminates wind and debris, but keeps the wind-in-the-hair feeling. Ideal for a cool morning ride to the office, the sleek profile hugs the front lamps for a sporty look.



COMPACT Traditional king-sized shape with a minimalist edge. For Harley-Davidson custom and cruiser models, the Compact Windshield provides wind and weather protection for "every day" riding.



TOURING Add maximum weather protection to your sporting motorcycle. Contoured to divert the wind around the rider's helmet and hands, a Touring windshield means long-ride comfort.



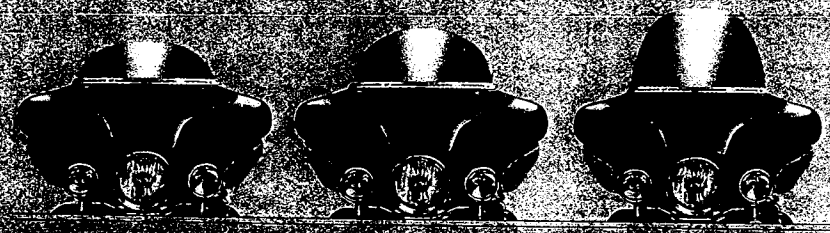
KING SIZE Nothing gets past this one. The King Size windshield is the ultimate in on-road protection. Available in a variety of shield heights, the road can't lay a finger on you.

Extended Coverage

LOW PROFILE Maximize your view. Made with the shorter rider in mind, this style extends 3 inches below the standard windshield height.

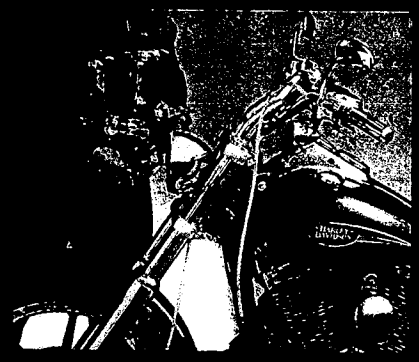
STANDARD HEIGHT Designed for a rider about 5 foot 10 inches, the Standard Height provides weather protection and an over-the-top view.

TALL For the taller rider, this style extends 3 inches above standard while preserving both visibility and protection.

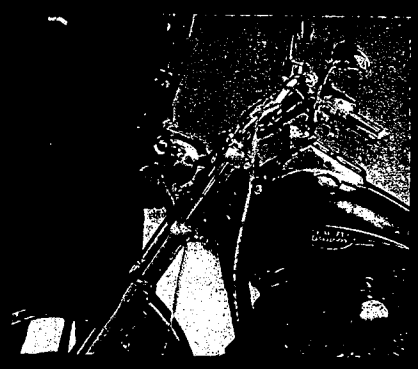


DETACHING A WINDSHIELD
Different trips call for different windshields. And, sometimes, for none at all. That's why most of our shields have a Quick-Release Mounting System. The patented hardware locks onto the fork tubes in seconds for a wind-fighting grip and then off for a clean, custom look.

Decide which windshield is best for the trip. Consider height, shape, and overall style.



With the clamps unlocked, position the windshield on the fork tubes.



Snap the clamps closed with your fingers. Now you're ready for whatever the open road throws at you.

A Plan For The Long Haul

When you're in the middle of a cross-country road trip, turning around isn't an option. You need to be prepared, but not overloaded. You want to travel lightly, but not helplessly. But there is a solution: Harley-Davidson® touring accessories. Saddlebags, racks and touring luggage can turn any bike into a long distance runner, and the patented Detachable accessories let you strip your bike down once you get there.

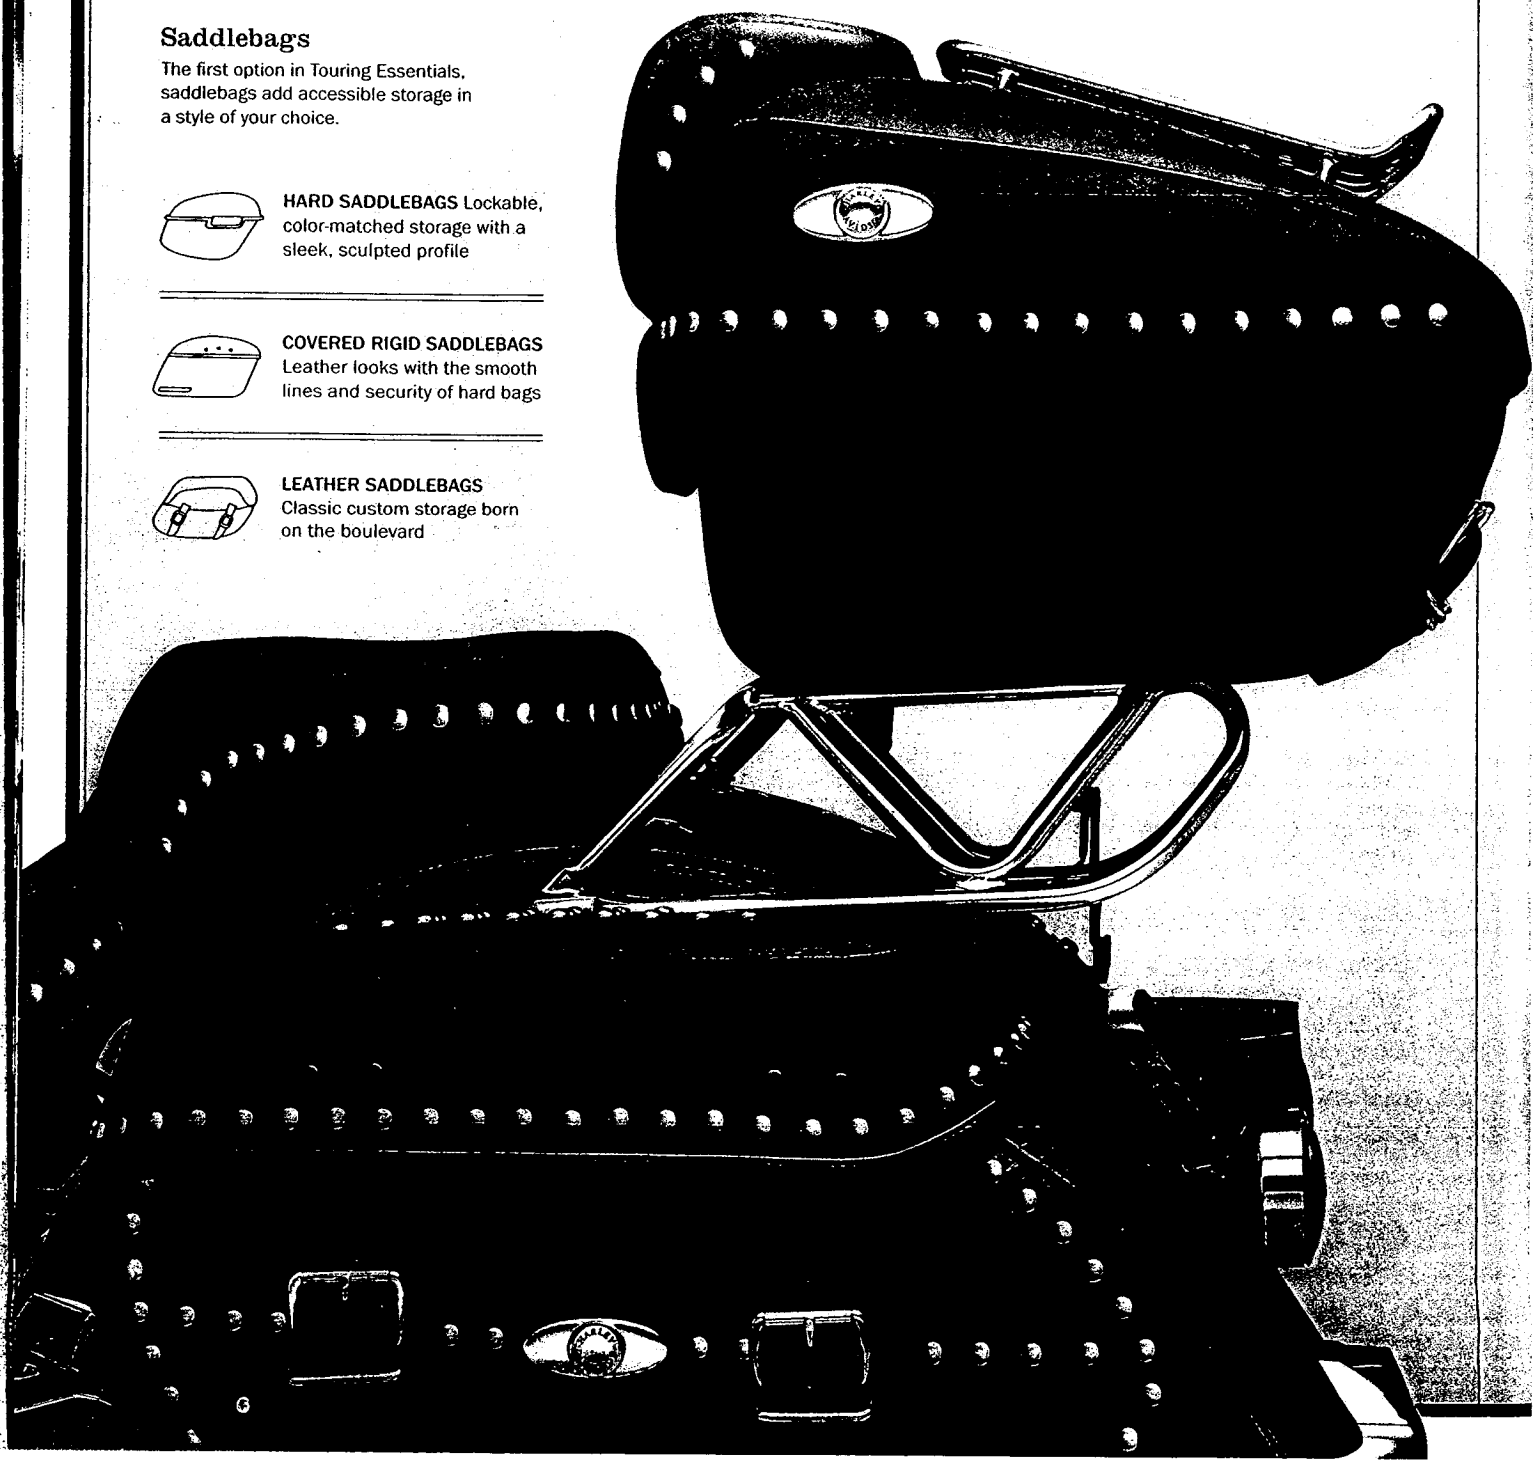
Saddlebags

The first option in Touring Essentials, saddlebags add accessible storage in a style of your choice.

HARD SADDLEBAGS Lockable, color-matched storage with a sleek, sculpted profile

COVERED RIGID SADDLEBAGS Leather looks with the smooth lines and security of hard bags

LEATHER SADDLEBAGS Classic custom storage born on the boulevard

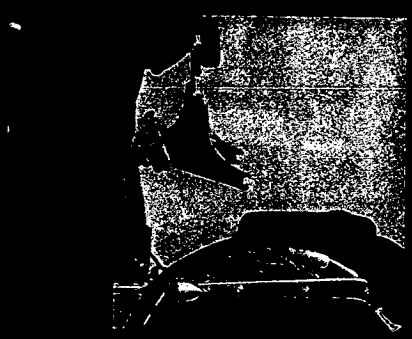


DETACHING A BACK REST
A detachable sissy bar upright and passenger backrest is the starting point to build a complete touring machine. The backrest provides long-range comfort and support while adding a feeling of control and confidence for the passenger. Once the Docking Hardware Kit is installed, adding or removing a Detachable accessory is a simple "slide and click" proposition.

Rotate the cam-lock Detachable Latch to release the rack or sissy bar from the docking points.

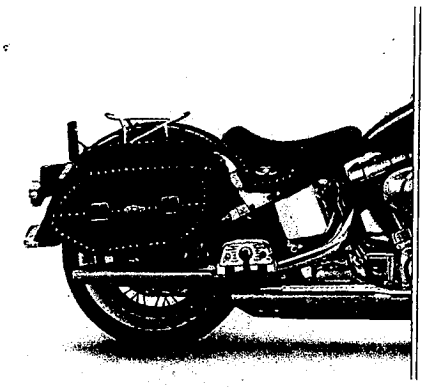
Pivot the rack or sissy bar forward to clear the rear docking points.

Lift the rack or sissy bar free from the front docking points. Mission accomplished.

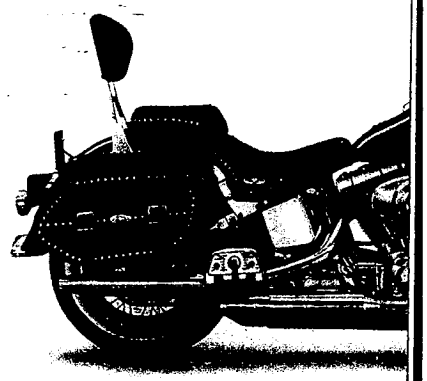


Choosing Touring Essentials

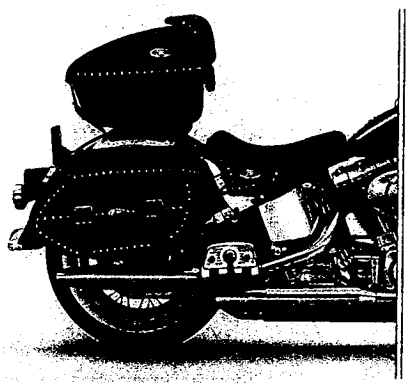
A solo commute to work, or a two-up run across the country; different journeys demand different equipment. Harley-Davidson® Detachable Docking Hardware makes the conversion a simple proposition. Strip the bike down to the bare essentials for a night on the town, and load it up with a Tour-Pak and Saddlebags for a week on the road. When selecting the right touring package, you have just two questions to answer: how far are you going and who's going with you.



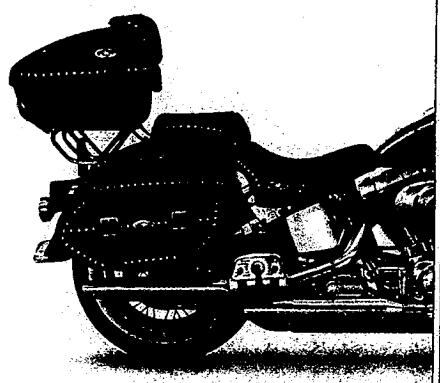
SOLO Go it alone in style. Saddlebags hold a change of clothes, a rain suit, and the basic travel gear, and a Solo Rack and soft bag can store any souvenirs you pick up along the way.



TWO-UP Take a day's ride on a bike built for two. Saddlebags carry clothes and the essentials, while a Sissy Bar backrest pad provides hours of passenger comfort on the open road.



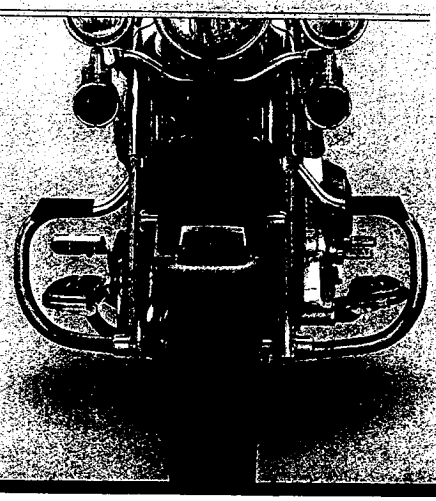
SOLO TOUR-PAK® Ride like you're on a mission. The Saddlebags and Tour-Pak offer tons of storage space, and the Solo Mounting Rack positions the Tour-Pak pad for maximum rider back support.



TWO-UP TOUR-PAK® The ultimate road trip. With all this space and comfort, you and one lucky passenger are fully equipped to go wherever you want, for as long as you want. See you later.

Stretch Your Legs

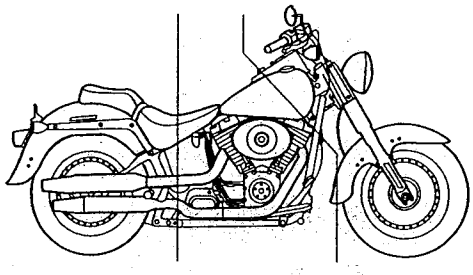
Re-positioning your feet during a long ride relieves muscle tension and strain, and reduces rider fatigue. The Mustache Engine Guard with integrated rubber pads offers a comfortable and slip-resistant cushion for your feet while traveling the open road.



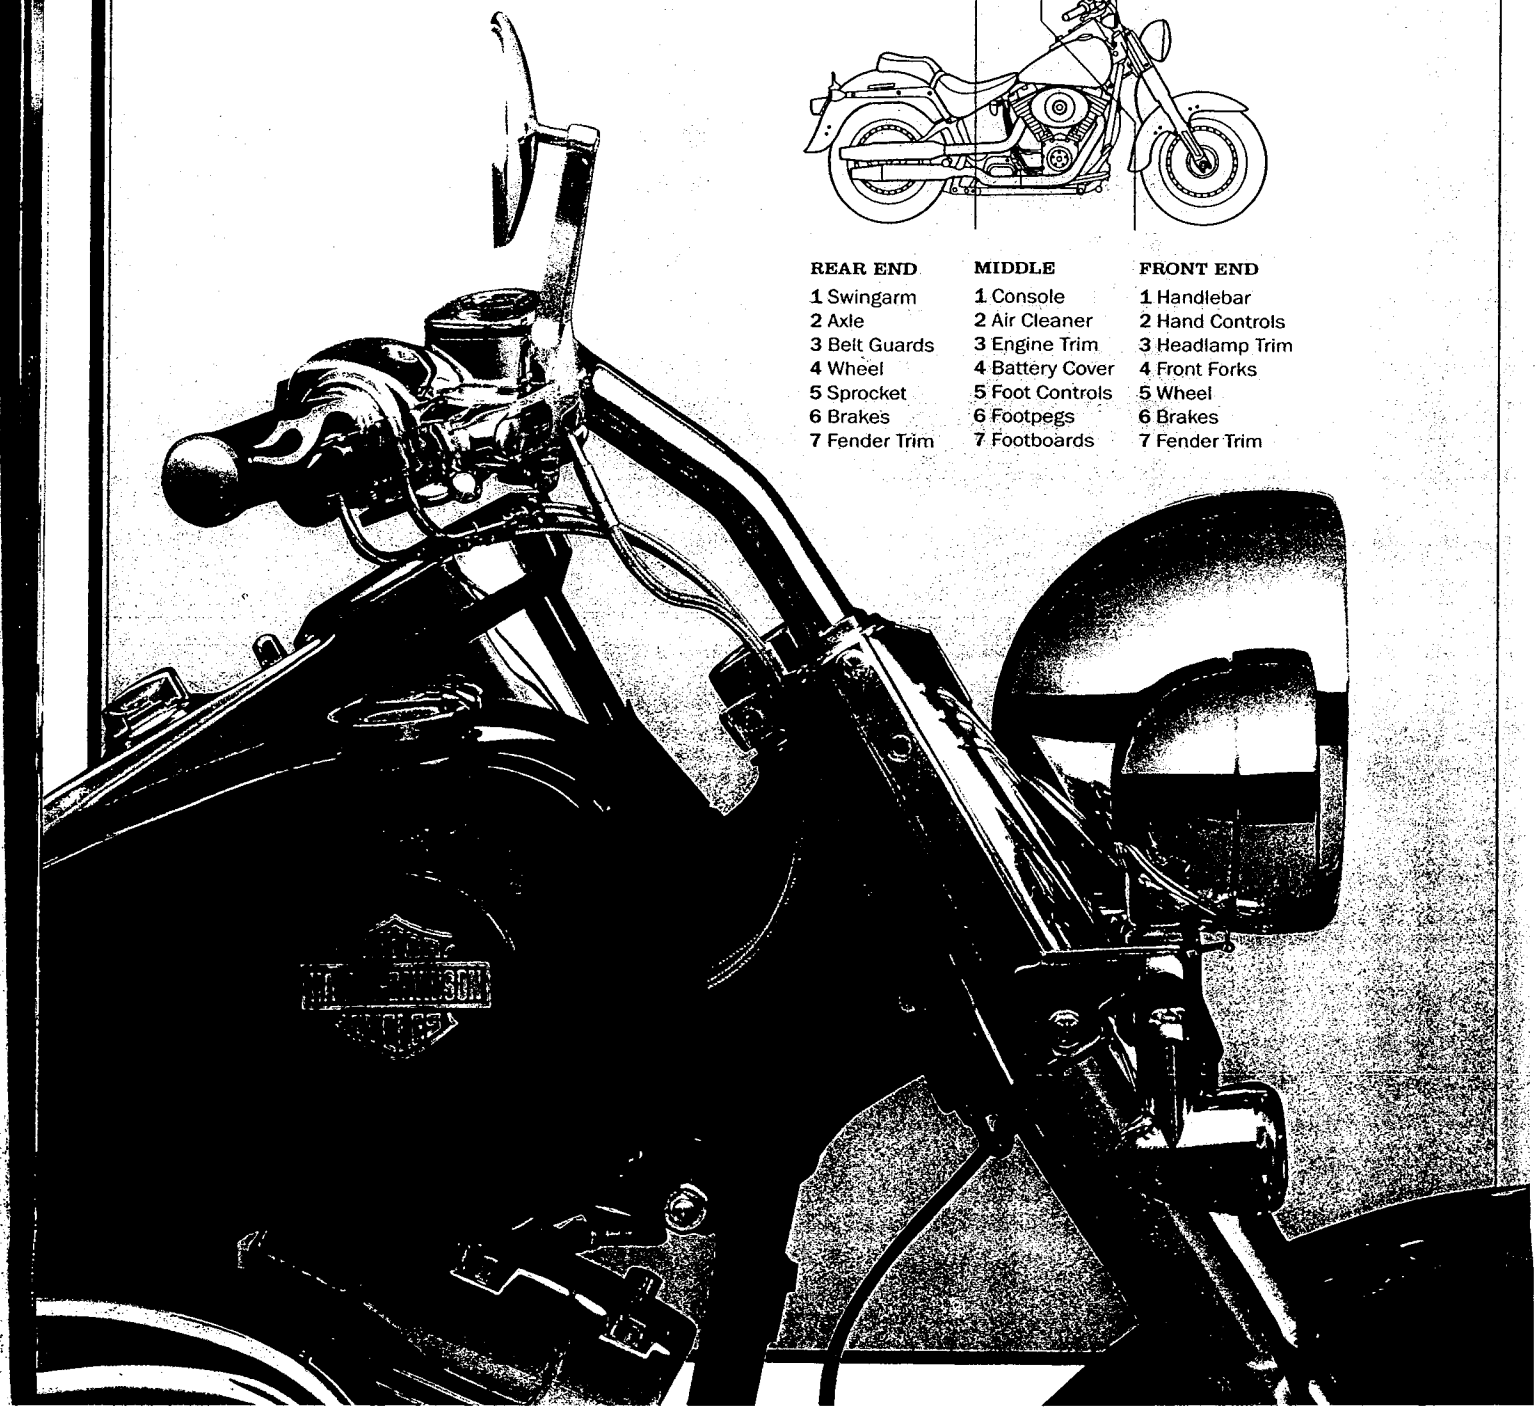
It's Time For Some Serious Reflection

The flash of chrome. It's the first thing that everyone sees. And the one thing that everyone remembers. Luckily, planning a chrome strategy isn't as hard as you think. First, divide the parts of the bike into three regions: front, middle, and rear. Next, use the largest parts in each region to establish a general theme. Finally, bring the smaller pieces into the theme until your custom strategy is complete.

The Breakdown



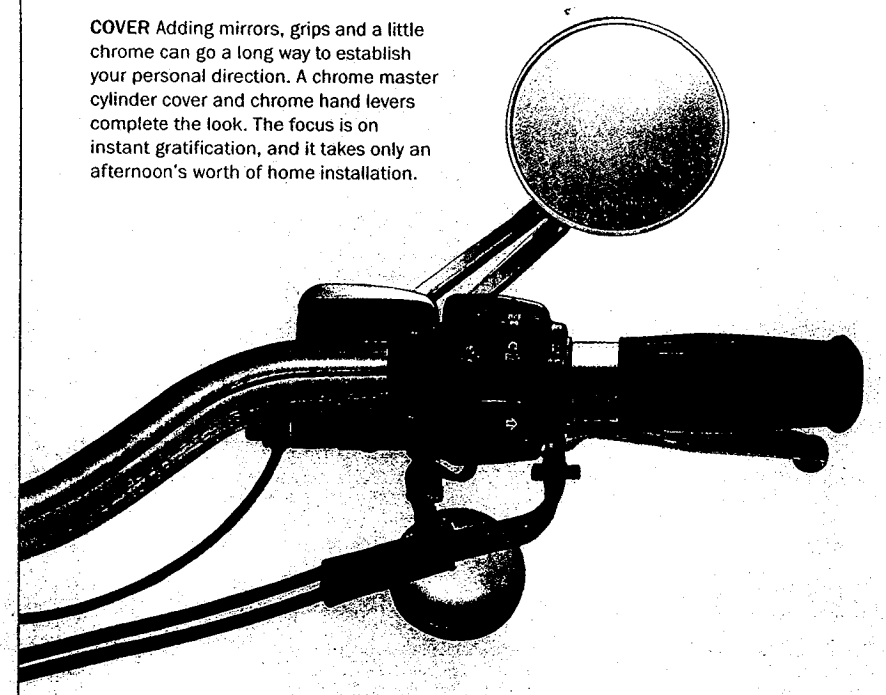
REAR END	MIDDLE	FRONT END
1 Swingarm	1 Console	1 Handlebar
2 Axle	2 Air Cleaner	2 Hand Controls
3 Belt Guards	3 Engine Trim	3 Headlamp Trim
4 Wheel	4 Battery Cover	4 Front Forks
5 Sprocket	5 Foot Controls	5 Wheel
6 Brakes	6 Footpegs	6 Brakes
7 Fender Trim	7 Footboards	7 Fender Trim



Two Ways to Customize

You can pursue your chrome strategy in two ways: "cover" or "custom". The Cover strategy focuses on adding decorative trim to stock components. It's quick, it's convenient and, in many cases, you can handle installation by yourself. The Custom strategy is more in-depth. It focuses on replacing Original Equipment parts with custom versions. This method offers many choices and a true "one-of-a-kind" look, but may require installation by a certified Harley-Davidson® technician.

COVER Adding mirrors, grips and a little chrome can go a long way to establish your personal direction. A chrome master cylinder cover and chrome hand levers complete the look. The focus is on instant gratification, and it takes only an afternoon's worth of home installation.

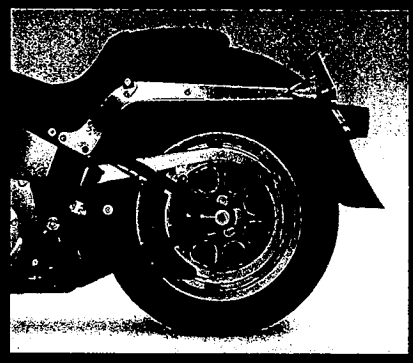


CUSTOM Every aspect is open to change. Combining chrome and custom replacement parts create a truly unique look and feel. A chrome master cylinder kit, a set of chrome switch housings, custom grips, and braided control cables finish the custom installation.

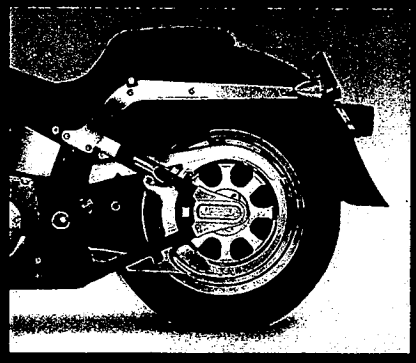
CONVERTING TO CHROME

Replacing Original Equipment painted or polished parts with chrome will dramatically change your bike's overall look. And because your motorcycle's front forks and rear swingarm live to be dressed in chrome, it's a great place to start your custom conversion.

From the Factory, quality painted and polished surfaces mix with chrome for a great starting point.



Chrome belt guards and sprocket, axle and pivot covers provide a custom look for a small investment.



Go all in with a chrome swing arm, wheel, sprocket, pivot, belt guard and hardware.

A TOURING

The Comfort Zone

Handlebar, seat and suspension choices work together to dictate your riding position. So it's crucial to select accessories based not solely on looks, but also on how they fit your body and riding style. While there's a wide range of postures you can achieve with different accessory combinations, the Reduced Reach and Extended Reach configurations below are designed as a starting point for riders whose inseams and armspans may differ from those of the average person. And because every rider fits their bike differently, remember to consult the professionals at your Harley-Davidson® dealer for additional options.

Seat of Authority

If we've said it once, we've said it plenty. A big part of being comfortable on your Sportster® motorcycle is choosing a saddle that fits your body and your preferred riding position. But as any good customizer knows, the key is balancing comfort considerations with the style factor. At Harley-Davidson, we've created a far-reaching selection of custom seats that allow you to get exactly what you want and need from a saddle. Which means you owe it to yourself to get familiar with the options, so you make an informed decision. And as always, seats are easily swapped—so you can have any number of seats on hand to match the road that lies ahead.

*WARNING: Installation of any accessory suspension components may affect cornering clearance and jiffy stand operation. This could distract the rider, causing loss of control and death or serious injury.

Custom Seat Collection

The very latest from the Harley-Davidson® Custom Seat Collection, these saddles combine superior construction with radical styling to give you the ultimate custom accessory. With contoured foam padding for added long-haul comfort, each seat is made from top grain leathers for superior wear and attitude with age. The smooth-flowing design leaves no doubt about your attention to custom detail. Seat pans are constructed from hand-laid fiberglass for extra durability, and carpeted to protect your paint finish. When it's time to flex your custom muscles, the Harley-Davidson Custom Seat Collection has the style you're after.

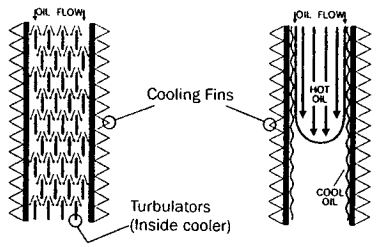
A. Premium Oil Cooler for Sportster® Models

This product brings touring model cooler technology to the Sportster. This vertical-mount cooler features a unique "Turbulator" system that efficiently distributes oil across the cooling chambers. The air fins feature several louvers to efficiently dissipate heat. The premium oil cooler has been designed for ease of installation, and features an adapter plate that allows oil lines to connect to the oil filter bracket. Kit includes oil cooler, oil filter mount, oil lines and mounting hardware.

62996-04 Fits '82-later XL models. **$269.95**

Inside View of Premium Oil Cooler with Turbulators

Inside View of conventional Oil Cooler without Turbulators



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.
