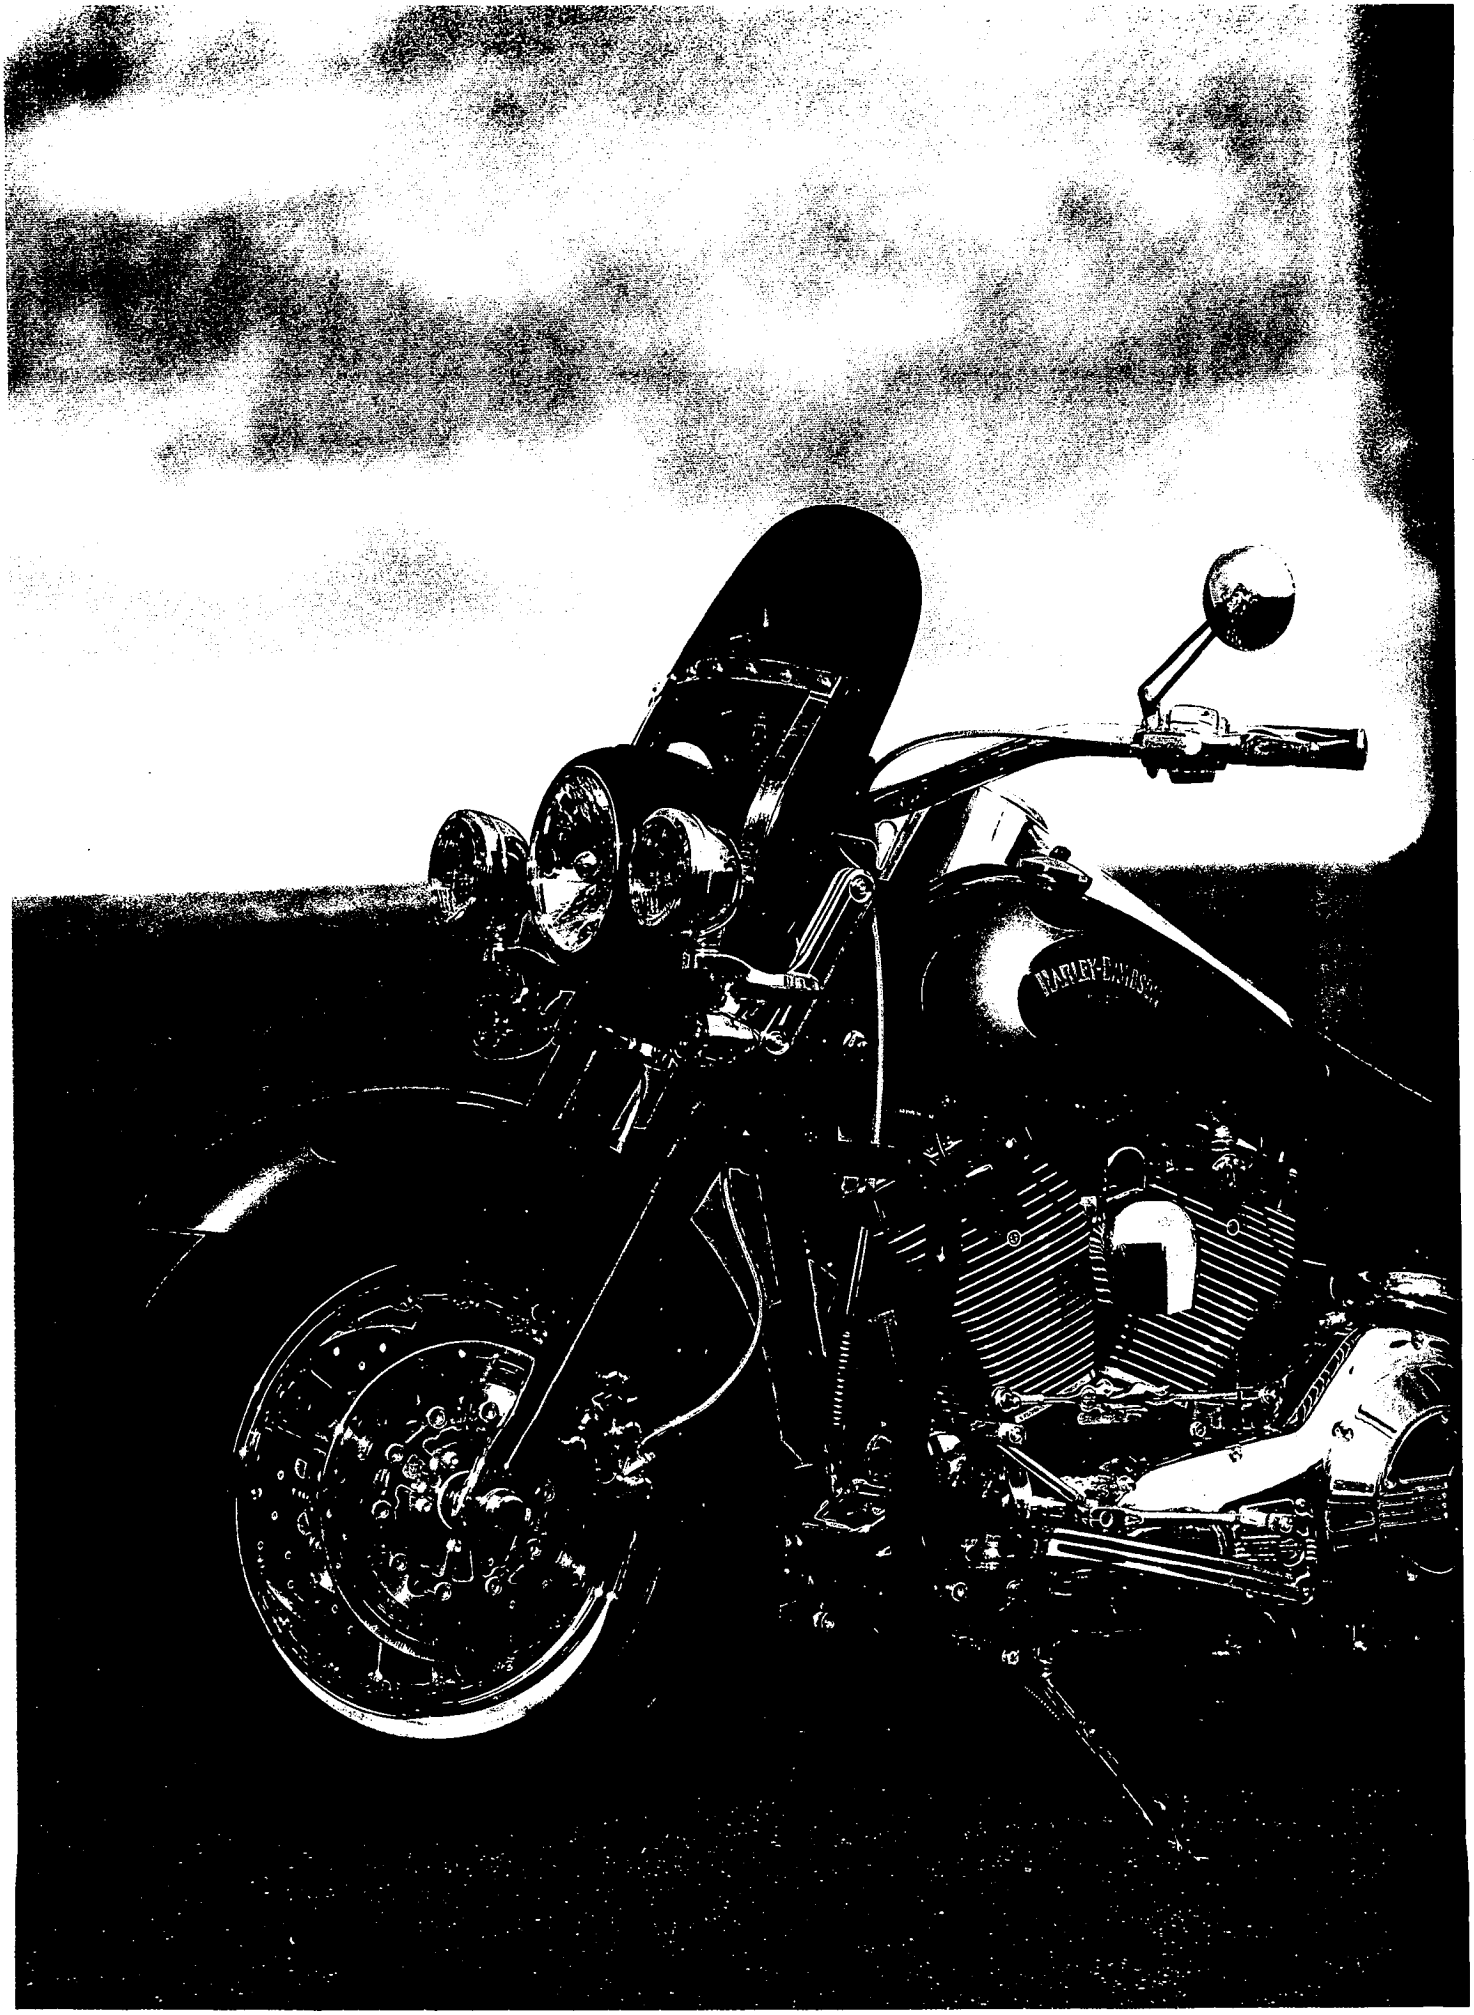
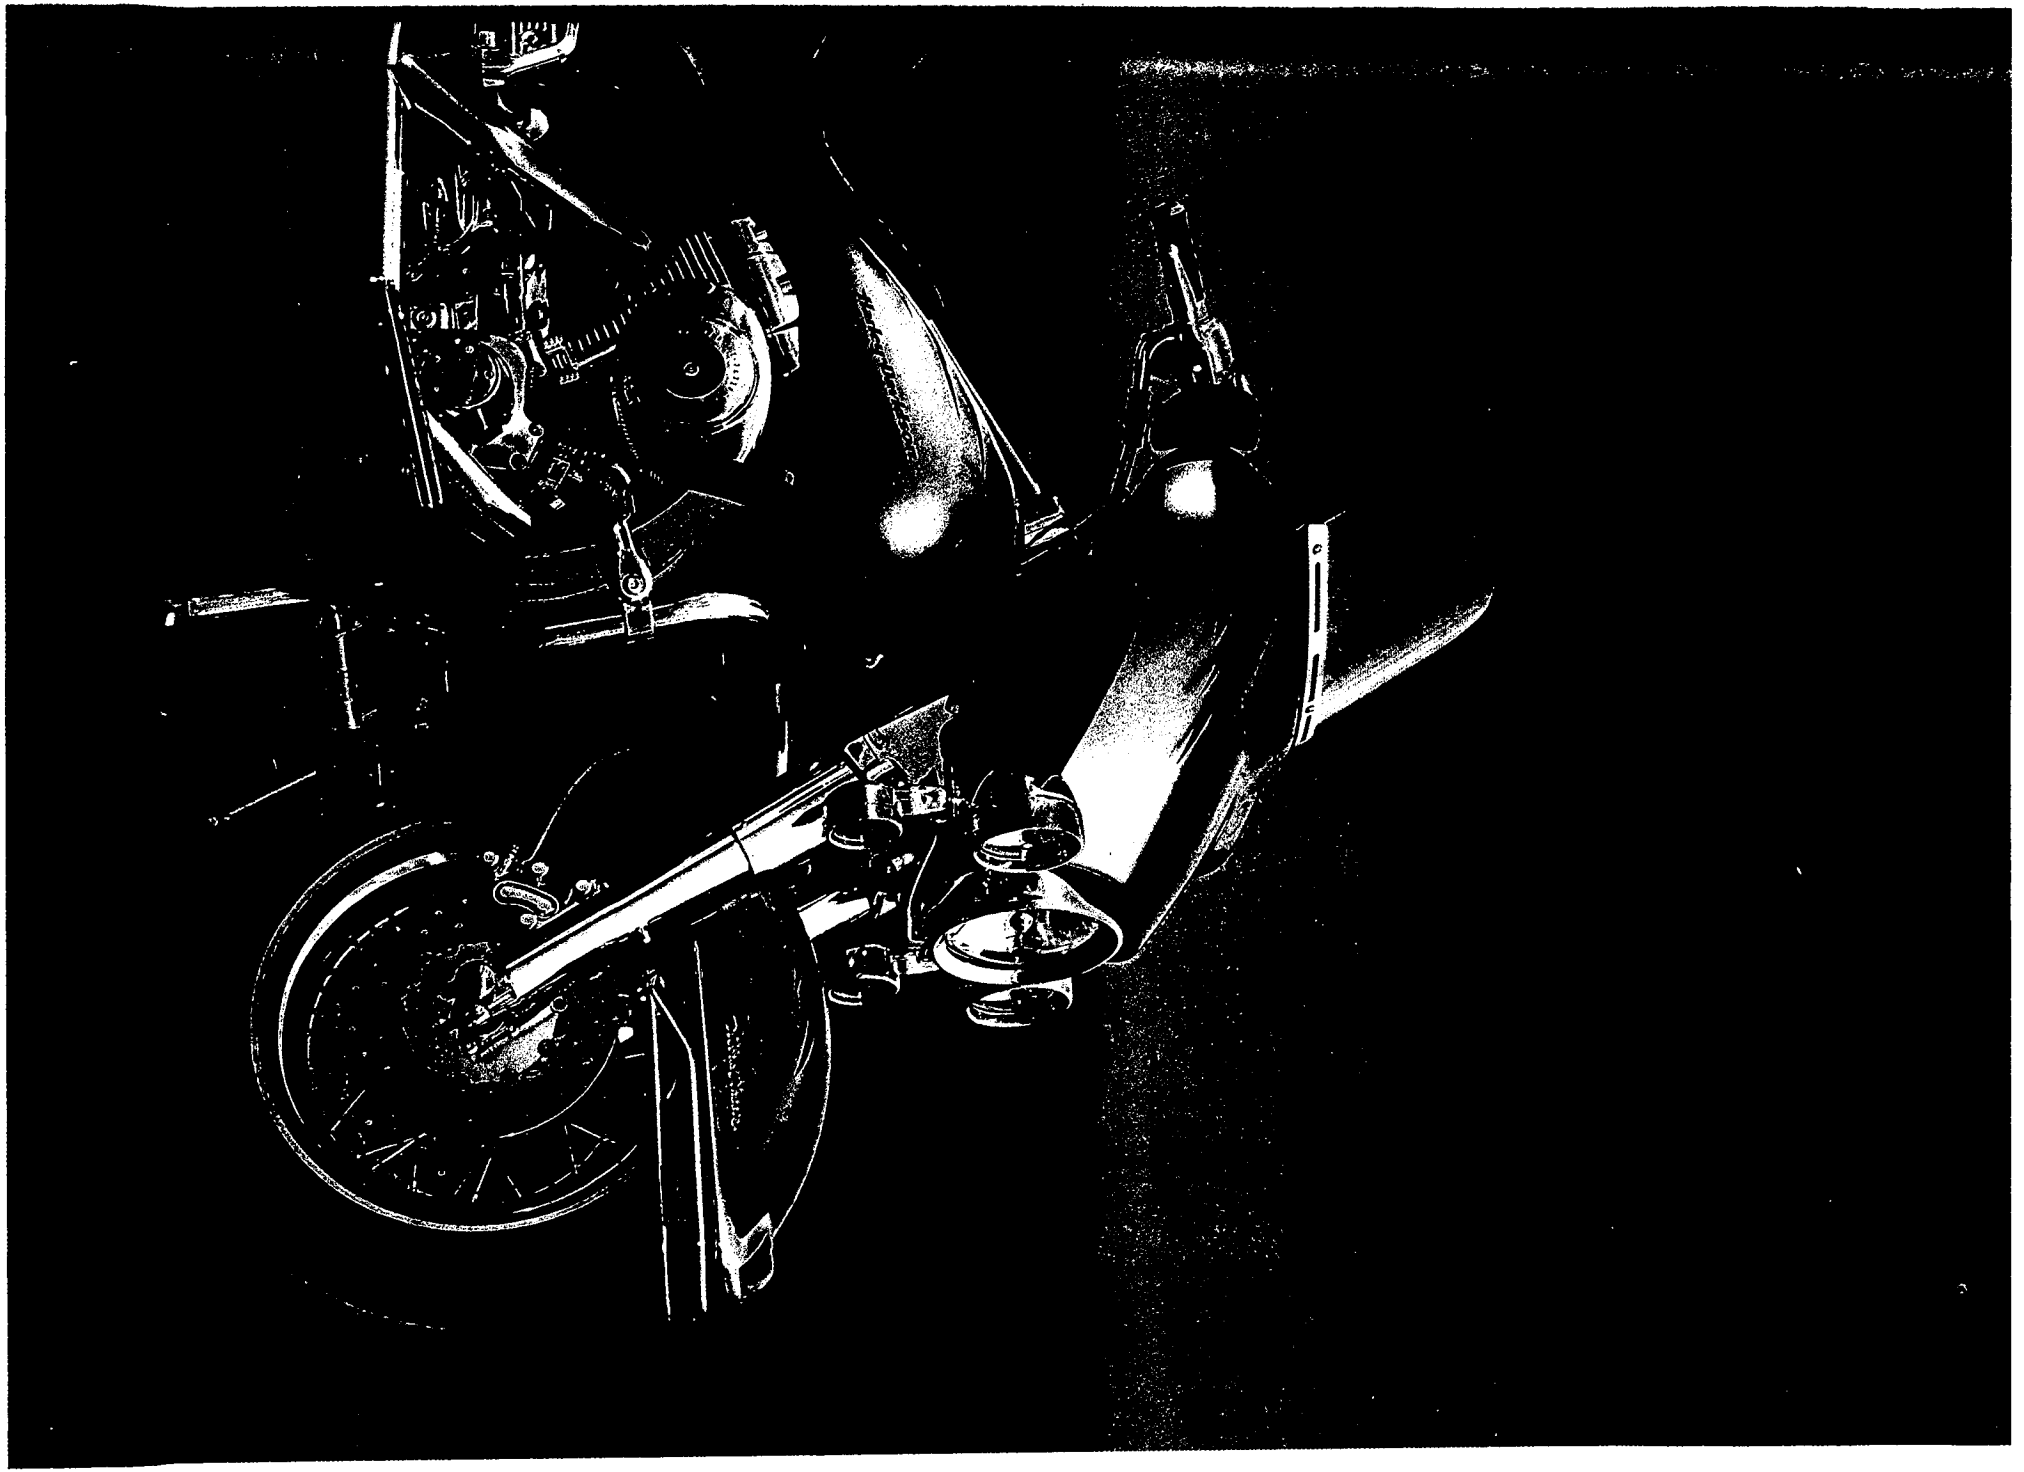
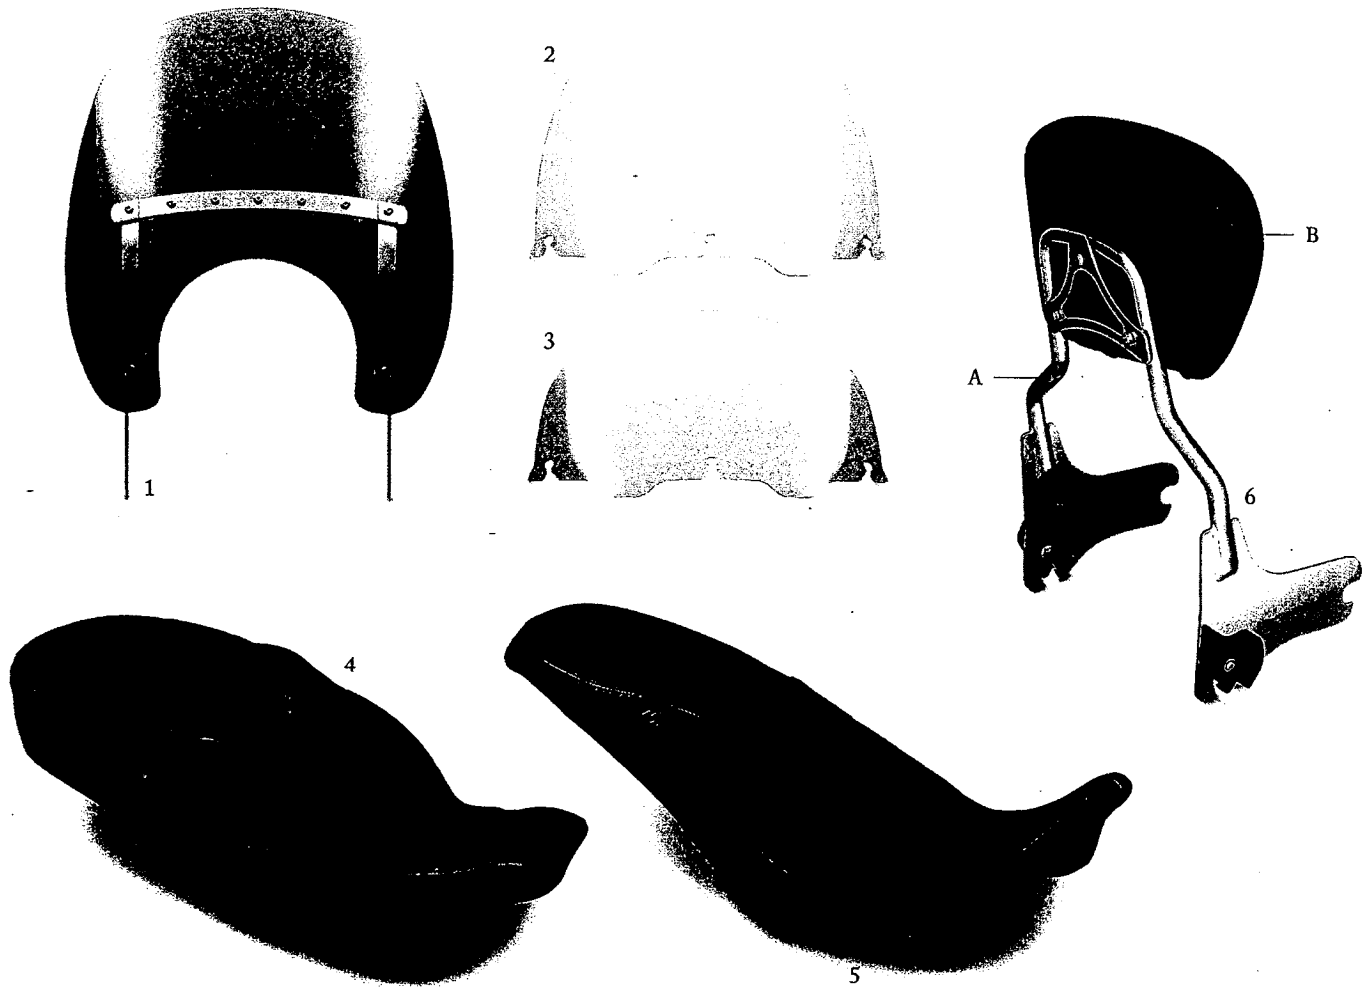
HARLEY-DAVIDSON





OFF AND RUNNING

While Touring models are built to make the miles disappear, they're also capable of packing a custom punch that can bring a boulevard cruiser to its knees—all that's needed are the right accessories and an active imagination.



WHEN THE WIND BLOWS

As the owner of a Touring model, you're probably well aware of the benefits a windshield can provide on the open road—like helping to reduce rider fatigue and protecting you from the elements. But you may not know that you have numerous custom windshield options with which you can make the most of every mile. For models with fairings, there's a range of heights available in clear, smoked and lightly smoked styles. And if you ride a Road King® model, you can pick from various sizes and looks, including an Adjustable Height design that lets you tailor your windshield height to match your riding needs.

1. Windshield — *Oversize Wind Deflector, Smoked*
2. Windshield — *Electra Glide® Tall, Clear*
3. Windshield — *Electra Glide® Low, Lightly Smoked*

SITTING PRETTY

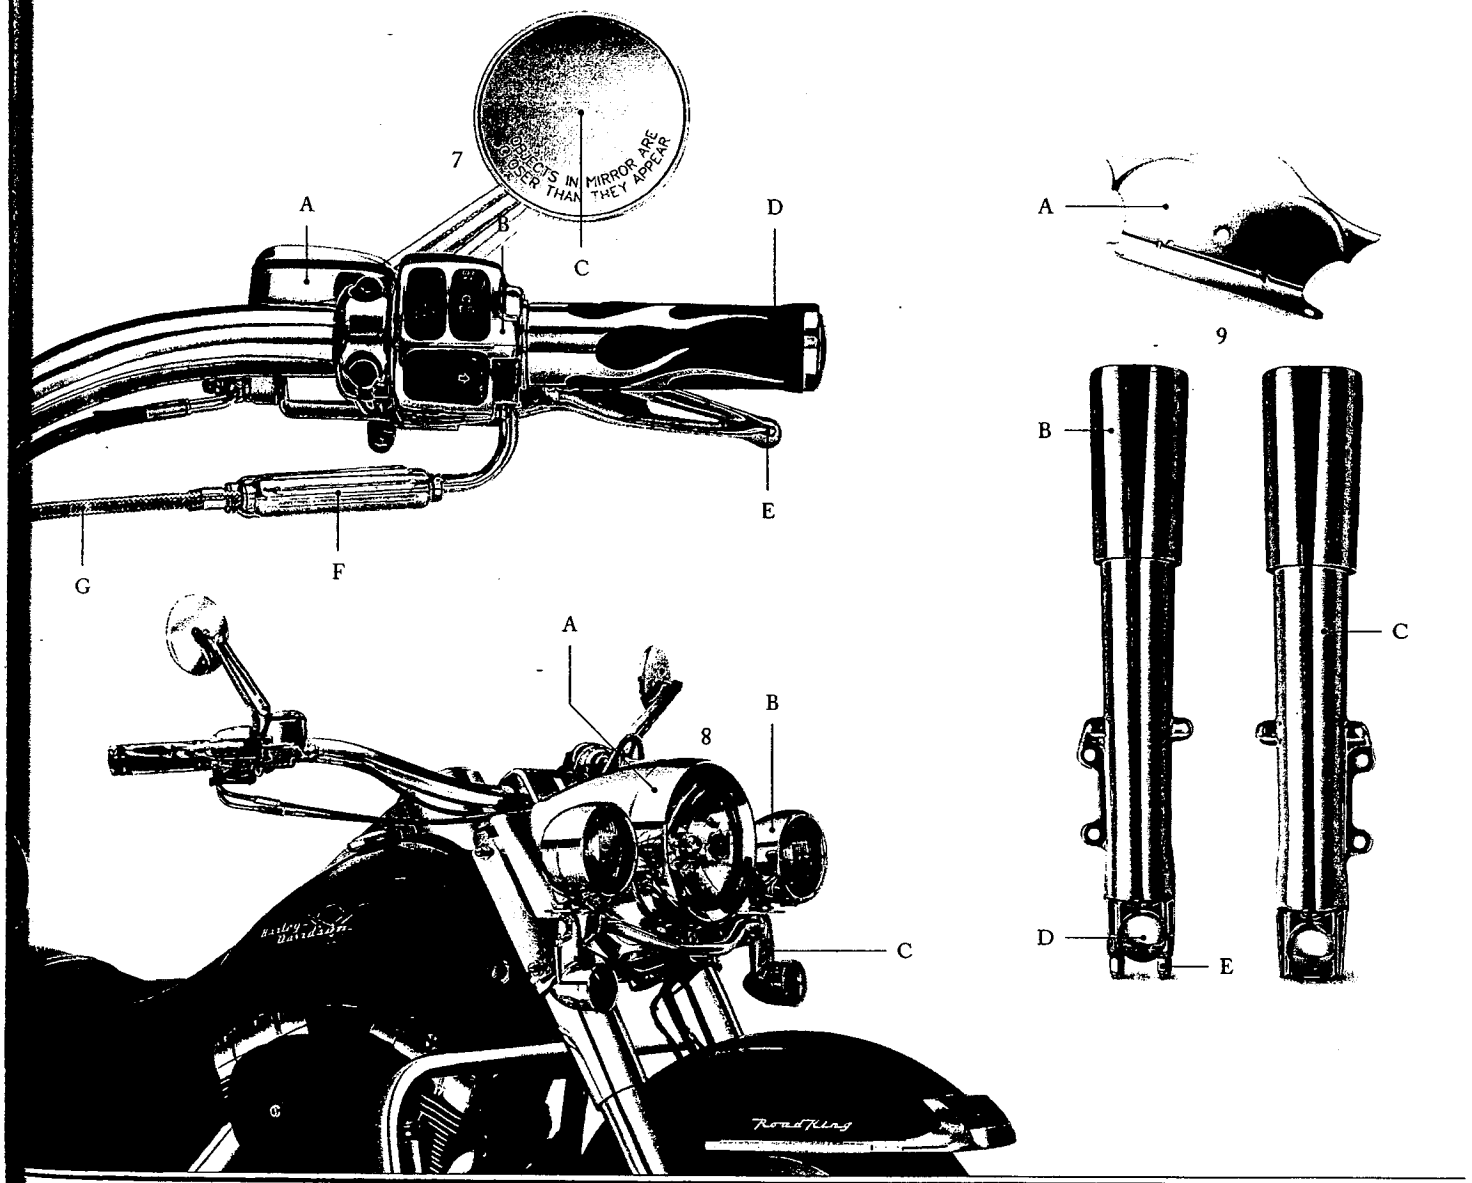
Just because you ride a Touring model doesn't mean your saddle has to be solely about comfort. With a Brawler™ solo or low-profile Badlander® seat, you can achieve a look that's right at home on the boulevard. Or you can opt for a deep-bucket Sundowner™ or Comfort Stitch style for spending serious time in the saddle, and add a Rider Backrest for extra back support. For the maximum in comfort, the air-adjustable Road Zeppelin® Seat has no equal. And there's also our Reach™ Forward-Position and Tallboy™ saddle designs to accommodate riders of every size.

4. Seat — *Tallboy™*
5. Seat — *Reach™ Bucket Seat*

TAKE IT BACK

For Electra Glide® Standard and Road King® models, the addition of a Detachable Sissy Bar Upright and Backrest Pad for the times when you ride two-up is an attractive proposition. For a little extra storage, you could make a Detachable Luggage Rack part of the equation. Or you may want to go with a Chopped Tour-Pak® on a Detachable Tour-Pak Rack, which provides more cargo capacity, fast installation and removal, and back support for a passenger.

6. Two-Up Touring Accessories
   A. Upright — *Detachable Passenger, Chrome*
   B. Backrest Pad — *Low-Profile Passenger, Leather*



UP FOR GRABS

When it comes to customizing, your bike's hand control area has a lot of things going for it: high visibility, simple accessory installation and immediate results. All of which makes a strong case for giving this part of your bike some serious consideration. And one more thing—you'll also find that most hand control accessories won't make a major dent in your customizing budget.

7. Hand Control Area
   - A. Chrome Master Cylinder Kit — *Clutch and Brake*
   - B. Switch Housing Kit — *Chrome*
   - C. Mirror — *Dome, Billet*
   - D. Grips — *Flame*

   - F. Throttle/Idle Cable Adjuster Covers — *Chrome*
   - G. Control Cables — *Braided Stainless Steel*

BRIGHT LIGHTS

Whether you're in the big city or miles from nowhere, auxiliary lighting can serve as a shining example of your custom commitment. If your Touring model is already blessed with passing lamps, you can upgrade the look with smoked bulbs, and add Chrome Trim Rings to your headlamp and auxiliary lamps—or go with a Custom Auxiliary Lamp Bracket Kit for sleek, custom style. If your Touring model is passing-lamp free, step up to the plate with an Auxiliary Lamp Kit. And don't forget about Chrome Bullet Turn Signal Kits and colored lenses to complete the custom effect.

8. Accessory Lighting
   - A. Headlamp Trim Ring — *Chrome*
   - B. Passing Lamp Trim Rings — *Chrome*
   - C. Turn Signal Kit — *Bullet*

SLIDE SHOW

Your Touring model was blessed with a beefy front end that longs to be dressed in chrome. And there's much more to it than just the forks. From Chrome Lower Triple Tree Covers and Axle Nut Covers, to Chrome Wheel Spacers and Axle Retainer Nuts, you've got genuine options to help you customize the whole package. We've even created special accessory packages that include all the parts you'll need to get there.

9. Front End Accessories

   - B. Upper Fork Slider Covers — *Chrome*

THE COMFORT ZONE

Handlebar, seat and suspension choices work together to dictate your riding position. So it's crucial to select accessories based not solely on looks, but also on how they fit your body and riding style. While there's a wide range of postures you can achieve with different accessory combinations, the Reduced Reach and Extended Reach configurations below are designed as a starting point for riders whose inseams and armspans may differ from those of the average person. And because every rider fits their bike differently, remember to consult the professionals at your Harley-Davidson® dealer for additional options.

SEAT OF AUTHORITY

If we've said it once, we've said it plenty. A big part of being comfortable on your Touring model is choosing a saddle that fits your body and your preferred riding position. But as any good customizer knows, the key is balancing comfort considerations with the style factor. At Harley-Davidson,® we've created a far-reaching selection of custom seats that allow you to get exactly what you want and need from a saddle. Which means you owe it to yourself to get familiar with the options, so you make an informed decision. And as always, seats are easily swapped—so you can have any number of seats on hand to match the road that lies ahead.

*WARNING: Installation of any accessory suspension components may affect cornering clearance and jiffy stand operation. This could distract the rider, causing loss of control and death or serious injury.

SHEEPSKIN COVER COLLECTION

Made with real sheep's wool that breathes when compressed to improve comfort and eliminate hot weather stickiness. Because it also insulates, wool gives added warmth for cold weather riding. Naugahyde side trim eliminates bulkiness and wrinkles for the sleek look of a custom-tailored seat with sheepskin inserts. A tough bungee cord sewn in the bottom hem provides a custom fit and prevents slipping.

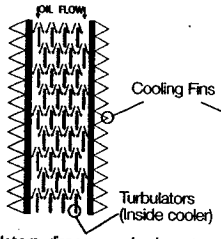
A. PREMIUM OIL COOLER KIT FOR TOURING MODELS

This cooler was designed specifically for Harley-Davidson to out-perform all other coolers in the industry. This cooler features a unique "Turbulator" system that evenly distributes oil across the cooling chambers. The air fins are designed to efficiently dissipate heat. This popular Touring oil cooler has been re-designed to simplify installation and enhance performance. The larger heat exchanger provides additional cooling efficiency. Kit features an adapter plate with integrated thermostat that allows oil lines to connect to the oil filter bracket. Kit comes complete with mounting hardware and precut oil lines.

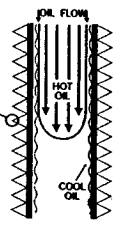
26082-05 Fits '99-later Touring models. Does not fit with Chrome Display Stand P/N 99002-97A or models equipped with sidecars. **$289.95**

INSIDE VIEW OF PREMIUM OIL COOLER WITH TURBULATORS



Turbulators disperse and mix oil inside cooler to provide more efficient cooling capabilities. The cooler oil is not allowed to remain along the boundaries of the flow tube as in conventional coolers.

INSIDE VIEW OF CONVENTIONAL OIL COOLER WITHOUT TURBULATORS



Coolers without the Turbulator system allow oil to flow only in a straight path. Oil does not mix and the cooler oil remains along the outer boundaries, while the hotter oil remains along the center path of flow. Without the mixing effects of the Turbulators, the conventional oil cooler provides less efficient cooling capabilities.

B. SUPER PREMIUM OIL COOLER KIT

This Touring Oil Cooler Kit provides a clean look and efficient cooling for Twin Cam-equipped models. First offered as Original Equipment on the '03 Screamin' Eagle® Road King® model, the oil lines of this Cooler Kit attach to a unique Oil Filter Mount at the front of the engine, eliminating long hoses that run to the oil tank. The black painted Oil Cooler is available with your choice of Chrome or Silver-finish Oil Filter Mount to complement Silver or Black & Chrome engines.

SCREAMIN' EAGLE® RACING UPDATE

Dominating the Gatornationals to open the 2004 season, the Screamin' Eagle® Pro Stock Drag Team rocketed its way to victory, marking the first time a V-Twin-powered motorcycle has won an NHRA Pro Stock Bike event. The win set the tone for the rest of the season, which so far has also included a victory in Columbus, OH, and a trip to the finals in Chicago. Don't miss your chance to cheer on riders Andrew Hines and G.T. Tonglet as they make racing history.

In May, H-D® factory flat track racer Rich King won the prestigious Springfield Mile for the third straight time, as legendary factory tuner Bill Werner earned his 150th career win—a fitting end to a storied career that has spanned nearly 40 years and produced 13 AMA Grand National Championships.

With four Screamin' Eagle® classes in its Screamin' Eagle®-sponsored championship series, the AHDRA lets you experience all drag racing has to offer, whether you're there as a spectator or a competitor. If you're up to the challenge, set your sights on the AHDRA® Screamin' Eagle® Las Vegas High Stakes Shootout, starting October 23, 2004 at Las Vegas International Speedway. It's open to all riders with an AHDRA membership and a bike sporting a Harley-Davidson® VIN. Plus, there's a $12,000 first-place prize for the taking. And if winning is part of the plan, you can get it done with Screamin' Eagle® Pro Racing Parts—premium competition and performance parts engineered for racing. F. SCREAMIN' EAGLE 6 SPEED TRANSMISSION AND GEAR SET

F. SCREAMIN' EAGLE® 6 SPEED TRANSMISSION AND GEAR SET

This new 6 speed transmission has been designed from the ground up to be the best accessory transmission for Harley-Davidson® motorcycles. The Screamin' Eagle transmission incorporates many of the best Original Equipment features, like late-style shifting mechanism and a newly designed "shift ring" system to make this the smoothest shifting Harley-Davidson transmission available. The "shift ring" system is similar to the system used in the V-Rod® transmission, and it slides on the shafts to mate into the gears. This eliminates sliding heavy gears to accomplish the shift, and results in smooth, precise and light effort shifting.

Sixth gear is a true overdrive, at a .89:1 ratio, and the first five gears mimic today's proven 5 speed ratios. The overdrive feature allows you to run a lower engine RPM in sixth gear, at any given road speed. Lower RPM can equate to less vibration, longer engine life and smoother cruising.

The Screamin' Eagle 6 Speed Transmission is available as a complete transmission, or as a complete gear set. All 6 Speed Transmissions feature forged chrome "trap door" and side covers, forged shifter forks, and forged and precisely ground gears. No speedometer or exhaust mount modifications are required. All transmissions and gear sets feature the "Screamin' Eagle" script and a bold "6 Speed" logo laser etched into the transmission side cover. Complete transmissions are delivered fully assembled and ready to install into the chassis. The 6 Speed Gear Set Kits replace the stock gear set in the vehicle without removing the entire transmission. Gear Set Kits include all necessary hardware and require slight modification (template included) to the Original Equipment transmission case.

The Screamin' Eagle 6 Speed Transmission has been tested and validated using the same rigorous procedures that Original Equipment transmissions are subjected to, and is backed by a 12 or 24 month (depending on model year), unlimited mileage warranty when installed at the time of a new bike purchase.

The Screamin' Eagle 6 Speed Transmission is available as a complete transmission, or as a complete gear set. All 6 Speed Transmissions feature forged chrome "trap door" and side covers, forged shifter forks, and forged and precisely ground gears. No speedometer or exhaust mount modifications are required. All transmissions and gear sets feature the "Screamin' Eagle" script and a bold "6 Speed" logo laser etched into the transmission side cover. Complete transmissions are delivered fully assembled and ready to install into the chassis. The 6 Speed Gear Set Kits replace the stock gear set in the vehicle without removing the entire transmission. Gear Set Kits include all necessary hardware and require slight modification (template included) to the Original Equipment transmission case.

The Screamin' Eagle 6 Speed Transmission has been tested and validated using the same rigorous procedures that Original Equipment transmissions are subjected to, and is backed by a 12 or 24 month (depending on model year), unlimited mileage warranty when installed at the time of a new motorcycle purchase.

ENGINE PROGRAMS

MOTOR SKILLS

Your engine is the heart of your Harley-Davidson® motorcycle—the machinery that gives your bike its signature look, feel and sound. So we've developed three affordable engine programs that allow you to have your aging motor remanufactured to original factory specifications, or replaced with a brand new, bona fide Harley-Davidson powerplant with a brilliant factory finish.

ENGINE REMANUFACTURING

FOR EVOLUTION® 1340 AND TWIN CAM® ENGINES

When the miles start to add up, the Harley-Davidson® Engine Remanufacturing Program can put the rumble back into your powerplant simply, quickly and affordably. The program is available for the Evolution® 1340, Twin Cam 88,® Twin Cam 88B™ and Twin Cam 95™ engines. Contact your dealer for more information.

STEP 1: SHIPPING

Your Harley-Davidson dealer will remove your engine and ship it to our Capitol Drive facility, in Milwaukee, where it will be unpacked and prepped for disassembly.

STEP 2: DISASSEMBLY

Engine parts that can be remanufactured to original specs are saved, while others are discarded. All reusable parts are cleaned and powder coated.

STEP 3: REMANUFACTURING

Reusable parts are machined, rehoned and rebored to exact tolerances, and then passed through rigid specification checks. If they make the cut, they go on.

STEP 4: REASSEMBLY

Crankcases are set, bearings pressed and parts reassembled. Chromed and polished parts are replaced. And your engine is upgraded to meet the latest specifications, where possible.*

STEP 5: TESTING AND DETAILING

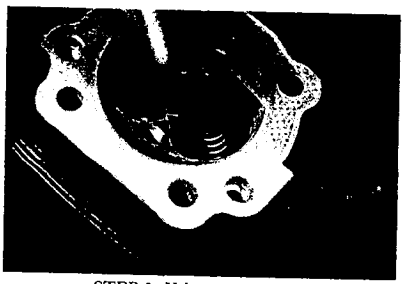
Your engine is hot-tested to Harley-Davidson standards. If it passes, it receives a one-year unlimited mileage factory warranty. Then, after a final round of cleaning and polishing, your engine is packed for shipping.

STEP 6: REINSTALLATION

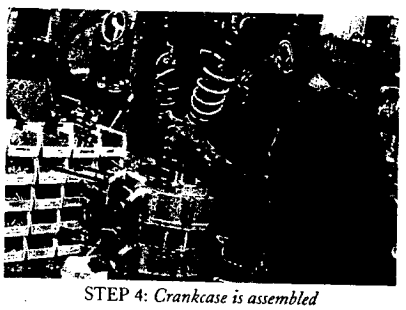
About two weeks after it left, your engine—bearing its original Vehicle Identification Number (VIN)—will return to your dealer, who will reinstall it.

**For compliance and warranty purposes, all engines will receive stock camshafts. If you have installed performance cams, you will lose them unless you reinstall the stock versions before your engine is shipped.*

STEP 2: *Engine is disassembled*



STEP 3: *Valve seats are recut*



STEP 4: *Crankcase is assembled*

SMART START

FOR EVOLUTION® 1340 ENGINES

If you'd rather replace your Evolution motor than get it remanufactured, the Smart Start Engine Program offers brand new, Harley-Davidson built and factory-tested Evolution 1340 engines at an unbeatable price—in the standard Silver and Polished or classic Black and Chrome finish. Matching Black and Chrome or Silver Painted Softail® transmissions are also available.

NEW ERA

FOR TWIN CAM® ENGINES

Through the New Era Engine Program, you can purchase a fresh-off-the-line, factory-built and tested Twin Cam 88, 88B, 95 or all-new 103 cubic inch "Stroker" engine manufactured to the latest model year specifications—in a Silver and Polished, Silver and Chrome or Black and Chrome finish. THE "BAR & SHIELD" LOGO COLLECTION

B. THE "BAR & SHIELD" LOGO COLLECTION

The "Bar & Shield" Collection from Harley-Davidson transports your ride to a new dimension. The custom die-cast, three-dimensional design combines mirror chrome and fine pebble grain finishes to create a pallet of complementing reflections. The raised designs are polished to highlight the details, and the "ball-milled" groove style recesses add a feeling of forward motion. From the workshop of Wyatt Fuller.

HEATED HAND GRIPS

Keep comfortable on those cool morning or frigid night rides. Warm hands have a major impact on overall body comfort, and sometimes gloves just aren't enough. These thermostatically controlled grips have variable heat settings and automatic temperature monitoring to adjust to changing ambient temperatures. The grips remain at a constant temperature regardless of changes in outside temperatures. The self-contained control circuit and control knob means you have no additional switches or controller boxes to mount, and the grips are switched on/off with the ignition to avoid draining your battery. The glueless grip design allows grip removal if you change handlebars or motorcycles. Patent pending.

HANDLEBAR BASICS*

Bars communicate style and also affect how you handle your bike. You want to select a handlebar that puts your arms in a position that matches both the attitude you want to convey and the kind of riding you expect to do. While every handlebar has its own distinct measurements and characteristics, there are four basic styles to consider in your quest for custom-styled comfort:

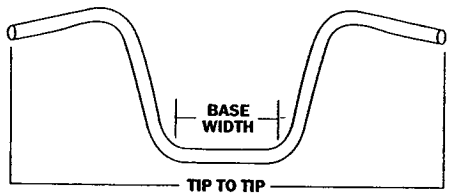
APE HANGERS
Pure custom attitude, best suited for boulevards and long straightaways.

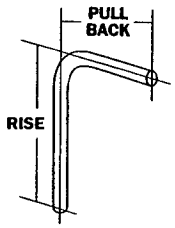
DRAG BAR
A flat, no-nonsense handlebar for an aggressive riding style.

SPORT BAR
Lower and wider bar for a slightly upright, forward leaning position.

PULL BACK
Brings handgrips closer to the body for a more upright riding posture.

HANDLEBAR MEASUREMENTS





Rise is the vertical distance between a handlebar's tip and its base. Adding risers to bars that sit low can help put hand grips in a higher spot.

Pull Back brings hand controls closer while also lowering grip height. More pullback facilitates an upright posture, and suits riders with a shorter reach.

Width is measured from the tip of one hand grip to the other. Touring calls for a wider bar, while sport riding is best with a narrower tip-to-tip width.

A. ROAD WINDER CUSTOM WHEEL

Take your custom ride in a new direction. The directional spokes of the one-piece Road Winder wheel add the look of forward motion even while standing still. The slim spokes open the wheel visually, and showcase the available matching brake rotors and sprockets. Forged from 6061-aircraft aluminum, the Road Winder design is born on the 8,000 ton press at Alcoa® Aluminum, creating a highly non-porous surface with great resistance to the elements. The resulting surface is tight, smooth, and takes a chrome finish like a mirror. Even the edge "rivets" and "Bar & Shield" logo are forged into the surface as a finishing touch. All H-D® wheels bear DOT and JWL markings, ensuring that they passed the tests and meet the requirements of those agencies.
