Your Ride It's entirely possible to be one with your surroundings and yet totally stand out. To feel like the only person out there, and still be part of something bigger. Customizing your motorcycle is about where you want to go, how you want to get there and the impression you make when you roll up. It's about finding the mix of fit, function and style that's right for you.

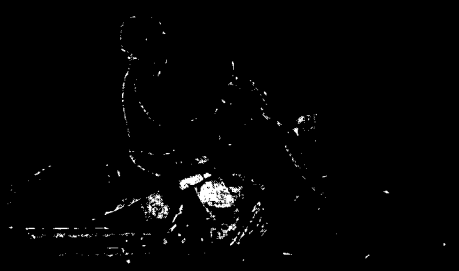
fit

How you fit your motorcycle is a major factor in maximizing comfort and enjoyment. The correct riding position can build confidence when you put your feet down at a stop light. It can enhance the feeling of control on a winding road. And it can add 100 miles to a day's ride. It's as simple as selecting the right seat, handlebar and ride height.

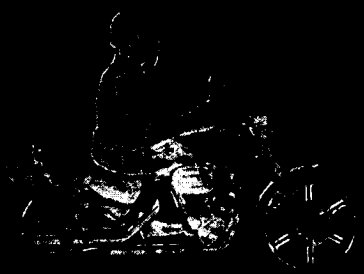
RIDING POSITION

Foot controls, handlebar, seat and suspension dictate riding position. So it's crucial to select accessories based not solely on looks, but also on how they fit your body and riding style. While there's a wide range of postures you can achieve, use the four main riding positions below as a guide.

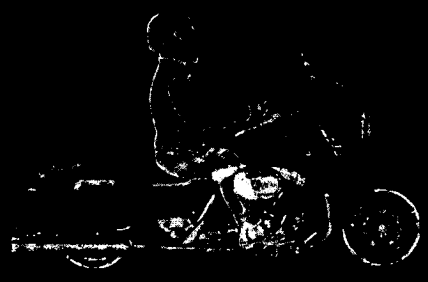


High-style, bodied-and-board posture achieved with an ape-hanger type handlebar, forward foot position, and solo or low-profile seat.

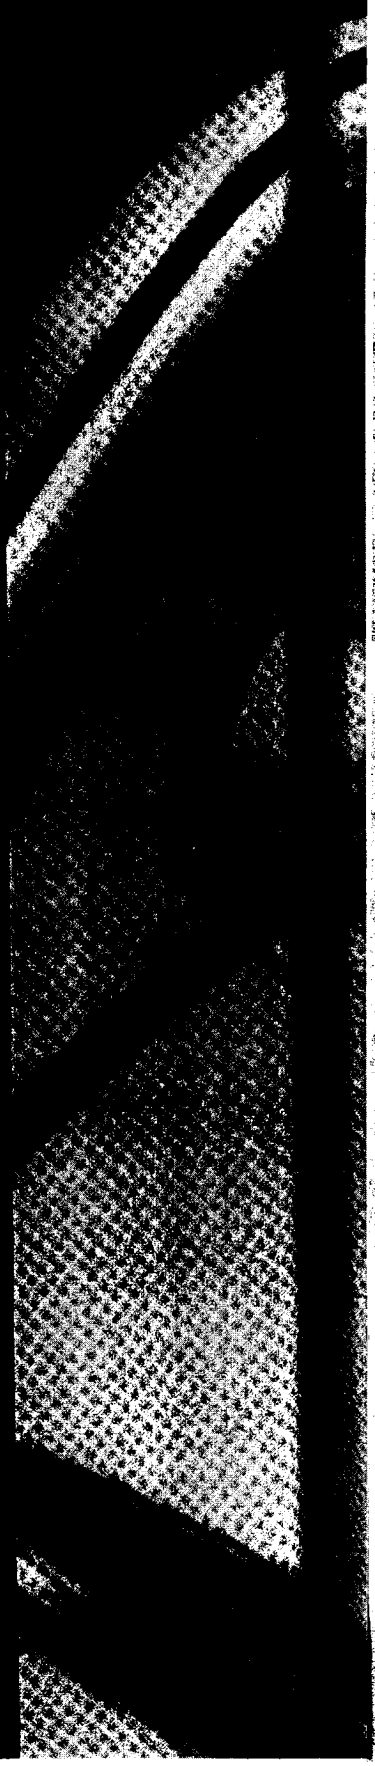
The ultimate fusion of comfort and laid back style, achieved with a buckhorn or sport handlebar and forward foot position.

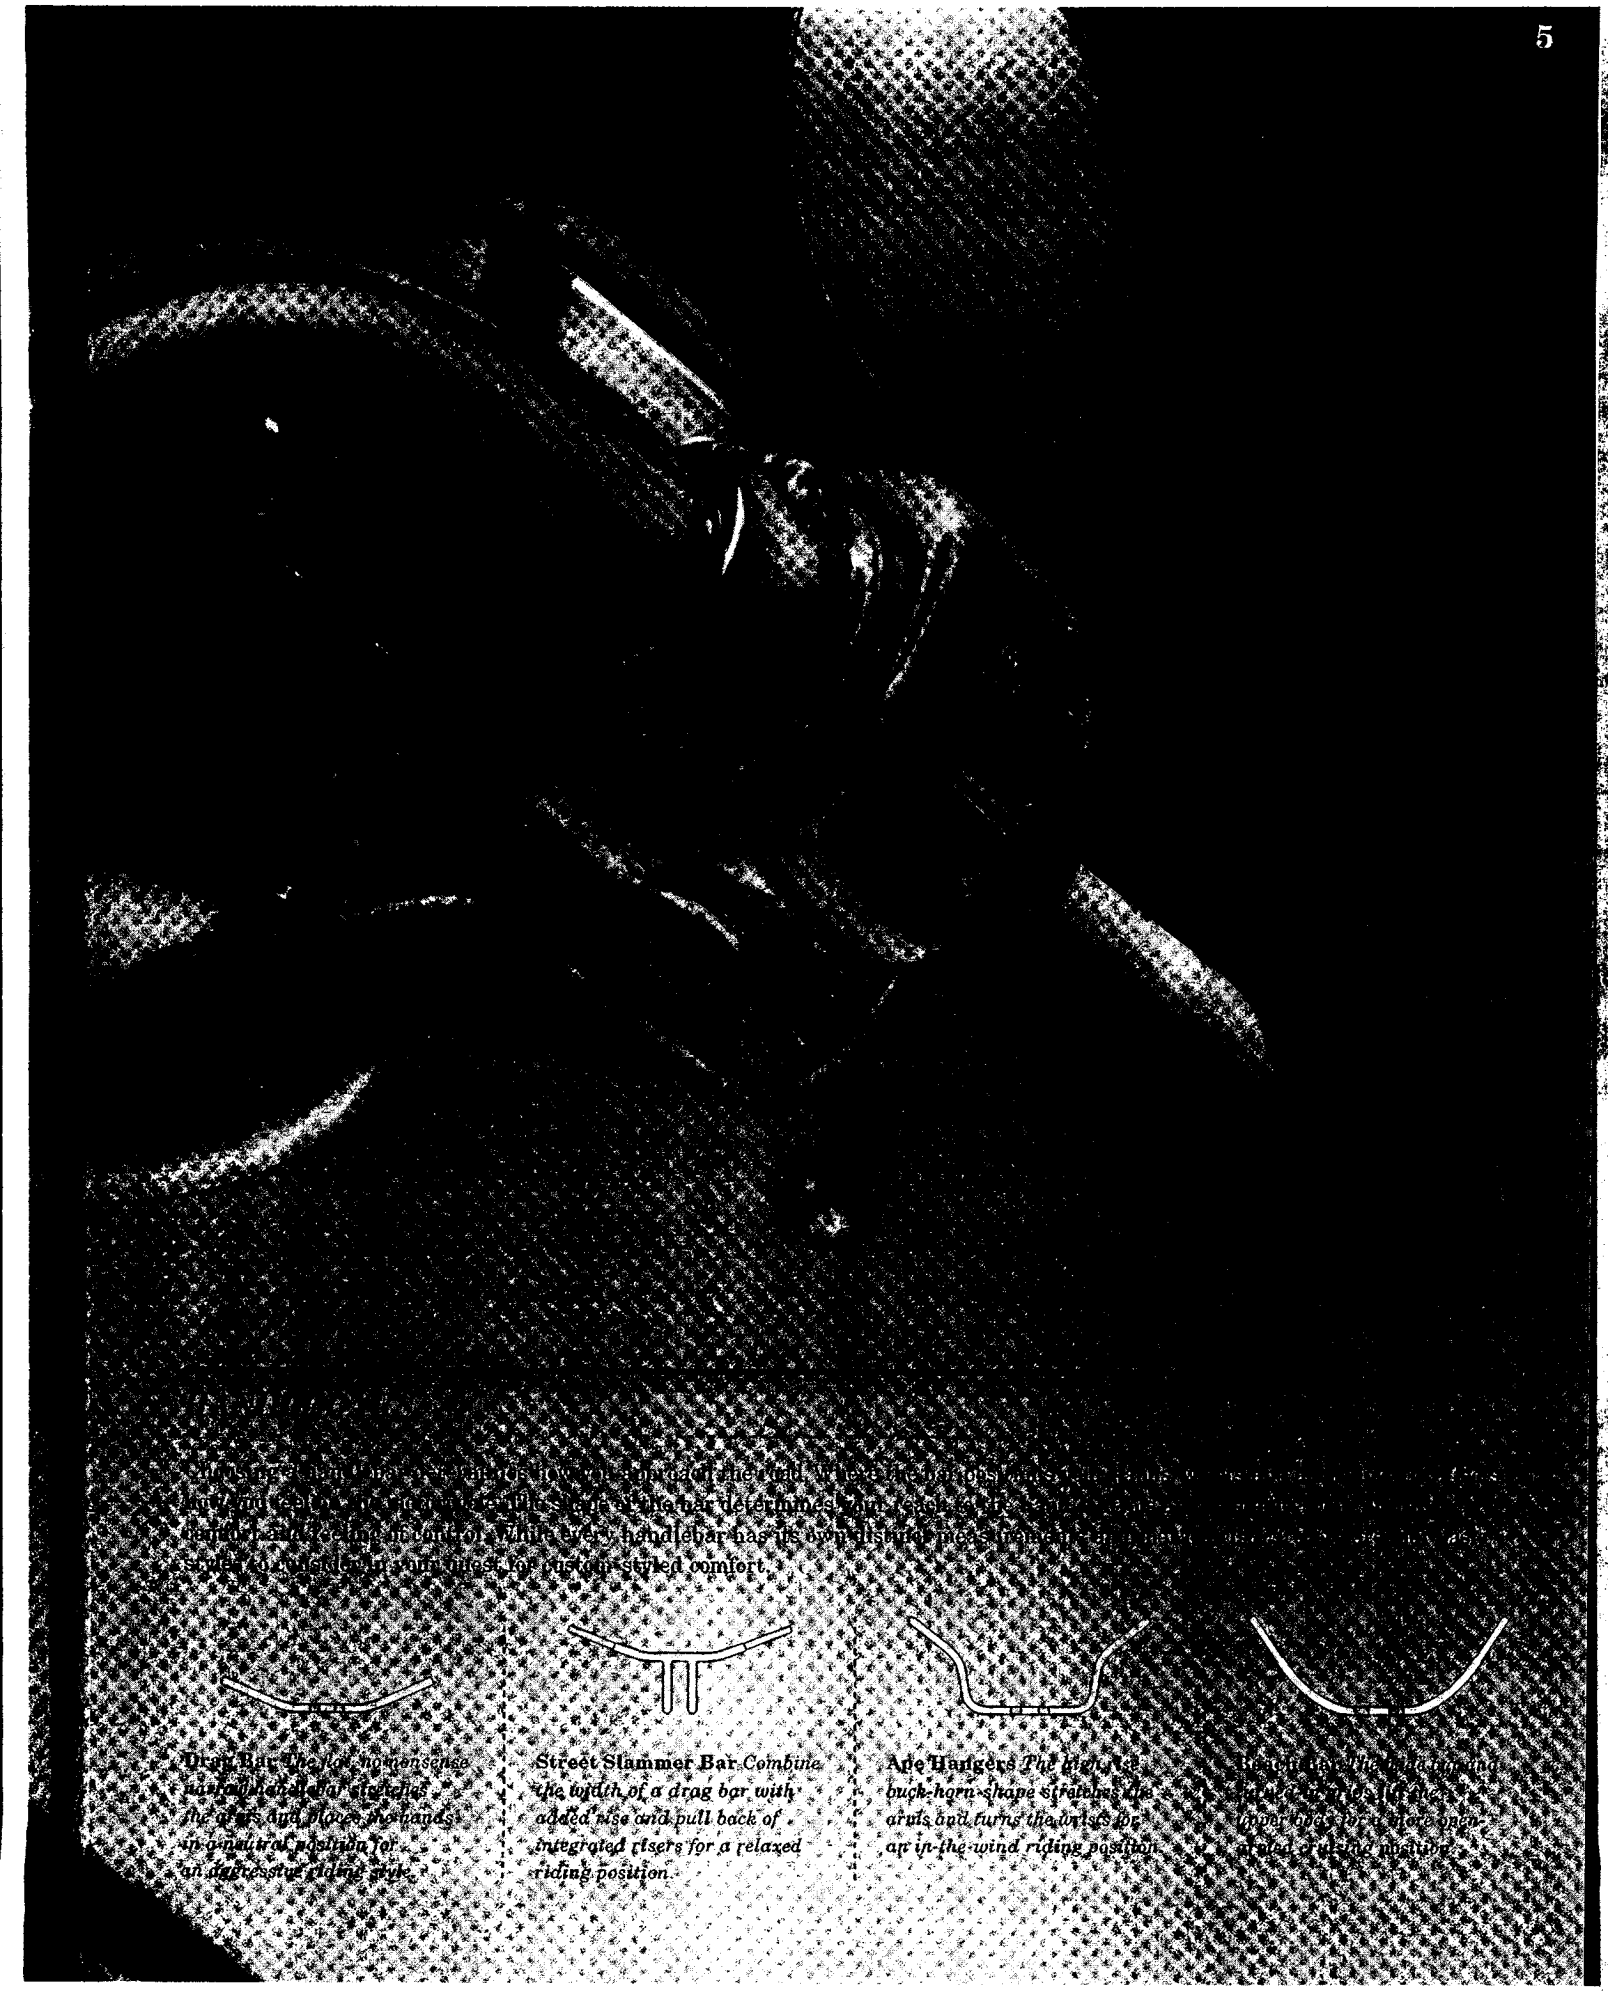


Upright stance with emphasis on handling, achieved with flat or sport bars, low-profile or sport seat, and a mid-range or slightly pulled back foot position.



Natural, upright position for high mile comfort, achieved with a wide handlebar, a standard foot position with pegs or footboards and a deep bucket seat.





Drag Bar *The low, no-nonsense mustang handlebar stretches the arms and places the hands in a natural position for an aggressive riding style.*

Street Slammer Bar *Combine the width of a drag bar with added rise and pull back of integrated risers for a relaxed riding position.*

Ape Hangers *The ultra buck-horn shape stretches the arms and turns the wrists for an in-the-wind riding position.*

Low Rider *The handlebar [illegible] position [illegible] before [illegible] the [illegible]*

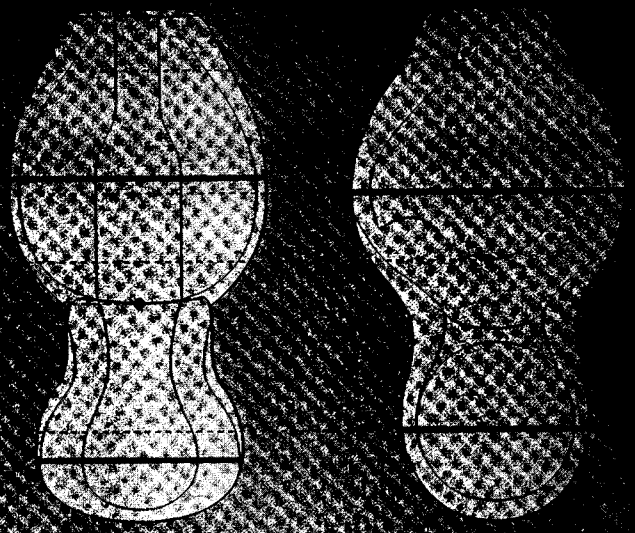
FOOT POSITION

Suspension

Being sure-footed at a stop or when parking your bike enhances your feeling of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.

Mustache Engine Guard

Re-positioning your feet during a long ride relieves muscle tension and strain, and reduces rider fatigue. The Mustache Engine Guard with integrated rubber pads offers a comfortable and super-resistant cushion for your feet while traveling the open road.



The Comfort Zone

A seat is more than just a place to sit. Several factors determine the comfort zone, including how it distributes weight to reduce pressure points. For a short rider, a narrow seat provides easier reach to the ground. And a stepped seat profile keeps the rider [illegible] during acceleration.

Installing a seat

Harley-Davidson seats fit a variety of riders and riding styles. From a low-profile street look to cross-country comfort, a Detachable Seat Hardware Kit lets you change at a moment's notice.

Unfasten the thumbscrew and remove current seat from the bike.

Insert seat's front tab into slot under the tank and line up to fasten on fender.

Fasten seat bracket to fender and re-install the grab strap.

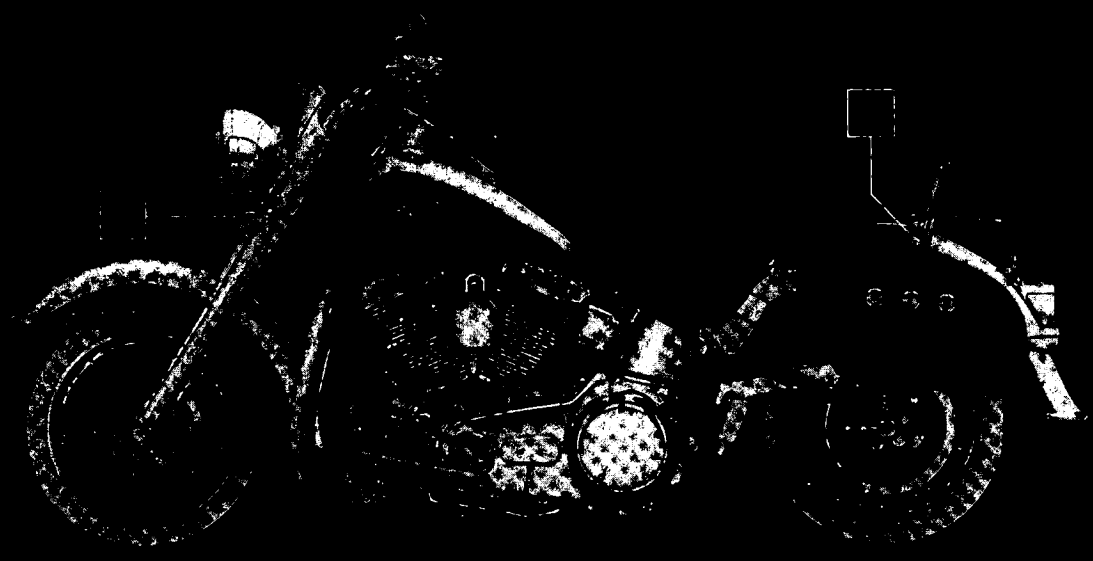
Detachables + Windshields + Sideplates + Uprights and Racks + Storage

function

Considering style and comfort is crucial to your customization efforts. But you should also match your accessories with how you plan to use your bike—whether it's cruising Main Street, chasing the horizon or both. No matter where you ride, Genuine Motor Parts and Accessories provide the flexibility to ensure that your Harley® is always in its element.

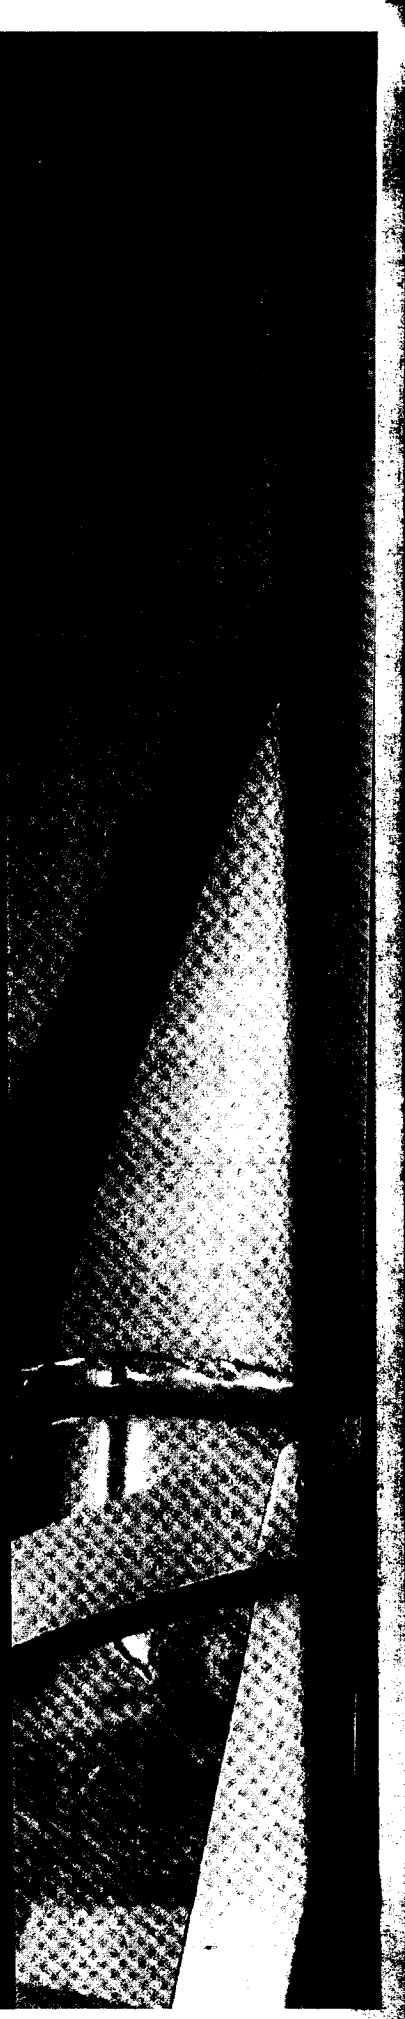
DOCKING POINTS

Designed to be installed or removed in 60 seconds or less, Harley-Davidson® Detachables technology gives you the flexibility to outfit your bike on the fly, changing the look and feel of your motorcycle in minutes. To use Detachables, you'll need special docking hardware installed on your bike.



Four-point system on upper front forks allows windshields to slide on and off easily and lock down tight to take on even the toughest wind.

Fender-strut location allows the use of detachable sideplates, to which uprights and luggage racks can be attached.



Installing a windshield

Different trips call for different windshields. And sometimes, for none at all. That's why most of our shields have a Quick-Release Mounting System.

Decide which windshield is best for the trip. Consider height, shape and overall style.

With the clamps unlocked, position the windshield on the fork tubes.

Snap the clamps closed with your fingers. Now you're ready for whatever the open road throws at you.

TOURING ACCESSORIES

When you're on a cross-country road trip, you need to be prepared, but not overloaded. You want to travel lightly, but not helplessly. There is a solution: Harley-Davidson® touring accessories.

Saddlebags

Saddlebags add storage in a style of your choice.

Lockable, color-matched storage with a sleek, sculpted profile

Leather looks with the smooth lines and security of hard bags

Classic custom storage born on the boulevard

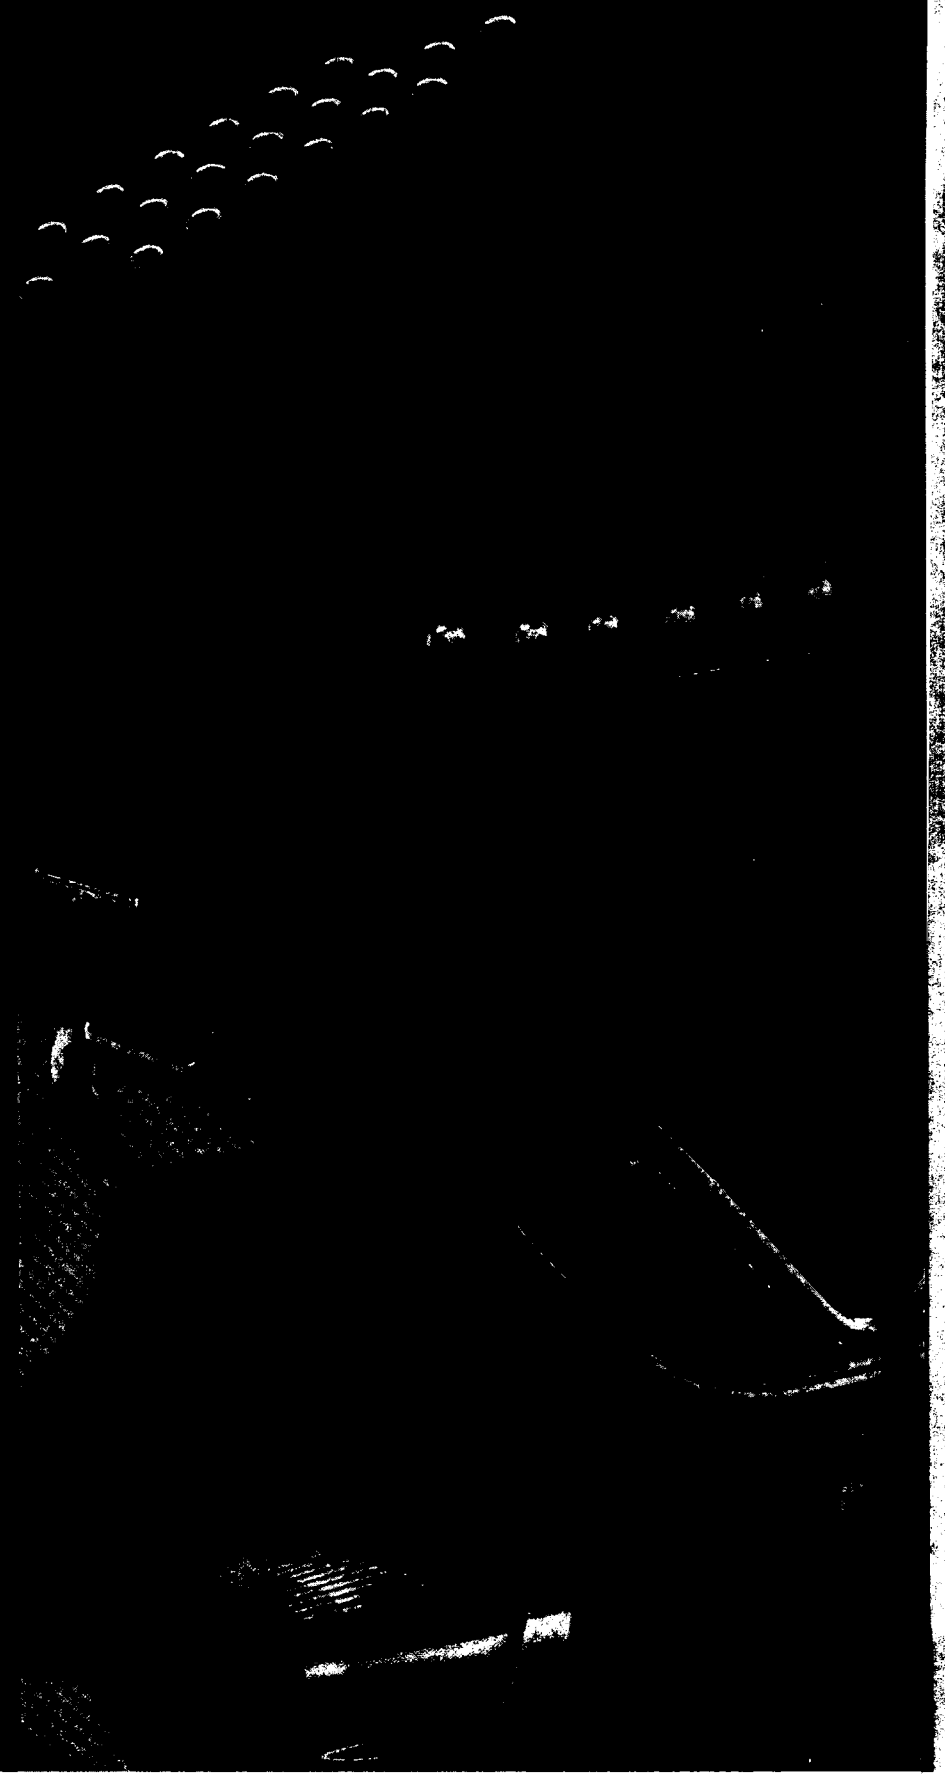
Detachables

Solo commute? Or two-up run across the country? Harley-Davidson® Detachable Docking Hardware makes the conversion a simple proposition.

Go it alone in style. Saddlebags hold a change of clothes, a rain suit and gear. A Solo Rack and soft bag store souvenirs you pick up along the way.

Take a day's ride together. Saddlebags carry clothes and essentials, while a Sissy Bar Backrest Pad provides passenger comfort on the open road.

The ultimate road trip. With all this space and comfort, you and one lucky passenger are fully-equipped to go wherever, for as long as you want.



Detaching a Backrest

A detachable sissy bar upright and passenger backrest is the starting point for a complete touring machine.

1. *Rotate the Detachable Latch to release the rack or sissy bar from the docking points.*

2. *Pivot the rack or sissy bar forward to clear the rear docking points.*

3. *Lift the rack or sissy bar free from the front docking points. Mission accomplished.*

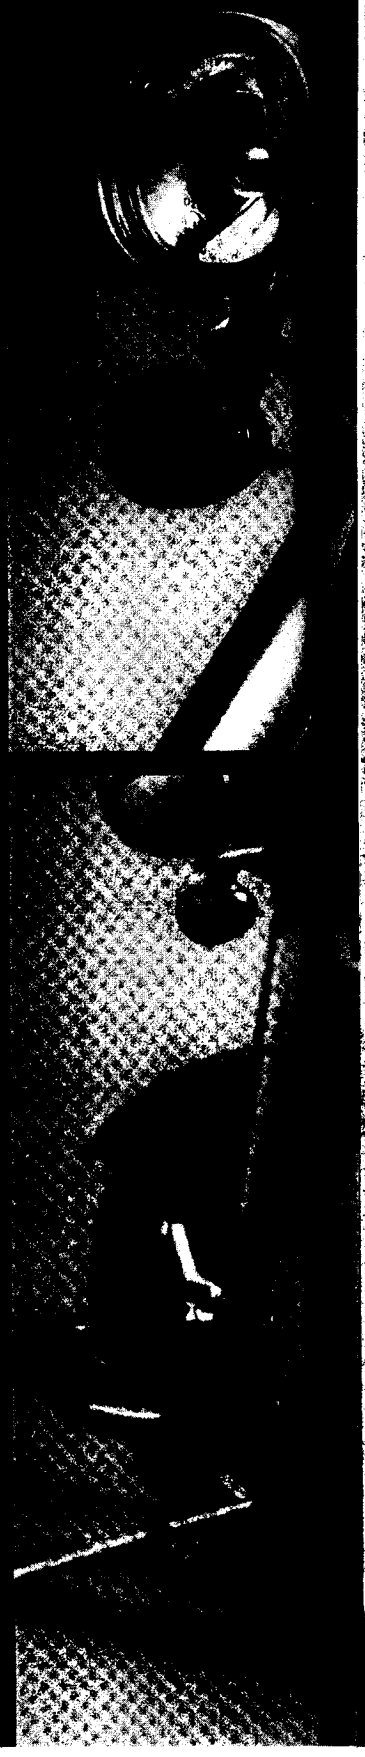
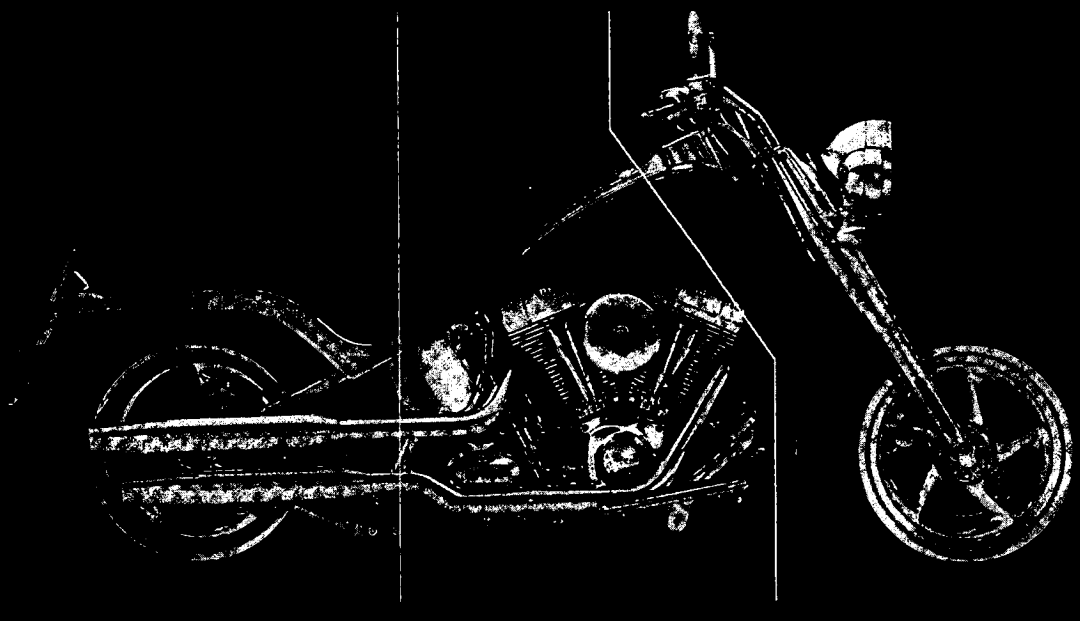
style

Customizing your Harley-Davidson® motorcycle is about you—about selecting accessories that work together to reflect your personality. So you've got to envision your bike as a whole and choose the options that will make that vision a reality. Fortunately, Genuine Motor Parts and Accessories are designed to make those choices easier.



THE THREE ZONES

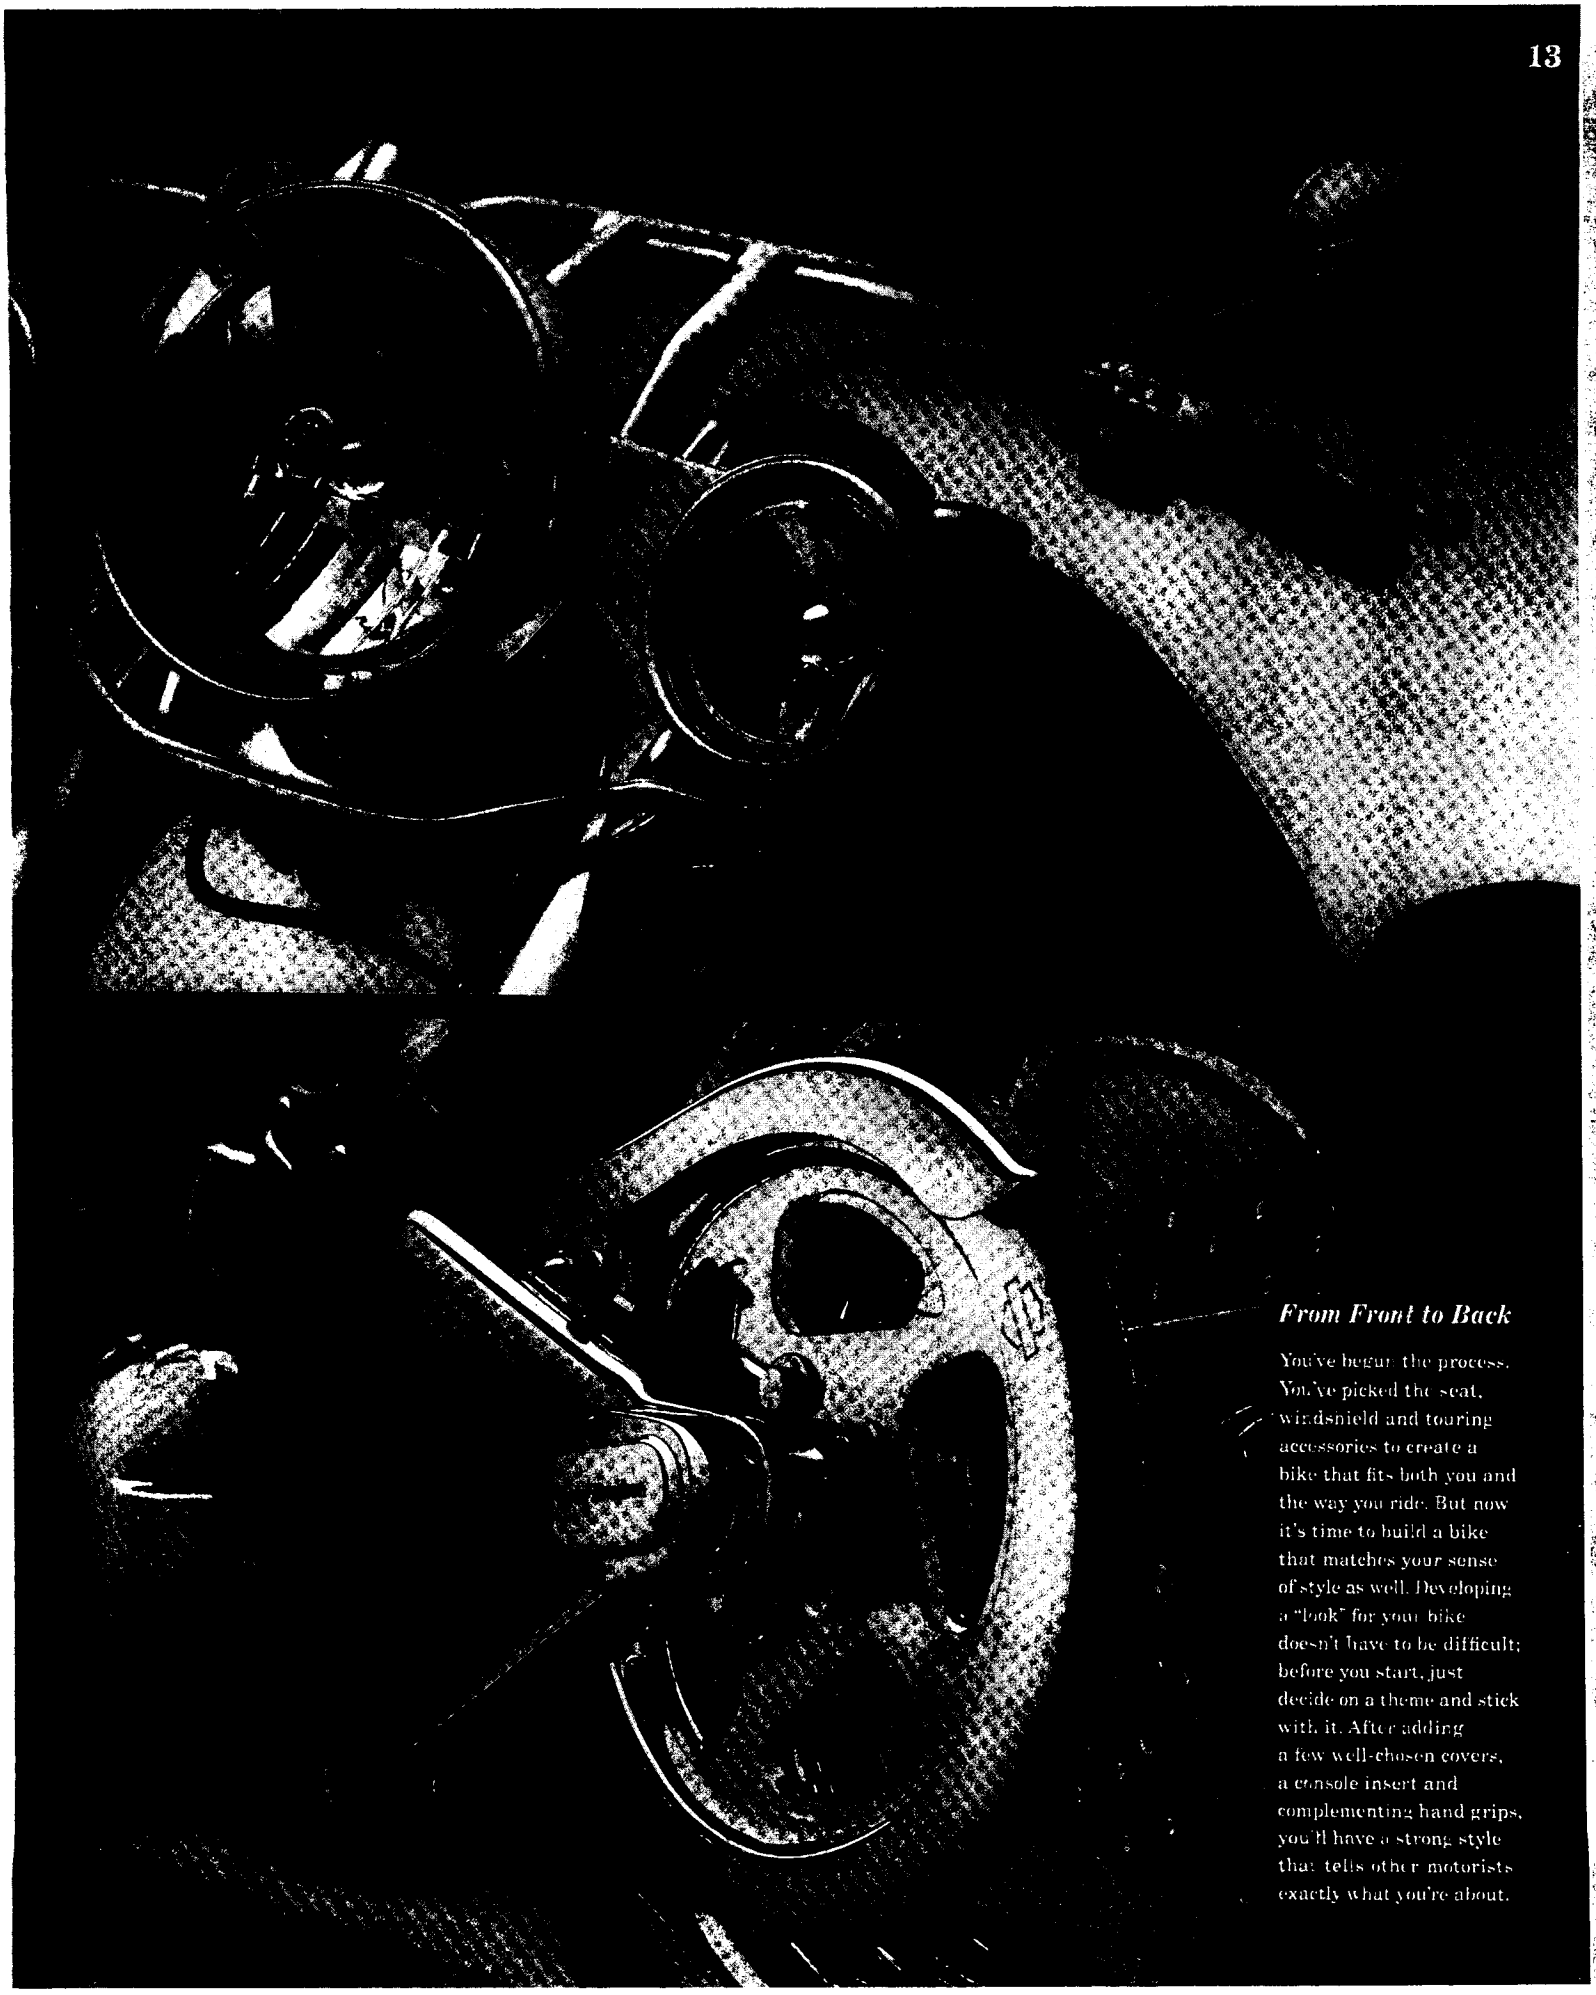
A good rule of thumb is to start customizing with larger accessories—the ones that have the biggest and most immediate impact on your bike's appearance—and then work your way down to more subtle details that complement those choices. The possibilities can seem overwhelming at first, but breaking up your bike into zones may help. In addition, you'll get a firm grasp of the elements that comprise your bike's overall look.



Swingarm, Axle, Wheel, Belt Guards, Sprocket, Brakes, Fender Trim

Air Cleaner, Engine Trim, Battery Cover, Foot Controls, Console, Footpegs, Footboards

Handlebar, Hand Controls, Headlamp Trim, Front Forks, Wheel, Brakes, Fender Trim



From Front to Back

You've begun the process. You've picked the seat, windshield and touring accessories to create a bike that fits both you and the way you ride. But now it's time to build a bike that matches your sense of style as well. Developing a "look" for your bike doesn't have to be difficult; before you start, just decide on a theme and stick with it. After adding a few well-chosen covers, a console insert and complementing hand grips, you'll have a strong style that tells other motorists exactly what you're about.

Your Road For some, it's the rush of chasing the sun. For others, it's a long river run. From a stretch of wood-lined twisties to the perfect ribbon of highway, each road offers its own personality. Which road does your ride belong on? And where do you want to go today?

Windshields
Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. For maximum protection from wind and weather, select a windshield that tops out just below your line of sight. You avoid looking through rain drops, bug spots and road grime to get a clear view of the highway ahead.

E. Quick-Release Detachable Ultimate Touring Windshield
The oversized Touring Windshield features an aerodynamic design shaped to provide hours of riding comfort. The additional center width directs airflow past the hand grips, and deflects rain and road debris around the rider. You get quick on-and-off convenience, and a clean, custom look. No tools are required. The tough, hard-coated polycarbonate windshield features a stylish horizontal brace with the Bar & Shield logo to accent the long, lean look of the V-Rod® model. Choosing A Backrest

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support, and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a detachable sideplate kit and appropriate Docking Hardware to make adding or removing a Detachable accessory a simple "slide and click" proposition.

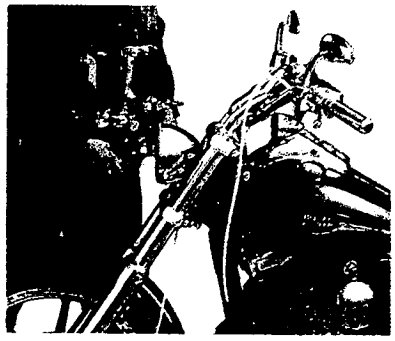
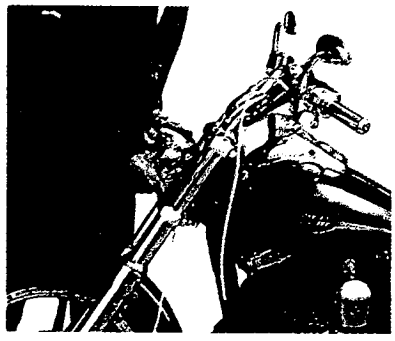
Windshields
Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. For maximum protection from wind and weather, select a windshield that tops out just below your line of sight. You avoid looking through rain drops, bug spots and road grime to get a clear view of the highway ahead.

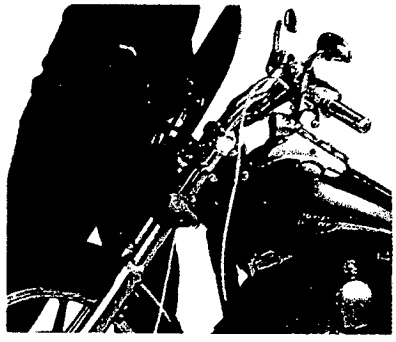
Detaching a Quick-Release Windshield
Different trips call for different windshields. And, sometimes, for none at all. That's why most of our shields have a Quick-Release Mounting System. The patented hardware locks onto the fork tubes in seconds for a wind-fighting grip and then off for a clean, custom look.



Step 1: Choose
Decide which windshield is best for the trip. Consider height, shape, and overall style.



Step 2: Position
With the clamps unlocked, position the windshield on the fork tubes.



Step 3: Secure
Snap the clamps closed with your fingers. Now you're ready for whatever the open road throws at you.

Choosing a Backrest

A sissy bar upright and passenger backrest are the starting point to build a complete touring machine. The backrest provides long-range comfort and support, and adds a feeling of control and confidence for the passenger. For permanent installation, choose rigid sideplates and a style of upright that suits your riding style. For added flexibility, choose a detachable sideplate kit and appropriate Docking Hardware to make adding or removing a Detachable accessory a simple "slide and click" proposition.

Dyna® Docking Hardware For Detachable Racks and Sideplates

Windshields

Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. For maximum protection from wind and weather, select a windshield that tops out just below your line of sight. You avoid looking through rain drops, bug spots and road grime to get a clear view of the highway ahead.

For added flexibility, choose a detachable sideplate kit and appropriate Docking Hardware to make adding or removing a Detachable accessory a simple "slide and click" proposition.
