Creating Healthier Communities Throughout Michiana

Home Infusion Therapy

Home Infusion Therapy allows patients to continue with their daily activities while receiving care in the comfort of their homes and offers a cost effective alternative to lengthy hospitalization or repeat trips to the hospital. Elkhart General Home Care's infusion team works with the patient's physician who directs the overall management of the patient's care.

We focus on managing each component of the therapy through our comprehensive staff of clinicians and case managers, who proactively monitor patient responses and outcomes to prescribe therapies. Our commitment is to provide the highest quality of care, clinical excellence, and customer services.

Your Health Care Team

Elkhart General Home Care employs registered nurses with extensive acute care backgrounds. From the first visit to routine follow-up visits, nurses educate the patient and family members with respect to medication and self-administration techniques. Elkhart General Home Care's PICC certified nurse clinicians are experienced in infusion management and maintain and problem-solve the patient's IV site and catheter. Monitoring the patient on an on-going basis includes assessing response services the patient may require.

Our pharmacy staff has extensive admixture experience and is available as a resource for drug information. They are active participants in the patient's ongoing Plan of Care. Our on-site pharmacy has a complete formulary of drugs and solutions. Infusion pumps and equipment are selected based on the latest technology and most appropriate selection for each patient. Medications and supplies are delivered to the patient's home in limited quantities to control drug costs due to therapy changes.

Continuum of Care

Our program provides complete coordination of a patient's care from the hospital to the home. We can also coordinate the patient's infusion needs directly from the physician's office. Often times, we can avoid the patient's hospitalization completely and begin their treatment directly in the home.

Our experienced team of IV therapy nurses and pharmacists are available 24-hours-a-day, seven days a week to meet every requirement of the treatment plan. We will customize a Plan of Care to the physician's specifications and the patient's individual needs. We will assess, teach, administer, communicate and coordinate with all disciplines, as well as provide on-call services, laboratory testing and monitoring and supply the patient with the necessary home medical equipment that will meet the infusion needs.

A Full Range of Quality Services

Elkhart General Home Care's Home Infusion Therapy program utilizes the latest technology available in both equipment and medications to provide therapies that include:

- Anticoagulation
- Antiemetics
- Antinauseants
- Biologicals
- Blood Products
- Cardiac Agents
- Central Line Care
- Chelation
- Chemotherapy
- Growth Hormone
- Heparin Therapy
- Hydration
- IV Intravenous Antibiotics and Antivirals
- Immunological Agents
- Iron Infusions
- Medtronic Pump Refills
- Multiple Sclerosis Injectable
- Pain Management
- Synagis Administration
- Total Parenteral Nutrition
- Tocolytic Therapy (Preterm Pregnancy)

Additional Support Services & Special Features

- 24-hour nursing and clinical pharmacy support
- State-of-the-art, home care specific medication, supplies, and infusion devices through a dedicated infusion pharmacy, with certified home infusion pharmacists
- Patient education regarding therapy, medication, and infusion device
- Ongoing clinical monitoring to assure therapeutic patient outcomes
- Needle-less system used for most patients to simplify administration and minimize patient risk

Overview

Providence Home Infusion therapy offers a welcome alternative to lengthy hospital stays for medically stable patients requiring intravenous (IV) therapies. Our highly trained clinical pharmacists and registered home infusion nurses work together with the physician to meet the individual needs of each patient, from adult to pediatric. We also offer onsite infusion suite services on both the East and Westside of Portland.

Your team

An infusion nurse visits your home to help you get started. This specially trained nurse helps you feel at ease with your therapy, monitors your progress, reports to your doctor and coordinates your supply needs. A clinical pharmacist works with your doctor and nurse to manage the therapy. Our patients know that their **team** is only a telephone call away. Services also include insurance verification and authorization by our trained insurance specialists.

Therapies

Therapies provided by Providence Home Infusion include antibiotics, Total Parenteral Nutrition (TPN), chemotherapy, drug therapies, pain management, hydration therapy, growth hormones and blood clotting therapies.

Resources

Referral process

For the clinician, our convenient and easy referral process takes care of everything, including clinical intake, insurance verification and authorization, prescriptions, therapy management, education for self administration, patient support 24/7, and coordination of other medical needs. Call in your referral at 503-215-4377 or **fax our referral form**

Contract payor list

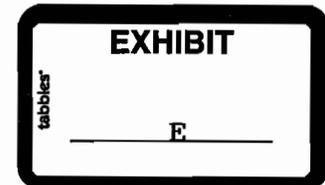

Providence Home Infusion contracts with and accepts the following insurance **payors**. If you have any questions regarding other insurance coverage, please call 503-215-4377.

Providence Health Resource Centers provide Web-based information and support on a variety of topics, including:

- [arthritis](#)
- [chronic fatigue](#)
- [diabetes](#)
- [heart disease](#)
- [lung cancer](#)
- [nutrition](#)
- [prostate cancer](#)

Home Infusion Therapy

Home infusion therapy allows patients to receive vital fluids and medications without the inconvenience or costs of a hospital visit. Our Home Infusion Team specializes in a full range of IV therapies for patients with chronic and acute illnesses. They're supervised by a CRNI specially trained and dedicated to intravenous therapy. Our team of IV specialty nurses combines their assessment skills, technical expertise and community health experience in treating patients with cancer, HIV/AIDS, nutritional deficiencies, bone marrow inflammation, leukemia, heart disease, hemophilia and other health problems.

Nursing Practices

The nursing staff collaborate with physicians to develop and implement the most effective care plan for each patient.

- Supervision by specially trained CRNI
- Initial and ongoing assessment
- Comprehensive care management
- Follow-up reports to physicians
- Patient and family education
- Peripheral intravenous site rotation
- IV site care
- Psychological support for patients and families
- Home Infusion Therapy team member available 24 hours a day
- Midline catheter placement and care and central line catheter care

Adult and Pediatric Infusion Therapies

- Antibiotic therapies
- Anticoagulant therapies
- Anti-fungals
- Anti-virals
- Cardiovascular therapies
- Chelatin therapy
- Chemotherapy
- Colony stimulating therapy
- Cystic Fibrosis therapy
- HIV-related therapies
- Hydration

“From our perspective, The Community Foundation for Greater New Haven's grants to the VNA throughout its history provide daily examples of what "mobilizing community philanthropy" means. Through the VNA's commitment to patient care, information sharing and educating future health care providers, lives are changed and our community is strengthened one resident at a time.”

South Shore Visiting Nurse Association

As the region's oldest hospital-based home care agency, South Shore Visiting Nurse Association (VNA) has been bringing quality, compassionate skilled care to South Shore communities since 1911. A program of South Shore Hospital, we are one of the state's largest providers of Medicare-certified home health care.

Our multidisciplinary team works together to identify your specific needs and then develops a customized treatment plan to meet those needs. We are able to provide a wide range of services in the comfort of your own home. Sophisticated services once requiring a hospital stay can now be performed successfully, safely, and conveniently in your home, utilizing all the latest home care methods and technologies.

Skilled Nursing

Our professional nurses are specially trained to bring advanced medical services into your home, including the most current techniques and cutting edge technologies. These experienced clinicians develop and implement a comprehensive care plan tailored to address your unique health concerns.

Our professional nursing services include, but are not limited to:

- Health and physical assessments
- Individualized plan of care
- Management of health care services
- Patient and family education
- Disease education and management
- Pain and symptom management
- Catheter care and instruction
- Ostomy and colostomy care and instruction
- Wound care and surgical dressing changes
- Medication administration, instruction, and supervision
- Blood collection for lab work
- Intravenous therapy
- Respiratory care, including trache care, breathing treatment, and oxygen therapy
- Chemotherapy administration
- Diabetes education and instruction
- Heart and blood pressure monitoring

Our professional nursing services are provided in conjunction with your physician.

Rehabilitation Services

Rehabilitation is often an essential component of a comprehensive patient care plan. Our specialized rehabilitation team – including registered physical, occupational, and speech therapists – offers you a wide range of rehabilitation services that are individually designed to meet your specific needs.

Physical Therapy

If you are experiencing a disability or loss in mobility caused by injury, illness, or surgery, our physical therapists are able to help you along the road to recovery while remaining in your own home. Our physical therapists are dedicated to getting you back to your usual activities and highest potential as quickly as possible.

These specially trained professionals help you regain functional mobility and gross motor skills (functions involving the use of large muscles) through therapeutic exercise, balance activities, and ambulation training techniques. When needed, various assistive tools – such as prosthetics, adaptive tools, and devices – may also be part of a rehabilitation program.

Our physical therapy services include, but are not limited to:

- Patient assessment
- Home assessment
- Individualized therapeutic care plan
- Patient and family education
- Post-op rehabilitation
- Therapeutic exercise, including weight bearing, muscle strengthening, and endurance
- Gait training
- Transfer training
- Assistive devices or medical equipment
- Prosthetic training
- Balance training
- Safety assessment
- Joint replacement therapy

Our physical therapy team provides services in conjunction with your physician.

Occupational Therapy

Our occupational therapists help you regain the basic skills associated with daily living, allowing you to become as independent and self-sufficient as possible. This expert team works with you to help you relearn everyday activities that have been lost or diminished due to a medical condition, including tasks such as bathing, dressing, grooming, and meal preparation.

During home visits, our occupational therapists use therapeutic techniques designed to restore your physical function as well as promote strength and coordination. In certain cases, patients are introduced to some helpful adaptive tools as well.

Occupational therapy services include, but are not limited to:

- Patient assessment
- Individualized therapeutic care plan
- Home assessment and modification
- Patient and family education
- Design, production, and modification of orthotic/adaptive equipment
- Energy conservation
- Fine motor coordination therapy
- Independent daily living skills therapy

Our occupational therapy team provides services under the direction of your physician.

Speech Therapy

If you are suffering with a condition that interferes with your ability to speak, form or understand language, and/or swallow, our speech and language therapists can help. These experts utilize advanced methods to help you regain lost verbal skills, comprehend speech, and learn new communication techniques, as well as manage swallowing and related muscle disorders.

Speech therapy services include, but are not limited to:

- Patient assessment
- Patient and family education
- Individualized therapeutic care plan

- Treatment of voice and swallowing disorders
- Treatment of cognitive disorders
- Articulation and language therapy

Our speech therapy team provides services under the direction of your physician.

Social Services

There are times when non-medical issues may interfere with the recovery process. If needed, our experienced social workers are available to visit with you to assess any social, emotional, or financial needs related to your medical condition that may be getting in the way of your full recovery. These highly trained professionals offer support to you and your family and help coordinate any appropriate community resources that may be of value.

Social services include, but are not limited to:

- Assessment of social/emotional needs
- Evaluation of home environment
- Patient and family education
- Counseling services
- Crisis intervention
- Community resource planning and referral
- End-of-life support

Our medical social workers provide services under the direction of your physician.

Specialty Programs

Cardiology Program

Many people with chronic heart problems are now receiving the care they need in the comfort and familiar surroundings of their homes. Our team of experts – which includes experienced cardiac nurses, physical and occupational therapists, home infusion nurses, social workers, and certified home health aides – delivers coordinated, specialized care to patients in homes throughout the South Shore. If you or a loved one is suffering from heart disease or recovering from a heart attack or a surgical procedure, our multidisciplinary team can help you manage your illness, prevent complications, avoid hospital readmissions, reach your recovery goals, and improve your overall quality of life.

Diabetes Program

Our Diabetes Program brings education, medical care, and support to the home environment to help our patients and their families better manage and understand diabetes. Our team of diabetes specialists will design an individualized plan of care to meet your personal goals and needs. You will learn about diabetes and be given the tools you need to manage your disease and recognize the signs of complications.

Home Infusion Therapy

Our Home Infusion Therapy Program makes it possible for patients to receive intravenous medications for a full range of medical conditions without the need for hospitalization. Our certified infusion nurses work with local pharmacies to facilitate a seamless move from inpatient care to home care and to ensure the delivery of safe, effective intravenous therapy in the comfort of your home. Our infusion therapy services include everything from hydration to chemotherapy to advanced IV therapies such as

immunosuppressive drugs.

Wound/Ostomy/Continence Program

Our Wound/Ostomy/Continence Program involves the assessment, treatment and management of acute and chronic wounds, including diabetic, vascular, pressure, stasis ulcers, surgical and traumatic wounds, as well as ostomy care and continence management. Our certified ostomy continence nurses (WOCN) provide specialized care to promote healing, prevent complications, and help patients with self-care issues. They work in collaboration with the physicians and staff at South Shore Hospital's Center for Wound Care and Hyperbaric Medicine to ensure positive outcomes.

Oncology Program

Our Oncology Program provides at-home nursing and rehabilitative care to patients with cancer diagnoses. The program is managed by an oncology clinical nurse specialist, who collaborates with patients' physicians, certified oncology nurses, social workers, physical therapists, nutritionists, and others. Services include education, support, infusion therapy, and symptom management. All care is personalized, focusing on the physical, mental, and social well-being of the patient and family.

Geriatrics/Alzheimer's Care

Our Geriatrics/Alzheimer Program is designed to help older patients remain in their homes for as long as possible. Our care team includes registered nurses with advanced training in the care and treatment of older adults. The program includes assessment, treatment, and case management for frail and at risk elders, as well as the coordination of support services and community resources, as necessary. Our goal is to keep you or your loved one as physically and cognitively active as possible, to enhance quality of life, and provide helpful instruction and understanding to caregivers.

[About Us](#)[Services](#)[Therapies](#)[Insurance](#)[Products](#)[Service Area](#)[Contact Us](#)

Professional and Management Staff

ROY ADAMSKI, RPH, MBA *Vice President*

Roy has over 22 years of experience in the health care field, the last 7 years in the area of home infusion. He worked for the Franciscan Sisters Care Corporation where he held positions of Director of Pharmacy (1975-87) and Vice President at St. Anthony Hospital, advancing to Vice President of clinical services at St. Joseph Hospital, Elgin, Illinois from 1987-1993. He helped start and was General Manager of Extended Home Infusion Services, a home health agency and Care Tech in 1994. After EHIS was sold in 1998 he became General Manager of Care Tech Home Infusion.

SHILPA BAXAMUSA, PharmD *Clinical Pharmacist*

Shilpa graduated in 1984 with her PharmD from the University of Illinois at Chicago School of Pharmacy. Her career started as a hospital pharmacist at Lutheran General Hospital and has taken her to Yale and Bridgeport Hospitals in Connecticut. Shilpa has served on numerous hospital committees including the Pharmacy and Therapeutics and Antibiotic subcommittee. She has over 7 years of hospital experience. Her in depth clinical knowledge of antibiotics and paternal nutrition are a real asset in managing home health care patients. She enjoys collaborating with nurses and physicians to allow the best possible outcomes for patients.

CAROL KING, RN, BSN, CRNI *VP Nursing Systems*

Carol has been involved in home health care for her entire nursing career. She was one of the first nurses to be involved in the care of home TPN patients and many subsequent high tech hospital therapies administered in the home. Carol was VP of Clinical services with Care Tech, a successful former independent home infusion company in Elmhurst, IL. Carol has held positions as the Manager of Patient Services, Nursing Administrator for the Chicago branch and Midwest Nursing Manager for Caremark. Previously, she worked at Lutheran General Hospital as a discharge planner and homecare nurse. She also worked as a consultant home care surveyor with the Joint Commission on the Accreditation of Healthcare Organizations.

VICKI FUKA, RN

Vicki's background in home infusion nursing spans 14 years and from field nurse to Director level. She began her infusion career as a hi-tech field nurse administering IV medications to patients in their homes. As an employee of Caremark Home Infusion she held positions of QA Nurse, Admissions Nurse and Supervisor. At Resurrection Home Health Care, she began as Infusion Supervisor and on to Director of Infusion Services with responsibilities for all aspects of their home IV program.

BILL HONIOTES *President, Owner*

Bill has over 26 years of sales and marketing experience with 22 of those in the health care field. As the Vice President of Marketing for Care Tech Home Infusion from 1995-2001, he has been successful in marketing customized infusion services and developing strong relationships with hospital and community based nursing agencies. He helped develop and market the "Comprehensive Care" independent "one-stop-shop" concept along with a local independent HME company and nursing agency. Prior to Care Tech, Bill held the position of Senior Territory Sales Manager with B. Braun/Burron Medical for 10 years.

Home Infusion Therapy

Who May Benefit?

Home infusion provides an alternative to receiving intravenous (IV) therapy in the hospital. Home Infusion Therapy is the intravenous administration of medication to patients in their own home. Patients and doctors find the convenience and comfort of being at home very appealing. Patients can often return to their normal routines and even, in some cases, return to work while still on therapy.

Infusion Nursing Support

UVA's CONTINUUM home infusion service consists of a specialized team of registered nurses. All members of the team are trained in the insertion and management of IV lines. Nurses will provide you and your family with the teaching and support needed to make sure you feel at ease with your IV therapy at home.

Pharmacy Support

We provide numerous IV therapies, such as antibiotics, pain management and chemotherapy, for home use, with easy-to-use infusion pumps and supplies. We can provide direct delivery of your IV drugs and supplies to your home. Your infusion pharmacist works closely with your home care nurse and physician to make sure your care and treatment goals are met and care is coordinated.

If you need nutritional products at home, such as tube feedings or IV nutrition, we have a nutritional support team that closely monitors your nutritional needs. Our nutritional team
