MOTION TO AMEND IDENTIFICATION OF GOODS WITH CONSENT

The parties have settled this matter and have entered into a Settlement Agreement.

Applicant, Athena ISG/GTXtreme, Inc., through counsel, hereby moves on behalf of all parties to amend the identification of the goods in connection with Application Ser. No. 77/430,297.

Provided below are the currently pending identification of goods; the proposed amendment to the identification of goods; and a marked-up version of the identification of goods showing the changes made in the proposed amendment.

CURRENT IDENTIFICATION OF GOODS

Wireless medical monitor system comprising two linked devices, one device with sensors for sensing, viewing, and monitoring of the vital signs of a patient, comprising electrocardiogram, shock state index, pulse wave delay as a measure of changes in blood pressure or non-invasive blood pressure (NIBP), pulse waveform, skin temperature, skin humidity, and saturation of blood oxygen, wherein the sensor device is capable of wireless

transmission of the vital signs to a second receiving device, which is a wrist worn mini-computer with automatic and autonomous wireless connectivity to numerous patient sensor systems.

PROPOSED AMENDMENT TO IDENTIFICATION OF GOODS

Wireless medical monitor system comprising two linked devices, one device with sensors for sensing, viewing, and monitoring of the vital signs of a patient, comprising electrocardiogram, shock state index, pulse wave delay as a measure of changes in blood pressure or non-invasive blood pressure (NIBP), pulse waveform, skin temperature, skin humidity, and saturation of blood oxygen, wherein the sensor device is capable of wireless transmission of the vital signs to a second receiving device, which is a wrist worn mini-computer with automatic and autonomous wireless connectivity to numerous patient sensor systems, all of the foregoing for use in emergency medicine environments by emergency medicine responders.

MARKED-UP IDENTIFICATION OF GOODS

Wireless medical monitor system comprising two linked devices, one device with sensors for sensing, viewing, and monitoring of the vital signs of a patient, comprising electrocardiogram, shock state index, pulse wave delay as a measure of changes in blood pressure or non-invasive blood pressure (NIBP), pulse waveform, skin temperature, skin humidity, and saturation of blood oxygen, wherein the sensor device is capable of wireless transmission of the vital signs to a second receiving device, which is a wrist worn mini-computer with automatic and autonomous wireless connectivity to numerous patient sensor systems, all of the foregoing for use in emergency medicine environments by emergency medicine responders.

This request is made for good cause and is not made merely for purposes of delay.
Athena ISG/GTXtreme, Inc. has secured the express consent of all other parties
to this proceeding for amending the identification of goods requested herein.

Respectfully submitted
