1 MARLA BEIER,

2 was thereupon produced as a witness and, after  
3 having been duly sworn on oath, was examined and  
4 testified as follows:

5 EXAMINATION

6 BY MS. LOESCH:

7 Q. Ms. Beier, we are here -- do you -- sorry.  
8 Ms. Beier, do you -- is there any reason why  
9 you will not be able to testify truthfully and  
10 accurately today?

11 A. No.

12 Q. So we are here to talk about the Purifics  
13 opposition against the Puralytics trademark  
14 application. Are you familiar with this  
15 matter?

16 A. Yes.

17 Q. How are you familiar with it?

18 A. It's a case that you're currently working on  
19 here at the firm, a trademark matter.

20 Q. And are you -- are you -- who's your employer?

21 A. Klarquist Sparkman.

22 Q. And what do you do?

23 A. I am a ligation assistant. I work for you and  
24 a couple other attorneys.

25 Q. And so what has been your involvement in this

1 trademark matter?

2 A. I've had very little involvement in this  
3 trademark matter because I do mostly litigation  
4 work for you. In the absence of a trademark  
5 paralegal to help you out, you will  
6 occasionally ask my assistance.

7 Q. Okay. I'm going to hand you what's marked as  
8 Exhibit 127. And it's Bates range PUR001496  
9 through 1530 something.

10 (Exhibit 127 was marked.)

11 BY MS. LOESCH:

12 Q. Have you seen this document before?

13 A. I have.

14 Q. And what is this document?

15 A. These are screen shots that we produced in the  
16 Puralytics matter.

17 Q. And were you involved in any way in creating  
18 this series of documents?

19 A. I was.

20 Q. And in what capacity were you involved?

21 A. I actually created some of these screen shots,  
22 pulled them off of the Internet. I was  
23 instructed to take the Puralytics second  
24 request for admissions, look at the marks that  
25 were listed within that document, go onto the

1 USPTO website, do a trademark search for each  
2 mark, which I did. And I was able to get the  
3 registration information and image of the mark,  
4 any other information I thought would be  
5 helpful identifying and pinning down that  
6 particular mark.

7 We created the document that had all that  
8 information that I could pull off the PTO  
9 website, an internal document. And then once I  
10 had that info in the document, I went into  
11 Google search engine and just plugged in the  
12 mark.

13 And once I was able to confirm that I had  
14 the right website corresponding with the  
15 trademark -- PTO website, I pulled the home  
16 page screen shot. Just did a print screen, hit  
17 the button, and copied it into a Word document.

18 Q. So, for example, what did you put in the Google  
19 search box to pull?

20 A. The mark.

21 Q. The mark. And this was the mark that was on  
22 the requests for admissions?

23 A. Correct.

24 Q. And then how did you determine if -- when  
25 you -- after you hit -- after you searched on

1 Google, how did you determine whatever the  
2 website was that popped up was the appropriate  
3 website for that mark?

4 A. Using the information from the trademark  
5 website -- the PTO trademark website. Just  
6 making sure that the product was the same.

7 A lot of times the -- the company and the  
8 address would be exact. So, you know, there  
9 was no denying that it was the correct website.  
10 But, yeah, just comparing the Google result  
11 with the trademark site.

12 Q. And were there marks for which there was no  
13 website you could find?

14 A. Not in -- in what I was searching. I didn't  
15 get very far. I believe I searched three  
16 marks, resulting in maybe eight websites.  
17 Eight to ten, maybe, websites.

18 Q. Do you remember the date you did this on?

19 A. Yes. This was June 20, and -- and I didn't get  
20 very far, like I said. And at the end of the  
21 day, I forwarded an e-mail to Heidi, our  
22 trademark paralegal, letting her know this is  
23 where I left off. I probably won't get back to  
24 this again today. And that's it.

25 Q. And you went in the order of the requests for

1 admissions?

2 A. Correct. In the order they're listed.

3 Q. And this is June 20, 2012?

4 A. Correct.

5 Q. And how do you know all this, the date and  
6 everything?

7 A. Going back through e-mails. Luckily, we keep  
8 all e-mails sent on matters. So I was able to  
9 go back and look at all the e-mails I had sent  
10 to Heidi and any e-mails I had forwarded to  
11 you, kind of put back a timeline.

12 Q. Okay. And do you remember which marks you  
13 searched, or some of the marks that you  
14 searched?

15 A. I remember Purtech, because I think that one  
16 resulted in the most screen shots. There was a  
17 lot of companies out there using that mark.

18 Let's see. Which other one? The Purgear.  
19 I did that one. And that's all I can recall  
20 off the top of my head.

21 Q. Okay.

22 MS. LOESCH: That's all I have.

23 EXAMINATION

24 BY MR. HAWKINS:

25 Q. I'm sorry, can I get your last name again?

1 A. Beier, B-E-I-E-R.

2 Q. Great. Ms. Beier, I just have a few questions  
3 for you.

4 As far as the screen shots that you did  
5 pursuant to Salumeh's request, did you do an  
6 analysis yourself?

7 A. An analysis as to?

8 Q. Well, what I'm familiar with legal assistants,  
9 a lot of times they are given certain job  
10 responsibilities to analyze something, to take  
11 data and do any kind of analysis. Did you do  
12 any analysis yourself?

13 A. No.

14 Q. Would it be fair to say what you did was  
15 basically clerical in nature; you were given a  
16 list and they said pull this particular screen  
17 shot and pull it up for me?

18 A. Well, in addition to those instructions, I was  
19 also told to make sure that you've got the  
20 right company. I mean, are they selling the  
21 correct product; are they -- compared to what's  
22 listed on the trademark website. So I guess  
23 that was a bit of analysis there.

24 Q. Right. As far as Exhibit Number 127 and the  
25 printout that you have, can you tell me whether

1 or not these particular companies are currently  
2 selling these products?

3 A. Currently as of today?

4 Q. Yeah. Do you have any personal knowledge of  
5 that?

6 A. No. No.

7 Q. Do you know when they would have started to  
8 sell those products?

9 A. No, sir.

10 Q. Do you know whether or not the companies  
11 identified in Exhibit Number 127, whether or  
12 not they used any other trade channels or forms  
13 of advertising other than the Internet?

14 A. I do not know that.

15 Q. Do you know as far as whether or not consumers  
16 have a recognition of these marks at all or to  
17 the extent of their recognition?

18 A. Again, I do not know that.

19 MR. HAWKINS: Thank you.

20 EXAMINATION

21 BY MS. LOESCH:

22 Q. I just wanted to clarify one thing.

23 When he asked you about analysis, when you  
24 looked at these marks, how did you know that  
25 this website correlated with the registration?

1 A. Sometimes on the websites you find trademark  
2 information, and they'll list their registered  
3 trademarks. Mostly, it had -- the companies  
4 listed on the trademark website corresponded  
5 with the company on the -- on the Google search  
6 result and the mark was identical. I mean, a  
7 lot of times they have an image of the mark  
8 that they use and, bam, it's there, identical  
9 in the website.

10 Q. Did you also look at, like, if the products,  
11 the description on the registration was the  
12 same?

13 A. Correct. Yes. I mean, if it was -- if it was,  
14 say, vitamins, I would make sure I wasn't  
15 pulling over a software company. That sort of  
16 thing.

17 MS. LOESCH: Okay. That's it.

18 MR. HAWKINS: Thank you for your time.

19 (Whereupon, the deposition of MARLA BEIER  
20 was concluded at approximately 4:47 p.m.)

### Puraflo wastewater treatment system

**Overview**

The Puraflo® wastewater treatment system is a peat biofilter incorporating peat fiber to provide high quality wastewater treatment for residential and light commercial developments.

Using a unique peat filter media, Puraflo is one of the highest performing, most reliable wastewater treatment systems on the market today. It has proven itself for nearly 20 years in a large number of US residential and light commercial applications, as well as sites subject to intermittent use or existing sites needing repairs or upgrades.

The greatest benefits are derived from the reliability and simplicity of how Puraflo works. The system does not require blowers or recirculating pumps, an important feature for any residential wastewater treatment system.

Following a septic tank containing an effluent filter, wastewater is time dosed into the Puraflo wastewater treatment system. Time dosing is an important aspect of the design that protects the drain field and ensures high wastewater treatment performance with ammonia levels of <math>< 5\text{mg/l}</math>. For sites where power is available a siphon system can be utilized for time-dosing.

**Other benefits include:**

- Ability to disperse treated effluent directly through a gravel pad beneath the Puraflo modules.
- Very low operating cost.
- Factory assembly reduces installation costs.
- The modular design of Puraflo allows phasing of construction.

## WaterPure Inc. Purifica of America

Images/Products [0] [Send email](#)

With headquarters in Tampa and distributors throughout the state of Florida, Purifica of America introduces consumers to affordable water filtration technology.

With a strong, proven track record of 10 years in South America, Purifica Brazil lends its history and credibility to Purifica and Purifica of America. Purifica's water filtration systems implement filtration by gravity technology in three stages:

Once tap water is poured into the upper chamber, in the first stage, the Purifica Purifica Filter Element retains sediments, organic materials, and micro particles present in the water.

The filter also removes chlorine, trihalomethanes, ammonia, and heavy metals such as mercury, lead, cadmium, and chrome. It also eliminates bacteria, and bad odor and taste.

Among the materials used in the filter is the babassu coconut from Brazil. The babassu recently made headlines as it is part of the "biofuel" recently used by Virgin Atlantic on a flight from London to Amsterdam.

Next, a Far Infrared Plate, developed by Purifica Brazil, emits infrared energy that replaces the water's natural properties and revitalizes the liquid.

Lastly, a magnetic field, also developed by Purifica Brazil, transforms the water into a more powerful solvent capable of eliminating the body's toxins.

Industrial Water Treatment Solutions

**Algicide® 325 Algicide**  
**- General Product Information**

Algicide® 325 has been developed to control algae in industrial water systems and ornamental fountains.

The active ingredient of Algicide® 325 is 2-chloro-4-(6-chlorophenyl)-6-ethoxy. The CAS number is 59154-1-3.

**Typical physical properties**

appearance:	white-colored dispersion
active ingredient content:	3.0-4.2% w/w
pH (undiluted product):	8-9
viscosity:	400-1000 cP
solubility in water of active ingredient:	soluble at low concentrations 8.6 mg/l at 20° C

**Chemical reactivity**  
 The active ingredients are stable in both neutral and alkaline solutions. It is unaffected by oxidizing chlorines.

**Thermal stability**  
 Algicide® 325 is stable over wide pH ranges and to UV light.

**Logistics**

classification:	harmful for supply
packaging:	not hazardous for transportation HDPE Lining drum, DOT spec 34 55 U.S. gallons (210 liters) height 36.3 in (922 mm) diameter 22.5 in (572 mm)
gross weight:	472 lb
net weight:	470 lb

KINETICO  
 Making water safe again

**PRODUCTS**

**Kinetico Purefecta Biopure Water Systems**

*"Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers." - Environmental Protection Agency*

The above warning is the lead statement included on Water Quality Reports all over the nation. Since the passage of the Safe Drinking Water Act, consumers are becoming more and more concerned about the quality and safety of our drinking water. They have been looking for a brand new system to produce microbiologically pure water that is free from bacteria, viruses, and parasites. Not just pure, but Biopure!

**Introducing Purefecta**

A revolution in water treatment is here and it's called Purefecta. Purefecta is the result of an extensive partnership between Pall Corporation, a 50 year old global leader in the medical, defense and aerospace fields and Kinetico with 33 years of experience in water treatment. Over three years in development and certification, Purefecta is the only system that can remove greater than 99,999,999% of waterborne bacteria, 99.99% of waterborne viruses, and 99.999% of waterborne protozoan cysts from drinking water.

[See the complete list of Purefecta's Microbiological Contaminant Capabilities.](#)

**NSF** No other single water treatment system offers Biopure water. The Purefecta has undergone rigorous testing and meets the USEPA's Guide Standard and Protocol for Microbiological Water Purifiers. After an extensive certification process through NSF on the Pall Kinetico Purefecta, the NSF created a new Protocol Certification (NSF Protocol P231) and the Purefecta stands alone as the only product of its kind available today.

### WORLD-CLASS CONTRACTING

Purac is Lockey Water Group's brand for contracting operations. The basic for our offering is the collective expertise of our personnel. This brings together know-how on processes, construction and contracting with the long and wide experience of our project managers, site managers and our booming staff. The power to create and the capability to build and maintain good relations with customers, suppliers and business partners, both locally and globally, are other success factors.

Purac is a world leader in contracting for treatment of wastewater, process water and drinking water, as well as innovative treatment of biological waste. The contracting business offers broad know-how and experience with our internally developed and licensed technologies for innovative solutions that deliver increased efficiency and more economic operation. To date, the contract has given us more than 4,000 contracting assignments in 70 countries.

Purac has decades of documented experience and can offer turnkey plants with function guarantees. We design solutions using the latest computer tools, methods and technologies, and then we supply, build and commission the plants for industrial and municipal customers worldwide.

Few other companies can compete with our list of successfully completed contracts for customers with widely differing conditions and requirements, and each plant is unique. Therefore, we are proud of our ability to customize plants and working methods to local conditions: technical, legal, traditional and cultural.

Purac has a presence in eight countries and carries out assignments worldwide. It is particularly important to increase our presence and assignments in the most expensive parts of the world, which accounts for our investment in growth in countries such as China. Purac constantly provides new processes to increase efficiency, decrease operating and maintenance costs, and save space.

### See our

[performance system](#)

Purac is a part of Lockey Water Group, an independent, privately-owned Swedish group, which offers contracting, products and servicing for water treatment and biogas production.

We are established on three continents and have to date completed contracts in 70 countries worldwide.

With sales of around USD 70 million, Lockey Water Group is a leading company in its field.

In 1998 Purac got its certificate according to ISO 9001, see our [Quality system](#). In 2006 we also got our certificate according to ISO 14001, see our [Environmental policy](#).

**Corporate Overview**

PURE Bioscience, Inc. (NASDAQ: PURE) develops and markets technology-based bioscience products that provide non-toxic solutions to numerous global health challenges. PURE's proprietary high efficacy/low toxicity bioscience technologies including its silver dihydrogen citrate-based antimicrobials, represent innovative advances in diverse markets and lead today's global trend toward industry and consumer use of "green" products while providing competitive advantages in efficacy and safety. PURE Bioscience, headquartered in El Cajon, California, (San Diego metropolitan area), was incorporated in 1992.

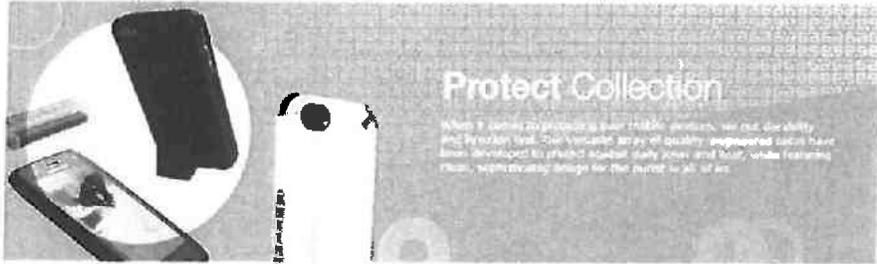

To order PURE™ HARD SURFACE Disinfectant, [CLICK HERE](#)

EPA-registered PURE™ Hard Surface disinfectant and food contact surface sanitizer provides an unparalleled combination of high efficacy and low toxicity with 30-second bacterial kill times and 24-hour residual protection. PURE Hard Surface completely kills resistant pathogens like MRSA and also effectively eliminates dangerous fungi and viruses including HIV, Norovirus, Influenza A, Avian Influenza and H1N1. PURE Hard Surface is registered for use on food contact surface and is gentle enough to be used in sensitive children's areas.

#### About PuriCore

PuriCore is a water-based clean technology company focused on developing and commercializing proprietary products that safely, effectively, and reliably kill contagious pathogens. These products address major public health threats of MRSA, seasonal influenza, H1N1, and other viruses, including H5N1 avian influenza and H1N1 swine influenza, H5, polio virus, norovirus, noron, and dengue.

Our products penetrate microscopic and the nasal cavity and are absorbed into the human body to fight pathogens. Hypochlorous acid is highly effective in killing MRSA, H5, polio virus and dengue.

## SIEMENS

### About Us

#### Siemens Water Technologies

Siemens Water Technologies is the world's leading water and wastewater treatment company. We provide the most comprehensive, cost-effective and reliable treatment systems and services for reclamation and reuse of water for our industrial, institutional, commercial, and municipal customers.

With the broadest range of technologies, a nationwide service network, and a long history of innovation and leadership in the water treatment market, Siemens Water Technologies offers everything from emergency water supply and conventional treatment processes to high-tech microfiltration systems. Our innovations combine treatment processes into smaller, more efficient treatment packages. We have also developed alternate disinfection systems that don't use chlorine.

We deliver market-leading technologies by offering systems and controls that allow treatment plants to use less energy in their operations and plant assets that identify energy saving opportunities.

Our best-in-class water and wastewater treatment brands include the leading technology innovators like USFilter, Inco, Water Treatment, Enviro, Permuto, Silenco, Alvac, & Termin. Zimpro, Vianco, Genera, Fize, Airo-mat, Davo and many more.

#### Municipal Technologies and Services

Municipalities depend on water and waste water treatment technologies designed for operational efficiencies and lower life-cycle costs. That's why we continuously strive to engineer our technologies to the highest standards - yours. Our best-in-class treatment brands are grouped by:

- [Wastewater Treatment](#)

***pura-tech***  
**Whole Home Conditioner & Softener Systems**

Big performance in half the space. Although compact in size, the pura-tech whole home water softener is big on performance. Designed to provide any size family with sparkling soft water without the hassle of stain-causing iron, the pura-tech continually outperforms conventional water softeners with a usable capacity of 32,500 grains of hardness removal with each regeneration.

**Soft Water Advantages**

Hardness, iron and sediment, even in low amounts can cause a wide variety of problems. They could range from simple aggravations like dishwasher spots and shower scale to economic waste through stained or ruined laundry to major expenses such as a ruined water heater.

In one compact unit, the pura-tech Water Conditioner treats hardness, sediment and iron. The result is the peace of mind that your sparkling clear water is better for your appliances and laundry, and most importantly, your family.

- Pura-tech's patented 11-inch dual compartment tank and versatile computer-controlled system team up for high efficiency and environmentally friendly water treatment system.
- Saves Water - the pura-tech system uses less than 18 gallons of water for regeneration. Some other conventional units use 40 to 100 gallons.
- Saves Salt - the pura-tech system received the Water Quality Association efficiency validation - more than 5,400 grains of capacity per lb. of salt.
- Quick Regeneration - the pura-tech system regenerates in less than 15 minutes.
- Soap Savings - pura-tech water will save you up to 75% on all soap products. Plus, it eliminates soap scum which causes dingy laundry, dry skin, bathtub rings, spotted dishes and silverware and diaper rash.
- Stain Fighters - no more ugly stains and soap residue on fixtures and glassware. Plus, fewer costly plumbing repair bills. Pura-tech water reduces build-up of scale-forming hardness in water heaters and pipes.
- Laundry - Cleaner, brighter, softer laundry costs less with pura-tech quality water.
- Hair - pura-tech water rinses away soap film for a smoother shave as well as softer, shinier, more manageable hair. Plus, it increases razor blade life and reduces the need for special hair rinses and conditioners.
- Warranty - 3 Years - 100% of all parts  
 10 Years - 100% on cabinet, resin tank and valve body

**Computerized Controller**

- LCD displays the amount of capacity remaining until the next regeneration, in gallons or liters.
- Full safe capacity guard assures a constant supply of soft water.
- Power Outage Protection - holds cycle programs indefinitely.
- All cycles are easily programmed with the touch of a button.
- Easy-to-set, adjustable reserve capacity.
- Turbo - Light flashes when water is in use. This convenient feature can also be used to signal your attention when there is excessive water usage that may be due to
