NOTICE OF OPPOSITION

Commissioner for Trademarks
P.O. Box 1451
Alexandria, VA 22313-1451

ATT: BOX TTAB FEE

Dear Sir:

Broadcom Corporation, a California corporation, located and doing business at 5300 California Avenue, Irvine, California 92617 (hereinafter referred to as "Opposer") believes that it will be damaged by the registration of U.S. Trademark Application Serial No. 77/855,572 for the mark BROADCHIP in International Classes 9 and 42 (hereinafter referred to as "Applicant's Application"), owned by Broadchip Technology Group Ltd, a corporation organized under the laws of China, located and doing business at 33 Leshan Road, Building 1, Suite 305, Shanghai 200030, China (hereinafter referred to as "Applicant") and therefore opposes the same.

A description of Applicant's application is as follows:

Mark: BROADCHIP
Serial No.: 77/855,572
Goods/Services: Handheld and mobile digital electronic devices in the nature of mobile data

terminals and secure terminals for electronic transactions, namely, telecommunication terminal for the sending and receiving of telephone calls, faxes, electronic mail, and other digital data; MP3 and digital audio players; handheld computers, personal digital assistants, electronic personal organizers, handheld computers in the nature of electronic notepads; telephones, mobile cellular telephones; computer game consoles for use with an external display screen or monitor, videophones, cameras; software for the redirection of messages, Internet e-mail, and other data to one or more electronic handheld devices from a data store on or associated with a personal computer or a server; software for the synchronization of data between a remote station or device and a fixed or remote station or device; computer hardware and software for providing integrated telephone communication with computerized global information networks; semiconductors; computer chipsets for use in transmitting data to and from a central processing unit; semiconductors and computer chipsets used in transmitting data to and from a central processing unit for communication, wireless communication, industry control and connectivity; computer software for communication, wireless communication, industry control and connectivity, namely, communication software for providing access to the Internet, communications software for connecting computer network users and global computer networks, computer software for communicating with users of hand-held computers, computer software for wireless content delivery, computer software for controlling and managing access server applications, industrial process control software, computer firmware for using and controlling wireless broadband communication technology and to enable wireless communication, communication over the internet, and communication by connecting computer network users and global computer networks in Class 9; and Design and development of computer hardware and software; design and development of telecommunication-related computer hardware and software; design and development of semiconductor-related computer hardware and software; computer hardware and software consulting services for others; consulting in the field of telecommunications technology, namely, telecommunication hardware and software consulting services for others; multimedia and audio-visual computer software consulting services for others; computer programming; development of voluntary standards for developing telecommunication systems, wireless systems, industry control systems, semiconductors, computer systems, databases and applications; consulting in the fields of telecommunications technology and information technology, namely, technical consultation services for developing telecommunication systems, wireless systems, industry control systems, semiconductors, computer systems, databases and applications; technical information relating to computer hardware and software provided on-line from a global computer network, telecommunication network and the Internet; creation and maintenance of web-sites for others; providing search engines for obtaining data on a global computer network; computer services, namely, creating indexes of service information, websites and other resources available

on global computer networks for others; hosting of digital content on the Internet, namely, hosting of digital content composed of technical information provided over a global computer network in Class 42.

Filed: October 22, 2009

Filing Basis: 1(a) Use for Classes 9 and 42 based on alleged use since August 1, 2007

As grounds for opposition, it is alleged:

1. Opposer is a global leader in the computer, communications and electronic industries and offers consumers a diverse product portfolio, including, but not limited to, semiconductors, chipsets, software, firmware, computer hardware, processors, data processing equipment, storage and network controllers and devices, adapters, and other solutions and products for numerous applications, including, but not limited to, networking, communications, interoperability, computers, and consumer electronics, all in connection with its BROADCOM[®]

mark,  logo, and other marks, such as, BROADCORE[®], BROADRANGE[®], and BROADVOICE[®] (hereinafter referred to collectively as the “BROADCOM Marks”). These solutions support the core mission of Broadcom: CONNECTING EVERYTHING[®]. In addition, Opposer provides various services to its customers, including, but not limited to, research and design of computer networks, computer hardware, computer software, integrated circuits, semiconductors, chipsets, and communications hardware and software; providing access to electronic communications networks and electronic databases; computer services, consulting services, services related to standards applications and policy, providing on-line searchable databases, and various technical support and customer support services, all in connection with its BROADCOM Marks.

2. Opposer is the owner of and relies on U.S. Trademark Registration No. 2,595,174 for the mark **BROADCOM** for “design of computer hardware, integrated circuits,

communications hardware and software, and computer networks for others” in International Class 42, which registered on the Principal Register on July 16, 2002. Said registration is based on an application filed in the United States Patent and Trademark Office (“PTO”) on February 4, 2000. Thus, the registration and filing dates of Opposer’s mark are prior to the filing date of, as well as the alleged first use date set forth in, Applicant’s Application.

3. Opposer is also the owner of and relies on U.S. Trademark Registration No. 2,392,925 for the mark **BROADCOM** for “computer hardware; integrated circuits; and software for controlling and using integrated circuits” in International Class 9, which registered on the Principal Register on October 10, 2000. Said registration is based on an application filed in the PTO on March 23, 1999. Thus, the registration and filing dates of Opposer’s mark are prior to the filing date of, as well as the alleged first use date set forth in, Applicant’s Application.

4. Opposer is also the owner of and relies on U.S. Trademark Registration No. 2,132,930 for the mark **BROADCOM** for “computer hardware and software for digitally operating upon signals in a network system to recover the information represented by such signals and for recovering and decoding video and audio information from signals transmitted by a direct broadcast satellite” in International Class 9, which registered on the Principal Register on January 27, 1998. Said registration is based on an application filed in the PTO on April 18, 1994. Thus, the registration and filing dates of Opposer’s mark are prior to the filing date of, as well as the alleged first use date set forth in, Applicant’s Application.

5. Opposer is also the owner of and relies on U.S. Trademark Registration No.

2,625,799 for the mark  for “design of computer hardware, integrated circuits, communications hardware and software, and computer networks for others” in International

Class 42, which registered on the Principal Register on September 24, 2002. Said registration is based on an application filed in the PTO on February 4, 2000. Thus, the registration and filing dates of Opposer's mark are prior to the filing date of, as well as the alleged first use date set forth in, Applicant's Application.

6. Opposer is also the owner of and relies on U.S. Trademark Registration No.

2,326,387 for the mark  for "computer hardware; integrated circuits; and software for controlling and using integrated circuits" in International Class 9, which registered on the Principal Register on March 7, 2000. Said registration is based on an application filed in the PTO on March 23, 1999. Thus, the registration and filing dates of Opposer's mark are prior to the filing date of, as well as the alleged first use date set forth in, Applicant's Application.

7. Opposer is also the owner of and relies on U.S. Trademark Registration No. 2,951,950 for the mark **BROADCORE** for "computer hardware; integrated circuits; and software for controlling and using integrated circuits" in International Class 9, which registered on the Principal Register on May 17, 2005. Said registration is based on an application filed in the PTO on February 4, 2000. Thus, the registration and filing dates of Opposer's mark are prior to the filing date of, as well as the alleged first use date set forth in, Applicant's Application.

8. Opposer is also the owner of and relies on U.S. Trademark Registration No. 3,490,624 for the mark **BROADRANGE** for "computer hardware; integrated circuits; computer chipsets; integrated circuit chipsets; computer hardware, integrated circuits, computer chipsets, and integrated circuit chipsets for communication, wireless communication and connectivity; firmware for using and controlling wireless broadband communication technology and to enable communication and wireless communication; computer software for communication, wireless

communication, and connectivity, and for controlling and using integrated circuits; computer software embedded or contained in computer hardware for communication, wireless communication, and connectivity, and for controlling and using integrated circuits” in International Class 9, which registered on the Principal Register on August 19, 2008. Said registration is based on an application filed in the PTO on August 9, 2006. Thus, the filing date of Opposer’s mark is prior to the filing date of, as well as the alleged first use date set forth in, Applicant’s Application.

9. Opposer is also the owner of and relies on U.S. Trademark Registration No. 2,913,502 for the mark **BROADVOICE** for “computer hardware; integrated circuits; and software for controlling and using integrated circuits” in International Class 9, which registered on the Principal Register on December 21, 2004. Said registration is based on an application filed in the PTO on August 14, 2001. Thus, the registration and filing dates of Opposer’s mark are prior to the filing date of, as well as the alleged first use date set forth in, Applicant’s Application.

10. True and correct copies of printouts from the electronic database records of the PTO showing the current status and title of the registrations set forth in Paragraphs 2-9 for these trademarks, as well as true and correct copies of the Certificates of Registration, are attached hereto as Exhibit A.

11. All of the registrations relied upon herein by Opposer are valid, subsisting, unrevoked, and uncanceled. Opposer’s registrations constitute *prima facie* evidence of the validity of these registered marks, the registration thereof, and of Opposer’s ownership of the marks shown therein as provided in Section 33(a) of the Trademark Act. All of Opposer’s registrations relied on herein constitute constructive use of the marks shown therein, conferring a right of priority nationwide in effect, as of the filing dates of the applications therefore as

provided in Section 7(c) of the Trademark Act. The filing dates of Opposer's registrations and the dates of actual first use of the marks relied on herein are all prior to the filing date of Applicant's Application. All of Opposer's registrations relied on herein also constitute notice to Applicant of Opposer's claim of ownership of the marks shown therein as provided in Section 22 of the Trademark Act.

12. Opposer's Registration Nos.: 2,392,925; 2,132,930; 2,625,799; 2,326,387; 2,595,174; and 2,913,502 are incontestable. Opposer's incontestable registrations constitute *conclusive* evidence of the validity of the registered mark, the registration thereof, and of Opposer's ownership of the mark shown therein, as provided in Section 33(b) of the Trademark Act.

13. Since prior to the filing date of, and alleged first use date set forth in, Applicant's Application, Opposer has continuously used and promoted the BROADCOM Marks in interstate commerce in connection with its various goods and services. By virtue of Opposer's continuous and substantial use, the BROADCOM Marks have become identifiers of Opposer and its goods and services, and distinguish Opposer's goods and services from the goods and services of others. As a result, Opposer has built up, at great expense and effort, valuable goodwill and consumer recognition in its BROADCOM Marks.

14. In addition to the protection afforded Opposer by its federal trademark registrations, Opposer has extensive common law rights in the BROADCOM Marks throughout the United States. Opposer's common law rights in the BROADCOM Marks were established long before and predate both the filing date of, and alleged first use date set forth in, Applicant's Application. Opposer's rights in the BROADCOM Marks are prior and superior to Applicant's BROADCHIP mark.

15. Applicant's BROADCHIP mark is confusingly similar to Opposer's BROADCOM Marks, individually and as an overall family of marks. Moreover, the goods and services covered under Applicant's Application are identical to or highly related to the goods and services offered and registered by Opposer under its BROADCOM Marks, and the respective goods and services are marketed or will be marketed to the same consumers and potential consumers in the same channels of trade.

16. Opposer will be damaged by the registration of Applicant's BROADCHIP application in that the BROADCHIP mark so resembles Opposer's BROADCOM Marks registered in the PTO, and in which Opposer owns common law trademark and service mark rights, as to be likely, when used on or in connection with the goods and services identified in the BROADCHIP application, as to cause confusion, or to cause mistake or to deceive within the meaning of Section 2(d) of the Trademark Act, 15 U.S.C. § 1052(d).

17. In view of Opposer's prior rights in its BROADCOM Marks, individually and as an overall family of marks, Applicant is not entitled to registration of the BROADCHIP mark pursuant to Section 2(d) of the Trademark Act, 15 U.S.C. § 1052(d).

18. Further, through extensive use, promotion, advertising, and the success of Opposer's BROADCOM Marks, they have become famous for Opposer's goods and services since a date prior to the filing date of, and alleged first use date set forth in, Applicant's Application.

19. Applicant's use and registration of the BROADCHIP mark will cause or is likely to cause dilution of the distinctive quality of Opposer's BROADCOM Marks within the meaning of Section 43(c) of the Trademark Act, 15 U.S.C. 1125(c), and will lessen the ability of Opposer's BROADCOM Marks to distinguish Opposer's goods and services, regardless of the

category of goods and/or services in connection with which Applicant uses or intends to use its BROADCHIP mark. By reason of the foregoing, Opposer will be damaged by the registration of the mark shown in Applicant's Application.

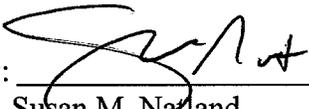

WHEREFORE, Opposer prays that U.S. Trademark Application Serial No. 77/855,572 be rejected and stricken, that no registration be issued thereon to Applicant, and that this Opposition be sustained in favor of Opposer.

Please charge Deposit Account No. 11-1410 to cover the opposition fee and any additional fees which may be required, or credit any overpayment to this account.

Respectfully submitted,
