Declaration of Joel Beling dated June 29, 2015

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE TRADEMARK TRIAL AND APPEAL BOARD**

Opposition No. 91203884

Ennis Inc.

In re Registration No. 3,372,884
(COLORWORX), Registered
January 22, 2008

v.

Joel L. Beling d/b/a Supa Characters Pty Ltd

PUBLIC VERSION

DECLARATION BY JOEL BELING

1. I am the applicant in the present proceeding. I submit this declaration pursuant to Trademark Rule 2.20. It contains a statement of the facts relevant to my application to register my COLOR WARS Mark in the opposition proceeding against Ennis. Inc (“Ennis”).
2. For the record, I allege no attorney misconduct in this declaration against Ennis’ current and former attorneys.
3. I am making this declaration in my capacity as applicant in the above matter and as Director of Supa Characters Pty Ltd.
4. Supa Characters Pty Ltd is a character licensing company that I founded in 2011, having its place of business at 1 Mirboo Court, Dallas, Victoria, 3047, Australia (hereinafter referred to as “My Company”).
5. By reason of my position with my Company I am very familiar with the **COLOR WARS** trade mark intended to be used by My Company in the United States and around the world.
6. I have full and unrestricted access to the records of My Company and am authorized to make this Declaration on behalf of My Company. The information contained in this declaration comes from my own personal knowledge and belief, from information which I have obtained from the books and records of My Company kept in the ordinary course of business which I have inspected, and from public records and information.

7. I regard and designate the information which is disclosed in this Declaration to be TOP SECRET and COMMERCIALLY SENSITIVE pursuant to the Board's Standard Protective Order.

8. By way of background, My Company is an Australian-based company specializing in the creation of high concept, marketable characters for licensing use in, inter alia, motion pictures, television, digital media, video games, comic books, graphic novels, books, action figures, clothing, footwear, stationary, toys, theme parks, private and corporate functions, homewares, gifts and novelties, food and beverages, and collectibles. Now shown to me and marked **Exhibit JB-1** is a copy of additional material relating to My Company. I may be mistaken, but at the time I issued my press releases I had never heard of the concept of trademark bullying or linked Ennis' conduct in this proceeding with trademark bullying. As at June 29, 2015, my press release dated 9th May, 2013, is available online at the following address:

<http://www.onlineprnews.com/news/377955-1367976708-supra-characters-to-compete-with-disney-marvel-and-dc-comics-in-hollywood-character-licensing-biz.html>

17.

*** CONFIDENTIAL/REDACTED ***

18. I filed U.S. Trademark Application Serial No. 85/324,443 for the mark COLOR WARS for classes 016, 028 and 041 on May 18, 2011 based on my intent to use the mark in commerce. I have a bona fide intent to use the mark COLOR WARS in commerce in the United States and have a mountain of evidence to support my defense to Ennis' opposition.

19. I filed U.S. Trademark Application Serial Nos. 85/324,453 and 85/324,457 for the marks COLOR WARS: MY FAVOURITE COLOUR IS BLUE/BLACK/CYAN/BROWN/PINK/YELLOW/WHITE/VIOLET/RED/ORANGE/GREEN/GRAY and COLOUR WARS: COLOUR-LECTION: VOTE BLUE!/BLACK!/CYAN!/BROWN!/PINK!/ YELLOW!/WHITE!/VIOLET!/RED!/ORANGE!/GREEN!/GRAY!, respectively, for goods and services in international class 025 on May 18, 2011 based on an intent to use the mark in commerce. Now shown to me and marked **Exhibits JB-8A** and **JB-8B** are copies of the TESS search results for U.S. Trademark Application Serial Nos. 85/324,453 and 85/324,457. The marks in these two applications are based on the same goods or properties (color-based characters and concepts) as those underpinning U.S. Trademark Application Serial No. 85/324,443. Ennis did not oppose my applications to register the marks in U.S. Trademark Application Serial Nos. 85/324,443 and 85/324,443 and these have proceeded to registration (registration nos.: 4124579 and 4120865). I have a bona fide intent to use the marks COLOR WARS: MY FAVOURITE COLOUR IS BLUE/BLACK/CYAN/BROWN/PINK/YELLOW/

WHITE/VIOLET/RED/ORANGE/GREEN/GRAY and COLOUR WARS: COLOUR-
LECTION: VOTE BLUE!/BLACK!/ CYAN!/BROWN!/PINK!/YELLOW!/WHITE!/
VIOLET!/RED!/ORANGE!/GREEN!/GRAY!, in commerce in the United States and have a
mountain of evidence to support my defense.

20. I was forced to amended the identification of some of the goods and services in U.S.
Trademark Application Serial No. 85/324,443 to be limited to the “field of superhero and cartoon
characters” on May 18, 2011, by virtue of the forced-choice format of the application.

21. At the outset of the present litigation I had attempted to narrow the issues in dispute so as
to minimize the time and expenses of both parties and the Board. I wrote the following email to
Ennis’ former attorney, Mr. Scott A. Myer, on February 27, 2012 (at this stage I had not filed my
Answer to Ennis’ Notice of Opposition):

RE: Request for Opposition Form_
From: Joel beling (joelbeling@hotmail.com)
Sent: Monday, 27 February 2012 2:06:24 AM
To: smeyer@chalkerflores.com

Scott,

Do you mind asking your client to provide a one page or bullet point statutory declaration
particularising your client's company background, ie. Number of stores across the U.S. and
abroad, annual and historical sales data, advertising expenditure, product lines, etc. If
I had this information and it satisfied me I may be prepared to concede your claims as to prior
history/reputation, etc.

Also, can you please refer me to internet references of your client's business.

If this is done we could focus on the confusion/deception issues.

Thanks

Joel

I received no response from Mr. Myer on Ennis’ behalf to this email. Although I was not aware
of the procedure at the time, in February 2012, I would have happily agreed to deal with Ennis’
opposition via the Board’s Accelerated Case Resolution procedure.

22. I believe that Ennis is not likely to be harmed or damaged by the registration of my COLOR WARS Mark for the following reasons:

- i) While the identification of goods in International Classification 016 of U.S. Trademark Application Serial No. 85/324,443 for the mark COLOR WARS lists numerous items that are printed goods and are not restricted to the “field of superhero and cartoon characters,” my COLOR WARS range refers to highly distinctive color-based characters, stories and concepts, such as the Gray Ghoul, the Pink Princess, and the Green Gargoyle.
- ii) Ennis’ mark is the term COLORWORX and a design element. Ennis’ mark, by its own admission, “has the capacity to *significantly distinguish*, and in fact *significantly distinguishes*, [its] goods and services from the goods and services of other traders who use the marks “ColorWorx,” “Color Worx,” “ColorWorks,” and/or “Color Works.””
- iii) Ennis’ COLORWORX mark has a distinctive design element, a crosshairs logo, whereas there is no design element in my COLOR WARS Mark;
- iv) When spoken the mark COLOR WARS is distinctively different from the word COLORWORX: the former has a soft-sounding ending, while the latter has a harder-sounding ending. In my opinion, native English speaking consumers with normal hearing ability would experience no difficulty distinguishing the two terms; the only consumers who would experience difficulty distinguishing the two terms are perhaps those for whom English is a second language or consumers with a hearing impairment.
- v) The semantic difference between the marks COLORWORX and COLOR WARS. In my opinion the word WARS in my mark has a highly emotive, loaded and immediately recognizable meaning and impression, while while the suffix “-WORX” in Ennis’ mark is nondescript and ordinary.

23. On or about June 20, 2015 I downloaded a number of current status and title reports for third party trademark applications or registrations involving the terms COLORWORX, COLOR WORX, COLOR WORKS, and COLORWORKS from the USPTO's TSDR system. I believe these third party applications or registrations are relevant to showing the meaning of Ennis' COLORWORX Mark, or the COLORWORX portion of Ennis's Mark; the sense in which the terms COLORWORX, COLOR WORX, COLOR WORKS, and COLORWORKS are employed in the marketplace, or to show the ordinary use of the terms COLORWORX, COLOR WORX, COLOR WORKS, and COLORWORKS. Now shown to me and marked **Exhibits JB-9A-JB-9L** are the current status and title reports from the TSDR system for the following trademark application serial numbers: 74527204, 74562261, 75072159, 75595803, 75615329, 75643180, 76636412, 77393203, 78388576, 78421318, 78698743, and 86240567.

24. I genuinely believe that in this proceeding, Ennis has engaged in what I call trademark bullying or overenforcement of its rights in its COLORWORX Mark and design. In other words, I believe that Ennis has undertaken enforcement measures based on an unreasonable interpretation of the scope of its rights in its COLORWORX Mark and design for the purpose of intimidating me into compliance with Ennis' demands. I genuinely believe that trademark bullying or overenforcement should be a valid and legally sufficient affirmative defense. Now shown to me and marked **Exhibit JB-10** are journal, newspaper and other articles I downloaded from the publicly accessible Lexis Nexis legal database on or about June 20, 2015 which focus on or refer to trademark bullying or overenforcement.

25. The bases for my belief that Ennis has engaged in trademark bullying or overenforcement of its rights in its COLORWORX Mark include, but is not limited to, the following:

- a) Ennis failed to send a cease-and-desist letter to me to notify me of its rights in its COLORWORX Mark and design and my possible violation of those rights prior to commencing the current litigation;

- b) Ennis has claimed separate rights to portions of its COLORWORX Mark and design, such as to the word “COLOR,” the word “WORX,” the word “COLORWORX” and the design element, in addition to claiming rights to its COLORWORX Mark and design as a whole;
- c) Ennis has formally prosecuted an opposition to my application to register my COLOR WARS Mark in international class 041, despite the fact that in my opinion Ennis has never traded in goods or services in this class nor shown a bona fide intent to do so, and then withdrawn its opposition in international class 041;
- d) Ennis has informally prosecuted an opposition to my application to register my COLOR WARS Mark in international class 028, despite the fact that in my opinion Ennis has never traded in goods or services in this class nor shown a bona fide intent to do so;
- e) Ennis has on April 28, 2014, October 31, 2014 and November 25, 2014 attempted or purported to withdraw its opposition to my application to register my COLOR WARS Mark in international class 028 despite the fact that it never formally opposed my application to register my COLOR WARS Mark in international class 028, showing a complete lack of due diligence in prosecuting its case;
- f) Ennis has in my opinion engaged in abusive litigation tactics against me in this proceeding. I define an abusive litigation tactic as any litigation tactic which an objective person would regard as unreasonable, unfair or unethical when used against the opposing party. Now shown to me and marked **Exhibit JB-11** are examples of Ennis’ abusive litigation tactics in this proceeding.
- g) Ennis has failed to deny engaging in trademark bullying or abusive litigation tactics;
- h) On or about the 28th June, 2012, Ennis’ former attorney, Mr. Thomas G. Jacks, wrote to me via email and stated that Ennis “would prefer not to involve the TTAB in this matter”; and

i) Ennis has failed to instruct its attorneys to file a motion for sanctions against me in this proceeding for alleging trademark bullying or abusive litigation tactics against it.

For the above reasons, I genuinely believe that an affirmative defense based on trademark bullying or overenforcement should be created to protect me and trademark applicants in general from unfair, unreasonable and abusive pre-litigation and litigation conduct.

26. One authority which I believe supports my belief that Ennis has engaged in trademark bullying or overenforcement of its rights in its COLORWORX Mark and design is the Office of Governmental Affairs– United States Patent and Trademark Office’s *Report to Congress: Trademark Litigation Tactics and Federal Government Services to Protect Trademarks and Prevent Counterfeiting* (April 2011) (“*Report to Congress*”). Now shown to me and marked **Exhibit JB-12** is the *Report to Congress*.

27. The *Report to Congress* was cited by His Honor Judge Adlin (then an Interlocutory Attorney) in another T.T.A.B. *inter partes* opposition proceeding in which I was involved. Now shown to me and marked **Exhibit JB-13** is TTABVUE Doc. #12 dated September 12, 2012 from *Joel Beling v DC Comics*, opposition no. 91205751. The relevant reference is made at Note 5, on page 5.

28. From late December, 2013 to early January, 2014, I performed a series of internet searches concerning traders which use trademarks involving the terms COLORWORX, COLORWORX, COLORWORKS and/or COLOR WORKS in relation to the sale of goods and services in the United States. I printed out and scanned some of the pages from those websites (the exact dates and internet addresses are shown on the pages) and served them on Ennis in the two weeks preceding the close of discovery. Now shown to me and marked **Exhibits JB-14A-JB-14E** are copies of the pages from my internet searches.

I declare under penalty of perjury that the foregoing is true and correct to the best

of my knowledge and belief. Executed this 29TH day of June, 2015.

Dated: June 29, 2015

Respectfully submitted,

JOEL BELING

ARTICLE: TRADEMARK EXTORTION REVISITED: A RESPONSE TO VOGEL AND SCHACHTER

NAME: KENNETH L. PORT

TEXT:

\$=P217 INTRODUCTION

In Volume 103 of the Trademark Reporter, Jason Vogel and Jeremy A. Schachter published an article stating that "concerns regarding trademark bullying do not justify new legislation, and instead there are sufficient safeguards in the form of sanctions, declaratory judgment actions, reverse domain name hijacking provisions, self-help, social media, and Internet publicity to address egregious conduct by trademark counsel." ⁿ¹ They claim to agree with the positions of INTA, AIPLA and IPO--that there is nothing that can be learned or gained through Congressional action. They insist, rather, that the problem will resolve itself without having to involve legislation. I respectfully dissent from these views. Mr. Vogel and Mr. Schachter's position, as well as the INTA, AIPLA and IPO, is purely anecdotal and unsupported by any data. I provide here an analysis of real cases based on real data that suggests that trademark bullying is a significant issue. In fact, the pervasiveness of trademark bullying is, statistically, as prevalent as the instances in which money damages are awarded to plaintiffs.

In 2008, I published an article titled *Trademark Extortion: The End of Trademark Law* ⁿ² where I discovered and reported alarming trends in trademark litigation. Specifically, the number of cases reaching a trial on the merits was falling drastically since the year 2000. The number of cases where damages were awarded and the amount of damages awarded were similarly falling--in fact, plaintiffs were awarded money damages only 5.5% of the time. ⁿ³ Treble damages were claimed more often but awarded less frequently and attorney's fees also showed decline. These trends occurred even though the number of cases initially filed continued to increase over time. ⁿ⁴

\$=P218 In *Trademark Extortion*, I argued that this was evidence that trademarks were being used for something other than the assertion of a right. ⁿ⁵ Rather than reducing transaction costs by promoting business goodwill, trademark litigation tactics--extortion, if you will--were effectively increasing the cost of market entry for third parties. Specifically, the evidence suggested that trademarks were increasingly being used as leverage against non-competing entities in an effort to coerce them into submission of their mark. This tactic serves to broaden the trademark holder's rights and, thereby, increase the likelihood that the mark will become famous. Once famous, competition is no longer relevant where the trademark holder asserts a dilution claim ⁿ⁶--a claim only available to famous marks. Conversely, where the mark is not famous, the holder must show that it is in competition with the alleged infringer, has actual plans to be in competition, or that competition is in the zone of natural expansion of the plaintiff's goods or services as a prerequisite to recovery. ⁿ⁷

The point of *Trademark Extortion* was to show that trademark holders are using the threat of litigation as an

additional vehicle by which they can broaden the scope of their trademark rights. The Constitution and the Lanham Act both contemplate that this broadening will happen through actual use of the mark in commerce. Alarming, it seemed to me in 2008 that we were embarking on a new course in trademark law and policy in the United States where rights were determined by litigation rather than by use.

For those suffering the consequences of this conduct, the trade organizations and the United States federal government have been remarkably disobliging. Rather, Vogel and Schachter, as well as the INTA, AIPLA, §=P219 IPO, and PTO, have joined forces in an effort to convince Congress that nothing should be done. They claim that existing rules, such as Rule 11 and others, are a sufficient response to trademark bullying, if bullying is happening at all.
n8

Yet, not only does trademark law permit trademark bullying to exist--it requires it. ⁿ⁹ Trademark holders have a duty to police their marks, as acquiescence to another's use of the same or similar mark on the same or similar goods entitles the junior user to a host of defenses to infringement. ⁿ¹⁰ The AIPLA insists that trademark extortion is essentially the exercise of that duty. The proposition that a mark holder has an affirmative duty to police all use of its mark, however, relies on dicta from a case decided over thirty-years ago in 1979. ⁿ¹¹ I submit that much, including trademark law, policy, the economy, the Internet, etc., has changed since 1979 to warrant a different approach even if this reference was not to gratuitous dicta. I attempt to use data, rather than merely supposition, to support my contention that trademark bullying is happening, is happening often, and is significant enough to warrant Congressional action.

Trademark bullying is an actual, measurable harm and it continues to grow. ⁿ¹² In fact, as the quality of trademark claims continues to decline, spurious claims increase. ⁿ¹³ Trademark bullying itself happens as often as a trademark holder is awarded money damages ⁿ¹⁴; it is present in at least 5.5% of all reported trademark cases. ⁿ¹⁵ Therefore, trademark bullying is, statistically, as prevalent as money damages in trademark litigation.

§=P220 As such, Congress should get involved to legislate a solution. The best solution is to amend Section 1117 of the Lanham Act ⁿ¹⁶ to clarify that defendants can obtain reasonable attorney's fees in egregious cases (like bullying) as well as plaintiffs. This would encourage attorneys to take trademark bullying cases and represent defendants. It would also discourage the prosecution of trademark cases that are only meant to harass or raise the cost of market access for defendants with little expectation of success on the merits. Anecdotal, we also know that once represented by competent trademark counsel, trademark bullying cases tend to evaporate. ⁿ¹⁷ Congress should get involved to create an income stream for trademark counsel who represent the bullied so that trademark counsel do not have to do it pro bono, if the bullied entity cannot pay.

II. Definition of Trademark Extortion

Today, most people refer to what I dubbed trademark extortion ⁿ¹⁸ as "trademark bullying." Trademark bullying is a less inflammatory term to describe the same conduct. Trademark extortion, or "bullying," means the use of a non-famous trademark to enjoin (or seek or threaten to enjoin) a non-competing use by a third party.

Some seem to presume that the relative size or capitalization of companies involved in trademark disputes is generally indicative of whether trademark bullying is present. ⁿ¹⁹ Although the relative size of a company may make the litigation more or less painful to fund, it does not, by definition, predict bullying. That is, often times, large companies sue small companies or individuals for trademark infringement. Most of the time, these cases are legitimate trademark complaints where the defendant knowingly or (most likely) unknowingly used the plaintiff's mark in commerce in an infringing manner. If our trademark system is legitimate and to be relied upon, we should not interfere with legitimate trademark infringement §=P221 cases. After all, every trademark defendant believes s/he is being bullied; most often, s/he is simply an infringer. ⁿ²⁰

Thus, a more clear and helpful definition of trademark bullying is needed. After researching trademark extortion for the better part of six years, as well as coining the term "trademark extortion," I have come up with the following

definition: Trademark Bullying occurs when there is evidence that a trademark holder asserts a non-famous mark against a noncompeting entity on or in connection with goods or services into which the plaintiff has no reasonable expectation of expanding.

A trademark bully is, according to this definition, not the holder of a famous appellation. The Lanham Act allows for the holders of famous marks to broadly assert trademark rights in the name of trademark dilution. ⁿ²¹ Trademark bullying contemplates a situation where the party asserting the trademark right would likely not prevail if the case were fully litigated because the parties are not competing (and there is no intention of competition in the future); however, if a mark is subject to dilution protection (meaning it is famous), competition becomes irrelevant. ⁿ²² Therefore, by definition, a famous mark cannot be the subject of trademark bullying because a famous mark can be legitimately enforced against even noncompeting entities. ⁿ²³

An axiom of American trademark jurisprudence (not dilution justification) has been that one seller of goods should not divert consumers from another. ⁿ²⁴ A long time ago, Learned Hand succinctly articulated the following:

§=P222 The law of unfair trade comes down very nearly to this - as judges have repeated again and again -- that one merchant shall not divert customers from another by representing what he sells as emanating from the second. This has been, and perhaps even more now is, the whole Law and the Prophets on the subject. . . ⁿ²⁵

Paradoxically, there is also the so-called "unrelated goods doctrine." ⁿ²⁶ Some claim that its existence requires an expanded view of trademark infringement and incentivizes trademark bullying. ⁿ²⁷ This doctrine recognizes that not all infringing conduct is on or in connection with goods or services that are immediately and directly competing. If a mark is strong, the relative range of goods and services on which it may be used grows. That is, the stronger the mark, the larger the range of goods and services for which the mark will be protected. The stronger the mark the more distinctive the mark and the more likely that one or more of the multiple factors will viewed in favor of the plaintiff--namely the likelihood that the plaintiff will bridge the gap between the non-competing goods or services. ⁿ²⁸

Each Circuit has adopted its own, distinct test for trademark infringement analysis. Yet, many of the Circuits' tests are very similar. For instance, five of the eleven Circuit Courts of Appeal tests for trademark infringement contain an express element that is, essentially, the likelihood the plaintiff will bridge the gap. Essentially, bridging the gap is the likelihood that the plaintiff will in the future sell a good or service that would more directly compete with the defendant's goods or services. ⁿ²⁹ Trademark §=P223 law is meant to be prospective ⁿ³⁰ and allow the trademark plaintiff's rights to expand over time. This expansion through the so-called related goods doctrine has to be objective and the record has to contain evidence that indicates the plaintiff actually intends such expansion or that the expansion is "natural." ⁿ³¹

The assertion of a mark in a reasonable (or natural) zone of expansion, too, is not bullying. Bullying contemplates enforcing trademark rights beyond the scope of the plaintiff's trademark rights and beyond a reasonable (or natural) expansion of those rights depending upon the strength of the plaintiff's mark. That is, whether or not bullying could or should be dealt with using existing rules regarding professional responsibility and the like, it is an extremely nuanced endeavor requiring an extremely nuanced analysis. We do this serious issue no favor by making bold, across the spectrum claims based on no data.

America is replete with anecdotal stories of trademark bullying where the only logical explanation for the conduct of the plaintiff was that it was engaging in bullying. In addition to the famous examples provided by Vogel and Schachter, some others include the following:

Rob Linden, a business owner that installs blown-in insulation into new homes, adopted the trade name (not the trademark) THERMAL WISE INSULATION as the name of his LLC. Mr. Linden operates solely within the Minneapolis, Minnesota area. Mr. Linden was sued by Questar, Inc. ("Questar") for allegedly infringing their mark

THERM-WISE to describe a rebate program and promotion where, as a regional monopoly in the state of Utah and immediate environs, it encourages people to wisely use energy. ⁿ³² Although Mr. Linden and Quester operate different businesses in different states, Questar is attempting to make Mr. Linden stop using the name of his LLC. ⁿ³³

§=P224 Lorenzo Borghese and his family were sued by Borghese, Inc. for use of the name BORGHESE in connection with the sale of pet care products. Borghese, Inc. is the assignee of the mark PRINCESS MARCHELLA BORGHESE for use on, or in connection with, cosmetics. ⁿ³⁴ Unless pet care products are a natural extension of cosmetics for women or unless Borghese, Inc. has specific plans to expand into pet care products, this part of the law suit is best characterized as trademark bullying.

A college student in Missouri attempted to fund his education by selling outdoor athletic gear under the appellation SOUTH BUTT, upsetting the manufacturers of North Face. ⁿ³⁵ Similarly, a man in Vermont attempted to register EAT MORE KALE, upsetting the Chick-fil-A corporation in light of its use of the mark EAT MOR CHIKIN (in the form of cows holding up a sign extorting such conduct--an example provided in the Vogel and Schachter article but they excluded the humorous context). ⁿ³⁶

The anecdotes abound. We are told, by people like Vogel and Schachter that these are not important and, ignoring any data that does exist, we should allow the law as it exists deal with these incidents. With this article, however, there is now good data that indicates that, more likely than not, trademark bullying is happening and should be dealt with by Congressional action.

III. DATA

Trademark bullying cases have been, heretofore, as elusive and anecdotal. Trademark plaintiffs are free to make claims of infringement, for legitimate or tactical reasons, without having to record or report such claims. Coupled with the vagaries of the requirement that trademark holders police potential infringing uses of their marks, it becomes exceedingly difficult to tell when a case amounts to bullying and when it is legitimate. ⁿ³⁷

§=P225 Until now, there have been no statistical attempts to show that bullying is real and/or and how frequently it happens. The data below suggests that it is very real and happens at same rate that trademark plaintiffs recover money damages.

To test for trademark bullying, I looked at all reported cases since the inception of the Lanham Act where the defendant moved for summary judgment. I used the database that I built in my original article *Trademark Extortion*. ⁿ³⁸ That database consists of every reported case that was dispositively terminated in America relying on the Lanham Act. The database consists of all reported cases from July 1, 1947 through 2011. I harvested from that database, all cases where the defendant moved for summary judgment and prevailed. ⁿ³⁹

General legal literature supports the notion that defendants are very unlikely to prevail in a motion for summary judgment in general subject matter jurisdiction. ⁿ⁴⁰ In fact, in general, defendants prevail in their motions for summary judgment only 4% of the time. ⁿ⁴¹ Trademark defendants, however, in the last decade prevailed at 5.5% of the time or slight more than general litigation. Further data would have to be collected and analyzed to determine if this difference is due to trademark bullying activity which may not be present or adequately represented in the general data.

Summary judgments for defendants are a good place to test the prevalence of trademark bullying. Usually, discovery has closed. ⁿ⁴² The judge looks at all of the plaintiff's evidence and, drawing all reasonable references in favor of the plaintiff, concludes that there are no material facts in dispute and that the defendant is entitled to a judgment as a matter of law. ⁿ⁴³ This is and should be a rare event. For the judge to grant a motion for summary judgment brought by the defendant, the judge is interfering with the plaintiff's chance to be heard, the chance to get a case before a jury, and a chance that, though not strong, it still might prevail. ⁿ⁴⁴ For the court to §=P226 grant a summary judgment motion brought by the defendant, the plaintiff's case must, by definition, be extremely weak. These are the cases that most likely encompass instances of trademark bullying.

There are some alarming trends when looking at the number of cases in the last 60 years broken-down by decade.

Table 1:

Decade	Summary Judgment Granted to Defendant	Average strength of case cases	Percentage of all reported cases	Total number of all reported
1950-1959	4	1.87	1.4%	270
1960-1969	5	1.92	1.9%	251
1970-1979	14	1.84	4.5%	309
1980-1989	16	1.49	2.5%	636
1990-1999	40	1.41	5.8%	682
2000-2009	40	1.33	5.5%	731

The first obvious trend is that the raw incidents of cases where the defendant is granted a summary judgment have increased. They have not only increased in real terms, they have increased in relative terms. In the decade ending in 1969, there were a total of 251 cases in the database. In the decade ending in 2009, there were 731 cases. In the decade ending in 1969, this number accounted for 1.9% of the cases; by 2009, this number accounted for 5.5% of the cases. That is, in relative terms, the number of cases where summary judgment was granted to the defendant increased 8-times in 50 years while the rate of increase of all cases increased only by 2.91-times. ⁿ⁴⁵

\$=P227 Second, the average strength of the case dropped significantly during the same time frame. From a high of 1.9 out of 3 for a quality score in the decade that ended in 1969, it reached a low of 1.33 by the decade that ended in 2009. That is, in the same 50 years, the quality of the plaintiff's claim dropped by more than 71%.

Most significantly, the rate of summary judgment being awarded to the defendant is now 5.5% of reported cases. For those that feel trademark bullying is insignificant, marginal, and should not be studied or discussed further, this is an important finding. Trademark bullying happens at the same rate that money damages are awarded to the plaintiff. Statistically speaking, money damages are as relevant as trademark bullying.

More significant still, this data is quite well supported by statistical analysis.

A. Regression Analysis

1. Strength of Claim

Image 1

The strength of the claim brought by the plaintiff is declining. Statistically, this is well supported by regression analysis. In this case, where $Y = -0.0103x + 21.942$. That is, there is strong statistical evidence that indicates the strength of the plaintiffs' claims is weakening over time. Here, with a p value of 0.001, we can say with 99% certainty that the relative strength of trademark claims has diminished $\$P228$ over time. That is, the regression analysis for the strength of trademark produced favorable results for the hypothesis that trademark strength in trademark bullying cases is declining. We also can predict that, with no additional variables, the strength of the claim will continue to decrease.

This regression analysis also tells us that the relative strength of a trademark claim is predicted to decrease in quality of 0.01 each year based on a case rating scale from 1 - 3. For instance, if in the year 2000 the average strength of a claim where summary judgment was found in favor of defendant equals 1.342, then in 2001 we can expect that the strength of claim will equal 1.332. In one year, the strength of a claim is projected to fall 3/4 of one percent. That is, the

quality of the plaintiff's claim will continue to diminish.

2. Degree of Similarity

Image 2

The degree of similarity between the plaintiff's mark and the defendant's mark has decreased since the inception of the Lanham Act in cases where the defendant prevailed in a motion for a summary judgment, that is, when trademark bullying was present. This is statistically portrayed above and this conclusion is also quite accurate. $Y = -0.0115x + 24.664$ [t stat = -1.98 / p value = 0.052]. That is, the regression analysis for the degree of similarity between marks produced favorable results. We know with 94.98% certainty that the degree of similarity between a plaintiff and an allegedly infringing mark has diminished since 1949. The graph above describes this relationship. Where trademark bullying is likely, plaintiffs' marks are becoming more and more dissimilar to defendants' marks and this trend seems to be continuing.

1.

3. Distinctiveness of Plaintiffs' Marks

\$=P229 Image 3

Here, the regression analysis did not support the contention that plaintiff's trademarks, in general, were generally becoming weaker and less distinctive. Where the p-value is 0.80, no correlation can be said to exist.

The data does show, however, an interesting trend that in fact does support the contention that plaintiff's marks are becoming weaker. Specifically, of percentage of cases where summary judgment was found for defendant, it became increasingly rare for a plaintiff to assert rights in connection with an inherently distinctive mark. That is, from 1980 - 1990 there were six (6) inherently distinctive marks (of 16 cases); from 1990 - 2000, there were nine (9) inherently distinctive marks (of 40 cases); and, from 2000 - 2010, there were only four (4) inherently distinctive marks (of 40 cases).

During the period from 1980 - 1990, 38% of cases where summary judgment was found for defendant involved inherently distinctive marks; from 1990 - 2000, 23%; and, from 2000 - 2010, only 10%. Although the regression analysis does not support the contention that distinctiveness is declining over time, a simple consideration of the percentages of cases involved, demonstratively, does support such a hypothesis.

Therefore, it is safe to say that the distinctiveness of the plaintiff's marks in trademark bullying cases is in a declining trend. Fewer marks being used to enforce rights against trademark defendants are distinctive marks.

4. Proximity of Goods or Services

As with the distinctiveness of plaintiffs' marks, the regression analysis does not support the hypothesis that the goods or services of the plaintiffs is becoming more remote from defendants in cases of likely trademark bullying. This is most \$=P230 likely because there are excluded and unknown variables such as the expansion of the economy, diversity of products, etc. ⁿ⁴⁶

Image 4

IV. METHODOLOGY

The methodology for this study was time consuming but quite simple. I relied on the database I created for the *Trademark Extortion* article that I still maintain. This database lists all reported trademark cases in the United States that came to a dispositive result. It can be found at

<http://web.wmitchell.edu/intellectualproperty/the-mitchell-study-on-trademark-litigation/>. The database currently reports 2,972 trademark cases.

Of the 2,972 cases which had previously been coded for, among other things, the procedural posture of the case, I merely culled only those that reported the results of a summary judgment motion. Of course, these could have been complete summary judgment or partial summary judgment. I did not code for this distinction. I discovered 119 reported cases since the inception date of the Lanham Act, July 5, 1949, that involved a summary judgment motions.

Even though I did not code for the distinction between partial and complete summary judgment motions, to be included in the study, all cases had to come to a dispositive result terminating the case. Therefore, each of the 119 cases came to a dispositive result terminating the case or that issue in the case, but it is possible that another trademark-related or other cause of action permitted the case to proceed. In each of the 119 cases, at least one trademark-related cause of action was met with a summary judgment where the defendant prevailed.

Those 119 cases were then read and coded for the strength of the case. The strength of the case was determined by applying the Polaroid factors. Each case was coded 1-3 as to the likelihood that the plaintiff would prevail on the merits. Each case was read and given a score that reported its likelihood of success, one \$=P231 factor at a time. In the end, each case received a score of 1-3 where 1 was extremely unlikely and 3 was extremely likely that the plaintiff would succeed on the merits.

Obviously, this part of the study was extremely arbitrary and subjective, however, it was consistently arbitrary and/or subjective. Two students read each case and determined what level of strength the case had; difficult cases were adjudicated by me. Therefore, although subjective, it is consistent in its outcome. Collectively, one set of eyes made every judgment as to how to score the strength of each case. Therefore, although subjective, the results were consistent.

All cases were then tabulated and presented in the graphs as shown above.

V. SIGNIFICANCE

The significance of this study is hard to overstate. In the battle over whether trademark bullying happens or not and, if so, how often, this study provides conclusive evidence that it is happening and it is a growing issue. If summary judgments in favor of the defendant are indicative of trademark bullying, trademark bullying happens in 5.5% of the reported cases in the last decade.

The context for the number 5.5 is also startling. In 5.5% of the reported cases, money damages are awarded to the plaintiff. Therefore, trademark bullying is as meaningful to trademark jurisprudence as money damages.

This study is limited by the fact that it relies exclusively on reported cases where the defendant prevailed in its motion for summary judgment. Anecdotally, it is not hard to imagine many other cases where the defendant loses its motion for summary judgment. This could be because the plaintiff's case was stronger, material facts were unresolved, or the individual judge rarely granted summary judgments to defendants because he/she believed that every plaintiff deserves its day in court, etc. This study does not address the multiple reasons why a motion for a summary judgment by defendant might be denied. However, to be sure, many are denied. At least some of them might reasonably be considered to be part of this study but, because the judge denied the motion, it is not.

That is, 5.5% is a floor. Trademark bullying happens at least 5.5% of the time.

Also not considered in this study are all the times a defendant and victim of bullying simply ceases use of the mark and/or changes to a different mark. All of those instances are not captured in this study. Therefore, all the unreported cases where Party X sends Party Y a cease and desist letter and Party Y capitulates and stops using the mark or changes the mark are not part of this study. It may be that some or all or some percentage of all the Party Ys in the United States may have prevailed in a motion for summary judgment; however, because they capitulated, we will never know.

As there is no reporting requirement or registration system in the United States to publicize when a party sends or receives a cease and desist letter and the results, it is impossible to conclude how often this type of scenario happens. However, to be sure, it is not never. Therefore, 5.5% is a floor. Trademark bullying happens at least 5.5% of the time.

This is the primary finding of this study. I respectfully disagree with claims made by such authors as Vogel and Schachter based on no data whatsoever that §=P232 bullying is best dealt with by existing law, that as sanctions such as Rule 11 are available to defendants, no action is required by Congress to respond to trademark bullying, even if it does exist. However, in the 119 cases where the defendant succeeded in its motion for summary judgment, the most egregious case possible where the court dismissed the plaintiff's case or cause of action with no regard for its rights to a day in court, Rule 11 sanctions were awarded in a total of zero cases. In fact, Rule 11 sanctions are very rarely awarded at all. To posit that because a theoretical sanction exists, there should be no concern about the actual conduct that could lead to the sanction is particularly empty when the sanction is never awarded.

VI. CONCLUSION

Trademark bullying (a.k.a. trademark extortion) happens in 5.5% of the reported cases. This is the same rate that plaintiffs recover any money damages. In the reported cases, trademark bullying is as significant, relevant and worrisome as cases where the plaintiff recovers money damages. Also, 5.5% is a floor. Trademark bullying happens at least 5.5% of the time. Where the ceiling is cannot be told because there is no requirement in the United States to report or record the sending out of cease and desist letters or how many times a trademark holder files suit to enforce its marks. Microsoft self-reports that they filed 235 law suits from 2001-2005. ⁿ⁴⁷ However, nowhere are the results recorded, maintained or analyzed.

The people that are not troubled by trademark bullying do not see evidence of it and therefore are not concerned. As there is no reporting or recording requirement in the United States, trademark bullying, if it happens at all, can only be found if we use deductive reasoning. This article is based on the deductive notion that cases where summary judgment was granted for the defendant are likely to represent cases of trademark bullying.

In trademark bullying cases, the quality of the plaintiff's claim is declining. This conclusion is supported by regression analysis that indicates that it is accurate to over 99% certainty.

Trademark bullying cases are increasing. Today, 5.5% of the reported cases are likely bullying cases.

In trademark bullying cases, the degree of similarity between the marks at issue has decreased over time and continues to decrease.

In trademark bullying cases, the pace of growth of all reported trademark cases during the life of the Lanham Act has grown 2.91 times while the pace of growth whether the defendant prevailed in a summary judgment motion has grown at 8 times. That is, the growth rate of trademark bullying cases far exceeds the growth rate of general trademark infringement cases at large.

As no data (just suppositions) was provided by Vogel and Schachter, it is difficult to claim they are wrong in their analysis. Of course, Rule 11 and the other potential sanctions do exist. Without knowing how often they are used in cases §=P233 that manifest trademark bullying, it is impossible to take issue with their nonanalysis. Further, no data is relied on by the various trade organizations (simply outdated dicta from now ancient cases). The data here is the first attempt to prove or disprove trademark bullying. It is provided in the spirit of an academic inquiry. To me, the data here supports the idea that trademark bullying deserves the scrutiny that would be brought to bear if Congress elected to get involved. Clearly, the existing "safeguards" have been proven here to be anything but safe.

As such, Congress should act. Congress could go a long way in stopping trademark bullying if it amended Section 1117 of the Lanham to make it explicit that trademark infringement defendants as well as plaintiffs should be awarded its attorney's fees when the opposing party acts egregiously. Attorney's fees should be liberally awarded in cases where

the defendant moves for summary judgment and prevails as these cases are the clearest manifestation of trademark bullying.

n5 Port, *Extortion*, *supra* note 2, at 633.

n6 *See* Lanham Act § 43(c)(1), 15 U.S.C. § 1125(c)(1) (2012) (stating that injunctive relief is available *regardless* of the presence or absence of actual or likely confusion) (*emphasis added*).

n7 With this statement, I do not intend here to enter the debate as to the degree of competition that is required (or should be required) for a

plaintiff to have standing to file suit or enforce its mark. I am only intending to show that the traditional understanding of trademark jurisprudence was/is to require competition or the likelihood of competition before a case or controversy exists. *See, e.g., Leah Chan Grinvald, Shaming Trademark Bullies*, 2011 WIS. L. REV. 625, 636-37 (2011). To the extent that American trademark jurisprudence--mostly in the form of academic commentary--diverges from this traditional understanding, it renders the dilution rationale even more irrelevant and, interestingly, further incentivizes trademark holders to engage in bullying conduct because they don't have to show that their mark is famous to enjoin a non-competitor, they only have to show that the mark is distinctive and/or strong. *Id.* at 638. As I have argued elsewhere, dilution rationale is most easily understood when the traditional view of trademark jurisprudence is followed. Kenneth L. Port, *The Congressional Expansion of American Trademark Law: A Civil Law System in the Making*, 35 WAKE FOREST L. REV. 827, 831 (2000). That is, dilution rationale should be applied when the parties are not and will not be in competition. Infringement rationale should be applied when the parties are or will be in competition. Practitioners do not make this distinction easy on judges when they claim both infringement and dilution in the same case. Under traditional trademark jurisprudence, infringement and dilution ought to be mutually exclusive and not applicable to the same set of operative facts. Judges do not seem to understand this distinction when they find marks infringed and diluted.

LENGTH: 9860 words

ARTICLE: THE NUCLEAR OPTION: AESTHETIC FUNCTIONALITY TO CURB OVERREACHING
TRADEMARK CLAIMS

NAME: Michael S. Mireles +

BIO:

+ Professor of Law, University of the Pacific, McGeorge School of Law. The author is grateful for the assistance of the staff and editors of the Wake Forest University School of Law Journal of Business and Intellectual Property Law, particularly Chris Hewitt, Stephen Pritchard, Cory Howard and Nathan Harrill. The author is also thankful for comments from the participants, including William H. Brewster, L. Robert Rehm, Jr., Simone Rose and Jeff Slattery, of the March 2012 Wake Forest University Journal of Business and Intellectual Property Law Symposium "Avenue of the Arts: Connecting Creativity, Economics and the Law." Finally, the author offers special thanks to the Texas Intellectual Property Law Journal for its permission to publish this paper which is based on an earlier version published with that journal.

LEXISNEXIS SUMMARY:

... This last issue--the vigorous policing of marks has led to so-called "trademark bullying" or "trademark extortion" through the use of cease and desist letters with the threat of litigation by companies with resources against entities with presumably less resources. ... While the USPTO Trademark Litigation Study focused on the impact of aggressive trademark litigation tactics on small businesses, it is noteworthy that the Chilling Effects Clearinghouse database, which attempts to collect examples of intellectual property overreaching through cease and desist letters, has mostly trademark cease and desist letters sent to Google since 2011 under a search for "trademark"--with almost no cease and desist letters sent to small businesses. ... Apparently, Nike, fearing loss of its Air Force 1 trademark, submitted a "Covenant Not to Sue," essentially stating that it "would not raise against Already or any affiliated entity any trademark or unfair competition claim based on any of Already's existing footwear designs" or "colorable imitation s ." ... A problem with using defensive aesthetic functionality, as alluded to earlier, is attempting to ascertain what is a non-reputation related disadvantage, because arguably the markets created for Betty Boop merchandise or works, and University of Alabama merchandise or works, are driven by demand created in part because of the popularity of the marks or copyrighted works. ... In this case the district court denied a preliminary injunction, in part, by essentially adopting a per se rule that a supposed trademark holder cannot use trademark law to control a single color in the fashion industry. ... However, trademark holders may essentially act as a "bully" when they overreach, and when they do, it is easily understandable how they can stifle artistic expression and creativity under the facts of these cases or a simple extension of the facts.

TEXT:

[*282] I. INTRODUCTION

This essay examines the aesthetic functionality doctrine and the fact patterns of three recent cases where the

doctrine should apply. The facts of these cases highlight how the aesthetic functionality doctrine could be applied to protect creativity and competition, and ensure robust freedom of expression. Importantly, this essay stresses that the doctrine should be considered in light of the vigorous policing of marks by mark owners, expanding trademark law protection and the benefits of aesthetic functionality over other tests.

Part I of this article sets forth an introduction. Part II provides a brief background of the problem of supposed "trademark bullying," "trademark extortion," or "aggressive trademark litigation tactics." Part III reviews the functionality doctrine and the policies animating it. Part IV analyzes three cases as examples of how the aesthetic functionality doctrine could effectively protect creativity, competition and freedom of expression. Part V offers a brief conclusion.

II. POLICING TRADEMARKS

The subject matter and scope of protection of trademark law has expanded tremendously in the last 70 years.ⁿ¹ This expansion has occurred because of the confluence of several important factors, including: new technology, such as the Internet; the value and importance of the brand--with valuations exceeding \$ 60 billion for one brand;ⁿ² and the use of trademarks to protect licensing and merchandising markets, which may generate as much as \$ 187.2 billion in the sale of licensed products worldwide,ⁿ³ including over \$ 3.9 billion for collegiate merchandising alone.ⁿ⁴ Other contributing factors [*283] include the expansion and importance of international markets, and the nature of trademark law itself.ⁿ⁵ The scope of trademark rights is pushed by consumer perception, which to some extent is controlled by trademark holders and their risk adverse lawyers who vigilantly police their marks to protect their clients' valuable brands, and lobby Congress for expanded trademark protection.ⁿ⁶ The policing of trademarks is driven by trademark doctrine and policy which partially provide the incentive to do so.ⁿ⁷

This last issue--the vigorous policing of marks has led to so-called "trademark bullying" or "trademark extortion" through the use of cease and desist letters with the threat of litigation by companies with resources against entities with presumably less resources.ⁿ⁸ Attorneys (of clients of any size and amount of resources) should police their clients' marks to ensure that those marks continue to receive a broad scope of trademark protection.ⁿ⁹ Thus, if there is any arguable [*284] infringing or diluting conduct, the zealous (prudent) lawyer sends a cease and desist letter which, in some cases, may dampen creativity and competition, and chill potential expression.ⁿ¹⁰ In one particularly interesting case, *Salu, Inc. v. Original Skin Store*, the court stated:

[Plaintiff] Salu presents evidence that . . . [it] has continually contacted anyone who it feels is infringing in order to protect its mark. It has sent out over 300 cease and desist letters to alleged infringers in the last couple of years alone. Salu claims that with the exception of ESKINSTORE, this litigation, and one other case that settled out of court, "every other infringer receives [the] letter and stops infringing on [the] trademark."ⁿ¹¹

The topic of "trademark bullying" or "trademark extortion" has received a significant amount of attention. The United States Patent and Trademark Office [USPTO] recently requested public comment on trademark overreaching--bullying--and issued a study on the subject.ⁿ¹² The request for comments initially used the word "bullies" or "bully" but eventually changed the title to "trademark litigation tactics." The reason for the change may be, in part, because there appears to be a lack of consensus about what "trademark bullying" means. The failure to agree on the definition may be the result of a belief by some that all so-called "bullying" that may fall under some definitions of "trademark bullying" may not be negative in light of trademark law so as to justify such a label.ⁿ¹³

Trademark bullying, at the least, seems to include litigation tactics that may involve using cease and desist letters and threats of litigation, where a trademark holder with more resources than a target entity [*285] asserts rights beyond the reasonable scope of its mark.ⁿ¹⁴ For example, a trademark holder might assert its rights against a small business or artist that is using the mark in a way that would be protected under the law because of First Amendment interests.

The April 2011 USPTO Trademark Litigation Study described the results of its request for comments and outlined some of its planned activities to address trademark bullying. ⁿ¹⁵ In summarizing some of the comments, the Trademark Litigation Study notes that:

Most of the direct respondents claimed at least some degree of first-hand knowledge of instances where unduly aggressive trademark litigation or pre-litigation tactics (e.g., cease-and-desist letters) were targeted at a small business. Many of these were directly involved in the issuance or receipt of cease-and-desist letters. . . . When asked if they currently encounter the problem of other trademark owners using their trademark rights to harass and intimidate another business beyond what the law might be reasonably interpreted to allow (e.g., is "trademark bullying a problem"), few commenters explicitly addressed whether and to what extent this issue is a significant problem. Given the limited number of comments and the varied nature of the commenters own experiences, the comments may be [*286] better viewed as anecdotal. ⁿ¹⁶

The Trademark Litigation Study also stated that:

A handful of small business owners explained that they withdrew their trademark applications after receiving a cease-and-desist letter because they lacked the time or financial resources to litigate against a larger, wealthier company. This imbalance of resources was a common theme among many of the comments concerned with the threat of litigation, including one noting that litigation is too expensive to be a realistic option for many small businesses. Other commenters, however, recognized that cease-and-desist letters have a legitimate purpose, explaining that most are sent in good faith, and only a small percentage result from overzealous protection of a mark. Some commenters explained that trademark owners have an obligation to police their marks, and the cease-and-desist letter is a necessary, cost-effective part of the process. ⁿ¹⁷

The results of the Trademark Litigation Study appear to be inconclusive and are perhaps helpful as a starting point for gathering more information about "trademark bullying." ⁿ¹⁸ However, the Trademark Litigation Study does seem to indicate that "trademark bullying" could be happening, but based on the comments received, also hedges on whether litigation enforcement activity that has occurred should be labeled "bullying." ⁿ¹⁹ There is no doubt that companies send cease and desist letters to one another, but whether those particular instances merit the label "trademark bullying" appears to be hard to justify based on the comments received by the USPTO. ⁿ²⁰ Two other studies provide additional support for the argument that trademark bullying exists. ⁿ²¹

The first is the study by Professor Port, which concluded that trademark extortion may explain why there is a rise in filings of [*287] trademark cases, but fewer reported decisions. ⁿ²² The second study by Professor Gallagher found that:

[T]rademark and copyright lawyers and their clients sometimes enforce admittedly weak IP claims precisely because it can be an effective strategy with few downsides. As this study shows, aggressive trademark and copyright enforcement efforts often work, as enforcement targets frequently choose to capitulate or settle rather than resist claims on the legal merits, likely due to the costs and uncertainties inherent in IP litigation. Thus, this study supports the thesis that trademarks and copyrights can be and often are over-enforced in everyday legal practice. ⁿ²³

While the USPTO Trademark Litigation Study focused on the impact of aggressive trademark litigation tactics on small businesses, it is noteworthy that the Chilling Effects Clearinghouse database, which attempts to collect examples of intellectual property overreaching through cease and desist letters, has mostly trademark cease and desist letters sent to Google since 2011 under a search for "trademark"--with almost no cease and desist letters sent to small businesses. ⁿ²⁴ This does not mean that companies are not sending cease and desist letters to small companies and overreaching (see the case involving Salu, Inc. mentioned above), but that small companies and others may not be reporting them to the

Chilling Effects Clearinghouse website. The Brand Geek blog offered to start collecting problematic cease and desist letters, but as of May 20, 2013, none have been posted.ⁿ²⁵ The Legal Force Trademarkia has, however, published data concerning oppositions filed by "trademark bullies"--there are many examples, and the most bullied and the biggest bullies are available for view.ⁿ²⁶

[*288] There have also been several well-publicized incidents involving cease and desist letters. For example, Louis Vuitton sent a cease and desist letter to a student intellectual property law group at the University of Pennsylvania because of their advertising for a symposium on fashion law.ⁿ²⁷ Another example is the cease and desist letter and subsequent interaction between publishing house Penguin and former Penguin author David Thorne,ⁿ²⁸ although there does not seem to be a Penguin cease and desist letter for Mr. Thorne's use of the Penguin logo on his blog.ⁿ²⁹ Finally, there is the very popular, supposedly successful, cease and desist letter story concerning Jack Daniels.ⁿ³⁰ Many seem to believe that this particular cease and desist letter by Jack Daniels was well done.ⁿ³¹

Notably, a recent U.S. Supreme Court case, *Already, LLC v. Nike, Inc.*,ⁿ³² provides an example of supposed trademark bullying. In that case, Nike alleged that its Air Force 1 trademark was infringed and diluted by Already's shoe lines "Sugars" and "Soulja Boys."ⁿ³³ Already "filed a counterclaim contending that the Air Force 1 trademark is invalid."ⁿ³⁴ Apparently, Nike, fearing loss of its Air Force 1 trademark, submitted a "Covenant Not to Sue," essentially stating that it "would not raise against Already or any affiliated entity any trademark or unfair competition claim based on any of Already's existing footwear designs" or "colorable imitation[s]."ⁿ³⁵ In this particular case, Nike, an entity with substantial resources, apparently enforced its trademark against a small entity.ⁿ³⁶ The question arises whether Nike's infringement and dilution claims were overreaching. Here, that seems to be the case. When the validity of its mark was challenged, Nike, "four months after Already counterclaimed," issued [*289] the "Covenant Not to Sue" and moved to dismiss the case.ⁿ³⁷ Unfortunately, the U.S. Supreme Court did not allow Already to pursue its counterclaim because the claim was moot, thus allowing Nike to continue to threaten third parties with trademark claims based on its Air Force 1 mark.ⁿ³⁸

While a different competitor may also challenge Nike's mark, they must have the resources to do so and may face bullying of another kind--importantly, in this case, Already also asserted that "Nike had intimidated retailers into refusing to carry Already's shoes."ⁿ³⁹ Moreover, Justice Kennedy's concurrence notes that, "[O]ver the past eight months, Nike has cleared out the worst offending infringers. Now Already remains as one of the last few companies that was identified on that top ten list of infringers."ⁿ⁴⁰ Justice Kennedy also discussed some of the harms that can occur from the threat of trademark infringement:

[C]harges of trademark infringement can be disruptive to the good business relations between the manufacturer alleged to have been an infringer and its distributors, retailers, and investors. The mere pendency of litigation can mean that other actors in the marketplace may be reluctant to have future dealings with the alleged infringer.ⁿ⁴¹

The anticompetitive impact for trademark overreaching in some cases is real.ⁿ⁴²

This context of vigorous policing is an important backdrop for a discussion of aesthetic functionality and illuminates the problem.ⁿ⁴³ [*290] The problem is not just unclear law. The problem is unclear law in the context of attorneys--notably zealously representing their clients--vigorously enforcing their clients' marks to their broadest arguable extent under evolving consumer perception.ⁿ⁴⁴

III. FUNCTIONALITY LAW

Functionality law is anything but clear.ⁿ⁴⁵ Depending on the jurisdiction, there are two types of functionality: aesthetic and utilitarian.ⁿ⁴⁶

There are arguably two rationales for the functionality doctrine: 1) to ensure that trademark law does not provide perpetual legal protection for subject matter better protected by utility patent law; and 2) to protect and promote

competition. ⁿ⁴⁷ Most would probably agree that both rationales can apply to utilitarian type functionality, but most likely would agree only the latter justifies aesthetic type functionality. ⁿ⁴⁸

Importantly, if functionality applies, either aesthetic or utilitarian, that means that the mark holder's trademark cannot receive legal [*291] protection notwithstanding the mark's ability to serve as a trademark--generally to serve to identify and distinguish one person's goods or services from another and to indicate the source of those goods or services. ⁿ⁴⁹ Thus, functionality and the policies that drive it trump other concerns in trademark law such as protecting the goodwill of the trademark owner or preventing consumer confusion. ⁿ⁵⁰

An additional lack of clarity in functionality law concerns the standards for when functionality exists and how to apply those standards. ⁿ⁵¹ In the U.S. Supreme Court's most recent discussion of functionality in *TrafFix Devices, Inc. v. Marketing Displays, Inc.*, the Court stated that the test for functionality asks whether the claimed trade dress is essential to the use or purpose of the article or affects its cost or quality. ⁿ⁵² Thus, a product design may be functional if the appearance of a product impacts how it works, or its cost or quality--a dual spring design is a cost effective way to allow road signs to flex and remain upright in adverse wind conditions. ⁿ⁵³ The Court also noted that after applying that test, courts could inquire as to whether the trade dress put competitors at a non-reputation related disadvantage--something not because of the functions of the trademark. ⁿ⁵⁴

In determining if the second test is met, a court may inquire into competitive necessity or whether there are alternatives to the claimed trade dress. ⁿ⁵⁵ Thus, if someone claimed the color black in connection with boat motors, the exclusive use of that color in connection with those goods would put competitors at a non-reputation related disadvantage, even though the color does not affect how the motor works. ⁿ⁵⁶ The color can serve to make the motor look smaller and the color black matches many boat colors. ⁿ⁵⁷ And, there are no alternatives to black to serve those purposes, so a competitor needs to use that color. ⁿ⁵⁸ The *TrafFix Devices, Inc.* court seemed to indicate that the second test was to be applied in cases of aesthetic functionality and not utilitarian functionality, but that could be interpreted to mean that the [*292] utilitarian or aesthetic functionality inquiry involves applying both tests, and if either is satisfied, then the mark is functional and not protected. ⁿ⁵⁹

Besides the benefit for certainty in the law, the aesthetic functionality doctrine should be clarified because it may serve to protect wide vistas of the creative arts and competition, and ensure robust freedom of expression. The potential benefits of the doctrine are particularly important because the subject matter of trademarks has expanded to protect almost any symbol that can be perceived as a trademark, including subject matter traditionally protected by copyright law--and it is continuously expanding. ⁿ⁶⁰ For example, subject matter that may be protected by trademark law includes motion marks; colors, including a single color; music; three-dimensional objects; and holographs. ⁿ⁶¹

Three recent cases highlight the expansion of trademark protection--in light of overreaching trademark claims by trademark holders--and how the aesthetic functionality doctrine may serve to reign in expansive trademark protection in the context of vigorous policing of trademarks. ⁿ⁶²

IV. THE CASES AND THE APPLICATION OF THE AESTHETIC FUNCTIONALITY DOCTRINE

The following three recent cases provide some context to how the aesthetic functionality doctrine could be applied to protect creativity, [*293] competition and free expression. This section also provides suggestions for the application of that doctrine.

The facts of the first two cases involve so-called defensive aesthetic functionality doctrine. Under this doctrine, if it applies, a court does not declare that the mark receives no protection in all circumstances as under an ordinary aesthetic functionality analysis. The court determines that the particular infringer's use of the trademark is aesthetically functional and the alleged infringer can thus continue using the mark. ⁿ⁶³

The first case involves two 2011 Ninth Circuit opinions and the famous character "Betty Boop." ⁿ⁶⁴ In *Fleischer Studios, Inc. v. A.V.E.L.A. Inc.*, one party claimed trademark protection over Betty Boop--her image, and word and

character marks--and tried to stop another party from selling Betty Boop dolls, T-shirts, and handbags with her image. ⁿ⁶⁵ The Ninth Circuit, in its first opinion, decided that the alleged infringers' use was covered by aesthetic functionality and the alleged mark holder could not stop that use. ⁿ⁶⁶ The court reasoned, following the controversial *International Order of Job's Daughters v. Lindeburg & Co.* ⁿ⁶⁷ decision, that A.V.E.L.A. was not using Betty Boop as a trademark but instead as a functional product and that Betty Boop was a prominent feature of the product, and A.V.E.L.A. never designated the merchandise as "official" or otherwise indicated sponsorship. ⁿ⁶⁸ The court noted that there was no evidence of confusion. ⁿ⁶⁹

The court, citing the U.S. Supreme Court's opinion in *Dastar Corp. v. Twentieth Century Fox Film Corp.*, ⁿ⁷⁰ also essentially stated that trademark protection should not extend to a copyrighted work such as the Betty Boop character because then that character would never enter the public domain and this would frustrate copyright law. ⁿ⁷¹ **[*294]** Interestingly, after the filing of several amicus briefs by parties such as the Motion Picture Association, the International Trademark Association, and others, the Ninth Circuit withdrew the opinion and substituted it for another opinion relying on other grounds concerning an incomplete chain of title. ⁿ⁷² Even in light of this withdrawal, some trademark lawyers have expressed concern that the Ninth Circuit did not explain why its prior opinion was wrong. ⁿ⁷³ Because of this lack of explanation, the Ninth Circuit may have opened up the door to the use of defensive aesthetic functionality which could mean the end of licensing and merchandising, and the loss of billions of dollars to their clients. ⁿ⁷⁴ Indeed, on remand, the district court found that the defendants' use of the word mark "Betty Boop" was aesthetically functional. In analyzing aesthetic functionality, the district court reasoned that:

Because, as noted above, Defendants' use of the mark is a decorative feature of their merchandise and is not source-identifying, "protection of the feature as a trademark would impose a significant non-reputation-related competitive disadvantage" on Defendants. Were Defendants to market their goods bearing the image of Betty Boop or Betty Boop movie posters without the words Betty Boop to identify the character, that would make their products less marketable than the same product that included the BETTY BOOP name. **[*295]** This is because the words Betty Boop serve to name the famous character depicted on those goods and are part and parcel of the movie posters printed on Defendants' merchandise. For example, Plaintiff points to one of Defendants' dolls that includes packaging bearing imagery from a Betty Boop movie poster, and a product tag that is a miniature reproduction of the movie poster. Both uses of the poster imagery bear the following text: "Adolph Zukor presents BETTY BOOP with HENRY the Funniest Living American". Removing the words BETTY BOOP from these items would render the textual aspect of the poster reproductions incomplete and the remaining words would be nonsensical. It would be obvious to the average consumer that such merchandise would be missing something. Clearly, merchandise that is missing something is less marketable and therefore at a competitive disadvantage. In addition, because Defendants' use of the Betty Boop word mark is not source identifying and simply does not trade on the "reputation" of any source, barring Defendants from using those words would "impose a significant non-reputation-related competitive disadvantage." ⁿ⁷⁵

The district court's opinion provides a glimmer of hope that aesthetic functionality can be effectively applied by courts, at least in the context of word marks, but the question remains whether other courts will follow it.

The second case involves the University of Alabama and an artist. ⁿ⁷⁶ In that case, the University of Alabama sued an artist for trademark infringement. ⁿ⁷⁷ The artist painted limited edition paintings of famous plays with University of Alabama football players wearing crimson and white uniforms. ⁿ⁷⁸ The infringement theory was apparently that consumers could believe there was some sponsorship or other relationship involving permission between the University of Alabama and the artist. ⁿ⁷⁹ Notably, in this case, there was a **[*296]** relationship between the University of Alabama and the artist, and there was a license in place between the two parties. ⁿ⁸⁰ Part of the dispute centered on whether the colors of the uniforms of the players were covered by the license. ⁿ⁸¹ However, the district court decided in favor of the artist, noting that the case involved "fine art" and that the artist's work was protected artistic expression, fair use or protected by the First Amendment. ⁿ⁸² The Court noted that the artist's paintings and the limited edition prints were not infringing, but that other merchandise such as T-shirts, cups, mugs, posters and calendars may be infringing.

ⁿ⁸³ Over two years later, the U.S. Court of Appeals for the Eleventh Circuit applied the *Rogers v. Grimaldi* test and found that Moore's work did not constitute a violation of the Lanham Act. ⁿ⁸⁴ The court reasoned that:

Therefore, we have no hesitation in joining our sister circuits by holding that we should construe the Lanham Act narrowly when deciding whether an artistically expressive work infringes a trademark. This requires that we carefully "weigh the public interest in free expression against the public interest in avoiding consumer confusion." An artistically expressive use of a trademark will not violate the Lanham Act "unless the use of the mark has no artistic relevance to the underlying work whatsoever, or, if it has some artistic relevance, unless it explicitly misleads as to the source or the content of the work."

In this case, we readily conclude that Moore's paintings, prints, and calendars are protected under the *Rogers* test. The depiction of the University's uniforms in the content of these items is artistically relevant to the expressive underlying works because the uniforms' colors and designs are needed for a realistic portrayal of famous scenes from Alabama football history. Also there is no evidence that Moore ever marketed an unlicensed item as "endorsed" or "sponsored" by the University, or otherwise explicitly stated that such items were affiliated with the University. Moore's [*297] paintings, prints, and calendars very clearly are embodiments of artistic expression, and are entitled to full First Amendment protection. The extent of his use of the University's trademarks is their mere inclusion (their necessary inclusion) in the body of the image which Moore creates to memorialize and enhance a particular play or event in the University's football history. Even if "some members of the public would draw the incorrect inference that [the University] had some involvement with [Moore's paintings, prints, and calendars,] ... that risk of misunderstanding, not engendered by any overt [or in this case even implicit] claim ... is so outweighed by the interest in artistic expression as to preclude" any violation of the Lanham Act. ⁿ⁸⁵

Importantly, the court did not address whether a trademark defense applied to the use of the marks on mugs and "other mundane objects." This leaves open the question of whether Moore's work applied to these other items would pass muster under *Rogers v. Grimaldi*. Indeed, if Moore or another artist created a work on a "mundane object" that work may fail the *Rogers v. Grimaldi* test if consumers would believe a license was required to create the work.

Under the facts of both cases it is easy to understand how potential "artists" or small companies with limited resources could be concerned. In one case, a party may not use a character even if it conceivably falls in the public domain to create new works because of a trademark merchandising right. In the other, a party may not create paintings of scenes in real life that have trademarks in them because under trademark law a trademark owner may claim a merchandising right. Under either case, there is a possibility that if there is an expected merchandising market because of the nature of the good then there may be a trademark infringement without a defense. The slippery slope seems clear and there are several problems with this type of reasoning and extending it. First, how do you determine what is merchandise or not? Maybe you could limit it to "traditional promotional goods" but what if LEGO sells plastic LEGO pieces, and then expands into creating characters, television shows, motion pictures, video games, and other audio-visual works traditionally protected by copyright law? Trademark protection has expanded to include motion marks, colors and sounds. Related to this question is whether LEGO will continue to control those works under a trademark [*298] merchandising theory even if the copyright expires in various works. And, as mentioned before, the question of which "copyrighted work" is the referenced work is a complicated issue. Moreover, in the context of aggressive trademark tactics, an artist with minimal funding or a small business with limited funding may not litigate and may choose to capitulate. A robust aesthetic functionality defense may provide a disincentive to or eliminate overreaching trademark claims.

Accordingly, instead of relying on a defense based on the First Amendment or a substitutionary test for the likelihood of confusion, ⁿ⁸⁶ courts could rely on defensive aesthetic functionality to justify or excuse an alleged infringer's use. As long as there is no attempt to suggest some "official" licensing relationship, aesthetic functionality would preserve a producer's ability to sell formerly copyright protected work as utilitarian functionality does for patent. Robust competition is preserved as consumers will have more choice and lower prices, and creativity is not stifled. And,

the copyright owner has received their reward and the work, as in the *A.V.E.L.A.* case, should pass to the public domain.

In the *University of Alabama* case, defensive aesthetic functionality could excuse or justify the artist's use and also hold the University of Alabama's marks as valid. The University of Alabama thus cannot stop the artist's use because to do so would effectively [*299] allow the University of Alabama to foreclose anyone from using their marks. This would not only place creators in the market for producing expressive works at some competitive disadvantage, but would also wholly preempt the market for the creation of those works in certain mediums.

A problem with using defensive aesthetic functionality, as alluded to earlier, is attempting to ascertain what is a non-reputation related disadvantage, because arguably the markets created for Betty Boop merchandise or works, and University of Alabama merchandise or works, are driven by demand created in part because of the popularity of the marks or copyrighted works. Arguably, this demand is all about a reputation related advantage. However, the argument cannot be that broad or defensive aesthetic functionality would never apply. The application of the defense would not fulfill its function of protecting competition. Consumers may purchase the item because of loyalty or some decorative reason; ⁿ⁸⁷ although inquiring into the motivations of consumers is unlikely to provide much certainty with respect to the application of the doctrine unless there was a presumption favoring the application of aesthetic functionality.

The final case is the *Louboutin* case involving a shiny, lacquered red on the outsoles of high-priced, high-heeled shoes, which Louboutin claims as its trademark. ⁿ⁸⁸ In this case the district court denied a preliminary injunction, in part, by essentially adopting a per se rule that a supposed trademark holder cannot use trademark law to control a single color in the fashion industry. ⁿ⁸⁹ The district court applied the aesthetic functionality doctrine, but not the defensive type. ⁿ⁹⁰ In highlighting the importance of color in the fashion industry, the court allowed competitors to use this color (or shade)--even on outsoles--because it is necessary for them to compete. ⁿ⁹¹ The court noted several reasons why a competitor may want to use red--that are not reputation related--red symbolizes energy, it's engaging, it's sexy, it attracts men to women who wear these shoes. ⁿ⁹² Moreover, competitors need the color to create coordinating outfits. ⁿ⁹³ The court [*300] likened the importance of color to fashion as the same as fine art. ⁿ⁹⁴ The court reasoned that:

Painting and fashion design stem from related creative stock, and thus share many central features. Both find common ground and goals in two vital fields of human endeavor, art and commerce. For the ultimate ends they serve in these spheres, both integrally depend on creativity. Fashion designers and painters both regard themselves, and others regard them, as being engaged in labors for which artistic talent, as well as personal expression as a means to channel it, are vital. Moreover, the items generated by both painters and fashion designers acquire commercial value as they gain recognition. Louboutin himself would probably feel his sense of *honneur* wounded if he were considered merely a cobbler, rather than an *artiste*. But, as a matter differing only in degrees and order of priority, Louboutin and Picasso both may also be properly labeled as men of commerce, each in his particular market.

The creative energies of painter and fashion designer are devoted to appeal to the same sense in the beholder and wearer: aesthetics. Both strive to please patrons and markets by creating objects that not only serve a commercial purpose but also possess ornamental beauty (subjectively perceived and defined). . . .

But, as an offshoot of color, perhaps most crucial among the features painting and fashion design share as commerce and art, are two interrelated qualities that both creative fields depend upon to thrive, and indeed to survive: artistic freedom and fair competition. In both forms, the greatest range for creative outlet exists with its highest, most vibrant and all-encompassing energies where every pigment of the spectrum is freely available for the creator to apply, where every painter and designer in producing artful works enjoys equal freedom to pick and choose color from every streak of the rainbow. The contrary also holds. Placing off limit signs on any given chromatic band by allowing one artist or designer to appropriate an entire shade and [*301] hang an ambiguous threatening cloud over a swath of other neighboring hues, thus delimiting zones where other imaginations may not veer or wander, would unduly

hinder not just commerce and competition, but art as well.

The thrust and implications of the Court's analogy are clear. No one would argue that a painter should be barred from employing a color intended to convey a basic concept because another painter, while using that shade as an expressive feature of a similar work, also staked out a claim to it as a trademark in that context. If as a principle this proposition holds as applied to high art, it should extend with equal force to high fashion. The law should not countenance restraints that would interfere with creativity and stifle competition by one designer, while granting another a monopoly invested with the right to exclude use of an ornamental or functional medium necessary for freest and most productive artistic expression by all engaged in the same enterprise. ⁿ⁹⁵

Unfortunately, the U.S. Court of Appeals for the Second Circuit determined that the district court's decision concerning aesthetic functionality was flawed. ⁿ⁹⁶ Specifically, the Second Circuit decided that the district court's per se rule that a single color could not be protected in an industry was inconsistent with the U.S. Supreme Court's *Qualitex* decision. ⁿ⁹⁷ Importantly, the Second Circuit did seem to indicate that *Qualitex* could be read to allow a per se rule in an industry, but stated that was "doubtful." ⁿ⁹⁸ The Second Circuit also limited Louboutin's trademark to the lacquered red color with a contrasting upper sole. ⁿ⁹⁹ This limitation allowed the Second Circuit to find that Yves Saint Laurent was not infringing Louboutin's trademark, while at the same time upholding Louboutin's [*302] trademark. ⁿ¹⁰⁰ Courts should follow the analysis of the district court in *Louboutin* and apply a "per se" approach to numerous types of marks, with the aesthetic functionality doctrine clearing the way for more creativity, and competition in specific industries. Aesthetic functionality could serve as a policy lever, similar to those in patent law, ⁿ¹⁰¹ to prohibit overreaching in trademark law in specific industries.

V. CONCLUSION

Trademark holders vigorously protect their marks--and they have every reason to do so under trademark law and policy. However, trademark holders may essentially act as a "bully" when they overreach, and when they do, it is easily understandable how they can stifle artistic expression and creativity under the facts of these cases or a simple extension of the facts. A struggling artist or small company may not have the resources to fight the University of Alabama and may just give in and stop using the mark. Notably, the artist in the University of Alabama case paid hundreds of thousands of dollars in attorneys' fees--how many struggling artists can afford to engage in years of litigation with such a high dollar cost. ⁿ¹⁰² A strong aesthetic functionality defense may ensure a robust competitive market for artistic works in many mediums including those in supposed merchandising markets. While some circuits do not recognize the aesthetic functionality doctrine at all or apply it very narrowly--the time has come for courts to reexamine the doctrine because the stakes are high.

n10 See William McGeveran, *Four Free Speech Goals for Trademark Law*, 18 FORDHAM INTELL. PROP. MEDIA & ENT. L.J. 1205, 1206-07 (2008) ("Considerable anecdotal evidence suggests that the real action occurs outside the courthouse: markholders send cease-and-desist letters and threaten legal action against those using trademarks to facilitate speech, and the recipients frequently capitulate.").

n11 *Salu, Inc. v. Original Skin Store*, No. CIV. S-08-1035 FCD/KJM, 2010 WL 1444617, at *2 (E.D. Cal. Apr. 12, 2010) (internal citations omitted).

n12 See USPTO.gov, *Request for Comments: Trademark Litigation Tactics*, U.S. PATENT & TRADEMARK OFFICE, http://www.uspto.gov/trademarks/bullies_survey.jsp (last updated Jan. 31, 2012 10:34:43 AM). The Secretary of Commerce was directed to investigate trademark litigation tactics by Congress. See Trademark Technical and Conforming Amendment Act of 2010, Pub. L. No. 111-146, 124 Stat. 66.

n13 Professor McCarthy cautions that a trademark "enforcement program [should be] neither overly lax nor overly aggressive." See 2 J. THOMAS MCCARTHY, MCCARTHY ON TRADEMARKS AND UNFAIR COMPETITION § 11:91 (4th ed. 2008).

n14 Based on some enforcement of trademark rights, perhaps bullying should include what *should be* beyond a trademark holder's scope of rights and is in its rights, as opposed to what *actually is* outside their rights. Some interesting cases of "trademark bullying" include enforcement of trademarks by professional sports teams against high schools. See Randall L. Newsome, *Cease and Desist: Finding an Equitable Solution In Trademark Disputes Between High Schools and Colleges*, 52 B.C. L. REV. 1833, 1853-63, 1868 (2011) (arguing that high schools may have a very good case against trademark infringement, but noting the ambiguity in whether high schools may infringe the trademarks of colleges). For a discussion of some of the other costs of aggressive trademark enforcement, see David E. Armendariz, *Picking on the Little Guy? Asserting Trademark Rights Against Fans, Emulators and Enthusiasts*, 90 TEX. L. REV. 1259, 1276-80 (2012).

n85 *Id.* (citations omitted).

n86 Notably, the jurisprudence concerning the First Amendment and trademark law is not entirely clear. There are multiple potential tests that courts may apply; although the leading test appears to be the test from *Rogers v. Grimaldi*. *Rogers v. Grimaldi*, 875 F.2d 994, 999 (2d Cir. 1989). In that case, the court examined the application of trademark law to a title of an expressive work. *Id.* The court stated that it needed to balance the expressive interest of the First Amendment against potential consumer confusion. *Id.* Unfortunately, the Circuits have at least three different ways of applying the *Rogers v. Grimaldi* test. See Nicolas Macri, *Holding Back the (Crimson) Tide of Trademark Litigation, The Eleventh Circuit Shields Works of Art from Lanham Act Claims in New Life Art*, 54 B.C.L. REV. 71, 78-80 (2013). Other Circuits have considered the First Amendment interest in different ways in trademark cases. See e.g., *Mutual of Omaha Ins. Co. v. Novak*, 836 F.2d 397, 402-03 (8th Cir. 1987); *Dr. Seuss Enters. v. Penguin Books USA, Inc.*, 109 F.3d 1394, 1405 (9th Cir. 1997); *Cartoons, L.C. v. Major League Baseball Players Ass'n*, 95 F.3d 959, 970 (10th Cir. 1996). Importantly, in a recent case, a district court applied the *Rogers* test to dismiss a trademark complaint. *Rebellion Devs. Ltd. v. Stardock Entm't, Inc.*, 2013 WL 1944888, at *3-6 (E.D. Mich. 2013). The use of *Rogers* to end a trademark litigation early is a welcome development. For additional discussion of the *Rebellion Devs. Ltd.* case, see Rebecca Tushnet, *Sins of a Trademark Owner: Rogers Applies Regardless of Intent*, REBECCA TUSHNET'S 43(B)LOG (May 23, 2013), http://tushnet.blogspot.com/2013/05/sins-of-trademark-owner-rogers-applies.html?utm_source=feedburner&utm_medium=email&utm_campaign=Feed%3A+Re

ARTICLE: TO BULLY OR NOT TO BULLY: UNDERSTANDING THE ROLE OF UNCERTAINTY IN
TRADEMARK ENFORCEMENT DECISIONS

NAME: Jessica M. Kiser*

BIO: * Assistant Professor of Law, Gonzaga University School of Law. I wish to thank the faculty of Seattle University School of Law and the Gonzaga University School of Law for their thoughtful advice on an earlier version of this article. This article benefitted greatly from the comments and insights provided by the participants of the Junior Scholars Virtual Colloquium. Thanks also to Sean Wright for his tireless support and to Matthew Meade, Mitchell Wayerski and Charles Allen for their research and editorial assistance.

LEXISNEXIS SUMMARY:

... Unlike Clark, who selected the "Charbucks" mark for his coffee while aware of the more famous "Starbucks" mark, Muller-Moore claimed to have never heard of Chick-fil-A's "Eat Mor Chikin" advertising campaign; instead, he made the first "Eat More Kale" shirt at the request of a fellow farmer's market vendor that grew and sold kale. ... Vermont Senator Patrick Leahy took up the charge against trademark bullies in 2010 when he introduced a bill, The Trademark Law Technical and Conforming Amendment Act Of 2010 (S. 2968), that called for a mandatory study by the Department of Commerce to report on "the extent to which small businesses may be harmed by litigation tactics by corporations attempting to enforce trademark rights beyond a reasonable interpretation." ... For these reasons, trademark law should not incentivize trademark bullying; instead, it should seek a balance between the protection of trademark owners and consumers against the costs of bullying and the protection of trademarks from a finding of abandonment. ... As trademark bullying is based on evaluation of risk and uncertainty pertaining to trademarks, this article will apply prospect theory to the problem of trademark bullying, with particular emphasis on the impact of the certainty effect, endowment effect and sunk cost effect on this prospect theory analysis. ... A trademark bully essentially faces three choices: (1) a gain through a favorable settlement agreement; (2) a gain (protection against genericide and abandonment) through litigation, successful or not; or (3) a chance of loss of trademark rights if settlement or litigation is not pursued and a court later deems policing efforts to be insufficient as a result.

HIGHLIGHT: ABSTRACT

Companies like Starbucks and Chick-fil-A are routinely labeled trademark bullies. The term "trademark bully" is typically used to describe a large company that uses aggressive intimidation tactics and threats of prolonged trademark infringement litigation to stop small businesses and individuals from using their own trademarks where the stated claims of infringement are likely spurious or non-existent. Trademark bullying harms competition and chills the free speech interests of those seeking to use trademarks for criticism and parody as permitted by the fair use doctrine. This Article

identifies two fundamental causes that interact to encourage the aggressive tactics used by trademark bullies. First, trademark law imposes a vague duty on trademark owners to "police" third party trademark use for potential infringement. This uncertain duty renders trademark owners unable to accurately predict the risk of harm that third parties pose to their trademarks. Secondly, inherent cognitive biases affecting evaluations of such risk lead to systematic judgment errors and overestimation of the risk involved, thereby encouraging aggressive trademark enforcement.

This Article uses prospect theory, an empirical social science approach to understanding human decision making, to characterize the psychological phenomena, including loss aversion and overestimation of risk, that motivate trademark bullies. Prospect theory explains apparently irrational decision making by trademark bullies. Recently proposed solutions for trademark bullying mistakenly assume that the trademark bully conducts a rational cost-benefit analysis prior to acting. Better solutions require an understanding of the actual psychological processes that underlie these aggressive tactics.

TEXT:

[*212]

INTRODUCTION

Choosing a trademark to represent your business or your product can be a risky undertaking. Consider the example of Jim Clark and the "Charbucks" trademark that he selected for one of his coffee products. In a March 2012 article in New Hampshire Magazine, author Jeff Woodburn described Jim Clark's New Hampshire business:

Along with his wife, Annie, he owns Black Bear Micro-Roastery, a tiny coffee roaster in the small town of Tuftonboro on the back side of Lake Winnepesaukee. They have one part-time employee and sales of less than \$ 200,000 annually. Nearly all of their twenty-two specialty roasts are sold online directly to customers and through a few stores in northern New England - including the Lebanon Co-op Food Store. They thrive on being small, authentic and responsive to their customers. Back in 1996, some of Clark's customers asked for a stronger blend. So on a lark, he made one - so strong, Clark admits, "I won't drink it." ⁿ¹

In this quote, Clark is referring to the dark roasted coffee that he began selling under a "Charbucks" trademark, a nod to the "charred" coffee beans used in this blend. ⁿ² This mark ⁿ³ ultimately led to his company being embroiled in a sixteen-year long trademark dispute with the large coffee retailer Starbucks. ⁿ⁴ Starbucks contacted Clark in 1997 and requested that he cease use of the "Charbucks" mark, because they believed that it was infringing upon and diluting the value of their famous "Starbucks" mark. ⁿ⁵ After years of discussions and settlement proposals between Clark, his attorneys and the attorneys for Starbucks, Starbucks brought suit against Clark and his business on July 2, 2001. ⁿ⁶ Over the next ten years, this case went to trial and was appealed and reversed several times. ⁿ⁷ The latest decision, [*213] from the U.S. Court of Appeals for the Second Circuit, came down on November 15, 2013 in favor of Clark and his Black Bear Micro-Roastery. ⁿ⁸ The court held that Starbucks had not met its burden of proving that the "Charbucks" mark, as it is consistently used in connection with the "Black Bear Micro Roastery" mark and logo, dilutes the famous "Starbucks" mark in violation of the Federal Trademark Dilution Act. ⁿ⁹

For a somewhat similar scenario involving a large corporation in a trademark dispute with a much smaller business, one only has to look to the "Eat More Kale" dispute. Bo Muller-Moore is a Vermont folk artist and small-scale T-shirt designer who received a cease and desist letter in 2006 from Chick-fil-A, a nearly national fast food chain. ⁿ¹⁰ Chick-fil-A demanded that Muller-Moore stop selling one of his T-shirt designs, alleging that the slogan on the shirt - "Eat More Kale" - infringed upon their "Eat Mor Chikin" mark. ⁿ¹¹ After receiving a letter from Muller-Moore's pro bono counsel explaining the small scale of Muller-Moore's T-shirt business, including the fact that the shirts were

primarily sold at a Montpelier, Vermont farmer's market, Chick-fil-A appeared to have allowed the matter to drop.ⁿ¹² Then, Muller-Moore filed a trademark application with the United States Patent and Trademark Office (the "USPTO") on August 31, 2011 for his "Eat More Kale" trademark.ⁿ¹³

This trademark application prompted Chick-fil-A to resume its dispute with Muller-Moore by sending a new cease and desist letter in October 2011, again demanding that Muller-Moore cease use of the "Eat More Kale" mark, abandon his trademark application, and transfer his eatmorekale.com domain name to Chick-fil-A.ⁿ¹⁴ Chick-fil-A noted in this letter that it had already successfully stopped third [*214] parties from using marks such as "Eat More Goat" and "Eat More Beer."ⁿ¹⁵ Muller-Moore's pro bono counsel refused Chick-fil-A's demands, noting that there is no likelihood of confusion between Muller-Moore's handmade T-shirts and Chick-fil-A's fast food chain, especially in light of the fact that the closest Chick-fil-A location to Muller-Moore's home business is 120 miles away in New Hampshire.ⁿ¹⁶ Unlike Clark, who selected the "Charbucks" mark for his coffee while aware of the more famous "Starbucks" mark, Muller-Moore claimed to have never heard of Chick-fil-A's "Eat Mor Chikin" advertising campaign; instead, he made the first "Eat More Kale" shirt at the request of a fellow farmer's market vendor that grew and sold kale.ⁿ¹⁷ Despite the fact that an Office Action from the U.S. Patent and Trademark Office (USPTO) dated December 18, 2011 stated that the attorney reviewing Muller-Moore's "Eat More Kale" trademark application noted no "similar registered or pending marks that would bar registration,"ⁿ¹⁸ Muller-Moore's application was flagged to be reviewed again on December 21, 2011 after an anonymous party filed a Letter of Protest with the USPTO.ⁿ¹⁹ On March 27, 2012, and again on March 7, 2013, the USPTO sent Muller-Moore Office Actions refusing the registration of his "Eat More Kale" mark based on a likelihood of confusion with Chick-fil-A's various "Eat More Chikin" trademark registrations.ⁿ²⁰ Because Muller-Moore may still respond to this last Office Action, his trademark application is still pending. Additionally, Muller-Moore seems eager to win this [*215] battle; he has routinely turned to the press to publicize his dispute with Chick-fil-A,ⁿ²¹ and he is currently participating in the production of a documentary, titled "A Defiant Dude," that will feature his story and examine trademark bullying by large corporations against individuals and small businesses.ⁿ²² Of course, Jim Clark's battle with Starbucks has been going on much longer than the "Eat More Kale" dispute. Despite his persistence through the numerous appeals of his case, Jim Clark's advice to Muller-Moore and others similarly situated would be, "Settle. Get it behind you. It's been a nightmare."ⁿ²³

Disputes like the ones above are the reason that companies like Starbucks and Chick-fil-A are called "trademark bullies."ⁿ²⁴ Trademarkia, a web-based company that assists users in searching for existing trademark registrations and in filing trademark applications,ⁿ²⁵ has begun tracking trademark oppositions in order to publish lists of the most aggressive "trademark bullies" - those companies that file the largest number of oppositions against third party trademark applications and who use extended opposition tactics to delay federal approval of such applications.ⁿ²⁶ Companies like Monster Energy Company, E. & J. Gallo Winery, McDonald's Corporation, Anheuser-Busch, LLC and Facebook, Inc. topped Trademarkia's list of trademark bullies for 2012.ⁿ²⁷

While several scholars and the media have begun to publicize and discuss the issue of trademark bullying,ⁿ²⁸ most of the attention on this potential problem has focused on how to "shame" or punish the trademark bully, or on how to embolden the perceived victim (such as through the creation of antiSLAPP legislation that [*216] allows defendants to seek damages upon proof that a plaintiff filed a meritless suit).ⁿ²⁹ This Article seeks to examine the reasons that may underlie the aggressive tactics of trademark bullies - a necessary step in understanding how best to address the problem. Part I of this Article provides background on trademark bullying and the potential problematic results of such trademark enforcement tactics. Part II of the Article explores the potential legal reasons for the aggressive and costly actions taken by trademark bullies, including the role played by trademark law's "duty to police" in encouraging bully-like behavior. Part III then attempts to explain bullying behavior, in light of the duty to police one's trademark, using prospect theory and cognitive bias research into the psychological basis for human reasoning, decision making and risk avoidance. The Article concludes by explaining that current proposals to address trademark bullying are insufficient because they neglect to address the often unconscious psychological mechanisms at work that likely encourage a trademark bully to behave irrationally. To overcome the hurdle posed by such irrationality, steps must be taken by legislators or attorneys to clarify the trademark duty to police and the true risk of abandonment of one's trademark. For the purposes of this

Article, the term "trademark bully" will refer to a company that takes aggressive steps to enforce its trademark rights against another company or individual where the legal claims are likely spurious or unenforceable.

I. THE TRADEMARK BULLYING PROBLEM

Most scholarship on the topic of trademark bullying has focused solely on large companies taking action against smaller companies or unsophisticated individuals.ⁿ³⁰ While trademark bullying disputes reported in the press and in scholarship typically play out in this large entity against small entity dichotomy, such a distinction is not necessary for the purposes of this Article. Instead, the aggressive - and potentially very costly and inefficient - actions taken by the trademark holder are the key to labeling such individuals or companies as [*217] "trademark bullies."ⁿ³¹

Typically, an incident of trademark bullying starts with a cease and desist ("C&D") letter sent from an owner of an established trademark to an individual or business with a vaguely similar mark. This was true of the "Charbucks" and "Eat More Kale" disputes discussed above. Each trademark bully may have learned of the other mark through the other party's official application for registration of the trademark with the USPTO.ⁿ³² They may have learned about the mark from an employee or customer who encountered a product bearing the trademark in the marketplace, or possibly through a general Internet search.ⁿ³³ The perceived victim of bullying could be a well-funded commercial enterprise, but it could just as easily be an individual with a small, local, home-based business. The Internet has made it relatively easy to find third parties using arguably similar trademarks without regard to the geographic or commercial scope of the use or the sophistication of the mark's owner. Often the C&D letters sent by the bullies threaten legal sanctions if certain demands are not met. Those demands may include immediate cessation of use of the allegedly infringing trademark, the transfer of the infringing owner's website domain name to the bully, and the destruction of all potentially infringing products, marketing materials and even packaging and business stationery. Sometimes such letters detail how the allegedly infringing party has violated the trademark rights of the bully, but often the letters are vague and filled with confusing legalese and idle threats.

[*218] The recipient of a C&D letter is faced with the daunting task of determining the merits of such vague claims in order to make a reasoned response. The problem is that trademark infringement cases are notoriously fact-specific. Because "likelihood of confusion, the test for trademark infringement, is considered an issue of fact at the trial level," it is "hard to determine with very real certainty how future courts will use prior cases."ⁿ³⁴ This lack of certainty and dearth of good precedential cases makes it difficult for the bullying targets to respond based on the legal merits of their possible infringement defenses; rather, they often respond based on their own financial ability to defend the dispute in the first place. Additionally, this lack of clarity and predictability in the law encourages trademark bullying. An experienced attorney may be able to rely on prior experience and anecdotal evidence to judge the costs associated with the dispute, but he is unlikely to be able to tell a client with any certainty that a claim is meritless (regardless of whether such client is the potential plaintiff or defendant).ⁿ³⁵ Thus, trademark bullying can only rarely be described as meritless and is often better described as unnecessary, inefficient and economically irrational.ⁿ³⁶

Vermont Senator Patrick Leahy took up the charge against trademark bullies in 2010 when he introduced a bill, The Trademark Law Technical and Conforming Amendment Act Of 2010 (S. 2968), that called for a mandatory study by the Department of Commerce to report on "the extent to which small businesses may be harmed by litigation tactics by corporations attempting to enforce trademark rights beyond a reasonable interpretation."ⁿ³⁷ This was a direct response to the very public dispute in the Senator's home state of Vermont between Hansen Beverage Company, makers of the "Monster Energy" trademarked energy drinks, and Rock Art Brewery, a small Vermont brewing company that released a beer under the trademark "Vermonster."ⁿ³⁸ In that instance, Rock Art Brewery received a threatening C&D letter from Hansen Beverage Company but was able to appeal to social media in order to "shame" Hansen Beverage Company into agreeing to a relatively neutral settlement agreement.ⁿ³⁹

The result of Senator Leahy's efforts was the "Report to Congress: Trademark Litigation Tactics and Federal Government Services to Protect Trademarks and [*219] Prevent Counterfeiting" (the "Report to Congress") that the USPTO published in April 2011.ⁿ⁴⁰ This report was based on comments received from the public during a period of

four months. According to the report, "The seventy-nine comments received reflected a diverse range of views, yet few explicitly addressed whether and to what extent trademark abuse is a significant problem."ⁿ⁴¹ Despite receiving only seventy-nine comments from the public, and recognizing that very few of those comments directly answered the question being asked, the USPTO somehow determined that trademark bullying can best be addressed by the current safeguards in the private litigation system.ⁿ⁴² This conclusion has been widely criticized.ⁿ⁴³ Eric Goldman, Professor of Intellectual Property Law at Santa Clara University School of Law, even went so far as to call the report "worthless."ⁿ⁴⁴ Overall, the report recommends that members of the private bar be encouraged to take on more pro bono cases to help any potential bullying victims that may not be able to afford counsel on their own.ⁿ⁴⁵ In a similar vein, Jason Vogel and Jeremy A. Schachter, both practicing attorneys, recently published an article on trademark bullying in the International Trademark Association's *The Trademark Reporter*.ⁿ⁴⁶ Their article also argues that the trademark bullying problem can be managed without new legislation: instead, existing legal ethics rules can be utilized to deter and punish bullying behavior in both the litigation and prelitigation stages of a dispute.ⁿ⁴⁷ While there is disagreement about whether trademark bullying is a widespread problem,ⁿ⁴⁸ it is clearly a costly problem with potentially dire consequences for the parties involved in each bullying dispute.

A. The Cost of Trademark Bullying to Small Businesses

When discussing the costs of trademark bullying to the bullying victim, small businesses become the logical focus of the discussion. When the target of bullying [*220] is a large corporation, that corporation is likely to have the resources to defend itself more fully, including easy access to an attorney to respond to a C&D letter. A large corporation is also likely to have a sophisticated understanding of the role the C&D letter plays in the dispute process. Professor Leah Chan Grinvald has explained that "the rational corporation would likely call the bluff of the threatening company because the rational corporation knows that only 3 percent of all threats of litigation end up in court."ⁿ⁴⁹ However, a small business will often agree to cease use of its trademark, viewing that option as the least expensive choice.

Changing one's trademark can still be an expensive proposition. If the trademark is also the name of the business, the bullying victim may need to consult with counsel about amending or filing for new licenses and incorporation documents with its state. Most bullies also demand that the bullying victim destroy all inventory, marketing materials and even packaging supplies bearing the offending trademark.ⁿ⁵⁰ It will not be cheap to replace these goods, which will be needed immediately to continue operation of the business, and it is unlikely that these kinds of expenses would be accounted for in a small business's regular budget. Additionally, a young business will have invested a lot of its initial capital into advertising and the development of goodwill around the company's business name or trademark. All of that investment will be lost, and those expenses will need to be duplicated. Trademark disputes, like the ones facing Jim Clark and Bo Muller-Moore, greatly increase the likelihood that a small business will fail.ⁿ⁵¹

A trademark bully is likely to recognize that his target is in such a precarious position. In Professor William Gallagher's interviews with trademark and copyright counsel, he found

that [the attorneys] were well aware that asserting claims against a smaller company was often easier than targeting a larger company. The lawyers stated that smaller companies generally could not effectively resist a trademark or copyright claim or threatened lawsuit due to the high cost of IP legal proceedings, regardless of the legal [*221] sophistication of the target or their lawyers.ⁿ⁵²

The Report to Congress envisions increased access to pro bono counsel as the solution to aid these small businesses, but this proposal is shortsighted. The small business owner would first have to be sophisticated enough to know how to obtain pro bono counsel and would have to be confident enough in its own resources and abilities to decide to consider fighting, rather than capitulating immediately. Even prior to taking his dispute to trial, Jim Clark incurred over \$ 10,000 in legal fees simply from his attempts to negotiate a settlement agreement with Starbucks.ⁿ⁵³ He was only able to

afford to defend the case in court after he was informed that his commercial insurance policy would cover the costs once a suit requesting damages was filed against him.ⁿ⁵⁴ Most small businesses would simply not have the ability to defend themselves or to risk waiting for help from pro bono counsel.

However, the public and media backlash against trademark bullying has led to an interesting change of fortune in some instances. By publicizing its trademark dispute with Hansen Beverage Company, Rock Art Brewery obtained a lot of free publicity.ⁿ⁵⁵ It garnered the support of a Vermont senator and benefitted from increased sales even after the dispute was settled.ⁿ⁵⁶ After learning of the "Eat More Kale" dispute, Vermont Governor Peter Shumlin said in December 2011 that the state would do all it could to help Muller-Moore in his battle against Chick-fil-A.ⁿ⁵⁷ It is unlikely that Bo Muller-Moore would be the subject of an upcoming documentary or touring festivals across the country selling his shirts were it not for the publicity surrounding Chick-fil-A's alleged trademark bullying in the first place.ⁿ⁵⁸ Of course, the typical trademark bullying victim is unlikely to fare so well.

B. The Costs Borne by the Trademark Bully

While it is easy to focus solely on the costs borne by the victim of trademark bullying, the bully faces a number of costs as well. Being a trademark bully can [*222] certainly be expensive - the trademark bully faces numerous direct and indirect costs related to its aggressive enforcement of its trademark rights. These companies incur these costs because they place substantial value on their trademarks: in some cases a company's trademark, or its combined trademark portfolio, can represent a substantial portion of the company's net worth. For example, Brand Finance, a consulting company that prepares brand valuations for tax, accounting, legal and other corporate purposes, has calculated the value of Apple's brand, and thus its trademark portfolio and related goodwill, at nearly \$ 71 billion for 2012.ⁿ⁵⁹ Brand Finance determined Google's 2012 brand value to be over \$ 47 billion.ⁿ⁶⁰ With such valuable assets presumed to be at stake, companies allocate a substantial amount of money to trademark enforcement and protection.

The party enforcing, or overenforcing, its trademark rights, must pay attorneys for correspondence and negotiations with the bullying victim, as well as potentially for "watch services" to find third parties to bully in the first place. According to a survey of intellectual property attorneys conducted and analyzed by the American Intellectual Property Law Association, the average billing rate for such an attorney was \$ 340 per hour.ⁿ⁶¹ Trademark monitoring watch reports are prepared by third parties, like Corsearch, CPA Global and Thomson CompuMark that monitor the marketplace for possible infringement of a client's trademark.ⁿ⁶² They routinely search the records of state and federal trademark registers, domain name registrars, business name registration databases, and other sources. Companies like Mark Monitor, Cyberveillance and BD Brand Protect also monitor the Internet and social media websites for potential trademark infringement.ⁿ⁶³ The costs associated with paying a third party for trademark watch reports and for Internet monitoring can quickly add up when many of these services charge based on the number of marks being monitored. Additionally, such reports must be analyzed by an attorney, so a trademark bully would pay high billing rates just to determine if a third party is a risk in the first place.

Additional attorneys fees and other costs are obviously incurred when companies proceed beyond C&D letters and seek to stop a potentially infringing third party. One option is to file an opposition to a third party's trademark registration or petition to cancel such registration with the USPTO. Attorneys Marcus Luepke and Brett Heavner with the law firm of Finnegan, Henderson, Farabow, Garrett & Dunner LLP, a firm that routinely handles such actions on [*223] behalf of its clients, explain that "depending on the complexity of the case, the motions filed, and the amount of discovery and testimony entered in the case, the costs of either oppositions to registration or petitions for cancellation of a registration through completion may be up to US \$ 500,000."ⁿ⁶⁴ If the trademark bully decides instead to file an infringement suit, the costs could grow even higher. According to the American Intellectual Property Law Association's 2011 Report of the Economic Survey, the average cost of a trademark infringement suit ranged from \$ 350,000 (when less than \$ 1 million was at risk) to \$ 1.5 million (when more than \$ 25 million was at risk).ⁿ⁶⁵ While it is true that a trademark bully imposes significant costs upon the target of its bullying, the bully clearly faces substantial costs of its own.

C. The Costs of Trademark Bullying to Society at Large

Trademark bullying imposes additional costs on society as a whole. If a trademark bully successfully forces a third party to cease use of a trademark that would not actually have been declared infringing in a court of law, then that bully may have reduced legitimate competition in the marketplace.ⁿ⁶⁶ Harming competitors, potentially through the use of costly litigation tactics without a real belief that infringement has occurred, is sometimes the tactical motivation for trademark bullying. In Professor Gallagher's interviews of trademark and copyright counsel, one interviewee stated, "No, I mean make them stop and make them pay for litigation if they don't. We can beat them ... up in court, too. Makes them think twice next time. Makes them disrupt things to deal with us."ⁿ⁶⁷ As discussed above, simply requiring the destruction of inventory and the creation and use of a new trademark could be expensive enough to force a small business into bankruptcy, which reduces the bully's potential competition. Such tactics clearly appear anticompetitive but do not rise to the level of an antitrust violation, and they are likely to be permitted to continue, largely unchecked, as a business strategy.ⁿ⁶⁸

Numerous scholars have also argued that society can be harmed by bullying's [*224] impact on free speech and cultural expression: bullying can stop and potentially chill speech that would otherwise be legally permissible.ⁿ⁶⁹ In Professor Gallagher's interviews, the interviewee quoted earlier stated that the third parties that his clients target are "no threat to us, a different world, very different services. No real likelihood of confusion. But we just didn't want them to use it, use their mark."ⁿ⁷⁰ In such a case, the third party's use is unlikely to be infringing; such use could continue if it were not for the intimidation tactics of the trademark bully. This concern about meritless trademark bullying is especially apt when the fair use defense is implicated. When a third party uses a trademark in an expressive manner, and thus not as a trademark identifying a source of a good or service, the Lanham Act states that such use is not actionable.ⁿ⁷¹ Professor Leah Chan Grinvald, for example, has expressed concern about such bullying when it goes to the heart of the fair use defense and "targets individuals who are utilizing a trademark to parody, criticize, or comment on a trademark owner."ⁿ⁷² Marks are often used for parody, such as when the musical group Aqua parodied the "Barbie" doll, or for criticism, such as in the case of critical "gripe" or complaint websites like www.ballysucks.com. Both trademark uses in these two examples were permitted by the courts as fair use.ⁿ⁷³ The aggressive and intimidating actions of trademark bullies could improperly prevent the artistic or critical commentary that society generally views as valuable and that the law permits as fair use. For these reasons, trademark law should not incentivize trademark bullying; instead, it should seek a balance between the protection of trademark owners and consumers against the costs of bullying and the protection of trademarks from a finding of abandonment.

II. THE LEGAL REASONS FOR BULLY-LIKE BEHAVIOR

One might wonder why trademark bullying exists if it is so costly to everyone involved. The reason is that even a strong trademark can lose the protections afforded to it by federal trademark law under certain circumstances.ⁿ⁷⁴ Trademark [*225] owners are typically advised to monitor and "police" third party uses of trademarks identical to or similar to those of the trademark owner, in order to serve three purposes: preventing genericide, monitoring licensees and quality control and stopping any potential infringement.ⁿ⁷⁵ Trademark owners do this to avoid a determination by a court or by the USPTO that they have "abandoned" their trademark. According to Section 1127 of the Lanham Act, a trademark will be deemed "abandoned" when "its use has been discontinued with the intent not to resume such use" or when "any course of conduct of the owner, including acts of omission as well as commission, causes the mark to become the generic name for the goods or services on or in connection with which it is used or otherwise lose its significance as a mark."ⁿ⁷⁶ It is primarily this definition of abandonment, and the loss of trademark rights that go along with such a determination, that spawned the "duty to police" third party trademark usage that is now generally accepted as a bedrock principle of trademark law.ⁿ⁷⁷ While the duty to police exists, its uncertain boundaries have negative consequences. According to Professor Irina D. Manta, "A significant amount of trademark bullying stems from bullies' impression that to maintain a mark, it is the owner's duty to aggressively police it. Thus, many bullying situations involve mark owners who have taken this perceived duty to extreme levels."ⁿ⁷⁸

A. The Duty to Police One's Trademark to Prevent Trademark Abandonment

Breaking down Section 1127 into its component parts, abandonment can be seen to occur in three ways: (1) a trademark owner intends to abandon the mark and thus discontinues its use, (2) a trademark owner, through overt acts or omissions, allows the mark to become the generic name for the good or service with which it has been used or (3) a trademark owner, through overt acts or omissions, allows the mark to lose its significance as a mark (such that it no longer identifies the source of the good or service to a consumer). As the duty to police focuses on actions of third parties, it does not implicate the "intent to abandon" route to abandonment referenced above.ⁿ⁷⁹ For the purposes of this article, the focus will be on the duty to [*226] police resulting from a desire to avoid (1) abandonment through genericide and/or (2) abandonment through loss of trademark significance.

1. Abandonment Through Genericide

A trademark can become the generic name for a type of good or service. This is the potential downside of having a popular trademark or a huge market share for a particular product or service. Consumers can fail to recognize that the trademark identifies the source of the product. This process, by which a formerly strong and distinct trademark loses its ability to identify the source of a particular product with which it has been previously connected, is generally called genericide.ⁿ⁸⁰ When genericide occurs, the trademark comes to be known by consumers as the generic term used to describe the whole category of goods in which that particular product exists.ⁿ⁸¹

One of the classic examples of this process of genericide is the shift of the trademark "Aspirin" from the fanciful brand name used by Bayer Co. to market its acetyl salicylic acid pain reliever to the generic term used by consumers to refer to all such pain relievers whether produced by Bayer Co. or a different manufacturer.ⁿ⁸² In *Bayer Co. v. United Drug Co.*, the District Court for the Southern District of New York held that the trademark "Aspirin" had lost its source identifying significance; as such, it no longer functioned as a trademark and would no longer be afforded the legal rights granted with respect to trademarks.ⁿ⁸³ In this manner, the actions of consumers, third parties unrelated to the manufacture, marketing or sale of a branded product, can usurp the trademark rights established by a trademark owner. "Aspirin" now exists in the public domain along with other former trademarks like nylon, cellophane, escalator and trampoline.ⁿ⁸⁴

Once a trademark has been declared generic, it must be deemed abandoned by the trademark owner according to Section 1127 of the Lanham Act. This stems directly from the fact that a generic trademark can never be granted federal trademark registration with the USPTO.ⁿ⁸⁵ Former Assistant Attorney General William F. Baxter once explained the purpose of trademark protection as follows: "by identifying the source of goods or services, marks help consumers to identify their expected quality and, hence, assist in identifying goods and services that meet the individual consumer's expectations."ⁿ⁸⁶ From this underlying purpose, it [*227] follows that all valid trademarks must function as source identifiers upon which consumer good will and confidence can be built.ⁿ⁸⁷ Therefore, words that are generic, or that become generic, "are unprotectable under the Lanham Act and the common law doctrine of unfair competition because they do not (or no longer) have the capacity for source identification."ⁿ⁸⁸ A word or phrase is generic where "the primary significance of the trademark is to describe the type of product rather than the producer."ⁿ⁸⁹ For example, a business that sells cakes cannot claim trademark rights in the word "cake." The word "cake" is a generic term for the cake product being sold; as such, this business cannot obtain monopolistic rights over the generic term for a product that will be sold by other businesses. This is true whether the proposed mark starts as a generic term or becomes generic over time, like the mark "aspirin."

2. Abandonment for Loss of Significance as a Mark

Section 1127 of the Lanham Act also indicates that a mark can be abandoned if its owner allows it to lose its significance as a mark.ⁿ⁹⁰ Distinguishing this situation from those instances where failure to stop third party infringers allows a mark to become generic, the noted trademark treatise author Thomas McCarthy has posited that the important consideration here is not whether such failure to sue constitutes abandonment but whether it has resulted in a loss of

strength of the underlying mark in the eyes of consumers.ⁿ⁹¹ The difference between a mark that has become generic and one that has lost its significance as a mark is one of scale. If a mark has lost its significance as a mark, it can no longer clearly signify to a consumer the source of that particular good or service. It has not become the generic label for the product or service being sold, but the direct link between product or service and its source has been severed. The Court of Appeals for the Federal Circuit has explained trademark significance as follows:

Without question, distinctiveness can be lost by failing to take action against infringers. If there are numerous products in the marketplace bearing the alleged mark, purchasers may learn to ignore the "mark" as a source identification. When that occurs, the conduct of the former owner, by failing to police its mark, can be said to have caused the mark to lose its significance as a mark.ⁿ⁹²

The loss of significance grounds for abandonment is often confused with the defenses of acquiescence and laches. In his treatise, McCarthy distinguishes [*228] between acquiescence and abandonment as follows:

While plaintiff's failure to prosecute trademark uses by parties other than defendants may be evidence of plaintiff's acquiescence in defendant's use, such a failure is not acquiescence where a third party's usage is de minimus. Acquiescence should not be confused with abandonment of trademark rights. The defense of abandonment results in a loss of rights as against the world, while the defense of acquiescence merely results in a loss of rights as against one defendant.ⁿ⁹³

Acquiescence can therefore be seen as a personal defense. If a trademark owner knows of a specific third party's potential trademark infringement and fails to take steps to stop it for a significant period of time, that third party may be able to use the defense of acquiescence to prohibit the trademark owner from stopping the third party's use in the future.ⁿ⁹⁴ This is very similar to the equitable defense of laches that such a third party may also be able to use. For laches to apply, the third party would need to show that the trademark owner's unreasonable delay in bringing the trademark suit would cause unfair prejudice to the third party.ⁿ⁹⁵ In both instances, these defenses are distinct from abandonment because they only hinder the trademark owner's monopolistic trademark rights against the single third party.ⁿ⁹⁶ Abandonment terminates those rights against the whole world.ⁿ⁹⁷

The defendant in *Wallpaper Mfrs., Ltd. v. Crown Wallcovering Corp.* raised the defense of abandonment.ⁿ⁹⁸ Both the plaintiff and the defendant had been using the trademark "Crown" in connection with the sale of wallpaper products.ⁿ⁹⁹ The plaintiff was the first user of this mark, and thus had priority absent loss of the trademark rights due to abandonment.ⁿ¹⁰⁰ The United States Court of Customs and Patent Appeals quickly dismissed the argument that abandonment had occurred through the plaintiff trademark owner's intent to abandon.ⁿ¹⁰¹ Additionally, the trademark "Crown" had not become a generic term within the field of wallpaper.ⁿ¹⁰² The lower court had found abandonment based on the evidence presented that the trademark "Crown" no longer identifies either party's goods or distinguishes them from those manufactured or sold by the other; therefore, the court ordered that the plaintiff's trademark registration be canceled because the mark could no longer serve as a source identifier and customers would be confused by two companies using the same mark in the same industry.ⁿ¹⁰³

[*229] However, this decision was reversed by the United States Court of Customs and Patent Appeals, which stated:

The only issue before us is abandonment - whether appellant has forfeited all rights because the mark CROWN no longer identifies appellant as a source for wallpaper. The board's finding that CROWN continues to function as a mark

for appellant can only mean appellant's acts have not been of such character as to cause the mark to lose its significance as an indication of origin for appellant's goods. ⁿ¹⁰⁴

The fact that some consumers also knew of the connection between the defendant and the mark did counter the evidence that many consumers still saw the mark as an indicator that the plaintiff was the source of the product. ⁿ¹⁰⁵

While the plaintiff in *Wallpaper Mfrs.* could have a claim against the defendant for infringement, the defendant's concurrent use of the mark was not substantial enough to cause abandonment. For abandonment to occur due to loss of significance of a mark, that loss must be something more than simply confusion among a small number of consumers due to two competitors using a similar mark.

B. Overestimation of Duty to Police by Trademark Owners

While trademark owners routinely cite the duty to police as justification for their bully-like behavior, ⁿ¹⁰⁶ the actual risk of losing one's trademark rights due to a failure to police third party trademark use appears to be highly exaggerated. In the majority of cases in which a failure to police third party trademark usage is alleged, courts find that any such failure has not risen to the level of abandonment of the mark and thus is inconsequential. ⁿ¹⁰⁷ Where the courts have terminated a mark in such cases, the deciding factor is not whether the mark owner failed to police third party use but whether the owner evidenced an intent to abandon the mark or allowed the mark to become so freely used by competitors that it no longer functions as an indicator of source at all. ⁿ¹⁰⁸ Additionally, a "party seeking to prove abandonment has a high burden of proof," and that burden is rarely met. ⁿ¹⁰⁹

In a clear case where termination of trademark rights was appropriate, the Second Circuit held that the "Milk of Magnesia" trademark, registered with the [*230] United States Patent and Trademark Office in 1905, should be canceled. ⁿ¹¹⁰ The Second Circuit based its decision on two separate grounds for cancelation: the fact that (1) the mark "was not in the actual and exclusive use of the defendant, or its predecessors, during the ten years prescribed by the statute," ⁿ¹¹¹ and (2) the defendant's abandonment of the mark as shown by its failure "during a long period to assert or enforce its rights" against widespread use of the mark by competitors. ⁿ¹¹² Between the date of registration of the mark in 1905 and the start of the cancelation proceeding on June 25, 1924, the defendant trademark owner in this case had allowed numerous competitors to sell high quantities of the same basic product under the "Milk of Magnesia" mark. ⁿ¹¹³ The Second Circuit determined that the defendant "had taken no steps whatever to assert its rights, and had really ignored the extensive use by others." ⁿ¹¹⁴ Such blatant disregard for the trademark allowed it to become abandoned, because the mark "no longer indicated the origin of the goods sold under it." ⁿ¹¹⁵

In contrast, in *Council of Better Business Bureaus, Inc. v. Better Business Bureau, Inc.*, the plaintiff organization brought an action for infringement against a former member who countered by asserting that the plaintiff's mark had been abandoned. ⁿ¹¹⁶ This defense was premised on the fact that the plaintiff had failed to stop numerous smaller and local organizations from referring to themselves as "Better Business Divisions, Councils and Departments, etc. of various Chambers of Commerce." ⁿ¹¹⁷ However, the U.S. District Court for the Southern District of Florida determined, based on evidence presented by the plaintiff, that the existence of such third party organizations had not "affected the distinctiveness" of the plaintiff's mark. ⁿ¹¹⁸ As a result, the defendant's abandonment defense failed. ⁿ¹¹⁹

Similarly, in *STX, Inc. v. Bauer USA, Inc.*, the defendant Bauer, a former licensee of the trademark for protective skating equipment at issue, alleged that STX's trademark rights had been abandoned and thus could no longer be enforced. ⁿ¹²⁰ This defense was based on an STX executive's admission that the company was aware of several competitors making widespread use of similar, [*231] unlicensed and potentially infringing trademarks. ⁿ¹²¹ While STX had knowledge of such third party trademark usage, STX had taken no formal action against any of these third parties in the five years preceding this suit against Bauer. ⁿ¹²² The U.S. District Court for the Northern District of California first clarified that "evidence of other potential infringers is 'irrelevant' to a suit against a particular infringer" absent convincing evidence of abandonment of the mark. ⁿ¹²³ The court then noted that the defendant had only shown that STX was aware of third party uses; the defendant had not presented any evidence illustrating STX's consent, tacit or

implied, to such potentially infringing uses. ⁿ¹²⁴ Quoting an opinion by the Ninth Circuit, the Court stated that "an owner is not required to act immediately against every possible infringing use to avoid a holding of abandonment." ⁿ¹²⁵ Despite STX's business determination not to take formal action against the potential infringers of which it was aware, the defendant's motion for summary judgment on the issue of abandonment was dismissed because STX's monitoring of industry magazines and visits to retail establishments led the court to conclude that STX conducted enough "policing" to prevent an unambiguous determination of abandonment. ⁿ¹²⁶

Based on abandonment case precedent, what should a trademark owner do to protect its mark from an allegation of abandonment? The court in *Wallpaper Mfrs.* explained that:

An owner is not required to act immediately against every possibly infringing use to avoid a holding of abandonment Some infringements are short-lived and will disappear without action by the trademark owner. In the case of a mark temporarily not in use or only used to a limited extent, a company may be hard pressed to extend its financial resources to fight an infringer when it has little or no current market under its mark. ⁿ¹²⁷

Clearly, courts do not require a trademark owner to stop every potential third party infringer. Additionally, the cases suggest that absent evidence of intent to abandon, a trademark owner simply needs to prevent its mark from becoming generic and monitor the significance of its mark within the relevant consuming public. Both of [*232] these goals could be achieved by employing a proactive branding strategy rather than a reactive litigation strategy. Perhaps a trademark owner would be wiser to spend money on advertising rather than spending it on bully-like tactics against non-competitor third parties. With this in mind, were the actions taken by Chick-fil-A and Starbucks reasonable or necessary? The "Starbucks" mark is clearly not generic, and it is highly unlikely that the "Charbucks" mark could cause the "Starbucks" mark to lose its significance as a trademark given the large amount of advertising conducted by Starbucks and the widespread brand recognition it enjoys. However, the fact that "Charbucks" was being used by a coffee company could have made this a closer case for loss of significance, or a laches or acquiescence concern, to the Starbucks attorney that sent the first C&D letter to Jim Clark. ⁿ¹²⁸ However, the attorneys for Chick-fil-A have less merit to their concerns. The company's "Eat Mor Chikin" mark is relatively popular and well known in its retail markets, suggesting that it is unlikely to be generic or close to losing its significance as a trademark. Whether it is known in areas without access to a retail location is arguable; Muller-Moore certainly claims to live in such a market and never to have heard of the mark prior to the dispute. Additionally, Muller-Moore's "Eat More Kale" mark is unlikely to hinder the strength of the Chick-fil-A marks because Muller-Moore is not a competitor of Chick-fil-A and has only negligible sales.

III. COGNITIVE BIAS RESULTS IN OVERESTIMATION OF RISK OF TRADEMARK ABANDONMENT

Why do trademark bullies expend so much time and energy pursuing noncompetitor third parties? As discussed above, case law suggests that the duty to police is not overly burdensome and simply requires mark owners to use their mark in such a way as to keep it from becoming generic and to police uses by competitors so that the mark maintains its ability to identify the source of a product or service. Based on this premise, it appears that the actions of trademark bullies - investing thousands of dollars in policing third party uses, pursuing weak claims to court when the bullied party refuses to capitulate, and incurring extensive bad publicity in the process - may not be entirely rational. ⁿ¹²⁹ Such seemingly irrational behavior consistently chosen by trademark owners suggests that other [*233] psychological factors may be at play.

Research from the fields of psychology and economics identifying cognitive biases and heuristics can resolve this apparent disconnect. Numerous behavioral studies have shown that humans are not always rational actors when faced with decisions pertaining to risk and uncertainty. ⁿ¹³⁰ Instead, such studies show that people often rely on mental shortcuts called cognitive biases or heuristics to consciously or subconsciously assist in making these sorts of decisions. ⁿ¹³¹ Legal scholars have already applied these theories of cognitive bias and heuristics in legal decision making to

explain the sometimes irrational behavior of judges,ⁿ¹³² juries (especially in terms of damage awards in tort litigation),ⁿ¹³³ and even negotiating parties.ⁿ¹³⁴ This Article proposes that cognitive biases can also help to explain the actions of trademark bullies. Better understanding the motivations, both legal and psychological, of trademark bullies will assist courts and legislators in crafting solutions to deter trademark bullying and to address the various problematic consequences of bullying discussed above.

A. Background on Cognitive Bias and Prospect Theory

Starting in the 1970s, Amos Tversky and Daniel Kahneman published a number of empirical studies that formed the foundation for the study of decision making under conditions of uncertainty.ⁿ¹³⁵ In 1974's "Judgment Under Uncertainty: Heuristics and Biases," they determined that "people rely on a limited number of heuristic principles which reduce the complex tasks of assessing probabilities and predicting values to simpler judgmental operations."ⁿ¹³⁶ These heuristics are the conscious or unconscious mental shortcuts that allow a person to quickly make a decision evaluating the likelihood of an uncertain outcome, such as the likelihood a [*234] small business will capitulate after receiving a C&D letter, or the likelihood that the failure to police every third party use of one's trademark will result in abandonment of the mark.ⁿ¹³⁷ While Tversky and Kahneman acknowledge that heuristics can be useful, their work illustrates how various heuristics can lead to "severe and systematic errors."ⁿ¹³⁸

These empirical studies on cognitive bias appear to argue against the rational choice theory of behavior that has long been a dominant approach in legal theory. Rational choice theory "presumes that individuals always try to maximize their expected utility, primarily through acting rationally when making decisions involving risks and benefits."ⁿ¹³⁹ Contrary to this view, the empirical studies on cognitive bias suggest that people sometimes rely on quick heuristical judgments rather than weighing risks and benefits to reflect the probability of the various outcomes. This reliance on shortcuts is a byproduct of human cognitive limitations, including the inability to process large amounts of information at one time. Kahneman explains that "when faced with a difficult question, we often answer an easier one instead, usually without noticing the substitution."ⁿ¹⁴⁰ While analyses of law and legal disputes based on rational choice theory have made substantial contributions to legal scholarship,ⁿ¹⁴¹ numerous legal scholars are now questioning that approach and attempting to incorporate legal realism into the dialogue using the research on cognitive bias and the related insights from prospect theory.ⁿ¹⁴²

Since Kahneman and Tversky's original article, numerous cognitive biases, heuristics and related effects have been documented and applied.ⁿ¹⁴³ Kahneman and Tversky built upon their initial discoveries in this area to develop a theory of decision making under conditions of uncertainty, which they termed "prospect theory." As trademark bullying is based on evaluation of risk and uncertainty pertaining to trademarks, this article will apply prospect theory to the problem of trademark bullying, with particular emphasis on the impact of the certainty effect, endowment effect and sunk cost effect on this prospect theory analysis.

[*235]

B. Prospect Theory: Framing Risk Judgments as Gains Versus Losses

While rational choice theory states that people make rational decisions to maximize the value of their total wealth, prospect theory argues that attempts to maximize wealth are influenced by systematic biases in judgment, such as the framing effect.ⁿ¹⁴⁴ The framing effect refers to the observation that people treat logically equivalent judgments differently if they are framed as losses or as gains.ⁿ¹⁴⁵ As an example of the framing effect, imagine a cancer patient trying to decide whether to undergo an effective yet risky surgery. A surgery reported to have an 80% survival rate will be chosen more often than the same surgery reported to have a 20% mortality rate - even though these statements of risk are equivalent. Framed as a gain (survival), the surgical option is appealing; framed as a loss (mortality), the same option is aversive. This example demonstrates that logically equivalent judgments about risk are treated quite differently depending on the way they are framed; these framing effects on medical decision making have been observed in patients as well as medical professionals, such as radiologists.ⁿ¹⁴⁶

A principal feature of prospect theory, which is concerned with how people actually make decisions regarding uncertainty and risk, is its attention to the way decisions are framed as either gains or losses. In accordance with empirical studies, prospect theory predicts that "people generally make risk averse decisions when choosing between options that appear to be gains and risk seeking decisions when choosing between options that appear to be losses." ⁿ¹⁴⁷ This suggests that people will make riskier decisions in order to try to avoid loss, which has been described as "loss aversion." ⁿ¹⁴⁸

Kahneman and Tversky have argued that there are several psychological mechanisms that interact in order to produce the loss aversion shown in empirical studies. First, when making decisions, people judge their options relative to a frame or reference point. ⁿ¹⁴⁹ Generally, this reference point is the status quo or the person's current position or status. Professor Chris Guthrie, an expert on behavioral law and economics, offers a helpful example: "People will generally choose a definite \$ 1,000 prize over a 50% chance at receiving a \$ 2,000 prize but will opt to face a 50% chance at having to pay a \$ 2,000 fine over having to pay a [*236] definite \$ 1,000 fine." ⁿ¹⁵⁰ If the individual was acting rationally, as predicted by rational choice theory, people should be found to have no preference between the \$ 1,000 prize and the 50% chance at a \$ 2,000 prize (as the expected benefit is effectively the same). However, experiments in support of prospect theory show that an individual faced with such a decision frames the decision as a gain or a loss relative to the status quo. When compared to the status quo reference point, either prize is seen as a gain and either fine is a loss. Prospect theory argues, and studies demonstrate, that individuals faced with this problem tend to be risk averse regarding the gains and will select the guaranteed \$ 1000 prize. ⁿ¹⁵¹ However, they will be risk seeking when faced with a decision about accepting a loss and will typically opt for the 50% chance at avoiding the larger fine. ⁿ¹⁵² Scholars in a variety of fields have noted the important repercussions this rule has on decisions such as those regarding financial investments or even criminal plea bargaining. ⁿ¹⁵³

How can the theory account for this preference to be risk averse with potential gains and risk seeking when judging potential losses? A fundamental feature of prospect theory is the premise that losses are more cognitively salient than gains. According to Kahneman, "When directly compared or weighted against each other, losses loom larger than gains. This asymmetry between the power of positive and negative expectations or experiences has an evolutionary history. Organisms that treat threats as more urgent than opportunities have a better chance to survive and reproduce." ⁿ¹⁵⁴ Empirical studies have suggested that people are so much more sensitive to losses than they are to gains that they perceive a loss to be nearly two times more emotionally charged than a numerically equivalent gain. ⁿ¹⁵⁵

Before applying the lessons of prospect theory to trademark bullying, it is useful to see how prospect theory has already been applied to the logic of litigation. Professor Jeffrey Rachlinski has examined how prospect theory's loss aversion may impact whether litigants decide to pursue a trial rather than seek a settlement of their dispute. According to Rachlinski, plaintiffs in a dispute are effectively faced with two potential "gains": a settlement agreement that would improve upon the status quo, which would be seen as the current situation where the defendant is [*237] allegedly causing injury to the plaintiff, or a trial whereby the plaintiff has the chance to seek an even more favorable judgment against the defendant. ⁿ¹⁵⁶ In contrast, the defendant can be viewed as facing two possible losses: a definite loss under the plaintiff's proposed settlement agreement terms or an uncertain risk at trial that the damages awarded would be less than those under the settlement agreement. ⁿ¹⁵⁷ When faced with two gains, prospect theory posits that the plaintiff will prefer the settlement agreement - the risk averse option. ⁿ¹⁵⁸ The defendant, on the other hand, will be averse to any loss and will thus prefer the risk seeking option of going to trial. ⁿ¹⁵⁹ These predictions also hold true in settlement negotiations depending on whether each party characterizes the settlement as a gain or as a loss. ⁿ¹⁶⁰ Rachlinski conducted two empirical studies involving subjects asked to respond to litigation scenarios and also studied the settlements obtained in actual disputes. ⁿ¹⁶¹ In all, he found the framing predictions of prospect theory to hold true based on whether the suit or settlement was viewed as a loss or gain. ⁿ¹⁶²

In another study concerned with framing in the litigation context, C. Russell Korobkin and Chris Guthrie had undergraduate students respond to proposed settlement amounts for hypothetical litigation scenarios from the perspective of the plaintiff. ⁿ¹⁶³ Two versions of the settlement offer were crafted, one framing the settlement as a gain to the plaintiff and the other framing the settlement as a loss to the plaintiff. Students found settlement offers framed as

gains as attractive, while offers framed as a loss were less attractive, meaning that the decision to accept the risk of going to trial was influenced by the framing effect.ⁿ¹⁶⁴ This conclusion was also confirmed by Babcock et al. in an empirical study asking undergraduates and trial attorneys to take the perspective of either plaintiff or defendant in a [*238] hypothetical products liability suit.ⁿ¹⁶⁵ Subjects were told that the defendant had been found liable and the upcoming litigation was only to determine the amount of damages. Subjects were then asked to set a "reservation price" they would accept to avoid the upcoming trial. For plaintiffs, the reservation price was the minimum amount they would accept to not continue litigation; for the defendants, the reservation price represented the maximum price they were willing to offer for settlement.ⁿ¹⁶⁶ Because the subjects were given information on the average of awards handed down in cases similar to theirs, the authors were able to categorize the reservation prices as risk averse or risk seeking. For plaintiffs, setting a reservation price below the average was characterized as risk averse, while a price above the average (and thus less likely to succeed) was characterized as risk seeking. Conversely, for defendants, setting a reservation price below the average was risk seeking, while a reservation price above the average was risk averse.ⁿ¹⁶⁷ Conforming to the predictions of the framing hypothesis, the authors found that plaintiffs accepted lower than average, i.e. risk averse, reservation prices, whereas defendants trended toward risk seeking offers (although this trend did not reach statistical significance).ⁿ¹⁶⁸

Parties in a trademark bullying scenario are less easily characterized than the traditional litigants that inspired the empirical studies discussed above. A trademark bullying dispute is most consistent with the results from Korobkin and Guthrie in framing changes affected the attractiveness of settlement offers. To illustrate this, consider the positions of the litigants in the Charbucks dispute: First, consistent with Rachlinski's analysis, Jim Clark likely viewed his options as a decision between two losses. Any settlement agreement with Starbucks would likely involve limits on the manner in which he could use his mark and, based on the initial negotiations, might require the destruction of his inventory and the loss of the goodwill he had established in that mark among consumers. Furthermore, at trial Clark faced direct losses related to the investment of time and resources in defending the suit, but he has the potential to emerge with a judgment in his favor and the ability to continue using the mark unencumbered. Prospect theory suggests that Jim Clark would choose the risk seeking path and elect to go to trial on the chance, however small, that his losses could be largely avoided. In fact, this is precisely what he did. Clark abandoned negotiation talks when Starbucks refused to pay all of his costs he had incurred.ⁿ¹⁶⁹

Applying prospect theory to the motivations of the plaintiff trademark bully is a more complex calculation. Where the bullied party gives into the trademark bully's demands, prospect theory suggests that, in agreement with the findings of Korobkin, Guthrie and Babcock, bullies will be risk averse by pushing for the [*239] definite gain afforded by a settlement. To some extent, bullies do choose this option, which explains the prevalence of C&D letters. However, trademark law imposes limitations on what bullies feel are acceptable settlement terms, as they must also protect against genericide and abandonment. As a result, bullies will appear more aggressive in settlement negotiations by offering paltry concessions to the bullied party, which in turn makes settlement less likely to occur, particularly in the case of a risk seeking defendant. Indeed, in the "Charbucks" dispute Starbucks made strong demands, including the destruction of inventory and cessation of use of the "Charbucks" mark, while refusing to pay all of Clark's related costs in exchange.

Furthermore, although litigation is certainly a riskier option, it has the added benefit to the bully of making a public display of an active attempt to police a mark, even if the bully ultimately loses in court. In this sense, litigation can be seen as a gain. A trademark bully essentially faces three choices: (1) a gain through a favorable settlement agreement; (2) a gain (protection against genericide and abandonment) through litigation, successful or not; or (3) a chance of loss of trademark rights if settlement or litigation is not pursued and a court later deems policing efforts to be insufficient as a result. Given prospect theory's principal finding that decision makers are subject to strong loss aversion effects, it is unsurprising that the first and second options are preferred over the third. To avoid loss, the bully will accept either a settlement or protection gain. Thus, Starbucks continues to appeal the adverse decisions in the "Charbucks" litigation despite the spiraling costs of attorneys' fees and related expenses like consumer surveys. The aggressive tactics of trademark bullies - one-sided settlement agreements, threats of litigation and considerable investment in litigation - can

be seen as a byproduct of decision making from a gain versus loss frame. Trademark law establishes the frame; bullies simply play by the rules.

Loss aversion in the context of a loss-versus-gain frame is the principal feature prospect theory that explains trademark bullying behavior. However, the problem is exacerbated by three related biases also described by prospect theory: the certainty effect, the endowment effect and the sunk cost effect.

1. The Certainty Effect

The certainty effect was interpreted in light of cognitive biases by Kahneman and Tversky in their seminal paper on prospect theory in 1979.ⁿ¹⁷⁰ They defined this phenomenon as the tendency of people to overvalue "outcomes that are considered certain, relative to outcomes which are merely probable."ⁿ¹⁷¹ To illustrate the certainty effect, Kahneman, in his book *Thinking, Fast and Slow*, uses the following example:ⁿ¹⁷² You are given a \$ 1 million inheritance, but the inheritance is challenged in court. On the day that the court is to render its verdict, your attorney explains that you have a 95% chance of winning the case and keeping [*240] the entire \$ 1 million sum. If approached by a risk adjustment company with an offer for a certain sum of \$ 910,000, however, you are likely to consider this a viable option. Even though the offer from the risk adjustment company is \$ 40,000 less than the expected value of waiting for a verdict in the case, you are likely to place a high value the certainty of knowing your fate now. This overvaluation of certainty is actually the basis for the risk adjustment and structured settlement industry. That industry profits from the certainty effect - the fact that people will forgo even a relatively high probability of a larger sum of money for a definite, or certain, payment of smaller sum. In short, people overvalue certainty.

This concept was also demonstrated in the study by Babcock et al. discussed above, where subjects representing plaintiffs accepted risk averse settlement amounts less than the average award value of similar cases.ⁿ¹⁷³ Subjects who were induced to see the litigation as more risky (by seeing a wider variation in the award values for individual cases) were willing to accept even lower settlement amounts, demonstrating that as perceived risk increases, people are willing to pay more for a certain gain.ⁿ¹⁷⁴

The certainty effect also applies to losses. If faced with a small risk of loss, people have been shown to be "willing to pay far more than the expected value to eliminate them altogether."ⁿ¹⁷⁵ They are willing to pay to remove the uncertainty, or, phrased another way, they overvalue certainty and are willing to pay for it. This principle is especially relevant to the discussion of trademark bullying. Even if an attorney tells her client that failure to stop all remotely infringing or diluting trademark use rarely results in the abandonment of a trademark, that attorney is unlikely to offer a promise of certainty that the trademark is safe. Thus, the client is faced with a low probability of risk that a third party somewhere in the marketplace, selling a potentially unrelated product with a remotely similar trademark, could harm the client's own trademark rights. A completely rational client would determine that such a risk minimal, and only invest a small sum of money into monitoring the third party usage or countering any concerning usage with increased advertising presence. But the certainty effect may cause the client to overvalue certainty, and push for reducing risk of harm to the trademark to zero.ⁿ¹⁷⁶ Such a client would be willing to aggressively pursue all potential third party infringers in pursuit of that illusive certainty. The certainty effect may be one of the motivating factors behind some of the "aggressive clients" mentioned by the trademark attorneys interviewed for Professor Gallagher's study of informal trademark and copyright enforcement efforts.ⁿ¹⁷⁷

[*241]

2. The Endowment Effect

The biased judgments stemming from the certainty bias discussed above are compounded when they interact with another cognitive bias called the endowment effect. The endowment effect provides that an individual will value an item in his or her possession more than an equivalent item in the marketplace. If the items in question are identical, and there are no transaction costs involved, then a rational decision maker should see no distinction between the two items.

However, studies of the endowment effect have shown that once a person claims ownership over an item, that person increases the item's value in that person's mind. ⁿ¹⁷⁸

For example, in the classic study conducted by Daniel Kahneman, Jack Knetsch, and Richard Thaler, half of the study participants were given coffee mugs and told they would have the opportunity to sell them. ⁿ¹⁷⁹ The other half of the participants were told they would have the opportunity to buy the mugs. ⁿ¹⁸⁰ Then, each current "mug owner" and each "buyer" was asked to fill out a questionnaire indicating the prices at which that individual would be willing to buy or sell a mug. ⁿ¹⁸¹ The mug owners consistently valued the mugs at a significantly higher price than the buyers. ⁿ¹⁸² This suggests that despite not actually purchasing the mugs themselves, and having no direct personal connection to the mugs, the fact that the mug owners had been randomly assigned possession of the mugs increased the assessed value of the mugs to those individuals.

The endowment effect can be seen as an expected consequence of prospect theory's loss aversion. From the perspective of prospect theory, the individuals buying and selling mugs are likely to base their decisions on a reference point that is the status quo. For the study participants who were given a mug, their status quo includes possession of a mug. Therefore, selling that mug can be seen as a loss since they are giving up the item in their possession now. In terms of underlying psychology, such an individual may consider the pain of giving up the mug when mentally assessing the mug's value. That pain can consciously or unconsciously contribute to the increase in value ascribed to the mugs in this instance. On the other hand, a buyer's status quo is more neutral: he or she does not currently have a mug. Therefore, buying a mug can be seen as a gain, and the pleasure of that gain could be taken into account when setting the price for the mug. According to Kahneman, "The values were unequal because of loss aversion: giving up a [possession] is more painful than getting an equally good [item]." ⁿ¹⁸³ While not explicitly discussing prospect theory, Supreme Court Justice Oliver Wendell Holmes has captured this same sentiment:

[*242]

It is in the nature of man's mind. A thing which you have enjoyed and used as your own for a long time, whether property or an opinion, takes root in your being and cannot be torn away without your resenting the act and trying to defend yourself, however you came by it. The law can ask no better justification than the deepest instincts of man. ⁿ¹⁸⁴

Additional studies have indicated that "endowment effects will almost certainly occur when owners are faced with the opportunity to sell an item purchased for use that is not easily replaceable." ⁿ¹⁸⁵ Given the unique nature of trademarks and the fact that they cannot easily be bought or sold on an open market, ⁿ¹⁸⁶ they are in a sense irreplaceable; consequently, a strong endowment effect should be expected to impact decisions of trademark owners. Trademark owners will have a strong incentive to avoid losing what they have - their current trademark and the goodwill associated with it. This suggests that trademark owners may overvalue their trademark assets and then invest irrationally large amounts of time and money into preventing a loss of those trademarks, even if such a loss is incredibly unlikely. Professor Gallagher's interviews with trademark attorneys show hints of the endowment effect at play in decision making regarding trademarks and the duty to police: "As these lawyers explained, enforcement efforts were much more likely to be undertaken against potential targets when the alleged infringement involved the client's 'core' IP, or 'crown jewels,' as several lawyers put it." ⁿ¹⁸⁷ Calling the trademarks "crown jewels," or viewing them as on par with tangible property, ⁿ¹⁸⁸ illustrates the tendency of trademark owners to elevate the status of trademarks to something more significant than mere business assets. The inherent nature of trademarks lends itself easily to the errors associated with the endowment effect. Since this psychological effect can impact rational decision making, it should be taken into consideration by anyone seeking to deter trademark bullying. Trademark bullying behavior should be expected in light of the endowment effect's interaction with the uncertain requirements of trademark law's duty to police.

3. The Sunk Cost Effect

The sunk cost effect - the observed greater tendency of an individual to "continue an endeavor once an investment of money, effort or time has been [*243] made" ⁿ¹⁸⁹ - is another factor that may exacerbate the problem of trademark

bullying. This behavior is motivated by the prior investment, known as the sunk cost, despite the fact that such investment objectively should be irrelevant to decisions about future behavior if the decision were based on rational choice theory. The sunk cost effect has been used to explain numerous examples of horrible financial decisions made by government agencies or even private corporations where additional funds continue to be contributed to a project or research program that has proven to be a failure. ⁿ¹⁹⁰

One study exploring behavioral ramifications of the sunk cost effect used full price and discounted theater ticket packages to evaluate the effect under real world conditions. In that study, individuals seeking to buy season ticket packages to a specific theater were randomly assigned to groups and either offered the option of purchasing the tickets at full price or at one of several discounted prices (allegedly offered as part of various promotions). ⁿ¹⁹¹ By tracking attendance of these individuals over the course of the season, the researchers were able to show that those individuals that purchased the full price tickets, and thus had higher sunk costs, were more likely to use their tickets in the six months following the ticket sales. ⁿ¹⁹² If the sunk cost effect was not at work, the researchers predicted that the individuals in the various test groups should have been equally likely to attend a performance. ⁿ¹⁹³ This is what rational choice theory would have anticipated. Also noteworthy was the fact that the sunk cost effect seemed to last only six months, ⁿ¹⁹⁴ which could be the period in which the purchase price of the tickets was most salient to the buyer. After six months, there was no difference in attendance rates between the theatergoers who purchased at full price and those who purchased with a discount. ⁿ¹⁹⁵

Now imagine that one of the study's theatergoers went to his first show of the season and hated the performance. He felt the cast and crew were untalented and that the show was a waste of his time. If that individual is persuaded to continue attending shows due to the sunk cost of the tickets already purchased, he would not be maximizing his happiness (as he dislikes the performances) or his productivity (since he could choose an alternate activity). To a rational choice theorist, he is "throwing good money after bad." Yet, examples of this sort of irrational behavior abound: the most famous perhaps is the supersonic Concorde airplane, where two governments developing the plane decided to continue development even when there was little chance of recouping costs. Their rationale was that they had "too much invested to quit." ⁿ¹⁹⁶ This "Concorde fallacy" - refusing to cut one's losses - [*244] appears to be unique to adult humans (not children or lower animals). ⁿ¹⁹⁷

While the sunk cost effect may not explain why trademark bullies take their initial aggressive actions against third parties, it might account for why these disputes can rapidly escalate into costly litigation. In the case of the "Charbucks" dispute, the endowment effect may have contributed to Jim Clark's decision not to capitulate immediately to the demands from Starbucks. However, that effect alone fails to explain why Clark continued to pay attorney's fees and dedicate time and effort to this dispute in the years leading up to the filing of the suit by Starbucks. Clark has indicated that his costs quickly approached \$ 20,000, a large sum for such a small business. While Clark had hoped Starbucks would pay his legal fees as part of the proposed settlement agreement, he had no guarantee of this from Starbucks. The only guaranteed way to stop incurring costs would have been to cease use of the "Charbucks" trademark. But the \$ 20,000 in fees did not occur all at once. Instead, it built up in small increments; each increment adding more to Clark's sunk costs and further encouraging to insist that Starbucks agree to his settlement terms.

At the same time, Starbucks experienced its own escalation of sunk costs. At the time of final negotiation between the parties, after which Clark refused to continue negotiating and Starbucks filed suit, Starbucks refused to pay more than \$ 20,000 to Clark to cover his expenses related to their settlement discussions. Both parties had invested so much in sunk costs that \$ 20,000 no longer seemed like a rational offer to Clark. At trial, however, Starbucks presented a \$ 30,000 consumer opinion survey as evidence. The company was now willing to invest \$ 30,000 on top of the sunk costs invested in the negotiation discussions and projected costs of ongoing litigation, when that same \$ 30,000 might have allowed them to reach settlement only a short while before. This escalation of the dispute may be attributable to the sunk costs effect. In order to deter such expensive and inefficient methods of dispute resolution, those crafting solutions must recognize that psychological mechanisms may motivate the parties involved and affect their decisions.

CONCLUSION

In light of loss aversion and the related cognitive biases discussed in this Article, it may be necessary to rethink how we best respond to trademark bullying and its negative consequences. While some attorneys and scholars have proposed that this problem could be addressed with existing ethics laws or the expansion of antiSLAPP measures allowing defendants to seek damages for meritless suits, these solutions are premised on an understanding of a trademark bully as a rational decision maker. The lack of clarity in the law regarding the duty to police third party trademark usage encourages trademark owners to be risk seeking and aggressive in order to avoid the small possibility of a finding of trademark [*245] abandonment. An attorney counseling such clients cannot say with certainty that there is no risk. Thus, he or she will be less likely to worry about violating ethical rules by pushing aggressively on a client's behalf to stop third party trademark usage. Any remedial measures designed to punish an overly aggressive trademark bully would occur after the impulse to avoid loss has already induced bully-like behavior. Such measures may be able to encourage that specific trademark owner to respond less aggressively in the future, but are unlikely to deter other potential trademark bullies. Bullies' initial motivations are not based solely on a rational cost-benefit analysis, and effective deterrents cannot assume that they are. The same problem exists with the proposal to deter trademark bullying through the use of extralegal "shaming" measures. Given mark owners' high degree of loss aversion, in the context of a overvalued trademark (due to the endowment effect) the negative consequences of shaming would likely need to be substantial and direct in order to affect the incentives to bully in the first place. Such a deterrent would add more "costs" to a cost-benefit analysis but would not go to the heart of the potential cognitive motivations of a trademark bully.

A more direct approach is needed, focusing on increasing clarity with regard to the risk of trademark abandonment. As this risk appears to be relatively slight, the USPTO may be able to counter the overestimation of risk through better guidance and outreach to trademark owners. In advising clients, attorneys have traditionally framed the issue of the duty to police as one of loss: if you fail to stop potential third party infringement, your trademark can be lost forever. The issue could be reframed, to better reflect the actual risk involved, as an issue of investment in one's brand. Attorneys could present it to clients as the duty of the trademark owner to ensure that the mark continues to serve as a source identifier. Part of this duty is to invest in quality control and advertising. Part of it is to monitor consumer usage to ensure that the mark is not falling into generic usage. Finally, the duty entails monitoring competitors to make sure the lines between the client's trademark and the competitor's remain distinct. Such a conception gives the power back to the trademark owner to view the duty as a way to invest in the trademark rather than a loss-oriented position where the only goal is to avoid having a mark taken away. Professor Irina Manta has proposed a USPTO-based registry of C&D letters, through which the merits of claims can be given a brief but official analysis, as a means of increasing clarity in this uncertain area of the law.ⁿ¹⁹⁸ While this also hints at the idea of "shaming," or deterrence through disclosure, it addresses the core issue of risk assessment by making more data available to trademark owners. Increases in clarity that come about through changes to the Lanham Act, agency guidance from the USPTO or C&D letter evaluations could all help to bring more rationality to decisions about enforcing and protecting a trademark. Any solution that fails to consider the potentially irrational cognitive mechanisms encouraging aggressive actions by trademark bullies is doomed to be ineffective. Providing clarity about the true risk of loss due to abandonment is essential to addressing the trademark bullying problem.

n29. See, e.g., Grinvald, *supra* note 29; Manta, *supra* note 29 (discussing judicial sanctions that might be used to punish trademark bullies whose tactics "rise to the level of intimidation or harassment"); Andrzejewski, *supra* note 29 (arguing that publicity of cease and desist letters or the use of antiSLAPP legislation or "threat actions" could punish trademark bullies and reduce the incidence of bullying); see also Frequently Asked Questions (and Answers) About Chilling Effects, Chilling Effects, <http://www.chillingeffects.org/faq.cgi> (last visited July 18, 2013) (This "project invites recipients and senders of cease and desist notices to send them to a central point (here, at chillingeffects.org) for analysis, and to browse the website for background information and explanation of the laws they are charged with violating or enforcing.").

n30. See, e.g., Grinvald, *supra* note 29, at 642 ("There are four elements in this Article's bullying definition, which are discussed in turn below: (1) unreasonable interpretation of rights, (2) intimidation tactics, (3) the trademark holder is a large corporation, and (4) the accused infringer is a small business or individual."); Manta, *supra* note 29, at 854 ("Simply stated, a trademark bully is usually a large company that seeks to put an end to behavior by individuals and small businesses that it perceives as a danger to its own intellectual property even though its legal claims against these other parties are spurious or non-existent.").

n31. Additionally, the term "bully" is clearly pejorative and, when used against the backdrop of the current media discussion of the bullying of children and adolescents online and in schools, directs potentially unearned ire at the alleged trademark bully. In this Article, I will use the terms "trademark bully" and "bullying victim" or "bullying target" for both ease of reference and to connect such discussions to earlier scholarship on trademark bullying in general; however, as is discussed below, trademark bullying may result more from our uncertain trademark laws and unconscious psychological biases than from aggressive intent on the part of the bully. While the negative repercussions of trademark bullying are to be disparaged, the bully itself may not have earned the shame directed at it.

n32. The USPTO makes all trademark applications publically available on its website and distributes printed publications containing trademarks at various stages of the application process. See Jessica M. Kiser, *How Dykes on Bikes Got It Right: Procedural Inequities Inherent in the Trademark Office's Review of Disparaging Trademarks*, 46 U.S.F. L. Rev. 1, 5-6 (Summer 2011) ("If accepted by the examiner, the trademark application will be published in the Official Gazette. This publication provides notice to third parties of the USPTO's intent to allow federal registration for such trademark and allows such third parties an opportunity to formally oppose the registration. An unopposed trademark will then receive its federal registration and will appear on the Principal Register thirty days after its publication date.").

n33. William T. Gallagher, *Trademark and Copyright Enforcement in the Shadow of IP Law*, 28 Santa Clara Computer & High Tech. L.J. 453, 470 (2012) (discussing interviews with attorneys about how they became aware of potential trademark infringement: "Some of the study lawyers stated they had paralegals monitor the Internet or use commercial trademark 'watch' services to discover potential infringers for clients with large trademark portfolios. More frequently, the clients themselves identified potential claims. These clients learned of potential claims in various ways. Clients with large trademark portfolios often have in-house staff monitor for infringement online. One example cited by a study attorney was a large client who dedicated several staff members to search the Internet for alleged trademark and copyright infringement. Several attorneys also gave as example situations wherein clients' sales staff became aware of potential infringements while attending industry trade shows or conferences, or from learning of instances of actual consumer confusion between their employer's and a competitor's products or services when dealing with customers").

n34. Grinvald, *supra* note 29, at 658.

n35. See Gallagher, *supra* note 34, at 485 ("Revealingly, the lawyers were loath to self-identify as bullies but did admit that they sometimes engaged in aggressive enforcement tactics, most often identified as sending demand letters that over-stated their client's rights or potential remedies, sending a complaint, and taking very aggressive and unyielding positions in negotiations. When asked whether they had ever enforced trademark or copyright claims the lawyers believed were weak, many of the interviewed lawyers responded that they had.").

n36. Of course, sometimes lawyers might not even care about the merits of a case. See *id.* at 486 ("The lawyer on the other side was yelling at me about how we didn't have a case, and I said you must be confusing me with somebody who cares about the merits. We are the giants in this case and we've decided we're not going to tolerate this, we're not going to give up.").

n37. Trademark Technical and Conforming Amendment Act of 2010, Pub. L. No. 111-146, 124 Stat. 66 (2010).

n38. See "Little Guy' Wins Goliath Vermonster Battle, ABC13 News (Oct. 22, 2009), <http://abclocal.go.com/ktrk/story?section=news/bizarre&id=7078063>.

In publication since 1991, *InsideCounsel* monthly magazine provides advice and insight to general counsel and other in-house legal professionals.

n63. *Id.*

n64. B. Brett Heavner & Marcus H.H. Luepke, Avoiding Trademark Pitfalls in the "Land of the Unlimited Possibilities": The Top 15 Mistakes of Foreign Applicants in the U.S. Trademark Office, 98 *Trademark Rep.* 974, 990 (2008). But see *Law Practice Mgmt. Comm.*, *supra* note 61, at 35 (determining the average cost of such actions in 2011 to be closer to \$ 90,000).

n65. *Law Practice Mgmt. Comm.*, *supra* note 61, at 35.

n66. Manta, *supra* note 28, at 854-55 ("Trademark bullying engenders a number of costs for society. First, the market suffers a reduction of legitimate competition. The potential downsides of this effect are well known and include consequences such as higher prices for products and a reduced panoply of choices in the marketplace. Relatedly, bullies create obstacles for consumers' ability to make source-identification connections with products that said consumers may wish to purchase or that could benefit them.").

n67. Gallagher, *supra* note 34, at 477.

n68. Grinvald, *supra* note 29, at 650-51 ("Free competition among businesses is the bedrock upon which American capitalism has been thought to rest, and the government has been devoted to regulating anti-competitive behavior since 1890. However, the majority of trademark bullying will not fall within the purview of antitrust law, as a trademark is unlikely to generate market power, which is the main requirement for an antitrust cause of action. Perhaps due to this, there have been only rare instances where antitrust claims are brought for trademark misuse." (footnotes omitted)).

n69. See, e.g., Manta, *supra* note 29, at 854-55 ("While individuals are supposed to be able to make fair use of trademarks, even fair use can at times encounter enforcement efforts by way of C&D letters. One such case was when the Lego Group sought to block use of the websites 'www.ratemylego.com' and 'www.ratemylegos.com.' Some have concluded that 'trademark law ... often serves as a blunt instrument of

cultural intimidation and censorship."").

n70. Gallagher, *supra* note 34, at 486.

n71. 15 U.S.C. § 1115(b)(4) (2006).

n72. Grinvald, *supra* note 29, at 652 ("In addition, some trademarks transcend their source-identifying functions and become cultural property in their own right, even entering our language. As Judge Kozinski has asked, 'How else do you say that something's 'the Rolls Royce of its class'? What else is a quick fix, but a Band-Aid?' Actions taken by large corporations against individuals utilizing trademarks in this manner harms this mode of cultural expression because threats of litigation through cease-and-desist letters are often enough to eradicate the commentary." (internal citations omitted)).

n73. See *Mattel, Inc. v. MCA Records, Inc.*, 28 F. Supp. 2d 1120 (C.D. Cal. 1998) *aff'd*, 296 F.3d 894 (9th Cir. 2002); see also *Bally Total Fitness Holding Corp. v. Faber*, 29 F. Supp. 2d 1161 (C.D. Cal. 1998).

n74. Third parties can harm a trademark owner's rights in other ways as well. Trademark owners must monitor the use of their marks by licensees and the quality of the products sold by licensees under the mark. Failing to do so is considered "naked licensing," which can be grounds for the USPTO or a court to declare the mark abandoned. J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* § 18:48 (4th ed. 1996).

n75. Gallagher, *supra* note 34, at 490 ("The interviewed lawyers often cited a need to 'police' their clients' trademarks and copyrights. They explained that the failure to do so on any particular occasion could lead to difficulties in enforcing rights against other targets in the future.").

n76. 15 U.S.C. § 1127 (2006).

n77. McCarthy, *supra* note 75, § 31:38.

n78. Manta, *supra* note 29, at 866-71 (proposing a system under which trademark owners (potential bullies) could submit their cease and desist letters to the U.S. Patent and Trademark Office for review of the merits of the underlying legal claims. This system could reduce the uncertainty felt by trademark owners seeking to protect their marks, and reduce frivolous harassment currently felt by the victims of trademark bullying); see also Grinvald, *supra* note 29, at 630 ("Trademark law and the legal system, as both currently operate, work to assist, and perhaps even encourage, the bully's efforts.").

n79. See, e.g., *Visa Int'l Serv. Ass'n v. Bankcard Holders of America*, 211 U.S.P.Q. 28, 41 (N.D. Cal. 1981) ("Member banks may properly use the marks in an authorized manner. Plaintiff is not aware of any 'syndicators' or others who use the logo in an unauthorized manner. Defendants have not demonstrated that plaintiff has abandoned its mark even if there were other infringers; there has been no proof of an intent to abandon.").

n128. For a discussion of this issue of whether lawyers exacerbate the problem of trademark bullying, or if they are required by ethical duties to stop bullying regarding meritless claims, see Jason Vogel and Jeremy A. Schachter, *supra* note 46, at 503 and Gallagher, *supra* note 33, at 490 ("In these four interviews, the lawyers each made some statement about how they would 'fire' a client who asked them to enforce an IP claim where the lawyer believed the claim was without merit. When probed as to whether they had ever had a client who asked them to enforce a claim the lawyer had explained was weak or non-meritorious, these lawyers stated that they had. When asked about the specific instances, all four lawyers indicated that they followed the clients' instructions to enforce the claims. None of these lawyers could identify an instance where they had actually 'fired' a client under such circumstances.").

n129. This assessment was also made by William T. Gallagher based on his empirical interviews with trademark and copyright attorneys. Gallagher, *supra* note 34, at 479-80 ("The research interviews revealed, in a number of ways, that the decision to assert IP claims is not entirely a rational decision.").

n157. See *id.*

n158. See *id.*

n159. *Id.* at 118-19. Framing theory does not, however, accurately predict the outcomes of frivolous disputes:

Although the framing theory holds true in most cases, it appears not to hold true in situations involving frivolous litigation. In frivolous or low-probability litigation, the plaintiff typically chooses between a relatively small settlement amount and a low likelihood of obtaining a much larger amount at trial. Defendants, by contrast, typically must choose either to pay some small settlement or face a low likelihood of having to pay a much larger amount at trial. In short, plaintiffs in frivolous suits typically confront decision options that appear to be low-probability gains, while defendants choose between options that appear to be low-probability losses. Decision makers confronted with low-probability gains, like plaintiffs in frivolous suits, tend to make risk-seeking decisions, while those confronted with low-probability losses, like defendants in frivolous suits, tend to make risk averse decisions. In short, litigant risk preferences are likely to be reversed in frivolous suits, with plaintiffs relatively more attracted to trial than are defendants.

SYMPOSIUM ARTICLE: Fear and Loathing in Trademark Enforcement

NAME: Jeremy N. Sheff*

BIO: * Associate Professor of Law, St. John's University School of Law. This Essay developed from a talk given in the "Trademark Enforcement Considerations" panel of the Fordham Intellectual Property, Media & Entertainment Law Journal's 2011 Symposium entitled "IP Bullying or Proactive Enforcement?" Thanks to the organizers of the symposium, the panel moderator Hugh Hansen, and my fellow panelists Irina Manta and James Barabas.

LEXISNEXIS SUMMARY:

... But I think many, if not most, trademark practitioners would take the contrary view that enforcement can only barely keep up with the constantly evolving and worsening threats to their clients' brands, particularly internationally and online. ... The third stage of the inquiry looks to the profession as the nexus of doctrine and action and questions the role of trademark attorneys in mediating these dynamics and advising their clients. ... Is it creating mark owners' enforcement motivations or is it providing those motivations an outlet they would not otherwise have? ... In his telling, incrementally more aggressive enforcement actions by trademark owners produce a marketplace in which consumers develop increasingly credulous views of what might be a sponsorship or affiliation relationship, and those increasingly credulous views feed back into the likelihood-of-confusion standard, to make ever-more aggressive assertions of trademark rights at least plausible. ... Congress eventually acquiesced, not only by passing a federal trademark dilution statute, but also by amending it to roll back a challenge to that statute from the Supreme Court in *Moseley v. ...* A trademark plaintiff's counsel might object that what I am categorizing as loathing really is fear: fear of losing the value of sunk investments in a marketing strategy; fear of losing prospective opportunities and potential areas of future expansion; fear of a slippery slope, of a death by a thousand cuts, of letting whatever strength a mark currently has be whittled away, a process that begins with a single unanswered stroke by a potential enforcement target. ... This second argument raised by academics highlights the central role played by the trademark lawyer in the dynamics of enforcement - not only as advocate, but also as counselor. ... For over a century, Courvoisier was known as the brandy of Napoleon, but today it is the brandy of Busta Rhymes. ... Consider Jay-Z's reaction to Cristal when an executive in the company that makes Cristal suggested - just suggested in an interview - that maybe he was not crazy about the association of Cristal with hip-hop nightlife.

TEXT:

[*873]

Introduction

Much academic commentary these days concludes that trademark enforcement has become overly aggressive.

Commentators argue that the increasingly expansive claims of rights by well-funded trademark owners are unreasonable, and thus that lawsuits asserting those rights amount to trademark bullying.ⁿ¹ But I think many, if not most, trademark practitioners would take the contrary view that enforcement can only barely keep up with the constantly evolving and worsening threats to their clients' [*874] brands, particularly internationally and online.ⁿ² The purpose of this Essay is to try and bridge these two positions by critiquing each one from the perspective of the other.

The first step in this exercise is to challenge my own camp, the academic camp, in this debate over the appropriate scope of enforcement. If we academics think that trademark owners are over-enforcing their marks, we should ask ourselves: why would they do that? Why would any trademark owner seek to enforce its marks unreasonably? Why would its trademark attorneys advise it to do so? I will examine these questions in three stages. The first stage is a bare psychological inquiry: what might motivate somebody to do something unreasonable? This is where I will introduce the dichotomy suggested by the title of this Essay (with apologies to the late Hunter S. Thompson).ⁿ³ The second stage is a doctrinal inquiry: once we think we understand trademark owners' psychological motivations, we can look at the law's role in mediating them. In particular, we ought to ask whether trademark doctrine is generating these motivations or responding to them in some way. The third stage of the inquiry looks to the profession as the nexus of doctrine and action and questions the role of trademark attorneys in mediating these dynamics and advising their clients.

I. The Psychology of Enforcement

To begin with psychology, let me explain what I mean by fear and loathing. By "fear," I mean that a trademark owner might take some enforcement action out of some concern that if they do not, [*875] they will lose something of value that they currently enjoy. By "fear," then, I refer generally to fear of loss. For example, the mark owner may be concerned that the conduct of a target of potential enforcement, if left unchecked, will result in a loss of business for the trademark owner. The classic example and the easiest case is the passing off of an inferior product, which threatens not only to divert customers from the mark owner to the target of enforcementⁿ⁴ but also, over time, to deplete the mark owner's goodwill.ⁿ⁵ We can understand enforcement actions against a defendant engaged in passing off shoddy goods as being motivated by this entirely justifiable fear.

Alternatively, mark owners might be concerned about losing some legal interest or right that they currently enjoy if they fail to take enforcement action. The classic example here is abandonment through acts of omission.ⁿ⁶ Failing to enforce a mark over an extended period of time can ultimately, in an extreme case, lead to a complete loss of trademark rights.ⁿ⁷ Again, enforcement actions taken to stave off the loss of one's trademark rights would seem to be entirely justifiable.

If these examples suffice to illustrate "fear," the question remains what I mean when I refer to "loathing." By "loathing," I simply mean that a trademark owner might take some enforcement action, not because it is worried that in failing to do so it will lose something of value that it currently enjoys, but rather because it simply does not like or approve of the conduct against which it is pursuing enforcement. One could imagine innumerable reasons for such disapproval. One highly controversial reason might be [*876] that the enforcement target is expressing a viewpoint about, or creating some sort of connotation around, the mark owner's brand that paints the mark owner in an unflattering light in the eyes of the public,ⁿ⁸ or is otherwise inconsistent with the mark owner's marketing or branding strategy.ⁿ⁹

We can see dilution by tarnishment as an example of this. Pillsbury may not want its family-friendly Doughboy character going into pornography, for obvious reasons.ⁿ¹⁰ But we can also look at mark owners' efforts to discourage the use of their products by persons or in expressive works that are somehow inconsistent with the mark owners' brand strategies. Such efforts do not always take the form of legal proceedings, or even saber rattling, but can rather take the form of persuasion, suggestion or even pleading with potential enforcement targets. Consider the recent spat between Abercrombie & Fitch and the cast of *The Jersey Shore*, in which the clothing retailer publicly offered to pay the boorish cast members of the hit reality program not to wear its products.ⁿ¹¹ There was no legal action taken, but there was, if not a threat, at least an attempt to persuade the target not to engage in certain conduct regarding the brand.ⁿ¹²

Another form of loathing might arise where the enforcement target is using the mark in a way that does not inflict any business losses on the mark owner (as, for example, passing-off would), but provides the potential target of enforcement with some benefit that the mark owner thinks is undeserved or is perhaps better deserved by the mark owner itself, even though the mark owner is not currently enjoying that benefit. Here we can look to the emergence [*877] of a merchandising right,ⁿ¹³ the expansion of infringement liability to non-competing goods,ⁿ¹⁴ and, of course, dilution by blurring.ⁿ¹⁵

It has to be admitted that the dichotomy that I have set up in this Part, between fear and loathing, is not a perfect one. There is obviously going to be a mixture of motivations behind any particular enforcement effort, and they might mix to greater or lesser degrees. But for reasons I will explore below, these appear to be the rhetorical poles that drive the debate over the proper scope of enforcement measures.

II. Trademark Doctrine: Leading or Following?

What, then, is the role of doctrine in enforcement decisions? Is trademark doctrine, including the examples cited above, leading or following? Is it creating mark owners' enforcement motivations or is it providing those motivations an outlet they would not otherwise have? And in either case, is the motivation that doctrine is either creating or serving primarily one of fear or one of loathing?

It is easiest to identify the one area - and I think it is really the only area - where doctrine is explicitly creating a motivation, and that is the so-called duty to police. Professors Deven Desai and Sandra Rierson have argued that the threat of losing trademark rights incentivizes mark owners to undertake wasteful and undesirable policing activities, activities that even the mark owners do not want to undertake, but which they feel they must undertake on pain of losing some right that they currently enjoy.ⁿ¹⁶ It may be [*878] that this fear is indeed responsible for driving at least some enforcement actions that we academics would denounce as bullying.

In most other areas, I think that doctrine has generally been playing catch-up with the enforcement objectives of trademark owners, moving where the owners want enforcement to go, for the reasons that they want it to go there. The merchandising right is one example. In cases like *University Book Store v. Board of Regents*ⁿ¹⁷ and *Boston Hockey Association v. Dallas Cap & Emblem Manufacturing*,ⁿ¹⁸ a monopoly was created literally out of whole cloth and used to stamp out what had up to that point been a competitive market in branded merchandise - for example, for university and professional sports teams.

With respect to sponsorship and affiliation confusion, Professor Jim Gibson at the University of Richmond has argued that doctrine responds to enforcement activity in a feedback loop of expanding trademark rights.ⁿ¹⁹ In his telling, incrementally more aggressive enforcement actions by trademark owners produce a marketplace in which consumers develop increasingly credulous views of what might be a sponsorship or affiliation relationship, and those increasingly credulous views feed back into the likelihood-of-confusion standard, to make ever-more aggressive assertions of trademark rights at least plausible.ⁿ²⁰ Again, the scope of infringement liability appears to be expanding to serve the motivations of trademark owners as expressed in their enforcement actions, rather than the other way around.

A third example is the federal dilution statute,ⁿ²¹ which, from my point of view, is a solution in search of a problem.ⁿ²² For years [*879] the statute was a top legislative priority of the organized trademark bar.ⁿ²³ Congress eventually acquiesced, not only by passing a federal trademark dilution statute,ⁿ²⁴ but also by amending it to roll back a challenge to that statute from the Supreme Court in *Moseley v. V Secret Catalogue*.ⁿ²⁵

So it seems that rather than generating fear among trademark owners that leads to enforcement activity, the law seems to be responding to trademark owners' demands by creating ever-greater opportunities for enforcement. Moreover, in each of these examples, I would argue that the motives of mark owners that the law is scrambling to accommodate are not based in fear of loss, but rather in the desire to expand trademark rights into new frontiers where

they had not yet been established - frontiers where they might well generate economic value for the mark owner, but also where others might otherwise (but for the expansion of those rights) have been able to realize some sort of commercial or expressive benefit without imposing any loss on the trademark owner. So as a matter of doctrine, I would submit that trademark law has been much more a vehicle for mark owners' loathing rather than a source of their fear.

III. The Role of Counsel

Perhaps, however, this is an unfair assessment. Let's take a step back at this point to consider the point of view of the trademark owner - or, more to the point, his counsel. A trademark plaintiff's counsel might object that what I am categorizing as [*880] loathing really is fear: fear of losing the value of sunk investments in a marketing strategy; fear of losing prospective opportunities and potential areas of future expansion; fear of a slippery slope, of a death by a thousand cuts, of letting whatever strength a mark currently has be whittled away, a process that begins with a single unanswered stroke by a potential enforcement target. We academics have two responses to this line of argument.

The first response is to disagree over baselines. That is, academics argue that whatever mark owners are afraid of losing in these areas - a brand image or a brand personality, a prospective market of expansion in which the mark owner is not currently operating - is not properly theirs to begin with. That is, what you are characterizing as fear is really loathing in disguise. This is an argument that has been made in one form or another by a number of commentators, including Judge Kozinski,ⁿ²⁶ Professors Rochelle Dreyfuss,ⁿ²⁷ Wendy Gordon,ⁿ²⁸ Mark Lemley (joined alternately by Stacey Doganⁿ²⁹ and Mark McKennaⁿ³⁰), and even myself.ⁿ³¹ The baseline argument has considerable power because as a matter of intuition, I think, we are inherently more sympathetic to actions taken out of a fear of losing something than we are to actions taken based on loathing or jealousy of someone else's gain. Such an intuition might be grounded in the cognitive psychology of gain and loss - losses loom larger than gains, the behavioral economists teach us.ⁿ³² Moreover, this type of argument is not something that should be new to most lawyers; in our first year of law school we all learn that whether one considers a particular legal intervention [*881] to be preventing a harm or conferring a benefit is often in the eyes of the beholder and of the advocate.ⁿ³³

This baseline debate is an important one to have. It is a debate on which we might not ultimately come to some sort of agreement, but the arguments we will inevitably raise in defending our positions implicate values that are fundamental to setting up our markets and our society - values of competition, expression, and fairness.ⁿ³⁴ They implicate not only the efficiency of our consumer markets, but the distribution of the value generated by those markets and the non-economic interests of participants in those markets.ⁿ³⁵ These are all complicated empirical and moral issues that I think, as a discipline, we have not sufficiently grappled with.

The empirical aspect of such questions leads us to the second response of academics to the practitioner's argument that what motivates zealous enforcement is fear of loss. This argument accepts that mark owners' motivations are not only - or perhaps not at all - venal, but merely misinformed or misguided.ⁿ³⁶ This is a position that has been taken by Professor Rebecca Tushnet with respect to dilution,ⁿ³⁷ and by Professors McKenna and Lemley with respect to sponsorship and affiliation confusion.ⁿ³⁸ As an empirical matter, they argue, the slippery slope model is just not an accurate description of how consumers respond to the types of third-party uses of trademarks that are at issue in some of the more controversial cases where trademarks are being enforced in a particularly aggressive way.ⁿ³⁹ In fact, many such uses have no effect on consumer perception of the mark or its owner at all.ⁿ⁴⁰ [*882] This argument is admittedly somewhat in tension with Professor Gibson's argument about enforcement feedback loops,ⁿ⁴¹ but it has the benefit of being supported by empirical evidence in cognitive and consumer psychology.ⁿ⁴²

This second argument raised by academics highlights the central role played by the trademark lawyer in the dynamics of enforcement - not only as advocate, but also as counselor. For every unauthorized use of a mark that might become the target of enforcement activity by that mark's owner, there is an important question as to what the effect of the use on consumers, and thus on the mark owner's business, is likely to be. One example that I have drawn in other work is the liquor market.ⁿ⁴³ For over a century, Courvoisier was known as the brandy of Napoleon, but today it is the brandy of Busta Rhymes.ⁿ⁴⁴ It may be just shy of exaggeration to say that the transformation saved Courvoisier. It

began, not with a planned shift of the marketing strategy within Courvoisier, but rather with the unauthorized invocation of the brand name in hip-hop lyrics, going back to the early 1990s.ⁿ⁴⁵

Under the expansive notions of sponsorship and affiliation confusion that we have today, and potentially also under dilution doctrine, those types of invocations might well be the subject of at least a colorable claim that might survive a motion to dismiss. But bringing that claim would have been a huge disaster for Courvoisier. Consider Jay-Z's reaction to Cristal when an executive in the company that makes Cristal suggested - just suggested in an interview - that maybe he was not crazy about the association of Cristal with hip-hop nightlife.ⁿ⁴⁶ Jay-Z launched a boycott.ⁿ⁴⁷ He started promoting a competing brand.ⁿ⁴⁸ He took to [*883] the pages of Time magazine to drag Cristal through the mud.ⁿ⁴⁹ Thus, the public relations consequences of enforcement action, and the business losses that can result from negative publicity, must be a consideration in any decision whether to take such action.

Conclusion

In short, perhaps the most important piece of the enforcement puzzle is not the law that we academics sometimes complain is moving in the wrong direction, but the lawyers who bring trademark claims, and in particular the judgment that they bring to bear on the decision whether or not to assert a trademark claim. To be fair, it is almost certainly malpractice not to advise your client on the potential consequences of failing to take action against an unauthorized user. But the duty to police is not absolute - not every forbearance from enforcement will negatively affect a mark owner's legal rightsⁿ⁵⁰ - and clients should know about that as well. Moreover, clients deserve to be reminded that enforcement activity comes at a cost, not only to society, not only to the targets of enforcement, but to the client itself. Those costs are not just the direct costs of the enforcement in terms of attorneys' fees and expenses, but the indirect costs in terms of negative publicity and loss of business. These indirect costs can be subtle but they are vitally important, as our culture continues to generate increasing demand for intangible and subjective sources of value.

I recognize that many trademark attorneys undoubtedly face significant financial and professional incentives to maximize enforcement activity. But I would suggest that those attorneys might still do well to critically examine the motivations for a [*884] particular enforcement action before advising a client whether or not to undertake it. On the question of whether a particular motivation is properly categorized as fear or as loathing, it may not be the advocate's place to second-guess their client. We academics and practitioners continue to fight that out, as we have in the past. But on the question of whether a particular fear is well founded, I believe it is the attorney's duty - as counselor rather than advocate - to apply judgment and counsel moderation to her client, to resist the traditional risk-aversion of our profession that might be triggered by the potential consequences of forbearance, and to consider, above all, the business interests of her client. This is especially true in a world where the actions of a mark owner towards its customers, its fans, its secondary market, its competitors, and even its critics increasingly play a role in constructing brand image and ultimately in generating demand.

SYMPOSIUM ARTICLE: Bearing Down on Trademark Bullies

NAME: Irina D. Manta*

BIO: * Visiting Associate Professor of Law, Brooklyn Law School; Assistant Professor, Case Western Reserve University School of Law; Yale Law School, J.D.; Yale College, B.A. I would like to thank James Barabas, Eric Goldman, Hugh Hansen, Brian Lee, Cassandra Robertson, Jeremy Sheff, David Silverman, Robert Wagner, and my research assistant David Gerard. I am very grateful to Fordham Law School and the Fordham IPLJ for inviting me to make this contribution and thank the symposium participants for their comments. My appreciation also goes to Brooklyn Law School and its staff for support during my research.

LEXISNEXIS SUMMARY:

... If the PTO could make preliminary determinations about the validity of infringement claims, trademark owners could record evidence of policing while being discouraged from making frivolous claims. ... Judicial Sanctions One natural question that arises in the trademark bullying context is why, if the behavior of a party or its attorney is excessive, we would not use judicial sanctions to eradicate their actions. ... Similarly, attorneys would think twice before sending aggressive C & D letters on behalf of their clients. ... While such sanctions could prove helpful against bullying in some situations, they also entail serious disadvantages for small business owners or individuals under attack by trademark bullies. ... Ultimately, while these changes could benefit the victims of trademark bullying, their costs may be too high to warrant implementation. ... Trademark owners generally rely on their public reputations for commercial success, and thus a shaming campaign exposing an owner as a bully can have significant repercussions for the owner's business.

HIGHLIGHT:

Trademark bullying has become a persistent problem, with large companies intimidating smaller entities with cease and desist campaigns and achieving anti-competitive results. A number of tactics exist to deal with bullying behavior. One of them is the imposition of judicial sanctions, but the standards in that area are unclear and the defendants often do not have the financial means to engage in litigation at all. Other, extralegal measures such as shaming have shown some success, but also present numerous drawbacks and prove insufficient when used against powerful actors. This article proposes a new model that draws on the existing functions of the Patent & Trademark Office (PTO) to stem the indiscriminate sending of cease and desist letters by large trademark holders and incentivizes them to file their claims with the PTO under certain conditions. This solution seeks to guard the interests of legitimate victims of infringement while balancing their rights with the need to protect smaller entities from the threat of ruinous litigation. If the PTO could make preliminary determinations about the validity of infringement claims, trademark owners could record evidence of policing while being discouraged from making frivolous claims.

TEXT:

[*854]

Introduction

In the last few years, the phenomenon of "trademark bullying" has begun to receive more attention in legal scholarship and the media. Simply stated, a trademark bully is usually a large company that seeks to put an end to behavior by individuals and small businesses that it perceives as a danger to its own intellectual property even though its legal claims against these other parties are spurious or non-existent.ⁿ¹ The bully puts its opponents under pressure through "cease and desist" (C & D) letters in which it demands that the opponent stop using a certain trademark that it believes resembles its own and threatens legal sanctions if the C & D demands are not met.ⁿ² These letters frequently do not contain detailed explanations of the alleged infringement but instead are intended to intimidate recipients into submission through the use of vague claims masked in legalese and are sent by lawyers who pressure recipients into providing a fast response.ⁿ³ Individuals and [*855] small businesses often capitulate rather than face a harrowing legal battle that could bring them to the brink of financial destruction.

Trademark bullying engenders a number of costs for society. First, the market suffers a reduction of legitimate competition.ⁿ⁴ The potential downsides of this effect are well-known and include consequences such as higher prices for products and a reduced panoply of choices in the marketplace. Relatedly, bullies create obstacles for consumers' ability to make source-identification connections with products that said consumers may wish to purchase or that could benefit them.ⁿ⁵ Second, bullying can seriously inhibit not only commercial but also non-commercial speech. While individuals are supposed to be able to make fair use of trademarks, even fair use can at times encounter enforcement efforts by way of C & D letters.ⁿ⁶ One such case was when the Lego Group sought to block use of the websites "www.ratemylego.com" and "www.ratemylegos.com."ⁿ⁷ Some have concluded that "trademark law ... often serves as a blunt instrument of cultural intimidation and censorship."ⁿ⁸

A recent commercial example that involved a tenuous trademark claim in which the alleged infringer did not cave has been that of Bo Muller-Moore, a folk artist in Vermont who tried to trademark the phrase "Eat More Kale" for his T-shirts only to find himself facing an attack by Chick-fil-A and its mark "EAT MOR CHIKIN."ⁿ⁹ The C & D letter that Muller-Moore received from the fast food giant accused him of "trademark infringement, dilution, and unfair competition in violation of federal and state [*856] law."ⁿ¹⁰ There is no obvious link between chicken and kale, aside from the fact that they are both food items. It is difficult to envision a reasonable reading of the Lanham Act that would enable Chick-fil-A to claim ownership of all variations of the phrase "Eat More ...". Lest one think that this claim was an isolated incident, however, Chick-fil-A has also initiated legal proceedings or sent C & D letters to a number of other owners of similar phrases, including ones that encouraged individuals to eat more beer, fish, goat, burritos, dog, moo, yogurt, ice cream, chocolate, cereal, authentic, music, kosher, and treats.ⁿ¹¹ While at times, infringers appropriate other elements of a trademark or trade dress in such a way as to convey the same source as the original, this does not appear to have been the case for Bo Muller-Moore. The dispute between Muller-Moore and Chick-fil-A continues at the time of this article, but for every Muller-Moore who receives publicity and fights for his rights (by himself or aided by public interest organizations), there are innumerable accused individuals who quietly disappear.

At times, the alleged instances of infringement that owners choose to pursue are downright strange, such as when the National Pork Board (NPB), which owns the slogan "The Other White Meat," went after a product that was actually an April Fool's joke. The NPB sent a long C & D letter to ThinkGeek over an ad for Canned Unicorn Meat because the ad contained the message: "Pate is passe. Unicorn - the new white meat."ⁿ¹² ThinkGeek remarked in a tongue-in-cheek comment: "We'd like to publicly apologize to the NPB for the confusion over unicorn and pork - and for their awkward extended pause on the phone after we had explained our unicorn meat doesn't actually exist."ⁿ¹³ While this incident is [*857] amusing in many ways, it is also indicative of the knee-jerk reactions of some trademark owners in the face of the slightest perceived infringement.ⁿ¹⁴ Indeed, the examples delineated here only offer up a taste of the magnitude of

the problem, and "trademark holders often threaten to sue in cases which - at least in the eyes of a person familiar with trademark law - would be demonstrably frivolous." ⁿ¹⁵ One of the tragic aspects of such bullying is that the abuser is safe from punishment for his actions because they take place outside of the jurisdiction of the judicial system. Even though the conduct occurs in a private forum, the bully is able to use the threat of litigation in a court that will at times favor him and exact onerous expenses from the defendant. Thus, the potential involvement of the judicial system becomes a sword wielded against the victim, while the bully simultaneously [*858] uses private conduct as a shield to avoid the standards of conduct and process that the judicial system imposes.

Trademark bullying is a touchy problem because the law does require owners to police their marks if they want to maintain exclusive rights in their marks and prevent so-called "genericide." ⁿ¹⁶ Any proposal to address the problem of bullying therefore has to avoid putting trademark owners into a double-bind in which the lines are blurry and both failure to police and excessively aggressive policing lead to sanctions or loss of rights. This article will outline some of the solutions that have been suggested in this context, including legal avenues that may theoretically be available to address bullying but ultimately prove inadequate, and then propose a new model of dealing with trademark bullying that draws on the existing qualities of the PTO while trying to circumvent its weaknesses.

This article will begin by exploring in Part I the existing options against trademark bullying, with a particular focus on the use of judicial sanctions and extralegal mechanisms such as shaming. Part II will then present an alternative model that harnesses the institutional strengths of the PTO and involves the filing of C & D letters with the agency.

I. Existing Options Against Trademark Bullying

A. Judicial Sanctions

One natural question that arises in the trademark bullying context is why, if the behavior of a party or its attorney is excessive, we would not use judicial sanctions to eradicate their actions. Judicial sanctions can be imposed via several mechanisms [*859] such as Rule 11, ⁿ¹⁷ 28 U.S.C. § 1927, ⁿ¹⁸ and Section 35 of the Lanham Act. ⁿ¹⁹ Rule 11 allows district courts to impose penalties on either the attorney or the client in a case for pleadings filed for an improper purpose, or for frivolous or unsupported legal arguments. ⁿ²⁰ Under 28 U.S.C. § 1927, sanctions are available for "unreasonable and vexatious[]" conduct. ⁿ²¹ Section 35 of the Lanham Act allows for the awarding of attorneys' fees to the prevailing party in "exceptional cases." ⁿ²² Courts have traditionally defined these as involving bad-faith conduct or willful infringement. ⁿ²³

All of these penalties could technically be used to punish trademark owners for policing tactics that rise to the level of intimidation or harassment, and therefore may constitute a potentially beneficial corrective method. Courts could strategically deploy these sanctions against either the attorney or the client, or both. ⁿ²⁴ This would allow judges to make factual determinations as to whether the harassment was the result of a bullying client or an overzealous attorney. Targeting the best cost avoider ⁿ²⁵ in any given situation could optimize the incentive structure of sanctions. This would also send a strong message to the trademark owner as to what types of behavior will not be tolerated, thereby likely slowing down a mark owner's attempts to unreasonably expand the scope of his mark's protection. Similarly, attorneys would think [*860] twice before sending aggressive C & D letters on behalf of their clients.

While such sanctions could prove helpful against bullying in some situations, they also entail serious disadvantages for small business owners or individuals under attack by trademark bullies. First, the key leverage that a trademark bully holds over her victims is the disparity in finances that often gives her the upper hand. ⁿ²⁶ Litigation can be prohibitively expensive for victims, and the costs of litigation alone can be enough to bankrupt a small business even if it ultimately prevails. ⁿ²⁷ To make a motion for judicial sanctions and obtain relief, the victim would have to engage in litigation with the trademark bully; judicial sanctions cannot be imposed outside of the litigation process, which is where the majority of bullying takes place. ⁿ²⁸ In addition, judicial sanctions have rarely been granted in trademark actions. When they have been granted, the threshold for bad faith has been very high, and the standards have been all but "bright-line." ⁿ²⁹ There also exists the non-negligible risk that the bully will appeal the sanctions and succeed in having an appellate

court overrule the district court's ruling. ⁿ³⁰

[*861] A further complication arises in this context from the fact that courts are split as to the proper standard to apply to Rule 11 and Section 1927 sanctions. Some courts employ a "bad faith" standard, akin to contempt of court, which sets a very high threshold and eliminates liability for careless or negligent conduct. ⁿ³¹ This high threshold could give an incentive to attorneys not to make bona fide efforts to verify their claims, evidence, and so on. ⁿ³² Some courts, however, maintain a standard that requires "objective unreasonableness." ⁿ³³ While this lower standard gives courts greater latitude in making factual inquiries into negligent conduct, critics have argued that it leaves attorneys vulnerable to liability for good-faith errors, misrepresentations by clients, and arbitrary interpretation by the judiciary. ⁿ³⁴

Further diluting the power of Rule 11 sanctions is its "safe harbor" provision requiring that before an attorney can move for sanctions, he must make a motion to opposing counsel, without alerting the court, and provide twenty-one days for the offender to correct her conduct before the court is notified. ⁿ³⁵ While this provision is touted as a method of easing the court's burden by allowing attorneys to self-police, the disadvantages of the provision are apparent. Because of the confusion surrounding sanctionable conduct, attorneys may be hesitant or unable to distinguish between acceptable and unacceptable behavior and to [*862] take the appropriate action. ⁿ³⁶ Attorneys sometimes additionally fail to report sanctionable behavior because they are afraid of reprisal or because they have a tacit agreement with the opposing counsel to look the other way. ⁿ³⁷ Genuine concerns also exist that without the court's oversight, attorneys will be able to use sanction motions as a method to delay the litigation process or as a threat to "bully an opponent into withdrawing a paper or position." ⁿ³⁸

Another avenue of recourse against trademark bullies that has received some attention is the use of anti-SLAPP (Strategic Lawsuit Against Public Participation) regulations. ⁿ³⁹ These regulations, which currently only exist at the state level, seek to protect the rights to free speech and to democratic participation against lawsuits that try to undercut such activities by forcing defendants to spend large amounts of money on litigation. ⁿ⁴⁰ Anti-SLAPP regulations allow defendants to expedite the litigation process and to potentially recover their litigation costs from plaintiffs. ⁿ⁴¹ The quintessential SLAPP against which such regulations are supposed to protect has little or no likelihood of succeeding in court and tries "to interfere with the protected free expression of defendants." ⁿ⁴²

Anti-SLAPP regulations would provide trademark defendants with access to courts at a lower cost and with a way to recover their costs from the plaintiff. At this time, however, they only form a part of state, not federal law, and they are not available in [*863] all fifty states. ⁿ⁴³ Even in the states where they do exist, they can currently only be used in federal court for cases decided under diversity jurisdiction ⁿ⁴⁴ rather than for claims under federal law ⁿ⁴⁵ (of which trademarks are a part). Additionally, a trademark bully faced with anti-SLAPP regulations would still have the opportunity to appeal his case and try to use the judicial system to cause the defendant hardship. Several changes would need to take place to increase the ability of judicial sanctions to combat trademark bullying. First, the standard for sanctions would require clarification so that the recipients of C & D letters could better evaluate their chances during litigation. Second, the courts would need to moderate their current policies that favor trademark owners and are rooted in the perceived obligation that owners have to aggressively police their marks. ⁿ⁴⁶ An excessively blurry line between forceful but legitimate enforcement and bullying is bound to render judicial sanctions ineffective. Third, courts would have to broaden their analysis to lend greater weight to bad-faith conduct that takes place prior to litigation, such as improper C & D letters and extortionist settlement demands. Because these sanctions currently focus on conduct during litigation, the victim must initiate court proceedings to gain redress. It is easy for bullies to intimidate victims in the private sphere, where a significant proportion of bullying occurs.

Recognizing that illegitimate actions generally take place before litigation and acknowledging that trademark owners will at times minimize record-keeping of their improper enforcement attempts would represent an important step in protecting the victims of bullying. ⁿ⁴⁷ Such a change could potentially also include shifting the target of sanctions from the attorney to the client if it is [*864] the client that is primarily responsible for initiating the excessive enforcement attempts. Finally, the legislature could play a role by removing the "safe harbor" provision of Rule 11 and either clarifying the intended use of sanctions or specifying the mens rea required under the law. ⁿ⁴⁸ Some legislative

proposals have attempted to make changes to Rule 11, but none has been enacted yet.ⁿ⁴⁹

Ultimately, while these changes could benefit the victims of trademark bullying, their costs may be too high to warrant implementation. Lowering the threshold for judicial sanctions may conflict with the greater legal policy of zealous representation of clients.ⁿ⁵⁰ Barring a tectonic shift in trademark law and an unprecedented clarification of the standards for proper mark policing, attorneys could find themselves in difficult positions and be subject to disciplinary measures either for aggressive representation or, alternatively, for deficient representation if rights to a mark are eventually lost as a result of genericide.ⁿ⁵¹ Changing the focus of sanctions from attorneys to clients is problematic as well. After all, clients are presumed to lack sophistication in legal matters and to rely on their attorneys for advice. Attorneys rather than clients are generally in the best position to assess whether enforcement conduct is likely to be improper and to advise accordingly. Attorneys also have to make decisions during trials that do not always allow for extensive conferrals with clients, so it would add numerous complications to sanction clients or apportion blame precisely between attorneys and clients. Hence, even if the political and judicial wills were sufficient to impose changes in the [*865] realm of judicial sanctions, the undesirable consequences are of sufficient magnitude that they should give us pause and encourage consideration of other alternatives.

B. Extralegal Measures

With the proliferation of social media on the Internet, the victims of bullying have obtained increased access to resources and can fight bullying without resorting to legal measures. One tool to combat bullies in this context has been the use of social media to make bullies' behavior the subject of public criticism and to shame them into ceasing their activities. Shaming can prove helpful in the trademark context because the costs of shaming are minimal while the punitive effects can have a lasting impact. Trademark owners generally rely on their public reputations for commercial success, and thus a shaming campaign exposing an owner as a bully can have significant repercussions for the owner's business. There are numerous stories in which individuals or small businesses were able to triumph over giant corporations this way.ⁿ⁵² The threshold for shaming is also much lower than it is for judicial sanctions, and the task is fairly clear: the victim has to convince the public that the bully has violated social and legal norms through his behavior.ⁿ⁵³

Shaming, however, is not without its downsides. Its effect could suffer dilution through overuse if some parties try to employ it excessively and in an illegitimate manner. Because shaming is essentially a private form of conduct that is unregulated by the courts or similar entities, there is no consistent way to prevent abusers of the technique from weakening its power.ⁿ⁵⁴ Shaming also still requires the victim to respond to the bully in a negative manner, which may invoke litigation from the bully who expects capitulation rather than resistance. Furthermore, shamers could [*866] face defamation lawsuits.ⁿ⁵⁵ The situation could escape the victim's control as the public or the media run away with a controversy. A negative impact against the victim could result if she has reached an agreement with the bully and is seeking to withdraw from or end the shaming campaign.

Some mechanisms could improve the effectiveness and smooth functioning of shaming in this context. For instance, we could make greater use of websites that monitor the veracity of shaming claims and could thus hopefully weed out a portion of abusers. Such websites could also serve as a centralized sounding board for dispute resolution such that once the parties have resolved their conflict and the victim wishes to cease its public campaign, the website can alert the public to the resolution, which might then discontinue the shaming. While the use of online tools can serve a critical role in providing information to victimsⁿ⁵⁶ and giving them access to retaliatory measures, the bullies are often so powerful that the effect may not prove strong enough. In some cases, victims may also not be aware of the resources that exist for their protection and could cave before even making efforts to retaliate.

II. The Alternative of a PTO Paradigm

The time may be ripe to consider adopting an altogether different model to combat trademark bullying. I will sketch here a proposal that tries to alleviate the problem of bullying and simultaneously maintain procedural safeguards as well

as enable mark owners to properly police their marks. The idea would be to create a new mechanism through the PTO that would balance the large company's duty to police and the individual's or small business' right to compete without unfair harassment. The PTO could offer an oversight process that would allow agency attorneys to review C & D letters and issue rulings on the merits of the [*867] alleged infringement.ⁿ⁵⁷ This would benefit both the trademark owner and the potential bullying victim. The initial requirement would be the filing of the C & D letter with the PTO. The primary purpose of that requirement is to impose some cost on the trademark owner to incentivize him to make careful choices as to when to attempt to enforce his mark.

The process would begin by having the mark owner file the letter, along with a fee determined by the PTO. The fee would have to cover the operating expenses of this mechanism and therefore would likely be more than simply nominal. The trademark owner would also have the option of filing additional supporting evidence. The documentation would then be sent to the alleged infringer, who would have the opportunity to respond. A PTO attorney would analyze the alleged infringement and determine whether legal action by the trademark owner would have merit.

If the PTO decides that infringement took place, the trademark owner could proceed either with private settlement negotiations or he could pursue litigation. Similar to how trademark registrations carry a presumption of validity,ⁿ⁵⁸ the declaration by the PTO would be treated as a presumption of infringement by courts. Further, if he is ultimately successful, part of the trademark owner's recovery could include his PTO filing fees, thus negating possible chilling effects that the costs might have on valid enforcement actions. If the PTO determines that the accusation is unfounded, the victim could use this to establish a presumption of improper conduct in court if further enforcement tactics are employed. This may lower the uncertainty otherwise provided by litigation and partially alleviate the burden to "litigate or capitulate" that defendants currently face.

Trademark owners could continue to send C & D letters without following the PTO procedure. The way I envision the [*868] system is that there would exist a threshold value of a mark above which certain requirements would kick in for owners when they send a letter directly to an alleged infringer.ⁿ⁵⁹ Mark owners would have to add a boilerplate statement indicating that they are or are not also filing the letter with the PTO, and cite the relevant statutes and regulations that cover the practice. With these rules in place, there are three possible scenarios. First, the owner may fail to include the statement. In that case, the letter would not count later if courts ever examine whether the owner properly policed his mark. If he sues the person to whom he sent the letter, his failure to include the statement would also be construed during litigation as bad faith on his part.ⁿ⁶⁰ Second, the owner could state that he is additionally filing the letter with the PTO. This would qualify as evidence of policing and serve as an information-forcing mechanism to show his good faith about his legal claims. The recipient would be on notice and know to take this type of letter seriously. Third, the owner could state that he is not filing the letter with the PTO. If that is the case, the letter will not qualify as evidence of policing down the line. The recipient of the letter may be less intimidated and could decide to force a conflict if he feels that he is in the right and the senior user is less than serious about his claims. Owners of less valuable marks would not be required to file the letter with the PTO (although they would have the option [*869] of doing so) and/or make related statements in C & D letters because imposing the costs on such owners to go through the PTO may be excessive, and bullying concerns are already reduced with these types of parties.

Trademark owners would receive additional benefits beyond the power of a determination of validity from the PTO procedure. A significant amount of trademark bullying stems from bullies' impression that to maintain a mark, it is the owner's duty to aggressively police it. Thus, many bullying situations involve mark owners who have taken this perceived duty to extreme levels.ⁿ⁶¹ By permitting the filing of C & D letters to serve as evidence of policing the mark, the trademark owner will be relieved of that burden and hopefully incentivized to make more careful decisions as to when to pursue enforcement actions.

One of the key advantages of the PTO regulation system will be the reduction of private trademark bullying, as the mark owner will most likely review the merits of an enforcement action before incurring the costs of filing a C & D letter. If he is pursuing a legitimate claim, the owner will likely recover those costs later and receive other procedural benefits from having filed the letter. The recipients of C & D letters would receive protection through the oversight of

the PTO and the disincentives against bullying that the new system would provide. Recipients would also be able to perform a search of pre-existing PTO decisions if the agency places them online like it does trademark registrations.ⁿ⁶² The average alleged infringer will likely find that these records are easier to search and understand than the results he is likely to obtain by searching judicial decisions in databases such as Westlaw, LexisNexis, or PACER, not to mention much more inexpensive to gather.ⁿ⁶³

[*870] This proposal certainly contains drawbacks as well. There would be significant administrative and set-up costs, which could result in filing fees high enough to reduce valid enforcement attempts. In addition, the program would require effective enforcement by the courts and the PTO. If a PTO determination represents a near-certain victory for a trademark owner, his settlement demands could become unreasonable and force the alleged infringer to accept litigation as the only means of protection. Critics may also argue that the PTO will essentially be required to act as a court and that it will be forced to hire more attorneys to undertake this work. These additional salaries would further increase the filing fees and could have a chilling effect on some legitimate claims. At the same time, the PTO already conducts likelihood of confusion analyses as part of the trademark registration process and is thus just as equipped to handle this task as that of registration.ⁿ⁶⁴ The additional costs should not prove insurmountable and the current registration system should not be unduly burdened.

Trademark owners may also argue that imposing PTO regulation on the enforcement process will in effect impose further costs for owners aside from the filing fees. The mark owners may claim that instead of merely issuing C & D letters, which are relatively inexpensive to prepare, owners will now have to engage their lawyers in costly in-depth infringement analyses, in the face of somewhat undefined case law. These cost impositions, however, would most likely not be prohibitive and in fact comport with general trademark policy. As PTO decisions on C & D letters [*871] are issued, these rulings will provide information as to how owners should interpret trademark law and, as indicated above, will potentially be easier to interpret than court decisions on the subject. The cost and uncertainty of legitimate enforcement could therefore actually decrease.ⁿ⁶⁵

Conclusion

The problem of trademark bullying is tricky but perhaps not entirely intractable. This area of the law remains an outlier in the sense that we do not normally expect such a high level of assertive policing and initiation of legal actions for owners to maintain their rights as we do for trademarks. Changes in the implementation of judicial sanctions and mechanisms such as shaming could alleviate some of the problems associated with bullying, but are likely to leave significant gaps. Public interest organizations will perhaps increase their outreach and provide greater legal representation to the victims of bullying, although this would require focused attention and financial resources. This article proposes a new paradigm to handle the tension between allowing owners to police their marks and preventing them from harassing competitors and silencing speech. While substantive changes in the law will hopefully clarify the line between legitimate and improper enforcement, the time may have come to consider new procedural safeguards as well. The proposal delineated here certainly requires significant further research before its final implementation, including detailed empirical study of the financial costs and benefits. My goal was to advance the conversation by offering another possible instrument in the toolbox at our disposal to fix a system in need of more than just tinkering.

n14. Another recent example that shook up the academic world was the C & D letter sent by Louis Vuitton to the University of Pennsylvania Law School over the use of a purse-like pattern on a poster evoking Louis Vuitton's purses and advertising the Penn Intellectual Property Group Annual Symposium whose subject this year was "Fashion Law." See Michael Pantalony, Letter to Dean Michael A. Fitts, Feb. 29, 2012, available at http://www.law.upenn.edu/fac/pwagner/DropBox/lv_letter.pdf (displaying the letter, which includes a depiction of the pattern). The letter argued that the university's

egregious action is not only a serious willful infringement and knowingly dilutes the LV Trademarks, but also may mislead others into thinking that this type of unlawful activity is somehow "legal" or constitutes "fair use" because the Penn Intellectual Property Group is sponsoring a seminar on fashion law and "must be experts."

Id. at 2. The University of Pennsylvania argued that the artwork on the poster represented a noncommercial parody that neither created confusion nor diluted Louis Vuitton's mark. Robert F. Firestone, Letter to Michael Pantalony, March 2, 2012, at 1, available at http://www.law.upenn.edu/fac/pwagner/DropBox/penn_ogc_letter.pdf. A number of scholars have condemned Louis Vuitton's action. See, e.g., Michael Risch, Really, Louis Vuitton? Really?, *Madisonian.net* (March 4, 2012), <http://networkedblogs.com/uL4R1>; Eugene Volokh, Penn Law School Rejects Louis Vuitton Nastygram, *Volokh Conspiracy* (Mar. 3, 2012), <http://volokh.com/2012/03/03/penn-law-school-rejects-louis-vuitton-nastygram/>. Not everyone in the legal community, however, agrees that Louis Vuitton's actions constitute bullying. See Steve Baird, How Fashionable is the Louis Vuitton "Trademark Bully" Label?, *DuetsBlog* (Mar. 12, 2012), <http://www.duetsblog.com/2012/03/articles/trademarks/how-fashionable-is-the-louis-vuitton-trademark-bully-label-2/>.

n15. Desai & Rierison, *supra* note 6, at 1840.

n16. Scholars have criticized courts' approach to genericide and argued that the "overly broad scope of evidence in deeming a trademark generic [] forces irrational behaviors on the part of mark holders in that they must expend resources trying to persuade the media,

dictionaries, and others from making fair use of their marks." Desai & Rierson, *supra* note 6, at 1855. They conclude: "Thus, mark holders waste resources trying to influence actors over whom they have no right or ability to control (through 'education,' bullying, and, in some cases, litigation), rather than spending those resources more efficiently elsewhere and/or cutting the cost of their goods or services." *Id.*

L.J., Sept. 2, 2011, available at <http://www.newyorklawjournal.com/PubArticleNY.jsp?id=1202513143784&slreturn=1> (describing recent proposals to eliminate the safe harbor and make other changes).

n50. See, e.g., Carl Tobias, *The Transmittal Letter Translated*, 46 Fla. L. Rev. 127, 131 (1994) (discussing the need to protect attorneys' ability to engage in zealous advocacy when policymakers determine the rules for sanctions).

n51. Desai & Rierson, *supra* note 6, at 1794-97 (describing the pressure on practitioners to aggressively protect marks based on the tremendous value that marks can have, and the legal implications that can arise from failing to protect a brand).

n52. For example, Rock Art Brewery successfully used Internet shaming against the multi-million dollar company Hansen Beverage when the latter started a C & D campaign regarding use of the term "Vermonster" in the context of beer sales. See Grinvald, *supra* note 2, at 671-74.

n53. *Id.* at 670-72; see also Dan M. Kahan, What Do Alternative Sanctions Mean?, 63 U. Chi. L. Rev. 591, 636 (1996) (explaining that shaming serves to "denounce the wrong doer and his conduct as contrary to shared moral norms").

n54. See Grinvald, *supra* note 2, at 680-81.

n55. *Id.* at 682-83.

n56. This is a key function of the Chilling Effects website, but its existence has certainly not extinguished trademark bullying. See Chilling Effects, <http://chillingeffects.org/> (last visited Jan. 28, 2012).

n57. This model contains some parallels to my previous work, in particular to a proposal to consider using judges to clear trademark infringement surveys before they are conducted. See generally Irina D. Manta, In Search of Validity: A New Model for the Content and Procedural Treatment of Trademark Infringement Surveys, 24 Cardozo Arts & Ent. L.J. 1027 (2007).

n58. 15 U.S.C. § 1057(b) (2006).

n59. One could object that mark owners might have an incentive to fudge the valuations of their marks down the line if there was a dispute as to whether they are obligated to meet the new requirements of PTO filings. The fact that the recovery of damages is directly tied to mark value, however, would provide them with a strong disincentive from doing so, especially because they would have difficulty providing inconsistent figures across different lawsuits without being accused of bad faith should they actually be tempted to do so. For a discussion of how the value of brands is determined, see, James T. Berger & Diana Tadzijeva, Marketing Perspectives on Brand Valuation,

JamesBerger.net, http://www.jamesberger.net/Brand_Valuation_Methods.shtml (last visited Feb. 5, 2012).

n60. Similarly, placing phone calls that constitute the substantive equivalents of C & D letters would be construed as bad faith if litigation does proceed. Some attorneys currently advise their clients to use the phone precisely because it avoids the creation of a record. See, e.g., Geri Haight, Trademark Enforcement, Trademark "Bullies" and Social Media, Copyright & Trademark Matters (Dec. 5, 2011), <http://www.copyrighttrademarkatters.com/2011/12/05/trademark-enforcementtrademark-bullies-and-social-media/> ("When in doubt, pick up the phone. A one-on-one conversation may be an effective way to resolve the issue amicably - without creating a paper trail.").

n61. For example, Warner Brothers was embarrassed to find out that it had sent a letter to a 15-year-old girl demanding that she take down her Harry Potter fan site. Kieren McCarthy, Warner Bros Backs Down on Harry Potter Web Site, The Register (Dec. 15, 2000), http://www.theregister.co.uk/2000/12/15/warner_bros_backs_down/.

n62. See U.S. Patent and Trademark Office, Trademark Electronic Search System (TESS), USPTO.gov, <http://tess2.uspto.gov/bin/gate.exe?f=tess&state=4002:v0fmrn.1.1> (last visited Jan. 29, 2012).

n63. Id. The TESS system is free to use (meaning that it is agency-funded, but the cost to the agency of this new task would likely be trivial).

n64. Nevertheless, there is no doubt that the PTO is, as I have previously stated, in need of reform to speed up and potentially improve its processing of claims. See generally Irina D. Manta, Privatizing Trademarks, 51 Ariz. L. Rev. 381 (2009) (proposing the targeted use of private actors to assist in the trademark registration process). Some critics argue that the PTO is not equipped to deal with determining real-world usage and infringement and that an entity like the World Intellectual Property Organization (WIPO) or National Arbitration Forum (NAF) would be better suited for this task. While I believe that my proposal would provide a sensible integration with the current duties of the PTO, these are alternatives worth exploring once more extensive empirical research on the issue takes place. At that stage, part of the focus may also turn toward the possible role of the Trademark Trial and Appeal Board (TTAB) in any new procedures given the TTAB's existing involvement in trademark registration opposition proceedings. I would like to thank Eric Goldman and David Silverman for their comments on this subject.

n65. As this article was going to press, a bill entitled "Small Business Trademark Protection Act" was introduced into the Minnesota State House with the goal of combating trademark bullying, in part through a requirement that all C & D letters include language advising recipients of their right to a settlement conference. See Steve Baird, Minnesota's Legislative Answer to "Trademark Bullying"?, DuetsBlog (Apr. 9, 2012), <http://www.jdsupra.com/post/documentViewer.aspx?fid=1b1e1dda-5c6f-4285-9254-25d2c757c105>. While my proposal is ultimately quite different from that in this bill, the idea to require specific language in C & D letters and involve administrative actors into the pre-litigation process mirror some of the notions presented in this article. See id.

P.&G. Settles Trademark Suit Against Start-Up Business

BYLINE: By ANDREW MARTIN and PETER LATTMAN

SECTION: Section B; Column 0; Business/Financial Desk; Pg. 4

LENGTH: 572 words

A Connecticut mother and businesswoman has won the right to name her company after her daughter, Willa, despite the objections of the nation's largest consumer products company.

Christy Prunier spent the last three years creating a line of skin care products aimed at preteenage girls like Willa, who is 11. But after obtaining trademark approval from the government early this year, she received a cease and desist letter from Procter & Gamble, which owns the hair care brand Wella.

Lawyers for Procter & Gamble said consumers would be confused because of the similarities, and demanded that she drop the name Willa. Ms. Prunier fought back. The two sides were scheduled to go to trial this week but instead settled the dispute, subject to a judge's approval.

"We are pleased to confirm that this matter has been amicably resolved," said Jennifer Chelune, a spokeswoman for Procter & Gamble, in an e-mail. She declined to elaborate.

Lawyers for Ms. Prunier also declined to provide additional specifics about the settlement, other than confirming that their client can continue to use the name Willa for her line of lip balm, facial masks and other skin care products.

Ms. Prunier, who had likened her struggle to David versus Goliath, declined to comment, citing confidentiality provisions in the settlement pact.

Trademark lawyers said it was not uncommon for disputes like Ms. Prunier's to settle just before trial.

"What's important to brand owners is control, and a private resolution that allows continued use in certain respects rather than an all-or-nothing decision by a judge or jury can be a good result," said James D. Weinberger, an intellectual-property lawyer at Fross Zelnick Lehrman & Zissu in New York. "If you go to trial and win, great; but if you lose, there can be long-term damage that is difficult to repair."

Mr. Prunier's battle with P. & G. is just the latest case of a small-business owner claiming "trademark bullying" by a large corporation. This summer, the Maya Archaeology Initiative fought claims by Kellogg that a bird in the organization's logo was too similar to Toucan Sam, the bird on the Froot Loops cereal box. The sides settled the dispute, allowing the Mayan group to use its mark.

The legal battles have caught the attention of Congress, which last year passed legislation that required a study of the issue. The subsequent Commerce Department report concluded that there was inconclusive evidence of widespread

trademark bullying and that disputes "may be best addressed by the existing safeguards in the litigation system."

A former film executive, Ms. Prunier said the idea of creating a cosmetics business for preteenage girls arose while Willa was taking a bath several years ago. Willa complained that she was tired of using "babyish" soaps and instead wanted soap made for girls her age.

Ms. Prunier spent the next three years meeting with chemists and developing a line of soaps and lotions that will be sold in purple and white bottles. She said her face wash was meant to "smell like a girl in the summertime who takes a shower outside."

Willa had caught the attention of Target, J. Crew and an Upper East Side boutique owned by the actress Phoebe Cates before the squabble with Procter & Gamble left the business in limbo.

The company's namesake was in school on Friday and unavailable for comment.

This is a more complete version of the story than the one that appeared in print.

Bubbles by Brooks buoyant after win

BYLINE: DAVID PHELPS; STAFF WRITER, STAR TRIBUNE (Mpls.-St. Paul)

SECTION: BUSINESS; Pg. 1D

LENGTH: 549 words

HIGHLIGHT: Bubbles by Brooks attorney: "We moved for summary judgment [dismissal] ... and Brooks Brothers caved ... "

Bubbles by Brooks can keep its name.

After a year of legal wrangling, high-end clothier Brooks Brothers has dropped a trademark infringement action against the small Rochester-based distributor of therapeutic soaps used by cancer patients, allowing Bubbles by Brooks to keep the identity it has nurtured for more than 10 years.

"I am very grateful for the way this worked out," owner Amy Brooks said from her home-based business Thursday.

Brooks was also grateful for the free legal assistance she received from a team of intellectual property lawyers from the Minneapolis firm of Fredrikson & Byron, which picked up the case when Brooks faced legal fees of up to \$200,000 to fight the case to the end.

"As a small business without representation, my voice would have never been heard," Brooks said.

It's often an uphill and costly battle for small companies to fight for their trademark if it is challenged by a big company.

"It's really difficult because it

costs money. It's money out the door. You can't recover it in sales or jack up your prices," said Kenneth Port, director of the Intellectual Property Institute at William Mitchell College of Law. "Small folks can't afford it and they just go away."

The Fredrikson lawyers took up the Bubbles by Brooks case last summer after the company was featured in a Star Tribune article about "trademark bullying," where companies use their deep pockets to challenge the trademarks of other companies - no matter how remote the connection.

In the Bubbles by Brooks case, attorneys for Brooks Brothers wrote: "Though 'Brooks' may be your surname, it does not give you the right to infringe on the Brooks Brothers trademark or otherwise compete with Brooks Brothers."

"Small companies are definitely at a disadvantage when litigating against a big one," said Lora Friedemann, one of three Fredrikson & Byron attorneys who worked on the Brooks case. "We moved for summary judgment [dismissal] ... and Brooks Brothers caved in the face of the motion."

"It feels good to be able to help this company," Friedemann said.

Brooks Brothers spokesman Arthur Wayne said in an e-mail late Thursday: "We do not comment on legal matters."

The dispute was handled in the U.S. Patent and Trademark Office. Port said the number of smaller companies that prevail in trademark disputes is rising, although those involved in so-called trademark bullying cases prevail just 5.5 percent of the time.

"We don't know how often the small guys win, but it is with more frequency than you'd expect and the way to win these cases is to go public and get the public to rally around you," said Port.

The soap and skin care products produced and sold by Bubbles by Brooks are handcrafted and designed to reduce irritation as cancer patients go through therapy.

Brooks, a cancer survivor, operates Bubbles by Brooks out of her home but recently hired a wholesale sales representative who has a showroom for wholesalers in Minnetonka.

"We had our best first quarter ever," Brooks said. "We moved forward but I always worried that I might have to change my name."

Brooks said her sales are a little less than \$100,000 a year.

"Yeah, this was good for me," she said of the dismissed trademark dispute. "But the system is still broken. I still want to help other people, too."

COMMENT: Protecting Small Businesses Against Trademark Bullying: Creating a Federal Law to Remove the Disparity of Leverage Trademark Holders Maintain Over Small Businesses

NAME: ANTHONY JAMES DISPOTO*

BIO: * © 2015 Anthony James Dispoto, J.D. Candidate 2015, University of San Diego School of Law. B.A., Business Administration, California State University, Fullerton. Ramsey for her guidance and support throughout the writing process, and the editors of the San Diego International Law Journal.

TEXT:
[*458]

I. Introduction

On December 9, 2013, Exit 6 Brewery, a small establishment located forty miles outside of St. Louis, received a letter from Starbucks demanding that the brewery stop serving a beer called the "Frappicino" at their venue.ⁿ¹ Starbucks asserted that Exit 6 Brewery was infringing upon Starbucks' trademarked "Frappuccino" coffee drink, and that the "Frappicino" brew might be confusedⁿ² for an officially licensed Starbucks product.ⁿ³ In response to the cease-and-desist letter, Jeff Britton, the owner of Exit 6 Brewery, ceased use of the "Frappicino" brew and sent Starbucks a check for six dollars, claiming it was the net profit from the three "Frappicino" beers sold.ⁿ⁴ Along with the check, Britton sent a letter joking about the Frappuccino coffee by referring to it as the "F word" and noting, "We just want to help Starbucks. Us small businesses need to stick together."ⁿ⁵ Instantly, the facetious letter went viral in a seeming attempt to shame Starbucks.ⁿ⁶

[*459] Shaming is just one of the modern defense tactics companies use instead of pursuing trademark litigation.ⁿ⁷ Most companies use this strategy to inform the public of a bullying company.ⁿ⁸ If the company continues such behavior, it may lose consumer loyalty or disassociation with the brand and, in turn, lose goodwill.ⁿ⁹

It is common for trademark holders to threaten legal action against many individuals, even if they do not have a strong claim of infringement. This is considered "overactive policing" of their trademark.ⁿ¹⁰ There is the potential for this overactive policing to result in an abuse of trademark protection, either by extending a company's trademark protection or bullying those that have a valid claim in a trademark, which will be discussed further within the comment.ⁿ¹¹ Markholdersⁿ¹² that do this are usually attempting to intimidate smaller holders of trademarks,ⁿ¹³ or individuals using descriptive terms similar or identical to their trademark, into ceasing use of their trademarks.ⁿ¹⁴ The markholder will typically attempt to claim broader rights in their trademark or use overactive policing efforts to [*460] maintain

protection of their already overly broad trademark rights, whether an alleged infringer ceases use of the mark or not. ⁿ¹⁵

The goal of shaming as an alternative to trademark litigation, like that seen with Mr. Britton, is to curb this "bullying" behavior from markholders. ⁿ¹⁶ While this may be an occasionally effective, informal way to deal with overly aggressive markholders, a formal codified solution would be more effective to deter markholders from acting aggressively in order to preserve the value of trademarks. When markholders are bullying, the value of the trademark may be reduced when the public gains a negative association with their brand. ⁿ¹⁷ When alleged infringers are bullied, the value to consumers is reduced because the alleged infringers are bullied out of markets before they are able to firmly secure a foothold.

While some trademark holders choose to act aggressively on their own accord, other trademark holders are forced to act to protect their trademarks from being used by other parties. ⁿ¹⁸ One such example occurred in Los Feliz, Los Angeles, after a comedian opened a coffee shop named "Dumb Starbucks." ⁿ¹⁹ Everything in the store replicated Starbucks products, except that the word "dumb" preceded every menu item, and the comedian included conspicuous disclosures of disassociation with the large coffee chain throughout the store. ⁿ²⁰ Instances of association with a trademark are not usually as blatant as this, but they are arguably protectable under freedom of speech or parody. ⁿ²¹ However, if third parties frequently use [*461] similar trademarks that associate with a well-known trademark, the distinctiveness ⁿ²² and value of the well-known trademark could and likely will decline. ⁿ²³

Starbucks was surprised by the individual behind Dumb Starbucks and initially did not bring suit because they were unsure how to handle the situation. ⁿ²⁴ One could speculate that a reason Starbucks did not sue right away was to preserve its reputation, which might start to decline if they are demonstrably a bully in their market, especially given the recent events of Starbucks and the Exit 6 Brewery described at the beginning of this comment. Because the Starbucks trademark has a great deal of value associated with the company, it is likely that a lawsuit will be brought against the Dumb Starbucks creator, otherwise Starbucks would seem to condone such actions, potentially spawning other impersonators. Since the Lanham Act protects trademarks that are not generic or abandoned, most companies would bring a lawsuit under the Act in order to protect their trademark and show they do not condone impersonation. ⁿ²⁵ The Lanham Act incentivizes trademark holders to be proactive in their enforcement of trademarks in order to maintain their trademark's distinctiveness and goodwill. ⁿ²⁶ However, sometimes that legislative incentive is too strong. In order to minimize large trademark holders' overactive [*462] policing against their respective targets, Congress must add provisions to the current trademark statute to dissuade markholders from overly policing their trademarks. ⁿ²⁷

This Comment will first seek to understand the problem of overactive trademark policing by starting with a brief introduction to trademarks, trademark bullying, and the modern methods that companies use against trademark bullying. Second, this Comment will make a comparative analysis of the United States federal and state statutory provisions, proposed legislation from Minnesota, a trademark reform theory from William McGeeveran, and current trademark statutory provisions in the United Kingdom. ⁿ²⁸ After analyzing the most pertinent provisions of the active and proposed domestic trademark laws and the trademark law from the foreign jurisdiction, this comment will seek to solve the problem of trademark holders' overactive policing efforts by proposing a new domestic statute that would better protect targets of their bullying.

II. Trademarks and Trademark Bullying

In the United States, a trademark is defined by the Lanham Act as a "word, name, symbol, or device, or any combination thereof ... to identify and distinguish [a company's] goods, including a unique product, from those manufactured or sold by others and to indicate the source of the goods, even if that source is unknown." ⁿ²⁹ Trademarks act as a source identifier, ⁿ³⁰ which helps consumers identify a specific product, or the quality and reputation of a product or manufacturer. ⁿ³¹

Trademarks are very specific and are capable of protecting the myriad of different ways that a producer can distinguish its product to the consuming public. One product may be trademarked in several different ways as long as

the trademark holder uses the mark as a way to identify [*463] the product's source or origin.ⁿ³² Consider the word "Red Bull," as a trademark for energy drinks, where the name of the product can be trademarked, or the image of two red bulls charging at each other before a circle backdrop can be trademarked as a logo for the product. There is even the potential that the silver, blue, red, and yellow color scheme can become trademarked if the consumers comes to associate those colors directly to the Red Bull Product. The name, logo, and color association can all demonstrate to the consumer what the Red Bull product is after their first experience with it, and any time that consumer sees the same name, logo, or color association, the consumer will remember their previous experience.ⁿ³³

The Lanham Act, state statutes, and common law protect both trademarks registered with the United States Patent and Trademark Office ("USPTO") and - in an attempt to prevent confusion - trademarks that are not so registered.ⁿ³⁴ Once a trademark becomes inarguably "famous," its trademark holder(s) can sue infringers for diluting the distinctiveness of that trademark without having to prove confusion, mistake or deception, which is normally needed to prove trademark infringement of a registered or unregistered mark.ⁿ³⁵ These dilution actions are available to protect trademark holders against alleged infringers who tarnish or blur the mark's image, which could inflict irreparable damage upon the goodwill associated with the trademark.ⁿ³⁶ In a general infringement action, the [*464] court may award damages or costs of the action; however, a court will only grant injunctive relief if a lawsuit is brought as a claim for trademark dilution.ⁿ³⁷

Failing to actively use, or "reasonably" enforce or police,ⁿ³⁸ a trademark can lead to an abandoned or generic trademark.ⁿ³⁹ An abandoned or generic trademark will lose its intrinsic value and distinct identification by the public and can possibly lose value from a loss of reputation and decline in sales.ⁿ⁴⁰ Conversely, a properly maintained and policed trademark can increase a company's value.ⁿ⁴¹ This can occur by the creation of reduced transaction costs or consumer search costs in the market, which will save a trademark holder money in advertising costs to repeat purchasers and could make the product more recognizable and desirable to the public.ⁿ⁴²

One of the most widely recognized trademarks is Apple, a technology company that designs, develops, and sells technological devices.ⁿ⁴³ In 2013, Interbrand ranked Apple at the top of its list of the most well-known and valued global brands.ⁿ⁴⁴ Interbrand valued the Apple brand at \$ 98.ⁿ⁴⁵ The commercial value of a company can be based on many different things, including trademarks, goodwill, reputation, and the overall brand of a company.ⁿ⁴⁶ In 2009, Apple was estimated to have a "Brand Value" around \$ 15 billion.ⁿ⁴⁷ The discrepancy in value between reputation and assets comes from the company's near-instantaneous public recognition and its well-established connection with high-quality products.ⁿ⁴⁸ Apple's exemplary value comes from the company name, marketability, and quality associated with the company, thus demonstrating the necessity to take great measures to protect trademarks associated with a company brand and [*465] reputation. However, if a company such as Apple overreaches in taking protective measures, it may be accused of trademark bullying.

The USPTO defines "trademark bullying" as the practice of a trademark holder using litigation tactics to harass and intimidate other businesses in an attempt to extend their trademark rights beyond the interpretation of what the law would reasonably allow.ⁿ⁴⁹ The litigation tactic most commonly used by trademark bullies is to send cease-and-desist letters to alleged infringers to put the "trademark target" on notice that they are infringing the sender's trademark.ⁿ⁵⁰ There are some circumstances where sending a cease-and-desist letter to an alleged infringer does not amount to trademark bullying. However, there are also instances where the utilization of a cease-and-desist letter is necessarily trademark bullying, because it is so unlikely that the target of such a letter is attempting to copy a specific trademark or to trick consumers as to the source of the mark.ⁿ⁵¹ In such instances, the trademark holders' motive in sending cease-and-desist letters is to intimidate the trademark target.ⁿ⁵² Trademark bullies use this method of intimidation to coerce the trademark target to cease use of the trademark altogether.ⁿ⁵³ This tactic is usually successful in pressuring alleged infringers to cease using the mark, settle with the "bullying" company, and obtain a license to use the trademark; but most importantly, it allows the trademark bullies to improperly extend the protection of their trademark in the market.ⁿ⁵⁴

One of Chick-fil-A's trademark disputes is illustrative of the trademark bullying process. Recently, Chick-fil-A

attempted to broaden the trademark [*466] rights granted in its "Eat Mor Chikin" trademark. ⁿ⁵⁵ Chick-fil-A got into a dispute with a Vermont folk artist named Bo Muller-Moore, who created "Eat More Kale" shirts to garner support for the surrounding kale farming community. ⁿ⁵⁶ When Moore tried to register his "Eat More Kale" trademark, Chick-fil-A issued a cease-and-desist letter for the infringement of its "Eat Mor Chikin" trademark. Moore decided to enlist legal aid rather than settle with Chick-fil-A, which led Chick-fil-A to file suit. ⁿ⁵⁷ While this is an instance where Chick-fil-A has a valid trademark in "Eat Mor Chikin," this legal action demonstrates Chick-fil-A's efforts to overextend its famous slogan beyond what should be legally protected. ⁿ⁵⁸

First, the use of the slogan "Eat More" in association with a restaurant chain is only a descriptive or generic phrase, since it denotes the advertisement of some edible product in connection with the company's goods. ⁿ⁵⁹ Chick-fil-A purposely misspelled the slogan and used a stylistic, graffiti-esque font to create a more distinctive trademark. ⁿ⁶⁰ "Eat More" is merely a descriptive phrase that should be usable by more than one individual. A court should not grant the rights to only one party, especially in connection with a food service.

Second, Chick-fil-A used the "Eat Mor Chikin" slogan with its "cow campaign," which consists of cows protesting against customers eating burgers. ⁿ⁶¹ The efforts of the campaign are to demonstrate cows and their mischievous activity to persuade the customer to not eat beef, but chicken. This can help to create a distinctive meaning of the phrase and has the [*467] potential to create a connection with Chick-fil-A and the mischievous cows. This would make one believe the phrase "Eat Mor Chikin" is a more specific, more distinctive, and more recognizable trademark than competing trademarks. ⁿ⁶² The cow campaign in conjunction with the phrase "Eat Mor Chikin" makes the brand more recognizable to the customer, and makes the specific phrase "Eat Mor" more distinctive. Since the connection of "Eat Mor" is used with the cow campaign, this is the phrase that should be protected.

Third, the context of the situation shows that there was no attempt to dilute Chick-Fil-A's trademark. Moore lives in Montpelier, Vermont, which is a simple farming community over 100 miles away from any Chick-fil-A location. Furthermore, Moore's use of the "Eat More Kale" brand in plain bold black writing is not an interference or an attempt to pass-off his mark as being somehow associated with Chick-fil-A. ⁿ⁶³

These two marks are only similar in that they share the "Eat More" phrase, but that distinction is only apparent when spoken, since Chick-Fil-A purposely misspells the word "more." Beyond that, there is no connection and no reason to believe that Moore intended to confuse his mark with Chick-fil-A in order to gain from Chick-fil-A's goodwill.

Although Chick-fil-A must remain vigilant to protect its "Eat Mor" mark, this is a perfect example of a company trying to maintain overly broad rights through overactive policing litigation tactics. ⁿ⁶⁴ The phrase "Eat More" is far too generic to be controlled by one trademark holder. While the specific stylized wording of the mark, its association with the cow campaign, or its association with fast food may be unique, for a court to hold that Chick-fil-A is the sole owner of the phrase "Eat More" would be too broad and a hindrance to competition in the marketplace. ⁿ⁶⁵ The case [*468] was resolved in Moore's favor when the USPTO granted the application for the trademark "Eat More Kale." ⁿ⁶⁶

Not all individuals standing in Moore's shoes would stand up to a large trademark holder to protect their product. ⁿ⁶⁷ The threat of prolonged litigation not only may lead to alleged infringers prematurely settling with the threatening party, it could lead to them giving up entirely. For instance, a USPTO Trademark Litigation Study found that several individuals threatened with the process of litigation withdrew their own registration for trademarks altogether, without settling, because the possibility of litigation was too expensive to be a viable option for a small businesses or individual trademark holders. ⁿ⁶⁸

Threatening litigation is not an uncommon tactic for multiple reasons. ⁿ⁶⁹ First, enforcing trademark rights, even if the claim is weak, is an effective strategy with relatively few downsides. ⁿ⁷⁰ Second, aggressive trademark enforcement is often effective in settling disputes without the claims ever rising to the level of litigation. ⁿ⁷¹ Third, cases that do go to court have limited case law upon which to rely. ⁿ⁷² This could result in excessive fees when a party would have to

craft an original argument for trial, potentially costing an alleged infringer, which is usually a small business, a substantial amount of in attorney's fees. ⁿ⁷³ Small businesses may not have sufficient support from human resources, may not be able to dedicate the time to prepare for such a lawsuit, or just may not have the financial ability to [*469] defend a suit. ⁿ⁷⁴ Even if a small business is capable of securing free or low cost legal assistance, the time devoted to the lawsuit would take away from the operation of the business, which could bury a company in debt. ⁿ⁷⁵

These threatened legal actions burden the targeted company rather than the trademark holders that send out the cease-and-desist letters. ⁿ⁷⁶ The targeted company is in a precarious situation in deciding which action to take. ⁿ⁷⁷ They can choose to wait and see if the threatening party will take legal action against them, while continuing to potentially infringe the trademark. Otherwise, the targeted company may seek a declaratory judgment, which could state that its trademark does not infringe upon the other party's mark, thereby precluding further legal action against it. ⁿ⁷⁸ The threatening party suffers no consequences from sending such letters. Since they are often viewed as aggressive policing tactics, no sanctions are imposed and the threatening party can decide whether or not to pursue legal action. ⁿ⁷⁹ Small businesses are particularly influenced by the potential threat of litigation, which in turn is externalized as a cost to the consumer and the economy. ⁿ⁸⁰

By extrapolating the theory of famous economist Adam Smith, it seems that this externalized cost in trademark bullying creates a barrier to entry, which in turn limits the choices available to consumers. ⁿ⁸¹ It does so by imposing higher costs in the market place, thereby increasing the initial amount of capital investment needed for new market entrants and ultimately limiting the amount of entrants who are capable of success in the market. ⁿ⁸² Cease-and-desist letters specifically impose high costs on businesses, not just in legal fees, but also in time diverted from the [*470] business. ⁿ⁸³ This harms the consumer, because the fewer companies that are in the market, the fewer products that are available to the public, and those available will tend to be of a lower quality. ⁿ⁸⁴ Competition between companies improves the quality of products and lowers prices, because competitors produce better and cheaper goods or services in order to win consumers. ⁿ⁸⁵

In a unanimous decision, the Supreme Court seemed to agree that there were higher costs to a business because of infringement claims and it warned in *Already, LLC v. Nike, Inc.* that litigation produces limitations in the marketplace and that other costs could arise from the threat of trademark infringement:

Charges of trademark infringement can be disruptive to the good business relations between the manufacturer alleged to have been an infringer and its distributors, retailers, and investors. The mere pendency of litigation can mean that other actors in the marketplace may be reluctant to have future dealings with the alleged infringer. ⁿ⁸⁶

In other words, the threat of trademark litigation is effecting the marketplace.

Circumstantial evidence supports the Supreme Court's statement concerning litigation's threatening effect on the marketplace. ⁿ⁸⁷ Within the past decade, the injunctions, attorney's fees, and damages ordered by courts in trademark actions have dropped by approximately ninety-nine percent; however, the number of trademark infringement claims filed is ascending on a yearly basis. ⁿ⁸⁸ This demonstrates that while more cases are being filed, a substantial number of them are being resolved in the pre-litigation stages.

Professors Kenneth Port and Leah Chan Grinvald believe the result of bringing trademark infringement cases is at least in part due to companies' improper desire to expand their market share and thereby impose greater [*471] costs onto the market. ⁿ⁸⁹ The greater market costs are caused by greater legal costs, which companies must calculate as additional investment and may become a barrier to entry for new market entrants. ⁿ⁹⁰ With a higher likelihood that they will have to face legal action to stay in the market, similar to the *Chick-fil-A/Eat More Kale* case above, potential entrants might stay away from the market altogether. ⁿ⁹¹ By dissuading potential entrants, the marketplace is affected, because the market's efficiency will suffer due to less competition and less need to innovate, the market's suppliers will

have fewer individuals to sell to, and the consumer will have fewer choices, thus diminishing the effectiveness of the trademark laws meant to protect those individuals. ⁿ⁹²

After examining how litigious tactics can be used in an attempt to dissuade new entrants into the market, and how the tactics allow current trademark holders to broaden their trademark rights, it becomes apparent how trademark holders can abuse the legal system. It also demonstrates the need to protect alleged infringers from those who use litigation tactics to overstep the boundaries of their trademark protection and force others out of the market. The next several sections of this comment will examine current laws that may limit or discourage trademark bullying in United States, as well as in the United Kingdom.

III. U.S. Trademark Law and the Problem of Trademark Bullying

The first trademark law to consider is the United States' Lanham Act. ⁿ⁹³ The Lanham Act is a federal law that protects both registered marks, under section 1114(a) and (b), and unregistered marks under [*472] section 1125(a). ⁿ⁹⁴ Civil actions are available under either section for trademarks used in connection with goods that are similar enough to another trademark, such that it is "likely to cause confusion or cause mistake." ⁿ⁹⁵ Additionally, under section 1125(c), trademark protection extends to those marks that are "famous" if an infringing party's use makes the mark less distinctive or tarnishes the image associated with the trademark. ⁿ⁹⁶ If a mark likely causes confusion to the market's customers, then a trademark holder can bring a lawsuit for either damages (lost profits and, for exceptional circumstances, treble damages) or an injunction, and on some occasions, parties are awarded costs. ⁿ⁹⁷

Most remedies attempt to compensate the plaintiff by awarding damages to the trademark holder for any loss of exclusivity of the marks and seek to return the trademark holder to the same financial position it would have been in had the defendant-infringer never infringed or never entered the market. ⁿ⁹⁸ For example, the Lanham Act may return to the trademark holder the costs incurred from litigation, profits made by a trademark infringer, and any costs that resulted from the harm done to the trademark holder, such as loss of sales. ⁿ⁹⁹ However, while measuring and granting damages ex post will remedy the plaintiff in some circumstances, [*473] it will not always resolve and remedy disputes, especially those concerning new entrants into the marketplace. ⁿ¹⁰⁰

While the Lanham Act provides for damages after the infringement occurs, it is impossible to measure lost profits if a company is bullied out of the market before it has a chance to accumulate any profits. ⁿ¹⁰¹ Additionally, the target of a trademark holder will not likely be afforded the right to an injunction at law because they are not making claims of infringement or dilution against the trademark bully. ⁿ¹⁰² Generally, the only option for alleged infringers is to seek a declaratory judgment, which may be difficult because the target of a trademark holder usually does not have the necessary financial resources, personnel, or time to maintain such a lawsuit. ⁿ¹⁰³ Furthermore, if an alleged infringer attempts to dismiss a lawsuit against it, there are limited chances for it to succeed because trademark suits contain many questions of fact, which are issues for a jury. Ultimately, the likely end result is a settlement that the alleged infringer was forced into because they were not able to compete with the costs of litigation.

Some trademark bullies mass send cease-and-desist letters without intending to follow up with any formal legal action. ⁿ¹⁰⁴ In such a scenario, the alleged infringer has a few options, but none are ideal. First, the recipient of such a letter could file a lawsuit in order to secure venue or to act preemptively against the trademark holders that sent the letter alleging [*474] their trademark is invalid. ⁿ¹⁰⁵ However, this may not be a smart strategic move because, if the trademark bully was mass sending cease-and-desist letters, it might not know how strong of a trademark infringement case it has against the target. Moreover, by proactively bringing a suit against the trademark bully, who might not have litigated at all, the alleged infringer could potentially be giving notice that it's using the trademark, when it otherwise could have just flown under the radar. ⁿ¹⁰⁶ Second, the receiver of a letter could file a declaratory action against the trademark bully and obtain a court order declaring that they are not infringing on the markholder's trademark. However, this will likely result in a counterclaim for infringement or dilution. Third, the receiver could take no action, otherwise known as the "wait-and-see" approach. If the letter was meritless, this would be the best option. However, lack of merit is difficult to determine beforehand and the letter informs the party of the other's trademark, which, if the alleged

infringer continues to utilize the trademark, the court might later consider willful infringement.ⁿ¹⁰⁷ Moreover, unlike some foreign jurisdictions, United States law does not include a provision governing groundless threats.ⁿ¹⁰⁸ Thus, those living in the United States are limited in their avenues of action against trademark bullies.

While there remain options for alleged infringers to pursue, these options are only plausible for companies and individuals that have been established long enough for their revenues to have steadied and plateaued, and thus have sufficient resources to maintain a legal action.ⁿ¹⁰⁹ Furthermore, while the Lanham Act is predominately favored by those that could maintain a legal action, the protections are still functional to targets of trademark bullies, however a difficulty may arise in assessing damages.ⁿ¹¹⁰ [*475] Since revenues for small businesses have the potential to rapidly expand, justice might not be served if a small business cannot accurately assess what its revenues would be, what internal damages were incurred, or what harm was actually accrued to its small business brand.ⁿ¹¹¹ This lack of valuation is a problem.

The problem is the ability of a trademark holder to bully and abuse an alleged infringer's business with the intention of slowing the expansion of the target company. Litigation imposed on an alleged infringer in this manner could ruin the target of a markholder's business momentum. However, because the trademark bully is usually the one spearheading all litigation efforts, the proper remedy would be a dismissal of the action or a declaratory judgment in favor of the defendant instead of an award of damages.ⁿ¹¹²

Alternatively, an alleged infringer could initiate the lawsuit against the large trademark holder in order to obtain a declaratory judgment, but this is rarely the case.ⁿ¹¹³ While different than the wait-and-see approach previously discussed, it is not a strategic business tactic, especially if the markholder has financial resources at their disposal.ⁿ¹¹⁴ The markholder could draw out a trial and bury the alleged infringer in litigation costs, effectually ruining the alleged infringer.

It may not always be the best idea to initiate litigation, but it is often markholders' chosen tactic to protect their trademark. This is the most [*476] apparent disadvantage of the Lanham Act.ⁿ¹¹⁵ Companies actively police trademarks because it is necessary to keep them distinctive under the Lanham Act.ⁿ¹¹⁶ Allowing others to use a trademark increases the likelihood that the trademark will become generic, which would void protection from the Lanham Act.ⁿ¹¹⁷ Fear of losing protection and reputation creates the necessity to actively police trademarks, thus perpetuating the mindset of sending cease-and-desist letters to similar trademark users.ⁿ¹¹⁸

One such area of trademarks that has particularly active policing is product design. Because there are a tremendous amount of knock-off products in the market, it is often necessary for product designers to remain proactive in prohibiting individuals from copying the exact designs of a trademark.ⁿ¹¹⁹ The following case demonstrates an example of how Nike, Inc. acted in accordance with this active policing approach for its Air Force 1 trademark.

In *Already, LLC v. Nike Inc.*, Nike sued under Lanham Act section 1114(a) for infringement and section 1125(c) for dilution of Nike's Air Force 1 trademark.ⁿ¹²⁰ Already, LLC ("Already") defended its trademark by arguing that Nike's trademark was invalid, and in return, Nike offered a settlement as long as Already signed a covenant not to sue.ⁿ¹²¹ The case settled four months after Already counterclaimed arguing invalidity of Nike's trademark, but there was no decision reached as to the validity of the Air Force 1 trademark.ⁿ¹²²

While Nike's actions were ostensibly suspicious, the settlement prevented the court from looking into the validity of Nike's trademark by rendering the case moot. Already's decision to settle allowed Nike to slip through the cracks and continue using its mark in association with its product and to continue bullying other companies.ⁿ¹²³

[*477] This action demonstrates one of the problems associated with the Lanham Act and current American trademark law: large companies can buy their way out of a lawsuit or intimidate their competitors into submission.ⁿ¹²⁴ Nike's financial strength was its greatest tool in this case and exemplifies that a markholder can hold the threat of litigation over others' heads.ⁿ¹²⁵ By buying Already's option to bring suit, Nike proved that trademark bullying could

extend beyond the confines of the courtroom.ⁿ¹²⁶ Additionally, Nike will likely remain protected, because no other individuals will likely want to engage in a lawsuit with Nike, one of the largest athletic brands in the world.ⁿ¹²⁷

Overall, the Lanham Act presents a problem because it provides a cure or "remedy" after an injury has already occurred.ⁿ¹²⁸ Thus, an alleged infringer is more likely to concede to a settlement than to fight for their trademark, because of coercive pressure that is exerted onto the alleged infringer from a disparity in financial leverage.

IV. Alternative Trademark Theories

The next two sections will address theoretical acts of law that could address some of the concerns derived from the disparity in financial leverage between trademark holders and their potential targets. Neither [*478] have been adopted at this point in time, but either one would help to dissuade large trademark holders from acting like bullies.

A. The Small Business Trademark Protection Act

The Small Business Trademark Protection Act ("SBTPA") was proposed by the William Mitchell College of Law to Minnesota State legislators,ⁿ¹²⁹ and was created to give smaller businesses an alternative to litigation.ⁿ¹³⁰ SBTPA requires settlement conferences as a primary method for settling disputes between trademark holders.ⁿ¹³¹ Either party to the dispute can invoke a settlement conference after receiving a cease-and-desist letter.ⁿ¹³² In the settlement conferences, an administrative law judge oversees the parties' dispute.ⁿ¹³³ If proceedings continue after the settlement conference, the administrative judge has the authority to make declarative judgments on undisputed matters in order to expedite trial proceedings.ⁿ¹³⁴ Furthermore, the proposed statute imposes a penalty on those who sent cease-and-desist letters without participating in a settlement conference.ⁿ¹³⁵ This penalty attempts to discourage trademark bullies from casually or aimlessly [*479] sending cease-and-desist letters without any intention to materialize the threats.ⁿ¹³⁶

In principle, this proposed legislation would place the target of a trademark holder in a better position by reducing the costs of initial negotiations between the parties and by removing the disparity in bargaining power between the parties.ⁿ¹³⁷ By removing the costs of litigation, the costs imposed on new market entrants are lessened, thus more entrants will be able to remain in the market, ultimately benefiting the consumer.ⁿ¹³⁸ Due to the mandatory settlement conferences, alleged infringers' concerns about litigation costs will decrease and trademark bullies will become less successful in their overactive policing efforts.ⁿ¹³⁹ This will reduce the coercive effect of overactive policing, even though some proactive policing will continue.ⁿ¹⁴⁰

While many of the provisions dissuade trademark holders from bullying others in order to prevent litigation, uncertainties remain in cases where the conflict does result in litigation.ⁿ¹⁴¹ If the parties do not agree to anything during the negotiations, then the time and money spent to prepare for the settlement conference is wasted, for it is likely that only minimal benefit resulted from the discussions, except for possible declaratory non- [*480] issue matters decided by the mediator.ⁿ¹⁴² The negotiations will lead to litigation, which will most likely end with the alleged infringer settling the matter.ⁿ¹⁴³ A markholder that is willing to hold out during negotiations would render SBTPA an insufficient protection against trademark bullying.ⁿ¹⁴⁴

Still, while it is not perfect, the Small Business Trademark Protection Act, if enacted, is a step in the right direction. However, it does not solve all of the problems associated with trademark bullying. By adding to the Small Business Trademark Protection Act and addressing the potential "timeliness problems,"ⁿ¹⁴⁵ this law could significantly improve current trademark jurisprudence.

B. The Trademark Fair Use Reform Act

William McGeeveran's Trademark Fair Use Reform Act is an alternative proposal to consider.ⁿ¹⁴⁶ According to McGeeveran, there are three main ways to reform trademark fair use: (1) focusing on the reduction of administrative costs, (2) creating clearly stated rules, rather than general standards, and (3) adding defenses or exemptions independent

from the prima facie liability requirements.ⁿ¹⁴⁷ All three changes seek to increase competition between companies, which benefits consumers. Currently, companies are stifled because the current state of the law imposes great barriers in the marketplace.ⁿ¹⁴⁸

[*481] McGeeveran seeks to amend the Lanham Act by adding exclusions for dilution and categorical exemptions for both trademark dilution and infringement.ⁿ¹⁴⁹ If adopted, a court would only need to determine if the conduct or the actions of the alleged infringer were either exempted or controlled by a safe harbor provision.ⁿ¹⁵⁰ This would be an effective approach because - although not necessarily deterring bullying - it would streamline the trademark system for exempted or safe harbored infringement actions.ⁿ¹⁵¹ As a result, filed infringement actions would likely decline because legal threats would be less imminent, as long as the alleged infringer could prove their mark falls into an exemption or safe harbor.ⁿ¹⁵² While these provisions would be a vast departure from the current trademark system, it would meld well with the underlying policies of the current statutory scheme through a reduction of ambiguity and an increase in court efficiency.ⁿ¹⁵³

Although these proposals would help small businesses by reducing administrative costs and adding protection, the parties still must go to court because both of these rules are dependent on the court reaching a solution.ⁿ¹⁵⁴ While the process might be shorter and less costly to small business owners, the problem of intimidation and the disparity of leverage between the parties still exists.ⁿ¹⁵⁵ The mere threat of litigation could stop companies from pursuing business opportunities or pressure them to submit to settlement.ⁿ¹⁵⁶ To address this issue, small businesses need a way to side-step litigation or obtain a declaratory judgment in an expedited proceeding.

While many of the above proposals have beneficial components, it is apparent that none of them are completely effective. However, while there is no perfect domestic solution, many of the above proposals could be improved by incorporating elements of British trademark law. The United Kingdom has passed legislation designed to discourage and eliminate trademark bullying that is worth examining.

[*482]

V. Current United Kingdom Laws Protecting Against Trademark Bullying

The United Kingdom and Australia have stronger trademark rights for protecting small businesses than the United States.ⁿ¹⁵⁷ However, because both statutes are very similar, this comment will only analyze the United Kingdom Trade Marks Act of 1994.

The Trade Marks Act of 1994 defines a trademark as "any sign capable of being represented graphically which is capable of distinguishing goods or services of undertaking from those of other undertakings."ⁿ¹⁵⁸ The law does not prevent a property or legal right if the mark is unregistered.ⁿ¹⁵⁹ Similar to the Lanham Act, the United Kingdom uses a likelihood of confusion test in order to protect only those markholders that have distinctive marks.ⁿ¹⁶⁰

Additionally, trademark defenses are similar in the United Kingdom to the United States. The Lanham Act's fair use defense, in which a third party may use a descriptive term (even if similarly situated with another's trademark), reads: "party's individual name in his own business, of the name of anyone in privity with such party, or of a term or device which is descriptive of and used fairly and in good faith only to describe the goods or services of such party, or their geographic origin."ⁿ¹⁶¹ The United Kingdom statute similarly states that a third party may use another's trademark without legally infringing on the markholder's rights if the third party's use would be of "his own name or address, the use of indications [*483] concerning the kind, quality, intended purpose, value, geographical origin, or other characteristics of the goods or services, and the use of the trademark where it is necessary to indicate the intended purpose of a product or service."ⁿ¹⁶² These two provisions are nearly identical. Furthermore, similar remedies are available in the United Kingdom's courts where the markholder may be granted damages, injunctions, accounts or other remedies in respect to the infringement of any property right.ⁿ¹⁶³

One major departure from United States law is the common rule of the United Kingdom concerning attorney's fees. Fees are shifted to the losing party, which differs from the "American rule," in which statutes or contracts are the circumstances required for attorney's fees under United States law.ⁿ¹⁶⁴ The possibility of paying significant attorney's fees should discourage frivolous litigation threats.ⁿ¹⁶⁵

While the trend in the United States is to promote mandatory settlement conferences to encourage resolution before trial, similar pretrial procedures are not mandatory in the United Kingdom.ⁿ¹⁶⁶ Parties have the option of settling before trial, but the attempts are not compulsory and are less effective without a judge present.ⁿ¹⁶⁷

Specifically in respect to protecting small businesses, the United Kingdom has one provision that overshadows the protections granted under the Lanham Act. Section 21 of the Trade Marks Act of 1994 is a provision specifically directed at parties sending groundless threats.ⁿ¹⁶⁸ According to [*484] L'Oreal (U.K.) Ltd. v. Johnson & Johnson, a groundless threat will not occur as long as a real issue of fact remains and the declarant has a real interest in the outcome.ⁿ¹⁶⁹ Only requiring proof of a real issue of fact and a real interest make the barrier of "good faith" easy to overcome.ⁿ¹⁷⁰

Similar to the occurrence of trademark bullying in the United States, cease-and-desist letters are the common way to initiate groundless threat actions in the United Kingdom.ⁿ¹⁷¹ Cease-and-desist letters are not the only means of starting a groundless threat action, however, as any type of oral or written communication meant to intimidate or make known that litigation is a viable avenue of action can be considered a groundless threat.ⁿ¹⁷² For example, in Prince Plc. v. Prince Sports Group Inc. the court found that a principal letter indicating interest in litigation constituted a threat, and that a company could not retrospectively withdraw the threat through subsequent letters.ⁿ¹⁷³ The provision disallowing withdrawal of threats holds companies accountable for their actions and forces potential issuers of cease-and-desist letters to think twice before sending them.ⁿ¹⁷⁴

Under section 21 of the Trade Marks Act of 1994, remedies are available when "a person threatens another party with proceedings of infringement of a registered trademark."ⁿ¹⁷⁵ Anyone who is an "aggrieved party" may bring an action.ⁿ¹⁷⁶ An "aggrieved party" is defined in Jaybeam Ltd. v. Abru Aluminum Ltd., as a party "likely to be adversely affected in a real as opposed to a fanciful or minimal way."ⁿ¹⁷⁷ The remedies available to aggrieved parties that bring actions are limited to declaratory statements that the threats are unjustified, injunctions against the continuation of threats, and damages equivalent to any loss sustained as a result of the threats.ⁿ¹⁷⁸

The purpose behind this section of the Trade Marks Act of 1994 is to provide relief from actions, whether they are ex ante or ex post.ⁿ¹⁷⁹ By [*485] obtaining a declaratory judgment, a targeted party can take preemptive action to protect against trademark bullies, and by obtaining damages a targeting party can reimburse a party for any damage incurred due to the threat of a trademark infringement action.ⁿ¹⁸⁰ Furthermore, an injunction prohibiting the continuance of unjustifiable threats can be used preemptively in reaction to an initial cease-and-desist letter and act almost like a declaratory action, but can also act as a defense to prevent future actions of bullying from markholders.ⁿ¹⁸¹

The main advantage of injunctions and declaratory judgments is that the targeted party does not have to wait-and-see, but can instead be proactive.ⁿ¹⁸² The main concern of litigation is time, because both trial preparation and procedure are extremely time-consuming. A targeted party, especially if it is a small business, may not have the workforce to stay in business and simultaneously prepare for trial. However, the sections providing for declaratory actions and injunctions may grant parties more strategic tools and potentially help them to receive judgments expeditiously to prevent the stagnation of small businesses.ⁿ¹⁸³

The provision on groundless threat actions strongly advocates a "sue-first, talk-later" attitude, because threatening trademark companies sue rather than wait for a declaratory judgment or other action in response to [*486] cease-and-desist letters.ⁿ¹⁸⁴ If the threatening party sues the targeted party first and only then starts negotiations, the targeted party has no power to utilize the preemptory provisions.ⁿ¹⁸⁵ Therefore, the threatening party can force the

targeted party into the courtroom and the targeted party will have no recourse but to submit to litigation or to accept an offer if the parties negotiate and settle.ⁿ¹⁸⁶ This poses a similar problem to some provisions in the Lanham Act.ⁿ¹⁸⁷ Trademark bullies, which are usually large companies with multiple trademarks, often attack and threaten alleged infringers who have a legal right to use their trademarks, but are intimidated by the markholders' threats.ⁿ¹⁸⁸ Moreover, based on the sheer inequality of power between the parties, the smaller alleged infringer will likely submit to the settlement offered by the markholder.

Additionally, this "sue-first, talk-later" approach seems to contrast with the main policy consideration of resolving disputes amicably before reaching litigation proceedings.ⁿ¹⁸⁹ Where one could initially send a cease-and-desist letter in order to notify another of a company's trademark and start amicable discussions to settle or avoid litigation, this process is removed.ⁿ¹⁹⁰ A trademark holder will get around the "sue-first, talk-later" approach through initiating litigation and will be able to leverage the intimidation that comes along with such a threatening action.ⁿ¹⁹¹ Usually, an individual receiving a cease-and-desist letter has the choice to bring a lawsuit first, if they choose to, and has the advantage of choosing venue. However, by serving the [*487] alleged infringer, a trademark holder can circumvent the issue of another party choosing venue. With this circumvention of amicable discussion, a trademark holder can use intimidation and threats to change the procedures of these actions to become more heavily based on the pre-litigation stage. A major departure such as this potentially could change mindsets towards litigation, such as the traditional desire to avoid litigation, or drive small companies to sue trademark holders early-on to make certain they have a right to use their trademark, rather than being hauled into court in a foreign jurisdiction. However, this does not seem to create an entirely negative result. Some uncertainty in litigation will effectively be removed since trademark holders may establish a new norm on dealing with trademark litigation, however it does not necessarily follow that the removal of uncertainty is beneficial.ⁿ¹⁹² While this statute has effectively eliminated the problem of aimless cease-and-desist letters, it has also created a "sue-first, talk-later" mentality.ⁿ¹⁹³

Therefore, as with the domestic proposals previously examined, the United Kingdom model is not sufficient to resolve the problem associated with trademark bullying on its own. The provision on groundless threat actions might be sufficient if more is added to protect small business holders and if the problem of the "sue-first, talk-later" approach can be removed. The next section will propose legislation that can remove the "sue-first, talk-later" approach, but keep the protection from groundless threat actions. Thus, it aims to combine the best aspects of all the incomplete proposals above, as well as some additional ideas, in order to create a more effective statutory model.

[*488]

VII. Proposal for a Trademark Bullying Statute

The current status of trademark statutes in the United States, as well as the United Kingdom, is inadequate to protect of the rights of a small business trademark holder. By looking to the various statutes created to protect trademark rights and compiling them into a single law, one could create a new statute that would adequately protect the interests of a target of a trademark bully.ⁿ¹⁹⁴

Ultimately, the purpose of this proposed statute is to give an alleged-infringer the option to seek a mediator before a claim is filed.ⁿ¹⁹⁵ By creating an avenue that potentially circumvents litigation, a targeted party will likely choose to pursue the alternative rather than let the threatening trademark holder intimidate or coerce them into ceasing use of the trademark.ⁿ¹⁹⁶

Attached at the end of this comment is a proposed statute, entitled the Prevention of Overreach through Litigation Tactics Act ("POLTA").ⁿ¹⁹⁷ This proposed statute is in the form of an American federal act that will help protect the target of a trademark bully by eliminating the "sue-first, talk-later" problem associated with the United Kingdom trademark act as well as creating preemptive measures lacking from the current United States law.ⁿ¹⁹⁸

Under POLTA, either party may opt-in to a pre-filing settlement conferenceⁿ¹⁹⁹ when a trademark holder alleges

infringement of a trademark [*489] through either oral or written statements.ⁿ²⁰⁰ If either party opts-in the pre-file settlement conference becomes mandatory and will commence within 45 days of the targeted party's notification to the threatening party that they opted-in.ⁿ²⁰¹ This provision provides preemptive remedies similar to the groundless threat sections contained in both of the Trade Marks Acts.ⁿ²⁰² Under the Trade Marks Acts of 1994 and 1995, a threatening party could circumvent the preemptive provision by simply forcing the party into litigation before threatening action.ⁿ²⁰³ However, under section 3, subdivision 1 of POLTA, even if a threatening party initiates litigation, the targeted party can act by requesting that mediation occur before the litigation may proceed.ⁿ²⁰⁴ By granting a targeted party this option, even after litigation proceedings have begun, and by mandating that parties participate in mediation before a lawsuit can continue, false or groundless threats should reduce and would likely cease altogether.ⁿ²⁰⁵ If a party brings a groundless threat, the case will ultimately end in mediation, where the mediator will have the power to bring judgment and award remedies to the targeted party.ⁿ²⁰⁶ The combination of these provisions should be sufficient to decrease the number of false threats, because going to mediation and splitting costs will grant the target of a trademark holder an opportunity to be heard rather than be forced into settlement.ⁿ²⁰⁷ This effectively removes the potential intimidation, coercion, and tremendous leverage that markholders have over alleged infringers.

Another important provision of POLTA imposes punitive measures onto the threatening party if the party does not attend a pre-filing conference after threatening a party with litigation, or if a threatening party sends an unspecific cease-and-desist letter.ⁿ²⁰⁸ The purpose of this provision is to impose punitive measures on those parties that send cease-and-desist letters without substantiating the reasons for such actions or [*490] those that send letters purely to intimidate alleged infringers. The requirement forces threatening parties to articulate valid reasons for the threat or else subject themselves to penalties for attempting to unjustly broaden their trademark protection in the marketplace.ⁿ²⁰⁹

In certain situations, a party from out of state may be unable to appear before the court, whereas the mediator should consider such circumstances when deciding whether to impose punitive measures. The timeliness of the procedure makes this a potential concern, but a party subjecting themselves to the jurisdiction of the state should anticipate such a situation.

The last important provision of POLTA differs from all of the previously mentioned statutes in that it concerns a policy that will allow a good faith user to retain profits earned during negotiations.ⁿ²¹⁰ Under this section, a party that uses a trademark in good faith will not have their profits disgorged by the continuous use of the trademark during mediation.ⁿ²¹¹ Good faith under POLTA requires that the party will not attempt to use the mark to be associated with a trademark holder's goods or services, or use a mark to take advantage of the goodwill of a trademark. This provision's policy is to allow a trademark holder's target to continue normal business operations without suffering stagnation caused by the alleged infringing action. While this provision may be subject to abuse, it is unlikely, because if a mediator finds that the alleged infringer is willfully riding-off the goodwill of the trademark holder threatening suit, he or she has the discretion to impose punitive damages on the target in the form of treble damages of profits.ⁿ²¹²

Admittedly, there are disadvantages associated with this proposal. First, this proposed statute extends the process before which a trial court could affirm the pre-file settlement conference decision.ⁿ²¹³ If this procedure becomes compulsory, then, for anyone who takes advantage of the pre-filing settlement discussions, the trial process will be extended at least 45 days before a court with jurisdiction can make a binding judgment. In terms of the overall time litigation consumes, this is a negligible amount, however it may still be a concern if parties want disputes to be finalized as soon as possible.

[*491] Second, if a trademark holder's target does not have a rightful claim to use a trademark but forces a threatening trademark holder to go through the procedures of POLTA, the trademark holder may have his trademark "appropriated" for several months.ⁿ²¹⁴ Because the process is mandatory if opted-in to, both parties must complete all pre-file procedures before an action is brought to court. While the process is long and "appropriation" is possible, it is more likely the mediator would catch cases of blatant infringement and recommend appropriate damages and punitive measures to courts.ⁿ²¹⁵

Third, because both parties are responsible for their own discovery, the disparity of leverage between the parties still exists.ⁿ²¹⁶ Since either party may choose to spend different amounts of time and money on discovery, large company markholders would have an obvious advantage. While this continues to produce a disparity between the parties, the one threatening trademark infringement would still be required to show a real interest and harm incurred from the infringement. If evidence or interest or harm does not exist, the leverage disparity will not affect the target of a trademark holder. Additionally, because a target of a trademark holder can retain profits if use of the trademark is in good faith, alleging trademark holders will be incentivized to find a balance between offering sufficient evidence to prove infringement and keeping their argument concise so that the negotiations are not overly extensive.ⁿ²¹⁷ Therefore, while there is potential for abuse, it is unlikely and if the actions amount to trademark bullying, the mediator would likely become aware of it before a lengthy negotiation would occur.

Fourth, the proposal calls for mediation, which results in removing actions from the court system.ⁿ²¹⁸ This unique construct could cause procedural problems if not supported by the legislature. Mandatory mediation is a construct that is generally accepted in instances of violence, or a peril that requires urgent need and is regarded as being a denial of [*492] justice.ⁿ²¹⁹ Cases with this type of procedure usually involve family law (divorce and custody), collective bargaining contracts, community development, and small claims, and are all backed by strong policy.ⁿ²²⁰ However, public policy also shows that trademark bullying cases are likewise better left to mediation than litigation.ⁿ²²¹ Even during mediation, the "alleged infringer" is at a disadvantage since either party may bring in all evidence at their own expense. Trademark bullies could potentially take advantage of this and produce substantial data against an alleged infringer.ⁿ²²² It is likely that this will not substantially affect the proceedings because a small business will not have a substantial amount of evidence to bring forth, thus making it cost effective on their part. Large trademark holders may bring as much evidence in as they desire, however, they will need to keep in mind how much the case is worth to them, as well as, how much evidence the alleged infringer needs to produce to demonstrate it has a rightful use to using a trademark. Mediation in this instance would act to dissuade a large company from bringing disputes without merit for [*493] they might spend more in costs than they could extort from a potential license, thus making a lack of financial resources no longer an issue.

Lastly, mediation might not be sufficiently coercive, because it is not binding. However, by creating more barriers and obstacles to impede those who have fruitless claims, this strategy will prevent trademark bullies from sending frivolous letters without any intent to pursue their claims. Some might criticize this proposal as merely extending and increasing the cost of litigation by paying for several stages before ultimately arriving in court. However, the use of settlement conferences before trial promotes policies of efficiency and expediency in resolving disputes between parties. Mediation and settlement conferences force the idea that alternatives to litigation are possible, as well as allow both parties to express their views concerning the dispute on a faster timeline than the litigation system.

While this statute may risk occasional abuses, the benefits far outweigh the possibility of abuse. The statutes currently in force are subject to greater abuse than POLTA.ⁿ²²³ By enacting a cheaper alternative for targets of trademark holders, there is a higher likelihood for protection of the valid trademarks and business ideas that would otherwise be intimidated into submission. The relatively low risk for abuse is outweighed by the utilitarian benefit to consumers due to the increase of business ventures and alternatives in the marketplace.ⁿ²²⁴

Overall, POLTA attempts to combine the best provisions of trademark protection laws worldwide. It aims to grant preemptive measures and to remove the "sue-first, talk-later" approach that circumvents the protections of the United Kingdom Trade Marks Act. While there is possibility for abuse, the potential benefit greatly outweighs the potential abuse.

VIII. Conclusion

In conclusion, after comparing United States federal and state statutes, proposed legislation, and United Kingdom trademark laws regarding trademark bullying protection, it is clear that the United States has not done enough to deter trademark holders from overreaching and expanding their market share through unfair litigation tactics. In fact, the

Lanham Act ensures that companies will continue to act proactively by sending [*494] cease-and-desist letters because there is little recourse for alleged infringers for such acts. ⁿ²²⁵

By adopting the statute recommended in this comment, a new substantive right of action will be created that will remove the "sue-first, talk-later" approach associated with these statutes, similar to both the Trade Marks Act 1994 and the Trade Marks Act 1995. ⁿ²²⁶ By creating a federal action for these preemptive measures, trademark holders that send groundless cease-and-desist letters will be held accountable. ⁿ²²⁷

Enacting this law will prevent trademark holders from acting aggressively, thereby reducing the false accusations of trademark holders and removing the tremendous disparity of leverage between the trademark holders and alleged infringers. ⁿ²²⁸ Providing targets of trademark holders an avenue to pursue lawsuits will be a significant improvement to the current federal statutory scheme, and is necessary so that targets can have their voices heard and their business's protected.

[*495]

VIX. Appendix: Proposed Legislation

A bill for an act relating to trademarks; enacting the Prevention of the Overreach Through Litigation Tactics Act; proposing new legislation containing provisions for timely mandatory pre-file settlement conferences, penalty damages available for nonspecific cease-and-desist letters, post-litigation procedures for mediation, and broad standing for any parties aggrieved by threat actions.

Be it Enacted by the Legislature of the United States.

Section 1. The Prevention of the Overreach through Litigations Tactic Act is created for the protection of small businesses, from trademark bullying or intimidation through the use of disparity of leverage of larger businesses, through mandatory pre-file settlement procedures.

Subdivision 1. Trademark bullying. "Trademark bullying" as used in all sections means the practice of a trademark holder using litigation tactics to harass and intimidate other businesses in an attempt to extend their trademark rights beyond the interpretation of what the law would reasonably allow.

Subdivision 2. Trademark dispute. "Trademark dispute" as used in all sections means the preliminary action of a trademark holder initiating contact with another party alleging infringement of a trademark; including initiation through cease-and-desist letters, and oral or written communication between the parties.

Subdivision 3. Groundless threat. "Groundless threat" as used in all sections means the intimidation or use of litigation tactics unaccompanied by specific articulable instances of infringement of an owned trademark. Examples include but are not limited to cease-and-desist letters and communication between both parties concerning the cessation of a trademark.

Section 2. Pre-file Settlement Conference

Subdivision 1. Initiation. Any party affected by a trademark dispute has the option to opt-in to a settlement conference. Upon the request of any party to a trademark dispute, the parties shall seek a mediator using the procedures provided in this article. Pre-file settlement conferences are mandatory before trial is available if either party opts-in.

[*496] Subdivision 2. Purpose. A pre-file settlement conference is for the primary purpose of assisting both parties to attain a quick resolution to a trademark dispute and to provide smaller companies an opportunity to have their case pleaded without the threat of significant attorney's fees.

Subdivision 3. Request for Preliminary Judgment. After the mediator or both parties come to a resolution that the action presented is not a groundless threat, either party may request a non-actionable judgment by the mediator. The mediator has the authority to state his judgment concerning preliminary facts and if the action is appealed to a trial court, the court appealing the matter should review the mediator's suggestion.

Subdivision 4. Procedures. All parties shall attend or be represented at the pre-file settlement conference. Parties attending shall be prepared to make reasonable attempts to settle the trademark dispute. A pre-file conference must be initiated within 45 days after the request of a pre-file settlement conference has been delivered to the other party in the dispute.

Subdivision 5. Information provided. All parties attending the settlement conference shall be prepared to discuss all matters relevant to the trademark dispute. In preparation of the pre-file settlement conference, both parties may provide all information they deem necessary or helpful in proving their case at their own cost. Parties may provide information relating but not limited to expert testimony, surveys of consumer impressions, industry practice standards, and evidence of trademark use in commerce.

Subdivision 6. Orders. If, following the pre-file settlement conference, all parties have not come to an agreement but have agreed on an issue of fact or any other issue, the mediator may submit an opinion to the court confirming the matters agreed between the parties. If both parties agree, the mediator may submit a ruling on the matter confirming a preliminary judgment based upon the information presented before him. This preliminary ruling will be given deference if the trademark dispute continues to trial.

Subdivision 7. Penalties. Penalties shall be imposed on those that act contrary to the purpose of this enactment. Penalties are as follows:

(a) if the party alleging trademark infringement refuses to participate in the settlement conference aforementioned in this article; or

(b) the party alleging trademark infringement sends a cease-and-desist letter without substantiating specific instances of infringing conduct by the alleging party,

[*497] that party is liable for a fine of \$ 1,000 dollars and all costs incurred by the other party including loss of revenue or costs in preparation for mediation.

Subdivision 8. Remedies. If both parties are in agreement and the mediator issues an opinion that the cease-and-desist letter is a groundless threat and an act of trademark bullying, an opinion may be submitted to the court confirming and adjudging in favor of the defending party. The following remedies shall be available to be chosen by the mediator, who has discretion to determine what is proper given the current circumstances, to be issued to the targeted party:

(a) a declaratory judgment that the threats are unjustifiable;

(b) an injunction against the continuance of threats; or

(c) damages sustained from the groundless threat, including court costs, attorney's fees and treble damages, shall be available if the threatening party's actions are found to be willfully and knowingly groundless.

Any appeals of this decision are to be submitted to any district court within 50 miles of the mediation venue.

Subdivision 9. Collection. If the mediator issues an opinion and the losing party does not submit to the opinion of the mediator, the mediator's opinion shall be brought forth to an appropriate venue where a judgment may be issued and

proper collective proceedings initiated.

Subdivision 10. Profits made during negotiations. Any profits realized by the alleged infringing business will not be disgorged from the business for any profits realized up until an opinion is made by the mediator, unless the alleged infringing company acts with unreasonable delay in the pre-file settlement conference or is found to be willfully and knowingly infringing. The mediator has the authority to issue an opinion concerning unreasonable delay or willful and knowing infringement by either party. If the party is found to be willfully and knowingly infringing the trademark, treble damages may be issued measured by the profits realized.

Subdivision 11. Standing requirement. Any party that is aggrieved by the sending of the cease-and-desist letter will have standing to assert the mandatory pre-file settlement conference between the parties or to bring [*498] countersuit against the trademark holder who sent the cease-and-desist letter for purposes of a declaratory statement that demonstrates the legal usage of the alleged infringing trademark.

Subdivision 12. Cost of pre-file settlement conference. The cost of the pre-file settlement conference is to be split evenly between both parties, unless the mediator or judge orders otherwise.

Subdivision 13. Cease-and-desist letter requirement.

(a) All cease-and-desist letters involving a trademark dispute sent by an individual in United States must contain the following conspicuous statement at the beginning of the cease-and-desist letter:

"All parties named in this letter may exercise their right to a mandatory pre-file settlement conference regarding this trademark dispute to a mediator of both parties choosing, with costs to be split evenly amongst all parties, unless the mediator judges otherwise."

Section 3. Litigation initiated.

Subdivision 1. If litigation has already initiated and the issue in dispute concerns the extension of protection between either party's trademark, either party may request the action to be transferred to a mediator, who may judge whether the trademark user with senior priority is being infringed, before litigation is resumed.

Section 4. Effective date.

Subdivision 1. The effective date of this act is to start 120 days after voted in by the United States legislature.

11:20 AM), <http://www.grubstreet.com/2013/12/exit-6-missouri-starbucks.html>.

n2. Federal and state trademark law uses a likelihood of confusion test because owners can hold the same trademark in different products as long as there is no confusion, i.e. Bentley cars and Bentley lumber. Many different circuits have developed their own formulations of what determines a likelihood of confusion, but one of the first formulations was developed in the *Polaroid Corp. v. Polorad Electronics Corp.* case. *Polaroid Corp. v. Polorad Electronics Corp.*, 287 F.2d 492, 495 (2nd Cir. 1961) (A likelihood of confusion's success is based on the following factors: (1) the strength of his mark, (2) the degree of similarity between the two marks, (3) the proximity of the products, (4) the likelihood that the prior owner will bridge the gap, (5) actual confusion, (6) the reciprocal of defendant's good faith in adopting its own mark, (7) the quality of defendant's product, and (8) the sophistication of the buyers); see also *AMF, Inc. v. Sleekcraft Boats*, 599 F.2d 341, 348-49 (9th Cir. 1979) (To determine confusion between related goods, the following factors are relevant: (1) strength of the mark, (2) proximity of the goods, (3) similarity of the marks, (4) evidence of actual confusion, (5) marketing channels, (6) type of goods and the degree of care likely to be exercised by the purchase, (7) defendant's intent in selecting the mark, and (8) likelihood of expansion of the product lines).

n8. *Id.* at 665-66.

n9. *Id.* at 672-74.

n10. Overactive policing is not uncommon because it is an easy method for an individual to protect their trademarks, however, it is arguably a necessary task to protect a trademark considering the uncertain protections of the current trademark regime. In fact, the uncertainty in trademark rights allows dilution actions to be brought by individuals who are not in the same market or dealing with the same products/services as an alleged infringer because these actions do not require competition or evidence of confusion or passing off, making the rights of a famous mark unreasonably broad. *Id.* at 640-45.

n11. *Id.*

n12. The term "markholders" will be used synonymously with "trademark bully," "trademark owner," and "markholder." "Markholders" is a term of art designated to refer to the owner of a trademark. See generally Lisa P. Ramsey, Brandjacking on Social Networks: Trademark Infringement by Impersonation of Markholders, 58 *Buff. L. Rev.* 851 (2010).

n13. Targets of markholders will hereinafter be referred to as "accused infringer," "target of a trademark holder," or "targeted party." These terms refer to the party or individuals who are being "bullied" or harassed by companies through the sending of cease-and-desist letters and unethical, yet legal, groundless litigation tactics to persuade the "target" from continuing use of their trademark.

n14. Grinvald, *supra* note 7, at 642.

n15. *Id.* at 645-51; see, e.g., Kirk Carapezza, Chicken Vs. Kale: Artist Fights Chick-Fil-A Suit, NPR, Dec. 6, 2011, <http://www.npr.org/2011/12/06/143195033/chicken-vs-kale-vt-artist-fights-chick-fil-a-suit>; Pete Mason, The Difference Between "Eat More Kale" and "Eat Mor Chikin," Huffington Post, May 3, 2012, http://www.huffingtonpost.com/pete-mason/eat-more-kale_b_1469661.html. In this circumstance, Chick-fil-A was attempting to maintain an overly broad interest in their trademark "Eat More Chicken" by claiming infringement of the mark "Eat More Kale." The context of this threat of legal action attempts to extend the rights of the Chick-fil-A trademark to essentially "Eat More" which is too descriptive and broad of a term to deserve trademark protection.

n16. Grinvald, *supra* note 7, at 664.

n17. Grinvald, *supra* note 7, at 665-66.

n20. *Id.*

n21. See *Mil-Spec Monkey, Inc. v. Activision Blizzard, Inc.*, No. 3:14-cv-02361-RS, 2014 WL6655844 (N.D. Cal. Nov. 24, 2014) (Seeborg, J.) (where a district court granted summary judgment in favor of a video game publisher that had used a military patch design in a military combat-themed video game, citing earlier precedent that video games qualify as expressive works entitled to the protections of the First Amendment); *Lyons P'ship v. Giannolous*, 179 F.3d 384, 390 (5th Cir. 1999) (where the satirical or parodic use of a trademark will likely influence a court's decision in determining customer confusion of the use, however, the strength of the mark might make it easier for an audience to understand the use is satirical or a parody).

n22. See *Abercrombie & Fitch Co. v. Hunting World, Inc.*, 537 F.2d 4, 9 (1976) (demonstrating the spectrum of "distinctiveness," or essentially what makes the mark itself different than other producers of goods, as a tiered system of generic, descriptive, suggestive and arbitrary or fanciful).

n23. Throughout this paper, policing efforts of trademark holders will be discussed and should be understood to be a balancing approach. On the one hand, a trademark holder must actively police their trademark so that it will not become generic, in order to maintain the protections afforded trademarks under the Lanham Act. On the other hand is the overactive policing of trademark bullies who use similar trademark efforts to expand their trademark protections beyond what should be allowed for the trademark. See Deven R. Desai & Sandra L. Rierison, *Confronting the Genericism Conundrum*, 28 *Cardozo L. Rev.* 1789, 1793-97 (2007) (stating that the 15 U.S.C. § 1127 of the Lanham Act requires self-policing of marks in order to maintain their source-identifying purpose, otherwise the mark may be deemed to be abandoned, in which case all protections of trademark law would disappear).

n24. Jolie Lee, Starbucks responds to Dumb Starbucks in L.A., USA Today, Feb. 11, 2014, <http://www.usatoday.com/story/news/nation-now/2014/02/10/dumb-starbucks-parody-free-coffee/5357597/>.

Jacobson Prods. Co., Inc., 514 U.S. 159, 163-64 (1995).

n32. See 15 U.S.C. § 1127; Overview of Trademark Law, <https://cyber.law.harvard.edu/metaschool/fisher/domain/tm.htm>.

n33. Where the original intention was for the purpose of determining a quality product, the same reason exists today to determine if the product has a reliable quality and whether the product was adequate for the needs of the consumer. See Chapter 2. The History and Development of Trademark Law, Section 1: The History of Trademark Law, Dec. 25, 1999, at 1, available at <http://www.iip.or.jp/translation/ono/ch2.pdf>.

n34. See 15 U.S.C. §§1114, 1125(a). Since not all trademarks are held by registered markholders, third parties may not know the scope of their trademark rights until a lawsuit is filed. This creates an incentive for markholders to send cease-and-desist letters to anyone that uses identical or similar marks, regardless of whether the goods or services are related, and regardless of whether the parties are in direct competition. This perpetrates a pro-litigation attitude. See also Report to Congress, *supra* note 31 (citing *Esquire, Inc. v. Esquire Slipper Mfg. Co., Inc.*, 243 F.2d 540, 545 (1st Cir. 1957), where an owner's zealous enforcement of its trademark may not have been justified by the intrinsic strength of the trademark, but rather was borne by the owner's enthusiasm and not an attempt to unjustly defend and overly extend the rights in the trademark *Esquire*).

n35. 15 U.S.C. § 1125(c), amended by Trademark Dilution Revision Act of 2006, Pub. L. No. 109-312; see also 15 U.S.C. §§1114(a), 1125(a).

n36. See 15 U.S.C. § 1125(c); Cal. Bus. & Prof. Code § 14247(a) (West 2008).

n37. See 15 U.S.C. §§1114(1)(b), 1116(a), 1125(b), (c)(2).

n38. "Reasonable" enforcement is necessary in order to actively maintain protection over a valid trademark, but what is considered reasonable is uncertain and only determined on a case-by-case basis. See *Dawn Donut Co. v. Hart's Food Stores, Inc.*, 267 F.2d 358, 367-68 (2d Cir. 1959).

n39. See generally *Hart's Food Stores, Inc.*, 267 F.2d 358 (1959).

n52. Report to Congress, *supra* note 31, at 9-10; see also Grinvald, *supra* note 7, at 628.

n53. Report to Congress, *supra* note 31, at 9-10

n54. *Id.* at 9-10, 13-14 (describing how trademark holders in a market might use intimidation tactics to broaden the rights of their trademark and eliminate individuals with similar trademarks in the same market so that the trademark holder can create a larger market for their own trademark).

n55. "Eat Mor Chikin" is a live trademark for the Chick-fil-A Corporation, which has protection in this mark for the use of costumed cattle in association with restaurant services and clothing products. EAT MOR CHIKIN, Registration Nos. 76192789, 76184298, 75342586, 75340161, 75031044.

n56. Carapezza, *supra* note 15.

n57. Mason, *supra* note 15.

n58. If there might seem to be a conflict between aggressive policing and trademark bullying, it is because one exists. There is a very fine line between what can be considered aggressive policing and trademark bullying, sometimes so fine that it might be hard to distinguish whether it is a problem or not. This is where the current trademark regime is flawed and where there needs to be an increase in protection in order to adequately protect a trademark holders' rights. *Id.*

n59. See *Zatarains, Inc. v. Oak Grove Smokehouse, Inc.*, 698 F.2d 786, 793-95, 797 (5th Cir. 1983) (describing that trademarks require

secondary meaning to warrant protection, and allowing others descriptive fair use, especially if the protection would substantially limit the ability to adequately compete in the market).

n60. The "cow campaign" is one of Chick-fil-A's advertising campaigns used to promote its products. The cows partake in human-like acts in an attempt to persuade customers to eat chicken instead of beef. The cows paint billboards and hold signs to protest outside Chick-fil-A restaurants. Additionally, the campaign is used as decor for the restaurant. See *The Cow Campaign: A Brief History*, Chick-fil-A (Feb. 17, 2014), <http://www.chick-fil-a.com/Cows/Campaign-History>.

n81. Grinvald, *supra* note 7, at 628-29. "Invisible hand" reflects the ideology that the market is guided by the competition of the free market, effectively creating the products that the consumer wants to have. The market expands based on the idea that more entrants will create products based on the consumer's demand, which will effectively create higher quality products and lower prices based on the producer's competition for the consumer. Adam Smith, Biography, in Library of Economics and Liberty, *The Concise Encyclopedia of Economics* (2008) [hereinafter "Invisible Hand"], <http://www.econlib.org/library/Enc/bios/Smith.html>.

n82. See Port, *supra* note 27, at 589.

n83. See Report to Congress, *supra* note 31, at 20 n.54.

n84. See Nicole Manuel, *How Does a Monopoly Affect Business and Consumers?*, *Houston Chron.*, <http://smallbusiness.chron.com/monopoly-affect-business-consumers-70033.html>.

n85. See discussion of the "Invisible Hand", *supra* note 81.

n86. Already, *supra* note 72, at 733-34.

n87. Threatening a small business not only imposes the costs of trademark infringement but, based on Justice Kennedy's words, could harm potential future profits for a business as well. With a small business where the potential to improve can be astronomical, the harm that can be incurred cannot reasonably be valued. For those trademark bullies that bring actions against small companies, there is potential for abuse that may bring a trademark infringement action purposefully to stall a small businesses development. See Port, *supra* note 27, at 622-23, 633.

n88. Already, *supra* note 72, at 733-34 (2013); see also Grinvald, *supra* note 7.

n89. See Port, *supra* note 27, at 622, 633-34 (stating that trademark extortion is one plausible explanation for the rise in the number of trademark infringement cases with a decline in trademark infringement trials, and believing that this rise can effectually circumvent antitrust laws); see also Grinvald, *supra* note 7, at 640-41 (stating that trademark laws force the owners to bring legal tactics in order to police their trademarks, which has the potential to lead to abuse).

n90. See Grinvald, *supra* note 7, at 603-04.

n91. By "threatening" new market participants, a trademark holder can increase their market share without actually expanding the business, by merging or buying out smaller businesses, and can in some circumstances avoid antitrust laws. See Port, *supra* note 27, at 622, 633-34; see also Grinvald, *supra* note 7, at 650-51; see also *supra* notes 55-64 and accompanying text.

n92. See Port, *supra* note 27, at 632-34; see also Grinvald, *supra* note 7, at 650-51.

n93. Lanham Act, 15 U.S.C. § 1051 et seq. (2012).

n94. 15 U.S.C. §§1114(a)-(b), 1125(a). Similar provisions are found in several state statutes as well. For instance, California has the same provisions and effectually mirrors the protections, requirements and defenses that are found within the Lanham Act. The policy for the California Business and Professions Code acts similarly to the Lanham Act as well by attempting to put an infringed markholder in the same place they were in before the infringement occurred. This policy is based on the assumption that no damage will occur to the reputation as a result of the infringer or the infringed company bringing a lawsuit against the infringer. If there is damage to the reputation of a product or company, then a dilution action may be brought but will only allow an injunctive relief. Cal. Bus. & Prof. Code §§14245-50.

n95. 15 U.S.C. § 1125(a).

n96. Under a claim of dilution, the only available remedy is an injunction. Id. § 1125(c).

n97. Id. §§1116(a), 1117(a)-(b).

n98. If damages are distributed for the purpose of compensating an individual for harm that has occurred, then to compensate someone that has incurred an injury based on confusion would be to compensate that individual assuming that the damages can place the individual in the same position where the company would have been had there been no damage from confusion. Thus, the damages are restorative and are for the purpose of returning them to the same position they were in prior to harm occurring, at least to the extent that the damages can adequately compensate them. Id. § 1117; Martha Chamallas, *The Measure of Injury: Race, Gender, and Tort Law* 157 (2010).

n99. 15 U.S.C. §§1116(d)(4), 1117(a).

n100. See Port, *supra* note 27; Paul Graham, *Startup = Growth*, Sep. 9, 2012, <http://www.paulgraham.com/growth.html> (since startups grow so fast, it can be difficult to pinpoint how much a startup would make in the early stages of its life); Jules Maltz, *How Fast Should You Be Growing?*, TechCrunch (Aug. 24, 2013), <http://techcrunch.com/2013/08/24/how-fast-should-you-be-growing/>.

n101. See *id.*

n102. It is unlikely that a smaller business will bring a trademark infringement action against a much larger company under a theory of

reverse confusion where the large company has the personnel and the money to finance extensive litigation. While this has happened in this past, it could potentially lead to negative consequences to the small business owner, who has the potential to get buried in legal costs, lack resources to manage their own business while seeking litigation, or lose association or distinctiveness with their mark from heated litigation. See Lanham Act §§1114, 1125; see also Grinvald, *supra* note 7, at 654-57.

n103. See 15 U.S.C. §§1116, 1117; see also Grinvald, *supra* note 7, at 654-57.

n104. This is a very common and effective strategy because there is relatively little downside to aggression when trying to police one's trademark. What is "reasonable" to one party is a subjective idea and could be considered over aggressive, or even too lenient, to another. See Grinvald, *supra* note 7, at 628, 632-33, 639-40, 644.

n105. See 15 U.S.C. § 1064.

n106. The current trademark regime could allow this action to happen, because someone who acts to aggressively police their own trademark will not incur any penalties. See Grinvald, *supra* note 7, at 628, 632-33, 639-40.

n107. Since a cease-and-desist letter has the potential to put an infringer on notice of their infringement, it may be assumed that a continuation of a trademark after a letter is received is willful infringement. *Burger King v. Mason*, 855 F.2d 779, 780-781 (1988) (finding that the court has a wide range of discretion to confer damages, including an award of lost profits, even if there is no actual demonstration of damage).

n108. See 15 U.S.C. § 1051 et seq.; Trade Marks Act, 1994, c. 26, § 21 (U.K.); Trade Marks Act 1995 (Cth) s 129 (Austl.).

n109. See Grinvald, *supra* note 7, at 653-57.

n110. Financial analysts can help determine and predict damages, but they cannot provide accurate readings based on pure assumptions. See 15 U.S.C. § 1117; see also *Ramada Inns, Inc. v. Gadsden Motel Co.*, 804 F.2d 1562, 1564 (11th Cir. 1986) (acknowledging that trademark infringement damages must be based on proof of actual damages and that some evidence of harm arising from the violation must exist);

Brian P. Brining, *Finance & Accounting For Lawyers* 256, 267-68 (2011) (stating that while courts will allow damages for new business ventures, much of the calculation for such damages is speculative and requires more assumptions than an established business); Robert L. Dunn, *Recovery of Damages for Lost Profits* 378 (6th ed. 2005) (lost profits of an unestablished business recovery is increasing, but requires that they be adequately proved with reasonable certainty); Kenneth M. Kolaski, *Measuring Commercial Damages via Lost Profits or Loss of Business Value: Are these Measures Redundant or Distinguishable?*, Pace Law School (last visited Mar. 24, 2015), <http://www.cisg.law.pace.edu/cisg/biblio/kolaski.html>.

n111. See Graham, *supra* note 100; Maltz, *supra* note 100.

n112. Port, *supra* note 27, at 587-89 (demonstrating that litigation is one of the costs imposed on the marketplace that makes entrance more difficult).

n113. Nathaniel Edwards, *I am ... Other - How Trademark Owners can Avoid Declaratory Judgment Actions*, Intellectual Property Blog of Lewis Roca Rothgerber LLP (July 7, 2013, 5:46 PM), <http://www.lrrlaw.com/ipblog/blog.aspx?entry=762> (explaining that this alternative rarely occurs because of the disparity of power between the parties, but also because there are ways to avoid creating an "actual controversy" between the parties, such as avoiding attaching a draft complaint to cease-and-desist letters, writing "soft" cease-and-desist letters, or not threatening proceedings in cease-and-desist letters); see *Already, LLC v. Nike, Inc.*, 133 S. Ct. 721, 725 (2013) (demonstrating that a more typical way to defend a company trademark is to cross-complain that the mark is invalid).

n114. Port, *supra* note 27, at 633-34.

n115. See Port, *supra* note 27, at 588; see also Grinvald, *supra* note 7, at 640.

n116. Companies need to actively police so that their trademarks do not become generic and get cancelled. 15 U.S.C. § 1064.

n117. See *Murphy Door Bed Co. v. Interior Sleep Sys., Inc.*, 874 F.2d 95, 97 (2d Cir. 1989) (holding that because other companies in the industry started using the term "Murphy Bed" to describe a general type of bed, the term became generic and lost its association with the company).

n118. See Grinvald, *supra* note 7, at 641-42.

n119. See Wal-Mart Stores, Inc. v. Samara Brothers, Inc., 529 U.S. 205, 208-09 (2000) (remanding the case to determine if the product design had secondary meaning after Wal-Mart contracted with a clothing supplier to intentionally make clothes similar to Samara Brothers clothing line).

n120. The case discusses trademark dilution under the Lanham Act, which may only arise under 1125(c). *Already, LLC v. Nike, Inc.*, 663 F.3d 89, 91 (2nd Cir. 2011).

n121. *Id.*

n122. *Id.*

n123. See *id.* By signing a covenant not to sue and rendering the case moot, the court did not address the validity of the Nike trademark thereby allowing Nike to continue having all the protections that trademark law allows despite having a response about the validity of the trademark.

n124. See *id.*; see also 15 U.S.C. § 1117 (exemplifying the lack of pre-litigation protections available for businesses that are much smaller than the trademark bully. It is likely that *Already* was "forced" into a settlement in order to not incur tremendous litigation costs by a corporation that has the finances and legal resources to potentially draw out a litigation).

n125. See *Already*, *supra* note 72, at 724 (stating that utilizing covenants not to sue is not beneficial for trademark holders in the long run, but bringing lawsuits against more humble competitors is encouraged in light of challenging their portfolios of intellectual property).

n126. See generally *id.*

n127. This is based on the assumption that most small companies would not want to have a legal battle with a financial giant like Nike, who holds the highest value sports brand at \$ 12 Billion on the Forbes top 40. The Forbes Fab 40: The World's Most Valuable Sports Brands, Forbes (last visited Mar. 24, 2015), <http://www.forbes.com/pictures/mlm45jemm/1-nike/>.

n128. See 15 U.S.C. § 1114 (demonstrating that the remedies are granted after there has been some demonstrative reproduction, counterfeit or copy used in commerce or has been used in the packaging or signs intended to be used in commerce. All these occur after there has been a use in commerce, except for the one instance of intent to use applications).

n129. The initial written version of the bill was sent to the committee on Jobs and Economic Growth. It was brought before the State Senate again in 2013-2014 and was redirected to the Committee on Commerce and Consumer Protection Finance and Policy. While it has not yet been enacted, the proposed statute is continuing to run its course through the legislature. Minnesota is one of few states attempting to limit the ability of markholders to bully other alleged infringers. There is no indication that other states have attempted or introduced into Senate a bill limiting the ability of markholders to "bully" others. Ultimately the proposal died in the committee, however it remains the view of the author that this proposal would benefit small business trademark holders if it was to be enacted. William Mitchell students craft bill to protect Minnesota's small-business owners, William Mitchell College of Law Intellectual Property Institute (Apr. 5, 2012), <http://web.wmitchell.edu/intellectual-property/2012/04/bill-protects-minnesota-small-business-owners/>.

n130. Small Business Trademark Protection Act, H.F. No. 2996, 2012 H.R., 87th Sess. (Minn. 2012), available at <http://wdoc.house.leg.state.mn.us/leg/LS87/HF2996.0.pdf>; rev'd by H.F. No. 1116, 2014 H.R., 88th Leg. (Minn. 2014), available at https://www.revisor.mn.gov/bills/text.php?session=ls88&number=HF1116&session_number=0&session_year=2013&version=list.

n131. The settlement conferences act as a cheaper alternative to litigation by removing the necessity of paid counsel, although counsel is permitted. H.F. No. 2996 § 4, subdiv. 1.

n132. See *id.*

n133. See *id.* § 4, subdiv. 7.

n134. *Id.*

n135. This penalty is similar to those seen in the groundless threat provisions of the U.K. and Australian Trade Marks Acts of 1994 and 1995, respectively. *Id.* § 4, subdiv. 9; Trade Marks Act, 1994, c. 26, § 21 (U.K.); Trade Marks Act 1995 (Cth) s 129 (Austl.).

n136. See H.F. No. 2996 § 4, subdiv. 9 (this provision dissuades aimless cease-and-desist letters by imposing a penalty on those parties who do not participate in the mandatory settlement conferences because those who aimlessly send cease-and-desist letters usually have no attempt to follow up on those letters. When they are forced to follow up by making their lawyers show up in settlement conferences it is likely an additional expense that those companies are not willing to undertake, especially when the cease-and-desist letters are very vague and can be used with multiple trademark holders); see also Grinvald, *supra* note 7, at 643 (Grinvald notes a case where Warner Brothers policed Harry Potter by sending out cease-and-desist letters to anyone that had registered a website with "harry potter" in the domain name without assessing the operation of the website).

n137. See generally H.F. No. 2996 (allowing parties to negotiate pre-litigation and forcing the parties into settlement conferences can potentially put the parties on the same level, rather than being intimidated through the force of litigation, and may reduce costs if the action never makes it to negotiation).

n138. Cf. Port, *supra* note 27, at 587, 589 (Professor Kenneth Port explains that by using litigation tactics to impose costs into the marketplace, barriers are created, and fewer entrants will come into the market).

n139. In addition to the penalties imposed, if the court finds that the entity is in fact a trademark bully, more extreme measures are taken, such as imposing certificates of dissolution or revoking certificates of authority for foreign companies. See H.F. No. 2996 § 4, subdivs. 1, 2, 10 (b) (1)-(2).

n140. *Id.*

n141. See generally H.F. No. 2996 (stating nothing about cases that result in litigation).

n142. *Id.* § 4, subd. 7 (orders by an administrative law judge may expedite trial time by pinpointing facts that are not at issue between the parties).

n143. See Grinvald, *supra* note 7, at 654-64.

n144. See generally H.F. No. 2996. Since the main purpose of the proposed trademark statute is to attempt to resolve disputes amicably, a party may dispute all the terms for the purpose of attempting to bring the case to litigation. Subdivisions 6 and 9 describe a penalty for being prepared to discuss matters, but they do not discuss whether there needs to be attempts to solve any dispute between the parties. Furthermore, subdivision 4 specifies that the parties should be prepared to participate in "meaningful settlement discussions," but does not actually specify any cost or penalty applicable for failure to do so. The statute seems to lack any coercive effects that would make the parties adhere to the ostensible purpose of amicable discussion.

n145. This term is meant to denote the fact that a party could prolong litigation in such a way as to drain all the money out of the small business, making the venture fail. If the venture failed, there would be almost no point in continuing to seek trademark rights through litigation if the alleged infringers wouldn't have the potential to use that trademark, since the venture was already without money. By granting an additional avenue of action, there could be amicable discussion to dissuade this prolonged litigation problem.

n146. McGeeveran's theory focuses on the intersection of trademark protection and freedom of speech, as exemplified in the Starbucks example found in the introduction to this paper. See *supra* notes 1-5 and accompanying text; see generally William McGeeveran, The Trademark Fair Use Reform Act, 90 B.U. L. Rev. 2267 (2010).

n147. *Id.* at 2279.

n154. *Id.* at 2303.

n155. See Report to Congress, *supra* note 31, at 1-2.

n156. *Id.* at 18.

n157. While Australia has some very subtle differences in the law compared to the United Kingdom, Australia's Trade Marks Act of 1995 has all of the same elements that make the Trade Marks Act of 1994 better at protecting small businesses than the United States' Lanham Act. For example, Australia's Trade Marks Act of 1994 allows for actions in response to groundless threats, codifies a common law found in the Trade Marks Act of 1995 (which has no substantive difference), and grants an explicit right of action to anyone who is directly or indirectly harmed financially due to the infringement or groundless threat against a markholder. See generally Trade Marks Act, 1994, c. 26 § 21 (U.K.); Trade Marks Act 1995 (Cth) s 129(1), (3), (5) (Austl.); Grinvald, *supra* note 7, at 630, 685-86; see *Jaybeam Ltd. v Abru Aluminum Ltd.*, [1975] FSR 334, 340 (Austl.); see also Robert Burrell & Michael Handler, *Australian Trademark Law* 517 (2010). Additionally, while section 129 allows for actions against groundless threats, it does not eliminate an action once litigation starts, but only allows the party an additional avenue to respond to a party once they have been threatened with litigation. See *Advanced Data Integration Pty Ltd. v ADI Ltd.*, (2004) 138 FCR 520, [17], [18] (Austl.); see also *Montana Tyres Rims & Tubes Pty Ltd. v Transport Tyre Sales Pty Ltd.* (1998) 155 ALR 489, 509-10 (Austl.).

n158. While the Trade Marks Act of 1994 has different wording than the United States' Lanham Act, it effectively creates the same law focusing on source-identification. Trade Marks Act, 1994, c. 26, § 1 (U.K.).

n159. *Id.* at § 1(2).

n160. *Id.* at § 10(2).

n161. 15 U.S.C. § 1115(b)(4).

n162. Trade Marks Act, 1994, c. 26, § 11(2) (Eng.).

n163. *Id.* at § 14(2).

n164. See Werner Pfennigstorf, *The European Experience with Attorney Fee Shifting*, 47 *Law & Contemp. Probs.* 37, 45-46 (1984); Walter Olson, *Loser Pays*, *Point of Law* (May 21, 2004), <http://www.pointoflaw.com/loserpays/overview.php>. 15 U.S.C. § 1117 (the Lanham Act requires exceptional circumstances for issuance of attorney's fees).

n165. See Pfennigstorf, *supra* note 164, at 73.

n166. See S.D. Cal. Civ. R. 16.3, 26.1, available at <https://www.casd.uscourts.gov/Rules/Lists/Rules/Attachments/1/Local%20Rules.pdf>.

n167. Ostensibly there are trade-offs with different court systems; the United States mandates pre-trial settlement conferences in the hopes of maintaining the policies concerning costliness, efficiency and speed, whereas the United Kingdom adopted more specific trademark laws. See generally *Civil Rules & Practice Directions Part 36*, Justice, available at <https://www.justice.gov.uk/courts/procedure-rules/civil/rules/part36>; Trade Marks Act, 1994, c.26 § 21 (U.K.).

n168. *Id.* Because groundless threats are the most common tactic used by trademark bullies, these types of threat actions will be the focus throughout the analysis of foreign law. *Id.* at § 21(1) (noting that another downside of Section 21 is that it does not cover three types of infringement: when the mark is applied to goods or packaging, when applied to imported good, and does not apply when the mark is applied to services).

n169. L'Oreal (UK) Ltd. v. Johnson & Johnson and Another, [2000] F.S.R. 686, 688, 701.

n170. See *id.*

n171. As stated previously, not all cease-and-desist letters are groundless, but sending these letters is the most common way to groundlessly threaten other parties.

n172. See L'Oreal (UK) Ltd. v. Johnson & Johnson and Another, [2000] F.S.R. 686, 688, 701.

n176. *Id.*

n177. Patents, Trade Marks and Design Rights: Groundless threats, Law Comm'n No. 345 p. 18 (2013) (citing *Jaybeam Ltd. v. Abru Aluminum Ltd.*, [1975] F.S.R. 334, for the definition of aggrieved party), available at http://lawcommission.justice.gov.uk/docs/lc346_patents_groundless_threats.pdf.

n178. Trade Marks Act, 1994, c. 26, § 21(2)(a)-(c) (U.K.).

n179. See *id.* (the problems can be curbed through the use of pre-litigation tactics such as punitive measures for groundless threat actions and post litigation through a grant of damages to the prevailing party); Department for Business, Innovation & Skills Intellectual Property Office, UK government to improve protection for businesses against groundless IP threats, Gov.UK (Feb. 26, 2015), <https://www.gov.uk/government/news/uk-government-to-improve-protection-for-businesses-against-groundless-ip-threats>.

n180. Damages could extend to cover loss of sales revenue or losses associated with case preparation. Trade Marks Act, 1994, c. 26, § 21(2)(a)-(c) (Eng.).

n181. *Id.* at § 21(2)(b).

n182. *Id.*

n183. By drafting into the statute declaratory judgments and injunctions from the issuance of threats, the courts understand that there is a problem with over policing trademark holders. Utilizing the tools available through the drafted statute, small business owners can act proactively and bring suit rather than building up a trademark only to be forced to rebrand at a later point in time. See *id.*; Grinvald, *supra* note 7, at 647 (stating that a legal system is set up so that billion dollar companies can prolong a lawsuit through appeals, if necessary, to drag out litigation to win the litigation by default when the small business can no longer pay to be represented); Evan Raynes, Declaratory Judgment Actions in Intellectual Property Cases, Symbus the blog, (Mar. 14, 2014), <https://symbus.com/blog/?p=483> (stating that there are multiple reason for the initiation of a preemptive lawsuit, such as: forum selection, time pressures on early parties, and setting the overall tone of the case).

n184. To prevent a small business from taking advantage of a preemptive strike against the trademark holder, markholders can simply sue first or even simultaneously file a suit and issue the cease-and-desist letter. This would prevent the issue of a groundless threat action where the small business owner would file first on receiving the letter. One issue of concern regarding this would be the need to bring a case or controversy before the court, which might be a problem for those trademark holders mass mailing cease-and-desist letters, but not likely for those with more targeted letters. See Grinvald, *supra* note 7, at 686.

n185. See Trade Marks Act, 1994, c. 26, §§10, 21 (U.K.).

n186. See *id.*

n187. See *supra* notes 95-99 and accompanying text.

n188. See, e.g., *Already*, *supra* note 72.

n189. See Grinvald, *supra* note 7, at 686; Howard Johnson, 13 Int'l Banking Fin. L. 54, 54-55 (1994) (Eng.).

n190. If we view the purpose of pretrial settlement conferences as resolving disputes to avoid costly trials and encourage parties to settle, it can be seen that a sue-first, and talk-later approach in law effectively removes this encouragement. When an individual sues, they come from a place of power and act as a threat, especially if the one suing comes from a well-funded company. On the other hand, a weaker individual who brings a suit for declaratory suit has more potential to place both parties on equal footing and allow an amicable discussion to occur. See Johnson, *supra* note 189, at 55; Glen Gallins, *The Settlement Conference*, The Law Centre (Mar. 2008), http://thelawcentre.ca/self_help/small_claims_factsheets/fact_12.

n191. See Johnson, *supra* note 189.

n192. See "No Tears," 32 Int'l R. Indus. Prop. Copyright L. 463, 463-66 (2001) (Eng.). See Grinvald, *supra* note 7, at 658-59 (trademark cases are extremely fact-specific, therefore issues that are brought to the court will need to arise to the trial level to be found by the fact-finder); Erin Coe, *SoCal Gains Traction As Hot Spot For Patent Cases*, Law360 (Dec. 2, 2013), <http://www.law360.com/articles/492220/socal-gains-traction-as-hot-spot-for-patent-cases>. While consistency in procedure might occur that does not effectively mean that litigation efforts will become more consistent or that courts will handle cases more efficiently. There is potential for more consistent or effective efforts to occur if the trademark disputes develop into a program designed around such disputes, such as a Patent Pilot Program. The purpose of the program is to set up front timelines that are to be adhered to throughout the litigation stages. While litigation provides some inconsistency, the patent pilot program has such specified dates to move cases expeditiously and proceed towards resolution.

n193. See Grinvald, *supra* note 7, at 686.

n194. See Lanham Act, 15 U.S.C. § 1051 et seq. (2012); Small Business Trademark Protection Act, H.F. No. 2996, 2012 H.R., 87th Sess. (Minn. 2012), available at <http://wdoc.house.leg.state.mn.us/leg/LS87/HF2996.0.pdf>; Trade Marks Act, 1994, c. 26, § 21 (U.K.); Trade Marks Act 1995 (Cth) s 129 (Austl.).

n195. See Appendix: Proposed Legislation, §§2, 3, which is attached to the end of this Comment.

n196. See generally Appendix: Proposed Legislation.

n197. Id.

n198. See note 192, supra.

n199. Due to the possibility of abuse and disparity in leverage between parties to trademark bullying cases, this comment proposes a mandatory pre-filing settlement conference similar to that of bankruptcy actions or child custody disputes. Similar to these types of cases, pre-filing is the appropriate measure in instances of trademark bullying because the disparity of leverage in cases of trademark bullying is sufficient to force companies out of business. Because young companies and start-ups have potential to grow at astronomical rates, it is imperative that these companies are not restrained to courtroom procedures or forced to pay litigation expenses that could defeat the business. See Raf Weverbergh, So how fast must your startup grow? Y Combinator has a growth benchmark to determine that, Whiteboard, <http://www.whiteboardmag.com/startup-grow-y-combinator-growth-benchmark/>; Bankruptcy Abuse and Consumer Protection Act of 2005, 11 U.S.C. § 1325 (2012); Child Custody Information Sheet - Child Custody Mediation, Judicial Council of California, (Jan. 1, 2012), available at <http://www.courts.ca.gov/1189.htm>.

n221. POLTA's proposed pre-file settlement mediation closely resembles the pre-filing settlement conferences discussed in family law, collective bargaining contracts, community development, and small claims proceedings. This proposal relies on pre-filing strategies that weigh the balance of freedom to commercialize and the enormous growth potential of small companies, which may be made vulnerable by threats of litigation or trademark bullying. The early stage development of start-ups have enormous potential and trademark bullying is an easy way to frustrate these businesses and for trademark holders to create high barriers to entry in markets. Thus, there is a need to have some front end protection for these small businesses. See How Courts Work: What are the Advantages to Mediation?, A.B.A., http://www.americanbar.org/groups/publiceducation/resources/law_related_education_network/how_courts_work/mediation_advantages.html (last visited Feb. 22, 2015).

n222. Certain law clinics allow students to provide free legal work for small businesses/trademark holders, but the services are limited because of the level of skill required for complicated trademark cases. A Start-Up Takes On a Titan

BYLINE: By PETER LATTMAN and ANDREW MARTIN

SECTION: Section B; Column 0; Business/Financial Desk; Pg. 1

LENGTH: 1334 words

A light bulb went off for Christy Prunier while giving her 8-year-old daughter, Willa, a bath. The girl complained that she didn't like "babyish" soaps anymore.

Ms. Prunier got to work, and after three years of research, introduced a line of skin care products aimed at preteenage girls. The name? Willa, of course.

With lip balm, facial masks and lotions in whimsical purple and white bottles, Willa caught the attention of Target, J. Crew and trendy Upper East Side boutiques like Blue Tree, owned by the actress Phoebe Cates.

Procter & Gamble noticed Willa, too, but wasn't so enthusiastic. It sent Ms. Prunier a letter demanding that she drop the name Willa, or it would resort to "lengthy and expensive alternative measures." Willa, contends Procter & Gamble, sounds too much like Wella, its own brand of hair care products, and consumers would be confused.

Instead of changing the name, Ms. Prunier chose to fight back. The battle between Ms. Prunier and Procter & Gamble - or Willa versus Wella - goes to court next month.

"There's no chance here that anyone is going to be confused," said Ms. Prunier, 43, a former film executive who lives in suburban Connecticut. "They have nothing to lose. They are intent on shutting me down."

Ms. Prunier is not the first small-business owner to claim harassment by a large corporation over its name. After some small businesses complained about what they call "trademark bullying," Congress mandated a study of the issue.

In introducing the study, which was released in April, Senator Patrick Leahy, Democrat of Vermont, said, "I am concerned that large corporations are at times abusing the substantial rights Congress has granted them in their intellectual property to the detriment of small businesses."

The senator noted a "spurious" trademark claim from 2009 against a Vermont business, Rock Art Brewery. Hansen Beverage, the makers of Monster Energy drinks, objected to the brewery's Vermonster beer. Hansen dropped its claim provided Vermonster was not sold as an energy drink.

In another case, from last August, the Maya Archaeology Initiative fought claims by Kellogg that a bird depicted in the organization's logo is too similar to Toucan Sam, the bird on the Froot Loops cereal box. The two sides have since reached an agreement allowing the Mayan group to use its mark.

Facebook, meanwhile, has sued Teachbook.com, a Web site for teachers, for using the word "book" in its name. A Facebook spokesman declined to comment.

"The big corporations often send these cease-and-desist letters and issue threats regardless of the merits of the claims," said Erik M. Pelton, a trademark lawyer in Alexandria, Va. "They then use their endless resources and legal firepower to get the result they want: the small businesses often go away because they can't afford to fight back."

But Alan C. Drewsen, executive director of the International Trademark Association, said, "Just because trademark owners are big doesn't mean they're bullies. Major brands must have a carefully considered enforcement strategy in order to protect their intellectual property."

Indeed, the government's study found that evidence of widespread trademark bullying was inconclusive, suggesting that disputes "may be best addressed by the existing safeguards in the litigation system."

The report effectively killed any momentum for a legislative fix. Instead, regulators have urged the private sector to provide free or low-cost legal counsel to small businesses engaged in trademark disputes, a remedy that some small businesses and lawyers have criticized as being woefully inadequate.

Like many large corporations, P.&G. fiercely protects its intellectual property, and company lawyers routinely search for potential conflicts. Procter's lawyer contacted Ms. Prunier in January after she received government approval to use the Willa name.

For Ms. Prunier, the trademark approval was the end of a nearly three-year process of working with chemists and dermatologists to develop the Willa line. Her goal, she said, was to provide a natural alternative to the "Miley Cyrus, made in China, bubble-gum flavor products" currently on the shelves.

For instance, among her products is a face wash that "is meant to smell like a girl in the summertime who takes a shower outside," she said.

The natural personal care category is big business, estimated at \$5 billion a year in sales in the United States alone, according to Organic Monitor. A few one-time start-ups have made a killing, too; Tom's of Maine was purchased by Colgate-Palmolive for \$100 million in 2006, and Burt's Bees was bought by Clorox for \$925 million a year later.

Ms. Prunier said she developed Willa with help from her baby sitter, Francesca Harrell, a recent graduate of the Parsons School of Design, and Willa herself. Focus groups consisted of Willa's classmates from the Spence School, a private school on the Upper East Side, who sampled products and jotted their reactions on a clipboard. (The family moved to Connecticut this summer.)

Ms. Prunier was picking Willa up at Spence on Jan. 31 when she received a call from her trademark lawyer informing her of the Procter cease-and-desist letter. P.&G. gave her less than two weeks to confirm that she was "taking the necessary steps to comply with our client's demands."

Instead, she sought advice from Willa's best friend's father, a lawyer, who urged her to stand up to Procter & Gamble. Eventually, Ms. Prunier sued, asking a court to rule that Willa does not infringe upon the trademark for Wella, a German hair care brand that P.&G. acquired in 2003 for \$7 billion.

Procter has since demanded the hard drive from Ms. Prunier's computer to search for incriminating documents. And it issued subpoenas to Ms. Prunier's potential customers, including Ms. Cates, according to Ms. Prunier's lawyer.

"If you were the owner of this boutique, why would you want to get involved in this fight?" said William A. Brewer III, Ms. Prunier's lawyer. "It basically stops the forward thrust, or opportunity, for our client."

Jennifer J. Chelune, a spokeswoman for Procter & Gamble, said, "We believe that a range of hair and related products

called 'Willa' would be too close to our Wella brand name. This risks consumer confusion and is important to know that it could set a precedent that other companies could exploit to try and infringe our Wella trademark."

She said that the company's trademarks were "how we build consumer trust in our brands over many years" and needed to be protected. "Especially in today's Internet world, the size of the company makes little difference."

The case goes to trial in Federal District Court in Manhattan on Oct. 12. It is likely to hinge on whether a jury finds a "likelihood of confusion" among customers of Willa and Wella, a rather squishy legal standard that focuses on factors including the similarity of the marks and products, and whether they are sold in the same channels.

Ms. Prunier argues that Wella sells only hair care products, while Willa's line is broader. In addition, she said Wella is primarily sold in hair salons, while Willa would be offered in retail stores and boutiques.

Given the strain of the lawsuit and the estimated \$750,000 in legal fees, Ms. Prunier said she had thought about changing the name. But she said the story of Willa was crucial to the brand and any other name lacked "authenticity."

Willa's middle name, Price, doesn't work either. "The first thing I think of when I think about 'Price' is cost," Ms. Prunier said.

For Willa, now a smiley 11-year-old with braces, the family start-up has provided all sorts of lessons about the business world, not all of them pleasant. As she watched her mother break down in tears during an interview at her kitchen table, Willa struggled to maintain her composure.

"I think it's going to work out," Willa said. "It's just a lot of stress for my mom."

This is a more complete version of the story than the one that appeared in print.

Trademark bullying leaves a sour taste

BYLINE: Jan MacLellan, Vancouver Sun

SECTION: EDITORIAL; Pg. A16

LENGTH: 124 words

Re: Food court restaurateur egged in to battle, July 28

Don't the big guys have enough to do these days? A & W takes on the Gourmet Grill over its long-time breakfast menu, Starbucks takes on HaidaBucks, Vanoc takes on a well-established Vancouver restaurant over its Olympic name and the World Wildlife Federation takes on the World Wrestling Federation over its initials: Do these folks assume we can't tell the difference between wrestlers and pandas? Between a 25-year-old restaurant in Vancouver and a two-week sports event?

I have stopped donating to the WWF because I wanted my donations to be spent on animals, not on legal fees, and I will stop eating at

A & W because of this latest trademark dispute. Enough is enough.

LEXISNEXIS SUMMARY:

... Hansen's gravamen was that Rock Art's "VERMONSTER" beer allegedly infringed on Hansen's "MONSTER ENERGY" trademarks. ... Additionally, when combined with a corollary development in the standards for trademark infringement, these expansions are alarming, as the breadth of potentially infringing uses balloons to unprecedented proportions. . expansion of actionable confusion and related goods An additional development in trademark law that has expanded the scope of trademark protection has occurred in the standards for trademark infringement: the likelihood of confusion. ... However, traditional trademark law defined confusion narrowly and courts limited plaintiff recovery to situations of direct competition, where consumers of defendant's products overlapped with the plaintiff's consumers. ... In addition, these benefits that accrue to strong or famous trademarks, and the ability to lose such rights, have incentivized trademark owners aspiring to such status and expanded protection to increase their policing efforts. . aggressive policing to expand or maintain trademark rights An owner's trademark rights can be lost or restricted through a failure to control how third parties are using the trademark (or even similar trademarks). ... Actions taken by large corporations against individuals utilizing trademarks in this manner harms this mode of cultural expression because threats of litigation through cease-and-desist letters are often enough to eradicate the commentary. ... Without robust defenses, small-business owners and individuals are easy prey for trademark bullies seeking to increase the strength and exclusivity of their trademarks. . lack of consequences for abuse of trademark rights One of the ways a trademark bully always maintains an upper hand in a trademark dispute with a small business or individual is that the bully can decide not to pursue its claim of infringement if its target puts up an initial fight. ... This Article steps in to suggest just this: that shaming should be used by small businesses and individuals to punish trademark bullies and deter future trademark bullying. ... In sum, where all of the conditions are met (community, shared norms, targets are vulnerable to shaming, and the shamers are credible), shaming of trademark bullies has the potential to be successful in both punishing the bully and deterring future behavior.

HIGHLIGHT:

In September 2009, Hansen Beverage Company sent Rock Art Brewery a letter demanding that Rock Art cease and desist its use of "VERMONSTER" as a trademark for beer. Hansen is a multi-million dollar beverage corporation and Rock Art Brewery is a small brewing company owned by a husband-and-wife team based in Vermont. Hansen's gravamen was that Rock Art's "VERMONSTER" beer allegedly infringed on Hansen's "MONSTER ENERGY" trademarks. Instead of capitulating, Rock Art Brewery fought back, taking to the virtual streets of the Internet and galvanizing public sentiment against Hansen. The end result was an amicable settlement agreement that allowed Rock Art to continue its use of "VERMONSTER" as it had before.

Rock Art's success highlights a growing phenomenon in trademark law: the use of shaming by small businesses and individuals to defend themselves against a trademark bully. To date, most scholarly work on curtailing the over-enforcement of trademarks has been focused on legal means, such as developing stronger defenses to infringement. While this is important and meaningful work, focusing on purely legal means may not assist small businesses or individuals who have no access to legal resources in the first instance. The goal of this Article is to complement the work being done by these scholars and suggest that shaming can be an effective, pre-litigation tool to combat trademark bullies. Since shaming is currently not guaranteed to be effective or available to all small businesses and individuals, this Article suggests a number of legal reforms that could be undertaken in order to maximize the availability of shaming, as well as assist in effective shaming.

TEXT: [*627]

Introduction

In September 2009, Hansen Beverage Company sent Rock Art Brewery a letter demanding that Rock Art cease and desist its use of "VERMONSTER" as a trademark for beer.ⁿ¹ The letter stated, in part, "To protect [Hansen's] rights, we must insist that you ... immediately cease and desist from any distribution, sale or other use of VERMONSTER in connection with beverages, including the use of any advertising, promotional and point-of-sale materials that include the infringing mark" ⁿ² Hansen is a multi-million-dollar beverage corporation and Rock Art Brewery is a small brewing company owned by a husband-and-wife team based in Vermont. ⁿ³ Hansen's gravamen was that Rock Art's "VERMONSTER" beer allegedly infringed on Hansen's "MONSTER ENERGY" trademarks. ⁿ⁴ Instead of capitulating, Rock Art Brewery fought back, taking to the virtual streets of the Internet and galvanizing public sentiment against Hansen. ⁿ⁵ Rock Art Brewery's YouTube video garnered over fifty thousand viewers in the first couple of days of its posting, ⁿ⁶ and over ten thousand members in the Facebook group, "Vermonters and Craft Beer Drinkers Against Monster." ⁿ⁷ The end result was an amicable settlement agreement that allowed Rock Art to continue its use of "VERMONSTER" as it had before. ⁿ⁸

[*628] The attack on Rock Art Brewery by a large corporation is not a unique one. Unfortunately for small-business owners and individuals, large corporations have embarked on "cease and desist" campaigns that are intended to "bully" these small businesses and individuals into compliance. ⁿ⁹ Large corporations send out multitudes of letters demanding small businesses or individuals cease and desist in their use of a trademark that has some resemblance to a large corporation's trademark(s). ⁿ¹⁰ On many occasions, these letters appear to be sent out without any analysis of the purported infringement. ⁿ¹¹ These letters seem intended to simply intimidate the small business or individual into forgoing the use and/or registration of their trademark. ⁿ¹² The intimidation factor is high, as often the letter is sent by a law firm or the large corporation's legal department to the small-business owner or individual (who is typically not a lawyer). ⁿ¹³ The letter is generally written in legalese, citing court cases that may or may not be relevant to the small-business owner or individual. ⁿ¹⁴ The large corporation's rights are often vaguely stated, and the "fame" of the corporation's trademark(s) often overstated. ⁿ¹⁵ In addition, the letter often claims that [*629] the small-business owner or individual will have to pay attorney's fees. ⁿ¹⁶ Finally, an extremely short time-frame for a response by the bullying victim is demanded. ⁿ¹⁷

This bullying is a serious concern, as it has implications far beyond trademark law and impacts the U.S. economy and the freedom of cultural expression.ⁿ¹⁸ One of the harms produced by bullying is that economic competition is impaired.ⁿ¹⁹ In particular, small businesses and individuals are more adversely affected, as these victims do not have the wherewithal to fight legal battles. While changing or ceasing to use the trademark at stake without a battle may seem to be the least expensive option, altering a trademark (especially if it is also the business's name) can be an expensive proposition.ⁿ²⁰ In addition, it is not merely a change in trademark that the bully demands, but also a cessation of sales of goods bearing the trademark, along with any marketing materials, and, further, the delivery of the remaining products bearing the trademark to the bully (presumably for destruction), along with an accounting of past profits.ⁿ²¹ For a small business, the destruction of inventory and the payment of a licensing fee may push the business into bankruptcy, which reduces the potential [*630] for competition for the bully.ⁿ²² Even for individuals with no commercial interest at stake, complying with a cease-and-desist letter can still be expensive, as some letters demand payment of attorney's fees even if the recipient agrees to cease in its use of the trademark.ⁿ²³

Trademark law and the legal system, as both currently operate, work to assist, and perhaps even encourage, the bully's efforts. Trademark litigation is expensive, time consuming, and emotionally draining. Even if victims of bullying are able to access low-cost or free legal assistance, the non-monetary costs may continue to outweigh the benefits of fighting (even where the victim has a strong case).ⁿ²⁴ In addition, trademark law and the standards for infringement are notoriously malleable, and prior case law provides very little by way of guidelines for attorneys to advise victims on the probability of winning their lawsuits.ⁿ²⁵ While many scholars and commentators have been focused on curing the deficiencies of trademark law, such as proposing the need for stronger defenses to trademark infringement,ⁿ²⁶ focusing on such cures (which mainly assist only once a lawsuit has been commenced) will not assist in those numerous cases that never see the [*631] inside of a courtroom.ⁿ²⁷ Small businesses and individuals need tools to defend themselves against trademark bullies without the need for litigation.

This Article suggests one tool that has been gaining popularity with small businesses and individuals (such as in Rock Art Brewery's case): shaming trademark bullies.ⁿ²⁸ The goal of this Article is to complement the work being done by scholars on methods of curing trademark law deficiencies. This Article argues that shaming can be used by small businesses and individuals as a litigation alternative to stop the bullying without having to resort to the courts. However, shaming is not guaranteed to be successful or even low-cost. Nonetheless, shaming may be an effective alternative to litigation because the upfront monetary costs are low (relative to litigation), and it is one avenue for small businesses and individuals to obtain low-cost or free legal advice.ⁿ²⁹ In order to maximize the shaming benefits, this Article identifies three legal reforms that would make shaming more effective: providing protected spaces for shaming, adopting a "groundless threats" cause of action,ⁿ³⁰ and promoting responsible shaming. Together, these reforms would increase the likelihood of shaming success and work to reduce trademark bullying.

This Article proceeds in five parts. Part I looks at various expansions in trademark law that have contributed to, and perhaps fueled, trademark bullying. In addition, Part I provides a systematic analysis of the current practices of trademark bullies, before turning in Part II to the unique issues facing small businesses and individuals in attempting to mount a defense against a trademark bully. This examination includes a discussion of how legal avenues are insufficient [*632] to assist small businesses and individuals. Part III turns to shaming and the argument that shaming will be effective in the trademark enforcement context. In addition, Part III provides an overview of some of the advantages and disadvantages to shaming. Part IV addresses these disadvantages by proposing legal solutions to make shaming more effective. This Article concludes in Part V.

I. Expansive Trademark Rights and Bullying

It is a truism that trademark rights have been on an expansive track since the early twentieth century.ⁿ³¹ While the use of the law by bullies to coerce small businesses and individuals into cooperation is not unique to trademark law, there is a sentiment that such bullying has reached levels of concern in the trademark arena.ⁿ³² Although merely expanding the law to provide stronger protection to trademark owners does not, in and of itself, cause bullying, simultaneous developments have assisted in incentivizing bullying, including increased protection given to strong or famous

trademarks and a lack of meaningful developments to assist those accused of trademark infringement.ⁿ³³ This Part provides a brief and simplified overview of these developments that have expanded the rights of trademark owners and have pushed such owners to abusive tactics in order to capture and maintain their expanded rights.ⁿ³⁴ In addition, this Part provides an analysis of trademark bullying.ⁿ³⁵

A. Trademark Rights on an Ever-Expansive Track

The basic concept of a trademark as a symbol that identifies the source of a productⁿ³⁵ is perhaps the only item that has remained [*633] unchanged over the course of two hundred years of trademark law.ⁿ³⁶ Other basic trademark concepts, such as the scope of a protectable trademark, the rationale underlying protection of a trademark and the significance given to the fame of a trademark, have all significantly evolved.ⁿ³⁷ This evolution has been towards greater protection of trademark rights, typically to the benefit of wealthy trademark owners who can afford to take advantage of such expanded rights.ⁿ³⁸ Some have argued that this has incentivized trademark bullying and other destructive efforts by trademark owners.ⁿ³⁹

1. expansion in scope of protectable trademarks

The trademark of the twenty-first century bears little resemblance to the trademark of the late nineteenth century.ⁿ⁴⁰ Under traditional common law, a name or symbol used in connection with a business was only considered a trademark if it met the indices of a "technical [*634] trademark."ⁿ⁴¹ If the name or symbol did not meet these indices, it was considered merely a "trade name."ⁿ⁴² This categorization was important because it held legal consequences. A technical trademark owner could proceed on an action for trademark infringement, whereas a trade-name owner could only proceed under an action for unfair competition.ⁿ⁴³ A plaintiff in a suit for trademark infringement did not need to prove any intent to infringe on the defendant's part; however, a plaintiff in a suit for unfair competition did need to prove such intent.ⁿ⁴⁴ Since the standard to prove trademark infringement was lower than that of unfair competition, this categorization sometimes meant the difference in the probability of success for a plaintiff. In addition, the potential remedy in a trademark-infringement action was greater than that in an action for unfair competition. Whereas in trademark-infringement suits plaintiffs could be entitled to a blanket injunction if they won their case, in unfair competition suits plaintiffs were not entitled to such broad injunctions.ⁿ⁴⁵ Typically, if a plaintiff proved a case of unfair competition, the court would narrowly tailor the injunction to preserve the ability of the defendant to utilize the trade name at stake while dispelling any consumer confusion.ⁿ⁴⁶ As such, it was to the plaintiff's benefit if he could have his trademark classified as a "technical trademark."ⁿ⁴⁷

Around the turn of the twentieth century, this strict categorization began to blur as trade names began to be afforded protection similar to that of a technical trademark if the trade-name owner could prove "secondary meaning."ⁿ⁴⁸ "Secondary meaning" referred to the [*635] association of the trade name by consumers with the source of the product, so that the trade name was deemed to have acquired distinctiveness similar to that of a technical trademark.ⁿ⁴⁹ By the 1930s, the distinction between technical trademarks and trade names had blurred to such an extent that scholars of the period declared that "in the main the trade name cases tend to approximate the trade-mark decisions and that the supposedly sharp line of demarcation is being obliterated."ⁿ⁵⁰

With the passage of the Lanham Act in 1946, the distinction between the two categories and the use of the two terms was officially eliminated.ⁿ⁵¹ A trademark can now be both one that is inherently distinctive (formerly known as the technical trademark) and one that has acquired distinctiveness (formerly known as a trade name).ⁿ⁵² One court has stated, "While the terms, words, letters, signs and symbols used by the parties are in part trade-marks and in part tradenames, the precise difference is immaterial as the law protects against the appropriation of either upon the same fundamental principles."ⁿ⁵³ The import of the collapse of this distinction is that the broad injunctive relief in trademark-infringement actions (once reserved for a select category of trademarks) is now available to any source identifier that has acquired secondary meaning.ⁿ⁵⁴ Therefore, users of descriptive terms (such as "fish fry"ⁿ⁵⁵) or even advertising slogansⁿ⁵⁶ claim trademark protection through secondary meaning, which entitles them to claim infringement by a greater number of users of the descriptive term.ⁿ⁵⁷

This expansion in the category of source identifiers that may qualify for trademark protection is troubling because it not only impacts [*636] the ability of businesses to compete, but it also impacts the free expression rights of all entities and individuals.ⁿ⁵⁸ Additionally, when combined with a corollary development in the standards for trademark infringement, these expansions are alarming, as the breadth of potentially infringing uses balloons to unprecedented proportions.ⁿ⁵⁹

2. expansion of actionable confusion and related goods

An additional development in trademark law that has expanded the scope of trademark protection has occurred in the standards for trademark infringement: the likelihood of confusion.ⁿ⁶⁰ This liability standard refers to the probability (not the actuality or possibility) that consumers will be confused by the same or similar trademarks.ⁿ⁶¹ The core of the standard, confusion, has been around since the inception of trademark law in the United States.ⁿ⁶² However, traditional trademark law defined confusion narrowly and courts limited plaintiff recovery to situations of direct competition, where consumers of defendant's products overlapped with the plaintiff's consumers.ⁿ⁶³ With the burgeoning consumer-products market,ⁿ⁶⁴ this narrow approach to confusion soon gave way to a broader approach. In the case of *Aunt Jemima Mills Co. v. Rigney & Co.*,ⁿ⁶⁵ the plaintiff, Aunt Jemima Mills [*637] Company, made and sold pancake batter under the trademark "AUNT JEMIMA" and brought suit against the defendant who was using the same trademark on pancake syrup. While the plaintiff did not yet make pancake syrup, the court held that, "Syrup and flour are both food products, and food products commonly used together. Obviously the public, or a large part of it, seeing this trade-mark on a syrup, would conclude that it was made by the complainant."ⁿ⁶⁶

Later courts held similarly and when the new federal trademark law was passed in 1946, the statute "embraced" this "related goods" doctrine.ⁿ⁶⁷ Whereas the previous federal trademark statute, the 1905 Act, had required that trademark infringement be limited to unauthorized use "upon or in connection with the sale of merchandise of substantially the same descriptive properties as those set forth in [plaintiff's] registration,"ⁿ⁶⁸ the 1946 Lanham Act only required that the unauthorized use be in connection with goods or services.ⁿ⁶⁹ Amendments to the Lanham Act in 1962 strengthened the ability of plaintiffs to claim infringement based on not only confusion as to the source of products, but also as to association, sponsorship, or affiliation.ⁿ⁷⁰ As one court stated, "Under the Lanham Act, as amended, however, Congress adopted an open-ended concept of confusion. Any kind of confusion will now support an action for trademark infringement."ⁿ⁷¹ With the potential for confusion to reach across unrelated product categories, trademark owners have the ability to allege infringement over trademark use in increasingly larger swathes of life. For example, these expansions in trademark law provide fodder for lawsuits such as the *International House of Pancakes v. International House of Prayer*, where the plaintiff alleged confusion [*638] between the use of "IHOP" for pancakes (plaintiff's use) and religion (defendant's use).ⁿ⁷²

3. the fame monster

Bolstering these two developments has been the heightened significance paid by courts and legislatures to "strong" or "famous" trademarks.ⁿ⁷³ Trademark strength, or fame, refers to the level of consumer recognition for a particular trademark.ⁿ⁷⁴ The higher the levels of consumer recognition, that is, the more people recognize a trademark, the stronger or more famous the trademark is considered to be.ⁿ⁷⁵ The benefits of having a strong or famous trademark are manifold, but in particular, a strong or famous trademark receives the benefits of an expanded likelihood-of-confusion infringement standard in two ways. First, trademark strength is one of the factors considered in the likelihood-of-confusion analysis.ⁿ⁷⁶ The stronger one's trademark, the more likely it is that the court will determine that there is a likelihood of confusion. As one court has stated, "The stronger the mark, the more likely it is that encroachment on it will produce confusion."ⁿ⁷⁷

Second, a strong trademark can claim confusion over an expanded category of products and the various types of confusion, as the ability to claim such protection depends on the strength of the trademark. An owner whose trademark is considered "weak" may acquire rights to enjoin the use or registration of the same or similar trademark, but generally only where such third-party use is within the same category of products as the owner's trademark is used within.ⁿ⁷⁸ For

example, the owner of "FAMILY CIRCLE," a trademark for a woman's magazine, could not enjoin third-party uses of FAMILY CIRCLE for uses with [*639] women's clothing or food.ⁿ⁷⁹ However, if a trademark owner has acquired an increased level of consumer recognition, an expansion of product categories, along with affiliation and sponsorship confusion, becomes available to the trademark owner.ⁿ⁸⁰ For example, a "famous" trademark, such as "ARDEN B," a trademark for women's clothing stores, could enjoin not only third-party uses of ARDEN B and other formulations (such as "ARDENBEAUTY") for uses with women's clothing, but uses in other product categories, such as personal-care products.ⁿ⁸¹

Additionally, famous trademarks are afforded an alternative form of protection against potential dilution.ⁿ⁸² Dilution is a type of trademark infringement that does not need a likelihood of confusion to be actionable, but rather only a likelihood of dilution through an association between the senior and junior trademarks.ⁿ⁸³ Federal dilution law protects famous trademarks against the likelihood that the fame of the trademark will be diluted either through "blurring" or "tarnishment."ⁿ⁸⁴ Although the level of consumer recognition needed to qualify for this protection is quite high,ⁿ⁸⁵ this has not stopped trademark owners from laying claim to fame and alleging trademark dilution.ⁿ⁸⁶ This ability to claim fame in pre-litigation settings, such as in cease-and-desist letters, has provided trademark owners with hefty ammunition.ⁿ⁸⁷ In addition, these benefits that accrue to strong or [*640] famous trademarks, and the ability to lose such rights, have incentivized trademark owners aspiring to such status and expanded protection to increase their policing efforts.ⁿ⁸⁸

4. aggressive policing to expand or maintain trademark rights

An owner's trademark rights can be lost or restricted through a failure to control how third parties are using the trademark (or even similar trademarks).ⁿ⁸⁹ Since the expanded scope of trademark protection is afforded to stronger trademarks,ⁿ⁹⁰ trademark owners have a burden of either increasing the strength of their trademark, or ensuring that their strong trademark does not lose its strength.ⁿ⁹¹ In order to do this, trademark owners need to police the extent to which their trademark is used in similar product categories, as well as in other categories, as "trademarks are weak when they are merely one of a similar crowd of marks."ⁿ⁹² For example, where the owners of the trademark "DOMINO'S" for sugar had not objected to other uses of their trademark, the owners were restricted to exclusive use only in the sugar market.ⁿ⁹³ The possibility of a loss of trademark strength is cited frequently by trademark owners as the reason for aggressive trademark [*641] enforcement efforts: "We have an obligation to protect our trademark; otherwise we'd lose it."ⁿ⁹⁴

In addition, the fear of losing the ability to claim trademark infringement due to the equitable doctrines of acquiescence and laches may also underlie aggressive trademark enforcement strategies.ⁿ⁹⁵ These equitable doctrines work to estop a trademark owner from claiming trademark infringement due to the past inactivity of the trademark owner.ⁿ⁹⁶ For example, where the National Federation of the Blind had been aware of the Missouri Federation of the Blind since the latter's inception, and did not challenge the latter's use of the term for at least ten years, a court held that the senior holder could not claim trademark infringement from the junior user.ⁿ⁹⁷ As one commentator has noted, "The fear that not bringing a suit now might foreclose or damage interests in bringing suit later may lead to unnecessary litigation."ⁿ⁹⁸

The increased stakes in having a strong mark and the fear of acquiescence or laches provides an incentive (or excuse) to trademark owners to aggressively police their trademarks. Aggressive policing can quite easily cross the line into bullying, "after all, one person's policing is another person's harassment, or worse, abusive trademark litigation."ⁿ⁹⁹

B. Trademark Bullying

Trademark owners are incentivized by the developments in trademark law to obtain expanded trademark rights and to keep these rights through aggressive policing. However, some trademark owners cross the line from aggressive, but reasonable, trademark enforcement [*642] to abusive trademark enforcement.ⁿ¹⁰⁰ This section will define trademark

bullying, and then move on to a discussion of the harms bullying produces.

1. what is trademark bullying?

This Article defines "trademark bullying" as the enforcement of an unreasonable interpretation by a large corporation of its trademark rights against a small business or individual through the use of intimidation tactics. This definition tracks the standard definition of a bully, which is a person who is "habitually threatening, harsh, or cruel to others weaker or smaller than himself."ⁿ¹⁰¹ The reason is that where a large corporation unreasonably interprets its trademark rights and enforces that interpretation against a small business or individual through the use of intimidation tactics, the large corporation is deliberately (or at the very least negligently) intimidating or persecuting a weaker party. While neither unreasonable interpretation of trademark rights nor intimidation tactics are exclusively the domain of large corporations, this Article confines the definition of trademark bullying to when these elements are utilized by large corporations against small businesses or individuals because of the relative vulnerability of this category of potential targets. This vulnerability, or weakness, stems from these victims' inability to access the same legal tools as large corporations, which is more fully discussed in Part II. There are four elements in this Article's bullying definition, which are discussed in turn below: (1) unreasonable interpretation of rights, (2) intimidation tactics, (3) the trademark holder is a large corporation, and (4) the accused infringer is a small business or individual.

[*643]

a. Unreasonable interpretation of trademark rightsⁿ¹⁰²

While trademark owners have a justifiable need to police against unauthorized third-party uses of their trademarks, such policing crosses the line into bullying when large corporations unreasonably interpret their trademark rights. More specifically, an unreasonable interpretation of trademark rights occurs when large corporations do one or more of the following: (1) do not conduct a complete and objective assessment of the third party's trademark and/or use of the trademark, (2) exaggerate the strength of their trademark, or (3) exaggerate the extent to which confusion is likely.

In the first instance, trademark owners engage in unreasonable interpretations of their trademark rights when they conduct a cursory assessment of the infringing nature of the third party's trademark and the use of the trademark by the third party, or do not conduct an assessment at all.ⁿ¹⁰³ Warner Brothers' policing of third-party uses of "HARRY POTTER" is a prime example of when trademark owners cross the line into bullying through the failure to assess third-party uses of the corporations' trademark. When Warner Brothers purchased the merchandising rights to the Harry Potter book-series franchise, it embarked on a cease-and-desist letter campaign to capture all of the websites that had been registered using the term HARRY POTTER.ⁿ¹⁰⁴ These letters were apparently sent without an assessment of who operated the underlying website (individuals or businesses) or whether the websites were commercial in nature or purely non-commercial (set up by fans of the books and characters).ⁿ¹⁰⁵ Warner Brothers later discovered, to their chagrin, that many of its letters were sent not only [*644] to children (one letter recipient was fourteen years old) but that these websites were fan-based and not for commercial purposes.ⁿ¹⁰⁶

Next, trademark owners may cross the line into bullying through an exaggeration of the strength of its trademark and the corresponding scope of protection. While trademark law has provided an expansion of rights to owners of strong trademarks, not all trademarks qualify for such rights.ⁿ¹⁰⁷ Even where trademark owners have registered trademarks, this registration does not confer trademark strength.ⁿ¹⁰⁸ But in the pre-litigation enforcement stage, the assessment of the strength of one's trademark and its corresponding scope of protection is privately conducted, which means that the trademark owner can feel free to claim strength where there is none. As there are few bright-line rules in trademark law, this self-assessment is prone to subjectivity.ⁿ¹⁰⁹ Trademark owners cross the line into bullying when they take advantage of this subjectivity and contend that their trademark is worthy of strong protection without the evidence to support high levels of consumer recognition.ⁿ¹¹⁰ Another form of bullying comes when a trademark owner attempts to control all uses of a descriptive or generic term that the owner has registered as a trademark. For example, Entrepreneur Media has been on a decade-long campaign to eradicate all uses of the term "ENTREPRENEUR" with

respect to print and online media focusing on starting and operating small businesses, even though the term "entrepreneur" with respect to start-up businesses is decidedly descriptive, and perhaps even generic.ⁿ¹¹¹

In addition, an assessment of the third party's actions is needed in order to assess whether there is a likelihood of confusion between the third party's use of a trademark and the trademark owner.ⁿ¹¹² Similar to the self-assessment of the strength of one's trademark, this assessment [*645] of likelihood of confusion is also quite subjectiveⁿ¹¹³ and can be prone to exaggeration or incomplete analyses. Bullying occurs when trademark owners exaggerate the likelihood that a third party's trademark use would cause confusion with their own, especially where the allegation of confusion is based on an incomplete assessment of the third-party use.ⁿ¹¹⁴ For example, three out of the five domain-name owners that Ford Motor Corporation filed a lawsuit against for trademark infringement were simply "hobbyists."ⁿ¹¹⁵ One of the domain-name owners, the owner of "jaguarcenter.com," hosted a website about the wild cats and not cars.ⁿ¹¹⁶ In addition, trademark owners need to remember that the likelihood-of-confusion standard is based on a multi-factor analysis.ⁿ¹¹⁷ While there is some evidence that in conducting this multi-factor analysis courts tend to favor some factors over others,ⁿ¹¹⁸ trademark owners are not necessarily paying close attention to these factors, nor are they always analyzing third-party usage under all factors.ⁿ¹¹⁹ For example, where there is a large geographical distance between a trademark owner and the third party, this may be strong evidence that there is no likelihood of confusion.ⁿ¹²⁰

b. Intimidation tactics

The second element of trademark bullying is the intimidation tactics used by bullies in enforcing their trademark rights.ⁿ¹²¹ Intimidation tactics are not unique to trademark law, and other areas of the law, such as contract law, recognize that intimidation tactics utilized by stronger parties against weaker parties are contrary to public policy [*646] and should be deterred.ⁿ¹²² For example, in an action for contract enforcement, a defendant can argue that the contract should be voided based on defects at the time of contract formation, such as duress and undue persuasion.ⁿ¹²³ If a court voids the contract due to one of these intimidation tactics, the plaintiff has no further recourse against the defendant.ⁿ¹²⁴ Similar intimidation tactics are utilized by trademark bullies; these include a combination of undue economic pressure and coercive persuasion.

(i) undue economic pressure

Small businesses and individuals are often in precarious economic situations, as will be discussed in more detail below. This economic frailty is generally not the fault of the trademark bully; however, the bully takes advantage of the precarious situation of small businesses and individuals. Bullying occurs when the trademark owner provides no alternative other than to comply with the demands of the trademark owner.ⁿ¹²⁵ Typically the trademark owner couches the trademark dispute in very stark terms, offering the target the choice to cease using the trademark or fight through litigation.ⁿ¹²⁶ Other options, such as a co-existence agreement, a licensing arrangement, or mediation, may not be [*647] mentioned in the cease-and-desist letter.ⁿ¹²⁷ Litigating necessitates sufficient financial resources to see the lawsuit through until the final appeal.ⁿ¹²⁸ Financially, many small businesses and individuals have little resources to fight a legal battle against large corporations with deep financial pockets. As Matt Nadeau of Rock Art Brewery explained:

The way the system is set up, I'm being explained by these trademark lawyers, is that this will enter the court system and this \$ 1 billion corporation will be allowed to fight this in the courts with dollars. If I win the first round, they can appeal. And if I win the second round, they can appeal. And all the time, this starts at \$ 65,000 for each court case and goes and goes and goes. And at some point obviously, a small little Vermont brewery is not going to be able to afford this anymore. And what happens at that point when you're involved in this legal battle and can no longer afford to represent yourself, you lose by default. The court system says you default lose. What happens then? I have to change the name of the beer and move on if there's any brewery left.ⁿ¹²⁹

A trademark owner's threat that it will sue the small business or individual if they do not comply with its demands is often enough economic pressure to force the small business or individual into compliance. Additionally, bullying occurs (when coupled with an unreasonable interpretation of rights) when trademark owners include demands for attorney's fees in their cease-and-desist letters - even if the recipient complies - or claims that attorney's fees and costs will be awarded when the litigation against the small business or individual is [*648] found in favor of the large corporation (and the letter is often couched in terms that lead the recipient to conclude that the only outcome is that the large corporation will win).ⁿ¹³⁰ The small business or individual has no way of knowing that attorney's fees are awarded only in rare instances of trademark infringement.ⁿ¹³¹

(ii) coercive persuasion

While trademark owners have an obligation to put third parties on notice about their trademark rights, the manner in which such notice is couched can be coercively persuasive. Coercive persuasion occurs when one party takes "'unfair advantage of another's weakness of mind; or ... a grossly oppressive and unfair advantage of another's necessities or distress.'" ⁿ¹³² The majority of cease-and-desist letters include a variety of aspects that unfairly take advantage of small businesses' or individuals' lack of legal knowledge. ⁿ¹³³ The cease-and-desist letter is typically written by a lawyer (either the corporation's in-house lawyer or an outside law firm) and written in legalese. ⁿ¹³⁴ The letter will sometimes cite to court cases, which may or may not be relevant to the small business or individual (not that the victim would have reason to know that). ⁿ¹³⁵ Not only do these letters take unfair advantage of the recipients' lack of legal knowledge, there is also an element of emotional coercion. This type of letter from a lawyer, received by a non-lawyer, often brings emotional distress, which many [*649] recipients of cease-and-desist letters cite upon receipt. ⁿ¹³⁶ In addition, many large corporations demand an extremely short time-frame for a response by the small business. ⁿ¹³⁷ This takes further advantage of the recipients' lack of legal knowledge, as the short time frame does not provide enough time for the small business to properly consult an attorney. ⁿ¹³⁸

c. Trademark holder is a large corporation and accused infringer is a small business or individual

The third and fourth elements of trademark bullying are focused on the parties involved in the bullying. "Large entities or corporations" and "small businesses or individuals" are defined in terms of financial strength, and this Article is focused on assisting those small businesses and individuals with few or no financial resources to defend against trademark bullying. ⁿ¹³⁹ The reason for this is that an entity or individual's financial resources is likely to be a factor in whether the entity or individual maintains a legal budget and the size of such budget. ⁿ¹⁴⁰ And whether an entity or individual maintains a legal budget (as well as the size) is a major factor in whether that entity or individual will be able to access the legal resources needed to defend itself against trademark-infringement allegations. ⁿ¹⁴¹ An inability to access legal resources is what makes the targeted small businesses and individuals "weaker" than the large corporations. In exploiting this weakness, large [*650] corporations are violating a widely held norm against bullying. While there are instances of large corporations attempting to intimidate small businesses or individuals with high levels of financial resources, ⁿ¹⁴² this does not violate the norm against bullying. These targets are not weaker than the large corporations, as they have sufficient resources to access the legal system and properly defend themselves against these attacks. ⁿ¹⁴³ And although this behavior may have similar deleterious effects on competition and freedom of expression, ⁿ¹⁴⁴ this behavior is better termed harassment and not bullying.

2. societal harms produced by bullying

Abusive enforcement of rights, whether in the trademark arena or elsewhere, is harmful to society as a whole. ⁿ¹⁴⁵ Specifically, in the trademark arena, one of the main harms produced by abusive enforcement of trademark rights is a reduction in competition. ⁿ¹⁴⁶ Free competition among businesses is the bedrock upon which American capitalism has been thought to rest, and the government has been devoted to regulating anti-competitive behavior since 1890. ⁿ¹⁴⁷ However, the majority of trademark bullying will not fall within the purview of antitrust law, as a trademark is unlikely to generate market power, ⁿ¹⁴⁸ which is the main requirement for an antitrust cause of action. ⁿ¹⁴⁹ [*651] Perhaps due

to this, there have been only rare instances where antitrust claims are brought for trademark misuse.ⁿ¹⁵⁰

This allows large corporations to bypass anticompetitive regulation and achieve the desired end result: reduced competition for their products. The reduction in competition comes in two ways. The first is from a reduction in the number of products bearing the same trademark as the large corporation - or even the level of use by third parties of the trademark. This reduction can come through efforts to stop the use of a trademark or similar variations by third parties in a broad range of product categories, in domain names, or even the use of descriptive trademarks in advertising or on product packaging.ⁿ¹⁵¹ If there is only one corporation utilizing a particular trademark, the trademark becomes stronger, meaning it is more recognizable to consumers.ⁿ¹⁵² Greater recognition with consumers typically translates into an increased likelihood that consumers will purchase the large corporation's products, rather than a competitor's products with a lesser recognized trademark.ⁿ¹⁵³ The second form of reduced competition comes from the cessation of sales of a certain product by the small businesses or individuals. As discussed above, even though the small business or individual complies with the bully's demands, compliance may push the victim into bankruptcy. Complete compliance with a bully's demands may mean the destruction of inventory bearing the infringing trademark, payment of licensing fees for past salesⁿ¹⁵⁴ and even payment of attorney's fees.ⁿ¹⁵⁵ In addition, altering a business's trademark can be expensive, with some small-business owners paying costs of \$ 50,000.ⁿ¹⁵⁶ The financial failure of the victim reduces the number of products that compete with the large corporation's products.ⁿ¹⁵⁷

[*652] Other societal harms that bullying causes are "assaults on cultural expression and free speech."ⁿ¹⁵⁸ Perhaps the most harmful bullying targets individuals who are utilizing a trademark to parody, criticize, or comment on a trademark owner.ⁿ¹⁵⁹ Expressions of criticism and parodies provide invaluable commentary on cultural phenomena, such as well-known trademarks.ⁿ¹⁶⁰ For example, various parodies utilizing "Barbie" (either the doll or the trademarked name) such as the 1997 song produced by Aqua, "Barbie Girl,"ⁿ¹⁶¹ provide insightful commentary on American culture and the "ideal" woman. In holding that Aqua had a right to use "Barbie" in its song, the Ninth Circuit upheld Aqua's First Amendment right to such commentary, stating: "The song pokes fun at Barbie and the values that Aqua contends she represents."ⁿ¹⁶² In addition, some trademarks transcend their source-identifying functions and become cultural property in their own right,ⁿ¹⁶³ even entering our language. As Judge Kozinski has asked, "How else do you say that something's 'the Rolls Royce of its class'? What else is a quick fix, but a Band-Aid?"ⁿ¹⁶⁴ Actions taken by large corporations against individuals utilizing trademarks in this manner harms this mode of cultural expression because threats of litigation through cease-and-desist letters are often enough to eradicate the commentary.ⁿ¹⁶⁵

In sum, trademark bullying of small businesses and individuals is a serious cause for concern, as has been recently noted by members of Congress.ⁿ¹⁶⁶ In the Trademark Technical and Conforming Act, passed in early 2010, Congress commissioned a study to be undertaken by the Intellectual Property Enforcement Coordinator to examine this very [*653] issue.ⁿ¹⁶⁷ The legislation calls for a report studying "the extent to which small businesses may be harmed by litigation tactics by corporations attempting to enforce trademark rights beyond a reasonable interpretation of the scope of the rights granted to the trademark owner."ⁿ¹⁶⁸ While the commissioned study is focused in particular on small businesses, bullying of individuals should also be included as well, since trademark bullying brings the very real potential of the bankruptcy of both small businesses and individuals (as will be discussed in more detail below). With the current economic environment, actions that are taken by entities that impede an economic recovery should be closely scrutinized.

II. Fighting Back: Problems Facing Small Businesses and Individuals

As previously acknowledged, unreasonable interpretation of rights coupled with intimidation tactics can occur among entities and individuals of all sizes.ⁿ¹⁶⁹ However, this rises to the level of bullying only when undertaken by large entities and directed at small businesses and individuals because of their relative vulnerability vis-a-vis the large entities. This vulnerability or weakness stems from an inability to access or afford legal tools. The question becomes one of how to overcome bullying for this category of individuals. Part of the answer to this question lies in the social-movement literature, which shows that litigation is but one tool in the arsenal of effecting change.ⁿ¹⁷⁰ In addition, litigation may not even be the best tool, as there are some actors who cannot or should not litigate.ⁿ¹⁷¹ Other

tools that actors may [*654] utilize include direct action protests, lobbying, and shaming.ⁿ¹⁷² In the trademark context, this Article argues that shaming is an especially powerful tool for small businesses and individuals, as this group cannot, and should not, litigate.ⁿ¹⁷³ This Part explores why small businesses and individuals cannot and should not litigate trademark disputes and then turns in Part III to this Article's proposed shaming solution.

A. Why Small Businesses and Individuals Cannot Litigate Trademark Disputes

Upon receipt of a cease-and-desist letter, a rationally minded corporation with unlimited monetary resources would not capitulate immediately, even if its internal analysis of the infringement claim indicated that it had a low likelihood of winning any potential lawsuit. Instead, the rational corporation would likely call the bluff of the threatening company because the rational corporation knows that only 3 percent of all threats of litigation end up in court.ⁿ¹⁷⁴ If the rational corporation does become embroiled in litigation, it will have the resources to defend itself in the litigation or pay for a settlement with the suing trademark owner. However, small businesses and individuals have neither the infrastructure of large corporations to analyze trademark-infringement claims for validity nor the monetary resources to bluff out would-be bullies.

1. lack of infrastructure

In the United States, approximately 78 percent of the twenty-seven million small businesses are owned and managed by a single individual without additional employees.ⁿ¹⁷⁵ This means that the small business is [*655] in a similar situation as an individual who receives a cease-and-desist letter. When an individual or small business receives the letter, the proprietor of the small business or the individual is the one who will need to handle all aspects of the issue: the analysis, response, and strategy planning. Unlike a large corporation with a staff of in-house lawyers who may be able to conduct a trademark-infringement analysis, the small-business owner or individual will likely not be capable of conducting a proper analysis on her own, as she is not likely to be a lawyer.ⁿ¹⁷⁶ Even if the owner or individual is a lawyer (or perhaps has family or friends that are lawyers), it is likely that trademark law is not her area of expertise.ⁿ¹⁷⁷

In addition, litigation is a time-consuming process, even for a large corporation with a staff of in-house lawyers. From claim analysis to strategy planning, to pre-trial meetings, discovery, and trial, litigation of a trademark-infringement claim may take up to a year to complete, at best.ⁿ¹⁷⁸ Since it is likely that the small-business owner is both the manager and sole employee of the business, it is unlikely that the owner will have the time to focus on any issues unrelated to the day-to-day workings of the business.ⁿ¹⁷⁹ Similarly, an individual who has received a cease-and-desist letter is likely to have a full-time job that is unrelated to her trademark use, as many individuals who are targets of cease-and-desist letters are targeted due to domain-name ownership, blogs, fan-based usage, or other non-commercial uses.ⁿ¹⁸⁰ Further, litigation, and even threats of litigation, brings emotional costs as well, especially for small-business owners and individuals, as threats of litigation may be perceived as a personal attack. Lauren Thom, the recipient of a cease-and-desist letter from the National Football League for selling t-shirts, [*656] described that her cease-and-desist letter "scared the bejesus out of me."ⁿ¹⁸¹

2. lack of monetary resources

Without the internal capacity for an analysis of the trademark-infringement claim, the small business or individual will need outside legal assistance. Unlike large corporations with large legal budgets and multiple outside law firms on retainer, small-business owners and individuals generally operate on a very tight budget.ⁿ¹⁸² Most small businesses are undercapitalized,ⁿ¹⁸³ which means that it is likely that the owner has not properly funded the business to begin with.ⁿ¹⁸⁴ To compound the undercapitalization problem, many small businesses poorly estimate their future earnings and do not manage their cash flow well.ⁿ¹⁸⁵ Further, it would be unlikely that the small-business owner will have adequately budgeted for any potential litigation, as many small businesses conduct inadequate risk assessments.ⁿ¹⁸⁶ The same is true for individuals. The median American income in 2009 was \$ 49,777.ⁿ¹⁸⁷ Many Americans operate on a budget that only includes expenses that can be covered by a monthly paycheck, supplemented by credit cards.ⁿ¹⁸⁸ In addition, the majority of Americans have fairly low savings rates.ⁿ¹⁸⁹ Therefore, it is likely that when a cease-and-desist letter

arrives, the small-business owner and the individual will not be able to afford any type of legal assistance and will likely capitulate.ⁿ¹⁹⁰ While [*657] many cease-and-desist letters are sent without the sender's intention of litigating, the victim has no access to that information.ⁿ¹⁹¹ In particular, where the sender has built up a reputation for litigating, or includes in the cease-and-desist letter examples of other compliance, the likelihood of bluffing out the large corporation appears minimal to a small business or individual.ⁿ¹⁹²

B. Why Small Businesses and Individuals Should Not Litigate Trademark Disputesⁿ¹⁹³

Even in the event that the small business or individual is able to access legal assistance (either through cash-flow reserves, insurance coverage, or pro bono assistanceⁿ¹⁹⁴), the small business or individual should not litigate trademark disputes. The likely legal advice to the small business or individual will reflect this.ⁿ¹⁹⁵ This is due to several features of trademark law, which work against this category of victims. First, previously litigated trademark cases do not provide well-founded precedent for future predictions of success. Second, statutory defenses in trademark law are grossly underdeveloped, leaving the small business or individual with few clear grounds to claim that its [*658] trademark use is appropriate.ⁿ¹⁹⁶ Finally, the recipient of a cease-and-desist letter has few, if any, tools for a legal counterattack.ⁿ¹⁹⁷ Therefore, it will be unlikely that a competent trademark attorney will be able to confidently advise a small-business owner or individual that the matter could be resolved without the need for litigation.ⁿ¹⁹⁸

1. lack of precedential value of previously litigated trademark cases

Trademark-infringement cases are extremely fact-specific.ⁿ¹⁹⁹ Likelihood of confusion, the test for trademark infringement, is considered an issue of fact at the trial level.ⁿ²⁰⁰ The implication stemming from this fact-intensive litigation is that it is hard to determine with very real certainty how future courts will use prior cases. Since each litigated case heavily depends on the facts and circumstances of the specific situation of the plaintiff and the defendant, it is highly unlikely that what one court considered non-infringement will be applicable in future cases, even with the same or slightly varying facts.ⁿ²⁰¹ In addition, on appeal, while many courts will review the lower court's decision applying a more deferential standard of review, the "clearly erroneous" standard, there are three high-volume circuits that apply the "de novo" standard and review the evidence afresh.ⁿ²⁰² The possibility for a reversal of a lower-court decision is high under a de novo review standard.ⁿ²⁰³ A high possibility of reversal adds [*659] to the lack of ability to glean guidelines from the case law. This provides the trademark attorney with little firm guidance to advise her client. With little value in precedential cases (along with a lack of statutory defenses, as discussed next), an attorney's legal advice will be crafted from prior experience, along with her knowledge of the large corporation.ⁿ²⁰⁴

In addition, in crafting her legal advice, the attorney will likely take into account the financial resources and other personal characteristics of her client. This will mean that even if the attorney believes that her client has a fairly strong case, the attorney may still advise her client to comply with the cease-and-desist letter's demands in order not to incur litigation costs or other non-financial tolls.ⁿ²⁰⁵ As discussed above, litigation costs do not end with the first trial.ⁿ²⁰⁶ Even if the small business were to win at trial, the large corporation could appeal, adding to the costs.ⁿ²⁰⁷ One attorney advised Nadeau of Rock Art Brewery the following: "They will drag this out until you can't afford it... you got two boys, you got a wife, you got a business, you got employees, you got to think about that. My recommendation, if you can't afford it, just change the name and move on."ⁿ²⁰⁸ Another small-business owner, Stacy Crummett, stated: "Of course, because they're a million-dollar beast [referring to the sender of her cease-and-desist letter], we have no choice. We would fold just in fighting them."ⁿ²⁰⁹

[*660]

2. lack of defenses to trademark infringement

To compound the lack of guidance from previously litigated trademark cases, there is a significant gap in statutory and common law defenses in trademark law.ⁿ²¹⁰ There are approximately three or four recognized defenses in trademark law, including fair use (classic and nominative), trademark use, and First Amendment arguments.ⁿ²¹¹ However, some

commentators have argued that these are not even affirmative defenses as such.ⁿ²¹² This means that instead of acting as a "screening mechanism" to weed out infringement claims based on typically legally sanctioned trademark uses such as news reporting, commentary, and artistic works,ⁿ²¹³ under the current defense jurisprudence, courts still need to conduct a likelihood-of-confusion analysis.ⁿ²¹⁴ The defenses, therefore, appear to be available to defendants only after they have proven there is no likelihood of confusion anyway.ⁿ²¹⁵ The implication from the lack of "autonomous defenses" in trademark law is that defendants must continue to go through the lengthy and costly litigation process in order to vindicate their trademark use.ⁿ²¹⁶

In addition, other statutes that trademark-infringement defendants could use to defend their trademark use, such as anti-Strategic Lawsuit Against Public Participation ("SLAPP") laws, do not really provide any reliable assistance. Anti-SLAPP laws have been applied in the trademark-infringement context, as the use of a trademark can qualify as an "act in furtherance of a person's right of petition or free speech."ⁿ²¹⁷ However, even though states that have enacted this law did so in order "to promptly expose and dismiss meritless and harassing claims seeking to chill protected expression,"ⁿ²¹⁸ most trademark-related anti-SLAPP motions are denied.ⁿ²¹⁹ As with trademark-specific defenses, [*661] the effect of this is that defendants will typically need to continue with the lawsuit.

Although many commentators have recognized the need for more robust defenses in trademark law, courts and Congress have been slow to act.ⁿ²²⁰ The last time the Supreme Court granted certiorari in a trademark case involving a trademark defense was in 2004, and its ruling arguably failed to clarify the applicable standards.ⁿ²²¹ In addition, some commentators argue that courts will not develop robust defenses without Congressional authorization, such as through amendments to the Lanham Act.ⁿ²²² Without robust defenses, small-business owners and individuals are easy prey for trademark bullies seeking to increase the strength and exclusivity of their trademarks.ⁿ²²³

3. lack of consequences for abuse of trademark rights

One of the ways a trademark bully always maintains an upper hand in a trademark dispute with a small business or individual is that the bully can decide not to pursue its claim of infringement if its target puts up an initial fight.ⁿ²²⁴ A trademark bully has this option because unlike other areas of intellectual property law, such as copyright law, a trademark bully faces no consequences for abusing her trademark rights.ⁿ²²⁵ For example, in copyright law, courts have recognized a doctrine of "copyright misuse," which a defendant may plead against a plaintiff in copyright infringement cases.ⁿ²²⁶ Copyright misuse occurs in cases where "a copyright owner [uses] an infringement suit to obtain [*662] property protection ... that copyright law clearly does not confer, hoping to force a settlement or even achieve an outright victory over an opponent that may lack the resources or the legal sophistication to resist effectively."ⁿ²²⁷ Where a court has found that a plaintiff has misused its copyright in a particular instance, the court has disallowed the plaintiff's infringement suit until the misuse is "purged."ⁿ²²⁸ While the defense of copyright misuse has been applied when plaintiff's actions rise to the level of anti-competitive behavior, courts have recognized that the defense could be applied when plaintiff's actions amount to behavior that violates the public policy of copyright.ⁿ²²⁹

However, in trademark-infringement suits, defendants are rarely granted a trademark-misuse defense.ⁿ²³⁰ In the few cases that have recognized a defense of trademark misuse, the defense has been limited to antitrust claims and is typically brought up when a franchisor abuses its relationship with its franchisee.ⁿ²³¹ Outside of the antitrust claim arena, "courts occasionally exercise discretion to withhold injunctive relief, but have declined to recognize misuse as an independent doctrine."ⁿ²³² In addition, although trademark plaintiffs can face an abuse-of-process cause of action from defendants, this is rarely successful.ⁿ²³³ Further, no court has recognized an affirmative cause of action for trademark misuse.ⁿ²³⁴

The lack of an affirmative action or defense for trademark misuse creates "one-way liability"ⁿ²³⁵ in favor of large trademark owners. Large trademark owners, especially those with big legal budgets, are allowed to send cease-and-desist letters with impunity to small businesses or individuals, as without a defense or affirmative cause of action for trademark misuse, there are little to no costs associated with the [*663] sending of the letter.ⁿ²³⁶ As discussed above, when a cease-and-desist letter is sent by a large corporation to a small business or individual, it is

highly likely that a small business or individual will comply with the demands in the letter, as this type of victim lacks the wherewithal to fight the large corporation.ⁿ²³⁷ In fact, some trademark owners may desire to obtain a reputation for bullying, as it allows such trademark owners to cite to past "successes" of compliance.ⁿ²³⁸ This then raises the probability that future cease-and-desist letter recipients will comply with the owner's demands. For example, the Village Voice consistently cites to its past successes of compliance when sending new letters. When the Village Voice sent a cease-and-desist letter to the Cape Cod Voice, its letter stated, "We hope to resolve this matter amicably, and, if you respond promptly, are willing to work with you in an effort to minimize any disruption to your company's business. Our previous experience with the Bloomington Voice, Dayton Voice and Tacoma Voice newspapers ... indicates that we can accomplish this goal."ⁿ²³⁹

Taken altogether, the lack of precedential value of previously litigated trademark cases, the lack of defenses to trademark infringement, and the lack of consequences for an abuse of trademark rights lead to the conclusion that small businesses and individuals should not litigate trademark disputes.ⁿ²⁴⁰ Even where small businesses and individuals can access the legal system, these features of trademark law work against this category of victims. Because litigation is not a viable tool for small businesses and individuals, these victims are left without legal tools that would force trademark bullies to fairly negotiate settlements. It is clear that small businesses and individuals need litigation alternatives with which to defend themselves against trademark bullies. The next Part suggests that shaming trademark bullies may provide one effective alternative.

[*664]

III. Shaming Trademark Bullies

Shaming as a sanction is not a new concept and has been around since biblical times.ⁿ²⁴¹ More recently, shaming has been incorporated (or commentators have argued for incorporation) in a variety of settings, such as shaming criminals, tax evaders, low-performing corporations, and polluting corporations.ⁿ²⁴² In each setting, shaming is seen to be able to both punish the offender as well as deter similar behavior in the future.ⁿ²⁴³ A common thread in the current scholarship on shaming is that the government is generally in the best position to shame the offender, with few commentators arguing that shaming be conducted by private individuals.ⁿ²⁴⁴ This Article steps in to suggest just this: that shaming should be used by small businesses and individuals to punish trademark bullies and deter future trademark bullying. This Part discusses shaming, including the conditions for successful shaming, an explanation of why shaming of trademark bullies has the potential to be effective, in addition to the advantages and disadvantages of shaming.

[*665]

A. Shaming and the Conditions for Success

Shaming is a method of publicizing someone's wrongful behavior, where such behavior is perceived to have violated a social norm.ⁿ²⁴⁵ "Shaming is the process by which citizens publicly and self-consciously draw attention to the bad dispositions or actions of an offender, as a way of punishing him for having those dispositions or engaging in those actions."ⁿ²⁴⁶ From "scarlet letters,"ⁿ²⁴⁷ to special t-shirts,ⁿ²⁴⁸ to personal signs,ⁿ²⁴⁹ the message regarding the wrongful behavior is communicated to the relevant community in which the target of the shaming resides.ⁿ²⁵⁰ While shaming was perhaps more common in the colonial days of the United States,ⁿ²⁵¹ in the past decade, judicially imposed shaming sanctions have been on the rise for non-violent criminal offenders and corporations alike.ⁿ²⁵² In addition, advocates for shaming as a legal alternative or as a complement to traditional civil and criminal sanctions such as fines or imprisonment have been increasingly more vocal in the past two decades.ⁿ²⁵³

Shaming can be effective as a punishment and as a deterrent for future behavior (both for the target as well as other individuals contemplating similar behavior): "The sting comes from the expectation that because one has developed a reputation as a bad and unreliable person, one will lose future opportunities which have significant value."ⁿ²⁵⁴ The future opportunities that may be lost to the target of the shaming may be monetary or non-monetary. For example, when

human-rights activists shamed sports-apparel manufacturer Nike for its employment of children in Southeast Asia and other human-rights [*666] violations, Nike developed a reputation as a poor corporate citizen.ⁿ²⁵⁵ Consumers of Nike stopped purchasing Nike shoes, which led to a current loss in revenue, and also a future loss in revenue as potential consumers were deterred from purchasing Nike products.ⁿ²⁵⁶

Three parties are involved in a shaming situation. First, the shamer is the one who undertakes the shaming. The shamer can be an individual, a group of individuals, corporate entities, or government-sponsored entities such as judges. In the Nike example above, the shamers were individual activists shaming a large corporation, Nike. The second party in a shaming situation is the target of the shaming, or the Nikes of the world. The target is the individual or entity who has transgressed a social norm, and the shaming punishes the target for such transgression. The final party, and in some respects the most important party of the shaming situation, is the community of the shamer and the target.ⁿ²⁵⁷ In the case of corporate targets, such as Nike, the community is made up of the consumers of Nike. The community is an essential party to the shaming, as the shaming cannot be effective if the community does not respond by shunning the target.

However, in order for shaming to be successful, at least four conditions are needed.ⁿ²⁵⁸ The first is that the target is vulnerable to shaming.ⁿ²⁵⁹ If the target possesses some special characteristics, or engages in interactions where reputation is not needed, shaming may not be effective.ⁿ²⁶⁰ It is not necessary that the target actually feel any "shameful" emotion in order for the shaming to be effective.ⁿ²⁶¹ More critical to successful shaming is that the community to which the shaming is directed understands that the target has violated a norm and reduces the level of reputation in which the target was previously held.ⁿ²⁶² Therefore, the second condition for successful shaming is that [*667] the community shares in the norms that the target has transgressed. If the community does not share a particular norm, the shaming will likely fall on deaf ears.

Related to the shared norms within a community is the third condition to successful shaming, which is an overlapping community that consists of consumers (in the case of corporate targets or in the case of individual shamers, followers) of both the target and the shamer. This is needed because the shaming of a target involves the reduction of the target's reputation in the eyes of the community and the potential for a boycott of the target. But one of the ways the community is most effectively activated to boycott the corporate target is if members were previously consumers or followers of the target and the shamer. In the Nike example above, the community included members who were both concerned with human rights (followers of the human-rights activities) and consumers of Nike products. The final condition for successful shaming is the credibility of the shamer.ⁿ²⁶³ But the shamer may not be in the best position to be believed, "[the community] might believe, for example, that the person who unsuccessfully tries to shame someone else is a competitor with the target of his shaming and wants to eliminate his rival - whether it is for a business opportunity or for something else."ⁿ²⁶⁴

Of these conditions, some commentators have argued that in the corporate context, the credibility of the shamer may be an important limitation in a shaming situation.ⁿ²⁶⁵ In particular, these commentators view the shamer's information and her motivations as critical for inducing the community to engage in the shaming of the target.ⁿ²⁶⁶ The reason is that if the shamer does not have the full information on the target's behavior, she may be shaming a target that is not "shameful."ⁿ²⁶⁷ In addition, if the shamer's motive for shaming the target stems from self-interest (for example, personal gain) the community may carry out inappropriate shaming.ⁿ²⁶⁸ While these are important considerations, the strength of the shamer's community membership is arguably a condition precedent to the credibility of the shamer. The reason is that the power to shame rests in the communityⁿ²⁶⁹ and if the shamer does not have a strong community [*668] membership, her shaming will not be successful even if her information is accurate and her motives pure. The situation of Rag City Blues, a small business operating in Hollister, California, is a good example of this. The proprietor of Rag City Blues attempted to utilize the term "HOLLISTER" in connection with its trademark "RAG CITY BLUES" on its blue jeans.ⁿ²⁷⁰ Abercrombie & Fitch, the monolithic corporation that owns the Hollister brand, objected.ⁿ²⁷¹ Although the proprietor of Rag City Blues was able to obtain support from her local council people and other small businesses in Hollister, California, her attempts at shaming Abercrombie & Fitch did not work.ⁿ²⁷² One of the potential reasons for the unsuccessful shaming is the lack of a strong membership in the consumer community. At the time of the

attempted shaming, Rag City Blues had just been restarted, with little time to foster its community membership. ⁿ²⁷³

B. Why Does Shaming Trademark Bullies Have the Potential to Be Effective?

When corporate entities are shamed, there are two potential parties that may be shamed: the individual managers of the corporate entity and the entity itself. ⁿ²⁷⁴ While individual managers, such as the general counsel of the corporation, may bear the responsibility for carrying out the bullying, it is sufficient for the purposes of the shamer that only the corporate entity is shamed. ⁿ²⁷⁵ In addition, it may promote more [*669] responsible shaming to encourage the position that only the corporate entity be shamed. Shaming of trademark bullies can be successful, when, as this Article argues, all four conditions for effective shaming in trademark bullying situations are met.

1. community

An existing community is easily identified with respect to bullies in the consumer-products market. As the consumer-products market has increasingly grown since the turn of the nineteenth century, ⁿ²⁷⁶ providers of consumer products have become more and more aware of the necessity of a loyal customer base through creating a consumer community. ⁿ²⁷⁷ Marketing campaigns to create such a community began in the mid-nineteenth century with promotional programs that offered premiums to loyal customers (such as lithographed pictures). ⁿ²⁷⁸ Other forms of loyalty programs, such as buyer reward programs, began to grow in the late twentieth century. ⁿ²⁷⁹ With the advent of social media in the twenty-first century, consumer-product providers have been able to solidify these communities even further by creating forums for instant feedback between the community and the provider. ⁿ²⁸⁰ For example, 1.5 million businesses maintain "Fan Pages" on Facebook, and over twenty million Facebook users become "fans" of commercial "Fan Pages" each day. ⁿ²⁸¹

[*670] Whether the community that consists of the bully also encompasses the bully's target depends in part on the products of the bully and the victim, or the reason for the targeting of the victim. Some trademark bullying cases arise where the bully is attempting to gain exclusivity in its trademark in a particular market. ⁿ²⁸² In these instances, the community of the bully and the victim are likely to overlap. Entrepreneur Media's attempt to bully all other media-related users of the term "ENTREPRENEUR" in relation to early stage businesses is a good example of this. ⁿ²⁸³ Other trademark bullies attempt to bully small businesses who sell related products that the bully may wish to sell at some point in the future. ⁿ²⁸⁴ In this situation, it is also likely that the community includes both the bully and the victim. For example, Hansen Beverage Corporation's bullying of Rock Art Brewery. Although Hansen does not yet sell alcoholic products, ⁿ²⁸⁵ it has the intention of entering the market at some point in the future. ⁿ²⁸⁶ Finally, some trademark bullies are attempting to control criticism of its brand, and will target small businesses or individuals that run "gripe sites" or parody the bully's trademark. ⁿ²⁸⁷ The reason that trademark bullies target critics or parodists is because the bullies fear that the messages of the critics and parodists are reaching their consumer community and are perhaps helping to shrink that community. ⁿ²⁸⁸

2. shared norms

The consumer community must share in the norms against trademark bullying, or otherwise, the bully will not have done anything [*671] wrong in the eyes of the community. ⁿ²⁸⁹ With respect to the social norm against bullying, this is a widely held norm and is not unique to any particular community. ⁿ²⁹⁰ For example, the Oprah Show recently aired a show highlighting the dangers of bullying and maintains a webpage within her oprah.com website for information on how to handle bullies. ⁿ²⁹¹ In addition, other nationally televised, culturally mainstream shows have featured anti-bullying messages, such as America's Next Top Model. ⁿ²⁹² As such, where there is perceived bullying, the community has spoken out against the violation of the norm, as can be seen in the General Mills and My Dough Girl situation. General Mills, the \$ 23 billion owner of the "PILLSBURY DOUGH BOY" trademark, sent a cease-and-desist letter in May 2010 to Tami Cromar, the small-business owner of "MY DOUGH GIRL." ⁿ²⁹³ Cromar's business has made and sold cookies in Salt Lake City since 2008 and was started by Cromar's use of her retirement fund. ⁿ²⁹⁴ Upon learning of the General Mills' request to Cromar, fans of her business started a Facebook page entitled, "my dough girl

v. pillsbury corporation," which garnered over 2,000 fans in just over eight weeks. ⁿ²⁹⁵

Whether consumer communities share the legal norm against an unreasonable interpretation of trademark rights is less straightforward. For example, in the My Dough Girl case, it is unclear whether the consumer community was simply reacting to the "David v. Goliath" aspect of the case and the economic duress or coercive persuasion by General Mills, or also reacting to the unreasonable interpretation by [*672] General Mills of their rights in the "PILLSBURY DOUGH BOY" trademark. ⁿ²⁹⁶ However, it would appear from consumer-community comments that members are not just reacting to the violation of the norm against bullying, but also to the violation of the legal norm. Like judges, members of the community base their judgments of whether there is a likelihood of confusion on visceral reaction. ⁿ²⁹⁷ Examples of community members discussing the likelihood of confusion are widespread, even if the specific legal terms are not utilized. ⁿ²⁹⁸ For example, in the My Dough Girl case, one community member's Facebook comments hint at the differences in both the use of "MY DOUGH GIRL," as well as the differences in the marketing channels (both factors in the likelihood-of-confusion analysis): "Just picked up my weekly fix at My Dough Girl ... and she is mine, not Pillsbury's! Can't believe that there is any problem with the brand naming ... the dough girl is an attractive pin-up girl of the 2010s for Pete's Sake!" ⁿ²⁹⁹

3. large corporations are vulnerable to shaming

For any business reputation is the key to success. ⁿ³⁰⁰ Reputation, also referred to in trademark law as goodwill, ensures that former customers will make repeat purchases, and it also ensures that potential [*673] customers turn into current customers. ⁿ³⁰¹ One of the impetuses behind a business's development of a consumer community is to cultivate and maintain their reputation with their consumers. ⁿ³⁰² While a business's reputation traditionally rested on the quality of the good or service it sold, in recent years, the extent to which the business is a good "corporate citizen" can also affect its reputation and its sales. ⁿ³⁰³ As discussed above, the norm against bullying is a widespread one and consumers (for the most part) do not condone such behavior. Therefore, when a large corporation is shamed for bullying efforts, the consumer community will likely sanction such behavior. Such sanctions may take the form of boycotts, demonstrations, and/or public criticism, all of which will impact the bully's present and future sales. ⁿ³⁰⁴ This was seen in the Vermonster dispute, where several businesses boycotted Hansen, refusing to sell MONSTER ENERGY drinks at their stores. ⁿ³⁰⁵ In addition, consumers took to the pages of Facebook and publicly criticized Hansen for its behavior. ⁿ³⁰⁶

Large corporations are vulnerable to the reputational harms that come with such sanctioning, as can be seen in quick resolutions to trademark disputes by shamed large corporations, as well as attempts by shamed large corporations to repair their reputations with their consumer communities. For example, where McDonald's Corporation attempted to bully Lauren McClusky from using her "MCFEST" trademark as a trademark for her charity benefit concerts, ⁿ³⁰⁷ shaming of McDonald's encouraged McDonald's to quickly settle the dispute with McClusky. ⁿ³⁰⁸ Even though McDonald's is notorious for litigating such [*674] types of trademark disputes to their final conclusion, ⁿ³⁰⁹ McDonald's eventually agreed to pay McClusky approximately \$ 40,000 to change the concert name. ⁿ³¹⁰ Another example of shaming affecting a large corporation is in the Vermonster dispute, where the proprietor of the targeted small business was able to shame its bully, Hansen Beverage Corporation, into settling. During the shaming, the president of Hansen engaged in a one-on-one conversation with its consumers on Facebook in order to repair its reputation. ⁿ³¹¹

4. small businesses and individuals are credible shamers

The last condition for successful shaming is that the shamer be credible within the community. ⁿ³¹² Where individuals are utilizing the bully's trademark (or a trademark similar to the bully's trademark) for non-commercial uses (such as a fan website, parody, or critical commentary), such individuals will likely be credible shamers. With no commercial interests at stake, such individuals have no ulterior monetary interest in shaming the trademark bully. ⁿ³¹³ For example, in the McFest case, McClusky was using "MCFEST" as a trademark for her charity benefit concerts, not to make a profit, and so was a credible shamer of McDonalds. ⁿ³¹⁴ In addition, where individuals are attempting to comment on

the large corporation's brand through either parody or critical commentary, bullying efforts may be viewed by the community as an attempt to halt freedom of expression.ⁿ³¹⁵ For example, Mattel Corporation attempted to bully artist Tom Forsythe from using Barbie dolls in his artwork by filing a lawsuit against him.ⁿ³¹⁶ Forsythe had created the "Food Chain Barbie" photography series, which depicted naked Barbie dolls in various kitchen and food-oriented situations.ⁿ³¹⁷ The Ninth Circuit district and appellate courts ruled in favor of Forsythe, with the decision of the Ninth Circuit Court of Appeals stating: "The public interest in free and artistic expression greatly [*675] outweighs its interest in potential consumer confusion about Mattel's sponsorship of Forsythe's works."ⁿ³¹⁸

Where individuals or small businesses utilize their trademark for commercial purposes, they may run into a credibility hurdle.ⁿ³¹⁹ Especially in situations where the small business or the individual is in a form of competition with the large corporation, members of the community or the large corporation may accuse the small business or individual of attempting to shame the large corporation in order to gain free publicity.ⁿ³²⁰ These allegations were made in the Rock Art Brewery dispute, where Mark Hall, the President of Hansen, accused Nadeau of attempting a "cheap publicity" stunt.ⁿ³²¹ However, the small business can ward off credibility concerns by explaining the reasons for their shaming of the large corporation. Nadeau did just that, responding to Hall's accusations in a point-for-point posting on Facebook.ⁿ³²²

In addition, as discussed above, if the shamer has a strong community presence, allegations of ulterior motives for shaming will likely not matter, as the Rock Art Brewery's example shows. The reason is that individuals and small businesses are generally assumed to be honest and morally righteous.ⁿ³²³ Further, these individuals and small businesses are usually a strong part of their consumer community and typically are known personally, unlike a faceless large corporation. For example, the proprietor of Fleurty Girl, the small business that was attacked by the NFL for selling t-shirts allegedly infringing on the NFL's trademarks, is a member of the New Orleans community.ⁿ³²⁴ The Fleurty Girl business is run from a reclaimed house in New Orleans that was damaged by Hurricane Katrina and is part of the dynamic [*676] economic reconstruction of the city.ⁿ³²⁵ In addition, self-sufficiency has been the bedrock of the United States, as epitomized by Benjamin Franklin.ⁿ³²⁶ Therefore, entrepreneurship, as opposed to "corporate America," may be viewed as the morally correct approach to business, since the entrepreneur is in many cases simply seeking to make a self-sustaining wage for herself and her family. This is in contrast to the large corporation (even if the corporation once started out as an entrepreneurial enterprise) that is viewed as an impersonal entity without any form of morality, simply seeking ever-larger profits at any cost.ⁿ³²⁷

In sum, where all of the conditions are met (community, shared norms, targets are vulnerable to shaming, and the shamers are credible), shaming of trademark bullies has the potential to be successful in both punishing the bully and deterring future behavior. The punishment of the trademark bully comes from the community-imposed sanctions. The losses the bully faces can be monetary and non-monetary: immediate sales may be lost due to consumer boycotts, or the bully's reputation as a whole may be diminished by its actions. In addition, the shaming has the potential to deter the bully from future bullying, as well as possibly other large corporations who would bully. For example, Monster Cable, a once-notorious trademark bully, has apparently ceased in its attempt to build a famous trademark.ⁿ³²⁸ This decision came after its chief executive officer learned that the company's attempted bullying of Monster Mini Golf would push the small business into bankruptcy.ⁿ³²⁹

C. Advantages and Disadvantages of Shaming

There are a number of benefits to shaming as a way to fight back against trademark bullies, the foremost of which is that it provides small businesses and individuals with an effective litigation alternative. However, there are also a number of disadvantages to shaming, [*677] including the reality that shaming of trademark bullies will not work in every instance. This Section discusses both the advantages and disadvantages in turn.

1. advantages of shaming

As noted earlier, small businesses and individuals cannot, or should not, litigate trademark disputes with trademark

bullies due to their inability to access legal tools and the nature of trademark law and litigation. Due to this, many small businesses and individuals are left without tools with which to defend themselves against a bullying attack. The advantage of shaming is that it provides an effective alternative to litigation for small businesses and individuals to defend themselves. In particular, shaming has the potential to solicit potential providers of low-cost legal assistance (for those victims who cannot access legal tools), as well as provide low-cost methods to effectively resist a trademark bully's demands (for those victims who should not litigate).

First, shaming has the potential to assist small businesses and individuals in soliciting providers of low-cost legal assistance for those victims who cannot otherwise access legal tools. It is likely that some of the small businesses and individuals who are victims of bullying could qualify for low-cost legal assistance through services such as Legal Services.ⁿ³³⁰ However, it is also likely that these organizations will not have the trademark experience needed to assist in defending a trademark-infringement case.ⁿ³³¹ And while these organizations may work with the local bar and have the ability to refer the victim's case to a pro bono trademark attorney, the time it takes to obtain such pro bono assistance may be longer than what the bully has demanded in its cease-and-desist letter (if such assistance can be obtained at all).ⁿ³³² The benefit to shaming, if undertaken by the victim as soon as the cease-and-desist letter is received, is that there is a potential for soliciting low-cost legal assistance within the time frame demanded in the letter. The reason is that the local legal community will be alerted to the bullying at the same time other community members are alerted to it. This means that those community members with trademark expertise [*678] (or the ability to refer to pro bono trademark lawyers) will likely be able to offer their assistance within the time-frame demanded in the cease-and-desist letter, or perhaps just shortly after. For example, in Fleurty Girl's situation, a local attorney offered to represent the small business for free within a few days of Thom's shaming of the NFL.ⁿ³³³

Second, shaming has the potential to provide an effective, low-cost litigation alternative to resisting a trademark bully.ⁿ³³⁴ Not too unlike the stocks during the Colonial era, shaming in the twenty-first century takes place in the crowded square of cyberspace through social media and the Internet. Communication through the Internet and social media is an inexpensive method to alert the community to the bullying. A good majority of the targeted small businesses and individuals will likely already have access to the Internet.ⁿ³³⁵ Of these small businesses and individuals, it is likely that a high percentage of those connected to the Internet will have a personal website, a blog, an email account and/or some form of social-media account, such as Facebook, Twitter, MySpace, Blogger.com, etc.ⁿ³³⁶ The shamer can reach a large audience simply through "tweeting"ⁿ³³⁷ about receiving the cease-and-desist letter, in addition to posting the letter online for the whole community to see and judge for themselves.ⁿ³³⁸ Therefore, there should be no additional monetary cost to the bullying victim to publicize the bullying.

In addition, community members who feel similarly about the bullying can just as quickly and inexpensively "spread the word" about the bullying by "retweeting" or "liking" a Facebook post.ⁿ³³⁹ This helps [*679] to insure that more community members know about the bullying and sanction the bully. Further, shaming through social-media outlets will likely cause traditional media outlets, such as newspapers and television stations, to provide broader coverage of the victim's issue.ⁿ³⁴⁰ While in previous years, obtaining traditional media coverage would require some monetary expenditure, such as holding press conferences or issuing a press release, more and more traditional media outlets appear to be looking to social media for issues to discuss in their news coverage.ⁿ³⁴¹ As such, there is likely to be no additional costs with obtaining traditional media coverage.

2. disadvantages/objections to shaming

Unfortunately, shaming is not a silver bullet to the problem of trademark bullying, as there are a number of downsides to shaming. This Section will discuss three of the primary disadvantages/objections to shaming trademark bullies, specifically that shaming may be unsuccessful, the potential for unwarranted or overzealous shaming, and that shaming may be too costly to undertake.

One of the primary disadvantages is that shaming will not always be successful. As discussed above, there are at least four conditions that need to be met for a successful shaming and not every situation will meet each of the

conditions. The court of public opinion can be fickle, and, for example, if the small business or individual is not credible for any number of reasons, ⁿ³⁴² the community may not galvanize on the shamer's behalf. In addition, if the small business or individual does [*680] not properly publicize the bullying situation, the information will not disperse to a large segment of the community. The attempt by Rag City Blues to shame Abercrombie & Fitch is a good example of this. Although the proprietor attempted to shame Abercrombie & Fitch through a letter-writing campaign to the U.S. PTO, these letters were not publicized. ⁿ³⁴³ In addition, the proprietor did not utilize social media in any respect, nor did she post the cease-and-desist letter. Although there were three local news articles written about the dispute (two in Hollister, California, where Rag City Blues is located and one in Columbus, Ohio, where Abercrombie & Fitch is headquartered), no other media outlet picked up the story at the time of the attempted shaming. ⁿ³⁴⁴

Another objection to shaming is that there is a very real potential for unwarranted and/or overzealous shaming. While this Article has delineated the difference between reasonable trademark enforcement and trademark bullying by only focusing on the norms that have been violated, shamers and communities may not conduct such a nuanced analysis. Not every case of trademark enforcement by a large corporation will be a bullying situation, ⁿ³⁴⁵ but there is the possibility that shamers and/or communities focus simply on the "David v. Goliath" aspect of the situation. ⁿ³⁴⁶ If there has been no violation of [*681] norms (unreasonable interpretation of rights and use of intimidation tactics), then any shaming of the large corporation would be unwarranted. In addition, shamers can become overzealous in their shaming efforts and instead of shaming the bullying behavior, personalize the situation, or take the shaming to a whole new level. This was seen in The North Face versus The South Butt conflict, where The South Butt's shaming of The North Face after the latter filed litigation came close to the limits of responsible shaming. ⁿ³⁴⁷ Among other items, The South Butt posted a notice "We're Being Sued!" on their webpage after the litigation was filed, and South Butt's attorney issued a press release calling upon The North Face's managers to "adopt some corporate anger management protocol." ⁿ³⁴⁸

Finally, shaming may be too costly for some small businesses or individuals. The costs of shaming may come from the potential (or the perceived potential) for liability stemming from shaming, including the posting of the cease-and-desist letters. Liability for shaming may come from a variety of sources, including copyright infringement allegations, as some senders of cease-and-desist letters include language that alleges that any publication of the letter is a copyright infringement. ⁿ³⁴⁹ One such letter states, "Any publication, dissemination or broadcast of any portion of this letter will constitute a ... violation of the Copyright Act, and You are not authorized to publish this letter in whole or in part absent our express written authorization." ⁿ³⁵⁰ If proven, willful copyright infringement carries potential statutory damages of up to \$ 150,000. ⁿ³⁵¹ The threat of this type of liability, on top of the potential for trademark-infringement litigation, is often enough to keep small businesses and individuals from shaming the bully. ⁿ³⁵² For example, one company that routinely includes a copyright infringement claim to [*682] prevent shaming is DirectBuy, an online wholesale retailer of furniture and home supplies. DirectBuy's cease-and-desist letter ends with the following paragraph: "Please be aware that this letter is copyrighted by our law firm, and you are not authorized to republish this in any manner. Use of this letter in a posting, in full or in part, will subject you to further legal causes of action." ⁿ³⁵³ Prior to Public Citizen, a nonprofit organization, posting and responding to DirectBuy's letter, no other instances of its cease-and-desist letter were published, indicating that DirectBuy's threat of copyright infringement works to make shaming too costly for small businesses and individuals. ⁿ³⁵⁴

Another form of liability stemming from shaming may come in the form of a defamation lawsuit against the shamer, whereby the bully alleges that its reputation has been damaged by the shamer's false statements. A defamation cause of action requires the plaintiff to prove at least three elements: (1) "a false and derogatory statement" about the plaintiff; (2) with such statement being unprivileged; and (3) that the defendant at least negligently published such statement about plaintiff. ⁿ³⁵⁵ The defense to a defamation lawsuit is typically that the statement made by the defendant was a true statement of fact. ⁿ³⁵⁶ Corporations, the likely targets of small businesses' or individuals' shaming, may be defamed as to its business reputation. ⁿ³⁵⁷ Although shamers may make true statements about their targets, and defamation suits are difficult to prove, ⁿ³⁵⁸ this may not stop large corporations from alleging defamation, as a corporation's reputation is one of its more important assets. Recently filed commercial defamation suits show that large

corporations have no qualms about filing lawsuits against "gripe [*683] websites," blogs, and the like.ⁿ³⁵⁹ As with copyright infringement, the threat of a defamation lawsuit carries the potential for damages to be awarded, and therefore the real possibility that shaming may be too costly for small businesses or individuals.

IV. Proposed Legal Reforms to Harness the Power of Shaming

The disadvantages and objections to shaming trademark bullies identified above are not insurmountable, and the incentives to overcoming these disadvantages are great as small businesses and individuals need tools with which to resist trademark bullies. One of the ways in which shaming can be more successful when it is undertaken is if small businesses and individuals understand the conditions under which shaming will work. By providing a detailed analysis of such conditions in Part III, this Article hopes to educate small businesses and individuals. In addition, there are some legal reforms that can be undertaken in order to lower the costs of shaming and assist small businesses and individuals in the pre-litigation setting. The suggestions include providing small businesses and individuals with a protected space for shaming and with additional pre-litigation negotiation leverage through a groundless-threats cause of action. In addition, this Part provides suggestions to promote responsible shaming as a way to avert the potential problem of overzealous or unwarranted shaming.

A. Providing Protected Spaces for Shaming

As discussed above, one of the ways in which shaming can be too costly for some small businesses or individuals is where there is a possibility for legal liability for actions other than trademark infringement. While the First Amendment provides general freedom-of-speech protection,ⁿ³⁶⁰ commercial speech is not afforded the highest level of protection available under First Amendment jurisprudence.ⁿ³⁶¹ And in some instances, particularly in situations where the shamer is a competitor of the bully, allegations of bullying and shaming may have the potential to be deemed commercial speech.ⁿ³⁶² This would mean that [*684] the shamer's communications would not be protected speech, exposing the shamer to liability under a wide array of causes of action, including defamation, economic injury, misleading advertising, etc.ⁿ³⁶³

One reform that could assist in lowering the costs of shaming is providing a protected space for shaming, and, in particular, protection of the right to post copies of cease-and-desist letters, along with the right to discuss the merits of the letter. Professor Eric Goldman has suggested that one way a protected space could be provided is through immunity from liability which would "exculpate [cease-and-desist] letter recipients from republishing the letter."ⁿ³⁶⁴ This reform could come through various forms, including legislative reform or case law.ⁿ³⁶⁵ For liability that may stem from causes of action where the First Amendment is a defense, immunity may be best provided through the courts. Most, if not all, of First Amendment interpretation is done through the courts,ⁿ³⁶⁶ and so this may be the quickest and most effective way to provide protected spaces for shaming. For liability stemming from a copyright-infringement cause of action, legislative reform, such as amending the Copyright Act, may be needed. Since copyright protection in the United States is a statutory prerogative, courts may not feel as comfortable interpreting immunity where copyright infringement is claimed.ⁿ³⁶⁷

B. Assisting in Effective Shaming: The "Groundless Threats of Trademark Infringement" Cause of Action

An additional cost to shamers is the potential that the shaming will not work because the community may not censor the bully. One of the reasons that the community does not shame the bully may be due to the fact that "shaming does connote objectionable forms of social stratification and potentially suffocating impositions of communal norms."ⁿ³⁶⁸ Another reason that shaming may not be successful is if the [*685] target is not vulnerable to shaming or does not take the shamer seriously. One way to lower the costs for potentially unsuccessful shaming is by enacting a cause of action for "groundless threats of trademark infringement" similar to that enacted in various nations around the world, including Belize, India, Malta, Singapore, and the United Kingdom.ⁿ³⁶⁹ To use the U.K. law as an example, the U.K. law provides victims of trademark-infringement threats with the ability to mount a legal attack on the sender of the threat where the threat is "groundless." As a defense, the bully must prove that "the acts in respect of which proceedings were

threatened constitute (or if done would constitute) an infringement of the registered trade mark concerned." ⁿ³⁷⁰ If the defendant cannot so prove, then the plaintiff may be entitled to a judicial declaration that the threats are unjustified, an injunction against the threats, and possibly monetary damages. ⁿ³⁷¹ The policy rationale for this "groundless infringement threats" claim is to prevent against those holders of intellectual property rights who are "'willing to wound but afraid to strike' from holding the sword of Damocles above another's head." ⁿ³⁷²

The United States should seriously consider adopting a similar cause of action, as it would assist in effective shaming in two ways. First, unlike uncodified norms, statutory laws offer a concrete reference point for shaming, and as such can be more of a rallying point for a community. ⁿ³⁷³ Since such a cause of action adopts both norms that are violated through trademark bullying and over-enforcement of trademark rights, each community member has the freedom to find in such law the expressive elements that are important to them. ⁿ³⁷⁴ Therefore, those community members who may have previously been leery of shaming the bully based simply on ephemeral norms may be more likely to shame a trademark bully. In addition, a cause of action for groundless threats of trademark infringement has the potential to make bullies take the shamer more seriously by adding a potential cost to the bullying. ⁿ³⁷⁵ In some situations, the bully may ignore the attempted shaming, or decide to file a lawsuit to cut short the shaming time period because the [*686] bully knows that the small business or individual will not have the resources to sustain a protracted shaming defense. ⁿ³⁷⁶ With a cause of action that could place liability on bullies (and a potential monetary recovery for the victim), a potential burden will be added, which would cause even large corporations to take heed of shaming before filing a lawsuit. ⁿ³⁷⁷

However, there may be various objections to adopting such cause of action. One objection, which is the subject of debate in the United Kingdom, is that the groundless-threats cause of action tends to encourage a "sue-first, talk-later" approach. ⁿ³⁷⁸ This objection likely arose from U.K. case law, which tended to broadly interpret correspondence that allegedly contained groundless threats of trademark infringement. ⁿ³⁷⁹ More recently, however, it would appear that this objection has been tempered somewhat, as the U.K. courts have issued recent decisions that more narrowly interpret such claims. ⁿ³⁸⁰ Likewise, a similar objection to the adoption of the cause of action in the United States could be handled by U.S. courts narrowly interpreting letters that allegedly contain groundless threats of trademark infringement, as well as interpreting such letters in context. For example, if the parties are already in negotiation, as was the situation in the recent case of *Best Buy Co. Inc. v. Worldwide Sales Corp. Espana S.L.*, ⁿ³⁸¹ a response letter containing an allegedly groundless threat is less likely to be construed as such. If, however, a threat of trademark infringement is made within the first cease-and-desist letter, as was the situation in the case of *Prince Plc v. Prince Sports Group Inc.*, ⁿ³⁸² a court should be more inclined to construe such a threat as groundless. This manner of interpretation would incentivize trademark holders to send cease-and-desist letters that do not threaten litigation right away, but provide notice of potential infringement and propose discussions to resolve the potential dispute. A related objection, that every accused infringer will either utilize this cause of action in every situation or counterclaim in [*687] every lawsuit, can also be addressed by a court's narrow interpretation of cease-and-desist letters. This will limit claims of groundless threats of trademark infringement to those cases that are in fact groundless and incentivize accused infringers to bring only claims with merit.

C. Promoting Responsible Shaming

One further objection identified above is the potential for overzealous or unwarranted shaming by small businesses, individuals, or even by the community. A case that exemplifies the potential for overzealous shaming is *The South Butt* conflict, briefly mentioned above. After *The North Face* filed its lawsuit against *The South Butt*, it sought a preliminary injunction to keep *The South Butt* from continuing to sell its products while litigation was pending. ⁿ³⁸³ While *The South Butt* had publicized *The North Face* actions prior to the lawsuit being commenced against it, after the lawsuit was filed, *The South Butt* increased and deepened the tone of its shaming of *The North Face*. ⁿ³⁸⁴ A statement made by *The South Butt*'s attorney highlights this: "Perhaps North Face should consider embracing its parent company's stated commitment to 'consideration and respect,' applaud the spirit and diligence of this young man, adopt some corporate anger management protocol, and save some money on unnecessary legal fees in the process" ⁿ³⁸⁵

In addition, The South Butt adopted a similar tone in its court filings, which earned its attorneys a reprimand by the judge for the case.ⁿ³⁸⁶ This judicial reprimand appeared to rein in The South Butt, as its attorney declined to provide further statements.ⁿ³⁸⁷ Although this is only one case, it is likely that judicial reprimands are effective against overzealous shaming by small businesses and individuals where the matter has been taken to litigation.

Outside of litigation, self-regulation may be the answer to promoting responsible shaming as there are many incentives to do so. [*688] For the shamer, an incentive to self-regulating its shaming behavior stems from the need to maintain its credibility with the community. One of the reasons the small business or individual is credible is that they are considered to be the morally righteous party in the dispute. Overzealous or unwarranted shaming may cause the shamer to lose its moral upper-hand, thereby causing the community to not take part in the shaming. For the shamer and the community, the threat of litigation may provide an inherent incentive to shame responsibly, as well as to self-regulate the shaming. Some targets of overzealous or unwarranted shaming may use litigation (by seeking a preliminary injunction) as a way to end the shaming. This tactic was used by The North Face, and as described above, the tactic was mostly successful. Since avoiding litigation is the goal of shamers and their communities, the ability of targets to file a lawsuit if they are "pushed over the edge" has the potential to work as an effective incentive to stem unwarranted or overzealous shaming. There is limited anecdotal evidence to support that communities engage in self-regulation of responsible shaming. For example, in the My Dough Girl case, the creator of the Facebook support page wrote:

Wow, great to see so many new supporters of my dough girl! want to take the next step? 1. post a polite plea to pillsbury on facebook to cease their "cease and desist", and please be polite. pillsbury fans need to know what's going on, but don't need to be bullied like pillsbury is bullying my dough girl. THANK YOU.ⁿ³⁸⁸

Conclusion

Small businesses and individuals enrich the marketplace with both product alternatives and with social commentary and criticism. However, trademark bullying of small businesses and individuals has the potential to both dampen competition and lessen the discourse on cultural phenomena, of which trademarks are a large part. Therefore, trademark bullying that occurs outside of the courtrooms should be recognized as a serious problem that needs addressing. In particular, the special circumstances that small businesses and individuals are in - leading to their inability to effectively fight bullies in the pre-litigation setting - need to be more closely examined. This Article has argued that shaming, if responsibly undertaken, has the potential in many instances [*689] to be an effective litigation alternative. In addition, this Article has suggested some legal reforms that are needed in order to lower the costs of shaming so as to make shaming more widely available and effective. Small businesses and individuals need an arsenal of tools to effectively resist trademark bullies in the pre-litigation setting and shaming provides one such tool.

n10. See *id.* at 5.

n11. See Stacey Knapp, *Balancing the Crucible: The Revolving Conflict Between Fair Use and Corporate Use in the Battle to Control Domain Names*, 1 Okla. J.L. & Tech. 10, 17-18 (2004), http://www.okjolt.org/index.php?option=com_content&view=article&id=84:1-jl-a-tech-10-2004-&catid=42:special-features&Itemid=65 (discussing Warner Brothers' tactics in bullying owners of domain names that incorporate any item related to the Harry Potter book-series franchise).

n12. See K.J. Greene, *Abusive Trademark Litigation and the Incredible Shrinking Confusion Doctrine - Trademark Abuse in the Context of Entertainment Media and Cyberspace*, 27 Harv. J.L. & Pub. Pol'y 609, 632 (2004) ("The 'effectiveness of lawsuits to silence corporate critics derives in part from the disparity of resources between the plaintiff corporation and the defendant ...'." (quoting Sarah Mayhew Schlosser, *The High Price of (Criticizing) Coffee: The Chilling Effect of the Federal Trademark Dilution Act on Corporate Parody*, 43 Ariz. L. Rev. 931, 948 (2001))).

n13. For example, among small-business owners, only 8.3 percent have attained a professional degree. See Chad Moutray, *Baccalaureate Education and the Employment Decision: Self-Employment and the Class of 1993*, at 30 (Oct. 2008) (Office of Advocacy, U.S. Small Bus. Amin., unnumbered working paper), available at <http://archive.sba.gov/advo/research/rs333tot.pdf>. While a small percentage of small-business owners have a graduate degree, it is likely that not all of these graduate degrees are law degrees.

n14. See, e.g., Letter from National Football League, to Ms. Thom, *Fleurty Girl* (Jan. 13, 2010).

n15. See, e.g., Letter from Diane Reed, *supra* note 1 ("Hansen created, manufactures and distributes the MONSTER ENERGY(R) line of drinks and supplements under its famous MONSTER and MONSTER ENERGY(R) mark." (emphasis added)). Being "famous" in trademark law is a term of art, requiring a high burden of proof. See 15 U.S.C. § 1125(c)(2)(A) (2006) ("[A] mark is famous if it is widely recognized by the general consuming public of the United States as a designation of source of the goods or services of the mark's owner.").

n16. See, e.g., Letter from Diane Reed, *supra* note 1.

n17. See *id.* (providing two weeks from date of letter); Letter from National Football League, *supra* note 14 (providing nine days from date of letter).

n18. See Rosemary J. Coombe, *The Cultural Life of Intellectual Properties: Authorship, Appropriation, and the Law* 66 (1998) ("[Trademark law] becomes the ruse by which corporations protect themselves from competition and from uncompensated circulation of their cultural indicators.").

n19. For in-depth discussions of other harms arising from trademark bullying, including violations of the First Amendment and harms to consumers, see generally Bollier, *supra* note 9, at 188-89; Eric Goldman, *Online Word of Mouth and Its Implications for Trademark Law*, in *Trademark Law and Theory: A Handbook of Contemporary Research* 404 (Graeme B. Dinwoodie & Mark D. Janis eds., 2008) [hereinafter *Trademark Law and Theory*]; Greene, *supra* note 12, and William E. Ridgway, *Revitalizing the Doctrine of Trademark Misuse*, 21 *Berkeley Tech. L.J.* 1547 (2006).

n20. See Russell L. Parr, *The Value of Trademarks*, in *Trademarks, Copyrights, and Unfair Competition for the General Practitioner* 229, 246 (Am. Law Inst.-Am. Bar Assoc. Comm. on Continuing Prof'l Educ., Course of Study Materials No. C913, 1994) ("Large-scale introduction of a new trademark carries enormous costs."); Peter Robison, *Time Warner, Broadwing, Change Names After Losses*, *Igor* (Oct. 16, 2003), <http://www.igorinternational.com/press/bloomberg-corporate-business-name.php> ("Changing a corporate name can take a year and cost tens of millions of dollars.").

n21. See, e.g., Letter from National Football League, *supra* note 14.

n22. Starting a business is a resource-intensive undertaking and many small businesses operate at a very small margin of error, as proprietors often underestimate the amount of capital needed to run the business in the first few years. See generally Mary Jane Byrd & Leon C. Megginson, *Small Business Management: An Entrepreneur's Guide* 13, 25, 181 (6th ed. 2009). Approximately 50 percent of all small businesses fail within the first five years of operation. See Get Ready, U.S. Small Business Administration, http://www.sba.gov/smallbusinessplanner/plan/getready/SERV_SBPLANNER_ISENTFORU.html (last visited Nov. 4, 2010) (on file with author; webpage is no longer available). As such, any unexpected expense or cost, such as a loss of inventory and payment of attorney's fees may push the business into bankruptcy.

n23. See, e.g., Letter from Diane Reed, *supra* note 1.

n24. Non-monetary costs may include the emotional strain of being involved in litigation. For example, when Ford Motor Corporation sued seven individuals to gain control over domain names that included one of Ford's purported trademarks ("FORD," "JAGUAR," etc), the Electronic Frontier Foundation provided free legal assistance. See EFF Wins a Partial Victory in Ford Case, *EFFector*, Jan. 10, 2002, <http://w2.eff.org/effector/HTML/effect15.01.html#II>. Notwithstanding the free legal assistance, two of the defendants decided not to pursue the litigation, citing the emotional strain of the litigation. See Bollier, *supra* note 9, at 126.

n25. See *infra* Part II.B.1.

n26. See generally Graeme Dinwoodie, *Developing Defenses in Trademark Law*, 13 *Lewis & Clark L. Rev.* 99 (2009) (arguing for courts to adopt stronger affirmative trademark defenses); Michael Grynberg, *Things Are Worse Than We Think: Trademark Defenses in a "Formalist" Age*, 24 *Berkeley Tech. L.J.* 897 (2009) (arguing for statutory amendments to encapsulate stronger trademark defenses); William McGeeveran, *Rethinking Trademark Fair Use*, 94 *Iowa L. Rev.* 49 (2008) (arguing for a stronger fair-use defense).

n27. While strong defenses may help in the pre-litigation stage (because strong defenses can convince a bully that their trademark-infringement case is not a strong one), where the bullying victim is a small business or individual, trademark bullies may choose to ignore defense arguments because it is common knowledge that such victims will likely not have the resources to make the same arguments in litigation.

n28. Although shaming has been widely written about in the criminal context, see Dan M. Kahan, *What Do Alternative Sanctions Mean?*, 63 *U. Chi. L. Rev.* 591, 631-53 (1996); Dan M. Kahan & Eric A. Posner, *Shaming White-Collar Criminals: A Proposal for Reform of the Federal Sentencing Guidelines*, 42 *J.L. & Econ.* 365 (1999), it has received only sporadic, descriptive coverage in the intellectual property context. See Mark F. Schultz, *Fear and Norms and Rock & Roll: What Jambands Can Teach Us About Persuading People to Obey Copyright Law*, 21 *Berkeley Tech. L.J.* 651, 681-88 (2006) (describing shaming as a sanction in the jamband community); Dotan Oliar & Christopher Sprigman, *There's No Free Laugh (Anymore): The Emergence of Intellectual Property Norms and the Transformation of Stand-Up Comedy*, 94 *Va. L. Rev.* 1787, 1824-25, 1862 (2008) (describing shaming as a sanction for comedians who infringe on other comedians' material).

n29. See *infra* Part III.C.1.

n30. Cf. *Trade Marks Act, 1994*, c. 26, § 21 (Eng. & Wales).

n31. See Lionel Bently, *From Communication to Thing: Historical Aspects of the Conceptualisation of Trade Marks as Property*, in *Trademark Law and Theory*, *supra* note 19, at 3; Mark P. McKenna, *The Normative Foundations of Trademark Law*, 82 *Notre Dame L. Rev.* 1839, 1840 (2007).

n32. See, e.g., 156 *Cong. Rec.* S349 (daily ed. Jan. 28, 2010) (statement of Sen. Leahy) ("I have become concerned, however, that large corporations are at times abusing the substantial rights Congress has granted them in their intellectual property to the detriment of small businesses.").

n33. See Deven R. Desai & Sandra L. Rierson, *Confronting the Genericism Conundrum*, 28 *Cardozo L. Rev.* 1789, 1791 (2007).

n34. For more in-depth coverage, see generally Robert G. Bone, *Hunting Goodwill: A History of the Concept of Goodwill in Trademark Law*, 86 *B.U. L. Rev.* 547, 548-49 (2006); Glynn S. Lunney, Jr., *Trademark Monopolies*, 48 *Emory L.J.* 367, 369 (1999).

n35. See Jane C. Ginsburg, Jessica Litman & Mary L. Kevlin, *Trademark and Unfair Competition Law* 43 (4th ed. 2007).

n36. Compare *Canal Co. v. Clark*, 80 U.S. (13 Wall.) 311, 322 (1871) ("The office of a trade-mark is to point out distinctively the origin, or ownership of the article to which it is affixed; or, in other words, to give notice who was the producer."), with Lanham Act, Pub. L. No. 79-489, § 45, 60 Stat. 442, 443 (1946) (codified as amended at 15 U.S.C. § 1127 (2006)) ("The term 'trade-mark' includes any word, name, symbol, or device or any combination thereof and used by a manufacturer or merchant to identify his goods and distinguish them from those manufactured or sold by others.").

n37. See McKenna, *supra* note 31, at 1900; Mark A. Lemley, *The Modern Lanham Act and the Death of Common Sense*, 108 *Yale L.J.* 1687, 1688 (1999).

n38. See Rochelle Cooper Dreyfuss, *Expressive Genericity: Trademarks as Language in the Pepsi Generation*, 65 *Notre Dame L. Rev.* 397, 399 (1990) ("The changing legal climate has tended to grant trademark owners greater control over their marks ..."). An aggressive strategy of trademark enforcement is needed in order to reap the benefits of the legal expansions, and therefore, larger businesses with the resources to undertake such a strategy are oftentimes the beneficiaries of such expansions.

n39. See Greene, *supra* note 12, at 640 ("The fear that not bringing a suit now might foreclose or damage interests in bringing suit later may lead to unnecessary litigation.").

n40. Currently, almost anything can function as a trademark, so long as it is source identifying. See *Qualitex Co. v. Jacobson Prods. Co., Inc.*, 514 U.S. 159, 162, 163 (1995). By contrast, trademarks consisting of color (as an example) were not protected in the late nineteenth or mid-twentieth centuries. See, e.g., *A. Leschen & Sons Rope Co. v. Broderick & Bascom Rope Co.*, 201 U.S. 166, 171 (1906) ("[A] trade-mark which may be infringed by a streak of any color, however applied, is manifestly too broad."); *James Heddon's Sons v. Millsite*

Steel & Wire Works, Inc., 128 F.2d 6, 9 (6th Cir. 1942) ("Color, except in connection with some definite, arbitrary symbol or in association with some characteristics which serve to distinguish the article as made or sold by a particular person is not subject to trademark monopoly.").

n41. J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* § 4:4 (4th ed. 2010).

n42. Milton Handler & Charles Pickett, *Trade-Marks and Trade Names - An Analysis and Synthesis: I*, 30 Colum. L. Rev. 168, 169 (1930).

n43. See *id.* at 168.

n44. See Frank I. Schechter, *The Historical Foundations of the Law Relating to Trade-Marks* 161 (1925).

n45. See Handler & Pickett, *supra* note 42, at 169.

n46. See, e.g., *Kellogg Co. v. Nat'l Biscuit Co.*, 305 U.S. 111 (1938).

n47. See James Love Hopkins, *The Law of Trademarks, Tradenames and Unfair Competition* § 4, at 14 (4th ed. 1924) (stating the author's opinion that trademark rights were "broader and by far ... more valuable" than trade-name rights).

n48. The first mentions of "secondary meaning" appeared in the late nineteenth century and with greater frequency in the early part of the twentieth century. See, e.g., *Elgin Nat'l Watch Co. v. Ill. Watch Case Co.*, 179 U.S. 665, 666 (1900); *R. Guastavino Co. v. Comerma*, 180 F. 920, 921 (S.D.N.Y. 1910); *Pepper v. Labrot*, 8 F. 29, 36 (D. Ky. 1881). The "Ten Year Clause" of the 1905 Act, whereby a trade name that had been in use for ten years prior to the passage of the Act was allowed to be federally registered even though it did not otherwise qualify as a technical trademark, was considered a codification of the secondary meaning rule. See Harry D. Nims, *The Law of Unfair Competition and Trade-Marks* § 43, at 78 (2d ed. 1917).

n49. See *E. Columbia, Inc. v. Waldman*, 181 P.2d 865 (Cal. 1947).

n50. *Handler & Pickett*, *supra* note 42, at 200; see also *Armstrong Paint & Varnish Works v. Nu-Enamel Corp.*, 305 U.S. 315 (1938).

n51. Compare 15 U.S.C. § 1052(f) (2006), with Trade-Mark Act of 1905, Pub. L. No. 58-84, § 5(b), 33 Stat. 724, 725-26.

n52. See *Two Pesos, Inc. v. Taco Cabana, Inc.*, 505 U.S. 763, 769 (1992).

n53. *Standard Oil Co. v. Standard Oil Co.*, 252 F.2d 65, 71 (10th Cir. 1958).

n54. See *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 164 (1995).

n55. *Zatarains, Inc. v. Oak Grove Smokehouse, Inc.*, 698 F.2d 786, 788 (5th Cir. 1983).

n56. For example, Fox News Corporation has registered its slogan, "Fair & Balanced" as a trademark, FAIR & BALANCED Registration No. 2,213,427, and brought a lawsuit to stop the use of the slogan by a third party. See *Fox News Network LLC v. Penguin Grp. (USA) Inc.*, 31 Media L. Rep. (BNA) 2254 (S.D.N.Y. 2003).

n57. For example, Zatarains, Inc., claiming that their descriptive trademarks "FISH-FRI" and "CHICK-FRI" had acquired secondary meaning, filed a lawsuit against three out of the four users of the term "fish fry." See *Zatarains, Inc.*, 698 F.2d at 788.

n58. See Lisa P. Ramsey, *Descriptive Trademarks and the First Amendment*, 70 Tenn. L. Rev. 1095, 1162 (2003). Professor Ramsey's article provides an excellent argument of how trademark protection of descriptive trademarks violates the First Amendment. See *id.*

n59. See Dreyfuss, *supra* note 38, at 405.

n60. See 15 U.S.C. §§1114(1)(a), 1125(a)(1) (2006); see also *Two Pesos, Inc. v. Taco Cabana, Inc.*, 505 U.S. 763, 769 (1992); Restatement (Third) of Unfair Competition § 20 cmt. d (1993) ("The term 'likelihood of confusion' has long been used to describe the standard of liability for trademark infringement in actions at common law and under federal and state trademark and unfair competition statutes.").

n61. See Richard L. Kirkpatrick, *Likelihood of Confusion in Trademark Law* § 1:1 (1995); see also *Lois Sportswear, U.S.A., Inc. v. Levi Strauss & Co.*, 799 F.2d 867, 875 (2d Cir. 1986); *Cont'l Motors Corp. v. Cont'l Aviation Corp.*, 375 F.2d 857, 860 & n.8 (5th Cir. 1967); McCarthy, *supra* note 41, § 23:3.

n62. See, e.g., *Thomson v. Winchester*, 36 Mass. (16 Pick.) 214, 216 (Mass. 1837).

n63. See, e.g., *Borden Ice Cream Co. v. Borden's Condensed Milk Co.*, 201 F. 510, 512-13 (7th Cir. 1912). This is perhaps due, in part, to the fact that most trademark owners only utilized their trademark in one product category. See Sara Stadler Nelson, *The Wages of Ubiquity in Trademark Law*, 88 Iowa L. Rev. 731, 777 (2003) ("In 1927, the vast majority of trademarks identified only a single good, or, at most, a single class of goods.").

n64. See Pamela Walker Laird, *Advertising Progress: American Business and the Rise of Consumer Marketing* 31 (1998) (discussing the post-war expansion of consumer products).

n65. 247 F. 407 (2d Cir. 1917).

n66. *Id.* at 410.

n67. See McKenna, *supra* note 31, at 1901.

n68. Trade-Mark Act of 1905, Pub. L. No. 58-84, § 16, 33 Stat. 724, 728, repealed by Lanham Act, Pub. L. No. 79-459, § 46(a), 60 Stat. 427, 444 (1946) (codified as amended in various sections of 15 U.S.C.) (emphasis added).

n69. See Lanham Act § 32(1)(a) ("(1) Any person who shall, in commerce, (a) use without the consent of the registrant, any reproduction, counterfeit, copy, or colorable imitation of any registered mark in connection with the sale, offering for sale, or advertising of any goods or services ... shall be liable to a civil action by the registrant ...").

n70. The amendments in 1962 deleted the requirement that confusion be of "purchasers as to the source of origin of such goods or services." McCarthy, *supra* note 41, § 5:6; see also Act of Oct. 9, 1962, Pub. L. No. 87-772, § 2, 76 Stat. 769, 769.

n71. *Armstrong Cork Co. v. World Carpets, Inc.*, 597 F.2d 496, 501 n.6 (5th Cir. 1979).

n72. See generally Demand for Jury Trial, *IHOP IP, LLC v. Int'l House of Prayer*, No. CV10-6622-SHO-SHX, 2010 WL 3775268 (C.D. Cal. Sept. 9, 2010).

n73. Congress passed the Federal Trademark Dilution Act in 1996, providing federal protection for famous marks from dilution. Federal Trademark Dilution Act of 1995, Pub. L. No. 104-98, § 3, 109 Stat. 985, 985 (1996). Congress amended this act in 2006. Trademark Dilution Revision Act of 2006, Pub. L. No. 109-312, § 2, 120 Stat. 1730, 1730.

n74. See *James Burrough, Ltd. v. Sign of the Beefeater, Inc.*, 540 F.2d 266, 276 (7th Cir. 1976).

n75. See McCarthy, *supra* note 41, § 11:83.

n76. See Graeme B. Dinwoodie & Mark D. Janis, *Trademarks and Unfair Competition: Law and Policy* 506-09 (2d ed. 2007).

n77. *Champions Golf Club, Inc. v. The Champions Golf Club, Inc.*, 78 F.3d 1111, 1117 (6th Cir. 1996); see also McCarthy, *supra* note 41, § 11:73.

n78. See, e.g., *Brookfield Commc'ns, Inc. v. W. Coast Entm't Corp.*, 174 F.3d 1036, 1058-59 (9th Cir. 1999).

n79. See *Family Circle, Inc. v. Family Circle Assocs., Inc.*, 332 F.2d 534, 540 (3d Cir. 1964).

n80. See *Mobil Oil Corp. v. Pegasus Petroleum Corp.*, 818 F.2d 254, 258 (2d Cir. 1987); *James Burrough, Ltd. v. Sign of the Beefeater, Inc.*, 540 F.2d 266, 276 (7th Cir. 1976) ("A mark that is strong because of its fame or its uniqueness, is more likely to be remembered and more likely to be associated in the public mind with a greater breadth of products or services, than is a mark that is weak ...").

n81. See *Wet Seal Inc. v. FD Mgmt. Inc.*, 82 U.S.P.Q.2d (BNA) 1629, 1641-42 (T.T.A.B. 2007).

n82. 15 U.S.C. § 1125(c) (2006).

n83. See Clarisa Long, *Dilution*, 106 Colum. L. Rev. 1029, 1030-31 (2006) ("Dilution grants trademark holders a remedy for the use of their famous marks by another even when consumers are not confused.").

n84. § 1125(c)(1).

n85. § 1125(c)(2)(A) ("[A] mark is famous if it is widely recognized by the general consuming public of the United States as a designation of source of the goods or services of the mark's owner.").

n86. A quick Lexis database search of trademark-infringement cases filed in federal district courts from 1995 to 2010 shows 2,417 cases alleging dilution as a cause of action (out of 7,773 filed trademark-infringement claims) (Lexis search: US District Court Cases, Combined, "trademark w/1 infringement," and Focus: "dilution").

n87. See generally Gerard N. Magliocca, *From Ashes to Fire: Trademark and Copyright in Transition*, 82 N.C. L. Rev. 1009, 1033 (2004) (stating that dilution "is now a powerful alternative to the traditional model of trademark protection"). Some public-interest groups, such as Public Knowledge, attempted to rally small businesses and individuals against the passage of the Trademark Dilution Revision Act in 2006, arguing that small businesses "will be severely limited when choosing how to market their products and refer to themselves." H.R. 683: The Trademark Dilution Revision Act of 2005, Public Knowledge (Feb. 9, 2005), <http://www.publicknowledge.org/issues/tmdilution> (last visited Mar. 17, 2011); see also *Stop the Trademark Dilution Revision Act*, Facebook, <http://www.facebook.com/group.php?gid=2210302309> (last visited Mar. 17, 2011).

n88. See, e.g., Benny Evangelista, *Monster Fiercely Protects Its Name: Cable Products Company Sues Those Who Use M-Word*, S.F. Chron., Nov. 8, 2004, <http://www.sfgate.com/cgi-bin/article.cgi?f=/c/a/2004/11/08/BUG1J9N3C61.DTL>.

n89. See § 1127 (defining when a mark is "abandoned").

n90. See Julius R. Lunsford, Jr., *Trademark Basics*, 59 Trademark Rep. 873, 878 (1969) ("Strong marks are widely protected, as contrasted to weak marks.").

n91. See *E.I. DuPont de Nemours & Co. v. Yoshida Int'l, Inc.*, 393 F. Supp. 502, 512 (E.D.N.Y. 1975) ("Strength is primarily a question of degree, an amorphous concept with little shape or substance when divorced from the mark's commercial context, including an appraisal of the owner's policing efforts to ensure that whatever distinctiveness or exclusivity has been achieved is not lost through neglect, inattention, or consent to infringing use.").

n92. 1.McCarthy, *supra* note 41, § 11:91.

n93. See *Amstar Corp. v. Domino's Pizza, Inc.*, 615 F.2d 252, 265 (5th Cir. 1980) ("A trademark owner that strongly believed its customers

were being deceived would hardly have remained idle for such an extensive period of time.").

n94. Evangelista, *supra* note 88 (quoting Noel Lee, President, Monster Cable).

n95. See Greene, *supra* note 12, at 640 ("Practitioners no doubt feel doctrinal pressure to protect their clients' marks aggressively, based on the fear that inaction against potential infringers now could lead to a finding of acquiescence or laches later.").

n96. See, e.g., *Coach House Rest., Inc. v. Coach & Six Rests., Inc.*, 934 F.2d 1551, 1558 (11th Cir. 1991) (discussing laches and acquiescence, "both ... are capable of estopping a petitioner from asserting dormant rights against a defendant. The difference between acquiescence and laches is that laches denotes passive consent and acquiescence denotes active consent."); see also *Dial-A-Mattress Operating Corp. v. Mattress Madness, Inc.*, 841 F. Supp. 1339, 1355-56 (E.D.N.Y. 1994) ("A laches or acquiescence defense does not divest the trademark owner of the right to use the mark but may deprive him or her of any remedy for infringing uses by others."); McCarthy, *supra* note 41, § 31:41-43.

n97. See *Mo. Fed'n of the Blind v. Nat'l Fed'n of the Blind of Mo., Inc.*, 505 S.W.2d 1, 10 (Mo. Ct. App. 1973).

n98. Greene, *supra* note 12, at 640.

n99. Desai & Rierson, *supra* note 33, at 1834.

n100. See Cheryl L. Hodgson, *When Enforcement Becomes Bullying*, *World Trademark Rev.*, June/July 2010, at 73.

n101. 1. Webster's Third International Dictionary 295 (unabr. ed. 2002) [hereinafter Webster's].

n102. See 156 Cong. Rec. S349 (daily ed. Jan. 28, 2010) (statement of Sen. Leahy) ("When a corporation exaggerates the scope of its rights beyond a reasonable interpretation in an attempt to bully a small business out of the market, that is wrong."). The norm that is violated is a legal norm against an unreasonable interpretation of legal rights. Legal and business ethics inform the reasonable interpretation of rights. While it is not illegal to exaggerate the scope of one's rights, there are ethical penalties for lawyers who assist clients in so doing. See, e.g., Fed. R. Civ. P. 11 (imposing affirmative duty on attorneys to make a reasonable inquiry into the circumstances of a case and authorizing courts to impose sanctions on attorneys or law firms who violate the rule).

n103. Although drawing bright-line rules for when a large corporation conducts a "cursory" assessment of a third party's trademark use may be difficult to do with any real certainty, it is useful to keep the dictionary definition for "cursory" in mind: "rapidly often superficially performed with scant attention to detail." Webster's, *supra* note 101, at 558.

n104. See Warner Conjures Up Trouble, *New Media*, Apr. 12, 2001, at 34.

n105. See *id.*

n106. See Elizabeth Weise, "Potter" Is Still the Muggles' Domain, *USA Today*, Feb. 6, 2002, <http://www.usatoday.com/tech/columnist/2001-04-24-weise.htm>.

n107. See *supra* Part I.A.3.

n108. See Amy Zipkin, Entrepreneurs Must Choose Their Words with Care, *N.Y. Times*, Oct. 7, 2004, http://www.nytimes.com/2004/10/07/business/07sbiz.html?_r=2&pagewanted=all&position= (quoting Professor Roger Schechter).

n109. See Ann Bartow, Likelihood of Confusion, 41 *San Diego L. Rev.* 721, 738 & n.49 (2004).

n110. See Evangelista, *supra* note 88.

n111. See Zipkin, *supra* note 108.

n112. A likelihood-of-confusion analysis is typically conducted by courts using a multi-factor test. While the specific number of factors vary from circuit to circuit, see Barton Beebe, *An Empirical Study of the Multifactor Tests for Trademark Infringement*, 94 Calif. L. Rev. 1581, 1582-84 (2006), all of the various tests include factors that examine defendant's use of the trademark. See Dinwoodie & Janis, *supra* note 76, at 506-08.

n113. See Bartow, *supra* note 109, at 745.

n114. See Ridgway, *supra* note 19, at 1549.

n115. See EFF Wins a Partial Victory in Ford Case, *supra* note 24.

n116. See *Ford Motor Co. v. Greatdomains.com, Inc.*, 177 F. Supp. 2d 635, 644 (E.D. Mich. 2001).

n117. See Kirkpatrick, *supra* note 61, at 1-5.

n118. See Beebe, *supra* note 112, at 1586.

n119. One way to protect against these allegations is to keep records of the trademark-infringement assessment and legal analysis.

n120. See, e.g., *What-A-Burger of Va., Inc. v. Whataburger, Inc.*, 357 F.3d 441, 450-51 (4th Cir. 2004).

n121. There is a recognized legal norm against utilizing intimidation tactics that have the effect of forcing or coercing weaker parties into agreeing to something that they would not have otherwise agreed. For example, in contract law, doctrines of unconscionability, duress, and undue influence protect weaker parties against various sorts of intimidation tactics. See generally *Williams v. Walker-Thomas Furniture Co.*, 350 F.2d 445, 447-49 (D.C. Cir. 1965) (unconscionability); *Totem Marine Tug & Barge, Inc. v. Alyeska Pipeline Serv. Co.*, 584 P.2d 15 (Alaska 1978) (economic duress); *Odorizzi v. Bloomfield Sch. Dist.*, 54 Cal. Rptr. 533, 539-41 (Dist. Ct. App. 2d 1966) (undue influence).

n122. See generally Clare Dalton, *An Essay in the Deconstruction of Contract Doctrine*, 94 Yale L.J. 997, 1024 (1985); Arthur Allen Leff, *Unconscionability and the Code - The Emperor's New Clause*, 115 U. Pa. L. Rev. 485, 487 (1967).

n123. See, e.g., *Totem Marine Tug & Barge*, 584 P.2d at 22; *Odorizzi*, 54 Cal. Rptr. at 539.

n124. See, e.g., *Capps v. Ga. Pac. Corp.*, 453 P.2d 935 (1969) (holding that where the defendant exploited the plaintiff's desperation, the contract was rescinded with no cause of action for defendant to recover against the plaintiff).

n125. While some bullies offer monetary assistance to the small-business owner or individual to cover the costs of changing the trademark, this monetary assistance generally comes only after the small business or individual has capitulated. See Lou Carlozo, *McDonald's Ends 'McFight' with Collegiate Charity Concert Promoter*, WalletPop (Jul. 12, 2010), <http://www.walletpop.com/blog/2010/07/12/mcdonalds-ends-mcfight-with-collegiate-charity-concert-promot/> [hereinafter *McDonald's Ends 'McFight'*]. In addition, even where the small-business owner has not agreed to change its trademark, the offer of monetary assistance comes after the bullying has already occurred. See *Monster Companies Settle Name Differences*, National Public Radio (Jan. 7, 2009).

n126. See Letter from Robert W. Payne, Attorney, LaRiviere, Grubman & Payne, to Michael Shkolnik, dated Jun. 7, 2002 (on file with author) ("Monster Cable vigorously protects its exclusive rights and wishes to resolve this matter promptly and in a satisfactory manner. We have otherwise been directed immediately to file suit in federal court to contest your use of 'monster.biz' for trademark dilution and infringement. The complaint is prepared, and we will file it next week if we do not receive an acceptable response from you by [date].").

n127. One letter out of over two hundred seventy letters from the ChillingEffects.org database of trademark cease-and-desist letters mentions arbitration as an option. See Letter from Cornell Univ., to Welzie, available at <http://www.chillingeffects.org/documenting/notice.cgi?NoticeID=661>. Letters from eBay mention actions taken in arbitration at the World Intellectual Property Organization. See Letter from eBay, Inc., to John Salmon (Aug. 27, 2003), available at <http://chillingeffects.org/domain/notice.cgi?NoticeID=809>; Letter from eBay, Inc.,

to W. Applications (Aug. 26, 2003), available at <http://chillingeffects.org/domain/notice.cgi?NoticeID=812>; Letter from eBay Legal Dep't, to Automatt Ventures (Jul. 30, 2002), available at <http://chillingeffects.org/udrp/notice.cgi?NoticeID=368>; Letter from eBay, Inc., to Joan Dumas (Jul. 22, 2002), available at <http://chillingeffects.org/domain/notice.cgi?NoticeID=394>; Letter from eBay Legal Dep't, to Valley Trading Post.com (Feb. 19, 2005), available at <http://chillingeffects.org/acpa/notice.cgi?NoticeID=1686>.

n128. See Rebecca Callahan, *Arbitration v. Litigation: The Right to Appeal and Other Misperceptions Fueling the Preference for a Judicial Forum* 7-8 (Bepress, Legal Series, Paper No. 1248, 2006).

n129. *Matt vs. Monster*, *supra* note 5, at 1:47.

n130. A survey of over two hundred seventy cease-and-desist letters in the ChillingEffects.org database reveals that approximately 20 percent of the letters include either a demand for payment of attorney's fees, or claim that attorney's fees will be awarded when the sender wins the litigation. See Chilling Effects, <http://chillingeffects.org/index.cgi> (last visited Apr. 3, 2011).

n131. Although the Lanham Act provides for a recovery of attorney's fees in trademark-infringement cases, such award is only for "exceptional cases." See 15 U.S.C. § 1117(a) (2006).

n132. *Odorizzi v. Bloomfield Sch. Dist.*, 54 Cal. Rptr. 533, 539 (Dist. Ct. App. 2d 1966) (quoting Cal. Civ. Code § 1575 (West 1970)).

n133. For example, it appears that only one letter in the ChillingEffects.org database cites to a case and attached a copy. See Letter from eBay Legal Department to Joan Dumas, *supra* note 127.

n134. See, e.g., *supra* note 127. Approximately 188 letters out of over 270 trademark-related cease-and-desist letters were written by lawyers. See Chilling Effects, *supra* note 130.

n135. See, e.g., Letter from National Football League, *supra* note 14 (citing to *La. State Univ. Bd. of Supervisors v. Smack Apparel Co.*, 438 F. Supp. 2d 653 (E.D. La. 2006), *aff'd*, 550 F.3d 465 (5th Cir. 2008); *Tex. Tech Univ. v. Spiegelberg*, 461 F. Supp. 2d 510 (N.D. Tex. 2006)); Letter from Church of Scientology, to Tanya Durni, <http://www.buffaloscienceologyinfo.com> (Apr. 1, 2005), available at

<http://chillingeffects.org/domain/notice.cgi?NoticeID=2060> (citing to eleven cases).

n136. For example, Nadeau stated that when he received the cease-and-desist letter from Hansen Beverage Company's lawyer, "I'm just beside myself, you know." See *Matt vs. Monster*, supra note 5. Lauren Thom of Fleurty Girl described that the letter from the National Football League's lawyer "scared the bejesus out of me." See Melinda Delatte, "Who Dat' Shirts CAN Be Sold: NFL Clarifies Saints Gear Position," *The Huffington Post* (Feb. 1, 2010, 8:47 PM), http://www.huffingtonpost.com/2010/02/01/who-dat-shirts-can-be-sol_n_445291.html.

n137. A significant number of letters demand a response between ten and fifteen days from the date of the letter, with some letters demanding a response in as short as one or two days. See *Chilling Effects*, supra note 127.

n138. See Ridgway, supra note 19, at 1548 ("Ready access to a lawyer is a barrier the internet has failed to eliminate.").

n139. The Small Business Administration generally defines a small business as any entity with five hundred or fewer employees and annual revenues of under \$ 7 million (although the specific figures may differ based on industry). See *Summary of Size Standards by Industry*, U.S. Small Business Administration, <http://sba.gov/content/summary-size-standards-industry> (last visited Mar. 9, 2011). However, this Article is not proposing a bright-line standard to determine the exact moment when bullying becomes harassment.

n140. See Altman Weil, 2010 Chief Legal Officer Survey 18-19 (2010).

n141. Some small businesses or individuals may have insurance, which may cover the costs for certain claims, such as advertising. But the decision to purchase insurance is often determined by financial resources.

n142. See, e.g., *MasterCard Int'l Inc. v. Nader 2000 Primary Comm. Inc.*, 70 U.S.P.Q.2d (BNA) 1046 (S.D.N.Y. 2004); *Fox News Network LLC v. Penguin Grp. (USA) Inc.*, 31 Media L. Rep. (BNA) 2254 (S.D.N.Y. 2003).

n143. See *MasterCard Int'l Inc.*, 70 U.S.P.Q.2d (BNA) 1046; *Fox News Network LLC*, 31 Media L. Rep. (BNA) 2254.

n144. For example, Judge Chin in *Fox News Network LLC* declared that Fox News was "trying to undermine the First Amendment." Still Frowning, *Fox News Drops Franken Suit*, Wash. Post, Aug. 26, 2003, at C07; see also *Fox News Network LLC*, 31 Media L. Rep. (BNA) 2254.

n145. See, e.g., Richard A. Posner, *The Cost of Rights: Implications for Central and Eastern Europe - And for the United States*, 32 *Tulsa L.J.* 1, 2 (1996) ("The enforcement of legal rights consumes real resources, including ... indirect costs to the extent that rights are enforceable against socially productive activities, or impose socially burdensome duties, or protect socially harmful activities.").

n146. See Coombe, *supra* note 18, at 66 ("Protecting consumers from potential confusion becomes the ruse by which corporations protect themselves from competition ...").

n147. See 1 Herbert Hovenkamp et al., *IP and Antitrust: An Analysis of Antitrust Principles Applied to Intellectual Property Law* § 1.2 (2d ed. 2010).

n148. See *Clorox Co. v. Sterling Winthrop, Inc.*, 117 F.3d 50, 56 (2d Cir. 1997).

n149. See Hovenkamp et al., *supra* note 147, § 4.1 ("An important goal of antitrust policy is minimizing the amount of market power in the economy ...").

n150. See *id.* § 3.5.

n151. See *Am. Online, Inc. v. AT&T Corp.*, 243 F.3d 812 (4th Cir. 2001); Ramsey, *supra* note 58, at 1147-48.

n152. See McCarthy, *supra* note 41, § 11:85.

n153. See Ronald D. Michman, Edward M. Mazze & Alan J. Greco, *Lifestyle Marketing: Reaching the New American Consumer* 66-67 (2003) ("Inexperienced consumers will purchase the most familiar brand and therefore brand recognition is desired by manufacturers."); see also *James Burrough Ltd. v. Sign of the Beefeater, Inc.*, 540 F.2d 266, 276 (7th Cir. 1976).

n154. See Letter from National Football League, *supra* note 14.

n155. See Letter from Diane Reed, *supra* note 1.

n156. See Parr, *supra* note 20, at 248-49; Robison, *supra* note 20. This is especially true where the small business's product is a parody of the trademark bully's product. See, e.g., *Louis Vuitton Malletier S.A. v. Haute Diggity Dog, LLC*, 507 F.3d 252 (4th Cir. 2007).

n157. See Coombe, *supra* note 18, at 65-66.

n158. 1.Bollier, *supra* note 9, at 129; see also Desai & Rierson, *supra* note 33, at 1839. For excellent scholarly treatment of these issues, see generally Ramsey, *supra* note 58.

n159. See Ridgway, *supra* note 19, at 1549.

n160. See Alex Kozinski, *Essay, Trademarks Unplugged*, 68 N.Y.U. L. Rev. 960, 972-73 (1993); Malla Pollack, *Your Image Is My Image: When Advertising Dedicates Trademarks to the Public Domain - With an Example from the Trademark Counterfeiting Act of 1984*, 14 Cardozo L. Rev. 1391, 1393 (1993). In addition, critical reviews of products provide invaluable purchasing aids to consumers. See Goldman, *supra* note 19, at 413.

n161. See *Mattel, Inc. v. MCA Records, Inc.*, 296 F.3d 894, 909 (9th Cir. 2002).

n162. See *id.* at 901.

n163. See Dreyfuss, *supra* note 38, at 397; Kozinski, *supra* note 160, at 961; Jessica Litman, *Breakfast with Batman: The Public Interest in the Advertising Age*, 108 *Yale L.J.* 1717, 1728 (1999).

n164. See *Mattel, Inc.*, 296 F.3d at 900.

n165. See Desai & Rierison, *supra* note 33, at 1839.

n166. See 156 *Cong. Rec.* S349 (daily ed. Jan. 28, 2010) (statement of Sen. Leahy).

n167. Trademark Technical and Conforming Amendment Act of 2010, Pub. L. No. 111-146, § 4, 124 *Stat.* 66, 69-70.

n168. *Id.*

n169. See *infra* Part II.B.1. Some commentators do not restrict their definition of bullying to large corporations. See Hodgson, *supra* note 100, at 73 ("Bully status is not limited to large companies.").

n170. See *The Social Movements Reader: Cases and Concepts* 252 (Jeff Goodwin & James M. Jasper eds., 2d ed. 2009) (describing "repertoires of protest" to include sit-ins, marches, demonstrations, vigils, and petitions); Thomas L. Gais & Jack L. Walker, Jr., *Pathways to Influence in American Politics*, in *Mobilizing Interest Groups in America: Patrons, Professions, and Social Movements* 103, 109 (Jack L. Walker, Jr. ed., 1991) [hereinafter *Mobilizing Interest Groups*] (listing litigation as among eight different tactics to influencing political change).

n171. See Kim Lane Scheppele & Jack L. Walker, Jr., *The Litigation Strategies of Interest Groups*, in *Mobilizing Interest Groups*, supra note 170, at 162, 171 ("Organizations need the resources of money, ability to turn control of policy over to lawyers, and a long time-horizon to use the courts. These are crucial resources any organization must have to find the courts attractive as a place to achieve policy goals... . Litigation remains one of the least popular forms of advocacy pursued by interest groups.").

n172. See Gais & Walker, supra note 170, at 109.

n173. This Article is not intended to provide legal advice of any sort. In arguing that certain small businesses and individuals should not litigate trademark-infringement lawsuits, this Article is providing a theoretical opinion of the author and is not recommending, encouraging, or suggesting that any entity or individual forego litigation or not defend itself in a lawsuit without first seeking the advice of competent counsel.

n174. See Stephen C. Yeazell, *Civil Procedure* 265 (7th ed. 2008); see also Kenneth L. Port, *Trademark Extortion: The End of Trademark Law*, 65 Wash. & Lee L. Rev. 585, 589 (2008).

n175. 1.2007 Survey of Business Owners, U.S. Census Bureau (July 13, 2010), <http://factfinder.census.gov/> (follow "Data Census" hyperlink; then follow "Economic Census" hyperlink; then follow "2007 Survey of Business Owners" hyperlink; then select data set "SB0700CSPRE01").

n176. See Moutray, supra note 13, at 30.

n177. Unlike patent attorneys who are admitted to practice before the U.S. Patent & Trademark Office (PTO), trademark attorneys need no special qualification or admittance in order to prosecute or litigate trademark matters. Therefore, it is difficult to estimate the number of trademark attorneys in the United States; however, there are approximately 2,218 U.S.-based attorneys who are members of the International Trademark Association, the largest trademark organization. See Int'l Trademark Assoc., *Membership Directory* (2010) (on file with author).

n178. See Julie A. Katz, *The Long and Winding Road: Successful Trademark Litigation in the United States*, *Intellectual Asset Management Magazine*, at 44, 45 (Brands in the Boardroom 2009: Key Branding Issues for Senior Executives Supp. 2009).

n184. Properly funding a new small business is crucial as the small business will need to draw upon the start-up funds in the beginning days of the business, when it is trying to attract customers.

n185. See Randall, *supra* note 183, at slide 5.

n186. See *id.* at slide 6.

n187. See Dougherty & Murray, *supra* note 182.

n188. See Nat'l Payroll Wk., 2010 "Getting Paid in America" Survey Results 1 (2010).

n189. See Sharon A. DeVaney & Sophia T. Chiremba, Comparing the Retirement Savings of the Baby Boomers and Other Cohorts, Bureau of Labor Statistics, tbl.3 (Mar. 16, 2005), <http://www.bls.gov/opub/cwc/tables/cm20050114ar01t3.htm>.

n190. As discussed earlier, in order to mount a successful defense, sufficient monetary resources are needed in order to see the case through to the last appeal.

n191. See Ridgway, *supra* note 19, at 1567 ("Because trademark holders possess, on average, better information about the scope and validity of their rights, they can sometimes successfully bluff a defendant, despite having a weak lawsuit.").

n192. For example, eBay's letters to domain-name holders similar to eBay contain the following language, "We have filed several successful federal court actions in the United States against companies and individuals employing the famous eBay trademark in their domain names, as well as more than six proceedings before the United Nation's World Intellectual Property Organization's arbitration panel. eBay prevailed in each case and the domain names at issue were all ordered to be transferred to eBay." See, e.g., Letter from eBay Legal Dep't to Valley Trading Post.com, *supra* note 127.

n193. See *supra* note 173 and accompanying text.

n194. There are various nonprofit entities around the United States devoted to providing legal assistance for intellectual property issues, such as the Volunteer Lawyers for the Arts organizations. See, e.g., Volunteer Lawyers and Accountants for the Arts St. Louis, <http://www.vlaa.org> (last visited Mar. 11, 2011). In addition, some law schools have established intellectual property clinics that are intended to assist nonprofit organizations. See, e.g., Intellectual Property and Nonprofit Organizations Clinic, Washington University Law, <http://law.wustl.edu/ClinicalEd/pages.aspx?id=6835> (last visited Mar. 13, 2011). However, barriers still exist to receiving legal assistance through these organizations, including the capacity of the organization and whether the small business or individual meets the criteria of the organization.

n195. For example, in Rock Art Brewery's dispute with Hansen Beverage Corporation, Nadeau was advised by one attorney to change the trademark. See *Matt vs. Monster*, *supra* note 5, at 2:38.

n196. See Dinwoodie, *supra* note 26, at 124.

n197. See Ridgway, *supra* note 19, at 1548.

n198. See Dinwoodie, *supra* note 26, at 142.

n199. See *Resorts of Pinehurst, Inc. v. Pinehurst Nat'l. Corp.*, 148 F.3d 417, 422 (4th Cir. 1998) ("The likelihood of confusion is a factual issue dependent on the circumstances of each case."); see also *Sunmark, Inc. v. Ocean Spray Cranberries, Inc.*, 64 F.3d 1055, 1060 (7th Cir. 1995) ("Likelihood of confusion in a trademark case is a factual issue ...").

n200. See McCarthy, *supra* note 41, § 23:67.

n201. Cf. Goldman, *supra* note 19, at 415-16, 424 ("Assessing consumer confusion about product source is an inherently inexact process.").

n202. See McCarthy, *supra* note 41, § 23:67 (citing the Second, Sixth, and Federal Circuits). More specifically, these courts will review the district court's findings of fact for each likelihood-of-confusion factor under the clearly erroneous standard, but then apply the *de novo* standard to the weighing of the factors. See *Arrow Fastener Co., Inc. v. Stanley Works*, 59 F.3d 384, 391 (2d Cir. 1995) ("We review the district court's treatment of each Polaroid factor under a clearly erroneous standard... . Whether the plaintiff proved a likelihood of confusion is a legal question, and we review the court's weighing of those factors and its ultimate conclusion under a *de novo* standard.").

n203. For example, in 2009 the Second and Sixth Circuit courts of appeals issued decisions in a total of nine cases reviewing district court findings related to trademark infringement. See *Starbucks Corp. v. Wolfe's Borough Coffee, Inc.*, 588 F.3d 97 (2d Cir. 2009); *Sly Magazine, LLC v. Weider Publ'ns L.L.C.*, 346 Fed. App'x 721 (2d Cir. 2009); *Hensley Mfg. v. ProPride, Inc.*, 579 F.3d 603 (6th Cir. 2009); *Dessert Beauty, Inc. v. Fox*, 329 Fed. App'x 333 (2d Cir. 2009); *Zino Davidoff SA v. CVS Corp.*, 571 F.3d 238 (2d Cir. 2009); *Rescuecom Corp. v. Google Inc.*, 562 F.3d 123 (2d Cir. 2009); *Citizens Banking Corp. v. Citizens Fin. Group, Inc.*, 320 Fed. App'x 341 (6th Cir. 2009); *Kerr Corp. v. Freeman Mfg. & Supply Co.*, No. 08-3330, 2009 U.S. App. LEXIS 6342 (6th Cir. Mar. 23, 2009); *Rush Indus. v. Garnier LLC*, 309 Fed. App'x 431 (2d Cir. 2009). Of these nine cases, three reversed the district courts' opinions. See *Wolfe's Borough Coffee, Inc.*, 588 F.3d at 102; *Rescuecom Corp.*, 562 F.3d at 124; *Kerr Corp.*, 2009 U.S. App. LEXIS 6342, at 1. While this is a small sample size, it does show a

reversal rate of 30 percent.

n204. Some large corporations may desire a reputation for being a "bully." See Hodgson, *supra* note 100, at 76.

n205. See *Matt vs. Monster*, *supra* note 5, at 2:38 (advice given to Nadeau); Bio: Food Chain Barbie and the Fight for Free Speech, Forsythe Artsurdism, http://creativefreedomdefense.org/bio_foodchain.cfm (last visited Mar. 11, 2011) [hereinafter Bio: Food Chain Barbie] ("A long list of attorneys suggested that I just give up, since I hadn't made any money anyway.").

n206. See Callahan, *supra* note 128, at 7.

n207. See *Matt vs. Monster*, *supra* note 5, at 1:41.

n208. See *id.* at 3:00.

n209. Alice Joy, Firm Says Stop Using Hollister Name on Jeans, *The Gilroy Dispatch*, Sept. 14, 2007, <http://www.gilroydispatch.com/printer/article.asp?c= 225171> [hereinafter Joy, Hollister Name] (quoting Stacey Crummett).

n210. See Grynberg, *supra* note 26, at 902 ("Trademark defenses ... enjoy an uneasy status in federal law.").

n211. See Dinwoodie, *supra* note 26, at 117-19; McGeeveran, *supra* note 26, at 77-109 (identifying and critiquing five doctrines used to evaluate expressive uses).

n212. See Dinwoodie, *supra* note 26, at 110.

n213. See McGeveran, *supra* note 26, at 62.

n214. See, e.g., Dinwoodie, *supra* note 26, at 111, 131; McGeveran, *supra* note 26, at 110.

n215. See McGeveran, *supra* note 26, at 86.

n216. See Dinwoodie, *supra* note 26, at 141-42.

n217. See, e.g., Cal. Civ. Proc. Code § 425.16(e) (West 2004 & Supp. 2011).

n218. *Bosley Med. Inst., Inc. v. Kremer*, 403 F.3d 672, 682 (9th Cir. 2005).

n219. See, e.g., *Mindys Cosmetics, Inc. v. Dakar*, 611 F.3d 590, 594 (9th Cir. 2010) (denying motion); *Bosley*, 403 F.3d at 674 (denying motion).

n220. See McGeveran, *supra* note 26, at 53-54.

n221. *KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc.*, 543 U.S. 111 (2004); see Graeme W. Austin, *Tolerating Confusion About Confusion: Trademark Policies and Fair Use*, 50 *Ariz. L. Rev.* 157, 182-89 (2008).

n222. See generally Grynberg, *supra* note 26.

n223. See generally Port, *supra* note 174 (discussing the problem of trademark "extortion").

n224. See, e.g., Steve Stecklow, The Scariest Monster of All Sues for Trademark Infringement, *Wall St. J.*, Apr. 4, 2009, <http://online.wsj.com/article/SB123869022704882969.html>.

n225. See Brett Frischmann & Dan Moylan, The Evolving Common Law Doctrine of Copyright Misuse: A Unified Theory and Its Application to Software, 15 *Berkeley Tech. L.J.* 865 (2000). But cf. Mark A. Lemley, Comment, The Economic Irrationality of the Patent Misuse Doctrine, 78 *Calif. L. Rev.* 1599 (1990) (arguing that the patent misuse doctrine is economically irrational and should be abolished); Note, Is the Patent Misuse Doctrine Obsolete?, 110 *Harv. L. Rev.* 1922 (1997) (examining doubts about the continuing vitality of patent misuse doctrine).

n226. See *Assessment Techs. of WI, LLC v. WIREdata, Inc.*, 350 F.3d 640, 647 (7th Cir. 2003); *Lasercomb Am., Inc. v. Reynolds*, 911 F.2d 970, 972-77 (4th Cir. 1990); *Int'l Motor Contest Ass'n v. Staley*, 434 F. Supp. 2d 650, 666 (N.D. Iowa 2006).

n227. *Assessment Techs.*, 350 F.3d at 647.

n228. See *Lasercomb*, 911 F.2d at 979 & n.22.

n229. See *Assessment Techs.*, 350 F.3d at 647.

n230. See *Ridgway*, *supra* note 19, at 1554.

n231. See *U.S. Jaycees v. Cedar Rapids Jaycees*, 794 F.2d 379 (8th Cir. 1986).

n232. See *Ridgway*, *supra* note 19, at 1557.

n233. For example, a search of the Lexis database shows 26 trademark-infringement cases from 2009 through 2010 contained allegations of "abuse of process" (out of 1,960 cases). In none of the cases did the court find in favor of the party alleging abuse of process. Lexis search conducted on April 4, 2011 (date range: Jan. 1, 2009 to Dec. 29, 2010, Search terms "trademark w/1 infringement," Focus: "abuse of process").

n234. See, e.g., *Ford Motor Co. v. Obsolete Ford Parts, Inc.*, 318 F. Supp. 2d 516, 521 (E.D. Mich. 2004); *Dunn Computer Corp. v. Loudcloud, Inc.*, 133 F. Supp. 2d 823, 830-31 (E.D. Va. 2001).

n235. See *Ridgway*, *supra* note 19, at 1549.

n236. See *id.* at 1569 ("Unlike in a full-scale lawsuit, the marginal cost of enforcement - in essence, one Google search and a cease-and-desist letter - is nearly negligible.").

n237. See *supra* Part II.A.

n238. See *Hodgson*, *supra* note 100, at 76 ("A reputation as a bully can actually be seen as a positive for less socially conscious trademark owners - they can not only potentially monopolize the word as a mark, but also gain fame by becoming infamous.").

n239. Alexander Zaitchik, *The Village Bully One Voice Under God?*, N.Y. Press (Apr. 29, 2003), <http://www.nypress.com/print-article-7433-print.html> (quoting cease-and-desist letter).

n240. To reiterate, this is not intended as legal advice.

n241. See Brief of the National Jewish Commission on Law and Public Affairs ("COLPA") and the International Association of Jewish Lawyers and Jurists (American Section) ("IAJLJ") as Amici Curiae Supporting Petitioner, *Bryan v. Moore*, 528 U.S. 1133 (2000) (No. 99-6723), 1999 U.S. S. Ct. Briefs LEXIS 364, at 3-4, 8.

n242. See Sandeep Gopalan, Shame Sanctions and Excessive CEO Pay, 32 Del. J. Corp. L. 757, 759 (2007) (overpaid chief executive officers); Kahan & Posner, *supra* note 28, at 383 (criminals); Bradley C. Karkkainen, Information as Environmental Regulation: TRI and Performance Benchmarking, Precursor to a New Paradigm?, 89 Geo. L.J. 257, 296-98 (2001) (environmental polluters); Michael S. Kirsch, Alternative Sanctions and the Federal Tax Law: Symbols, Shaming, and Social Norm Management as a Substitute for Effective Tax Policy, 89 Iowa L. Rev. 863, 865-66 (2004) (tax evaders); David A. Skeel, Jr., Shaming in Corporate Law, 149 U. Pa. L. Rev. 1811, 1812 (2001) (low-performing corporations).

n243. See Kahan, *supra* note 28, at 630-49.

n244. See, e.g., Kahan & Posner, *supra* note 28, at 383-87 (arguing for shaming to be included in the Federal Sentencing Guidelines); Skeel, *supra* note 242, at 1860-62 (providing a descriptive account of shaming undertaken by private entities, but arguing that shaming can be made less costly with governmental assistance). One of the few instances of an advocate for shaming by private activists is Thomas Friedman. See Thomas L. Friedman, *The Lexus and the Olive Tree: Understanding Globalization* 207 (2000) (arguing for private activism to "compel" companies to behave better). There are some commentators who argue against shaming by private activists, citing concerns of "vigilantism" and "lynch justice." See e.g., James Q. Whitman, What Is Wrong with Inflicting Shame Sanctions?, 107 Yale L.J. 1055, 1059, 1085 (1998).

Why Canadians fight; Our military history is far more complicated than the black and white, 'support the troops,' rhetorical blackmail we've heard from our government in recent years, writes Noah Richler

BYLINE: Noah Richler, Ottawa Citizen**SECTION:** NEWS; Pg. A9**LENGTH:** 1671 words

Last week, Prime Minister Stephen Harper responded to NDP leader Thomas Mulcair's requests for information about the withdrawal of the approximately 900 Canadian troops who remain in a training role in Afghanistan with one of his party's nasty, trademark, bullying retorts. "The NDP could not even make up its mind to support World War Two," said Harper. Mulcair was failing, according to the familiar catchphrase, to "support our troops."

It is this bit of rhetorical blackmail that has been so prevalent during the last decade. The notion that it is simply not possible to doubt a mission and, at the same time, to respect our troops and want them to be as safe and secure as they can be in the work that they are doing - i.e. to "support" them - is absurd and damaging, but has been one of the cornerstones of the ongoing Conservative project to entrench Canada, the "warrior nation."

The Conservatives and their acolytes in think-tanks and the media would have you believe that MPs or ordinary Canadians who raise questions about the war, one that is going on with or without us, are not patriotic and that others who are wary, say, of the already inordinate powers of mostly unaccountable police services, are lining up with the child pornographers when they oppose Internet surveillance. They would have you believe that criminal offenders should be thrown into megajails, rehabilitation no longer an intent, and that scared, desperate immigrants arriving in rusted-out freighters are "terrorists," "jumping the queue" when money will buy you a "Super Visa" and get you to the top of a line that they have shut the door on anyway. Environmental activists are also tarred - an appropriate term, really, given the circumstances - with the ludicrous allegation that they are funded by "foreign money," yet more demagoguery, while Ethical-Oil.org, a group that must be credited with the point it made about the loathsome regimes we support to meet our energy needs, behaves like the worst sort of Eastern European Stasi operator, denouncing charities (David Suzuki's, most recently) in its cynical attempt to ruin their decent initiatives through the suddenly necessary and very costly work of legal defence in courts.

What binds these and a packet of other phenomena - such as our renewed subservience to the monarchy and the ardent and very useful simplistic retelling of the story of the Battle of Vimy Ridge - is the epic mode of storytelling that underpins their black and white, "you're with us or against us" view of the world. Our present, thuggish bunch of ministers revel in the epic's simple schema - and, in particular, its elevation of men and women in uniform and the simplification of the tasks they are asked to perform. The demonization of any opposition at all: there is good and there is bad, people are friends or enemies. There is, quite intentionally, no sophistication in such views.

Why Canadians fight; Our military history is far more complicated than the black and white, 'support the troops,' rhetorical blackmail we've heard from our government in recent years, writes Noah Richler Ottawa Citizen April 29, 2012 Sunday

Sophistication, significantly, was the mark of the prior, Pearsonian version of Canada that militarist Conservatives despise for the imaginative leaps it made - for the attempts of that incarnation of the country to build bridges with less fortunate others exemplified by measures such as the Charter, introduced 30 years ago, and that era's more empathetic notion of multiculturalism.

The greatest symbol of that vilified age, of course, is the UN's "blue beret" that Canadian Forces wore for several decades. This government and its supporters have encouraged Canadians to regard the blue beret and all it stands for as a symbol of the pathetic failure of a liberal version of the country that was the naïve fantasy of unworlly, "hippy-dippy" children of a "flower-power" generation putting Canadian Forces, mandated not to shoot back, deliberately into harm's way. This caricature of the missions that Canadian Forces participated in for several decades is deeply offensive in a legion of ways, but it has been absolutely vital to the endeavour of making the epic view of good Canadians operating in a world of former chief of the defence staff Rick Hillier's "detestable murderers and scumbags" stick. Complex ideas have no place.

Put aside, for the moment (though not for long, please) that the accusation that Canadians such as myself who still ascribe to Lester B. Pearson's vision would put soldiers "deliberately into harm's way" is made by those who glorify the sending of tens of thousands of Canadian soldiers up and over the trenches of Flanders and France to near certain injury or death. Ignore, even, that the malicious characterization of mostly UN-led efforts at conflict resolution that Canadian Forces participated in for half a century are heaped together as one kind in which soldiers are not allowed to shoot back, relies upon the amplification of a restriction that applies under certain UN mandates but not others. What this coterie actually hates is the internationalist aspect of our character that predates even Pearson's vision of the country, an idea of Canada that we continue to back away from but that can be said to explain our national identity every bit as much as the divisive though presently vaunted idea of Canada, the "warrior nation."

True multilateralism, rather than the ever more contracted military alliances to which the Harper government subscribes, is exactly the quality that has characterized Canadian foreign policy since even before the First World War that the myth-builders of Vimy would have you believe constituted the moment in which Canadians from all over the country met in the trenches of Europe (who needs to include Québec?), forged a bond, and went on to distinguish themselves in valour.

Every country has such stories. Every country has ways of upholding its own society over others, this trait being another hallmark of the epic narrative. But history is a malleable thing, and it can also easily be that the war of 1914-18 was merely one of several, over the course of a century, in which Canadians distinguished themselves not because of how they were fighting, but because of the greater, less nationally self-interested idea of freedom that they were fighting for.

Canadians, remember, have never had to fight to defend their borders. This is not a disparagement. It is merely a fact, though it is one that the government is presently pouring millions of dollars into yet another propagandistic venture, this time the celebration of the War of 1812, to have you forget. Rather they would push a popular identification with the British and the Crown. This does not mean that the battles of the War of 1812 did not happen, that very interesting and significant relationships with First Nations were not advanced, or that the people occupying the territory of Upper and Lower Canada, not yet an independent state, were not brave or that their stories are not fascinating and needing to be told. History happens.

But the manipulation of history upon which the idea of the warrior nation depends, and of which the reconstruction of the War of 1812 is the latest example, denies a competing truth of the military ventures that the country has undertaken. From the Boer War of 1899, through the 20th century's two World Wars, the UNled campaign in Korea and several decades of similar operations undertaken in blue helmets, and then the present war in Afghanistan for which the iconic headgear was dropped, the truth about Canada is that we have always gone to bat for some other, greater alliance or idea - whether of the "Motherland," Empire, the Allies, the UN, NATO or that vague thing called "the international community." This is actually the quality that distinguishes us, and it is derived from the knowledge that Canadians have of their own extraordinary good fortune and that, along with that inexplicable blessing, comes an incumbency to make it

Why Canadians fight; Our military history is far more complicated than the black and white, 'support the troops,' rhetorical blackmail we've heard from our government in recent years, writes Noah Richler Ottawa Citizen April 29, 2012 Sunday

possible for others to know it.

Of course there will be wars that Canada must fight with the simple objective of homeland security. Militarists will be keen to tell you otherwise, but one of the lessons of Afghanistan, and of how Canada might proceed in a time of intertwined national relations that is already upon us, is that war-fighting and peace operations of the kind that the country had such a hand in developing - in which humanitarian rather than merely Canadian interests are primary - are distinct ventures.

Recognizing this aspect of our nature and entrenching it in our institutions would be a bold, forward-looking and appropriate measure. Consider, for instance, that, backed up by a new university in civil society, the Department of National Defence founded a new regiment, trained as rigorously and as fiercely as the rest of the Canadian Forces are, but wholly dedicated to peace operations as DART is to disaster assistance and JTF2 to secret operations. At least three good things would follow: there would be greater clarity surrounding the missions that Canada does undertake and no longer the obfuscation and shifting explanations such as were tendered upon Canadians during the fight in Afghanistan; there would be a recognition, especially with the university backing the regiment up, of the evolving nature of peace operations and conflict resolution, and a recognition of the internationalist tendencies that Canadian youth, especially, show. And this venture forward would amount to a challenge to the rest of the world to follow suit and commit to the world in which we now live - and its security. With these institutional moves the only legitimate criticism of the "peacekeeping" version of Canada - that the country was not, after a while, committing sufficient resources to it - would be addressed. And Canada would be a fount of vision again, rather than the increasingly resented and insular country it is rapidly becoming.

Noah Richler's new book, *What We Talk About When We Talk About War*, is published by Goose Lane Editions. He is appearing at the Ottawa International Writers Festival today at 2 p.m. at the Knox Presbyterian Church, 120 Lisgar Ave. (off Elgin Street).

COURTSIDE; Pipe dream

BYLINE: Anthony L. Cuaycong**SECTION:** Pg. S2/5**LENGTH:** 349 words

Considering how badly the Celtics played the other day, it's a wonder the final score didn't show a bigger spread. Granted, stalwarts of the green and white aren't predisposed to succumbing by 14, even on the road after just 24 hours' worth of rest. On the other hand, there is every cause to note that the blowout could have been more pronounced, what with the Heat's Big Two on a roll and only Kevin Garnett providing respectable resistance. Virtually from opening tip to final buzzer, the visitors looked tired, worn down, and downright overmatched.

Not that the Celtics didn't try. In fact, they were determined to stamp their bruising brand of hoops in Game One of the National Basketball Association East finals. Unfortunately, they appeared as long in the tooth as in desire; they couldn't shoot a lick, even from the charity stripe, and, worse, stunk on defense. And their trademark bullying tactics? More fizzle than sizzle in the face of certain defeat. So outplayed were they that the Heat, with a win in sight, appeared to take pity on them and thus refrained from adding insult to injury.

Today, the Celtics will again aim to overcome their Sisyphean challenge. Their relative lack of talent notwithstanding, they remain convinced that a series triumph is possible, albeit as a product of extreme focus and hard work. As Rivers acknowledged, their margin for error is virtually nonexistent against the powerhouse Heat. In other words, everything needs to go right for them to be competitive. And, in doing battle, they can't be five good men; they must be one good team, period.

For the casual observer, the Celtics ultimately getting the better of the Heat has long been in the realm of the improbable. Don't tell that to the proud bearers of the clover, though. For as long as there is a contest to claim, there is time to believe; they may well be holding on to a pipe dream, but darned if their pride won't allow them to keep plodding on. And they will scratch and claw until they can't; after all, the only way they can accept losing is if they know they couldn't have given more.

TRADEMARK TRAUMA

BYLINE: DAVID PHELPS; STAFF WRITER, STAR TRIBUNE (Mpls.-St. Paul)

SECTION: BUSINESS; Pg. 1D

LENGTH: 1386 words

HIGHLIGHT: Legal battles over company names put small businesses at a big disadvantage.

He sprays foam building insulation; she makes soap.

But Rob Linden and Amy Brooks have one issue in common. They're ensnared in a practice some attorneys call "trademark bullying." Both are fighting against big, deep-pocketed corporations over the use of their hand-selected names for their small businesses.

High-profile trademark disputes, such as the long-running litigation between Apple Corps (owner of the Beatles Apple Records label) and Apple Computer (of Macintosh and iPod fame) often pit big businesses against one another. But it can be a life-or-death contest when the defendant is a small company.

For the past four years, Linden has run a small Columbia Heights business called Thermal-Wise Insulation that provides insulation services to commercial and residential customers.

Brooks, of Rochester, sells handcrafted soaps that are designed to reduce skin irritation to cancer patients as they go through therapy. A cancer survivor herself, Brooks has been selling soap under the name Bubbles by Brooks for 10 years.

These days Linden is the target of a lawsuit brought by a Utah-based natural gas utility that claims the name of Linden's company infringes on the name of a rebate program it offers its customers, ThermWise.

Brooks is the subject of a trademark objection by Brooks Brothers, the giant Connecticut-based clothier which also has a line of fragrances and self-described "cleansing products." Brooks Brothers wants Bubbles by Brooks to withdraw its trademark application with the U.S. Patent and Trademark Office or face "potentially costly litigation."

The legal challenges have left both Linden and Brooks dumbfounded.

"I didn't think what they are claiming is even possible," Linden said in an interview. "I'm an insulation company. They sell gas."

Questar Gas Co. of Salt Lake City wants Linden to stop using the Thermal-Wise Insulation name and is seeking a

federal court order in Minnesota to do just that.

In its letter to Brooks demanding that she withdraw her trademark application, attorneys for Brooks Brothers said, "Though 'Brooks' may be your surname, it does not give you the right to infringe on the Brooks Brothers trademark or otherwise compete with Brooks Brothers."

In an interview, Brooks told the Star Tribune: "I've grown every year for the last 10 years by word of mouth. I could change my [company's] name, but then there's the domino effect. I have custom printed boxes, website domains. What does that affect? Absolutely everything."

Questar, which distributes natural gas in parts of Wyoming and Idaho as well as Utah, claims Linden's continued use of the Thermal-Wise name will "damage [its] reputation and impair and dilute [its] goodwill" with ThermWise customers.

Both cases recently came to the attention of the Intellectual Property Institute at William Mitchell College of Law and institute director Kenneth Port, who has spent much of his professional life studying trademark disputes.

"It's a deal-killer. That's the whole point of this," said Port of the infringement claims. "It's strange, that's for sure."

Extreme lengths

Companies sometimes go to seemingly extreme lengths to protect their trademarks.

A Vermont T-shirt designer was sued last year by Chick-Fil-A over a shirt that said "Eat more Kale." The seller of fast-food chicken said the shirt infringed on its "Eat Mor Chikin" slogan. The convenience store chain Casey's General Stores sued Subway after Subway asked in a cease-and-desist letter that Casey's stop using the word "footlong" to describe the 12-inch sandwiches it sells.

The Vermont case is still pending; Casey's eventually decided to use "12-inch" to describe its sandwiches.

"They want to put you out of business," Port said of these disputes.

Brooks said her attorneys told her it would cost \$200,000 to fight Brooks Brothers' opposition to her trademark request.

"I don't have that," Brooks said. "It's wrong what they're doing."

Arthur Wayne, a Brooks Brothers vice president for public relations, said that the company does not comment on legal matters, but did say "we are reviewing the situation and potential solutions."

In a study of trademark litigation tactics released last year, the U.S. Patent and Trademark Office acknowledged that the cost of legal counsel "has the greatest impact on small businesses" to fight trademark challenges.

But the study also concluded that "there are sufficient mechanisms in place to deter or punish those who resort to abusive ... tactics."

There were 9,025 contested trademark cases filed with the trademark office last year, up from 8,800 the year before. The number of contested cases has fluctuated noticeably in recent years, reaching a high of 12,277 in 2008.

State Rep. Joyce Peppin, R-Rogers, introduced legislation earlier this year to provide for a purportedly less-costly trademark resolution process involving the state Office of Administrative Hearings rather than federal court.

"This is an alternative for small businesses to fight cease-and-desist letters," said Peppin, who worked with Port in drafting the legislation and is herself a William Mitchell student. "They can't afford a lengthy and expensive trademark battle."

The legislation was introduced late in the 2012 session and will be reintroduced next year, Peppin said.

In the Linden case, Port and a team of five William Mitchell students have offered to provide pro bono legal assistance to Linden and his attorney in the form of research and brief writing. "I'm the unpaid expert," said Port, who has studied more than 2,800 trademark disputes going back to 1947.

'Good-faith' basis for suit

But Port may be treading on squishy ground where there are no black-and-white answers.

"This doesn't look like a frivolous suit to me," said Stephen Baird, head of the intellectual law practice group for the Minneapolis law firm Winthrop Weinstine, referring to the Questar case. "The marks are close enough and in a similar field -- energy."

Baird said only the likelihood of confusion needs to be shown, not actual confusion, for a trademark challenge to be successful.

Joel Leviton, a trademark attorney for the Minneapolis office of Fish Richardson, said many companies are diligent about protecting trademarks because of potential long-term implications.

"The law puts the duty on the mark owners to enforce their trademarks or they could lose their distinctiveness in the marketplace," Leviton said. "A plaintiff needs to have a good-faith basis before filing a lawsuit. We [as lawyers] have this obligation and shouldn't file lawsuits that don't fit that category. I don't agree that trademark bullying is a rampant problem."

Linden said he's already spent \$15,000 in legal fees fighting the Questar motion and deferred two hires over the lawsuit uncertainty.

"This has been costly in every which way," Linden said. "I've invested a lot into this business as it is. And for me to start over with a new name would be devastating. A change of name is often a sign of a failed business."

Linden said he offered to give up the Thermal-Wise name if Questar ever came into the Minnesota marketplace, but that was rejected.

Questar spokesman Chad Jones said the utility spends \$1 million a year educating its 980,000 customers about its ThermWise rebate program and its thermwise.com website, which features a character named "Therm -- the energy Wiseguy."

"Thousands search the Internet for ThermWise to get rebates, and if they turned up something with a negative connotation that would reflect on our brand," Jones said. "The world is all connected on the Internet now."

Carlos Torelli, an assistant marketing professor at the University of Minnesota's Carlson School of Management, said brands and trademarks have become a very valuable commodity in the marketplace.

"In the last 10 to 15 years, companies have come to realize that brands are assets. The same way you think about tangible assets you think about intangible items like brands," Torelli said. "When you can bring association with a name, you have an edge that is very difficult to replicate."

Linden is still shellshocked about his legal battle.

"I recently asked my lawyer where we are at in the case," Linden said. "He said, 'We've just reached the tip of the iceberg.' I didn't want to hear that."

Legal battle between Bangor sandwich shops ends with a dismissal

BYLINE: Judy Harrison, Bangor Daily News, Maine

SECTION: BUSINESS AND FINANCIAL NEWS

LENGTH: 635 words

Oct. 12--BANGOR, Maine -- The Queen City's sandwich battle is over. At least on the legal front it is.

The debate over who makes sandwiches most like the ones served at the Coffee Pot, a landmark Bangor business on State Street that closed its doors on Dec. 31, 2009, quietly rages on.

The closure spun off at least five surrogate sandwiches, including those made by the Coffee Pot Cafe at 652 Broadway, owned by Dr. Robert E. Erickson, a Bangor dentist, and The Legacy Sandwich Shop at 163 State St., owned by Bruce and Carol Guimond of Hermon.

Last year, the Coffee Pot Cafe sued The Legacy Sandwich Shop over the use of the words "deluxe" and "superdeluxe" to describes its sandwiches.

Lawyers for the owners of the two rival Bangor restaurants that make sandwiches similar to the beloved Coffee Pot -- a sandwich made with ham or salami, onions, cheese and vegetables -- on Oct. 1 filed a joint stipulation of dismissal in U.S. District Court in Bangor. The case will be dismissed by U.S. District Judge D. Brock Hornby "with prejudice," which means it can not be resubmitted in federal court or refiled in state court.

Earlier this week, Erickson referred questions about the dismissal of the lawsuit to his attorney, Anthony D. Pellegrini of Bangor. Pellegrini declined to comment.

"A dismissal with prejudice functions as an adjudication on the merits and any attempt to refile similar claims in another court, including state court, is barred," Sean Sweeney, the Portland attorney who represents the Guimonds, said Thursday in an email. "Accordingly, because the Coffee Pot Cafe's complaint expressly raised issues of state unfair competition in Counts 6-10, the Coffee Pot Cafe is precluded from raising these claims again in state court."

Carol Guimond said Wednesday that the trademark issue has been hanging over their heads since their second day of business, May 18, 2010, when they received a cease and desist letter from Pellegrini. The lawsuit was filed in March 2012 in federal court in Bangor.

"It feels like a great big cloud has been removed but there's still damage from the storm," she said Wednesday in a telephone interview. "It's been two-and-a-half years of trademark bullying and confusion for our customers."

She continued: "We are moving forward running our business just as we have but without the lawsuit hanging over us.

Legal battle between Bangor sandwich shops ends with a dismissal Bangor Daily News (Maine) October 12, 2012
Friday

Our customers have been wonderful and very supportive."

The complaint alleged that Legacy Sandwich began using nearly identical names -- "Legacy Deluxe Sandwich," "State Street Super Deluxe Ham and Salami Sandwich," "State Street Super Deluxe Ham Sandwich" and "State Street Super Deluxe Salami Sandwich" -- for its own creations when it opened next door to the original Coffee Pot location shortly after the Coffee Pot Cafe made its debut.

The Coffee Pot Cafe alleged that this "caused a likelihood of confusion or of misunderstanding" as to the source of Legacy Sandwich sandwiches and that the similarity of its sandwiches' names to those used by the Coffee Pot Cafe led some people to believe that there was an affiliation or association.

Sweeney said one of the issues that led to the dismissal of the case was that Erickson filed the trademark for the words "deluxe" and "superdeluxe" with the Maine Secretary of State's Office, not with the U.S. Patent and Trademark Office, which conducts a search to see if there are other similar patents or trademarks pending. The state is not able to do similar searches to determine the uniqueness of a patent or name, the attorney said.

"A lot of restaurants, including some national chains, use these words," Sweeney said. "They are common in the food industry."

**Small Vermont company beats fast-food giant Chik-fil-A in kale trademark battle;
Chik-fil-A claimed that Bo Muller-More's T-shirt logo 'Eat More Kale' was too similar to their advertising slogan 'Eat Mor Chikin'**

BYLINE: Nicky Woolf

SECTION: WORLD NEWS

LENGTH: 577 words

Kale emerged the victor in a titanic three-year legal struggle against chicken - or rather, "chikin" - on Friday, after a Vermont silk-screen artist beat controversial fast food giant Chick-fil-A in a battle over trademark protection.

Bo Muller-More's small Vermont-based company prints T-shirts that say "Eat More Kale," but Chick-fil-A - which has 1,800 locations nationwide - claimed "Eat More Kale" was too similar to their advertising slogan, "Eat Mor Chikin [sic]."

Muller-More had been fighting to get the US Patent and Trademark Office (USPTO) to grant his application for almost three years, but Chick-fil-A's lawyers used an unusual legal wrangle called a "letter of protest" to try to derail his application.

In November, an examiner at the USPTO ruled in favour of giving trademark protection to "Eat More Kale."

Vermont's governor, Peter Shumlin, who has been involved with the case, gave a joint press conference on Friday with Muller-More to celebrate the victory, which he portrayed as a win for "the little guy who stands up to a corporate bully", as well as a victory for the state of Vermont.

"The message is out: don't mess with Vermont. And don't mess with Bo," said the governor. "In Vermont, we care about what's in our food, who grows it, and where it comes from. That's what Bo and Eat More Kale represent. And that's something worth fighting for."

Muller-More, who started his T-shirt printing business in 1999 after being given a silk-screen kit by his wife, first received a "cease-and-desist" letter from Chick-fil-A's lawyers in 2006, but the real legal battle didn't start until he filed an application for trademark protection in August 2011.

In October 2011, lawyers representing Chick-fil-A sent another aggressive "cease-and-desist" demand, saying

Small Vermont company beats fast-food giant Chik-fil-A in kale trademark battle; Chik-fil-A claimed that Bo Muller-More's T-shirt logo 'Eat More Kale' was too similar to their advertising slogan 'Eat Mor Chikin' The Guardian
December 12, 2014 Friday 9:55 PM GMT

"Chick-fil-A's intellectual property is extremely valuable to it, and it will pursue all available remedies, including opposing your client's application, in the event it fails to comply with this demand."

Muller-Moore said that he never would have dreamed it would take the USPTO so long to decide on his trademark case. He said he was thrilled that reason prevailed and Chick-fil-A had to "eat some crow", and admit they were wrong.

"My company is not going to 'cease and desist,'" he said. "I am now allowed to protect my simple, original art from copycat artists and hopefully Chick-fil-A's trademark bullying spree can come to an end."

"I hope Mom and Pop operations across the country will see this as a victory for all of us."

The Vermont senator Bernie Sanders also got involved in the victory celebrations. "The American people are getting tired of the greed and recklessness of large corporations which use their size and power to push individuals and small businesses around," he said. "Bo fought the fight not just for Eat More Kale, but for all small businesses out there, making a difference for their families and their communities. He fought and he won!"

Ashlyn Lembree, a lawyer and professor of law at the University of New Hampshire specialising in intellectual property, who worked as co-counsel for Muller-Moore's case, described the feeling of victory as "fabulous".

This is not the first time that Chick-fil-A has found itself portrayed in a negative light. In 2011, they were the target of nationwide protests after it was reported that the corporation had made big donations to anti-gay pressure groups.

A representative of Chick-fil-A was not available for comment.

Baltimore-based Under Armour settles suit against Body Armor

BYLINE: Danny Jacobs

SECTION: NEWS

LENGTH: 767 words

Under Armour Inc. has settled its trademark infringement lawsuit against a California-based sports beverage maker it alleged used variations of Under Armour's, name, logo and "Protect this house" tagline to sell its products.

Under Armour and Body Armor Nutrition LLC reached the settlement Dec. 20, agreeing to dismiss all claims and counterclaims with prejudice, according to court documents.

Terms of the settlement are confidential, according to David H. Bernstein, the New York-based lead attorney for Body Armor Nutrition, of Beverly Hills.

"We settled the dispute on mutually satisfactory terms," Bernstein said Thursday.

Judge James K. Bredar closed the case Tuesday, according to online records for the U.S. District Court in Baltimore.

Body Armor, which launched in 2011, offers what it describes as a "revolutionary, category-creating line of nutrient-enhanced juice beverages," according to court filings. Baltimore Ravens running back Ray Rice is among the company's professional-athlete spokesmen, according to Body Armor's website.

The company, in an answer to Under Armour's lawsuit, listed dozens of other companies with either "Armor" or "Armour" in their names. Body Armor's logo does not have interlocking aspects but was a "stickman graphic, designed to visually communicate the protective armor" its nutrients provide, Body Armor wrote in response to the lawsuit.

Under Armour's lawsuit, filed in April 2012, also alleged Body Armor used the slogan "Protect + Restore" to promote its drink, which is similar to Under Armour's "Protect this house. "

"Taken individually or collectively, Defendant's Body Armor mark, Interlocking Logo, and Protect + Restore tagline are likely to cause consumers to mistakenly believe that Defendant's beverages come from Under Armour or are otherwise associated or connected with Under Armour," an amended complaint states.

Body Armor, in its answer to the complaint, said it changed its tagline before Under Armour filed suit, adding it did not believe the two tag lines would cause any confusion.

The company also claimed it filed for its trademark more than six years ago and that Under Armour had not raised any objections before suing, even though Under Armour was aware of Body Armor since at least 2009, when the drink was in development by the Beverly Hills-based company.

Baltimore-based Under Armour settles suit against Body Armor The Daily Record (Baltimore, MD) December 26, 2013
Thursday

"This lawsuit is a prime example of trademark bullying by a corporate giant seeking to stifle an innovative startup company ..." Body Armor stated. "In spite of UA's efforts to manufacture evidence of confusion, it is impossible that consumers or retailers of either brand would confuse the two. "

According to the U.S. District Court's online filing system, Baltimore-based Under Armour has filed five trademark-infringement suits in Maryland's federal court since 2011. Only one, against Nike Inc., remains open.

Douglas A. Rettew, the Washington, D.C.-based lead lawyer for Under Armour, did not return a call seeking comment.

The lawsuit settled last week sought to enjoin Body Armor from using its name, logo and tagline. It also sought control of Body Armor's domain name, drinkbodyarmor.com, which Under Armour called "confusingly similar to and/or dilutive" of Under Armour's trademarks.

Body Armor, in turn, filed a counterclaim seeking to cancel several of Under Armour's trademarks because Under Armour was not using them with bottled water when it applied for the trademarks in 2008, even though the company said it had been using them since 2005.

"Drinkbodyarmor.com" and the company's sports drinks remained online Thursday. According to an article in trade publication Beverage Industry, Body Armor changed its packaging at the beginning of 2013. "The brand removed the legs from its 'stickman'-shaped stripes to create lines that make a shield of armor on top of vivid fruit photography," the Jan. 11 article said. The article did not mention Under Armour's lawsuit.

NOTE: "LEAVE LITTLE GUYS ALONE!": PROTECTING SMALL BUSINESSES FROM OVERLY LITIGIOUS CORPORATIONS AND TRADEMARK INFRINGEMENT SUITS

NAME: Sara Marie Andrzejewski*

BIO: * J.D. Candidate 2012, University of Georgia School of Law. The author would like to thank her editors for their invaluable attention to drafts of this Note. She would also like to thank her family and friends for their encouragement and support. .

LEXISNEXIS SUMMARY:

... In addition to warning about potential confusion and demanding that Nadeau stop using the name "Vermonster," it also asked that Nadeau pay for legal expenses incurred in connection with the trademark infringement matter. ... Although Nadeau's lawyer felt the name was properly used and the federal government legitimately registered the trademark, he further explained that a large company like Hansen could prolong litigation to be long enough to bankrupt Nadeau. ... By using recent cases filed by large corporations against smaller local businesses, this Note will explore the costs and benefits of imposing a higher bar on trademark infringement claims filed by large corporations against smaller companies. ... This Note will also survey the rationales supporting both sides in the trademark bullying cases: whether over- enforcement of trademark rights has a deleterious effect on free speech and a dynamic public domain, or whether corporations are simply aggressively protecting their interest in their trademark, and, if so, whether this type of enforcement should be allowed. ... Essentially, the basic argument made by those in favor of dilution regulation is that consumers rely on the familiarity of trademarks as an indicator of a certain quality that has come to be associated with that particular brand, which helps to reduce risk and evaluation costs. ... This "intermittent chilling effect has grown into a more widespread expectation of licensing that influences both individuals and institutions in their approach to trademarks." ... Currently, trademark owners face little disincentive to sending these letters and the misuse and overuse of cease and desist letters has effectively expanded trademark law's doctrine.

TEXT:

[*118]

I. Introduction

Disputes over intellectual property are often fierce and have earned some corporations the reputation of being trademark bullies, a nickname that carries with it images of a deep-pocketed, faceless corporation stamping out mom-and-pop style shops. The images accompanying this label are not surprising, as the term "trademark bully" strongly implies some impropriety on behalf of the corporation.ⁿ¹ However, not all large corporations act improperly when they attempt to protect their intellectual property. The problem lies with the corporations that incorrectly assert

that their property rights extend beyond the limits of the Lanham Act, the legislation that contains the federal statutes of trademark law in the United States. ⁿ²

In a fight that is reminiscent of a schoolyard showdown between the classic bully and his easy target, Matt Nadeau and his local craft brewery, Rock Art Brewery, were pitted against Monster Energy Drink. The energy drink company, Hansen Natural Corporation, sold and distributed its Monster Energy Drinks through a partnership agreement with Anheuser-Busch. ⁿ³ Hansen Natural had \$ 603.8 million in net sales for the first six months of 2010 ⁿ⁴ and a market capitalization of \$ 7.4 billion as of September 2011. ⁿ⁵ Meanwhile, Rock Art Brewery was housed in Morrisville, Vermont and had modest beginnings. ⁿ⁶ Nadeau and his wife started brewing beer in the basement of their home in 1997. ⁿ⁷ They now have nine employees working in a plant of 10,000 square feet and produce about 3,500 barrels of beer annually. ⁿ⁸ Rock Art sells most of its beverages in Vermont, both in bottles and in kegs. ⁿ⁹ Outside of Vermont, Rock [*119] Art expanded into other markets including Arizona, Connecticut, and New Jersey. ⁿ¹⁰ In 2007, Nadeau decided to brew a special beer to celebrate the company's tenth anniversary. ⁿ¹¹ He described it as "an American style barley wine with a big, hoppy, fully flavored complex that was 10 percent alcohol." ⁿ¹² After registering the name "Vermonster" as a trademark in the state of Vermont, ⁿ¹³ Nadeau successfully registered "The Vermonster" as a federal trademark in the summer. ⁿ¹⁴

The brewery received a cease and desist letter from the international beverage company, Hansen Natural. ⁿ¹⁵ At the center of the dispute was the name of Rock Art's celebratory beer, "The Vermonster." ⁿ¹⁶ Because of the similarity in the names "Monster" and "The Vermonster," Nadeau's small company was pitted against an industry giant and was forced to respond in order to protect his company. ⁿ¹⁷

In its cease and desist letter, Hansen argued that the use of "VERMONSTER in connection with beer [would] undoubtedly create a likelihood of confusion and/or dilute the distinctive quality of Hansen's MONSTER marks." ⁿ¹⁷ Rock Art contended that confusion was unlikely because Hansen did not make alcoholic drinks and the products' packaging were dissimilar. ⁿ¹⁸ In addition to warning about potential confusion and demanding that Nadeau stop using the name "Vermonster," it also asked that Nadeau pay for legal expenses incurred in connection with the trademark infringement matter. ⁿ¹⁹ Although Nadeau's lawyer felt the name was properly used and the federal government legitimately registered the trademark, he further explained that a large company like Hansen could prolong litigation to [*120] be long enough to bankrupt Nadeau. ⁿ²⁰ Nadeau was advised that, in the end, he would likely have to change the beer's name. ⁿ²¹

Rather than allow Hansen to bully him, Nadeau fought back and contacted his client base to inform them of Hansen's actions. ⁿ²² In response, one of the state's largest beverage centers, Beverage Warehouse, protested Hansen's actions by pulling all Hansen products off the shelves. ⁿ²³ Additionally, at the peak of the controversy, Nadeau gained over 18,000 supporters through social networking sites he used to promote his cause. ⁿ²⁴ Largely due to the public support for Rock Art, Hansen settled within twenty-one days and allowed Nadeau to continue using the name "The Vermonster" as long as he did not make energy drinks. ⁿ²⁵

Fortunately for Nadeau and Rock Art Brewery, they were able to garner support and draw in enough media scrutiny to counterbalance Hansen's deep pockets. ⁿ²⁶ Stories of small businesses being harassed by larger companies are not rare, but they usually go unnoticed. While certain areas of trademark law make it easy for large companies to bully smaller companies, stories where the little guy wins are few and far between. However, this type of overly aggressive behavior on the behalf of large corporations has been noticed and the small businesses' often grassroots supporters have caught the attention of Congress. ⁿ²⁷

The Trademark Technical Conforming Amendment Act of 2010 was signed into law on March 17, 2010.ⁿ²⁷ The Act made technical changes to the Lanham Act, but it mainly "harmonize[d] filing procedures between trademarks filed in the United States directly and those filed abroad pursuant to the Madrid Protocol."ⁿ²⁸

Another provision included in the TTCA Act, quite different in nature, was added to the legislation.ⁿ²⁹ According to this provision, the Secretary of Commerce, along with the Intellectual Property Enforcement Coordinator, must report to the House and Senate Judiciary Committees on "the extent to which small businesses may be harmed by litigation tactics by corporations attempting to enforce trademark rights beyond a reasonable interpretation," and "the best use of Federal Government services to protect trademarks and prevent counterfeiting" within one year of the TTCA Act's enactment.ⁿ³⁰ This section has been referred to as the trademark bullies provision.ⁿ³¹

The TTCA was created by Senator Leahy of Vermont, who was frustrated by the trademark dispute happening in his state between Rock Art Brewery and Hansen.ⁿ³² The Vermonster dispute, and the Act created in its wake, illustrates a familiar situation. Often, a party with deeper pockets and more clout challenges the authenticity of another party's trademark rights, whether or not the basis for such challenge has a sound foundation in law.ⁿ³³ When both parties involved are in similar financial situations, a lengthy lawsuit can ensue with relatively few consequences for either company. But when one party cannot afford the expense of such a protracted suit, the opportunity for a fair and animated debate diminishes significantly. For this reason, the label of trademark bully emerged. However, the presence of two parties with different financial footings does not necessarily mean one party deserves to be dubbed a trademark bully. While most people enjoy cheering for the underdog, having a financial disadvantage does not always mean the law is on one's side.

Although a trademark is technically a property right, the main purpose behind trademark law is to protect consumers from brand confusion.ⁿ³⁴ The distinction afforded to famous or well-known trademarks is often essential to a trademark owner's success and can be lost if comparable marks come to be associated with the trademark owner's goods or services.ⁿ³⁵ Although there is no fixed duty to keep watch over other businesses' use of a mark, if a brand owner does not take legal action against potential infringers and such use becomes sufficiently rampant, the owner's mark will be stripped of its distinctiveness, or, even worse, the mark could be considered abandoned.ⁿ³⁶ Once a mark is widely used by other companies, the public will no longer relate the mark to a single business because of the crowd of analogous marks flooding the marketplace. The TTCA Act has sharply brought into focus the competing needs of protecting legitimate intellectual property rights and encouraging the growth of small businesses.

By using recent cases filed by large corporations against smaller local businesses, this Note will explore the costs and benefits of imposing a higher bar on trademark infringement claims filed by large corporations against smaller companies. In proposing a solution, this Note will examine whether the intellectual property heavyweights traditionally come out ahead in trademark enforcement actions by looking at key cases throughout the development of this problem. This Note will also survey the rationales supporting both sides in the trademark bullying cases: whether over-enforcement of trademark rights has a deleterious effect on free speech and a dynamic public domain, or whether corporations are simply aggressively protecting their interest in their trademark, and, if so, whether this type of enforcement should be allowed.

Because many trademark disputes often settle and do not result in a full jury trial, this Note will primarily consider doctrinal developments in the law that affect free speech. Therefore, this Note will not consider relatively informal practices such as demand letter negotiations. Because these tactics typically occur out of public view, they are difficult to track and it is difficult to determine what effects these letters might have on the market.

Part II of this Note will discuss the foundations of trademark law and the purpose behind allowing a particular manufacturer's or seller's product to be distinguished from another's parallel product. It will also delve into the case law in different states and evaluate the level of protection offered. Part III will analyze the economic and free speech consequences of these cases on the marketplace. Part IV will conclude that in light of the lowered bar for large corporations to pursue unreasonable enforcement claims, the study called for by the TTCA Act will plainly show that legislation is necessary to once again raise that bar.

[*123]

II. Background

A. COMMON LAW ROOTS

Unlike copyrights or patents,ⁿ³⁷ trademark rights are not rooted in the Constitution.ⁿ³⁸ Rather, trademark protection evolved from common law.ⁿ³⁹ This type of protection originated in 1584, when an English court found a defendant liable for counterfeiting another's mark and placing it on his own goods.ⁿ⁴⁰ As time passed, courts dubbed this behavior as "passing off," and placed it under the umbrella of the tort law of fraud and deceit.ⁿ⁴¹ However, by 1850, the common law of trademark protection had grown to have more similarities with unfair competition law than with tort law.ⁿ⁴²

With these common law roots as a foundation, Congress enacted the first federal law of trademark protection in 1870 but the Supreme Court later invalidated this law.ⁿ⁴³ Congress attempted to revisit the issue in 1905, but the law it created in its place only provided limited protection.ⁿ⁴⁴ Hence, it was not until the passage of the Lanham Act in 1946 that modern federal protection for trademarks came into existence.ⁿ⁴⁵

B. LANHAM ACT

The federal trademark law of the United States is the Lanham Act,ⁿ⁴⁶ which is now over sixty years old. The Lanham Act defines a trademark as "any word, name, symbol, or device, or any combination thereof [used in commerce] . . . to identify and distinguish [one's] goods, including a unique product, from those manufactured or sold by others and to indicate the source of the goods, even if [*124] that source is unknown."ⁿ⁴⁷ A trademark can be anything as long as it signals to consumers the specific product's origin.ⁿ⁴⁸ For example, a trademark may be a word,ⁿ⁴⁹ sound,ⁿ⁵⁰ symbol,ⁿ⁵¹ smell,ⁿ⁵² or color.ⁿ⁵³ "The primary and proper function of a trademark is to identify the origin or ownership of the article [or service] to which it is affixed."ⁿ⁵⁴ This recognition by the public is how trademarks derive value.ⁿ⁵⁵

Trademark holders should monitor their trademarks, or else risk a court holding that the trademark owners assented to infringing uses by abandoning their mark or that the mark now lacks distinctiveness.ⁿ⁵⁶ Thus, when truly infringingⁿ⁵⁷ conduct is identified, the trademark owner must take corrective steps.ⁿ⁵⁸ The trademark owner need not sue every business suspected of infringing on its trademark or send cease and desist letters in response to every conflicting use.ⁿ⁵⁹ Rather, the trademark owner should only do what it can [*125] within reason.ⁿ⁶⁰ On the other hand, if the trademark holder allowed conflicting uses to continue for more than a reasonable time period, the trademark owner may have trouble in later efforts to enforce that trademark.ⁿ⁶¹ For that reason, policing the trademark is an indispensable part of trademark preservation.ⁿ⁶²

Frequently though, some businesses take their policing too far and engage in overly aggressive behavior.ⁿ⁶³ For

example, the New York Times ran a front-page article uncovering illegitimate tactics that Levi Strauss & Co. used while pursuing trademark litigation to secure more market share.ⁿ⁶⁴ Interestingly, the article detailed the predatory practices that Levi Strauss & Co. used without discussing whether it was appropriate to even take those aggressive actions in the first place.ⁿ⁶⁵ In fact, all trademark owners are encouraged to employ this type of behavior to protect what is (sometimes) rightfully theirs.ⁿ⁶⁶ That is, nearly all trademark owners use trademark litigation to gain market share by suing competitors, and in so doing increase the competitor's cost to enter the market as well as the cost to stay in business.ⁿ⁶⁷

[*126]

C. FEDERAL TRADEMARK DILUTION ACT

Although the first anti-dilution laws were passed by individual states, it was not until 1995 that the federal government incorporated the Federal Trademark Dilution Act (FTDA) into the Lanham Act.ⁿ⁶⁸ Under the FTDA, a trademark owner had a remedy "against another person's commercial use in commerce of a mark or trade name, if such use [began] after the mark [had] become famous and [caused] dilution of the distinctive quality of the mark."ⁿ⁶⁹ The FTDA expanded the scope of rights granted to famous and distinctive trademarks under the Lanham Act.ⁿ⁷⁰ Dilution differs slightly from traditional trademark infringement in that there is no need to prove a likelihood of confusion to protect a mark.ⁿ⁷¹ Instead, all that is required is a showing that the use of a famous mark by a third party caused dilution of the distinctive quality of the mark.ⁿ⁷²

Following the enactment of the FTDA, a number of courts struggled with its interpretation.ⁿ⁷³ Some of this uncertainty was centered around whether a mark could be famous when used in niche markets and whether a famous mark must be either inherently distinctive or distinctive with secondary meaning through continuous use.ⁿ⁷⁴ Inherently distinctive marks tend to be more creative, avoiding any actual description of the related goods or services,ⁿ⁷⁵ like the "Google" mark, which bears no relation to the actual services offered by Google. If a mark is not inherently distinctive, it can acquire the necessary distinctiveness through secondary meaning.ⁿ⁷⁶ Secondary meaning shows that the mark has some meaning to the public beyond the obvious meaning of the terms or images of the mark itself.ⁿ⁷⁷ If the primary significance of the mark to [*127] the consuming public has become the source of the goods or services, rather than the product itself, the mark has acquired secondary meaning.ⁿ⁷⁸

Another issue involved trademark dilution, a concept giving the owner of a famous trademark the ability to forbid others from using that mark in a way that would lessen its uniqueness.ⁿ⁷⁹ Importantly, appellate courts were split on the issue of whether a plaintiff had to show actual dilution or a likelihood of dilution to prevail on a dilution claim after the enactment of the FTDA.ⁿ⁸⁰ The issue was eventually addressed by the Supreme Court in *Moseley v. V Secret Catalogue Inc.*ⁿ⁸¹ In *Moseley*, the plaintiff, the owner of the "Victoria's Secret" trademark, claimed that the defendant's use of the trademark "Victor's Secret" for a store selling predominantly adult novelty items caused the dilution of plaintiff's well-known mark under the FTDA.ⁿ⁸² The Supreme Court reversed and remanded the district court's decision, finding that trademark owners must establish actual dilution rather than merely a likelihood of dilution.ⁿ⁸³ In other words, a plaintiff would need either objective proof or reliable circumstantial evidence to prove actual dilution of the plaintiff's mark to prevail under the FTDA.ⁿ⁸⁴

D. TRADEMARK DILUTION REVISION ACT

Following *Moseley*, Congress held hearings to examine possible revisions to the FTDA.ⁿ⁸⁵ In 2006, President Bush signed into law the Trademark Dilution Revision Act (TDRA), which made considerable changes to the FTDA.ⁿ⁸⁶ The TDRA expressly overruled *Moseley* by allowing famous trademark holders to prevail on a dilution claim by

showing only a likelihood of confusion.ⁿ⁸⁷ [*128] Specifically, the Act stated that the use of a trademark in connection with the sale of a good will constitute infringement if it is likely to cause consumer confusion as to the source of those goods or as to the sponsorship or approval of such goods.ⁿ⁸⁸

For all practical purposes, these changes cleared considerable hurdles for well-known trademark holders by not requiring actual dilution. The threshold to reach a famous mark status might have been made higher, but once reached, the evidentiary burden to prevail on a dilution claim became significantly lower.ⁿ⁸⁹ That is, instead of requiring a famous mark owner to prove actual dilution, they only have to show a likelihood of dilution to meet their burden.ⁿ⁹⁰ This benefited famous trademark holders, but not lesser-known operations like Vermonster.ⁿ⁹¹

Although the label of trademark bully can be attached to any overly aggressive trademark owner, it usually sticks to famous trademark owners.ⁿ⁹² Case law is replete with examples of famous trademark owners asserting infringement and dilution claims against small business operations.ⁿ⁹³ The TDRA gives large companies substantial leverage in keeping small businesses from using marks that may only marginally resemble the famous mark by claiming that it has been diluted.ⁿ⁹⁴ The bigger the company, the more famous the trademark, and therefore the easier it will be under the Act for larger [*129] companies to use their market share against smaller companies.ⁿ⁹⁵ National companies with highly recognizable marks could have more leverage than any single small business and could easily outspend those businesses if litigation arose.ⁿ⁹⁶

E. PURPOSES AND GOALS OF TRADEMARK PROTECTION

Despite what some commentators say,ⁿ⁹⁷ there is a general consensus that the primary purpose of trademark protection is to supply consumers with accurate information regarding the source of the good.ⁿ⁹⁸ Thus, trademarks help diminish consumer search costs.ⁿ⁹⁹ Consumers can seek out specific information while searching for goods, and then use easily distinguishable and identifiable trademarks to help decrease the time and resources necessary to find their desired product.ⁿ¹⁰⁰ Another effect of the public detection aspect of trademarks is the incentive for producers to increase product quality.ⁿ¹⁰¹ Thus, if trademark law protects the mark's owner from infringement by a competitor, the owner will invest more money and resources to improve his product's quality, because consumers will seek out the higher quality product.ⁿ¹⁰² Without trademark protection, a competitor could easily use another's mark to sell an inferior product, and take away some of the actual trademark holder's customers.ⁿ¹⁰³ This scenario demonstrates another purpose served by trademark [*130] protection, which is the prevention of consumer deception stemming from the use of a confusingly similar mark, and resulting in the purchase of products that the consumer does not desire.ⁿ¹⁰⁴

A secondary goal of trademark law is the protection of a trademark owner's goodwill through the manufacture and use of that trademark.ⁿ¹⁰⁵ This purpose of trademark law makes it different than other types of intellectual property, such as patents or copyrights.ⁿ¹⁰⁶ For patents and copyrights, the protected intellectual property is the property that actually contains value.ⁿ¹⁰⁷ By contrast, the value of trademarks comes from their ability to signal to the market the quality of the good.ⁿ¹⁰⁸ Therefore, the goal of protecting a trademark holder's goodwill is not necessarily what trademark protection aims to do, but some commentators nonetheless endorse it.ⁿ¹⁰⁹ Those who argue for upholding a trademark holder's goodwill often state that not doing so would encourage free riding, but free riding may in some cases be a good thing, as it can be a means of serving public demand.ⁿ¹¹⁰

The Supreme Court encompassed both of these goals of trademark law in *Qualitex Co. v. Jacobsen Products Co.*ⁿ¹¹¹ In *Qualitex*, the court stated that trademark law "reduce[s] the customer's costs of shopping and making purchasing decisions" because "it quickly and easily assures a potential customer that the . . . item with [the trademark] . . . is made by the same producer as other similarly marked items that he or she liked (or disliked) in the past."ⁿ¹¹² It prevents

others from copying a source-identifying mark.ⁿ¹¹³ Meanwhile, the law also helps comfort a producer that it, and not an imitating competitor, will [*131] collect the financial and reputation-related rewards associated with a sought-after product.ⁿ¹¹⁴

Some scholars argue that there is a third, separate goal of trademark protection to promote "fair competition."ⁿ¹¹⁵ This third goal favors the public market and freedom of expression over the individual trademark holder.ⁿ¹¹⁶ "This third policy justification, however, may not do much additional work beyond that already done by the primary purpose," which is to "prevent customer confusion."ⁿ¹¹⁷

III. Analysis

A. A LOOK AT TRADEMARK DILUTION

Trademark dilution is a relatively modern legal doctrine.ⁿ¹¹⁸ As one commentator, Laura R. Bradford, explained, trademark law conventionally aims to improve the quality of market information by prohibiting misleading uses of trademarks.ⁿ¹¹⁹ Prohibiting misleading uses of trademarks improves the efficiency of the market because it prevents the consumer from buying the wrong product.ⁿ¹²⁰ Thus, protection for the "informational integrity" of trademarks allows consumers to spend less time and fewer resources in search of the desired product, which in turn decreases search costs.ⁿ¹²¹

[*132]

In an effort to limit consumer confusion and economic consequences, trademark dilution law prohibits "interferences with the uniqueness of a trademark."ⁿ¹²² As Bradford explains the concept: "consumers may or may not think that 'Chevrolet shoes' were made by the car company, but their presence in the marketplace would diminish or 'dilute' the singularity of the original Chevrolet mark."ⁿ¹²³ Bradford continues by noting that the goal of these prohibitions is to prevent "the gradual whittling away or dispersion of the identity and hold upon the public mind of the mark or name by its use upon non-competing goods."ⁿ¹²⁴ Finally, Bradford gives examples of contemporary dilutive uses of famous marks, including the use of the mark "Perfume-bay" for E-bay, "Nikepal" for Nike, and the name "Hot Rigz" for "Hot Wheels" toy cars.ⁿ¹²⁵

It is clear that most trademark holders find dilution damaging and believe that dilution harms the value created in their trademark.ⁿ¹²⁶ According to Bradford, supporters of "dilution regulation have linked the dilution cause of action to the goal of lowering search costs."ⁿ¹²⁷ They argue that the loose use of well-known symbols will cause a trademark's meaning and significance to decline, thus also decreasing a mark's utility as a means for quickly locating goods.ⁿ¹²⁸ Based on this view, "free-riding on the familiarity of well-known marks increases 'internal search costs', or the amount of mental time and effort consumers must expend to connect the mark to its original owner and larger goodwill."ⁿ¹²⁹

Bradford points out that "critics are skeptical that a few extra seconds of cogitation, assuming they are required, justifies a race to the federal courthouse [*133] if consumers are not actually confused about who makes a particular good."ⁿ¹³⁰ "Famous marks have always existed" in the same market with "lesser-known" trademarks.ⁿ¹³¹ Bradford considers two market leaders in separate industries as examples: Ford Motor Company and the Ford Modeling Agency.ⁿ¹³² While it does not appear that either company is negatively impacted by the other, the consumer presumably "must spend a certain amount of time or effort to distinguish them."ⁿ¹³³ Protecting these and similar trademarks, however, appears to be in direct conflict with First Amendment values that encourage "criticism of, discussion about, and comparison with well-known brands."ⁿ¹³⁴ Bradford finds it unsurprising that "courts have found the harm threatened by dilution 'dauntingly elusive' to comprehend; accordingly [the courts] have been reluctant to enforce the law as

written." ⁿ¹³⁵

"Dilution regulation aims to preserve the signaling value of brand familiarity for consumers," ⁿ¹³⁶ but it may overstep boundaries and interfere with other businesses' ability to create marks. Proponents of dilution regulation argue that because consumer markets suffer from information asymmetries in which sellers possess better information than buyers, buyers depend on signals from sellers and other third parties in making purchasing decisions. ⁿ¹³⁷ Essentially, the basic argument made by those in favor of dilution regulation is that consumers rely on the familiarity of trademarks as an indicator of a certain quality that has come to be associated with that particular brand, which helps to reduce risk and evaluation costs. ⁿ¹³⁸

[*134]

B. WHY MOST CASES ARE NOT LITIGATED

As former Chief Justice Warren E. Burger once said, "for many claims, trials by the adversarial contest must in time go the way of the ancient trial by battle and blood. Our system is too costly, too painful, too destructive, [and] too inefficient for a truly civilized people." ⁿ¹³⁹ As such, the small business owner may feel defeated before even stepping foot into the courthouse when "faced with uncertainties such as the length of a trial, the amount of discovery required, the success of winning on the merits and the likelihood of appeal." ⁿ¹⁴⁰ Regardless of the relative merits of a small business owner's case, the seemingly endless resources of his opponent will undoubtedly intimidate him. ⁿ¹⁴¹ For the average small business owner, "adequate representation of his claim lies in a quicker and more cost-effective alternative to litigation." ⁿ¹⁴²

In addition to smaller companies, larger corporations may also elect not to engage in the typical litigation route for many reasons. ⁿ¹⁴³ First, the number of potential infringers is possibly infinite and the list could include both small and large businesses. Second, larger companies put their reputation on the line and are often under strict public scrutiny when they file suit against other companies for trademark infringement in the typical litigation setting. ⁿ¹⁴⁴ As mainstream media follows high-profile litigation with microscopic precision, a company that pursues that route risks being called a trademark bully. ⁿ¹⁴⁵ Moreover, even though only a handful of cases actually make it to the trial stage, ⁿ¹⁴⁶ the endless cycle of the "filing of complaints is costly and would still invite the attention of the media and the public alike." ⁿ¹⁴⁷

[*135]

Perhaps the most troubling aspect of the litigation route for any company "is that the outcome of the litigation is essentially out of their hands." ⁿ¹⁴⁸ First, all of the normal variables that exist in any jury trial are also present in trademark infringement suits, including the judge assigned to the case, which lay people are selected to be members of the jury, and what evidence is admitted or excluded. ⁿ¹⁴⁹ Stakes are exponentially higher in cases involving intellectual property disputes where the subject matter could potentially be very technical. ⁿ¹⁵⁰ "This realization is driven home when [the company is] waiting for the jury to return a verdict or a judge to announce a decision. At that moment, it is crystal clear the outcome can go either way and [the company] might lose." ⁿ¹⁵¹

A small business has limited resources to avoid litigation when faced with possible lawsuits from overly aggressive trademark holders due to unpredictable litigation outcomes and large legal bills. Large businesses, and even entire industries, should also respond to these risks conservatively. They should adopt "trademark rights clearance practices" to avoid the danger of liability, thereby "institutionalizing an incentive structure contrary to free speech values." ⁿ¹⁵² For example, insurers often insist on rights clearance for every single expressive use of a trademark in documentaries. ⁿ¹⁵³ Also, "reality television producers obscure unlicensed trademark logos captured incidentally in the footage they

air." ⁿ¹⁵⁴ Google also allows trademark holders to "ban the use of their trademarks in others' advertisements." ⁿ¹⁵⁵ Finally, the virtual game world Second Life generally forbids graphical items created by individuals if they incorporate trademarks. ⁿ¹⁵⁶ These policies, which go beyond what the law requires, are designed to remove even the smallest risk of trademark disputes, and are a cost of the current [*136] system. ⁿ¹⁵⁷ The extreme caution may be to high of a cost when it censors "artists or critics who rely on institutional support to disseminate their speech." ⁿ¹⁵⁸

To protect their intellectual property rights, companies may feel they must use aggressive tactics because of the uncertainties inherent in pursuing traditional litigation. A recent study determined that "a continued increase in the number of trademark cases filed, combined with decreases in the percentage of cases that reach trial, suggested that [trademark owners] were filing strike suits aimed at forcing quick or favorable settlements." ⁿ¹⁵⁹ More evasive (and harder to measure) than strike suits are cease and desist letters. ⁿ¹⁶⁰ Trademark owners often send cease and desist letters even when the use of the mark is almost certainly legal under current law. ⁿ¹⁶¹ Such threatening letters, which usually are printed on formal law firm stationery and contain intimidating legal jargon, "have been colorfully characterized as 'gorilla chest thumping' and 'trademark extortion.'" ⁿ¹⁶² Most trademark holders send this type of letter as a standard procedure because there is little disadvantage to sending one. ⁿ¹⁶³ In fact, some facets of trademark law force businesses to police their marks in order to maintain them so that it cannot be said that the marks were [*137] abandoned. ⁿ¹⁶⁴ This can lead to overly aggressive behavior, including sending off frivolous cease and desist letters. ⁿ¹⁶⁵

According to another commentator, William McGeeveran, one suggestion to help alleviate this type of bullying is the use of licensing agreements in situations where the smaller business is likely to win but the larger business has infinitely more resources. ⁿ¹⁶⁶ McGeeveran notes that there are at least three reasons why heavily relying on voluntary licensing in these situations would not help the problem. ⁿ¹⁶⁷ First, obtaining licenses is often difficult and expensive. ⁿ¹⁶⁸ McGeeveran contends that there is little or no incentive for large businesses to even respond to various small business, and thus lower- stakes, licensing requests. ⁿ¹⁶⁹ He believes that even if for some reason they did engage in licensing agreements with smaller businesses, "the pricing of the transaction would reflect both these costs and the [trademark owner's] monopoly position." ⁿ¹⁷⁰ The sum of all those costs would further discourage the little guy and greatly diminish the helpfulness of licensing devices, especially for smaller businesses.

Second, "legally unnecessary trademark licensing produces a feedback effect that further shrinks the public domain." ⁿ¹⁷¹ As previously discussed, "trademark law defines infringement based upon consumer understanding," ⁿ¹⁷² or lack thereof, in which case it would be consumer confusion. ⁿ¹⁷³ McGeeveran continues his analysis by stating that "widespread overcautious licensing fortifies consumers' expectations that such licensing is legally required." ⁿ¹⁷⁴ In turn, this distorted view of the law "increases the likelihood that consumers will be confused in the future by an unauthorized expressive use of a mark, [*138] rendering even more uses infringing." ⁿ¹⁷⁵ McGeeveran concludes this second point by finding that "the chilling effect of unstable fair use protection causes more problems for trademark law than does the parallel problem in copyright law, where the definition of rights does not depend on subjective public understanding." ⁿ¹⁷⁶

The third and most substantial objection raised by McGeeveran to relying on licensing arises when the potential use negatively reflects the trademark. ⁿ¹⁷⁷ McGeeveran cautions that "license requirements give trademark owners vetoes over criticism and parody of themselves or their products" and therefore only encourages arrangements that depict trademarks in a positive light. ⁿ¹⁷⁸ "Truly consensual agreements to make favorable expressive uses (involving, say, a large consumer-products [trademark owner] and a Hollywood movie studio) may be mutually beneficial and perhaps relatively inoffensive to public interests." ⁿ¹⁷⁹ McGeeveran once more warns that the "pressure to license all uses would deprive the public of unfettered discourse about products and their makers." ⁿ¹⁸⁰

Therefore, McGeeveran explains that the existing trademark fair use laws deter unlicensed uses of trademarks or, alternatively, encourage submission on behalf of the smaller businesses when threatened with legal action.ⁿ¹⁸¹ This "intermittent chilling effect has grown into a more widespread expectation of licensing that influences both individuals and institutions in their approach to trademarks."ⁿ¹⁸² Ultimately, McGeeveran asserts that licensing is not a viable solution to the problem because of the three factors he lays out above.ⁿ¹⁸³

C. PROPOSED SOLUTION

A new structure should exist where small businesses are free to create their own marks and not be afraid of overly litigious companies. This is not to say the power imbalance between large and small companies would or even should be changed, but there are some improvements that should be implemented. According to McGeeveran, "with clearer law and simpler, shorter litigation, [*139] both individuals and institutions should be more likely to engage in expressive uses and more likely to persist in those uses when faced with the prospect of legal action."ⁿ¹⁸⁴ At the same time, trademark owners should be less likely to engage in unreasonably aggressive behavior "or pursue litigation that is clearly frivolous."ⁿ¹⁸⁵

There are several options to curtail overly litigious and aggressive companies. Cease and desist letters are typically the means through which a company initially threatens small business owners. Currently, trademark owners face little disincentive to sending these letters and the misuse and overuse of cease and desist letters has effectively expanded trademark law's doctrine. Therefore, a starting place would be to create ways to thwart unmeritorious cease and desist letters. A few suggestions could include punishing coercion, requiring that copies of cease and desist letters be sent to the Patent and Trademark Office, or assessing penalties once a certain threshold of letters is met. Additionally, returning to showing actual economic harm may force larger companies to have legitimate claims before they begin firing off baseless cease and desist letters.

One option may simply be greater public scrutiny of behavior by trademark owners. As discussed earlier, fans of smaller companies or individuals will rally for their cause by going to the Internet either through a forum or even by creating a Facebook page. Publicity was used to great effect in the dispute between North Face, a popular outdoor apparel company, and a college student.ⁿ¹⁸⁶ The overwhelmingly negative media attention garnered the smaller company enough support to counteract the considerable resources North Face had at its disposal.ⁿ¹⁸⁷ Replicating this outcome in countless other cases where trademark owners go too far may help deter overly aggressive behavior.

Alternatively, creating a public database of trademark owner cease and desist letters may bring these often hidden scare tactics to the surface of media attention. For example, trademark owners could be required to send a copy of every cease and desist letter to a public repository, which would create a database of letters that could be monitored and scrutinized. A website called "Chilling Effects Clearinghouse"ⁿ¹⁸⁸ serves an analogous function, but it relies [*140] on recipients voluntarily contributing cease and desist letters rather than forcing senders to submit them. If this approach is taken, then Congress must eliminate the argument that a cease and desist letter can be protected under copyright law, which allows cease and desist senders to threaten an unmerited copyright infringement (or other) claim if the recipient publicly shares the letter.ⁿ¹⁸⁹

A second option could involve hiring a central monitor who would call attention to unreasonable trademark enforcement efforts through some form of public shaming. Chilling Effects Clearinghouse is a step in this direction, as it publishes demand letters in a neutral format on a website. While this solution would generate additional costs, the social benefits of this scrutiny could be enormous. This sort of availability to the public may incite discussions about particular trademark holders who continuously act as trademark bullies. Those discussions could, in turn, bring about

changes in the way companies protect their trademarks.

Another route may be found in the progress made on a proposed federal anti-SLAPP law, which stands for "Strategic Lawsuit Against Public Participation."ⁿ¹⁹⁰ The term was coined about three decades ago by two Denver University professors, George Pring and Penelope Canan.ⁿ¹⁹¹ Pring and Canan recognized that lawsuits were discouraging people from participating in vital government processes.ⁿ¹⁹² Thus, they advocated for a statute that would curb these anti-democratic lawsuits.ⁿ¹⁹³ While this is a step in the right direction, it is incomplete because anti-SLAPP protection only applies once a plaintiff has actually dragged a defendant into court—a subset of the problematic situations involving cease and desist letters. However, the anti-SLAPP law may apply to trademark lawsuits,ⁿ¹⁹⁴ so it could offer a useful expedient in some cases.

A final solution could be to look to international law involving threat actions in the United Kingdom and other commonwealth countries. In these countries, threat actions allow a cease and desist letter recipient to sue the sender and obtain damages including attorney's fees for the suit.ⁿ¹⁹⁵ For example, Section 21 of the Trade Marks Act of 1994 states that where a trademark owner [*141] makes groundless threats of infringement proceedings, any person aggrieved may ask the court for a declaration that the threats are unjustifiable, an injunction to restrain the continuance of the threats, and damages for any loss sustained by the threats.ⁿ¹⁹⁶ The essential components of a threats action are that a relevant threat has been made, that the person threatened is "a person aggrieved" and finally, that the threat is unjustified.ⁿ¹⁹⁷

Borrowing from the threats action legislation in the United Kingdom would not be entirely seamless. The threats provisions appear to run counter to the Federal Rules of Civil Procedure (FRCP) which encourage parties to pursue alternative dispute resolution before commencing litigation.ⁿ¹⁹⁸ The FRCP encourage parties to put their respective cases to each other before litigation starts, and there is clear tension between the talk-first policy of the FRCP and the sue-first policy potentially encouraged by the threats legislation. These solutions would help avoid the current trend of large companies acting as trademark bullies against smaller companies with fewer resources and forcing them into submission. While some of the small businesses discussed in this Note have been successful, an immeasurable majority of businesses yield to the threats of larger corporations.

IV. Conclusion

The Trademark Technical Conforming Act of 2010 comes at an interesting time. The most important provision of this Act is a call to action for a study to be conducted concerning the long-term effects of unreasonably aggressive trademark owners. This study, while a seemingly small step, may put into motion meaningful reform in the way that large companies communicate with small companies when they believe their trademark is being infringed. Certainly, small companies are not always on the right side of the law and, oftentimes, the large company has a duty to police their trademark by alerting small and large companies alike that they may be engaged in illegal behavior. Engaging in some sort of trademark monitoring is necessary for all trademark owners. Admittedly, it is the larger companies who engage in overly aggressive litigious behavior that inspired the TTCA's creation.

While the goals of trademark law are to prevent consumer confusion, some larger companies overstep their bounds and become "bullies" when they harass smaller, lesser-known companies. This legislation, while a step in the right direction, merely acknowledges that a problem with these business tactics may [*142] be forming. Further action is necessary to protect both consumers and the owners of smaller businesses. The proposed solutions aim to suggest possible methods to improve the position of small business owners in the face of overly aggressive competitors. While there are definite costs associated with implementing each of these solutions, their benefits may prove to outweigh these

costs significantly.

The study required by the 2010 Trademark Technical Conforming Amendment Act comes after revisions to existing trademark law have been seemingly ineffective in helping small business owners, given past jurisprudence governing famous trademarks and dilution claims. While it is still unclear what results this study will generate, if any, it certainly has reopened a legislative dialogue that began with the Trademark Dilution Act of 1995. At a minimum, small business owners should feel some comfort in knowing that Congress is acknowledging the impact that trademark bullies have in the marketplace. Even if the study does not come out in favor of small businesses, perhaps they should hone their lobbying skills while the topic is still up for debate in Congress.

n45 15 U.S.C. § 1051 (2006).

n46 Lanham Act, 15 U.S.C. §§ 1051-1141 (2006).

n47 *Id.* § 1127.

n48 See, e.g., *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 162 (1995) (noting the underlying principles of trademark law, including the requirements that the mark "identify and distinguish [the seller's] goods . . . from those manufactured or sold by others and to indicate [their] source").

n49 See, e.g., *Interstellar Starship Servs. v. Epix, Inc.*, 304 F.3d 936, 943 n.6 (9th Cir. 2002) (suggesting that words like "Amazon" for an online bookstore or "Roach Motel" for an insect trap receive protection).

n50 Jane C. Ginsburg, Jessica Litman & Mary L. Kevlin, *Trademark and Unfair Competition Law: Cases and Materials* 108 (3d ed. 2001)

("Intel recently registered the five note sequence 'D flat, D flat, G, D flat, A flat' as a trademark for computer hardware.").

n51 See, e.g., *Polo Fashions, Inc. v. Craftex, Inc.*, 816 F.2d 145, 145 (4th Cir. 1987) (holding trademark owner of "an embroidered representation of polo player mounted on horse [could proceed with a] trademark infringement action under the Lanham Act").

n52 See, e.g., *In re Clarke*, 17 U.S.P.Q.2d (BNA) 1238, 1238-39 (T.T.A.B. 1990) (finding applicant demonstrated that the scent of "high impact, fresh, floral fragrance reminiscent of Plumeria blossoms" functions as a trademark for her thread and embroidery yarn).

n53 See, e.g., *Qualitex Co.*, 514 U.S. at 159 (holding that the green- gold color of a manufacturer's dry cleaning press pads could be registered as a trademark).

n54 *Hanover Star Milling Co. v. Metcalf*, 240 U.S. 403, 412 (1916).

n55 See William M. Landes & Richard A. Posner, *Trademark Law: An Economic Perspective*, 30 J.L. & Econ. 265, 270 (1987) ("The value of a trademark is the saving in search costs made possible by the information . . . that the trademark conveys.").

n56 See *Wallpaper Mfrs., Ltd. v. Crown Wallcovering Corp.*, 680 F.2d 755, 766 (C.C.P.A. 1982) (explaining that when trademark holders fail to sue infringers, they risk losing the significance of their mark).

n57 See *KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc.*, 543 U.S. 111, 111 (2004) (explaining that infringement is present when there is a likelihood of confusion between two marks).

n58 See *Ty Inc. v. Softbelly's, Inc.*, 353 F.3d 528, 531 (7th Cir. 2003) ("Ty polices the use of 'Beanie(s)' vigorously by filing lawsuits, sending cease and desist letters, and opposing trademark applications for the word or its cognates.").

n59 See *United States Jaycees v. Philadelphia Jaycees*, 639 F.2d 134, 139 (3d Cir. 1981) (holding that a trademark owner is not required to act immediately against every possible infringing use to avoid abandonment).

n60 See *Accurate Merch., Inc. v. Am. Pac.*, 186 U.S.P.Q. (BNA) 197, 200 (S.D.N.Y. 1975) (holding that a trademark owner must "take

reasonable measures to detect and prevent misleading uses of his trademark by his licensees or suffer cancellation of his federal registration").

n61 *Wallpaper Mfrs.*, 680 F.2d at 766 (connecting a trademark holder's failure to enforce his mark with its subsequent loss of legal significance).

n62 *Herm s Int'l v. Lederer de Paris Fifth Ave., Inc.*, 219 F.3d 104, 110 (2d Cir. 2000) ("To establish the defense [to trademark infringement] of abandonment, it is necessary to show either the owner's intent to abandon the mark, or a course of conduct on the part of the owner causing the mark to become generic or lose its significance as a mark.").

n63 Peter Lattman & Andrew Martin, *A Start-Up Takes on Proctor & Gamble Over a Name*, *Dearbook*, Sept. 28, 2011, <http://dealbook.nytimes.com/2011/09/28/a-start-up-takes-on-proctor-and-gamble-over-a-name/> (describing Proctor & Gamble's cease and desist letter that advised a small business owner that unless she changed the business's name, it would resort to "lengthy and expensive measures").

n64 Michael Barbaro & Julie Creswell, *With a Trademark in Its Pocket, Levi's Turns to Suing Its Rivals*, *N.Y. Times*, Jan. 29, 2007, at A1 ("[C]ompetitors say the [trademark infringement] lawsuits are the last resort of a poor loser, a company that has lost billions in sales, laid off thousands of workers and flirted with bankruptcy as the denim industry exploded.").

n65 *Id.*

n66 *See Hutchinson v. Essence Commc'ns, Inc.*, 769 F. Supp. 541, 569 (S.D.N.Y. 1991) (explaining that a trademark owner is entitled to engage in aggressive behavior to protect its mark).

n67 *See, e.g., Abercrombie & Fitch Co. v. Hunting World, Inc.*, 537 F.2d 4, 7 (2d Cir. 1976) ("A&F has spent large sums of money in advertising and promoting products identified with its mark 'Safari' and in policing its right in the mark, including the successful conduct of trademark infringement suits.").

n68 Federal Trademark Dilution Act of 1995, Pub. L. No. 104-98, 109 Stat. 985, amending the Trademark Act of 1946 (codified at 15 U.S.C. § 1125 (1995)).

n69 15 U.S.C. § 1125(c)(1) (2006).

n72 *Id.*

n73 See *infra* notes 74-80.

n74 See *Savin Corp. v. Savin Grp.*, 391 F.3d 439, 449 (2d Cir. 2004) (stating that a famous mark must be inherently distinctive); *Sporty's Farm L.L.C. v. Sportsman's Mkts., Inc.*, 202 F.3d 489, 497 n.10 (2d Cir. 2000) (discussing the requirement for fame in the general marketplace); *Star Mkts. Ltd. v. Texaco, Inc.*, 950 F. Supp. 1030, 1034-35 (D. Hawaii 1996) (finding that being famous in a "niche" market is sufficient); *Equine Techs., Inc. v. Equitechnology, Inc.*, 68 F.3d 542, 546- 47 (1st Cir. 1995).

n75 *Two Pesos, Inc. v. Taco Cabana, Inc.*, 505 U.S. 763, 768 (1992) (explaining that some marks are deemed inherently distinctive because "their intrinsic nature serves to identify a particular source of a product").

n76 McCarthy on Trademarks, *supra* note 39, § 15:1.50.

n77 *Id.*

n78 See *Wal-Mart Stores, Inc. v. Samara Bros., Inc.*, 529 U.S. 205, 211 (2000) (stating that secondary meaning is developed when the primary significance of the trademark is to identify the source of the product rather than the product itself).

n79 15 U.S.C. § 1125(c)(1) (2006).

n80 Compare *Ringling Bros.-Barnum & Bailey Combined Shows, Inc. v. Utah Div. of Travel Dev.*, 170 F.3d 449 (4th Cir. 1999), superseded by statute, 15 U.S.C. § 1125(c)(1) (2006) (concluding that the FTDA requires proof of actual dilution), with *Nabisco, Inc. v. PF Brands, Inc.*, 191 F.3d 208 (2d Cir. 1999), abrogated by *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418 (2003) (disagreeing with the Fourth Circuit and holding that an action for dilution may be adjudicated before actual dilution occurred by using a "likelihood of dilution" standard).

n81 *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418 (2003).

n82 *Id.* at 423.

n83 *Id.* at 433-34.

n84 *Id.*

n85 Trademark Dilution Revision Act of 2005: Hearing on H.R. 683 Before the Subcomm. on Courts, the Internet, and Intellectual Property of the H. Comm. on the Judiciary, 109th Cong. (2005).

n86 Trademark Dilution Revision Act of 2006, Pub. L. No. 109-312, 120 Stat. 1730.

n87 *Id.*

n88 See 15 U.S.C. § 1125(c)(1) (revising the FTDA by providing that using a trademark that is "likely to cause dilution" is enough to create liability under the Lanham Act, making clear that evidence of actual harm is not required).

n89 Candidus Dougherty & Greg Lastowka, *Virtual Trademarks*, 24 Santa Clara Computer & High Tech. L.J. 749, 793 (2008) (explaining that the Trademark Dilution Revision Act "loosened a plaintiff's evidentiary burden to a likelihood of dilution standard").

n90 *Id.*

n91 See, e.g., 152 Cong. Rec. H6965 (daily ed. Sept. 25, 2006) (statement of Rep. David Wu) (expressing concern that the Act too heavily favored major corporations over small businesses).

n92 See *Mattel, Inc. v. Walking Mountain Prods.*, 353 F.3d 792, 796 (9th Cir. 2003) (finding that the defendant did not infringe on Mattel's trademark by producing photographs that "portray[ed] a nude 'Barbie' doll in danger of being attacked by vintage household appliances").

n93 See, e.g., *Entrepreneur Media, Inc. v. Smith*, 279 F.3d 1135, 1144-45 (9th Cir. 2002) (holding a public relations firm's use of mark "Entrepreneur Illustrated" on publication distributed freely to media members was likely to cause confusion as to publisher's "Entrepreneur" mark for magazine targeted at small business owners, and thus infringed the "Entrepreneur" mark); *Bell v. Starbucks U.S. Brands Corp.*, 389 F. Supp. 2d 766, 777 (S.D. Tex. 2005) (holding "Plaintiff's use of the word 'Starbock,' as presented in Plaintiff's trademark application, and his use of 'Star Bock' in word form without the word 'beer' or any design elements, manifestly infringes Defendants' mark").

n94 See *Virgin Enterprises Ltd. v. Nawab*, 335 F.3d 141, 150 (2d Cir. 2003) (finding that the closer the junior company's goods resemble the other trademark user's famous brand, "the more likely that the consumer will mistakenly assume a common source").

n95 See, e.g., *Malletier v. Dooney & Bourke, Inc.*, 561 F. Supp. 2d 368, 391 (S.D.N.Y. 2008) (accepting plaintiff's mark as generally famous based on expenditures in advertising).

n96 See, e.g., Mike Masnick, TechDirt, Feb. 10, 2009, <http://techdirt.com/articles/20090210/0230413713.shtml>.

n97 See Robert G. Bone, *Hunting Goodwill: A History of the Concept of Goodwill in Trademark Law*, 86 B.U. L. Rev. 547, 549 (2006) ("It is customary to refer to trademark law as protecting a seller's goodwill in its mark.").

n98 See *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 163-64 (1995) (explaining how a mark reduces the cost to consumers of making informed shopping decisions); *Park 'N Fly, Inc. v. Dollar Park and Fly, Inc.*, 469 U.S. 189, 197-98 (1985) (concluding that one purpose of protecting trademarks is to "protect the ability of consumers to distinguish among competing producers").

n99 See William M. Landes & Richard A. Posner, *The Economic Structure of Intellectual Property Law* 167-68 (2003).

n100 *Id.*

n101 See *Qualitex Co.*, 514 U.S. at 164 (1995) (noting that trademark law " 'encourage[s] the production of quality products' and simultaneously discourages those who hope to sell inferior products by capitalizing on a consumer's inability quickly to evaluate the quality of an item offered for sale" (quoting *McCarthy on Trademarks*, supra note 39, § 2.01)).

n102 See Stacey L. Dogan & Mark A. Lemley, A Search-Costs Theory of Limiting Doctrines in Trademark Law, 97 *Trademark Rep.* 1223, 1225 (2007) (discussing the economic efficiencies created by trademarks as indicators of quality).

n103 See David W. Barnes, Trademark Externalities, 10 *Yale J.L. & Tech.* 1 (2007) (explaining that without trademark protection, consumers may mistakenly buy an inferior product and shun the mark holder's product).

n104 Bone, supra note 97, at 555-56.

n105 *Id.* at 549 ("It is customary to refer to trademark law as protecting a seller's goodwill in its mark There is, however, a serious problem with this proposition. Characterizing trademark law in terms of goodwill protection ultimately conflicts with the well recognized consumer-oriented goals of trademark law.").

n106 See *McCarthy on Trademarks*, supra note 39, § 6:3 (comparing the policies behind patents, trademarks, and copyrights).

n107 *Id.*

Meridian-based Scentsy files flurry of court documents to protect brand name**BYLINE:** Sean Olson**SECTION:** NEWS**LENGTH:** 836 words

Meridian direct sales giant Scentsy has filed a federal court request in a bid to stop unauthorized sales of its products.

Scentsy wants to compel Amazon.com to give up the names of sellers on the website who are offering Scentsy products.

Scentsy submitted a list of 100 different products displayed on Amazon in a request for subpoena filed Jan. 8 in the Idaho district of federal court. The company states that the sellers violate copyrights the company holds in the Amazon ads. The company did not respond to a request for comment on the issue, but patent lawyers say the copyright violation claims likely stem from the fact that the sellers use stock photos of Scentsy products in the ads.

Ken Pedersen, a patent attorney in Boise, said Amazon has been through this sort of court proceeding before, and courts have ruled that stock images can be used under the "fair use" exception to copyright infringement. Fair use allows people to use certain intellectual property in the public domain under various conditions, such as allowing news stories to be cited in research.

"The 9th Circuit (Court of Appeals) said this sort of thing is fair use," Pedersen said, adding that there is not any damage to Scentsy in this kind of potential copyright infringement. "They are a manufacturer; they make money from distributing their product, not because of these images. "

He said a good analogy of the issue is used car stock photos from Ford being placed in classified ads to resell a car, a practice that is widely held as legitimate and legal.

Meanwhile, Scentsy also moved forward with a trademark violation lawsuit against an Iowa-based company that sells apparel over the Internet, claiming some of the images used on clothing and other accessories violate Scentsy trademarks.

The Iowa company, American Hero Clothing & Accessories, uses repeated images on its products that incorporate the word "scents," including text such as "Join the Scentsation," "love wickless scents" and "ask me about joining my scents family. " The company never uses the word "Scentsy," however.

Scentsy released a statement from its chief legal officer, Phil Broadbent, Jan. 11.

"Scentsy has an obligation to protect our trademarks and our intellectual property," Broadbent states. "We have a process that allows people to get permission to use our trademarks, but in this case, the individual chose not to follow that process. We always seek voluntary compliance first, but sometimes we have to file a lawsuit. "

Meridian-based Scentsy files flurry of court documents to protect brand name The Idaho Business Review (Boise, ID)
January 15, 2013 Tuesday

The owner of American Hero, Michelle Sanderson, could not be reached. The company's website states that Sanderson, who is an Army veteran, started the clothing line to support veterans, firefighters and soldiers.

Boise patent attorney Scott Swanson said the courts will use the "likelihood of confusion" as the main test to judge whether American Hero violated the trademarks. That test measures whether reasonable people would be confused into thinking that American Hero's products were somehow connected to Scentsy's.

Swanson said Scentsy does not have a trademark on the word "scent," however, as the word has been a staple in the English language since well before Scentsy existed.

Pedersen said that from the limited amount of information available in the recently filed case, it appears Scentsy is pushing its luck with the American Hero case.

"It's harassment and trademark bullying. I can't even see what interest Scentsy is trying to protect here," Pedersen said.

Both court filings represent Scentsy attempts to protect its brand, but the motivations could be dissimilar.

The request for subpoena against Amazon might be an action that is directed at trying to regulate third-party marketing of Scentsy products, Pedersen said.

United States law allows people to resell goods they purchase legally within the country, so it is impossible to stop Amazon sellers from offering Scentsy products obtained legally. Lawsuits for copyright infringement could deter sellers from offering Scentsy products, however.

Swanson said companies are duty-bound to protect their trademarks for several reasons, and the case against American Hero could be an attempt at ensuring Scentsy fights potential trademark violations whenever the company can.

Swanson said protecting trademarks, through legal means if necessary, is important because when other companies use marks similar to the company's, it dilutes the value of the symbol. A good example is when a company that creates products similar to a rival's but of lesser quality uses a similar trademark, confusing customers and lowering the reputation of the rival company.

"A lot of companies' main value comes from their trademarks," Swanson said.

The legal action can also be important in determining the outcome of future legal cases, as other companies can show Scentsy did not aggressively defend its trademarks in other situations.

ARTICLE: THE MARK OF A RESOLD GOOD

NAME: Yvette Joy Liebesman* and Benjamin Wilson**

BIO: * Assistant Professor of Law, Saint Louis University School of Law. We wrote this Article with the support of the Summer Research Stipend Program at Saint Louis University School of Law. In addition, we benefited from comments at the Summer 2011 SLU Law Faculty Workshop, the Spring 2011 Works In Progress in Intellectual Property Colloquium at Boston University Law School, and the Summer 2011 Intellectual Property Scholars Conference at DePaul University Law School. Comments from Mark Lemley, Glynn Lunney, Greg Vetter, James Grimmelman, Laura Heymann, Zoe Argento, Ann Bartow, Zahr Said and Bob Brauneis were especially helpful. She is grateful to Renee Zerbonia and Nicholas Llewellyn, who provided valuable research assistance, as well as to her summer faculty fellows, Julia Houska, Stephanie Powell, Paul Silio, Ashley Sproull, and Ann Vatterott.

** Law Clerk for the Honorable William D. Stiehl of the U.S. District Court for the Southern District of Illinois.

LEXISNEXIS SUMMARY:

... Rather, the point is that the sort of attenuated confusion at issue in sponsorship and affiliation cases does not necessarily or even often harm consumers or the market for quality products , " and the costs of protecting consumers from this form of confusion is unreasonably high. ... Weber in a Texas federal court under the Lanham Act, alleging that she was an unaffiliated online reseller of Mary Kay cosmetics and that her sales therefore constituted unfair competition, passing off, and trademark infringement. ... Manufacturers have also used other means to stifle the resale market, such as filing claims of trademark and copyright infringement against both resellers and auction sites, attempting wholesale removal of their goods on auction websites and other unauthorized distribution channels, and using auction site take-down notice procedures that are supposed to be reserved for removing counterfeit and infringing goods. ... Dudnikov began listing goods for sale on eBay, she started having to defend herself against take-down notices submitted by the mark owners associated with the goods she was selling. ... Supposedly, "likelihood" is not the mere possibility of confusion; customer confusion must be "probable," and the likelihood of confusion must affect an "appreciable or substantial number of consumers."

TEXT:

[*157]

Introduction

The cosmetics giant Mary Kay requires that its Independent Beauty Consultants purchase at least \$ 200 worth of product each month. ⁿ¹ Unfortunately for Amy Weber, her relationship with Mary Kay was terminated because she failed to purchase the monthly minimum. ⁿ² To dispose of her large inventory of unsold products, Mrs. Weber sold the

products through her website, touchofpinkcosmetics.com, and through her "Touch of Pink" eBay store. ⁿ³

In 2008, Mary Kay brought action against Mrs. Weber in a Texas federal court under the Lanham Act, alleging that she was an unaffiliated online reseller of Mary Kay cosmetics and that her sales therefore constituted unfair competition, passing off, and trademark infringement. ⁿ⁴ In its pleadings, Mary Kay claimed that the website and eBay store's names created confusion as to affiliation or sponsorship--that is, consumers would wrongly assume that Weber was an authorized Independent Beauty Consultant affiliated with Mary Kay, even if that confusion ended prior to sale. ⁿ⁵

In her motion for summary judgment, Mrs. Weber argued that the first sale and nominative fair use doctrines rendered her sales lawful under the Lanham Act. ⁿ⁶ The court, however, denied her motion, ⁿ⁷ and Mrs. Weber [*158] ultimately lost at trial. ⁿ⁸ As a result, Mrs. Weber was enjoined from using the name "Touch of Pink" as her store name, ⁿ⁹ from "using any portion of Mary Kay's product descriptions to describe the products for sale on the defendant's website," ⁿ¹⁰ from "representing to consumers that Touch of Pink is a 'one stop shop' for all of a consumer's Mary Kay needs," ⁿ¹¹ and from "representing to consumers that Touch of Pink carries authentic products from former consultants that have never been tested or used." ⁿ¹² Mrs. Weber was thus prohibited from selling genuine products in the secondary market--an activity that thousands of individuals do on a regular basis at garage sales, flea markets, and secondhand stores.

With the Internet revolutionizing secondary market sales, Mrs. Weber's problem looms large. ⁿ¹³ This Article focuses on websites that resell genuine goods in the secondary market and the trademark infringement claims that are affecting their ability to legally market these goods. ⁿ¹⁴ Poli [*159] cites that advance the mark owner's ability to control all distribution channels would harm consumers and disincentivize competition; manufacturers would have less motivation to innovate and improve their product when they control all distribution of goods beyond their first sale. ⁿ¹⁵

This Article argues for an end to spurious claims of confusion where genuine goods are sold outside the manufacturer's distribution channel, as long as the reseller clearly disclaims any affiliation with the manufacturer or authorized distributor. This is in accord with the work of other scholars who have reached similar conclusions regarding irrelevant confusion, ⁿ¹⁶ the weak state of trademark fair use, ⁿ¹⁷ and the inadequacy of trademark defenses. ⁿ¹⁸ As with arguments in these areas, this Article contends that mark owners' attempts to increase the scope of their control over distribution channels thwart competition while doing little to protect consumers from deception. ⁿ¹⁹ These suggestions would protect the lawful sale of goods in the secondary market while allowing manufacturers to prevent counterfeit products from being sold online.

To begin this discussion, Part I looks at the nature of the Internet resale business, and the issues facing resellers regarding the use of the marks that are attached to the goods sold. This section tackles some of the practical difficulties that confront small resellers attempting to defend themselves against the mark owners in court. Part II focuses on the substantive legal issues that arise when a manufacturer uses initial interest confusion and a reseller's non-affiliation with "official" distribution channels of the good to limit competition. This Part examines how some courts have interpreted the law regarding fair use and confusion with regard to the online resale of genuine goods in a way that weakens the first sale doctrine in the process, [*160] as well as the overlap of trademark and copyright infringement claims in the online resale market.

Part III elaborates on trademark law's fair use and first sale defenses, and some courts' reluctance to recognize these defenses in the case of resold goods. Part IV proposes that courts strengthen trademark's nominative fair use and first sale doctrines, while discounting the controversial doctrine of initial interest confusion, to protect legitimate online merchants while recognizing the need for manufacturers to stop online counterfeiters. We conclude that the first sale doctrine, which is well-established in patent and copyright law, and considered by both the courts and Congress as an important limitation to a mark owner's Lanham Act rights in the brick-and-mortar setting, should include a presumption of non-infringement when a reseller is using a mark to truthfully inform consumers about the source of a genuine good.

I. That's Gonna Leave a Mark

When one buys a Waterford crystal vase, the Waterford mark remains associated with the vase. No matter how many times that vase is sold, traded, gifted, regifted, or bequeathed, it remains identified as a Waterford vase. This serves a trademark's dual function of identifying the source of the vase and protecting the Waterford brand equity.ⁿ²⁰ "Trademark law protects the producer from pirates and counterfeiters" and others who would attempt to exploit the good will established by Waterford.ⁿ²¹ However, merely because the Waterford mark remains inextricably linked to its vases as a source indicator does not and should not protect Waterford from controlling downstream sales of their goods outside their own distribution chains.ⁿ²² And while the Lanham Act is intended to promote quality goods and services by protecting producers' good will, it is irrelevant whether the customer even knows the identity of the source.ⁿ²³ Consumers need not be able to identify the company behind a mark--for example, the fact that Kimberly-Clark makes "Huggies" disposable diapers is unimportant, so long as the consumer recognizes that the "Huggies" mark identifies a single source of the good.ⁿ²⁴

A. From Garage Sales and Consignment Shops to the Internet

Over the past ten years, casual resellers have migrated from garage sales, swap meets, and classified ads to eBay and Craigslist, turning side hobbies into lucrative businesses. Today, there are hundreds of books about selling goods online;ⁿ²⁵ every month 30 million new ads are posted on Craigslist,ⁿ²⁶ and every day six million new listings are posted on eBay.ⁿ²⁷ The explosive online market has affected the sales of new goods, troubling manufacturers;ⁿ²⁸ in turn, mark owners seek to curtail the growth of this secondary market through several avenues--some legitimate, and others not so much.ⁿ²⁹ For example, to combat diversion to resellers outside of its official distribution chain, Tiffany, Inc., the well-known jeweler, attempted to institute a policy of limiting retail sales of identical items to lots of five or fewer, though this proved to be unsuccessful due to its sporadic enforcement.ⁿ³⁰

Manufacturers have also used other means to stifle the resale market, such as filing claims of trademark and copyright infringement against both resellers and auction sites,ⁿ³¹ attempting wholesale removal of their goods on [*162] auction websites and other unauthorized distribution channels,ⁿ³² and using auction site take-down notice procedures that are supposed to be reserved for removing counterfeit and infringing goods.ⁿ³³ These actions go beyond trademark bullying and are more than merely stopping a merchant from using the owner's mark--the goal is to remove the reseller's goods from the market altogether.ⁿ³⁴

Courts have aided manufacturers by ignoring the lack of confusion as to a good's source and finding that online initial interest confusion as to sponsorship or affiliation of the distribution channel--even when the goods are the genuine goods of the mark owner--constitutes infringement.ⁿ³⁵ *Mary Kay, Inc. v. Weber*,ⁿ³⁶ for example, illustrated this phenomenon.ⁿ³⁷ These courts' reasoning is contradicted by strong evidence showing that many consumers visit sites like eBay and Craigslist for the purpose of finding genuine goods at lower costs than they would find buying directly from the mark owner or authorized retailer, and are therefore not confused as to affiliation regarding distribution channel.ⁿ³⁸ This is just one of many reasons, unrelated to trying to find the mark owner, for a consumer to use the mark in question as an Internet search term.ⁿ³⁹

B. Genuine Goods

As long as the customer is not confused as to the source of these genuine goods, then the identity of the purveyor of the goods--whether it be the mark owner's own distribution channel or a resellerⁿ⁴⁰--should be irrelevant. As source identifiers, marks "provide[] consumers with information they [*163] need (and cannot otherwise readily obtain) in order to match their desires to particular products."ⁿ⁴¹ Indeed, the legislative history of the Lanham Act and related case law recognizes the need to protect consumers from passing off or otherwise confusing customers into purchasing goods that are not the genuine goods of the mark owner.ⁿ⁴² Trademarks serve to (1) foster competition in the marketplace;ⁿ⁴³ (2) encourage manufacturers to maintain the quality of goods;ⁿ⁴⁴ (3) "discourage[] those who hope to sell inferior products by capitalizing on a consumer's inability quickly to evaluate the quality of an item offered for

sale";ⁿ⁴⁵ (4) help consumers locate products and services more efficiently;ⁿ⁴⁶ and (5) serve as a "species of advertising."ⁿ⁴⁷ And while trademark protection may have some anticompetitive consequences, "such protection may nevertheless remain justified so long as the mark improves the flow of otherwise indiscernible information concerning . . . the product to consumers, and . . . consumer desires to producers."ⁿ⁴⁸

C. The Harsh Realities of Pursuing Justice

Although it would appear that--based on nominative fair use and first sale/exhaustion principles--online secondary-sale merchants have a strong and valid affirmative defense against any claims of trademark infringement and should thus be free from interference by the mark owners, the reality of fighting these charges in court, or even battling take-down notices from [*164] Internet service providers ("ISPs") and online auction sites, may be enough to shut down a secondary market business.ⁿ⁴⁹ The ISPs and auction sites also may face accusations of contributory infringement should they refuse to remove listings for the allegedly offending goods.ⁿ⁵⁰

The roadblocks faced by small resellers who choose to defend themselves against the mark owners in court find the odds stacked against them even in getting to the courthouse steps. Even those who want to either proactively fight mark owners through declaratory judgment actions or defend themselves against infringement may not have the resources to do so.

Oftentimes, the small reseller is unable to afford an attorney to defend itself,ⁿ⁵¹ or if on the offensive, the stakes are too small for it to be economically feasible for an attorney to pursue a claim on behalf of the client.ⁿ⁵² One illustration of the hardships fighting these claims involves reseller Karen Dudnikov, who, along with her husband, Michael Meadors, owns an eBay online auction store called Tabber's Temptations.ⁿ⁵³ Shortly after Ms. Dudnikov began listing goods for sale on eBay, she started having to defend [*165] herself against take-down notices submitted by the mark owners associated with the goods she was selling.ⁿ⁵⁴ At various times, Ms. Dudnikov's auctions were shut down due to recurring take-down notices, even though each time she successfully defended the claim and had the item relisted.ⁿ⁵⁵ But in 2003, Major League Baseball ("MLB") had eBay delist items containing various baseball team logos,ⁿ⁵⁶ and was able to have some of Ms. Dudnikov's auctions shut down for several days.ⁿ⁵⁷

The attorneys with whom they spoke advised the couple either they had no case, or that it wasn't worth pursuing,ⁿ⁵⁸ so Dudnikov and Meadors chose to bring a declaratory judgment action against MLB pro se, based on the trademark nominative fair use and copyright first sale doctrines.ⁿ⁵⁹ Eventually, MLB agreed to settle the matter and have its complaints against Dudnikov's eBay account expunged.ⁿ⁶⁰ The couple spent an enormous [*166] amount of time researching the law, and lost sales every time their auctions were shut down.ⁿ⁶¹ In addition, the cease-and-desist letters continued from other mark owners.ⁿ⁶²

Karen Dudnikov chose to fight and publicized their struggle online against these large corporations.ⁿ⁶³ Her inability to hire an attorney to represent them in her declaratory judgment action exemplifies one of several roadblocks facing resellers when they seek to defend their livelihoods.ⁿ⁶⁴ And many small businesses would most likely choose to close shop rather than spend the energy and money required to defend themselves against the behemoths.ⁿ⁶⁵ Due to the high costs of prolonged litigation, resellers who most likely would have a valid nominative fair use claim may not be able defend themselves.ⁿ⁶⁶ As noted by Professor William McGeveran, several ways in which courts that do follow *New Kids on the Block v. News America Publishing, Inc.*ⁿ⁶⁷ apply nominative fair use in a way to make it "less effective in delivering clear and swift resolutions that reduce chilling effects on speech."ⁿ⁶⁸

Reseller-defendants may face the same fate as Veoh Networks, which, even though it was cleared of copyright infringement liability, was fatally wounded defending itself.ⁿ⁶⁹ "Veoh is legal, but Veoh is dead--killed by rightsowner lawfare that bled it dry. Meanwhile, rightsowners wrongly assessed the legality of Veoh, but the worst consequence they suffered was overpaying their lawyers."ⁿ⁷⁰ Likewise, resellers may be dead right, but dead nonetheless if they attempt to fight big plaintiffs who are more concerned with shutting down competition than proving infringement.

II. Waging Lawfare

In addition to using threatening cease-and-desist letters, mark owners have not been shy about pursuing their claims in court.ⁿ⁷¹ The most common [*167] suits brought against online resellers are claims of either infringement,ⁿ⁷² or false designation of origin or descriptionⁿ⁷³ regarding the reseller's affiliation with the mark owner as an "authorized" distributor, often based on initial interest confusion.ⁿ⁷⁴ Other claims are sometimes also alleged, including trademark dilution,ⁿ⁷⁵ tortious interference with business relations,ⁿ⁷⁶ copyright infringement,ⁿ⁷⁷ and false advertising.ⁿ⁷⁸

A. Claiming All Sorts of Confusion

When asserting a claim of confusion as to affiliation, in her *prima facie* case, a plaintiff mark owner must demonstrate that (1) she is the owner of a registered mark; (2) the defendant has used a mark in commerce in connection with goods or services as an indicator of source or sponsorship; [*168] and (3) this use is likely to cause customer confusion.ⁿ⁷⁹ Of these elements, the last is the key in any infringement suit.ⁿ⁸⁰ Supposedly, "likelihood" is not the mere possibility of confusion; customer confusion must be "probable,"ⁿ⁸¹ and the likelihood of confusion must affect an "appreciable or substantial number of consumers."ⁿ⁸² Each circuit uses a similar set of factors to make this determination.ⁿ⁸³ The factors adopted by the Second Circuit in *Polaroid Corp. v. Polarad Electronics Corp.*ⁿ⁸⁴ are typical of those used by other circuits.ⁿ⁸⁵

Resellers are usually accused of confusion as to affiliation or sponsorshipⁿ⁸⁶ --that is, the consumer is likely to think that the reseller is an authorized distributor or affiliated with the mark owner, even if, upon visiting the [*169] reseller's website, the consumer immediately realizes this is not the case.ⁿ⁸⁷ As noted by Professors Mark Lemley and Mark McKenna, "'sponsorship' or 'affiliation' could refer to virtually any relationship between the parties," even ones that do not create any material confusion on the part of the consumer.ⁿ⁸⁸ These terms are not defined in the Lanham Act, "so courts must interpret those terms and their interaction with the confusion requirement."ⁿ⁸⁹

In their assertions, mark owners often compare this initial interest confusion to a "bait and switch"--the plaintiff claims that the defendant has used the plaintiff's mark in a way that gains the consumers' initial atten [*170] tion.ⁿ⁹⁰ Initial interest confusion relies on the notion that, due to being initially drawn to the competitor,

even though the consumer eventually may realize that the product is not the one originally sought, he or she may stay with the competitor. In that way, the competitor has captured the trademark holder's potential visitors or customers.

Even if the consumer eventually becomes aware of the source's actual identity, or where no actual sale results, there is nonetheless damage to the trademark. This damage can manifest itself in three ways: (1) the original diversion of the prospective customer's interest to a source that he or she erroneously believes is authorized; (2) the potential consequent effect of that diversion on the customer's ultimate decision whether to purchase caused by an erroneous impression that two sources of a product may be associated; and (3) the initial credibility that the would-be buyer may accord to the infringer's products--customer consideration that otherwise may be unwarranted and that may be built on the strength of the protected mark, reputation and [good will].ⁿ⁹¹

Initial interest confusion is a controversial claim and has not been accepted by all circuits. On the one hand, the Ninth Circuit recognizes "that the use of another's trademark in a manner calculated 'to capture initial consumer attention, even though no actual sale is finally completed as a result of the confusion, may be still an infringement.'"ⁿ⁹² The Fourth Circuit, however, describes it as "relatively new and sporadically applied" and has refused to consider the doctrine as a legitimate claim under the Lanham Act.ⁿ⁹³ [*171]

The initial interest confusion doctrine "is at odds with the purpose, intent, and literal meaning of the Lanham Act"

ⁿ⁹⁴ and we should question the outright validity of the doctrine. ⁿ⁹⁵ As Professor Jennifer Rothman argues,

application of the initial interest confusion doctrine prevents comparative advertisements, limits information available to consumers, and shuts down speech critical of trademark holders and their products and services. The initial interest confusion doctrine undermines the free market system under a misguided notion that competition in and of itself is unfair. ⁿ⁹⁶

B. Acts of Aggression

Encouraged by the expansion of trademark protection in the courts, mark owners have become increasingly aggressive in policing their marks. ⁿ⁹⁷ Since "the middle part of the twentieth century, courts have expanded the range of actionable confusion beyond confusion over the actual source of a product--trademark law's traditional concern--to include claims against uses that might confuse consumers about whether the trademark owner sponsors or is affiliated with the defendant[.]" ⁿ⁹⁸ Courts are finding liability even when consumers "couldn't possibly have been confused about the actual source of the defendants' products." ⁿ⁹⁹

The actionable confusion, according to these courts, was not confusion that would have led consumers to buy the wrong product, or even to wrongly think they were buying from the trademark owner. Rather, the theory in [the examples described by Professors Lemley and McKenna] was that consumers would think there was some relationship between the trademark owner and the defendant based on the defendant's use of the trademark. The problem with this formulation is that it fails to specify the types of relationships about which confusion is relevant or the harm that supposedly flows from confusion about those relationships. ⁿ¹⁰⁰

[*172]

Resellers are often at the mercy of spurious trademark and copyright infringement claims, and some courts have ignored affirmative defenses in finding infringement. ⁿ¹⁰¹ As discussed supra, and as illustrated in the Mary Kay decision, some courts have accepted that confusion with regard to distribution of genuine goods is a valid form of trademark infringement, ignoring that there is no confusion as to the source of the goods--thus eviscerating the first sale affirmative defense. ⁿ¹⁰² These forms of confusion, however, were not envisioned to apply to a competitor's use of the mark to sell the mark owner's own goods. ⁿ¹⁰³ Rather, it "results when a consumer seeks a particular trademark holder's product and instead is lured to the product of a competitor by the competitor's use of the same or a similar mark." ⁿ¹⁰⁴

Thus, in spite of the genuineness of the article sold through resellers, these online resale businesses face the prospect of infringement suits, due to courts' broadening interpretation of what constitutes actionable confusion. ⁿ¹⁰⁵ By rejecting a first sale defense based on initial interest confusion--which lowers the bar for a finding of a likelihood of confusion and thus infringement liability--"courts have made it very difficult to resell goods online." ⁿ¹⁰⁶ In essence, the ability to successfully claim initial interest confusion based on the distribution channel eviscerates the first sale/exhaustion defense for Internet resellers, even when any confusion ends before the sale is consummated. ⁿ¹⁰⁷ For Amy Weber, this meant that her claim that she was [*173] selling genuine Mary Kay goods fell on deaf ears. ⁿ¹⁰⁸ Such decisions seem contradictory to both congressional intent and Supreme Court precedent. ⁿ¹⁰⁹

C. Mixing It Up

Mark owners have also sought to indirectly stifle resellers by accusing the resellers' web hosts of infringement through claims of contributory infringement. ⁿ¹¹⁰ ISPs and online auction sites would find it very useful if there were an Internet safe harbor provision in the Lanham Act similar to the one that currently exists for copyright owners. ⁿ¹¹¹ Under Section 512 of the Copyright Act, if a rights holder notifies a service provider such as eBay that infringing copyrighted material is stored in its system, in order to be immune from a suit for monetary damages, the service provider must promptly remove the allegedly infringing work. ⁿ¹¹² The limitations of copyright [*174] rights, however, should, in theory, thwart attempts to remove listings of genuine items for resale. ⁿ¹¹³ However, this copyright

misuse leaves the mark owners vulnerable to lawsuits under Section 512(f) of the Digital Millennium Copyright Act ("DMCA").ⁿ¹¹⁴

The Copyright Act of 1976 provides copyright owners the exclusive right to reproduce, make adaptations, distribute, publicly display, and publicly perform their works.ⁿ¹¹⁵ Since photographing a three-dimensional copyrighted work results in a reproduction and adaptation of that work, photographing a Waterford vase, even for the purpose of posting the photograph in an advertisement selling the lamp, would theoretically infringe on the copyright owner's reproduction and adaptation right, and avail the copyright owner of the Section 512 take-down provisions.ⁿ¹¹⁶

There are, however several limitations on these exclusive rights,ⁿ¹¹⁷ including one which protects such activities. Congress created a narrow exception to the exclusive reproduction and adaptation rights in copyrighted [*175] works that have been lawfully reproduced in "useful articles," such as a lamp, or an article of clothing.ⁿ¹¹⁸ Section 113(c) of the Act declares that it is not an infringement of the reproduction rightⁿ¹¹⁹ for others to make and distribute pictures or photos of a useful article, such as our hypothetical Tiffany lamp, in connection with ads or commentaries related to the distribution or display of such articles, so long as the lamp has been offered for sale or distributed to the public.ⁿ¹²⁰ Consequently, it is lawful for a furniture store to feature a picture in a news ad or catalog of the lamp whose base is a statue, even though that would involve making a two-dimensional photographic reproduction of the statue. And, despite MLB's protestations, it was lawful as a matter of copyright law for Karen Dudnikov to display a photograph of MLB-logo items on her listing web page.ⁿ¹²¹ Since the photographs may be used to advertise goods for sale, this use should not expose the reseller to trademark infringement liability; otherwise Section 113 of the Copyright Act is meaningless.ⁿ¹²²

Yet mark owners persist in bullying resellers to remove photographs of their items from websites based on a trademark likelihood of confusion claim, eviscerating the exception delineated in Section 113.ⁿ¹²³ For example, Standard Process separately sued two resellers of dietary supplements--Total Health Discountⁿ¹²⁴ and chiropractor Scott J. Banksⁿ¹²⁵--for trademark infringement, based in part on their use of photographs of Standard Process's products that were being resold online by the defendants.ⁿ¹²⁶

Standard Process sent cease-and-desist letters to the two defendants, stating that use of Standard Process's photographs violated trademark law,ⁿ¹²⁷ and the defendants complied by removing the product photo [*176] graphs.ⁿ¹²⁸ Yet in addition to Section 113, the trademark first sale doctrine includes the ability to "stock, display, and resell"; posting photographs of products online amounts to displaying the products.ⁿ¹²⁹ There was no reason the defendants should have removed the photographs. Their removal, according to Professor Rebecca Tushnet, is "caving to bullying" and unwarranted.ⁿ¹³⁰

Since the first sale doctrine was originally borrowed from copyright law,ⁿ¹³¹ courts should consider that, since copyright law does not limit the right to use photographs of copyrighted material to advertise the sale of useful articles,ⁿ¹³² the same use should not be grounds for a trademark infringement claim. The evident purpose is to allow further sales in commerce,ⁿ¹³³ and the same limitation should be recognized with regard to trademark infringement claims. Moreover, product photographs can actually help mark owners identify counterfeit products.ⁿ¹³⁴ So, ironically, by creating an environment in which product photographs cause liability, mark owners make it even more difficult--for themselves and consumers--to identify counterfeit products.ⁿ¹³⁵

Of course, a major motive for removing photographs from the reseller's auction listings is that this will hurt sales. "Detailed information and photographs . . . help entice buyers."ⁿ¹³⁶ eBay even lists as one of its [*177] most effective strategies the use of "photos from a variety of angles."ⁿ¹³⁷ If mark owners were able to claim that a reseller's use of photographs constitutes trademark infringement, this would be an end run around Section 113 of the Copyright Act and eviscerate any protection it affords.ⁿ¹³⁸

We can see an illustration of this misclaiming of rights in Disney's actions against Karen Dudnikov. In 2002, Disney sought to remove items from Ms. Dudnikov's website that were crafted from legally purchased bulk fabricⁿ¹³⁹

that contained licensed Disney characters.ⁿ¹⁴⁰ Eventually Disney [*178] backed down and agreed that Ms. Dudnikov's creations from licensed Disney fabric were not infringing uses.ⁿ¹⁴¹ Disney claimed copyright infringement to shut down her eBay auction, yet Disney's objection to Ms. Dudnikov displaying her crafts on her website was in direct conflict with the exemption under Section 113.ⁿ¹⁴² Thus, despite a demonstrably false copyright infringement claim, manufacturers such as Disney attempt to use the take-down provisions in Section 512 of the Copyright Act to remove online auction items listings.ⁿ¹⁴³

Misusing copyright and trademark law points to a single objective: to decrease the competition of secondary markets.ⁿ¹⁴⁴ Small dealers are faced with either defending themselves or ceasing operations.ⁿ¹⁴⁵ And as previously discussed, even when a successful defense is likely, the costs of such litigation can be prohibitively expensive, and even the threat of litigation leads the secondary market merchants to abandon their online ventures.ⁿ¹⁴⁶ [*179]

D. Further Pursuits

In addition to attacking resellers, in their aggressive pursuit to shut down the Internet resale market, mark owners have also taken their fight to ISPs and online auction sites, alleging contributory infringement based on resellers' use of these sites to advertise the mark owners' goods.ⁿ¹⁴⁷ The Supreme Court has held that

even if a manufacturer does not directly control others in the chain of distribution, it can be held responsible for their infringing activities under certain circumstances. . . . If a manufacturer or distributor intentionally induces another to infringe a trademark, or if it continues to supply its product to one whom it knows or has reason to know is engaging in trademark infringement, the manufacturer or distributor is contributorily responsible for any harm done as a result of the deceit.ⁿ¹⁴⁸

In their suits, mark owners allege that auction sites are not doing enough to stop counterfeiters; however, the mark owners also have the objective of removing genuine goods from this alternative distribution channel.ⁿ¹⁴⁹ For example, in 2002, Tiffany & Co., the well-known jewelry company, began pressuring eBay to summarily remove Tiffany goods that met some general criteria--such as merchants selling more than five items--alleging that any Tiffany items sold in bulk outside Tiffany's normal distribution chain had to be counterfeit.ⁿ¹⁵⁰ When eBay refused to do so, Tiffany sued, contending that eBay was "facilitating and advertising the sale of 'Tiffany' goods that turned out to be counterfeit."ⁿ¹⁵¹

eBay was successful in defending both direct and indirect infringement claims based on the defenses of nominative fair useⁿ¹⁵² and lack of control over the merchants who use the site.ⁿ¹⁵³ The Second Circuit declined to find eBay contributorily liable, stating "that eBay's practice was promptly to remove the challenged listing from its website, warn sellers and buyers, [*180] cancel fees it earned from that listing, and direct buyers not to consummate the sale of the disputed item."ⁿ¹⁵⁴

While the court found that eBay did possess general knowledge that counterfeit items were listed on its website, it held that under the Supreme Court test outlined in *Inwood Laboratories, Inc. v. Ives Laboratories, Inc.*,ⁿ¹⁵⁵ generalized knowledge was not sufficient "to impose upon eBay an affirmative duty to remedy the problem."ⁿ¹⁵⁶ Other websites have also successfully defended themselves against similar suits.ⁿ¹⁵⁷

In spite of winning in court, these websites want to avoid suits for contributory infringement, and will take an unnecessarily strong conservative approach regarding accused listings.ⁿ¹⁵⁸ The hosts want to ensure that they are viewed merely as "conduits" between the buyer and seller with no direct control over the listed goods,ⁿ¹⁵⁹ and will usually remove listings based on any accusation by the mark owner.ⁿ¹⁶⁰ If it is later proved (by the entity listing the good for sale) that it is indeed a genuine good and there is no confusion as to "distribution channel" affiliation, the item is relisted.ⁿ¹⁶¹ This cycle [*181] of removing/disputing/relisting, however, costs the resellers of genuine goods time, money, and frustrationⁿ¹⁶² and creates added burdens to both the reseller and the auction site, stifling the sale of goods for both parties.ⁿ¹⁶³ Under the eBay model, every time an item is listed, the auction site earns a fee, and another fee is earned when the item is sold.ⁿ¹⁶⁴ Yet when a "take down" occurs, the listing fee is returned to the seller, depriving the

host of the fee for a legitimate good.ⁿ¹⁶⁵ If the reseller eventually gives up due to the burden of constantly having to defend legitimate auction listings to the host, then both the reseller and the host lose the income that is generated from the listing and sale of the good.ⁿ¹⁶⁶

A clearly defined and strong trademark first sale doctrine, however, would give auction hosting sites less concern over potential lawsuits by mark owners who don't like their items being sold outside their authorized distribution channels.ⁿ¹⁶⁷ [*182]

III. Getting Defensive

It has been repeatedly acknowledged that the producer of a good cannot prevent others from using the good's mark to truthfully describe the good.ⁿ¹⁶⁸ This basic belief is the foundation for both nominative fair use and first sale defenses, and "reflects the simple insight that anybody should be free to refer to goods and services by their brand names."ⁿ¹⁶⁹

A. Repackaged, Repaired, Resold

There are several ways to use another's mark in commerce which do not constitute infringement. These include, among others,ⁿ¹⁷⁰ (1) the vendor is selling repackaged goods; (2) the vendor is selling used or repaired goods; (3) or the vendor is reselling a genuine good.ⁿ¹⁷¹

While using a mark to identify repackaged goods may be done in a non-infringing way, the repackager does not receive absolute protection under the first sale doctrine--the repackaging "can present a non-trivial harm to the producer's good will, and can deceive consumers who, in addition to identifying the trademark, have come to expect or rely upon a particular type of packaging in their purchasing decisions."ⁿ¹⁷²

When a "reseller's repackaging interferes with the trademark owner's ability to control the quality of its products . . . two harms can arise: harm to the consuming public in the form of deception and harm to the trademark owner in the form of loss of [good will]."ⁿ¹⁷³ Consequently, as packaging becomes more and more important in swaying a potential consumer's purchasing decision, shoddy packaging may cause increasing harm to the mark owner's good will, resulting in a higher likelihood of trademark infringement liability.ⁿ¹⁷⁴

In order to avoid Lanham Act liability, when sellers purchase genuine goods and then repackage the goods for resale, these resellers generally [*183] must (1) disclose that they have repackaged the goods; (2) include their own name; (3) provide notice on the package that they are not affiliated with the manufacturer; and (4) must not give "undue prominence" to the good's mark.ⁿ¹⁷⁵ These rules for repackaged goods illustrate the underlying philosophy governing all sellers and resellers--an obligation to tell the truth regarding the source of the goods.ⁿ¹⁷⁶

Other resellers repair goods and then resell them with the original trademark on the goods or the packaging.ⁿ¹⁷⁷ A reseller who is selling a repaired good "has the right to resell the original product with the original trademark attached, as long as he tells the truth about the origin of the repaired goods and about his responsibility for any repairs."ⁿ¹⁷⁸ And just as a reseller must state that repackaged goods have been repackaged, a reseller of repaired goods must state that they have been repaired.ⁿ¹⁷⁹ At some point, however, repairs may be so extensive that the product "cannot properly be considered the same any longer"ⁿ¹⁸⁰ and the mark no longer truthfully describes the goods attached to it.

B. Trademark Nominative Fair Use

Supposedly, "use of the mark alone is not sufficiently probative of" an intent to deceive the public into believing that the mark owner endorsed or somehow supported the defendant's products or services.ⁿ¹⁸¹ Accordingly, [*184] nominative fair uses are actions outside of trademark law,ⁿ¹⁸² and a defendant has a right to use a plaintiff's mark to truthfully describe the plaintiff's goods using the plaintiff's mark.ⁿ¹⁸³ In his opinion in *New Kids on the Block*, Judge Alex Kozinski declared that courts

may generalize a class of cases where the use of the trademark does not attempt to capitalize on consumer confusion or to appropriate the cachet of one product for a different one. Such nominative use of a mark--where the only word reasonably available to describe a particular thing is pressed into service--lies outside the strictures of trademark law: Because it does not implicate the source-identification function that is the purpose of trademark, it does not constitute unfair competition; such use is fair because it does not imply sponsorship or endorsement by the trademark holder.ⁿ¹⁸⁴

Yet in spite of its 20-year history, the nominative fair use defense has mostly been confined to the Third, Fifth, and Ninth Circuits, and is not well understood in any of them.ⁿ¹⁸⁵ Indeed, in the Ninth Circuit, nominative fair use is not an affirmative defense; rather, it replaces likelihood of confusion in the plaintiff's prima facie case.ⁿ¹⁸⁶ The Ninth Circuit declares that, in asserting nominative fair use, a defendant "need only show that it used the mark to refer to the trademarked good,"ⁿ¹⁸⁷ having the burden of proving that (1) the product or service in question is one not readily identifiable without the use of the trademark; and (2) only so much of the mark is used as is reasonably necessary to identify the product or service.ⁿ¹⁸⁸ "The burden then reverts to the plaintiff to show a likelihood of confusion,"ⁿ¹⁸⁹ that the user has acted in a way "that would, in conjunction with the mark, suggest sponsorship or endorsement by the trademark holder."ⁿ¹⁹⁰ As noted supra, this [*185] final prong is "a substitute for the usual likelihood-of-confusion analysis"ⁿ¹⁹¹ and "amounts to a requirement of good faith [on the part of the defendant], denying protection . . . to anyone who attempts to use a trademark to confuse the public."ⁿ¹⁹²

The Fifth Circuit recommends--without requiring--that courts evaluate likelihood of confusion and nominative fair use simultaneously.ⁿ¹⁹³ In contrast, in 2005, the Third Circuit designed its own two-step version of nominative fair use, whereby the plaintiff must prove likelihood of confusion under a modified likelihood-of-confusion test, which removes factors that are not appropriate in the context of nominative fair use.ⁿ¹⁹⁴ This replaces the third part of the Ninth Circuit's test, instead asking whether "the defendant's conduct or language reflect the true and accurate relationship between plaintiff and defendant's products or services."ⁿ¹⁹⁵ The burden then shifts to the defendant to show that its use is fair, under the court's own three-part nominative fair use test.ⁿ¹⁹⁶

The First, Second, and Sixth Circuits have either rejected or declined to adopt nominative fair use,ⁿ¹⁹⁷ and other courts have yet to decide on its adoption or rejection.ⁿ¹⁹⁸ Yet in spite of this limited acceptance, nominative [*186] fair use is mentioned, albeit without a definition, in the Trademark Dilution Revision Act of 2006.ⁿ¹⁹⁹

The nominative fair use defense has been criticized for its analytical defects. As noted by Professor McGeeveran, "nominative fair use as it now exists has become ungainly and often unhelpful."ⁿ²⁰⁰ Professor McGeeveran argues that there are three major issues with how courts apply a nominative fair use analysis.ⁿ²⁰¹ First, the analysis typically occurs late in the litigation process rather than early in the process, when many defenses are adjudicated.ⁿ²⁰² The second issue arises when courts

become entangled in a foolish preliminary inquiry of asking whether the nominative fair use doctrine, rather than section 33(b)(4) [descriptive fair use], applies to particular facts. The third and most significant problem. . . is the collapse of the requirements for nominative fair use into a substitute likelihood of confusion analysis in a way that actually prejudices fair uses and further prolongs litigation.ⁿ²⁰³

Professor McGeeveran also argues that "this substitution also shifts burdens unfairly. Nominative use was not designed as a means to determine ultimate liability, but as a mechanism to set aside cases that fall outside the bounds of trademark law."ⁿ²⁰⁴ He evinces the Ninth Circuit's use of the doc [*187] trine in a way that eviscerates nominative fair use's usefulness.ⁿ²⁰⁵ "Instead of serving as an early 'gatekeeper' that can screen out fair uses and reduce the length and cost of litigation, nominative fair use becomes just another fact-intensive confusion inquiry that may be brought only after extensive discovery."ⁿ²⁰⁶

Professor Graeme B. Dinwoodie likewise concludes that "the third part of the [Ninth Circuit's] test looks very

much a proxy for an assessment of likely confusion as to association, sponsorship or endorsement." ⁿ²⁰⁷ Professor Dinwoodie suggests "that it is time to treat nominative fair use as an autonomous and real defense, rather than simply a reformulation of the test for likely confusion." ⁿ²⁰⁸

Similarly, in his treatise, Professor Thomas McCarthy queries how the third part of the test

differs from the ultimate issue that the three part test is supposed to facilitate: is there a likelihood of confusion? If it is not to be simply a repetition of the ultimate issue, . . . the third factor should be viewed as asking whether, in addition to mere use of the mark, defendant has engaged in some additional conduct that affirmatively suggests sponsorship or endorsement by the plaintiff. ⁿ²⁰⁹

These criticisms appear well-founded because some courts indeed evaluate the third part of the nominative fair use test using the same factors they use for likelihood of confusion. ⁿ²¹⁰ Indeed, there should be some degree of confusion allowed without foreclosing that a defendant's use is objectively fair. ⁿ²¹¹ Professor McGeveran succinctly summarizes the confused and inadequate state of the nominative fair use defense:

Courts have gradually larded up the simple idea of nominative fair use presented in *New Kids* to the point where it is excessively complex and minimally useful. By moving the doctrine away from any role as an early screening mechanism and closer in timing and substance

[*188]

to the likelihood of confusion determination, subsequent cases have destroyed nominative fair use. ⁿ²¹²

Thus, this muddled application of nominative fair use has adversely affected the ability of online resellers' such as Karen Dudnikov and Amy Weber to truthfully describe their goods. ⁿ²¹³ This unfairly strengthens mark owners' control over distribution channels for their goods beyond the initial sale to the public. ⁿ²¹⁴

C. That First Sale of a Genuine Good

The nominative fair use defense usually concerns comparative advertising ⁿ²¹⁵ or other instances where the defendant is selling their own goods and in some way refers to the mark owner's goods. ⁿ²¹⁶ Under first sale/exhaustion--which could be considered a variation of nominative fair use--the defendant does not use the plaintiff's mark in an effort to sell her own goods, but rather uses the plaintiff's mark to refer to the plaintiff's goods, albeit with the intention of selling the plaintiff's goods. ⁿ²¹⁷ The first sale doctrine is based on the principle that trademark owners should not be able to control downstream sales of their goods. ⁿ²¹⁸ **[*189]**

While first sale is legislatively created in the Copyright Act, ⁿ²¹⁹ trademark and patent first sale (or exhaustion) affirmative defenses are long-recognized judicial constructs. ⁿ²²⁰ All three, however, serve a similar purpose: to "narrow[] the rights of the creator of intellectual property by creating competition between the creator and the reseller of the work." ⁿ²²¹ As noted supra, ⁿ²²² the Supreme Court has recognized as early as 1924 that, even though it results in the secondary market merchant getting some advantage from the mark, a mark may be used by a refurbisher or reseller of a good in a way that does not deceive the public. ⁿ²²³ Under the exhaustion doctrine, **[*190]**

the resale of genuine trademarked goods generally does not constitute infringement. This is for the simple reason that consumers are not confused as to the origin of the goods: the origin has not changed as a result of the resale. . . . The trademark protections of the Lanham Act are exhausted after the trademark owner's first authorized sale of that product. Therefore, even though a subsequent sale is without a trademark owner's consent, the resale of a genuine good does not violate the Act. ⁿ²²⁴

It reflects a general public policy against restraints on alienation. ⁿ²²⁵ The Southern District of New York quite

recently reaffirmed this longstanding principle in *Bel Canto Design, Ltd. v. MSS HiFi, Inc.*ⁿ²²⁶ --"as a general matter, trademark law does not reach the sale of genuine goods bearing a true mark even though the sale is not authorized by the mark owner."ⁿ²²⁷ The court reaffirmed that the "Lanham Act does not give mark owners the right to control subsequent, non-authorized resales, as long as the product sold is genuine."ⁿ²²⁸ In her opinion, Judge Colleen McMahon cites the long history in the Second Circuit recognizing that "the unauthorized sale of a trademarked article does not, without more, constitute a Lanham Act violation."ⁿ²²⁹

Thus, a reseller has the right to dispose of genuine goods that were originally produced under the authority of the mark owner, provided that the goods are not materially altered and the reseller does not give the impression it is affiliated with the manufacturer.ⁿ²³⁰ "Resale by the first purchaser of the original article under the producer's trademark is neither trademark infringement nor unfair competition."ⁿ²³¹ Because reselling the manufacturer's product can lead to some confusion as to the connection between the mark owner and the reseller, the first sale defense should not be

rendered inapplicable merely because consumers erroneously believe the reseller is affiliated with or authorized by the producer. It is the essence of the "first sale" doctrine that a purchaser who does no more than stock, display, and resell a producer's product under the producer's trademark violates no right conferred upon the producer by the Lanham Act. When a purchaser resells a trademarked article under the producer's trademark, and nothing more, there is no actionable misrepresentation under the statute.ⁿ²³²

Courts should tolerate more confusion than they typically do where the defendant is using a mark similar to the plaintiff's to sell the defendant's own goods.ⁿ²³³ As noted by David Barnes, courts tend to treat first sale "as an affirmative defense to what would otherwise be an infringement of the creator's rights . . . and the trademark defendant has the burden of proving that it was reselling genuine and lawfully acquired goods."ⁿ²³⁴ However, it is the plaintiff's burden under the Lanham Act to establish likelihood of confusion as part of the prima facie case.ⁿ²³⁵ Therefore, if the reason for the alleged likelihood of confusion claim is that the goods are not genuine, the plaintiff must prove that.ⁿ²³⁶

D. Exhausted in Cyberspace

The trademark first sale/exhaustion principle supposedly extends to a reseller's use of a mark in cyberspace.ⁿ²³⁷ This means that "a retailer can use a brand name on Web site ads selling that branded product without a license from the trademark owner,"ⁿ²³⁸ so long as the reseller does not mislead the consumer into believing that the reseller is an authorized dealer of the brand.ⁿ²³⁹ Deceptiveness as to affiliation between the reseller and the [*193] mark owner could also be better handled through a claim of false advertising.ⁿ²⁴⁰ After all, courts have consistently held that

after the first sale, the brandholder's control is deemed exhausted. Down-the-line retailers are free to display and advertise the branded goods. Secondhand dealers may advertise the branded merchandise for resale in competition with the sales of the markholder (so long as they do not misrepresent themselves as authorized agents).ⁿ²⁴¹

Exhaustion should apply equally to online sales as it does to brick-and-mortar stores.ⁿ²⁴² Courts, however do not always do so, and--as discussed below--by supporting plaintiffs' claims of trademark infringement, they extend control over the distribution channels of goods beyond the initial sale.ⁿ²⁴³

IV. Challenging the Mark Owner's Desire for Total Control

As illustrated *supra*, there is a need for comprehensive and definitive trademark nominative fair use and first sale doctrines with regard to online resale of genuine goods, along with more leeway regarding initial interest confusion related to distribution affiliation.ⁿ²⁴⁴ Our solutions are supported by recent trademark scholarship advocating the need for a showing of actual injury, rather than "merely a benefit to someone else."ⁿ²⁴⁵ [*194]

A. Strengthening Available Defenses

In line with this current advocacy seeking to eliminate claims where there is no confusion as to source or responsibility or material confusion,ⁿ²⁴⁶ this Article proposes more specific solutions with regard to Internet resellers. There is a need for either the courts or Congress to rebalance the scales regarding trademark rights to prevent continued control by mark owners of the distribution of their products beyond the first sale.ⁿ²⁴⁷ However, "absent congressional action, courts have only a limited ability to correct the imbalance between trademark liability and defenses."ⁿ²⁴⁸ For a legislative solution that would protect resellers of genuine goods without affecting a mark owner's ability to remove counterfeit goods from the marketplace, Congress could add language to the Lanham Act which (1) codifies trademark first sale and nominative fair use as defenses under Section 33(b); (2) eliminates the controversial claim of initial interest confusion regarding the sale of genuine goods; and (3) specifies a requirement of deceptive intent regarding distribution affiliation confusion for it to be an actionable claim.ⁿ²⁴⁹ This would generate uniformity among the circuits regarding nominative fair use, initial interest confusion, and the robustness of the first sale doctrine with regard to trademarks. Professor Michael Grynberg notes that when Congress passed the Trademark Anti-Dilution Act, it "enacted specific safe harbors for activities that are unlikely to cause confusion or those that may cause confusion, but whose social utility is high enough that the benefits of immunizing the acts outweigh any costs."ⁿ²⁵⁰

Since the trademark exhaustion doctrine has its roots in copyright law,ⁿ²⁵¹ an amendment to the Lanham Act could mimic Section 109 of the [*195] Copyright Act.ⁿ²⁵² Similar language would provide uniformity across these two often-times related intellectual property claims. As discussed earlier, copyright and trademark infringement are often asserted in the same lawsuit.ⁿ²⁵³ If Lanham Act language clearly stated that the same first sale exception which applied for copyright also applied for the use of the mark attached to the goods, this would give resellers more certainty in their use of the mark owner's brand when identifying the mark owner's goods during resale.

This solution should lead to less litigation; however unless damages for frivolous suits are allowed, it may not stop the reality of cease-and-desist letters and threatened litigation.ⁿ²⁵⁴ Penalties for threats of frivolous litigation are common, and are part of anti-trust law,ⁿ²⁵⁵ first amendment protectionⁿ²⁵⁶ and copyright law.ⁿ²⁵⁷ Similarly worded language in the Lan [*196] ham Act may prevent some of this bullying with regard to frivolous litigation.ⁿ²⁵⁸

B. Expect Some Confusion

As noted supra, courts should move back towards their "traditional willingness to permit a considerable degree of confusion in order to leave room" for competition.ⁿ²⁵⁹ Professor Jennifer E. Rothman contends that, with regard to metatags, domain names, and search engines,

the initial interest confusion doctrine. . . conflicts with specific well-established principles in trademark law. Trademark law, like copyright and patent law, provides that a consumer who purchases a good can freely resell that good without committing trademark infringement. Being able to resell goods necessitates the ability to advertise the sale of such goods. The initial interest confusion doctrine severely limits the freedom of consumers to resell products.ⁿ²⁶⁰

More broadly, Professor Glynn Lunney argues that, "we must limit actionable confusion to cases where, if the use is allowed to continue, a substantial number of purchasers or prospective purchasers will actually become confused concerning information that will materially influence their buying decisions."ⁿ²⁶¹ As such, this Article argues that, unless the mark owner can show actual deception on the part of the reseller, as a general rule plaintiffs should not be allowed to claim initial interest confusion with regard to alternative distribution channels of genuine goods.ⁿ²⁶² First, as long [*197] as there is no deception on the part of the reseller, any confusion as to "distribution channel" affiliation ends prior to the sale of the good.ⁿ²⁶³ Second, as noted earlier, many consumers visit sites like eBay and Craigslist for the purpose of finding genuine goods at lower costs than they would expect to find when buying directly from the mark owner or an authorized retailer.ⁿ²⁶⁴

Indeed, when a product is subject to first sale doctrine and the nominative fair use that accompanies it, some

confusion should be expected. The Supreme Court declared in *KP Permanent Make-Up, Inc. v. Lasting Impressions I, Inc.*ⁿ²⁶⁵ that, "since the burden of proving likelihood of confusion rests with the plaintiff, and the fair use defendant has no free-standing need to show confusion unlikely, it follows . . . that some possibility of consumer confusion must be compatible with fair use, and so it is."ⁿ²⁶⁶

Any initial confusion to the resale of a genuine good is related to the distribution source, not to the good itself; a claim of initial interest confusion should be a spurious allegation.ⁿ²⁶⁷ An assertion of confusion as to the distributor's affiliation should be discounted--after all, there is no confusion as to the source of the good; the mark owner is truthfully the source of the good. And to hold a defendant liable for infringement where there may only be initial confusion as to whether the distribution channel is associated with the mark owner results in the mark owner controlling subsequent sales of his or her product.ⁿ²⁶⁸

Although courts have declared that "affiliation confusion exists where use of a 'unique and recognizable identifier' could lead consumers to 'infer a relationship' between the trademark owner and the new product[.]"ⁿ²⁶⁹ this should not apply to the distribution of the goods after the initial sale, but rather only to the good itself. Otherwise, a finding of initial interest affiliation confusion because the seller is not affiliated with the mark owner would eviscerate any protection afforded through trademark law's first sale/exhaustion principle.ⁿ²⁷⁰ **[*198]**

Because of the controversial nature of the claim, we should question whether initial interest affiliation confusion matters at all with regard to the secondary sale of goods. Courts have found such a claim spurious. In her concurrence in *Playboy Enterprises, Inc. v. Netscape Communications Corp.*,ⁿ²⁷¹ Judge Marsha Berzon contended that it was not "reasonable to find initial interest confusion when a consumer is never confused as to source or affiliation, but instead knows, or should know, from the outset that a product or web link is not related to that of the trademark holder because the list produced by the search engine so informs him."ⁿ²⁷² Yet this form of confusion has been successfully asserted in Internet resale cases.ⁿ²⁷³ Juries and judges have supported a finding of infringement based on initial interest affiliation confusion as to the distribution channel of the good,ⁿ²⁷⁴ and have often discounted any first sale or nominative fair use defense.ⁿ²⁷⁵ Judges and juries seem to hold Internet sales to a different standard than consignment and resale shops in the brick-and-mortar world, where a plaintiff would face a much higher hurdle to show customer confusion with regard to distribution affiliation.ⁿ²⁷⁶

There should be a presumption of non-infringement when a product's brand is used in the advertising for the reselling of an item--including in the description of it or use of a photograph of the item in an online sale. This presumption would shift the burden of proof--rather than the reseller-defendant asserting nominative fair use as an affirmative defense, the plaintiff would have to overcome this presumption as part of his or her prima facie case.ⁿ²⁷⁷

Without a proven deception by the reseller, confusion as to affiliation with regard to distribution channels should be negated by the fact that the goods in question are genuine goods, and there is no confusion as to the actual source of the goods. As Justice Antonin Scalia stated in *Dastar Corp. v. Twentieth Century Fox Film Corp.*,ⁿ²⁷⁸ "the words of the Lanham Act should not be stretched to cover matters that are typically of no consequence to purchasers."ⁿ²⁷⁹ As long as the goods are genuine, we must even question whether the purchaser is initially confused regarding the reseller's lack of affiliation with the mark owner.ⁿ²⁸⁰ Indeed, when looking even more **[*199]** generally at sponsorship or affiliation confusion, Professors Lemley and McKenna provide a strong argument that the "point is not that consumers can never be harmed by confusion regarding non-quality-related relationships. Rather, the point is that the sort of attenuated confusion at issue in sponsorship and affiliation cases does not necessarily or even often harm consumers or the market for quality products[.]"ⁿ²⁸¹ and the costs of protecting consumers from this form of confusion is unreasonably high.ⁿ²⁸² "In delineating the boundary between fair and unfair competition, we must keep firmly in mind that if competition is to remain an effective force for promoting social welfare, we must leave room for would-be competitors to operate."ⁿ²⁸³

C. Resellers as a Class of Plaintiffs

Suppose Karen Dudnikov contacted other eBay resellers who had faced similar problems, and they banded together as a class of plaintiffs to enjoin MLB and other repeat accusers from shutting them down. As discussed *supra*, resellers individually may not suffer enough damage to bring a viable lawsuit themselves.ⁿ²⁸⁴ Forming a class of plaintiffs, however, would be more economical and encourage settlement as well.ⁿ²⁸⁵ "Class relief is 'peculiarly appropriate' when the 'issues involved are common to the class as a whole' and when they 'turn on questions of law applicable in the same manner to each member of the class.'" ⁿ²⁸⁶ Yet class actions are a rarity in the world of trademark law due to significant procedural difficulties.ⁿ²⁸⁷

For the resellers to sue a mark owner as a class of plaintiffs, they would need to show, under Federal Rule of Civil Procedure 23(a), that (1) the class of resellers who are harmed by the mark owner's actions is so numerous that joinder of all members is impracticable; (2) there are questions of law or fact common to the class of resellers; (3) the claims of the representative parties are typical of the claims of the class, and (4) the representative parties will fairly and adequately protect the interests of the class.ⁿ²⁸⁸

The first two requirements of Rule 23(a), numerosity and commonality, "form the core of the class-action concept."ⁿ²⁸⁹ There would seem to be little difficulty in meeting the numerosity requirement. The site eBay alone boasts over 94 million users.ⁿ²⁹⁰ If only 1 in 10,000 users had an auction closed or account unjustly terminated, that calculates to over 9,000 potential class members. And that considers only eBay users; it does not include resellers who have their own websites or use other online auction sites. Having as few as 40 class members should raise a presumption that joinder is impracticable and the numerosity requirement has been met.ⁿ²⁹¹ In addition, Internet resellers are spread across the globe, which tends to make joinder impracticable.ⁿ²⁹²

Regarding commonality, whether the trademark owner made a good-faith inquiry into infringement before sending a takedown notification to eBay is one question of law and fact common to the class.ⁿ²⁹³ Commonality requires that the class members "have suffered the same injury."ⁿ²⁹⁴ Recently, an eBay user brought such a claim against Coach, Inc.ⁿ²⁹⁵ Gina Kim was a former employee of Coach who tried selling a genuine Coach handbag on [*201] eBay.ⁿ²⁹⁶ Coach notified eBay, claiming the handbag was counterfeit, and eBay closed Ms. Kim's auction and terminated her seller account.ⁿ²⁹⁷ Ms. Kim sued for a declaratory judgment, among other claims, and attempted to certify a class of all consumers in Washington State who had received similar treatment from Coach.ⁿ²⁹⁸ Ms. Kim alleged that Coach had no basis in fact for its allegation she was selling a counterfeit handbag.ⁿ²⁹⁹ This appears to be a sufficiently common question.ⁿ³⁰⁰ Even though generally trademark law may be rife with factual disputes, if the legal issue can be framed properly in terms of the trademark owner's lack of inquiry and the reseller's defense under first sale, then the matter is ripe for adjudication as a class action--because the "determination of its truth or falsity will resolve an issue that is central to the validity of each one of the claims in one stroke."ⁿ³⁰¹

In 2008, the U.S. District Court for the Northern District of Illinois, in *Vulcan Golf, LLC v. Google Inc.*,ⁿ³⁰² found the commonality requirement was met based on the allegation that the defendants had allegedly engaged in a deceptive scheme to benefit from the plaintiffs' trademarks.ⁿ³⁰³ Thus, the common question can center on the defendants' actions.ⁿ³⁰⁴

A class action similar to Ms. Kim's has been proposed in the U.S. District Court for the District of Colorado. In *Righthaven LLC v. BuzzFeed, Inc.*,ⁿ³⁰⁵ the defendant, BuzzFeed, was sued for copyright infringement for posting a copyrighted photograph to its website.ⁿ³⁰⁶ BuzzFeed filed a counterclaim alleging that Righthaven's lawsuits were an abuse of process because Righthaven did not own the copyrights at issue.ⁿ³⁰⁷ BuzzFeed further alleged in their counterclaim that Righthaven was suing in bad faith by not [*202] investigating whether BuzzFeed's use of the photograph at issue was protected by fair use.ⁿ³⁰⁸ Similarly, our hypothetical class could allege the trademark owners are not investigating whether the resellers' sales are protected by first sale and not infringing.ⁿ³⁰⁹

The likelihood of successful class actions will also depend on the legal claims pursued and the remedies available to the resellers.ⁿ³¹⁰ Defamation and tortious interference are among the claims that resellers have alleged.ⁿ³¹¹ The Righthaven lawsuit and proposed class is premised on the purported copyright owner's failure to investigate fair use.

ⁿ³¹² Because the Copyright Act provides for attorney's fees to the prevailing party, ⁿ³¹³ this bad-faith, or failure-to-investigate claim has much greater prospects under copyright law than it would under trademark law. The Lanham Act, on the other hand, is more grudging and convoluted in its fee-shifting; the prevailing party may only recover attorney's fees "in exceptional cases." ⁿ³¹⁴ As one judge observed, "a rainbow of standards has been promulgated to define the word exceptional in the Lanham Act, some seemingly requiring bad faith or other culpability, others following a less stringent approach." ⁿ³¹⁵

At the close of 2010, Judge Richard Posner surveyed the standards used across the circuit courts and decided to use a bifurcated approach to awarding attorneys' fees: if the losing party is the plaintiff, then "exceptional" means abuse of process; if the losing party is the defendant, it means the defendant "had no defense yet persisted in the trademark infringement or false advertising for which he was being sued, in order to impose costs on his opponent." ⁿ³¹⁶ Therefore, at least in the Seventh Circuit, reseller-defendants accused of trademark infringement would need to both prevail and prove that the plaintiffs engaged in abuse of process, i.e., "the use of [*203] the litigation process for an improper purpose, whether or not the claim is colorable." ⁿ³¹⁷ Other circuits will award attorneys' fees for bad faith or a "willfulness short of bad faith." ⁿ³¹⁸ These standards may be difficult to meet, yet trademark owners are acting in bad faith by accusing Internet resellers of infringement, not because they are infringing, but because they are competing for sales. ⁿ³¹⁹

Final Thoughts

Protecting the resale market increases consumer choice and spurs mark owners to innovate and bring new and improved products to the market. ⁿ³²⁰ If we allow mark owners to prevent the resale of their goods, consumers lose out on the competition that resellers provide. ⁿ³²¹ Legislatively created first sale and nominative fair use doctrines, along with the elimination of initial interest confusion as a cause of action under the Lanham Act, would provide resellers and auction websites guidance in navigating the minefield of rights and duties with regard to Internet secondary-market sales, so that they more closely resemble the brick-and-mortar setting. ⁿ³²² This would support the economic policy goals underlying intellectual property ⁿ³²³ and spur [*204] competition and innovation in the marketplace. ⁿ³²⁴ These solutions would also benefit consumers looking for bargains and align trademark exhaustion in cyberspace with its application with brick-and-mortar settings. ⁿ³²⁵

Copyright ⁿ³²⁶ and patent ⁿ³²⁷ laws have robust first sale defenses, which severely limit ongoing rights of the copyright and patent owner beyond the first authorized sale of the material object which embodies the intellectual property right(s) at issue. ⁿ³²⁸ However, the weakening of trademark first sale doctrine with regards to online sales and advertising has, to some extent, led to an "end run" around copyright first sale. ⁿ³²⁹

This dilution has increasingly allowed trademark, patent, and copyright owners to extend control over the resale of their goods, even though this restraint has consistently been rejected. ⁿ³³⁰ In its construction and interpretation of the Lanham Act, the Supreme Court has "been 'careful to caution against misuse or over-extension' of trademark and related protections into areas traditionally occupied by patent or copyright." ⁿ³³¹

After all, "the rights of a patentee or copyright holder are part of a 'carefully crafted bargain,' under which, once the patent or copyright monopoly has expired, the public may use the invention or work at will and without attribution." ⁿ³³² And both courts and Congress are loath to extend through trademark that which has been lost through the expiration of a patent or copyright. ⁿ³³³

For the first sale/exhaustion doctrine to be meaningful in copyright and patent law contexts, it must be equally robust as a trademark infringe [*205] ment defense. ⁿ³³⁴ Nominative fair use must actually be accepted by the courts. In "brick-and-mortar" settings, there is no confusion as to affiliation with the mark owner with regard to distribution channels—it would be difficult to believe that a consumer would think that a consignment shop or antique store was affiliated with the mark owners of all the goods sold at such venues. The same should hold equally true in cyberspace.

n14 Recent scholarship has focused on such areas as:

(1) trademark infringement as it relates to metatags and search engines, see, e.g., Stacey L. Dogan & Mark A. Lemley, Trademarks and Consumer Search Costs on the Internet, 41 HOUS. L. REV. 777, 782 (2004); Jennifer E. Rothman, Initial Interest Confusion: Standing at the Crossroads of Trademark Law, 27 CARDOZO L. REV. 105, 107 (2005); Rachel R. Friedman, Note, No Confusion Here: Proposing a New Paradigm for the Litigation of Keyword Advertising Trademark Infringement Cases, 12 VAND. J. ENT. & TECH. L. 355, 357 (2010); Tyson Smith, Note, Googling a Trademark: A Comparative Look at Keyword Use in Internet Advertising, 46 TEX. INT'L L.J. 231, 233 (2010);

(2) online first sale doctrine with regard to copyright infringement, see, e.g., Benjamin Wilson, Comment, Notice, Takedown, and the Good-Faith Standard: How to Protect Internet Users from Bad-Faith Removal of Web Content, 29 ST. LOUIS U. PUB. L. REV. 613, 623 (2010);

(3) free-riding, see Mark A. Lemley & Mark P. McKenna, Owning Mark(et)s, 109 MICH. L. REV. 137, 140 (2010); and

(4) trademark bullying, see, e.g., Leah Chan Grinvald, Shaming Trademark Bullies, 2011 WIS. L. REV. 625, 628.

Other scholars focus on competitors who infringe by misleading traffic away from the mark owner's website to the competitor's site--where the consumer sees the competitor's goods, instead of the mark owner's. See, e.g., Eric Goldman, Deregulating Relevancy in Internet Trademark Law, 54 EMORY L.J. 507, 561 (2005).

n15 See generally Lemley & McKenna, *supra* note 14, at 187.

[Trademark law] is designed to facilitate a competitive marketplace by allowing consumers to know what they are buying But a trademark law that is distorted into a right to own markets--one that seeks out and tries to forbid all free riding on a mark--ends up interfering with rather than enabling competition.

n51 Grinvald, *supra* note 14, at 647-48.

A trademark owner's threat that it will sue the small business or individual if they do not comply with its demands is often enough economic pressure to force the small business or individual into compliance. Additionally, bullying occurs (when coupled with an unreasonable interpretation of rights) when trademark owners include a demand for attorney's fees in their cease-and-desist letters--even if the recipient complies--or claims that attorney's fees and costs will be awarded when the litigation against the small business or individual is found in favor of the large corporation (and the letter is often couched in terms that lead the recipient to conclude that the only outcome is that the large corporation will win). The small business or individual has no way of knowing that attorney's fees are awarded only in rare instances of trademark infringement.

Id. (footnotes omitted).

n52 Melvin Simensky & Eric C. Osterberg, *The Insurance and Management of Intellectual Property Risks*, 17 CARDOZO ARTS & ENT. L.J. 321, 337 (1999).

One of the consequences of the soaring cost of litigation is that many businesses simply cannot afford the expense of bringing an infringement suit, even if attorneys' fees may be recovered in the end. This problem is exacerbated by the fact that many significant technological innovations are developed by smaller businesses lacking the financial resources to sue larger companies which are likely to defend vigorously. Furthermore, many intellectual property lawyers are unwilling to litigate such cases on a contingency fee basis.

n70 *Id.*

n71 See McGeveran, *supra* note 17, at 63-64.

n72 15 U.S.C. § 1114(1) provides relief for registered marks:

Any person who shall, without the consent of the registrant--

. . . use in commerce any reproduction, counterfeit, copy, or colorable imitation of a registered mark in connection with the sale, offering for sale, distribution, or advertising of any goods or services on or in connection with which such use is likely to cause confusion, or to cause mistake, or to deceive . . .

shall be liable in a civil action by the registrant[.]

15 U.S.C. § 1114(1) (2006); see also SCHECHTER & THOMAS, *supra* note 44, at 636 n.4.

n73 Under 15 U.S.C. § 1125(a)(1),

Any person who, on or in connection with any goods or services. . . uses in commerce any word, term, name, symbol, or device. . . or any false designation of origin, false or misleading description of fact, or false or misleading representation of fact, which--

. . . is likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of such person with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities by another person . . .

shall be liable in a civil action by any person who believes that he or she is or is likely to be damaged by such act.

Id. § 1125(a).

n74 See, e.g., *Mary Kay, Inc. v. Weber*, 601 F. Supp 2d 839, 846 (N.D. Tex. 2009). For more information about confusion regarding the reseller's affiliation with authorized distributors, see *Volkswagenwerk Aktiengesellschaft v. Church*, 411 F.2d 350, 352 (9th Cir. 1969).

n75 15 U.S.C. § 1125(c)(1) ("Subject to the principles of equity, the owner of a famous mark that is distinctive . . . shall be entitled to an injunction against another person who, at any time after owner's mark has become famous, commences use of a mark or trade name in commerce that is likely to cause dilution by blurring or dilution by tarnishment of the a famous mark, regardless of the presence or absence of actual or likely confusion, of competition, or of actual economic injury.").

n83 See SCHECHTER & THOMAS, *supra* note 44, § 29.1, at 640.

n84 287 F.2d 492 (2d Cir. 1961).

n85 *Id.* at 495; SCHECHTER & THOMAS, *supra* note 44, § 29.1, at 640.

Polaroid is a world-renowned manufacturer of photographic equipment, sheet-polarizing material, optical desk lamps, and other electronics products. *Polaroid*, 287 F.2d at 494. Polaroid sued Polarad Electronics (manufacturer of microwave devices and television-studio equipment) for trademark infringement due to the similarity of its name and the proximity of the goods the two corporations manufactured. *Id.* at 493-95. In ruling in favor of Polaroid, the Second Circuit listed eight factors to be used to determine whether there is a likelihood of confusion: (1) the strength of the plaintiff's mark; (2) the degree of similarity between the plaintiff's and the defendant's marks; (3) the proximity of the products or services covered by the marks; (4) the likelihood that the plaintiff will bridge the gap; (5) evidence of actual confusion of consumers; (6) the defendant's good faith in adopting the mark; (7) the quality of the defendant's product or service; and (8) consumer sophistication. *Id.* at 495.

Other circuits have adopted their own, similar versions of the Polaroid factors. For example, the Tenth Circuit uses a six-factor test first delineated in *Sally Beauty Co. v. Beautyco, Inc.*, 304 F.3d 964, 972 (10th Cir. 2002), declaring that, for determining likelihood of confusion, courts in that circuit examine

(1) the degree of similarity between the marks; (2) the intent of the alleged infringer in adopting the mark; (3) evidence of actual confusion; (4) similarity of products and manner of marketing; (5) the degree of care likely to be exercised by purchasers; and (6) the strength or weakness of the marks.

Id.; see also *Austl. Gold, Inc. v. Hatfield*, 436 F.3d 1228, 1240 (10th Cir. 2006) (noting that "no one factor is dispositive, and likelihood of confusion is a question of fact").

n86 See, e.g., *Designer Skin, LLC v. S & L Vitamins, Inc.*, 560 F. Supp. 2d 811, 818 (D. Ariz. 2008) (where the mark owner argued "that the visible uses of its marks on the websites in close association with [the defendant's] own logo" was a form of initial interest confusion). This claim failed on summary judgment. *Id.* at 827.

n87 See 15 U.S.C. § 1125(a)(1) ("Any person who, on or in connection with any goods or services . . . uses in commerce any word, term, name, symbol, or device, or any combination thereof . . . which . . . is likely to . . . deceive as to the affiliation, connection, . . . or as to the origin, sponsorship, or approval of his or her goods, services . . . shall be liable in a civil action by any person who believes that he or she is or is likely to be damaged by such act."). This is considered forward confusion, which occurs when the mark owner is arguing that "the alleged trademark infringer [is taking] advantage of the reputation and good will of a senior trademark owner by adopting a similar or identical mark." *Harlem Wizards Entm't Basketball, Inc. v. NBA Props., Inc.* 952 F. Supp. 1084, 1091 (D.N.J. 1997). The two other major forms of confusion--reverse and post-sale confusion--are less prevalent in claims by mark owners against internet resellers. In reverse confusion, "a larger, more powerful entity adopts the trademark of a smaller, less powerful trademark user and thereby causes confusion as to the origin of the senior trademark user's goods or services." *Id.* "Post-sale confusion occurs when use of a trademark leads individuals (other than the purchaser) mistakenly to believe that a product was manufactured by the trademark-holder." *Gibson Guitar Corp. v. Paul Reed Smith Guitars, LP*, 423 F.3d 539, 549 (6th Cir. 2005). It can occur, in some courts' views, when a manufacturer offers a consumer a cheap knockoff of a more expensive Louis Vuitton bag; the buyer acquires the prestige of owning what appears to be the more expensive product. See *Malletier v. Dooney & Bourke, Inc.* 561 F. Supp. 2d 368, 384 n.112 (S.D.N.Y. 2008). And while the purchaser knows it is a knock-off of a Louis Vuitton bag, others seeing the purchaser with the bag are not aware of this, and instead associate the cheap knock-off with the mark owner's product. *Id.* at 384. In addition to the mark owner being associated with inferior goods,

the creation of confusion in the post-sale context can be harmful in that if there are too many knockoffs in the market, sales of the originals may decline because the public is fearful that what they are purchasing may not be an original. Furthermore, the public may be deceived in the resale market if it requires expertise to distinguish between an original and a knockoff. Finally, the purchaser of an original is harmed by the widespread existence of knockoffs because the high value of originals, which derives in part from their scarcity, is lessened.

Hermes Int'l v. Lederer de Paris Fifth Ave., Inc., 219 F.3d 104, 108 (2d Cir. 2000). For further discussion on post-sale confusion and the first sale doctrine with regard to resold goods, see David W. Barnes, *Free-Riders and Trademark Law's First Sale Rule*, 27 SANTA CLARA COMPUTER & HIGH TECH. L.J. 457, 485-90 (2011).

n88 See Lemley & McKenna, *supra* note 16, at 427.

n89 Grynberg, *supra* note 18, at 964; see also 15 U.S.C. § 1125(a) (2006).

n90 See *Vail Assocs., Inc. v. Vend-Tel-Co.*, 516 F.3d 853, 872 (10th Cir. 2008) ("Initial interest confusion is a 'bait and switch' tactic that permits a competitor to lure consumers away from a service provider by passing off services as those of the provider, notwithstanding that the confusion is dispelled by the time of sale."). For a synopsis of the case history of initial interest confusion, see Rothman, *supra* note 14, at 114-21. In spite of Rothman's fervent attack on the doctrine, initial interest confusion has unfortunately yet to meet its demise. *Id.* at 121-30.

n91 *Austl. Gold, Inc. v. Hatfield*, 436 F.3d 1228, 1238-39 (10th Cir. 2006) (citations omitted); see also *Lamparello v. Falwell*, 420 F.3d 309, 315-16 (4th Cir. 2005) ("The Lanham Act forbids a competitor from luring potential customers away from a producer by initially passing off its goods as those of the producer's, even if confusion as to the source of the goods is dispelled by the time any sales are consummated.") (quoting *Dorr-Oliver, Inc. v. Fluid-Quip, Inc.*, 94 F.3d 376, 382 (7th Cir. 1996)); Deborah F. Buckman, *Initial Interest Confusion Doctrine Under Lanham Trademark Act*, 183 A.L.R. FED. 553, 578-82 (2003).

n92 *Brookfield Commc'ns, Inc. v. W. Coast Entm't Corp.* 174 F.3d 1036, 1062 (9th Cir. 1999).

n93 Lamparello, 420 F.3d at 315-16. The First Circuit also rejects initial interest confusion. See *N. Light Tech., Inc. v. N. Lights Club*, 97 F. Supp. 2d 96, 113 (D. Mass. 2000) (noting that "initial confusion . . . is not cognizable under trademark law in the First Circuit.") (citing *Astra Pharm. Products, Inc. v. Beckman Instruments, Inc.*, 718 F.2d 1201, 1207 (1st Cir. 1983)), *aff'd*, 236 F.3d 57 (1st Cir. 2001); see also Goldman, *supra* note 14, at 565-66 ("[Initial interest confusion] is predicated on multiple mistaken and empirically unsupported assumptions about searcher behavior. . . . [It is based on the unsupported assumption] that a searcher using a trademarked keyword is looking for the trademark owner (or, perhaps, some authorized licensee or secondary user." (footnote omitted)). Professor Goldman discusses in detail the various reasons--other than trying to find the mark owner--for a consumer to be using the mark in question as a search term. *Id.* at 521-28.

n94 Lisa M. Sharrock, *Realigning the Initial Interest Confusion Doctrine with the Lanham Act*, 25 WHITTIER L. REV. 53, 54 (2003); see also Rothman, *supra* note 14, at 108 ("The creation and application of initial interest confusion doctrine directly contravenes the Lanham Act, the goals underlying trademark protection, other intellectual property laws, and the First Amendment.").

n95 Rothman, *supra* note 14, at 111 (arguing that "the doctrine is wrong as a matter of policy and . . . it represents an assault on the fundamental principles of trademark law").

n96 *Id.* at 108.

n97 See generally Lemley & McKenna, *supra* note 16, at 416-21 (evincing that the recipients of cease-and-desist letters from mark owners--who claim consumers would wrongly assume that the mark owner had granted permission or otherwise sponsored the mark's use by the defendant--usually cease using the mark, even when such use was most likely legitimate). "The recipients of all these threats . . . knew well that they had to take the asserted claims seriously because courts have sometimes been persuaded to shut down very similar uses." *Id.* at 418.

n98 *Id.* at 414.

n99 *Id.* at 421.

n100 *Id.* at 421-22.

n101 Grinvald, *supra* note 14, at 660-61.

n102 See *supra* notes 4-12, 86-91, and accompanying text.

n103 *Mary Kay, Inc. v. Weber*, No. 3:08- CV-0776-G, 2009 WL 2569070, at *3 (N.D. Tex. Aug. 14, 2009).

n104 *Austl. Gold, Inc. v. Hatfield*, 436 F.3d 1228, 1238 (10th Cir. 2006).

n105 *Lunney*, *supra* note 19, at 371, 385. Since 1958, "the law's traditional willingness to permit a considerable degree of confusion in order to leave room for competitive imitation vanished, and courts began to seize on the slightest evidence of confusion as proof of infringement." *Id.* at 385.

n106 *Rothman*, *supra* note 14, at 140-45.

n107 See *Buckman*, *supra* note 91, at 607-08.

n108 *Mary Kay*, 2009 WL 2569070, at *1, *8. While most courts have not addressed Internet resale directly with regard to initial interest confusion, other courts have, with mixed results. Compare *Austl. Gold, Inc. v. Hatfield*, 436 F.3d 1228, 1238-40 (10th Cir. 2006) (recognizing claim of initial interest confusion and noting that resellers' disclaimers cannot prevent damage from initial interest confusion) and *PACCAR Inc. v. TeleScan Techs., L.L.C.*, 319 F.3d 243, 256 (6th Cir. 2003) ("A disclaimer disavowing affiliation with the trademark owner read by a consumer after reaching the web site comes too late. This 'initial interest confusion' is recognized as an infringement under the Lanham Act."), overruled on other grounds by *KP Permanent Make-up, Inc. v. Lasting Impression I, Inc.*, 543 U.S. 111, 121-23 (2004), with *Standard Process, Inc. v. Banks*, 554 F. Supp. 2d 866, 871 (E.D. Wis. 2008) (finding no initial interest confusion where trademark holder's unaltered products were available through reseller's website) and *S&L Vitamins, Inc. v. Austl. Gold, Inc.*, 521 F.Supp.2d 188, 201 (E.D.N.Y. 2007) (finding initial interest confusion cannot be established before determination of whether the reseller used the trademarks in a trademark sense).

n109 See *infra* notes 219-232 and accompanying text.

n110 Cf. John T. Cross, *Contributory Infringement and Related Theories of Secondary Liability for Trademark Infringement*, 80 IOWA L. REV. 101, 101-02 (1994); Elizabeth K. Levin, *A Safe Harbor for Trademark: Reevaluating Secondary Trademark Liability After Tiffany v. eBay*, 24 BERKELEY TECH. L.J. 491, 506 (2009).

n111 *Levin*, *supra* note 110, at 518-21.

n112 17 U.S.C. § 512 states:

A service provider shall not be liable for monetary relief . . . for infringement of copyright by reason of the storage at the direction of a user of material that resides on a system or network controlled or operated by or for the service provider, if the service provider--

(A)(i) does not have actual knowledge that the material or an activity using the material on the system or network is infringing;

(ii) in the absence of such actual knowledge, is not aware of facts or circumstance from which infringing activity is apparent; or

(iii) upon obtaining such knowledge or awareness, acts expeditiously to remove, or disable access to, the material;

(B) does not receive a financial benefit directly attributable to the infringing activity, in a case in which the service provider has the right and ability to control such activity; and

(C) upon notification of claimed infringement . . . responds expeditiously to remove, or disable access to, the material that is claimed to be infringing or to be the subject of infringing activity.

17 U.S.C. § 512(c)(1) (2006). The written notification required under § 512(c)(1)(C) must include (among other requirements):

(ii) identification of the copyrighted work claimed to have been infringed . . .

(iii) identification of the material that is claimed to be infringing . . . that is to be removed . . . and information reasonably sufficient to permit the service provider to locate the material.

* * *

(v) a statement that the complaining party has a good faith belief that use of the material in the manner complained of is not authorized by the copyright owner, its agent, or the law[, and]

(vi) a statement that the information in the notification is accurate, and under penalty of perjury, that the complaining party is authorized to act on behalf of the owner of an exclusive right that is allegedly infringed.

Id. § 512(c)(3).

n113 See id. § 512(f).

n114 Id.

Misrepresentations.--Any person who knowingly materially misrepresents under this section--

(1) that material or activity is infringing, or

(2) that material or activity was removed or disabled by mistake or misidentification, shall be liable for any damages, including costs and attorneys' fees, incurred by the alleged infringer . . . who is injured by such misrepresentation, as the result of the service provider relying upon such misrepresentation in removing or disabling access to the material or activity claimed to be infringing, or in replacing the removed material or ceasing to disable access to it.

Id.

n115 Id. § 106.

n116 See id. § § 106(1)-(2).

n117 The Copyright Act grants the owner of the copyright the exclusive rights of reproduction, adaptation, distribution, public performance, public display, and digital broadcasts of sound recordings. See 17 U.S.C. § 106 (2006). However, there are several exceptions to these exclusive rights, such as fair use (§ 107), first sale (§ 109) and compulsory licenses (§ 115).

n118 Id. § 113.

n119 Id. § 106(1).

n120 Id. § 113(c) ("In the case of a work lawfully reproduced in useful articles that have been offered for sale or other distribution to the public, copyright does not include any right to prevent the making, distribution, or display of pictures or photographs of such articles in connection with advertisements or commentaries related to the distribution or display of such articles, or in connection with news reports.").

n121 See id. Of course this presupposes that the manufacture of the utilitarian article is a lawful reproduction of the work. If the maker of the lamps never secured permission to use the statues as lamp bases, then the Section 113(c) exception does not apply. Id.

n122 See id.

n123 See Rebecca Tushnet, Supplemental Complaint: Internet Resale Case Survives Summary Judgment, REBECCA TUSHNET'S 43(B)LOG (June 12, 2008), <http://tushnet.blogspot.com/2008/06/supplemental-complaint-internet-resale.html>; see also Standard Process,

Inc. v. Total Health Disc., Inc., 559 F. Supp. 2d 932, 936 (E.D. Wis. 2008); Standard Process, Inc. v. Banks, 554 F. Supp. 2d 866, 868 (E.D. Wis. 2008).

n124 Total Health, 559 F. Supp. 2d at 935-36.

n125 Banks, 554 F. Supp. 2d at 868.

n126 Total Health, 559 F. Supp. 2d at 936; Banks, 554 F. Supp. 2d at 868.

n127 Total Health, 559 F. Supp. 2d at 936; Banks, 554 F. Supp. 2d at 868.

n128 Total Health, 559 F. Supp. 2d at 936; Banks, 554 F. Supp. 2d at 868. Banks even agreed to a permanent injunction prohibiting him from putting photographs of Standard Process' products on his website or in his email solicitations. Banks, 554 F. Supp. 2d at 870.

n129 See Sebastian Int'l, Inc. v. Longs Drug Stores Corp., 53 F.3d 1073, 1076 (9th Cir. 1995) (per curiam) (emphasis added) ("It is the essence of the 'first sale' doctrine that a purchaser who does no more than stock, display, and resell a producer's product under the producer's trademark violates no right conferred upon the producer by the Lanham Act."); see also Austl. Gold, Inc. v. Hatfield, 436 F.3d 1228, 1241 (10th Cir. 2006).

n130 Tushnet, *supra* note 123. In Standard Process, Inc. v. Banks, the court found that Banks' website did not impermissibly give the impression he was an authorized dealer because, in addition to posting disclaimers, he "does not include any pictures" 554 F. Supp. 2d at 869. It is unfortunate that the cases discussed imply that photographs connote sponsorship or affiliation, even though under the Trademark first sale doctrine, removing photographs is unwarranted.

n131 S&L Vitamins, Inc. v. Austl. Gold, Inc., 521 F. Supp. 2d 188, 202 (E.D.N.Y. 2007) (citing Luxottica Grp. S.p.A. v. Bausch & Lomb Inc., 160 F. Supp. 2d 545, 552 (S.D.N.Y. 2001)).

n138 See 17 U.S.C. § 113(c) (2006).

n139 Complaint & Plaintiffs' Motion for Declaratory Judgment <para><para> 3-6, Tabbers Temptations v. Disney Enters., No. 02-WM-2402 (PAC), (D. Colo. Dec. 24, 2002), available at <http://www..com/Trademarks/DisneyLawsuit/ourlawsuit/complaint.html>.

15. Based upon information and belief, the defendant aggressively protects the copyrighted images. These actions include policing of flea markets, craft shows, craft malls, and Internet auctions sites. At crafts shows and flea markets, when hand-crafted items are found that use the fabrics portraying the copyrighted images owned by the defendant, cease and desist letters are distributed. On the auction sites, the auctions featuring similar fabric items are terminated at the request of the defendant.

16. Based upon information and belief, Disney counsel knows, or reasonably should know, the fabric items are not derivatives as defined by federal courts, federal law and recognized authorities on copyrights. The intimidation tactics used by Disney are therefore illegal and immoral. They rely on the fact people can't fight back because of the potential enormous legal expense.

17. Based upon information and belief, on September 4, 2002, the defendant requested eBay(r) terminate three auction listing sic by Tabberone, falsely alleging to eBay(r) in an affidavit that the articles offered on these auctions were infringing items.

18. When asked, a representative of the defendant, a Deborah Perry, responded that the auctions were terminated because the fabric items were considered to be derivatives and therefore infringing upon the copyrights held by the defendant.

Id. <para><para> 15-18.

n140 Disney licenses the sale of bulk fabric containing Disney characters, which is then sold through authorized distributors such as Amazon.com and Joann Fabrics. Search Results for "Disney Licensed Fabric" in Arts, Crafts, and Sewing, AMAZON.COM, <http://www.amazon.com/gp/search/ref=?srnri0?rh=k%3Adisney+licensed+fabric%2C%3Aarts-crafts&keywords=disney+licensed+fabric&ie=UTF8&qid=1315> (last visited Sept. 9, 2012); Search Results for "Disney Fabric", JOANN.COM, <http://www.joann.com/search/disneyfabric> (last visited Sept. 9, 2012). Some sites selling Disney licensed fabric even advertise the projects that can be made with the fabric. See, e.g., Disney Fabrics: Little Mermaid, Cars, Toy Story and Other Favorite Disney Characters, DISNEY FABRICS, <http://www.disneyfabrics.com> (last visited Sept. 9, 2012). That Disney licenses the production of these fabrics can easily be seen as an implied license by Disney for purchasers to cut and use the fabric to make various items of clothing, quilts, and knick-knacks. For further reading on implied licenses, see Michael Grynberg, Property Is a Two-Way Street: Personal Copyright Use and Implied Authorization, 79 FORDHAM L. REV. 435, 454-58 (2010). In his article, Professor Grynberg argues that "courts should appreciate the reasonable expectations of consumers in their control of personal property used to interact with the protected works." *Id.* at 435-36. Karen Dudnikov used legally purchased Disney licensed fabric in her creations:

22. The defendant, directly and through licensees, has released innumerable different copyrighted fabrics in the last few years through an estimated ten thousand national fabric outlets including Wal-Mart, Hancock Fabrics, and Joann Fabrics. It was the intention of the defendant that the fabric be cut, shaped, and sewn into fabric items such as pillows, bedding, wearing apparel, accessories, etc. There is no other purpose for selling uncut fabric.

23. The Plaintiffs lawfully purchased the copyrighted fabric from retail outlet sources. Since the plaintiffs use of the copyrighted fabric was consistent with the intended purpose of the sale of the fabric, the subsequent sales of the fabric items falls wholly under the First Sale Doctrine.

Complaint & Plaintiffs' Motion for Declaratory Judgment, *supra* note 139, <para><para> 22-23.

n141 Letter from Mary Fossier on behalf of Disney Enters., Inc. to Karen Dudnikov & Michael Meadors, *supra* note 57 ("You TabberOne represent that you have already stopped and agree that in the future you will no longer make or use copies of [Disney Enterprises, Inc.] copyrighted and/or trademark characters (or other intellectual properties) in connection with your business except it is understood that you make and sell hand-crafted items from licensed fabric bearing Disney properties and will use photographs, including close-up shots of the licensed fabric used to make the item, as reasonably necessary to show the item for sale in a particular auction and to describe the item as being made from licensed Disney fabric.").

n142 Complaint & Plaintiffs' Motion for Declaratory Judgment, *supra* note 139, <para> 6; see 17 U.S.C. § 113(c). Disney's actions could lead to lawsuits similar to Stephanie Lenz' against Universal Music Corporation, where she claimed that her fair use of Prince's song "Let's go Crazy"--played briefly in the background of a video of her baby dancing--should have been considered by Universal's attorneys before filing their take-down notice with YouTube. See Wilson, *supra* note 14, at 616.

n143 Complaint & Plaintiffs' Motion for Declaratory Judgment, *supra* note 139, <para> 6; see also *Standard Process, Inc. v. Total Health Disc., Inc.*, 559 F. Supp. 2d 932, 936-37 (E.D. Wis. 2008); *Standard Process, Inc. v. Banks*, 554 F. Supp. 2d 866, 868 (E.D. Wis. 2008); Tushnet, *supra* note 123.

n144 See Grinvald, *supra* note 14, at 650-51.

n145 See *id.* at 647.

n146 See supra notes 51-52 and accompanying text.

n147 See, e.g., *Tiffany (NJ) Inc. v. e Bay, Inc.*, 600 F.3d 93, 101 (2d Cir.), cert. denied, 131 S. Ct. 647 (2010).

n148 *Inwood Labs., Inc. v. Ives Labs., Inc.* 456 U.S. 844, 853-54 (1982).

n149 See, e.g., *Tiffany*, 600 F.3d at 98.

n150 This allegation was rejected by both the district court and on appeal. *Id.* at 109 n.13.

n151 *Id.* at 101. Tiffany claimed these actions "constituted direct and contributory trademark infringement, trademark dilution, and false advertising." *Id.*

n152 *Id.* at 103 (agreeing "with the district court that eBay's use of Tiffany's mark on its website and in sponsored links was lawful. eBay used the mark to describe accurately the genuine Tiffany goods offered for sale on its website. And none of eBay's uses of the mark suggested that Tiffany affiliated itself with eBay or endorsed the sale of its products through eBay's website.").

n153 *Id.* at 106, 109 (holding that eBay was not contributorily liable because it had not continued "to supply its service to one whom it knows or has reason to know is engaging in trademark infringement" (quoting *Inwood Labs., Inc.*, 456 U.S. at 854)).

n154 *Id.* at 106.

n155 456 U.S. 844, 853-54 (1982).

n156 *Tiffany*, 600 F.3d at 107 (quoting *Tiffany (NJ) Inc. v. e Bay, Inc.*, 576 F. Supp. 2d 463, 508 (S.D.N.Y. 2008), *aff'd* in part, 600 F.3d 93 (2d Cir. 2010)). "The district court reasoned that Inwood's language explicitly imposes contributory liability on a defendant who 'continues

to supply its product [--in eBay's case, its service--] to one whom it knows or has reason to know is engaging in trademark infringement." *Id.* (quoting *Tiffany*, 576 F. Supp. 2d at 508).

n157 See, e.g., *GMA Accessories, Inc. v. BOP, LLC*, 765 F. Supp. 2d 457, 465 (S.D.N.Y. 2011) (holding that the plaintiff's "allegation of constructive knowledge . . . based upon the federal registration did not establish that Electric Wonderland knew or had reason to know of the [Plaintiff's] trademark"); *Sellify Inc. v. Amazon.com, Inc.*, No. 09 Civ. 10268(JSR), 2010 WL 4455830, at *4 (S.D.N.Y. Nov. 4, 2010) (finding that there was "no evidence that Amazon had particularized knowledge of, or direct control over" infringing material and promptly acted when it received a demand letter from the plaintiff); see also *1-800 Contacts, Inc. v. Lens.com, Inc.*, 755 F. Supp. 2d 1151, 1184 (D. Utah 2010). "For contributory trademark infringement liability to lie' with a service provider, however, it 'must have more than a general knowledge or reason to know that its service is being used to infringe. Some contemporary knowledge of which particular acts are infringing or will infringe in the future is necessary.'" *Id.* (quoting *Tiffany*, 600 F.3d at 107). Importantly, "the doctrine of contributory trademark infringement should not be used to require defendants to refuse to provide a product or service to those who merely might infringe the trademark." *1-800 Contacts*, 755 F. Supp. 2d at 1184 (quoting *Tiffany*, 576 F. Supp. 2d at 509-10).

n158 See, e.g., *Tiffany*, 600 F.3d at 98-99.

n159 See *Sellify*, 2010 WL 4455830, at *4 ("A service provider may be liable for contributory infringement only when it has 'direct control . . . of the instrumentality used by a third party to infringe' on the plaintiff's trademark." (second alteration in original) (quoting *Tiffany*, 600 F.3d at 104-05)).

n160 See *Tiffany*, 600 F.3d at 103; cf. *Hendrickson v. eBay, Inc.*, 165 F. Supp. 2d 1082, 1093 n.14 (C.D. Cal. 2001) (describing eBay's process of searching for and removing infringing listings).

n161 Cf. *Tiffany*, 576 F. Supp. 2d at 474, 517 (noting that "Tiffany has occasionally been wrong [in alleging that an item listed on eBay was counterfeit] and later requested that listings be reinstated"). The Second Circuit noted that, since a substantial number of authentic Tiffany goods are sold on eBay, "reducing or eliminating the sale of all second-hand Tiffany goods, including genuine Tiffany pieces, through eBay's website would benefit Tiffany in at least one sense: It would diminish the competition in the market for genuine Tiffany merchandise." *Tiffany*, 600 F.3d at 98.

n162 See, e.g., *Tiffany*, 576 F. Supp. 2d at 517 n.39. The district court noted that,

in addition, it is certainly possible that other listings have been erroneously reported. Tiffany refuses to authenticate items without proof that the items were purchased from a Tiffany store. Several sellers have complained to Tiffany that their items were inappropriately reported, only to have Tiffany refuse to offer any meaningful way of validating their legitimacy.

Id.

n163 An additional burden on the seller is recreating the listing. See *Why Did eBay Remove My Listing?*, EBAY, <http://pages.ebay.com/help/sell/questions/listing-ended.html> (last visited Sept. 9, 2012) ("If we agree that your item was removed in error, you can relist it. Unfortunately, you'll have to recreate the listing from scratch.").

n164 Fees for Selling on eBay, EBAY, <http://pages.ebay.com/help/sell/fees.html> (last visited Sept. 9, 2012) ("The basic cost of selling an item is the insertion fee plus the final value fee. . . . When you list an item on eBay, you're charged an insertion fee. If the item sells, you're also charged a final value fee.").

n165 Why Did eBay Remove My Listing?, *supra* note 163 ("If we removed your listing because of a policy violation, we may or may not refund your fees for that listing, depending on the policy you violated and whether you've violated our policies in the past. If we refund your fees, all fees related to the removed listing will be automatically credited to your account within one billing cycle.").

n166 Cf. *Tiffany*, 576 F. Supp. 2d at 516 ("In addition to removing the [allegedly offending] listing, eBay also warned sellers and buyers, cancelled all fees associated with the listing, and directed buyers not to consummate the sale of the listed item.").

n167 " Trademark law needs a theory of trademark injury that distinguishes harm to legitimate interests the law should protect from a mere desire to capture a benefit enjoyed by another." Lemley & McKenna, *supra* note 14, at 137.

n168 See, e.g., *New Kids on the Block v. News Am. Publ'g, Inc.*, 971 F.2d 302, 307-08 (9th Cir. 1992); Grynberg, *supra* note 18, at 956.

n169 Grynberg, *supra* note 18, at 956.

n170 Other defenses that are not relevant to this Article include comparative fair use, 15 U.S.C. § 1125(c)(3)(A) (2006), descriptive fair use, *id.*, and geographic restrictions, *id.* § 1115(b)(4). See generally *New Kids on the Block*, 971 F.2d at 306-07 (defining comparative and descriptive fair use); *Burger King of Fla., Inc. v. Hoots*, 403 F.2d 904, 907 (7th Cir. 1968) (describing geographic restrictions on the use of a registered mark).

n171 Justin D. Swindells, *Repackaging Original Trademarked Goods: Trademark Exhaustion or Consumer Confusion?*, 7 FED. CIR. B.J. 391, 391-92 (1997).

n172 *Id.* at 393.

n173 *Id.* at 402.

n174 *Id.* at 401-02. Mr. Swindells argues for a repackaging exception to the first sale/exhaustion doctrine. See *id.* at 409-16.

n175 SCHECHTER & THOMAS, *supra* note 44, § 31.1.2, at 731. In the foundational nominative fair use case of *Prestonettes, Inc. v. Coty*, the Supreme Court recognized that when a "mark is used in a way that does not deceive the public," there is "no such sanctity in the word as to prevent its being used to tell the truth." *Prestonettes, Inc. v. Coty*, 264 U.S. 359, 368 (1924); see also *Enesco Corp. v. Price/Costco Inc.*, 146 F.3d 1083, 1086 (9th Cir. 1998) (holding that providing notice that a good was repackaged is necessary to prevent customer confusion).

n176 See *Prestonettes*, 264 U.S. at 368.

n177 *Barnes*, *supra* note 87, at 482-83, 486.

n178 *Id.* at 486.

n179 SCHECHTER & THOMAS, *supra* note 44, § 31.1.2, at 732; see also *Nitro Leisure Prods., L.L.C. v. Acushnet Co.*, 341 F.3d 1356, 1361 (Fed. Cir. 2003) ("The Supreme Court acknowledged that, in some cases, used and repaired goods can be sold under the trademark of the original manufacturer, without 'deceiving the public,' so long as the accused infringer had attempted to restore 'so far as possible' the original condition of the goods and full disclosure is made about the true nature of the goods, for example, as 'used' or 'repaired.'" (alteration in original) (quoting *Champion Spark Plug Co. v. Sanders*, 331 U.S. 125, 129 (1947))); RESTATEMENT (THIRD) OF UNFAIR COMPETITION § 24 cmt. d (1995) ("One may use another's mark in marketing genuine goods that are used, repaired, reconditioned, or altered if consumers are not likely to be confused into believing that the goods are new or in their original form or that the alterations were performed or approved by the trademark owner.").

n180 SCHECHTER & THOMAS, *supra* note 44, § 31.1.2, at 732; see also *Champion Spark Plug*, 331 U.S. at 129 ("Cases may be imagined where the reconditioning or repair would be so extensive or so basic that it would be a misnomer to call the article by its original name, even though the words 'used' or 'repaired' were added.").

n181 *Century 21 Real Estate Corp. v. Lendingtree, Inc.*, 425 F.3d 211, 227 (3d Cir. 2005).

n182 *Grynberg*, *supra* note 18, at 957.

n184 *Id.* at 307-08.

n185 See *Century 21 Real Estate*, 425 F.3d at 218.

n186 E.g., *Toyota Motor Sales, U.S.A., Inc. v. Tabari*, 610 F.3d 1171, 1175 (9th Cir. 2010) ("The district court applied the eight-factor test for likelihood of confusion articulated in *AMF Inc. v. Sleekcraft Boats*, 599 F.2d 341, 348-49 (9th Cir. 1979). . . . But we've held that the Sleekcraft analysis doesn't apply where a defendant uses the mark to refer to the trademarked good itself."); see also Grynberg, *supra* note 18, at 958 (citing *Pebble Beach Co. v. Tour 18 I Ltd.*, 155 F.3d 526, 545 (5th Cir. 1998)) ("It is not a true defense, but an alternative method of ascertaining whether liability exists in the first place.").

n187 *Toyota Motor Sales*, 610 F.3d at 1183.

n188 *New Kids on the Block*, 971 F.2d at 308.

n189 *Toyota Motor Sales*, 610 F.3d at 1183; see also *KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc.*, 543 U.S. 111, 118 (2004) (stating that "Section 1115(b) [of the Lanham Act always] places a burden of proving likelihood of confusion . . . on the party charging infringement even when relying on an incontestable registration. And Congress said nothing about likelihood of confusion in setting out the elements of the fair use defense in § 1115(b)(4). . . . It takes a long stretch to claim that a defense of fair use entails any burden to negate confusion.").

n190 *New Kids on the Block*, 971 F.2d at 308.

n191 Grynberg, *supra* note 18, at 957 n.265 (citing *Playboy Enters., Inc. v. Welles*, 279 F.3d 796, 801 (9th Cir. 2002)).

n192 SCHECHTER & THOMAS, *supra* note 44, § 31.2, at 746.

n193 See *Pebble Beach Co. v. Tour 18 I Ltd.*, 155 F.3d 526, 545-46 (5th Cir. 1998); see also *Bd. of Supervisors for La. State Univ. Agric. & Mech. Coll. v. Smack Apparel Co.*, 550 F.3d 465, 489 (5th Cir. 2008) ("A court ordinarily should consider a nominative fair use claim in conjunction with its likelihood-of-confusion analysis in order to avoid lowering the standard for confusion." (emphasis added)).

n194 *Century 21 Real Estate Corp. v. Lendingtree, Inc.*, 425 F.3d 211, 222 (3d Cir. 2005); see also *Toyota Motor Sales, U.S.A., Inc. v. Tabari*, 610 F.3d 1171, 1182 (9th Cir. 2010) (holding that a "finding of nominative fair use is a finding that the plaintiff has failed to show a likelihood of confusion as to sponsorship or endorsement"). Thus, the burden ultimately rests on the plaintiff to establish that the use of the plaintiff's mark was not nominative fair use. *Id.*

n195 *Century 21 Real Estate*, 425 F.3d at 222.

n196 *Id.* The defendant must show

(1) that the use of plaintiff's mark is necessary to describe both the plaintiff's product or service and the defendant's product or service; (2) that the defendant uses only so much of the plaintiff's mark as is necessary to describe plaintiff's product; and (3) that the defendant's conduct or language reflect the true and accurate relationship between plaintiff and defendant's products or services.

n197 *Tiffany (NJ) Inc. v. e Bay Inc.*, 600 F.3d 93, 102-03 (2d Cir.), cert. denied, 131 S. Ct. 647 (2010); *Universal Comm'n Sys., Inc. v. Lycos, Inc.*, 478 F.3d 413, 424 (1st Cir. 2007) ("This court has not previously decided whether to endorse the Ninth Circuit's test for nominative fair uses, and we have no occasion to do so here. We have, however, recognized the underlying principle."); *PACCAR Inc. v. Telescan Techs., L.L.C.*, 319 F.3d 243, 256 (6th Cir. 2003), overruled on other grounds by *KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc.*, 543 U.S. 111, 121-23 (2004).

n198 The Fourth, Seventh, Eighth, Tenth, and Eleventh circuits have to varying degrees declined to affirmatively state their position on nominative fair use. See *Suntree Techs., Inc. v. EcoSense Int'l, Inc.*, 802 F. Supp. 2d 1273, 1282 (M.D. Fla. 2011) (mentioning nominative fair use in passing in the Eleventh Circuit); *Teter v. Glass Onion, Inc.*, 723 F. Supp. 2d 1138, 1156 (W.D. Mo. 2010) (declining to apply in the Eighth Circuit because defendant may have caused confusion as to source or affiliation); *Gennie Shifter, LLC v. Lokar, Inc.*, No. 07-cv-01121, 2010 WL 126181, at *14 (D. Colo. Jan. 12, 2010) (applying this doctrine even though it is not the law of the Tenth Circuit); *Lorillard Tobacco Co. v. S & M Brands, Inc.*, 616 F. Supp. 2d 581, 589 (E.D. Va. 2009) (recognizing that the Fourth Circuit does not allow this defense); *DeVry Inc. v. Univ. of Med. & Health Sci.-St. Kitts*, No. 08 CV 3280, 2009 WL 260950, at *5 (N.D. Ill. Feb. 3, 2009) (applying it even though it is not the law of the Seventh Circuit).

n199 15 U.S.C. § 1125(c)(3)(A) (2006). ("The following shall not be actionable as dilution by blurring or dilution by tarnishment under this subsection: . . . any fair use, including nominative . . . fair use, or facilitation of such fair use, of a famous mark by another person other than as a designation of source for the person's own goods or services . . ."); see also Siegrun D. Kane, *Trademark Hot Topics: Progress in Bridging the Great Divides?*, in 15TH ANNUAL INSTITUTE ON INTELLECTUAL PROPERTY LAW 905, 919-20 (2009).

n200 McGeveran, *supra* note 17, at 89. "Although New Kids itself engaged in common-sense analysis of the situation before it, the test

created there has not fared as well. Courts following in the footsteps of *New Kids* sowed confusion and seriously deformed the original proposal . . . It would be preposterous if famous musicians could prevent magazines from discussing them, and a reader poll is little different from an unauthorized biography or parody. Any other outcome could thwart both communication and competition." *Id.* at 89-90.

n201 *Id.* at 90.

n202 *Id.*

n203 *Id.* at 90-91 (referring to *Cairns v. Franklin Mint Co.*, 292 F.3d 1139, 1150 (9th Cir. 2002)). For further discussion regarding how courts' nominative fair use analyses are muddled through these problems, see McGeveran, *supra* note 17, at 91-97.

n204 McGeveran, *supra* note 17, at 91-92.

n205 See generally *id.* at 88-97 (discussing the normative fair use doctrine).

n206 *Id.* at 91. McGeveran notes that "the Ninth Circuit has explicitly transformed nominative fair use into a substitute for the traditional test to judge likelihood of confusion. This shift--from regarding nominative fair use as a threshold showing or a defense to approaching it as an alternate standard for the plaintiff's *prima facie* case--vitiated most of its usefulness." *Id.*

n215 See 15 U.S.C. § 1115(b)(4) (2006) ("The right to use . . . a mark shall be subject to proof of infringement . . . and shall be subject to the following defenses or defects: . . . that the use of the name, term, or device charged to be an infringement is a use which . . . is descriptive of and used fairly and in good faith only to describe the goods or services of such party[.]"); *id.* § 1125(c)(3)(A)(i) ("The following shall not be actionable as dilution by blurring or dilution by tarnishment under this subsection: . . . any fair use, including a nominative or descriptive fair use, or facilitation of such fair use, of a famous mark by another person other than as a designation of source for the person's own goods or services, including use in connection with . . . advertising or promotion that permits consumers to compare goods or services[.]"); *Lindy Pen Co. v. Bic Pen Corp.*, 725 F.2d 1240, 1248 (9th Cir. 1984) ("Liability for infringement may not be imposed for using a registered trademark in connection with truthful comparative advertising.").

n216 15 U.S.C. § 1115(b)(4).

n217 See *Sebastian Int'l, Inc. v. Longs Drug Stores Corp.*, 53 F.3d 1073, 1074 (9th Cir. 1995) (*per curiam*).

n218 *Id.*; see also RESTATEMENT (THIRD) OF UNFAIR COMPETITION § 24 cmt. b (1995).

The rules governing the protection of trademarks are intended to prevent the diversion of trade or harm to reputation that is likely to result if consumers are confused as to the source or sponsorship of goods and services. Confusion does not occur, however, when a trademark is used to identify genuine goods marketed under that mark by the trademark owner. Thus, the trademark owner cannot ordinarily prevent or control the sale of goods bearing the mark once the owner has permitted those goods to enter commerce. It can be said that the rights of the trademark owner are exhausted once the owner authorizes the initial sale of the product under the trademark or that the owner implicitly licenses others to further market the goods under the mark. Thus, no infringement occurs when the use of a mark properly identifies the source, sponsorship, or certification of the goods or services, even if the owner of the mark objects to the use.

Id. For an in-depth discussion on the first sale rule and its rationale, see *Barnes*, *supra* note 87, at 461-69.

n219 17 U.S.C. § 109(a) (2006).

Notwithstanding the provisions of section 106(3) [the distribution right], the owner of a particular copy or phonorecord lawfully made under this title, or any person authorized by such owner, is entitled, without the authority of the copyright owner, to sell or otherwise dispose of the possession of that copy or phonorecord.

Id. Patent law has a robust, but judicially created exhaustion principle. See *Quanta Computer, Inc. v. LG Elecs., Inc.*, 553 U.S. 617, 625 (2008) ("The longstanding doctrine of patent exhaustion provides that the initial authorized sale of a patented item terminates all patent rights to that item.").

n220 See, e.g., *Champion Spark Plug Co. v. Sanders*, 331 U.S. 125, 129 (1947); *Prestonettes, Inc. v. Coty*, 264 U.S. 359, 360 (1924); see also *Quanta Computer*, 553 U.S. at 625; *B. Braun Med., Inc. v. Abbott Labs.*, 124 F.3d 1419, 1426 (Fed Cir. 1997) ("An unconditional sale of a patented device exhausts the patentee's right to control the purchaser's use of the device thereafter."); RESTATEMENT (THIRD) OF UNFAIR COMPETITION § 24 (1995) ("One is not subject to infringement liability . . . for using another's trademark, trade name, collective mark, or certification mark in marketing genuine goods or services the source, sponsorship, or certification of which is accurately identified by the mark[.]").

n221 *Barnes*, supra note 87, at 461.

n222 See supra notes 175-180 and accompanying text.

n223 *Champion Spark Plug*, 331 U.S. at 129; see *Prestonettes*, 264 U.S. at 360; see also *Nitro Leisure Products, LLC v. Acushnet Co.*, 341 F.3d 1356, 1360-62 (Fed. Cir. 2003).

One significant limitation on the first sale doctrine is that it only applies to unaltered or "genuine goods," unless the consumer has reason to know of the alterations. Therefore, using the mark in connection with the resale of a materially different product is trademark infringement. *Davidoff & Cie, S.A. v. PLD Int'l Corp.*, 263 F.3d 1297, 1302 (11th Cir. 2001). First Sale and nominative fair use defenses are inapplicable for altered goods, because "a materially different product is not genuine and may generate consumer confusion about the source and the quality of the trademarked product." *Beltronics USA, Inc. v. Midwest Inventory Distrib., LLC*, 562 F.3d 1067, 1072 (10th Cir. 2009). In *Beltronics*, the Tenth Circuit stated that a difference is material if a consumer would consider the difference relevant in the decision to purchase the product. Id. at 1073. These differences are not limited to the physical product; they may include warranties and "service commitments." Id. Yet "the purpose of the material difference test is to assist courts in determining whether allegedly infringing products are likely to cause confusion . . . and undermine the [good will] the trademark owner has developed . . ." Id. at 1074. Therefore, material differences by themselves may not trigger liability. In other words, because the critical issue remains likelihood of confusion, material differences will not cause liability for trademark infringement as long as the seller dispels potential confusion by sufficiently disclosing material differences to the buyer. Id. The premise of first sale is that the consumers are getting exactly what they bargained for. *S&L Vitamins, Inc. v. Austl. Gold, Inc.*, 521 F. Supp. 2d 188, 202 (E.D.N.Y. 2007); see also *Matrix Essentials, Inc. v. Emporium Drug Mart, Inc.*, 988 F.2d 587, 591 (5th Cir. 1993).

n224 *Davidoff & Cie*, 263 F.3d at 1301-02 (citations omitted); see also *Beltronics USA*, 562 F.3d at 1071 ("Those who resell genuine trademarked products are generally not liable for trademark infringement."); *Austl. Gold, Inc. v. Hatfield*, 436 F.3d 1228, 1240-41 (10th Cir. 2006) ("The right of a producer to control distribution of its trademarked product does not extend beyond the first sale of the product[.] resale by the first purchaser of the original article under the producer's trademark is neither trademark infringement nor unfair competition. It is the essence of the 'first sale' doctrine that a purchaser who does no more than stock, display, and resell a producer's product under the producer's trademark violates no right conferred upon the producer by the Lanham Act." (second and third alterations in original) (quoting *Sebastian Int'l, Inc. v. Longs Drug Stores Corp.*, 53 F.3d 1073, 1074, 1076 (9th Cir. 1995) (per curiam))); *NEC Elecs. v. CAL Circuit Abco*, 810 F.2d 1506, 1509 (9th Cir. 1987) ("The reason is that trademark law is designed to prevent sellers from confusing or deceiving consumers

about the origin or make of a product, which confusion ordinarily does not exist when a genuine article bearing a true mark is sold.").

n225 Barnes, *supra* note 87, at 458, 462 ("The first sale rule reflects property law's distaste for restraints on alienation and allows the holder of intellectual property rights to obtain the price for its creations only once.").

n226 837 F. Supp. 2d 208 (S.D.N.Y. 2011).

n227 *Id.* at 222 (quoting *Zip Int'l Grp., LLC v. Trilini Imps., Inc.*, No. 09-CV-2437(JG)(VVP), 2011 WL 2132980, at *3 (E.D.N.Y. May 24, 2011)). MSS HiFi, however, had altered the goods' serial number, and the court found that these constituted "altered goods" which, as noted *supra*, are not genuine articles and "may generate consumer confusion about the source and quality of the trademarked product." *Id.* at 223 (citing *Beltronics USA*, 562 F.3d at 1072).

n233 See *Sebastian Int'l*, 53 F.3d at 1076 (applying the first sale doctrine despite consumer confusion); see also *NEC Elecs.*, 810 F.2d at 1509 ("Trademark law is designed to prevent sellers from confusing or deceiving consumers about the origin or make of a product.").

n234 Barnes, *supra* note 87, at 465.

n235 KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc., 543 U.S. 111, 121 (2004) (holding that it is the plaintiff's burden to show a likelihood of confusion and that the defendant raising the affirmative defense of descriptive fair use has no independent burden to show no likelihood of confusion); see also Barnes, *supra* note 87, at 465-67.

Proof of genuineness of the goods being resold is intimately linked to the question of whether there is likely to be confusion about the source of the goods. If the goods are genuine, there can be no confusion because the trademark appearing on the goods correctly identifies the manufacturer. The plaintiff in a trademark suit clearly has the burden of showing that a likelihood of confusing arises from the defendant's conduct.

n237 4 MCCARTHY, *supra* note 23, § 25:41.

n238 *Id.* (referencing *Patmont Motor Werks, Inc. v. Gateway Marine, Inc.*, No. C 96-2703 TEH, 1997 WL 811770, at *4 (N.D. Cal. Dec. 18, 1997), where the district court held that the "defendant could sell GO-PED trademarked motorized scooters, using that mark at defendant's Web site" because the "Web site in question . . . refers to the Go-Ped mark only to the extent necessary to identify the particular brand of scooter that he had for sale"); cf. *Volkswagenwerk Aktiengesellschaft v. Church*, 411 F.2d 350, 352 (9th Cir. 1969) (holding that "although he may advertise to the public that he repairs appellant's cars, [the appellee-defendant] must not do so in a manner which is likely to suggest to his prospective customers that he is part of Volkswagen's organization of franchised dealers and repairmen").

n239 See *Bernina of Am., Inc. v. Fashion Fabrics Int'l, Inc.*, No. 01 C 585, 2001 WL 128164, at *2 (N.D. Ill. Feb. 9, 2001) ("It is well-settled that under the 'first sale doctrine,' an independent dealer may use a manufacturer's trademark to re-sell that brand of goods, and that such conduct does not constitute trademark infringement or unfair competition. However, 'one who resells trademark goods is obligated to do so in a manner that is not likely to cause confusion or imply that the seller is associated with the manufacturer.'" (citations omitted) (quoting *Quill Corp. v. NADA Scientific Ltd.*, No. 97 C 7461, 1998 WL 295502, at *3 (N.D. Ill. May 21, 1998))); see also *Austl. Gold, Inc. v. Hatfield*, 436 F.3d 1228, 1241 (10th Cir. 2006) ("The first sale doctrine does not protect resellers who use other entities' trademarks to give the impression that they are favored or authorized dealers for a product when in fact they are not."); 4 MCCARTHY, *supra* note 23, § 25:41.

n240 See generally Lemley & McKenna, *supra* note 16, at 444-45. Professors Mark Lemley and Mark McKenna propose importing into trademark law the materiality requirement courts have created in the false advertising context and applying it in any case based on confusion that does not relate to source or control over quality.

Plaintiffs bringing cases then would face a choice: (1) bring a trademark infringement claim and be required to prove confusion regarding actual source or responsibility for the quality of the defendant's goods or services; or (2) bring a false advertising-type claim alleging that the use causes some other form of confusion and be required to prove confusion about that relationship and that such confusion materially affects consumers' decisions whether to purchase the defendant's goods or services.

Id. at 446.

n241 4 MCCARTHY, *supra* note 23, § 25:41 (quoting *Osawa & Co. v. B & H Photo*, 589 F. Supp. 1163, 1173-74 (S.D.N.Y. 1984)).

n242 See, e.g., *Austl. Gold, Inc.*, 436 F.3d at 1240-41 (regarding a website); *Sebastian Int'l, Inc. v. Longs Drug Stores Corp.*, 53 F.3d 1073, 1076 (9th Cir. 1995) (*per curiam*) (regarding a pharmacy).

n243 Lemley & McKenna, *supra* note 14, at 152-53.

n244 See Goldman, *supra* note 14, at 587; Lemley & McKenna, *supra* note 16, at 448-49; *supra* Part I.C;

n245 See Lemley & McKenna, *supra* note 14, at 188. Professors Lemley and McKenna provide a two part test:

Trademark plaintiffs should have to demonstrate (1) that their injury flows from confusion about the actual source of the defendant's goods or about who is responsible for the quality of those goods, or (2) that the defendant's use causes confusion about some other relationship that is material to consumer purchasing decisions.

n246 See *id.*

n247 *Thompson v. N. Am. Stainless, LP*, 520 F.3d 644, 650 (6th Cir.) (Griffin, J., dissenting) (stating that courts tend to "legislate from the bench" only to implement what they believe is the intent of Congress), vacated, No. 07-5040, 2008 WL 6191996 (6th Cir. July 28, 2008).

Were judges empowered to revise and amend statutes to further what we believe to be the "purpose" of the law, there would be no limit on judicial legislation and little need for Congress. Recognizing the consequences of such unbridled judicial forays into the legislative sphere, the Supreme Court has admonished "time and again that a legislature says in a statute what it means and means in a statute what it says there."

NICK GODFREY ON SUNDAY: MUSING OVER JUMPING'S SHAKY FUTURE ON DAY OUT AT PLUMPTON SHOWS THAT LOWLY FARE..

BYLINE: NICK GODFREY

SECTION: FEATURES; Pg. 14

LENGTH: 942 words

Changes in the air? Plumpton and other jump tracks are bracing themselves

AN enjoyable trip to Plumpton on Monday for a card short on both quantity and quality served to highlight a few issues of the day.

Jumps enthusiasts - in Britain, if not in Ireland - see demons everywhere. While some of the fears may be exaggerated, it would take a brave person indeed to suggest they are without foundation.

After all, they can point to the death of jumping at Nottingham and Windsor, and Kempton's having been prepared seriously to consider ditching the King George.

They fear the intervention of the OFT and bookmakers calling the tune; they fear the effect of the downturn in the rural economy; they fear global warming making safe ground hard to come by at numerous venues; and they fear the all-weather, which means fewer horses going jumping, and offers a powerful winter alternative.

While the likes of Cheltenham and Aintree will not have too much to worry about, complacency elsewhere is not an option. Not many tracks want to become glorified point-to-points - but, as Paul Haigh suggested in yesterday's brilliant effort, the sort of embarrassing cards on offer across a range of Britain's jump tracks recently do not table a persuasive argument for continued success. Put three or four of these together and you might get a decent meeting; taken individually, they resemble apologetic excuses. Given such dubious-looking attractions', is it any wonder jump racing has its problems?

And so to Plumpton on Monday, which demonstrated low-level jumping in all its glory - and that's both good and bad.

No-one could pretend that the card looked particularly enticing - fast ground, only 39 runners and more than one short-priced favourite lent certain events an unattractive hue.

Although, as a journalist, I am spared the entry fee, these fast-ground fields will never put bums on seats. (Though free entry, it appears, does: witness the success at the re-nascent Towcester.)

The relative lack of competition cannot have done too much for off-course turnover, and "brisk" might not have been the adjective of choice to describe the level of on-course business, where someone taking a pounds 50 note out of their wallet was enough for Cristoforo to be sent off 9-4 favourite from 9-2 in places. (Okay, the pounds 50 may have come

from an associate of Barney Curley, who trained the beast in question, though Curley himself said he had nothing to do with the punt. Obviously.)

Few of the small-field events provided much of a spectacle in terms of tight finishes or displays of equine class. Quite the opposite in most cases.

And there was the presence of the Countryside Alliance as main sponsors, demonstrating a remarkable level of support with a silent auction featuring 35 lots, mainly of the hunting, shooting and fishing variety.

Although racing should gain enormous benefit from its massive bedrock of support in rural areas, the dangers of this continued hand-in-glove association should be obvious. Racing is a vastly different beast to other, more widely unpopular pastimes; otherwise, it would have rather more than the OFT to think about.

Nevertheless, from such dismal antecedents, the day somehow managed to conjure a compelling reminder of the virtues of many a minor meeting.

Consider the opener at Plumpton and the aforementioned

Curley-inspired gamble. Intrigue enough on its own as the trainer - a man whose very presence still turns heads - turned up on course to monitor operations.

There was much to examine in the race itself as well, as there usually is in even the most depressing of contests. Saddlers' Quest did such a good job as pacemaker that he might as well have been the winner's stablemate, and Cristoforo's rider Paul Moloney was cute enough to ensure he was in the right place to capitalise as the front-runner, inevitably, folded. It had been set up perfectly for him, and, with the money down, the bacon was duly brought home.

The highlight of the rest of the afternoon was yet another masterclass from Tony McCoy, who recorded a hat-trick with the sort of performances that we all take for granted.

The champion's victories on novice chaser Themanfromcarlisle and stayer Pessimistic Dick were similar, typically urgent rides of the sort that have become his trademark, bullying and bold.

Patience was the key to his third winner, Blue Streak, settled a little off a decent pace before coming through to score in convincing fashion. Great stuff, and it is worth considering in how many sports you can witness the top performer of his era at such close quarters. It is like seeing David Beckham beating the keeper at Sutton United; the sort of thing that could never happen in football happens daily in racing.

Perhaps the OFT is full of Thatcherite free-market ideologues, but simply demonising such a robust body seems an unhelpful response. Change can be for the better: in many areas, it may offer an opportunity for some long-overdue shaping up.

For some, though, it could also mean shipping out. Despite Plumpton's obvious agricultural situation, the Sussex track has always appeared to benefit from a wider constituency than might be imagined, with a fair influx of day-trippers mixing happily alongside its stout defenders in the rural community.

Such a lively mix is an advantage in the face of the various perceived threats, as, of course, are its friends in high places - Peter Savill is racecourse chairman. Whether it will be enough if the doomsday soothsayers are right, or whether other tracks are quite as well placed, remains to be seen.

That, presumably, is what everyone is so worried about.

TAKING DOWN TRADEMARK BULLYING: SKETCHING THE CONTOURS OF A TRADEMARK NOTICE AND TAKEDOWN STATUTE

NAME: Jason R. Brege+; Kelli A. Ovies++

BIO:

+ Smith, Anderson, Blount, Dorsett, Mitchell & Jernigan, L.L.P., Raleigh, North Carolina. B.A. Physics and Mathematics (magna cum laude), Vanderbilt University (2002); J.D., University of Virginia School of Law (2006).

++ Smith, Anderson, Blount, Dorsett, Mitchell & Jernigan, L.L.P., Raleigh, North Carolina. B.A. Journalism and Mass Communication and German (with highest honors), University of North Carolina at Chapel Hill (2000); J.D., Duke University (2006).

LEXISNEXIS SUMMARY:

... While the Digital Millennium Copyright Act ("DMCA") provides for uniform, non-litigation mechanisms for pursuit and defense of claims of copyright infringement on the internet through a structured "notice and takedown" system ("NTS"), no such mechanism exists for trademark infringement. ... Facebook, applying its policies, shuts down Apple's Facebook page, disabling its user account, and deleting all connections to "friends" and users who "like" Apple. 4. ... Instead, disputes regarding alleged online trademark infringement are governed by one or more of the following sources, none of which is comprehensive, broadly applicable, or drafted to address the unique issues present in online trademark infringement. ... EVALUATING PROPOSED TRADEMARK NOTICE-AND-TAKEDOWN STATUTES In order to effectively evaluate proposals regarding a trademark NTS, we suggest the following analytical framework, which begins by defining a broad spectrum of constituencies who potentially may assert or infringe trademark rights: Potential Asserters of Trademark Rights Purported Infringers of Trademark Rights Holds registered "Famous Mark" ("FM"), Seller of counterfeit goods clear basis for trademark ("TM") claim Holds registered trademark, clear basis for Other infringer, clear TM claim infringing action Holds registered "Famous Mark" ("FM"), Other infringer, unclear unclear basis for TM claim infringing action Holds registered trademark, unclear basis for Potentially similar mark, TM claim same class of use Holds common law trademark only Similar mark, different class of use Holds no trademark Fair use users Spurious/frivolous holder of trademark Legitimate seller of authentic goods Because a trademark NTS mediates disputes amongst parties, it is useful to evaluate such system's application to disputes between various combinations of the above constituencies. ... The Mostert and Schwimmer proposal and article, however, primarily focus on disputes similar to the Oakley scenario--namely enforcement by a famous mark holder against counterfeiters in an online auction/marketplace forum. ... Thus, it might encourage more trademark owners to take steps to protect their trademark rights in the face of the type of clear-cut infringement that trademark laws seek to combat.

TEXT:

[*392] I. INTRODUCTION

"We have removed or disabled access to the following content that you have posted on Facebook because we received a notice from a third party that the content infringes or otherwise violates their rights: [insert your Facebook page name here]." For many college or high school students, such a message might result in social angst at losing access to a primary means of communication. In an increasingly socially-interconnected business world, however, a business receiving such a message stands to lose much more: "friends," "likes," connections, customers, reputation, and ultimately, revenue. The means by which access to a business's online content may be curtailed by online intermediaries ("OIs")ⁿ¹ vary immensely, but often arise out of an alleged breach of a third party's copyrights or trademarks.ⁿ² While the Digital Millennium Copyright Act ("DMCA")ⁿ³ provides for uniform, non-litigation mechanisms for pursuit and defense of claims of copyright infringement on the internet through a structured "notice and takedown" system ("NTS"), no such mechanism exists for trademark infringement. Businesses attempting to enforce trademarks or defend against alleged infringement are left at the whim of OIs' varying policies and procedures in a "race to the bottom" whereby OIs seek (perhaps arbitrarily) to protect themselves from being construed as trademark infringers or being held liable on a contributory basis for user infringement,ⁿ⁴ all without regard for the merits (or lack thereof) underlying the assertion or defense of trademark rights by users and third parties.

The following four fictional scenarios (based on actual events) demonstrate the wide-ranging effects of OIs' responses to trademark disputes on the Internet:

[*393] 1. Oakley notices that counterfeit sunglasses bearing the OAKLEY logo are being sold by an eBay reseller. Oakley notifies eBay of the infringement and eBay, applying its policies, shuts down the reseller's site selling the counterfeit sunglasses, disabling the reseller's user account.ⁿ⁵

2. Small Business 1 ("SB1"), which holds a service mark registration for GREEN in connection with services described as "garden design," competes with Small Business 2 ("SB2"), which holds a trademark registration for GREENBOX in connection with goods described as "raised garden planters." SB1 notifies SB2's ISP that SB2's use of GREENBOX infringes upon SB1's service mark. The ISP, applying its policies, shuts down SB2's webpage.ⁿ⁶

3. Joe Smith, upset about buying an iPhone 4S for full price on the eve of the launch of the iPhone 5, frivolously and falsely notifies Facebook that Apple's Facebook page is infringing his non-existent trademarks. Facebook, applying its policies, shuts down Apple's Facebook page, disabling its user account, and deleting all connections to "friends" and users who "like" Apple.ⁿ⁷

4. High Fashion Designer ("HFD") notices that a high number of its handbags bearing its trademarks are being legitimately resold in the secondary market by resellers. HFD, in order to curtail such resale and augment direct sales, notifies eBay, and eBay, applying its policies, shuts down each reseller's site, disabling each of their user accounts.ⁿ⁸

This Essay uses the above scenarios to illustrate the breadth of potential disputes that should be mediated by an effective trademark NTS. In addition, an examination of several threshold points **[*394]** regarding the scenarios is instructive. First, the Oakley, Apple, and HFD disputes above elicit a normative response applying trademark laws--Oakley "should" be able to shut down counterfeiters, Apple "should not" be affected by frivolous trademark assertions, and HFD "should not" be able to assert its trademarks as "trademark bullying" against legitimate secondary market sellers. However, it is only in the Oakley example that the OIs' action of shutting down the site results in a normative outcome.ⁿ⁹ If the OIs' default policies instead were to "do nothing,"ⁿ¹⁰ then the Apple and HFD examples would result in normative outcomes, and the Oakley example would result in an incorrect outcome. Second, regardless of the default action by the OI, the Small Business dispute may require a context-specific analysis to achieve a normative result consistent with the application of trademark laws. Trademark NTS structures should be designed to achieve the normative result as frequently and consistently as possible across a broad spectrum of potential disputes

without undue effort by OIs.

As discussed further below, others have recognized the need for a uniform, non-litigation trademark NTS, generally offering proposals that, like the DMCA, establish a "safe harbor" for OIs as long as they follow certain steps in response to a notice of infringement. This is a critical underlying incentive that ensures widespread adoption and consistency, but designing a trademark NTS around the needs of OIs, or any other single constituency or normative goal of trademark law, misses the subtle distinctions inherent in online trademark disputes. In this Essay, we propose a broadly applicable framework (for which our four scenarios serve as archetypical examples) with which to evaluate proposed trademark NTSs and then briefly apply that framework to several existing proposals. Before introducing our framework, however, we briefly highlight the existing laws in the area of trademark takedown and contrast them with the DMCA. ⁿ¹¹

[*395] II. PROSECUTING & DEFENDING CLAIMS OF ONLINE TRADEMARK INFRINGEMENT

Unfortunately, the law provides no uniform, non-litigation recourse for those who want to prosecute or defend claims of trademark infringement on the internet. Instead, disputes regarding alleged online trademark infringement are governed by one or more of the following sources, none of which is comprehensive, broadly applicable, or drafted to address the unique issues present in online trademark infringement.

The Common Law and the Lanham Act. ⁿ¹² Trademark owners can pursue common law trademark infringement claims in state court under state law, regardless of whether the mark at issue is federally registered. ⁿ¹³ However, owners of federally registered marks also can pursue federal trademark infringement claims in federal court under Section 32 of the Lanham Act. ⁿ¹⁴ Although owners of unregistered marks cannot bring federal infringement claims, ⁿ¹⁵ the federal courts are not completely closed to them. ⁿ¹⁶ Regardless of the basis or venue, however, litigation is expensive and time-consuming, making it undesirable and simply out of reach for many parties.

Moreover, although the Lanham Act has a provision specifically directed to online trademark use, its scope is limited to the use of a [*396] domain name that is identical or confusingly similar to, or, in the case of a famous mark, dilutive of, another person's mark. ⁿ¹⁷ Mark owners also have made extensive use of dilution claims under Lanham Act Section 43(c) ⁿ¹⁸ against persons using their mark, or a variation of it, as a domain name. ⁿ¹⁹ Unfortunately, neither of these provisions is useful in the context of other potentially infringing online trademark uses.

ICANN. The Internet Corporation for Assigned Names and Numbers ("ICANN"), which administers the internet name and address system on a global level, has an alternative dispute resolution policy, the Uniform Domain-Name Dispute Resolution Policy ("UDRP"), that governs domain name conflicts. ⁿ²⁰ Like the Lanham Act provisions discussed in the preceding paragraph, however, the ICANN dispute resolution policy does not address all forms of online trademark infringement.

Website Terms and Conditions and Other Policies. In the absence of regulation, many OIs have terms and conditions and other policies that generally prohibit their users from infringing the intellectual property rights of others and provide for removal of infringing content. Sometimes, these terms and conditions prescribe procedures for mark owners to send notice of such infringement and for alleged infringers to challenge the notice. ⁿ²¹ While these policies help fill the void left by the other sources discussed above, they also often create the opportunity for a "self-help end-around" of court proceedings. ⁿ²²

[*397] Conspicuously absent from the above list is the DMCA and its NTS. ⁿ²³ As its name would imply, however, the DMCA applies only to instances of alleged copyright infringement. ⁿ²⁴ There is no statutory equivalent in the Lanham Act. ⁿ²⁵ Thus, trademark owners who seek to protect their marks from infringement, and parties who have been accused of online infringement, are left to fend for themselves and fashion a remedy using one of the blunt instruments described above, or even attempt to shoe-horn their claims into the DMCA's NTS. As described above, this uncertainty and lack of uniformity encourages trademark bullying and other sub-optimal results because OIs receiving takedown notices regarding infringing content are inclined simply to protect themselves by removing the content

indefinitely and leaving the involved parties to resolve their dispute.ⁿ²⁶ This amounts to a pro-plaintiff legal regime where the party who shoots first wins,ⁿ²⁷ especially in cases in which an innocent party does not have the resources to hire counsel to challenge false accusations of trademark infringement.

III. THE DIGITAL MILLENNIUM COPYRIGHT ACT

Congress enacted the DMCA in part to "provide certainty for copyright owners and Internet service providers with respect to [*398] copyright infringement liability online" by "clarif[ying] the liability faced by service providers who transmit potentially infringing material over their networks."ⁿ²⁸ Accordingly, the DMCA has two main components. First, it provides a "safe harbor" for an OI whose service hosts or transmits infringing work, but only if the OI meets certain statutory requirements.ⁿ²⁹ Second, the DMCA provides a mechanism by which a copyright owner can give an OI notice that it is hosting infringing material.ⁿ³⁰ Upon receipt of such a notice, the OI must "respond[] expeditiously to remove, or disable access to, the material that is claimed to be infringing or to be the subject of infringing activity."ⁿ³¹ The OI then must take "reasonable steps" to notify the owner of the allegedly infringing content that the content has been removed or rendered inaccessible.ⁿ³²

Unlike the procedures typically followed by many OIs in cases of alleged trademark infringement,ⁿ³³ the DMCA gives the accused infringer an opportunity to "counter notify" the OI if it believes the removal of its content is in error.ⁿ³⁴ The DMCA also, however, provides a ten-to-fourteen business day period in which the content will not be restored in anticipation of the accuser instituting legal action.ⁿ³⁵ Accordingly, commentators have criticized the DMCA for being pro-accuser.ⁿ³⁶ This lack of attention to the competing interests of the accuser and the accused is perhaps unsurprising given the pro-OI policy underpinnings of the DMCA.

Equally unsurprising is the fact that legal scholars and other commentators have put forth suggested statutory schemes governing [*399] allegations of online trademark infringement modeled on the DMCA. Because these proposals, like the DMCA, focus on providing a "safe harbor" for OIs, their proponents, like the 105th Congress that passed the DMCA, often stop short of fully analyzing how the system will affect the broad spectrum of potential accusers and accused.

IV. EVALUATING PROPOSED TRADEMARK NOTICE-AND-TAKEDOWN STATUTES

In order to effectively evaluate proposals regarding a trademark NTS, we suggest the following analytical framework, which begins by defining a broad spectrum of constituencies who potentially may assert or infringe trademark rights:

Potential Asserters of Trademark Rights	Purported Infringers of Trademark Rights
Holds registered ⁿ³⁷ "Famous Mark" ("FM"), clear basis for trademark ("TM") claim	Seller of counterfeit goods
Holds registered trademark, clear basis for TM claim infringing action	Other infringer, clear
Holds registered "Famous Mark" ("FM"), unclear basis for TM claim ⁿ³⁸	Other infringer, unclear infringing action
Holds registered trademark, unclear basis for TM claim	Potentially similar mark, same class of use

Holds common law trademark only	Similar mark, different class of use
Holds no trademark	Fair use users
Spurious/frivolous holder of trademark	Legitimate seller of authentic goods

Because a trademark NTS mediates disputes amongst parties, it is useful to evaluate such system's application to disputes between various combinations of the above constituencies. The below matrix illustrates anticipated normative outcomes resulting from any such combination: See Chart

[*400] In the above matrix, the dark region corresponds to the clearest cases in which the normative result is an infringement determination, and a trademark NTS should establish an easy path to enable the potential asserter to curtail infringing activity. The un-shaded and dotted regions of the matrix correspond to the clearest cases in which the normative result is a determination of no infringement, and a trademark NTS should establish an easy path to enable the purported infringer to successfully counter and defend against infringement allegations. There are two general types of such cases: frivolous assertions by those holding no trademark rights whatsoever (unshaded region), and the blatant form of "trademark bullying" where legitimate holders assert their trademarks against fair use or legitimate sales (dotted region). Finally, the gray region corresponds to the difficult, context-specific cases where the normative result is unclear and would warrant further analysis or court resolution. These are the cases where unclear case law, variations between not only the marks, but also the associated goods and services, and distinctions between uses all complicate the analysis; a trademark NTS may merely establish a mechanism for identifying (rather than resolving) such cases. The scenarios presented in Part I are numbered in the matrix above, serving as archetypical examples of disputes in each of these regions, although as noted previously, with non-normative outcomes in certain instances. Clearly, the range of potential scenarios is far broader than our four examples, but we have selected each of them for the purpose of providing straightforward, yet varied, points of application for evaluating proposed trademark NTSs. ⁿ³⁹

[*401] To demonstrate application of our framework, the following two sub-parts present two proposals, and the third sub-part evaluates the proposals against each of the four scenarios.

A. The "Safe Harbor for Trademark Infringement"

In a 2009 Note in the *Berkeley Technology Law Journal*, Elizabeth K. Levin proposes a safe harbor within trademark law in line with the DMCA's goals of preserving strong incentives for OIs and trademark holders to address online infringement and limit OIs' exposure to suit. ⁿ⁴⁰ The resulting proposal is aimed at protecting online auction sites, and would incorporate the DMCA's prerequisites for safe harbor protection found in 17 U.S.C. § 512(c)(1)(A)-(C), ⁿ⁴¹ as well as eliminate any requirement that the sites "track users in a particular way or affirmatively police users for evidence of repeat infringement." ⁿ⁴² Additionally, the proposal would incorporate procedures for notification and counter-notification based on the DMCA. ⁿ⁴³ The proposal would not, however, require the service provider to wait ten to fourteen business days to restore access to the allegedly infringing material after receipt of a counter-notice. ⁿ⁴⁴ Rather it would "require the auction site to repost the listing within a slightly shorter period of time in order to encourage ISPs to repost legitimate content quickly, especially where the complaint is frivolous." ⁿ⁴⁵

B. The "Expedited Dispute Resolution Proceeding"

Frederick W. Mostert and Martin B. Schwimmer propose a two-other [*402] part, expedited dispute resolution

proceeding to filter and address online trademark disputes as efficiently as possible.ⁿ⁴⁶ The Mostert and Schwimmer proposal and article, however, primarily focus on disputes similar to the Oakley scenario--namely enforcement by a famous mark holder against counterfeiters in an online auction/marketplace forum.ⁿ⁴⁷ As noted above, we believe this category of disputes to be the clearest case where the normative result is an infringement determination--the sale of counterfeit goods strikes at fundamental goals of trademark law to provide certainty of origin and reliability of quality--and the primary question in such a case is a factual one, namely whether a good is or is not counterfeit.ⁿ⁴⁸ The other difficult context-specific questions might not arise in this category.

The first phase of the proposed proceeding is a mandatory notice and takedown/safe harbor procedure resembling the DMCA and eBay's VeRO system, followed by an arbitration phase.ⁿ⁴⁹ Notice and takedown is initiated by a trademark owner filing a short notice to an agent of the OI stating its good faith belief that a website is "offering goods that infringe its rights."ⁿ⁵⁰ Notice also includes certain information regarding the owner's rights in the trademark, basis for takedown, and other elements including the owner's verifiable contact information and a declaration under penalty of perjury.ⁿ⁵¹ The OI notifies the purported infringer, but does not immediately remove the content unless the OI has no verifiable contact information (in which case removal is automatic).ⁿ⁵² If the purported infringer fails to [*403] respond or responds inadequately, the infringing content is removed. The purported infringer may respond with a counter-notice, which must contain verifiable contact information, in which event the parties can enter into discussions or select an abbreviated arbitration proceeding. If such a counter-notice is filed, the purportedly infringing content remains online until the dispute is otherwise resolved. The system also incorporates a check against "bad faith" assertions, but looks to Rule 11 of the Federal Rules of Civil Procedure as a starting point, rather than a difficult-to-prove subjective "bad faith" standard.ⁿ⁵³

C. Evaluation of Proposals

1. Scenario 1: The Oakley Dispute

In the Oakley scenario, the owner of a registered trademark discovers blatant infringement--the offering for sale of counterfeit goods online. Here, both of the foregoing proposals would minimize the time, effort, and, therefore, money the trademark owner would expend in figuring out an initial, non-litigation remedy. Thus, it might encourage more trademark owners to take steps to protect their trademark rights in the face of the type of clear-cut infringement that trademark laws seek to combat. In particular, a framework in line with the Mostert and Schwimmer proposal might resolve many cases at the default stage, either because of lack of verifiable contact information for the purported infringer, failure to respond, or inadequate counter-notice. In the unlikely circumstance that a seller of truly counterfeit goods provided an adequate counter-notice, Oakley would have the capacity to seek more traditional legal remedies in order to achieve its desired outcome.

Note, however, that the timing of the actual takedown of the purportedly infringing content differs between the two proposals; Levin's proposal would immediately result in removed content, whereas there could be a delay (at least until default or failure to properly respond) under the Mostert and Schwimmer proposal. In the context of sales of infringing goods, especially by means of time-limited auctions, even a several day delay could result in unimpeded sales of infringing goods, and provide infringers with the ability to close up shop and reopen under another name before a takedown is successful. Accordingly, although outside the scope of this Essay, it [*404] might be worth considering context-specific takedown timing. For example, for purportedly infringing sales of counterfeit goods in an online auction site or marketplace, content removal could be immediate, but for other categories of infringement or other OIs (such as Facebook or an ISP with respect to an owned website), a delay until default or inadequate counter-notice might be more appropriate. Alternatively, there might be other mechanisms whereby OIs could manage and disincentivize users who show a repeated pattern of receiving takedown notices and closing up shop only to reopen under another guise.

2. Scenario 2: The Small Business Dispute

In the Small Business scenario, the owner of a registered trademark (SB1) discovers what might be infringement under a likelihood-of-confusion analysis. As in Scenario 1 above, because each proposal would minimize the time, effort, and money SB 1 would have to expend in figuring out an initial, non-litigation remedy, both proposals might encourage more trademark owners to take steps to protect their trademark rights. Conversely, because liability is not clear-cut in this scenario, each proposal's counter-notice provision would provide a means for an accused infringer, like SB2, to protect its rights and restore content, thereby discouraging abuse by trademark bullies seeking to take down competitors indefinitely. However, because Levin's proposal does not clearly define the amount of time that an OI must wait before restoring the content, and also does not state whether the allegedly infringing material must stay off the internet during the pendency of litigation, it is difficult to evaluate whether Levin's proposal does enough to discourage abuse. Moreover, it likewise is difficult to evaluate whether the proposed periods of downtime would be so long as to have a potentially devastating effect on SB2's business. The Mostert and Schwimmer proposal, however, would keep the content online in the event of an adequate counter-notice, preserving the status quo and enabling the parties to pursue traditional resolution methods of negotiation, arbitration or litigation.

In each of these proposals, however, there does not appear to be a mechanism that accounts for pre-existing litigation between parties involved in an online notice-and-takedown dispute, especially when the self-help takedown attempts to circumvent the impartial litigation process designed to resolve the underlying dispute. ⁿ⁵⁴ Accordingly, it [*405] might be worth considering adding a layer to the form of counter-notice, where the purported infringer can indicate that the parties are involved in pre-existing litigation or trademark opposition proceedings, which will effectively bar a takedown from occurring, absent a resolution in the litigation or opposition proceeding to the contrary.

Finally, in scenarios comparable to this Small Business scenario, we would not expect a trademark NTS to quickly and easily resolve disputes. Instead, these often will require the context-specific analyses for which court mechanisms are best suited. The role of a trademark NTS with respect to disputes of this type is primarily one of identification and filtering to ensure that the easy cases are handled via the NTS, and only the more context-specific and difficult cases reach court (assuming they do not settle on the way to the courthouse).

3. Scenario 3: The Apple Dispute

In the Apple scenario, Joe Smith makes a fraudulent claim of trademark infringement that results in Facebook disabling Apple's user account. Each of the proposals would incorporate a notice procedure that includes verifiable contact information for the infringer and a declaration under penalty of perjury. Provisions such as these could prove useful in deterring would-be accusers such as Joe Smith. Additionally, Levin's proposal would afford Apple with a chance to send a counter-notice that could trigger Facebook's obligation to restore the account if no legal action is commenced. However, as noted in the analysis of Scenario 2 above, Levin's proposal does not identify the duration for which content is rendered inaccessible or whether such duration would effectively prevent trademark bullies, large and small, from achieving the desired effect of harming a business. The Mostert and Schwimmer proposal, on the other hand, would not have removed Apple's content in the first place.

Although remedies for a "bad faith" assertion (as might be implicit in Levin's proposal or covered by reference to Rule 11 of the Federal Rules of Civil Procedure in the Mostert and Schwimmer proposal) exist, it is not entirely clear whether such remedies offer a significant enough disincentive for frivolous accusers. It might be worth considering in this case, as in the analysis of Scenario 1 above, context-specific takedown timing with respect to accusers alleging infringement by holders of famous marks, which could provide a thumb on the scale in order to ensure that a likely frivolous accusation does not result in an automatic takedown of a "famous mark"-related website. Alternatively, filtering mechanisms could weed out frivolous assertions, if directed towards verification of a potential asserter's [*406] identity or verification of existing trademark rights, certain of which could be automated or centralized. ⁿ⁵⁵

4. Scenario 4: The High Fashion Designer Dispute

In the High Fashion Designer scenario, the owner of a registered trademark discovers a fair use of its mark in

connection with resales online, but attempts to curtail such fair use in order to strengthen its direct sales of goods. Here, Levin's proposal would require the service provider to keep the allegedly infringing content off the internet for some period of time, even in the face of a fraudulent notice. In the case of a small reseller, this is potentially devastating.ⁿ⁵⁶ The Mostert and Schwimmer proposal, however, would not have removed the content in the first place, and the content would remain online assuming the reseller provides adequate counter-notice. The Mostert and Schwimmer proposal would then effectively shift the burden back upon HFD to exert pressure upon the reseller, where the existence of negotiation, litigation, and arbitration remedies are more effective at ferreting out legitimate claims by HFD against unauthorized resales, and discourage continued pursuit of illegitimate claims by HFD against fair use resales of goods.

[*407] V. CONCLUSION

Within the parameters of this brief "Practitioner's Essay" we have commented upon a practical problem that lawyers and their clients face on a frequent basis, and for which the available remedies are ill-fitting for a potentialasserter of trademark rights and for parties wrongfully accused of infringement. Although much of the potential for analysis of this issue is outside the scope of this Essay and forum, it is our desire for this Essay to at least scratch the surface of this issue in a unique way that furthers analysis and commentary on the wide-ranging implications of and considerations related to trademark takedown notices and trademark bullying. While we and numerous others before us have expended efforts to devise, categorize, and identify the "best" trademark notice-and-takedown system possible (perhaps magnified by criticisms and perceived faults in the DMCA), it is our firm conviction that in this arena, even an imperfect solution is better than nothing.

n10 See, e.g., *Louis Vuitton Malletier, S.A. v. Akanoc Solutions, Inc.*, 658 F.3d 936, 936 (9th Cir. 2011) (noting that if an OI took such a posture, it could be construed as a trademark infringer or held liable for contributory infringement).

n11 An exhaustive review and comparison of such laws is outside the scope of this Essay.

n12 15 U.S.C. §§ 1051-1141 (2006).

n13 See, e.g., *Frequently Asked Questions About Trademarks*, USPTO.GOV, http://www.uspto.gov/faq/trademarks.jsp#_Toc275426681 (last modified Mar. 9, 2012, 11:02 AM) ("Federal registration is not required to establish rights in a trademark. Common law rights arise from actual use of a mark and may allow the common law user to successfully challenge a registration or application."); see also, N.C. GEN. STAT. § 80-13 (2003) ("Nothing herein shall adversely affect the rights or the enforcement of rights in marks acquired in good faith at any time at common law.").

n14 See 15 U.S.C. § 1114 (2006) (listing the circumstances under which a registrant may institute a civil infringement action).

n15 See, e.g., *Frequently Asked Questions About Trademarks*, *supra* note 13 (listing "[t]he ability to bring an action concerning the mark in federal court" as one of "the benefits of federal trademark registration").

n16 See 15 U.S.C. § 1125 (2006). This section, which prohibits the use in commerce of "any word, term, name, symbol, or device, or any combination thereof that "is likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of [the user] with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities by another person," has been interpreted by the federal courts as providing a federal cause of action for claims of infringement of unregistered marks that have acquired distinctiveness--i.e., secondary meaning--in the relevant marketplace. See J. Thomas McCarthy, *Lanham Act § 43(a): The Sleeping Giant Is Now Wide Awake*, 59 LAW & CONTEMP. PROBS. 45, 45-46 (1996).

n17 15 U.S.C. § 1125(d) (2006).

n18 15 U.S.C. § 1125(c) (2006).

n19 Indeed, the legislative history of the Federal Dilution Act, which added subsection (c) to Section 43 of the Lanham Act, suggests that the legislation was intended to apply to domain names and provide a remedy for the situation in which one entity registers a domain name consisting of someone else's famous mark. See 141 CONG. REC. S19311-01 (daily ed. Dec. 29, 1995) (statement of Sen. Patrick Leahy) ("[I]t is my hope that this antidilution statute can help stem the use of deceptive Internet addresses taken by those who are choosing marks that are associated with the products and reputations of others.").

n20 See *Uniform Domain Name Dispute Resolution Policy*, ICANN (Oct. 24, 1999), <http://www.icann.org/en/help/dndr/udrp/policy>.

n21 See FACEBOOK, <http://www.facebook.com/#/legal/terms> (last updated Apr. 26, 2011) (Facebook's terms, entitled "Statement of Rights and Responsibilities," link to pages entitled "How to Report Claims of Intellectual Property Infringement" and "How to Appeal Claims of Copyright Infringement"); see also EBAY, <http://pages.ebay.com/help/policies/questions/vero-ended-item.html> (last visited May 16, 2012) (eBay's Verified Rights Owner ("VeRO") Program was developed to provide a procedure for intellectual property rights owners to ask eBay to remove certain listings that offer infringing items or contain infringing materials).

n22 If, for example, in the Small Business scenario, SB 1 and SB2 were involved in a trademark opposition case, SB1's actions to take down SB2's webpage could achieve SB1's desired result much more quickly and efficiently than through the court process, but this should not be allowed. Such self-help dynamics alter the statutorily intended function of court resolution of difficult trademark issues and dramatically corrupt the parties' incentives.

n23 17 U.S.C. § 512(c) (2006) ("A service provider shall not be liable for . . . infringement of *copyright* by reason of the storage at the direction of a user of material that resides on a system or network controlled or operated by or for the service provider, if the service provider" meets certain criteria (emphasis added).

n24 *Id.*

n25 See Elizabeth K. Levin, *A Safe Harbor for Trademark: Reevaluating Secondary Trademark liability After Tiffany v. eBay*, 24 BERKELEY TECH. L.J. 491, 521-22 (2009) (proposing a statutory solution for online trademark infringement modeled on the DMCA).

n26 See Ken Fisher, *Facebook Shoots First, Ignores Questions later*, ARS TECHNICA, (Apr. 28, 2011, 2:37 PM), <http://arstechnica.com/business/news/2011/04/facebook-shoots-first-ignores-questions-later-account-lock-out-attack-works.ars> (commenting on how easy it is "to file a malicious claim and take down an entire brand's page" and observing that "it seems the only way to resolve the issue [when Facebook disables a page due to a claim of infringement] is to get the original complainant [sic] to retract the claim"). While this article speaks of alleged copyright infringement, the discussion is equally applicable to trademark infringement.

n27 To illustrate, consider the long-running debate over whether Han Solo or Greedo shoots first in the cantina scene of the first Star Wars movie: regardless of who shot first, Greedo is still dead.

n28 S. REP. NO. 105-190, at 2 (1998).

n29 See 17 U.S.C. § 512(c) (2006); see also *ALS Scan, Inc. v. Remarq Cmty., Inc.*, 239 F.3d 619, 625 (4th Cir. 2001) (stating that the service provider must be "innocent" and lack knowledge of the ongoing infringement).

n30 17 U.S.C. § 512(c)(3) (2006).

n31 17 U.S.C. § 512(c)(1)(C) (2006).

n32 17 U.S.C. § 512(g)(2)(A) (2006).

n33 See Fisher, *supra* note 26 (observing that "it seems the only way to resolve the issue [when Facebook disables a page due to a claim of infringement] is to get the original complainant [sic] to retract the claim").

n34 17 U.S.C. § 512(g)(3) (2006).

n35 17 U.S.C. § 512(g)(2)(C) (2006).

n36 See, e.g., Tim Bukher, *The Dumbest Examples of Online Copyright Law Enforcement*, Bus. INSIDER (Nov. 23, 2011), http://articles.businessinsider.com/2011-11-23/tech/30432335_1_dmca-claims-of-trademark-infringement-content (discussing three cases in which "the innocent parties were ultimately successful in getting their content back online but only after having had their content down for, at minimum, the two week period that the DMCA sets out for takedown counter-notices" and noting that "[i]n the realm of internet business, where memes and popularity swell and fade like flash floods, two weeks can seriously hurt a business").

n37 "Registered" means federal registration under the Lanham Act.

n38 "Unclear basis for TM claim" means a potential assertion where a likelihood-of-confusion analysis (for which a court is best suited) may be required.

n39 A more fulsome evaluation of any trademark NTS might benefit from an extrusion of our four examples to the full parameters of the matrix (likely including constituencies), but such an evaluation is beyond the scope of this Essay.

n40 Levin, *supra* note 25, at 521.

n41 *Id.* at 522.

n42 *Id.* (stating that this provision would be "like section 512(i) of the DMCA").

n43 *Id.* at 523.

n44 See 17 U.S.C. § 512(g)(2)(C) (2006) (requiring a service provider to "replace[] the removed material and cease[] disabling access to it not less than 10, nor more than 14, business days following receipt of the counter notice, unless its designated agent first receives notice from the person who submitted the notification . . . that such person has filed an action seeking a court order to restrain the subscriber from engaging in infringing activity relating to the material on the service provider's system or network").

n45 Levin, *supra* note 25, at 524-25. Although the author notes that the DMCA--in requiring that contested material remain off the internet until any litigation between the copyright owner and the alleged infringer is resolved--effectively gives the plaintiff "the benefit of an injunction without meeting the traditional standard required for an injunction," she does not propose a way to avoid this situation.

n46 Frederick W. Mostert & Martin B. Schwimmer, *Notice and Takedown for Trademarks*, 101 TRADEMARK REP. 249 (2011).

n47 *Id.* at 255-56.

n48 *Id.* at 261-62 ("It is of interest that a trademark owner can have items in its possession and still not be able definitively to conclude whether an item is legitimate."). Query whether the inability to identify legitimate goods might undercut certain goals of trademark law--if in fact the inherent value of a good (i.e., quality, functionality, fitness for particular purpose) diverges from the subjective value of a good (based on its trademark and the societal/cultural implications of ownership thereof), there seems to be something more going on that might not be properly addressed by the parameters of trademark law. In fact, the use of a trademark could in some cases add value to a good where such value was not already inherently there in the first place. Unfortunately, further assessment of this issue is outside the scope of this Essay.

n49 *Id.* at 211-12.

n50 *Id.* at 272.

n51 *Id.* at 274-75.

n52 *Id.* at 277-78. We agree with Mostert and Schwimmer's assertion that there is little to no public policy argument in favor of the right to conduct commerce anonymously, especially if such party is conducting commerce under the auspices of a trademark, which is designed to provide a critical identification and origin function. Identification and origin from "anonymous" carries no value supportable by trademark law.

n53 *See id.* at 278-79 (explaining that bad faith rarely has, if ever, been proven in a case under the comparable provision of the DMCA).

n54 *See supra* note 22.

n55 Given the relatively clean slate in this arena, it is at least worth considering the establishment of a centralized system and mechanism that facilitates and maximizes efficiencies in the notice-and-takedown process, rather than relying upon decentralized OIs to review, process, and respond to notices and counter-notices on a case-by-case basis. For example, any OI who wishes to avail itself of a safe harbor with respect to direct or contributory trademark infringement could register with a Centralized Trademark Registration and Notice System ("CTRNS"), designating an employee as the point person to communicate with CTRNS. Notice and takedown instructions on participating OI websites would direct (or re-direct) potential asserters to file a takedown notice that would be processed by CTRNS, which will review it for conformity, conduct automated filtering directed towards verifying identity, verify existing trademark rights, verify jurisdiction, and otherwise ensure the quality of takedown notices that are ultimately transmitted by CTRNS to the participating OI point person. The OI then would re-direct the processed/filtered notice to the purported infringer, and any default or counter-notice would be re-transmitted to CTRNS for similar centralized processing, verifying identity, verifying existing disputes between the parties, etc. Such a centralized system could improve the quality, consistency, and predictability of trademark takedown disputes, helping filter out the frivolous, and perhaps ultimately devising further heuristics to characterize patterns of infringing behavior or trademark bullying that can be strategically addressed by further systemic modifications or regulation.

n56 *See* Bukher, *supra* note 36 ("In the realm of internet business, where memes and popularity swell and fade like flash floods, two weeks can seriously hurt a business.").

HIGHLIGHT: ABSTRACT

Comedian Nathan Fielder opened a coffee shop which looked like a Starbucks, but he put the word "dumb" in front of the Starbucks name. Fielder justified his behavior based on the argument that he had created a parody of Starbucks. This article explores when a parody of a trademark may be entitled to protection under the First Amendment. If so, what are the limits of this protection, especially when a trademark holder argues that the parody is diluting his or her trademark by either blurring or tarnishment? The article analyzes federal statutes and judicial decisions. It concludes with recommendations to improve U.S. trademark law.

TEXT:

[*145] I. INTRODUCTION

The story of DUMB STARBUCKS illustrates the law's inconsistency in addressing the intersection of parody, trademark infringement, dilution, and the First Amendment. In February, 2014, in Los Angeles County, comedian Nathan Fielder opened a coffee shop which looked just like a Starbucks, but in front of STARBUCKS and the names of all the products was the word "dumb." Fielder announced and posted an online statement that DUMB STARBUCKS was a parody of STARBUCKS. ⁿ² He also objected to the Los Angeles County Health Department forcing the shop to close for lack of a food serving permit, asserting that the coffee and food were art and so there was no need for a food permit. ⁿ³ While humorous, the story raises legitimate questions about First Amendment free speech and parody protection against claims of trademark infringement and dilution ⁿ⁴ by either blurring or tarnishment when the parody is pretty "dumb."

The Lanham Act has provided federal protection for trademarks since 1946 when it prohibited trademark

infringement, or palming off of a junior mark as that of the senior mark holder.ⁿ⁵ The law has expanded to include protection against a variety of unfair competition activities, including dilution. The law of particular interest in the DUMB STARBUCKS parody case is the Trademark Dilution Revision Act of 2006 [*146] (TDRA).ⁿ⁶ It gives owners of famous trademarks a right to sue junior mark holders for blurring the distinctiveness of the senior mark or for tarnishing the reputation of the senior mark holder, similar to common law product disparagement and trade libel.ⁿ⁷ The TDRA allows non-commercial uses of a mark and allows fair use such as parody when the use is not as the junior mark holder's designation of source.ⁿ⁸ Neither exception would apply to Nathan Fielder who was using his mark both as a source designation and commercially.ⁿ⁹ The TDRA, by providing famous and wealthy senior mark holders with a cause of action to prevent junior mark holders from diluting the senior mark, likely increases the costs small junior mark holders might incur in conducting their businesses, by requiring them to defend against possibly less than meritorious claims by the famous senior mark holder, a sort of trademark bullying.ⁿ¹⁰ Part II tells the story of DUMB STARBUCKS. Part III contains a summary of trademark law. Part IV contains summaries of trademark parody cases. Part V contains an analysis of trademark parody law.ⁿ¹¹

[*147] The authors find:

1. Trademark law overprotects famous businesses.
2. Junior mark holders might have undue expenses in defending.
3. Terms and concepts should be clearly defined to avoid a chilling effect of unclear law.
4. Commercial and brand parodyⁿ¹² should have broader First Amendment protection than that expressed in the TDRA.
5. The internet is a good tool to educate the public and to help protect freedom of expression.
6. Inconsistency among circuits makes the law unpredictable.
7. Congress should eliminate dilution as a cause of action in federal law.
8. Some changes based on the findings are also suggested.

II. STORY

In February, 2014, the media and social media websites were teeming with news of the opening of an establishment in Los Angeles called DUMB STARBUCKS that was giving away free coffee. Comedian Nathan Fielder opened the store to obtain publicity for his Comedy Central show, *Nathan for You*.ⁿ¹³ He used Starbucks' famous trademark and coffee terminology and inserted DUMB in front of them.ⁿ¹⁴ Fielder also distributed a *Frequently Asked Questions* document where he explained his view that he can legally use STARBUCKS in his coffee shop's name because he is making a parody of Starbucks.ⁿ¹⁵ Starbucks has a trademark in its name and mermaid logo. Three days after DUMB STARBUCKS was opened, the Los Angeles County Health Department closed it down for lack of a health permit.ⁿ¹⁶ Appendix I contains online sites summarizing the story, the FAQ document, and photos from the shop.

DUMB STARBUCKS appears to be trademark infringement because it uses Starbucks' mark. However, finding trademark infringement requires finding likelihood of confusion and consumers were not confused about the source of the coffee they obtained. So there would not be trademark infringement. But DUMB STARBUCKS could dilute the value of the Starbucks mark. Dilution can occur by blurring and/or tarnishment. Generally, parody is a defense to both trademark infringement and dilution. Fielder claimed he was making a parody. Consumers stood [*148] in line for hours, not to get a cup of Starbucks coffee, but to get what they clearly knew was a disposable cup with DUMB above the name STARBUCKS, probably for the novelty of the experience and for the possibility that the cup would become a collector's item.

The authors ask whether putting DUMB above a famous trademark is a parody. It might not be, since many courts require that the alleged parody "poke fun" at the senior mark holder or its product. Fielder denied poking fun at Starbucks or its coffee. If Fielder's business is not a parody, could Starbucks prevail in a trademark dilution action? If Starbucks could prove dilution, could Fielder still claim a First Amendment right to entertain us by creating an art store that gives away coffee? Fielder was poking fun at the trademark law system more than he was poking fun at Starbucks.

This article discusses the above questions, explaining the statute and case law, and examining the wisdom of current U.S. trademark law, especially as it applies to parodies.

III. TRADEMARK, DILUTION, AND PARODY BASICS

A. *The Value of Trademarks*

Private property ownership, management, and rights enforcement are foundations of the social contract between business and society. This contract permits efficient societal distribution of property through rewarding property users, thereby preventing waste and underutilization of resources.ⁿ¹⁷ Intellectual property (IP) rights are included in the right of private property ownership and are key to promoting and encouraging innovation, invention, and brand identities through a legal system that allows creation of IP and protection of the rights holders. These systems of protection can encourage new business development, reduce inefficiencies, and induce technology acquisition and creation.

IP legal systems have two central economic objectives. The first is to encourage businesses to innovate and invest in knowledge creation. Businesses have an incentive to do so because the law creates a kind of monopoly for the business that creates technologies, information, goods and services. That monopoly, which gives creators exclusive rights to their creations, prevents competitors from taking and using those developments without compensation.ⁿ¹⁸ The second objective is to encourage innovators to bring those innovations to the marketplace. Information is a public good that improves society when shared/exchanged. The more knowledge creators place in the social marketplace, the better informed is society.ⁿ¹⁹

There is a tradeoff between these two objectives. The law seeks to provide reasonable return on investment for the knowledge creators. In addition, the law seeks [*149] to temper private property rights so that knowledge creation and exchange are encouraged.ⁿ²⁰ The legal system needs to find a balance that is "appropriate to market conditions and conducive to growth."ⁿ²¹ Enforcement is another important element of an IP system. "[E]nforcement entails two opposing tasks: punishing infringement by free riders and disciplining enterprises that try to extend their rights beyond intended levels by acting in an anti-competitive manner."ⁿ²²

Because intellectual property is different from land and tangible property, it is more complicated to analyze and enforce.ⁿ²³ For example, IP is not scarce, at least not in the way real and personal property are scarce resources. IP is intangible property. Yet the law assumes that IP protection is as valuable as protecting tangible property rights; if it isn't protected, it might be under-produced or wasted, which results in market inefficiencies. Failure to protect IP may reduce availability of related resources.ⁿ²⁴ Over-protection, on the other hand, may harm progress by raising the costs of creation and by permitting monopolistic behavior by IP owners, which creates inefficiencies. "The potential gains and losses depend on the competitive structure of markets and the efficiency of IP business regulation, including aspects of competition policy and technology development policy."ⁿ²⁵

Trademarks are a different type of IP in that the law protects the trademark in order to protect the association, that is, customer goodwill, between the product and the mark. The right to create and use a trademark allows businesses to build a strong association between the brand and the product.ⁿ²⁶ To promote this association, marks must be sufficiently unique to avoid confusion by consumers and to reduce their search costs.ⁿ²⁷ Trademark protection systems encourage firms to invest in name recognition and product quality. These systems also induce licensees to protect asset value by selling goods of guaranteed quality.

If trademarks were not protected, rival firms could pass off their lower-quality goods as legitimate versions of those produced by recognized companies. That would discourage companies from engaging in innovation because there would be insufficient return on investment and it would permit free riders to gain the benefit of any research and development without incurring the costs. This situation would diminish incentives for maintaining quality and would raise consumer search costs.

Enforcement of IP rights is a critical component of promoting and protecting return on investment. In the United

States, Congress, state legislatures, and the [*150] judicial system provide that protection. In an IP article Daniel Cahoy, business law professor, noted that the judicial system and its interpretations of trademarks have a significant impact on the economic value of a trademark. ⁿ²⁸ Cahoy notes that the value of a trademark is especially sensitive to a court's retroactive interpretation of whether a trademark is protected or not. That arises when senior mark holders file suits for trademark infringement and trademark dilution. If the courts are inconsistent in their application of the law and unexpectedly reduce or increase protection for a particular mark, the court's decisions have a far-reaching impact on businesses and valuation of their trademarks. ⁿ²⁹

Trademarks serve an information role for consumers. Consumers' preference for a certain brand is expressive conduct that should be protected by the First Amendment. A consumer who sees another consumer with certain trademarked property receives information about that other consumer. The issue isn't whether the consumer made the choice, necessarily, but instead consumers letting other consumers know the choices they've made. ⁿ³⁰

Parodies appeal to a segment of the public also. ⁿ³¹ Brand parodies appeal to those who might ridicule or make a social commentary about the value of a trademark or brand. Those who create parodied goods are also providing information to their co-conspirators in the parody and to those who purchase the trademarked goods. ⁿ³²

It is against this backdrop that the authors examine U.S. trademark law and justifiable uses of senior marks.

B. Trademark Basics

"A trademark is a word, phrase, symbol or design, or a combination thereof, that identifies and distinguishes the source of the goods of one party from those of others." ⁿ³³ Trademark law is often justified as a consumer protection law, designed to assure consumers that they are buying a reputable product or service from a reputable provider, but it is also beneficial to businesses, assisting them in establishing goodwill. "Trademarks make it easier for consumers to quickly identify the source of a given [*151] good. ... By making goods easier to identify, trademarks also give manufacturers an incentive to invest in the quality of their goods. ... Trademark law furthers these goals by regulating the proper use of trademarks." ⁿ³⁴ Businesses rely on trademark law to give them a marketing advantage over competitors by establishing business goodwill. ⁿ³⁵

Trademark law began as part of the common law of unfair competition. ⁿ³⁶ Since a trademark is a source identifier, infringement is similar to the common law tort of palming off or passing off. States have both common and statutory trademark and unfair competition laws. ⁿ³⁷ The federal government chose to regulate trademarks in the Lanham Act ⁿ³⁸ in 1947, yet it has consistently provided that federal trademark does not preempt state law. ⁿ³⁹ Congress obtained its authority to regulate unfair competition and trademark from the constitution's Commerce Clause ⁿ⁴⁰ rather than from the Progress Clause. ⁿ⁴¹ The latter authorizes protecting patents and copyrights as embodying the federal government's interests in promoting social and economic [*152] progress through protection of writings and inventions. Trademarks are not a traditional type of IP. ⁿ⁴²

The mark must be distinctive and courts have classified marks into levels of distinctiveness with varying levels of protection for each category. ⁿ⁴³ The nature of the classification depends on the relationship of the word or mark to the product. ⁿ⁴⁴ The most protected are marks designated as arbitrary or fanciful. According to the Patent and Trademark office, fanciful marks are those "invented for the sole purpose of functioning as a trademark or service mark" and "arbitrary marks that are in common linguistic use" but do not describe the goods or characteristics of the goods. ⁿ⁴⁵ Ones that are suggestive get second level protection. Descriptive marks get third level. Generic marks get fourth level protection. STARBUCKS is considered a distinctive mark, probably fanciful, so is entitled to maximum legal protection.

Assuming the mark is sufficiently distinct to be protected, the senior mark owner has the burden of showing that the junior mark holder created a likelihood of confusion by consumers. ⁿ⁴⁶ This means confusion as to identity or source of the goods or services. In the DUMB STARBUCKS case consumers were not confused. The consumers did not believe

they were buying Starbucks coffee. They stood in line for hours to get a cup that looked just like a Starbucks cup but had DUMB above the STARBUCKS name. ⁿ⁴⁷ They did that because Nathan Fielder was making a joke and they thought it was novel or that they might be on Fielder's *Comedy Central* television show. So Starbucks might lose if it claimed trademark infringement.

C. Dilution Basics

Even though Starbucks would not be able to show likelihood of confusion for trademark infringement, it has a second option in federal trademark law. The senior mark holder may claim dilution. Since 1995 businesses have obtained federal statutory recognition of protection against dilution. ⁿ⁴⁸ Following Frank Schechter's 1927 law review article arguing that a trademark is actually a property right and [*153] should be protected as such, ⁿ⁴⁹ states began enacting dilution statutes that allow the senior mark holder to stop others from using the mark in a way that blurs or tarnishes its identity. The state statutory causes of action provided trademark owners with a protectable property right in their trademarks. ⁿ⁵⁰

States enacted dilution statutes before the federal government did and about half of the states have dilution statutes. ⁿ⁵¹ In 1995 the federal government enacted its dilution statute, the Federal Trademark Dilution Act (FTDA). ⁿ⁵² Then in 2006 it enacted the Trademark Dilution Revision Act of 2006 (TDRA), replacing the FTDA, further clarifying dilution, and overruling a Supreme Court decision interpreting the federal dilution statute to require actual dilution rather than likelihood of dilution. ⁿ⁵³ Both the FTDA and the TDRA protect against dilution of a trademark by an infringer even if there is no likelihood of consumer confusion when the trademark owner proves blurring and/or tarnishment. ⁿ⁵⁴ While the TDRA is a better drafted law than was the [*154] FTDA, there are still areas where reasonable courts may differ. As regards the TDRA, it is disturbing that a business trade group, the International Trademark Association (INTA), which has the most to gain from strong trademark protection was the main proponent and drafter of the federal dilution legislation. It is like the fox guarding the henhouse.

The TDRA added definitions of blurring and tarnishment and clarified that the burden of proof for the senior mark holder was to show likelihood of dilution, rather than the actual dilution the Supreme Court had decided was the requirement under the FTDA. ⁿ⁵⁵ Since one of the issues in this inquiry into DUMB STARBUCKS' legality concerns whether the TDRA changed dilution law significantly, the rest of this section compares the former FTDA with its replacement law the TDRA and explains the TDRA.

Both statutes apply only to the owner of a famous mark. But the TDRA clarifies the meaning of "famous mark" by adding that it is one "that is distinctive, inherently or through acquired distinctiveness." ⁿ⁵⁶ Both statutes state that an injunction is the appropriate remedy. The FTDA used the terminology "dilution of the distinctive quality of the mark." The TDRA says "dilution by blurring or dilution by tarnishment." The TDRA added definitions for the two types of dilution. There is substantial overlap between the two. The TDRA's definition of blurring is more detailed than its definition of tarnishment. Either type of dilution could be subjected to a fair use defense, including parody. ⁿ⁵⁷ This may have an impact on federal dilution law in that the courts now have factors to consider when deciding whether blurring has occurred. But the impact on the results in dilution cases may not be significant.

[*155] The TDRA adds language to clarify that likelihood of confusion is not a requirement. ⁿ⁵⁸ It adds that dilution may occur "regardless of the presence or absence of actual or likely confusion, of competition, or of actual economic injury." This language was inserted to clarify that Congress was overturning the Supreme Court's holding in *Moseley I* ⁿ⁵⁹ that one claiming dilution would have to show actual dilution rather than a mere likelihood of dilution. ⁿ⁶⁰ Consequently, the claimant's burden is only to show likelihood of dilution under the TDRA. ⁿ⁶¹ This has resulted in lack of uniformity of federal law on dilution among the circuits.

The TDRA added a section called "Definitions." It contains three items significant to this discussion: a restatement of the criteria for being a famous mark, ⁿ⁶² a definition [*156] of blurring, and a definition of tarnishment. This probably does not have a significant impact on federal dilution law.

The first item in "Definitions" is the listing of the factors to consider in deciding whether a mark is famous. The TDRA has 4 factors while the FTDA had 8. However, the TDRA combines several factors from the FTDA into one factor, so they are still similar. ⁿ⁶³ Whether a mark is sufficiently famous to qualify for protection under the TDRA is beyond the scope of this article, since Starbucks is a strong mark.

The TDRA defined blurring and tarnishment. Blurring is "association arising from the similarity between a mark or trade name and a famous mark that impairs the distinctiveness of the famous mark." ⁿ⁶⁴ The statute provides guidance by suggesting factors for courts to consider when determining whether the defendant's actions amounted to actionable dilution by blurring. They are:

1. The degree of similarity between the mark or trade name and the famous mark.
2. The degree of inherent or acquired distinctiveness of the famous mark.
3. The extent to which the owner of the famous mark is engaging in substantially exclusive use of the mark.
4. The degree of recognition of the famous mark.
5. Whether the user of the mark or trade name intended to create an association with the famous mark.
6. Any actual association between the mark or trade name and the famous mark. ⁿ⁶⁵

The factors do not clarify what is blurring, but are a non-exclusive list of considerations to help illuminate the concept. The description of blurring is reminiscent of defamation or disparagement. Blurring might be more aptly named slurring since many of the cases that find dilution involve disparaging uses of the senior mark, what many readers might call tarnishment.

[*157] The *LEXIS v. LEXUS* ⁿ⁶⁶ case illustrates blurring, although it was decided before enactment of the TDRA with its definition of blurring. Mead Data Central sued Toyota Motor Sales for dilution of its trademark LEXIS, the legal data base, when Toyota started its luxury brand of LEXUS cars. The district court, applying New York's dilution law, ordered Toyota to stop marketing cars under the trade name LEXUS. ⁿ⁶⁷ The Second Circuit Court of Appeals reversed on an expedited appeal so that Toyota would not have to stop selling Lexus automobiles while awaiting results of an appeal. ⁿ⁶⁸ Two findings supported the circuit court's reversal. First, in order to qualify for the highest protection, the mark must be fanciful or arbitrary. The term LEXIS is actually a Latin word used and found in English language dictionaries and not fanciful as is required to be a highly protected mark. So LEXIS was not given the highest protection. ⁿ⁶⁹ The second finding related to the mark's recognition, i.e. whether it was famous enough, and Mead lost that argument. Most people have not heard of LEXIS the legal database. ⁿ⁷⁰ Blurring through use of similar marks makes the case intriguing. It is not "slurring," because it is not disparaging, but an innocent blurring of the two marks by the second user. McCarthy in *MCCARTHY ON TRADEMARK* identified the "neurological and economic theory," where some scholars argue there is economic harm to consumers when the consumer must spend a fraction of a second longer to link the mark to its source once blurring has occurred. ⁿ⁷¹ Did the reader think about legal research for a fraction of a second when deciding whether to purchase a LEXUS?

Dilution by tarnishment is different than an innocent similarity like LEXIS and LEXUS. However, a number of courts use blurring even when the junior mark holder's use of the senior mark is unsavory, so the distinction between tarnishment and blurring is blurred. Tarnishment is "association arising from the similarity between a mark or trade name and a famous mark that harms the reputation of the famous mark." ⁿ⁷² Had Starbucks sued Fielder for DUMB STARBUCKS, Starbucks would probably have claimed dilution by tarnishment. This is the type of dilution that is limited by the fair use parody defense when junior users are poking fun at or criticizing the famous senior mark owner. This is similar to a cause of action for trade libel or product disparagement where the plaintiff has the burden of showing injury to the [*158] product or a company's reputation. ⁿ⁷³ However, under the TDRA the plaintiff only has to show likelihood of dilution rather than actual harm to its reputation.

The former FTDA had listed defenses to dilution. The TDRA amended the FTDA in regards to defenses (exclusions). This might have a significant impact on federal dilution law. The TDRA added nominative and descriptive

fair use; ⁿ⁷⁴ parody, criticism, and comment; and limitation of fair use to uses of the senior mark that are not a source designation of the junior mark holder's mark. The TDRA now says:

The following shall not be actionable as dilution by blurring or dilution by tarnishment under this subsection:

(A) Any fair use, including a **nominative or descriptive fair use**, or facilitation of such fair use, of a famous mark by another person **other than as a designation of source for the person's own goods or services**, including use in connection with--

advertising or promotion that permits consumers to compare goods or services; or

identifying and **parodying, criticizing, or commenting** upon the famous mark owner or the goods or services of the famous mark owner.

(B) All forms of news reporting and news commentary.

(C) Any noncommercial use of a mark. ⁿ⁷⁵ (emphasis added by authors)

The language in bold letters, by statutorily limiting when parody and fair use are available as defenses, might have reduced courts' use of the defenses in trademark infringement and dilution cases when the junior mark holder is using the senior mark commercially and/or as its own source indicator. The TDRA provides that non-commercial parody for other than identification of a junior mark is protected. By negative implication, it is possible some courts will assume the law will not now protect brand parody of a senior mark by a junior mark holder, that is using the parody as part of his or her own mark. This would limit the fair use and parody doctrine's application in dilution law substantially. So courts who wish to use the parody defense to protect the junior mark holder must resort to general parody case law developed for both traditional trademark infringement with its likelihood of confusion and for dilution generally. Nathan Fielder with his DUMB STARBUCKS would not be able to take advantage of the TDRA's parody defense because he was designating the source of his product and service as DUMB STARBUCKS.

As long as the TDRA's defenses list is not interpreted as limiting fair use defenses, the prior parody law should continue to protect junior mark holders who use the senior mark even as a designation of source, so long as the use is parodic, called "brand [*159] parody." ⁿ⁷⁶ As it turns out, well-known businesses with famous trademarks had better have a pretty thick skin, since at least two circuits have held that the First Amendment allows junior mark holders to make fun of famous senior mark holders. ⁿ⁷⁷

D. Fair Use and Parody Basics

Parody is an ancient literary technique. ⁿ⁷⁸ It calls to mind another's work and alters it in a humorous or satiric way. The editors of THE OXFORD BOOK OF PARODIES traced parody back to before the 14th century, before THE CANTERBURY TALES was published. ⁿ⁷⁹ The Oxford Dictionary definition of parody is "an imitation of the style of a particular writer, artist, or genre with deliberate exaggeration for comic effect." ⁿ⁸⁰ Trademark parody is a bit different in that it imitates the mark rather than the style or genre; it does tend to be humorous, however.

Parody can be considered a defense under both traditional trademark infringement and dilution causes of action. However, it is probably not a very good parody and probably will not be protected if consumers are likely confused in believing that the senior mark holder is responsible for the parodic use. ⁿ⁸¹ Fair use in trademark law is similar to the doctrine as used in copyright law ⁿ⁸² in that it protects the public interest in preserving the First Amendment's guarantee of free speech. Two judicial developments through copyright fair use have benefited courts applying fair use in trademark situations. One is the realization that commercial uses of a work or senior mark can be fair use, in that commerciality is merely a factor to consider when deciding whether the second use is fair and hence not infringing. The second is the judicial recognition that parody is a form of fair use. ⁿ⁸³ The Supreme Court in its *Campbell* [*160] musical copyright case affirmed that even though the copyright fair use statute ⁿ⁸⁴ did not specifically mention parody

as a form of fair use, it could still be fair use.ⁿ⁸⁵ Parody had been considered a form of fair use prior to the 1976 Copyright Act that took fair use from the common law and incorporated it into that statute.ⁿ⁸⁶ So in addition to non-commercial uses recognized under the copyright fair use statute is the use of another's IP for parody, to make fun of the protected mark, name, or work of art if it is copyright.ⁿ⁸⁷ Parody of a trademark could be an infringement if there is a likelihood of consumer confusion between the senior mark and the parodic one.ⁿ⁸⁸ Trademark parody could possibly be dilution if the parody causes a likelihood of dilution of the senior mark under the above explained language of the TDRA.

Congress has not defined parody either in the copyright or the trademark statutes. The courts have defined parody and have disallowed imitative works that do not satisfy the judicial concept of parody.ⁿ⁸⁹ But the judicial definition leaves it to the court to effectively be a censor of expression if the court deems the parody to be either non-parodic or offensive. For instance, in *Original Appalachian Artworks v. Topps Chewing Gum*,ⁿ⁹⁰ the court found infringement when the defendant was making fun of the senior mark holder's Cabbage Patch Dolls.ⁿ⁹¹ It said children, the audience for the Cabbage Patch Dolls, were likely to be confused that the parodic Topps Chewing Gum cards showed Cabbage Patch Dolls. That is unlikely, since cards with images on them do not resemble soft cuddly dolls.

In addition, some "parodic" junior marks are not very creative, such as DUMB STARBUCKS, and courts may find that they are not protected as parody. Evaluating creativity is a difficult task, though, as creativity, to some extent, is in the eye of the beholder. If the junior mark owner's use is not parodic, is it unprotected or might there [*161] be further fair use considerations that would save dumb parodies from being banned? Congress and/or the courts should define parody and should recognize First Amendment rights to make fun of senior marks when the junior mark does not rise to the level of the parody concept developed for copyright law.

IV. PARODY CASELAW

A. Generally

This section provides a brief overview and history of parody in IP law, summarizes some classic trademark parody cases, and reviews some trademark parody cases decided since passage of the TDRA.ⁿ⁹² Parody in trademark law is a fairly heavily litigated legal area with entertaining stories. Many U.S. courts treat parody as a form of speech that is protected under the First Amendment and as a limitation on an IP owner's exclusive right to writings and trademarks.ⁿ⁹³ When Congress enacts a statute that affects IP law, particularly copyright and trademark, courts might reconsider whether the prior parody case law is still effective.

This happened in 1994 for copyright's fair use doctrine when the Supreme Court considered whether parody could be fair use of a copyright even though the 1976 Act did not refer to it.ⁿ⁹⁴ Congress, in the Copyright Act of 1976,ⁿ⁹⁵ had codified the judicially created fair use doctrine, but the statute did not mention parody as a type of fair use.ⁿ⁹⁶ The Supreme Court recognized fair use protection for parody in copyright law in its 1994 *Campbell*ⁿ⁹⁷ decision. The Court confirmed that fair use in copyright law included parody, even though the 1976 Act's fair use provisionⁿ⁹⁸ did not mention it.ⁿ⁹⁹ Similarly, the Supreme Court confirmed the right to make parodic use of a well-known senior mark under trademark law and the FTDA in *Moseley v. V. Secret (Moseley I)*.ⁿ¹⁰⁰ The Court acknowledged the fair use defense under the former FTDA as the method for [*162] protecting society's and the junior user's First Amendment interests. It relied on prior case law to affirm its interpretation of the FTDA. The FTDA did not mention parody as a fair use, but prior and subsequent trademark opinions have recognized it.

The trademark dilution proof standard and the Supreme Court's interpretation of it led to Congressional enactment of the TDRA. *Moseley I* is briefly described here. Victor and Cathy Moseley opened VICTOR'S SECRET, selling lingerie and adult novelties in a small town in Kentucky. When Victoria's Secret complained, they changed the name to VICTOR'S LITTLE SECRET. Victoria's Secret was not satisfied with the modification and sued to defend its trademark. Victoria's Secret claimed the Moseley's infringed the VICTORIA'S SECRET mark and diluted its mark in violation of the FTDA. Victoria's Secret neither showed likelihood of consumer confusion nor actual dilution of its

famous mark. The Supreme Court had granted certiorari to resolve the conflict among the circuits as to whether the FTDA required proof of actual dilution or whether a likelihood of dilution is sufficient to obtain an injunction. The Court ruled that the FTDA required actual proof of dilution, based on a literal reading of the statute.ⁿ¹⁰¹ The Court noted that other federal trademark laws and a number of state trademark laws refer to the likelihood of dilution, but that the FTDA did not incorporate that standard. The Court qualified its holding by saying that the senior mark owner does not have to show actual lost sales or profits, but the mere fact that consumers will associate the senior mark with the junior mark does not preclude the junior mark owner's right to parody the senior mark.ⁿ¹⁰²

Part of the *Moseley I* decision was invalidated by Congress when in 2006 it enacted the TDRA, specifying that the senior mark holder had the burden of showing likelihood of dilution rather than the Supreme Court's requirement of actual dilution.ⁿ¹⁰³ The TDRA is unique in naming parody as a defense to dilution, but the statutory defense is limited to junior mark uses that do not use the parody as a source indicator. In addition, under the TDRA noncommercial uses of the senior mark are a defense to dilution. Some courts still consider parody a defense to both infringement and dilution even when the junior mark holder's use is as a source indicator or brand parody.ⁿ¹⁰⁴ The next section summarizes the status of trademark parody law prior to passage of the TDRA through review of some of the pre-2006 trademark parody cases. As the post-TDRA cases show, many courts believe the prior cases are still reflective of trademark parody law, notwithstanding the TDRA's limitation of the parody defense to noncommercial uses of the senior mark by the junior mark holder.

[*163] B. Trademark and Parody Tradition

Jordan Blanke, professor of Computer Information Systems and Law, in his 2004 article on *Moseley I* provided an insightful review of trademark parody cases.ⁿ¹⁰⁵ Some cases are referenced herein in order to show the judicial treatment in place prior to the FTDA and the TDRA, both of which created the federal cause of action for dilution. Under traditional trademark infringement, the plaintiff has to show there is a likelihood of consumer confusion in order to prevail. With good parody there is little or no consumer confusion, so parody was protected as a factor in considering likelihood of confusion, but not as a defense in itself. As already explained, parody in a limited application is acknowledged as a defense to dilution under the TDRA.

Blanke treated "sex related" parody cases separately, which is a distinction also in at least one post-TDRA case.ⁿ¹⁰⁶ First, in *Dallas Cowboy Cheerleaders, Inc. v. Pussycat Cinema, Ltd.*,ⁿ¹⁰⁷ the Second Circuit found that the use of the cheerleader costume in an X-rated film was not a parody and was infringing. Second, in the GENITAL ELECTRIC caseⁿ¹⁰⁸ the court found trademark infringement for a t-shirt bearing the above words written to look like GENERAL ELECTRIC.ⁿ¹⁰⁹ Third, in the POPPIN FRESH case *Screw* magazine showed Pillsbury's Poppin' Fresh and Poppie Fresh dough characters in sex acts. The court banned the parody on the grounds of dilution under state law: it did not use trademark infringement due to there being no likelihood of confusion.ⁿ¹¹⁰ Last was *High Society Magazine's* parody of L.L. Bean entitled *L.L. Bean's Back-to-School-Sex-Catalog*, which the court found not to be an infringement and not to be dilution. The court distinguished *Dallas Cowboy Cheerleaders* and *General Electric*, both of which had found dilution:

First, they all involved unauthorized commercial uses of another's trademark. Second, none of those cases involved a defendant using a plaintiff's trademark as a vehicle for an editorial or artistic parody. In contrast to the cases cited, the instant defendant used plaintiff's mark solely for noncommercial purposes. Appellant's parody constitutes an editorial or [*164] artistic, rather than a commercial, use of plaintiff's mark. The article was labelled as "humor" and "parody" in the magazine's table of contents.ⁿ¹¹¹

It offends the Constitution to use a dilution statute to prevent the defendant's parodic use of a trademark when the defendant is engaged in a protected form of expression.ⁿ¹¹² Even though parody is often offensive, it still deserves substantial freedom.ⁿ¹¹³ "Denying parodists the opportunity to poke fun at symbols and names which have become woven into the fabric of our daily life, would constitute a serious curtailment of a protected form of expression."ⁿ¹¹⁴ The *L.L. Bean* decision signals that some courts have more respect for First Amendment freedoms even when they

involve sexual material. It does not, however, directly help junior mark holders who engage in brand parody, which is commercial and is a source indicator.

Finally, *Kraft Foods Holdings, Inc. v. Helm*ⁿ¹¹⁵ combined sex, drugs, and violence. Defendant used VELVEEDA for websites that contained graphic sexuality and illustrations of drug use and drug paraphernalia.ⁿ¹¹⁶ The court held that VELVEEDA, being similar to VELVEETA, probably tarnished VELVEETA.ⁿ¹¹⁷ Sometimes litigants hurt their own cases, and Helm did so because many of his statements contradicted his First Amendment claim.ⁿ¹¹⁸

In several brand parody type cases, courts reached differing results. First, Jim Henson created a Muppet character called SPA'AM, and Hormel, the maker of SPAM, sued and lost on both its infringement and dilution claims.ⁿ¹¹⁹ The court felt that customers of SPAM and SPA'AM would not be confused. Both the Muppets and SPAM are well known marks. As to dilution based on blurring, the court held that the parody would strengthen rather than weaken the link between the name and the senior mark holder. Jim Henson did not plan to market the word SPA'AM by itself, but only to use it in conjunction with the Muppet character. Tarnishment, on the other hand, occurs when a mark is "linked to products of shoddy quality, or is portrayed in an unwholesome or unsavory context," with the result that "the public will associate the [*165] lack of quality or lack of prestige in the defendant's goods with the plaintiff's unrelated goods."ⁿ¹²⁰ The Muppet character SPA'AM was not unsavory, but was likeable and would not create any negative associations. Additionally, Jim Henson's products would not be in direct competition with those of Hormel.

Second, the maker of LARDASHE jeans was sued by Jordache and the Tenth Circuit permitted the parody, again considering both infringement and dilution.ⁿ¹²¹ Third, Blanke noted that the Eighth Circuit is more protective of senior mark holdersⁿ¹²² and that it banned MUTANT OF OMAHA t-shirts as both infringing and dilutive.ⁿ¹²³ Fourth, Lucasfilm, the maker of STAR WARS movies, sued the maker of the pornographic film STARBALLZ in the Ninth Circuitⁿ¹²⁴ and lost, the public interest in free or artistic speech trumping trademark infringement and dilution. Fifth, Mattel's BARBIE has also been parodied and Mattel lost its trademark infringement and dilution suit when she was parodied in a song.ⁿ¹²⁵

Finally, the case where the judicial analysis was most disturbing was the CONSUMER WHORE parody of Starbucks' mermaid where the court banned sale of parodic memorabilia.ⁿ¹²⁶ Cartoonist Kieron Dwyer created a parody of Starbucks's ubiquitous mermaid logo and posted it to his Web site. His logo changed the name encircling the mermaid from "Starbucks Coffee" to "Consumer Whore." He also changed the stars to dollar signs, opened the mermaid's eyes, placed a cup of coffee in one hand and a cell phone in the other, and gave her nipples and a navel ring. On his Web site, he advertised T-shirts, bumper stickers, and a comic book, all carrying the logo. He sold about 200 of the T-shirts. Starbucks sued Dwyer for, among other things, copyright infringement, trademark infringement, and trademark dilution by tarnishment. The District Court for the Northern District of California issued a preliminary injunction prohibiting Dwyer from posting the logo to his Web site and selling any items containing the logo.ⁿ¹²⁷ The ruling is consistent with sex-referring cases as receiving the least protection, but is disturbing in that a clear parody received no First Amendment protection.

Variation in result occurs among circuits and among subjects, with sexual parody being the least protected topic. Generally, it appears that the sex-related parody cases are given less leeway than politically satiric cases. In general, likelihood of consumer confusion is irrelevant for a dilution claim. So in dilution cases it is not as clear how parody should be considered. Many courts perform both a likelihood of confusion and a dilution analysis in infringement claims, an analysis that McCarthy identifies as unnecessary;ⁿ¹²⁸ if there is likelihood of consumer confusion, there is no need to also [*166] consider dilution. Each circuit has a system for determining likelihood of confusion in a trademark infringement case.ⁿ¹²⁹

It appears that parody continued to be protected in trademark law even after passage of the FTDA in 1995, but clearly courts vary according to their own reactions to the parody. It is also important that this review of pre-2006 parody cases end on a Starbucks case, since that company is Fielder's target. Fielder's case may involve parody, but it is nothing more than adding the word DUMB above STARBUCKS. That is not very edgy, biting, or satiric, and it seems

to make little social comment on Starbucks as a senior mark holder. In fact, if anything it is making fun of trademark law and the parody exception. So the answer to whether "dumb" parody is protected is unknown.

C. Trademark and Parody after the TDRA of 2006 ⁿ¹³⁰

This section reviews some trademark infringement and/or dilution cases decided by federal courts since enactment of the TDRA in 2006. Some of the cases involve trademark infringement, but not dilution, so they do not consider parody under the TDRA. The first three cases were decided by appellate courts, while the rest were decided by district courts.

1. Moseley II

The dispute between the Moseleys and Victoria's Secret continued after the TDRA overturned the Supreme Court's decision in *Moseley I*. ⁿ¹³¹ The District Court granted an injunction prohibiting Victor Moseley from naming his store VICTOR'S LITTLE SECRET and the Sixth Circuit affirmed the decision. ⁿ¹³² Under the new standard dictated by the TDRA, the senior mark holder did not have the burden of showing actual dilution, but only likelihood of dilution. The Sixth Circuit agreed with Victoria's Secret that the Moseleys diluted its mark by tarnishment in violation of the TDRA. ⁿ¹³³ The Sixth Circuit created a presumption that if the junior mark is used to "sell sex [*167] related products, [it] is likely to tarnish a famous mark if there is a clear semantic association between the two." ⁿ¹³⁴

The *Moseley II* decision was not unanimous. Judge Moore's dissenting opinion argued that Victoria's Secret did not provide sufficient evidence that Victor's Little Secret would tarnish its mark. She agreed that there is a clear association between the marks. She felt the significant question is whether that association is likely to harm Victoria's Secret's reputation. She felt that Victoria's Secret failed to show that it would be harmed. ⁿ¹³⁵

Judge Moore's dissent shows respect for the Supreme Court's reasoning in *Moseley I* and recognizes the exact change that the TDRA made to the Supreme Court's holding without making inferences and/or presumptions that may affect First Amendment law. The majority opinion created a new speech censorship law by misinterpreting tarnishment and the TDRA. Both the senior and junior mark holders are effectively "selling sex," which perhaps should have been explained in the opinion. The Sixth Circuit cited eight cases from various circuits that found tarnishment when the similar sounding junior mark was "used to sell sex-related products." ⁿ¹³⁶ But the dissent answered that none of those eight cases involved both senior and junior mark holders being in the business of selling sex, which is the situation here. ⁿ¹³⁷ Besides, the TDRA [*168] says nothing about sex related products, so there would be no reason for the majority to create a presumption of tarnishment if the subject involves sex. The *Moseley II* decision goes beyond the language of the TDRA and limits First Amendment sexual content speech. It does not appear that Congress intended that result when it enacted the TDRA.

2. Charbucks

In *Starbucks Corp. v. Wolfe's Borough Coffee, Inc.*, ⁿ¹³⁸ a New Hampshire coffee company Black Bear Micro Roastery marketed dark roasted coffee it called CHARBUCKS. ⁿ¹³⁹ Black Bear's trade dress was dissimilar to Starbucks', so there was little likelihood of confusion. Starbucks requested that Black Bear cease marketing CHARBUCKS, Black Bear declined, and Starbucks filed suit claiming trademark infringement, federal dilution, state dilution, and state unfair competition. ⁿ¹⁴⁰

The litigation resulted in seven judicial decisions, six of which are briefly summarized hereafter. During the twelve years of this litigation, the statutory law changed; the 1995 FTDA was replaced by the 2006 TDRA. In 2005, Judge Swain ruled in favor of Black Bear on the following claims: federal trademark infringement, federal unfair competition, federal trademark dilution, state trademark dilution, and unfair [*169] competition under the common law. ⁿ¹⁴¹ (Starbucks I) The Second Circuit remanded for Judge Swain to apply the TDRA (Starbucks II). ⁿ¹⁴² Judge Swain applied the TDRA and found for Black Bear on all counts (Starbucks III). ⁿ¹⁴³ Starbucks again appealed and the

Second Circuit, while seemingly agreeing with Judge Swain's application of the law, affirmed in part, vacated in part, and remanded once again (Starbucks IV).ⁿ¹⁴⁴ The Second Circuit did determine that the TDRA changed the law and it clarified how the TDRA limited use of the parody defense in dilution claims.ⁿ¹⁴⁵ In Starbucks V, Judge Swain corrected the law, as directed by the Second Circuit, but continued to hold for Black Bear.ⁿ¹⁴⁶ Starbucks appealed yet again. In Starbucks VI, the Second Circuit affirmed Judge Swain's prior opinion, not even mentioning parody, and finding that Starbucks had the burden of showing likelihood of dilution and it had not done so.ⁿ¹⁴⁷ The Starbucks VI opinion reviewed the prior five opinions and explained the Second Circuit federal dilution law under the TDRA's blurring factors.ⁿ¹⁴⁸ The reasoning by both the district court and the Second Circuit were reflective of prior case law and provided courts with a clear interpretation of how the TDRA and its limited recognition [*170] of parody should fit into future judicial analyses. It also explored what the senior mark holder must show to make a case for "likelihood of dilution."

3. Chewy Vuiton

A 2007 Fourth Circuit decision *Louis Vuitton Mallatier (LVM) v. Haute Diggity Dogg*,ⁿ¹⁴⁹ was similar to the Charbucks opinion in its broad strokes, but different in specifics. LVM added copyright infringement to its state and federal trademark, dilution, and unfair competition claims.ⁿ¹⁵⁰ Haute Diggity Dogg sold dog toys and other pet supplies. The toys parodied famous designers and people, like Vincent van Gogh.ⁿ¹⁵¹ The toy that bothered LVM was CHEWY VUITON, a parody of a Vuitton purse, but clearly a toy. The court interpreted and applied the TDRA. It agreed with the district court's findings of no trademark infringement and no dilution, but used different reasoning than the trial court.ⁿ¹⁵²

The court recited the judicial definition of parody, which is not defined in statutory law. For trademark purposes, "[a] 'parody' is defined as a simple form of entertainment conveyed by juxtaposing the irreverent representation of the trademark with the idealized image created by the mark's owner. ... A parody must convey two simultaneous--and contradictory--messages: that it is the original, but also that it is *not* the original and is instead a parody."ⁿ¹⁵³ This second message must not only differentiate the alleged parody from the original but must also communicate some articulable element of satire, ridicule, joking, or amusement. Thus, "[a] parody relies upon a difference from the original mark, presumably a humorous difference, in order to produce its desired effect."ⁿ¹⁵⁴

The Fourth Circuit found CHEWY VUITON was a parody.ⁿ¹⁵⁵ There was not a likelihood of confusion for trademark infringement.ⁿ¹⁵⁶ On the dilution claim, the court wisely explained that even if the parody is used commercially and is not protected by the TDRA's non-commercial parody defense, courts may still consider the junior mark [*171] holder's general right to parody the senior mark.ⁿ¹⁵⁷ The drafting of the TDRA to include a very limited parody fair use defense in only non-commercial uses by the junior mark holder could have been interpreted as Congress' intent to expand dilution to commercial parodies. This opinion demonstrates how courts will preserve First Amendment speech rights even when a statute does not so provide. This opinion paves the way for continued protection of the junior mark holder's right to associate its mark with the senior mark holder as a form of social commentary or even mere entertainment.

The rest of the post-TDRA cases are from district courts.

4. NAACP

In *Radiance Foundation, Inc. v. National Association for the Advancement of Colored People (NAACP)*,ⁿ¹⁵⁸ plaintiff Radiance, an anti-abortion group, was denied declaratory judgment and found to be liable for trademark infringement and dilution of the NAACP's trademark when it published on its website articles using the name "National Association for the Abortion of Colored People."ⁿ¹⁵⁹ The court found likelihood of confusion over use of the imitative name.ⁿ¹⁶⁰ Successful parody should not confuse the public, so the court decided this was not a parody, hence not entitled to protection as such.ⁿ¹⁶¹ It also found dilution by tarnishment because the use of the name "insinuates a stance of abortion that the NAACP has deliberately avoided."ⁿ¹⁶² Radiance claimed a First Amendment right to say

what it thinks about abortion. The court agreed, but said it could not lie or mislead about what the NAACP says about abortion. ⁿ¹⁶³ So it was tarnishment by misleading the public that the NAACP takes any stand on abortion, which it does not. ⁿ¹⁶⁴ The court used the TDRA's limitation on [*172] parody to non-commercial uses of a senior mark to find for the NAACP; it said Radiance was making a commercial use of the mark, so the TDRA's parody defense would not work here. ⁿ¹⁶⁵ That holding could be interpreted as the Tenth Circuit banning trademark parody that is commercial. Hopefully the case will not be used in this manner, but only to explain that commercial uses of a senior mark can be made by non-profit groups. ⁿ¹⁶⁶ A further problem with the court's reasoning is that it found both infringement and dilution, when others realize that the senior mark holder should not have a cause of action for dilution if it already has shown infringement through likelihood of confusion.

5. *THE SITUATION* v. *THE FITCHUATION*

In *MPS Entertainment, LLC v. Abercrombie & Fitch Stores, Inc.*, ⁿ¹⁶⁷ Abercrombie & Fitch (A&F) had requested that Michael "The Situation" Sorrentino, a character in MTV's *Jersey Shore*, cease wearing A&F clothes on the TV show. At the same time A&F had been marketing a parody t-shirt that it called the FITCHUATION, making fun of the actor's self-styled name THE SITUATION. A&F alleged the show depicted the characters "in an unwholesome view" ⁿ¹⁶⁸ that reflected poorly on the A&F reputation. A&F had even offered to pay the actors not to wear A&F clothes. ⁿ¹⁶⁹ Sorrentino sued A&F for trademark infringement and dilution under federal and state law. The court entered summary judgment in favor of A&F's parodic t-shirt. This would be a weak case for dilution since THE SITUATION may not be sufficiently famous to obtain federal dilution protection.

6. *Louis Vuitton* v. *Hyundai*

In *Louis Vuitton Malletier (LVM) v. Hyundai Motor America*, ⁿ¹⁷⁰ Hyundai aired a TV commercial that "poked fun at these symbols of 'old' luxury to distinguish them from [Hyundai] in an effort to challenge consumers to rethink what it means for a product to be luxurious." ⁿ¹⁷¹ One of the symbols of old luxury was a "basketball decorated with a distinctive pattern resembling the famous trademarks of plaintiff...." ⁿ¹⁷² LVM sued for dilution under state and federal law, infringement under federal law, and unfair competition under state law, claiming a right to money damages for "willful dilution." ⁿ¹⁷³ The Hyundai designers claimed they were not parodying LVM, but were "challeng[ing] consumers to rethink what it means for a [*173] product to be luxurious." ⁿ¹⁷⁴ That made the purpose satire rather than parody, which the court assumed is not protected by the First Amendment in a trademark dilution claim. One interpretation of the court's decision is that making a social comment on old wealth and luxury as compared to the trendy new auto being advertised was not a fair use. ⁿ¹⁷⁵

This case is disturbing. An entertaining commercial was banned because Hyundai used references to famous marks to make a comment to consumers on Hyundai's Sonata being luxurious in a different way than traditional luxury. The case is similar to the hypothetical DUMB STARBUCKS in that Fielder was not parodying Starbucks, but was at most making a satiric comment on trademark parody law. The value system espoused by this Second Circuit court comes dangerously close to being censorship; people watching the commercial may make a subtle association between Hyundai and LVM, but they certainly would not be confused by seeing a basketball decorated like a LVM purse. The use of the basketball image would not likely dilute LVM's trademark, even though consumers might associate LVM with Hyundai.

7. *Elf on the Shelf* v. *Elf off the Shelf*

In *CCA and B, LLC v. F + W Media Inc.*, ⁿ¹⁷⁶ defendant made an adult parody of plaintiff's children's book. Plaintiff claimed trademark infringement and dilution, plus six other state and federal related claims. ⁿ¹⁷⁷ The court determined the issue was merely whether "it is likely that the average consumer of Plaintiff's book...will be confused by the similarity of the book covers of THE ELF ON THE SHELF and Defendant's purported parody, THE ELF OFF THE SHELF." ⁿ¹⁷⁸ It is unclear whether the court recognized that dilution does not need a showing of likelihood of confusion by consumers. It did deny the plaintiff's motion for preliminary injunction. ⁿ¹⁷⁹ And it did comment on

plaintiff's dilution claims. "Plaintiff cited an article in *Publisher's Weekly* that reported that Elf Off is intended to 'knock a holiday favorite off its perch.' ... Defendant agrees that is precisely their goal, but says there is nothing naughty about it." ⁿ¹⁸⁰ Notably, the opinion combined a fair use in copyright claim and analysis in its opinion. ⁿ¹⁸¹ Without delving into whether the TDRA has altered parody considerations in trademark dilution claims, the court chose to protect parody under First Amendment free speech values. "With regard to the public interest, both trademark and copyright law offer protection for parodic use of IP, consistent with the strong public interest in protecting free speech and expression. Thus, in a case presenting a [*174] parody that criticizes an original work, the public interest in protecting that expression is of the highest level." ⁿ¹⁸²

8. *Protect Marriage*

In *ProtectMarriage.com v. Courage Campaign*, ⁿ¹⁸³ plaintiff political group promoting marriage as only unions between heterosexual couples had a logo depicting a four person heterosexual family. Defendant political group promoting legalization of same sex marriage had a similar logo that showed a four person family with same sex parents. ⁿ¹⁸⁴ The court protected defendant's use of plaintiff's logo as a parody. ⁿ¹⁸⁵ The case did not use the TDRA, perhaps because the mark is not sufficiently famous to support a dilution claim.

9. *Lettuce Entertain You*

In *Lettuce Entertain You Enterprises, Inc. v. Leila Sophia AR, LLC*, ⁿ¹⁸⁶ plaintiff LEYE, a Chicago business, used LETTUCE marks to identify its restaurant and catering businesses. ⁿ¹⁸⁷ Defendant named its Chicago restaurant Lettuce mix and was asked to remove the sign by LEYE. Defendant replaced the sign with a banner saying "Let us be!" and a lettuce head image, and LEYE sued. The banner was permitted to remain and the court dismissed the suit. ⁿ¹⁸⁸ The defendant made an effective use of parody. It may develop in dilution and infringement cases that the courts take one more analytical step considering the junior holder's purpose for using the mark, with highly protected speech like political, social, and artistic being more protected against a trademark infringement or dilution claim. This is similar to Fielder's argument and he called his shop art.

10. *Hershey*

In *The Hershey Company v. Art Van Furniture*, ⁿ¹⁸⁹ defendant, advertising for its furniture store, placed an image of a sofa being unwrapped from a candy wrapper on the side of the furniture company's delivery truck. There was no likelihood of confusion [*175] by consumers. The court found presumptively dilution by blurring and granted a preliminary injunction. ⁿ¹⁹⁰ The court applied *Moseley II* to explain its reasoning.

This case is similar to *Lettuce*, *Hyundai* (summaries above) and other cases dealing with advertising and using consumers' mental associations to sell one's own product. These cases are problematical because they are not necessarily parodic of the senior mark holder; they merely create a mental association between the marks. They use the senior mark to entice consumers by association. But to stop junior mark holders from being able to do so by creating a cause of action for tarnishment or blurring will make the world a more boring place. It is illogical that one can use parody to protect junior marks that are mean, but not ones that create a cheerful association. ⁿ¹⁹¹ The court blurred dilution law when it justified its decision to find dilution by referencing likelihood of confusion consumer protection. ⁿ¹⁹² Dilution law is not established to protect consumers, but to protect the famous mark. Here the HERSHEY mark was not blurred or tarnished.

11. *BUTTWIPER*

In *Anheuser-Busch, Inc. v. VIP Products, LLC*, ⁿ¹⁹³ the court found a dog toy named BUTTWIPER infringed the Budweiser mark, relying on survey evidence of likelihood of confusion between the toy and Budweiser beer. There have been other dog toy cases with the result that one can name its dog toy LOUIS' CHEWIES, TOMMY HOLEDIGGER, BARKBURY, and MANOLO BARKNIK, but not BUTTWIPER. ⁿ¹⁹⁴ The court applied the Eighth

Circuit's interpretation of trademark parody law which is more protective of the senior mark holder and less protective of the First Amendment and parody. It found trademark infringement, but not dilution. ⁿ¹⁹⁵ There are definitely litigation costs and issues of lack of consistency in law when it comes to marketing parodic dog toys.

12. NAKED COWBOY

In *Burck v. Mars*, ⁿ¹⁹⁶ the Naked Cowboy Times Square street performer sued Mars for its "animated cartoon advertisement on two oversized video billboards in Times Square, featuring a blue M&M dressed exactly like The Naked Cowboy, wearing only [*176] a white cowboy hat, cowboy boots, and underpants, and carrying a guitar." ⁿ¹⁹⁷ It was actually a right of publicity case, but NAKED COWBOY is a trade name and M&M claimed parody, so the facts are relevant. M&M was permitted to keep the billboard and the Naked Cowboy still plies his trade, all in Times Square. ⁿ¹⁹⁸

The court used copyright parody law and applied it in a trademark parody case, which might be appropriate for Fielder regarding his DUMB STARBUCKS. He claimed the shop was a work of art, so he was moving into the copyright realm, or at least not distinguishing between the two. The only difference remaining is whether DUMB is parodic; the Naked Cowboy M&M satisfied the court's requirements to be a parody.

13. Wal-Mart

In *Smith v. Wal-Mart Stores, Inc.*, ⁿ¹⁹⁹ Smith used terms such as WALOCAUST to criticize and make fun of Wal-Mart on web-sites he created for that purpose. ⁿ²⁰⁰ He sold t-shirts through a site managed by CafePress called WAL-QAEDA. ⁿ²⁰¹ The court held the words were parodies ⁿ²⁰² and dismissed the suit. ⁿ²⁰³ On his website, Smith now includes a nice notice thanking the court in northern Georgia for allowing him to continue marketing his t-shirts and making fun of Wal-Mart. ⁿ²⁰⁴

Several of the opinions summarized had considered the law on determining the evidentiary value of survey evidence. The Wal-Mart court went into detail to review how the survey was done, what was asked, and whether the conclusions were accurate. ⁿ²⁰⁵ Surveys do not always fare well when the court applies legal logic to testing their evidentiary value. That happened here; the court found the survey was flawed in regard to proving likelihood of confusion. ⁿ²⁰⁶ Logically, people would not be confused as to source.

In *Smith v. Wal-Mart Stores*, the court also considered dilution by tarnishment. After summarizing what tarnishment is, the court wrote, "However, tarnishment caused merely by an editorial or artistic parody which satirizes [the complainant's] product or its image is not actionable under an anti-dilution statute because of the free speech protections of the First Amendment." ⁿ²⁰⁷ It could well be the same with DUMB STARBUCKS, even though it contains little redeemable social value.

It appears from the summaries of parody cases since 2006 when the TDRA became effective, some of the courts have continued to apply their prior legal understanding of parody's permissible use in trademark usage, while at least one circuit, the Sixth Circuit that decided *Moseley*, has decided not to protect parody if it has a sexual aspect [*177] to it. Appendix II summarizes the findings in the above thirteen trademark cases decided since 2006.

V. ANALYSIS/APPLICATION

Several law journal articles, both before and since passage of the TDRA, have explored similar problems in trademark as those identified in the DUMB STARBUCKS problem. This section summarizes and builds on some of the difficulties that have been identified. Scholars and the authors have suggested making changes to the law as well as ways to cope with the law as it is currently being administered.

A. Trademark Law Overprotects Famous Businesses

First, the current trademark law overprotects big businesses to the detriment of small ones. This is true of the TDRA which provides famous mark holders with a cause of action against junior mark holders for likelihood of dilution of the senior mark. Trademark law has also expanded protection in its topical protection, covering odors, colors, and more. ⁿ²⁰⁸ One legal scholar identified this increased legal power of the senior mark holder as a sort of incentivization to become a trademark bully. ⁿ²⁰⁹ The law encourages senior mark holders to police their marks vigorously. It is noticeable how diligently Starbucks polices its trademark while still presenting itself to the world as a highly ethical and socially responsible company. The legal system incentivizes Starbucks to police its trademark, or risk losing maximum protection. From Starbucks' viewpoint, it is enforcing its legal rights conscientiously. Yet to many people this behavior appears to be bullying, ⁿ²¹⁰ which seems unethical from a consuming public perspective.

[*178] *B. Junior Mark Holders Might Have Undue Expenses in Defending.*

Second, the junior mark holder has to bear the expense of defending a claim when it may not have the financial ability to defend against the often much larger senior mark holder. Defending against a dilution claim under the Lanham Act is by definition defending against a large, well known, and probably wealthy senior mark holder. Such companies are able to spend substantial amounts of money to police their marks. If those who would push back at the expansive boundaries of the senior mark holder's right to stop a junior mark holder from parodying the senior mark are not financially able to do so, the law will become one-sided.

Law professor and intellectual property attorney Leah Grinvald suggested that one tool to push back against bullying senior mark holders is shaming. ⁿ²¹¹ She summarized a case where the "little guy" stood up to the "big guy" and is still using his mark. It was not a parody case, but her advice might have broad applicability. She identified the senior mark holder's behavior as bullying ⁿ²¹² and condemned it as economically damaging. ⁿ²¹³

Law professor William Gallagher traced the impact of cease-and-desist letters sent by senior mark holders. ⁿ²¹⁴ His findings indicated that the above described impression of the system's favoritism of the large senior mark holder is negatively impacting exercise of rights in trademark law, due to the expense of defending.

[P]rivate IP enforcement practices - primarily "cease and desist" letters and threats of litigation during the course of negotiations - are strategically used to settle disputes, often resulting in a target's decision to capitulate to the asserted IP claims. ... [N]on-meritorious trademark and copyright claims are indeed enforced successfully in many cases, thus substantiating the thesis that IP rights are over-enforced in practice under the radar of the courts and the formal legal system. ⁿ²¹⁵

Trademark law is in need of substantial reform with statutory guarantee of free speech rights rather than a statutory incentive for large, wealthy mark holders to bully smaller businesses. Self-help against big business practices may be advisable and **[*179]** later it is suggested that junior mark holders use internet resources to help them learn more trademark law and strategies to defend against senior mark holders' claims.

C. Terms and Concepts Should be Defined to Avoid a Chilling Effect of Unclear Law.

Third, the law may be having a chilling effect on junior mark holders asserting their rights due to its lack of predictability. Clarification of the law could include statutory

1. definition of parody,
12. guidelines for likelihood of confusion in trademark infringement, and
13. recognition of First Amendment rights to use senior marks for proper and creative purposes.

This section advocating defining crucial terms has two branches. One calls for further legislation and/or judicial lawmaking. The other is that the purpose for doing so is to promote uniformity and predictability in the law, two

qualities that are lacking in current trademark law. Improving predictability would decrease litigation and encourage parties to come to the bargaining table with a greater incentive to negotiate. ⁿ²¹⁶ Reducing the costs of compliance would help both government and individual litigants.

1. Definition of parody.

Many trademark courts use the definition of parody derived from the Supreme Court's copyright fair use case *Campbell v. Acuff-Rose*, ⁿ²¹⁷ where a musical parody was a fair use of the original owner's song *Pretty Woman*. The Court defined parody as "the use of some elements of a prior author's composition to create a new one that, at least in part, comments on that author's works." ⁿ²¹⁸ David Simon, Fellow, Project on Law and Mind Sciences, Harvard Law School, in his article on trademark's "confusion trap," summarized parody from *Campbell*:

Parody, the Court stated, was a form of comment or criticism that ridicules the original work by, for example, mimicking its style. It can be distinguished from satire, which does not target the original work but instead uses it as a vehicle to express some other (perhaps critical) message. The Court reasoned that parody had a greater claim to fair use than satire. Parodists require the original works to make their comment or criticism. Satirists, on the other hand, have a weaker claim because they are not commenting or criticizing directly the work they use. ⁿ²¹⁹

[*180] The parody/satire distinction recognized in copyright does not seem workable in trademark law and it causes defendants and courts to work hard to characterize the work as a parody. ⁿ²²⁰ The senior mark holder in a trademark dilution situation is famous by definition, so calling the mark to mind will represent consumerism at the very least. In trademark it makes sense to provide fair use, or noninfringement protection, to satiric works as well as to purely parodic works. ⁿ²²¹ So the *Campbell* definition is not adequate for trademark. ⁿ²²² Courts applying trademark law are not uniform in their interpretation of whether a use is parodic, satiric, and/or permissible. ⁿ²²³

In addition, a trademark use's status as a parody should not depend on the junior mark holder's intent, since similar situations would be treated differently based on one's state of mind and the care one used in documenting it. ⁿ²²⁴ But the use must be more than free riding or publicity seeking. For instance, in *Dallas Cowboy Cheerleaders* the mark was used for attention, not for parody or satire, so the use was not protected. ⁿ²²⁵ A parody should be protected even if it (1) is biting; (2) is directed or aimed at a favorite local or national company or person; or (3) expresses a position or view that is unpopular. ⁿ²²⁶ DUMB STARBUCKS may have been sufficiently biting, since the term dumb is somewhat pejorative.

The TDRA has incorporated parody, albeit without definition, into the defenses section of the dilution statute. ⁿ²²⁷ It creates a bright line for noncommercial parodies that are not used as source identifiers, saying they are permitted. ⁿ²²⁸ However, most parodic uses of a senior mark are probably done by a junior mark holder for commercial purposes and as its own source identification, a brand parody. ⁿ²²⁹ So the statute does not expressly help most junior parodic mark holders. ⁿ²³⁰ It makes sense to have legislation that clearly defines parody and then provides guidance for courts in analyzing the legality of a junior mark holder's parody under the particular circumstances of a case. This would promote uniformity and predictability in the law so that when a junior mark holder is considering making a parodic use of a senior mark, its legality will be more predictable. ⁿ²³¹

DUMB STARBUCKS is brand parody, although Nathan Fielder was not really building a brand. He was free riding in the sense that he was appealing to the Starbucks allure. But he was not really competing with Starbucks, but was making satiric comment on the use of another's trademark. An illustration of a truer brand parody was provided by Dogan & Lemley who used the pre-dilution case involving Lardashe jeans as a play on both Jordache and lard ass, a pejorative term for an overweight person who carries the excess weight in the buttocks. ⁿ²³² Since the case was decided before either of the federal dilution statutes, it may not be decided in the same way today. If it would be, its similarity to DUMB STARBUCKS is that it makes fun of overweight people as much as it parodizes the Jordache brand. Similarly, DUMB STARBUCKS makes fun of the inanity of the law as much or more than it parodizes Starbucks. It appears from

the parody cases since 2006, when the TDRA became effective, that some courts have continued to apply their prior legal understanding of parody's permissible use in trademark, but the Sixth Circuit that decided *Moseley* has decided not to protect brand parody with sexual connotations.

Dogan & Lemley's analysis would permit satiric uses of the senior mark even with the strong TDRA dilution statute. They noted that in trademark parody cases, many courts dwell less on whether the parody meets some criteria than on whether there is likelihood of confusion or dilution. If the court finds the use is neither likely to cause confusion nor dilution, then the junior user's parodic use is generally, but not always, permitted. ⁿ²³³

[*182] 2. *Guidelines for likelihood of confusion in trademark infringement*

Courts seem to use the concept of consumer confusion for infringement and dilution, even though it is not an element of dilution. The TDRA says:

the owner of a famous mark that is distinctive...shall be entitled to an injunction against another person who...commences use of a mark...that is likely to cause dilution...regardless of the presence or absence of actual or likely confusion, of competition, or of actual economic injury. ⁿ²³⁴

The reference to "likely confusion" in the TDRA indicates that a court can find a junior mark holder liable for both trademark infringement and dilution. McCarthy, on the other hand, suggests that if a court has found trademark infringement, it has no reason to further consider dilution, since the court has already found for the senior mark holder. ⁿ²³⁵ Dilution is to be considered when there is no likelihood of confusion, but the senior mark holder asserts it is likely to be harmed in either the distinctiveness of the mark or in its reputation (blurring or tarnishment). Therefore, the following analysis of confusion relates primarily to when the senior mark holder alleges trademark infringement rather than dilution.

Confusion will often be irrelevant in a well-crafted parody because one of the messages that a parody conveys is "that it is *not* the original and is instead a parody." ⁿ²³⁶ A senior mark holder is not likely to create a parody of its own brand and most consumers recognize this. However, a court should consider confusion and it can be a determining factor (1) where a parodist intends to confuse the public, (2) the marks are confusingly similar, or (3) confusion actually results. Courts could narrow their interpretation of confusion by first determining who the relevant audience is for the confusion test. ⁿ²³⁷ Two products in different markets can use similar names without unduly confusing potential purchasers, like LEXIS and LEXUS. The *Hormel* court recognized that Jim Henson's Spa'am product was a movie and Hormel's Spam product was canned meat. ⁿ²³⁸ In *DUMB STARBUCKS'* case, a court might determine that Fielder's product was a comedy show and Starbucks' product was coffee and pastries. But courts might erroneously define the relevant market; the *Mutual of Omaha* court said that since the insurance company Mutual of Omaha also produced and sold t-shirts and Novak also sold t-shirts with his Mutant of Omaha image, that they were in the same market. ⁿ²³⁹ Clearly they were not selling t-shirts in competition with one **[*183]** another. Consumers who saw Mutant of Omaha t-shirts would not believe that the shirts were produced by Mutual of Omaha. ⁿ²⁴⁰

A tangential problem regarding proof of likelihood of confusion is judicial confusion over the probative value of surveys. The problems with determining the probative value of surveys is beyond the scope of this article, other than to suggest that legislation dictating what survey evidence is probative would put marketing specialists on notice of the legal and logical standards courts will apply to determine whether the survey will be probative in court.

3. *Recognition of First Amendment rights to use senior marks for proper purposes.*

The next section suggests that courts should more consistently consider First Amendment rights of the junior mark holder. In addition, Congress should recognize freedom of speech in commercial settings in the trademark statute sections that recognize junior mark holder defenses, such as in the TDRA and for general trademark infringement. When it statutorily recognized the limited parody defense (exclusion) under the TDRA, this was a first step in

legislative recognition of free speech rights guarded in the U.S. Congress could further recognize the public's free speech rights in trademark situations, since the legislative purpose is to provide for the common welfare, not just wealthy and famous trademark holder's rights to stop others from inappropriately referencing the senior mark. Meanwhile, as the next section indicates, the courts tend to raise First Amendment considerations when considering trademark infringement and dilution claims, as evidenced in the case summaries provided above.

D. Commercial and Brand Parody Should Have Broader First Amendment Protection than that Expressed in the TDRA.

Courts should consider broader First Amendment protections for the junior mark holder to use the senior mark even when the junior mark is not a true parody. In dealing with free speech in *Hustler*, a defamation case involving free speech and parody, the Supreme Court said that refusing to protect "outrageous" speech is not an acceptable standard.

Outrageousness in the area of political and social discourse has an inherent subjectiveness about it which would allow a jury to impose liability on the basis of the jurors' tastes or views, or perhaps on the basis of their dislike of a particular expression. An "outrageousness" standard thus runs afoul of our longstanding refusal to allow damages to be awarded because the speech in question may have an adverse emotional impact on the audience. ⁿ²⁴¹

If outrageousness is not a suitable standard for tort law, it is equally unsuitable for trademark dilution actions. *Hustler* is particularly important to consider in light [*184] of the Sixth Circuit's holding in *Moseley II* that if the junior mark involves a sexually related association, it will be presumed to be diluting of the senior mark. ⁿ²⁴²

In commercial parodies generally the parties are two commercial enterprises, although they may not be of the same size; the First Amendment protects even commercial speech, although to a lesser extent than ideological speech. ⁿ²⁴³ DUMB STARBUCKS involves commercial speech, even though Fielder gave away the coffee, since it was a sort of advertisement for his comedy show. But regardless of the commercial nature, the intent of the parodic use to entertain the public should be protected.

[T]he correct question is not whether speech is commercial or not, but whether it is commercial to such an extent as to overwhelm the underlying parody. ... [I]t is virtually unimaginable, particularly in dilution actions, that commercial purpose ever overwhelms the parody, *provided the parody is genuine*. Courts should begin by looking at whether the defendant has a genuine parody, not whether the parody is primarily commercial. ⁿ²⁴⁴

Of course, as previously mentioned, the law should restrict free riding that claims to be a parody. ⁿ²⁴⁵

In conclusion, trademark law would benefit by an explanation of what parody is in the context of trademark. It is not the same thing as it is in copyright law. What copyright law might call satire and for which it might be inclined to provide less fair use protection is not necessarily desirable in trademark law. Having a better explanation of tarnishment, how it is distinct from blurring, would be helpful as well. It may result in courts discovering that what might be thought of as tarnishment is merely parody and should still be protected as a type of brand parody. Second, while this area of law is notoriously unpredictable, the law could be made more predictable by statutory descriptions of what is fair use, parody, tarnishment, and the like. The authors also suggest removing the cause of action for dilution altogether or balancing it with a statute that literally says courts and the law must protect reasonable First Amendment rights to use others' trademarks, even when doing so might be offensive to the court, to the senior mark holder, and/or to some members of the public.

In an area of law involving ordinary business usage such as trademark, making the law more predictable and uniform is desirable. The legislature and courts should create a clear definition of parody that is practical, consistent, and easy to operationalize. The advantages of a clear definition are that it would:

1. Encourage businesses to play by the legal rules and not engage in excessive trademark policing,

2. Discourage trademark bullying,
3. Discourage socially undesirable litigation which is expensive to the individuals and the taxpayers who fund the legal system,
- [*185] 4. Encourage good faith participation in settlement conferences and alternate dispute resolution,
5. Provide a disincentive for free rider behavior, and
6. Encourage free speech, because the mere threat of litigation can have a chilling effect on speech as the Supreme Court noted in *New York Times v. Sullivan*.ⁿ²⁴⁶

E. The Internet is a Good Tool to Educate Junior Mark Holders and the Public and to Help Protect Freedom of Expression.

Fifth, the courts should reassess fair use and broaden its application in trademark law. In Fielder's case the parody was so dumb that courts might be inclined to deny protection. Starbucks was not injured by his prank and the public was amused. There was a net social gain by his use of DUMB STARBUCKS. Yet the law of dilution is so ill-defined that predicting what a court might do is difficult. Is there protection for dumb parody? Courts and legislature could create a new defense based on the public's right to have fun with famous marks so long as the famous mark is not severely injured, even though the senior mark holder may be offended. This area in particular is problematical under the current trademark enforcement system where the majority of enforcement is done without involving the judicial system, according to law professor William Gallagher's interviews with IP lawyers, which revealed that the majority of trademark issues are handled through cease-and-desist letters and never reach the courtroom.ⁿ²⁴⁷

While preparing the DUMB STARBUCKS story as a teaching case where the students would use online searches to find the law, the authors discovered that a large amount of useful and correct trademark law information is easily available online. This is an area of law where the lay public has a strong interest in the development of the law and the resolution of disputes. The online sites could help lay junior mark holders make informed decisions on whether to parody/satirize a famous mark or not and to help the junior mark holder defend itself against at least the initial stages of a claim by a famous senior mark holder. The Legal Information Institute at Cornell, the U.S. government, law firms, and the Berkman Center for Internet and Society provide the public with solid basic information and with explanations of where the law is inconsistent from circuit to circuit.

However, lay users' comments on the status of IP law are not always accurate. But overall, the internet makes it easier for individuals to perform basic trademark searches and to avoid infringement.ⁿ²⁴⁸ For instance, the parodic t-shirt industry [*186] through online marketing is huge, and those who design parodic t-shirts can take advantage of their First Amendment free speech rights, being able to more accurately predict whether the use might cross the line into commission of trademark and/or copyright infringement. While DUMB STARBUCKS was not an internet marketing device, Nathan Fielder took advantage of the internet to publicize his actions. He used all the media forms that would acknowledge his antics to make his comedic (and sincere) digs on parody in trademark usage. He had a hard copy of a document called Frequently Asked Questions at the establishment and posted it on his website. While the law contained in it might have been erroneous, his use of the internet enhanced the social impact of his prank. In conclusion, an internet site and a junior mark holder defense fund are good modern methods to protect First Amendment freedoms in the face of legislation designed to protect interests of famous senior mark holders with no corresponding protections for junior mark holders who would fairly engage in brand parody.

Self-help through educating oneself about trademark law, is available through online sources. There are several good internet sources, including Harvard's, Stanford's, and Cornell's IP websites.ⁿ²⁴⁹ In addition, often law firms provide basic information online for free, but one would have to pay for legal services. Another possibility is to form a junior mark holder defense fund, similar to the Comic Book Legal Defense Fund created by the comics industry.ⁿ²⁵⁰

F. Inconsistency Among Circuits Makes the Law Unpredictable

Sixth, there is a lack of consistency among the circuits. The TDRA may have been developed to eliminate the variations and to guide the courts in a uniform interpretation of dilution under federal trademark law. But it has not. It would be helpful if the courts or the legislature would clarify the standard of proof issue raised [*187] in *Mosely II* after the TDRA was enacted. In *Starbucks VI* the court identified differences between itself, the Second Circuit, and both the Fourth Circuit and the Ninth Circuits. The *Vuitton* case was a Fourth Circuit dilution case which the Second Circuit refused to follow in its own dilution analyses. The Eighth Circuit finds dilution and infringement under factual circumstances that the other circuits most likely would not. The law should be predictable and consistent. In the case of parody in trademark law, it is not.

G. Congress Should Eliminate Dilution in Federal Law.

Finally, dilution is designed to protect famous marks from being diluted by folks who use the same mark to identify or name other products, for example, Buick aspirin, and Tiffany restaurant. The effect of the dilution right under trademark law is to remove the word TIFFANY from the trademark marketplace for anything other than one jewelry store. Through the reputation of the jewelry store, the word TIFFANY has come to mean elegance and expense, to have a secondary meaning to the public. While some argue that allowing a junior mark holder to capitalize on the senior mark's reputation to cause the public to associate anything named TIFFANY to be elegant and expensive, the likelihood that a poor quality restaurant named TIFFANY, assuming there is no likelihood of confusion (which there was in the actual case), will dilute the reputation of the jewelry store is not great. Hence, dilution has little use under the U.S. trademark system, which is designed to be a consumer protection law rather than a third IP system.

Besides, TIFFANY is also the name associated with Art Deco style stained glass works, especially lamps. It so happens that a father and a son named their various creative craft works after themselves. ⁿ²⁵¹ Which TIFFANY should have a right to sue to stop a restaurant from calling itself TIFFANY? Does the son's business name dilute the father's reputation for elegance and expense? The rights to a trademark in a name, while relevant here, is a larger topic than can be dealt with in this article.

Law professor Sandra Rierson in *Myth and Reality of Dilution* ⁿ²⁵² advanced three claims regarding the disadvantages of dilution:

First, dilution statutes incorrectly assume that the source-identifying function of a trademark is akin to a rivalrous good (a good that is dissipated by use). If marks are nonrivalrous and therefore function more like words than disposable goods, the economic justification for the dilution cause of action ceases to exist. Second, even if diluting but noninfringing uses of famous trademarks do impair the source identifying capacity of some marks, the social and transaction costs imposed by dilution law still [*188] outweigh the harm that it is designed to avert. Dilution claims inflict anticompetitive burdens and, as a result, may entrench dominant (often oligopolist) firms at the expense of market entrants. ... Finally, the true foundation for dilution law lies in the misplaced fiction of corporate personality, not in alleged economic harms. ... Instead, we have granted the holders of famous trademarks the equivalent of a moral right to these marks: an extension of the rights granted to a creator of an expressive work in the copyright context.

All three points dictate against continued federal protection of dilution claims. Perhaps the lack of logical justification for dilution is part of the reason that courts are not really able to distinguish between blurring and tarnishment and so are using blurring where most would first think of tarnishment. ⁿ²⁵³ Also, under the current business economic climate, courts and the legislature should be encouraging competition in the marketplace, not squelching it through laws that protect the status quo. Hence, the TDRA is an undesirable law because it is based on mistaken assumptions about the use of trademark in U.S. law and society. It is an attempt to incorporate personal property concepts into a legal area that under U.S. law lacks that purpose.

Appendix III is a decision tree that provides a logical approach for courts considering a purported parody by a junior mark holder and deciding whether to grant an injunction against the junior mark holder's use as an infringement or a dilution in violation of trademark law. The actual analysis is more complex than the diagram since courts can and

should consider fair use, parody, and other First Amendment defenses under both trademark infringement (not specified in the diagram) and under dilution.

VI. CONCLUSION

The law is constantly balancing competing interests. In trademark law, the interests include: (1) the property rights of the senior mark holder who created the mark and invested in it so that consumers would associate the mark with the senior mark holder's goods and services; (2) the free speech rights of the members of the public who want to use the mark to communicate to others; (3) members of the public who would receive the communication; and (4) the rights of consumers to know the authentic purveyor of the goods and services available for purchase. It is beneficial to society to encourage both commentary and public discourse and also to encourage creativity.

[*189] Nathan Fielder claimed that DUMB STARBUCKS was a parody, and as such was entitled to a legal defense in a trademark infringement or dilution claim by Starbucks, the owner of the STARBUCKS mark. Whether his assertion is true on either or both counts is far from clear based on examination of trademark statutory law, parody cases, and scholarly reviews of trademark regarding dilution and parody, all of which reveal that the law is not settled. Nathan Fielder's defense might win in one court and lose in another court. Minor statutory changes and additions could be made to make judicial outcomes more predictable for junior mark holders trying to parody a famous mark holder and to satirize the status of the law, so that they would know whether they might be liable for trademark infringement, dilution, or another unfair competition claim.

The question remains whether DUMB STARBUCKS would constitute a parody. Is it really a parody/satire or just a publicity stunt to gain attention for Nathan Fielder's television show? Would this be dilution by tarnishment or blurring? Could Starbucks successfully argue both? A trademark parody should be protected if the trademark is relevant to the point being made by the parodist. In many cases, this would require an analysis by the decider of fact. Somewhat more precise legislative guidelines might be helpful to courts making the decisions. The parodist should not be allowed to use a trademark just to get public attention at the expense of the trademark holder when the trademark is irrelevant to his or her point. ⁿ²⁵⁴ The legal system should not encourage that sort of free riding on the trademarked image. ⁿ²⁵⁵ Was Fielder a free-rider or an entertaining comic?

[*192] FREQUENTLY ASKED QUESTIONS

Is this a Starbucks?

No. Dumb Starbucks is not affiliated in any way with Starbucks Corporation. We are simply using their name and logo for marketing purposes.

How is that legal?

Short answer - parody law.

Can you elaborate?

Of course. By adding the word 'dumb', we are technically "making fun" of Starbucks, which allows us to use their trademarks under a law known as 'fair use'. Fair use is a doctrine that permits use of copyrighted material in a parodical work without permission from the rights holder. It's the same law that allows Weird Al Yankovic to use the music from Michael Jackson's "Beat It" in his parody song "Eat It".

So is this a real business?

Yes it is. Although we are a fully functioning coffee shop, for legal reasons Dumb Starbucks needs to be categorized as a work of parody. So, in the eyes of the law, our 'coffee shop' is actually an art gallery and the "coffee" you're buying is considered the art. But that's for our lawyers to worry about. All you need to do is enjoy our delicious coffee!

Are you saying Starbucks is dumb?

Not at all, in fact, we love Starbucks and look up to them as role models. Unfortunately, the only way to use their Intellectual Property properly under fair use is if we are making fun of them. So the "dumb" comes out of necessity, not enmity.

Okay. I think I understand now.

Great. Anything else?

I guess not.

Okay thanks. See you later!

For any other questions, please contact us at DumbStarbucks.gmailcom.

Hershey	6/trial	*N, but...	N/A	Y
BUTTWI PER	8/trial	Y	N	N
NAKED COWBO Y	2/trial	Y	N	N
Wal-Mart	11/trial	N	N/A	N

Case	Parody	Comments
Moseley II	N/A	Victoria's Secret won.
CHARBU CKS	Y	Starbucks lost.
CHEWY VUITON	Y	Louis Vuitton lost. Court discussed First Amendment defense in trademark law.
NAACP	N	NAACP won. Court added First Amendment as defense.
THE SITUATI ON	Y	A&F won. Court used "trademark fair use" without mentioning dilution. State dilution claim failed because plaintiffs mark was not distinctive.
Louis Vuitton v. Hyundai	N	Louis Vuitton won. Court denied fair use even though ad commented on Louis Vuitton products as representing luxury.
ELF ON THE SHELF	Y	Elf Off won. Court considered both copyright and trademark, treating parody separately under each claim. No dilution

		discussion.
Protect Marriage	Y	Defendant's parody of a heterosexual family won. Court used First Amendment and parody as one and did not mention dilution.
Lettuce Entertain You	Y	Defendant won. Court applied the "fair use" defense from 15 U.S.C. § 1115(b)(4), not from the TDRA.
Hershey	N	Hershey won on *trademark infringement even though there was no likelihood of confusion. The court said there was blurring and it was not a parody.
BUTTWI PER	N	Anheuser-Busch won on trademark infringement! Court relied on survey, which other courts had not used.
NAKED COWBO Y	Y	Defendant Mars won on motion to dismiss, not on merits. Mars claimed parody, First Amendment, and fair use.
Wal-Mart	Y	Plaintiff maker of WALOCAUST prevailed. Cause was for declaratory judgment. Majority of opinion is about viability of survey evidence.

n3 Tenny Tatusian, *Comedy Central's Nathan Fielder is Behind Dumb Starbucks*, L.A. TIMES (Feb. 10, 2014, 4:34 PM), <http://www.latimes.com/food/dailydish/la-dd--nathan--fielder--dumb--starbucks--story.html>.

n4 *Moseley v. V Secret Catalogue*, 537 U.S. 418, 433 (2003). The authors use "dilution" and "anti-dilution" interchangeably. Dilution gives one who has a famous mark a cause of action against a junior user whose use of the mark, even in the absence of likely causing consumers to be confused, blurs or tarnishes the senior mark. The concept was adopted in statutory form by about half the states, and since 1995 has been recognized in federal trademark statutory law.

n5 *I.P. Lund Trading ApS v. Kohler Co.*, 11 F. Supp. 2d 112, 114 n.3 (D. Mass. 1998). The authors use "senior mark" to denote the registered mark or the first use of the mark. "Junior mark" denotes the second and potentially infringing use. *Id.*

n6 Trademark Dilution Revision Act of 2006 (TDRA), Pub. L. No. 109--312, § 2, 120 Stat. 1730 (2006) (codified at Lanham Act 43 U.S.C. § 1125(c) (2006)). The TDRA replaced the Federal Trademark Dilution Act (FTDA) of 1995, Pub. L. No. 104--98, 109 Stat. 985 (1996) (repealed).

n7 See Ethan Horwitz and Benjamin Levi, *Fifty Years of the Lanham Act: A Retrospective of Section 43(a)*, 7 FORDHAM INTELL. PROP., MEDIA AND ENT L. J. 59, 59--60 (1996); Jennifer Files Beerline, *Anti-Dilution Law, New and Improved: The Trademark Dilution Revision Act of 2006*, 23 BERKELEY TECH. L. J. 511, 511 (2008) ("Federal [trademark] law provides famous trademark owners with power over and above traditional trademark protection.").

n8 15 U.S.C. § 1025(c)(3) (2012). The TDRA labels the defenses "exclusions."

n9 Admittedly, the definition of "commercial use" varies within the law. Nathan Fielder was reportedly giving the coffee away for free, so one might argue that it was a non-commercial use. The authors assume a business such as a store that provides coffee and pastries to customers, even without charging for the goods, is engaging in commerce. According to reports, the beverages were being given away free. See Rachel Zarrell, *People Are Waiting for Hours to Visit a "Dumb Starbucks" Coffee Shop in California*, BUZZFEED (Feb. 9, 2014, 4:30 PM), <http://www.buzzfeed.com/rachelzarrell/a--dumb--starbucks--coffee--shop--is--the--newest--craze--in--californ>. The L.A. County Health Department treated Dumb Starbucks as a commercial enterprise and ordered it to close, even though Nathan Fielder during his press conference called it an art installation. *Id.*

n10 See generally, Leah Chan Grinvald, *Shaming Trademark Bullies*, 2011 WIS. L. REV. 625, 641--652 (2011).

n11 See e.g., *Hustler Magazine v. Falwell*, 485 U.S. 46, 48, 56 (1988). While this article concentrates on trademark parody, the *Hustler Magazine* case illustrates the First Amendment privilege in defamation cases from a point of view that it is not receiving sufficient protection under the current interpretation of trademark law, that of parodic sexual speech. *Id.* at 46--47. *Hustler Magazine* published a parody "of an advertisement for Campari Liqueur that contained the name and picture of [Falwell] entitled 'Jerry Falwell talks about his first time.'" *Id.* at 48. It was "modeled after Campari ads that included interviews with various celebrities about their 'first times.'" *Id.* "Although it was apparent by the end of each interview that this meant the first time they sampled Campari, the ads clearly played on the double entendre of the sexual subject of 'first times.'" *Id.* Hustler drafted a fictitious interview with Falwell in which he stated that his "first time" was during a drunken incestuous rendezvous with his mother in an outhouse, suggesting that he was a hypocrite. *Id.* The ad contained the disclaimer in small print, "ad parody -- not to be taken seriously." *Id.* The Court concluded that public figures and public officials must show 'actual malice,' i.e., "knowledge that the statement was false or with reckless disregard as to whether or not it was true." *Id.* at 56. Famous people in the United States have no cause of action for parodic speech unless it is done maliciously. Yet First Amendment limitations might not be available to defend against famous companies who sue for dilution or trademark infringement.

n12 See Stacey L. Dogan and Mark A. Lemley, *Parody as Brand*, 47 U.C. DAVIS L. REV. 473, 485 (2013).

"Parody as brand differs from parody as product because the parody is being used as an indicator of source." *Id.* "Building a brand name around someone else's trademark looks, to some observers, like a classic case of 'free riding,' with the parodist taking advantage of the allure of the targeted brand." *Id.* "Trademark holders, not surprisingly, abhor the practice and sue to prevent it." *Id.*

n35 1 J. MCCARTHY, MCCARTHY ON TRADEMARKS AND UNFAIR COMPETITION § 2:20 (4th ed. 1997). "Good will and its symbol, a trademark, are inseparable. A trademark has no independent significance apart from the good will it symbolizes. If there is no business and no good will, a trademark symbolizes nothing."

n36 Stephen L. Carter, *The Trouble With Trademark*, 99 YALE L. J. 759, 764 (1990); see e.g., *Estate of Presley v. Russen*, 513 F. Supp. 1339, 1372 (D.N.J. 1981) (citing *Hanover Star Milling Co. v. Metcalf*, 240 U.S. 403, 413 (1916) in stating "the common law of trademarks is but a part of the broader law of unfair competition"); Daniel M. McClure, *Trademarks and Unfair Competition: A Critical History of Legal Thought*, 69 TRADEMARK REP. 305, 312 (1979).

n37 See generally, RESTATEMENT (THIRD) OF UNFAIR COMPETITION (2009).

n38 15 U.S.C. § 1051, et seq. (2012). The Legal Information Institute introduces the Lanham Act with the following description:

The Lanham Act, 15 U.S.C. § 1051, et seq., was enacted by Congress in 1946 based on the power granted to it by the Commerce Clause. It provides for a national system of trademark registration and protects the owner of a federally registered mark against the use of similar marks if such use is likely to result in consumer confusion, or if the dilution of a famous mark is likely to occur. The scope of the Lanham Act is independent of and concurrent with state common law.

Lanham Act, LEGAL INFORMATION INSTITUTE, http://www.law.cornell.edu/wex/lanham_act (last visited Jan. 23, 2015).

n39 *Id. See*, Lynda J. Oswald, "*Tarnishment*" and "*Blurring*" Under the Federal Trademark Dilution Act of 1995, 36 AM. BUS. L.J. 255, 269--270, n. 85 (1999). Oswald wrote that the legislative history of the FTDA of 1995 states that the federal statute does not preempt state dilution statutes. Since federal trademark law does not preempt state trademark and unfair competition law, it is different from copyright law where federal law preempts similar state law. *See* 17 U.S.C. § 301 (2013):

On and after January 1, 1978, all legal or equitable rights that are equivalent to any of the exclusive rights within the general scope of copyright ... are governed exclusively by this title. Thereafter, no person is entitled to any such right or equivalent right in any such work under the common law or statutes of any State.

n40 U.S. CONST., art. I, § 8, cl. 3.

n41 U.S. CONST., art. I, § 8, cl. 8 ("Congress shall have power ... to promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries.").

n42 Yet, trademark has IP aspects and is treated as IP in business law courses. The new dilution statute goes farther in treating trademark as IP in that it provides enforcement rights in the absence of consumer confusion, treating the trademark as property protectable by the mark holder.

n43 *Overview of Trademark Law*, *supra* note 34.

n44 TMEP, § 1209.01a (9th ed. Oct. 2012), *available at* <http://tmept.uspto.gov/RDMS/detail/manual/TMEP/Oct2012/TMEP--1200d1e6993.xml> (last visited June 15, 2014).

n45 *Id.*

n46 15 U.S.C. § 1114 (2012). For instance subsection (1) provides in part: "Any person who shall... use in commerce any...copy...of a registered mark in connection with the...distribution...of any goods or services on or in connection with which such use is likely to cause confusion... shall be liable in a civil action by the registrant for the remedies hereinafter provided." The remedies are injunction and money damages if the infringement is intentional. *Id.*

n47 See Appendix I and the websites noted therein.

n48 See Scot A. Duvall, *The Trademark Dilution Revision Act of 2006: Balanced Protection for Famous Brands*, 97 THE TRADEMARK REPORTER 1252, 1253 (2007). This is the official publication of the International Trademark Association (INTA). The author helped draft the TDRA.

n49 Frank I. Schechter, *The Rational Basis of Trademark Protection*, 40 HARV. L. REV. 813, 814 (1927).

n50 See Jordan M. Blanke, *Victor's Little Secret: Supreme Court Decision Means More Protection for Trademark Parody*, 13 FORDHAM INTELL. PROP. MEDIA & ENT. L.J. 1053, 1061 (2003) ("Significantly, the purpose behind anti-dilution laws is not to avoid consumer confusion, but rather, to promote a property-like interest in the mark itself.") In the 1940's states began enacting anti-dilution statutes. See Robert N. Klieger, *Trademark Dilution: The Whittling Away of the Rational Basis for Trademark Protection*, 58 U. PITT. L. REV. 789, 811 (1997):

Yet in 1947, just one year after enactment of the Lanham Act, Massachusetts adopted the first state anti-dilution statute, which provided: "Likelihood of injury to business reputation or of dilution of the distinctive quality of a trade name or trade-mark shall be a ground for injunctive relief . . . notwithstanding the absence of competition between the parties or of confusion as to the source of goods or services." Other states followed suit and by January 1996, when President Clinton signed the Federal Trademark Dilution Act into law, twenty-eight states had adopted identical or substantially similar anti-dilution statutes, and at least one state had recognized dilution as part of its common law. (citations omitted).

L.J. 469, 497 (2008); Patrick Emerson, *"I'm Litigatin' It": Infringement, Dilution, and Parody Under the Lanham Act*, 9 NW. J. TECH. & INTELL. PROP. 477, 478 (2011); Mathias Strasser, *The Rational Basis of Trademark Protection Revisited: Putting the Dilution Doctrine into Context*, 10 FORDHAM INTELL. PROP., MEDIA & ENT. L.J. 375, 406 (2000).

n51 Mark H. Anania, *Note: The Plight of Small Business Trademark Holders*, 59 RUTGERS L. REV. 565, 579, 588 (2007). States generally use one of the two model statutes included in the United States Trademark Association Model State Trademark Bill. It is unknown how the two model statutes differ from one another, which is beyond the scope of this article.

n52 Pub. L. No. 104--98, 109 Stat. 985 (1996) (codified at Lanham Act § 43(c), 15 U.S.C. § 1125(c) (Supp. II 1996), replaced by Pub. L. 109--312, 109th Cong., 120 Stat. 1731 (Oct. 6, 2006), codified at 15 U.S.C. § 1125(c) ("This Act may be cited as the "Trademark Dilution Revision Act of 2006".) For an excellent summary of the FTDA and the status of trademark law as of 1998, see Oswald, *supra* note 39.

n53 15 U.S.C. § 1125(c)(1) (2012). "... [T]he owner of a famous mark that is distinctive... shall be entitled to an injunction against another person who...commences use of a mark or trade name in commerce that is **likely to cause dilution** by blurring or dilution by tarnishment of the famous mark, regardless of the presence or absence of actual or likely confusion, of competition, or of actual economic injury." (emphasis added).

n54 15 U.S.C. § 1125(c)(2)(B) and (C) (2012):

(B) For purposes of paragraph (1), "dilution by blurring" is association arising from the similarity between a mark or trade name and a famous mark that impairs the distinctiveness of the famous mark.

(C) For purposes of paragraph (1), "dilution by tarnishment" is association arising from the similarity between a mark or trade name and a famous mark that harms the reputation of the famous mark.
Blurring is more specifically described by the statute's list of factors the court should consider when deciding whether blurring has occurred. Since tarnishment has only the bare definition without further factors a court should consider, it is more difficult to predict.

See e.g., Laura E. Little, *Regulating Funny: Humor and the Law*, 94 CORNELL L. REV. 1235, 1272 (2009):

[T]he general purpose of the tarnishment theory is to redress injuries caused by degrading a mark's positive associations and using it for "unwholesome or degrading goods or services." ... [C]ourts have found dilution by tarnishment where a defendant used a plaintiff's trademark in the context of humor based on bodily functions and drug culture as well as adult cartoons, websites, live entertainment, and movies. As in the infringement setting, tarnishment cases are unpredictable, with parodies on relatively uncontroversial subjects sometimes becoming entangled in the liability net and unsavory subject matter occasionally avoiding capture (citations omitted).

n55 *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418, 433 (2003).

n56 15 U.S.C. § 1125(c) (2012).

n57 *Id.* Parody is also provided for in the TDRA, which was not the case in the FTDA. The Lanham Act does not define parody, however.

n58 *Id.* The TDRA states "regardless of the presence or absence of actual or likely confusion, of competition, or of actual economic injury."

n59 *Moseley*, 537 U.S. at 432--433:

The relevant text of the FTDA...provides that "the owner of a famous mark" is entitled to injunctive relief against another person's commercial use of a mark or trade name if that use "*causes dilution* of the distinctive quality" of the famous mark. ... This text unambiguously requires a showing of actual dilution, rather than a likelihood of dilution.

n60 *Id.* at 434:

It may well be...that direct evidence of dilution such as consumer surveys will not be necessary if actual dilution can reliably be proven through circumstantial evidence... Whatever difficulties of proof may be entailed, they are not an acceptable reason for dispensing with proof of an essential element of a statutory violation. The evidence in the present record is not sufficient to support the summary judgment on the dilution count.

See Julie Manning Magid, Anthony D. Cox, and Dena S. Cox, *Quantifying Brand Image: Empirical Evidence of Trademark Dilution*, 43 AM. BUS. L.J. 1, 26--27 (2006) (proposing an experimental design that could be used to measure trademark dilution under the TDRA and *Moseley I*).

n61 The Supreme Court in *Moseley* said the showing of actual dilution did not require proof of harm, actual loss, etc. *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418, 433 (2003):

Of course, that does not mean that the consequences of dilution, such as an actual loss of sales or profits, must also be proved. To the extent that language in the Fourth Circuit's opinion in the *Ringling Bros.* case suggests otherwise ... we disagree. We do agree, however, with that court's conclusion that, at least where the marks at issue are not identical, the mere fact that consumers mentally associate the junior user's mark with a famous mark is not sufficient to establish actionable dilution.

That qualifying statement indicated that the difference between proving dilution and proving likelihood of dilution was more semantic than substantive. The above statement regarding consumer association between the senior and junior mark should still be good law.

n62 15 U.S.C. § 1125(c)(2)(A) (2012):

For purposes of paragraph (1), a mark is famous if it is widely recognized by the general consuming public of the United States as a designation of source of the goods or services of the mark's owner. In determining whether a mark possesses the requisite degree of recognition, the court may consider all relevant factors, including the following:

- (i) The duration, extent, and geographic reach of advertising and publicity of the mark, whether advertised or publicized by the owner or third parties.
- (ii) The amount, volume, and geographic extent of sales of goods or services offered under the mark.
- (iii) The extent of actual recognition of the mark.
- (iv) Whether the mark was registered under the Act of March 3, 1881, or the Act of February 20, 1905, or on the principal register.

n63 15 U.S.C. § 1125(c)(2)(B) (2012):

For purposes of paragraph (1), "dilution by blurring" is association arising from the similarity between a mark or trade name and a famous mark that impairs the distinctiveness of the famous mark. In determining whether a mark or trade name is likely to cause dilution by blurring, the court may consider all relevant factors, including the following:

- (i) The degree of similarity between the mark or trade name and the famous mark.
- (ii) The degree of inherent or acquired distinctiveness of the famous mark.
- (iii) The extent to which the owner of the famous mark is engaging in substantially exclusive use of the mark.
- (iv) The degree of recognition of the famous mark.
- (v) Whether the user of the mark or trade name intended to create an association with the famous mark.
- (vi) Any actual association between the mark or trade name and the famous mark.

n64 15 U.S.C. § 1125(c)(2)(B) (2012).

n65 15 U.S.C. § 1125(c)(2)(B)(i-vi) (2012).

n66 *Mead Data Central, Inc. v. Toyota Motor Sales, Inc., U.S.A.*, 875 F.2d 1026, 1030 (2d Cir. 1989) (reversing district court's finding of dilution and finding no blurring).

n67 *Mead Data Cent., Inc. v. Toyota Motor Sales, U.S.A., Inc.*, 702 F. Supp. 1031, 1045 (S.D.N.Y. 1988).

n68 *Mead Data Cent., Inc. v. Toyota Motor Sales U.S.A., Inc.*, 875 F.2d 308, 308 (2d Cir. 1989) (granting a reversal of district court's permanent injunction, opinion subsequently published as *Mead Data Cent., Inc. v. Toyota Motor Sales, U.S.A., Inc.*, 875 F.2d 1026 (2d Cir. 1989)). *See Mead Data Cent., Inc. v. Toyota Motor Sales, U.S.A., Inc.*, 875 F.2d 1026, 1027 (2d Cir. 1989).

n69 *Mead Data Cent., Inc.*, 875 F.2d at 1027.

n70 *Id.* at 1028. Most readers of this article, as legal professionals, however, will recognize the similarity between LEXIS and LEXUS.

n71 MCCARTHY, *supra* note 35, at § 24:72: "... the argument that proponents of anti--dilution law have forwarded: Blurring diffuses the meaning of a mark, increases mental search costs and delays consumer thinking of mark to source...." McCarthy cites, quotes from, and discusses Rebecca Tushnet's article on the topic. *See generally*, Rebecca Tushnet, *Trademark Law and Cognitive Science*, 86 TEX. L. REV. 507, 508 (2008).

n72 15 U.S.C. § 1125(c)(2)(C) (2012).

n73 See RESTATEMENT (SECOND) OF TORTS § 561 (1981). *See* Steven B. Morgan, *The First Amendment and the Corporate Plaintiff: Applicability of the New York Times Standard to Corporate Defamation and Product Disparagement*, 19 VAL. U. L. REV. 847, 847--48 (1985), available at <http://scholar.valpo.edu/cgi/viewcontent.cgi?article=1515&context=vulr> (summarizing both W. PROSSER, LAW OF TORTS (undated) and the RESTATEMENT (SECOND) OF TORTS § 561 (1981)).

n74 15 U.S.C. § 1125(c)(3)(A) (2012). Nominative fair use occurs when the senior mark is used to compare with the junior mark. Descriptive fair use occurs when the senior mark's words are used to describe the product, like a cereal that is all bran. *See Overview of Trademark Law*, *supra* note 34. That nominative and descriptive uses of a senior mark are permitted is recognized law. It is legal for Crest toothpaste owner to talk about Gleem toothpaste when comparing the products in an advertisement. Neither nominative nor descriptive fair uses are relevant for the Fielder parody defense claim. *Id.*

n75 15 U.S.C. § 1125(c)(3) (2012).

n76 *See generally*, Dogan & Lemley, *supra* note 12, coining the term "brand parody" to describe humorous or biting uses of the senior mark holder for one's own trademark. DUMB STARBUCKS, if it is a parody at all, is a brand parody.

n77 See e.g., *Starbucks Corp. v. Wolfe's Borough Coffee, Inc.*, 736 F.3d 198, 211, 212 (2d Cir. 2013) (Starbucks VI), and *Louis Vuitton Malletier S.A. v. Haute Diggity Dog, LLC*, 507 F.3d 252, 261, 262 (4th Cir. 2007).

n79 THE OXFORD BOOK OF PARODIES, John Gross, ed., 2010. "The political cartoon is a weapon of attack, of scorn and ridicule and satire; it is least effective when it tries to pat some politician on the back. It is usually as welcome as a bee sting and is always controversial in some quarters." *Hustler Magazine v. Falwell*, 485 U.S. 46, 54 (1988) (citing and quoting Long, *The Political Cartoon: Journalism's Strongest Weapon*, THE QUILL, 56, 57 (Nov. 1962)).

n80 *Parody*, OXFORD DICTIONARY, http://www.oxforddictionaries.com/us/definition/american_english/parody (last visited Jan. 24, 2015).

n81 See MCCARTHY, *supra* note 35, at § 31:153. Starbucks prevailed in a case where the junior mark holder's LESSBUCKS COFFEE was denied registration on the basis of survey results showing consumers thought that LESSBUCKS was associated with STARBUCKS. *Starbucks Coffee Company v. Marshall S. Ruben*, 78 U.S.P.Q. 2d 1741 (T.T.A.V. 2006).

n82 See generally, WILLIAM PATRY, THE FAIR USE DEFENSE IN COPYRIGHT LAW (1985). Fair use came into copyright law from British common law, so is not based on the First Amendment. While the concept of fair use derived from copyright, the doctrine is different in trademark law.

n83 *Campbell v. Acuff-Rose Music*, 510 U.S. 569, 579--80 (1994). The Supreme Court has only once before even considered whether parody may be fair use, and that time issued no opinion because of the Court's equal division. *Benny v. Loew's Inc.*, 239 F.2d 532, 536 (9th Cir. 1956), *aff'd sub nom.* *Columbia Broadcasting System, Inc. v. Loew's Inc.*, 356 U.S. 43 (1958).

Suffice it to say now that parody has an obvious claim to transformative value, as Acuff--Rose itself does not deny. Like less ostensibly humorous forms of criticism, it can provide social benefit, by shedding light on an earlier work, and, in the process, creating a new one. We thus line up with the courts that have held that parody, like other comment or criticism, may claim fair use under § 107.

See, e. g., *Fisher v. Dees*, 794 F.2d 432, 435--40 (9th Cir. 1986) ("When Sonny Sniffs Glue," a parody of "When Sunny Gets Blue," is fair use); *Elsmere Music, Inc. v. National Broadcasting Co.*, 482 F. Supp. 741, 747 (S.D.N.Y.

1980), *aff'd*, 623 F.2d 252 (2d Cir. 1980) ("I Love Sodom," a "Saturday Night Live" television parody of "I Love New York," is fair use). Judicial decisions prior to enactment of the Copyright Act of 1976, which codified the fair use defense, had established that parody could be fair use. *See generally*, PATRY, *supra* note 82.

n84 17 U.S.C. § 107 (2012).

n85 *Campbell*, 510 U.S. at 569.

n86 *See generally*, PATRY, *supra* note 81 (tracing the fair use doctrine to English cases and identifying its first recognition under U.S. law in Justice Story's opinion in *Folsom v. Marsh*, 9 F. Cas. 342 (C.C.D. Mass. 1841)).

n87 *Campbell*, 510 U.S. at 569.

n88 *See* MCCARTHY, *supra* note 35, at § 31:154 (providing examples of infringing parodies, illustrating how courts confuse likelihood of confusion with dilution analysis).

n89 *Id.*

n90 *Original Appalachian Artworks, Inc. v. Topps Chewing Gum, Inc.* 642 F. Supp. 1031, 1032-33 (N.D. Ga. 1986) (copyright and trademark infringement claimed and proved).

n91 *Id.* at 1038 (likelihood of confusion standard for trademark infringement satisfied, so parody was not protected).

n92 Trademark Dilution Revision Act of 2006, Pub. L. No. 109--312, § 2, 120 Stat. 1730, *codified* at 15 U.S.C. § 1125(c).

n93 *See e.g.*, *Campbell v. Acuff-Rose Music*, 510 U.S. 569, 579 (1994) ("This Court has only once before even considered whether parody may be fair use, and that time issued no opinion because of the Court's equal division. *Benny v. Loew's Inc.*, 239 F.2d 532, 536 (9th Cir. 1956), *aff'd sub nom*, *Columbia Broadcasting System, Inc. v. Loew's Inc.*, 356 U.S. 43 (1958)"). *See generally*, PATRY, *supra* note 82, 6--17.

n94 *Campbell v. Acuff-Rose Music*, 510 U.S. 569, 571-72 (1994).

n95 17 U.S.C. §§ 101, et seq. (2012).

n96 17 U.S.C. § 107 (2012).

n97 *Campbell*, 510 U.S. at 594.

n98 17 U.S.C. § 107 (2012):

[T]he fair use of a copyrighted work, including such use by reproduction in copies or phonorecords or by any other means specified by that section, for purposes such as criticism, comment, news reporting, teaching (including multiple copies for classroom use), scholarship, or research, is not an infringement of copyright.

The list of uses is illustrative, so parodic use could be permitted, even though parody is not on the list of illustrative uses.

n99 *Campbell v. Acuff--Rose Music*, 510 U.S. 569, 579--80 (1994) ("We thus line up with the courts that have held that parody, like other comment or criticism, may claim fair use under § 107.")

n100 *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418, 431 (2003).

n101 *Id.* at 434 ("[D]irect evidence of dilution such as consumer surveys will not be necessary if actual dilution can reliably be proved through circumstantial evidence -- the obvious case is one where the junior and senior marks are identical.")

n102 *Id.*

n103 *Id.* at 433 (actual dilution must be shown). The Court, however, made clear that this was not much different than the likelihood of confusion standard under traditional trademark law. "Of course, that does not mean that the consequences of dilution, such as an actual loss of sales or profits, must also be proved." *Id.* at 433--434.

n104 *See generally*, Dogan & Lemley, *supra* note 12.

n105 Blanke, *supra* note 50, at 1059--73.

n106 In *V Secret Catalogue, Inc. v. Moseley*, 605 F.3d 382 (6th Cir. 2010) [*Moseley II*], the court held that Congress intended to treat sex--related parodic marks as unprotected. The dissent argued that the statute did no such thing. Sex is not mentioned in the TDRA, so the dissent is correct.

n107 *Dallas Cowboy Cheerleaders, Inc. v. Pussycat Cinema, Ltd.*, 604 F.2d 200, 202--203 (2d Cir. 1979).

n108 *Gen. Elec. Co. v. Alumpa Coal Co.*, No. 79-1815, 1979 U.S. Dist. LEXIS 9197, at *2, 4--5 (D. Mass. Oct. 12, 1979).

n109 The court decided the case under a straight infringement theory. In the words of the court, "I find that General Electric's distinctive and widely--recognized trademark is valid and worthy of protection. I find that there is great probability of confusion among the general public of plaintiff's trademarks and defendant's imitation. Accordingly, issuance of a preliminary injunction is warranted ..." *Id.* at 4. In the brief opinion, the court did not analyze blurring, tarnishment, or parody. The court did not even mention the First Amendment, however, it did mention that the defendant contended that he was lampooning the General Electric mark. Emerson concludes that it was because the message primarily had a commercial purpose, "i.e., to *sell* the joke, rather than to *make* the joke." See Emerson, *supra* note 50, at 488.

n128 MCCARTHY, *supra* note 35, at § 24:72.

n129 See Barton Beebe, *An Empirical Study of the Multifactor Tests for Trademark Infringement*, 94 CAL. L. REV. 1581, 1581 (2006) (thirteen circuits and thirteen multifactor tests).

n130 See generally Pub. L. 109-312, 120 Stat. 1730, 109th Cong. (2006), (codified at Lanham Act § 43(c), 15 U.S.C. § 1125(c) (2012)). See *V Secret Catalogue, Inc. v. Moseley*, 605 F.3d 382, 392 n. 3 (6th Cir. 2010) (Moore, J., dissenting) (alteration in original) (emphasized added) (dissenting opinion reviewing H.R. Rep. No. 109-23, at 5):

Witnesses at the [legislative] hearings focused on the *standard of harm threshold* articulated in *Moseley* [sic]. For example, a representative of the International Trademark Association observed that '[b]y the time measurable, provable damage to the mark has occurred much time has passed, the damage has been done, and the remedy, which is injunctive relief, is far less effective.' The Committee endorses this position. The *Moseley* [sic] standard creates an undue burden for trademark holders who contest diluting uses and should be revised.

n131 *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418, 435--36 (2003).

n132 *V Secret Catalogue, Inc.*, 605 F.3d at 389--390 ("The Moseleys do not have a right to use the word "secret" in their mark.")

n133 15 U.S.C.S. § 1125(c) (2012). The TDRA recognizes dilution by both blurring and tarnishment.

n134 *V Secret Catalogue, Inc.*, 605 F.3d at 385. The court also embraced a puritanical tarnishment standard for the TDRA, even though the TDRA does not mention sex. *Id.* at 387.

There appears to be a clearly emerging consensus in the case law . . . that the creation of an "association" between a famous mark and lewd or bawdy sexual activity disparages and defiles the famous mark and reduces the commercial value of its selling power. This consensus stems from an economic prediction about consumer taste and how the predicted reaction of conventional consumers in our culture will affect the economic value of the famous mark.

V Secret Catalogue, Inc., 605 F.3d at 387--88.

n135 *Id.* at 391--95 (Moore, J., dissenting).

Victoria's Secret's evidence of tarnishment includes . . . an affidavit from Army Colonel John E. Baker stating that he 'was...offended by [the] defendants' use of [Victoria's Secret's] trademark to promote...unwholesome, tawdry merchandise,' such as 'adult' novelties and gifts,' and that since his 'wife...and ...daughter ...shop at Victoria's Secret, [he] was further dismayed by [the] defendants' effort to associate itself with . . . a store frequented by members of [his] family.'

Id. at 391 (Moore, J., dissenting). The dissent further stated that there was no evidence that Moseley's use would taint their image.

Yet evidence that the junior mark is likely to undermine or alter the positive associations of the senior mark--i.e., evidence that the junior mark is likely to harm the reputation of the senior mark--is precisely the showing required under the plain language of 15 U.S.C. § 1125(c)(2)(C) to prove dilution by tarnishment.

Id. At 392 (Moore, J., dissenting).

[I]n fact, when reviewing the exact same evidentiary record, the Supreme Court explicitly noted that Victoria's Secret's offer of proof included no evidence that "Victor's Little Secret" affected Baker's positive impressions of Victoria's Secret . . . In short, Victoria's Secret has presented *no* probative evidence that anyone is likely to think less of Victoria's Secret as a result of "Victor's Little Secret" and cannot therefore prevail on its claim of dilution by tarnishment.

Id. at 392--93 (Moore, J., dissenting).

n136 *V Secret Catalogue, Inc. v. Moseley*, 605 F.3d 382, 388 (6th Cir. 2010).

n137 *Id.* at 395--96.

The burden--of--proof problem, the developing case law, and the Restatement (Third) of Trademarks in § 25 (particularly subsection g) should now be interpreted, we think, to create a kind of rebuttable presumption, or at least a very strong inference, that a new mark used to sell sex--related products is likely to tarnish a famous mark if there is a clear semantic association between the two.

Id. at 395--96.

n138 There are seven published opinions in this case, which began in 2001. The authors did not count the first one because it was a denial of motions to dismiss. They are listed here from earliest to most recent. Starbucks Corp. v. Wolfe's Borough Coffee, Inc., 2004 U.S. Dist. LEXIS 19239, *9 (S.D.N.Y. 2004) (denying cross motions for summary judgment on trademark infringement, state and federal dilution, and state unfair competition claims); 2005 U.S. Dist. LEXIS 35578, *30 (S.D.N.Y. 2005) (Starbucks I) (judgment for defendant on all state and federal claims); 477 F.3d 765, 766 (2d Cir. 2007) (Starbucks II) (vacating and remanding to apply the TDRA); 559 F. Supp. 2d 472, 481 (S.D.N.Y. 2008) (Starbucks III) (reinstating district court decision and judgment from Starbucks I); 588 F.3d 97, 119 (2d Cir. 2009) (Starbucks IV) (affirming, vacating, and remanding: "we a fortiori agree with the District Court's ultimate conclusion that there is no likelihood of confusion "as to source, sponsorship, or association of [Charbucks] with the Starbucks mark"); 2011 U.S. Dist. LEXIS 148081, *15 (S.D.N.Y. 2011) (Starbucks V) (denying relief under the TDRA); 736 F.3d 198, 213 (2d Cir. 2013) (Starbucks VI) (affirming district court's finding for defendant).

n139 Starbucks Corp. v. Wolfe's Borough Coffee, Inc., 2005 U.S. Dist. LEXIS 35578, at *6--7 (S.D.N.Y. 2005) ("Indeed, one of Black Bear's inspirations for using the term "Charbucks" was the public perception that Starbucks tended to roast its product more darkly than any of the other major roasters.") See *What's It All About?*, BLACK BEAR COFFEE, http://www.blackbearcoffee.com/Starbucks/What%27s_it_all_about.htm (last visited Jan. 24, 2015). This is Black Bear Coffee's website. The statement reviews the history of the term CHARBUCKS to designate dark roasted coffee. The owner of Boston's Coffee Connection shops sold to Starbucks, which changed the coffee to darker roasted beans. So people pejoratively called dark roasted coffee CHARBUCKS. Black Bear adopted the term for its dark roasted coffee. *Id.*

n140 Starbucks Corp. v. Wolfe's Borough Coffee, Inc., 2004 U.S. Dist. LEXIS 19239, *9 (S.D.N.Y. 2004). Many of the parody trademark cases involve the same claims: federal trademark infringement, state unfair competition law violations, state and federal dilution. The claims tend to overlap and possibly create judicial waste. *Id.*

n141 *Id.*

n142 Starbucks Corp. v. Wolfe's Borough Coffee, Inc., 477 F.3d 765, 765 (2d Cir. 2007) (Starbucks II).

n143 Starbucks Corp. v. Wolfe's Borough Coffee, Inc., 559 F. Supp. 2d 472, 481 (S.D.N.Y. 2008) (Starbucks III) ("[J]udgment will be entered in Defendant's favor on all counts.").

n144 Starbucks Corp. v. Wolfe's Borough Coffee, Inc., 588 F.3d 97, 107 (2d Cir. 2009), *affirming in part and vacating in part* (Starbucks IV) (Judge Miner).

Upon its finding that the marks were not substantially similar, however, the District Court concluded that '[t]his dissimilarity alone is sufficient to defeat [Starbucks'] blurring claim, and in any event, this factor at a minimum weighs strongly against [Starbucks] in the dilution analysis.' We conclude that the District Court erred to the extent it required "substantial" similarity between the marks, and, in this connection, we note that the court may also have placed undue significance on the similarity factor in determining the likelihood of dilution in its alternative analysis.

n145 *Id.*

n146 2011 U.S. Dist. LEXIS 148081, 15 (S.D.N.Y. 2011).

n147 Starbucks Corp. v. Wolfe's Borough Coffee, Inc., 736 F.3d 198, 200 (2d Cir. 2013) (Starbucks VI).

n148 *Id.* at 201--03. The court said:

[I]n 2001 Starbucks started this action claiming, among other things, trademark dilution in violation of 15 U.S.C. §§ 1125(c), 1127. . . . The District Court determined that there was neither actual dilution, which would establish a violation of federal trademark law, nor a likelihood of dilution, which would establish a violation of New York trademark law. Starbucks appealed. While the appeal was pending, Congress passed the Trademark Dilution Revision Act of 2006 ("TDRA"), which amended the FTDA to clarify that the owner of a famous mark seeking an injunction need prove only that the defendant's mark "is likely to cause dilution . . . of the famous mark.

Id. at 201--02. The court held:

[T]he District Court held that Starbucks had failed to meet its burden of showing that it was entitled to injunctive relief: [T]he Charbucks marks are...not likely to impair the distinctiveness of the famous Starbucks marks. In other words, [Starbucks] has failed to carry its burden of proving that [Black Bear's] use of its marks...is likely to cause dilution by blurring.

Id. at 205 (quoting Starbucks V, *supra* note 138).

n149 Louis Vuitton Malletier S.A. v. Haute Diggity Dog, LLC, 507 F.3d 252, 252 (4th Cir. 2007).

n150 *Id.* at 256. There were nine claims arising from the same facts. The list of state and federal claims reveals the problem with overlapping legal protection between state and federal law and between trademark and copyright law. *See generally*, Lee B. Burgunder, *The Scoop on Betty Boop: A Proposal to Limit Overreaching Trademarks*, 32 LOY. L. A. ENT. L. REV. 257 (2012) (use of trademark which lasts in perpetuity to replace copyright protection when the latter has expired).

n155 *Id.* at 261. "We conclude that the PETA criteria are amply satisfied in this case and that the 'Chewy Vuiton' dog toys convey 'just enough of the original design to allow the consumer to appreciate the point of parody,' but stop well short of appropriating the entire marks that LVM claims." *Id.* (quoting People for the Ethical Treatment of Animals v. Doughney, 263 F.2d 359, 266 (4th Cir. 2001)).

n156 *Id.* at 263.

n157 *Id.* at 266--67.

Under the statute's plain language, parodying a famous mark is protected by the fair use defense only if the parody is not 'a designation of source for the person's own goods or services.' The TDRA, however, does not require a court to ignore the existence of a parody that is used as a trademark, and it does not preclude a court from considering parody as part of the circumstances to be considered for determining whether the plaintiff has made out a claim for dilution by blurring Thus, it would appear that a defendant's use of a mark as a parody is relevant to the overall question of whether the defendant's use is likely to impair the famous mark's distinctiveness Indeed, by making the famous mark an object of

the parody, a successful parody might actually enhance the famous mark's distinctiveness by making it an icon . . . In sum, while a defendant's use of a parody as a mark does not support a "fair use" defense, it may be considered in determining whether the plaintiff--owner of a famous mark has proved its claim that the defendant's use of a parody mark is likely to impair the distinctiveness of the famous mark.

n208 Michael S. Mireles, Jr., *Towards Recognizing and Reconciling the Multiplicity of Values and Interests in Trademark Law*, 44 IND. L. REV. 427, 428 (2011). In the last seventy years, trademark rights have expanded enormously. Many commentators believe this has led to an unjustified increase in the rights and remedies available to trademark owners. This expansion has been approved and led by trademark owners, Congress, and courts, including the U.S. Supreme Court.

n209 Grinvald, *supra* note 10, at 638--640. The author named the section "The Fame Monster." She thinks fame and the law's favoritist statute, the TDRA, inspires famous mark holders to bully junior mark holders. The scope of legal protection for trademarks has expanded greatly in the last century. From the recognition of new subject matter of trademarks to new causes of action, trademark owners have benefited from additional protection. Trademark owners have pursued this protection because of the increased importance of the brand in establishing and building goodwill, and expanding into new product, service, and geographic markets, particularly with the advent of globalization and use of the Internet. *See also* David Bollier, BRAND NAME BULLIES: THE QUEST TO OWN AND CONTROL CULTURE (2005) (documenting various bullying campaigns).

n210 Michael S. Mireles, Jr., *Aesthetic Functionality*, 21 TEX. INTELL. PROP. L.J. 155, 157--158 (2013). Diligent trademark owners -- spurred by the structure and policy of trademark law and the value of the brand -- are motivated to vigorously protect their trademarks through policing efforts... Notably, many trademark owners are successful not only in the marketplace, but also in obtaining additional trademark protection through new legislation. Scholars and courts have criticized the expanding nature of trademark protection, which may harm competition and impinge on socially important values, such as free expression.

n211 Grinvald, *supra* note 10, at 631.

n212 *Id.* at 628.

n213 *Id.* at 629. This bullying is a serious concern, as it has implications far beyond trademark law and impacts the U.S. economy and the freedom of cultural expression. One of the harms produced by bullying is that economic competition is impaired. In particular, small businesses and individuals are more adversely affected, as these victims do not have the wherewithal to fight legal battles.

n214 William T. Gallagher, *Trademark and Copyright Enforcement in the Shadow of IP Law*, 28 SANTA CLARA COMPUTER & HIGH TECH. L.J. 453, 456 (2011-2012). In recent years, as Congress has created new intellectual property (IP) rights and courts have often interpreted those rights broadly, legal scholars have frequently decried the expanded scope of protection afforded IP owners in most substantive areas of IP law - including patents, copyrights, trademarks, and rights of publicity. According to this critique, the over-expansion of IP rights throughout the past two decades harms competition, chills free speech, and diminishes the public domain as increasingly broad areas of social life are brought within the scope of strong IP protection. The author interviewed trademark lawyers and created qualitative evidence of senior mark holders engaging in bullying through use of cease and desist letters.

n215 *Id.* at 461.

n216 *See Gallagher, supra note 214*, *Campbell v. Acuff-Rose Music, Inc.*, 510 U.S. 569, 573 (1994) (A number of lawyers advise clients not to sue on parody claims because it is so unpredictable.).

n217 *Id.* at 571.

n218 *Id.* at 580.

n219 David A. Simon, *The Confusion Trap: Rethinking Parody in Trademark Law*, 88 Wash. L. Rev. 1021, 1024 (2013).

n220 Dogan & Lemley, *supra* note 12, at 500 (Courts that make the distinction must decide what qualifies as a parody, including deciding: "is a subsidiary purpose to make fun of the plaintiff enough, or must it be the primary focus of the defendant's use? ... Does the defendant's intent to make a parody ... matter? Does it matter how the audience perceives it?").

n221 Simon, *supra* note 219 at 1028. This author asks whether parody under copyright and *Campbell* is followed by trademark law and he answers basically yes. He includes a proposal for how courts might handle parody in trademark situations better.

n222 See Dogan & Lemley, *supra* note 12, at 490. ("Lacking tools specifically designed for parody, courts treat it in an ad hoc way that reflects their own subjective assessment of the value or parody and the morality of free rides.")

n223 Simon, *supra* note 219, at 1024.

n224 Dogan & Lemley, *supra* note 12, at 504. Dogan & Lemly recommend that courts use a nominative fair use framework for analyzing trademark parodies. *Id.* at 508.

n225 See *Dallas Cowboy Cheerleaders, Inc. v. Pussycat Cinema, Ltd.*, 604 F.2d 200, 205-06 (2d Cir. 1979).

n226 The federal and state governments could still use criminal law to prevent pornography by a mark holder. See e.g., *Alexander v. US*, 509 U.S. 544, 555-56 (1993).

n227 15 U.S.C. § 1125(c)(3)(A)(ii) (2012).

n228 15 U.S.C. § 1125(c)(3)(C) (2012). The way the statute reads, it is actually two different defenses. One defense is that the use is not commercial. The other defense is that the use is a fair use AND the use is not as a source indicator, a brand identification.

n229 Dogan & Lemley, *supra* note 12, at 484 et seq.

n230 Eugene C. Lim, *Of Chew Toys and Designer Handbags: A Critical Analysis of the "Parody" Exception under the U.S. Trademark Dilution Revision Act*, 35 CAMPBELL L. REV. 83, 85 (2012).

While parodies have recently received some legislative attention...through the Trademark Dilution Revision Act (TDRA), the dividing line between a "legitimate" parody and a "dilutive" parody is not entirely clear, and the rather imprecise language of the TDRA has provoked an interesting debate among trademark scholars and commentators. While some commentators have applauded the TDRA as having broadened the protection of civil liberties through its "fair use" provision, others have argued that the TDRA takes freedom of expression too far by failing to provide adequate protection against tarnishment caused by artistic works that sully the reputation or good name of a famous trademark.

Id. Lim asserted that the TDRA's parody provision "is too lenient vis-a-vis artistic parodies that are not used as trademarks and yet too strict with respect to source-identifying parodies."

n231 Dogan & Lemley, *supra* note 12, at 474:

We conclude that, despite increasing attention to speech interests in recent years, the law's treatment of parody reflects too much uncertainty, leaving would-be parodists vulnerable to threats of legal action by trademark holders. In particular, given the flexibility of likelihood of confusion analysis, parodists' fate is usually determined by the subjective judgment of courts, whose treatment of parody often seems to turn on instinct rather than trademark principles.

n232 See *Lard-Ass*, OXFORD DICTIONARY, http://www.oxforddictionaries.com/us/definition/american_english/lard-ass (last visited Jan. 24, 2015). The opinion is *Jordache Enterprises, Inc. v. Hogg Wyld, Ltd.*, 828 F.2d 1482, 1483 (10th Cir. 1987).

Although the TDRA provides some guidance as to what factors might suggest a likelihood of dilution by blurring, it does not provide similar guidance as to what a plaintiff must show in order to prove a likelihood of tarnishment. The tarnishment provision, unlike the blurring provision, does not include a list of factors for consideration. ... Despite this ambiguity, little scholarship has touched upon dilution by tarnishment since the passage of the TDRA. (citations omitted).

n254 Eriq Gardner, *Comedy Central Lawyers Approve 'Dumb Starbucks' Stunt*, THE HOLLYWOOD REPORTER (Feb. 11, 2014), <http://www.hollywoodreporter.com/thr-esq/comedy-central-lawyers-approve-dumb-679246>. Attorney Aaron Moss said,

You can't just take a famous logo and trade dress, call it dumb and use it to sell the very same products in competition with the company you're making fun of. I question whether it's even a legitimate parody in the first place. The people behind 'Dumb Starbucks' are not making fun of 'Starbucks' so much as they're using its marks as a vehicle to sell their own commercial products.

n255 *See* Cahoy, *supra* note 17, at 14. Any parody use of a trademark involves some degree of free-riding:

By using a trademark as a source indicator, consumers are able to apply the goodwill generated from products or services back to the originating company. Without trademark protection, the goodwill created by a business based on its products or services can simply be appropriated by competitors. Capitalizing on the goodwill of another business is a disincentive to investment because it allows free riders to unfairly compete. Trademarks, thus, promote investment by ensuring that the intangible benefits received by the investor are not misappropriated by competitors ... This is the primary benefit which is gained by the property owner.

(citations omitted). Dogan & Lemley, *supra* note 12, at 483 (arguing that trademark law should not attempt to

prevent all free riding by junior mark holders). The question remains as a policy what free-riding should be illegal and what free-riding should be permitted or even encouraged.

Calling their bluff? Pizza chain's lawyer challenges Parkway's powerhouse firm to prove its case in court

LENGTH: 992 words

A Florida pizza chain being sued by Garden State Parkway officials who say its logo looks too much like the road's iconic yellow trailblazer is delivering a spicy threat of its own to the authority's powerhouse lawyers.

Jersey Boardwalk Pizza contends it's not infringing any trademarks, saying the Parkway's logo is in the public domain and a judge should drop the lawsuit.

And the company's attorney, JoyAnn Kenny, added some toppings to its response: She may seek sanctions against the politically connected law firm Wolff & Samson for filing a suit with "no legal basis" and "harassing and causing unnecessary legal expense" for her clients. "The proposition that as a result of the Florida Pizza Parties' use of their logos, consumers are likely to believe that the pizza restaurants or services offered through the pizza restaurants are provided, sponsored, approved, licensed by, or affiliated with the NJ Turnpike is laughable and, for a great number of New Jersey residents (myself included) embarrassing," Kenny, an associate at Marks & Klein in Red Bank, wrote on Aug. 2 to Wolff & Samson attorneys Peter Nussbaum and Ronald Israel in West Orange.

She ended the letter by saying that unless the suit is dropped, she'll file her own action under federal law that allows judges to sanction law firms -- and make them pay the other side's legal bills -- for pursuing frivolous lawsuits.

Neither Nussbaum nor Israel of Wolff & Samson returned calls.

Tom Feeney, a spokesman for the New Jersey Turnpike Authority, which runs the Parkway, said in a statement that "our position is that the courts are the appropriate place to have these conversations, not the newspapers. Other than to tell you that there is not a scintilla of merit to any point she makes in her letter, we're not going to comment further." The pizza suit was filed July 21 in U.S. District Court in New Jersey, against three related companies run by a pair of brothers-in-law originally from the Garden State who started making pizzas together nine years ago after moving to South Florida. Paul DiMatteo, born and raised in Brick, and Skip Parratt, a Belmar native, now have two Jersey Boardwalk Pizza restaurants, in Tavernier, Fla., in the Keys, and in Florida City, on the mainland's southern end. They don't dispute the similarity between the chain's logo and the Parkway's trailblazer. Rather, the fight is over whether the Turnpike Authority has the legal right to prevent DiMatteo and Parratt from using something that looks like it. The complaint says the pizza owners "are trading upon the tremendous fame and goodwill associated with ... (the) Garden State Parkway Logo, which mark is one of the most iconic symbols in the State of New Jersey and is well

known throughout the country." It claims using a "parkway-like logo is likely to dilute, and has diluted, the strength and value of the parkway logo."

The commercial value of logos is something the Turnpike Authority and other highway agencies take very seriously these days, as federal funding for road projects dries up and agencies seek to grab money from every potential asset. The agency has several federal trademark applications on file, for the logo and for knickknacks like key chains, towels and coffee mugs that can be sold.

Spokesmen for the New York State Thruway Authority and the Pennsylvania Turnpike Commission said those agencies were in the process of registering their logos.

"We can't recall an occasion where we had to contact anybody, much less sue them, for the use of our logo," said William Capone, a spokesman for the 75-year-old Pennsylvania Turnpike, which has a keystone-shaped logo.

Regardless of the law, lawyers not involved in the case said the Turnpike Authority and its law firm might be trying to intimidate small businesses with limited resources into meeting their trademark demands.

"There's something called trademark bullying," said Stephen Baker, an intellectual property lawyer based in Raritan. It felt a lot like that to the founders of Bagel Guys Deli in Long Branch, who received a cease-and-desist letter from Wolff & Samson early last year, demanding they take down their Parkway-like sign and destroy any similar messaging. "Me and my partner sat down and we thought, are they bluffing?" said Chris Brigandi, 32, of West Long Branch, who started the business with Brad Dian, a friend since their high school days in Toms River. "We figured we'd get buried, so we said forget it."

But Brigandi said it still cost them \$12,000 just to back down, including the tab for replacing their sign and other items, and a \$5,000 bill from their own lawyer just to make sure their changes had satisfied the Turnpike Authority.

In the suit against Jersey Boardwalk Pizza, the complaint says the pizza logo is so similar to the Parkway's that it was "likely to cause confusion, mistake or deception as to the source or origin of (the pizza owners') services."

But Kenny said public outrage over the suit made it clear there was no such confusion.

"No one expects to pay for pizza with their E-ZPass, or to order a slice at a toll booth," Kenny wrote.

Kenny asserted in her letter that, because the Turnpike Authority had adopted the Federal Highway Administration Manual on Uniform Traffic Control Devices as its own standard, its trailblazer is in the public domain and it was prohibited from asserting trademark protection.

Trademark lawyers who reviewed the complaint said a trademark infringement action by a highway agency against two pizzerias more than 1,200 miles away seemed like a stretch.

Baker and his partner, Ryan McGonigle, said whether or not there has been any confusion, they can't see how the Parkway has been damaged by the pizzerias.

"How does the parkway authority have any damage if it's not doing business in Florida?" Baker said. In infringement suits, he said, "You always have to have damage."

Ben Manevitz, a Clifton lawyer specializing in trademarks and

* Assistant Professor of Intellectual Property and Executive Director of the Franklin Pierce Center for IP, University of New Hampshire School of Law. The author thanks Ian Ayres, Sarah Burstein, John Balzano, Stacey Dogan, Gregory Dolin, Wendy Gordon, Michael Meurer, Martin Schwimmer, Frederick Tung, Rebecca Tushnet, and participants in the 2012 Intellectual Property Scholars Conference at Stanford Law School and the 2012 Roundtable on Intellectual Property and Constitutional Law at the University of New Hampshire School of Law.

LEXISNEXIS SUMMARY:

... But when examining attorneys, the the Trademark Trial and Appeal Board (TTAB), and federal courts deem inherently distinctive marks that contain descriptive terms, in practice it empowers the owners of those marks to prevent competitors from using similar marks or marks containing some of the same terms regardless of whether consumers actually regard them as source indicators. ... As a result, fact-finders reward producer ingenuity by overprotecting descriptive marks, needlessly handicapping competitor speech and enabling owners to assert rights in trademarks when they don't actually function as trademarks and may never come to indicate source. ... Existing tests for distinctiveness often lead fact finders to reach the wrong outcome for borderline marks because the tests do not adequately interrogate whether a proposed mark fulfills its source-constative, performative function. ... The risks of presuming secondary meaning in descriptive marks are far higher than those of presuming secondary meaning in inherently distinctive marks because, before and after they are trademarks, descriptive marks are simply words. ... Creativity Fallacy The express goal of the fact-finder assessing a mark's distinctiveness, whether in the context of registration or litigation, is gauging consumer perception of the mark. ... Another of the pitfalls of the competitors' need test is that courts applying it, like those applying the dictionary test, often consider a phrase in its entirety rather than asking whether competitors might need to use one or more component terms to describe their goods. ... Laudatory marks convey their desired message without requiring much imagination; competitors often use the same terms for their own products; and laudatory terms should remain "freely available to all competitors in any given field to refer to their products or services."

TEXT:

[*1036] INTRODUCTION

Have you ever eaten a steak bomb? If the phrase "steak bomb" means anything to you, does it mean a submarine ⁿ¹ sandwich stuffed with steak, salami, peppers, onions, mushrooms, and cheese, or does it refer to one particular purveyor of said sandwich? That question suddenly became relevant for the owner of a sub shop in New Hampshire when he

received a cease-and-desist letter from a competitor.ⁿ² The letter cited a federal trademark registration granting USA Subs exclusive rights to use the mark STEAK BOMBⁿ³ for steak sandwiches and demanded that Great American Subs cease using the phrase, which appeared on the latter's menus, signage, and website. But as one patron remarked after learning of the dispute, "steak bombs are a staple of life in New England . . . This is right up there with trying to trademark 'lobster roll.'"ⁿ⁴ A local newspaper agreed, recounting conversations with "several local sub shop owners, all of whom carry their own versions of the steak bomb"ⁿ⁵ and call it by the same name.

In order for a word or phrase to be legally recognized and protected as a trademarkⁿ⁶ under federal law, it cannot be generic or "merely descriptive" for the goods or services with which it is used.ⁿ⁷ Consumers must perceive the mark as an indicator of source, rather than as a description of the product itself: they must associate the phrase STEAK BOMB with a specific brand or restaurant, rather than with a type of sandwich available from various purveyors. Whether a trademark qualifies for registration or protection depends upon whether the mark is "distinctive"ⁿ⁸ of the product--whether consumers perceive the mark as distinguishing source.

A trademark can be *inherently* distinctive, and thus protectable *ab initio*, or it can become protectable by *acquiring* distinctiveness based on its use in commerce. Marks that are fanciful (made up words, such as EXCEDRIN for aspirin), arbitrary (existing words applied to unrelated [*1037] goods, such as PENGUIN for books), or suggestive (words that hint at characteristics of the goods or services, such as GREYHOUND for buses) are considered inherently distinctive and can be registered on the Principal Register or protected at common law without further indicia of distinctiveness. Marks that are characterized as descriptive, such as SAFETY for snow tires, are only registrable if they have become distinctive based on their use in commerce.ⁿ⁹

The STEAK BOMB kerfuffle is far from the only example that illustrates how overprotecting descriptive marks enables mark owners to silence competitors' speech. A cosmetics company that registered PERFECTING SERUM for serum that purports to perfect the skinⁿ¹⁰ issued warnings to over a dozen competitors whose products used the same name, demanding they cease use of the phrase; the company is currently embroiled in litigation with those competitors that did not capitulate.ⁿ¹¹ The producer of ENTREPRENEUR magazine, via a series of cease and desist letters and strike suits, persuaded more than forty other entities that used the term "entrepreneur" to end their use.ⁿ¹² A rum maker registered PAINKILLER for a well-known mixed drink sold under that name and then threatened to sue two bartenders who opened a tiki bar named for the cocktail.ⁿ¹³ Based on its registration of SMALLLAW for news about small law firms, a media company demanded a competitor refrain from using the phrase "small law" in discussing--what else?--small law firms.ⁿ¹⁴

[*1038] In each of these examples, a commercial actor has used trademark law to prevent competitors from describing their products in accurate ways. The right to wield a trademark offensively, engaging in self-help or enlisting the court system to stop others from using the same or a confusingly similar mark or term, must be predicated on the ownership and use of a valid mark, whether registered or not. The mark must only be asserted against a party making a trademark useⁿ¹⁵ that is likely to confuse consumers or dilute a famous mark. The requirement that the mark actually functions as a mark is critical. Of course, a descriptive term can *come* to serve as a mark over time, acquiring distinctiveness based on commercial use, advertising, publicity, and consumer engagement.ⁿ¹⁶ Once marks become distinctive, protecting them against competitors makes sense. But when examining attorneys, the the Trademark Trial and Appeal Board (TTAB), and federal courts deem *inherently* distinctiveⁿ¹⁷ marks that contain descriptive terms, in practice it empowers the owners of those marks to prevent competitors from using similar marks or marks containing some of the same terms regardless of whether consumers actually regard them as source indicators.

Fact-finders apply a variety of testsⁿ¹⁸ to determine whether a word mark is inherently distinctive. Such tests include the dictionary, puffery, competitors' need, competitors' use, and imagination tests. In addition, the incorporation of a rhetorical device, such as incongruity, musicality, or double entendre, is often treated as a proxy for distinctiveness. Those tests and proxies, discussed at length in Part III, lead fact-finders to incorrectly deem inherently distinctive marks like the alliterative CLASSIC COLA for a brand of cola,ⁿ¹⁹ the anaphoric SPORTSWEAR FOR EVERYWEAR for [*1039] apparel,ⁿ²⁰ or the ostensibly incongruous SNO-RAKE for a particular snow removal tool.ⁿ²¹ When

descriptive terms that lack secondary meaning are granted protection, that protection authorizes the owner to wield the mark offensively against new entrants before the mark has come to serve as a trademark to consumers. Such offensive use is the equivalent of a property owner erecting a "no trespassing" sign on a piece of land that he has not yet purchased (and may never come to own).ⁿ²² USA Subs made precisely that type of offensive use when it demanded that Great American Subs cease using "steak bomb" despite copious evidence that consumers do not regard the phrase as a trademark.ⁿ²³

The formal and informal tests for distinctiveness fail to provide objective guidelines for gauging consumer perception. Given the centrality of distinctiveness to trademark law, we might expect courts and agencies to have developed predictable, evidence-based standards for determining whether consumers perceive particular terms as trademarks. Instead, the tests invite fact-finders to privilege the perceptions of the producers who selected the marks over those of consumers. As a result, fact-finders reward producer ingenuity by overprotecting descriptive marks, needlessly handicapping competitor speechⁿ²⁴ and enabling owners to assert rights in trademarks when they don't actually function *as* trademarks and may never come to indicate source.

[*1040] In order to correct this problem, USPTO trademark examining attorneys, the TTAB, and federal courts should require secondary meaning for a greater proportion of marks. Rather than granting immediate protection for marks that contain one or more descriptive terms, fact-finders must raise the bar on what constitutes inherent distinctivenessⁿ²⁵ in order to better serve the goals of trademark law and protect junior users' ability to compete freely. No change in the Lanham Act is necessary. Changing how the standard for distinctiveness is applied would help preserve competitors' ability to communicate information about their goods and protect consumers' access to knowledge about new or lesser-known products. This Article proposes a new test for inherent distinctiveness that asks simply whether a hypothetical competitor could use a term literally and in good faith to describe its own product.

In order to highlight deficiencies in the classification of descriptive marks and provide a better test for distinctiveness, this Article employs speech-act theory, drawing upon concepts first articulated by linguist and philosopher J. L. Austin in *How to Do Things with Words*.ⁿ²⁶ Austin contrasts the "constative utterance," speechⁿ²⁷ that relates or reports, with the "performative utterance," speech characterized by *doing* in addition to describing. The phrase "I sentence you to five years in prison," uttered by a judge in the proper context, is an example of performative speech; it enacts the very sentence it articulates. In contrast, most speech is constative: it describes and can be judged true or false. Austin never mentioned trademarks in his famous William James lectures, but he certainly could have, as speech-act theory has a great deal of insight to offer trademark law. Speech-act theory provides a helpful lens for understanding how trademarks work and illustrates why overprotecting descriptive terms undermines the goals of trademark law and hurts competition. In so doing, it directs us to a clearer and more consistent test for protectability.

The first Part of this Article introduces speech-act theory as a framework for understanding trademark use as both speech and action. The second Part explores distinctiveness doctrine and the role of trademark law in fostering competition. The third Part discusses the tests and proxies courts use to determine whether a proposed mark is merely descriptive or **[*1041]** inherently distinctive--whether it functions primarily to convey information about a product's characteristics or primarily to communicate its source. The fourth Part draws on speech-act theory to generate a new test for inherent distinctiveness and applies that test to several of the examples that appear throughout the Article.

I. A SPEECH-ACT THEORY OF TRADEMARKS

Speech-act theory has received a great deal of attention over the years from scholars of linguistics, philosophy, theology, rhetoric, and literature, but lends itself perhaps most fruitfully--as Austin and his successors were well aware--to the study of law.ⁿ²⁸ A statute does not merely make statements about the law; rather, in articulating the law, it creates it.ⁿ²⁹ Contract disputes may hinge on whether a certain utterance constituted an "offer" or an "acceptance," without which no contract was formed. Austin called these types of utterances "speech acts" or "performatives" because, unlike statements that primarily function to convey information, they primarily function to *alter* reality--they are noteworthy for "not merely[] saying something[,], but *doing* something."ⁿ³⁰ Performatives are "acts of language[]" that .

. . . bring[] things into being, organizing the world rather than simply representing what is." ⁿ³¹ A judge who speaks the words "I sentence you to three years in juvenile detention" is, at that moment, enacting the sentence. Of course, the judge must also be authorized to perform the sentencing, and the context must otherwise be appropriate--if she speaks the words to her beagle at the dog park, or she is not a judge but an actress playing a role, the performative does not succeed: it is "infelicitous." ⁿ³²

[*1042] Austin distinguished constative utterances, such as "New York City has five boroughs," from performative utterances. Constative utterances "claim[] to represent things as they are, to name things that are already there." ⁿ³³ Trademark use is constative in one of two ways--it is either *source*-constative or *goods*-constative. Use is *source*-constative when consumers perceive the mark as primarily indicating the goods' source, as when EXCEDRIN is used as a trademark in connection with aspirin. Use is *goods*-constative when consumers perceive the mark as primarily describing qualities or characteristics of the product or service itself, ⁿ³⁴ as when, for example, a restaurant's sign reads "Brick Oven Pizza."

When trademark use is source-constative, law renders it simultaneously performative: the trademark use, with or without registration, generates enforceable legal rights and places competitors on notice of those rights. The constative speech is directed at consumers; the performative act, at competitors. A producer may intend its use of a mark to be source-constative, but if the mark is descriptive and lacks secondary meaning, consumers will perceive it as merely goods-constative--the use will suffer from an audience uptake error. Audience reaction is a contingency essential to the performativity of the mark. Just as the performative "I bet you the Red Sox will win tomorrow" is felicitous only if met with assent, ⁿ³⁵ so is the performative function of trademarks supposedly contingent upon consumer perception. When a producer's use of a distinctive word mark relates some information about a product to consumers, it simultaneously generates enforceable legal rights and places competitors on notice of those rights.

Consider an inherently distinctive mark like ADVIL. Because the mark does not exist as a word apart from its status as a mark, every utterance of the mark by the producer is source-constative and thus performative: it has the legal and ontological effect of creating the trademark and bestowing common law rights upon its owner and simultaneously putting competitors on notice of those rights. The primary attribute of performative speech acts is that they not only state something, but also do something. When Pfizer advertisements advise consumers to "choose ADVIL for pain," or a supermarket circular notifies us that "ADVIL is on sale during the month of July," the term "ADVIL" in the sentence--like Austin's "I bequeath" or "I christen"--serves as both speech and act. ⁿ³⁶ As directed at consumers, the **[*1043]** use is source-constative, describing the product's brand or source. As directed at competitors, the use is performative, doing action: it puts competitors on notice that "ADVIL" is taken and forbids them from adopting "RAVDIL" for pain relievers, or any other mark that comes too close to treading on Pfizer's piece of semantic real estate. Existing tests for distinctiveness often lead fact finders to reach the wrong outcome for borderline marks because the tests do not adequately interrogate whether a proposed mark fulfills its source-constative, performative function.

Trademarks are typically categorized as either fanciful, arbitrary, suggestive, or descriptive. ⁿ³⁷ Fanciful and arbitrary marks map neatly onto the speech-act schema: KODAK for cameras and BUMBLE AND BUMBLE for hairspray are innately source-constative precisely because they are never goods-constative. The adjective "bumble" has no definition that modifies the noun "hairspray" other than its source-indicating definition. Conversely, descriptive marks like TASTY SELECTIONS for cookie dough ⁿ³⁸ or TRIPLE MOISTURE for hair conditioner ⁿ³⁹ are, without secondary meaning, goods-constative--consumers have no inherent reason to perceive the terms as describing anything other than characteristics or aspirations of the products to which they are affixed.

As in the case of the judge who cannot sentence her pet beagle to life imprisonment, performatives require certain contextual elements in order for their use to be felicitous:

The uttering of the words is, indeed, usually a, or even *the*, leading incident in the performance of the act . . . the performance of which is also the object of the utterance, but it is far from being usually, even if it is ever, the *sole* thing necessary if the act is to be deemed to have been performed. Speaking generally, it

is always necessary that the *circumstances* in which the words are uttered should be, in some way, or ways, *appropriate*, and it is very commonly [*1044] necessary that either the speaker himself or other persons should *also* perform certain *other* actions, whether 'physical' or 'mental' actions or even acts of uttering further words. ⁿ⁴⁰

Source-constative trademarks also require the presence of contextual elements. When Pfizer suggests that headache sufferers purchase ADVIL, its trademark use is likely to be felicitous because the fanciful mark always already functions as a mark, and will be perceived as such by consumers. But when PENGUIN is used as a mark for a publishing house, consumers remain aware of the term's dictionary meaning; thus, "I can get the PENGUIN version of that book for half price" will be source-constative while "I can pet a penguin at the Mystic Aquarium" will not. The source-constative use of arbitrary or suggestive marks, then, is more context-dependent than that of fanciful marks, while the source-constative use of descriptive marks with secondary meaning is the most context-dependent. ⁿ⁴¹

Austin describes various errors that can prevent a performative utterance from being successful, or in his terms, "felicitous." The one most relevant to a discussion of trademark distinctiveness is the one I call "uptake" error. If I enter a colleague's office and say, "I wonder if it would be cooler in here if you opened the window," and my colleague opens the window, then my request succeeded--my performative utterance was felicitous. But if my colleague doesn't hear me, or he believes I'm being sarcastic because it's already fairly cool in his office, the instruction doesn't take. I possessed the requisite intent to request his action, and I recited conventional words to do so, but I also needed a specific response from him; without it, the performative is infelicitous. The performative function of trademarks is likewise contingent upon audience perception. ⁿ⁴² The mark owner's intent to use its mark as a source indicator does not suffice to render that use source-constative; only the consumer's perception of the mark as fulfilling a trademark function makes the use source-constative.

Speech-act theory teaches that words can constitute both speech and action simultaneously. As applied to trademark distinctiveness doctrine, it [*1045] drives home the difference between distinctive and merely descriptive marks as a difference between words that perform action and words that simply provide information. Fact-finders tasked with evaluating whether a word mark is inherently distinctive often behave as though they are simply placing passive terms in various siloes as dictated by a set of rules. In fact, their task is to determine whether a mark is, by its nature, primed to serve as an active indicator of source. The speech-act model can thus guide us toward a more deliberate and conscientious approach to gauging distinctiveness.

II. INHERENT DISTINCTIVENESS

Protecting descriptive terms as inherently distinctive directly harms competitors and new entrants. Two of the chief policy justifications offered for trademark law are that it protects consumers from being misled, deceived, or confused and that it provides incentive for producers to ensure that the quality of the goods sold under the mark is consistent. Proponents of law and economics argue that another of the main benefits trademarks offer is their capacity to reduce consumer search costs, promoting marketplace efficiency. ⁿ⁴³ Conversely, protecting producers' investment is touted as the "second goal of trademark law" by some, ⁿ⁴⁴ and its primary and original goal by others. ⁿ⁴⁵ Different trademark doctrines prioritize different policy goals and values: ⁿ⁴⁶ the consumer perspective reigns supreme in theories about infringement and motivates the bars against registering deceptive ⁿ⁴⁷ and scandalous ⁿ⁴⁸ marks; producer protection, on the other hand, provides the basis for anti-dilution laws. Most positive theories [*1046] of trademark law focus on consumers and mark owners, ⁿ⁴⁹ with a nod to "competition" but little emphasis on competitors themselves. ⁿ⁵⁰

But the speech-act theory of trademarks demonstrates that trademark use has two target audiences. As directed at consumers, it serves to indicate source and consistency and reduce search costs. As directed at competitors, it provides notice that a term or phrase is being used as a mark and that infringement, dilution, cyber-squatting, and other behaviors that violate the perceived rights associated with the mark owner's use will not be tolerated.

Whose interests are served and whose subordinated when the PTO grants registration of marks that contain

goods-constative terms? In such cases, the producers have not yet invested sufficient time and money to create an association between the mark and the product, rendering the mark source-constative; if they had, secondary meaning would serve as a basis for registration. Consumers have not yet been conditioned to associate the mark with a particular producer or its goods; if they had, secondary meaning would exist. When applications to register marks that contain non-disclaimed descriptive terms are denied registration unless the owner can demonstrate secondary meaning, neither producers nor consumers are harmed. Consumers are not misled; search costs do not increase; producers are not deprived of valuable goodwill because they have not yet acquired it. ⁿ⁵¹ In the converse scenario, however, arguably descriptive marks are protected without secondary meaning, and competition is stifled. Junior users are more likely to avoid using terms similar to those that compose the mark--terms they might find useful or desirable in marketing their competing goods. Competitive speech is chilled without the justification of either preventing consumer confusion or protecting producer goodwill.

[*1047] Despite the harm to competitors and consumers, neither constituency is likely to be effective in blocking the registration of descriptive marks. Consumers share with competitors a general desire to keep descriptive terms in the pool for use by others, but their interest in preventing registration of a specific descriptive mark is rather attenuated. When they have the motivation, they typically lack the means to block registration. ⁿ⁵² Competitors' perspectives warrant even greater attention than consumers' perspectives in connection with the decision to register an arguably descriptive mark before it acquires secondary meaning. When descriptive marks are registered without acquired distinctiveness, the chilling effects on competitor speech are significant, yet competitors are not well-positioned to object to it. If the PTO passes an applied-for mark to publication, it appears among the thousands of entries published in the Official Gazette each week. ⁿ⁵³ A competitor can then oppose the mark in an *inter partes* proceeding before the TTAB within thirty days ⁿ⁵⁴ or seek to cancel the mark within five years of registration. ⁿ⁵⁵ But the sheer volume of marks in each Gazette makes it unlikely that any mark owner will be able to review it each week to decide whether to oppose any of the published marks. ⁿ⁵⁶ Producers are motivated to seek maximal protection for their marks, and consumers and competitors have little opportunity to push back. The PTO and TTAB face only producer pressure to grant registration, with little countervailing pressure from those with opposing interests.

[*1048] Whether a proposed trademark is inherently distinctive is an important determination. Yet that determination is often botched by fact finders, as evidenced by a plethora of decisions that overprotect descriptive marks based on vague, misapplied, and ill-fitting tests. Distinctiveness purports to be a question of consumer perception, but because the existing tests ⁿ⁵⁷ provide scant guidance for the PTO, TTAB, and federal courts, fact finders often focus unduly on mark selection, fixing on the employment of double entendre, incongruity, rhyme, metaphor, alliteration, or other rhetorical device as evidence that a mark is distinctive.

Rewarding mark owners for the use of such devices without regard to the goods-constative nature of specific terms often creates problems. It can result in deeming marks suggestive when they're actually merely descriptive and removing from the pool of available words many that competitors ought to remain free to use. ⁿ⁵⁸ When courts overprotect descriptive marks *ex ante*, they supplant the goals of open competition and economic efficiency with a scheme that prizes owners' natural rights and, in so doing, chill commercial expression. ⁿ⁵⁹ What's more, they specifically disadvantage competitors, precluding second comers from using descriptive and laudatory terms to position their products as viable alternatives to those already in the marketplace.

A. Defining Distinctiveness

Distinctiveness refers to a trademark's serving as an indication of source to consumers--i.e., functioning as a trademark. A distinctive mark need not tell consumers who or what the source of a product actually is but merely that the product will be consistent because the source is consistent. The source-indicating function of trademarks enables the consumer to rest assured that a STARBUCKS iced doppio she buys on West Street in Annapolis will be nearly identical to the STARBUCKS iced doppio she buys at John F. Kennedy airport outside of gate forty-six.

[*1049] Courts and the PTO categorize word marks ⁿ⁶⁰ along a spectrum of least to most distinctive, including

generic, descriptive, suggestive, arbitrary, and fanciful marks. ⁿ⁶¹ Fanciful, arbitrary, and suggestive marks are considered inherently source-indicating and thus automatically protectable, while descriptive marks are only protected if they possess secondary meaning, and generic terms cannot be protected as trademarks. Fanciful or "coined" marks like CLOROX for bleach are created solely to serve as trademarks. Arbitrary marks are existing words used as trademarks for supposedly unrelated products, such as AARDVARK for graphic design or, in the example most often cited by courts in recent years, APPLE for computers. ⁿ⁶²

While arbitrary and fanciful marks ostensibly bear no relation to the goods or services on which they're used, ⁿ⁶³ suggestive marks suggest or "subtly connote" ⁿ⁶⁴ information about the qualities or nature of the product to which they are affixed without directly describing it, such as CHICKEN OF THE SEA for tuna fish ⁿ⁶⁵ or COPPERTONE for suntan oil. In contrast, a descriptive mark imparts information about the goods or services directly ⁿ⁶⁶ and immediately. Descriptive marks communicate some feature of, or information about, a product, such as its ingredients, ⁿ⁶⁷ characteristics, ⁿ⁶⁸ color, ⁿ⁶⁹ odor, ⁿ⁷⁰ flavor, ⁿ⁷¹ shape, ⁿ⁷² function, ⁿ⁷³ intended [*1050] users, ⁿ⁷⁴ purpose, ⁿ⁷⁵ mechanism of action, ⁿ⁷⁶ or effect. ⁿ⁷⁷ A word mark need not describe all of the characteristics of a product to be deemed merely descriptive--it is enough that it describe one significant function or attribute. ⁿ⁷⁸ Prior to the 1900s, descriptive marks could not receive protection as trademarks; ⁿ⁷⁹ today, descriptive marks can only be enforced or registered on the Principal Register if they possess acquired distinctiveness (as opposed to the inherent distinctiveness that arbitrary, fanciful, and suggestive marks are presumed to possess). ⁿ⁸⁰

While descriptive terms identify qualities of the goods, generic terms convey their "nature and class." ⁿ⁸¹ Generic phrases, like "computer store" for a store that sells computers or "strawberry milk" for strawberry-flavored milk, are neither inherently distinctive nor capable of acquiring distinctiveness, and thus cannot become source-constative and earn [*1051] protection as trademarks. ⁿ⁸² The phrase "computer store" functions not as an indication of source for the store or the computers it offers for sale, but simply as the most obvious way to refer to any store that sells computers. Marks initially registrable on the Principal Register or protectable under common law can become generic over time. Formerly source-constative trademarks that are now considered generic and incapable of serving a source-indicating function include "thermos," ⁿ⁸³ "trampoline," ⁿ⁸⁴ "yo-yo," ⁿ⁸⁵ and "cellophane." ⁿ⁸⁶

The determination of whether a mark is inherently distinctive is not made in the abstract, but in the context of the goods or services to which it is affixed. ⁿ⁸⁷ For example, DELICIOUS might be generic for a particular cultivar of apple and thus incapable of becoming a source indicator. ⁿ⁸⁸ Yet DELICIOUS would be descriptive if used in connection with ice cream or potato chips because it functions as a laudatory term boasting their superior taste. DELICIOUS would be arbitrary for copy machines or snowplow services because it has no goods-constative meaning as applied to them. The Ninth Circuit, faced with determining whether DELICIOUS was suggestive or descriptive for footwear, left the question for the jury. ⁿ⁸⁹

B. Policy Goals

Why protect fanciful, arbitrary, and suggestive marks without requiring registrants to establish secondary meaning? Theorists have rationalized that those categories of words and phrases will be source-constative as soon as they are used in commerce, precisely because they bear little or no logical, goods-constative relationship to the goods or services with which they are used. ⁿ⁹⁰ As Robert Bone notes, characterizing a subset of marks as inherently distinctive and protecting them without requiring owners to establish acquired distinctiveness is an efficient shortcut because it minimizes administrative costs by capitalizing on our knowledge about how trademarks accrue meaning:

[*1052] Because the symbol has no other meaning to consumers (or in the case of suggestive marks, no other obvious meaning), consumers, who are accustomed to seeing source identifiers on labels, are very likely to assume that the symbol is a trademark and use it as such. Thus, the probability is extremely high (though not certain) that an inherently distinctive mark will become a source identifier, and in a reasonably short period of time.

....

. . . Because of the high probability that these marks already have or will soon acquire secondary meaning, the conclusive presumption is very likely to be correct most of the time. Moreover, the conclusive presumption saves the litigation costs of actually proving secondary meaning in individual cases. ⁿ⁹¹

Conversely, descriptive marks are less certain to acquire secondary meaning ⁿ⁹² and apt to take longer to acquire it if they do. The risks of presuming secondary meaning in descriptive marks are far higher than those of presuming secondary meaning in inherently distinctive marks because, before and after they are trademarks, descriptive marks are simply words. Further, they are words understood to convey information about the goods and services with which they are used. In order to warrant protection as trademarks, marks must function *as* trademarks, i.e. as source indicators. When they do not, public policy favors ensuring those words remain available to the public and to other producers. ⁿ⁹³ The Court of Customs and Patent Appeals (CCPA), the predecessor to the Court of Appeals for the Federal Circuit, ⁿ⁹⁴ has identified two "major reasons" for declining to protect merely descriptive marks without a showing of secondary meaning: "to prevent the owner of a mark from inhibiting competition in the sale of particular goods," and "to maintain freedom of the public to use the language involved, thus avoiding the possibility of harassing infringement suits by the registrant against others who use the mark when advertising or [*1053] describing their own products." ⁿ⁹⁵ Justice Stevens in his dissent in *Park 'N Fly* noted the "well-recognized public interest in prohibiting the commercial monopolization of [descriptive] phrases" and cautioned that "[l]anguage, even in a commercial context, properly belongs to the public." ⁿ⁹⁶

As those opinions acknowledge, competition can be inhibited where competitors are not free to draw from the complete pool of possible terms and phrases to describe their products. If a new entrant to the field of portable music players devised a way for multiple users to listen to a single player simultaneously, it might want to advertise the new player using the phrase "share music with your friends!" But once the new entrant learns of the registration for SHAREMUSIC under § 2(e), ⁿ⁹⁷ it may feel constrained in its use of that descriptive phrase. Competition is also inhibited when the pool of descriptive terms has been depleted and competitors cannot--or believe they cannot--incorporate certain descriptive or generic terms into their trademarks. For example, the determination that XTREME HEAT is inherently distinctive for cheese curls ⁿ⁹⁸ will likely lead the makers of other snacks to steer clear of marks like XTREME CHEESE or EXTRA HEAT, even though "cheese" and "heat" describe the chips' flavor and "xtreme" or "extra" serve to modify or amplify those descriptors. In theory, the PTO, TTAB, and courts treat flavors and laudatory terms as merely descriptive, but they often allow those default rules to be trumped by the application of various tests and proxies. The PTO also applies a "rule of doubt" in close questions of distinctiveness, resolving borderline cases in favor of applicants.

Of course, infringement suits are not the only means of aggressive policing by trademark owners. Some large companies send out hundreds of "cease and desist" letters per year, ⁿ⁹⁹ each designed to intimidate its recipient into choosing a different mark because the letter writer deems the [*1054] recipient's use infringing. ⁿ¹⁰⁰ Often such letters are sent from large companies with legal teams to junior users who lack expertise in trademark law and cannot afford litigation. ⁿ¹⁰¹ When a firm successfully registers a descriptive term as a mark by persuading the trademark examining attorney that the mark is inherently distinctive, it may succeed in discouraging others from employing that descriptive term. ⁿ¹⁰² The statutory fair use defense to a claim of infringement does not sufficiently mitigate the harm to competition because it is not actual infringement liability that chills the use of descriptive terms, but the specter of litigation.

Federal courts have long acknowledged "the danger of depleting the general vocabulary available to all for description and denomination of articles of commerce." ⁿ¹⁰³ Sixty years ago, the Third Circuit Court of Appeals warned against excluding commercial actors from "us[ing] apt normal words or phrases in depicting or characterizing articles because of language preemptions by others." ⁿ¹⁰⁴ About thirty years after that, the Seventh Circuit similarly opined:

The rationale for prohibiting the appropriation of . . . a descriptive term as a trademark rests upon the

equal right of another individual producing and marketing a similar product to describe his or her product with similar accuracy. Were this right not protected by the law, elements of the language could be monopolized in such a way as to impoverish others' ability to communicate. ⁿ¹⁰⁵

Descriptive terms used in conjunction with the sale of goods or services, such as NO MORE TANGLES for a hair detangling spray or [*1055] QUICK COPIES for a photocopying service, may be perceived by consumers only as goods-constative--conveying a feature of the product, rather than source-constative--communicating a brand name or consistent source. If the PTO and courts overprotect descriptive marks by allowing their registration and enforcement without secondary meaning, they risk depleting the language available to competitors and chilling speech by granting a property right in a term that serves no trademark function.

To determine whether a trademark that is merely descriptive has acquired secondary meaning and thus warrants registration or protection under federal law, trademark examining attorneys and courts look to various indicia of secondary meaning, ⁿ¹⁰⁶ including the nature, expense, and amount of advertising; length, exclusivity, and manner of use; total sales; consumer or dealer statements of recognition of the mark as a source identifier; survey evidence; and unsolicited media coverage. ⁿ¹⁰⁷ A court's inquiry with regard to secondary meaning focuses on the effectiveness of promotional efforts in altering the mark's meaning to consumers. ⁿ¹⁰⁸ The goal is to determine whether, based on the use of a mark in commerce, an initially goods-constative mark has become source-constative.

Determining whether a word mark is inherently distinctive or merely descriptive ⁿ¹⁰⁹--what McCarthy has called the "[d]escriptive-'suggestive' [*1056] battle line" ⁿ¹¹⁰--often triggers in fact-finders a "know it when I see it" attitude that reflects their personal impressions of a mark, rather than gauging the perception of the relevant group of consumers. Calling the determination "fuzzy," ⁿ¹¹¹ "tricky," ⁿ¹¹² "blurred," ⁿ¹¹³ "hazy," ⁿ¹¹⁴ and "difficult," ⁿ¹¹⁵ and the distinction ⁿ¹¹⁶ between descriptive and suggestive marks "inarticulable," ⁿ¹¹⁷ judges have repeatedly acknowledged that intuition plays a large role in evaluating distinctiveness. ⁿ¹¹⁸ While a number of so-called "tests" are recited and ostensibly applied, the results are inconsistent both across and within the TTAB, PTO, federal district courts, and circuit courts of appeal. The unsatisfactory tests and inconsistent results leave applicants and litigants ill-equipped to predict how their marks will be categorized, raising administrative costs and failing to serve the signaling function that should guide firms in selecting marks. ⁿ¹¹⁹

III. TESTS FOR DISTINCTIVENESS

Skeptics need not look far to find examples of inconsistent outcomes. The Eighth Circuit held "LA" suggestive for low-alcohol beer, ⁿ¹²⁰ while the Seventh Circuit held the same mark merely descriptive ⁿ¹²¹ within the same [*1057] five-year period. One trademark practitioner points out the inexplicability of the PTO's classifying SUPER MOIST as suggestive for cake mix while deeming MOIST SUPREME and MOIST DELUXE merely descriptive for similar products. ⁿ¹²² Another notes the PTO's bafflingly inconsistent treatment of nineteen similar "The [noun] People" marks for retail, distribution, or educational services, ⁿ¹²³ including its deeming THE TUNA PEOPLE and THE HARDWARE PEOPLE suggestive and THE SHRIMP PEOPLE and THE TOOL KIT PEOPLE merely descriptive. ⁿ¹²⁴ The PTO, TTAB, and federal courts have applied a number of formal and informal tests to guide fact-finders in determining distinctiveness. This Part explores each in turn, revealing both their inconsistent application and their inappropriate emphasis on producer creativity and intent rather than consumer perception or competitor speech.

A. Imagination

The test used most often to determine whether a mark is merely descriptive, i.e. goods-constative, is known as the imagination test. It asks how much imagination a consumer must use to glean from the word mark a description of the goods or services in question--in other words, how direct and immediate the link is between the mark and a characteristic of the goods. ⁿ¹²⁵ Under the imagination test, a "term is suggestive if it requires imagination, thought and perception to reach a conclusion as to the nature of goods." ⁿ¹²⁶ For example, a district court recently held LOVELY SKIN merely descriptive for skin care products, finding "that no imagination, thought, or perception is needed to reach

a conclusion as to the nature of goods sold under the name Lovely Skin. The goods . . . are designed to produce . . . exactly what the name describes." ⁿ¹²⁷ Another district court held GROUT SHIELD merely descriptive for products that clean grout and enhance its color, opining that it "does not require 'imagination, thought [*1058] and perception' to reach a conclusion that plaintiff's products are intended to protect grout." ⁿ¹²⁸

The Ninth Circuit calls the imagination test the "primary criterion" for evaluating whether a mark is suggestive or descriptive. ⁿ¹²⁹ Nonetheless, the imagination test is less a test than an application of the definitions of the "descriptive" and "suggestive" categories of marks. Vague and subjective as it appears--a fact-finder purports to measure the extent of imagination a *consumer* would use in gleanng information about goods--courts and the TTAB have held myriad marks suggestive based on the imagination test alone. Yet the test maps poorly onto the speech-act theory of trademarks. Under that theory, if a mark primarily functions to communicate a feature rather than a source, the fact that it requires imagination to glean the description does not necessarily render it source-constative.

A related approach to the imagination test is to conceptualize it as a "multi-stage" ⁿ¹³⁰ or "inferential" ⁿ¹³¹ reasoning test, "mental leap," ⁿ¹³² or "mental hiccup." ⁿ¹³³ In accordance with that approach, the TTAB reasoned that

some degree of thought or imagination must be used to get from BRIDAL KEEPSAFE to the concept "keeps bridal gowns safe" . . . [T]here is an element of incompleteness which we believe an individual encountering the mark must interpret in order to arrive at the conclusion that applicant's boxes are used for holding wedding gowns after cleaning. ⁿ¹³⁴

Based on this logic, a mark is suggestive if a consumer "must exercise 'mature thought or follow a multistage reasoning process' to determine attributes of the product or service" based on the mark. ⁿ¹³⁵ The mark [*1059] MAILROOM TOOLKIT was found to be distinctive for a toolkit designed to create "'mailroom friendly' database programs" on the basis that it "requires imagination or cogitation as an additional mental step in order for applicant's customers to perceive [w]hat it is." ⁿ¹³⁶

Likewise, the TTAB held the mark APPLIANCE STATION suggestive because a multistage reasoning process

is necessary in order to ascertain the precise nature of applicant's services. . . [S]tation describes the system in applicant's retail stores by which a customer may order or obtain information about the products sold therein; appliances are among the products sold in applicant's stores; thus a customer may order or obtain information about the appliances sold in applicant's stores at the "appliance station." ⁿ¹³⁷

Compare the excerpt above with the following discussion from a district court, finding PET PALS merely descriptive for a pet health and safety program based on the imagination test:

The dictionary defines "pal" as "a close friend." Thus, the literal interpretation of "pet pal" is one who is a friend to his or her pet. It is a common and distinctive quality of friendship to care for and seek the well-being of one's friend. Thus, it takes no imagination or perception to conclude that a program called "Pet Pals" is one that promotes the well-being of pets. ⁿ¹³⁸

Multistage reasoning is a concept that, like imagination, seems to contract or expand in order to rationalize what is often an intuition-based result. Yet even if it takes multiple stages to translate "appliance station" into a direct description of the service provided, courts offer no reason to presume that such a multistage process transforms a goods-constative phrase to a source-constative one.

[*1060] Beyond asking fact-finders to determine whether relevant consumers use multistage reasoning, imagination, cogitation, additional mental steps, or even mere perception, the test provides little concrete guidance. Instead, it supplies the requisite language for courts, the PTO, and the TTAB to justify their determinations post-hoc. Viewed from another angle, some of these decisions appear flat-out wrong: MAILROOM TOOLKIT for a toolkit for creating mailroom programs, BRIDAL KEEPSAFE for a box that keeps a bridal gown safe, and APPLIANCE

STATION for a station where appliances are sold not only "convey[] an immediate idea" about the goods or services offered, the goods and services can scarcely be explained without the very words the marks comprise. What would a competitor call a new and better toolkit for creating mailroom programs without risking trademark infringement--SYSTEM FOR CREATING VIRTUAL ROOMS FOR DISTRIBUTION OF MAIL?

When determining whether a word mark is suggestive or merely descriptive, ostensibly "the mentality used is that of an ordinary prospective purchaser who, seeing the mark for the first time, is only generally apprised as to the service and not specifically as to the particular qualities, features, characteristics or aspects of the service." ⁿ¹³⁹ In some cases, courts overzealously misapply the imagination test, defining descriptiveness in a way that is too narrow to be meaningful. In one such approach, the viewer attempts to deduce the product from the mark as a test for distinctiveness, ⁿ¹⁴⁰ deeming a mark merely descriptive only if it describes *all* characteristics of the product in question, rather than one. ⁿ¹⁴¹ For example, the Eleventh Circuit declined to overturn a jury's finding that LASERSPECIALIST.COM was suggestive, finding it "requires a leap of the imagination to deduce that a 'laser specialist' is a[n] oculoplastic surgeon." ⁿ¹⁴² Likewise, the Second Circuit held WET ONES inherently distinctive for individual moist towelettes:

while the plaintiff acknowledged that "Wet Ones is descriptive in the sense that each of the words describes an attribute of the [*1061] product--it is wet and it is dispensed one by one . . . [T]he term 'Wet Ones,' without more, does not itself conjure up the image of a towelette . . . [but] could plausibly describe a wide variety of products. ⁿ¹⁴³

The Federal Circuit has also fallen prey to this backward application of the imagination test. In one case it held LOAD-CARRIER was not merely descriptive for load-supporting units for automobiles because it was "equally suggestive of many other things--e.g., wheel barrows, dump trucks, freight cars, steamships, and elevators." ⁿ¹⁴⁴

The TTAB appears less prone to engage in this type of reasoning, noting that a descriptiveness refusal does not require

that it is possible for a blindfolded consumer who has been given only the proposed mark to enumerate the exact features, technologies or methodologies employed in the goods. Rather, the question is whether someone who knows what the goods are will understand the term or phrase to convey significant information about them ⁿ¹⁴⁵

The distinction is crucial, given that fact-finders applying the "blindfold" test would adjudge so few marks descriptive that the test would eviscerate the category of descriptive marks. Under the logic of the Federal Circuit in *Maremont*, DELICIOUS DESSERT for ice cream would not be descriptive because it could refer just as easily to brownies or banana bread as it could to ice cream. It is difficult to posit a real or hypothetical descriptive mark that could pass the "blindfold" test because if a phrase embodies the [*1062] product so completely as to leave no question about its characteristics, it's likely generic, and if it describes only one or a subset of features, the blindfold test would deem it suggestive.

B. Double Entendre

Courts treat double entendre in a mark as signaling suggestiveness ⁿ¹⁴⁶ and often categorize marks that employ double entendre as suggestive. ⁿ¹⁴⁷ In the words of one treatise writer, "If a mark projects a double meaning, it is not merely descriptive." ⁿ¹⁴⁸ Courts, the PTO, and the TTAB, in assessing inherent distinctiveness, often give a pass to a phrase that qualifies as a double entendre, even when it comprises one or more literally descriptive terms. But double entendres are indicia of mark owner creativity, not consumer perception. Case law offers no evidence that employment of double entendre elevates a mark containing descriptive terms from goods-constative to source-constative.

A "double entendre," old French for "twofold meaning," ⁿ¹⁴⁹ is defined as "a word or expression capable of two interpretations" ⁿ¹⁵⁰ or one "that can be interpreted in two ways." ⁿ¹⁵¹ The TMEP defines the term as "an expression that has a double connotation or significance as applied to the goods or services." ⁿ¹⁵² The TTAB has deemed

suggestive, based on their use of double entendre, marks including SHEER ELEGANCE for pantyhose; ⁿ¹⁵³ SUGAR & SPICE for bakery products; ⁿ¹⁵⁴ THE FARMACY for retail store services relating to dietary supplements and nutrition; ⁿ¹⁵⁵ THE SOFT PUNCH for a noncarbonated soft drink; ⁿ¹⁵⁶ NAPSACK for a [*1063] baby carrier with straps; ⁿ¹⁵⁷ HAY DOLLY for a dolly for carrying hay; ⁿ¹⁵⁸ CHIC for jeans; ⁿ¹⁵⁹ MUFFUNS for mini-muffins; ⁿ¹⁶⁰ and L'EGGS for pantyhose. ⁿ¹⁶¹ Federal courts have followed suit, applying the double entendre rule to hold distinctive marks including CHOICE for a health care plan; ⁿ¹⁶² 100% TIME RELEASE MOISTURIZER for skin moisturizer; ⁿ¹⁶³ and POLY PITCHER for a pitcher made of polyethylene. ⁿ¹⁶⁴ A district court credited a double entendre argument sufficiently to leave for a jury the question of whether THE PINT was inherently distinctive for a urinal that only requires one pint of water to flush. ⁿ¹⁶⁵

Practitioners are well-versed in the double entendre exception ⁿ¹⁶⁶ and often make a point to assert the existence of a double entendre when arguing before the TTAB or responding to an office action from the PTO, whether or not the word play is an obvious and intended feature of the mark. ⁿ¹⁶⁷ As one district court explained, "a mark that consists of a double or triple entendre, at least one meaning of which is suggestive, is protectable without proof of secondary meaning." ⁿ¹⁶⁸ Some of the courts that apply this rule interpret the phrase "merely descriptive" quite literally to mean "only descriptive," such that the Lanham Act's prohibition on registering descriptive marks without secondary meaning does not apply if a mark possesses both a descriptive interpretation and an additional, non-descriptive interpretation. ⁿ¹⁶⁹

[*1064] C. Incongruity

Courts and examining attorneys also treat incongruity as "a strong indication that a mark is suggestive rather than merely descriptive." ⁿ¹⁷⁰ A conclusion that a mark is incongruous may result from the unusual combination of two or more words together, in the form of "internally incongruous" marks like REBEL DEBUTANTE for clothing ⁿ¹⁷¹ or CORPORATE FUEL for business consulting services. ⁿ¹⁷² Alternatively, it may result from the use of a term or phrase that is unexpected given the goods in question, "contextually incongruous" marks like CRAZY GOOD for toaster pastries ⁿ¹⁷³ or SNO-RAKE for a tool for removing snow. ⁿ¹⁷⁴ Fact-finders have identified incongruity based merely on the use of descriptive terms in an unexpected order; the Second Circuit held SEASON-ALL inherently distinctive for aluminum storm windows despite acknowledging that ALL-SEASON would be merely descriptive. ⁿ¹⁷⁵ Incongruity apparently can lift a mark into the category of suggestive and thus inherently distinctive marks even when the mark comprises words that might be characterized as descriptive or generic in isolation, as in examples like DESIGNERS PLUS+ for sweaters, ⁿ¹⁷⁶ BRANTREATS for biscuits made with bran, ⁿ¹⁷⁷ GRAPE RANCH for wine, ⁿ¹⁷⁸ and PERFECTING SERUM for moisturizer. ⁿ¹⁷⁹

Incongruity is not considered its own separate test; rather, incongruous marks are usually regarded as suggestive based on the imagination test. For example, the TTAB held SNO-RAKE inherently distinctive for a tool used [*1065] to remove snow, opining that "the idea of a 'rake' or 'raking' . . . sit[s] strange in terms of application to snow." ⁿ¹⁸⁰ It noted that the concept of descriptiveness "should not penalize coinage of . . . incongruous word combinations whose import would not be grasped without some measure of imagination and 'mental pause.'" ⁿ¹⁸¹ The TMEP cites several instructive examples of incongruous marks: TENNIS IN THE ROUND for tennis facilities; ⁿ¹⁸² FRANKWURST for hot dogs; ⁿ¹⁸³ TINT TONE for hair coloring; ⁿ¹⁸⁴ and PARIS BEACH CLUB for t-shirts. ⁿ¹⁸⁵ Here again, the Board's analyses give no real reason to expect an incongruous mark will be source-constative without secondary meaning based on use.

D. Creativity Fallacy

The express goal of the fact-finder assessing a mark's distinctiveness, whether in the context of registration or litigation, is gauging consumer perception of the mark. Yet time and again, trademark examining attorneys, the TTAB, and federal courts are influenced by the perceived creativity of the producer who selected the mark. ⁿ¹⁸⁶ Of course, corporations often invest substantial money and time into devising the perfect mark; they expect it will serve as a source indicator for their goods, and fact-finders may find themselves itching to reward that investment on a theory of desert or

natural rights. ⁿ¹⁸⁷ But it is inappropriate for producer selection to influence evaluation of a borderline mark.

Fact-finders applying some of the tests and proxies discussed above are often seduced by the "creativity fallacy." The semantic gymnastics that enable courts to equate "mere" descriptiveness with a determination that a mark has only one descriptive meaning and no other meanings represents [*1066] the creativity fallacy at work. ⁿ¹⁸⁸ In other cases, fact-finders are unduly swayed by mark owners' use of sophisticated rhetorical devices, from rhyme and allusion to assonance and alliteration. The TTAB, for example, has held not merely descriptive the rhyming marks AIR CARE for maintenance of medical equipment used for administering oxygen, ⁿ¹⁸⁹ BEST REST for mattresses, ⁿ¹⁹⁰ ACTION SLACKS for stretchy pants, ⁿ¹⁹¹ and STRIPE WRITER for pens and markers. ⁿ¹⁹²

Alliteration has also nudged marks from the category of merely descriptive to that of suggestive for some fact-finders. The TTAB has held distinctive COLOR CARE for laundry bleach that protects colored fabrics, ⁿ¹⁹³ CLASSIC COLA for a beverage, ⁿ¹⁹⁴ TINT TONE for hair coloring, ⁿ¹⁹⁵ MASTER MECHANIC for tools, ⁿ¹⁹⁶ FAST FEATURE PLATFORM for telecommunications hardware and software, ⁿ¹⁹⁷ and SNAP SIMPLY SAFER for medical syringes. ⁿ¹⁹⁸ Characterizing LIGHT 'N LIVELY for yogurt as inherently distinctive, the TTAB credited the mark's "alliterative lilting cadence." ⁿ¹⁹⁹ Marks that employ metaphor, synecdoche, and related figures of speech, such as CHICKEN OF THE SEA for canned tuna ⁿ²⁰⁰ and PC ON A STICK for flash drives ⁿ²⁰¹ have also been deemed inherently distinctive. The Fifth Circuit held EXTEND YOUR BEAUTY suggestive for eyelash extensions, relying in part on a belief that the term [*1067] "beauty serves as a metaphor for eyelashes" and "metaphorical usage means the mark is arguably suggestive." ⁿ²⁰²

While the creativity fallacy usually strikes fact-finders unawares, occasionally its application is explicit. The Fifth Circuit characterized its attention to creativity as the converse of the imagination test, suggesting that the selection of a clever mark correlates with the perception that the mark requires consumer imagination:

The imagination test might usefully be reversed by inquiring whether the first user has devised a term of some creativity or cleverness, as opposed to merely selecting a term that anyone might readily have chosen. (Any dunce could come up with a generic term, for example.) Creativity on the part of the mark's inventor is a correlative of imagination on the part of the consumer. ⁿ²⁰³

But does "[c]reativity on the part of the mark's inventor" really correlate with or indicate whether a mark is goods-constative or source-constative? The court gives no reason to believe it does. Whether the marks discussed above are goods-constative or not, focusing on the producer's mark selection process distracts the court from the ultimate issue of consumer perception. The goals of trademark law are better served when fact-finders focus on consumers and competitors in their evaluations of distinctiveness and registrability.

E. Dictionary

The "dictionary test" refers generally to the practice of considering a mark's dictionary definitions in gauging its distinctiveness. ⁿ²⁰⁴ According to the Fifth Circuit, in determining whether a mark is inherently distinctive, "[a] suitable starting place is the dictionary, for [t]he dictionary definition of the word is an appropriate and relevant indication of the ordinary significance and meaning of words to the public." ⁿ²⁰⁵ Some define the test more specifically to refer to the question of whether "the mark's dictionary definition corresponds with its meaning and context," rendering it merely [*1068] descriptive when applied to the mark holder's goods. ⁿ²⁰⁶ For example, a district court held MICROTHIN merely descriptive for condoms, citing a dictionary that defined the term as "extremely or, sometimes, microscopically thin." ⁿ²⁰⁷ The court noted that "[d]ictionary definitions are relevant to determining the placement of a mark on the spectrum of generic to fanciful," and in the case of MICROTHIN, the mark "immediately convey[ed] the intended meaning as to the type of condom sold—one that is extremely thin." ⁿ²⁰⁸

When a mark consists of two or more words, some courts consider the dictionary definition of each component term. ⁿ²⁰⁹ A district court assessing the distinctiveness of the mark WEBSITE GADGET, for example, cited dictionary

definitions for both "gadget" and "website" and concluded that the two terms' definitions were equivalent to the definition of the phrase at issue. The dictionary test thus "indicate[d] ['website gadget'] is a term of ordinary significance and meaning to the public," providing "at least preliminary evidence" of descriptiveness.ⁿ²¹⁰ Other courts query whether the entire phrase is listed in a dictionary and view its absence as an indication that the mark is not merely descriptiveⁿ²¹¹ or disregard the test if the phrase is not found.ⁿ²¹² The Fifth Circuit, considering whether the mark EXTEND [*1069] YOUR BEAUTY was descriptive or distinctive for eyelash extensions, found the dictionary test weighed toward suggestiveness because "[t]he three-word mark, viewed as a whole, has no dictionary meaning."ⁿ²¹³ The same court, evaluating the distinctiveness of the mark BETTER-N-BUTTER, recalled the 'dictionary test' it applied in *Zatarains*, but concluded it was "inapplicable because 'Better-N-Butter' is not a standard dictionary term."ⁿ²¹⁴

Dictionary definitions of a mark's component terms may have some relevance in determining whether a mark is goods-constative or source-constative, as discussed further below. But a dictionary alone does not suffice to establish contemporary usage by consumers and competitors. To better measure whether a given term is used descriptively by a particular group or within a specific industry, fact-finders should consider sources such as consumer reviews, auction websites, search engine queries, social networking platforms, reader comments in response to media coverage, and online message boards, which provide a more complete understanding of a term's meaning to the relevant public.

F. Competitors' Need

The "competitors' need" testⁿ²¹⁵ evaluates the extent to which a term or phrase is needed by competitors to identify their goods or services. For example, the mark WEBSITE GADGET was deemed merely descriptive in part because the district court deemed the component terms "virtually indispensable to the vocabulary of the website industry."ⁿ²¹⁶ According to McCarthy, if a trademark conveys a message about goods that is "so direct and clear that competing sellers would be likely to need to use the term in describing their goods in advertising and promotion," it indicates that the mark is merely descriptive.ⁿ²¹⁷ Conversely, if competitors do not need the [*1070] term or phrase to describe their goods, the mark is less likely to be descriptive. Some courts have asserted an inverse relationship between the imagination test and the competitors' need test: the more imagination required to deduce characteristics of the goods or services, the less likely competitors need to use the same terms within their own trademarks.ⁿ²¹⁸

Of the existing tests for descriptiveness, the competitors' need test comes closest to considering offensive use against competitors and is most closely aligned with the test this Article proposes. Its fatal flaw lies in construing narrowly the question of whether competitors *need* to use the term or terms in describing their goods and servicesⁿ²¹⁹--whether they are "indispensable to the industry"ⁿ²²⁰--rather than whether competitors might choose to use the terms or ought to be free to use them. The Ninth Circuit in *Zobmondo*, for example, applied the competitors' need test in determining whether the mark WOULD YOU RATHER . . . ? is merely descriptive for a board game that asks players to choose between two alternative scenarios. The court found the mark distinctive because "competitors do not *need* to use 'WOULD YOU RATHER . . . ?' to describe their products. They can say 'Would you prefer' or 'Would you most like' or use some other verbal formula to convey a choice of alternatives."ⁿ²²¹ Of course, WOULD YOU MOST LIKE is a rather artless name for a game. Requiring a second-comer to sidestep straightforward terms that describe its goods when the senior user has not instilled those terms with a source-indicating function does not seem justifiable based on the policy goal of avoiding consumer confusion. It simply rewards the first mover for primacy. Protecting descriptive terms without secondary meaning triggers concerns about the land-grab nature of trademark registration.

Another of the pitfalls of the competitors' need test is that courts applying it, like those applying the dictionary test, often consider a phrase in its entirety rather than asking whether competitors might need to use one or more component terms to describe their goods. The Fifth Circuit in *Blendco* deemed the mark BETTER-N-BUTTER for butter-flavored oil suggestive in part because competitors "would not likely need or even find [*1071] useful the exact term 'Better-N-Butter' or a similar term in its name. 'Liquid margarine,' 'buttery blend,' 'I can't believe it's not butter,' or many other terms could be used."ⁿ²²² Given the richness of the English language, fact-finders who want to offer synonyms for competitors' use will always be able to do so unless the mark or its components are actually generic.ⁿ²²³ As the *Zobmondo* and *Blendco* courts make abundantly clear, hypothetical trademarks for potential competitors always exist,

although they may be less appealing or effective than the marks at issue. Laudatory terms, for example, will always fail the competitors' need test due to the wealth of alternative laudatory words.

Members of Congress considered competitors' needs in the context of the fair use defense to allegations of trademark infringement ⁿ²²⁴ and reached a similar conclusion. Where a prior draft of the law suggested that fair use required necessity, a committee member from the House of Representatives articulated the problem of requiring that an infringement defendant show he *needed* to employ a particular term to describe his own goods, rather than that he merely chose to do so:

If, for example, someone should register the term "jackknife," and secure an incontestable right after five years' continuous use, and somebody else came along and in a normal way in his business used the term "jackknife" and this man sued him, and the defendant said, "Why, I am just using the English language," the plaintiff could say, "No; under this provision here you cannot use that term "jackknife" because I have an incontestable right in it." "But," he says, "I am not using it as a trademark. I am using it in a normal way to describe this product." And the plaintiff says, "But it is not necessary to use that word to truthfully describe it. You can use 'Pocket knife.'" Now, if you go along that line and somebody else registers "pocket knife," it would not be long until that man would have a lot of trouble describing his product. ⁿ²²⁵

[*1072] That "jackknife" has not only a finite number of synonyms but a very small number, and that it is a noun rather than an adjective, suggests the possibility that it is generic, rather than descriptive. Yet the same principle applies to flatly descriptive terms like "tasty" for food products, "miracle" for slimming apparel, or "non-stick" for cookware. Whether a given concept has three synonyms or three hundred, a mark owner should not be able to corner the market on a descriptive term and exclude competitors from using it unless and until he can establish that the once goods-constative term has become source-constative.

G. Competitors' Use

The "competitors' use" test, also called the "actual use," "common use," or "extent-of-use" test, asks whether others marketing similar goods or services already use the designation; if they do, the mark is more likely to be found descriptive. ⁿ²²⁶ The competitors' use and competitors' needs test are complementary ⁿ²²⁷--just as actual confusion between two marks is regarded as strong evidence of likelihood of confusion in an infringement analysis, actual use by competitors is regarded as an indication of competitor need.

The Fifth Circuit discussed the policy underlying the competitors' use test in assessing the mark SECURITY CENTER:

We look into actual and likely use of a mark in order to determine whether its protection, i.e., its exclusion from the language freely available for commercial use, interferes with competition among providers of the same product or service. The more users there are of a term, the more its protection in a given case would be commercially disruptive and unfair to competitors. ⁿ²²⁸

[*1073] Like the competitors' need test, the competitors' use test is often applied too narrowly to preserve the ability of future competitors to rely on descriptive terms. The TTAB found the competitors' use test supported reversal of the USPTO determination that the mark CRAZY GOOD was merely descriptive for baked goods. In so doing, the Board interpreted the test to implicate only uses of the phrase by competitors selling the very same type of goods as the applicant and ignored uses in connection with other types of goods. ⁿ²²⁹ The TTAB deemed the mark suggestive even though the record showed that "several sellers of other, largely unrelated products may have made trademark use of this term." ⁿ²³⁰ Such an interpretation is problematic for terms of praise or superiority that could be applied to a variety of goods and services. The use of "crazy good" as slang for "great" by third parties, even if they are non-competitors, indicates that the phrase is laudatory and thus merely descriptive for all goods. Other marks that are not technically

descriptive of goods have been deemed insufficiently distinctive based on competitors' use, such as PEOPLES for banks, ⁿ²³¹ LABRADOR for software, ⁿ²³² BLISS for beauty salons or spas, ⁿ²³³ and puns that play on the term SHEAR for hair cutting services. ⁿ²³⁴

The competitors' use test will also fall short when the mark at issue is used by the first producer to launch or popularize novel goods, such as APP STORE for an online store selling wireless applications, ⁿ²³⁵ **[*1074]** BLUBLOCKER for sunglasses that block blue light, ⁿ²³⁶ or BEANIE BABIES ⁿ²³⁷ for plush animals stuffed with pellets. Some courts have thus rightly questioned the premise that competitors' non-use of a term indicates or reflects consumer perceptions. ⁿ²³⁸ As with the other tests, the competitors' use test offers no evidence that consumers will understand a descriptive mark as goods-constative simply because others don't use the same mark. When numerous competitors use the same terms on similar goods--as Murad, Guerlain, Kinerase, and Lancome all use "perfecting serum" in connection with competing cosmetic products--it provides evidence that the phrase is goods-constative, but we have no reason to believe the converse also holds true. Use by competitors may therefore be helpful in *disproving* distinctiveness, but its mere absence does not prove a mark source-constative.

H. Puffing

It seems reasonable that terms and phrases that are either needed by competitors or are actually used by them should not receive protection without secondary meaning. Those tests will not, however, filter out all goods-constative terms. Laudatory or "puffing" marks are widely recognized as merely descriptive, ⁿ²³⁹ even where competitors do not use, and do not necessarily need to use, the same laudatory terms that their competitors use to describe competing products. The Trademark Manual of Examining Procedure provides that "[l]audatory terms, those that attribute quality or excellence to goods or services, are merely descriptive under [§ 2(e)(1)]." ⁿ²⁴⁰ The Federal Circuit regularly applied the same rule, holding that "[m]arks that are merely laudatory and descriptive of the alleged merit of a product" are not inherently distinctive; "puffing marks are regarded as a condensed form of describing the character or quality of the goods." ⁿ²⁴¹ In one recent case, the Federal Circuit reversed the TTAB and held that it **[*1075]** "legally erred when it concluded that puffery could render [a particular] mark more than descriptive." ⁿ²⁴²

Puffing marks include terms like "best," "superior," and "preferred." ⁿ²⁴³ The TMEP cites exemplars including THE BEST BEER IN AMERICA for beer; ⁿ²⁴⁴ THE ULTIMATE BIKE RACK for bike racks; ⁿ²⁴⁵ QUESO QUESADILLA SUPREME for cheese; ⁿ²⁴⁶ and ORIGINAL BLEND for cat food. ⁿ²⁴⁷ Numerous federal courts purport to apply the same rule; the Ninth Circuit opined that when a word mark constitutes "self-laudatory advertising," that advertising weighs against a finding that the mark is suggestive, ⁿ²⁴⁸ while an S.D.N.Y. opinion states definitively that "laudatory and descriptive words . . . do not qualify for trademark protection." ⁿ²⁴⁹ Other laudatory marks held merely descriptive include SUPER LAUNDRY for laundry-related services; ⁿ²⁵⁰ NUMBER ONE IN FLOORCARE for vacuum cleaners; ⁿ²⁵¹ TASTEMAKERS for a publication; ⁿ²⁵² TRADITIONAL for feta cheese; ⁿ²⁵³ and THE GREATEST BAR for bar and restaurant services. ⁿ²⁵⁴

Categorizing laudatory marks as descriptive appears to comport with the various tests used to determine distinctiveness--laudatory terms purport to directly describe the goods or services (whether they do so accurately or not). Laudatory marks convey their desired message without requiring much imagination; competitors often use the same terms for their own products; and laudatory terms should remain "freely available to all competitors in any given field to refer to their products or services." ⁿ²⁵⁵ Ultimately, though, the "rule" cannot accurately guide applicants and litigants in predicting outcomes, because the same courts that recite it **[*1076]** regularly defy it. In recent years, the following apparently--often admittedly--laudatory marks have been held inherently distinctive: BEER 1 for beer; ⁿ²⁵⁶ SUPER IRON for iron supplements for soil; ⁿ²⁵⁷ RAPIDSHAVE for shaving cream; ⁿ²⁵⁸ HEARTWISE for low-cholesterol foods; ⁿ²⁵⁹ MASTER MECHANIC for tools; ⁿ²⁶⁰ BEST REST for mattresses; ⁿ²⁶¹ BETTER-N-BUTTER for a butter substitute; ⁿ²⁶² ULTRACATH for catheters; ⁿ²⁶³ and STEAK UMM for meat. ⁿ²⁶⁴ The general rule that laudatory marks are not inherently distinctive is consistent with the speech-act theory of distinctiveness, but the problem lies in fact-finders' lack of adherence to it.

I. Intentional Fallacy

The creativity fallacy has a counterpart in the intentional fallacy.ⁿ²⁶⁵ Theoretically, as the Third Circuit has noted, "In classifying a mark, the Court does not look to the intent of the party choosing that mark. Instead, the impact of the mark on the minds of prospective consumers is controlling."ⁿ²⁶⁶ Nonetheless, a number of courts and boards seeking to determine whether a mark is inherently distinctive or merely descriptive have explicitly weighed the intent of the mark owner in selecting the mark, [*1077] using intent as a proxy for consumer perception. Underlying the intentional fallacy is the rationale that "if the proponent of trademark status himself uses the mark as a descriptive term, [it] is strong evidence of descriptiveness,"ⁿ²⁶⁷ and perhaps vice-versa.

Evidence of the intentional fallacy abounds. The First Circuit found "5 Minute" epoxy descriptive based in part on testimony by the company's president that "he called his product '5 Minute' epoxy because [the company was] trying to give the customer an idea that it sets up in about five minutes' time."ⁿ²⁶⁸ A district court in the same circuit held UNLEASHED merely descriptive for dog-walking services, citing the defendant's statement that "'Unleashed' was meant to be 'a description of what we were doing and what we felt described the services and products we offered.'"ⁿ²⁶⁹ Another district court held SINU CLEANSE merely descriptive based on testimony that the company selected the mark because it "described better the cleaning or cleansing process."ⁿ²⁷⁰ Yet another based its finding of descriptiveness in part on deposition testimony that the mark owner considered the mark descriptive.ⁿ²⁷¹

While it may seem rational to be guided by a company's understanding of its own mark in determining that mark's distinctiveness, that consideration offers no insight as to whether a mark is goods-constative or source-constative to consumers. The intentional and creativity fallacies exemplify the "uptake error": just as some performatives require audience reaction, a mark cannot be source-constative without consumers perceiving it as an indication of source. A term or phrase is not an effective or ineffective trademark as a result of the wishes or mental processes of the person who devised it, but only as a result of how consumers view it.

IV. THE SPEECH-ACT TEST FOR INHERENT DISTINCTIVENESS

The tests discussed in the preceding section fail because they privilege producers' interests over those of competitors, because they inappropriately reward producers for creating clever word combinations out of descriptive and generic terms, and because they are simply too vague and ill-defined to provide clear and consistent guidance to courts, the TTAB, trademark examining attorneys, and new entrants. The speech-act test for inherent distinctiveness offers a single question that prizes competition and clarity [*1078] and directs fact-finders' attention to contemporary consumer usage of descriptive terms. It simply asks whether a hypothetical competitor could use one or more of the trademark's component terms in good faith to describe its own product if the term is defined in accordance with contemporary usage. This test borrows from existing fair use doctrine to bring fair use concerns to the forefront of the distinctiveness analysis. I first describe the fair use defense and then propose an adaptation to remedy the above-described pathologies of existing approaches.

A. The Statutory Fair Use Defense

Section 33(b)(4) of the Lanham Act provides a fair use defense to an allegation of infringement where "the use of the name, term, or device charged to be an infringement is a use, otherwise than as a mark . . . of a term or device which is descriptive of and used fairly and in good faith only to describe the goods or services of such party."ⁿ²⁷² A junior user charged with trademark infringement who pleads statutory fair useⁿ²⁷³ argues that the word or phrase is used to describe the product, geographic origin, creator, or some other aspect of the junior user's goods or services and not used as a mark.ⁿ²⁷⁴ For example, when a party described its comfortable women's dress shoe by telling consumers that the shoe "feels like a sneaker," the Second Circuit affirmed that such a descriptive use did not infringe plaintiff's registered mark LOOKS LIKE A PUMP, FEELS LIKE A SNEAKER because the defendant's use qualified as a fair use under the Lanham Act.ⁿ²⁷⁵ Likewise, the Seventh Circuit held that the use of the term "sweet-tart" to describe the flavor of cranberry juice did not infringe the trademark SWEETARTS for candy,ⁿ²⁷⁶ and the Fifth Circuit held a defendant's use

of "fish fry" to describe a batter coating for fish non-infringing, [*1079] despite the plaintiff's rights in the mark FISH-FRI for a competing batter. ⁿ²⁷⁷

Courts have construed the statutory fair use defense to comprise three elements: the defendant must use the term or phrase (1) other than as a trademark or service mark; (2) "fairly and in good faith"; and (3) "only to describe" its goods or services. ⁿ²⁷⁸ Thus, in considering whether the use of the phrase "thirst aid" as part of the slogan "Gatorade is thirst aid" infringed the plaintiff's THIRST AID trademark, the Seventh Circuit considered the prominence of the phrase and the use of rhyme in creating a catchy slogan and held that the defendant's use of "thirst aid" constituted use as a mark, rendering the defendant ineligible for the fair use defense because its use failed to satisfy the first element of the test. ⁿ²⁷⁹ The good faith required by the second element has been interpreted to require that the defendant did not intend to create source confusion or capitalize on the plaintiff's goodwill. ⁿ²⁸⁰

The third element, whether a mark is used to describe the goods, is construed broadly. According to McCarthy, a fair use defendant's use of a term "need not literally describe a characteristic of the goods, but can fit within the defense if its use is descriptive in a broader sense." ⁿ²⁸¹ For example, the Second Circuit held that a lipstick seller could use the phrase "Seal it with a kiss!" on a countertop display that invited consumers to kiss a postcard without infringing on plaintiff's trademark SEALED WITH A KISS for lip gloss. ⁿ²⁸² Likewise, the maker of beauty products could use "love potion" to describe the effects of its products on others without infringing the plaintiff's mark LOVE POTION for perfume. ⁿ²⁸³ The Ninth Circuit held an apparel manufacturer could sell tank tops featuring the word "delicious" without infringing plaintiff's mark DELICIOUS for shoes. ⁿ²⁸⁴

[*1080] As William McGeveran and other commentators have argued, the safeguards for fair use offer too little protection, and come into play too late, to adequately protect speech. ⁿ²⁸⁵ High-profile infringement cases involving fair use almost always reach the correct outcome; when courts consider the merits, "the defendant's free speech arguments ultimately carry the day." ⁿ²⁸⁶ And yet we cannot be lulled into a false sense of complacency based on those outcomes:

[O]nly a tiny fraction of disputes actually reach litigation and become eligible for a happy ending Considerable anecdotal evidence suggests that the real action occurs outside the courthouse: markholders send cease-and-desist letters and threaten legal action against those using trademarks to facilitate speech, and the recipients frequently capitulate. We need not devote too much energy to improving the courts' ability to reach the correct substantive outcomes in the final judgment at the end of a lawsuit. They already do. Rather, the priority should be restructuring the relevant doctrines to reduce the pre-litigation chilling effect. ⁿ²⁸⁷

McGeveran focuses his attention primarily on restructuring the fair use doctrine and refining its application by courts, working toward "clearer rules and faster adjudication." ⁿ²⁸⁸ The speech-act theory of trademark distinctiveness advocates addressing the problems McGeveran identifies by intervening at the outset, incorporating fair use goals into the registration process. The pre-litigation chilling effect ⁿ²⁸⁹ can impact a potential new entrant as early as the mark selection stage, all because a producer succeeded in registering a mark with descriptive components without being required to demonstrate acquired distinctiveness. ⁿ²⁹⁰ Cease and desist letters [*1081] posted to the Chilling Effects Clearinghouse ⁿ²⁹¹ reflect the frequency of this scenario, and they likely represent only a very small fraction of the letters producers send each year.

Rather than fine-tune the fair use test as a defense to an allegation of infringement, this Article proposes moving it up in time, applying some of its elements when owners initially apply to register trademarks. While the existing approach to categorizing distinctive marks emphasizes only producer interests, putting fair use first will help ensure that useful descriptive terms remain available to second comers, which in turn serves competition by maximizing both competitors' ability to effectively explain what they're selling, and consumers' access to information about alternatives.

B. Fair Use First

The Subparts above have detailed the ways in which the existing formal tests and informal proxies for gauging distinctiveness tend to overprotect descriptive terms, handicapping competitors' ability to compete fairly. A speech-act approach to distinctiveness would preclude some of those problems by refocusing the distinctiveness inquiry on more appropriate questions, such as how the public views and uses the term and whether granting trademark rights in it would affect competitors.

The speech-act distinctiveness inquiry closely resembles the statutory fair use defense. It borrows two of three elements from that defense: the descriptive and good faith elements.ⁿ²⁹² The test simply asks whether a hypothetical competitor could use any of the terms that compose the producer's mark (1) in good faith and (2) descriptively in connection with the competitor's own product. If the answer to both questions is "yes," the original mark is not inherently distinctive and should not be registered without a showing of secondary meaning. Simply stated, words that are descriptive enough to be used by a junior user on or in connection with related goods, without the junior user seeking to pass off its goods as those of the senior user, belong in the pool for competitors to use until the senior user has made use sufficient to lead consumers to view the mark as an indication of source. The descriptive or laudatory terms must remain available for new entrants until the producer has invested sufficient time, [*1082] money, and effort to create a source-constative mark. Until then, competition should take priority.

The rule of doubt that mandates holding a mark inherently distinctive where the mark appears to occupy the liminal space between descriptiveness and distinctiveness must be reversed. When in doubt, the PTO, TTAB, and federal courts should categorize such marks as non-distinctive. Descriptive terms communicate information, which is nonrival.ⁿ²⁹³ Laudatory terms constitute puffery and are not inherently source identifying, but rather serve to advertise the product. The option to oppose a mark on the grounds of mere descriptiveness after it passes to publication is rarely exercised by small business owners and places too great a burden on competitors to act as watchdogs. Rather, producers should bear the burden of either establishing that a mark is clearly distinctive or demonstrating secondary meaning. The harm to competition when goods-constative marks are granted protection is far greater than the harm to producers when a borderline mark is deemed descriptive and secondary meaning required. If the mark indeed has the capacity to function as a source identifier, a producer need merely proceed to market and advertise its goods in the ordinary course of business, and it will soon be able to demonstrate secondary meaning.

It's crucial that the determination of whether a hypothetical competitor could use a given term descriptively in connection with its own product be based on evidence of whether and how the trademark term is used by the public. Consulting only dictionaries and prior registrations--as several of the current tests advocate--doesn't suffice. Fortunately, fact-finders have access to a wealth of evidence with which to catalogue usage. In recent cases, trademark examining attorneys have looked to online message boards,ⁿ²⁹⁴ blogs,ⁿ²⁹⁵ consumer reviews,ⁿ²⁹⁶ auction sites, industry or community norms,ⁿ²⁹⁷ periodicals,ⁿ²⁹⁸ and Twitter to gauge whether a term is [*1083] descriptive for a given product category. The speech-act model demonstrates why that type of evidence is necessary to determine whether a phrase is source-constative and merits protection.

Consider earlier examples. In the case of PERFECTING SERUM, the TTAB acknowledged use by competitors but dismissed it, noting "there are only two other users of the term at issue."ⁿ²⁹⁹ But if a prospective purchaser runs a search for "perfecting serum" on a popular site geared toward consumer reviews of beauty products and finds that users' posts discuss three or more different brands of products called "perfecting serum"ⁿ³⁰⁰ or use the phrase to refer to a whole class of products, then "perfecting serum" is functioning as a goods-constative phrase. Consumers understand it and use it to describe a product, not that product's source, so competitors should be free to use the term descriptively under the speech-act test. Instead, the registration for PERFECTING SERUMⁿ³⁰¹ empowers its owner to use the mark offensively, suing any competitors that use the phrase, which is exactly what Murad has done and continues to do.

BRANTREATS was also among the marks allowed registration without a showing of secondary meaning, and neither "bran" nor "treats" is disclaimed in the registration.ⁿ³⁰² But "bran" is an ingredient, and "treat" is laudatory. Could a new entrant use "bran" or "treats" (or both) for its cookies in good faith, without attempting to pass off its product as Almondina's? A quick search shows that the general public indeed uses both terms, sometimes at the same

time, to describe baked goods: Google results for the search "bran treats" returns recipes for homemade "bran treats,"ⁿ³⁰³ "peanut butter bran treats,"ⁿ³⁰⁴ "sweet pecan bran treats,"ⁿ³⁰⁵ "blueberry bran breakfast treats,"ⁿ³⁰⁶ "all bran treats,"ⁿ³⁰⁷ "chocolate bran [*1084] treats,"ⁿ³⁰⁸ "bran muffin treats,"ⁿ³⁰⁹ and many more. The use of both terms in those recipes belies the TTAB's assertion that "BRANTREATS is an incongruous term when used in connection with a biscuit made of a cereal by-product"ⁿ³¹⁰ unless the Board defines competitors' use so narrowly that the goods must be nearly identical--flat, crispy, biscotti-shaped cookies--to qualify as competitive products. BRANTREATS is thus goods-constative unless and until it becomes source-constative through use.

When the owner of a winery in Oklahomaⁿ³¹¹ applied to register GRAPE RANCH for wine, the examining attorney issued multiple office actions, denying registration on the basis that the mark was merely descriptive.ⁿ³¹² She appended over a dozen Internet screenshots demonstrating that numerous other wineries used the words "ranch" or "grape" on their wine bottles' labels or websites and at least two sources used the phrase "grape ranch" in a descriptive or generic sense.ⁿ³¹³ She also appended a number of prior registrations reflecting disclaimers of exclusive rights to "ranch" or "grape" as part of a word mark for wine.ⁿ³¹⁴ The applicant appealed and the TTAB reversed the refusal, holding the mark inherently distinctive because it was incongruous as applied to wine.ⁿ³¹⁵ But if the TTAB had applied the speech-act test rather than the imagination test, it would have affirmed the trademark examining attorney's refusal based on the latter's own evidence. Hypothetical users could--and in fact already do--use each component term descriptively and in good faith in connection with their own wines.

Finally, we return to SNO-RAKE. A search for "snow rake" on amazon.com returns hundreds of results, including an Avalanche! brand [*1085] "snowrake," a Garelick brand "snow roof rake,"ⁿ³¹⁶ a Sno-Knife brand "snow removal tool rake,"ⁿ³¹⁷ a Suncast brand "snow roof rake,"ⁿ³¹⁸ a Midwest Rake brand "aluminum snow removal roof rake,"ⁿ³¹⁹ and a Garant brand "Poly Blade Aluminum Handle Snow Roof Rake With 16-Foot Reach."ⁿ³²⁰ In fact, Amazon features an entire product category called "snow rakes." The TTAB speculated that no one uses "rake" as his verb or noun of choice for snow clean-up, but it did not offer any evidence for its assertion.ⁿ³²¹ At least today, competitors and consumers clearly use "snow rake" goods-constatively. A competitor could thus use "rake," with or without "snow," in good faith to describe its own snow removal products, rendering the mark merely descriptive under the speech-act test.

CONCLUSION

Commentators have described the anti-competitive and chilling effects of granting extensive protection to owners of trademarks that comprise descriptive or generic terms.ⁿ³²² It is clear, however, that the tests for descriptiveness and distinctiveness often lead trademark examining attorneys, the TTAB, and federal courts to protect as inherently distinctive marks that are purely descriptive or contain descriptive elements and lack both secondary meaning and appropriate disclaimers. Because the tests are ill-defined and haphazardly-applied, their use "exacerbate[s] rather than ameliorat[es] the chilling effect."ⁿ³²³ The Supreme Court has acknowledged that "Competition is deterred . . . not merely by successful suit but by the [*1086] plausible threat of successful suit."ⁿ³²⁴ In fact, competition is also deterred by the threat of expensive and lengthy litigation, even when plaintiffs are ultimately unlikely to succeed.ⁿ³²⁵

Speech-act theory offers the crucial insight that a trademark is not just a word; it's also an action. Trademarks have both semantic force and legal force, and the latter is too often used to silence competitors by forcing them to sidestep the clearest and most obvious terms in describing and marketing their goods. Protecting descriptive terms as marks when they lack secondary meaning divorces action from speech. It enables a producer to exploit the benefits of mark ownership without the mark having legally earned protection.

In order to safeguard competitors' rights, we must repair the speech-act connection by ensuring that descriptive terms remain in the pool for use by competitors, with a narrow exceptionⁿ³²⁶ for those marks that have become source-constative through use. The best way to accomplish that goal is to bring concerns about competitor speech to the fore when evaluating trademarks that contain descriptive terms. Could a hypothetical competitor use one or more of the trademark's component terms, defined in accordance with contemporary usage, literally and in good faith to describe its own product? If it could, the mark remains goods-constative until its owner can establish that it has become

source-constative. Only then does the Lanham Act empower the mark owner to use the mark performatively.

n15 15 U.S.C. § 1115(b)(4) (2006). A "trademark use" refers to the use of a mark as a source indicator in connection with goods or services. For example, if a water bottle is labeled "Dasani purified water," the company is likely making a trademark use of "DASANI" but not of "purified water."

n16 *Id.*

n17 Common law rights based on the use of a distinctive trademark are enforceable under the Lanham Act, although registration of a mark on the Principal Register provides additional rights and privileges. For example, registering a trademark gives rise to a rebuttable presumption of validity. 15 U.S.C. § 1115(a) (2006); *Leelanau Wine Cellars, Ltd. v. Black & Red, Inc.*, 502 F.3d 504 (6th Cir. 2007). When an infringement plaintiff has not registered its mark, it bears the burden of persuasion that the mark is protectable. See Raymond I. Geraldson, Jr., Mark V.B. Partridge & Joseph N. Welch, *Developments in Trademark and Unfair Competition Law: In the Courts, the Patent and Trademark Office and Before the Trademark Trial and Appeal Board*, 24 J. MARSHALL L. REV. 1, 12 (1990), for a discussion of other benefits of registration.

n18 The PTO and TTAB most often consider inherent distinctiveness in determining whether a mark may be registered on the Principal Register without a showing of secondary meaning. Federal courts typically consider it in the context of infringement litigation, where distinctiveness can have a substantial effect on the outcome of a likelihood of confusion analysis. *See, e.g.*, Edward J. Heath & John M. Tanski, *Drawing the Line Between Descriptive and Suggestive Trademarks*, COM. & BUS. LIT., Sept. 2010, at 11.

n19 *In re Classic Beverage, Inc.*, 6 U.S.P.Q.2d 1383, 1386 (T.T.A.B. 1988) (requiring disclaimer of "cola").

n20 *In re David Crystal, Inc.*, 145 U.S.P.Q. 95 (T.T.A.B. 1965).

n21 SNO-RAKE, Registration No. 1,252,181; *In re Shutts*, 217 U.S.P.Q. 363 (T.T.A.B. 1983).

n22 *See* Jake Linford, *Trademark Owner as Adverse Possessor*, 63 CASE W. RES. L. REV. 703, 706 n.6 (2013) (arguing that the trademark doctrine providing for rights in descriptive trademarks resembles the real property doctrine of adverse possession and observing "the trademark owner takes a defensive posture against encroachment similar to that taken by a real property owner to forestall adverse possession" (citing Laura A. Heymann, *The Grammar of Trademarks*, 14 LEWIS & CLARK L. REV. 1313, 1318 (2010))). Gallagher's

interviews with IP attorneys reveal that the language of real property often dominates discussions of trademark protection: "When referring to trademark examples, the most frequently used phrases [by interviewees] included the 'need to build a fence around' their client's trademark, or to 'wall off' and protect a mark in order to keep it distinct in the marketplace." *Supra* note 11 at 491.

n23 On the contrary, blog comments and media coverage make abundantly clear that consumers do not perceive STEAK BOMB as an indication of source. *See* comments at Duckler, *supra* note 2; Eick, *supra* note 4; *N.H. Shop Claims Ownership of 'Steak Bomb' Sandwich*, BOS. HERALD, Aug. 29, 2007.

n24 *See generally* Suman Naresh, *Incontestability and Rights in Descriptive Trademarks*, 53 U. CHI. L. REV. 953, 982 (1986) ("[M]onopolization of descriptive marks by particular sellers would seriously disadvantage their competitors by creating formidable informational barriers between the competitors and their potential customers."). As a result, "buyers experience greater difficulty and incur higher costs in obtaining the information necessary to make optimal purchasing decisions among similar products." *Id.* at 992; *see also* Maya Alexandri, *The International News Quasi-Property Paradigm and Trademark Incontestability: A Call for Rewriting the Lanham Act*, 13 HARV. J.L. & TECH. 303, 327-28 (2000) ("[M]onopolies in descriptive marks can lead to increased start-up or marketing costs, endow one firm with an unfair competitive advantage, and, in extreme cases, enable a firm to engage in predatory pricing.").

n25 *See* Robert G. Bone, *Enforcement Costs and Trademark Puzzles*, 90 VA. L. REV. 2099 (2004) (discussing why trademark law has evolved to protect inherently distinctive marks without requiring proof that they function as source indicators).

n26 J. L. AUSTIN, *HOW TO DO THINGS WITH WORDS* 25 (2d ed., William James Lectures, J. O. Urmson and Marina Sbisa, eds. 1962); *see also* JOHN R. SEARLE, *SPEECH ACTS: AN ESSAY IN THE PHILOSOPHY OF LANGUAGE* 54-55 (1969).

n27 Despite the prevalence of terms like "utterance" and "speech" throughout Austin's work, speech-act theory can and has been applied to written language. *E.g.*, Kepa Korta & John Perry, *Pragmatics*, in *THE STANFORD ENCYCLOPEDIA OF PHILOSOPHY* (Edward N. Zalta ed., Summer 2011 ed.); Kent Bach, *Speech Acts*, in *ROUTLEDGE ENCYCLOPEDIA OF PHILOSOPHY* (2011).

n28 *See, e.g.*, Peter Meijes Tiersma, *The Language of Offer & Acceptance: Speech Acts & the Question of Intent*, 74 CAL. L. REV. 189 (1986); *see also* Janet E. Ainsworth, *In a Different Register: the Pragmatics of Powerlessness in Police Interrogation*, 103 YALE L.J. 259 (1993); Martin F. Hansen, *Fact, Opinion, & Consensus: The Verifiability of Allegedly Defamatory Speech*, 62 GEO. WASH. L. REV. 43 (1993); B. Jessie Hill, *Putting Religious Symbolism in Context: A Linguistic Critique of the Endorsement Test*, 104 MICH. L. REV. 491 (2005); Laura E. Little, *Hiding with Words: Obfuscation, Avoidance, & Federal Jurisdiction Opinions*, 46 UCLA L. REV. 75 (1998); Jonathan Yovel, *What is Contract Law 'About'? Speech Act Theory and a Critique of 'Skeletal Promises'*, 94 NW. U. L. REV. 937 (2000).

n29 See Austin, *supra* note 26. Austin provides several illuminating examples of performatives: a ship owner announces, "I christen this ship the Harper's Ferry" and kicks away the chocks; a dying man states, "I give and bequeath my watch to my brother"; an umpire pronounces a base-runner "out" at third base.

n30 *Id.* at 25 (emphasis added).

n31 JONATHAN CULLER, *LINGUISTIC THEORY: A VERY SHORT INTRODUCTION* 101-102 (2011).

n32 AUSTIN, *supra* note 26. Austin uses the term "felicitous" (or "happy") to describe a successful or effective performative utterance and "infelicitous" to characterize a performative utterance that fails to achieve its intended result.

n33 CULLER, *supra* note 31, at 101.

n34 See 3 LOUIS ALTMAN & MALLA POLLACK, *CALLMANN ON UNFAIR COMPETITION, TRADEMARKS, AND MONOPOLIES* § 18:13 n.13 (4th ed. 2011) (comment by author Altman) ("The fundamental import of the term 'descriptive' . . . is antithetical to the notion of source-significance.").

n35 See AUSTIN, *supra* note 26, at 9 ("[F]or a bet to have been made, it is generally necessary for the offer of the bet to have been accepted by a taker (who must have done something, such as to say 'Done').").

n36 See Justin Hughes, *Group Speech Acts*, 7 *LINGUISTICS AND PHIL.* 379 (1984) (discussing performative utterances by groups).

n37 See *infra* Part II.A for a discussion of mark categories and the distinctiveness spectrum.

n38 The application to register TASTY SELECTIONS for "[c]akes, cookie dough, and muffin batter" on the Principal Register was abandoned after the PTO issued a non-final office action refusing registration based on descriptiveness under 15 U.S.C. § 1052(e)(1). U.S. Trademark Application Serial No. 85,422,053 (filed Sept. 14, 2011), *available at* <http://tdr.uspto.gov>.

n39 Neutrogena registered NEUTROGENA TRIPLE MOISTURE for "[h]air care preparations" but, at the PTO's instruction, disclaimed "the exclusive right to use TRIPLE MOISTURE apart from the mark as shown." NEUTROGENA TRIPLE MOISTURE, Registration No. 28,676,08. The PTO often requires a disclaimer as a condition of registration when a mark contains one or more terms that are descriptive or generic. *See In re Stereotaxis, Inc.*, 429 F.3d 1039, 1041 (Fed. Cir. 2005). According to the Trademark Manual of Examining Procedure [hereinafter TMEP], "[t]he purpose of a disclaimer is to permit the registration of a mark that is registrable as a whole but contains matter that would not be registrable standing alone, without creating a false impression of the extent of the registrant's right with respect to certain elements in the mark." TMEP § 1213 (9th ed. Oct. 2013); *see also* Ashlyn Lembree, *Marking Territory: An Empirical Study Concerning the Tightening of Trademark Claim Space on the USPTO Register*, INTELL. PROP. TODAY (May 2011).

n40 AUSTIN, *supra* note 26, at 8.

n41 *See* Thomas R. Lee, Eric D. DeRosia, & Glenn L. Christensen, *An Empirical and Consumer Psychology Analysis of Trademark Distinctiveness*, 41 ARIZ. ST. L.J. 1033 (2004) (suggesting that consumers often perceive even merely descriptive terms as trademarks when they appear on product packaging with various non-semantic indicia of trademark use, such as large font size, prominent location, capitalization, and color).

n42 Similarly, Jeanne Fromer points out that a trademark must be "socially appropriate" for the goods and services to which it is applied: "Once a mark is selected and used, society will find it either helpful and it will be a successful--and thus appropriate--mark or unhelpful as a source indicator. In the latter case . . . trademark law frequently steps in to deny protection for the link." Jeanne C. Fromer, *The Role of Creativity in Trademark Law*, 86 NOTRE DAME L. REV. 1885, 1906 (2011).

n43 *See generally* WILLIAM M. LANDES & RICHARD A. POSNER, *THE ECONOMIC STRUCTURE OF INTELLECTUAL PROPERTY LAW* 173 (2003) ("[In t]he implicit economic model that guides that law . . . trademarks lower consumers' search costs by providing them with valuable information about brands and encourage quality control . . ."); William M. Landes & Richard A. Posner, *The Economics of Trademark Law*, 78 TRADEMARK REP. 267 (1988); *see also, e.g.*, *Ty Inc. v. Perryman*, 306 F.3d 509, 510 (7th Cir. 2002) ("The fundamental purpose of a trademark is to reduce consumer search costs by providing a concise and unequivocal identifier of the particular source of particular goods," giving producers an incentive to invest in products and maintain quality.).

n44 Greg Lastowka, *Trademark's Daemons*, 48 HOUS. L. REV. 779, 785 (2011).

n45 Mark P. McKenna, *The Normative Foundations of Trademark Law*, 82 NOTRE DAME L. REV. 1839, 1858-60 (2007), (arguing that trademark law was designed to protect producers, rather than consumers); *see also* Fromer, *supra* note 42, at 1891 ("[Nineteenth-century trademark law] focused primarily on protecting producers from competitors' illegitimate interference with their trade rather than on the consumer."); Lastowka, *supra* note 44, at 785.

n47 15 U.S.C. §§ 2(a), 2(e)(1), 2(e)(3) (2006).

n48 *Id.* at § 2(a)

n49 *E.g.*, *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418, 428 (2003) (citation omitted), *superseded by statute*, Trademark Dilution Revision Act of 2006, Pub. L. No. 109-312, § 2, 120 Stat. 1730, 1730 (2006) (codified at 15 U.S.C. § 1125 (2006)) ("[Trademark law] protects consumers from being misled by the use of infringing marks[.]"); *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 163-64 (1995) (explaining that trademark protection "reduce[s] the customer's costs of shopping and making purchasing decisions" and ensures mark owners "reap the financial, reputation-related rewards associated with a desirable product"); *Two Pesos, Inc. v. Taco Cabana, Inc.*, 505 U.S. 763, 773 (1992) (noting that the purpose of trademark protection is "preventing deception and unfair competition"); *see also* S. REP. NO. 79-1333, at 3 (1946), *reprinted in* 1946 U.S.C.C.A.N. 1274, 1274 ("The purpose underlying any [trademark] statute is . . . to protect the public so that it may be confident . . . it will get the product which it asks for and wants to get . . . [and to] protect[] [a mark owner] in his investment from its misappropriation by pirates and cheats."); 1 J. THOMAS MCCARTHY, MCCARTHY ON TRADEMARKS AND UNFAIR COMPETITION § 2:1, at 2-3 (4th ed. 2011) (explaining that the basic policy behind trademark law is to protect consumers from deception but that a producer's "interest in not having the fruit of his labor misappropriated should not be disregarded"); Michael Grynberg, *The Judicial Role in Trademark Law*, 52 B.C. L. REV. 1283, 1287 (2011) ("The view that trademark law vindicates both buyer and seller interests is old."); McKenna, *supra* note 46, at 847 ("Trademark law has long struggled to balance the interests of consumers and producers.").

n50 Genericism doctrine, on the other hand, prioritizes competition.

n51 Requiring applicants to demonstrate secondary meaning in order to register or enforce an arguably descriptive mark often increases costs for those applicants, however.

n52 Consumers have no standing to oppose or cancel the registration of a mark on the basis that it is merely descriptive. As Michael Grynberg has argued, consumers aren't technically represented in infringement litigation either, yet their interests are front and center as fact finders seek to gauge the likelihood of their confusion. Michael Grynberg, *Trademark Litigation as Consumer Conflict*, 83 N.Y.U. L. REV. 60, 73 (2008).

n53 The Official Gazette is available in PDF form at the USPTO official website, http://www.uspto.gov/news/og/trademark_og/index.jsp.

n54 In order to show standing, a petitioner must allege that it has a direct stake in the outcome and could be harmed by the registration of the mark it seeks to cancel.

n55 After five years have elapsed, marks can still be canceled on certain grounds, but many marks achieve incontestable status five years after registration and are then protected from challenge based on mere descriptiveness. *Park 'N Fly, Inc. v. Dollar Park & Fly, Inc.*, 469 U.S. 189 (1985).

n56 See Lisa P. Ramsey, *Descriptive Trademarks and the First Amendment*, 70 TENN. L. REV. 1095, 1165 (2003) ("Although competitors have five years to challenge a registered descriptive mark before it can become incontestable, time and money are required to monitor trademark registrations and file opposition proceedings with the PTO. It is even more unlikely that general members of the public and possible future competitors will monitor PTO registrations to ensure that descriptive words remain available for use by everyone in a particular industry."). While some large firms retain a third party to monitor the Gazette for trademarks that might be confusingly similar to those in their portfolios, merely descriptive marks are harder to screen, and potential new entrants who have not yet begun to compete with a mark holder are unlikely to be attuned to the process. See U.S. PATENT & TRADEMARK OFFICE, DEPT OF COMMERCE, TRADEMARK LITIGATION TACTICS AND FEDERAL GOVERNMENT SERVICES TO PROTECT TRADEMARKS AND PREVENT COUNTERFEITING 7 (Apr. 2011), available at http://www.uspto.gov/ip/TMLitigationReport_final_2011April27.pdf.

n57 The tests and heuristics used to evaluate distinctiveness and descriptiveness are discussed *infra* at Part III.

n58 See Bone, *supra* note 25, at 2114 (noting that when trademark law protects a descriptive word, such as FISH-FRI for a batter mix used to fry fish, there is a risk that competing firms will have difficulty finding other words to use as trademarks to describe the same features of

their products. A trade-mark like FISH-FRI is more than a device to communicate to consumers product information acquired through advertising, experience, or word of mouth; the word itself communicates information directly. A firm with exclusive rights to a descriptive word like FISH-FRI therefore gets an immediate advertising advantage.); *see also* Michael S. Mireles, Jr., *Towards Recognizing and Reconciling the Multiplicity of Values and Interests in Trademark Law*, 44 IND. L. REV. 427, 448 (2011).

n59 *See* Ramsey, *supra* note 56 (arguing that granting exclusive rights in descriptive trademarks violates the First Amendment and asserting that the government should protect trademark rights only in inherently distinctive marks).

n60 Designs, colors, scents, packaging, product configuration, and other non-semantic elements that indicate source can also be protected as trademarks or trade dress. While "descriptiveness" and "distinctiveness" are not without meaning in assessing non-semantic marks, this Article focuses on word marks. Some of its principles, however, may apply with equal force to non-semantic marks.

n61 TMEP § 1209.01 (9th ed. Oct. 2013). *But see* Barton Beebe, *Search and Persuasion in Trademark Law*, 103 MICH. L. REV. 2020, 2029 (2005) ("As perceived by a given consumer, a trademark either is or is not source distinctive; it either qualifies for protection or it does not. The difference between the mark which is source distinctive and the mark which is not is a difference of kind, not degree.").

n62 *See, e.g.,* Flynn v. AK Peters, Ltd., 377 F.3d 13, 19 (1st Cir. 2004); First Sav. Bank, F.S.B. v. First Bank Sys., Inc., 101 F.3d 645, 655 (10th Cir. 1996); Sara Lee Corp. v. Kayser-Roth Corp., 81 F.3d 455, 464 (4th Cir. 1996).

n63 Many commentators have questioned this assumption in recent years. *See, for example,* Rebecca Tushnet's discussion of the mark VIAGRA, ostensibly a fanciful mark but carefully architected to connote virility and vigor and to conjure images of Niagara Falls. Rebecca Tushnet, *Looking at the Lanham Act: Images in Trademark and Advertising Law*, 48 HOUS. L. REV. 861, 871-72 (2011).

n98 Serial No. 85/027087 was published in the Principal Register on August 28, 2012, after the TTAB held the mark not merely descriptive. *In re HEB Grocery Co.*, 2012 WL 2930644, at *5 (T.T.A.B. June 29, 2012).

n99 Letter from Kenneth L. Port to David Kappos, Dir. of the U.S. Patent & Trademark Office 17 (2011), available at <http://openwmitchell.edu/facsch/203>. The NFL estimates that it sends out 80 to 100 cease-and-desist letters each year regarding unauthorized use of its SUPER BOWL trademark. Robert Channick, *Defense Rules in Guarding Super Bowl Name*, CHICAGO TRIBUNE, Feb. 1, 2012, http://articles.chicagotribune.com/2012-02-01/business/ct-biz-0201-big-game-20120201_1_nfl-shield-official-pizza-sponsor-nfl-sponsors. For a helpful discussion of trademark bullying, including the use of cease and desist letters, see Grinvald, *supra* note 11.

n100 See generally CHILLING EFFECTS, www.chillingeffects.org (last visited Jan. 2, 2014), for examples of cease and desist letters alleging trademark infringement.

n101 See Grinvald, *supra* note 11, at 628 & n.13. See also Department of Commerce letter to Congress on Trademark Litigation Tactics and Federal Government Services to Protect Trademarks and Prevent Counterfeiting at 18 (April 2011), written in response to Public Law 111-146, which required a study and report on the effect of abusive trademark litigation tactics on small businesses:

With respect to cease-and-desist letters, many of the comments acknowledged regular use of these letters in the trademark field. A handful of small business owners explained that they withdrew their trademark applications after receiving a cease-and-desist letter because they lacked the time or financial resources to litigate against a larger, wealthier company. This imbalance of resources was a common theme among many of the comments

n102 For example, the owner of the VILLAGE VOICE trademark has accused of infringement the proprietors of various other publications that use the term "voice," including the *Cape Cod Voice*, the *Bloomington Voice*, and the *Tacoma Voice*. Zipkin, *supra* note 12. Over a ten year period, the owner of the mark ENTREPRENEUR for magazine services "resolved or settled about forty instances of actual or potential trademark infringement," the majority likely via cease-and-desist letters or informal communications. *Id.*

n103 *Telechron, Inc. v. Telicon Corp.*, 198 F.2d 903, 906 (3d Cir. 1952).

n104 *Id.*

n105 *Gimix, Inc. v. JS & A Grp., Inc.*, 699 F.2d 901, 907 (7th Cir. 1983).

n106 Three basic types of evidence may be used to establish acquired distinctiveness under § 2(f): (1) ownership of prior registrations on the Principal Register of the same mark for goods that are the same as or related to those named in the pending application (37 C.F.R. § 2.41(b) (2006)); TMEP §§ 1212.04-1212.04(e) (9th ed. Oct. 2013)); (2) a statement verified by the applicant that the mark has become distinctive of the applicant's goods or services by reason of substantially exclusive and continuous use for the five years before the claim of distinctiveness is made (37 C.F.R. § 2.41(b); TMEP §§ 1212.05-1212.05(d) (9th ed. Oct. 2013)); and (3) actual evidence of acquired distinctiveness (37 C.F.R. § 2.41(a); TMEP §§ 1212, 1212.06-1212.06(e)(iv) (9th ed. Oct. 2013)).

n107 See 37 C.F.R. § 2.41(a); *In re Ideal Indus., Inc.*, 508 F.2d 1336, 1337-41 (C.C.P.A. 1975); *In re Instant Transactions Corp.*, 201 U.S.P.Q. 957 (T.T.A.B. 1979); 3 ALTMAN & POLLACK, *supra* note 34 § 20:29; TMEP § 1212.06 (9th ed. Oct. 2013).

n108 Aloe Creme Labs., Inc. v. Milsan, Inc., 423 F.2d 845, 850 (5th Cir. 1970).

n109 Distinctiveness is evaluated in several different contexts. When a mark owner files a use-based application to register her mark on the Principal Register, an examining attorney determines whether the mark is registrable on a § 2(e) basis as inherently distinctive or only on a § 2(f) basis, in which case proof of secondary meaning is required. When the application is filed on an intent-to-use ("ITU") basis, a descriptive mark will usually be rejected because the owner has not yet begun to use the mark in commerce, and secondary meaning is thus unlikely to exist. An applicant can challenge a refusal by filing an *ex parte* appeal with the TTAB. If the PTO is sufficiently convinced of a mark's inherent distinctiveness and has not rejected the mark on any other basis, the mark will be published in the Gazette. Third parties can then bring *inter partes* proceedings before the TTAB to oppose registration of a mark within thirty days of publication or to cancel a mark after the opposition period has closed. When federal courts consider distinctiveness, they do so most frequently in infringement cases, either during a preliminary determination of whether a plaintiff owns a valid and legally protectable trademark or as part of a likelihood of confusion analysis. In many jurisdictions, the multifactor test for likelihood of confusion considers the strength of the plaintiff's mark, which has two components: conceptual strength, typically equated with the mark's inherent distinctiveness, and commercial strength, a concept more akin to secondary meaning. *E.g.*, *Polaroid Corp. v. Polarad Elecs. Corp.*, 287 F.2d 492, 495 (2d Cir. 1961). Some courts explicitly consider mark strength among the most important factors in determining the likelihood of confusion, *e.g.*, *Aronowitz v. Health-Chem Corp.*, 513 F.3d 1229 (11th Cir. 2008), and a recent empirical analysis led three scholars to conclude that the strength of the plaintiff's mark was the second most important factor in predicting a finding of infringement. See Kevin Blum, Ariel Fox, Christina J. Hayes & James (Hanjun) Xu, *Consistency of Confusion? A Fifteen-Year Revisiting of Barton Beebe's Empirical Analysis of Multifactor Tests for Trademark Infringement*, 2010 STAN. TECH. L. REV. 3, 33 (2010). Courts adjudicating claims of trademark dilution may also consider whether or not a mark is distinctive.

n110 2 MCCARTHY, *supra* note 49 § 11:22 ("Generally, litigation over descriptiveness resolves into a dispute as to whether a given mark should be put into one of two pigeonholes: (1) the 'descriptive' category or (2) the 'suggestive' category.").

n188 Greg Lastowka has identified a "creativity daemon" that overemphasizes creativity at the expense of trademark doctrine, leading in some cases to unexpected and insupportable results. Lastowka, *supra* note 44, at 791.

n189 *Airco, Inc. v. Air Prods. & Chems., Inc.*, 196 U.S.P.Q. 832 (T.T.A.B. 1977).

n190 *Dreamwell, Ltd. v. Kittrich Corp.*, 2011 WL 1495462 (T.T.A.B. Mar. 29, 2011).

n191 *Levi Strauss & Co. v. R. Josephs Sportswear, Inc.*, 28 U.S.P.Q.2d 1464, 1471 (T.T.A.B. 1993).

n192 *In re JPI Colorworkshop, Inc.*, 2005 WL 1822541, at *1 (T.T.A.B. July 26, 2005); *but see In re Ginc UK Ltd.*, 90 U.S.P.Q.2d 1472, 1477 (T.T.A.B. 2007) (holding that rhyme of ZOGGS TOGGS "does not infuse TOGGS with any separate and distinct meaning apart from its generic meaning").

n193 *In re Morton-Norwich Prods., Inc.*, 209 U.S.P.Q. 791, 792 (T.T.A.B. 1981).

n194 *In re Classic Beverage Inc.*, 6 U.S.P.Q.2d 1383, 1387 (T.T.A.B. 1988) (reversing § 2(e)(1) refusal to register).

n195 *In re John H. Breck, Inc.*, 150 U.S.P.Q. 397, 398 (T.T.A.B. 1966), *cited in* TMEP § 1209.01(a) (9th ed. Oct. 2013).

n196 *In re True Value Co.*, 2008 WL 4674589, at *2 (T.T.A.B. Sept. 26, 2008).

n197 *In re Siemens Stromberg-Carlson*, 1999 WL 1062812, at *3 (T.T.A.B. Nov. 19, 1999).

n198 *Inviro Med. Devices Ltd. v. DuoProSS Meditech Corp. (DuoProSS I)*, No. 92046702, Dkt. 52, at *23 (T.T.A.B. 2011), *rev'd*, *DuoProSS II*, 695 F.3d 1247, 1257 (Fed. Cir. 2012). The Federal Circuit took exception to the TTAB's comment that "the combination of the terms SIMPLY and SAFER 'creates a rhyming pattern that results in a distinctive impression,'" asserting that "[t]he Board's observation about the alliteration . . . [is] not a finding about the commercial impression that the mark conveys to a consumer based on evidence in the record."

n199 *In re Kraft, Inc.*, 218 U.S.P.Q. 571, 573 (T.T.A.B. 1983).

n200 *Van Camp Sea Food Co. v. Alexander B. Stewart Orgs.*, 50 F.2d 976, 977 (C.C.P.A. 1931).

n201 *In re Lockheed Martin Corp.*, 2012 WL 5902074, at *5 (T.T.A.B. Nov. 15, 2012) ("The term PC is used elliptically to stand in for 'all of the data and software content of a PC.'").

n202 *Xtreme Lashes, LLC v. Xtended Beauty, Inc.*, 576 F.3d 221, 233 (5th Cir. 2009).

n203 *Sec. Ctr., Ltd. v. First Nat'l Sec. Ctrs.*, 750 F.2d 1295, 1299 (5th Cir. 1985).

n204 *See Janes v. Watson*, No. SA-05-CA-0473-XR, 2006 WL 2322820, at *5 (W.D. Tex. Aug. 2, 2006) ("The first test [for descriptiveness] is the 'dictionary test,' under which the dictionary definition of the mark is considered.").

n205 *Zatarains, Inc. v. Oak Grove Smokehouse, Inc.*, 698 F.2d 786, 792 (5th Cir. 1983), *abrogated by* *KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc.*, 543 U.S. 111 (2004).

n206 *Xtreme Lashes*, 576 F.3d at 232; *see also, e.g.*, *USA Football Inc. v. Robinson*, 74 U.S.P.Q.2d 1646, 1653-61 (S.D. Tex. 2004) (deeming mark "USA Football" merely descriptive and discussing judicial formulations invoked to support descriptiveness, including "the dictionary test"); *Chi. Reader, Inc. v. Metro Coll. Pub. Co.*, 218 U.S.P.Q. 804 (N.D. Ill. 1982), *aff'd*, 711 F.2d 801 (7th Cir. 1983) (court may rely on dictionary for common usage of word); *Bone*, *supra* note 25, at 2130-35 ("[T]he dictionary test [refers to] looking the word mark up in the dictionary to see if its primary meaning is descriptive of the product . . ."). *But see In re Phase Dynamics, Inc.*, 2010 WL 985332, at *4-5 (T.T.A.B. Mar. 4, 2010) ("Although dictionary evidence may certainly be used to prove a mark is merely descriptive, we are not aware of any case law that actually sets out a 'dictionary test.'"); *Sec. Ctr.*, 750 F.2d at 1298 n.4 ("Dictionaries lag behind linguistic realities . . . so the dictionary test may be of questionable validity in many instances.").

n207 Church & Dwight Co., Inc. v. Mayer Labs., Inc., 868 F. Supp. 2d 876, 925 (N.D. Cal. 2012).

n208 *Id.*

n209 *E.g.*, Surgicenters of Am., Inc. v. Med. Dental Surgeries, Co., 601 F.2d 1011, 1015 n.11 (9th Cir. 1979); *In re* World Internet Inc., 2007 WL 1620775, at *8 (T.T.A.B. May 31, 2007) (holding WORLD INTERNET SUMMIT merely descriptive for Internet marketing seminars).

n210 Firefly Digital Inc. v. Google Inc., 817 F. Supp. 2d 846, 862 (W.D. La. 2011) (internal quotation marks omitted).

n211 A TTAB panel held CRAZY GOOD suggestive for toaster pastries in *In re* Kellogg, 2008 WL 2675685, at *13 (T.T.A.B. June 30, 2008). In his concurring opinion, Judge Bucher applied the dictionary test to the entire phrase and counted its absence as evidence of distinctiveness. *See also In re* Strategic Weather Servs., LP, 2000 WL 1853498, at *3 (T.T.A.B. Nov. 30, 2000) (applicant argued that the absence from dictionaries of composite terms including "boatingweather," "fishingweather," and "golfweather" suggested the marks were not merely descriptive; Board reversed refusal for eleven of the seventeen marks).

n212 Blendco, Inc. v. Conagra Foods, Inc., 132 F. App'x 520, 521-22 (5th Cir. 2005). *See also* Janes v. Watson, No. SA-05-CA-0473-XR, 2006 WL 2322820, at *5 (W.D. Tex. Aug. 2, 2006) ("Because 'FineArtStudioOnline' is not a standard dictionary term, [the dictionary] test is inapplicable."). *But see In re* Petroglyph Games Inc., 91 U.S.P.Q.2d 1332, 1341, (T.T.A.B. 2009) (Where the component terms "battle" and "cam(era)" were descriptive for the goods at issue, "the absence of [the composite term] BATTLECAM from the dictionary . . . does not dictate, as applicant contends, that we find the term to be a fanciful mark, rather than a descriptive term." (citation omitted)).

n213 Xtreme Lashes, LLC v. Xtended Beauty, Inc., 576 F.3d 221, 233 (5th Cir. 2009). *But see In re* Mine Safety Appliances Co., 66 U.S.P.Q.2d 1694 (T.T.A.B. 2002) (WORKMASK found descriptive despite absence from dictionaries); *In re* Energy Prods. of Idaho, 13 U.S.P.Q.2d 2049, 2052 (T.T.A.B. 1989) ("The absence of [WASTE-TO-ENERGY] from the dictionary is not, contrary to applicant's argument, 'persuasive evidence' that the term is not merely descriptive of applicant's services."); Sweats Fashions Inc. v. Pannill Knitting Co., 833 F.2d 1560, 1564 (Fed. Cir. 1987) (absence of term "sweats" from dictionary insufficient to preclude summary judgment "in the face of the strong evidence showing that 'sweats' is commonly used as a descriptive name for . . . sweatshirts and sweatpants.").

n214 *Blendco*, 132 F. App'x at 521-22.

n215 This test has also been called the "competition test" or "the necessity standard."

n216 *Firefly Digital Inc. v. Google Inc.*, 817 F. Supp. 2d 846, 862 (W.D. La. 2011).

n217 2 MCCARTHY, *supra* note 49 § 11:68; *see also* *Zatarains, Inc. v. Oak Grove Smokehouse, Inc.*, 698 F.2d 786, 793 (5th Cir. 1983) (finding competitors would need to use the phrase "fish fry" to describe batter for use in frying fish).

n218 *Miss World (UK), Ltd. v. Mrs. Am. Pageants, Inc.*, 856 F.2d 1445, 1449 (9th Cir. 1988); *see also* *Marketquest Grp., Inc. v. BIC Corp.*, No. 11-CV-618JLS(WMC), 2011 WL 5360899, at *7 (S.D. Cal. Nov. 7, 2011).

n219 *E.g., In re Kellogg N. Am., Co.*, 2008 WL 2675685, at *14 (T.T.A.B. June 30, 2008); *Zobmondo Entm't, LLC v. Falls Media, LLC*, 602 F.3d 1108, 1118 (9th Cir. 2010); *Fortune Dynamic, Inc. v. Victoria's Secret Stores Brand Mgmt., Inc.*, 618 F.3d 1025, 1034 (9th Cir. 2010); *Reynolds Metals Co.*, 480 F.2d 902 (C.C.P.A. 1973); *Marketquest*, 2011 WL 5360899, at *7.

n220 *Ice Cold Auto Air of Clearwater, Inc. v. Cold Air & Accessories, Inc.*, 828 F. Supp. 925, 933 (M.D. Fla. 1993).

n221 *Zobmondo*, 602 F.3d at 1118 (reversing summary judgment, finding issue of fact remained as to mark's distinctiveness) (emphasis added).

n222 *Blendco, Inc. v. Conagra Foods, Inc.*, 132 F. App'x 520, 522 (5th Cir. 2005).

n223 Even generic terms may have synonyms, as several courts have acknowledged. *See, e.g.,* Loctite Corp. v. Nat'l Starch and Chem. Corp., 516 F. Supp. 190 (S.D.N.Y. 1981) (that synonyms exist for a generic or descriptive term, such as "instant glue" or "ten second glue" for "super glue," does not establish that Super Glue is not generic or descriptive); *In re Diamond Commc'n Prods. Inc.*, 1999 WL 180802, at *1 (T.T.A.B. Mar. 30, 1999) ("That other generic words like 'strap' or 'fastener' might also be used to name such products does not make 'cable tie' or its equivalent any less generic.").

n224 15 U.S.C. § 1115(b)(4) (2006). The Supreme Court has summarized the four elements of statutory fair use as "the affirmative defense that a term is used descriptively, not as a mark, fairly, and in good faith." *KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc.*, 543 U.S. 111, 124 (2004).

n225 *Hearings on H.R. 102, H.R. 5461, and S. 895 Before the Subcomm. on Trademarks of the H. Comm. on Patents*, 77th Cong. 67 (1941), cited in 4 ALTMAN & POLLACK, *supra* note 34 § 22:64.

n226 *E.g.,* *Sec. Ctr., Ltd. v. First Nat. Sec. Ctr.*, 750 F.2d 1295, 1300 (characterizing "security center" as descriptive in part based on "the number of enterprises throughout the nation that use 'security center' in some form"); *Fortune Dynamic v. Victoria Secret Stores Brand Mgmt., Inc.*, 618 F.3d 1025, 1034 (9th Cir. 2009) ("[W]e are aware of no other shoe companies . . . that use the word 'delicious' to describe their product"); *Peoples Fed. Sav. Bank v. People's United Bank*, 672 F.3d 1, 6 (1st Cir. 2012) ("[F]requent use of the term 'People' in connection with banking services cuts in favor of defining the mark as descriptive. . . . '[P]eople' ranks as the twelfth most commonly used word in bank names on the FDIC's website, appearing in the names of 159 banks in the United States."); *In re Panera*, 2002 WL 31536505, at *2-3 (T.T.A.B. 2002).

n227 Courts often consider both tests together or treat the dual considerations as two halves of the same test. *See, e.g.,* *Sec. Ctr.*, 750 F.2d at 1300 ("We turn now to the issue whether those engaged in similar businesses have used the phrase, or are likely to do so."); *In re Siemens Stromberg-Carlson*, 1999 WL 1062812, at *3 (T.T.A.B. 1999).

n228 *Sec. Ctr.*, 750 F.2d at 1300.

n229 *In re Kellogg N. Am. Co.*, 2008 WL 2675685, at *14 (T.T.A.B. 2008); *see also* *Heartland Animal Clinic, P.A. v. Heartland SPCA Animal Med. Clinic, LLC*, 861 F. Supp. 2d 1293 (D. Kan. 2012) (holding HEARTLAND ANIMAL CLINIC suggestive for veterinary services even though Google Maps and local phonebook showed hundreds of businesses using "heartland" in geographic area).

n230 *In re Kellogg*, 2008 WL 2675685, at *14.

n231 *Peoples Fed. Sav. Bank v. People's United Bank*, 672 F.3d 1, 15 (1st Cir. 2012) (PEOPLES merely descriptive for banking services).

n232 *Labrador Software, Inc. v. Lyvos, Inc.*, 32 F. Supp. 2d 31, 33 (D. Mass. 1999) (holding LABRADOR marks and dog images descriptive for information retrieval software in light of frequent use by competitors of terms "Labrador" and "retriever").

n233 *Bliss Salon Day Spa v. Bliss World LLC*, 268 F.3d 494, 498 (7th Cir. 2001) (affirming denial of injunctive relief for Bliss Salon against Bliss World, noting that "BLISS marks are a glut on the market in hair styling and beauty care.").

n234 *Pullan v. Fulbright*, 287 Ark. 21, 23 (Ark. 1985) (SHEAR PLEASURE descriptive for hair salon).

n235 U.S. Trademark Application Serial No. 77,525,433 (filed July 17, 2008). Apple initially attempted to register APP STORE under § 2(e) but was unable to persuade the trademark examining attorney that the mark was inherently distinctive for the services in question. *See* Office Action from U.S. Patent and Trademark Office to Apple, Inc. (Sept. 24, 2008), *available at* TSDR, tsdr.uspto.gov (search "77525433," click "DOCUMENTS," click "Sep. 24, 2008 Offc Action Outgoing"); Response to Office Action from Apple, Inc. to U.S. Patent and Trademark Office (Feb. 18, 2009), *available at* TSDR, tsdr.uspto.gov (search "77525433," click "DOCUMENTS," click "Feb. 18, 2009 Response to Office Action"); Office Action from U.S. Patent and Trademark Office to Apple, Inc. (Mar. 19, 2009), *available at* TSDR, tsdr.uspto.gov (search "77525433," click "DOCUMENTS," click "Mar. 19, 2009 Offc Action Outgoing").

n236 BLUBLOCKER, Registration No. 1,504,627. BLUBLOCKER was registered based on a § 2(f) showing of acquired distinctiveness.

n237 BEANIE BABIES, Registration No. 2,049,196. BEANIE BABIES was registered under § 2(e).

n238 *E.g.*, Decatur Fed. Sav. & Loan Assoc. v. Peach State Fed. Sav. & Loan Assoc., No. C-78-904-A, 1978 WL 21348, at *1 (N.D. Ga., Dec. 29, 1978).

n239 *But see* Gary J. Sosinsky, Note, *Laudatory Terms in Trademark Law: Square Pegs in Round Holes*, 9 FORDHAM INTELL. PROP. MEDIA & ENT. L.J. 725, 729 (1999) (observing courts' inconsistency in proposing laudatory terms be treated as "suggestive in a literal sense yet needing secondary meaning to be protected").

n240 Thomas R. Lee, Eric D. DeRosia & Glenn L. Christensen, *An Empirical and Consumer Psychology Analysis of Trademark Distinctiveness*, 41 ARIZ. ST. L.J. 1033, 1045 n.39 (2009).

n241 *In re Bos. Beer Co.*, 198 F.3d 1370, 1373 (Fed. Cir. 1999) (citing 2 J. THOMAS MCCARTHY, MCCARTHY ON TRADEMARKS & UNFAIR COMPETITION § 11:17 (4th ed. 1996)); *see also* Hoover Co. v. Royal Appliance Mfg. Co., 238 F.3d 1357, 1360 (Fed. Cir. 2001).

n242 *DuoProSS II*, 695 F.3d 1247, 1256 (Fed. Cir. 2012) ("[O]ur precedent clearly indicate[s] that puffing . . . is *more* likely to render a mark merely descriptive . . .").

n243 *Champions Golf Club, Inc. v. The Champions Golf Club, Inc.*, 78 F.3d 1111, 1117 (6th Cir. 1996) (district court erred in holding CHAMPIONS arbitrary for golf club services).

n244 *In re Bos. Beer Co.*, 47 U.S.P.Q.2d 1914 (T.T.A.B. 1998), *aff'd*, 198 F.3d 1370 (Fed. Cir. 1999); TMEP § 1209.03(k) (9th ed. Oct. 2013).

n289 *See Gallagher, supra* note 11, at 456 ("[M]ost enforcement of IP rights takes place *not* in court, but in the everyday practices of IP owners and their lawyers. 'Cease and desist' letters, phone calls, and negotiations with alleged infringers constitute the bulk of IP enforcement efforts in trademark and copyright practice. To be sure, these efforts take place in the 'shadow' of IP law and are therefore influenced by it. But it is in these everyday practices--and not in trial or appellate courts--that most IP rights are asserted, resisted, and negotiated.").

n290 Of course, mark owners that do demonstrate acquired distinctiveness may also wield their registrations offensively to quash others' legitimate uses of descriptive terms that would constitute protected fair use. Raising the bar for inherent distinctiveness is not a complete cure that would stop bullies from silencing fair-use competitors, which is why some scholars have called for an end to the protection of descriptive marks regardless of the extent or duration of their use. *See, e.g., Ramsey, supra* note 56, at 460.

n291 The organization Chilling Effects invites those who receive cease and desist letters to submit them. Chilling Effects posts the letters online and provides general information to aid recipients in assessing and responding to them. *See* CHILLING EFFECTS, <http://www.chillingeffects.org> (last visited Jan. 21, 2013).

n292 The third element, the requirement of non-trademark use by the junior user, is irrelevant at the trademark prosecution stage.

ARTICLE: Trademark Owner's Strategy: Litigation Versus the UDRP

NAME: Jessica Sganga*

BIO: * Jessica Sganga received her Juris Doctor from Pepperdine University School of Law in 2013.

LEXISNEXIS SUMMARY:

... The following non-exhaustive list constitutes evidence of the registration and use of a domain name in bad faith: (i) circumstances indicating that the Respondent registered or acquired the domain name primarily for the purpose of selling, renting, or otherwise transferring the domain name registration to the complainant who is the owner of the trademark or service mark or to a competitor of that complainant, for valuable consideration in excess of your documented out-of-pocket costs directly related to the domain name; or (ii) circumstances indicating that the Respondent registered the domain name in order to prevent the owner of the trademark or service mark from reflecting the mark in a corresponding domain name, provided that respondent has engaged in a pattern of such conduct; or (iii) circumstances indicating that the Respondent registered the domain name primarily for the purpose of disrupting the business of a competitor; or (iv) circumstances indicating that the Respondent is using the domain name to intentionally attempt to attract, for commercial gain, Internet users to its website or other on-line location, by creating a likelihood of confusion with the complainant's mark as to the source, sponsorship, affiliation, or endorsement of the Respondent's website or location or of a product or service on its website or location. ... Facebook has also enforced its trademark against Bearbook, PlaceBook, Shagbook, FacebookOfPorn, Faceporn, Lamebook, and Teachbook; however, Facebook did not use the UDRP in these disputes. ... In this case, Facebook probably strategized that the UDRP's expediency does not trump the litigation's potential damages. ... Prior to ICANN's approval of a new gTLD, third parties have a seven-month opportunity to file an objection to an application on several grounds, including an objector's trademark rights. ... Because domain names play such an integral role in consumer perception of a site's source, trademark owners must police the use of their trademark in domain names. ... Generally, a trademark owner takes one of these two routes: 1) the trademark owner files a complaint in federal court, pleading trademark infringement under the Lanham Act, trademark dilution under the FTDA, and/or cybersquatting under the ACPA; or 2) the trademark owner files a UDRP complaint.

TEXT:

[*301]

Introduction

The Internet has widened the gap between the producer and the consumer. Online consumers have no assurances as to whom they are dealing with or what they are actually buying, except for the domain name.ⁿ¹ Domain names fulfill the

same role that trademarks historically played in more traditional modes of business.ⁿ² Accordingly, "the use of one's trademark as a domain name has been increasingly important in securing a business' Internet dominance";ⁿ³ likewise, precluding others from using one's trademark in a domain name has become critical.ⁿ⁴

[*302] Any individual can register an available domain name for a low price;ⁿ⁵ consequently, domain names can impinge on the rights of trademark owners. A trademark owner may seek redress against a domain name registrant from the Lanham Act, the Federal Trademark Dilution Act (FTDA), the Anticybersquatting Consumer Protection Act (ACPA), and the Uniform Domain-Name Dispute-Resolution Policy (UDRP). Each avenue offers trademark owners a unique path; however, these avenues are not mutually exclusive. Part I of this paper outlines the domain name registration process. Additionally, Part I describes the history of the Lanham Act, including the enactment of the FTDA. Part II outlines the rise of the ACPA. Part III describes the UDRP, including some criticisms of it. Part IV exposes the strategic decisions a trademark owner can make - federal court versus the UDRP - by looking at Facebook's recent enforcement campaign to control the prefix "face" and suffix "book" for social networking sites. Part V discusses the implications of the new generic top-level domains and Uniform Rapid Suspension System (URS) Procedure's release. Part VI briefly concludes by discussing the implications of this study and suggesting avenues for future research.

I. The Lanham Act

Since the 1990s, United States trademark owners have been bringing actions against domain name registrants under sections 32 and 43 of the Lanham Act.ⁿ⁶ The Lanham Act prohibits uses of trademarks that are likely to cause confusion about the source of a product or service.ⁿ⁷ Section 32 permits suits against any unauthorized "use in commerce ... of a registered mark in connection with the sale, offering for sale, distribution, or advertising of any goods or services on or in connection with which such use is likely to cause confusion, or to cause mistake, or to deceive."ⁿ⁸ Section 43 allows suits against any person using:

in commerce any word, term, name, symbol, or device, or any combination thereof, or any false designation of origin, false or misleading description of fact, or false or **[*303]** misleading representation of fact, which - is likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of such person with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities by another person.ⁿ⁹

The Lanham Act seeks to "prevent consumer confusion that enables a seller to pass "off his goods as the goods of another."ⁿ¹⁰ To determine whether a likelihood of confusion exists under the Lanham Act, circuit courts have developed various multifactor tests.ⁿ¹¹ In general, these tests include non-exhaustive lists of factors pertaining to the likelihood of consumer confusion.ⁿ¹² A claimant need not prove that a domain name registrant acted with bad faith, although it is still a factor in these tests.ⁿ¹³ Additionally, infringement claims are subject to a commercial use requirement.ⁿ¹⁴ As a result, registration of a domain name with another's trademark, but not using it in commerce, does not invoke protection of the Lanham Act.ⁿ¹⁵

Section 35(a) of the Lanham Act governs what damages a successful claimant is entitled to recover: "(1) defendant's profits, (2) any damages sustained by the plaintiff, and (3) the costs of the action."ⁿ¹⁶ In exceptional **[*304]** cases, a district court may award reasonable attorney fees to the prevailing party.ⁿ¹⁷ A claimant may also seek injunctive relief.ⁿ¹⁸

In 1996, Congress codified existing common law by enacting the Federal Trademark Dilution Act (FTDA), which allows the owner of a famous mark to obtain an injunction against another person who, at any time after the owner's mark has become famous, commences use of a mark or trade name in commerce that is likely to cause dilution by blurring or tarnishment.ⁿ¹⁹ A claimant does not need to show a likelihood of confusion, competition, or actual economic injury.ⁿ²⁰ Under the FTDA, where willful intent to dilute is demonstrated, the owner of the famous mark is

also entitled to recover "(1) damages (2) the dilutor's profits, and (3) costs." ⁿ²¹

II. Anticybersquatting Consumer Protection Act

While the Lanham Act and FTDA provided recourse for conflict arising in the Domain Name System (DNS), the legal remedies for cybersquatting victims became "expensive and uncertain." ⁿ²² Cybersquatters are defined as those who: "(1) register well-known brand names as Internet domain names in order to extract payment from the rightful owners of the marks; (2) register well-known marks as domain names and warehouse those marks with the hope of selling them to the highest bidder; (3) register well-known marks to prey on consumer confusion by misusing the domain name to divert customers from the mark owner's site to the cybersquatter's own site; (4) target distinctive marks to defraud consumers, including to engage in counterfeiting activities." ⁿ²³ "Because the element of direct competition or [*305] consumer confusion is often absent in trademark suits against cybersquatters, [cybersquatting victims initially] relied on the FTDA for help." ⁿ²⁴ However, the FTDA did not expressly prohibit the act of cybersquatting, and cybersquatters began taking the necessary precautions to shield themselves from liability under the FTDA. ⁿ²⁵ Specifically, "'many cybersquatters [were] careful to no longer offer the domain name for sale in any manner that could implicate liability ...'" ⁿ²⁶

To remedy the perceived shortcomings of the FTDA in cybersquatting cases, ⁿ²⁷ Congress enacted the Anticybersquatting Consumer Protection Act (ACPA) in 1999. ⁿ²⁸ The ACPA, in effect, amended the Lanham Act by creating a particular federal remedy for cybersquatting. ⁿ²⁹ Specifically, the ACPA prohibits a person from registering a domain name with bad faith intent to profit from a mark that is confusingly similar to a registered or unregistered mark, or dilutive of a famous mark. ⁿ³⁰ The bad faith requirement of the ACPA creates a higher burden of proof than the Lanham Act, and the merit of an ACPA claim does not depend on whether trademark [*306] infringement exists under the Lanham Act or whether trademark dilution exists under the FTDA. ⁿ³¹

In determining whether a defendant acted with a bad faith intent to profit from the use of a mark, a court may look at the nine, non-exhaustive factors the ACPA provides to assist courts. ⁿ³² Additionally, the ACPA exempts defendants who "believed and had reasonable grounds to believe that the use of the domain name was a fair use or otherwise lawful." ⁿ³³

As for remedies, the ACPA provides that "a court may order the forfeiture or cancellation of the domain name or the transfer of the domain name to the owner of the mark" ⁿ³⁴ for any "domain name registered before, on, or after the date of the enactment of [the] Act." ⁿ³⁵ The ACPA also provides an award of damages for violations of the Act, so long as the [*307] domain name was registered after the enactment of the ACPA. ⁿ³⁶ Further, the ACPA does not preclude an award of damages under any pre-existing law. ⁿ³⁷

The ACPA also protects against reverse domain name hijacking. ⁿ³⁸ A reverse domain name hijacking claim exists when trademark owners "overreach" in exercising their ACPA rights. ⁿ³⁹ In a reverse hijacking claim, "a plaintiff (registrant) must show that (1) the plaintiff's name was "suspended, disabled, or transferred" under a registrar's policy, (2) the trademark owner has notice of the action, and (3) plaintiff's use or registration of the domain name is not unlawful." ⁿ⁴⁰ A plaintiff can seek declaratory and injunctive relief, in addition to damages. ⁿ⁴¹

III. Uniform Dispute Resolution Policy

To deal with the rising litigation related to domain names, ICANN instituted the Uniform Dispute Resolution Policy (UDRP) on August 26, 1999. ⁿ⁴² The UDRP is a non-binding, alternative dispute resolution (ADR) process designed to solve disputes between trademark ⁿ⁴³ owners and domain name registrants. ⁿ⁴⁴ More specifically, ICANN drafted the UDRP to fight [*308] cybersquatting. ⁿ⁴⁵ As discussed above, cybersquatting is the practice of registering well-known brand names as Internet domain names in order to force the rightful owners of the marks to pay for the right to engage in electronic commerce under their own brand name. ⁿ⁴⁶ Cybersquatting is profitable because it is inexpensive to register the mark of an established company as a domain name, and such companies often pay substantial sums of

money to obtain the domain name with their mark. ⁿ⁴⁷ ICANN also intended the UDRP to prevent typosquatting, which involves "identifying legitimate popular web sites and purposefully registering deceptively similar or deliberately misspelled domain names in order to lure visitors into visiting unrelated - and often pornographic - web sites." ⁿ⁴⁸ Typosquatters, like cybersquatters, profit "if owners of the legitimate domain name are willing to purchase the deceptive domain name to prevent further confusion" and lost profits. ⁿ⁴⁹

The UDRP essentially is an expedited administrative proceeding that the owner of a trademark initiates "by filing a complaint with an approved [*309] dispute-resolution service provider." ⁿ⁵⁰ The UDRP begins with the registration agreement that the domain name registrant signs with the registrar. All registration agreements include a clause that all claims allegedly arising from abusive registrations of domain names will be decided pursuant to the UDRP. ⁿ⁵¹ Consequently, a domain name registrant ("Respondent") is required to submit to a mandatory administrative proceeding if a third party ("Complainant") asserts to the applicable Provider that:

(i) The disputed domain names registered by the Respondent are identical or confusingly similar to a trademark or service mark in which the Complainant has rights; and

(ii) The Respondent has no rights or legitimate interests with respect to the disputed domain names; and

(iii) The disputed domain names have been registered and are being used in bad faith. ⁿ⁵²

In order to force the transfer or cancellation of a domain name, the Complainant must prove the existence of all three elements by a preponderance of evidence. ⁿ⁵³ The following scenarios demonstrate a Respondent's rights or legitimate interests with respect to the disputed domain name:

(i) before any notice ... of the dispute, [the Respondent's] use of, or demonstrable preparations to use, the domain name or a name corresponding to the domain name in connection with a bona fide offering of goods or services; or

(ii) [the Respondent] (as an individual, business, or other organization) [has] been commonly known by the domain name, even if [it has acquired] no trademark or service mark rights; or

[*310]

(iii) [the Respondent] is making a legitimate noncommercial or fair use of the domain name, without intent for commercial gain to misleadingly divert consumers or to tarnish the trademark or service mark at issue. ⁿ⁵⁴

The following non-exhaustive ⁿ⁵⁵ list constitutes evidence of the registration and use ⁿ⁵⁶ of a domain name in bad faith:

(i) circumstances indicating that [the Respondent] registered or acquired the domain name primarily for the purpose of selling, renting, or otherwise transferring the domain name registration to the complainant who is the owner of the

trademark or service mark or to a competitor of that complainant, for valuable consideration in excess of your documented out-of-pocket costs directly related to the domain name; or

(ii) [circumstances indicating that the Respondent] registered the domain name in order to prevent the owner of the trademark or service mark from reflecting the mark in a corresponding domain name, provided that respondent has engaged in a pattern of such conduct; or

(iii) [circumstances indicating that the Respondent] registered the domain name primarily for the purpose of disrupting the business of a competitor;ⁿ⁵⁷ or

(iv) [circumstances indicating that the Respondent] is using the domain name [to] intentionally attempt to attract, for commercial gain, Internet users to its website or other on-line location, by creating a likelihood of confusion with the complainant's mark as to the source, sponsorship, affiliation, or endorsement of [the Respondent's] website or location or of a product or service on its website or location.ⁿ⁵⁸

The Respondent must respond to a UDRP complaint within twenty days.ⁿ⁵⁹ However, if the Respondent does not respond to the complaint [*311] within the requisite twenty days, the UDRP requires adjudication based only on the complaint.ⁿ⁶⁰ As a result, default judgments are frequently granted in the UDRP proceedings.ⁿ⁶¹ In several cases, the UDRP panel has interpreted a respondent's default as an actual admission of the complaint's assertions.ⁿ⁶² Assuming the respondent does respond, he or she can prevail by negating any one of the complaint's three required elements.ⁿ⁶³

Under the UDRP, a "Panel shall decide a complaint on the basis of the statements and documents submitted and in accordance with the Policy, these Rules and any rules and principles of law that it deems applicable."ⁿ⁶⁴ The Panel's decision may include transferring the domain name to the complainant or the respondent may keep the domain name.ⁿ⁶⁵ A complainant may also seek cancellation of the domain name.ⁿ⁶⁶ The UDRP does not award injunctive relief or monetary damages.ⁿ⁶⁷ However, because UDRP proceedings are not binding, a dissatisfied complainant or respondent can [*312] file a complaint in federal court.ⁿ⁶⁸ WIPO claims that such appeals rarely occur.ⁿ⁶⁹ While providing a form of recourse after a panel decision is necessary, some UDRP participants arguably do not feel like the costly process of litigation is much recourse.ⁿ⁷⁰ Accordingly, "critics have argued that the UDRP would operate more effectively and fairly if it included an internal review board - essentially an appellate body - that could hear appeals."ⁿ⁷¹

IV. Facebook's Strategy: Litigation Versus the UDRP

The previous sections briefly explain how conflict under the DNS may be resolved - through the Lanham Act, FTDA, ACPA, and the UDRP. A critical examination of Facebook's recent enforcement campaign to control the prefix "face" and suffix "book" for social networking sites offers a deeper understanding of these options. Facebook currently owns seventy-nine active trademarks, including "Facebook," "FB," "Like," "Face," and "Wall."ⁿ⁷² To date, Facebook has filed sixteen UDRP complaints resulting in [*313] the transference of thirty-seven domain names to Facebook and the termination of two domain names.ⁿ⁷³ In all of these cases, the challenged domain name included "facebook" in its entirety, and the panels used Facebook's fame and notoriety as evidence of registration and use in bad faith.ⁿ⁷⁴ Facebook has also enforced its trademark against Bearbook, PlaceBook, Shagbook, FacebookOfPorn, Faceporn, Lamebook, and Teachbook; however, Facebook did not use the UDRP in these disputes.ⁿ⁷⁵

Bearbook and PlaceBook both changed their names after receiving cease and desist letters from Facebook.ⁿ⁷⁶ The

letters demanded that both companies abandon their unregistered trademarks because their names confuse users and dilute the Facebook registered trademark.ⁿ⁷⁷ Bearbook, now called Bruizr, is a social networking site for the hirsute, gay community,ⁿ⁷⁸ and PlaceBook, now called TripTrace, is a start-up site that provides a variety of location-based services.ⁿ⁷⁹ Neither company had the funds to fight Facebook in a trademark battle.ⁿ⁸⁰ While Facebook had the option of pursuing its cause of action in federal court or the UDRP, Bearbook and Placebook were ultimately left with no way to defend themselves (besides fighting a costly, long battle in federal court).

This scenario raises the inadequacy of recourse for "trademark bullying" victims.ⁿ⁸¹ "A trademark bully is a trademark owner who uses intimidation [*314] tactics in order to eliminate potential competitors and remove them from the market place."ⁿ⁸² Trademark bullies enforce their trademark rights beyond any reasonable interpretation of trademark law and capitalize on the fact that most of their victims will be unable to pay the litigation costs associated with defending a trademark infringement or dilution charge.ⁿ⁸³ Trademark bullying victims may bring a reverse hijacking claim under the ACPA or seek a declaratory judgment;ⁿ⁸⁴ but, if the victim does not have the funds to defend itself in court, it is unlikely that it will not have enough funds to file either of these claims. Under the UDRP, the victim of a trademark bully may not file a UDRP complaint against the trademark owner.ⁿ⁸⁵ However, if a trademark bully files a UDRP complaint, and the panel finds that the complaint was brought in bad faith, such as in an attempt to reverse hijack or to harass the domain name holder, the panel "shall declare in its decision that the complaint was brought in bad faith and constitutes an abuse of the administrative proceeding."ⁿ⁸⁶

Unlike Bearbook and Placebook, Shagbook - an adult dating website - refused to willingly abandon its name.ⁿ⁸⁷ On May 24, 2010, Shagbook applied for a trademark with the United States Patent and Trademark Office (USPTO).ⁿ⁸⁸ The USPTO published the mark "shagbook" in the Trademark Official Gazette on January 25, 2011;ⁿ⁸⁹ thereafter, Facebook filed an opposition to stop Shagbook from registering a trademark under that name.ⁿ⁹⁰ In Shagbook's answer to the opposition, Shagbook alleged that the term [*315] "facebook" is generic, and thus, incapable of trademark protection.ⁿ⁹¹ Shagbook's registration of "shagbook" and Facebook's opposition of "shagbook" are still pending in the USPTO.ⁿ⁹² However, Shagbook's cancellation of "facebook" was dismissed and terminated on March 29, 2012.ⁿ⁹³

Facebook most likely has not filed a UDRP complaint against Shagbook because the strength of Facebook's UDRP complaint depends on the outcome of the pending opposition proceeding. If the opposition is sustained, Facebook has more leverage to demand that Shagbook abandon its domain name. If, however, the opposition is not sustained, and "shagbook" registers, a UDRP panel would likely not prevent a trademark registrant from using its own trademark as a domain name.

Unlike with Shagbook, the UDRP is a viable option for Facebook's dispute with FacebookOfSex.com, a site launched by adult social networking company FriendFinder.ⁿ⁹⁴ On April 13, 2011, Facebook filed suit in the Northern District of California against FriendFinder and its subsidiaries, claiming "FacebookOfSex" is too similar to Facebook's trademarked name.ⁿ⁹⁵ The suit, which includes trademark dilution and cybersquatting claims, seeks injunctive relief, revenue from the site, actual damages, and punitive damages.ⁿ⁹⁶ The action is still pending in the district court, but the parties stipulated to stay the action in order to reach a settlement.ⁿ⁹⁷

[*316] Facebook most likely would have prevailed in a UDRP proceeding here. Facebook and FacebookOfSex are confusingly similar because the domain name includes the "facebook" mark in its entirety. FriendFinder has no rights or legitimate interests with respect to FacebookOfSex. And circumstances indicate that FacebookOfSex has been registered and is being used in bad faith; specifically, because "FaceBookOfSex includes many of the same features as Facebook, such as profiles with photos and personal info, the ability to upload and share contact, and live chats," a likelihood of confusion is created with respect to Facebook's affiliation.ⁿ⁹⁸ The UDRP, however, does not award damages as a remedy.ⁿ⁹⁹ FriendFinder's estimated 2011 revenues are \$ 333 million, and FacebookofSex.com received over 4 million monthly visitors;ⁿ¹⁰⁰ such solvency makes FacebookOfSex.com a good target for litigation.ⁿ¹⁰¹ Moreover, "tech companies concerned with their online image have won much more marginal trademark disputes [in federal court] than this one."ⁿ¹⁰² In this case, Facebook probably strategized that the UDRP's expediency does not trump the litigation's potential damages.

Unlike with FriendFinder, the UDRP may be the best (or only available) forum for Facebook's dispute with Faceporn.com. Faceporn.com is a pornographic website that allows "its users to create profiles, join groups, upload photos and video, and conduct live chats." ⁿ¹⁰³ Retro Invent is a Norwegian company doing business as Faceporn.com, and Thomas Pedersen, a resident of Norway, is the principal of Retro Invent. ⁿ¹⁰⁴ **[*317]** Facebook sued Pedersen and Retro Invent for trademark dilution and infringement, in addition to cybersquatting, in the Northern District of California. ⁿ¹⁰⁵ Facebook moved for a default judgment after neither defendant responded; however, on November 29, 2011, the district court sua sponte issued an order to show cause for lack of personal jurisdiction. ⁿ¹⁰⁶ On December 12, 2011, Facebook filed its response to the order to show cause. ⁿ¹⁰⁷ On March 2, 2012, the presiding magistrate judge issued a report and recommendation to deny Facebook's motion for default judgment, finding that Facebook failed to show that the defendants purposefully directed their conduct at California. ⁿ¹⁰⁸

This is an opportune scenario for utilizing the UDRP: "Recourse to the courts involves perplexing jurisdiction . . . + . . . issues, which the UDRP was meant to avoid." ⁿ¹⁰⁹ As a domain name registrant, Retro Invent is required to submit to the UDRP, regardless of jurisdiction. ⁿ¹¹⁰ Facebook filed its complaint on October 15, 2011. ⁿ¹¹¹ Nearly a year has passed, and Retro Invent still owns the domain name Faceporn.com. ⁿ¹¹² The UDRP **[*318]** Administrative Procedure, on the other hand, is generally completed within sixty days of the date the WIPO Center receives the complaint. ⁿ¹¹³ Facebook technically could have simultaneously filed a complaint in the district court and with WIPO. It is, however, important to note that "in the event of any legal proceedings initiated prior to or during an administrative proceeding in respect of a domain name dispute that is the subject of the complaint, the Panel shall have the discretion to decide whether to suspend or terminate the administrative proceeding, or to proceed to a decision." ⁿ¹¹⁴ In sum, Facebook may have had a more satisfactory result with the UDRP, assuming Facebook could prove confusing similarity and bad faith. ⁿ¹¹⁵

The UDRP was not a viable option for Facebook in its dispute with Lamebook. Lamebook is a Facebook parody blog that "invites users to submit funny or embarrassing photos, status updates, wall posts and other tidbits from Facebook profiles." ⁿ¹¹⁶ This case is unique because Lamebook preemptively filed suit against Facebook in the Western District of Texas, seeking declaratory judgment on November 4, 2010. ⁿ¹¹⁷ Four days later, Facebook sued Lamebook in the Northern District of California. ⁿ¹¹⁸ The California case was dismissed without prejudice, and the parties settled the Texas case on August 24, 2011. ⁿ¹¹⁹ The parties agreed Lamebook would **[*319]** keep its name, but add this prominent disclaimer to its site: ⁿ¹²⁰ "This is an unofficial parody and is not affiliated with or associated with, or endorsed or approved by, Facebook." ⁿ¹²¹

Here, Lamebook could not have filed a UDRP complaint because there was no declaratory judgment equivalent in the UDRP. However, by definition, "any such declaration [by the district court] shall have the force and effect of a final judgment or decree . . ." ⁿ¹²² Because a UDRP decision is not binding in federal court, a UDRP declaratory judgment equivalent would be futile.

Facebook also sued Teachbook, an online community for teachers, in the Northern District of California on August 18, 2010, choosing not to use the UDRP. ⁿ¹²³ On May 3, 2011, the district judge granted Teachbook's motion to dismiss for lack of personal jurisdiction because Teachbook does not allow people from California to join the site. ⁿ¹²⁴ On May 6, 2011, Facebook re-filed its complaint in the Northern District of Illinois. ⁿ¹²⁵ On September 26, 2011, Teachbook moved to dismiss the complaint for failure to state a claim upon which relief can be granted, which the district court denied. ⁿ¹²⁶ A year later, Facebook and Teachbook reached a settlement agreement. ⁿ¹²⁷ Under this agreement, Teachbook changed its name to TeachQuest. ⁿ¹²⁸

[*320] While the UDRP may have alleviated the jurisdictional and timeliness problems Facebook encountered here, it is unclear whether Facebook could have prevailed with a UDRP panel. ⁿ¹²⁹ Evidence of bad faith is lacking because it is unclear if Teachbook is using its domain name to intentionally attempt to attract Internet users to its website, by creating a likelihood of confusion as to its affiliation with Facebook. Teachbook's site, aesthetically at least, looks nothing like facebook.com. ⁿ¹³⁰ Furthermore, Facebook has no incentive to risk losing in the UDRP, where Teachbook can afford to defend itself. ⁿ¹³¹ So long as Facebook has a valid claim (and is not "trademark bullying"),

Facebook can use the financial strain of a long lawsuit as part of its strategy. Just as Lamebook and FriendFinder settled, Teachbook eventually settled too.

The previous cases illustrate when litigation can be useful, and conversely, when the UDRP can be useful. If removing the site is the complainant's primary goal, the UDRP can be a more efficient mechanism than federal court. A trademark owner must strategically choose its forum.

V. New gTLDs and the Uniform Rapid Suspension System Procedure

However, understanding how to best protect one's trademark in the DNS is about to become even more important with ICANN's release of its new generic top-level (gTLDs) domains. Developed to increase competition, ICANN accepted applications for new gTLDs from January 12, 2012 to May 30, 2012. ⁿ¹³² The basic cost of submitting an application was \$ 185,000 per gTLD. ⁿ¹³³ The submission process is projected to last at least five months, as ICANN must determine if each applicant has the financial, technical, and operational capabilities to run a TLD on its own. ⁿ¹³⁴ Prior to ICANN's approval of a new gTLD, third parties have a seven-month [*321] opportunity to file an objection to an application on several grounds, including an objector's trademark rights. ⁿ¹³⁵

To assist with the release of the new gTLDs, ICANN developed the Uniform Rapid Suspension System (URS) Procedure. ⁿ¹³⁶ The URS is an expedited supplement ⁿ¹³⁷ to the UDRP, designed to remedy clear-cut, blatant cases of infringing conduct. ⁿ¹³⁸ The final resolution of a URS proceeding takes a mere twenty days. ⁿ¹³⁹ The URS includes an initial administrative review that is conducted within two business days of a complaint's filing. ⁿ¹⁴⁰ If the complaint is in order, the URS Provider will notify the domain name's registry that it must "lock" the domain name, thereby precluding the domain name from being transferred or altered. ⁿ¹⁴¹ The proposed standards for URS examiners to apply in rendering their decisions are the same as those in the UDRP, but the burden of proof is higher. ⁿ¹⁴² Complainants in URS proceedings must prove their cases with clear and convincing evidence. ⁿ¹⁴³ If a URS complainant prevails, the contested domain name would be suspended for the duration of the registration period, not transferred. ⁿ¹⁴⁴ Further, the cost of the URS will be much less than the UDRP. URS fees will be about three hundred dollars per decision, ⁿ¹⁴⁵ whereas the UDRP filing [*322] fee is usually about a thousand dollars. ⁿ¹⁴⁶ "Once it's finally implemented, the URS will provide a very streamlined process, considerably faster and cheaper than the UDRP (and vastly faster and cheaper than the litigation route)." ⁿ¹⁴⁷

While the UDRP, and now the URS, are designed as alternatives to litigation, the URS may promote more litigation. Because the URS is so inexpensive and quick, trademark owners could use the URS to suspend an infringing site and then file in federal court to obtain damages. For a mere three hundred dollars, Facebook could have suspended FacebookOfPorn.com within twenty days of filing a URS complaint and then filed in federal court. While the URS holding will not affect a federal court's decision, at least during the action's pendency, FacebookOfPorn.com would have been suspended. A favorable URS holding could also help leverage a substantial settlement. Furthermore, a trademark owner dissatisfied with a URS decision may feel motivated, or at least financially capable, to "try again" - either in the UDRP or through litigation. Or a successful URS complainant may want to file a UDRP complaint to cancel or transfer the domain name. Because the standard of proof is higher in the URS, arguably, a successful URS complainant should be a successful UDRP complainant. Will the UDRP panels respect the decisions of the URS panels? How the URS fits into a trademark owner's strategy will be interesting.

VI. Conclusion

Internet users assume, and implicitly trust, that a company's name or brand will correlate to its domain name. Because domain names play such an integral role in consumer perception of a site's source, trademark owners [*323] must police the use of their trademark in domain names. A trademark owner may seek redress against a domain name registrant from the Lanham Act, the FTDA, the ACPA, and the UDRP. Soon, trademark owners may enforce their rights against domain name registrants through the URS as well.

Trademark owners must strategically choose how they want to enforce their trademark rights against domain name registrants. Generally, a trademark owner takes one of these two routes: 1) the trademark owner files a complaint in federal court, pleading trademark infringement under the Lanham Act, trademark dilution under the FTDA, and/or cybersquatting under the ACPA; or 2) the trademark owner files a UDRP complaint. Soon, trademark owners will have a third option - the URS. And, as discussed in the previous section, trademark owners may feel compelled to combine the use of the URS with the UDRP or litigation.

A critical examination of Facebook's recent enforcement campaign to control the prefix "face" and suffix "book" for social networking sites offers a deeper understanding of a trademark owner's strategy. Beyond the elements of proof necessary for any of these options, a trademark owner must weigh the potential for damage recovery in litigation versus the expediency and lower cost of the UDRP. As evidenced by Facebook's enforcement campaign, sometimes the price of the UDRP can actually weigh against its use. And, while the line between trademark bullying and aggressive trademark protection is a fine one, Facebook's campaign demonstrates that the threat of litigation is a powerful tool that leaves many alleged infringers with little recourse other than a costly litigation battle.

Should ICANN implement a mechanism to allow domain name registrants to cheaply file trademark-bullying complaints after receiving cease and desist letters? This, in effect, would be analogous to filing a declaratory judgment claim with the UDRP. The futility of a non-binding declaratory judgment was discussed in the previous section; nevertheless, it may stop some trademark owners from pursuing their cause of action in court. Further steps should be taken to develop an inexpensive mechanism for trademark bullying victims to defend themselves.

n27. See *Sporty's Farm L.L.C.*, 202 F.3d at 496.

n28. See 15 U.S.C. § 1125(d)(1)(A) (2006).

A person shall be liable in a civil action by the owner of a mark, including a personal name which is protected as a mark under this section, if, without regard to the goods or services of the parties, that person--

(i) has a bad faith intent to profit from that mark, including a personal name which is protected as a mark under this section; and

(ii) registers, traffics in, or uses a domain name that--

(I) in the case of a mark that is distinctive at the time of registration of the domain name, is identical or confusingly similar to that mark;

(II) in the case of a famous mark that is famous at the time of registration of the domain name, is identical or confusingly similar to or dilutive of that mark; or

(III) is a trademark, word, or name protected by reason of section 706 of Title 18 or section 220506 of Title 36. Id.

n29. See 15 U.S.C. § 1125(d)(1)(A) (2006).

n30. See 15 U.S.C. § 1125(d)(1)(A) (2006). "Bad faith intent to profit" are terms of art in the ACPA, and thus, courts should not equate them with "bad faith" in other contexts. Sporty's Farm L.L.C., 202 F.3d at 499. Recall, "bad faith" was a factor in the Lanham Act likelihood of confusion tests but not necessary to a finding of infringement. Id.

n31. See Reed, *supra* note 6, at 230-31.

n32. See 15 U.S.C. § 1125(d)(1)(B)(i). These factors are:

(I) the trademark or other intellectual property rights of the person, if any, in the domain name;

(II) the extent to which the domain name consists of the legal name of the person or a name that is otherwise commonly used to identify that person;

(III) the person's prior use, if any, of the domain name in connection with the bona fide offering of any goods or services;

(IV) the person's bona fide noncommercial or fair use of the mark in a site accessible under the domain name;

(V) the person's intent to divert consumers from the mark owner's online location to a site accessible under the domain name that could harm the goodwill represented by the mark, either for commercial gain or with the intent to tarnish or disparage the mark, by creating a likelihood of confusion as to the source, sponsorship, affiliation, or endorsement of the site;

(VI) the person's offer to transfer, sell, or otherwise assign the domain name to the mark owner or any third party for financial gain without having used, or having an intent to use, the domain name in the bona fide offering of any goods or services, or the person's prior conduct indicating a pattern of such conduct;

(VII) the person's provision of material and misleading false contact information when applying for the registration of the domain name, the person's intentional failure to maintain accurate contact information, or the person's prior conduct indicating a pattern of such conduct;

(VIII) the person's registration or acquisition of multiple domain names which the person knows are identical or confusingly similar to marks of others that are distinctive at the time of registration of such domain names, or dilutive of famous marks of others that are famous at the time of registration of such domain names, without regard to the goods or services of the parties; and

(IX) the extent to which the mark incorporated in the person's domain name registration is or is not distinctive and famous within the meaning of subsection(c)(1) of section 43. Id.

n33. 15 U.S.C. § 1125 (d)(1)(B)(ii).

n34. 15 U.S.C. § 1125(d)(1)(C).

n35. 15 U.S.C. § 1117.

n36. See 15 U.S.C. § 1125(d)(1)(C).

n37. 15 U.S.C. § 1125(d)(3) (providing that any remedies created by the new act are "in addition to any other civil action or remedy otherwise applicable").

n38. See Eric Goldman, District Court Denies Motion to Dismiss on Reverse Domain Name Hijacking Claim, Technology & Marketing Blog (Oct. 31, 2011), http://blog.ericgoldman.org/archives/2011/10/district_court.htm (discussing a district court's denial of a motion to dismiss on a reverse domain name hijacking claim). Reverse hijacking argument claims are rare. *Id.*

n39. Goldman, *supra* note 38.

n40. *Id.*

n41. 15 U.S.C. § 1125. In order to obtain damages, however, the claimant must show that the person claiming rights to the domain name made "knowing and material" misrepresentations. *Id.*

n42. FAQs on the UDRP, InterNIC, <http://www.internic.net/faqs/udrp.html> (last visited Feb. 25, 2012). In 2011, 2,764 cases were submitted to the UDRP. Total Number of Cases per Year, WIPO, <http://www.wipo.int/amc/en/domains/statistics/cases.jsp> (last visited March 1, 2012).

n43. " Unless personal names have achieved trademark status they are not protected under the UDRP In contrast, the Lanham Act provides a remedy for cyberspiracy of personal names that do not qualify for trademark protection" Gerald M. Levine, Injunctive Relief Against Domain Name Registrants for Unauthorized Registration of Personal Name, UDRP Commentaries (Jan. 12, 2012), <http://www.udrpcommentaries.com/injunctive-relief-against-domain-name-registrants-for-unauthorized-registration-of-personal-name/>.

n44. See FAQs on the UDRP, *supra* note 42. UDRP panel decisions, unlike arbitration, are not binding. See Elizabeth C. Woodard, The UDRP, ADR, and Arbitration: Using Proven Solutions to Address Perceived Problems with the UDRP, 19 Fordham Intell. Prop. Media & Ent. L.J. 1169, 1179 (2009). "Using classic arbitration was considered [by WIPO] but dismissed on the grounds that it does not allow for judicial review of decisions, an element that WIPO considered crucial to ensure the fairness of the new process. WIPO therefore concluded that an entirely new system of ADR was required." *Id.* Consequently, the UDRP is a unique blend of different forms of ADR. *Id.* Some argue, however, "the desire to treat the UDRP process as less than binding arbitration ultimately works against the UDRP's goal of establishing a quick and inexpensive resolution mechanism," because the domain name registrant can file a lawsuit at any time. Chad D. Emerson, Wasting Time in Cyberspace: The Udrp's Inefficient Approach Toward Arbitrating Internet Domain Name Disputes, 34 U. Balt. L. Rev. 161, 175-76 (2004).

n45. " The UDRP was not the first attempt to solve the cybersquatting problem using ADR. A single registrar had previously created its own system of ADR for cybersquatting disputes, in an effort to avoid being brought into lawsuits between trademark owners and cybersquatters. Once more registrars were accredited, however, the U.S. government decided that cybersquatting was so pervasive that it was necessary to create a new ADR system dedicated to hearing cybersquatting claims." Woodard, *supra* note 44, at 1178--79.

n46. See Navai *supra* note 24.

n47. Generally, cybersquatters do not sell the same type of product as the trademark holder does. See, e.g., *Virtual Works, Inc. v. Volkswagen of Am., Inc.*, 238 F.3d 264, 267 (4th Cir. 2001) (holding Internet service provider Virtual Works's domain name "vw.net" was confusingly similar to the Volkswagen company's famous "VW" mark and domain name owner was motivated by bad faith).

n48. Christopher G. Clark, *The Truth In Domain Names Act of 2003 and A Preventative Measure to Combat Typosquatting*, 89 *Cornell L. Rev.* 1476, 1480 (2004). For example, "www.whitehouse.com" used to direct a viewer, such as an innocent child looking for the White House's website, to an adult pornography website. See *In Re Parisi*, SERIAL 75291235, 2004 WL 2368410 (Trademark Tr. & App. Bd. May 28, 2004). Additionally, any person can register a Columbia top-level domain (.co). As such, it is easy to redirect a user who makes the mistake of typing ".co" instead of ".com."

n49. Clark, *supra* note 48, at 1481.

n50. Uniform Domain-Name Dispute-Resolution Policy, ICANN, <http://www.icann.org/en/udrp/udrp.htm> (last visited Feb. 25, 2012). "Around 60% of the UDRP disputes have been heard by the World Intellectual Property Organization's [(WIPO)] Domain Name Dispute Resolution Service (DNDRS), arguably because plaintiffs are comfortable with WIPO's aesthetic of the 'sacredness' of intellectual property. The others are the CPR Institute for Dispute Resolution (CPR), National Arbitration Forum (NAF) and the Asian Domain Name Dispute Resolution Centre (ADNDRC). The latter replaced Canada-based eResolution (eRes), which withdrew in late 2001." ICANN profile: UDRP, Caslon Analytics, <http://www.caslon.com.au/icannprofile7.htm> (last visited Feb. 25, 2012); see List of Approved Dispute Resolution Service Providers, ICANN, <http://www.icann.org/en/dndr/udrp/approved-providers.htm> (last visited Feb. 25, 2012) (providing a list of ICANN's approved UDRP service providers).

n51. See Uniform Domain-Name Dispute-Resolution Policy, *infra* note 52.

n52. Uniform Domain Name Dispute Resolution Policy, ICANN, <http://www.icann.org/en/udrp/udrp-policy-24oct99.htm> (last visited Feb. 25, 2012).

n53. See *id.*; Dennis S. Prah & Eric Null, The New Generic Top-Level Domain Program: A New Era of Risk for Trademark Owners and the Internet, 101 Trademark Rep. 1757, 1784 (2011).

n54. Uniform Domain Name Dispute Resolution Policy, *supra* note 52.

n55. Because this list is non-exhaustive, panels have found bad faith in circumstances beyond those enumerated. See, e.g., *Tourism and Corporate Automation Ltd. v. TSI Ltd.*, AF-0096, [2000] GENDND 66 Disputes.org/eResolution Consortium Admin. Panel March 16, 2000 (WorldLII) (finding an employee who left his job "more or less unhappily," then registered a domain name identical to the trademark of his former employer with no demonstrable plans to use the name acted in "bad faith").

n56. Initially, the UDRP's bad faith use requirement concerned trademark attorneys because "use" under the Lanham Act means "used in commerce." See *supra* note 16. However, the "use" requirement has not been troublesome: "Three of the four factors outlining bad faith do not require any use per se ... and many of the early decisions under the UDRP have similarly found bad faith in the absence of any traditional use of the domain, indeed even in the absence of an active website." Analysis of Key UDRP Issues, Berkman Center for Internet & Soc'y at Harv. U., <http://cyber.law.harvard.edu/udrp/analysis.html> (last visited Feb. 25, 2012).

n57. "For example, in *Bragg v. Condon* (plasticdocshop.com, cosmeticdocshop.com) FA0092528, the respondent registered two domain names using a competitor's trademark soon after learning of the competitor's confidential business strategy; and in *Easyjet Airline Company Ltd v. Steggles* (easyjet.net) D2000-0024, the respondent's web site used the disputed domain name to link to two of the complainant's competitors." Analysis of Key UDRP Issues, *supra* note 56.

n58. Uniform Domain Name Dispute Resolution Policy, *supra* note 52.

n59. Rules for Uniform Domain Name Dispute Resolution Policy, ICANN, <http://www.icann.org/en/dndr/udrp/uniform-rules.htm> (last visited Feb. 25, 2012). Some commentators have argued that UDRP is pro-claimant, and thus an unfair process, because of the twenty-day response time. See Woodard, *supra* note 464, at 1188-89. While the rules of most arbitration providers give respondents thirty days to answer a complaint, the Federal Rules of Civil Procedure only allow defendants twenty-one days to answer a complaint. *Id.* at 1190; Fed. R. Civ. P. 12.

n60. Rules for Uniform Domain Name Dispute Resolution Policy, *supra* note 59.

n61. One study found that 54% of UDRP claims result in default judgments, and that 96% of those default judgments favor the complainant. See Woodard, *supra* note 44, at 1192.

n62. See *Alcoholics Anonymous World Servs., Inc. v. Raymond*, D2000-0007 (WIPO Arbitration and Mediation Ctr. Admin. Panel March 6, 2000) (holding that "Respondent's failure to respond to the Complaint allows the inference that the evidence would not have been favorable to Respondent").

n63. See Uniform Domain Name Dispute Resolution Policy, *supra* note 52.

n64. Rules for Uniform Domain Name Dispute Resolution Policy, *supra* note 59. This provision, Rule 15(a), was "promulgated to give the panel full discretion in deciding which law, if any, to apply to any particular dispute." Analysis of Key UDRP Issues, *supra* note 56. "Panelists in a UDRP proceeding are given significantly more freedom to select important aspects of the decision-making process than panelists in other types of ADR, most of which require the governing law of the proceeding to be mutually agreed upon by the parties in advance." Woodard, *supra* note 44, at 1195-96. Panels do rely on previous UDRP opinions as persuasive authority to help address procedural and substantive matters though. See, e.g., *Alcoholics Anonymous World Servs., Inc.*, D2000-0007.

n65. Frequently Asked Questions: Internet Domain Names, WIPO, <http://www.wipo.int/amc/en/center/faq/domains.html#12> (last visited Feb. 25, 2012). "The panel decisions are mandatory in the sense that accredited registrars are bound to take the necessary steps to enforce a decision, such as transferring the name concerned." *Id.*

n66. *Id.* Based on WIPO's statistical analysis of all cases decided, 1.57% end with cancellation of the domain name, 85.07% end with transfer of the domain name, and 13.36% end with denial of the complaint. Case Outcome (Consolidated): All Years, WIPO, http://www.wipo.int/amc/en/domains/statistics/decision_rate.jsp?year= (last visited Oct. 30, 2012).

n67. Frequently Asked Questions: Internet Domain Names, *supra* note 65.

n68. "The accredited domain name registrars ... implement a decision after a period of ten days, unless the decision is appealed in court in that time." Frequently Asked Questions: Internet Domain Names, *supra* note 65. Appealing a panel decision in court is only possible if jurisdiction exists; however, being able to appeal a UDRP panel decision to a judge was an integral part of ICANN's original vision in developing UDRP. See Woodard, *supra* note 44, at 1179.

n69. Frequently Asked Questions: Internet Domain Names, *supra* note 65. Any decision made by a panel under the UDRP is no more than an agreed-upon administration that is not given any deference in federal court. See *Barcelona.com, Inc. v. Excelentísimo Ayuntamiento De Barcelona*, 330 F.3d 617, 626 (4th Cir. 2003) ("Because a UDRP decision is susceptible of being grounded on principles foreign or hostile to American law, the ACPA authorizes reversing a panel decision if such a result is called for by application of the Lanham Act.").

n70. See Woodard, *supra* note 44, at 1200.

n71. *Id.* at 1200-01. "These critics claim that such a board is necessary to 'provide uniformity to the process,' reduce inconsistencies among UDRP decisions, and 'establish principles and precedent under the UDRP, which other lower level Panels would be required to follow.'" *Id.* Other critics have proposed a change to the UDRP appeal process, such that when there is a split panel, either side can request one additional three-person panel review. See *How to Save UDRP from Bad Panel Decisions*, Domain Name Wire (May 1, 2008), <http://domainnamewire.com/2008/05/01/how-to-save-udrp-from-bad-panel-decisions/>.

n72. See Trademark Electronic Search System (TESS), United States Patent and Trademark Office, <http://tess2.uspto.gov/bin/gate.exe?f=searchss&state=4004:dbjkr.1.1> (search for live marks with "facebook" under "Owner name and address" field). On March 15, 2012, Facebook expanded its trademark rights over the word "book" by revising its "Statement of Rights and Responsibilities." See *Statement of Rights and Responsibilities Updates*, Facebook, https://www.facebook.com/note.php?note_id=10151420037600301 (last visited Oct. 12, 2012). All Facebook users must now agree to the following: "You will not use our copyrights or trademarks (including Facebook, the Facebook and F Logos, FB, Face, Poke, Book and Wall), or any confusingly similar marks, except as expressly permitted by our Brand Usage Guidelines or with our prior written permission." *Id.*

n103. Venkat Balasubramani, Facebook Fails In Its Argument That Faceporn Is Under US Jurisdiction For Using A .com, Techdirt (Dec. 7, 2011), <http://www.techdirt.com/articles/20111206/11351416992/facebook-fails-its-argument-that-faceporn-is-under-us-jurisdiction-using-com.shtml>.

n104. Facebook, Inc. v. Pederson Document 46, Justia Dockets & Filings, <http://docs.justia.com/cases/federal/district-courts/california/candce/3:2010cv04673/233043/46/> (last visited March 1, 2012). Faceporn.com is currently "offline for a redesign." FaceBook.com Sues FacePorn.com, Special VPS (Oct. 22, 2010), <http://www.specialvps.com/facebookcom-sues-faceporncom/>.

n105. Facebook, Inc. v. Pederson, Justia Dockets & Filings, <http://docs.justia.com/cases/federal/district-courts/california/candce/3:2010cv04673/233043/46/> (last visited March 1, 2012).

n106. *Id.* Facebook alleges that Faceporn is a highly interactive website that has 250 users in California and 1000 users in the United States, and that Faceporn targeted "a U.S. audience" by registering its website with a domain name ending in ".com." These allegations alone, without facts showing that Faceporn's California viewer base was "an integral component" of Faceporn's business model and profitability, falls short of meeting Facebook's burden to establish that the exercise of personal jurisdiction over Defendants is proper, as "not all material placed on the Internet is, solely by virtue of its universal accessibility, expressly aimed at every state in which it is accessed..." *Id.*

n107. See *id.*

n108. See *id.*

n109. Julia Hornle, *The Uniform Domain Name Dispute Resolution Procedure: Is Too Much of A Good Thing A Bad Thing?*, 11 *SMU Sci. & Tech. L. Rev.* 253, 284 (2008).

n110. See *supra* note 54.

n111. See *Facebook, Inc. v. Pederson*, *supra* note 104.

n112. Whois faceporn.com, Whois, <http://www.whois.com/whois/faceporn.com> (last visited Oct. 12, 2012). One has to wonder why the district court has been sitting on this jurisdictional issue for so long. On September 30, 2011, the district court judge randomly assigned Facebook's motion for default judgment to a magistrate judge; the magistrate judge issued the order to show cause regarding personal jurisdiction. *Facebook, Inc. v. Pederson* Document 46, *supra* note 105. As to dispositive pretrial matters, magistrate judges may enter findings and recommendations, which are reviewed by the district judge *de novo*. See § 3505 *The District Courts*, 13 *Fed. Prac. & Proc. Juris.* § 3505 (3d ed.). However, a magistrate judge may conduct all proceedings and order the entry of judgment upon consent of the parties. See *id.* Here, the parties did not consent to magistrate jurisdiction. Therefore, the magistrate judge cannot dismiss this case for lack of personal jurisdiction. Rather, the magistrate judge can issue a recommendation to the district court. The docket does not reflect that the district court has reviewed the magistrate judge's report and recommendation though.

n113. WIPO Guide to the Uniform Domain Name Resolution Policy (UDRP), WIPO, <http://www.wipo.int/amc/en/domains/guide/#b2> (last visited March 1, 2012). Some critics have argued that "aggrieved parties ... should proceed straight to court without stopping at the UDRP" if they "truly want to save time and money." Emerson, *supra* note 44, at 163. This criticism is based on a domain name registrant's ability to circumvent, or even completely avoid, mandatory participation in the UDRP by initiating a lawsuit. *Id.* at 173. Here, however, it is highly unlikely Retro Invent would bring a lawsuit against Facebook, considering Retro Invent is not answering Facebook's complaint.

n114. Rules for Uniform Domain-Name Dispute Resolution Policy, *supra* note 52. "In the event that a Party initiates any legal proceedings during the pendency of an administrative proceeding in respect of a domain-name dispute that is the subject of the complaint, it shall promptly notify the Panel and the Provider." *Id.*

n115. Because both Facebook and Faceporn are eight letter words with two syllables, and Faceporn does offer a service - albeit one that includes porn - very similar to Facebook, Facebook could argue that Faceporn is likely to create Internet user confusion. Moreover, Facebook owns the trademark "Face."

n116. Catharine Smith, *Lamebook SUES Facebook*, The Huffington Post (May 25, 2011), http://www.huffingtonpost.com/2010/11/08/lamebook-sues-facebook_n_780482.html.

JUDGES: JULIE E. CARNES, CHIEF UNITED STATES DISTRICT JUDGE.

OPINION BY: JULIE E. CARNES

OPINION

ORDER and OPINION

This case is presently before the Court on defendant's Motion For Protective Order [21], defendant's Motion For Summary Judgment [23], defendant's Motion For Protective Order Regarding Privileged Documents [27], plaintiff's Motion To Deny Summary Judgment Under Rule 56(d) [33], defendant's Emergency Motion For Scheduling Conference [38], defendant's Motion For Leave To File Sur-Reply [46], and the parties' Joint Motion For A Discovery Extension [49].

The Court has reviewed the record and the arguments of the parties and, for the reasons set out below, concludes that defendant's Motion For Protective Order [21] should be **DENIED as moot**, defendant's Motion [*2] For Summary Judgment [23] should be **DENIED without prejudice**, defendant's Motion for Protective Order Regarding Privileged Documents [27] should be **GRANTED**, plaintiff's Motion To Deny Summary Judgment [33] should be **GRANTED**, defendant's Emergency Motion For Scheduling Conference [38] should be **DENIED**, defendant's Motion For Leave To

File Sur-Reply [46] should be **DENIED as moot**, and the parties' Joint Motion For A Discovery Extension [49] should be **GRANTED**.

BACKGROUND

This is a trademark case. Plaintiff Royal Oak Enterprises, LLC ("Royal Oak") uses the mark "Nature-Glo" in connection with its sale of charcoal and wood briquets, wood chips and grill wood. (Compl. [1] at ¶¶ 9, 15.) The original owner of the "Nature-Glo" mark, Hickory Specialties, Inc., adopted and began using the mark in its charcoal and grilling products business in 1985. (*Id.* at ¶ 8.) Hickory Specialties registered the mark with the United States Patent and Trademark Office ("USPTO") in 1987, and subsequently assigned the mark to plaintiff. (*Id.* at ¶¶ 10, 15.)

Defendant Nature's Grilling Products, LLC ("Nature's Grilling") is in the business of selling natural and sustainable grilling products, including charcoal briquets. [*3] (Def.'s Br. in Supp. of Summ. J. ("Def.'s Br.") [25] at 5-6.) In 2006, defendant began using the mark "Nature's Grilling Products" in connection with its business. (*Id.* at 5.) Defendant later shortened its mark to "Nature's Grilling." (*Id.*) Defendant filed an application to register the "Nature's Grilling" mark with the USPTO in February, 2008. (*Id.* at 6.) Approximately two years later, the USPTO notified defendant that the "Nature's Grilling" mark had been allowed for use in connection with charcoal briquets. (*Id.*)

Plaintiff contends that defendant's use of the term "Nature's Grilling" infringes plaintiff's preexisting rights in the mark "Nature-Glo." (Compl. [1] at ¶ 28.) In its complaint, plaintiff asserts federal claims against defendant for trademark infringement and unfair competition, and state claims for infringement and deceptive trade practices. (*Id.* at ¶¶ 23-45.) Assuming that it prevails on its claims, plaintiff seeks an injunction prohibiting defendant from using the "Nature's Grilling" mark, as well as compensatory damages and the costs of the action. (*Id.* at 11-12.)

Discovery in this case was scheduled to close in May, 2011, but it is largely incomplete as a result of [*4] several intervening motions filed by the defendant. Specifically, defendant has filed a motion for a protective order regarding discovery pending resolution of its separate motion for summary judgment. (Def.'s Mot. for Protective Order [21] and Mot. for Summ. J. [23].) According to defendant, this action should be summarily dismissed prior to discovery because it constitutes "trademark bullying." (Def.'s Br. [25] at 1-4.) In response to defendant's highly unusual request for summary judgment without any discovery, plaintiff has filed a motion to deny summary judgment pursuant to Federal Rule 56(d). (Pl.'s Mot. to Deny Summ. J. [33].)

In addition to the above motions, defendant has filed a motion requesting general protection from discovery and a protective order as to certain allegedly privileged documents. (Def.'s Mot. for Protective Order [27] and Mot. for Scheduling Conference [38].) The parties have also filed a joint motion to extend the discovery deadline, which expired nearly six months ago.¹ (Jt. Mot. for Extension [49].) All of these motions are presently before the Court.

¹ Defendant's motion for leave to file a sur-reply also appears on the docket. (Def.'s Mot. for Leave [46].) [*5] The proposed sur-reply pertains to plaintiff's motion for a stay of this action pending a ruling by the Trademark Trial and Appeal Board ("TTAB") in a cancellation proceeding. (*Id.*) The Court previously denied plaintiff's motion for a stay. (Order [52].) Accordingly, defendant's motion for leave to file a sur-reply addressing the stay issue [46] is **DENIED as moot**.

DISCUSSION

I. Defendant's Motion For Summary Judgment

A. Standard

Summary judgment is appropriate when the pleadings, the discovery and disclosure materials on file, and any affidavits

show that there is no genuine issue as to any material fact and that the movant is entitled to a judgment as a matter of law. FED. R. CIV. P. 56(c). A fact's materiality is determined by the controlling substantive law. *Anderson v. Liberty Lobby, Inc.*, 477 U.S. 242, 248, 106 S. Ct. 2505, 91 L. Ed. 2d 202 (1986). An issue is genuine when the evidence is such that a reasonable jury could return a verdict for the nonmovant. *Id.*

Summary judgment is not properly viewed as a device that the trial court may, in its discretion, implement in lieu of a trial on the merits. Instead, Rule 56 mandates the entry of summary judgment against a party who fails to make a showing sufficient to establish [*6] the existence of every element essential to that party's case on which that party will bear the burden of proof at trial. *Celotex Corp. v. Catrett*, 477 U.S. 317, 322, 106 S. Ct. 2548, 91 L. Ed. 2d 265 (1986); FED. R. CIV. P. 56(c). In such a situation, there can be "no genuine issue as to any material fact," as "a complete failure of proof concerning an essential element of the nonmoving party's case necessarily renders all other facts immaterial." *Celotex Corp.*, 477 U.S. at 323 (quoting FED. R. CIV. P. 56(c)) (internal quotation marks omitted).

The movant bears the initial responsibility of asserting the basis for his motion. *Id.* at 323. However, the movant is not required to negate his opponent's claim. The movant may discharge his burden by merely "showing"--that is, pointing out to the district court--that there is an absence of evidence to support the nonmoving party's case." *Id.* at 325. After the movant has carried his burden, the nonmoving party is then required to "go beyond the pleadings" and present competent evidence designating "specific facts showing that there is a genuine issue for trial." *Id.* at 324 (quoting FED. R. CIV. P. 56(e)) (internal quotation marks omitted). While the court is to view all evidence [*7] and factual inferences in a light most favorable to the nonmoving party, *Samples*, 846 F.2d at 1330, "the mere existence of *some* alleged factual dispute between the parties will not defeat an otherwise properly supported motion for summary judgment; the requirement is that there be no *genuine* issue of *material* fact." *Anderson*, 477 U.S. at 247-48.

B. Plaintiff's Trademark Claims

In order to prevail on its federal trademark infringement claims, plaintiff must show that defendant's use of the "Nature's Grilling" mark is likely to confuse consumers.² *Welding Servs., Inc. v. Forman*, 509 F.3d 1351, 1356 (11th Cir. 2007). Whether there is a likelihood of confusion is a question of fact, determined by weighing the following factors: (1) strength or distinctiveness of the allegedly infringed mark, (2) similarity of the infringed and infringing marks, (3) similarity of the goods or services offered under the two marks, (4) similarity of the sales methods used by the two parties, such as their sales outlets and customer base, (5) similarity of advertising methods, (6) intent of the alleged infringer to misappropriate the proprietor's good will, and (7) the existence and extent of actual confusion [*8] in the consuming public. *Id.* at 1360.

² Plaintiff's state claims are governed by the same standard. See *Future Prof'ls, Inc. v. Darby*, 266 Ga. 690, 691, 470 S.E.2d 644 (1996)(Georgia law "entitles a person to the protection of a trade name when another person's use of a similar name" creates a likelihood of confusion) and *Impreglon, Inc. v. Newco Enters.*, 508 F. Supp. 2d 1222, 1242-43 (N.D. Ga. 2007)(Story, J.)(recognizing that the Lanham Act and the Georgia UDTPA are governed by the same standard).

For purposes of the present motion, defendant concedes that the goods offered for sale under the two marks are the same, and that the parties use similar advertising methods. (Def.'s Br. [25] at 10.) Nevertheless, and in spite of the lack of any discovery on the relevant issues, defendant argues that summary judgment is warranted because the remaining factors overwhelmingly weigh in its favor. (*Id.*) Specifically, defendant asserts that the "Nature's Grilling" and "Nature-Glo" marks "drastically differ" in sound and appearance. (*Id.* at 11-20.) In addition, defendant submits the declaration testimony of its founder Bradley Natrass that defendant: (1) uses different channels of trade and does not share [*9] a customer base with plaintiff and (2) did not intend to take advantage of plaintiff's goodwill in the "Nature-Glo" mark. (*Id.* at 21-23.) Finally, defendant notes that it is unaware of any instances of actual confusion among consumers. (*Id.* at 24.)

Depending on the evidence that is developed during discovery, defendant may ultimately prevail on its motion for summary judgment. However, at this stage in the litigation, the motion is clearly premature. Contrary to defendant's suggestion, the marks at issue are not so obviously distinct that reasonable confusion is foreclosed. *Cf. Alaven Consumer Healthcare, Inc. v. DrFloras, LLC*, 399 Fed. Appx. 545, 547 (11th Cir. 2010)(upholding the district court's determination that "DrNatura" and "DrFloras" were insufficiently similar to create a triable issue of fact on trademark infringement). Considering that the products offered for sale under the marks are identical, discovery may reveal questions of fact on this issue.

As to the remaining factors, plaintiff is entitled to discovery in order to: (1) test the veracity of the declaration testimony submitted by defendant and (2) explore fact-intensive issues such as intent and actual confusion. *See* [*10] FED. R. CIV. P. 56(d)(providing for discovery where a nonmovant "cannot present facts essential to justify its opposition" to summary judgment) and *Snook v. Trust Co. of Georgia Bank of Savannah, N.A.*, 859 F.2d 865, 870 (11th Cir. 1988)("This court has often noted that summary judgment should not be granted until the party opposing the motion has had an adequate opportunity for discovery."). *See also Vining v. Runyon*, 99 F.3d 1056, 1058 (11th Cir. 1996)("it is error for a district court to decide a summary judgment motion before ruling on an outstanding motion to compel"). Even in the absence of any discovery, plaintiff has produced evidence that contradicts defendant's assertions as to the channels of trade. (Pl.'s Resp. to Def.'s Mot. for Summ. J. ("Pl.'s Resp.") [32] at 22-24.)

In fact, defendant concedes in a different pleading that at least some discovery is warranted "out of respect for fair play and the general notion of a sort of civil Sixth Amendment right to cross-examination." (Def.'s Resp. to Pl.'s Mot. to Deny Summ. J. Under Rule 56(d) [39] at 1.) The Court agrees with that statement. Moreover, the Court is persuaded by plaintiff's argument that discovery is required by [*11] Rule 56(d). (Pl.'s Mot. to Deny Summ. J. Under Rule 56(d) [33].) Accordingly, the Court **GRANTS** plaintiff's Motion to Deny Summary Judgment Under Rule 56(d) [33] and **DENIES without prejudice** defendant's Motion for Summary Judgment [23]. Defendant will be permitted to renew its motion for summary judgment following discovery.³

³ In accordance with these rulings, and to clarify the docket, the Court **DENIES as moot** defendant's motion for a protective order as to discovery [21] pending the Court's ruling on summary judgment. Defendant effectively achieved a stay by refusing to participate in discovery prior to the Court's ruling.

II. Discovery Motions

A. General Protective Order

The question that remains to be decided is whether plaintiff is entitled to full discovery prior to the summary judgment ruling. In its motion for a scheduling conference, defendant argues that discovery should be strictly limited in its scope and time frame. (Def.'s Mot. for Emergency Scheduling Conference [38].) As a justification for imposing such limits, defendant again invokes the "trademark bullying" rationale. (*Id.* at 6.) According to defendant, this case is simply an attempt by plaintiff to rid itself of a competitor [*12] under the guise of enforcing trademark rights. (*Id.*) Defendant suggests that its survival will be threatened by the expense of full discovery and the length of time required to complete it. (*Id.* at 4-5.)

Defendant's arguments are unpersuasive. As an initial matter, there is insufficient evidence in the record to simply accept, without question, defendant's trademark bullying theory. In support of its theory, defendant cites a USPTO survey and recent Congressional action concerning the "epidemic" of trademark bullying. (Def.'s Br. [25] at 1, 4.) Of course, the fact that trademark bullying is becoming more common does not mean that plaintiff is guilty of it in this particular case. Further, hyperbolic name-calling of one's opponent tends to suggest some insecurity about the merits of one's own position.

Defendant also presents declaration testimony suggesting that plaintiff recently lost a contract to defendant in a competitive bidding process. (Natrass Decl. [36] at 2-4.) Assuming the testimony is true, it does not necessarily follow that plaintiff filed this action in retaliation. Indeed, the fact that plaintiff concurrently filed a cancellation proceeding with the TTAB suggests otherwise. [*13] In any case, the declarant's statements are open to dispute, as they have not been tested by deposition or otherwise in discovery.

Furthermore, defendant's stated concerns about its ability to fund the litigation and survive during the time required to complete full discovery are suspect. Defendant claims that it does not have the necessary cash reserves to pay "exorbitant attorneys' fees for protracted and burdensome litigation." (*Id.* at 4.) However, in other pleadings, defendant asserts that this litigation "costs zero" to defendant as a result of its insurance coverage. (Def.'s Br. in Supp. of Mot. to File Sur-Reply [46] at 10.) Certainly defendant's conduct of the litigation thus far, including its extensive filing of non-meritorious motions, has not been especially cost-sensitive. As to the time factor, discovery could have been completed six months ago if defendant had merely complied with the original scheduling order, rather than filing a pre-discovery motion for summary judgment that counsel could not have reasonably expected would actually be granted.

In short, there is no good reason to deviate in this case from the usual course of discovery. Accordingly, the Court **DENIES** [*14] defendant's motion for a scheduling conference [38] and the relief requested therein. To facilitate the discovery process, the Court **GRANTS** the joint motion for an extension of time to complete discovery [49]. Discovery will begin on the date of this order, and will conclude in four (4) months. As to its scope, all discovery requests should comply with Rule 26(b) of the Federal Rules of Civil Procedure. *See* FED. R. CIV. P. 26(b)(permitting discovery "regarding any nonprivileged matter that is relevant to any party's claim or defense"). Pursuant to Rule 26(c), the parties should make every effort to resolve any disputes that arise without the involvement of the Court. *See* FED. R. CIV. P. 26(c)(requiring "an effort to resolve [discovery] dispute[s] without court action").

B. Protective Order As To Privileged Documents

In addition to its general request for protection from discovery, defendant has filed a motion for a protective order as to specific documents that are allegedly privileged. (Def.'s Mot. for Protective Order [27].) The documents at issue are the subject of a subpoena served on defendant's insurer, Nautilus Insurance Company ("Nautilus"). (*Id.* at Ex. B.) The subpoena encompasses [*15] the entire Nautilus claim file, including any communications with defendant and/or defense counsel since the beginning of the litigation. (*Id.*)

Federal Rule of Civil Procedure 26(b)(3) generally prohibits the discovery of "documents . . . that are prepared in anticipation of litigation or for trial by or for another party or its representative." FED. R. CIV. P. 26(b)(3). The prohibition expressly extends to documents created by a party's insurer. *Id.* Pursuant to Rule 26(b)(3), such documents may only be discovered if the party requesting them "shows that it has substantial need for the materials to prepare its case and cannot, without undue hardship, obtain their substantial equivalent by other means." *Id.*

The documents described in the Nautilus subpoena clearly fall within the protection of Rule 26(b)(3). *See Carver v. Allstate Ins. Co.*, 94 F.R.D. 131, 134 (D.C. Ga. 1982)(once litigation is imminent, an insurer's claim file is maintained "in anticipation of litigation" and its contents are protected by Rule 26(b)(3)) and *Taylor v. Temple & Cutler*, 192 F.R.D. 552, 558 (E.D. Mich. 1999)(files generated during an insurer's investigation of a third party claim are made in anticipation of [*16] litigation and are not discoverable). The subpoena specifically covers documents related to the litigation that were generated after the case was filed. (Def.'s Mot. for Protective Order [27] at Ex. B.)

Plaintiff does not even attempt to show "substantial need" or "undue hardship." (Pl.'s Resp. to Mot. for Protective Order [31].) Indeed, plaintiff does not provide any substantive response to defendant's motion. (*Id.*) Rather, plaintiff argues that the motion should be denied because defendant did not: (1) submit a memorandum of law in support of its motion or (2) provide a privilege log as required by Rule 26(b)(5). (*Id.* at 1-2.)

Plaintiff's arguments are unavailing. Defendant's motion adequately sets forth its fairly simple legal argument concerning Rule 26(b)(3), and cites the appropriate authorities. A formal brief is not necessary. With regard to the privilege log, Rule 26(b)(5) technically does not apply because plaintiff's subpoena is not directed to a "party" in the case. *See* FED. R. CIV. P. 26(b)(5). Moreover, a privilege log would serve no purpose here because defendant seeks protection for the entire Nautilus claim file. As plaintiff fails to assert any persuasive argument for [*17] permitting discovery of the file, the Court **GRANTS** defendant's motion for a protective order [27].

CONCLUSION

For the foregoing reasons, the Court **DENIES as moot** defendant's Motion For Protective Order [21], **DENIES without prejudice** defendant's Motion For Summary Judgment [23], **GRANTS** defendant's Motion for Protective Order Regarding Privileged Documents [27], **GRANTS** plaintiff's Motion To Deny Summary Judgment [33], **DENIES** defendant's Emergency Motion For Scheduling Conference [38], **DENIES as moot** defendant's Motion For Leave To File Sur-Reply [46], and **GRANTS** the parties' Joint Motion For A Discovery Extension [49].

So ORDERED this 21st day of November, 2011.

LEXISNEXIS SUMMARY:

... Provisions to Encourage Use of Detention Procedures by Trademark Holders Not only does ACTA require that the United States provide a method for trademark holders to request detentions of suspected shipments, there are also a number of provisions in ACTA that encourage such use by trademark holders. ... Further, ACTA's mandate to include mere trademark infringement into the United States' border measures may mean that the CBP will need to revise its current procedures with respect to merely infringing shipments. ... Further, in cases where the CBP has provided personally-identifiable information to trademark holders prior to making a determination of infringement, small businesses are vulnerable to interference by trademark bullies on perfectly legitimate products. ... Such a rigorous timeframe and a requirement for proactive steps on the part of trademark holders can be found in other international agreements, such as in the Agreement on Trade-Related Aspects of Intellectual Property (TRIPS), as well as in the European Union (EU). ... Either of these situations would indicate that the requesting trademark holder has not sufficiently undertaken an analysis of her trademark rights vis-a-vis the importer.

HIGHLIGHT:

Small businesses are an important component of the American economy. In fact, the jobs created by small businesses could assist the United States in overcoming its most recent economic downturn. Paradoxically, though, the failure rate of small businesses is quite high. Although various factors contribute to this high failure rate, one of the factors the U.S. government has focused on has been the disproportionate impact that intellectual property laws, policies, and their enforcement may have on small businesses. While the U.S. government has paid attention to the impact of domestic intellectual property laws on small businesses, the government has paid little attention to the impact that the implementation of international intellectual property obligations may have on small businesses. This disconnect threatens to undo the efforts of the U.S. government, as implementation of these obligations in the United States pose similar hurdles to success for small businesses. One recent example of this disconnect and potential for serious harm to

small businesses is the Anti-Counterfeiting Trade Agreement (ACTA), where the U.S. government has seemingly all but ignored small businesses. This Article uses ACTA as an example of how the U.S. government should be analyzing and negotiating international intellectual property agreements with an eye toward the impact on small businesses, which would thereby resolve the disconnect and create a coherent policy approach.

TEXT:

[*1493]

I. Introduction

Small businesses are the heart of the American economy, accounting for approximately sixty percent of all job creation in any given year.ⁿ¹ The United States government has recognized that small businesses may be the key to leading the United States out of its recent economic downturn.ⁿ² At the same time, starting a small business is a risky proposition. Approximately fifty percent of all new businesses fail within the first five years.ⁿ³ This vulnerability to failure is due to a number of factors, including the disproportionate impact that certain laws may have on small businesses.ⁿ⁴ Such laws may be those involving intellectual property,ⁿ⁵ employment,ⁿ⁶ taxes,ⁿ⁷ and international trade,ⁿ⁸ to **[*1494]** name a few. In particular, the U.S. government has recognized that intellectual property laws, policies, and their enforcement can have unintended consequences that may impact the viability of some small businesses.ⁿ⁹ In recent years, the U.S. government has recognized this unintended harm to small businesses and, through a number of governmental agencies, has established a variety of programs to assist small businesses in overcoming hurdles posed by domestic laws.ⁿ¹⁰

However, there is a disconnect between the U.S. government's efforts to assist small businesses with domestic intellectual property laws on the one hand, and the international agreements it enters into on the other hand.ⁿ¹¹ This disconnect threatens to undo the efforts of the U.S. government to assist small businesses, as these agreements may contain intellectual property provisions that will have deleterious effects on small businesses once they are implemented domestically. These deleterious effects may range from creating more competition for small businesses in the United States,ⁿ¹² raising barriers to doing business,ⁿ¹³ to directly **[*1495]** impacting financial resources.ⁿ¹⁴ This disconnect is a serious concern as the United States has negotiated a number of international agreements that contain intellectual property obligations, in addition to currently negotiating the Trans-Pacific Partnership Agreement.ⁿ¹⁵ Policymakers in the United States need to take into account the harms that domestic implementation of these obligations will have on small businesses.

This Article examines one recent example of this disconnect and potential for serious harm to small businesses, the Anti-Counterfeiting Trade Agreement (ACTA),ⁿ¹⁶ where the U.S. government has seemingly all but ignored small businesses.ⁿ¹⁷ As a result, the signed agreement **[*1496]** contains a number of provisions that have the potential to harm small businesses in their implementation in the United States.ⁿ¹⁸ In particular, this Article argues that there are at least two negative intellectual property-related implications for small businesses: first, small businesses will be more vulnerable to detentions and seizures of their imported products at the U.S. border, and second, trademark bulliesⁿ¹⁹ will be provided with a more effective framework for bullying. Both implications have a very real potential for harming American small businesses, as the ability to import products into the United States directly impacts a business' ability to remain competitive in the market and maintain its business.ⁿ²⁰ As mentioned above, small businesses are already vulnerable to financial failure;ⁿ²¹ therefore, any additional negative financial impact may push a greater number of small businesses into bankruptcy.

[*1497] Although this Article provides a number of proposals that could help mitigate the impact ACTA will have on small businesses, these proposals are merely examples of how policymakers should rethink their approach with respect to international intellectual property agreements that have already been adopted or fully negotiated.ⁿ²² This Article suggests that interpretation, adoption of safeguards, and education can assist in overcoming barriers that may be posed by such agreements. With respect to future agreements, this Article urges policymakers to take small business concerns into account when negotiating international intellectual property-related agreements (for example, in the

current ongoing negotiations of the Trans-Pacific Partnership Agreement ⁿ²³) and when implementing these agreements in the United States. If policymakers do so, the United States will have a coherent policy approach to small businesses, which will make the assistance it provides to small businesses more effective.

The remainder of this Article will proceed in six parts. Part II will provide an overview of the hurdles posed by intellectual property laws to small businesses and the U.S. government assistance in overcoming these hurdles. Part III will provide background information on ACTA, including an overview of the agreement, an identification of the specific provisions that are of concern, and a comparison of the new provisions to existing law and regulations. Part IV will analyze the provisions of [*1498] ACTA that contribute to the first implication for small businesses, which is that small businesses will be more vulnerable to border seizures. Part V will focus on the second implication for small businesses, that ACTA provides a more effective bullying framework to trademark bullies. Part VI will turn to the proposals of this Article that may assist in mitigating harms for small businesses, and Part VII concludes this Article.

II. Small Businesses, Harms to Viability from Intellectual Property Laws and U.S. Government Response

Intellectual property rights - the umbrella term for the various intangible ownership rights in inventions, ⁿ²⁴ brand symbols, ⁿ²⁵ and original works in recordable media ⁿ²⁶ - pose unique challenges to small businesses. ⁿ²⁷ As intellectual property rights give exclusivity over use, duplication, distribution, exploitation (among other rights) to the right holder, small businesses run into a variety of issues in starting up or in conducting business. ⁿ²⁸ In fact, overly protective intellectual property rights may harm the viability of small businesses, ⁿ²⁹ or prevent small [*1499] businesses from entering into a particular market. ⁿ³⁰ For example, due to expanded trademark rights, small businesses face an increasing threat from trademark bullies that threaten litigation, which if instituted could cause the targeted victims to enter into bankruptcy. ⁿ³¹ Recently, the U.S. Congress and the Obama Administration have recognized this, and as a response, Congress has held hearings and requested studies to be undertaken to determine whether changes to American intellectual property laws are needed. ⁿ³² In addition, the Obama Administration, through the Small Business Administration and other governmental entities, has worked to provide resources to small businesses in order to mitigate some of the harms intellectual property laws pose. ⁿ³³ However, as will be discussed in Parts III through V below, if the U.S. government does not pay similar attention to its international intellectual property obligations, small businesses will continue to be negatively impacted by intellectual property laws.

A. Harms to Small Businesses from Intellectual Property Laws

Although intellectual property rights can sometimes be beneficial to small businesses, ⁿ³⁴ there are significant harms that can arise that may impact viability. These harms arise because the intellectual property right holder is given exclusivity over her patent, trademark, or copyright. Depending on the type of right held, the right holder has the ability to exclude third parties from utilizing her intellectual property in a number of different ways. ⁿ³⁵ Patents, for example, give a patent holder [*1500] the right to exclude third parties from duplicating the holder's invention, as well as distributing or even using the patented invention in another product. ⁿ³⁶ As another example, trademark law gives a trademark holder the right to exclude third parties from "using in commerce any reproduction, counterfeit, copy, or colorable imitation of a registered mark in connection with the sale, offering for sale, distribution, or advertising of any goods or services on or in connection with which such use is likely to cause confusion, or to cause mistake, or to deceive." ⁿ³⁷

Due to this, small businesses run into a variety of problems when starting up a business, or in conducting business. The first problem arises in starting a business. Intellectual property rights raise the costs of starting a business because entrepreneurs should conduct "clearance" searches to find any existing intellectual property rights that their products or services may infringe. ⁿ³⁸ To start a business without conducting a search for existing rights is risky. For example, if an entrepreneur starts a business selling fans without conducting a prior search, she is exposed to the risk that her fan may contain elements covered by a patent or that such elements constitute another's trademark. ⁿ³⁹ If the patent or trademark holder enforces their rights against the entrepreneur, the new business will run into the issues discussed below. However, the costs associated with conducting a clearance search may be outside of the entrepreneur's budget because

such clearance searches can be costly.ⁿ⁴⁰ In addition, even if the entrepreneur conducts such a search, finds existing intellectual property rights, and seeks to create a design that does not infringe on those rights, moving forward may be too costly for a small business.ⁿ⁴¹ Further, [*1501] licensing opportunities of the right holder's intellectual property may also be outside the budget of the entrepreneur's start-up expenses.ⁿ⁴² In total, the requirements to search, invest in research to design non-infringing products, and pay potential license fees all create high barriers to entry for small businesses.ⁿ⁴³ This may mean that some entrepreneurs will be thwarted from starting a business, which lowers the potential for job creation by small businesses.ⁿ⁴⁴

Another problem arises from the enforcement of intellectual property rights against small businesses. In the example above, if the small business did not conduct a prior search and the business' product potentially infringes another's right, the small business would have been vulnerable to a lawsuit brought by the intellectual property right holder.ⁿ⁴⁵ Litigation is an expensive proposition.ⁿ⁴⁶ If the small business decides to defend itself in the lawsuit, the business needs to have enough resources to continue the lawsuit through to the final appeal.ⁿ⁴⁷ In addition, even if the small business decides to not fight the lawsuit (or the right holder just threatens to bring a lawsuit) and the parties settle, a [*1502] settlement may be too costly for the small business to continue its business. In a settlement, the right holder may demand a license fee from the small business, expulsion of profits, delivery of the infringing goods, or attorney's fees (or all of the above).ⁿ⁴⁸ Further, some of these threats may be without merit because intellectual property rights bullies may abusively claim infringement knowing that small businesses lack the resources to fight lawsuits.ⁿ⁴⁹ Therefore, enforcement of intellectual property rights can raise the costs of doing business for small firms, which has been found by at least one study to be the number one cause for small entities to fail.ⁿ⁵⁰

B. U.S. Government Assistance to Mitigate Harms to Small Businesses

Since 1942, the U.S. government has recognized that small businesses need extra support and resources in order to succeed in the marketplace.ⁿ⁵¹ One of the ways in which the government provides assistance to small businesses is through the Small Business Administration (SBA).ⁿ⁵² The implementing legislation for the SBA recognized that the "security and well-being [of the American economic system] cannot be realized unless the actual and potential capacity of small business is encouraged and developed."ⁿ⁵³ With respect to the harms posed by intellectual property laws, the SBA's assistance to small business owners is primarily in educating them about intellectual [*1503] property rights.ⁿ⁵⁴ Educating small business owners is critical because without such knowledge, small business owners may not even be aware of the risks that they are taking in starting up a business. As part of its educational measures, the SBA maintains an online community board where small business owners can post questions they may have about intellectual property laws and have them answered by experts.ⁿ⁵⁵

Similarly, other governmental agencies maintain educational programs that target small businesses, such as the U.S. Patent and Trademark Office (PTO). Its "Small Business Education Campaign" seeks to "curb [intellectual property] crime and strengthen [intellectual property] enforcement - both domestically and overseas."ⁿ⁵⁶ As part of this program, the PTO maintains a telephone hotline where small businesses can call and speak to an intellectual property attorney at the PTO.ⁿ⁵⁷ In addition, the PTO conducts outreach seminars targeted at small businesses.ⁿ⁵⁸

On the legislative side, the U.S. Congress has addressed the challenges that small businesses face with respect to intellectual property laws. For example, the House Committee on Small Businesses has held a variety of hearings aimed at determining how to revise current intellectual property laws to better serve small businesses. As part of the ongoing debates on patent reform, the Committee held a hearing entitled "The Importance of Patent Reform on Small Business" in 2007.ⁿ⁵⁹ During the hearing, the Committee heard from a number of witnesses regarding the changes to the American patent laws that would assist small businesses.ⁿ⁶⁰ With respect to enforcement of intellectual property laws, Congress recognized that small businesses were vulnerable to over enforcement and abuse.ⁿ⁶¹ In the Trademark Technical and Conforming Act passed in early 2010, Congress commissioned a report from the Intellectual Property Enforcement Coordinator to study "the extent to which small businesses may be [*1504] harmed by litigation tactics by corporations attempting to enforce trademark rights beyond a reasonable interpretation of the scope of the rights granted to the trademark owner."ⁿ⁶²

With respect to international intellectual property laws, the U.S. government has shown concern that small businesses may be adversely impacted.ⁿ⁶³ To date, the United States has entered into at least seventeen separate agreements with other countries that contain a variety of intellectual property-related obligations.ⁿ⁶⁴ Many of these obligations are already implemented in the United States, but there remain some obligations that need to be implemented in order for the United States to be compliant with such agreements.ⁿ⁶⁵ Although Congress has questioned whether these agreements are a barrier to small businesses, the focus of such concern has been on the harm to small businesses arising from the inability to protect intellectual property rights in other countries.ⁿ⁶⁶ In addition, other governmental agencies have focused on intellectual property-related barriers to small businesses in exporting to other countries, rather than importing into the United States.ⁿ⁶⁷ Neither Congress nor any other branch of the U.S. government has examined whether these international obligations, as implemented domestically, could harm small businesses. As the U.S. government is continuously negotiating new agreements that contain intellectual property-related obligationsⁿ⁶⁸ (some of which may need to [*1505] be implemented into the United Statesⁿ⁶⁹), this disconnect threatens to undo the assistance that the U.S. government provides to small businesses.

III. The Anti-Counterfeiting Trade Agreement

One of the more recently negotiated international intellectual property-related agreements is the Anti-Counterfeiting Trade Agreement (ACTA).ⁿ⁷⁰ During the negotiations, small businesses appear to have been left out of the calculus.ⁿ⁷¹ The Office of the United States Trade Representative (USTR) has claimed that, "ACTA is consistent with existing U.S. law, and does not require any change to U.S. law for its implementation in the United States."ⁿ⁷² However, this Article argues that there are in fact a number of changes to current U.S. policy and practice that will need to be made in order to comply with ACTA,ⁿ⁷³ and such changes have the potential to harm small businesses.

[*1506]

A. Overview

Although the initial goal of the drafters was focused on counterfeiting and piracy, the early drafts of ACTA and related documents that were leaked beginning in 2007 showed that the proposed text of ACTA envisioned far broader changes to international intellectual property law and norms.ⁿ⁷⁴ For example, these early drafts envisioned the criminalization of all trademark infringement, rather than confining criminalization to counterfeit trademark products.ⁿ⁷⁵ Fortunately, the final text of ACTA is a marked improvement over these earlier drafts (for example, deleting the criminalization of trademark infringementⁿ⁷⁶); however, the current text still poses serious concerns for small businesses.ⁿ⁷⁷ Because there are numerous provisions in ACTA that may harm small businesses, this Article focuses on the immediate and direct harm for small businesses that import products [*1507] into the United States.ⁿ⁷⁸ Without the ability to effectively import products into the United States, the capital resources of small businesses will be hampered through a number of ways, including defaults on delivery obligations or elimination of inventory.ⁿ⁷⁹

B. Provisions of Concern

There are at least four different provisions in ACTA that have the potential to harm the ability of small businesses to effectively import products into the United States. While the U.S.T.R. maintains that there is no need to change U.S. laws to implement ACTA, this Article argues that compliance with ACTA will require the United States to expand the scope of its border enforcement measures, provide right holders with increased participation in border enforcement, provide additional information to right holders, and encourage right holders to utilize border enforcement measures. Parts IV and V argue that these provisions will increase small business vulnerability to border detentions and seizures, along with providing trademark bullies with a more effective framework for bullying small businesses.

1. Scope of Border Measures

As a first concern, Article 13 of ACTA will require that the United States broaden the scope of its enforcement at the

border. The relevant portion of Article 13 states, "In providing, as appropriate, and consistent with its domestic system of intellectual property rights protection ... for effective border enforcement of intellectual property rights, a Party should do so in a manner that does not discriminate unjustifiably between intellectual property rights" ⁿ⁸⁰ Currently the U.S. Customs and Border Protection agency (CBP) enforces American intellectual property rights at the border by detaining imported shipments that infringe an American right holder's intellectual property. ⁿ⁸¹ Prominent among the intellectual property rights that are enforced at the border [*1508] are trademarks. ⁿ⁸² Defined broadly, trademark infringement is the unauthorized use by a third party of another's trademark that is likely to cause confusion. ⁿ⁸³ However, the term "trademark infringement" refers to two different types of infringement: "mere" or "traditional" trademark infringement and counterfeiting. The differences between the two are vast.

In order for a trademark to be determined to be "counterfeit," the unauthorized trademark must be identical or "substantially indistinguishable from" a registered mark. ⁿ⁸⁴ In contrast, mere trademark infringement occurs when a third party's mark is similar enough to the original trademark that confusion is likely to occur among consumers of the trademark holder. ⁿ⁸⁵ The requirement that the unauthorized mark be identical or indistinguishable from the registered trademark means that the legal standard for determining a mark as counterfeit is much narrower than the standard for mere trademark infringement. Counterfeiting is considered the more severe form of trademark infringement, as seen in the different remedies that are available for instances of counterfeiting. In cases of mere trademark infringement, an injunction is the typical remedy. ⁿ⁸⁶ In cases of counterfeiting, an injunction and statutory damages are typical remedies. ⁿ⁸⁷ Statutory damages may be up to \$ 1 million for each mark on each product. ⁿ⁸⁸ Further, counterfeiting is a crime, punishable by up to [*1509] ten years in prison, a fine of no more than \$ 2 million (for individuals), or both. ⁿ⁸⁹

As will be discussed in Part IV, the current border enforcement efforts of the United States are focused on stopping counterfeit products from entering into the United States. ⁿ⁹⁰ This is understandable, as counterfeit products have the potential to harm Americans, whereas mere trademark infringement only has the potential to confuse consumers. ⁿ⁹¹ However, implementing Article 13 of ACTA will mean that the U.S. Customs and Border Protection (CBP) will need to revise its focus and include mere trademark infringement in its border enforcement efforts. This is due to the definition of the term "intellectual property" in Article 13, which is all-inclusive and incorporates a very broad notion of "trademark." ⁿ⁹² This means that all forms of potentially trademark infringing products will need to be detained by border enforcement authorities, not just those shipments that the authorities suspect contain counterfeited goods. This provision is problematic because it will mean that small businesses will be vulnerable to increased border detentions and seizures of their imported products. ⁿ⁹³

2. Right Holder Involvement in Border Measures

Another provision of concern is Article 16(1), which requires that the United States give right holders the ability to request detention of suspect shipments. ⁿ⁹⁴ The language of Article 16(1) provides, "Each [*1510] Party shall adopt or maintain procedures with respect to import and export shipments under which: ... (b) where appropriate, a right holder may request its competent authorities to suspend the release of suspect goods." ⁿ⁹⁵ This requirement would also be a change for the CBP, as the current CBP regulations do not include procedures for trademark holders to request detention of specific shipments. ⁿ⁹⁶

Although the CBP encourages right holders to provide to the CBP intelligence about specific shipments, there is no application procedure that the right holders follow (as envisioned by ACTA). ⁿ⁹⁷ It can be inferred from the CBP materials that the CBP may utilize the information provided by trademark holders, but that the decision to detain shipments is ultimately in the CBP's discretion while trademark holders play a passive role. ⁿ⁹⁸ This inference is further supported by the current CBP regulations that provide for trademark holders' recordation of their registered trademarks with the CBP, ⁿ⁹⁹ and provision of training materials and information. ⁿ¹⁰⁰ Therefore, if the United States [*1511] implements this requirement of ACTA, changes in the current CBP regulations and procedures would be needed. This would be a drastic departure from current practices and - combined with the provisions discussed in subsections 3 and 4 below - provides a new and more effective enforcement framework to trademark bullies, which would harm small businesses.

3. Disclosure of Information

Along with the increased trademark holder involvement in customs detentions of shipments, ACTA requires that the scope of information required to be disclosed to right holders be significantly broadened. Article 22(c) of ACTA requires that the following information be given to right holders: "description and quantity of the goods, the name and address of the consignor, importer, exporter, or consignee, and, if known, the country of origin of the goods, and the name and address of the manufacturer of the goods." ⁿ¹⁰¹ By comparison, the CBP currently provides similar information only in cases of counterfeit seizures. ⁿ¹⁰² In cases of mere trademark infringement, the CBP provides much less information: "Date of Importation; Port of Entry; Description of Merchandise; Quantity; [and] Country of Origin." ⁿ¹⁰³ Article 22(c) would require broad disclosure in all cases of trademark infringement and, therefore, would necessitate a change in current CBP interpretation and practice of U.S. law. As will be argued in Part V, this expanded scope of information required to be provided to right holders encourages more effective bullying of small businesses.

4. Provisions to Encourage Use of Detention Procedures by Trademark Holders

Not only does ACTA require that the United States provide a method for trademark holders to request detentions of suspected shipments, there are also a number of provisions in ACTA that encourage such use by trademark holders. In particular, Articles 17, 18 and 21 include such "encouragement" provisions.

Article 17 covers various matters related to the application process by the trademark holder to request detentions. Article 17(1) provides **[*1512]** that requesting trademark holders shall provide "adequate evidence to satisfy the competent authorities that ... there is prima facie an infringement of the right holder's intellectual property right" ⁿ¹⁰⁴ Although this language would seem to place a fairly heavy burden on requesting trademark holders, and thereby work as a disincentive, it is unclear the level of scrutiny that the CBP will apply to such applications.

In trademark litigation, the elements of a prima facie case of trademark infringement are: (1) valid trademark of the plaintiff with priority of use; (2) unauthorized use by the defendant; and (3) a likelihood of confusion between the plaintiff's trademark and defendant's use. ⁿ¹⁰⁵ However, embedded into these seemingly straightforward elements are a variety of complexities, as in the case of an alleged unauthorized use by the defendant. ⁿ¹⁰⁶ When dealing with mere trademark infringement, there are a variety of defenses that can turn an otherwise unauthorized use into a permissible one. ⁿ¹⁰⁷ For example, a trademark holder's evidence of prima facie infringement may be copies of brochures of an importer's product that bear the trademark holder's mark alongside the importer's product. ⁿ¹⁰⁸ But such advertising may qualify for a nominative fair use defense or be permissible comparative advertising, and therefore, not be considered **[*1513]** trademark infringement. ⁿ¹⁰⁹ In addition, the final element of a prima facie case, the likelihood of confusion, is a multi-factor analysis that greatly differs from circuit to circuit, ⁿ¹¹⁰ and is further vulnerable to great subjectivity. ⁿ¹¹¹ All of this legal complexity provides CBP field officers with great leeway to determine likelihood of confusion and therefore, the requirement of a prima facie case may not be much of an impediment to trademark holders.

Moreover, the additional provisions of Article 17 seem to indicate that the drafters of ACTA wanted to encourage the use of the application process. An additional requirement for a requesting trademark holder is that it provide "sufficient information that may reasonably be expected to be within the right holder's knowledge to make the suspect goods reasonably recognizable by the competent authorities." ⁿ¹¹² As will be discussed below, it is unclear the level of information the term "reasonably recognizable" will require. ⁿ¹¹³ Further, the last sentence of Article 17(1) acts as a barrier to the United States to place greater restrictions on requesting trademark holders as it states, "The requirement to provide sufficient information shall not unreasonably deter recourse to the procedures described in subparagraphs 1(b) and 2(b) of Article 16 (Border Measures)." ⁿ¹¹⁴

Similarly, Article 18 encourages trademark holders to apply for detentions of shipments. Article 18 indicates that the United States should provide their customs authorities with the authority to request from trademark holders, "a reasonable security or equivalent assurance **[*1514]** sufficient to protect the defendant ... and to prevent abuse." ⁿ¹¹⁵ While the "reasonableness" of such security is not defined, the following sentence provides an insight into the levels

which ACTA envisions the United States to set: "Each Party shall provide that such security or equivalent assurance shall not unreasonably deter recourse to these procedures."ⁿ¹¹⁶ This requirement would appear to indicate that the levels of the security should be on the lower end of the scale and effectively creates a barrier to the United States being allowed to set higher levels of security in order to disincentivize abuse.

Finally, Article 21 places an additional barrier on the United States from requiring that requesting trademark holders pay high fees in order to discourage abuse. Article 21 provides, "Each Party shall provide that any application fee, storage fee, or destruction fee to be assessed by its competent authorities in connection with the procedures described in this Section shall not be used to unreasonably deter recourse to these procedures."ⁿ¹¹⁷ As will be discussed in Part IV, one of the ways to weed out non-serious or abusive actors is by setting fees at an amount at which only serious actors would be willing to pay.ⁿ¹¹⁸ By creating a barrier to such fee-setting, it appears that ACTA contemplates that some level of abuse should be tolerated by the United States. Altogether, these "encouragement" provisions found in Articles 17, 18, and 21 work to not only encourage abuse, but - as this Article argues in Part V - work hand-in-hand with Articles 16 and 22 to provide to trademark bullies a more effective framework for bullying.

IV. First Implication: Small Businesses Will Be More Vulnerable to Border Seizures

ACTA's mandate to include all forms of trademark infringement in the United States' border enforcement measures will mean that small businesses will be more vulnerable to border seizures. This is due to at least two factors. The first factor is that it will be more likely that shipments of products that are potentially merely trademark infringing will be detained by customs authorities.ⁿ¹¹⁹ Although ACTA's mandate **[*1515]** to include all forms of trademark infringement in border enforcement measures is not new to the United States' domestic legislation, the current focus of the U.S. CBP is on counterfeit products.ⁿ¹²⁰ Therefore, ACTA requires that the CBP broaden their net of detection at the border. The second factor is that small businesses are less likely to have the resources to know how to handle such detention. Small businesses are less likely than large businesses to be able to financially afford delays in importation of products or any losses of shipments that may arise through seizure.ⁿ¹²¹ This implication is particularly troubling, as the American economy depends in large part on the health of its small businesses.ⁿ¹²²

A. Broadening the Net of Detentions & Seizures

As discussed above, Article 13 of ACTA requires that all trademark infringing products be subject to the border measures of the United States.ⁿ¹²³ Legislatively, the scope of ACTA's border enforcement measures actually mirrors that of the federal trademark statute, the Lanham Act,ⁿ¹²⁴ and the customs-related statute, the Tariff Act.ⁿ¹²⁵ Section 42 of the Lanham Act provides,

No article of imported merchandise which shall copy or simulate the name of any domestic manufacture ... or which shall copy or simulate a trademark registered in accordance with the provisions of this chapter ... shall be admitted to entry at any customhouse of the United States.ⁿ¹²⁶

In addition, Section 526 of the Tariff Act reads,

[*1516]

It shall be unlawful to import into the United States any merchandise of foreign manufacture if such merchandise, or the label, sign, print, package, wrapper, or receptacle, bears a trademark owned by a citizen of ... the United States, and registered in the Patent and Trademark Office ... unless written consent of the owner of such trademark is produced at the time of making entry.ⁿ¹²⁷

Read together, Section 42 of the Lanham Act and Section 526 of the Tariff Act both prohibit the importation of goods

that infringe upon registered trademarks.

Based on this reading, it does not appear that Article 13 would necessitate a legislative change in the United States; rather, this Article argues that Article 13 would require a major change in the practices of the U.S. customs authorities. In its implementation of the Lanham and Tariff Acts, the U.S. CBP currently focuses its intellectual property enforcement efforts on counterfeited and pirated shipments.ⁿ¹²⁸ While shipments of products that are not counterfeit, but potentially are trademark infringing, are detained and seized at times,ⁿ¹²⁹ these shipments are not the primary focus of the U.S. government or the CBP.ⁿ¹³⁰ This can be seen in the manner in which the CBP promotes the work that it undertakes and in its interpretation of the relevant statutory provisions.

First, in almost every description of its priorities and focus on intellectual property enforcement, the CBP describes the scope of its measures in counterfeiting and piracy terms.ⁿ¹³¹ For example, in the overview of its intellectual property rights priority, the CBP states, "Stopping the flow of fake goods is a priority for the U.S. government, and CBP has designated intellectual property rights (IPR) enforcement as a Priority Trade Issue (PTI)."ⁿ¹³² In particular, the CBP attempts to [*1517] intercept those shipments that would contain products that threaten the health and safety of Americans.ⁿ¹³³ In the brochure entitled "Protecting Intellectual Property Rights at Our Borders," the encroachment on intellectual property rights defined as a serious problem is counterfeiting and piracy: "Growing global trade in pirated and counterfeit goods threatens the health and safety of people, their jobs, community competitiveness, trade, investment in research and innovation, and critical infrastructure and national security."ⁿ¹³⁴

Additionally, the CBP interpretation of the relevant provisions of the Lanham and Tariff Acts provides support that the CBP views its primary responsibility in intellectual property enforcement as related only to counterfeiting and piracy.ⁿ¹³⁵ First, the CBP regulations interpreting these federal laws differentiate between detention of counterfeit products on the one hand and products "bearing copying or simulating trademarks" on the other.ⁿ¹³⁶ This distinction is made without much statutory support: Section 42 of the Lanham Act does not distinguish between counterfeited trademarks and "copying or simulating ... trademarks."ⁿ¹³⁷ And although Section 526 of the Tariff Act distinguishes products bearing counterfeit trademarks in subsection (e), the purpose for such distinction could be seen to provide a different method of disposal for counterfeit products, as opposed to merely infringing products.ⁿ¹³⁸ The original Section 526 did not distinguish between counterfeit and merely infringing products.ⁿ¹³⁹

[*1518] More telling is the different treatment in the CBP monitoring efforts between counterfeit and merely infringing products. The CBP policy is to encourage trademark holders to "record" their federally-registered trademarks with the CBP: "Customs policy mandates that the majority of resources and emphasis should be placed upon the enforcement of recorded trademarks."ⁿ¹⁴⁰ While the CBP indicates that unrecorded trademarks may still be monitored at the borders (just not as a priority), the CBP actually does not provide the same protection to counterfeited unrecorded trademarks and merely infringed unrecorded trademarks.ⁿ¹⁴¹ Whereas CBP field officers are instructed that goods bearing counterfeit, but unrecorded, trademarks "may be seized" "where administratively feasible and appropriate,"ⁿ¹⁴² CBP field officers are instructed the opposite in cases of merely infringing, but unrecorded, trademarks. For this latter category, the CBP states that "Customs policy is to neither detain nor seize goods bearing such marks."ⁿ¹⁴³

Therefore, it would appear that Article 13 of ACTA would require the United States and the CBP to broaden its current focus to include not only counterfeit shipments but any shipment that may potentially contain trademark infringing products. Broadening the net of potential detentions and seizures will likely have a disproportionate impact on those small businesses who import products that bear trademarks similar to large trademark holders but are not counterfeits.ⁿ¹⁴⁴ In 2009, there were approximately 174,500 small businesses importing products into the United States.ⁿ¹⁴⁵ This represents approximately ninety-seven percent of the total number of importers in the United States.ⁿ¹⁴⁶ Specifically, those small businesses that operate in the private label market are likely to be importing products that may be more likely to be [*1519] detained under a broadened CBP enforcement net.ⁿ¹⁴⁷ Private label manufacturers produce products that are intended to be a low-cost alternative to branded products.ⁿ¹⁴⁸ Although some private label manufacturers have their own trademarks, they may appear to be similar to more well-known products due to characteristics such as fonts, colors, or packaging design.ⁿ¹⁴⁹ In addition, private label products may include the more

well-known product trademark as a manner of comparison for consumers.ⁿ¹⁵⁰ All of these factors increase the potential for these types of products to be detained by the CBP under ACTA's broadened requirements. In addition, depending on the standards used by the CBP to determine infringement, seizures and forfeitures may be the more likely outcome after an initial detention.ⁿ¹⁵¹ This greater potential for detention, seizure, and forfeiture of imported shipments will place an additional burden on small businesses' existing lowered resource levels and potentially increase the failure rate of small businesses in the United States.

B. Small Businesses' Lack of Resources

Another factor contributing to the increased vulnerability of small businesses to ACTA's enhanced border measures is the paucity of [*1520] resources that small businesses have to draw upon. In the United States, approximately seventy-eight percent of the twenty-seven million small businesses are owned and managed by a single individual without additional employees.ⁿ¹⁵² This means that most small business owners are managing every aspect of their business on a daily basis, from the day-to-day business aspects, to future planning, to handling legal claims such as customs detentions based on an allegation of trademark infringement. Unlike a large corporation with a staff of in-house lawyers who may be knowledgeable about customs procedures and trademark law, the small-business owner will likely not be informed as to his or her rights with respect to the customs authorities or trademark law, as she is likely to not be a lawyer.ⁿ¹⁵³ Even if the owner is a lawyer (or perhaps has family or friends that are lawyers), it is likely that trademark law is not her area of expertise.ⁿ¹⁵⁴

Without the internal capacity for an analysis of the allegation of trademark infringement by customs, the small business will need outside legal assistance. But unlike large corporations with large legal budgets and multiple outside law firms on retainer, small business owners generally operate on a very tight budget.ⁿ¹⁵⁵ Most small businesses are undercapitalized,ⁿ¹⁵⁶ which means that it is likely that the owner has not properly funded the business to begin with.ⁿ¹⁵⁷ To compound the [*1521] undercapitalization problem, many small businesses poorly estimate their future earnings and do not manage their cash flow well.ⁿ¹⁵⁸ In addition, it is unlikely that the small business owner will adequately budget for any potential customs detentions or seizures, as many small businesses conduct inadequate risk assessments.ⁿ¹⁵⁹ Further, it is unlikely that small businesses will be able to access low-cost legal resources. Although there are many governmental agencies in the United States with office liaisons that provide small business assistance, the CBP is not one of them.ⁿ¹⁶⁰ Similarly, while there are various non-profit entities devoted to providing legal assistance for intellectual property issues, such as the Volunteer Lawyers for the Arts organizations around the United States or law school legal clinics, these entities are likely not well-versed in customs procedures.ⁿ¹⁶¹ Even if these organizations do have the capacity to handle the unique cross section of intellectual property and customs issues that arise in a detention proceeding, barriers still exist to receiving legal assistance through these organizations, including the capacity of the organization and whether the small business meets the criteria of the organization.ⁿ¹⁶²

In addition, even if small businesses could access low-cost or free assistance, many small businesses may not be able to afford the delay in the release of their shipments from the customs authorities, in terms of both monetary and reputational costs. Under current CBP procedures, customs officers are allowed to detain shipments based on "reasonable suspicion" that the shipment likely infringes a registered trademark.ⁿ¹⁶³ [*1522] Even if no reasonable suspicion exists at the time of detention, CBP officers are allowed to detain shipments for up to five days in order to determine whether reasonable suspicion exists.ⁿ¹⁶⁴ If, after five days, reasonable suspicion is determined to exist, then the CBP sends a letter to the importer informing him or her of the detention.ⁿ¹⁶⁵

The next step in the detention process is that the importer has up to thirty days to meet one of the exceptions provided by the CBP in order for the shipment to not be seized and forfeited.ⁿ¹⁶⁶ These exceptions include the following: (1) the trademarks that are deemed to be infringing are removed from the products such that the products can no longer be associated with the infringed trademarks;ⁿ¹⁶⁷ (2) the importer can prove that he or she is legitimately associated with the trademark holder as either the recordant of the trademark or the holder's designate;ⁿ¹⁶⁸ (3) the trademark holder provides written consent to the importation of the shipment;ⁿ¹⁶⁹ or (4) the importer is claiming the one-item personal exemption.ⁿ¹⁷⁰ If none of these exceptions are met, then the shipment is subject to seizure and

forfeiture. ⁿ¹⁷¹

[*1523] In addition, this thirty-day timeframe for detentions may change with the enactment of ACTA. The current provisions of ACTA do not specify a timeframe in which the CBP needs to render a decision regarding the infringing nature of the shipment. The only limitation on such determination is that it should be made "within a reasonable period" after the shipment's detention. ⁿ¹⁷² From leaked prior versions of ACTA, it can be seen that the drafters debated specifying that this "reasonable" time period apply to the initiation of such determination proceedings, and not to the need to determine whether the shipment infringed. ⁿ¹⁷³ Therefore, this "reasonable" time period may be well beyond thirty days.

Further, ACTA's mandate to include mere trademark infringement into the United States' border measures may mean that the CBP will need to revise its current procedures with respect to merely infringing shipments. As mentioned above, during the thirty-day period after the CBP notifies the importer of a detained shipment that has been judged "confusingly similar" to a recorded trademark, the importer may remove the marks from the products. ⁿ¹⁷⁴ This provides the importer the opportunity to salvage a portion of her shipment, albeit without its original source identifying mark. While it is likely that the importer would need to expend resources to remove the infringing marks and perhaps replace them with new ones, this expense is likely to be less than the loss of the shipment altogether through seizure and forfeiture. However, the CBP will likely need to revise this procedure in the event of ACTA's implementation. Article 20(1) of ACTA requires that

Each Party shall provide that its competent authorities have the authority to order the destruction of goods following a [*1524] determination referred to in Article 19 (Determination as to Infringement) that the goods are infringing. In cases where such goods are not destroyed, each Party shall ensure that, except in exceptional circumstances, such goods are disposed of outside the channels of commerce in such a manner as to avoid any harm to the right holder. ⁿ¹⁷⁵

This provision effectively removes the CBP discretion to allow an importer to reclaim her shipment after removal of the infringing trademarks, as the release of the shipment to the importer will place the products into the "channels of commerce." ⁿ¹⁷⁶ Although Article 20(1) allows for some infringing goods to be disposed of within channels of commerce, the limitation of "exceptional circumstances" appears to require a high level of justification on the part of the CBP and importer for such release. It is likely that the average small business will not qualify under this exception, and the number of seizures and forfeitures may rise as a consequence. ⁿ¹⁷⁷

Many small businesses may not be able to financially afford such delays or losses of their shipments. Depending on the situation of a small business, the financial loss can arise from a number of different reasons. If the small business had contracted with a third party to deliver the products contained in the shipment by a certain date, or within a certain time period, any delay of the shipment by customs may cause the small business to be in breach of its contract. Delays in delivery, especially substantial delays, often provide contractual grounds for a third party to decline to accept and pay for the products even if [*1525] they are eventually delivered. ⁿ¹⁷⁸ In addition, if the delivery is never made (due to a seizure and forfeiture), the small business may be in total breach of its contractual obligations. Depending on the contract and third party, the small business may be liable for damages for its unintended breach. ⁿ¹⁷⁹

Although some small businesses may have insurance that could cover such losses, such small businesses could still face issues in obtaining payment under their policies. ⁿ¹⁸⁰ First, it is not certain that the coverage would be adequate to cover such losses. When purchasing insurance, a small business owner may decide to pay a lower premium in exchange for a higher deductible. ⁿ¹⁸¹ This may mean that when a loss occurs, the deductible may be the same amount as the loss of the shipment, which will not help the small business. ⁿ¹⁸² Second, the insurance company may decide to decline the small business' claim, depending on the scope of coverage that the small business selected at the time of purchasing the insurance. The scope of insurance policy coverage differs widely and oftentimes depends on the priorities that the small business laid out when purchasing the insurance. ⁿ¹⁸³ At the time of purchase, the small business owner may have

overlooked the need to include losses from potential trademark infringement claims. In addition, not all small businesses may purchase business insurance. While some types of insurance may be mandatory in some states, general business insurance is typically not required and may be too [*1526] costly, especially for start-up businesses in the early stages of business formation.ⁿ¹⁸⁴

Notwithstanding the financial impact that a delay or loss of a shipment may have on a small business, there may be other, non-financial consequences (or even indirect consequences). All businesses depend on their reputation, both for maintenance of their customer base and for future growth.ⁿ¹⁸⁵ Small businesses that deliver shipments late, or not at all, may lose good reputations that they have worked hard to build. Current customers may decline to perform under executed contracts, or they may decline to enter into future contracts. In addition, potential customers may choose to select to do business with another entity that has not had similar delivery or legal issues. As a consequence, the small business may have difficulty maintaining its current business, with the end result being bankruptcy. With the success rate of U.S. small businesses hovering at around fifty percent, it appears that these indirect and direct financial impacts could push the success rate even lower.ⁿ¹⁸⁶

V. Second Implication: ACTA Provides Trademark Bullies with a More Effective Framework for Bullying

Trademark bullying has become a problem in recent years in the United States and is a particular problem for small businesses due to their weakness vis-a-vis large trademark holders.ⁿ¹⁸⁷ Trademark bullying occurs when a large corporation enforces an unreasonable interpretation of its trademark rights against a small business through [*1527] the use of intimidation tactics.ⁿ¹⁸⁸ Trademark bullies tend to attempt to coerce small businesses into ceasing use of the bullies' trademarks through a traditional enforcement program, which consists of intimidating cease-and-desist letters and the threat of litigation.ⁿ¹⁸⁹ This type of trademark bullying has stemmed in part from an expansion of trademark rights and protection afforded to American trademark holders.ⁿ¹⁹⁰ Although U.S. trademark law currently serves to assist trademark bullies and perhaps even incentivize such bullies, ACTA would go one step further and provide trademark bullies with a more effective path for bullying.ⁿ¹⁹¹ This implication arises from the requirements contained in Articles 16 and 17 of ACTA, which in effect incentivizes bullies to work through the CBP to bully their victims with a complete lack of judicial oversight.ⁿ¹⁹² In addition, the expanded information requirements of Article 22 of ACTA allow bullies to interfere in the supply chain of small businesses both inside and outside of the United States. Finally, Articles 17, 18, and 21, requiring the United States to encourage participation in the border enforcement measures by trademark holders and limiting the United States' ability to implement safeguards, work to support this more effective framework for bullying.ⁿ¹⁹³

A. Incentivizing Forum Shifting and Interference with Supply Chains

As discussed above, Articles 16(1)(b) and 17 would appear to require the CBP to establish an application process whereby trademark holders would have the right to request detentions of specific shipments [*1528] of suspected goods.ⁿ¹⁹⁴ Although the CBP encourages trademark holders to engage the CBP with training and provide them with information regarding shipments, the CBP currently retains the discretion regarding whether to detain shipments.ⁿ¹⁹⁵ The requirements of Articles 16 and 17 result in an incentivization of trademark bullies to shift their attacks on small businesses from one that includes a potential for judicial oversight (the threat of litigation) to the CBP. Additionally, adherence to Article 22, which requires an expanded scope of information to be given to trademark holders, would provide trademark bullies with the tools to interfere in the supply chain of small businesses both inside and outside of the United States.

1. Incentivizing Forum Shifting

Articles 16 and 17 provide trademark holders with an unprecedented ability to direct the CBP's seizure activities and target specific importers.ⁿ¹⁹⁶ Although this ability to target specific importers would appear to have merit in cases of counterfeiting, the inclusion of all forms of trademark infringement in the scope of border measures could mean that small businesses could be disproportionately targeted.ⁿ¹⁹⁷ In addition, and perhaps more importantly, implementation

of Articles 16 and 17 would shift the costs of enforcement from the budgets of the trademark bullies onto the CBP.ⁿ¹⁹⁸ Instead of having to resort to [*1529] traditional enforcement measures (sending cease-and-desist letters, followed by potential litigation), a trademark bully would be able to simply apply to the CBP for detentions of specific shipments of small businesses.ⁿ¹⁹⁹ This would result in a cost savings to the trademark bully because the bully would not need to pay high-priced lawyers to oversee its enforcement efforts.ⁿ²⁰⁰

Border enforcement efforts are typically the purview of "brand managers," who are generally not attorneys, but in-house employees with experience in customs practices and procedures.ⁿ²⁰¹ Depending on experience, brand protection managers may be paid in the range of \$ 67,000 to \$ 118,000.ⁿ²⁰² In addition, under traditional enforcement tactics, if a target decided to put up a fight, a trademark bully may need to litigate the dispute to maintain its reputation as a bully,ⁿ²⁰³ which can be quite expensive. In a survey conducted by the American Intellectual Property Law Association in 2006, median costs for trademark litigation ranged from \$ 250,000 to \$ 650,000, depending on the size of the lawsuit.ⁿ²⁰⁴ Further, litigating necessitates expending financial resources [*1530] to see a lawsuit through until the final appeal.ⁿ²⁰⁵ A trademark bully may decide to appeal a lost lawsuit all the way to the end and then need to pay both its legal costs and the defendant's, as in the case of Mattel Corporation's lawsuit against the artist Tom Forsythe.ⁿ²⁰⁶

In addition, an ability to direct the CBP's enforcement actions seemingly provides trademark bullies with the power to directly impact the inventory flow of small businesses on a faster timetable than through traditional enforcement methods. Instead of sending a cease-and-desist letter and providing an option (albeit in some cases not a viable option) to the target to comply with its demands, a trademark bully could simply apply to the CBP and have that target's shipments detained.ⁿ²⁰⁷ This then shifts the point of contact and the responsibility for compliance from the trademark bully to the CBP. Once a shipment is detained, the small business needs to work through the CBP and on the CBP's timeframe to obtain release of the shipment.ⁿ²⁰⁸ By contrast, under the traditional enforcement framework, a trademark bully would need to work with its target, oversee compliance, and potentially resort to the judicial system if a target decided to not comply with its demands. The traditional enforcement framework results in a much longer process than the CBP process. Litigation, in the best of circumstances, may take up to one year to complete.ⁿ²⁰⁹

[*1531] Finally, another aspect that incentivizes trademark bullies to shift their enforcement efforts to the CBP is that the option for small business victims to resort to the court system is opaque in customs proceedings. First, it is unclear that a targeted small business would be able to afford to appeal a detention or seizure to the judicial system. As discussed above, many small businesses are undercapitalized and have conducted insufficient risk assessments.ⁿ²¹⁰ Even if a targeted small business could afford to mount a legal appeal of a CBP decision, under current law, an appeals process is quite complicated.ⁿ²¹¹ Depending on the type of action taken by the CBP, a targeted small business can appeal to the Court of International Trade or to a U.S. District Court.ⁿ²¹² If an appealing small business chooses the wrong forum, the case may be dismissed for lack of subject matter jurisdiction.ⁿ²¹³ The small business is then required to re-file the case in the alternate jurisdiction and pay the relevant costs and attorneys' fees for a second time. This type of complicated process will likely dissuade a small business from filing an appeal (or may dissuade an attorney from advising the small business to mount a legal appeal), which allows the bullies easy victories without any type of judicial oversight. Altogether, these three aspects of implementing Articles 16 and 17 would incentivize forum shifting of abusive trademark enforcement to the CBP.

2. Empowering Interference with Supply Chains Without Judicial Oversight

In addition to incentivizing a shift in forums from one that may include judicial oversight to the CBP, an implementation of Article 22 of ACTA would encourage the CBP to provide unprecedented levels of information to trademark holders. This would empower trademark bullies with the ability to impair small business activities not only in the United States, but also at the source of their manufacturing. This is due [*1532] to the expanded scope of information required to be given under Article 22, along with the potential for the CBP to provide such expanded scope of information prior to the time a determination of infringement has been made.ⁿ²¹⁴

Currently, the CBP policies require that very limited information be provided to trademark holders in cases of mere trademark infringement.ⁿ²¹⁵ This information includes date of importation, port of entry, description of merchandise, quantity, and country of origin.ⁿ²¹⁶ This limited information means that trademark holders are kept informed about infringing imports, but have no ability to interfere with the importer's business because the CBP does not release personally-identifying information.ⁿ²¹⁷ By contrast, Article 22 expands the scope of such information to "including, but not limited to, the description and quantity of the goods, the name and address of the consignor, importer, exporter, or consignee, and, if known, the country of origin of the goods, and the name and address of the manufacturer of the goods."ⁿ²¹⁸ This information would provide trademark holders with personally-identifying information of every entity connected to the shipment.

In addition, ACTA encourages that the timeframe for the provision of such information is as soon as possible. Article 22(b) encourages that customs authorities provide the personally-identifying information as soon as a shipment is detained so that the trademark holder can "assist in the determination referred to in Article 19 (Determination as to Infringement)."ⁿ²¹⁹ Currently, CBP field officers are allowed to disclose to trademark holders the limited information described above prior to the time of detention.ⁿ²²⁰ Because Article 22(b) is couched in optional [*1533] language ("a Party may authorize its competent authorities"ⁿ²²¹), the CBP could decide that its current practice of allowing CBP field officers to provide trademark holders with information prior to the time of detention is consistent with Article 22(b).

The more important question is whether the current CBP practice of releasing its limited information after a shipment has been detained would comport with the scope of information listed in Article 22(b). If the CBP decided that it needed to expand the scope of information to comply with Article 22(b), personally-identifying information would be given to trademark holders prior to the time of detention.ⁿ²²² This would in effect provide trademark bullies with the tools to interfere with the supply chain of small businesses prior to a determination of infringement. By knowing the name of the consignor, importer, exporter, and consignee as well as the name and address of the manufacturer of the goods, trademark bullies would be able to trace small businesses' chain of supply.ⁿ²²³

Depending on the country of origin, a trademark bully may be able to persuade the consignor, exporter, or manufacturer of the goods to cease supplying the small business with products.ⁿ²²⁴ For example, if the country of origin is China, it is likely that the trademark bully is manufacturing in China as well, since a high percentage of the world's manufacturing occurs in China.ⁿ²²⁵ A cease-and-desist letter from a well-known American corporation to the manufacturer, exporter, or consignor may be all that is needed to cease supply to the small business. In addition, depending on the influence of the trademark bully in any particular local area of China, the trademark bully may be able to [*1534] "persuade" the local authorities to raid the consignor, exporter, or manufacturer of the goods without proof of counterfeit products.ⁿ²²⁶ This would, in turn, disrupt the small business' supply chain and at the very least, make life more difficult for the small business.

Further, even if the CBP decided that it did not need to comply with the optional Article 22(b) language, it would need to comply with the mandatory Article 22(c) language. As discussed above, Article 22(c) would require that the CBP release the personally-identifying information within thirty days after seizure or a determination of infringement. It is hard to read the straight-forward language of Article 22(c) as consistent with the current practices of the CBP with respect to the scope of information provided. Therefore, it is likely that an implementation of Article 22(c) would require that the CBP include the personally-identifying information along with its provision of information to trademark holders. While the timing of the provision of information (after seizure or determination of infringement) may make such provision more appropriate, it is important to remember that the scope of the CBP's determination of infringement is quite narrow. The CBP's determination is with respect to only the shipment at issue, and not with respect to other products or shipments that a small business may import in the future.ⁿ²²⁷ However, providing trademark holders with personally-identifying information allows trademark bullies to interfere with such small business's entire importing operation, regardless of whether future shipments would be infringing.

Moreover, all of this interference can take place without any judicial oversight and due process. Although

trademark holders may be allowed to similarly interfere with the supply chains of infringing third parties after a successful determination of infringement in a trademark lawsuit, such interference is typically only allowed after a court issues an injunction against such infringer.ⁿ²²⁸ And an injunction (preliminary or [*1535] permanent) is not granted lightly. In order to grant an injunction, a court must find:

(1) that [the plaintiff] has suffered an irreparable injury; (2) that remedies available at law, such as monetary damages, are inadequate to compensate for that injury; (3) that, considering the balance of hardships between the plaintiff and defendant, a remedy in equity is warranted; and (4) that the public interest would not be disserved by a permanent injunction.ⁿ²²⁹

In addition, in cases where a court awards an injunction, such award is subject to review by an appellate court for abuse of discretion.ⁿ²³⁰ The same cannot be said of the CBP's determination or review standards. As discussed above, it is unclear the standards under which the CBP determines trademark infringement.ⁿ²³¹ In addition, it is unclear whether small businesses would have the resources to appeal such determination, and if they do, where such appeal should be made.ⁿ²³² Further, in cases where the CBP has provided personally-identifiable information to trademark holders prior to making a determination of infringement, [*1536] small businesses are vulnerable to interference by trademark bullies on perfectly legitimate products.

B. Lack of Safeguards

An additional element in the incentivization of trademark bullies to forum shift and interfere with small businesses' supply chains is the lack of safeguards found within the provisions of ACTA. To the contrary, the provisions of ACTA appear to be directed at encouraging some level of abuse. This stems from the language of ACTA found in Articles 17, 18, and 21 that mandates against overly strict measures that may deter abuse of the border enforcement measures.ⁿ²³³ In addition, the absence of any real consequences for abuse seems designed to allow bullies easy access to bully their victims through the CBP.

1. Limitations on Deterrence of Abuse

In directing that trademark holders be given the ability to request detention of shipments, Article 17(1) of ACTA requires only that trademark holders provide "sufficient information that may reasonably be expected to be within the right holder's knowledge to make the suspect goods reasonably recognizable by the competent authorities."ⁿ²³⁴ In addition, Article 17(1) further provides that "the requirement to provide sufficient information shall not unreasonably deter recourse to the [border enforcement] procedures" ⁿ²³⁵ Similar limiting language is found in Article 18: "Each Party shall provide that such security or equivalent assurance shall not unreasonably deter recourse to these procedures."ⁿ²³⁶ Additional limiting language is found in Article 21, which discusses fees to be assessed on trademark holders requesting detentions: "Each Party shall provide that any application fee, storage fee, or destruction fee to be assessed by its competent authorities in connection with the procedures described in this Section shall not be used to unreasonably deter recourse to these procedures."ⁿ²³⁷

Altogether, these provisions work to limit the CBP's ability to curb potential abuses. For example, one method of curbing abuse in the application process by trademark holders would be to require a higher [*1537] threshold amount of information that only trademark holders carrying out a trademark enforcement program in good faith would have. Where trademark holders engage in an enforcement program in good faith, such holders will likely conduct investigations of suspected activity prior to contacting customs authorities or law enforcement agencies. In order to do this, some large trademark holders routinely hire private investigators to report on infringing activities.ⁿ²³⁸ Employing private investigators is not a costless undertaking, with some private investigation fees starting at \$ 180 per hour.ⁿ²³⁹ However, such cost ensures that such trademark holders are obtaining extensive (and more likely accurate) information regarding potential infringements, which can then be passed along to the CBP. In turn, if the CBP decides to act upon

such information, it is less likely that they will be conducting a fishing expedition. Under the current language of Article 17(1), it appears that the CBP would be required to allow trademark holders to submit as much information as such holders would "reasonably" possess. It is unclear whether large trademark holders should "reasonably" possess information obtained only through engaging private investigators or other methods of extensive investigation. It is possible that under a loose interpretation of "reasonably," large trademark holders would not need to undertake extensive investigation efforts before having the right to request detentions. Such requests may then turn into fishing expeditions for the CBP and may result in a greater increase in unwarranted detentions, thus disproportionately impacting small businesses.

In addition, another method to limit abuse in an application process to request detentions would be to require that the requesting trademark holders place with the CBP some form of monetary security that could be used to cover the damage caused by unwarranted detentions. The level of the bond or security could be related to the expected value of the shipment, as measured against the trademark holder's own products of a similar category and quantity.ⁿ²⁴⁰ Additionally, a non-refundable [*1538] application fee could be assessed based on the expected value of the shipment. If a detention is deemed to have been unwarranted (meaning that no infringement was found), then the bond would be forfeited entirely. This level and type of security would work to discourage those trademark holders from requesting detentions negligently or even willfully. However, the language of Articles 18 and 21 would prevent either of these types of deterring fees from being implemented. Combined, the limiting language of Articles 17(1), 18, and 21 works to limit the discretion the CBP may otherwise have in attempting to deter abuse of the application procedures by trademark bullies.

2. Lack of Consequences for Bullies

Finally, there appears to be no consequences for bullies under ACTA. In fact, with the limiting language contained in Articles 17, 18, and 21, it would seem that ACTA seems more concerned with promoting the use of the application process to request detentions than with deterring abuse. The only mention of a potential penalty for abuse appears in Article 17(4), which provides the following, "A Party may provide that, where the applicant has abused the procedures described in subparagraphs 1(b) and 2(b) of Article 16 (Border Measures), or where there is due cause, its competent authorities have the authority to deny, suspend, or void an application."ⁿ²⁴¹ While this language leaves open the possibility that the United States could adopt additional sanctions for trademark bullies, the language does not provide much guidance. In addition, the language seems to indicate that an adequate remedy is to simply "deny, suspend, or void an application."ⁿ²⁴² Although an application may be related to multiple shipments and to multiple points of entry (per Article 17(2)), this is not a requirement.ⁿ²⁴³ Therefore, depending on the application process adopted by the CBP under an implementation of ACTA, denial, suspension, or voidance of an application may just relate to one shipment at one point of entry. The language of Article 17(4) does not seem to contemplate any other [*1539] sanctions or remedies, and therefore, leaves the possibility that no further sanctions will be placed on bullies. This may leave open the potential for bullies to reapply in the future with no further consequences. In addition, if the CBP adopts a single shipment-single port of entry application or sanction process (as contemplated by Article 17(2) of ACTA), this low level of sanction leaves open the possibility that bullies will reapply to request a detention of products for the same importer, just at a different point of entry. With over three hundred points of entry in the United States, this leaves a dedicated bully with quite a number of possibilities for abuse.ⁿ²⁴⁴

VI. Proposals to Mitigate Harm to Small Businesses Stemming from International Intellectual Property Agreements

The first, and most obvious way in which potential harm to small businesses stemming from international intellectual property agreements could be avoided is to have the U.S. government take into consideration small business concerns during negotiations. However, this only mitigates harms from future agreements and does not assist with fully negotiated or signed agreements, such as ACTA.ⁿ²⁴⁵ In this latter instance, this Article suggests that at least three approaches may be taken that could still mitigate harms to small businesses: interpretation of problematic provisions, adoption of safeguards, and education of small businesses.

A. Interpretation of Problematic Provisions

In cases where international agreements have already been fully negotiated or signed, promoting a small business-friendly interpretation of problematic provisions may be all that is needed. Specifically, interpretation can be utilized by governmental agencies that may need to implement the problematic provisions of an international agreement. In the case of ACTA and the border enforcement measures, the CBP will need to implement the provisions relating to the scope of such measures. As discussed above, Article 13 of ACTA requires that the CBP broaden the scope of border enforcement to include mere trademark infringement. To mitigate the impact to small businesses [*1540] from this implementation, the CBP can adopt an interpretation of Articles 5(h) and 13 that excludes mere trademark infringement.

At least one American industry group, the Intellectual Property Owners Association (IPO), has suggested this path. n246 As IPO's letter to Ambassador Ron Kirk states,

ACTA is unwittingly broadening the scope of the seizure power of Customs and Border Patrol forces to encompass civil action trademark infringement and raising the specter of potential abuse in many countries around the globe. The determination of whether marks are similar and whether there is a likelihood of confusion should not be conducted hastily and in an ex parte manner by a border official, but should instead be based upon the appropriate legal analysis (possibly resulting from extensive pre-trial preparation and discovery where allowed). n247

IPO has suggested that the definition of "intellectual property" as provided in Article 5(h) of ACTA could be narrowly construed as referring only to "trademark counterfeiting" or "copyright piracy." n248 The support for such interpretation is that ACTA should be interpreted consistent with the current laws of the United States, as well as with the "stated intention of ACTA as reflected in the preamble, that it is an "anti-counterfeiting trade agreement."" n249 IPO goes on to state, "IPO is confident that it is not the intent of ACTA to change settled United States law by transforming what are the commonly occurring non-counterfeit-types of civil action infringements into activity intended to be punished under federal criminal law in the case of the United States" n250

The same suggestion has been made by at least one scholar, although with the goal of protecting access to generic medicines. n251 Henning Grosse Ruse-Khan of the Max Planck Institute has proposed a limitation on the scope of ACTA's border measures with respect to [*1541] goods in transit through an interpretation of Article 6(1) and Article 13. n252 Article 6(1) provides:

Each Party shall ensure that enforcement procedures are available under its law so as to permit effective action against any act of infringement of intellectual property rights covered by this Agreement, including expeditious remedies to prevent infringements and remedies which constitute a deterrent to further infringements. These procedures shall be applied in such a manner as to avoid the creation of barriers to legitimate trade and to provide for safeguards against their abuse. n253

And as discussed above, Article 13 provides the scope of border measures for ACTA and allows the United States to provide "as appropriate, and consistent with its domestic system of intellectual property rights protection and without prejudice to the requirements of the TRIPS Agreement, for effective border enforcement of intellectual property rights." n254 In addition, border enforcement measures should not "discriminate unjustifiably between intellectual property rights" and should "avoid[] the creation of barriers to legitimate trade." n255

Although Ruse-Khan's interpretation of both of these sections of ACTA relies primarily on a policy argument that trade in generic medicines is recognized as a global benefit, Ruse-Khan's interpretation can still be the basis for similar

interpretations of Articles 6(1) and 13 even based on different policy reasons.ⁿ²⁵⁶ With respect to Article 6(1), [*1542] Ruse-Khan focuses on the definition of "legitimate trade," and argues that a normative understanding of the term would mean that a public policy in the country of origin or destination would support a limitation of border measures to exclude mere trademark infringement.ⁿ²⁵⁷ In addition, Ruse-Khan argues that Article 13 contains "several open and ambiguous terms and conditions, which in sum create a form of constructive ambiguity that disguises the remaining differences amongst the parties over the treaty text."ⁿ²⁵⁸ Ruse-Khan posits that these ambiguities may have been a way for the United States and the European Union to resolve their differences over geographical indications and other intellectual property rights.ⁿ²⁵⁹ However, Ruse-Khan concludes that the same ambiguities could be utilized to interpret an exclusion of mere trademark infringement.ⁿ²⁶⁰

This Article argues that a similar interpretation can be applied to importations by small businesses in the United States. As discussed above, ACTA's inclusion of mere trademark infringement in the scope of border measures would likely mean that more small businesses' imports into the United States would be more vulnerable to a risk of detention than before.ⁿ²⁶¹ This increased vulnerability raises the very real possibility that barriers to trade conducted by small businesses in the United States would be raised to such an extent as to prevent small businesses from participating in international trade. Without the ability to participate in international trade, small businesses would be unable to take advantage of the savings that manufacturing or supply purchasing in places such as China may bring to a business.ⁿ²⁶² In turn, this would raise the cost of doing business and perhaps create insurmountable [*1543] obstacles to starting a small business in the first place or, at the very least, maintaining a profitable small business.

These barriers would appear contrary to the current public policies of the United States, which are geared toward providing as much assistance as possible to small businesses.ⁿ²⁶³ Recognizing that small businesses are the "backbone" of the United States economy, the United States has implemented a number of policy measures aimed at assisting small businesses secure financing,ⁿ²⁶⁴ effectively plan for the growth of their businesses,ⁿ²⁶⁵ and even enter the international trade arena.ⁿ²⁶⁶ It would seem that the importance placed on small businesses in the United States shows a sufficient policy rationale that could underlie an interpretation of Article 6(1) or Article 13 that would allow the United States to exclude mere trademark infringement from the scope of its border measures.

B. Adoption of Safeguards for Small Businesses

Even if a governmental agency (such as the CBP) were unable to interpret problematic provisions as proposed above, another method that could be used to mitigate harms to small businesses is the adoption of safeguards. With respect to ACTA, safeguards could include adopting more rigorous procedures for detentions of imported shipments and adopting penalties for abuse by trademark holders.

1. More Rigorous Detention Procedures

In the event the CBP could not (or does not) adopt a limiting interpretation of ACTA to exclude mere trademark infringement, the CBP should adopt more rigorous procedures for its border measures, which would help mitigate harms to small businesses. An adoption of such measures would not contravene ACTA or require an interpretation of ACTA because Article 6(1) explicitly allows the United States to "provide for safeguards against" the abuse of the [*1544] border measures procedures.ⁿ²⁶⁷ In particular, one measure that could easily be adopted by the CBP is a more limited timeframe in which detentions can occur for merely trademark infringing shipments, along with a requirement for proactive measures on the part of trademark bullies.ⁿ²⁶⁸

Currently, the CBP procedures allow a timeframe of between five and thirty days for initial detentions of shipments.ⁿ²⁶⁹ As discussed above, the first five days are for the CBP to determine whether "reasonable suspicion" exists for detaining a shipment that may be merely infringing.ⁿ²⁷⁰ After the five days have expired, if the CBP has determined that reasonable suspicion does exist, then the CBP issues a notice of detention to the importer.ⁿ²⁷¹ The notice of detention provides the importer with thirty days in which the importer may establish any of the grounds in which its goods may be released.ⁿ²⁷² However, the CBP procedures are silent on whether the importer may obtain a

release of its shipment sooner than the thirty day period if the importer meets one of the conditions for release.ⁿ²⁷³ In addition, these procedures apply where the CBP has acted to detain shipments, not where trademark holders have requested such detentions.ⁿ²⁷⁴ Although there may be a possibility of abuse by CBP field officers in detaining non-infringing shipments, the potential for abuse is much greater where trademark holders request such detentions.ⁿ²⁷⁵ In order to deter abuse by trademark holders in requesting detentions, this Article suggests that the CBP should adopt different procedures when detentions are requested by trademark holders for merely infringing products.

[*1545] With respect to shipments of merely infringing products detained based on a trademark holder's request, the timeframe for detention should be limited to ten days, or in the case of perishable goods, three days. In addition, the CBP should adopt a requirement that the trademark holder is required to file a cause of action against the importer in a district court before the expiration of the ten or three day period. If the trademark holder does not file such action against the importer, then the goods shall be released.ⁿ²⁷⁶ Such a rigorous timeframe and a requirement for proactive steps on the part of trademark holders can be found in other international agreements, such as in the Agreement on Trade-Related Aspects of Intellectual Property (TRIPS), as well as in the European Union (EU).ⁿ²⁷⁷ Although these rigorous timeframes are applied only to counterfeit shipments under TRIPS and in the EU,ⁿ²⁷⁸ the potential for abuse by trademark bullies in the United States supports an application to where merely trademark infringing shipments are detained at the request of trademark holders.

Article 55 of TRIPS provides that a ten-day period (beginning at the time notice is served to the trademark holder of the detention) be provided for trademark holders to inform the customs authorities that they have initiated proceedings against the importer.ⁿ²⁷⁹ If the trademark **[*1546]** holder does not provide notice to the customs authorities, then the shipment shall be released.ⁿ²⁸⁰ In addition, the ten-day period may be extended by another ten days if so requested.ⁿ²⁸¹ A similar provision is found in the EC Council Regulation No. 1383/2003, which requires that Member states detain shipments for no longer than ten days, or three days in the case of perishable goods.ⁿ²⁸² Although the timeframe can be extended for another ten days in the case of regular shipments, in the case of perishable goods, no extension is allowed.ⁿ²⁸³ During this timeframe, a trademark holder who requests such detention must inform the customs authorities that they have initiated legal proceedings against the importer, or else the detained goods shall be released.ⁿ²⁸⁴

This strict timeframe would assist in providing some safeguard against abuse by trademark bullies who may request unwarranted detentions because it would add costs to the otherwise costless trademark enforcement process that the CBP provides.ⁿ²⁸⁵ If, instead, the current CBP procedures were applied to detentions requested by trademark holders, factoring of litigation costs would never be required by the trademark holders. While trademark bullies could bring lawsuits for mere trademark infringement against importers after successful detentions, it would not be required, thereby providing a near costless form of enforcement to trademark bullies. Without costs to enforcement, there would be no disincentive for abuse.

Under this Article's proposed new procedures, trademark bullies would need to undertake a serious analysis of the potential infringement **[*1547]** by third parties prior to requesting any detentions. This analysis would include not only the severity of the infringement, but also the likelihood of success on the merits of the case and whether litigation is appropriate. In addition, the short timeframe provided for trademark bullies to undertake any actions against importers would mean that trademark bullies would need to be prepared at the outset to follow up its requests with litigation. This would add a variety of costs, including legal fees for the analysis and for preliminary preparation of court documents. Although there may be some trademark bullies who may proceed in any situation,ⁿ²⁸⁶ it is likely that in a majority of situations, these costs would incentivize trademark bullies to request detentions only where they have a reasonable case of trademark infringement.ⁿ²⁸⁷

2. Penalties for Abuse

In addition to adopting a more rigorous timeframe and requiring proactive steps to be taken by trademark holders, the CBP should adopt penalties for abuse of the border enforcement measures. Similar to the adoption of the more rigorous

procedures as described above, an adoption of penalties for abuse would not be contrary to the plain language of ACTA, nor would it require an interpretation of ACTA. As mentioned above, ACTA already provides for the ability of the United States to adopt measures that would prevent abuse under Article 6(1).ⁿ²⁸⁸ Further, as discussed in Part IV, Article 17(4) does contemplate some form of penalty for abusing trademark holders by allowing the United States to "deny, suspend, or void an application."ⁿ²⁸⁹ But while Article 17(4) does not seem to indicate that any further penalty should be applied to abusive trademark holders,ⁿ²⁹⁰ neither does it prevent the United States from adopting additional penalties. In cases where a request by trademark holders has yielded three unwarranted detentions,ⁿ²⁹¹ the CBP should revoke the ability of such trademark [*1548] holders (and its affiliates) to utilize the border enforcement measures across all U.S. ports of entry. With over three hundred ports of entry in the United States,ⁿ²⁹² revocation of the ability to request detentions at all ports would likely be a sufficient deterrent to abuse of the process by trademark bullies. This way, a determined bully would not be able to move from one port to another to request additional unwarranted detentions.ⁿ²⁹³

A determination of unwarranted detentions could be made in one of two situations. The first could be where shipments are detained but the CBP finds that there is no trademark infringement. The second situation could be where the trademark holder declines to proceed with filing a lawsuit against the importer. Either of these situations would indicate that the requesting trademark holder has not sufficiently undertaken an analysis of her trademark rights vis-a-vis the importer. While mistakes can occur, three mistakes on three different occasions is abuse. In addition, in order to make the revocation a serious penalty, the revocation of ability to utilize the border enforcement measures should be for at least one year, if not longer. After expiration of the time period, penalized trademark holders could reapply to the CBP to have their ability to utilize the border enforcement measures reinstated, but only upon a showing of an adoption of internal measures that would prevent future abuses.

C. Educational Outreach to Small Businesses

Yet another method that could be used to mitigate harms stemming from international intellectual property agreements is educational outreach to small businesses. This method is one that many governmental agencies already undertake in order to assist small businesses overcome hurdles that intellectual property laws pose.ⁿ²⁹⁴ With respect to ACTA, the CBP should undertake an outreach program to educate small businesses on border measures that may affect them. [*1549] Although the CBP currently maintains a "Trade Outreach" program,ⁿ²⁹⁵ very few programs are geared specifically toward small businesses.ⁿ²⁹⁶ In addition, the CBP does not maintain an office or other liaison specifically for small businesses.ⁿ²⁹⁷ This is in contrast to other governmental agencies that have a role in intellectual property enforcement, like the Office of the United States Trade Representative, which recently designated an Assistant United States Trade Representative for Small Business, Market Access, and Industrial Competitiveness.ⁿ²⁹⁸ While the CBP may not have similar resources to establish an office or point of contact dedicated to small businesses, additional training programs geared toward small businesses could easily be adopted. In particular, the CBP should attempt to educate small businesses about the CBP policies and procedures with respect to importations and intellectual property rights. This would help alleviate some of the harms stemming from the lack of knowledge that many small business owners likely operate under with respect to border enforcement measures.ⁿ²⁹⁹

VII. Conclusion

As the U.S. economy struggles to recover from its most recent "meltdown on par with the Great Depression,"ⁿ³⁰⁰ the U.S. government is paying more attention to small businesses with the understanding that the strength of small businesses may contribute to a successful economic recovery.ⁿ³⁰¹ Although Congress and the U.S. PTO have recognized that [*1550] intellectual property laws can pose an impediment to the success of small businesses,ⁿ³⁰² this recognition has not extended to international agreements that contain intellectual property obligations. This Article attempts to pull these two related areas together in an effort to craft a more consistent policy approach for small businesses. Utilizing ACTA as a timely foil, this Article has attempted to bring to light the potential harms that the border measure provisions of ACTA pose to small businesses. Policymakers need to seriously consider the increased

vulnerability of small businesses to border detentions and seizures, along with an empowerment of trademark bullies, as the viability of small businesses is at stake.

Although the current version of ACTA has been signed by the United States and textual changes are not possible, there are a number of measures that the United States may undertake to mitigate the harms to small businesses. These measures may also be used where other international agreements have already been fully negotiated or signed and ratified. More importantly, the analysis of ACTA provided in this Article and the suggestions to mitigate the harmful provisions provide a framework for policymakers to utilize in their approach to other international intellectual property-related agreements. If this is done, the U.S. government will have resolved the intellectual property disconnect and have a coherent policy approach that effectively assists small businesses.

n1. See Shayndi Raice, For Small Business, Slow Gains in Credit, Wall St. J. (July 13, 2010), http://online.wsj.com/article/SB10001424052748703283004575363381891292318.html?mod=WSJ_newsreel_smallbiz ("Mr. Bernanke noted that small businesses are essential to job creation, saying that data show that small firms employ roughly one-half of all Americans and account for about 60% of job creation.").

n2. See Brian Headd, Small Businesses Most Likely to Lead Economic Recovery, Small Bus. Advoc., July 2009, at 1 ("Small businesses' historical overall rate of net job creation makes them a key player in solving our labor market woes.").

n3. See Frequently Asked Questions, SBA: Office of Advocacy (Jan. 2011), available at <http://www.sba.gov/sites/default/files/sbfaq.pdf>. There is further evidence that 20% of small businesses fail within the first year of inception. See Sarah E. Needleman, Rise in Start-Ups Draws Doubters, Wall St. J. (Feb. 2, 2012), <http://online.wsj.com/article/SB10001424052970204652904577197043592536240.html?KEYWORDS=20+small+business>.

n4. See, e.g., Kirk Heriot et al., Evaluating the Impact of Federal Legislation on Small Businesses: An Exploratory Study of the New Minimum Wage Rate and the Health Insurance Tax, Small Bus. Inst. J., Oct. 2010, at 63, 84, http://sbaer.uca.edu/sbij_2010_v6.pdf (concluding that "a firm with as few as 20 employees would have as much as a 50-55 percent decrease in net income as a result of the two federal labor laws discussed in [the article's] research").

n5. The impact of trademark litigation tactics on small businesses was recognized as a concern by Congress in 2010. In the Trademark

Technical and Conforming Act, passed in early 2010, Congress commissioned a study to be undertaken by the Intellectual Property Enforcement Coordinator to study "the extent to which small businesses may be harmed by litigation tactics by corporations attempting to enforce trademark rights beyond a reasonable interpretation of the scope of the rights granted to the trademark owner." See Trademark Technical and Conforming Amendment Act of 2010, Pub. L. No. 111-146, § 4, 124 Stat. 66, 69-70 (2010). Unfortunately, the study that was presented to Congress does not appear to be responsive to the concerns expressed by Congress. See Eric Goldman, Department of Commerce Releases Worthless Study on Trademark Bullying, Tech. & Mktg. L. Blog (Apr. 29, 2011, 9:58 AM), <http://blog.ericgoldman.org/archives/2011/04/>; David Pardue, Whitewash: Commerce Department Issues Trifling Report on Trademark Bullying, Trade Secrets and IP Today (May 2, 2011, 9:13 AM), <http://tradesecretstoday.blogspot.com/2011/05/whitewash-commerce-department-issues.html>.

n6. See Heriot et al., *supra* note 4, at 64 ("Small firms are especially challenged by changes in their labor costs because the burden is often not shared by multiple shareholders, but rather by a sole proprietor or a few shareholders in a closely held firm.").

n7. See Teresa A. Sullivan et al., Financial Difficulties of Small Businesses and Reasons for Their Failure 4 (U.S. Small Bus. Admin., Working Paper No. SBA-95-0403, 1998), available at <http://archive.sba.gov/advo/research/rs188tot.pdf> (reporting that twenty percent of small businesses studied cited tax-related reasons for their business failure).

n8. See Press Release, Office of U.S. Trade Rep., New Online Tool Highlights Tariff Benefits of Free Trade Agreements for American Small Businesses (Apr. 27, 2011), available at <http://www.ustr.gov/about-us/press-office/press-releases/2011/april/new-online-tool-highlights-tariff-benefits-free-trade> (quoting Small Business Administration Deputy Administrator Marie Johns, who said, "'Many small business owners would benefit from exporting but might not have the time or resources to get started. Giving small business owners a simple way to navigate the complexities of tariffs and international trade is a crucial step in ensuring they have what they need to grow their business and create jobs.'").

n9. See Trademark Technical and Conforming Amendment Act of 2010, Pub. L. No. 111-146, § 4, 124 Stat. at 69-70.

n10. See, e.g., Frequently Asked Questions, U.S. Pat. & Trademark Off., <http://www.uspto.gov/smallbusiness/pdfs/USPTOSmallBusinessCampaignFAQ.pdf> (last visited June 6, 2012) (describing, in number thirteen, what the U.S. Patent & Trademark Office is doing to assist small businesses overcome problems related to intellectual property laws); Press Release, Office of U.S. Trade Rep., *supra* note 8 (attempting to overcome knowledge hurdle and assist small businesses in exporting products overseas).

n11. International intellectual property obligations are typically included in the international trade agreements the United States negotiates with other nations. One of the main sources of international intellectual property obligations for the United States is from the Agreement on Trade Related Aspects of Intellectual Property (TRIPS). See Agreement on Trade-Related Aspects of Intellectual Property Rights, 33 I.L.M. 1197, 1197-98 (1994) [hereinafter TRIPS Agreement].

n12. For example, the Ford Motor Company has complained that the Free Trade Agreement between the United States and South Korea would result in more competition in the United States from Korean cars. Ford has claimed that for every fifty-two Korean cars that are imported into the United States, only one American car can be exported to South Korea. See *All Things Considered: Ford: Korea Trade Deal Could Hurt U.S. Automakers*, Nat'l Pub. Radio (Nov. 4, 2010), available at <http://www.npr.org/templates/story/story.php?storyId=131075653>.

n13. See *infra* Parts IV-V (arguing that due to ACTA, small businesses will be more vulnerable to border seizures and trademark bullies have a more effective bullying framework, both of which impact viability of small businesses).

n14. As argued in Part IV, small businesses will be more vulnerable to border seizures of their imported products, which has a direct impact on their finances. If a business is unable to import products, it may default on delivery obligations or run out of inventory, all of which has a negative and direct impact on the cash flow of the business. See *infra* Part IV.B.

n15. See *Outlines of the Trans-Pacific Partnership*, Off. U.S. Trade Representative, <http://www.ustr.gov/about-us/press-office/fact-sheets/2011/november/outlines-trans-pacific-partnership-agreement> (last visited June 6, 2012) [hereinafter U.S.T.R., TPP] (describing the outlines of the TPP, including intellectual property provisions).

n16. See *Anti-Counterfeiting Trade Agreement*, Dec. 3, 2010, 50 I.L.M. 243 (2011) [hereinafter ACTA].

n17. In a recent hearing before the United States Senate Committee on Finance, the U.S. Trade Representative, Ron Kirk, indicated in one of his responses that "as stated in the President's Trade Policy Agenda, the Administration is committed to conducting its trade policy efforts based on high standards that reflect American values on public engagement and transparency. USTR will continue to consult with stakeholders, both formally, through our ITAC advisory system, and informally. This will help ensure that we receive appropriate input" 2011 Trade Agenda: Hearing Before the S. Comm. on Fin., 112th Cong. 31 (Mar. 9, 2011) [hereinafter *Questions to Ambassador Kirk*] (Statement of Ambassador Ron Kirk, United States Trade Representative), available at http://keionline.org/sites/default/files/RonKirk_SFC_9Mar2011.pdf. Although small businesses comprise one of the ITACs (an acronym for Industry Trade Advisory Committees), ITAC 11, see *Industry Trade Advisory Committees*, Int'l Trade Admin., <http://www.ita.doc.gov/itac/committees/index.asp> (last visited June 6, 2012), it is unclear how much input or credence they have had in formulating the policies of ACTA. For example, in the transcript from the Meeting of the Committee Chairs of the ITACs in October 2010, the chairperson for ITAC 11 (Small and Minority Businesses) made no statements. See *Industry Trade Association Committees (ITACs) Meeting of the Committee Chairs, Public Session*, Oct. 12, 2010, available at http://www.ustr.gov/webfm_send/2449. In addition, ACTA negotiations were conducted in secret, without any stakeholder attendance. See Charles R. McManis, *The Proposed Anti-Counterfeiting Trade Agreement (ACTA): Two Tales of a Treaty*, 46 Hous. L. Rev. 1235, 1236 (2009) (describing the negotiations as "being carried out behind closed doors"); Peter K. Yu, *Six Secret (and Now Open) Fears of ACTA*, 64 SMU L. Rev. 975, 998-1015 (2011) (arguing that the first fear of ACTA was the lack of transparency and accountability of the negotiation process).

n18. Whether ACTA needs to be implemented in the United States is an open question. The U.S.T.R. has taken the position that U.S. law already complies with ACTA. See ACTA: Meeting U.S. Objectives, Office of U.S. Trade Rep., <http://www.ustr.gov/about-us/press-office/fact-sheets/2011/september/acta-meeting-us-objectives> (last visited June 8, 2012) ("Significantly, the ACTA is consistent with existing U.S. law, and does not require any change to U.S. law for its implementation in the United States."). However, policy analysts have come to a different conclusion. See Memorandum from Brian T. Yeh, Legis. Atty. Am. L. Div., Cong. Research Serv., to Hon. Ron Wyden, at 2 (Oct. 29, 2010), available at <http://www.techdirt.com/articles/20110421/16580813994/crs-report-withheld-ustr-confirms-that-acta-language-is-quite-questionable.shtml>; Mike Masnick, CRS Report Withheld by USTR Confirms That ACTA Language Is Quite Questionable, TechDirt (Apr. 26, 2011, 1:33 PM), <http://www.techdirt.com/articles/20110421/16580813994/crs-report-withheld-ustr-confirms-that-acta-language-is-quite-questionable.shtml>.

n19. A trademark bully is a large corporation that enforces an unreasonable interpretation of its trademark rights against a small business through the use of intimidation tactics. See Leah Chan Grinvald, *Shaming Trademark Bullies*, 2011 Wis. L. Rev. 625, 642 [hereinafter Grinvald, *Shaming Trademark Bullies*].

n20. Edward G. Hinkelman, *Importers Manual U.S.A.* 17 (4th ed. 2004) (listing thirteen ways import businesses fail). If the ability to import products is reduced or lost altogether, the costs of running a small business would be higher, making such business less competitive. See *infra* Parts IV.A-B. In addition, the internet-related provisions of ACTA also pose a serious threat to the viability of small businesses. See ACTA, *supra* note 16, art. 27. These internet provisions of ACTA are bracketed for now.

n21. See generally Michael S. Gutter & Tabassum Saleem, *Financial Vulnerability of Small Business Owners*, 14 Fin. Serv. Rev. 133, 134 (2005) (positing small business financial vulnerability due to lack of diversification); Sullivan et al., *supra* note 7, at 21-23 (studying factors that lead small businesses to file for bankruptcy).

n22. On October 1, 2011, the ACTA negotiating parties held a signing ceremony, where eight parties signed the agreement, including the United States. See Press Release, Off. of U.S. Trade Rep., *Partners Sign Groundbreaking Anti-Counterfeiting Trade Agreement* (Oct. 1, 2011), available at <http://www.ustr.gov/about-us/press-office/press-releases/2011/october/partners-sign-groundbreaking-anti-counterfeiting-t>. The next step is for the United States to deposit its ratification of ACTA with Japan, the depositary of the Agreement. See *id.* Once six parties have deposited their ratification of ACTA with Japan, ACTA will enter into force. See *id.* Ambassador Ron Kirk has announced that ACTA is considered by the Obama administration as an "executive agreement," rather than as an international treaty. See Questions to Ambassador Kirk, *supra* note 17, at 27-28. An executive agreement does not require Congressional approval, rather, just the President's signature. See Jack Goldsmith & Lawrence Lessig, *Anti-counterfeiting Agreement Raises Constitutional Concerns*, Wash. Post, Mar. 26, 2010, at A23. However, scholars, commentators, and policymakers have expressed concern that treating ACTA as an executive agreement is unconstitutional. See, e.g., Sean Flynn, *ACTA's Constitutional Problem: The Treaty Is Not a Treaty*, 26 Am. U. Int'l L. Rev. 903, 904 (2011) (arguing that ACTA is an international treaty, and as such, cannot be treated as an executive agreement by the United States); Letter from Ron Wyden, U.S. Senator, to Barack Obama, President of the U.S. (Oct. 12, 2011), available at <http://wyden.senate.gov/newsroom/press/release/?id=12a5b1cb-ccb8-4e14-bb84-a11b35b4ec53>.

n23. See U.S.T.R., TPP, *supra* note 15.

n24. Exclusive rights to an invention are granted through patent law. See 35 U.S.C. § 101 (2006) ("Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.").

n25. Ownership rights in brand symbols are granted through trademark law. See 15 U.S.C. § 1127 (2006) ("The term 'trademark' includes any word, name, symbol, or device, or any combination thereof - (1) used by a person ... to identify and distinguish his or her goods ...").

n26. Ownership rights of works in recordable media are granted through copyright law. See 17 U.S.C. § 102(a) (2006) ("Copyright protection subsists, in accordance with this title, in original works of authorship fixed in any tangible medium of expression, now known or later developed, from which they can be perceived, reproduced, or otherwise communicated, either directly or with the aid of a machine or device.").

n27. The Small Business Administration generally defines a small business as any entity with five hundred or fewer employees and annual revenues of under \$ 7 million (although the specific figures may differ based on industry). See Summary of Size Standards by Industry, U.S. Small Bus. Admin., <http://sba.gov/content/summary-size-standards-industry> (last visited June 8, 2012).

n28. For example, a copyright gives the owner exclusive rights to reproduce, perform, display, distribute, and create derivative works of the copyrighted item. See 17 U.S.C. § 106 (2006).

n29. See The Impact of Intellectual Property on Entrepreneurship and Job Creation: Hearing Before the H. Comm. on Small Bus., 111th Cong. 1 (2010) [hereinafter *The Impact of Intellectual Property*] (statement of Congressperson Nydia Velazquez, Chairwoman, H. Comm. on Small Bus.) ("Technological entrepreneurs want to know that innovations like TiVo and Slingbox are not hindered, as we seek to protect content creator's rights."). However, not all intellectual property laws disfavor small businesses. For example, the Fairness in Music Licensing Act provides a benefit to small business music users, as codified in the Copyright Act. See 17 U.S.C. § 110(5)(B)(i)-(ii) (2006) (exempting all businesses that are less than 2,000 gross square feet in size, in addition to food and drinking places that are less than 3,750 square feet).

n30. See, e.g., Iain M. Cockburn & Megan J. MacGarvie, Entry and Patenting in the Software Industry (Nat'l Bureau of Econ. Research, Working Paper No. 12563, 2006), available at <http://www.nber.org/papers/w12563> (conducting empirical research on the relationship between patents and market entry of entities without prior experience).

n31. See Grinvald, *Shaming Trademark Bullies*, *supra* note 19, at 647.

n32. See *infra* notes 59-63.

n33. See *infra* Part II.B.

n34. In fact, for some small businesses, such as small biotechnology firms, their intellectual property portfolio may be the most valuable asset of the business. See Andrew J. Sherman, *Legal and Strategic Challenges for Life Science and Biotech Companies*, *Entrepreneurship*, <http://www.entrepreneurship.org/en/resource-center/legal-and-strategic-challenges-for-life-science-and-biotech-companies.aspx> (last visited June 8, 2012) ("For life science companies, IP is typically their most valuable asset.").

n35. See *supra* note 28 and accompanying text.

n36. See 35 U.S.C. § 271(a) (2006) ("Whoever without authority makes, uses, offers to sell, or sells any patented invention, within the United States or imports into the United States any patented invention during the term of the patent therefor, infringes the patent.").

n37. 15 U.S.C. § 1114(1)(a).

n38. See, e.g., Linda A. Kuczma, *Creating a Trademark Protection Program in the U.S. and Abroad*, in *Understanding Trademark Law* 2009, 193, 196 (Jeffery A. Handelman et al. eds., 2009) [hereinafter *Understanding Trademark Law*] ("It is common practice to conduct some level of investigation or a trademark search.").

n39. See, e.g., *Vornado Air Circulation Sys., Inc. v. Duracraft Corp.*, 58 F.3d 1498, 1500-01 (10th Cir. 1995), cert. denied, 516 U.S. 1067 (1996).

n40. For example, having a professional service conduct a clearance search for trademarks can cost anywhere from \$ 30 to \$ 100 per mark searched, depending on the type of search used. See Stephen Elias & Richard Stim, *Trademark: Legal Care for Your Business & Product Name* 101-02 (9th ed. 2010) (advising readers how to conduct trademark searches to save professional search service fees).

n41. See Cockburn & MacGarvie, *supra* note 30, at 2.

n42. See *id.* This is assuming that the intellectual property right holder is even amenable to a licensing arrangement.

n43. See *id.*

n44. While entrepreneurs already face high barriers generally due to financing constraints, see David S. Evans & Linda S. Leighton, *Some Empirical Aspects of Entrepreneurship*, 79 *Am. Econ. Rev.* 519, 520 (1989), the costs stemming from intellectual property rights have been shown to have a direct impact on entry by small businesses. For example, one study conducted by economists in 2006 of the software industry found that the increased ability to patent software had a disproportionately negative impact on small businesses. See Cockburn & MacGarvie, *supra* note 30, at 19-21. The study showed that there was a correlation between an increase in the number of patents obtained in the software industry (due to relaxed standards for patentability) and the decrease in the entry into the industry by small firms. *Id.*

n45. See, e.g., *Vornado Air Circulation Sys., Inc. v. Duracraft Corp.*, 58 F.3d 1498, 1500-01 (10th Cir. 1995).

n46. See Am. Intellectual Prop. Law Ass'n, *Report of the Economic Survey 2009*, at 29 (2009) (finding that the median cost to litigate a patent dispute can be as great as \$ 2.5 million).

n47. See Rebecca Callahan, *Arbitration v. Litigation: The Right to Appeal and Other Misperceptions Fueling the Preference for a Judicial Forum 2* (Bepress, Legal Series, Working Paper No. 1248, 2006) (noting the money that can be saved through arbitration processes because those processes offer finality). Callahan further notes the nuanced and lengthy appellate process involved in using the judiciary as a means to settle disputes. *Id.* at 7-8. For example, in the *Vornado* case, the case was appealed all the way to the United States Supreme Court. See 516 U.S. 1067 (1996) (denying certiorari). Although the Supreme Court did not grant certiorari, see *id.*, the litigants likely expended a great deal of financial resources to perfect the appeal and defense.

n48. See, e.g., Letter from Diane Reed, Attorney, Knobbe Martens Olson & Bear LLP, to Christopher J. Day, Law Office of Christopher Day (Sept. 4, 2009) (on file with author); Letter from National Football League, to Ms. Thom, Fleurty Girl (Jan. 13, 2010) (on file with author).

n49. See generally David Bollier, *Brand Name Bullies: The Quest to Own and Control Culture* (2005) (documenting copyright and trademark bullying); Grinvald, *Shaming Trademark Bullies*, *supra* note 19 (discussing trademark bullying); Ted M. Sichelman, *The Vonage Trilogy: A Case Study in "Patent Bullying"* (San Diego Legal Studies, Working Paper No. 11-057, 2011), available at <http://ssrn.com/abstract=1856703> (discussing patent bullying).

n50. See Sullivan et al., *supra* note 7, at 4.

n51. The Small Business Administration was established in 1953, see Small Business Act of 1953, Pub. L. No. 83-163, 67 Stat. 230, 278 (1953); but its predecessor, the Smaller War Plants Corporation, was established in 1942. See Our History, U.S. Small Bus. Admin., <http://www.sba.gov/about-sba-services/our-history> (last visited June 8, 2012).

n52. See Mission Statement, U.S. Small Bus. Admin., <http://www.sba.gov/content/mission-statement-0> (last visited June 8, 2012) ("The U.S. Small Business Administration (SBA) was created in 1953 as an independent agency of the federal government to aid, counsel, assist and protect the interests of small business concerns, to preserve free competitive enterprise and to maintain and strengthen the overall economy of our nation.").

n53. 15 USC § 631(a) (2006).

n54. See Sarah Millican, *Ultimate Guide to Intellectual Property*, U.S. Small Bus. Admin. (Oct. 25, 2011, 4:53 PM), <http://community.sba.gov/community/blogs/community-blogs/business-law-advisor/ultimate-guide-intellectual-property>.

n55. See, e.g., *id.*

n56. Frequently Asked Questions, *supra* note 10, at question 2.

n57. *Id.* at question 10.

n58. *Id.* at question 13.

n59. See The Importance of Patent Reform on Small Business: Hearing Before the H. Comm. on Small Bus., 110th Cong. (2007).

n60. See *id.* at 19-40 (statements of witnesses representing small business interests).

n61. See *id.*

n62. Trademark Technical and Conforming Amendment Act of 2010, Pub. L. No. 111-146, § 4, 124 Stat. 66, 69-70 (2010). As discussed *supra* in note 5, the actual study was not that helpful to small businesses.

n63. See, e.g., The Impact of Intellectual Property, *supra* note 29, at 17 (question by Rep. Luetkemeyer regarding the enforcement of existing laws abroad).

n64. See Trade Agreements, Office of U.S. Trade Rep., <http://www.ustr.gov/trade-agreements> (last visited June 8, 2012).

n65. For example, the Paris Convention and the TRIPS agreement require the United States to protect foreign well-known marks that have

not been previously used in the United States but are well-known here. See generally Leah Chan Grinvald, A Tale of Two Theories of Well-Known Marks, 13 Vand. J. Ent. & Tech. L. 1 (2010) (discussing the U.S. compliance with the well-known marks doctrine).

n66. See, e.g., Help Wanted: How Passing Free Trade Agreements Will Help Small Businesses Create New Jobs: Hearing Before the H. Comm. on Small Bus., 112th Cong. 1-5 (2011).

n67. See, e.g., Small and Medium-Sized Enterprises: U.S. and EU Export Activities, and Barriers and Opportunities Experienced by U.S. Firms, Inv. No. 332-509, USITC Pub. 4169 (July, 2010) (Final).

n68. For example, the United States is currently negotiating the Trans-Pacific Partnership Agreement, which contains various intellectual property obligations. See Catherine Saez, US IP Enforcement Ambitions in Trans-Pacific Trade Agreement Stir Reactions, *Intell. Prop. Watch* (Mar. 16, 2011, 4:30 PM), <http://www.ip-watch.org/weblog/2011/03/16/us-ip-enforcement-ambitions-in-trans-pacific-trade-agreement-stir-reactions/>. The chapter on intellectual property (dated February 2011) was leaked in March 2011. See Trans-Pacific Partnership Agreement, Intellectual Property Rights Chapter (Feb. 2011), <http://keionline.org/sites/default/files/tpp-10feb2011-us-text-ipr-chapter.pdf>.

n69. For example, the draft intellectual property rights chapter of the Trans-Pacific Partnership contains specific obligations with respect to well-known trademarks and geographical indications. See Trans-Pacific Partnership Agreement, *supra* note 68, art. 2(6)-(8). It is questionable whether the United States currently protects well-known trademarks that have not been previously used in the United States at the federal level. See Grinvald, *supra* note 65, at 4-5.

n70. See Emily Ayoob, Recent Development, The Anti-Counterfeiting Trade Agreement, 28 *Cardozo Arts & Ent. L.J.* 175, 178 (2010).

n71. See sources cited *supra* note 17.

n72. ACTA: Meeting U.S. Objectives, *supra* note 18. However, a report by the Congressional Research Service questions this stating: "Depending on how broadly or narrowly several passages from the ACTA draft text are interpreted, it appears that certain provisions of federal intellectual property law could be regarded as inconsistent with ACTA" Memorandum from Brian T. Yeh to the Hon. Ron Wyden, *supra* note 18, at 2; see also Masnick, *supra* note 18.

n73. See *infra* Part III.B. At the time of this Article, it is unclear whether compliance with ACTA will be necessary, as a number of member nations within the European Union have refused to sign the agreement. See ACTA Loses More Support in Europe, *Guardian* (Feb. 15, 2012), <http://www.guardian.co.uk/technology/2012/feb/15/acta-loses-more-support-europe>. According to Article 40(1), six signatories of ACTA need to deposit their ratifications with Japan in order for ACTA to enter into force. See ACTA, *supra* note 16, art. 40(1), 45. Only after ACTA comes into force will it have the effect of binding the United States. See Sean Flynn, ACTA to Be Signed - But Can It Enter into Force?, *infojustice.org* (Sept. 29, 2011), <http://infojustice.org/archives/5699>.

n74. See, e.g., Japan-U.S. Joint Proposal, Anti-Counterfeiting Trade Agreement, Discussion Draft, June 25, 2008, <http://sites.google.com/site/iipenforcement/acta> (discussing "Border Measures"); Discussion Paper on a Possible Anti-Counterfeiting Trade Agreement, May 22, 2008, <http://ipjustice.org/wp/wp-content/uploads/ACTA-discussion-paper-1.pdf>. For scholarly commentary of this issue, see Kenneth L. Port, A Case Against the ACTA, 33 *Cardozo L. Rev.* 1131, 1156-59 (2012) (describing the various objections to ACTA, citing to various organizations, including the Electronic Frontier Foundation); Yu, *supra* note 17, at 1019-44 (arguing that the second and third fears of ACTA are "upward ratchets" of intellectual property protection in the United States and abroad); Margot Kaminiski, Recent Development, The Origins and Potential Impact of the Anti-Counterfeiting Trade Agreement (ACTA), 34 *Yale J. Int'l L.* 247, 247 (2009) (arguing that ACTA would create a "new world" of intellectual property enforcement).

n75. Criminalizing all forms of trademark infringement would be a major change in the United States. See *infra* Part III.B.1 for a discussion of the differences between mere trademark infringement and counterfeiting. For the early proposal to criminalize all forms of trademark infringement, see Japan-U.S. Joint Proposal, Anti-Counterfeiting Trade Agreement [Chapter 2 (Criminal Provisions)], Discussion Draft, Oct. 16, 2008, <http://sites.google.com/site/iipenforcement/acta> ("Each Party shall provide for criminal procedures and penalties to be applied at least in cases of willful trademark counterfeiting [Option J.: trademark infringement caused by confusing similar trademark goods] ..."); Consolidated Text, Anti-Counterfeiting Trade Agreement, Deliberative Draft, Jan. 18, 2010, sec. 3, art. 2.14, <http://sites.google.com/site/iipenforcement/acta>; see also Margot E. Kaminski, An Overview and the Evolution of the Anti-Counterfeiting Trade Agreement, 21 *Alb. L.J. Sci. & Tech.* 385, 424-26 (2011); Kimberlee G. Weatherall, ACTA April 2010 - Analysis of Provisions 3 (2010), available at <http://works.bepress.com/kimweatherall/20/>.

n76. See ACTA, *supra* note 16, art. 23 ("Each Party shall provide for criminal procedures and penalties to be applied at least in cases of willful trademark counterfeiting or copyright or related rights piracy on a commercial scale.").

n77. See Kim Weatherall, ACTA: New (Leaked) Text, New Issues, *Fortnightly Review IP & Media Law* (July 15, 2010), <http://fortnightlyreview.info/2010/07/15/acta-new-leaked-text-new-issues%E2%80%A6/> ("In short, though: the text is an improvement that continues to have significant problems.").

n78. There are a number of small businesses that import into the United States. See U.S. Dept. of Commerce, U.S. Census Bureau News, A Profile of U.S. Importing and Exporting Companies, 2008-2009, at 15 (Apr. 2011).

n79. See *infra* notes 178 and 179.

n80. See ACTA, *supra* note 16, art. 13 (emphasis added).

n81. The United States Customs and Border Protection agency is the border law enforcement agency within the Department of Homeland Security. See We Are CBP!, Border Prot. (Oct. 4, 2010), http://cbp.gov/xp/cgov/careers/customs_careers/we_are_cbp.xml.

n82. See U.S. Customs & Border Prot. and U.S. Immigration & Customs Enforcement, Intellectual Property Rights, Fiscal Year 2010 Seizure Statistics - Final Report 6 (Jan. 2011) (showing that counterfeit footwear accounted for the number one commodity seized at the border).

n83. See 15 U.S.C. § 1114 (2006) (defining trademark infringement of a registered trademark).

n84. See 15 U.S.C. § 1127 (2006) (defining "counterfeit" as "a spurious mark which is identical with, or substantially indistinguishable from, a registered mark").

n85. *Birmingham v. Mizuno USA, Inc.*, No. 5:09- CV-0566 (GTS/GHL), 2011 U.S. Dist. LEXIS 34696, 26 ("This test of identical with, or substantially indistinguishable from requires a closer degree of similarity than is required for traditional trademark infringement or unfair competition." (citation omitted) (internal quotation marks omitted)).

n86. See Jennifer E. Rothman, The Questionable Use of Custom in Intellectual Property, 93 Va. L. Rev. 1899, 1910 n.24 (2007) ("Generally, only injunctive relief is awarded in trademark infringement cases, but when a showing of willfulness is made, courts can award monetary damages for lost profits, costs, and fees.").

n87. See 15 U.S.C. § 1117(a) (2006).

n88. See *id.* § 1117(c).

n89. See 18 U.S.C. § 2320(a).

n90. See *infra* Part IV.B.

n91. See J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* § 25:10 (4th ed. 2011) (discussing counterfeiting in a variety of industries that have caused serious harm to the public and distinguishing between counterfeit and civil trademark infringement).

n92. See ACTA, *supra* note 16, art. 5(h). Article 5(h) refers to the TRIPS agreement definition of intellectual property, which includes copyright and related rights, trademarks, geographical indications, industrial designs, and layout designs of integrated circuits. See TRIPS Agreement, *supra* note 11, at 1201-12; see also Henning Grosse Ruse-Khan, *A Trade Agreement Creating Barriers to International Trade?: ACTA Border Measures and Goods in Transit*, 26 *Am. U. Int'l L. Rev.* 645, 672-73 (2011).

n93. See *infra* Part IV. This Article is not suggesting that small businesses be allowed to import trademark infringing products; however, due to the complexities of determining what infringes a trademark, it is likely that small businesses in certain industries will be subject to increased border detentions for shipments that may come close to infringing but do not in fact infringe. See *infra* Part IV.B.

n94. See ACTA, *supra* note 16, art. 16(1).

n95. *Id.*

n96. See 19 C.F.R. §§133.1-133.53 (2011); Customs & Border Prot., Customs Directive No. 2310-008A, Trademark and Trade Name Protection (Apr. 7, 2000) [hereinafter Customs Directive], <http://www.cbp.gov/linkhandler/cgov/trade/legal/directives/2310-008a.ctt/2310-008a.pdf>.

n97. Although the Customs Directive states that there is an application procedure, see Customs Directive, *supra* note 96, at 2.3, there is no further mention of the process in the Customs Directive, nor is there an application on the CBP website. See Intellectual Property Rights, U.S. Customs & Border Prot., http://cbp.gov/xp/cgov/trade/priority_trade/ipr/ (last visited June 8, 2012). Instead, trademark holders are encouraged to fill out an online form or call the CBP with any intelligence information they may have. See E-Allegations: Online Trade Violation Reporting System, Customs & Border Prot. (CBP), <https://apps.cbp.gov/eallegations/> (last visited June 8, 2012).

n98. See, e.g., E-Allegations Frequently Asked Questions, U.S. Customs & Border Prot., http://cbp.gov/xp/cgov/trade/trade_programs/e_allegations/e_allegations_faq.xml (last visited June 8, 2012) ("Q: Will I be able to find out the status of an e-Allegation I submit? A: In most cases, Privacy Act and Trade Secrets Act laws prevent CBP from disclosing the results of any research conducted as the result of an e-Allegation."). Trademark holders that are able to afford to train CBP officers and agents may often see products that infringe their trademarks detained more often. See, e.g., Timothy P. Trainer & Vicki E. Allums, Customs Enforcement of Intellectual Property Rights 25-30 (2011) (discussing training of CBP by trademark holders and advising that training will increase the effectiveness of CBP efforts on their behalf).

n99. See 19 C.F.R. §§133.3-133.7. Trade names are also allowed to be recorded with the CBP. See 19 C.F.R. §§133.11-133.15.

n100. See U.S. Customs & Border Prot., Protecting Intellectual Property Rights at Our Borders, Publication No. 0105-0909 ("How Can Right Holders Protect Themselves from Counterfeiting and Piracy? For maximum protection, right holders should: ... Familiarize customs officials with their intellectual property through product identification training guides and/or customs officials training.").

n101. ACTA, *supra* note 16, art. 22(c).

n102. See Customs Directive, *supra* note 97, at 5.1.

n103. See *id.* at 5.2.

n104. ACTA, *supra* note 16, art. 17(1).

n105. See Eric Goldman, Online Word of Mouth and Its Implications for Trademark Law, in *Trademark Law and Theory* 404, 414 (Graeme B. Dinwoodie & Mark D. Janis eds., 2008). Some courts require plaintiffs to establish an additional element for a prima facie case of trademark infringement, that of "commercial use" of the trademark. See Lisa P. Ramsey, Brandjacking on Social Networks: Trademark Infringement by Impersonation of Markholders, 58 *Buff. L. Rev.* 851, 885 (2010) ("Appellate courts in some circuits hold the use in connection with goods, services, or commercial activities language in the infringement statutes also implicitly requires the markholder to establish 'commercial use' of the mark for a prima facie infringement claim.").

n106. The definition of "unauthorized use" has been the subject of a lengthy debate among the scholarly community, with scholars arguing for and against a "trademark use" requirement in infringement cases. See generally Margreth Barrett, Internet Trademark Suits and the Demise of "Trademark Use," 39 *U.C. Davis L. Rev.* 371 (2006) (arguing for such a rule); Graeme B. Dinwoodie & Mark D. Janis, Confusion Over Use: Contextualism in Trademark Law, 92 *Iowa L. Rev.* 1597 (2007) (arguing against a bright-line rule of trademark use); Graeme B. Dinwoodie & Mark D. Janis, Lessons from the Trademark Use Debate, 92 *Iowa L. Rev.* 1703 (2007); Stacey L. Dogan & Mark A. Lemley, Grounding Trademark Law Through Trademark Use, 92 *Iowa L. Rev.* 1669 (2007) (arguing for such a bright-line rule). For a good discussion of the current status of a "trademark use" requirement by courts, see Ramsey, *supra* note 105, at 890-94.

n107. See 15 U.S.C. § 1115 (2006) (listing defenses to trademark infringement).

n108. See, e.g., *Smith v. Chanel, Inc.*, 402 F.2d 562, 562-63 (9th Cir. 1968) (involving defendant's use of plaintiff's trademark "Chanel No. 5" on brochures and invoices).

n109. See *id.* at 570 (holding that "where, as here, the appellants have done all that could reasonably be expected to avoid confusion, the speculative possibility of deliberate fraud by third persons is not a sufficient basis for injunctive relief"); *New Kids on the Block v. News Am. Pub., Inc.*, 971 F.2d 302, 309 (9th Cir. 1992) (holding that nominative fair use is an appropriate defense to trademark infringement).

n110. The specific number of factors varies from circuit to circuit. See Barton Beebe, An Empirical Study of the Multifactor Tests for Trademark Infringement, 94 *Calif. L. Rev.* 1581, 1582-84 (2006); see also Graeme B. Dinwoodie & Mark D. Janis, *Trademarks and Unfair Competition: Law and Policy* 506-08 (3d ed. 2010) (listing the circuits and the respective tests).

n111. See Ann Bartow, Likelihood of Confusion, 41 *San Diego L. Rev.* 721, 745 (2004) ("Whether a mark accused of infringing another mark is similar enough to constitute an actionable colorable imitation is a subjective decision that courts make and is usually articulated as a judgment about whether the contemporaneous coexistence of the marks underlying the dispute is likely to cause consumer confusion.").

n112. ACTA, *supra* note 16, art. 17(1) (emphasis added).

n113. See *infra* Part V.B.1.

n114. ACTA, *supra* note 16, art. 17(1).

n115. *Id.* art. 18.

n116. *Id.*

n117. *Id.* art. 21.

n118. See Edward Lee, *The Global Trade Mark 17* (April 4, 2011) (unpublished manuscript), available at http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1804985 (stating the rationale for setting the application fee at \$ 5,000).

n119. This assumes that a majority of small businesses are "followers" of large businesses and sell products that may imitate popular or famous products, such as look-alike designs of clothing, which may be similar to the original but not trademark infringing or counterfeit products. See *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 207-08 (2000) (involving a case where plaintiff sued designer and Wal-Mart for allegedly infringing the clothing design of plaintiff).

n120. See *infra* Part IV.A.

n121. See *infra* Part IV.B.

n122. See, e.g., Raice, *supra* note 1 ("Mr. Bernanke noted that small businesses are essential to job creation, saying that data show that small firms employ roughly one-half of all Americans and account for about 60% of job creation.").

n123. See *supra* Part III.B.1.

n124. 15 U.S.C. §§1051-1124 (2006).

n125. 19 U.S.C. §§1001-1654 (2006).

n126. 15 U.S.C. § 1124 (2006).

n127. 19 U.S.C. § 1526(a) (2006).

n128. See Intellectual Property Rights, *supra* note 97 (describing its role as one that "protects businesses and consumers every day through an aggressive IPR enforcement program[, whereby] CBP targets and seizes imports of counterfeit and pirated goods").

n129. See Keith M. Stolte, Note, If It Walks Like a Duck: A Proposal to Unify U.S. Customs' Treatment of Infringing Imports, 29 J. Marshall L. Rev. 711, 747 n.180 (1996).

n130. Other commentators have argued similarly, although with a different goal in mind. See, e.g., *id.* at 746.

n131. See, e.g., Intellectual Property Rights, *supra* note 97.

n132. U.S. Customs & Border Prot., Trade, Priority Trade Issues, Intellectual Property Rights, Overview of IPR Enforcement: A Priority Trade Issue (on file with author; webpage no longer available).

n133. See *id.*

n134. Protecting Intellectual Property Rights at Our Borders, *supra* note 100.

n135. At least one American industry group, the Intellectual Property Owners Association, believes similarly. See Letter from Douglas K. Norman, President, Intell. Prop. Owners Ass'n, to The Hon. Ron Kirk, Ambassador, U.S. Trade Representative (Jun. 25, 2010) [hereinafter IPO June Letter], available at <http://www.ipo.org/AM/Template.cfm?Section=Home&template=/CM/ContentDisplay.cfm&ContentID=26212> ("ACTA is unwittingly broadening the scope of the seizure power of Customs and Border Patrol forces to encompass civil action trademark infringement" (emphasis added)).

n136. Compare 19 C.F.R. § 133.21 (2011) (counterfeit), with *id.* § 133.22 (copying or simulating) (2011).

n137. See 15 U.S.C. § 1124 (2006).

n138. See 19 U.S.C. § 1526(e) (2006). This provision was added by amendment in 1978. See Customs Procedural Reform and Simplification Act of 1978, Pub. L. No. 95-410, 92 Stat. 888, 903 (1978).

n139. See Tariff Act of 1930, Pub. L. No. 71-361, 46 Stat. 590, 741 (1930).

n140. Customs Directive, *supra* note 96, at 4.1 ("Agency policy dictates that U.S. Customs focus its enforcement efforts on trademarks and trade names that are 'recorded' with Customs.").

n141. Compare *id.* at 4.3.4.2, with *id.* at 4.3.6.2.

n142. *Id.* at 4.3.4.2.

n143. *Id.* at 4.3.6.2.

n144. One example may be generic medicines. See Ruse-Khan, *supra* note 92, at 676 ("Imposing this task [referring to the determination of likelihood of confusion analysis] on customs officers is likely to result in a considerable increase in seizures and temporary detentions based on right holder allegations that transiting generics are confusingly similar.").

n145. See U.S. Census Bureau News, *supra* note 78, at 15 (stating that the total number of identified importers in 2009 was 179,831, with 5,219 importers having 500 or more employees).

n146. See *id.* The U.S. Census Bureau reports on those U.S. companies that can be linked to import transactions.

n147. It is hard to determine how many small businesses operate in the private label manufacturing market. However, among the fourteen member board of directors of the Private Label Manufacturers' Association, at least three board members represent small businesses. See Press Release, Private Label Manufacturer's Association, Tom Chaffee of Sturm Foods Elected to Second Term as Chairman of PLMA Board of Directors, http://plma.com/share/press/FOR_IMMEDIATE_RELEASE/PLMA_Board_of_Directors%E2%80%952011_Election.pdf (listing Bill Bond from Willert Home Products, Philip Shaoul from Global Tissue Group, and Quentin Filippo from ASO LLC as board members). Willert Home Products employs approximately 380 employees. See Willert Home Products Company Profile, Hoovers, http://www.hoovers.com/company/Willert_Home_Products_Inc/rtryfri-1.html (last visited June 8, 2012). Global Tissue Group has approximately fifty employees. See Global Tissue Group Company Profile, Manta, <http://www.manta.com/c/mm3s544/global-tissue-group-inc> (last visited June 8, 2012). ASO LLC employs approximately 240 employees. See ASO LLC Company Profile, Manta, <http://www.manta.com/c/mm3jrfd/aso-llc> (last visited June 8, 2012).

n148. See What Are Store Brands?, Private Label Mfr. Ass'n, <http://plma.com/storeBrands/facts11.html> (last visited June 8, 2012) ("Store brands ... are products that stores put their own names or brands on. They may also be called private label, house brands, own brands or retailer brands ...").

n149. See, e.g., *Wal-Mart Stores, Inc. v. Samara Bros.*, 529 U.S. 205, 207-08 (2000) (trademark infringement case involving product design similar to that of plaintiffs).

n150. For example, the well-known trademark may be used as a point of comparison with the lesser known trademark. See, e.g., *Smith v. Chanel, Inc.* 402 F.2d 562 (9th Cir. 1968).

n151. See *supra* Part III.B.

n152. U.S. Census Bureau, 2007 Survey of Business Owners (2007), http://factfinder2.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=SBO_2007_00CSCB07&prodType=table.

n153. See Chad Moutray, *Baccalaureate Education and the Employment Decision: Self-Employment and the Class of 1993*, at 30 tbl.6 (Office of Advocacy, U.S. Small Bus. Admin., unnumbered working paper, 2008), available at <http://archive.sba.gov/advo/research/rs333tot.pdf> (indicating that only 8.3% of self-employed citizens had attained a professional degree). While a small percentage of small-business owners have a graduate degree, it is likely that not all of these graduate degrees are law degrees.

n154. Unlike patent attorneys, who are admitted to practice before the U.S. Patent & Trademark Office, trademark attorneys need no special qualification or admittance in order to prosecute or litigate trademark matters. Therefore, it is difficult to estimate the number of trademark attorneys in the United States; however, in 2010, there were approximately 2,218 U.S.-based attorneys who were members of the International Trademark Association, the largest trademark organization. See Int'l Trademark Assoc., *Membership Directory 2010* (on file with author).

n155. Incomes for the average American household fell 4.8% between 2000 and 2009. See Conor Dougherty & Sara Murray, *Lost Decade for Family Income*, *Wall St. J.*, Sept. 17, 2010, <http://online.wsj.com/article/SB10001424052748703440604575495670714069694.htm>.

n156. See David K. Randall, In Pictures: Five Common Financial Mistakes Small Businesses Make, *Forbes*, at slide 2 (Apr. 30, 2009), http://www.forbes.com/2009/04/30/moneybuilder-start-business-personal-finance-starting_slide_2.html.

n157. Properly funding a new small business is crucial, as the small business will need to draw upon the start-up funds in the beginning days of the business, when it is trying to attract customers. See *id.*

n158. See *id.*, at slide 5.

n159. See *id.*, at slide 6.

n160. See Commissioner's Staff Offices, U.S. Customs and Border Prot., http://cbp.gov/xp/cgov/about/organization/comm_staff_off/ (last visited June 8, 2012); Assistant Commissioners' Offices, U.S. Customs and Border Prot., http://cbp.gov/xp/cgov/about/organization/assist_comm_off/ (last visited June 9, 2012).

n161. See, e.g., About Us, St. Louis Volunteer Law. & Acct. for the Arts, <http://www.vlaa.org> (last visited June 9, 2012); Intellectual Property and Nonprofit Organizations Clinic, Wash. U. L. Sch., <http://law.wustl.edu/ClinicalEd/pages.aspx?id=6835> (last visited June 9, 2012).

n162. For example, the Intellectual Property and Nonprofit Organizations Clinic at Washington University Law School divides its activities into four category areas, with none of the categories seemingly a match for a small business with an intellectual property/customs issue. See Intellectual Property and Nonprofit Organizations Clinic, *supra* note 161 (listing coursework, early stage legal advice to innovators and entrepreneurs, entity formation of nonprofit organizations, and research at local area organizations).

n163. See Customs Directive, *supra* note 96, at 4.2.1 ("Customs policy mandates that suspect trademark-violative goods can only be detained upon a 'reasonable suspicion' that said goods bear marks which violate a federally registered trademark.").

n164. See 19 U.S.C. § 1499(c)(1) (2006) ("Within the 5-day period (excluding weekends and holidays) following the date on which merchandise is presented for customs examination, the Customs Service shall decide whether to release or detain the merchandise."); see

also Customs Directive, *supra* note 96, at 4.2.2 ("Where a Customs officer is unsure whether to formally detain the goods at the time of presentation to Customs, he may detain the goods for a 5-day period pursuant to 19 U.S.C. § 1499 to determine whether such "reasonable suspicion" exists.').

n165. See 19 U.S.C. § 1499(c)(2) (2006) ("The Customs Service shall issue a notice to the importer or other party having an interest in detained merchandise no later than 5 days, excluding weekends and holidays, after the decision to detain the merchandise is made."); see also Customs Directive, *supra* note 96, at 4.2.3 ("If Customs determines that such "reasonable suspicion" exists, Customs shall issue a formal letter of detention to the importer before the expiration of the 5-day period.").

n166. See 19 C.F.R. § 133.25(a) (2011) ("The importer may, during the 30-day period, establish that any of the circumstances described in § 133.22(c) or § 133.23(d) are applicable.").

n167. See 19 C.F.R. § 133.22(c)(1) ("The objectionable mark is removed or obliterated as a condition to entry in such a manner as to be illegible and incapable of being reconstituted ... ").

n168. See 19 C.F.R. § 133.22(c)(2) ("The merchandise is imported by the recordant of the trademark or trade name or his designate ... ").

n169. See 19 C.F.R. § 133.22(c)(3) ("The recordant gives written consent to an importation of articles otherwise subject to the restrictions set forth in paragraph (b) of this section or § 133.23(c) of this subpart, and such consent is furnished to appropriate Customs officials ... ").

n170. See 19 C.F.R. § 133.22(c)(4) ("The articles of foreign manufacture bear a recorded trademark and the one-item personal exemption is claimed and allowed under § 148.55 of this chapter."). The personal exemption contains a couple of limitations, the first being that a person importing an otherwise infringing product is limited to "one article of the type bearing a protected trademark" and second, that the importation of the same type of product can only occur once within thirty days. See 19 C.F.R. § 148.55(b)-(c).

n171. See 19 C.F.R. § 133.22(f) ("If the importer has not obtained release of detained articles within the 30-day period of detention, the merchandise shall be seized and forfeiture proceedings instituted.").

n172. See ACTA, *supra* note 16, art. 19.

n173. See Japan-U.S. Joint Proposal Border Measures, *supra* note 74, at 6-7 ("Comment: The language should refer to launching a determination within a reasonable period of time, rather than making a determination within a reasonable period of time.").

n174. See 19 C.F.R. § 133.22(c)(1).

n175. ACTA, *supra* note 16, art. 20(1).

n176. See Letter from Stewart Baker, Assistant Sec'y for Pol'y, U.S. Dep't of Homeland Security, to The Hon. Susan C. Schwab, Ambassador, Officer of the U.S. Trade Rep. (Aug. 7, 2008), available at http://keionline.org/sites/default/files/steward_baker_schwab_7aug2008.pdf.

n177. Article 20 of ACTA is very similar to the language found in TRIPS Articles 46 and 59, which was the subject of interpretation by a WTO dispute panel in the 2009 United States-China intellectual property dispute. The WTO Panel found that "exceptional cases" meant "'of the nature of or forming an exception; unusual, out of the ordinary; special ...'" See Panel Report, China - Measures Affecting the Protection and Enforcement of Intellectual Property Rights, P 7.390, WT/DS362/R (Jan. 26, 2009) (citing 1 New Shorter Oxford English Dictionary 872 (1993)). In addition, the Panel stated, "such cases must be narrowly circumscribed in order to satisfy the description of 'exceptional.' Even when narrowly circumscribed, application of the relevant provision must be rare, lest the so-called exception become the rule, or at least ordinary." See *id.* P 7.391.

n178. See, e.g., *Harlow & Jones, Inc. v. Advance Steel Co.*, 424 F. Supp. 770, 772 (E.D. Mich. 1976) (litigating the rejection by defendant of final delivery due to defendant's contention that the contract provided for timely delivery).

n179. See, e.g., *Melford Olsen Honey, Inc. v. Adeo*, 452 F.3d 956, 967 (8th Cir. 2006); *Latex Equip. Sales & Serv., Inc. v. Apache Mills, Inc.*, 484 S.E.2d 274, 277 (Ga. Ct. App. 1997); *Borah v. McCandless*, 205 P.3d 1209, 1218-19 (Idaho 2009).

n180. Coverage will depend on how the insurance company interprets a customs detention or seizure and forfeiture situation, and whether

that interpretation fits within the insurance policy. See generally Ernest Martin, Jr., et al., *Insurance Coverage for the New Breed of Internet-Related Trademark Infringement Claims*, 54 SMU L. Rev. 1973, 1983-2004 (2001) (discussing interpretation of commercial general liability insurance policies and trademark infringement claims).

n181. See *Buying Insurance, Five Tips for Buying Business Insurance*, Small Bus. Admin., <http://www.sba.gov/content/buying-insurance> (last visited June 15, 2012) ("Generally, the higher deductible you agree to pay, the lower your premium will be.").

n182. See *id.* ("However, when you agree to take on a high deductible you are taking on some financial risk.").

n183. See generally *Choosing Your Specialty Insurance*, Nat'l Fed'n of Indep. Bus., <http://www.nfib.com/business-resources/business-resources-item/cmsid/20385/amp%3bv/1> (last visited June 15, 2012).

n184. Mandatory insurance usually includes worker's compensation and unemployment insurance. See *Insurance Requirements for Employers*, Small Bus. Admin., <http://www.sba.gov/content/insurance-requirements-employers> (last visited June 15, 2012). For example, in Missouri, any business that employs five or more employees is required to carry worker's compensation insurance, with a construction business required to carry such insurance where they employ one or more employees. See *Worker's Compensation Insurance*, Mo. Dep't of Labor, <http://www.labor.mo.gov/DWC/Employers/insurance.asp> (last visited June 15, 2012). In Missouri, unemployment insurance is also required for general businesses in certain circumstances, including where \$ 1,500 or more in wages are paid in any calendar quarter or where the business has an employee for any part of a day in each of twenty different weeks. See *Liability for Missouri Unemployment Insurance Tax*, Mo. Dep't of Labor, <http://www.labor.mo.gov/DES/Employers/liability.asp> (last visited June 15, 2012).

n185. See Charles J. Fombrun & Cees B.M. Van Riel, *Fame & Fortune: How Successful Companies Build Winning Reputations* 3-4 (2004) (explaining that reputations are used by people to decide what to purchase and which businesses to invest in).

n186. See *Frequently Asked Questions*, *supra* note 3.

n187. See generally Grinvald, *Shaming Trademark Bullies*, *supra* note 19.

n188. See *id.* at 642. Cf. 156 Cong. Rec. S349 (daily ed. Jan. 28, 2010) (statement of Sen. Leahy) ("When a corporation exaggerates the scope of its rights far beyond a reasonable interpretation in an attempt to bully a small business out of the market, that is wrong.").

n189. See generally Bollier, *supra* note 49 (documenting various bullying campaigns).

n190. See Grinvald, *Shaming Trademark Bullies*, *supra* note 19, at 632 ("Although merely expanding the law to provide stronger protection to trademark owners does not, in and of itself, cause bullying, simultaneous developments have assisted in incentivizing bullying, including increased protection given to strong or famous trademarks and a lack of meaningful developments to assist those accused of trademark infringement."); see also Deven R. Desai & Sandra L. Rierison, *Confronting the Genericism Conundrum*, 28 *Cardozo L. Rev.* 1789, 1791 (2007).

n191. Although all businesses (small or large) may be impacted by ACTA's empowerment of trademark bullies, the focus of this Article is on small businesses due to their lack of resources and extra vulnerability to enhanced border measures.

n192. See *infra* Part V.A.

n193. See *infra* Part V.B.

n194. See ACTA, *supra* note 16, arts. 16(1) and 17. See discussion of Articles 16(1) and 17 *supra* Parts III.B.2 & III.B.4.

n195. See *supra* Part II.

n196. See ACTA, *supra* note 16, arts. 16(1), 17.

n197. If the CBP excludes mere trademark infringement from its implementation of ACTA and provides educational outreach to small businesses, this provision could provide a benefit to small businesses who are victims of counterfeiting. One of these benefits would be a lowered cost of trademark enforcement against counterfeiters through the CBP. Large businesses are not the only entities that need to be worried about counterfeiters - businesses of all sizes may be victims. See About the Small Business Education Campaign, Stopfakes.gov/smallbusiness, <http://www.uspto.gov/smallbusiness/about/> (last visited June 15, 2012) ("Piracy, counterfeiting and the theft of intellectual property pose a serious threat to all U.S. businesses.").

n198. Cf. Kaminski, *supra* note 75, at 442 (arguing that ACTA on the whole shifts costs from right holders to governments): Stewart Baker, When DHS Questioned ACTA, The Volokh Conspiracy (Apr. 27, 2011, 9:13 PM) (stating (in an article by Stewart Baker, who was the Assistant Secretary for Policy at the Department of Homeland Security at the time ACTA was being negotiated) that "in the Bush Administration, [the Department of Homeland Security] didn't much like ACTA, at least as it was then drafted. It seemed like a sweetheart deal for a few intellectual property owners, who'd get free government enforcement of their private rights, potentially to the detriment of security and traditional customs enforcement").

n199. See ACTA, *supra* note 16, art. 17(2) ("Each Party shall provide for applications to suspend the release of, or to detain, any suspect goods under customs control in its territory. A Party may provide for such applications to apply to multiple shipments. A Party may provide that, at the request of the right holder, the application to suspend the release of, or to detain, suspect goods may apply to selected points of entry and exit under customs control.").

n200. Many large corporations engage outside law firms to write and send cease and desist letters. See, e.g., Letter from Diane Reed to Christopher J. Day, *supra* note 48.

n201. For example, Apple and Fossil have advertised for in-house positions that oversee brand protection management. See Apple, Senior IPR Investigator - Apple (on file with author; webpage no longer available) (advertising for senior intellectual property rights investigator with needed experience in customs procedures); Fossil, Careers, Legal Assistant (on file with author; webpage no longer available) (advertising for paralegal who will coordinate anti-counterfeiting measures). See generally Ginny Han, *Lenovo's Brand Management Strategy - Promotion and Protection*, China Intell. Prop. (Dec. 2007), <http://www.chinaipmagazine.com/en/journal-show.asp?id=267> (discussing Lenovo's brand management strategy, where the brand communication department is independent of the legal department); Ken Taylor, *Using the "P" Word. The Inside Scoop on Pretext Investigations 1, 8-9* (May 8, 2008) (unpublished manuscript) (discussing the ethical issues with attorneys conducting trademark infringement investigations and advocating the use of private investigation firms), available at <http://www.alabar.org/sections/intellectualproperty/pdf/KenTaylor-PretextInvestigations.pdf>.

n202. See Salary Wizard: Product/Brand Manager, Salary.com, <http://swz.salary.com/SalaryWizard/Product-Brand-Manager-Salary-Details.aspx> (last visited June 15, 2012).

n203. See Cheryl L. Hodgson, *When Enforcement Becomes Bullying*, World Trademark Rev., June-July 2010, 73, 76.

n204. See Am. Intellectual Prop. Law Ass'n, Report of the Economic Survey 25 (2007).

n205. See Callahan, *supra* note 47, at 2, 7-8.

n206. See *Mattel, Inc. v. Walking Mountain Prods.*, No. CV99-8543RSWL(RZX), 2004 WL 1454100, at 4 (C.D. Cal. June 21, 2004) (awarding defendant \$ 1,584,089 in legal fees and \$ 241,797.09 in costs), *aff'd*, 353 F.3d 792 (9th Cir. 2003). Mattel Corporation attempted to bully artist Tom Forsythe from using Barbie dolls in his artwork by filing a lawsuit against him. See Bollier, *supra* note 49, at 83, 89-93; Food Chain Barbie and the Fight for Free Speech, *Artsurdist: Photographic Art*, <http://www.tomforsythe.com/the-fight-for-free-speech.html> (last visited June 16, 2012). Forsythe had created the "Food Chain Barbie" photography series, which depicted naked Barbie dolls in various kitchen and food-oriented situations. See Food Chain Barbie-Supergloss-Edition of 20, *Artsurdism: Photographic Art*, <http://www.tomforsythe.com/food-chain-barbie---supergloss.html> (last visited June 15, 2012). The Ninth Circuit district and appellate courts ruled in favor of Forsythe, with the decision of the Ninth Circuit Court of Appeals stating: "The public interest in free and artistic expression greatly outweighs its interest in potential consumer confusion about Mattel's sponsorship of Forsythe's works." *Mattel, Inc. v. Walking Mountain Prods.*, 353 F.3d 792, 807 (9th Cir. 2003).

n207. See ACTA, *supra* note 16, art. 17(2).

n208. See 19 C.F.R. § 133.22(e) (2011) (outlining procedure for obtaining release of detained shipment).

n209. See Julie A. Katz, *The Long and Winding Road: Successful Trademark Litigation in the United States*, *Intell. Asset Mgmt. Mag.* 44, 45 (Brands in the Boardroom 2009).

n210. See *supra* Part IV.B.

n211. The appropriate place to appeal depends on whether the CBP "excluded" the importer's shipment or "seized" the shipment. See *Stuhlbarg Int'l Sales Co. v. John D. Brush & Co.*, 240 F.3d 832, 836 (9th Cir. 2001); *H & H Wholesale Servs., Inc. v. United States*, 437 F. Supp. 2d 1335, 1340 (Ct. Int'l Trade 2006). If an appeal is inappropriately filed, a later court may vacate any judgment based on lack of subject matter jurisdiction. See *Sakar Int'l, Inc. v. United States*, 516 F.3d 1340, 1341-42 (Fed. Cir. 2008) (vacating judgment of the Court of

International Trade for lack of subject matter jurisdiction).

n212. See *Stuhlbarg Int'l Sales Co.*, 240 F.3d at 836; *H & H Wholesale Servs.*, 437 F. Supp. 2d at 1340.

n213. See *Sakar Int'l, Inc.*, 516 F.3d at 1341-42.

n214. See ACTA, *supra* note 16, art. 22(b).

n215. See 19 C.F.R. § 133.25(b) (2011).

n216. See *id.*

n217. In fact, a recent Ninth Circuit case deemed the information contained in the CBP Notice of Seizures "trade secrets" and exempt under the Freedom of Information Act. See *Watkins v. U.S. Bureau of Customs and Border Protection*, 643 F.3d 1196 (9th Cir. 2011). Although *Watkins* was primarily a case about counterfeit goods, the court acknowledged that "importers of non-counterfeit goods ... zealously guard their supply chain." See *id.* at 1196.

n218. ACTA, *supra* note 16, art. 22(b).

n219. *Id.*

n220. See Customs Directive, *supra* note 96, at 5.2 ("When articles are subject to the restrictions under 19 CFR § 133.22, Customs officers MAY disclose to the trademark holder the following information prior to the time that a detention notice is issued under 19 CFR § 133.25.").

n221. ACTA, *supra* note 16, art. 22(b) (emphasis added).

n222. This may not be too far afield. In 1995, the CBP expanded the scope of information provided to trademark holders for merely infringing shipments. See Copyright/Trademark/Trade Name Protection; Disclosure of Information, 60 Fed. Reg. 36249, 36251 (July 14, 1995) (codified at 19 C.F.R. §§133.22, 133.23(a), 133.42-.43).

n223. See, e.g., *Gilda Indus., Inc. v. United States Customs & Border Prot. Bureau*, 457 F. Supp. 2d 6, 11 (D.D.C. 2006) (finding that disclosure of information related to "sources of supply," "product lines," and "supply chains" to provide competitive advantages to competitors by, "for example, arrogating another company's exclusive source of supply").

n224. These products may or may not be infringing.

n225. See James Fallows, *China Makes, the World Takes*, *The Atlantic*, July-Aug. 2007, at 48, 48-50 (describing that Guangzhou, China, has become the world's manufacturing center); Forrest Jones, *China Ousts US as World's Top Manufacturer*, *MoneyNews* (Mar. 14, 2011, 9:39 AM), <http://www.moneynews.com/StreetTalk/China-Ousts-US-World/2011/03/14/id/389350> ("China is now the world's top manufacturer in terms of output, ousting the U.S. from the top spot ...").

n226. One long-noted problem with the enforcement of intellectual property laws (including trademark laws) in China has been corruption. See *Protecting Your Intellectual Property Rights (IPR) in China*, [export.gov](http://www.export.gov), <http://www.export.gov/china/doingbizinchina/riskmanagement/ipr/index.asp> (last visited June 15, 2012). Although bribing local authorities would be illegal for an American corporation under the Foreign Corrupt Practices Act, local authorities could be "persuaded" in non-monetary methods, such as entertainment or even business referrals. See Daniel Chow, *China Under the Foreign Corrupt Practices Act*, 2012 *Wis. L. Rev.* 573, 589-90.

n227. Hinkelman, *supra* note 20, at 199-207 (discussion of entry procedures with respect to shipments).

n228. An injunction typically means that the defendant needs to cease production and sales of the infringing product(s). In addition, through discovery, it is likely that the defendant's supply chain details would be made available to the plaintiff. See, e.g., Marcy J. Bergman,

Trademark Infringement Litigation Primer, in *Understanding Trademark Law*, supra note 38, at 255, 281-82 (providing sample listing of questions to consider for discovery, including "What information is the manufacturer/producer likely to have on key subjects such as intent to copy and design?" and "What is their relationship with the party and scope of involvement?").

n229. *EBay, Inc. v. MercExchange, L.L.C.*, 547 U.S. 388, 391 (2006). Although eBay dealt with a patent infringement and permanent injunction situation, the Second Circuit has stated in dicta that eBay would extend to any case, regardless of the type of intellectual property involved or whether the requested injunction was permanent or temporary. See *Salinger v. Colting*, 607 F.3d 68, 78 n.7 (2d Cir. 2010) (applying eBay in copyright infringement case involving preliminary injunction and stating, in dicta, "although today we are not called upon to extend eBay beyond the context of copyright cases, we see no reason that eBay would not apply with equal force to an injunction in any type of case").

n230. See *e Bay, Inc.*, 547 U.S. at 391.

n231. Although the percentage of detained shipments that are found to be non-infringing is not reported by the CBP, see *Stolte*, supra note 128, at 747 n.180, it could be argued that the potential for an erroneous determination of infringement is higher with CBP field officers making the determination, than with a judge. One of the reasons for this potential is that it is unclear how the likelihood of confusion test is applied by CBP field officers, as well as whether defenses to trademark infringement are applied at all. Both of these factor greatly into a correct determination of trademark infringement. See supra Part II.A.

n232. See supra notes 211-213 and accompanying discussion.

n233. See supra Part II.B.4.

n234. ACTA, supra note 16, art. 17(1).

n235. *Id.*

n236. *Id.* art. 18.

n237. *Id.* art. 21.

n238. See, e.g., Senior IPR Investigator - Apple, *supra* note 201. Cf. Taylor, *supra* note 201, at 9 (advocating for the use of private investigators).

n239. See Marksmen, Trademark Investigations, Services and Fees (on file with author).

n240. Currently, bonds are assessed by the CBP where a trademark holder requests a sample of an infringing product. According to the CBP guidelines, "The bond is normally set at 120 percent (120%) of the CIF value of the sample, plus duty and other applicable fees (but not lower than \$ 100)." Customs Directive, *supra* note 96, at 5.2.2. The acronym "CIF" refers to the "cost, insurance and freight price." See U.N. Dep't of Econ. & Soc. Affairs, International Merchandise Trade Statistics: Concepts and Definitions, at 9, U.N. Doc. ST/ESA/52, U.N. Sales No. E.98.XVII.16 (1998).

n241. ACTA, *supra* note 16, art. 17(4).

n242. *Id.*

n243. See *id.* art. 17(2) ("A Party may provide for such applications to apply to multiple shipments. A Party may provide that, at the request of the right holder, the application to suspend the release of, or to detain, suspect goods may apply to selected points of entry and exit under customs control.").

n244. See Locate a Port of Entry - Air, Land, or Sea, CBP.gov, <http://www.cbp.gov/xp/cgov/toolbox/contacts/ports/> (last visited June 16, 2012).

n245. See sources cited *supra* note 22.

n246. IPO June Letter, *supra* note 135, at 2; Letter from Douglas K. Norman, President, Intell. Prop. Owners Ass'n, to The Hon. Ron Kirk, Ambassador, U.S. Trade Representative (Feb. 15, 2011), available at <http://www.ipo.org/AM/Template.cfm?Section=Home&ContentID=28568&template=/CM/ContentDisplay.cfm> [hereinafter IPO February Letter].

n247. See IPO June Letter, *supra* note 135, at 2.

n248. See IPO February Letter, *supra* note 246, at 2.

n249. See *id.*

n250. See *id.*

n251. See generally Ruse-Khan, *supra* note 92.

n252. See *id.* at 677-81, 695-703.

n253. ACTA, *supra* note 16, art. 6(1).

n254. *Id.* art. 13.

n255. *Id.*

n256. With respect to Article 13, Ruse-Khan states,

Here, access to medicines and international trade in generic medicines and other goods can serve as justifications to exclude ordinary trademark infringements, especially if the country has introduced border measures against goods in transit. The chapeau provision in Article 13 therefore allows for the exclusion of those types of infringements from a domestic system of border measures that are particularly problematic for generic drugs in transit.

See Ruse-Khan, *supra* note 92, at 680-81. With respect to Article 6(1), Ruse-Khan relies on a normative understanding of the term "legitimate" in this phrase, which means that "any enforcement procedures that create barriers to trade for which a justifiable public policy exists or which are supported by other social norms would be considered as "barriers to legitimate trade." See *id.* at 699. The justifiable public policy that underlies Ruse-Khan's argument is access to medicines, which is a public policy generally upheld in both the exporting and importing countries. See *id.* at 700.

n257. See *id.* at 701 ("If this insight is applied to the understanding of 'legitimate trade' advocated here, ACTA Article 6(1) will prohibit seizures of goods in transit as a barrier to legitimate trade whenever the trade in these goods can be justified by a public policy in the country of origin or the country of destination.").

n258. See *id.* at 678-79; see also Henning M. Grosse Ruse-Khan, *The Role of Chairman's Statements in the WTO*, 41 *J. of World Trade* 475, 491-92 (2007).

n259. See Ruse-Khan, *supra* note 92, at 678-79.

n260. See *id.* at 679 ("While this constructive ambiguity may have been primarily created to allow the negotiating parties to take different approaches to address infringements of geographical indications, it may equally serve as an appropriate tool to exclude ordinary trademark infringements from a national system of border measures.").

n261. See *supra* Part IV.

n262. See Fallows, *supra* note 225 ("Americans complain about cheap junk pouring out of Chinese mills, but they rely on China for a lot that is not junk, and whose cheap price is important to American industrial and domestic life.").

n263. See *supra* Part IV.B.

n264. See Ben S. Bernanke, Chairman, Bd. Gov. Fed. Res. Sys., Remarks at the Federal Reserve Meeting Series: "Addressing the Financing Needs of Small Businesses": Restoring the Flow of Credit to Small Businesses (July 12, 2010), available at <http://www.federalreserve.gov/newsevents/speech/bernanke20100712a.pdf>.

n265. See What SBA Offers to Help Small Businesses Grow, U.S. Small Business Administration, <http://www.sba.gov/content/what-sba-offers-help-small-businesses-grow> (last visited June 6, 2012).

n266. See Press Release, Office of U.S. Trade Rep., *supra* note 8.

n267. See ACTA, *supra* note 16, art. 6(1).

n268. Whether similar detention procedures should apply to shipments of counterfeit products, even if requested by trademark holders, is bracketed for now.

n269. See 19 C.F.R. §§133.22, 133.25 (2011)

n270. See Customs Directive, *supra* note 96, at 4.2.2.

n271. See 19 C.F.R. §§133.22, 133.25.

n272. See *id.*

n273. The language of 19 C.F.R. § 133.22 seems to indicate that the importer will not be able to obtain a release of her goods prior to the thirty days. See 19 C.F.R. § 133.22(c) ("Articles subject to the restrictions of this section shall be detained for 30 days from the date on which the goods are presented for Customs examination" (emphasis added)).

n274. As discussed above, the CBP procedures do not contemplate direct involvement by trademark holders. See *supra* Part IV.

n275. Cf. William E. Ridgway, Comment, Revitalizing the Doctrine of Trademark Misuse, 21 Berkeley Tech. L.J. 1547, 1569 (2006) (arguing for an adoption of a "trademark misuse" cause of action in order to impose costs on trademark enforcement, thereby limiting abuse).

n276. One assumption underlying this suggestion is that most trademark bullies are unlikely to file a lawsuit against its victims. As this assumption will not be correct all the time, this requirement does pose a risk of greater lawsuits brought by those trademark bullies who litigate any and all disputes, sometimes in a desire to gain a reputation for being a "bully." See Hodgson, *supra* note 203, at 76 ("A reputation as a bully can actually be seen as a positive for less socially conscious trademark owners - they can not only potentially monopolize the word as a mark, but also gain fame by becoming infamous."). However, one proposal that has been proffered to assist small businesses and individuals with a speedier and less expensive mode of litigation is to create an intellectual property-type of small claims court. See Goldman, *supra* note 5 (making recommendations to assist with overcoming trademark bullying, including "a small claims IP court where low-stakes disputes could be adjudicated more cheaply than full-scale litigation").

n277. See TRIPS Agreement, *supra* note 11, at 1218; EC Council Regulation No. 1383/2003.

n278. See TRIPS Agreement, *supra* note 11, at 1217 (the scope of border measures is only mandatory with respect to counterfeit and pirated products); EC Council Regulation, *supra* note 276, arts. 1(1), 2(1) ("This Regulation sets out the conditions for actions by the customs authorities when goods are suspected of infringing an intellectual property right in the following situations," and "for the purposes of this

Regulation, "goods infringing an intellectual property right" means: (a) "counterfeit goods" ... [and] (b) "pirated goods."").

n279. See TRIPS Agreement, *supra* note 11, at 1218 ("If, within a period not exceeding 10 working days after the applicant has been served notice of the suspension, the customs authorities have not been informed that proceedings leading to a decision on the merits of the case have been initiated by a party other than the defendant, or that the duly empowered authority has taken provisional measures prolonging the suspension of the release of the goods, the goods shall be released ...").

n280. See TRIPS Agreement, *supra* note 11, at 1218.

n281. See *id.* ("In appropriate cases, this time-limit may be extended by another 10 working days.").

n282. See EC Council Regulation, *supra* note 277, art. 13 ("If, within 10 working days of receipt of the notification of suspension of release or of detention, the customs office ... has not been notified that proceedings have been initiated to determine whether an intellectual property right has been infringed under national law in accordance with Article 10 or has not received the right-holder's agreement provided for in Article 11(1) where applicable, release of the goods shall be granted, or their detention shall be ended ...").

n283. See EC Council Regulation, *supra* note 277, art. 13(1) ("This period may be extended by a maximum of 10 working days in appropriate cases."); see also *id.* art. 13(2) ("In the case of perishable goods suspected of infringing an intellectual property right, the period referred to in paragraph 1 shall be three working days. That period may not be extended.").

n284. See EC Council Regulation, *supra* note 277, art. 13(1).

n285. Cf. Ridgway, *supra* note 274, at 1567-69 (arguing for an adoption of a "trademark misuse" cause of action in order to impose costs on trademark enforcement, thereby limiting abuse).

n286. There are some trademark bullies who may desire to gain a reputation as a "bully" and, therefore, litigate any dispute. See Hodgson, *supra* note 203, at 76.

n287. Cf. Ridgway, *supra* note 274, at 1567-69 (arguing for an imposition of "misuse damages" to deter trademark bullying).

n288. See ACTA, *supra* note 16, art. 6(1).

n289. *Id.* art. 17(4).

n290. See *supra* Part V.

n291. Americans seem to favor a "three strikes" rule, as seen in baseball and in the California Penal Code. See Official Baseball Rules, Rule 10.15 (2011), available at http://mlb.mlb.com/mlb/downloads/y2011/Official_Baseball_Rules.pdf; Cal. Penal Code § 667 (West 2010).

n292. See *Locate a Port of Entry*, *supra* note 244.

n293. If the revocation would be with respect to just one port of entry, this forum shopping could be a reality - until recently, each CBP field office operated autonomously from one another. See Telephone Interview with Cherise Miles, Press Officer, U.S. Customs and Border Protection Chicago Field Operations Office (Jun. 21, 2011). However, the CBP is currently attempting to limit port shopping with more recent attempts at inter-office integration. See *id.*

n294. See *Frequently Asked Questions*, *supra* note 10.

n295. See *Trade Outreach*, U.S. Customs and Border Prot., http://cbp.gov/xp/cgov/trade/trade_outreach/ (last visited June 16, 2012).

n296. From a survey of the CBP website, there appears to have been only one training presentation specifically directed to small businesses. NOTE: Picking on the Little Guy? Asserting Trademark Rights Against Fans, Emulators, and Enthusiasts*

* I would like to thank Professor Oren Bracha and Professor Robert Bone for fostering my interest in intellectual property, and Professor Bracha in particular for providing insightful comments on an earlier draft of this Note. I would also like to thank my friends on the staff and Editorial Board of the Texas Law Review for their excellent work in preparing this Note for publication. I am eternally grateful to my family for their love and encouragement through the years. Most of all, thank you to my wife, Arcelia, whose constant love, endless patience, and unwavering support make anything possible.

NAME: - David E. Armendariz

LEXISNEXIS SUMMARY:

... These groups include sports fans, youth and amateur sports teams that use official team names and logos, and enthusiasts that use trademarks in their domain names or to identify their group. ... While the law allows a trademark owner to enforce its rights in these situations, there are costs involved in such enforcement - costs to the trademark owner asserting its rights, costs to the allegedly infringing party, and costs to the community and society as a whole. ... Regardless of whether a likelihood of confusion or dilution exists in a strictly legal sense, trademark owners may have a genuine concern that their brand might be harmed in some way and might want to prevent that potential harm by asserting their rights through a cease-and-desist letter or actual litigation. ... Thus, while trademark confusion may be a valid concern in some instances, the existence of licensing agreements suggests it is not the reason for trademark litigation in every case. ... What ensued was something of a firestorm, spreading to other fan websites with members and Ford fans expressing outrage at Ford's actions. ... The first is to ensure that the doctrines of acquiescence and laches do not attach unless there is a risk of significant harm to the original owner's interests.

TEXT:

[*1259]

We live in a time of robust trademark ⁿ¹ protection, but the fact that a trademark owner has a right does not mean the owner should always exercise that right. There are times when asserting a trademark right might do more harm than good to a trademark owner, without addressing any real threat to that owner. This Note aims to explore the actions of trademark owners against subsets of infringers referred to here as fans, emulators, and enthusiasts - groups that use the mark not to create a separate brand identity of their own but rather to show their support for or imitate the original brand owner. These groups include sports fans, youth and amateur sports teams that use official team names and logos, and enthusiasts that use trademarks in their domain names or to identify their group.

This presents a different situation than most trademark analyses, which usually focus on two separate businesses at

odds with one another, each attempting to secure a share of its own product market. In the particular cases at issue here, the use is not competitive, and it usually has little risk of confusing consumers or diluting the original mark. In fact, in some cases such use may actually strengthen or reinforce the original mark, given the nature of the use.

While the law allows a trademark owner to enforce its rights in these situations, there are costs involved in such enforcement - costs to the trademark owner asserting its rights, costs to the allegedly infringing party, and costs to the community and society as a whole. While costs are inherent in any trademark-enforcement scenario, there is a problem if the costs are not offset by a corresponding benefit. For example, costs to an infringing party or to society are justifiable if the trademark owner derives a benefit to which [*1260] it is entitled under the law - such is the nature of our trademark regime. However, if the trademark owner does not derive a benefit, or actually ends up worse off as a result, then such a situation is unacceptably inefficient. Trademark law itself obligates an owner, to a certain extent, to police its mark and ensure the integrity of its brand, but this obligation should be understood in such a way as to avoid unnecessary enforcement actions that result in inefficient outcomes.

This Note proceeds in four parts. Part I presents several examples of enforcement actions against fans, emulators, and enthusiasts for analysis. Part II explores the trademark owners' possible motivations for taking such actions, looking both at reasons expressed by spokespeople and reasons that may be lying beneath the surface. Part III analyzes the costs of enforcement actions in these cases to the parties involved, including the public. Part IV concludes.

I. Fans, Emulators, and Enthusiasts

There are several examples of enforcement actions taken against fans, emulators, and enthusiasts. Trademark owners take different approaches to these groups that use their marks. Some owners refuse to allow the use altogether, while others force groups to enter into licensing agreements if they wish to continue the use. Still other owners take no action at all and actually encourage the use. What follow are a few representative examples of the types of use that are the focus of this Note.

In 2010, a team of Philadelphia Phillies fans calling themselves the "Phlyin' Phanatics" entered their contraption in the Red Bull Flugtag Competition, a contest in which people build homemade flying machines and launch them into a body of water.ⁿ² The team of fans had spent \$ 3,000 and 400 hours building a machine modeled after the Phillie Phanatic, the mascot of the Phillies and a trademark of Major League Baseball (MLB).ⁿ³ MLB objected to the use, requiring them to remove a replica of the mascot's head from the craft and leaving a sour taste in the mouths of the dejected Phillies fans.ⁿ⁴

MLB has a history of vigorously enforcing its trademarks. In the 1990s, it began cracking down on little league teams whose uniforms featured [*1261] official logos but were not purchased through an authorized, licensed dealer.ⁿ⁵ This requirement to purchase from a licensed dealer appears to be the status quo,ⁿ⁶ but there have been some recent instances of enforcement actions taken against amateur teams. In 2008, a youth league in the Tinley Park area of Chicago was forced to stop using MLB team names because its uniforms were not purchased from licensed vendors, even though the teams apparently did not use official MLB logos.ⁿ⁷ This action even garnered the attention of comedian Stephen Colbert, warranting an appearance in a satirical segment on his show, *The Colbert Report*, along with plenty of tongue-in-cheek criticism of the youth league at the expense of the intended target - MLB.ⁿ⁸ MLB took similar action against the Cape Cod League, an amateur league that had served for years as a breeding ground for future MLB talent.ⁿ⁹ MLB demanded that they comply with the licensed-vendor requirement in order to use MLB team names, but in this case the threat was not a strictly legal one - instead, MLB threatened to withhold the annual \$ 100,000 grant that it had provided to the league for years.ⁿ¹⁰ Six teams were affected by the demand: two changed their names in order to stay loyal to local vendors, and the other four kept their major league names and agreed to purchase through the licensed vendor.ⁿ¹¹

Recently, college football teams have also begun to make news for actions taken against high school teams that use official names and logos, but the actions taken turn out to be quite diverse. For example, the University of Florida

refuses to allow any use of its "Gator" mark, licensed or not, arguing [*1262] that licensing agreements are "extremely difficult to maintain and manage." ⁿ¹² The University of Wisconsin takes a similar stance regarding use of its "Motion W" insignia. ⁿ¹³

The University of Notre Dame has taken a mixed approach to high schools infringing its trademarked "Fighting Irish" name and leprechaun logo. When Notre Dame's football team returned from El Paso, Texas, after participating in the Sun Bowl in 2010, the University sent a letter to Cathedral High School - an El Paso Catholic school - demanding that it phase out its use of the famous leprechaun logo and the name "Fighting Irish." ⁿ¹⁴ The high school had been known as the Fighting Irish for over eighty-five years. ⁿ¹⁵ The University said that it does not actively seek out infringement, but it does stop it when it sees it. ⁿ¹⁶ The school had previously taken similar action against a high school in its home state of Indiana, a school that was founded by the same religious order as the one that founded Notre Dame. ⁿ¹⁷ In the case of Cathedral High School in El Paso, the school will ultimately be allowed to continue using the name "Irish," though it must drop "Fighting" from the name as well as use of the leprechaun logo. ⁿ¹⁸

Other schools take a somewhat more lenient approach to high schools using their logos and names. Schools like Kansas State University allow licensing of their logos for a nominal fee, sometimes as low as one dollar for two years. ⁿ¹⁹ Western Michigan University actively seeks out infringement from time to time, but when it finds instances of infringement, the University offers the infringer the option of a two-year license for \$ 100. ⁿ²⁰

In stark contrast to the approach taken by some colleges, the National Football League (NFL) reportedly allows youth teams and high schools to use official NFL team names and logos freely. ⁿ²¹ In fact, the NFL seems to [*1263] encourage the use. ⁿ²² Thus, many high schools borrow popular official NFL logos without having to worry about the threat of enforcement by the NFL. ⁿ²³

The case of enthusiasts is perhaps best illustrated by an incident between Ford Motor Company and therangerstation.com, a website for enthusiasts of Ford Ranger pickup trucks. In 2008, Ford sent a letter to the owner of the website demanding that he surrender the URL and pay Ford \$ 5,000. ⁿ²⁴ What ensued was an online firestorm regarding Ford's actions against the website. ⁿ²⁵ While Ford's primary concern actually involved the alleged sale of counterfeit merchandise on the site and not use of the trademark "Ranger," ⁿ²⁶ the case is an important illustration of what can happen when a company pursues its trademark rights too aggressively against enthusiasts. ⁿ²⁷

II. Why Do Trademark Owners Assert Their Rights Against These Users?

One question that may not be completely obvious to ask is why trademark owners challenge these types of uses in the first place. Are these owners simply trademark bullies, ⁿ²⁸ seeking to expand their own rights through abusive enforcement against small alleged infringers? This explanation alone seems incomplete here. Many of these allegedly infringing uses do not seem all that threatening to the original owners and may even be reinforcing and strengthening the brand among its followers. A member of a youth football team that calls itself the "Gators" might grow up with an affinity for the University of Florida and go on to become an actual Florida Gator one day. Likewise, a frequent contributor to the message boards on therangerstation.com is likely to continue buying Ford Rangers after sharing common experiences with the online community.

The focus in this part is not on what the law allows a trademark owner to protect, or even what it should allow, because those issues are largely irrelevant in this context. In all of the examples discussed above, the threat of litigation was sufficient to effect compliance by the junior user. These [*1264] users are not equipped to withstand the costs of litigation, and once threatened, they usually conform to the mark owner's demands by either discontinuing the use or entering into a licensing agreement. Thus, the focus in this part is instead on the trademark owners' internal motivations - that is, on what motivates owners to take the enforcement actions that they do.

When asked, many trademark owners assert that the main motivation behind zealous enforcement is preservation of their mark and the rights associated with it. However, there may be other motivations at play here as well, including a

desire to capitalize on an opportunity for revenue and a genuine concern about the effects of actual confusion and dilution among consumers. The likely answer is a combination of these concerns, but while these incentives are often present in any trademark enforcement scenario, there is reason to think that they are less warranted in this specific context.

A. Ability to Capitalize

The easy (and perhaps cynical) answer to why trademark owners assert their rights in these situations is that they want to make more money. The ability to license the use of a mark is an opportunity for increased revenue - a potentially lucrative one, as evidenced by the vibrant sports merchandising market.ⁿ²⁹ If the revenue from licensing to these users exceeds the costs of enforcement,ⁿ³⁰ this could be a sufficient motivator.

MLB's requirement that youth teams buy official uniforms from a licensed vendor clearly results in some revenue, though it is unclear how much. For most of these owners, however, it seems unlikely that generation of revenue is a significant motivator for enforcement. As discussed above, many of them - such as the University of Florida and the University of Wisconsin - refuse to allow the use outright, foreclosing any possibility of licensing revenue from those users.ⁿ³¹ Others - such as Kansas State University and Western Michigan University - do charge nominal licensing fees, though they are so small that licensing income alone cannot be the reason for them to take the actions that they do.
n32

Additionally, one might expect that as licensing fees approach a level where they become profitable to the trademark owner, the users would become more likely to simply discontinue the use altogether. Youth sports [*1265] teams and car enthusiasts might decide it is not worth the extra cost of using the officially licensed name in order to identify with the brand. Thus, while the opportunity for revenue can surely be one factor in the decision of whether to enforce trademark rights, in at least some of these cases it cannot be the only reason.

B. Fear of Consumer Confusion and Dilution

Another possibility is that the trademark owners in these cases actually fear what the law is purportedly meant to protect against: consumer confusion and dilution.ⁿ³³ Regardless of whether a likelihood of confusion or dilution exists in a strictly legal sense, trademark owners may have a genuine concern that their brand might be harmed in some way and might want to prevent that potential harm by asserting their rights through a cease-and-desist letter or actual litigation.

Confusion in the trademark context typically refers to confusion as to affiliation, connection, association, origin, sponsorship, or approval between the original mark owner and a subsequent user.ⁿ³⁴ When a high school sports team uses a college team's logo or team name, the college may be concerned that third parties who encounter that youth team will think that the college is somehow affiliated with the high school, sponsored the high school, or at the very least, approved the use of the mark. If this is a serious concern, then the mark owner is justified in using the mechanisms of the law to stop the subsequent use.

However, actual confusion among the public is unlikely. The chance that the public will think that a team of teenagers playing high school football is associated with a college hundreds of miles away is arguably small. Most of the spectators are usually affiliated with the school and surrounding community and would know that the school has merely adopted a popular team name or logo. Further, the number of consumers exposed to that particular use is likely to be relatively small, therefore posing a minimal threat [*1266] to the original mark owner.ⁿ³⁵ Finally, the fact that some mark owners enter into licensing agreements belies any claim by them of concern about confusion. Owners that enter into these agreements are actually creating associations and affiliations that were not there previously, and the public is not likely to spot the difference between licensed and unlicensed uses. Thus, while trademark confusion may be a valid concern in some instances, the existence of licensing agreements suggests it is not the reason for trademark litigation in every case.

Fear of dilution is another potential threat that a trademark owner may wish to address by enforcing its rights. Dilution by blurring refers to an "association arising from the similarity between a mark or trade name and a famous mark that impairs the distinctiveness of the famous mark," ⁿ³⁶ and dilution by tarnishment refers to an association that "harms the reputation of the famous mark." ⁿ³⁷ Considering that in many of these cases the contested marks are identical to the original marks, there may be a risk of dilution of the original (assuming the original would be considered a "famous mark"). ⁿ³⁸ Mark owners may fear that too many uses of the same mark might make the original less distinctive or that it may actually harm the reputation of the mark. ⁿ³⁹

In these particular cases, however, it seems that the result would not be dilution but, rather, the opposite. For example, in the case of youth teams using major league names, the use is obviously a reference to the original and not an attempt to create a separate brand identity. At the very least, the contested use likely does not diminish the original brand but rather highlights the original in the minds of those who come into contact with it. In these cases, it is plausible to think that the use might actually reinforce the original brand, leading those who support the youth team to support the original or to buy officially licensed merchandise of the original. ⁿ⁴⁰ Similarly, when a Ford [*1267] enthusiast website uses the original brand in its name, it is an obvious direct reference to the original mark holder and not the typical dilutive use that the Lanham Act (along with most businesses) seems to be concerned with.

While it is possible that the law might find that likelihood of confusion or dilution exists in these contexts, that does not necessarily mean that the trademark owners would sincerely have the same fear. While the risk of confusion and dilution is likely on the minds of trademark owners in these contexts, there is reason to think that this alone is not enough to motivate their actions. The fact that some of the owners enter into licensing arrangements that create associations and allow potentially dilutive uses suggests that there is still another motivator at play here.

C. Fear of Losing Protection

Conventional wisdom says that trademark owners are under an affirmative duty to "police" their marks and that failure to do so can have disastrous consequences, from a weakening of rights all the way up to loss of the mark. ⁿ⁴¹ At least publicly, many trademark owners in these cases adopt this view as well. Regarding its actions against the Cape Cod League, a spokesman for MLB's licensing division said, "There's a variety of reasons we have to do this It affects our relationships. If you don't enforce your trademark rights, then you run the risk of losing them." ⁿ⁴² A spokesman for Notre Dame spoke similarly regarding its actions against Cathedral High [*1268] School, saying, "To allow others to use our trademarks as their own could weaken the University's rights to its own marks to the point where its legitimate property interests could be at risk." ⁿ⁴³ Even the media itself adopts this dire prediction for those owners who fail to police their marks sufficiently. ⁿ⁴⁴

However, many owners also try to at least convey the message that they take no pleasure in fulfilling this duty the law imposes on them. After the Tinley Park Bulldogs were forced to either drop the use of official MLB team names or buy from approved vendors, an MLB spokesman was quoted as saying, "We want nothing more than youth league players using the names of major league teams." ⁿ⁴⁵ During another incident where MLB sent warning letters to a fan site that featured official Houston Astros uniforms, an MLB spokesman said, "'We like the sites, encourage the sites[,] ... but our (trademark) people are very wary of misuse. They are very careful to protect our logos and trademarks.'" ⁿ⁴⁶ In this way, it seems entities attempt to distance themselves from their actions, as if to say that the real culprits behind any harm caused by their enforcement actions against fans are the law itself and the "trademark people" and lawyers that force owners to comply with the unhappy obligations that the law imposes. While, in general, those who sleep on their trademark rights can run the risk of losing them, there is reason to think that the risk may be overstated in this subset of infringement cases. There are two aspects to this potential loss of rights that must be examined: (1) rights as to the infringing party or parties and (2) rights as to third parties in general.

1. Rights as to the Infringing Party. - When trademark owners speak of the obligation to assert their rights for fear of losing them, they may be speaking of the closely related equitable doctrines of laches and acquiescence. ⁿ⁴⁷ The doctrines of laches and acquiescence are by no means exclusive to trademark law, but they do apply in a particular way

in the trademark context. The application of laches and acquiescence has been [*1269] articulated as a sort of "implied license" to use a mark if the mark owner does not enforce its rights vigorously against a party.ⁿ⁴⁸

While the approach of courts is not always precise or consistent regarding the impact of a failure to sue infringers, in general, laches is an equitable defense that may be recognized when a long delay in taking action causes undue prejudice to a defendant.ⁿ⁴⁹ Importantly, however, these are "personal" defenses that only involve the loss of rights as against a particular defendant as opposed to a loss of rights as against the world.ⁿ⁵⁰

The Second Circuit indicates that the defense of laches requires a defendant to prove that it has been prejudiced by the plaintiff's unreasonable delay in bringing suit and characterizes laches as essentially "passive consent."ⁿ⁵¹ The Fourth Circuit enumerates three questions to ask in considering a laches claim: "(1) whether the owner of the mark knew of the infringing use; (2) whether the owner's delay in challenging the infringement of the mark was inexcusable or unreasonable; and (3) whether the infringing user was unduly prejudiced by the owner's delay."ⁿ⁵² The court points out that the Lanham Act does not contain a limitations period, and thus, the doctrine of laches acts to remedy the inequity of a trademark owner allowing a competitor to build up its business only to later "lower the litigation boom."ⁿ⁵³ Thus, the doctrine of laches requires that a claim for infringement existed at the time from which any delay is measured.ⁿ⁵⁴

Acquiescence is very similar to laches but requires something more.ⁿ⁵⁵ In fact, the doctrines are so similar that the Sixth Circuit uses the terms interchangeably, noting that "acquiescence encompasses the elements of laches."ⁿ⁵⁶ What differentiates acquiescence is that it is premised on the notion of "active consent" - that is, a finding of conduct on the part of the plaintiff amounting to "an assurance to the defendant, express or implied, that the plaintiff would not assert his trademark rights against the defendant."ⁿ⁵⁷ As articulated by the Second Circuit, the elements of acquiescence are (1) that the trademark owner actively represented that it would not take action against the subsequent user; (2) that the delay between [*1270] the active representation and any subsequent assertion of a right against the user was not excusable; and (3) that the delay caused undue prejudice to the subsequent user.ⁿ⁵⁸

The doctrines of laches and acquiescence are not as threatening as they may appear at first glance, however. For one, while the doctrines can limit monetary relief for damages, they will generally not bar injunctive relief if the likelihood of confusion is great enough to outweigh the effect of the delay.ⁿ⁵⁹ In the historic trademark case of *United Drug Co. v. Theodore Rectanus Co.*,ⁿ⁶⁰ the Supreme Court articulated this principle.ⁿ⁶¹ That case established that a trademark right is not a property right, nor is it a right "in gross or at large"; rather, it is "a right appurtenant to a business or trade" that derives from use, not mere adoption.ⁿ⁶² While the issue in that case was the scope of geographic rights in a mark,ⁿ⁶³ another corollary inference to take from the nature of a trademark right as articulated by the Court is that there is an interest in the trademark right that extends beyond the owner and the infringer: the public's interest in the mark as a source identifier. A trademark transcends mere property rights, and thus, even in the face of equitable doctrines like laches and acquiescence, the consumer's interest in the trademark may still warrant an injunction to prevent confusion even if the trademark owner himself is foreclosed from recovering a financial remedy. In most of the cases at issue in this Note, all the trademark owners seek is for the infringing use to cease or be licensed. If all that the owners seek to protect is the right to an injunction against the infringing use should they desire it in the future, refusing to enforce that right promptly would not necessarily destroy that right.

Of course, this is assuming the doctrines would even apply when the actual elements of the doctrines are examined. While there may be knowledge of, or even assent to, the infringing use on the part of the owner, it is not clear that the elements of inexcusable delay or undue prejudice would be met in most of these cases. What distinguishes these cases from the usual case of laches and acquiescence is perhaps best articulated in *Dwinell-Wright Co. v. White House Milk Co.*ⁿ⁶⁴ - an opinion authored by Judge Learned Hand. He explained the rationale behind estopping an owner from asserting its rights after an unreasonable delay, saying, "How [such a plaintiff] can expect us to stifle a competition which with complete complaisance, and even with active encouragement, it has allowed for years [*1271] to grow like the mustard tree; why we should destroy a huge business built up with its connivance and consent: this we find it impossible to understand."ⁿ⁶⁵ This characterization makes sense in the context of a business, competing or not, that is

expending efforts and capital to expand and grow. Millions of dollars may have been spent by the time a delaying owner decides to assert rights against the alleged infringer.ⁿ⁶⁶ That is not the case in the examples discussed in Part I. Fans, emulators, and enthusiasts are typically not businesses that seek to grow and expand as a normal business would, and thus it is unlikely that a delay in bringing suit will cause them to incur substantial expenses building up a brand only to lose it all in an eventual lawsuit. Given the relatively minimal effect that a delay would have on these users as compared with the usual commercial infringer, it is unlikely that the element of undue prejudice would even be satisfied in many of those cases.

There are also other doctrines that would act to protect a trademark owner in these cases against losing protection through laches or acquiescence. Consider the situation where the owners claim that they actually want the users to utilize the mark but are forced to enforce the mark or lose protection. If it is truly the case that they support the use, then what might they be afraid of? Why are they afraid of losing protection against a use that they purport not to oppose on its face? Assuming their desire to allow the use is sincere, then what they may fear is a future use or an expansion of the existing use that begins to affect the owner's interests in a way it did not before. For example, a high school might realize that it can sell logoed merchandise to fans of the original owner at a lower cost because it does not pay licensing fees. Under the pretext that it is selling its own merchandise, this activity harms the original owner's interest. Likewise, a youth or amateur sports league could expand and gain national prominence, becoming a legitimate enterprise and posing a real risk of confusion or dilution of the original mark.

This might be a valid concern except for the fact that trademark law makes an exception for these types of cases. Inherent in the doctrine of acquiescence is the principle that "while a plaintiff may acquiesce in some uses of the mark and in any resulting likelihood of consumer confusion, that acquiescence does not extend to a use that has not yet materialized and is not foreseeable."ⁿ⁶⁷ Thus, use in a different way or in a different geographic area [*1272] may be outside of the original scope of consent, express or implied, that may have otherwise foreclosed enforcement against the original infringing use.ⁿ⁶⁸

When Kellogg filed suit against Exxon for the use of Exxon's "Whimsical Tiger" symbol as infringing on its own "Tony the Tiger" mark, thirty-one years had passed from the time Kellogg was placed on notice of the use by virtue of Exxon's federal registration, which Kellogg did not oppose.ⁿ⁶⁹ The district court in the case granted summary judgment to Exxon, finding that this delay constituted acquiescence on the part of Kellogg and that Kellogg was therefore foreclosed from exercising its trademark rights against Exxon.ⁿ⁷⁰ However, Exxon's initial registration was for use on petroleum products, while Kellogg's mark was for breakfast cereals.ⁿ⁷¹ As the Sixth Circuit noted on appeal, "the two marks peaceably co-existed, each catering to its own market."ⁿ⁷² At issue in the case now, however, was Exxon's use of the mark on its line of convenience stores in connection with the sale of food and beverage products.ⁿ⁷³ The Sixth Circuit reversed the district court's summary judgment in favor of Exxon, holding as a matter of law that Kellogg's acquiescence to the use of the mark for petroleum products did not extend to acquiescence to use of the cartoon tiger to sell non-petroleum products.ⁿ⁷⁴ Similarly, acquiescence to the use of a college team's logo or team name for a high school or youth team would not automatically extend to use on merchandise or other commercial activities.

The related doctrine of progressive encroachment is also effective in protecting a delaying or acquiescing trademark owner's rights. Essentially, the doctrine allows an owner sufficient leeway to wait to take action until the likelihood of confusion becomes significant enough to warrant it.ⁿ⁷⁵ As the Second Circuit says, "the primary rationale is that a plaintiff should not be obligated to sue until its right to protection has ripened."ⁿ⁷⁶ According to the court, the important question is whether the defendant "redirected its business so that it more squarely competed with plaintiff and thereby increased the likelihood of public confusion of the marks."ⁿ⁷⁷ Essentially, a plaintiff is allowed to show that even if it could have brought suit earlier but [*1273] did not, certain factors now exist that have justified it doing so.ⁿ⁷⁸ This means that if use by a fan, emulator, or enthusiast becomes a threat to the original owner where it was not one before, that owner could assert progressive encroachment as "an offensive countermeasure to the affirmative defenses of laches and acquiescence" to excuse the delay.ⁿ⁷⁹

Based on the foregoing analysis, it seems that trademark owners have little to fear regarding their rights against

infringers. The doctrine of progressive encroachment and the narrow scope of acquiescence afford considerable protection for a trademark owner, allowing it to tolerate uses to which it has no objection and from which it may actually be benefitting. Further, even a successful laches or acquiescence defense would still not bar a remedy of injunction completely, which is all these owners seek in most cases.

2. Rights as to Third Parties in General. - A more serious consequence than loss of rights against a particular infringer is loss of rights against third parties. Some doctrines, such as genericide and abandonment, can result in a complete loss of rights in a mark, though for reasons to be discussed, that result is highly unlikely in these cases. However, one general result that may affect one's rights in a mark is a loss of mark strength, and this might be a somewhat more realistic concern.

The Lanham Act provides for cancellation of a registered mark at any time if it "becomes the generic name for the goods or services ... for which it is registered, ... or has been abandoned." ⁿ⁸⁰ Further, it provides that a mark is deemed to be "abandoned" if either (1) its use has been discontinued with intent not to resume use, or (2) the owner causes, including through acts of omission, the mark to become the generic name for the goods or services. ⁿ⁸¹ The first definition for abandonment is not at issue here because in none of these cases has the original use been discontinued with an intent not to use the mark. The second definition, which involves the mark becoming the generic name for the goods and services, is commonly referred to as "genericide." ⁿ⁸²

A word or mark is generic if it "refers ... to the genus of which the particular product is a species" ⁿ⁸³ - that is, a generic mark is one that refers to [*1274] a class of goods rather than a specific source of goods. For example, use of the mark "Apple" would be generic for a brand of apples but is not so for a brand of computers. At common law and under the Lanham Act, a generic mark has never been protectable. ⁿ⁸⁴ In determining whether a previously protectable mark has become generic (that is, whether genericide has occurred), courts usually look to both the use of the mark by consumers and the policing efforts of mark owners against third parties. ⁿ⁸⁵ Famous examples of once-protectable marks that were lost through genericide include "Murphy Bed," ⁿ⁸⁶ "Escalator," ⁿ⁸⁷ "Aspirin," ⁿ⁸⁸ and "Thermos." ⁿ⁸⁹

While failure to police a mark can result in genericide, that is highly unlikely in the cases at issue. The use of the trademarks here is not the same as the public adopting a brand name to refer to a class, as it might be with use of the word "Kleenex" to refer to facial tissue or "Xerox" to refer to photocopies. Regardless of how many youth teams use the name "Dodgers," such use is not likely to make the word synonymous with "baseball" or "baseball team." There is little risk of the mark losing significance altogether with this type of use, and in all of these cases the original owner has not discontinued use. Thus, there is no risk of the owners in these cases losing their trademark rights completely as against the world.

However, widespread use of a mark may affect the strength of the mark. In his treatise on trademarks, J. Thomas McCarthy opines that the greatest significance of a failure to sue goes to the strength of the mark rather than abandonment or genericity. ⁿ⁹⁰ In this case, the mark still has significance as a source identifier but is weakened through similar use by competitors. ⁿ⁹¹ However, he calls the relationship here a "tenuous" one. ⁿ⁹² He also notes that failure to sue could undercut an argument of irreparable injury, which is necessary to obtain a preliminary injunction. ⁿ⁹³

Strength of the mark is one of the factors commonly considered in deciding whether a likelihood of confusion exists. ⁿ⁹⁴ Accordingly, it is [*1275] possible that in an action against a third party, a court may look to the use of the mark by fans, emulators, or enthusiasts and conclude that the mark is relatively weak and therefore entitled to a more narrow scope of protection. Similarly, one of the elements for determining likelihood of dilution by blurring is "the extent to which the owner of the famous mark is engaging in substantially exclusive use of the mark." ⁿ⁹⁵ Thus, it is possible that other uses of the mark by these groups could harm a dilution claim by the owner against a third party.

However, such a result would require a court to follow the factors for confusion and dilution blindly, without regard for the difference between use of the mark by these groups and use by a competitor or another business. This kind of blind adherence to the factors is unlikely, as it would warrant a similar inference of weakness for marks that are the

subject of licensing agreements or product-line expansions - an approach that courts have not generally taken.ⁿ⁹⁶

Does this analysis regarding loss of protection suggest that these trademark owners are simply naive and misinformed regarding their rights under trademark law? Not likely. These entities presumably utilize attorneys and professionals who are knowledgeable of their rights under the law. This could mean one of two things. It could mean that even though owners may be aware that the risk that they will lose substantial rights for failure to enforce them is small, they still feel the safest way to ensure full protection of the mark is to stop any other use altogether. After all, Exxon did win summary judgment on the issue of acquiescence at the trial-court level in Kellogg, even where Exxon's use of the mark had expanded to other goods beyond the initial acquiescence by Kellogg.ⁿ⁹⁷ Kellogg was ultimately successful in its appeal on that issue, but it does illustrate the uncertainty and risk inherent in acquiescing to a particular use. The best way for a trademark owner to avoid any uncertainty regarding interpretation of its possible acquiescence is for the owner to never acquiesce in the use to begin with.

The second possibility is that there is more to a trademark owner's motivation than the fear of losing protection or rights. For example, any third-party use of a mark that an owner allows is a use that a potential challenger to that mark might present before a court and force that owner to confront, raising the potential costs of litigation for that owner. Thus, it may benefit the owner to control the mark for control's sake. Again, the surest way to ensure that potential uses of the mark do not harm the owner's [*1276] interests (whether through blurring, tarnishment, consumer confusion, or some other effect) is to foreclose any other unauthorized use at all. The law currently allows the mark owner to do this through mechanisms such as cease-and-desist letters or even litigation, and this Note does not seek to change that. However, such a decision by a trademark owner should take into account the costs associated with it. Similarly, the law should account for these costs to provide appropriate incentives for the trademark owner to exercise its rights and to prevent inefficient enforcement of those rights.ⁿ⁹⁸

III. Costs of Enforcement Against Fans, Emulators, and Enthusiasts

There are several costs associated with enforcing a trademark. The most obvious are the costs of enforcement to the trademark owner: litigation, monitoring, sending cease-and-desist letters, and simply retaining personnel to deal with trademark issues. There are also obvious costs to the infringer, who must discontinue the use, find its own brand, and rebrand anything that has the offending logo. When a right is exercised efficiently, these costs are ones the system should have no problem forcing infringers to bear. Finally, there are costs to the public of litigation and of losing a source identifier that they may have been using to identify a particular product or service. These too are justified costs if overall consumer confusion is reduced by enforcement. However, in many of these cases the costs may not be justified by any appreciable benefit to the owner or otherwise. As we have seen, zealous enforcement may not earn a trademark owner substantially more protection for its mark in these cases than if the owner simply allowed the use, and any financial benefits do not appear to be significant.

A. Costs to the Trademark Owner

Aside from the normal costs of enforcement, actions taken against fans, emulators, and enthusiasts entail special costs to the trademark owner. One such cost is the potential benefit and goodwill that may have been derived from allowing the use. As the NFL observes, allowing use of their team trademarks could be a "great opportunity to inspire kids to one day play in the NFL and wear the real helmet."ⁿ⁹⁹ Allowing the use might even encourage kids and fans at those schools to purchase officially licensed merchandise with the logo, eventually leading them to support the original team.ⁿ¹⁰⁰ This [*1277] opportunity may be something the mark owners are willing to forgo, but if they only do so because they fear they have to in order to preserve their marks, then this is a wasted opportunity.

There is also a risk of backlash against the owner among fans who feel that the actions are unwarranted. In response to the demand that they remove the Phillie Phanatic head from their Flugtag, the Phlyin' Phanatics Flugtag team was understandably dejected, having poured so much time and money into something that was meant to represent their support as Phillies fans. The pilot of the craft, Adam Denard, was quoted as saying, "I've been going to Phillies games

since I was a toddler, and the Phillie Phanatic was always a favorite." ⁿ¹⁰¹ It is not clear that the incident would be enough to turn the group off of the Phillies forever - after all, fandom likely does not die that easily. However, when fans feel a connection to something and devote this amount of effort to it, it is probably little consolation to them that these enforcement actions are in accordance with trademark law.

The incident with the Ranger Station illustrates just how quickly this kind of backlash can take off, especially in the context of widespread Internet use. When the website received the letter from Ford demanding that it turn over the URL and pay \$ 5,000, the news first broke on the forums of the website itself under a thread entitled "TRS is being attacked by the Ford Motor Company." ⁿ¹⁰² What ensued was something of a firestorm, spreading to other fan websites with members and Ford fans expressing outrage at Ford's actions. ⁿ¹⁰³ The furor was abated by quick action on the part of Scott Monty, head of social media at Ford. ⁿ¹⁰⁴ Monty checked with Ford's legal department and confirmed that the actual concern was sale of counterfeit decals on the Ranger Station - the website demand was used as a scare [*1278] tactic. ⁿ¹⁰⁵ Monty acted quickly to resolve the situation and spread word of its resolution through social media. ⁿ¹⁰⁶ After all was said and done, Ford had contained the crisis less than twenty-four hours after it had begun. ⁿ¹⁰⁷

Word spreads quickly online, and one can imagine the damage that may have been done among the brand's most devoted enthusiasts had the situation not been resolved so skillfully. With the growth of the Internet, this poses a real danger to trademark owners who pursue their rights too vigorously. Rumbblings like those that occurred with the Ranger Station surface on some of the news stories surrounding the examples highlighted in this Note. ⁿ¹⁰⁸ In fact, some commentators argue that the public should strive to become informed about possible trademark "bullying" so lawmakers might shape trademark law in a way that makes it work for the people. ⁿ¹⁰⁹ The power of the Internet to provide that information should inform trademark owners' decisions and make them think twice before acting. ⁿ¹¹⁰

B. Costs to the Public

Enforcement in these actions also brings with it costs to the general public. One such cost is the loss to the community of a team that they have grown to support and with which they identify. For example, loss of a logo, name, or mascot not only hurts a community because of the history built up around support for the local high school team, but it also takes time and money for a school to rebrand the team and to rebuild the school spirit and pride behind the team. The public is an interested party in the trademark system, and loss of a mark to the public is not without cost.

There is also an even more significant interest involved that may implicate important speech concerns, and this might best be described as a sort of identification interest. Take the example of the Phlyin' Phanatics [*1279] Flugtag Team. Their interest in building a contraption based on the Phillie Phanatic is not based solely on the fact that the character is an interesting one. It is based on the fact that they feel a sort of identification with the mascot and the team - as fans, they feel entitled to use the mascot to express their support for what they see as "their" team. ⁿ¹¹¹ Many youth teams similarly want to identify with major league teams and players when they seek to don official team uniforms to play youth ball. ⁿ¹¹² Ford Ranger enthusiasts also undoubtedly feel a certain entitlement to use the mark given their allegiance to the brand and their wishes to identify themselves as Ford devotees.

This is another way that use of a mark serves a purpose that transcends the original source-identifying function of trademarks. ⁿ¹¹³ The use of the marks in these cases is reflective of the original mark and should be analyzed differently because of the expressive use involved. As Judge Kozinski notes, once enforcement moves beyond the confusion rationale, trademark law risks losing its "built-in first amendment compass." ⁿ¹¹⁴ This is not to say that enforcement in these cases violates the Constitution. Rather, the law must be sensitive to the price we pay when speech interests are implicated in a trademark-enforcement scenario. Surely, speech is stifled any time a trademark is enforced because it necessarily means that the infringer is not allowed to communicate the mark, but this is usually acceptable because enforcement often serves some beneficial purpose, whether it be preventing consumer confusion, protecting investment in a mark, or lowering consumer search costs. ⁿ¹¹⁵ However, if the benefit derived from the action is small or nonexistent, or if the enforcement actually acts to the detriment of all parties involved, impingement on speech interests like those at issue here becomes a much more serious problem. Trademark law has already created a situation [*1280]

where much of our cultural capital is not in the public domain.ⁿ¹¹⁶ Elements of our cultural heritage have become "private properties that we parody, proliferate, or politicize at our peril,"ⁿ¹¹⁷ and in these cases we can also add identify with to that list of actions that are taken at the risk of infringing another's property right.

Finally, another cost of trademark enforcement in these cases that affects the public interest is the cost to the trademark system itself. A legal system that sanctions, and even incentivizes, trademark bullying through overzealous enforcement of marks against small infringers might harm the integrity of the trademark system as a whole if it goes too far.ⁿ¹¹⁸ When the public begins to see trademark law as a vehicle that serves only corporate interests, it harms the legitimacy of the law.

IV. Conclusion

There are a myriad of reasons why trademark owners might choose to enforce their rights against fans, emulators, and enthusiasts. However, such enforcement actions may yield no benefit in the aggregate and may actually be causing significant harm. In order to prevent inefficient enforcement actions, the focus must be not on the law itself, but rather on the incentives that the law provides (or does not provide) to the trademark owner. The reason for this is simple: A change in the law to protect these allegedly infringing groups would be largely ineffective. The fact of the matter is that these users are in such a position that even if the law is on their side, litigation would be so prohibitively expensive that they would usually face two choices: (1) comply with the cease-and-desist letter, or (2) fight the case and win, but to their financial ruin. The solution, then, is to ensure that the law at the very least does not encourage vigorous enforcement in situations where it benefits no one and results in a net loss to all parties involved.

There are two ways that this may be addressed so that trademark law at least does not encourage inefficient enforcement of a mark.ⁿ¹¹⁹ The first is to ensure that the doctrines of acquiescence and laches do not attach unless there is a risk of significant harm to the original owner's interests. As we have seen, this is largely already the case given the doctrines of ripeness and progressive encroachment. Ensuring that the law allows for recognition of the special nature of the uses in these cases will help prevent inefficient [*1281] enforcement of rights against nonthreatening uses. The second way involves the confusion and dilution analyses. Courts applying the law should recognize that these types of uses should factor differently in the analysis, both in assessing the strength of the mark for confusion and dilution purposes, and in determining whether substantially exclusive use of the mark exists for the dilution inquiry. Since these cases are litigated so infrequently, it is hard to say whether courts would be inclined to do this anyway, but making sure that this is considered is essential to moving toward the proper balance.

For the trademark owner, the foregoing analysis illustrates that choosing whether to stop use by a fan, emulator, or enthusiast is not just a legal decision but also an important business decision, and a mark owner must be cognizant of all of these factors and take them into account before blindly asserting rights against any and all users. In these cases in particular, special attention must be paid given how little owners might stand to gain from enforcing rights against these groups and how much they could lose with an incorrect decision. To the extent that the law can encourage wise, efficient decision making on the part of a mark owner in these situations, it has the potential to result in situations that are beneficial to all involved: the mark owner, the subsequent user, the public, and trademark law itself.

n28. See Leah Chan Grinvald, *Shaming Trademark Bullies*, 2011 Wis. L. Rev. 625, 642 (defining "trademark bullying" as "enforcement of an unreasonable interpretation by a large corporation of its trademark rights against a small business or individual through the use of intimidation tactics").

n29. See David Bennett, *Tilting Playing Field: Expanded Protection for Sports Trademarks*, Sports Litig. Alert (Nov. 20, 2009), <http://www.hackneypublications.com/sla/archive/000951.php> (reporting revenues from the licensing of logos and names of college teams of over \$ 3 billion annually); Darren Rovell, *Publication: MLB Will Beat NFL in Licensing Revenue in '10*, CNBC.com (June 14, 2010), http://www.cnbc.com/id/37692194/Publication_MLB_Will_Beat_NFL_In_Licensing_Revenue_In_10 (detailing the results of a report that revealed that the total retail sales of licensed merchandise based on sports teams, logos, and personalities totaled \$ 17.5 billion worldwide in 2009).

n30. See discussion *infra* Part III.

n31. See *supra* notes 12-13.

n32. See *supra* notes 19-20.

n33. See Lanham Act § 32(1)(a), 15 U.S.C. § 1114(1)(a) (2006) (imposing liability upon anyone who without permission "uses in commerce any reproduction ... of a registered mark in connection with the sale, offering for sale, distribution, or advertising of any goods or services on or in connection with which such use is likely to cause confusion"); *id.* § 43(a), 15 U.S.C. § 1125(a) (making "any person who ... uses in commerce any word, term, name, symbol, or device" liable to "any person who believes that he or she is or is likely to be damaged by such act" if that use "is likely to cause confusion ... as to the affiliation, connection, or association of such person with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities by another person"); *id.* § 43(c), 15 U.S.C. § 1125(c) ("The owner of a famous mark ... shall be entitled to an injunction against another person who ... commences use of a mark ... that is likely to cause dilution by blurring or dilution by tarnishment of the famous mark ...").

n34. See *id.* § 43(a)(1)(A), 15 U.S.C. § 1125(a)(1)(A) (imposing liability upon users who "cause confusion ... as to the affiliation, connection, or association of such person with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities by another person").

n35. Although admittedly, with websites like YouTube and the proliferation of nationally televised high school games, there may be a valid counterargument to be made here regarding the exposure of the junior user's use of the mark to the general public.

n36. Lanham Act § 43(c)(2)(B), 15 U.S.C. § 1125(c)(2)(B) (emphasis added).

n37. *Id.* § 43(c)(2)(C), 15 U.S.C. § 1125 (c)(2)(C).

n38. See *id.* § 43(c)(2)(B)(i), 15 U.S.C. § 1125(c)(2)(B)(i) (listing "degree of similarity between the mark or trade name and the famous mark" as one of the factors courts may consider in determining whether a mark is likely to cause dilution by blurring).

n39. The tarnishment concern may have been what motivated MLB to prevent the Phlyin' Phanatics from launching their contraption; perhaps MLB felt that an amateur rendition of their valuable mark would not portray it in the best light. See *supra* notes 2-4 and accompanying text.

n40. If the youth team tries to sell logoed merchandise that could pass as that of the original mark owner, that presents a different, and arguably valid, concern. See *Hanover Star Milling Co. v. Metcalf*, 240 U.S. 403, 412-13 (1916) ("The essence of the wrong [in trademark cases] consists in the sale of the goods of one manufacturer or vendor for those of another."), superseded by statute, Lanham Act, 15 U.S.C. §§ 1051-1141n, as recognized in *Park 'N Fly, Inc. v. Dollar Park & Fly, Inc.*, 469 U.S. 189 (1985); *Beacon Mut. Ins. Co. v. OneBeacon Ins. Grp.*, 376 F.3d 8, 10, 15 (1st Cir. 2004) (identifying loss of sales and diversion of sales as among the types of commercial injury relevant to a determination of infringement under the Lanham Act); *Bos. Prof'l Hockey Ass'n v. Dall. Cap & Emblem Mfg., Inc.*, 510 F.2d 1004, 1012-13 (5th Cir. 1975) (holding that the reprinting of a team's mark on embroidered emblems for sale constituted an infringing use of that mark, even while conceding that buyers might arguably not even be deceived or confused by the emblems); see also 4 J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* § 25:5 (4th ed. 2011) ("Express passing off" is defined as the classic form of trademark infringement."). But see Robert G. Bone, *Enforcement Costs and Trademark Puzzles*, 90 Va. L. Rev. 2099, 2153-55 (2004) (challenging the rationale behind the enforcement of merchandising rights through trademark law, contending that in merchandising cases "there is little in the way of trademark-related harm ... , and the substantive policies favoring trademark protection are not strongly implicated"); Stacey L. Dogan & Mark A. Lemley, *The Merchandising Right: Fragile Theory or Fait Accompli?*, 54 Emory L.J. 461, 481-84 (2005) (arguing that where consumers are not "duped" into thinking that a product bearing a trademark was made or sponsored by the mark owner, a broad merchandising right might actually interfere with the goals of trademark law). Resolution of the debate over whether a merchandising right is consistent with the policies underlying trademark law is beyond the scope of this Note.

n41. See *Nitro Leisure Prods., L.L.C. v. Acushnet Co.*, 341 F.3d 1356, 1367 (Fed. Cir. 2003) (Newman, J., dissenting) ("Trademark law requires that the trademark owner police the quality of the goods to which the mark is applied, on pain of losing the mark entirely."); 6 McCarthy, *supra* note 40, § 31:38 (noting that the law imposes a duty on a trademark owner to police its rights against infringers); Michael S. Mireles, Jr., *Towards Recognizing and Reconciling the Multiplicity of Values and Interests in Trademark Law*, 44 Ind. L. Rev. 427, 473 (2011) ("Trademark owners who fail to police their marks take great risks with the value of their marks under trademark law."); Arnold B. Calmann & Jakob B. Halpern, *Ten Steps to Prevent Trademark Disaster*, N.J. Law., June 2009, at 53, 56 (warning that if an owner does not police its rights effectively, equitable doctrines such as acquiescence or laches may attach, or the mark may lose significance as a source identifier and lose protection altogether).

ARTICLE: Trouble in Trademark Law: How Applying Different Theories Leaves Door Open for Abuse

NAME: Connie Davis Nichols*

Charley Carroll**

BIO: * Connie Davis Nichols is an Associate Professor of Law at Baylor University School of Law. Professor Nichols received a J.D. from The Maurer School of Law - Indiana University and a B.A in Biology from the University of North Carolina at Chapel Hill.

** Charley Carroll is a licensed Texas attorney who graduated in 2011 from Baylor Law School with a concentration in Intellectual Property. With an entrepreneurial spirit and passion for creativity, he now works as an actor, photographer and social media manager for small artistic-driven businesses.

LEXISNEXIS SUMMARY:

... Gilson on Trademarks states the multiple functions currently assigned to trademarks: A trademark functions and is accorded legal protection because it: (a) designates the source or origin of a particular product or service, even though the source is to the consumer anonymous; (b) denotes a particular standard of quality which is embodied in the product or service; (c) identifies a product or service and distinguishes it from the products or services of others; (d) symbolizes the goodwill of its owner and motivates consumers to purchase the trademarked product or service; (e) represents a substantial advertising investment and is treated as a species of property; or (f) protects the public from confusion and deception, insures that consumers are able to purchase the products and services they want, and enables the courts to fashion a standard of acceptable business conduct. ... It is the protection of distinction that laid the groundwork for the previously mentioned allegations of infringement lodged by Lucas, Facebook, and Chik-fil-A. These expansions, namely brand dilution and initial interest confusion, are necessary to protect certain owners' rights, but inconsistent judicial interpretation and unanswered questions have ushered in potential for abuse. ... Prior to the twentieth century, trademark law rested on the Source Theory of product recognition and relief was afforded based on a trademark's value (as rooted in its use in commerce) by identifying the source of producer goods and services in the marketplace. ... Indeed, this abandonment of a likelihood of confusion requirement for infringement on the Internet created a split within and among circuits.

TEXT:

[*1]

I. INTRODUCTION

Never in a million years would one suspect that a small, virtually unknown, Internet start-up company would threaten George Lucas - the master of all things in a galaxy far, far away. It stunned Matt Cooper, owner of Addroid,ⁿ¹ when he received a cease-and-desist letter from LucasFilms Ltd./ [*2] Lucas Entertainment.ⁿ² The letter alleged Cooper's use of the word "droid" in his business name infringed upon Lucas' established trademark rights in the registered "DROID" trademark. Cooper, intending to launch his start-up in January 2011, had two options: either cease all use of the term "Addroid" and any other mark that included the use of "droid" or battle with Lucas, not in the throes of space, but in a courtroom.ⁿ³ In September 2013, Forbes estimated George Lucas's net worth to be \$ 4.2 billion.ⁿ⁴ That figure positions the film director and special effects guru with the ability to follow through on his threat against Cooper and any other infringement potentially threatening his establishment as the premier owner and user of all things "droid."

To many observers and trademark advocates, Lucas's actions appear to be logical outgrowths of the desire to protect his trademark. Indeed, the law imposes a duty on the owner of a registered trademark to monitor and police its trademarks.ⁿ⁵ However, as Mike Masnick of Tech Dirt Blog asks, "Would anyone really confuse R2D2 with an ad platform service?"ⁿ⁶ Masnick's question speaks to the long-established basis for trademark infringement - determining the likelihood of confusion between mutually shared consumer communities.ⁿ⁷ In other words, would consumers, caught in any potential market crossover, wrongfully associate the source of a product or service with a similar trademark?

[*3] Elsewhere on the information superhighway, Facebook, with an estimated net worth of \$ 41 billion,ⁿ⁸ is forcing smaller online businesses into similar situations as Cooper faced with Lucas.ⁿ⁹ Facebook has rained down threats of lawsuits on various website companies that use domain names containing the terms "face" or "book."ⁿ¹⁰ On the receiving end of these suits are websites that serve various purposes: Teachbook, an Illinois-based online community where educators can share lesson plans and other materials,ⁿ¹¹ and Placebook, a site offering users tools for organizing and documenting trips.ⁿ¹² Having only launched in Fall 2010, Teachbook vowed to play the role of David to Facebook's Goliath.ⁿ¹³ Teachbook stated that they would face the lawsuit head on.ⁿ¹⁴ Placebook, whose fight with Facebook began soon after its website launched in May 2010, decided to avoid the potentially costly legal fight and instead changed its name to TripTrace.ⁿ¹⁵

In response to Facebook's trademark protection campaign, a parody site called Lamebook - featuring Facebook users' lesser moments - tried to beat the social network at its own game by seeking to enjoin Facebook from alleging trademark infringement against them.ⁿ¹⁶ In November 2010, Facebook responded with a countersuit, adding Lamebook to its list of would-be infringers.ⁿ¹⁷ At the time, Lamebook was involved in a deal with clothing [*4] retailer Urban Outfitters,ⁿ¹⁸ a 5.4 billion dollar brand, on a coffee table rendition of the website, perhaps providing the motivating factor for getting to Facebook first. Inherent to Lamebook's case is the copyright notion of fair use, which includes parody.ⁿ¹⁹ The topic of trademark use in parody is briefly discussed later but is largely beyond the scope of this article. As Masnick asks of Cooper's use of "droid,"ⁿ²⁰ will the general public assume any site beginning with "face" or ending in "book" is offered and/or sponsored by Facebook?

Undoubtedly, the likes of George Lucas and Facebook have expended much time, energy, and money to obtain the level of recognition afforded by their trademarks; billion dollar net valuations are certainly not born on the backs of the languid. At one time, "droid" was simply a popular suffix indicating something having mechanical qualities. The only "Facebook" anyone was aware of came in the form of a printed pamphlet containing the names and faces of their fellow incoming college freshmen. By adopting the terms as trademarks, subsequently registered with the United States Patent and Trademark Office, these producersⁿ²¹ transformed the term's common associations and connotations into brand and product identifiers - the very essence of trademark law. Like any other valid trademarks, Facebook's and Lucas's trademarks are at risk of losing the meaning and significance they represent. Thus, as trademark law requires, protective measures are rightfully and necessarily taken by mark owners to ensure marks retain their strength and unique meaning in the marketplace.

Our current trademark system provides many incentives for proper trademark development. It affords a monopoly to trademark owners, whose brands the consuming public identifies as the source of the goods or services and

establishes clear channels to eliminate would-be infringers. Indeed, the law obligates trademark owners to regularly police their marks for unauthorized use by third parties who create a likelihood of confusion. The failure to police does not go without consequence. The long-established doctrine of laches eliminates remedial channels to mark owners who fail to consistently take action against infringers.ⁿ²² No doubt, trademarks have become vital organs of the free-market system and often represent the value of a business itself. Consistent interpretation and expansion of trademark law in the past century has morphed it from a producer-identifier/consumer protection to a full-on business information capsule, capable of housing business image and consumer impression. Twentieth-century changes in trademark law, as well as ideas expanding trademark valuation and remedial concepts, have given [*5] trademark users the means to better develop and protect their marks than was previously possible.

Despite the progression of trademark law, trademark policing and protection favors those with the financial resources to spare. These same tools, meant to bring order and purpose to the marketplace, are now susceptible to "weaponization" by firms with strong market power and massive fortunes. Large, established entities often leverage their power in the market by overzealously asserting their trademark rights against small businesses that attempt to use similar marks, regardless of whether these small businesses' similar uses would actually ever cause a likelihood of confusion among consumers. The result is an imbalance, placing unintentional and damaging limitations on hopeful users and granting well-financed mark owners the tools to snuff out competition, create mark monopolies affording no room for similar marks whose use would not cause confusion, and hamper the free-market system. Trademark law requires entities to protect their marks.ⁿ²³ However, at what point do George Lucas and Facebook go from valiant trademark defenders to playground bullies throwing their weight around? Are they fighting against true foes distributing similar set of products using a confusingly similar mark,ⁿ²⁴ or are George Lucas and Facebook just flexing financial muscle to spoil others' efforts? The line has not been clearly drawn and will remain ambiguous unless greater effort is made to properly distinguish protection from bullying or courts begin to punish trademark-system abusers.

This article will examine the two established, yet conflicting, theories of trademark law: Source Theory and Quality Theory.ⁿ²⁵ Rooted in the history of trademark law, Source Theory contains the foundations for trademark law and its purpose.ⁿ²⁶ The standard for infringement under this theory is the "likelihood of confusion," which creates the necessity for a mark's distinctiveness.ⁿ²⁷ In discussing the theory, this article will briefly look at the historical foundations of trademark law, the import of trademark distinctiveness, [*6] and its impact on the validity and strength of a mark. This article will then introduce Quality Theory, which purports that a trademark is able to house and communicate both business image and consumer protection.ⁿ²⁸ The discussion of Quality Theory will delve into several legal expansions, including goodwill in trademark value and dilution statutes, and the unrest resulting from judicial attempts to harmonize the two theories. This article affirms the need for trademark owners to police their marks, but calls for the courts to offer relief to secondary mark users who are unfairly targeted by established mark owners in the name of policing.

II. TRADEMARK'S ROLE IN THE FREE MARKETPLACE

In a marketplace that constantly changes, trademarks assist in stabilizing the economy, encouraging honest business practices, providing a low-cost method for communicating brand quality, and contributing to consumer reliance and loyalty, which would otherwise only be obtainable through other extensive and costly methods. In its simplest form, a trademark is the necessary visual link between a producer and the goods or services it distributes. Without the outline of a woman riding horseback appearing on the packaging, consumers may struggle to distinguish Godiva chocolate from chocolate made by Ghirardelli or Lindt, making brand loyalty and intentional repeat business impossible. If the brand's distinct name and mark were removed, discerning the maker of two different chocolate bars for sale would require an investigation most consumers would likely not care to embark upon when making purchasing decisions. Also, without a trademark system, it would be very difficult to determine liability for defective commercial products and services.

A functioning trademark system orchestrates the many components of a marketplace where the goals of producers, competitors, and consumers are all met. The producer of goods adopts the mark of his choice and maintains the exclusive use of that name, device, or symbol;ⁿ²⁹ the competitor distinguishes his products, and the consumer develops

an awareness of the products available based on their preferences. Trademarks are the simple solution to the varying interests of a marketplace that both encourages competition and seeks to fortify consumer peace of mind. Without trademarks, the marketplace would be a frenetic hub of frustration for producers, competitors, and consumers alike. A trademark assumes a certain value for each producer, and has historically remained intangible. The expansion of societies and businesses, however, has ultimately caused trademarks to develop dramatically more tangible valuations and begin to function as more than mere source identifiers. As the twentieth century arose, courts struggled to merge traditional [*7] trademark concepts with developing trademark uses without expanding the law and broadening the definition of a trademark's value. The trademark is a keystone to a productive economy; however, the evolution of trademark treatment by courts has subsequently given larger entities more grounds for legal action. Trademark law is currently in a state of unrest, largely due to a century of unorganized judicial attempts to harmonize the Source Theory and the Quality Theory, two theories of trademark law that are not wholly compatible.

III. CONFLICTING THEORIES OF TRADEMARK LAW

Source Theory, present in the earliest of trademark systems, bases a trademark's value on its ability to identify the source of products.ⁿ³⁰ Quality Theory, which gained recognition in the early twentieth century, finds the strength of a mark's beating heart in the goodwill the mark harnesses for the brand, including the owner's image and consumer's impression.ⁿ³¹ Rooted in Source Theory is the "likelihood of confusion" test, the long-established basis for trademark infringement.ⁿ³² Action for infringement arose under this test when a secondary use of a mark was so similarly situated, typically caught in market crossover, that consumer confusion about the true source of the product was considered likely.ⁿ³³ Conversely, expansions of the trademark system resulting from Quality Theory's advancement moved away from "likelihood of confusion" and into a generalized realm of prohibiting similar mark use as a general means of protecting against diminishing mark uniqueness.ⁿ³⁴ Currently, both theories of trademark remain distinct, although Quality Theory is dependent upon Source Theory. As such, the functions of trademarks now extend beyond source identification. Gilson on Trademarks states the multiple functions currently assigned to trademarks:

A trademark functions and is accorded legal protection because it: (a) designates the source or origin of a particular product or service, even though the source is to the consumer anonymous; (b) denotes a particular standard of quality which is embodied in the product or service; (c) identifies a product or service and distinguishes it from the products or services of others; (d) symbolizes the goodwill of its owner and motivates consumers to purchase the trademarked product or service; (e) represents a substantial advertising investment and is treated as a species of property; or (f) protects the public from confusion and deception, insures that consumers are able to purchase the products and services they want, [*8] and enables the courts to fashion a standard of acceptable business conduct.ⁿ³⁵

Both theories accurately represent trademark's function in a marketplace, but they have proven highly difficult to harmonize. This is largely the result of marketplace and court efforts to assign tangible value to goodwill that at best is indefinable. These expansions, though valuable in protecting a business's goodwill stake in its trademark, are compounded by messy judicial interpretations opening the door to allow mark owners to use their rights in ways that may potentially stomp out competition, stymie creativity, and suppress free speech under the guise of protecting the mark and its value. Chick-fil-A is a recent actor. In November of 2011, Chick-fil-A asserted its "Eat mor Chikin" tagline and other trademarks against Vermont resident Robert "Bo" Muller-Moore's "Eat More Kale" tagline and trademark.ⁿ³⁶ Chick-fil-A cited policing as the reason for asserting its trademark rights and stated, "We must legally protect and defend our 'Eat mor chikin' trademarks in order to maintain rights to the slogan."ⁿ³⁷ Perhaps Chik-fil-A is correctly policing its mark liquidity as courts have stated must be done. However, would a marketed suggestion to eat more of anything trigger thoughts of Chik-fil-A in the absence of cows with poor spelling offering it?ⁿ³⁸ In this instance, it seems unlikely that if Bo's kale is not fresh, no consumer will blame Chik-fil-A.

A. Source Theory: Prevention of Consumer Confusion and Competitor Counterfeit

Source Theory cannot be fully understood without first examining the roots of modern trademark law, as noted trademark scholar and author Frank Schechter has remarked is often overlooked:

[*9]

Practitioners ... of trade-mark law have ... been quite content to regard that law as practically the creation of the nineteenth century, without attempting in any way to ascertain the extent to which trade-marks had been used prior to the nineteenth century, the functions or purposes which these trade-marks had served and the methods, if any, by which they came under any form of legal protection or surveillance. ⁿ³⁹

Trademarks are as old as the records of man, with semblances of trademark concepts appearing in the earliest civilizations. ⁿ⁴⁰ Trademark presence persisted into the Middle Ages, where consumers lived in segregated societies and often personally knew the manufacturers of the products they purchased. ⁿ⁴¹ The mark protected a producer's reputation and prevented his or her goods from being passed off as the goods of another. ⁿ⁴² These adaptations of trademark usage demonstrate that even before the establishment of English Common Law, mankind had discovered the practicalities of trademarks. ⁿ⁴³ Trademark usage remained intact through Western interpretation and governance of the field to: (1) prevent consumer confusion and deception by aligning the source with the product; and (2) prevent competitors from copying those aspects of a product that identify the source of the product. ⁿ⁴⁴

The usefulness of trademarks has not changed in the centuries since, but the need for a fluid and organized trademark system grew as industries expanded and marketplaces became less geographically defined. ⁿ⁴⁵ Through the sixteenth century and until the early seventeenth century, when the English [*10] courts considered the matter, ⁿ⁴⁶ trademark concerns were largely privatized. ⁿ⁴⁷ As the English courts' awareness of private trademark governance expanded, they began to absorb the concepts into their developing legal aura. Movement of trademark theory towards producer reliance and away from competitor counterfeit made its earliest appearance in the English Courts in *Southern v. How*, in a bit of extraneous commentary regarding the infringement of a clothier's mark:

The action upon the case was brought in the Common Pleas by a clothier, that whereas he had gained great reputation for his making of his cloth by reason whereof he had great utterance to his benefit and profit, and that he used to set his mark on his cloth whereby it should be known to be his cloth: and another clothier, observing it, used the same mark to his ill-made cloth on purpose to deceive him; and it was resolved that the action did well lie. ⁿ⁴⁸

Southern is regarded as early authority for the idea that unauthorized use of a trademark counters its purposes and creates grounds for action. ⁿ⁴⁹ References recognizing *Southern's* prominence appear in many American trademark cases of the early twentieth century. ⁿ⁵⁰ While *Southern* planted a seed, trademark litigation in English courts did not emerge again until the mid-eighteenth century when a tradesman sought injunctive relief against infringement but was denied by the Lord Chancellor, who feared outright protection of trademarks would foster monopolies in the marketplace. ⁿ⁵¹ Though a tightly constrained monopoly on an image, name, or presentation of a brand is necessary to a trademark's function, perhaps Lord Chancellor rightfully feared some of the greater vagaries of opening the door to such monopolies.

There was a noticeable lack of trademark litigation in the early eighteenth century. Nonetheless, the potential benefits of source-to-product indicators in the marketplace gained attention, and Parliament implemented statutes in

select trades that permitted a producers to use marks as a means of identifying products and protecting themselves from counterfeiters.ⁿ⁵² Producers targeted consumers on a broader plane as industry expanded with changes [*11] in manufacturing, technology, and general social and economic practices.ⁿ⁵³ As the need for product-source identifiers became greater than ever before, the English and young American courts took notice.ⁿ⁵⁴ Indeed, in an option-filled market gone unchecked, the danger is great for a low-earning competitor to pass his products off as those made by a successful competitor. This scenario would defeat consumers' ability to determine product quality and develop preference for a certain producer's goods over another, thus further diminishing consumer confidence in economies and marketplaces. Economies could never hope for stability. The worst of this had yet to materialize when American manufacturers became impatient with losses suffered from infringements and pled to the legislature for relief.ⁿ⁵⁵ Founding Father Thomas Jefferson became an avid proponent of creating a system where the federal and state registration of producer marks would serve to cement their rights to protection and relief for unauthorized use of the registered mark.ⁿ⁵⁶ Indeed, this proposed registration system served to put others on notice that the producer was claiming a right to the mark on his products.ⁿ⁵⁷ Jefferson and others recognized trademarks "contribute to the fidelity" of the marketplace, promoting innovative production, fair competition, and consumer trust by significantly decreasing the ease at which deception and fraud could infiltrate the marketplace.ⁿ⁵⁸

Early American trademark case law quickly established the value of a mark's distinctive quality as a useful source identifier and guard against competitor fraud. In *Hanover Star Milling Co. v. Metcalf*, the Supreme Court highlighted these traditional purposes as it explained the producer's sanctity in his mark:

Where a party has been in the habit of labeling his goods with a distinctive mark, so that purchasers recognize goods ... as being of his production, others are debarred from applying the same mark to goods of the same description, because to do so would in effect represent their goods to be of his production and would tend [*12] to deprive him of the profit he might make through the sale of the goods which the purchaser intended to buy.ⁿ⁵⁹

Less than a decade after the Supreme Court decided *Hanover Star*, the federal government registered more than 15,000 trademarks, evidencing producer confidence in the system and eagerness to claim territory in the marketplace.ⁿ⁶⁰ In 1970, there were 23,447 federal registrations granted and 33,326 applications filed.ⁿ⁶¹ In 2011, there were 398,667 applications filed and 177,661 certificates of registration given.ⁿ⁶² Trademark registration continues to grow exponentially and litigation continues to increasingly invade United States courtrooms.

1. Distinctiveness: The Basis of a Trademark's Ability to Distinguish

Distinctiveness is the soul of a valid and registrable trademark. Distinctiveness is also a necessary component of trademark law that can frustrate mark owners. If a mark fails to stand apart from another mark, it fails its function as a source identifier for corresponding products. Marks that are not distinctive may cause consumer confusion, especially if the similarly marked products share market crossover. Coupled with its use in commerce,ⁿ⁶³ a distinctive mark gains consumer awareness and earns protection. Distinctiveness is necessary for the creation and registration of a trademark, but it is neither synonymous with the originality needed for copyright nor the novelty needed to earn a patent:

The trade-mark may be, and generally is, the adoption of something already in existence as the distinctive symbol of the party using it. At common law the exclusive right to a trademark grows out of its use, and not its mere adoption. By the act of Congress this exclusive right attaches upon registration. But in neither case does it depend upon novelty, invention, discovery, or any work of the brain. It requires no fancy or imagination, no genius, no laborious thought. It is simply founded on the priority of appropriation.ⁿ⁶⁴

[*13] Distinctiveness is purely action-oriented, sprouting from specific and formulaic producer efforts to harmonize a mark with his products and nestle the association into consumer awareness. Unlike its intellectual property brethren, trademarks are the application of something already created and then adopted by a producer with the intent to transform it into a marketplace symbol. "To acquire ownership of a trademark it is not enough to have invented the mark first or even to have registered it first; the party claiming ownership must have been the first to actually use the mark in the sale of goods or services." ⁿ⁶⁵

As expressed in the Trade-Mark Cases, adopting a trademark requires little effort. ⁿ⁶⁶ However, making a trademark valuable and effective in the marketplace as a tool for communicating information about a product does require effort. Rooted in its ability to identify the "origin or ownership," ⁿ⁶⁷ a consumer should identify a mark only with the sources of origin or ownership intended by the producer:

To acquire the right to the exclusive use of a name, device, or symbol as a trademark, it must appear that it is adopted for the purpose of identifying the origin or ownership of the article to which it is attached, or that such trade-mark must point distinctively, either by itself or by association, to the origin, manufacture, or ownership of the article on which it was stamped. ⁿ⁶⁸

An adopted mark distinguishing a producer's goods in a marketplace ⁿ⁶⁹ earns common law protection; once the distinguished use of a mark is recognized by the consuming public as denoting the producer's goods, meaning the producer has made efforts to insert his mark into consumer consciousness, it may be federally registered.

Distinctiveness is a matter of degree. The more distinctive a word or symbol is, the greater strength it has as an identifier of the product source. In the marketplace, a mark with greater distinction more easily suits trademark purposes. Thus, a producer is incentivized to adopt a highly distinct mark because it lends itself to greater protection. A strong mark - one with greater distinction - is easier to streamline into consumer consciousness as symbol of origin or ownership. Marks with a greater degree of distinctiveness are [*14] often inherently distinct, and their ability to identify a source is presumed. ⁿ⁷⁰ Weaker marks - those consisting of words or symbols in their commonly recognized contexts - must gain distinctiveness through "secondary meaning" to prove the mark has "acquired" a "source-identifying" meaning apart from its ordinary, common usage. ⁿ⁷¹

"[A] mark has acquired distinctiveness, even if it is not inherently distinctive, if it has developed secondary meaning, which occurs when, 'in the minds of the public, the primary significance of a [mark] is to identify the source of the product rather than the product itself.'" ⁿ⁷²

In *Abercrombie & Fitch Co. v. Hunting World*, the Second Circuit provided the most illustrative analysis of mark distinction by categorizing trademark terms into four classes of distinctiveness and "[arraying them] in an ascending order which roughly reflects their eligibility for trademark status and the degree of protection accorded." ⁿ⁷³ The court listed the classes as "(1) generic, (2) descriptive, (3) suggestive, and (4) arbitrary or fanciful." ⁿ⁷⁴

"Generic" describes a term that has "come to be understood as referring, to the genus of which the particular product is a species." ⁿ⁷⁵ It is a term "commonly used to denote a product or other item ... the thing itself, rather than any particular feature or exemplification of it." ⁿ⁷⁶ Because a generic term is "commonly used as the name or description of a kind of goods," ⁿ⁷⁷ it is useless as an identifier of product origin or ownership, having zero distinction. It is "irretrievably in the public domain, and the preservation of competition precludes its protection." ⁿ⁷⁸ Generic terms are incapable of being registered and do not receive any common law protection.

A "descriptive" mark describes product characteristics and has been subcategorized into two classes: "commonly descriptive" and "merely descriptive."ⁿ⁷⁹ The "commonly descriptive" term is synonymous with the generic **[*15]** term, identifying a product type by its characteristics, and permanently cemented in the public domain.ⁿ⁸⁰ A "merely descriptive" mark describes product characteristics and can be registered if it distinctly represents the applicant's goods upon a showing of secondary meaning, specifically, that "it has become distinctive of the applicant's goods in commerce."ⁿ⁸¹ An example of the difficulty in differentiating "commonly descriptive" and "merely descriptive" terms can be found in the Seventh Circuit case *Henri's Food Products v. Tasty Snacks*, where the court held "tasty dressing" was "merely descriptive."ⁿ⁸² The Court contrasted their case to *Miller Brewing* and the use of "LITE beer,"ⁿ⁸³ in which "the word 'light,' including its phonetic equivalent 'lite' ... [is] a generic or common descriptive term as applied to beer, [and] could not be exclusively appropriated ... as a trademark, 'despite whatever promotional effort may have [been] expended to exploit it.'"ⁿ⁸⁴

Departing from reasoning of the Eastern District Court of Wisconsin, which classified "tasty dressing" as "commonly descriptive,"ⁿ⁸⁵ the Seventh Circuit noted:

Unlike "light beer," "tasty salad dressing" is not a kind, sort, genus or subcategory of salad dressing. Rather, "tasty" is "merely descriptive" and describes a quality found in many genres of salad dressing. It is not an adjective which in any way serves to classify the noun to which it is attached.ⁿ⁸⁶

The court noted that this type of "merely descriptive" word theoretically could convey a secondary meaning. "'Merely descriptive' terms convey a quality or characteristic of the product. The term 'tasty' describes the quality of the salad dressing. There really can be no suggestion that 'tasty dressing' is a kind or type or subcategory of dressing such as, for example, French dressing."ⁿ⁸⁷ A "merely descriptive" term becomes capable of trademark protection and subsequent registration when, through the efforts of the adopting producer, the term acquires secondary meaning as a source identifier apart from the term's ordinary meaning.ⁿ⁸⁸

[*16] Sitting somewhere between the "descriptive" and "fanciful" classes, a "suggestive" term "requires imagination, thought, and perception to reach a conclusion as to the nature of goods."ⁿ⁸⁹ "Suggestive" terms are defined as having inherently distinctive meaning, the association between the mark and its source is presumed and the mark is eligible for trademark protection.ⁿ⁹⁰ Though a suggestive term may capture some of the qualities of a product, it stands apart from a descriptive term, which "conveys an immediate idea of the ingredients, qualities or characteristics of the goods."ⁿ⁹¹

Also inherently distinctive are "arbitrary" and "fanciful" terms.ⁿ⁹² "Arbitrary" or "fanciful" terms bear no relation to the product and therefore deserve protection.ⁿ⁹³ A mark is arbitrary if it "is well-known in a different context" apart from its source-identifying use.ⁿ⁹⁴ A mark is fanciful "if it is newly invented" for the source-identifying use and not otherwise established in any other context.ⁿ⁹⁵

2. Burdens Associated with Distinction

Once a mark has obtained distinction to any degree, it becomes a commodity to the producer because it now carries the ability to distinguish his products from those of his competitors. While a mark with distinction has value and is worthy of protection, it is not free from burden. Once obtained, a mark may not always retain its distinction. Mark distinction may shift along with ever-changing consumer awareness and is constantly at risk of becoming "generic" if a producer does not monitor his mark's use in the marketplace. It is the protection of distinction that laid the groundwork for the previously mentioned allegations of infringement lodged by Lucas, Facebook, and Chik-fil-A.

3. Shifting Distinction

As consumer awareness changes and the market place shifts, it is entirely possible for a mark's identifying power to shift as well. The Second Circuit states that:

The lines of demarcation, however, are not always bright. Moreover, the difficulties are compounded because a term that is in one [*17] category for a particular product may be in quite a different one for another, because a term may shift from one category to another in light of differences in usage through time, because a term may have one meaning to one group of users and a different one to others, and because the same term may be put to different uses with respect to a single product. ⁿ⁹⁶

Thus, the contextual and environmental conditions the mark is associated with are highly relevant to the distinction it carries. For example, when associated with computer systems, the term "Apple" is arbitrary. But an apple grower would find it impossible to adopt this mark as signifying the crop he produces. It would be poor branding, and no producer can claim the sole rights to use the product genus as a brand. ⁿ⁹⁷ Genus terms are inherently generic and therefore remain in the public domain. ⁿ⁹⁸

Maintaining distinction of a mark can be an uphill battle for a producer because they must fight against the winds of a constantly evolving market to preserve a mark's value. The fight is partially won in the first round when a producer chooses an arbitrary, fanciful, or a suggestive mark. As seen with the dilemma posed by common descriptive or merely descriptive marks, terms that avoid directly revealing a product's qualities or characteristics are more useful in the marketplace and thus more capable of achieving trademark purposes. A mark owner must develop his symbol into a valid trademark recognized by the public as indicative of his products, but this process is easier when he chooses a non-descriptive mark creatively at the outset. ⁿ⁹⁹ For the producer choosing a descriptive mark, efforts must focus on shifting consumer awareness away from a term's ordinary meaning and towards the "secondary" source identifying the producer's intended meaning. ⁿ¹⁰⁰ This is not an easy task, but it has been done successfully. ⁿ¹⁰¹

[*18]

4. Genericide

No matter the degree of distinction, a mark owner's worst fear is a transformation into the colloquial term for his product class. ⁿ¹⁰² Producers must find the middle ground between expending too little effort to establish distinction for their mark in a marketplace, and oversaturating to the point of synonymizing a product brand with the class of products itself. Once a term, trademarked or not, becomes referential to a product type, class, or genus, it belongs to the public domain and cannot be validly transformed into a distinctive trademark. ⁿ¹⁰³ A generic classification becomes the fear of any producer who has spent time, money, and effort to distinguish a mark in the marketplace because generic classification indicates a point of no return.

"The [Lanham] Act provides for the cancellation of a registered mark if at any time it 'becomes the common descriptive [or generic] name of an article or substance.'" ⁿ¹⁰⁴ The Second Circuit found that "this means that even proof of secondary meaning, by virtue of which some 'merely descriptive' marks may be registered, cannot transform a generic term into a subject for trademark." ⁿ¹⁰⁵ The court further noted that "no matter how much money and effort the user of a generic term has poured into promoting [merchandise sales] and what success it has achieved in securing public identification, it cannot deprive competing manufacturers of the product of the right to call an article by its name." ⁿ¹⁰⁶

When threatened by genericide, producers must overhaul their advertising and communication schemes. In modern trademark practice, producers with threatened marks have, out of necessity, resorted to various strategies to keep the endangered marks alive. This extra spending is needed to provide new significance and meaning to a mark that teeters on the edge of generically signifying a whole product classes. Examples of fallen marks resigned to the generic graveyard include "Escalator" (Otis Elevator Co. trademark for the rotating staircase),ⁿ¹⁰⁷ "Aspirin" (Bayer trademark for acetylsalicylic acid),ⁿ¹⁰⁸ "Thermos" (Thermos GmbH trademark name for a vacuum flask),ⁿ¹⁰⁹ and "Yo-Yo" (Papa's Toy Co. Ltd. trademark for a spinning toy).ⁿ¹¹⁰

Traditionally, a mark's decline towards generic may surprise a producer when brand popularity is high. Kids with cuts and scrapes requesting Band-Aids, or the sniffing friend asking, "Where's the Kleenex?" indicate brand awareness and confidence. However, both Band-Aidⁿ¹¹¹ and Kleenexⁿ¹¹² saw their brands become synonymous with their respective product classes, i.e., bandages and facial tissue paper. Band-Aid sought to avoid their generic brand problem by slightly modifying their commercial jingle, drawing clear focus to the word "brand." The kids, happy to be protected by Band-Aid bandages, now sing, "I am stuck on Band-Aid brand, 'cause Band-Aid's stuck on me." Kleenex has long been victimized by pervasive generic use by consumers, but still remains a valid trademark.

The brand Google,ⁿ¹¹³ an embodiment of a newly created fanciful mark that now represents the preeminent Internet search-engine, has become so synonymous with the act of searching for something on the Internet that consumers transformed the mark into a verb when suggesting someone perform an Internet search. "Just Google it." Google is not passive on this matter. Still measures to reverse this association and retain brand strength do not always correct a problem that can quickly tumble out of control in a time when thoughts, associations, or memes have the potential to go viral in minutes.ⁿ¹¹⁴ Dr. Julie Coleman, an authority on linguistics from the University of Leicester, suggests that while Google is unable to slap every impermissible use of "Google" with a lawsuit, the company could pursue other avenues such as "forcing dictionaries to mention its origin in a trade-marked brand name, which is what the Oxford English Dictionary already does."ⁿ¹¹⁵ Even though some may consider a mark slipping towards generic as the highest [*20] form of brand flattery, producers, who wish to maintain mark protection, often fear such generic status as a trademark black hole.

B. Quality Theory: Protection of Business Goodwill

While Source Theory remains a functioning theory of trademark law, the rise of the twentieth century's booming business landscape, and resulting judicial interpretations of trademark law, broadened the scope of what trademarks can identify. Twentieth century treatment of trademark rights as tangible property forced lawmakers to recognize that trademark, in addition to identifying producer goods and services, also captured the consuming public's perception of a producer's standards and product quality. This secondary interest in protecting a mark called for expansions of trademark law that stepped beyond the established "likelihood of confusion" grounds for infringement. Proponents of Quality Theory target any use of a similar mark, regardless of market crossover, citing the uses as attempting to capture and diminish the quality and standards represented, thereby weakening their mark. Relying on the intangible and ubiquitous concept of goodwill as a component to a trademark's value, Quality Theory required the trademark to shoulder this goodwill, which proved impossible without expansions to the law. These expansions, namely brand dilution and initial interest confusion, are necessary to protect certain owners' rights, but inconsistent judicial interpretation and unanswered questions have ushered in potential for abuse. What is the measure to determine if a mark owner has sufficiently policed the value of his mark? Can a brand with a great amount of goodwill justify a degree of policing that appears arbitrary and perhaps insidious to one who knows the standards for infringement?

1. Trademark as a Symbol of Owner's Goodwill

The historical conception of a trademark as a strict emblem or source of the product to which it attaches has been largely abandoned. The burgeoning business of franchising has made trademark licensing a widespread commercial practice and has resulted in the development of a new rationale for trademarks as representations of product quality. This is particularly true in the case of a franchise system set up to conduct a certain business under a common trademark

or trade name, i.e., not necessarily to distribute the trademarked goods of the franchisor. Under such a type of franchise, the trademark embodies the goodwill and quality standards of the enterprise and is not directly used to identify the enterprise's products. ⁿ¹¹⁶

Prior to the twentieth century, trademark law rested on the Source Theory of product recognition and relief was afforded based on a trademark's value (as rooted in its use in commerce) by identifying the source of producer [*21] goods and services in the marketplace. ⁿ¹¹⁷ In the early twentieth century, propertization of trademarks came to the forefront and brought to light what many were aware of but never acknowledged - in a complex marketplace, where merchants sold goods manufactured by others, a merchant could own a trademark on goods he did not manufacture. ⁿ¹¹⁸ A merchant could sell products made by a wholly different manufacturer, "as frequently occurs today in [the private brand] arrangements, but when he affixed his trademark to them he signified that they met his standards of quality and that his business reputation stood behind them." ⁿ¹¹⁹ Under this system, trademarks were not only a product identifier but also a symbol or guarantee of the quality and standards employed by the mark owner. ⁿ¹²⁰ This resulted in economic and legal acceptance that a trademark was valuable separate and apart from the products it signified in commerce. ⁿ¹²¹ Namely, a trademark captured a business's goodwill,--in some instances, possibly even more than the trademark identified a particular producer.

The acceptance of goodwill as part of the trademark package was possibly inevitable. Nonetheless, it caused new frustrations because few could precisely define goodwill, consistently signify it, or determine its valuation. ⁿ¹²² Still, its presence in the marketplace was universally recognized and undeniable; goodwill or favor towards a brand is the intangible guide that presupposes repeat purchases. ⁿ¹²³ It is the lifeblood of consumer loyalty. The Supreme Court of Georgia wrote about goodwill's abstract nature in *Smith v. Davidson*:

It is difficult to conceive of the good will of a business apart from the tangible properties used in such business, or as a thing of form and substance. It is more like a spirit that hovers over the physical, a sort of atmosphere that surrounds the whole; the aroma that springs from the conduct of the business; the favorable hue or reflection which the trade has become accustomed to associate with [*22] a particular location, or under a certain name. As fragrance may add loveliness to the flower from which it emanates, so good will may add value to the physical from which it springs

ⁿ¹²⁴

Goodwill has developed into a business commodity apart from a producer's ability to distinguish his mark in consumer awareness. ⁿ¹²⁵ A producer attempts to control the distinctive use of his mark as a product identifier, but his goodwill rests in the hands of consumers and is a prize when it is received. ⁿ¹²⁶

Consumers do not make purchasing decisions simply because they can distinguish a product from others. ⁿ¹²⁷ In an option-filled market, consumers make decisions based on product and brand favorability. ⁿ¹²⁸ Consumer recognition of a trademark may "recall a previously-formed regard for the product that is favorable, unfavorable[,] or neutral." ⁿ¹²⁹ These consumer impressions "influence or even determine" the product selections of consumers. ⁿ¹³⁰ Businesses stand to gain when they are able to communicate to the consuming public the qualities and standards they have adopted. ⁿ¹³¹ Ensuring a business's image is accurately conveyed becomes a secondary effort to a consumer's ability to identify a business's products, since consumer choice lends itself to favorability over product distinction alone. ⁿ¹³²

Though the association of goodwill with a trademark is here to stay, it has frustrated the governance of trademark law and the protections it affords. Quality Theory cannot operate apart from Source Theory; a consumer must first distinguish products before he can apply favorability. ⁿ¹³³ However, Source Theory can function on its own without the need to decipher brands' consumer favorability. ⁿ¹³⁴ A trademark's ability to signify a producer's goods and services remains intact regardless of whether consumers attach goodwill to a brand's trademark. ⁿ¹³⁵ Consumers' awareness of a

trademark does not necessarily mean consumers have particular impressions of a certain brand, but the trademark may still function to communicate what products are sold by the brand. The Supreme Court has said:

[*23]

There is no such thing as property in a trade-mark except as a right appurtenant to an established business or trade in connection with which the mark is employed... . The right to a particular mark grows out of its use, not its mere adoption; its function is simply to designate the goods as the product of a particular trader and to protect his good will against the sale of another's product as his; and it is not the subject of property except in connection with an existing business. ⁿ¹³⁶

Expanding to account for the positive value a business's goodwill adds to its trademark, the courts have offered several additional remedies for trademark infringement, which have adjusted the scope of infringement from "likelihood of confusion" to realms of misappropriation and unfair use. ⁿ¹³⁷

2. Dilution: Remedial Expansion in Trademark Law

While Quality Theory gave unsure mark owners a means to conceptualize property rights, it distorted trademark law's original recourse, use of a mark likely to cause consumer confusion because the mark's value was no longer solely in its ability to link consumers from product to brand. ⁿ¹³⁸ Now, infringement has to also contemplate the goodwill a business might have created. ⁿ¹³⁹ Trademark dilution arose as a variant of infringement. ⁿ¹⁴⁰ Courts now protect trademark owners from uses formerly not considered to have been infringements and have offered protections showing they view the trademark as more than a product identifier. ⁿ¹⁴¹ It is theorized that courts "are well on their way to divorcing trademarks entirely from the goods they are supposed to represent." ⁿ¹⁴²

As businesses grow and succeed in the marketplace, their marks gain notoriety and even fame. ⁿ¹⁴³ These trademarks have developed a uniqueness given the distinct and pervasive goodwill developed by the owners. ⁿ¹⁴⁴ Trademark dilution grew out of the proposition that any use of marks similar to famous marks ⁿ¹⁴⁵ weakened the senior mark regardless of whether it actually [*24] caused consumer confusion. ⁿ¹⁴⁶ The Federal Trademark Dilution Act provided, "The owner of a famous mark shall be entitled ... to an injunction against another person's commercial use in commerce of a mark or trade name, if such use begins after the mark has become famous and causes dilution of the distinctive quality of the mark." ⁿ¹⁴⁷ Departing from the traditional foundation of trademark infringement, trademark dilution sidesteps the "likelihood of confusion" test and prohibits another's use of a similar mark not in competition or connection with those of the famous mark owner. ⁿ¹⁴⁸

Specified by the federal statute, "federal dilution is actionable in two situations: (1) dilution by 'blurring' and (2) dilution by 'tarnishment.'" ⁿ¹⁴⁹ Blurring occurs when the degree of similarity and use between famous and secondary marks is strong enough that consumers could wrongfully associate the marks together, thus, diminishing the distinctiveness of the famous mark. ⁿ¹⁵⁰ Dilution by tarnishment is actionable when consumers perceive an association between famous and secondary marks, potentially damaging the reputation of the famous mark. ⁿ¹⁵¹ Blurring and tarnishment are restricted by forms of speech protected by fair use principles under the Lanham Act. ⁿ¹⁵² Uses of famous marks are permitted in connection with advertising that encourages consumers to compare products or in connection with parody, critique, or commentary on the owner of the famous mark. ⁿ¹⁵³

3. Frustrations of Dilution (Goodwill Protection)

"The requirement that the mark be 'famous' and 'distinctive' significantly limits the pool of marks that may receive dilution protection," ⁿ¹⁵⁴ but these "famous" mark owners often have the financial resources to use this protection as a weapon by targeting brands that stand no chance of siphoning the goodwill of the famous mark. Recently, in Starbucks

Corp. v. Wolfe's Borough Coffee, the Second Circuit rendered dilution claims slightly easier [*25] to win by asserting that "some - but not substantial - similarity between the subject marks" was necessary to "demonstrate a likelihood of dilution." ⁿ¹⁵⁵ From the outset, trademark principles have been devised to tightly control the monopolistic tenants of mark ownership. Even if the adoption and use of a mark give it value and render it protectable, the letters, words, numbers, and colors comprising the marks remain property of the public, free to adopt them in distinct ways. The core of trademark law, resting on the "likelihood of confusion" standard for infringement, left open the opportunity to use similar marks so long as they were not caught in a market crossover.

The recognition that a trademark encompasses the goodwill of a business incorporates the notion that a trademark's prominence is tied directly to the business's longevity. It follows that protections specifically for goodwill were created. Although dilution is an appropriate remedial measure for protecting a business's image and reputation, broad application by courts conflicts with the trademark objective to foster a free and open marketplace. Faced with expensive litigation brought by a large company, regardless of whether the claim claims likelihood of confusion or likelihood of dilution, a small business is likely to trade in the mark at issue for one that is less troublesome. The power and control this places in the hands of large businesses, without checks and sanctions for unfounded lawsuits, permits forms of trademark bullying.

4. The Internet and Initial Interest Confusion

Much like dilution, the theory of initial interest confusion developed as a mechanism to provide a remedy to mark owners whose marks were used by unauthorized third parties to capture a consumer's interest and trade on the goodwill of the trademark. Following the development and proliferation of the Internet, this theory of confusion has been used with increasing frequency, and it is seen most often in the context of domain name disputes, metatag use, and keyword advertising. However, the doctrine has developed inconsistently, with no definitive test and no certainty as to the factors that a court will consider in deciding initial interest confusion cases.

In the early development of online trademark litigation, which dealt primarily with domain names, many courts were reluctant to extend trademark to scenarios where there was no likelihood of confusion. ⁿ¹⁵⁶ Indeed, the consensus at the time was simple: trademark uses must be analyzed according to the traditional likelihood of confusion factors when determining infringement online. ⁿ¹⁵⁷ Evaluating evidence of actual confusion, the district court in CD [*26] Solutions, Inc. v. Tooker wrote, "While an Internet user seeking to purchase a product of defendants may go initially to the plaintiff's website, it is unlikely that an actual or prospective customer of defendants would be confused in its purchasing decision" ⁿ¹⁵⁸ As Internet usage increased and technology advanced, many courts became concerned and could not fathom that the use of a trademark in a domain name did not give rise to an actionable claim under trademark law. The shift in attitude of the courts toward infringement online began the great migration from a requirement of a thorough "likelihood of confusion" inquiry to opinions, which seem to be solely concerned with the goodwill associated with the mark. Indeed, this abandonment of a likelihood of confusion requirement for infringement on the Internet created a split within and among circuits. ⁿ¹⁵⁹ Ultimately, courts began to advance the doctrine to find liability for perceived bad acts without engaging in any analysis, concluding the existence of initial interest confusion and therefore infringement. ⁿ¹⁶⁰ As noted by Notre Dame law professor Mark McKenna, trademark owners have become increasingly astute at equating any use of a trademark as causing confusion (and therefore infringement) and capitalizing on the generalization of confusion as harm. ⁿ¹⁶¹ McKenna is certainly correct that, under modern trademark law, confusion is too often equated to harm and has created the excess that one sees in trademark confusion doctrine.

5. The Reality of the Internet Troika

Imagine for a moment that you are in the market for a tablet computer. While you are not necessarily interested in purchasing an iPad, it is the only thing you can conjure up for your Internet search to describe the type of product for which you are searching. You go to Google, rather than searching for "tablet computers," you type in the search term "iPad." If the search engine [*27] returns results for the Samsung Galaxy Note, according to the "Internet troika" (described below) Samsung has committed trademark infringement. Liability attaches, notwithstanding the facts that

you are not interested in purchasing a particular make or model of tablet, you are clearly aware that Samsung and Apple market competing products, and there is no confusion as to the source. The Internet troika originated with the Ninth Circuit in *Brookfield Communications v. West Coast Entertainment Corp.* and has been used as the benchmark for countless decisions involving initial interest confusion online.ⁿ¹⁶² That "troika" of "(1) the similarity of the marks, (2) the relatedness of goods or services, and, (3) the simultaneous use of the Web as a marketing channel,"ⁿ¹⁶³ has been cited and used by courts extensively in decisions due to their viewing the unauthorized use of trademarks online as inherently creating harm to the goodwill of the brand. Indeed, trademark owners in their policing policies have used this same rationale. Use by a third party of a similar mark is bound to lead to confusion, and this encourages owners to protect their marks with active enforcement even in the absence of any true likelihood of confusion. After over a decade, the Ninth Circuit abandoned the troika and writing for the court in *Network Automation v. Advanced Systems Concepts*, Judge Wardlaw stated that the court "did not intend *Brookfield* to be read so expansively as to forever enshrine these three factors--now often referred to as the 'Internet trinity' or 'Internet troika'--as the test for trademark infringement on the Internet."ⁿ¹⁶⁴ Recognizing the error that arose from reliance on the Internet troika, the court abandoned the limiting view, writing that "given the multifaceted nature of the Internet and the ever-expanding ways in which we all use the technology, ... it makes no sense to prioritize the same three factors for every type of potential online commercial activity."ⁿ¹⁶⁵ There is no doubt that courts that handle trademark cases, like those from the Ninth Circuit, need to evaluate their policies of policing and determine when policing evolves into bullying.

IV. TRADEMARK POLICING VERSUS TRADEMARK BULLYING

For the trademark system to maintain its core functionality, trademark owners must be fervent in protecting their marks. A valid trademark is not something that just materializes into being. It is an investment chosen by a producer, who in turn nurtures it into an effective device for communicating [*28] brand and product information. Rapid growth and expansion of trademark law have placed a lot of weight on trademark owners' shoulders. Trademarks first developed as a means to designate the source or origin of a particular product or service in order to distinguish products and services from one another, but trademarks have since grown to denote standards of quality, symbolic of goodwill, which guide consumer purchases and loyalty.ⁿ¹⁶⁶ Owners invest time and money into building business symbols and deserve the right to protect them.

Doctrinal pressures also exist to encourage diligence in trademark protection. The doctrine of laches, a long established concept, forbids a mark owner to assert his trademark rights over a secondary user when in the past the mark owner has not consistently or appropriately asserted.

"Laches is an equitable time limitation on a party's right to bring suit, ... resting on the maxim that one who seeks the help of a court of equity must not sleep on his rights."ⁿ¹⁶⁷ The party asserting laches must show "(1) [the plaintiff's delay] in filing suit was unreasonable, and (2) [it] would suffer prejudice caused by the delay if the suit were to continue."ⁿ¹⁶⁸

Now a mark owner must rebut the underlying presumption of laches to recover from another who uses improper mark policing as a defense; this limits the relief available in infringement lawsuits.ⁿ¹⁶⁹ Laches presumes that an owner who makes little, inconsistent, or no effort to assert trademark rights perceives no value in his mark and, thus, acquiesces to its unfettered use. Application of laches is highly circumstantial, "not determined by simple rules of thumb or rigid legal rules ... [but] by a consideration of circumstances of each particular case" ⁿ¹⁷⁰ Knowing the highly circumstantial nature of the application of laches, the motivation to assert superiority over other mark uses becomes clear. Failing to stand against one's confusing use may lead to preclusion from future threats and limit options for relief.

However, where laches motivate mark owners to police their marks, it also gives legitimacy to trademark bullies. Courts expect businesses to diligently police their marks in order to expect remedies against alleged infringement, but remain rather tight-lipped on when an owner's mark policing has [*29] become excessive. Courts have yet to truly explore the realm of sanctioning unwarranted lawsuits initiated by those plaintiffs who look to assert an excessive

degree of control by use of their financial strength. This is largely because such cases rarely make it to court and thus demonstrates how these trademark bullies have been successful in their bullying efforts. The administrative costs of enforcing trademark litigation, like litigation in general, are often determinative of which conflicts make it before a court. It is a marketplace reality that many small businesses simply do not have the financial means to stand their ground. Weighing against two evils, it is likely more efficient for a secondary mark user to surrender his rights in the mark, despite the expense invested developing it, in order to avoid the expense of litigating in court. Though this is a construct of a marketplace where entities earning large-and small-scale profits coexist, the developing problem of trademark bullying hinders the anti-monopolistic constraints of trademark law.

V. CONCLUSION

Now more than ever, there is need for judicial recognition of when a mark owner has crossed the line in policing his mark past valid protection and into a realm of hindering competition or fostering monopoly. A concerted delineation on the boundaries of mark protection policies, within the context of the policies' effects on smaller businesses, will level the competitive playing field and more closely align trademark practice with its original intentions. Trademark law frequently sees surrender to the stronger party; larger businesses are striking down smaller businesses who attempt to use marks that are similar, yet unlikely to cause consumer confusion. Are consumers likely to believe that George Lucas, who has been a leader in fantasy film and computer graphic design, suddenly opted to get into the niche market of Internet-based ad design? More importantly, are consumers even aware that "droid" signified Lucas-owned products? Not likely so. Consumer understanding would also likely reject the belief that Mark Zuckerberg and Facebook decided to provide educator lesson plans or that Chik-fil-A decided to bring kale to the forefront of its menu.

What should be the resolution to this growing form of abuse? The answer does not lie in deconstructing the settled world of trademark law. An owner has a valid interest in his mark's position, and what it signifies and communicates to consumers in the marketplace. Courts have always recognized the use of trademarks as a tool for protecting producers and business owners but not as a tool meant for control and monopolistic creation. The trademark has seen its own expansion through the historical development of American and foreign free-market economies. A touch of irony exists in the fact that some mark owners are using the system against itself. Courts must now address this important matter and begin to impose sanctions for excessive policing, where claims of superior over secondary marks are superficial or speculative. The doctrine of laches, as a form of estoppel, prevents inconsistent assertion of mark rights, but certainly does not encourage wanton attacks [*30] against less powerful mark users. Ownership of a trademark does not equate to monopoly over that mark, which is emphasized by the "likelihood of confusion" standard for infringement. However, with expansions and new accommodations introduced into the trademark realm, courts are dealing with an evolving being. Courts must make a concerted effort to come together and consider the effect interpretations and standards have upon the commercial population, not just those who they consistently see before their bench.

n14. *Id.*

n15. See Triptrace, *supra* note 12.

n16. Cohen, *supra* note 10.

n17. *Id.*

n18. *Id.*

n19. *Id.*

n20. Masnick, *supra* note 2.

n21. "Producer" is used to denote one as a maker, manufacturer, distributor of goods, or an offeror of services.

n22. See *infra* text accompanying note 117.

n23. See 15 U.S.C. § 1051(a)(3)(D) (2012).

n24. See, e.g., *Inwood Labs., Inc. v. Ives Labs., Inc.*, 456 U.S. 844, 854 n.14 (1982) ("The infringer deprives consumers of their ability to distinguish among the goods of competing manufactures"); *James Burrough, Ltd. v. Sign of Beefeater, Inc.*, 540 F.2d 266, 274 (7th Cir. 1976) ("A 'trademark' is not that which is infringed. What is infringed is the right of the public to be free of confusion and the synonymous right of a trademark owner to control his product's reputation."); *Max Factor & Co. v. Factor*, 226 F. Supp. 120, 124 (S.D. Cal. 1963) ("Under the [trademark] owner's name ... he may protect it ... against those who use the name to sell goods near enough alike to confuse his customers." (quoting *S.C. Johnson & Son, Inc. v. Johnson*, 116 F.2d 427, 429 (2d Cir. 1940))).

n25. See 1-1 Anne Gilson LaLonde, *Gilson on Trademarks* § 1.03[1] (2013) [hereinafter "Gilson"].

n26. *Id.* at § 1.03[11].

n27. *Id.* at § 1.03[2].

n28. See *id.* at § 1.03[3].

n29. See *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 162 (1995) (establishing that a color or symbol may be used as a trademark if it meets the requisite distinction and use); see also *infra* text accompanying note 46.

n30. See Gilson, *supra* note 25, at § 1.03[2].

n31. *Id.* at § 1.03[3], [11].

n32. *Id.* at § 1.03[2].

n33. *Id.*

n34. *Id.* at § 1.03[11].

n35. *Id.* at § 1.03(1).

n36. Jess Bidgood, *Chicken Chain Says Stop, but T-Shirt Maker Balks*, N.Y. Times (Dec. 4, 2011), <http://www.nytimes.com/2011/12/05/us/eat-more-kale-t-shirts-challenged-by-chick-fil-a.html>.

n37. Kirk Phillips, *Which Came First? The Chicken or the Kale?*, BrandSTOKE (Dec. 7, 2011), <http://www.brandstoke.com/2011/12/07/which-came-first-chicken-or-kale/>.

n38. In a conversation with two Baylor law school students, Megan Walker and Wills Collier, the students seemingly hopped onto the corporate bandwagon insisting that Chick-fil-A's action should not be considered "bullying" but rather an attempt to prevent the Eat mor Chickin trademark from dilution. After explaining the requirement for actual dilution versus likelihood of dilution they began to ponder why Muller-Moore did not raise a parody defense. Notwithstanding, outrage of the general public has led to what some might say is a social intolerance of trademark owners' forceful fists against the little guy's expressions that poses no risks whatsoever in creating a likelihood of confusion.

n39. Frank I. Schechter, *The Historical Foundations of The Law Relating to Trade-Marks* 11 (1925).

n40. See Gilson, *supra* note 25, at § 1.06[1] ("Through his mark, a scratchy form of commercial signature, the potter could be identified with the quality of his craftsmanship by all who saw his work." (citing Gerald Ruston, *On the Origin of Trademarks*, in 45 *Trademark Rep.* 127, 127 (1955))); *id.* at § 1.06[1] n.2 ("Ruston cites jars buried in tombs of 1st Dynasty Egyptian Kings, but also mentions markings on pottery of the Stone Age period, c. 5000 B.C.").

n41. *Id.* at § 1.03[11].

n42. See *id.*

n43. See generally Gilson, *supra* note 25, at § 1.06[1].

n44. See *id.* at § 1.03.

n45. *Id.* ("The Industrial Revolution and the Twentieth Century explosions of population, communications, transportation and technology placed the consumer at a substantial distance from the manufacturer."); see also *Family Circle, Inc. v. Family Circle Assocs.*, 332 F.2d 534, 539 (3d Cir. 1964) ("As has been pointed out by the very courts that define trademarks in terms of ownership or origin, that owing to the ramifications of modern trade and international distribution of goods from the manufacturer to the jobber or importer and retailer to the consumer, the source or origin of the goods bearing a well-known trademark is seldom known to the consumer.").

n46. Schechter, *supra* note 39, at 125.

n47. *Id.* at 16 (stating that trade was largely conducted through private "gilds," or organizations, which also presided over arbitrated matters between tradesmen, including when one would use another's mark without permission).

n48. *Id.* at 6 (quoting *Southern v. How*).

n49. See *id.* at 9-10 (treating *Southern v. How* as trademark authority to justify passing off as a well-recognized action for the last 250 years (citing *Magnolia Metal Co. v. Tandem Smelting Syndicate, Ltd.*, 17 R.P.C. 477, 483 (1900))).

n50. See *id.*

n51. See *Blanchard v. Hill*, (1742) 26 Eng. Rep. 692 (P.C.).

n52. See An Act for Better Regulation of the Linen and Hempen Manufacturers in that Part of Great Britain Called Scotland, 1726, 9 Geo. 1, c. 27, § 57 (Scot.).

n53. See Schechter, *supra* note 39, at 130.

n54. See *id.*

n55. See Thomas Jefferson, Secretary of State, *Manufacturer's Marks* (Dec. 9, 1791) ("[A trademark system] would ... contribute to fidelity in the execution of manufacturers, to secure to every manufactory an exclusive right to some mark on its wares, proper to itself."), reprinted in 1 Am. St. Papers Comm. & Navigation 48 (1832).

n56. *Id.* ("That this should be done by general laws ... that this may be done by permitting the owner of every manufactory to enter into the records of the court of the district wherein his manufactory is, the name with which he chooses to mark or designate his wares, and rendering it penal in others to put the same mark to any other wares.").

n57. *See id.*

n58. *See Schechter*, *supra* note 39, at 130-31.

n59. *Hanover Star Milling Co. v. Metcalf*, 240 U.S. 403, 412 (1916) (emphasis added).

n60. *See Schechter*, *supra* note 39, at 134.

n61. *Gilson*, *supra* note 25, at § 1.01 (citing United States Trademark Association 1971 Year End Report).

n62. *Id.*

n63. *See Dep't. of Parks & Recreation v. Bazaar Del Mundo, Inc.*, 448 F.3d 1118, 1125 (9th Cir. 2006) (holding that the common law requires a mark to have been used in commerce before it can be protected by the owner).

n64. *In re Trade-Mark Cases*, 100 U.S. 82, 94 (1879).

n65. *Sengoku Works, Ltd. v. RMC Int'l., Ltd.*, 96 F.3d 1217, 1219 (9th Cir. 1996).

Johnson; Edward Lee; Manoj Mate; Dotan Oliar; Lisa Ramsay; Al and Julie Rosenblatt; Wendy Rosenstein; Chris Sprigman; Ethan Zuckerman; the participants at the 2012 Intellectual Property Scholars' Conference; the participants at the 2013 Chicago IP Colloquium; and the participants at the 2013 WIPIP Conference.

LEXISNEXIS SUMMARY:

... For every Internet shaming campaign that reaches its audience, there may be dozens of attempts at shaming that few people ever become aware of. ... Second, the RIAA's advertising campaign explicitly labeled peer-to-peer file sharing "theft," which likened file sharing to an established shameful behavior and may have triggered the shame mechanism in many who had not previously viewed file sharing as shameful. ... Shame and shaming are major factors in creating intellectual property's negative spaces - areas of creation and innovation that thrive without significant formal intellectual property protection. ... Tattoo artists will copy trademarks and copyrighted works onto clients' skin, but refrain from copying custom tattoos; they enforce these norms through notions of self-respect, shame, and shaming rather than formal legal remedies. ... Shaming influences not only whether, but also how, intellectual property owners enforce their rights. ... In the intellectual property context, shame and shaming allow communities to customize copying and attribution norms to the needs and wants of particular creative communities. ... If shamed targets take shamers up on their invitations to join a community of values, shamers may begin to regain trust in those targets. As discussed above, firms cannot experience shame as individuals do, and while the individuals inside firms may be guided by their own shame or firms may feign shame for reputational reasons, firms as unitary entities are guided by a separate set of principles that may overcome shame.

TEXT:

[*1]

Introduction

Shame is civilizing. It is the governing drive of conscience; if people had no shame, the rule of law would lose much of its power, and might would often mean right. Shaming - the public attempt to impose shame on others - is an equally important driver of behavior. People strive to avoid humiliation and the loss of reputation; we steer clear of "bad" behaviors even if they would benefit us. In the words of Seneca the Younger, "Shame can forbid sometimes what

the law does not." ⁿ¹

Shame and shaming are crucial to our understanding of intellectual property law and norms, and yet they have gone largely unexplored in the intellectual property literature. Many scholars have examined intellectual property norms and how they interact with the law. ⁿ² But it is not enough to point out that someone acts a certain way because of norms; we must also understand the motivational forces that drive people to conform. In the criminal and tax law contexts, scholars have paid ample attention to the role of shame and shaming in governing [*2] behavior and, particularly, in reinforcing formal law. ⁿ³ Yet few have recognized what major roles shame and shaming play in the way people choose to follow or disregard intellectual property law.

In the shadow of formal law, shame and shaming govern intellectual property's liminal spaces, where protection is uncertain or inconsistent with the strictures of formal law. Much intellectual creation occurs in markets, where selfish needs and wants must control. There is no Utopian commons where the fruits of creation and innovation are shared by all; pride and practicality demand some measure of ownership or control, tempting creators and copiers to claim more than they have made. Shame and shaming temper these impulses. They reflect the needs and wants of individual creative communities and, based on those needs, either restrict copying or promote it. Where formal law does not reach, shame and shaming create and facilitate copying norms, imposing order and predictability. Where the law does reach, shame and shaming provide a release valve: the discourse of shame surrounding over-assertions of rights encourages rights holders to forbear from asserting weak or overreaching claims rather than being publicly identified as "bullies" or "trolls." Thus, together, shame and shaming help to create and maintain "low-IP equilibria," ⁿ⁴ where copying norms are created and internalized by the creative community and optimized to its needs, rather than being imposed, top-down, by Congress and courts.

The result is an overlay of shame-and shaming-driven behavior that sits atop, and informally adjusts the boundaries of, formal intellectual property protection. This dynamic establishes and enforces intellectual property "negative spaces" - areas where innovation and creation thrive without significant formal intellectual property protection or enforcement. ⁿ⁵ A number of scholars have explored intellectual property's [*3] negative spaces. ⁿ⁶ Most have conducted case studies, examining such diverse areas as fashion, ⁿ⁷ cuisine, ⁿ⁸ magic tricks, ⁿ⁹ stand-up comedy, ⁿ¹⁰ typefaces, ⁿ¹¹ free and open-source software, ⁿ¹² sports, ⁿ¹³ wikis, ⁿ¹⁴ [*4] academic science, ⁿ¹⁵ jambands, ⁿ¹⁶ hip-hop music, ⁿ¹⁷ tattoo artists, ⁿ¹⁸ and even roller derby pseudonyms. ⁿ¹⁹ Negative spaces like these are crucial pieces of the intellectual property law puzzle. They prove that people create even when they are not guaranteed exclusive control over their creations. For that reason, negative spaces tend to undermine the conventional wisdom that intellectual property law is necessary to promote creation and innovation. But while scholars have paid increasing attention to these areas, none have articulated the importance of shame and shaming in creating and maintaining them.

I submit that shame and shaming are not only major factors in generating negative spaces, but also may help guide our understanding of intellectual property law more generally. Shame and shaming regulate behavior in many settings, but they cannot substitute for formal law. They are too variable, and in some cases are harmful. But shame and shaming are valuable nonetheless: first, they modulate the law, making it stronger or weaker depending on community needs; second, they highlight where the law may draw lines in the wrong places. The role of shame and shaming in creating and governing negative spaces implies that people gravitate toward "set points" of intellectual property protection. They create intellectual property rules where none exist, and they rail against the rules when they are too restrictive. Examining shame and shaming in the intellectual property context indicates what people value in various creative settings and teaches that [*5] the level and details of communities' set points may vary from community to community.

As we consider the proper boundaries of intellectual property protection, therefore, we should consider the roles of shame and shaming in shaping creation, innovation, and copying. This Article first explores the operation of shame and shaming. ⁿ²⁰ Next, it examines the relationships between shame, shaming, and formal law, first generally and then in the intellectual property context. ⁿ²¹ This is followed by an analysis of the benefits and drawbacks of shame and shaming as regulatory mechanisms. ⁿ²² The Article concludes with a brief discussion of the normative implications of shame and shaming for intellectual property law. ⁿ²³ While shame and shaming do not - and should not - replace formal

law, they influence it and sometimes stand in its shoes. When considering whether to implement new protections and whether to carve out exceptions to current protections, lawmakers should take into account how shame and shaming will interact with formal rules, and they should consider whether formal enactments will add value beyond shame-based enforcement.

II. Shame and Shaming

While shame and shaming share common roots, they operate somewhat differently. Shame is a painful emotion of self-judgment, generated by the person who experiences it.ⁿ²⁴ Shaming is an external, and generally public, appeal to the shame of another.ⁿ²⁵ Thus, while both rely on the concept of shame, the entity that feels shame or gets shamed may experience them quite differently. Nevertheless, both have the potential to be powerful shapers of behavior.

A. Shame Defined

Shame is the natural response of psychologically healthy individuals when they fail to conform to their own values or to the prevailing values of their family or social community. For example, people might experience shame if they lie, which is contrary to the value "lying is wrong." Both an excess of shame and the lack of it are associated [*6] with psychological pathology - neuroticism and psychoticism, respectively.ⁿ²⁶ But in limited amounts, shame is not only normal and healthy, but also a necessary element of social cohesion.ⁿ²⁷ Shame prevents chaos by motivating people to follow the norms of society and civilization: they conform, at least in part, because they would be ashamed not to.

Shame operates in the gap between ambition and achievement. Psychologically, people are strongly motivated to align their "actual self" with their "ideal self" and their "ought self."ⁿ²⁸ People feel shame when there is a negative gap between their aspiration level ("I aspire to be a generous person ...") and their perceived self on that trait ("... but I am selfish sometimes").ⁿ²⁹

What is "shameful" varies widely from culture to culture, but the phenomenon of shame is universal and has even been identified in nonhuman animals.ⁿ³⁰ Recent studies have shown that shame may have genetic roots, evolving naturally through individual selection.ⁿ³¹ This makes sense. In addition to enhancing social cohesion, shame benefits those who experience it, as they are less likely to run afoul of rules, and by extension, less likely to experience punishment. Indeed, statistical modeling shows that people who experience shame should have longer life spans than those who do not.ⁿ³²

While shame is innate, what people are ashamed of is defined largely through their interactions with others. Social science research has demonstrated that people consciously or subconsciously absorb and internalize the social norms of community influences such as family, religion, profession, neighborhood, and politics.ⁿ³³ Each community [*7] has a set of beliefs that are generally accepted among community members and are partly sustained by their approval.ⁿ³⁴ Some social norms are widely held, such as manners and etiquette, honesty norms, and the norm against cannibalism. But many social norms vary from community to community.ⁿ³⁵ When people are, or aspire to be, members of a particular community, they see themselves as embodying the ideals of that community. Acting or desiring something inconsistent with those ideals will automatically generate shame.ⁿ³⁶ Shame therefore acts as an enforcer of community norms and values.

Shame does not require an audience per se,ⁿ³⁷ but it does depend on some conception, either real or imagined, of what others would think. Experiencing shame demands either being observed by others - peers, respected authorities, customers, social cohort, society at large - or seeing oneself as one presumes others would.ⁿ³⁸ When people are "ashamed of themselves," therefore, it is because they have internalized a value they ascribe to others and see in themselves a failure to embody that value. In the words of Jean-Paul Sartre: "Shame is by nature recognition. I recognize that I am as the Other sees me."ⁿ³⁹

Shame is related to, but different from, guilt. Although many use the terms interchangeably in common parlance,

they differ to social scientists: guilt is based on individual transgressions, while shame is based on a perceived failure or defect of the whole self.ⁿ⁴⁰ For instance, the sentiment that "I did something wrong," differs from the feeling that "there's something wrong with me." Guilt and shame depend on each other to shape behavior through the "guilt-shame cycle."ⁿ⁴¹ [*8] People feel guilty when they transgress, and then they feel shame for being the sort of person who would do something worthy of guilt.ⁿ⁴² ("There is something wrong with me because I want/embody/am willing to do something inconsistent with society's expectations/norms/mores.") For this Article's purposes, however, the difference between guilt and shame is less important than the difference between shame and shaming.

B. Shaming Defined

While shame is a reflexive, internal emotion, shaming is an external, aggressive action - an appeal to the shame of another, generally before a public audience. Shaming may have many motivations, including a desire to impose norms on another, to trigger someone else's shame, or to inflict reputation-based punishment. Regardless of the motivation, shaming appeals to community norms and attempts to impose them on someone else.

Sociologically, shaming includes "all social processes of expressing disapproval which have the intention or effect of invoking remorse in the person being shamed or condemnation by others who become aware of the shaming."ⁿ⁴³ Shaming may take many forms: scolding, rebuking, ridiculing, scorning, avoiding, and shunning are all varieties of shaming sanction.ⁿ⁴⁴ Shaming is often, but not always, directed at stigmatizing a transgressor. As Dan Kahan has explained, public shaming may take the form of stigmatizing publicity (e.g., publishing a list of "johns" to stigmatize those who violate anti-prostitution norms); literal stigmatization (e.g., compelling someone to wear a badge identifying herself as a transgressor); self-debasement (e.g., requiring someone to perform a publically debasing act, such as carrying a sign stating that she stole from a particular retailer); or contrition (e.g., requiring a public apology).ⁿ⁴⁵ Although shaming may be directed privately at the transgressor, it is usually also directed at a broader audience.

Thus, most shaming has two audiences. First, it is directed at the "shamed" entity, as it may cause the target to internalize the values of the shamers or to experience feelings of shame. Second, it is directed [*9] to a community of listeners who share the shamers' values and who may judge the target according to those values. For example, shaming is a core element of picketing: striking workers' signs say, "Shame on [employer]," not only to hurt the employer's feelings, so to speak, but also to harm the employer's reputation - and by extension, its bottom line.

C. How Shame and Shaming Shape Behavior

Both shame and shaming are powerful behavior shapers.ⁿ⁴⁶ Sometimes they work in concert: members of a community adhere to norms and ideals both because they want to avoid feeling shame and because they want to avoid being shamed or expelled from the community.ⁿ⁴⁷ Although the two forces may complement each other, they operate differently: shame operates through automatic self-restraint, whereas shaming operates through conscious manipulation by others.ⁿ⁴⁸ As a result of this difference, the behavioral effects of shaming are more complex, and less reliable, than the behavioral effects of shame.

1. Shame

People fear shame because shame is painful. Long ago, Emile Durkheim, Talcott Parsons, and other social researchers posited that people often comply with internalized norms in order to avoid experiencing shame, and this conclusion has been reinforced by more recent experimental evidence regarding brain activity.ⁿ⁴⁹ In fact, research indicates that shame is more powerful than law in shaping behavior. For example, empirical studies have shown that shame is more effective than rules at securing compliance with college anti-underage drinking policies;ⁿ⁵⁰ that appeals to conscience are more successful than threats [*10] of punitive sanction in securing compliance with tax laws;ⁿ⁵¹ and that hard-core criminals will avoid informing on others, even when informing would have legally beneficial effects, because they are ashamed to "snitch."ⁿ⁵² Thus, shame may drive someone to refrain from behavior even when formal law permits it, or to engage in behavior even when formal law prohibits it.ⁿ⁵³

Shame derives its power from community identity. Commercial chefs, for example, internalize the values "it's bad to copy someone's recipe exactly" and "it's important to give credit to chefs who develop significant recipes."ⁿ⁵⁴ Accordingly, chefs comply with the norms of originality and attribution associated with those values. Members of the open-source movement internalize the ideal "software sharing is good" and comply with the distribution and license-proliferation norms associated with it.ⁿ⁵⁵ When people violate community norms, they feel a threat to their very identities.ⁿ⁵⁶ This makes the fear of shame so potent that people follow community norms even when the norms may not be in their immediate interest. For example, someone who has internalized the value of sharing software code will do so even in cases where sharing the software code might be financially harmful, or where keeping it secret might be financially beneficial.ⁿ⁵⁷

Shame effectively shapes even unobserved and unobservable behavior, because violators of community norms fear losing identity or self-respect.ⁿ⁵⁸ Thus, shame can enforce norms even when they are [*11] sporadically or non-uniformly enforced, as long as community members understand those norms to be community values or ideals.

2. Shaming

Shaming, unlike shame, does not rely exclusively on internalization, but also operates through public perception. Shaming can make a broader audience - members of a community who share the values of the shamer - dislike the shamed entity, and therefore can harm even an entity that does not share the community's values. Shaming sanctions, such as shunning, can harm an entity's reputation, identity, or even profitability. Other shaming sanctions, such as rebuke and recrimination, can lead to humiliation - the "manifestation of shame which is the product of action perpetrated against the self by someone else."ⁿ⁵⁹ This in turn results in an actual or presumed loss of reputation. Since entities want to avoid the disapproval of others, they tend to avoid behavior that would lead to public shaming. Thus, public shaming may shape behavior even when the shamed entity has not internalized the value in question - but it is doubtless most effective when the shamed entity also experiences internal shame as a result of having internalized the value.ⁿ⁶⁰ In those settings, shaming has the potential to be more powerful than physical or pecuniary punishment. Growing up, many children are far more moved by hearing a parent say, "I am ashamed of you," than by other punishments, such as being spanked or having their allowance reduced. The same reasoning extends to the context of formal legal punishment.

Shaming can also work on firms - collective entities such as corporations, partnerships, and associations. Because shame is a human emotion, firms cannot "have shame" as natural people do. Firms lack the emotional mechanisms required to feel, process, or react to shame. But this is not to say that shame has no influence on firm behavior. Firms are comprised of people who (unless they are pathological) undoubtedly experience shame. Individuals' shame may particularly influence small or closely held corporations, and may influence larger firms as well, because the shame of a firm's leaders will at least partially guide the firm's behavior. But the collective shame-driven behaviors of multiple individuals - who may not have internalized the same, or even consistent, values - is less predictable than the individual shame-driven behavior of a single person. In addition, the existence [*12] of a corporate structure, and the presence of other people as a buffer, may make larger corporate entities systematically insusceptible to shame, as they may permit individuals to avoid taking internal responsibility for any value-betraying desires. Therefore, although individuals within a firm will experience their own shame, the firm as a whole cannot be expected to "have shame" as the individuals do.

Although shame may not control corporate entities, public shaming can. It is often effective: we can all think of countless instances in which corporations, universities, sports teams, and the like have been effectively shamed into changing their policies.ⁿ⁶¹ Research shows that shaming works on corporations largely because they are concerned with reputation.ⁿ⁶² As social scientist Raul Lopez-Perez queries, "Why should firms spend huge amounts of money in efforts to improve society and safeguard the environment, guided by ideas of Corporate Social Responsibility ... , if [they thought] nobody cared about that?"ⁿ⁶³ In the intellectual property context, Internet shaming has unquestionably influenced the behavior of potential IP bullies. Many attorneys now advise against sending cease-and-desist letters to "gripe site" operatorsⁿ⁶⁴ - even letters the senders might believe to be "reasonable" - because of the risk that a site

operator will post the letter publicly, harming the sender's reputation. ⁿ⁶⁵

The reasoning behind this response may be cynical rather than ethical: firms make business decisions based on what will help or harm [*13] their bottom lines. But even these decisions depend on firms' presumptions about the shame-based values of consumers, as consumers generally want to patronize businesses they approve of. Consumers feel shame when they support businesses that betray their values. ("I am ashamed to be the sort of person who supports a business that pollutes the environment or engages in other practices I abhor.") Businesses want prospective consumers to see them as embodying the consumers' values and are therefore keenly aware of the reputational impact of shaming. While public shaming may not trigger the "shame" of a business per se, it may compel a business to feign shame for reputational and, by extension, commercial purposes.

One might assume that public shaming is a more powerful behavior shaper than internal shame because public shaming works in two ways - emotionally and reputationally - while internal shame works only emotionally. But the contrary is true: as a behavior shaper, shaming is actually less predictably effective than shame. The effects of shame on individual emotion are automatic, but the effects of shaming are not. Shaming, unlike shame, depends on the beholder.

Shaming demands, at least in part, that the target have basic respect for the shamer's opinion, or the opinions of the shamer's audience. Shaming has little effect if the target perceives its actions to be justified or misunderstood: "If the violator shrugs off the criticisms as a product of ignorance, malice, or envy, and in addition anticipates no bad effects on him from the reception of the criticisms by other people, the criticisms will fail as sanctions for the criticized act." ⁿ⁶⁶ This has particularly broad implications for firms, as they cannot experience the emotional aspect of shaming. Shaming, therefore, has little power over firms that do not depend on public opinion for profits or market share. ⁿ⁶⁷ A firm that believes its reputation does not "matter" may simply ignore any attempts at shaming. ⁿ⁶⁸ Indeed, even if reputation-based shaming does influence public opinion, firms may brush it off if they don't perceive the "public" as significant enough to affect profits. An oil company can tolerate being labeled a "polluter," and a [*14] manufacturer an "exploiter of workers," unless they believe that a meaningful number of relevant purchasers care enough to buy exclusively from "eco-friendly" and "worker-friendly" companies. ⁿ⁶⁹ In addition, different people may hold different, and sometimes diametrically opposed, values regarding what is shameful. While some viewed the public announcement by restaurant chain Chick-Fil-A that it supported anti-gay causes as shameful, others thought it worthy of celebration. ⁿ⁷⁰ In the absence of an authoritative consensus regarding what constitutes good-type or bad-type behavior, shame and shaming cannot provide consistent governance and will inevitably be unsatisfying for some portion of the population.

Furthermore, reputation-based shaming is unlikely to matter unless it reaches the ears and eyes of people who care. For example, although the website Chilling Effects Clearinghouse (Chilling Effects) performs the valuable service of collecting overzealous cease-and-desist letters and takedown notices, ⁿ⁷¹ there is no way of knowing whether Chilling Effects succeeds in reducing the aggressiveness of IP bullies. For every Internet shaming campaign that reaches its audience, there may be dozens of attempts at shaming that few people ever become aware of. And while Internet shaming may be growing as a method of enforcing community values on perceived transgressors, ⁿ⁷² the capacity of listeners may not be growing commensurately. Some percentage of shaming campaigns, therefore, will just be shouting into the wind - and it is difficult, if not impossible, to predict which ones.

In addition, shaming works best if the transgressive behavior is either rare or rarely detected. Studies have shown that once behavior is common, it becomes accepted, and shaming is no longer effective as a [*15] punishment or deterrent. ⁿ⁷³ Similarly, shaming may actually promote bad behavior when the behavior is common, since it may highlight the fact that "everyone is doing it." ⁿ⁷⁴ In the intellectual property context, this carries an ironic twist: the more that IP bullies are shamed, the less their practices may be seen as shameworthy.

Empirical studies show that, even in individuals, shame is a more powerful behavior shaper than shaming. One study established that, although both shame and shaming were more effective than rules in securing students' compliance with college underage drinking policies, students' internal shame was more influential than external shaming penalties, such as "name and shame" lists or embarrassment. ⁿ⁷⁵ Another study found that appealing to

taxpayers' consciences was more successful in securing their compliance with tax laws than threatening them with punitive sanctions. In addition, the study found that voluntary compliance is more likely when an action is deemed important in the wider society or community. Thus, people are motivated more by community approval than by community scorn.ⁿ⁷⁶

These findings reflect that while the pain of shame is automatic, the pain of shaming can be circumvented by rejecting the shamer's values. Shaming can even generate rage and rebellion.ⁿ⁷⁷ The stigmatizing effect of shaming can drive targets out of a community instead of pulling them in, creating "outsiders" who feel they owe nothing to the community and feel no discomfort in transgressing.ⁿ⁷⁸

3. Disintegration vs. Reintegration

Social scientists have struggled to discern what causes shaming to backfire into rage or rebellion. The most prominent theory originates with sociologist John Braithwaite, whose work focuses predominantly on shaming and crime. Braithwaite divides shaming practices into "disintegrative" and "reintegrative" varieties.ⁿ⁷⁹ Disintegrative shaming stigmatizes offenders by alienating them from a community. Thus, [*16] disintegrative shaming may not prevent unwanted behavior - and in fact, may promote it - because instead of creating an incentive to conform to norms, stigmatization creates outcasts who reject community values and consequently repeat their behavior without fear of emotional pain.

In contrast, reintegrative shaming incorporates some notion of forgiveness or repentance and a renewed relationship with the offender. Braithwaite argues that it is therefore much more effective at preventing crime (and by extension, other behaviors unacceptable to the prevailing community). In his words, "the key to crime control is cultural commitments to shaming in ways that I call reintegrative."ⁿ⁸⁰ Unlike stigmatization,

reintegrative shaming ... is disapproval dispensed within an ongoing relationship with the offender based on respect, shaming which focuses on the evil of the deed rather than on the offender as an irremediably evil person, where degradation ceremonies are followed by ceremonies to decertify deviance, where forgiveness, apology, and repentance are culturally important.ⁿ⁸¹

Where disintegrative shaming tells the transgressor, "you are bad," reintegrative shaming tells the transgressor, "do better next time."

Braithwaite's theory is instinctively appealing, but incomplete. Other studies show that the effectiveness of shaming depends on interdependency between the shamer and the transgressor.ⁿ⁸² These findings are consistent with the limits of shaming discussed above: reputation-based shaming works only if (1) it is actually likely to influence the target's reputation and (2) the target cares. In short, an offender who feels no relationship with the shamer is not the fittest candidate for reintegration.

III. Shame, Shaming, and Law

Shame, shaming, and law share a long common history as systems of social control. At a fundamental level, shame and formal law are intertwined. In most cases, formal law embodies the values of society, and breaking the law is considered per se shameful.ⁿ⁸³ This shame [*17] functions even when people may not agree with a particular law: even someone who believes that drugs should be legalized may refrain from taking drugs because it is illegal - and thus shameful - to take them.ⁿ⁸⁴

Shaming, too, has long been used as a tool of law enforcement. Historians have tracked the existence of parallel and complimentary systems of law and shaming at least as far back as ancient Greece, and anthropologists have found it to be a universal phenomenon.ⁿ⁸⁵ Shaming penalties - ranging from public physical punishments such as whippings and hangings to more psychologically driven shaming via stocks or pillories - were common forms of formal law enforcement imposed by religious and state authorities in colonial America.ⁿ⁸⁶ Shaming's popularity as an official penal technique waned in the nineteenth century, likely due in part to the influence of the Quakers - who advocated for rehabilitative and educative punishment - and partly to social science work of the day, which favored swift, certain punishment over more flamboyant options.ⁿ⁸⁷

Today, so-called scarlet letter punishments have returned to vogue as alternatives to the cost and time of prison. A Milwaukee judge offered reduced jail time to a convicted drunk driver who agreed to wear a sandwich board publicly admitting his crime.ⁿ⁸⁸ One Florida judge commonly sentences thieves to carry a sign in front of the place they stole from, stating, "I stole from this store," in lieu of fines or jail time.ⁿ⁸⁹ Public shaming via apology and advertisement are also on the rise as formal punishments for white-collar crime. Informal extrajudicial shaming, such as conducting a "perp walk" for white-collar criminals, is similarly growing in popularity.ⁿ⁹⁰ Furthermore, several states publish lists of tax offenders.ⁿ⁹¹ In most contexts, shame and shaming reinforce formal law. There are a few outlying exceptions to this: for example, in communities of hard-core criminals, shame reinforces anti-"snitching" norms that conflict with law enforcement.ⁿ⁹²

A. IP, Specifically

The outlying exception in the criminal context seems to be the norm in the intellectual property context: While shame and shaming reinforce formal intellectual property law in some ways, they may actually do even more to work against it. Shame and shaming create rules where formal intellectual property law provides none; and where formal law does provide rules, shame and shaming limit enforcement.

For many, intellectual property infringement is shameful, just as violating criminal law is. By labeling certain conduct as "infringing," society identifies it as transgressive, and potential offenders refrain from infringing because they fear the shame of transgressing. External shaming reinforces this; it is likely that shaming has been an informal remedy for unauthorized copying for as long as there has been unauthorized copying.ⁿ⁹³ Recently, the Recording Industry Association of America (RIAA) employed several varieties of shaming to stem the tide of infringing music piracy. First, the RIAA's highly publicized suits against file sharers made examples of a few file sharers - a modern-day pillory - and reinforced the concept that infringement is shameful.ⁿ⁹⁴ Second, the RIAA's advertising campaign explicitly labeled peer-to-peer file sharing "theft," which likened file sharing to an established shameful behavior and may have triggered the shame mechanism in many who had not previously viewed file sharing as [*19] shameful.ⁿ⁹⁵ This example demonstrates how external shaming can define what is shameful. Although a great deal of music file sharing takes place today, some reports say that it has declined somewhat,ⁿ⁹⁶ and many people doubtless elect to not engage in file sharing because they have internalized anti-file sharing values. People, whether they share files or not, are now more likely to believe that file sharing is "wrong."ⁿ⁹⁷

File sharing is only one example of this phenomenon. Because small-scale copyright and patent infringements are difficult to detect, most potential infringers would probably never be caught. But they are guided by conscience; they refrain from infringing not because they fear enforcement, but because they believe infringement is shameful. In that way, shame and shaming operate in the intellectual property law context exactly as they do in other contexts.ⁿ⁹⁸ But shame and shaming also do something else in the IP context: they supplant and re-form formal law, creating restrictions and freedoms that formal law does not. Shame and shaming are major factors in creating intellectual property's negative spaces - areas of creation and innovation that thrive without significant formal intellectual property protection. These areas are important because they tend to defy the conventional wisdom that intellectual property exclusivity is universally necessary as an incentive for creation and innovation. Understanding what makes these areas function, therefore, helps us understand when formal protection is, and is not, needed.

[*20] Shame and shaming create and govern these spaces in two ways. First, in some creative communities, shame and shaming govern copying behavior when there is no formal law in place. Second, shame and shaming help discourage intellectual property owners from enforcing their intellectual property rights in overreaching ways. Shame and shaming are therefore among the factors that help to sustain low-IP equilibria.

1. Fear: Shame and "IP Without IP"

When people have internalized values regarding copying, they are ashamed to violate them, regardless of what the law dictates. This is just as true in areas where formal intellectual property law does not reach - areas that I call "doctrinal no man's land" ⁿ⁹⁹ - as it is in areas well controlled by formal intellectual property law. The result is that, in doctrinal no man's land, individuals conform to community norms regarding copying without the strictures of formal law, creating "IP without IP." ⁿ¹⁰⁰

Even when formal law might permit copying in various contexts, shame prevents it, or shapes the behavior of would-be copiers. For example, copyright fair use rules allow scholars to rely on quotations from other scholars' work, ⁿ¹⁰¹ and law does not require attribution to the original work. Yet scholars still cite each other when they use quotations. Scholars even cite each other when there is no meaningful risk that their plagiarism would be discovered, as when relying on obscure sources or student research. Why cite? Taking credit for another's ideas might, especially in a world without anti-plagiarism norms, be beneficial to the plagiarist. But we live in a world that values citation, and scholars have internalized that norm. Scholars would be ashamed to take credit for others' work (and rightly so). Perhaps scholars share other concerns as well: a desire for reciprocal citation, for example, or a desire to appear well-read. But a great many, no doubt, cite because they believe it would be wrong not to.

Empirical case studies indicate that scholars are not alone in adhering to copying and attribution norms because they would be ashamed not to. Haute cuisine chefs maintain an unspoken, yet well-defined, [*21] set of sharing, anti-copying, and attribution norms that differ significantly from the strictures of formal law. ⁿ¹⁰² Roller derby participants register their pseudonyms in a sport-wide database and consult that database before choosing pseudonyms. Although the law is silent on the question of roller derby pseudonym copying, the participants know that copying would betray community values, and being part of the community is "central to the derby experience." ⁿ¹⁰³ Tattoo artists will copy trademarks and copyrighted works onto clients' skin, but refrain from copying custom tattoos; they enforce these norms through notions of self-respect, shame, and shaming rather than formal legal remedies. ⁿ¹⁰⁴ Comedians refrain from copying not only expression (as copyright law would demand), but also ideas, because they believe joke-stealing is wrong. ⁿ¹⁰⁵ Typeface designers avoid copying designs verbatim because to do so would be "dirty pool." ⁿ¹⁰⁶ Free-software advocates "see avoiding proprietary or commercial entanglements as a moral imperative." ⁿ¹⁰⁷

Although the interviewees in these case studies seldom use the word "shame," they consistently refer to notions of conscience and community values in identifying the taboos and obligations of their particular negative spaces. This amounts to shame: the fear that if they do not conform, they would be failing to live up to the values of their community. This is distinct from concerns about shaming, humiliation, or the embarrassment of being exposed, although certainly each of those may play a part in the decision to comply with community norms. ⁿ¹⁰⁸ Rather, it is about internalizing values, desiring to live up to them, and fearing the emotional pain of shame that would result from betraying those values.

Thus, the individual, internal shame of participants helps to sustain the delicate equilibrium of low-IP negative spaces, where creation [*22] thrives without significant formal intellectual property protection. In these communities, the law permits copying - even unlimited or unrestricted copying. One might expect that freedom to copy would undermine the incentive to create in those areas. It does not, likely because creators in those areas are motivated by reasons other than exclusivity or direct pecuniary benefit. For example, creators may create out of a desire for recognition or a desire to be part of a creative community. For creators who desire recognition, a community that permits widespread copying but demands attribution is ideal. ⁿ¹⁰⁹ Creators who merely desire community membership do best to find a creative community and adhere to its norms, whatever they may be. In either case, the creator will be

highly motivated to conform to community norms, and will feel shame for violating them, because those very norms are among the creator's reasons for joining the community. And even if a creator does not possess the community's values at the outset, the creator will eventually internalize them and feel shame for violating them.

Like the norm against snitching in criminal circles, here shame arises from doing something that is perfectly legal. The shameful behavior may even be salutary from a broader societal perspective, but it violates community norms. Perhaps society would benefit from more imitations of haute cuisine recipes. But because the behavior is taboo among a relevant segment of society - other chefs and "foodies" - chefs generally refrain from copying.ⁿ¹¹⁰ Shame may be an ideal enforcement mechanism when formal law will not work. For example, performance magicians have great difficulty relying on formal law to protect their tricks, because seeking or enforcing protection would usually require disclosing one's secrets. Instead, magicians abide by a culture of secrecy, policed by shame.ⁿ¹¹¹ Where formal law leaves off, shame takes over.

Because they are backed by the power of shame, these norms-based systems are more sustainable than they might appear. One might expect a handful of self-interested rogues to stray from a norms-based system, thereby causing it to collapse. According to Rochelle Cooper Dreyfuss, a number of factors may contribute to the breakdown of negative spaces, which highlights the fragility of low-IP equilibria.ⁿ¹¹² [*23] Yet the norms persist. While shame-based norms depend on a stable conception of what constitutes good-type behavior,ⁿ¹¹³ they will not change easily. Change requires a transformation in attitudes rather than a handful of selfish defectors.

Many negative-space communities of individuals, as distinct from those inhabited mostly by firms, exhibit signs of the "interdependence" that makes shame and shaming most effective.ⁿ¹¹⁴ Although a tattoo artist could work in a vacuum, most rely on each other for business and professional growth.ⁿ¹¹⁵ Open-source creators depend on each other for crowdsourcing and technical support.ⁿ¹¹⁶ Stand-up comedians depend on each other for bookings and moral support in what could otherwise be a crushingly lonely existence.ⁿ¹¹⁷

These are communities in which public shaming would be effective, and occasionally it occurs: dozens of YouTube videos expose alleged joke-stealers.ⁿ¹¹⁸ Tattoo "plagiarist hall of shame" galleries show examples of norm violators.ⁿ¹¹⁹ Academic science plagiarists may be "named and shamed" in journals.ⁿ¹²⁰ Foodies draw attention to menus that seem "plagiarized."ⁿ¹²¹ But for the most part, low-IP subcultures seem not to depend on shaming. Even people who believe they can "get away with it" will adhere to community values because, as a matter of conscience, they want to see themselves as someone who belongs. [*24] This is consistent with case studies about negative spaces: some are close-knit, like the communities of roller derby participants or elite tattoo artists,ⁿ¹²² but others are not. Most lack barriers to entry.ⁿ¹²³ Yet even in the open-source community, where it would be nearly impossible to know who is toeing the line and who is not, certain core values prevail: distributed software creation is good; sharing is good; closed licensing is bad.ⁿ¹²⁴ These values spread, even though the open-source community is geographically far-flung; the Internet permits effective dissemination of common values, and shame follows.ⁿ¹²⁵

These communities rely on a network of custom and internal enforcement to develop norms and teach new members what behaviors are accepted and what behaviors are shameful. This shame-teaching takes place largely informally, through simple communications within the community. It may also involve requesting that community members conform,ⁿ¹²⁶ shaming within the community, or denying members future community benefits. Chefs, for example, are less likely to share recipes with those who betray community values.ⁿ¹²⁷ Tattoo artists will personally confront or badmouth those who copy custom tattoos.ⁿ¹²⁸ Performance magicians will stop associating with colleagues who reveal how tricks are performed; when a rogue magic trick manufacturer sold unauthorized illusions, a long list of respected magicians signed a letter shaming the manufacturer.ⁿ¹²⁹ These informal enforcement mechanisms teach community members what constitutes good-type and bad-type behavior, so that they will be driven by conscience to comply with norms regardless of whether they are likely to be caught. In this way, negative-space communities conduct shame-teaching through a combination of custom - communicating norms and values [*25] to each other - and enforcement techniques, such as shaming, denial of reciprocal benefits, and even expulsion for those who fail to comply.

Thus, each negative-space creative community makes its own copying and attribution norms, and the participants in the community are compelled by shame, and to some extent, shaming, to comply with them. Because they arise organically from within the community, these norms are customized to the needs of the greater community.ⁿ¹³⁰ They may not serve each participant ideally, but they are more likely to suit participants' needs than the one-size-fits-all approach of formal law, which is not only imposed from the outside to suit the needs of external constituencies like major entertainment companies, but is also designed to work across all industries and creative endeavors.ⁿ¹³¹

2. Loathing: Shaming and IP Forbearance

While internal shame prevents copying, external shaming encourages it. More accurately, external shaming discourages intellectual property owners from aggressively enforcing their rights. When copyright, patent, or trademark owners send cease-and-desist letters, the Internet makes it easy to shame the intellectual property owners by accusing them of bullying or being trolls. In so doing, shamers create a public conversation that transforms intellectual property owners into "bad guys" simply for enforcing their own rights. This discourse uses the language of shaming to shape the reaction of the shamed entity and to build public opinion. The terms "troll" and "bully" signal shameful identity just as the terms "junkie" and "slut" signal shaming-based condemnation of drug use and female sexuality.ⁿ¹³²

The Internet creates a panopticon.ⁿ¹³³ The instant an intellectual property owner sends a cease-and-desist letter, that letter can be [*26] posted to the Internet for the whole world to see. And when a shamer begins the discourse, the shamer controls it; when a shamer introduces an IP owner to the world as a bully or troll, the world sees that intellectual property owner through the shamer's eyes. This gives accused infringers the power to turn the accusation around and impose sharing norms on IP-holding entities that may be big and powerful.

Indeed, fear of external shaming may act prophylactically, preventing powerful intellectual property owners from overextending their rights.ⁿ¹³⁴ One commentator advises that "in a classic 'David versus Goliath' battle, throngs of people come to the defense of the small business owner" who is perceived to be at the mercy of the larger corporate giant.ⁿ¹³⁵ Attorneys are increasingly aware that "enforcement can bring unwanted negative publicity."ⁿ¹³⁶ Sending a cease-and-desist letter carries with it an enormous risk of negative attention. The phenomenon is so well-known that it has a name: the Streisand Effect.ⁿ¹³⁷ The name originated in 2003, when photographer Ken Adelman and his wife sought to document California coastal erosion by photographing the entire California coast from a helicopter and posting their results on the website www.californiacoastline.org. These photos included and identified an aerial view of Barbara Streisand's estate.ⁿ¹³⁸ Streisand demanded the photo be removed, first via cease-and-desist letterⁿ¹³⁹ and later via lawsuit, which the Los Angeles Superior Court dismissed.ⁿ¹⁴⁰ The ironic result was that Streisand not only failed to get the photos removed, but also drew massive attention to the photo. Reports state that the image was downloaded just six times prior to the suit but was accessed as many as 420,000 [*27] times in the month after Streisand's suit was filed.ⁿ¹⁴¹ By taking legal action, Streisand created exactly the opposite of her desired result. Her experience and scores of others have taught intellectual property owners that it is risky to assert one's rights, especially when the rights are weak or the alleged infringer has many sympathizers.

Shaming influences not only whether, but also how, intellectual property owners enforce their rights. Savvy IP owners know that their cease-and-desist letters may be posted on the Internet, so they incorporate more reasonable demands and make them less threatening in tone.ⁿ¹⁴² When asserting trademark rights, they shift responsibility away from themselves, relying on the so-called duty to police to appear more practical and less overbearing.ⁿ¹⁴³ By seeming reasonable, intellectual property owners can not only avoid being shamed, but can develop positive reputations. They can harness the shame of consumers who would be ashamed to patronize companies who betray the consumers' values. Jack Daniel's garnered positive attention, for example, by sending an exceedingly friendly cease-and-desist letter to an author who parodied the Jack Daniel's label on a book cover, with a jovial tone and a more limited set of demands than an average letter of its kind.ⁿ¹⁴⁴ Regardless of the motivation, these moves gradually shift intellectual property owners' behavior toward the shamers' values and away from maximal enforcement.

In the Internet age, shaming campaigns have the potential to spread virally. Social media sites like Facebook help

harness network effects to spread shaming messages; the more "likes" a shaming campaign garners, the larger an audience it reaches.ⁿ¹⁴⁵ In addition, sites like Chilling Effects seek to harness this phenomenon by collecting and indexing aggressive cease-and-desist letters. Chilling Effects thereby identifies IP bullies and labels them as such.ⁿ¹⁴⁶ Similarly, for years, [*28] the Patent TrollTracker blog named and shamed patent assertion entities.ⁿ¹⁴⁷

These attempts not only shift public opinion about the shamed entities, but also create public opinion about what constitutes good-type and bad-type behavior. Until Patent TrollTracker embarked on its campaign of naming and shaming patent assertion entities, few had ever heard of a "patent troll," and few had an opinion at all about the moral propriety of being in the patent litigation business. But by creating a discourse of shame around patent assertion behavior, Patent TrollTracker (and many others who took part in the conversation) made the patent assertion business model shameful - or at least ethically questionable.ⁿ¹⁴⁸ Large-scale campaigns have even influenced the path of formal law. In 2011 and 2012, shaming campaigns drew attention to proposed Internet IP regulations known as the Stop Online Piracy Act (SOPA) and the PROTECT-IP Act (PIPA), mixing market and electoral power with the language of shame and ultimately defeating the laws' passage.ⁿ¹⁴⁹

Shaming sends the message that certain values are important enough for the target to adopt (or at least perform) them. If environmentalists did not shame polluters, the polluters might not perceive a sufficient reason to justify the expense of avoiding it. Merely drawing attention to polluting behavior would not produce the same result because attention alone, without normative content, does not create or reinforce values. Shaming not only draws attention to the behavior, but also reinforces to all who listen - including the target and the public at large - that the behavior in question is wrong.

By shaming a target, shamers invite the target to become a part of the shamers' community value system. Shamers not only threaten the [*29] target, but also reintegrate it (in the Braithwaitean sense) by giving the target an opportunity to be forgiven - to "do better next time." If the target adopts or performs the shamers' values, it has the opportunity to join the shamers' community. In addition, if the shamers and the target are at all interdependent, a reformed target will gain customers, or at least stop losing them. Thus, reintegrative shaming is possible even outside the context of insular communities.

Were it not for shaming, IP bullies might not appreciate the number and potency of those who care about pro-sharing values or attribution. A few recent incidents highlight this. In June 2012, the United States Olympic Committee (USOC) sent a cease-and-desist letter to the fiber-arts community Ravelry, demanding that the community stop using the term "Ravelympics" for a community event.ⁿ¹⁵⁰ The USOC was well within its rights to send the letter: in fact, the Olympic and Amateur Sports Act (OASA), which grants it exclusive rights in the term "Olympics," is significantly stronger than the trademark rights granted by the Lanham Act, as the OASA does not provide infringers with the same expression-based exceptions.ⁿ¹⁵¹ Ravelry changed the name of its event to the Ravellenic Games,ⁿ¹⁵² even though there was little likelihood that Ravelry's use of the suffix "-lympics" would cause confusion or harm to the USOC's mark. But the fiber-arts community members were not as ready to accept what it saw as bullying, and they reacted virulently. Over two days, the community generated over 2,300 furious message board posts, and the story went viral to news outlets like Gawker, Slate, and NPR.ⁿ¹⁵³ As a result, the USOC learned a lesson, or at least appeared to: it posted a formal letter of [*30] apology to the community stating, among other things, that it "embraces hand-crafted American goods."ⁿ¹⁵⁴

In January 2013, the Fox television show Glee broadcast a cover version of the Sir Mix-A-Lot song "Baby Got Back" that was copied, note-for-note, from a version by independent artist Jonathan Coulton. This was par for the course: Glee had copied covers before, including covers from artists DJ Earworm, Greg Lasswell, and Nouvelle Vague.ⁿ¹⁵⁵ This did not constitute infringement because, as a function of the compulsory licensing scheme for creating cover songs, cover artists do not own rights in their cover versions. If a cover version of a song is close enough to the original that it fits within the compulsory licensing scheme, the cover does not constitute infringement of the original. But by making something so similar to the original, the cover artist essentially gives up the right to argue that he or she added anything original to the song.ⁿ¹⁵⁶ As a practical matter, a listener might find a cover version to be quite novel, but the

law says differently. Thus, Fox and Glee have the right to copy cover songs without permission from the cover maker, as long as they enter into the appropriate licenses with the original song creator. With Coulton, however, this approach backfired: Coulton is a standard-bearer for the Creative Commons community and its pro-sharing, pro-attribution values. When Coulton made a blog post about Glee's unauthorized use of his cover, the Internet exploded with outrage at Glee's choice not to attribute the cover to Coulton.ⁿ¹⁵⁷ Although Glee was not required by law to give credit to Coulton, the community shamed Glee and Fox, in essence inviting them to join the community's pro-attribution values. It is still too soon to say whether the campaign has had any effect on Fox's attribution practices, but it has generated enough attention to touch Fox's bottom line: in a few days on iTunes, sales of Coulton's [*31] "Baby Got Back - In the Style of Glee" (with all proceeds going to charity) sold more units than any track actually produced by Glee.ⁿ¹⁵⁸

Although these stories demonstrate the communicative power of shaming, they also demonstrate its unpredictability. While each has felt the effects of shaming, there is no guarantee that either the USOC or the producers of Glee will change their enforcement or attribution behaviors in the long term. The shamers invited both entities to join their norms-communities, but it remains to be seen whether either will join. We can be sure, however, that each shamed target has a newfound awareness that competing norms exist - something they may not have known before the shaming occurred. Likewise, consumers can rely on the shaming to make decisions about whether they want to support the Olympics or watch Glee. This demonstrates the discursive aspect of shaming: it carries information about what the shamers believe is, and should be, shameful.

B. Strengths and Weaknesses of Shame and Shaming as Regulatory Mechanisms

As regulatory mechanisms, shame and shaming have a number of significant benefits, even as compared with formal law: they are more democratizing, more flexible, and sometimes more effective at governing behavior. But it would be a mistake to assume that these benefits make shame and shaming optimal tools for regulating copying in all circumstances. In fact, both shame and shaming have significant flaws and risks. Shame only affects a small portion of the population, and shaming, although it applies more universally, is far less likely to be effective. Both shame and shaming have the potential to be deeply damaging. For that reason, they are not adequate replacements for formal law. I suggest that in an ideal intellectual property system, they would augment, not supplant law, serving more as tools for understanding proper levels of protection rather than as regulatory mechanisms in and of themselves.

1. A Few Strengths

Many of the strengths of shame and shaming as regulatory mechanisms are discussed above: shame, and to some extent shaming, compels people to comply with laws and norms, even when their transgressions would likely never be discovered.ⁿ¹⁵⁹ In the intellectual property context, shame and shaming allow communities to customize [*32] copying and attribution norms to the needs and wants of particular creative communities.ⁿ¹⁶⁰ Shame and shaming not only deter and punish, but they also may result in some measure of reconciliation and proportionality, as the community itself metes out what it believes is an appropriate punishment for transgression.ⁿ¹⁶¹

Shame and shaming are also cost-effective. Shame costs nothing, since it happens automatically, and shaming, especially in the age of viral Internet discussion, is very inexpensive. Both can be effective even against minor transgressions. Considering the cost of litigation, a lawsuit over an appropriated roller derby pseudonym, an imitated recipe, a stolen joke, or a plagiarized blog post would - even if the law permitted them - surely not be worth the price. In contrast, shame and shaming are virtually free.

For that reason, shame and shaming can level the playing field between Davids and Goliaths.ⁿ¹⁶² In many circumstances, intellectual property owners hold all the cards, while accused infringers hold none. It costs very little to send a cease-and-desist letter or to initiate a lawsuit, but resisting that letter or defending that suit can be crushingly expensive and time consuming.ⁿ¹⁶³ The result is that IP owners may be able to extract monetary settlements or other business concessions without ever giving meaningful consideration to the merits of their claims. In the online context, this effect is particularly powerful. Under the Digital Millennium Copyright Act, protections for alleged infringers are

weak, as internet service providers are required to remove accused material even before the alleged infringer has an opportunity to respond to the accusation.ⁿ¹⁶⁴ An alleged infringer may have material reinstated by filing a counternotice, but judicial protection for wrongly accused material is not available unless (1) the target of the notice elects to submit a counter-notice; (2) the complainant then [*33] files suit; and (3) a court resolves the issue.ⁿ¹⁶⁵ Shaming gives an inexpensive extralegal option to accused infringers: to shine a bright, public, and critical light on the accuser.

Shaming thus gives IP bullies something to fear. It forces them to examine the quality of their claims because they know that they will be shamed for overreaching and that the consequences of shaming may be far more severe than the benefit they would gain from asserting their rights. In this way, shaming tends to offset other harmful intellectual property phenomena that are not bound by due process, such as the chilling effect of cease-and-desist letters.

Moreover, unlike other penalties, such as fines, shaming can help the shamer directly. Because the shamer is involved in punishing the transgressor, the shamer feels a sense of agency and closure. In fact, when people are "fed up" - for example, as they are fed up with sharp banking practices and white collar crime in the midst of a challenging economy - public shaming may help restore public faith in the shamed industry. If shamed targets take shamers up on their invitations to join a community of values, shamers may begin to regain trust in those targets.

2. Many Weaknesses

In analyzing the flaws and risks of shame and shaming as regulatory mechanisms, it is helpful to separate internal shame from external shaming. Each has its own weaknesses.

The chief critique of internal shame is that it is not universal. As discussed above, firms cannot experience shame as individuals do, and while the individuals inside firms may be guided by their own shame or firms may feign shame for reputational reasons, firms as unitary entities are guided by a separate set of principles that may overcome shame. In addition, people who "have no shame" are simply not bounded by the values of their community. In a way, it is very similar to formal law: some proportion of those bound by formal law will decide to disregard it. The difference is that formal law is more reliably enforceable. Shame is enforced principally through shaming - and transgressors who have no shame are less likely to be bothered by shaming. For that reason, shame cannot act as a universal regulatory mechanism.

A subtler, but no less important, critique is that shame is painful. The same thing that makes shame effective also gives it enormous power over those who experience it. Imagine if everyone walked [*34] around wearing a collar that would administer a shock every time one violated a rule of etiquette: it might be very effective at making the world more genteel, but it would not be humane. This is problematic in itself, but it is especially so when one considers that what constitutes shameful behavior is seldom in the discretion of the person experiencing the shame. An outside force - usually some variety of community or family - defines what is shameful. This gives "mob psychology" enormous power to inflict emotional pain on behavioral outliers.ⁿ¹⁶⁶ In the broader social context, this may have the severest of consequences, such as the suicides of those who have been socialized to believe that homosexuality is shameful. In the intellectual property context, the consequences may be less severe because the behaviors are less likely to be identity defining, - one can change one's copying behaviors, but not one's sexuality - but shame is no less powerful in defining people's personal values in the intellectual property context as in any other. The tragic story of Aaron Swartz may serve as a cautionary tale. Swartz, who co-founded the Internet site Reddit and was an outspoken free-information activist, was indicted for downloading 4.8 million academic articles from the JSTOR database with the intent of distributing them for free via peer-to-peer file sharing sites. Swartz committed suicide in January after pleading not guilty.ⁿ¹⁶⁷ This highlights the inequality of shame and the variability of its results: Swartz almost certainly experienced a complex set of emotions, including depression and shame,ⁿ¹⁶⁸ and he took his own life. JSTOR, which never pursued charges against Swartz, began offering limited free access to its materials in the wake of his death.ⁿ¹⁶⁹ The FBI has its own role in this discourse, but it - and the individual prosecutors who pursued Swartz in defense of their own passionately held values - may never feel shame as Swartz did, although some have argued they should.ⁿ¹⁷⁰

This highlights a third concern with shame: it requires a static, or at least consistently held, idea of what constitutes good-type and bad-type behavior. While this may be common in close-knit communities, [*35] it is far from universal on a broader scale. In fact, as the Chick-Fil-A example demonstrates, some may celebrate what others consider shameful.ⁿ¹⁷¹ And even within a given community, there may be dissent about the best approaches to copying and attribution. For the most part, this variability is a benefit because it allows for customization of norms and fine-grained distinctions among and inside communities. Jamband fans can value copying and sharing of live recordings but oppose the copying of commercial releases,ⁿ¹⁷² while comedians can disapprove of copying jokes.ⁿ¹⁷³ Tattoo artists can approve of purchasing and copying "flash" designs, but revile the copying of custom tattoos; they can rely on copyright protection for books of flash, but disapprove of aggressive copyright enforcement.ⁿ¹⁷⁴ Fan fiction communities can approve of transformative copying, but disapprove of plagiarism.ⁿ¹⁷⁵ But it also means that at the edges of any community, the norms and values may begin to break down. Some roller derby participants have begun registering their names as trademarks, while others place a high value on the sport's self-regulation and would be ashamed to rely on formal law.ⁿ¹⁷⁶ Once outliers grab a foothold, values can shift. This flexibility may be good for optimizing norms to match the needs of a given time and community, but it can make shame an unpredictable governing tool. When different people have conflicting views regarding what is shameful, shame is not only incapable of providing predictable governance, but is also guaranteed to govern in a way that some find unacceptable.

External shaming may be even more troublesome as a regulatory mechanism than internal shame. First, shaming only works if someone hears it. If the target never knows that it is being shamed, it will never respond to the shaming; and if no one ever knows that the target is being shamed, there will be no harm to the target's reputation and no lesson imparted to the public regarding what is or should be considered shameful. As the Internet becomes increasingly saturated, it becomes even more difficult for an audience to separate signal from [*36] noise. This means that the effectiveness of shaming as a regulatory mechanism may end up depending as much on luck as on merit.

In addition, shaming is less effective in communities where identity is plastic.ⁿ¹⁷⁷ If the shamed target is anonymous or can easily change identity, the target will not perceive the threat or feel the sting of reputational harm. Many online settings permit or encourage anonymity; in such settings, shaming is largely ineffective. In pseudonymous societies - for example, many online communities - shaming is more effective, but only if pseudonyms are persistent identifiers of a single entity.ⁿ¹⁷⁸ Although some of these communities have cultures of reciprocity that most members follow, those members must be guided and governed by their own consciences and internal shame, since there is no mechanism for shaming (or even identifying) those without persistent identities. In those settings, formal remedies - and the subpoena power that accompanies them - are far more effective against those without shame.

Even more problematic is shaming's unpredictability. If the target does not share the values of the shamer, or perceives its actions as justified, the shaming will not generate the shamer's desired reaction.ⁿ¹⁷⁹ Most IP owners likely wish to avoid being branded as bullies, but others might actually want to be seen as litigious, "scary" adversaries.ⁿ¹⁸⁰ In addition, if the target does not believe that the shamer's values are popular enough to make a meaningful reputational difference, the target can blithely ignore the shamer's efforts.ⁿ¹⁸¹ For this reason, shaming is likely to be ineffective against targets whose market success does not depend on reputation. Shaming-based collective action can be very effective, as it was with the SOPA-PIPA demonstrations that shamed web intermediaries and congresspeople. But the effectiveness of those demonstrations depended largely on the fact that users may have choices about internet service providers and that congresspeople depend entirely on voters. In contrast, shaming campaigns [*37] against Facebook have been largely ineffective, likely because Facebook perceives no ill effect from violating its customers' norms.ⁿ¹⁸² Facebook no doubt knows that its users believe it should be ashamed of its practice of shifting privacy policies with little or no warning, but Facebook also knows that its market power depends on the network effect, not on reputation.ⁿ¹⁸³ In this way, even the loudest shaming campaign may fall on deaf ears.

Moreover, while shaming campaigns may begin as attempts to integrate an outsider into a community, reintegrative shaming depends on the potential for forgiveness, which may not be forthcoming after a viral shaming campaign. Many members of the Ravelry community continued to revile the USOC long after its public apology.ⁿ¹⁸⁴ A target looking at the Ravelry example could reasonably ask, "Why bother apologizing, if I will continue to be despised?" The result is

that while shaming might spread values to shaming targets through integration or reintegration, it could just as easily lead to recalcitrance, making the target all the more likely to re-offend.

In fact, external shaming can backfire for a number of reasons. While shaming may infuse public opinion with the idea that a particular behavior is "bad," it can have the opposite effect by highlighting how widespread the behavior is. This is particularly likely if campaigns attempt to condemn multiple targets for the behavior before public opinion has condemned it. If a particular type of behavior is a frequent target of shaming campaigns, it could lead targets to believe their behavior puts them in good (or at least numerous) company rather than bad.ⁿ¹⁸⁵ For that reason, using shaming to manipulate targets' shame may have unpredictable results: increased formal enforcement may actually undermine norms by signaling that transgression is common or that compliance is "uncool."ⁿ¹⁸⁶ This may be one reason why shaming campaigns have not eradicated peer-to-peer file sharing: those who engage in it may believe that "everyone is doing it."

[*38] External shaming may also backfire as a result of rage and rebellion.ⁿ¹⁸⁷ Although some proportion of shamers may want to integrate (or reintegrate) an offender into a community of norms, their shaming efforts may ultimately push the target away. Viral shaming campaigns lack a central control mechanism and therefore find it difficult to send a consistently integrative or reintegrative messageⁿ¹⁸⁸ - and even if they succeed in sending such a message, the target may not hear or appreciate what the shamers have in mind. So unless the target depends heavily on the shamer's community for some reason (e.g., profit), the target can become an "outsider" who will not be interested in integration or reintegration and will not be harmed by ostracism, shunning, or other disintegrative shaming techniques.ⁿ¹⁸⁹ Thus, external shaming can create rogues who feel they owe nothing to the community and can therefore transgress with relative impunity.ⁿ¹⁹⁰ Indeed, empirical studies associate shaming sanctions that involve stigmatizing the target with higher rates of re-offense.ⁿ¹⁹¹

On the other hand, reactions to shaming can be equally powerful and potentially destructive in the direction of compliance. If the target does share the shamer's values or the audience reacts strongly to the shaming, the results may be extremely damaging or painful. In social science parlance, "either one finds [shaming sanctions] easy to ignore, or one finds them particularly harsh, and cripplingly diminishing of self-esteem. The effectiveness of such sanctions on people of the first sort is nil; with respect to the second sort, the effect is likely to be overkill, and hard to predict."ⁿ¹⁹² While the former speaks only to shaming's effectiveness, the latter raises what may be a deeper concern: It grants the shamer a potentially overwhelming power to hurt targets and influence values. On one hand, this is powerfully democratizing; entities with very little financial power can shape public opinion effectively through shaming campaigns, as Patent TrollTracker and its ilk have influenced public opinion against patent assertion entities. On the other hand, it can lead to unfair results - especially when shaming is spread virally by a public with incomplete information. **[*39]** YouTube contains many videos shaming "joke-stealers" whose popularity and careers may be severely injured by the shaming, even if they independently, and thus innocently, invented the same jokes. This can lead to lasting, unearned reputational harm.ⁿ¹⁹³

This harm occurs without regard for due process or proportionality. It is, in essence, vigilantism. In the words of John Rothchild, "[A] regime of ... vigilantism is not an entirely attractive prospect."ⁿ¹⁹⁴ Vigilantism may result in justice, but it is uncontrolled. It is ironic that the shaming campaign to defeat SOPA and PIPA focused largely on highlighting the proposed legislation's creation of an Internet "blacklist" without due process - considering that the campaign essentially blacklisted suspected SOPA and PIPA supporters without any due process.ⁿ¹⁹⁵ Blacklisting and watchlisting may be effective shaming techniques, but they can also lead to unsubstantiated "witch-hunting" and disproportionate punishment.ⁿ¹⁹⁶

In the intellectual property context, self-policing might mediate this danger. A study of letters submitted to the Chilling Effects database indicated that individuals who had (or believed they had) a strong defense to infringement allegations were more likely to submit their notices to the database. Thus, it appears that the shaming effect of the database is directed at bullies rather than tarring all IP enforcers with the same shaming brush.ⁿ¹⁹⁷ But self-policing depends on shared values. When a group of shamers has a variety of views, the least reasonable **[*40]** of those views may be the loudest. For example, when the cyber-vigilante group Anonymous becomes involved in a shaming

campaign, reputational harm is only the beginning: the group hacks corporate websites and conducts denial-of-service attacks and other cyber punishments.ⁿ¹⁹⁸ The result is that the target cannot retaliate and may not even be able to defend itself. Anonymous's brand of activity may backfire as a method of behavior control; studies show that shaming actually hinders social behavior when it imposes a harsh cost on the transgressor.ⁿ¹⁹⁹ But even if it effectively disseminates social values, it imposes the most extreme values and does so at a very high cost.

The upshot of these considerations is that both shame and shaming are problematic as regulatory tools. Of the two, shame may be preferable. Although shame only works on a portion of the population, it is - at least for that portion - both more predictable and more effective than shaming. This is consistent with social science research with computer-simulated societies, which indicates that introducing shame - teaching people to be ashamed of certain anti-social behaviors - "is more effective for the achievement of pro-social behavior than increasing the [shaming-based or other] punishment to non-complying agents."ⁿ²⁰⁰

Ultimately, both have benefits and drawbacks. Shame is an excellent mechanism for enforcing norms in relatively close-knit communities of individuals or very small firms. Shaming may currently be the best approach to regulating certain behaviors such as IP bullying and may be particularly helpful in generating a discourse about what behaviors should be considered shameful. But as a replacement for formal law, or even as a mechanism for adjusting the boundaries of formal law, neither shame nor shaming is a panacea.

IV. Normative Implications

Clearly, neither shame nor shaming should replace formal intellectual property law. They are too unpredictable, risky, and potentially harmful. But it is undeniable, and perhaps beneficial, that they augment and shape the effects of formal law. We can look to current uses of shame and shaming in the intellectual property context to learn [*41] something about how the public wants intellectual property law to work.

First, we must acknowledge that formal intellectual property laws cannot, and have not, done the job alone. Shame and shaming have always been part of the intellectual property landscape and are increasingly important in moderating the effects of formal protection. This implies that formal law may not be the ideal mechanism for protecting all varieties of intellectual property in all circumstances. In negative-space communities, a lack of formal protection seems to benefit creation and innovation,ⁿ²⁰¹ at least partly because participants in these communities are governed by customized rule sets enforced by conscience and shame. These communities seem to have little difficulty creating effective systems that meet their own needs.ⁿ²⁰² Some restrict copying; others encourage it with specific provisos such as attribution norms.ⁿ²⁰³ The lack of formal protection does not appear to chill creation or innovation; in fact, it seems to encourage it, especially in settings like academia, cuisine, fashion, open-source software, and fandom, where "creative copying," - building upon the works of others to create something new - advances the creative needs of the community. The norms of these communities are more flexible than formal law, as they are able to change as technology or prevailing markets do. In addition, community members likely follow these norms more assiduously, both because of the power of shame and also because, unlike formal laws made by distant politicians, community members can feel like they had some hand in creating and reinforcing them.

I do not suggest that we should start repealing intellectual property laws because shame will do all the work. However, particularly when considering whether to implement new protections and whether to implement carve-out exceptions to current protections, it is important for lawmakers to consider whether formal enactments will add value beyond shame-based enforcement.

How do we tell the difference between situations where laws are necessary and situations where shame should stand in their place? The discussion above provides some of those answers. Shame cannot be the sole governing mechanism when the transgressors are likely to be firms or other collective entities. But when individuals are the [*42] most likely transgressors, then formal law may not be necessary. Second, social science literature indicates that shame and shaming are most effective when reintegrative shaming is possible and when the participants are interdependent on

each other. This implies that shame and shaming may do much of the work of formal law in relatively close-knit communities where members are likely to communicate with each other and may depend on each other for creative or inventive purposes.ⁿ²⁰⁴ This includes communities like those discussed above that involve creative copying and countercultures in which belonging to the community and adhering to its values becomes part of the participant's identity, such as sharing or free-information movements, athletics, performance magic, stand-up comedy, or roller derby. Ultimately, the equilibria of low-IP spaces may not be as fragile as one might fear.ⁿ²⁰⁵ In a world of shame, shaming, and interdependence, there are high costs, both emotionally and reputationally, for "going rogue."

While shame and shaming are good at regulating interactions within communities, they are far from ideal for regulating interactions among communities.ⁿ²⁰⁶ As we have seen above, different communities hold different, and often inconsistent, values. Take pro-copying or free-information norms: while these work well within the sharing community, they do not necessarily reflect the needs or values of initial creators. Free-information activists may wish to copy without any respect or understanding for the needs of initial creators, and therefore find no shame in harming them. In that instance, formal law is required. As a more concrete example, many fan fiction writers strongly favor transformative copying, as long as it includes attribution.ⁿ²⁰⁷ They not only write transformative works, but also welcome others to remix (and attribute) their fanworks.ⁿ²⁰⁸ Many commercial authors, however, feel differently.ⁿ²⁰⁹ They may not want the characters they [*43] invented to be put in new situations, with or without attribution. Because these communities disagree about what constitutes shameful behavior, shame will not adequately govern their interactions, and formal law is necessary to determine whose view "wins" and under what circumstances. For fans and commercial authors, the law does just that: the Copyright Act and its fair use provision provide parameters under which fans can make transformative use of commercial authors' works.ⁿ²¹⁰ Shame augments formal law to govern fans' behavior among each other (copying is fine, plagiarism is not) and with the commercial authors (showing them fan fiction is generally taboo). Shaming also comes into play, as fans may shame authors or copyright holders who wish to enforce their copyrights against fair uses or attempt to enforce rights they do not have.ⁿ²¹¹ This forces rights holders to consider the strength of their claims before asserting them, because a weak claim is more likely than a strong one to generate reputational harm via shaming.ⁿ²¹² In that setting, therefore, shame and shaming augment law but would not adequately replace it.

While shame and shaming should not be the only mechanisms governing inter-community intellectual property practices, they are still valuable in the inter-community setting, both for governing and for instructing lawmakers about the appropriate boundaries for formal protection. From a governance standpoint, shaming stems the gradual accretion of rights by offsetting the effects of risk aversion and overreaching. Rights holders will inevitably seek to expand protection by asserting rights they do not have or accusing non-infringing activities. Victims of such IP bullying have little formal recourse: they may respond with motions to dismiss, declaratory judgment actions, or anti-SLAPP motions,ⁿ²¹³ but doing so requires significant expense and attention, especially considering that bullying victims may have done nothing wrong. In that setting, shifting some of the risk to the bully - the risk of being shamed - may make bullies think twice about overreaching.ⁿ²¹⁴ [*44] In the creative copying context, for example, this might offset rights holders' coercive power and allow creative copiers the freedom to pursue their art.

From a normative standpoint, shaming demonstrates where the law itself may overreach. When targets are shamed for exercising their own intellectual property rights against plausible opponents - like the shaming of Apple's aggressive patent strategiesⁿ²¹⁵ or Monster Energy Company's aggressive trademark strategiesⁿ²¹⁶ - it may signal that the problem is not with the rights holder, but with laws so broad that rights holders may use them to make costly and potentially chilling claims. Shaming campaigns identify when formal law ill-serves particular communities and when it has fallen out of line with prevailing social norms and preferences.

The prevalence of shaming in response to overreaching intellectual property assertions may also signal the need to shift power to accused infringers early in the cease-and-desist and litigation processes. As discussed above, under current law, shaming is often the best option for small-scale accused infringers when faced with weak or baseless threats from larger-scale rights holders.ⁿ²¹⁷ Although shaming creates a workable escape valve for the bullied, it is flawed: shaming campaigns may not reach the desired audience, and if they do, they may backfire in a number of ways.ⁿ²¹⁸

Even if we are content to leave intra-community governance to shame, it is risky to leave inter-community governance to shaming. With that in mind, lawmakers may want to consider formalizing other early escape valves for accused infringers, [*45] such as broader misuse doctrines, causes of action for "baseless threats," or "anti-troll" fee-shifting legislation.ⁿ²¹⁹ In addition, lawmakers and courts may wish to consider requiring formal apologies as remedies for abuse of process by overreaching plaintiffs. The latter would harness not only the power of shame and shaming, but also the power of plaintiffs' risk aversion. The risk of having to make a public apology might more effectively prevent IP bullying than would the possibility of merely losing a case or having to pay an opponent's fees.

Considering the power of shame and shaming, and the fact that they are already discursively intertwined with intellectual property law, lawmakers may also want to consider the benefits and drawbacks of creating "apology" or "censure" remedies for infringement of formal law. The pros and cons are manifest: formal shaming penalties would signal the shamefulness of intellectual property infringement, and could provide opportunities for reintegration of infringers and emotional vindication for rights holders - but these penalties could backfire and further establish a class of intellectual property "rebels." A full discussion of shaming sanctions as formal remedies for infringement is beyond the scope of this Article, but it should be noted that China's copyright and trademark laws include official censure and apology as punishments for infringement.ⁿ²²⁰

In the end, however, examining shame and shaming in the intellectual property context may be most valuable as a tool for determining what people value. Shame and shaming modify formal law to conform to popular conceptions of what the law should be, especially when those conceptions differ from what the law is. Formal law reflects [*46] the power structure of legislative governance and common law, which rely on influence and compromise to generate rules that may fit poorly in individualized situations.ⁿ²²¹ In contrast, shame and shaming reflect a different power structure: a critical mass of individually powerless people can collectively define and enforce what is shameful, and they can do so in a far more situational, granular manner. Shame and shaming silence the minority, but formal law may compromise away the values of the majority. Neither system reflects the full picture of society, but to ignore shame and shaming is to ignore the will of the people. By examining what is shameful and who is targeted for shaming, one can learn what the critical mass wants from its laws.

The role of shame and shaming in creating and governing negative spaces implies that people gravitate toward "set points" of intellectual property protection. By examining what people find to be shameful, and what they shame others for, we can see that people's collective moral intuition rebels against a complete lack of protection while also resisting a level of protection so high that it chills creation. An examination of shame and shaming also teaches us that the level and details of this optimal set point may not be constant: Some areas of creation may demand a high level of sharing. In others, attribution may be important. In another, even a small amount of copying may be too much.

Considering the power and inevitability of shame, and the unpredictability of shaming, one may conclude that the best outcome would permit shame-based "IP without IP" systems to flourish, while implementing policies that reduce the need for public shaming of those who enforce their intellectual property rights. Regardless of the outcome, however, lawmakers should take note and strive for balance between the "mob justice" of shame and shaming and the one-size-fits all regime of formal law.

V. Conclusion

For too long, lawmakers and scholars have ignored the power of shame and shaming to shape intellectual property behavior, as well as their potential to guide the path of formal intellectual property law. Shame and shaming not only reinforce formal law as they do in other areas, but also augment that law. Together, they help to create and maintain intellectual property negative spaces where innovation and creation thrive without significant formal intellectual property protection or enforcement. In areas beyond the reach of formal intellectual property protection, shame helps define the boundaries of informal or [*47] norms-based intellectual property practices. In areas governed by formal intellectual property protection, shaming helps define the boundaries of rights holders' enforcement forbearance.

These effects adjust the boundaries of formal intellectual property protection in a more finely tuned way than formal law can, but they do so at a potentially high cost. Shame is extremely powerful - more so than formal law - but painful, and it is ineffective as a tool for regulating those who do not experience it. Shaming may influence the behavior of more targets, but has notable disadvantages, including not only pain, but also unpredictable results. Despite those flaws, shame and shaming possess marked advantages over formal law for regulating copying behavior. Most notably, shame and shaming are flexible and reflect the needs of the communities they govern, unlike the monolithic, one-size-fits-all dictates of formal law. Shame and shaming are not suitable substitutes for formal law, nor are they miracle cures for law's failings, but they may act as guideposts for determining where to draw the lines of formal legal protection.

n63. See Lopez-Perez, *supra* note 24, at 570 (footnote omitted) (establishing via economic modeling that shaming drives such corporate norms).

n64. Gripe sites are websites dedicated to the public shaming of people or corporations. For a general collection of gripe sites, see WebGripeSites.com, <http://www.webgripesites.com/> (last visited Sept. 18, 2013). There are countless examples of gripe sites posting cease-and-desist letters they have received. See, e.g., JP Morgan Chase is Officially Pissed Off About This Site, Chase Bank Sucks (Jan. 3, 2009), <http://www.chase-sucks.com/11/jp-morgan-chase-is-officially-pissed-off-about-this-site/>.

n65. See Rachael Braswell, Consumer Gripe Sites, Intellectual Property Law, and the Use of Cease-and-Desist Letters to Chill Protected Speech on the Internet, 17 *Fordham Intell. Prop. Media & Ent. L.J.* 1241, 1287-88 (2007).

n66. Posner & Rasmusen, *supra* note 3, at 374; see also Litowitz, *supra* note 45, at 55; John Rothchild, Protecting the Digital Consumer: The Limits of Cyberspace Utopianism, 74 *Ind. L.J.* 893, 968 (1999) (noting that shaming is ineffective in policing, for example, "the behavior of junk e-mailers, who do not shrink from antagonizing the vast majority of the recipients of their marketing").

n67. See Amy Morganstern, Comment, In the Spotlight: Social Network Advertising and the Right of Publicity, 12 *Intell. Prop. L. Bull.* 181, 196-97 (2008) (noting mixed effectiveness of collective shaming action in motivating corporate entities, particularly those with market-dominant products such as Google and Facebook).

n68. See Posner & Rasmusen, *supra* note 3, at 380.

n69. In its early stages, therefore, public shaming may be more of an attempt to create public "buy-in" for a particular value than an attempt to shape firm behavior. Once a particular market community internalizes a value, firms seeking that community's business will be forced to conform to that value - to market themselves as "eco-friendly" or "worker-friendly" - but may not see any reason to do so earlier. Similarly, early-stage shaming may be an attempt to invite (or coerce) a firm into a particular community by trying to convince the firm that the community is large or influential enough to merit conforming to the community's values.

n70. See Joe Satran, Chick-Fil-A Sales Soar in 2012 Despite Bad PR, *Huffington Post* (Jan. 31, 2013, 12:24 PM), http://www.huffingtonpost.com/2013/01/31/chick-fil-a-sales-2012_n_2590612.html.

n195. See Doctorow, *supra* note 149 (shaming legislators who supported the bills); see also Gibbs, *supra* note 149 (shaming websites that did not participate in public demonstration against bills); Wilhelm, *supra* note 149 (shaming a corporate supporter of the bills).

n196. See generally Daniel J. Steinbock, Designating the Dangerous: From Blacklists to Watch Lists, 30 Seattle U. L. Rev. 65 (2006) (discussing dangers of blacklisting and watchlisting). I understand that by criticizing shaming as a tool for encouraging IP forbearance and preventing overreaching IP assertion, I am postulating a market failure of sorts - arguing that "more information" may not always be better. And to the extent that shaming disseminates accurate information about shaming targets, it is hard to dispute that it may help consumers make informed decisions. That, in itself, would be a benefit of shaming, if it were true. It may not be: the public may over-or undervalue shaming information, and may reach a point of "information overload" when presented with complete information. But even assuming that the consuming public absorbs information perfectly, shaming may generate negative externalities, including disproportionate, unpredictable, or perverse reactions from the shamed targets.

n219. The benefits and drawbacks of such approaches are beyond the scope of this Article; I only suggest that, considering their relationship with anti-bully shaming, they are worth considering.

n220. See Copyright Law of the People's Republic of China, State Intellectual Property Office, http://english.sipo.gov.cn/laws/relatedlaws/200804/t20080416_380362.html ("Anyone who commits any of the following acts of infringement shall bear civil liability for such remedies as ceasing the infringing act, eliminating the effects of the act, making an apology or paying compensation for damages, depending on the circumstances ..."); see also Anne M. Wall, Intellectual Property Protection in China: Enforcing Trademark Rights, 17 Marq. Sports L. Rev. 341, 362 (2006) (describing Chinese formal copyright remedy of apology, which "brings with it the significant social stigma of shaming," and noting that Chinese courts have increasingly included the apology remedy in orders); Peter K. Yu, From Pirates to Partners: Protecting Intellectual Property in China in the Twenty-First Century, 50 Am. U. L. Rev. 131, 187 n.312 (2000) (describing public shaming as a remedy that may be "unconventional" to the American audience but has the potential to be very effective). As a generalization, however, Chinese culture is thought to be considerably more concerned with reputation and loss of "face" than American culture, and therefore, the threat of official censure may not be as effective a deterrent of behavior in the United States as it is in China. See Heidi Hansen Kalscheur, Note, About "Face": Using Moral Rights to Increase Copyright Enforcement in China, 39 Hastings Const. L.Q. 513, 524 (2012).

CONTENT: SOCIAL NETWORKS AND THE LAW: SOCIAL MEDIA AMPLIFY CONSUMER INVESTMENT IN TRADEMARKS*

*© 2012 Deborah R. Gerhardt.

NAME: Deborah R. Gerhardt**

BIO: ** Assistant Professor, University of North Carolina School of Law. I am grateful for thoughtful feedback from Michael J. Gerhardt, Eric Goldman, Mark Lemley, Mary-Rose Papandrea, Meredith Wilkes and the participants in the North Carolina Law Review Symposium on Social Networking and the Law. Thanks to John Dougherty, Jeremy Fairfield and Charlie Hiser for excellent research assistance.

LEXISNEXIS SUMMARY:

... To distinguish between these two concepts, this Article will use "social media" to refer to website services that offer individuals other than the brand owners a platform for participating in conversations about brands. ... As the Internet creates new opportunities to use brands for expressive and informational purposes, courts sometimes find themselves stuck in a pre-Internet box of brand perception in which the trademark owner is thought to have exclusive rights to control the brand by stamping out all unauthorized uses, especially those that involve commercial transactions. ... This legislation substantially broadened opportunities for stopping the unauthorized use of trademarks, because no longer was consumer deception - or even confusion - a predicate for trademark liability. ... The quick demise of Disney's "SEAL Team 6" trademark applications provides a fascinating insight into how social networking has shifted the trademark balance of power. ... Social media forces them to let go of that myth as brand reliance on consumer investment becomes more open than ever before, and brands become linked with many stories authored by consumers and other brand owners. ... By creating a page on Facebook, a corporate brand owner like Tupperware can benefit from both the narrative of a cool social media brand like Facebook and its membership base. ... Social media also provide consumers with easily accessible opportunities to use brands for favorite products and services as ties in social networking.

HIGHLIGHT:

New ways to use brands in social media are pressuring traditional conceptions of trademark law. Contrary to much trademark doctrine, every brand is built by a community, not by its proprietor alone. I previously described this phenomenon as consumer investment in trademarks. Internet technology amplified the effects of the consumer investment model, enabling consumers to gain more power over the marks of others. This Article shows that social media have turned the volume of consumer voices up another notch and explores the consequences for trademark law. Sites like Facebook offer consumers a platform for the expression of personal identity through trademark preferences. Social media also give consumers unprecedented power to affect brand value by publishing positive and negative

commentary. If corporate brand owners want to take advantage of social media, they must let go of much of their control by opening their brands to constant consumer feedback. This trend is changing traditional notions of what it means to acquire goodwill in a mark. Brand owners no longer work alone to craft the story of a trademark. Instead, modern brand narratives are written in collaboration with consumer communities. This new trend of trademark co-authorship through social media will require rethinking some entrenched concepts of trademark law. Ironically, one way for trademark owners to reassert control of their story is by linking their brand narrative to marks belonging to others. This phenomenon occurs every time one brand owner tells its audience to "like it" on Facebook or "follow it" on Twitter. In social media, many brand owners use the marks of others for commercial benefits without express authorization. The ubiquity of this trend requires rethinking when unauthorized uses should result in trademark liability. New social media norms will require tolerance of expressive, informational and even some commercial use of marks that happen without the owner's permission. Consequently, social media are creating multiple challenges for everyone attempting to apply trademark doctrine to new practices in cyberspace.
