5. "Identify (document)." When referring to a document, "identify" means to give, to the extent known, the following information: (a) the type of document; (b) the general subject matter of the document; (c) the date of the document; (d) the authors, addressees, and recipients of the document; (e) the location of the document; (f) the identity of the person who has custody of the document; and (g) whether the document has been destroyed, and if so, (i) the date of its destruction, (ii) the reason for its destruction, and (iii) the identity of the person who destroyed it.
6. "Any" should be understood in either its most or its least inclusive sense as necessary to bring within the scope of the discovery request all responses that might otherwise be construed to be outside of its scope.
7. "And/Or." The connectives "and" and "or" should be construed either disjunctively or conjunctively as necessary to bring within the scope of the discovery request all responses that might otherwise be construed to be outside of its scope.
8. "Number." The use of the singular form of any word includes the plural and vice versa.
9. "Possession, custody, or control" of an item means that the person either has physical possession of the item or has a right to possession equal or superior to that of the person who has physical possession of the item.
10. "Person" means any natural person, corporation, firm, association, partnership, joint venture, proprietorship, governmental body, or any other organization, business, or legal entity, and all predecessors or successors in interest.
11. "COLOR WARS" defines the mark COLOR WARS, U.S. Trademark Application Serial No. 85/324,443, applied for by Joel L. Beling d/b/a Supa Characters Pty Ltd.

12. "COLORWORX" defines the mark COLORWORX®, U.S. Trademark Registration No. 3,372,884 and includes a variety of printing goods and printing services that are international Class 40 products manufactured and put into the stream of commerce by Ennis, Inc.

13. "Identify" or "describe" when referring to a person, means you must state the following:

- a. The full name.
- b. The present or last known residential address and residential telephone number.
- c. The present or last known office address and office telephone number.
- d. The occupation, job title, employer, and employer's address at the time of the event or period referred to in each particular interrogatory.
- e. In the case of any entity, identify the officer, employee, or agent most closely connected with the subject matter of the interrogatory and the officer who is responsible for supervising that officer or employee.

14. "Identify" or "describe" when referring to a document, means you must state the following:

- a. The nature (e.g., letter, handwritten note) of the document.
- b. The title or heading that appears on the document.
- c. The date of the document and the date of each addendum, supplement, or other addition or change.
- d. The identity of the author and of the signer of the document, and of the person on whose behalf or at whose request or direction the document was prepared or delivered.
- e. The present location of the document, and the name, address, position or title, and telephone number of the person or persons having custody of the document.

15. "Document" means all written, typed, or printed matter and all magnetic, electronic, or other records or documentation of any kind or description in your actual possession, custody, or control, including those in the possession, custody, or control of any and all present or former directors, officers, employees, consultants, accountants, attorneys, or other agents, whether or not prepared by you, that constitute or contain matters relevant to the subject matter of the action.

16. Wherever in the following interrogatories Applicant is asked to identify documents, it is requested that the documents be identified by stating:

- a. general type of document, e.g., letter, memorandum, report, miscellaneous, notes, etc.;
- b. date;
- c. author;
- d. organization, if any, with which author was connected;
- e. addressee or recipient;
- f. other distributees;
- g. organization, if any, with which addressee or recipient, or distributees were connected;

h. general nature of the subject matter to extent that Applicant can do so without divulging matter considered by it to be privileged;

i. present location of such document and each copy thereof known to Applicant, including the title, index number and location, if any, of the file in which the document is kept by the Applicant or the file from which such document was removed, if removed for the purposes of this case, and the identity of all persons responsible for the filing or other disposition of the document.

17. Should Applicant deem to be privileged any documents concerning information which is requested by any of the following interrogatories, Applicant shall list such documents and supply information as requested concerning such documents and additionally shall indicate that they claim privilege therefore, briefly state the nature of the document, the sender, the author, the recipient of each copy, the date, the name of each person to whom the original or any copy was circulated, the names appearing on any circulation list of Applicant associated with such document, a summary statement of the subject matter(s) of such document in sufficient detail to permit the Court to conduct an analysis to reach a determination of any claim of privilege or exclusion and separate indication of the basis for assertion of privilege or the like for each such document.

18. Wherever in the following interrogatories Applicant is asked to identify a product, it is requested that the product be identified by stating the catalog, stock, model or the like number or designation, the trademark, name, type, grade, and any other designation customarily used by the party concerned to designate such product, and to distinguish it from others made by the same or a different producer.

19. Each of the separate interrogatories herein is deemed to seek separate answers and responses as of the date they are answered. However, these interrogatories shall be deemed to be continuing and any additional information relating in any way to these interrogatories and to events occurring or documents existing prior to the filing of the Opposition herein which Applicant acquires or which becomes known to Applicant up to and including the close of discovery shall be furnished to Opposer within a reasonable time after such information is acquired or becomes known. Applicant's response to these interrogatories is to be promptly supplemented to include subsequently acquired information in accordance with the requirements of Fed. R. Civ. P. 26(e).

INTERROGATORIES

INTERROGATORY NO. 1: Specify the date and describe the details of Applicant's first use of "COLOR WARS" on its services and/or products, including indentifying all persons involved and all materials referring or relating to the usage.

ANSWER:

INTERROGATORY NO. 2: When did Applicant first intend to use, sell or offer to sell products and/or services under the mark "COLOR WARS"?

ANSWER:

INTERROGATORY NO. 3: Identify each and every geographical location where Applicant intends to use or has used "COLOR WARS", including specifying the dates of first use and first offer of services and/or products in the identified geographical location.

ANSWER:

INTERROGATORY NO. 4: Identify every product and service in connection with which you have used, are using, or plan to use under or with the "COLOR WARS" mark.

ANSWER:

INTERROGATORY NO. 5: Identify the media in or through which Applicant advertises or promotes its services and/or products under or with the "COLOR WARS" mark.

ANSWER:

INTERROGATORY NO. 6: Identify each person or the entity whom distributed, circulated, sold, or advertised services and/or products in connection with the "COLOR WARS" mark, including whether any contract exists for distribution, circulation, sale, or advertisement.

ANSWER:

INTERROGATORY NO. 7: Identify all facts, laws, information, or materials that Applicant relies on to support the contention that all or part of the mark "COLOR WARS" is not confusingly similar to the mark "COLORWORX[®]".

ANSWER:

OPPOSER'S FIRST SET OF INTERROGATORIES TO APPLICANT

PAGE 5

INTERROGATORY NO. 8: Identify all facts, laws, information, or materials that Applicant relies on to support the contention that there is no likelihood of confusion between any trademark, service mark, domain name, or other designation of Opposer and any trademark, service mark, domain name, or other designation of Applicant.

ANSWER:

INTERROGATORY NO. 9: Identify all facts, laws, information, or materials that Applicant relies on to support the contention that Applicant's mark will not injure Opposer by causing the trade and/or purchasing public to be confused and/or deceived.

ANSWER:

INTERROGATORY NO. 10: Identify all facts, laws, information, or materials that Applicant relies on to support the contention that Opposer's mark has not acquired secondary meaning among the public or trade.

ANSWER:

INTERROGATORY NO. 11: Identify all facts, laws, information, or materials that Applicant relies on to support the contention that Applicant's mark will not place a cloud over Opposer's mark.

ANSWER:

INTERROGATORY NO. 12: Identify all facts, laws, information, or materials that Applicant relies on to support the contention that Applicant's mark is not the same as, or substantially the same as, Opposer's mark in visual appearance and in pronunciation.

ANSWER:

INTERROGATORY NO. 13: Identify each officer of Supa Characters Pty Ltd, including each officer's name, title, address, and job duties.

ANSWER:

OPPOSER'S FIRST SET OF INTERROGATORIES TO APPLICANT

PAGE 6

INTERROGATORY NO. 14: Identify each person who participated in the selection, design and adoption of the "COLOR WARS" mark.

ANSWER:

INTERROGATORY NO. 15: Identify every opinion, legal or otherwise, requested or received by you, regarding the right to use the mark "COLOR WARS", including the identity of the persons requesting the opinion, the date and substance of the opinion, and the persons receiving the opinion.

ANSWER:

INTERROGATORY NO. 16: Describe in detail any instances in which a third party, other than Opposer, has challenged your right to use the mark "COLOR WARS".

ANSWER:

INTERROGATORY NO. 17: Describe in detail any plans for future expansion, including but not limited to, expansion of marketing lines, services, customer base or geographical areas served.

ANSWER:

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE TRADEMARK TRIAL AND APPEAL BOARD**

Opposition No. 91203884

Ennis Inc.

v.

Joel L. Beling d/b/a Supa Characters Pty Ltd

**DECLARATION IN SUPPORT OF
MOTION TO COMPEL**

Cancellation No. 92055374

Joel L. Beling d/b/a Supa Characters Pty Ltd

v.

Ennis, Inc.

DECLARATION OF JOEL L. BELING

1. I am the Applicant and Petitioner in the present proceeding. I submit this declaration pursuant to Trademark Rule 2.20 in support of my motion to compel. It contains a statement of the facts relevant to the motion in respect of which I am willing to give evidence if called upon.
2. On April 24, 2012 I participated in the Discovery Conference for this matter along with Mr. Thomas G. Jacks, attorney for Ennis Inc. (“Ennis”), and Ms. Elizabeth Dunn, Board Interlocutory Attorney. Subjects discussed included the pleadings, priority, settlement, legal representation, ACR (accelerated case resolution), and a stipulation as to service, most of which are discussed in the Board’s order dated April 26, 2012.
3. Another subject discussed at the Discovery Conference in this proceeding was whether there were any other similar proceedings on foot. That is, proceedings which involved similar issues to those which were before the Board. Mr. Jacks advised Ms. Dunn and me that there was in fact another similar opposition proceeding on foot that involved Ennis’ COLORWORX mark

and design, and that his client was the opposer. I asked Mr. Jacks what the issues were and he said the other mark was COLOR WORKS with a “K-S.” We moved on to different topics for a couple of minutes and then I asked Mr. Jacks what the file number was for the opposition proceeding involving the similar allegations to the present suit and he replied that he did not have the file in front of him. For the record, I make no allegations of attorney misconduct in this declaration or the above motion against Ennis’ attorneys, including Mr. Jacks.

4. On the 19th June, 2013, I did an internet search and found Ennis’ internet homepage, which is located at www.ennis.com. I went to the “Investor Relations” section of the website and downloaded Ennis’ 2003 annual report. A true and correct copy of pages 8 and 9 of the annual report which relate to the creation of the COLORWORX brand is shown in Exhibit 1. In its 2003 Annual Report, Ennis states that the COLORWORX brand was designed by Admore to “serve the short run color needs of [Ennis’] distributors” (p. 9). Throughout the discovery process in this proceeding, Ennis has failed to produce any of its annual reports to me, despite all being relevant under a number of my discovery requests. In addition, during my initial research into Ennis in mid-2012 while preparing my first motion to compel (which was not considered by the Board in its decision on May 15, 2013), I skim-read each of Ennis’ annual reports for the previous 12 years. I discovered that nowhere in Ennis’ annual reports for the previous 12 years, to the best of my knowledge and belief, is there even a single reference to Ennis expanding its goods and services to include goods and services listed in international class 41.

5. On the 19th June, 2013, I did an internet search for Ennis’ COLORWORX mark, registration number 3372884, on the United States and Patent Office’s TARR site and retrieved a status report, which is shown in Exhibit 2. It shows an opposition by Ennis against the Pioneer Supply Company in opposition no. 91203773, with Ennis relying on its COLORWORX and design registration to oppose the application for the mark PSC COLOR WORKS.

6. On the 19th June, 2013, I did an internet search and found Ennis’ COLORWORX website, which is located at www.colorworxonline.com. I downloaded the page “About Us” from

the webpages from this site which I believe is relevant to my motion to compel. A true and correct copy of this webpage is shown in Exhibit 3. The main text of the page reads as follows:

High Quality, Full Color

ColorWorx provides the quality, full color printing you expect at an affordable price.

Quick Turnaround

Most orders ship in 3-5 working days or less from receipt of acceptable artwork/disk.

Standard Printing

All standard ColorWorx products are printed in 4-color process only. All PMS colors in files will be automatically converted to CMYK process equivalents. Be aware this can cause a slight color shift.

Color Matching

ColorWorx is a "gang run" style print company. Your job will be run on a press sheet with other jobs and will be run to standard color densities. The overall dominant color on a sheet may cause individual job colors to shift slightly. We make every effort to produce a reasonable representation; however, ColorWorx, like all other gang run commercial printers, does not guarantee an exact color match.

ColorWorx...Guarantee

We're proud of the work we do. And if we don't do it right, we'll make it right. Period.

Ennis' COLORWORX website, "About Us"
<http://www.colorworxonline.com/aboutus.html>

7. Finally, in early-mid 2012, before I filed my motion to amend my pleadings in my cancellation petition to include an allegation of fraud against Ennis, I wrote to Ennis' then-attorney, Mr. Scott Myer, and asked him whether Ennis consented to this amendment. Approximately 10 days later, Ennis replied, through Mr. Myer, that it did not consent. *See* Exhibit 4. I believe that my fraud allegation would have generated a flurry of emails amidst Ennis' senior management during those 10 days, especially given that Ennis is a public company listed on the New York Stock Exchange. I also believe it beggars belief to suggest that there was no written or email correspondence concerning Ennis's other opposition proceeding against the Pioneer Supply Company regarding the use of the "PSC COLOR WORKS" mark (Opposition No. 91203773).

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief. Executed this 20th day of June, 2013.

Dated: June 20, 2013

Respectfully submitted,

JOEL BELING

Exhibit 1

promotional solutions group

The Promotional Solutions Group exudes an image of distinction to customers and competitors alike. The companies that make up this division of Ennis are viewed as leaders in their industries and work hard to ensure that their products, capabilities and relationships are second to none. This attitude of distinction, mixed with a service-first mindset has led to a history of success and trust in the industry.

Success & Trust

The Promotional Solutions Group of companies is characterized by the word Distinction. Our oldest company, Wolfe City Tag and Label, has been a leading supplier of tags, labels and ad specialty products to Ennis' customers for over 34 years. This company has set itself apart by being the largest supplier of cotton tags in the United States and has excelled in the manufacture of unique and difficult custom labels for almost any application. With the addition of new flexographic equipment, Wolfe City now offers its customers an array of new promotional label opportunities in vivid color. The focus this past year has been to enhance the capability to service a wider range of customers' needs.

Whether these needs are for products that offer more promotion or for a unique environment at higher volume, Wolfe City has enhanced its product offerings for distributors with the addition of medium format screen-printing capability. This division partners with the Forms Solutions Group and the other divisions within this group to offer customers a broader range of promotional products. Wolfe City Tag and Label has distinguished itself and stands ready to do so in the future.

Expansion & Growth

Admore is distinguished as the leading manufacturer of presentation folders in the nation. What really distinguishes Admore is the outstanding quality of its products and the people who manufacture them. The efforts of Admore employees to reduce costs while maintaining this outstanding quality is allowing the company to be more aggressive in the market, leading to sales growth in a challenging economic environment. A focused marketing effort was initiated at the beginning of the year that emphasized a renewed push by Admore to distinguish the company as the leader in its product category.

A successful effort was made to promote the Admore Line of products to our traditional forms customers. This effort will continue with the increase in traditional forms distributors selling commercial color printing. During the year, Admore introduced the ColorWorx Line, which is designed to serve the short run color needs of our distributors. We also introduced a technologically unique series of expansion products called the Conformer® Line. Admore experienced significant volume growth during this past year and expects to continue growth in the coming year.

Development & Promotions

The Adams McClure division has distinguished itself as one of the leading temporary point-of-purchase product manufacturers in the commercial printing industry. This profile has continued this past year with substantial growth with key customers. A refocusing of attention on the temporary point-of-purchase core product line resulted in substantial improvement in the profitability of the division. Less profitable product lines that were not contributing to our key competency were discontinued or

transferred to other Ennis facilities more suitable for the manufacture and distribution of these lines. Another area that distinguished Adams McClure is in the kitting and fulfillment of complex point-of-purchase promotional programs for major customers such as 7-Eleven and Sonic. In addition to these continuing monthly programs, Adams McClure offers many other programs on a less frequent basis.

A dedicated marketing effort to expand awareness of Adams McClure in new market regions and with new customers has successfully led to new business opportunities. This should allow continued growth in the next year as our new relationships develop.

Adams McClure has improved its cross-selling activity with the Forms Solutions and Financial Solutions Groups, which has led to enhanced product offerings for Ennis' customers. With continued effort to grow profitable sales while operating with greater efficiencies, Adams McClure will be a strong contributor to Ennis' growth.

COLORWORX®
 NOTHING MAKES A BIGGER IMPACT
 THAN COLOR!

High Quality, Full Color
 ColorWorx provides the quality, full color printing you expect at an affordable price.

Quick Turnaround
 Most orders ship in 3-5 working days or less from receipt of proof (please allow extra lead time).

Standard Printing
 All standard ColorWorx products are printed in 4-color process only. All CMYK colors in files will be automatically converted to CMYK process. No printing is possible with color separations or 1-bit images.

Color Matching
 ColorWorx is a "gang run" style print company. Your job will be run on a press sheet with other jobs and will have to share sheet color densities. The most dominant color on a sheet may cause individual job colors to shift slightly. We make every effort to produce a reasonable representation; however, ColorWorx, like all other gang run commercial printers, does not guarantee an exact color match.

ColorWorx...Guarantee
 We're proud of the work we do. And if we don't do it right, we'll make it right. Period.

Subject: RE: Joel L. Beling d/b/a Supa Characters Pty Ltd v. Ennis, Inc. (Cancellation Proceeding: 92055374)

Scott,

I seek your written consent to amend my petition to cancel to include a count for fraud. The basis for this request is your recently served request for admissions.

I will be filing a motion to amend my pleading if consent is not granted.

Thanks

Joel

**OPPOSER'S RESPONSE TO
APPLICANT'S MOTION TO COMPEL DISCOVERY RESPONSES**

Opposer, Ennis, Inc. ("Opposer" and/or "Registrant"), by and through its undersigned counsel and pursuant to 37 CFR § 2.127(a) and the Federal Rules of Civil Procedure, hereby files this its Response to Applicant's Motion to Compel Discovery Responses (hereinafter referred to as "Motion to Compel").

I. APPLICANT'S MOTION TO COMPEL IS PROCEDURALLY DEFICIENT

Applicant's Motion to Compel is procedurally deficient because it does not include the statement under 37 C.F.R. § 2.120(e)(1) and TBMP § 523.02 that it made a good faith effort to resolve the issues prior to filing the Motion to Compel on June 20, 2013. Applicant's Motion to Compel should be denied.

TBMP § 523.02 provides "the motion to compel disclosures or discovery must be supported by a written statement from the moving party that such party or its attorney has made a good faith effort, by conference or correspondence, to resolve with the other party or its attorney the issues presented in the motion and has been unable to reach agreement." *See also* 37 C.F.R. § 2.120(e)(1). A motion to compel that does not comply with the "meet and confer" requirements of 37 C.F.R. § 2.120 should be denied. *See e.g., Giant Food, Inc. v. Standard Terry Mills, Inc.*, 231 USPQ 626 (TTAB 1986); *MacMillan Bloedel Ltd v. Arrow-M Corp.*, 203 USPQ 952 (TTAB 1979).

Applicant's Motion to Compel filed on June 20, 2013 is procedural deficient because (1) all of Applicant's correspondence regarding the discovery in the "Certificate of Conference" occurred in June 2012, approximately twelve months prior to the filing of the Motion to Compel on June 20, 2013,¹ and (2) there is no statement that Applicant made a good faith effort resolve any issues in the Motion to Compel from May 15, 2013, when these proceedings were resumed, until the filing the Motion to Compel on June 20, 2013:

CERTIFICATE OF CONFERENCE

On **June 12, 2012**, Applicant sent Opposer's attorneys an e-mail entitled "Applicant's first good faith attempt to convince opposer to produce documents, answer

¹ The Board suspended these proceedings from July 7, 2012 until May 15, 2013. (Orders of July 17, 2012 and May 15, 2013).

interrogatories and admit or deny questions,” reminding Opposer of its discovery obligations and asking it to provide responses (see Exhibit 2). Opposer refused to comply, stating that its responses were sufficient (see Exhibit 26). Other email correspondence ensued between the parties with applicant continually reminding opposer about its discovery obligations (see Exhibits 3, 5, 6, 8, 9). On **June 19, 2012**, applicant sent opposer’s attorneys an e-mail entitled “Applicant’s second good faith attempt to convince opposer to produce documents, answer interrogatories and admit or deny questions,” reminding opposer of its discovery obligations and asking it to provide responses (see Exhibit 11). Opposer did not reply at all. Further correspondence ensued between the parties (see Exhibits 19-25). On **June 23, 2012**, applicant sent opposer’s attorneys an e-mail entitled “Applicant’s third good faith attempt to convince opposer to produce documents, answer interrogatories and admit or deny questions,” reminding opposer of its discovery obligations and asking it to provide responses. Opposer replied on **27th June 2012** that it would attempt to supplement its discovery responses with further production (see Exhibit 23) but has failed to respond at all with further production.

(Applicant’s Motion to Compel Discovery at 23-24) (emphasis added).

Applicant’s disregard of 37 C.F.R. § 2.120(e)(1) should not be condoned, and its Motion to Compel should be denied in full for failure to comply in full with that rule.

II. APPLICANT FAILED TO MAKE A GOOD FAITH EFFORT TO RESOLVE THE DISCOVERY ISSUES

Applicant failed to make a good faith effort to resolve the discovery issues prior to filing the Motion to Compel on June 20, 2013 as required by 37 C.F.R. § 2.120(e)(1) and TBMP § 523.02. Applicant's Motion to Compel should be denied.

The "meet and confer" requirements of 37 C.F.R. § 2.120 require the moving party or its attorney to make "a good faith effort, by conference or correspondence, to resolve with the other party or the attorney therefor the issues presented in the motion" prior to filing the motion. A motion to compel that does not comply with the "meet and confer" requirements of 37 C.F.R. § 2.120 should be denied. *See e.g., Giant Food, Inc. v. Standard Terry Mills, Inc.*, 231 USPQ 626 (TTAB 1986); *MacMillan Bloedel Ltd v. Arrow-M Corp.*, 203 USPQ 952 (TTAB 1979).

On May 15, 2013, the Board resumed these proceedings. (Order of May 15, 2013). Two weeks later on May 29, 2013, Applicant served 209 Requests for Admission and 10 Interrogatories on Opposer. (Applicant's Fourth Request for Admissions to Opposer; Applicant's Second Set of Interrogatories to Opposer). On May 30, 2013, counsel Scott A. Meyer and Thomas G. Jacks, withdrew as attorneys of record for Ennis, Inc., and were replaced by Daniel J. Chalker and Jessica Flores. (Withdrawal of Counsel and Change in Designation of Lead Counsel for Ennis, Inc.). Within three weeks after Opposer's withdrawal and change in lead counsel, Applicant filed its Motion to Compel on June 20, 2013. Since the resumption of these proceeding on May 15, 2013, Applicant make no effort, much less a good faith effort, to resolve the issues in the Motion to Compel prior to filing the Motion to Compel on June 20, 2013.

Applicant's disregard of 37 C.F.R. § 2.120(e)(1) should not be condoned, and its Motion to Compel should be denied in full for failure to comply in full with that rule.

III. CONCLUSION

Applicant's Motion to Compel is procedurally deficient because it does not include the statement under 37 C.F.R. § 2.120(e)(1) and TBMP § 523.02 that it made a good faith effort to resolve the issues prior to filing the Motion to Compel on June 20, 2013. Moreover, Applicant failed to make a good faith effort to resolve the discovery issues prior to filing the Motion to Compel on June 20, 2013 as required by 37 C.F.R. § 2.120(e)(1) and TBMP § 523.02. Opposer respectfully requests that Applicant's Motion to Compel be denied in its entirety.

Dated: July 5, 2013

Respectfully submitted,

**APPLICANT’S MODIFICATION OF REQUESTS SOUGHT UNDER MOTION TO COMPEL
PURSUANT TO TRADEMARK RULE 2.120(e)(1)**

To: Ennis Inc. 2441 Presidential Parkway, Midlothian, TX 76065, United States.

Pursuant to Trademark Rule 2.120(e)(1), Joel L. Beling d/b/a Supa Characters Pty Ltd (“Applicant” or “Petitioner”) advises the Board that the following issues no longer require adjudication, as a result of Ennis, Inc.’s (“Opposer” or “Registrant”) discovery supplementation.

ISSUES WHICH NO LONGER REQUIRE ADJUDICATION BY THE BOARD

Interrogatories

The Applicant advises the following Interrogatories no longer require adjudication by the Board:

Interrogatory No. 1, Interrogatory No. 2, Interrogatory No. 3, Interrogatory No. 5, Interrogatory No. 6, Interrogatory No. 7, Interrogatory No. 8, Interrogatory No. 11, Interrogatory No. 12, and Interrogatory No. 18.

Requests for Production

The applicant advises that all Requests for Production still longer require adjudication by the Board, in addition to Requests for Production No 1-4 (inclusive), which have been supplemented in light of the opposer's Expert Disclosures, which were not known to the applicant at the time the motion to compel was filed.

ISSUES WHICH STILL REQUIRE ADJUDICATION BY THE BOARD

Interrogatories

The Applicant advises the following Interrogatories still require adjudication by the Board:

INTERROGATORY NO. 4: Define in detail your understanding of the phrases "color works" and "works of color."

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer is not aware of any definition or special meaning within the printing industry of the phrases "color works" and "works of color." As a result, Opposer does not have a detailed understanding of the phrases "color works" and "works of color."

The applicant relies on his arguments in his motion to compel. In addition the applicant submits that opposer's answer is highly dishonest and evasive, because the Interrogatory does not request the definitions of the phrases "color works" and "works of color" *in the printing industry*. Rather, it seeks *opposer's* understanding of the two phrases. The relevance of the phrase "color works" is obvious, while the phrase "works of color" is simply the expanded version of the phrase "color works." If opposer argues that the phrases "color works" and "works of color" are not relevant to this proceeding, then it has no grounds for opposing the applicant's "COLOR WARS" Mark and it has filed a frivolous, unmeritorious opposition.

INTERROGATORY NO. 9: Describe in detail the similarities and/or points of confusion and/or deception between the word “wars” and the word “works.”

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer objects to this Interrogatory because it is not reasonably calculated to lead to the discovery of evidence admissible at trial because the word “works” does not appear in either mark. The likelihood of confusion analysis in this proceeding involves the marks “COLORWORX” and “COLOR WARS.”

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the word “works” is highly relevant to this proceeding because it is the actual spelling of part of the opposer’s Mark, COLORWORX. Opposer’s Mark is a compound word made up of two words, “color” and “worx.” The word “worx” is simply an insignificant misspelling of the word “works,” which is recognizable to all members of the public visually, semantically and aurally. One of the main points of difference between the opposer’s mark and the applicant’s mark is the distinction between the words “wars” and “worx,” since both Marks share the word “color.” Understanding the similarities and/or points of confusion and/or deception between the word “wars” and the word “worx” is arguably the crux of the entire opposition and is likely to lead to the discovery of an abundance of evidence admissible at trial.

INTERROGATORY NO. 10: Identify all facts, laws, information, or materials that Opposer relies on to support the contention that Applicant’s mark is the same as, or substantially the same as, Opposer’s mark in visual appearance and in pronunciation.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, and requires Opposer to marshal its evidence prior to trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer’s Notice of Opposition and Opposer’s document production produced on May 24, 2012.

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the opposer cannot rely alone on its Notice of Opposition and document production dated May 24, 2012.

Applicant is entitled to detailed evidence or analyses concerning the facts and information the opposer will rely on to support the contention in this Interrogatory.

INTERROGATORY NO. 13: Describe in detail the role and contributions made that each person identified in Interrogatory number 12 played in the selection, design and adoption of the “COLORWORX” mark.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Lisa Goebel, Bill Tignanelli, David Crysler and Cindy Wronski contributed to the selection and adoption of the mark designed by Rachel Maples.

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the answer to this Interrogatory is critical to investigating the fraud allegations against the opposer. The applicant has alleged that the opposer has procured a trademark registration by fraud in that over 20 traders have used part of the opposer’s mark (either the design element or the term COLORWORX) before the opposer, and that these third parties’ details are part of the USPTO database. Ascertaining the role and contributions each of the four individuals identified in the opposer’s answer played in the selection, design, and adoption of the “COLORWORX” mark is fundamental to determining the fraud allegations. The opposer’s answer is utterly unresponsive, evasive and dishonest in that it simply lists the four individuals from Interrogatory No. 12 without describing their role and contributions.

INTERROGATORY NO. 14: Describe in detail the rationale, philosophy and ideas behind the selection, design and adoption of each feature and/or part of the “COLORWORX” mark, including the logo, words, style of lettering, visual appearance, sound, compound/composite nature and misspelling.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer Answers as follows: Opposer rebranded a line of products in 2002 that was initially branded with the “INSTACOLOR” mark. The mark “COLORWORX” incorporates part of the old brand and is reflective of the four-color printing process used by Opposer. Opposer has made a reasonable inquiry and except for the answers to this Interrogatory, more specific details are not known or readily obtainable by Opposer as the events in question occurred approximately eleven (11) years ago.

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the opposer’s answer is incomplete, evasive and dishonest. Opposer has not described *how* it created, selected or adopted its COLORWORX Mark, either the logo or the term COLORWORX. Did the

opposer invent the term “Colorworx” (as it has claimed in an answer to a previous Interrogatory) or did it copy the term? There is no description of the rationale, philosophy and ideas in relation to the logo, words, style of lettering, visual appearance, sound, compound/composite nature and misspelling. Moreover, the opposer has produced several emails from 2002 concerning the selection of different variations of the term “Colorworx” and design (with different designs to the one in its registered Mark) and its claims that it cannot locate more specific details after a reasonable inquiry are completely false and a blatant suppression of evidence at the heart of the dispute, especially the fraud claims.

INTERROGATORY NO. 15: Describe in detail your understanding of the connections between each aspect of your answer to Interrogatory No. 14 and the works of color you sell, promote, advertise and distribute, including but not limited to business cards, letterhead, rack cards, postcards, brochures, and posters.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer Answers as follows: The phrase “works of color” is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation. Moreover, the phrase “understanding of the connections” is ambiguous and vague. Opposer states that Opposer’s “COLORWORX” mark is used in connection with printing services provided by Opposer.

The applicant relies on his arguments in his motion to compel. The opposer’s answer is again highly dishonest, evasive and incomplete. The applicant submits that the phrase “works of color” is not ambiguous, overbroad, harassing, irrelevant and vague because the Interrogatory then lists specific works of color which the opposer has expressly admitted to producing and selling under its COLORWORX mark: “business cards, letterhead, rack cards, postcards, brochures, and posters.” The phrase “understanding of the connections” is not ambiguous or vague because it seeks the opposer’s view or understanding of how different parts of its Colorworx Mark and design relate or connect to products the opposer has admitted selling under the Mark.

INTERROGATORY NO. 16: Identify every opinion, legal or otherwise, requested or received by you, regarding the right to use the marks “COLORWORX,” “COLOR WORX,” “COLORWORKS,” or “COLOR WORKS,” including the identity of the persons requesting the opinion, the date and substance of the opinion, and the persons receiving the opinion.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

The applicant relies on his arguments in his motion to compel. In addition the Applicant again reinforces that the opposer has completely failed or refused to answer this question. The applicant’s arguments for the Board breaching the attorney-client and work-product privileges are contained in the motion to compel.

INTERROGATORY NO. 17: Describe in detail any instances in which you have been involved which have called into question, created conflict in respect of, or challenged the right to use the marks “COLORWORX,” “COLOR WORX,” “COLORWORKS,” or “COLOR WORKS.”

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer Answers as follows: Opposer filed a Notice of Opposition on February 10, 2012 against Pioneer Supply Company, Inc. for the Mark “PSC COLORWORKS”, Application Serial No. 85/374,011, under Opposition No. 91203773. A default judgment was granted by TTAB on September 11, 2012 due to failure of Pioneer Supply Company, Inc. to answer the Notice of Opposition.

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that this answer is dishonest and incomplete. It beggars belief to suggest that there has only been a single instance in 11 years wherein the opposer’s Colorworx Mark has been questioned, or called into conflict or challenged, given the many individuals, groups, or companies which use the marks “COLORWORX,” “COLOR WORX,” “COLORWORKS,” or “COLOR WORKS” in the United States. *See* petitioner’s second amended petition to cancel for examples.

INTERROGATORY NO. 19: Identify and describe all facts, laws, information, or materials that Opposer found, discovered, became aware of and/or knew about before, during and after its registration of the COLORWORX mark involving use of the marks “COLORWORX,” “COLOR WORX,” “COLORWORKS,” or “COLOR WORKS.”

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

Subject to, and without waiving, the foregoing objections, Opposer Answers as follows: Opposer objects to this Interrogatory as being ambiguous, overbroad, harassing and vague because the Interrogatory does not provide sufficient information for Opposer to know what “COLORWORX,” “COLOR WORX,” “COLORWORKS,” or “COLOR WORKS” marks are being referred to. Opposer filed a Notice of Opposition on February 10, 2012 against Pioneer Supply Company, Inc. for the Mark “PSC COLORWORKS”, Application Serial No. 85/374,011, under Opposition No. 91203773. A default judgment was granted by TTAB on September 11, 2012 due to failure of Pioneer Supply Company, Inc. to answer the Notice of Opposition.

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the opposer’s response is blatantly evasive, dishonest and incomplete, feigning ignorance of “what ‘COLORWORX,’ ‘COLOR WORX,’ ‘COLORWORKS,’ or ‘COLOR WORKS’ marks are being referred to.” The Interrogatory is plain, self-explanatory and obvious on its face and simply requests the opposer’s knowledge or awareness of any “use[s] of the marks ‘COLORWORX,’ ‘COLOR WORX,’ ‘COLORWORKS,’ or ‘COLOR WORKS’”. The applicant’s arguments for the Board breaching the attorney-client and work-product privileges are contained in the motion to compel.

Requests for Production

In essence, the opposer’s supplementary production of documents and things consists only of a few non-incriminating emails from 2002, more product samples bearing the Colorworx mark and design, and a CD of the opposer’s annual reports from 2000 to 2012, which the applicant already possessed and were already in the public domain. Apart from the pages exhibited in the motion to compel, the opposer’s annual reports contain *no* specific information relating to its Colorworx Mark and design – no financial information whatsoever – and may thus be construed as a pseudo-production intended to deceive the applicant and the Board that the opposer is complying with its discovery obligations, when in fact the reverse is true.

The Applicant advises the following *new* Requests for Production require adjudication by the Board:

REQUEST 1: Produce working papers, notes, calculations, diagrams, photographs, models, exhibits, and other materials, including reports and factual observations, prepared or reviewed by any expert who will testify at trial on Opposer's behalf.

RESPONSE: None at this time.

REQUEST 2: Produce copies of all transcripts of testimony previously provided by any individual listed by You as an expert witness.

RESPONSE: None at this time.

REQUEST 3: Produce treatises, rules, regulations, guidelines, statutes, policies, procedures, and any other authoritative materials considered by any testifying expert in forming an opinion.

RESPONSE: None at this time.

REQUEST 4: Produce invoices, bills, and other billing materials for each expert You expect will testify at trial.

RESPONSE: None at this time.

Because the opposer has provided Expert Disclosures, the applicant now seeks production of documents in relation to the opposer's expert. In particular, the opposer listed Steve Osterloh, Vice President of Marketing, as an expert witness in its Expert Disclosures where it had not hitherto indicated reliance on an expert. The applicant therefore seeks the above documents and things in relation to the opposer's expert, Steve Osterloh. The applicant relies on the legal doctrine of estoppel (in its various forms) to submit that the opposer is estopped from denying that Steve Osterloh is an expert witness by its Expert Disclosures in which it claimed that Steven Osterloh was and is an expert witness.

REQUEST 5: Produce all photographs, videotapes, drawings, and other tangible things that pertain in any way to the subject matter of this suit.

RESPONSE: Opposer refers Applicant to all of the documents produced in this proceeding Bates labeled ENNI 0001 – ENNI 1563.

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the opposer has not provided all drawings of the logo in its Colorworx Mark. It has provided a page of different variations of possible Colorworx Marks but has not provided documents concerning the development of these logos. The logo in the opposer's Mark is the subject of a number of fraud claims.

REQUEST 8: Produce all oral or written statements made by You or Your representatives concerning this suit.

RESPONSE: None.

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the opposer has not provided any written correspondence, including emails, made by it or its representatives concerning this suit. The applicant's arguments for the Board breaching the attorney-client and work-product privileges are referred to in the motion to compel and incorporated by reference.

REQUEST 9: Produce all documents and things relating to the creation, consideration, design, development, selection, adoption, and first use of the "COLORWORX" mark or any work of color (including black and white) or service.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to documents Bates labeled ENNI 0480 – 0481 and ENNI 1563 produced herewith, as well as documents previously produced showing representative specimens. Opposer has made a reasonable inquiry and except for the produced documents and prosecution history of U.S. Trademark Registration Number 3,372,884 for Opposer's "COLORWORX" mark, no other documents and things are known or readily obtainable by Opposer as the events in question occurred approximately eleven (11) years ago.

The applicant relies on his arguments in his motion to compel and the argument advanced in respect of Interrogatory No. 14, above.

REQUEST 12: Produce all documents and things relating to the distribution channels through which works of color (including black and white) or services relating to Opposer's "COLORWORX" mark are advertised, marketed, sold, or promoted.

RESPONSE: Opposer is currently offering goods and services worldwide via the Internet and through qualified dealers. Opposer refers Applicant to Opposer's document production produced in this proceeding. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation.

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the phrase "works of color" is not overbroad, harassing, irrelevant and vague because the phrase is specifically related to the opposer's Colorworx Mark.

REQUEST 13: Produce all documents and things relating to the classes of customers to whom You advertise, market, sell, or promote works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer is currently offering goods and services worldwide via the Internet and through qualified dealers. Opposer refers Applicant to Opposer's document production produced in this proceeding. Further, Opposer refers Applicant to Opposer's Answers and Supplemental Answers to Applicant's First and Second Set of Interrogatories. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation.

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that documents relating to the classes of customers to whom the opposer sells and advertises its works of color or services is key because the opposer sells and advertises its products to both professional printers as well as members of the public. In addition the applicant submits that the phrase "works of color" is not overbroad, harassing, irrelevant and vague because the phrase is specifically related to the opposer's Colorworx Mark.

REQUEST 14: Produce all documents and things relating to the yearly dollar and unit volume of sales to date and projected future dollar and unit volume of sales for each of the works of color (including black and white) or services produced by Opposer in connection with the "COLORWORX" mark.

RESPONSE: Opposer objects to this Request as it is overbroad, irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Annual Reports, available to the public, and Bates labeled ENNI 0482 – 1560 produced herewith. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation.

REQUEST 15: Produce all documents and things relating to variable and fixed costs for sales of works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer objects to this Request as it is overbroad, irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Annual Reports, available to the public, and Bates labeled ENNI 0482 – 1560 produced herewith.

REQUEST 16: Produce all documents and things relating to gross and net profits from sales of works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer objects to this Request as it is overbroad, irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation. Subject to, and without waiving,

the foregoing objections, Opposer refers Applicant to Opposer's Annual Reports, available to the public, and Bates labeled ENNI 0482 – 1560 produced herewith.

REQUEST 17: Produce all documents and things relating to the yearly cost to You of advertising, marketing, selling, and promoting works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer objects to this Request as it is overbroad, irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Annual Reports, available to the public, and Bates labeled ENNI 0482 – 1560 produced herewith.

REQUEST 20: Produce all documents and things relating to Your yearly expenses to date and planned future expenses corresponding to each type of adverting and promotion used for works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer objects to this Request as it is overbroad, irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Annual Reports, available to the public, and Bates labeled ENNI 0482 – 1560 produced herewith.

REQUEST 43: Produce all documents and things relating to the financial health of the ColorWorx mark, including all documents and things submitted to and received from the Internal Revenue Service and all accounting documents.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Annual Reports, available to the public, and Bates labeled ENNI 0482 – 1560 produced herewith.

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the opposer has produced a CD of the opposer's annual reports from 2000 to 2012, which the applicant already possessed and were already in the public domain. Apart from the pages exhibited in the motion to compel, the opposer's annual reports contain *no* specific information relating to its Colorworx Mark and design – no financial information whatsoever – and may thus be construed as a pseudo-production intended to deceive the applicant and the Board that the opposer is complying with its discovery obligations, when in fact the reverse is true.

REQUEST 32: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 9 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and

without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Notice of Opposition.

The applicant relies on his arguments in his motion to compel and Interrogatory No. 9, above.

REQUEST 36: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 13 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to documents Bates labeled ENNI 0480 – 0481 and 1563 produced in this proceeding, Opposer's Supplemental Disclosures, and Opposer's Supplemental answers to Applicant's First and Second Set of Interrogatories. Opposer has made a reasonable inquiry and except for the produced documents and prosecution history of U.S. Trademark Registration Number 3,372,884 for Opposer's "COLORWORX" mark, no other documents and things are known or readily obtainable by Opposer as the events in question occurred approximately eleven (11) years ago.

The applicant relies on his arguments in his motion to compel and Interrogatory Nos. 13 and 14, above.

REQUEST 37: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 14 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to documents Bates labeled ENNI 0480 – 0481 and 1563 produced in this proceeding, Opposer's Supplemental Disclosures, and Opposer's Supplemental answers to Applicant's First and Second Set of Interrogatories. Opposer has made a reasonable inquiry and except for the produced documents and prosecution history of U.S. Trademark Registration Number 3,372,884 for Opposer's "COLORWORX" mark, no other documents and things are known or readily obtainable by Opposer as the events in question occurred approximately eleven (11) years ago.

The applicant relies on his arguments in his motion to compel and Interrogatory Nos. 13 and 14, above.

REQUEST 38: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 15 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Supplemental answers to Applicant's First and Second Set of Interrogatories.

The applicant relies on his arguments in his motion to compel and Interrogatory Nos. 13, 14 and 15, above.

REQUEST 39: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 16 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

The applicant relies on his arguments in his motion to compel and Interrogatory No. 16, above.

REQUEST 40: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 17 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Supplemental answers to Applicant's First and Second Set of Interrogatories. Opposer has equal or greater access to the documents requested through the U.S. Trademark Trial and Appeal Board.

The applicant relies on his arguments in his motion to compel and Interrogatory No. 17, above.

REQUEST 42: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 19 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

The applicant relies on his arguments in his motion to compel and Interrogatory No. 19, above.

Conclusion

For the above reasons, the applicant's motion to compel should be granted and the Board should compel the opposer to respond to the above Interrogatories and Requests for Production, without objection and within 30 days of the Board's order. The applicant also seeks a further and more definite statement of all documents in the opposer's privilege log dated August 27, 2012, and a privilege log of all documents over which Ennis claims privilege from August 27, 2012 to the date of the Board's decision concerning the present motion to compel, as well as *production* of those documents.

Dated: August 31, 2013

Respectfully submitted,

**OPPOSER’S RESPONSE TO APPLICANT’S
MODIFICATION OF REQUESTS SOUGHT UNDER MOTION TO COMPEL
PURSUANT TO TRADEMARK RULE 2.120(e)(1)**

Opposer, Ennis, Inc. (“Opposer” and/or “Registrant”), by and through its undersigned counsel and pursuant to 37 CFR § 2.127(a) and the Federal Rules of Civil Procedure, hereby files this its Response to Applicant’s Modification of Requests Sought Under Motion to Compel Pursuant to Trademark Rule 2.120(e)(1) (hereinafter referred to as “Applicant’s Modification”).

I. APPLICANT REPEATEDLY FAILED TO MAKE A GOOD FAITH EFFORT TO RESOLVE THE DISCOVERY ISSUES

Applicant failed to make a good faith effort to resolve the discovery issues prior to filing his Motion to Compel on June 20, 2013 (hereinafter referred to as “Applicant’s Motion to Compel”) as required by 37 C.F.R. § 2.120(e)(1) and TBMP § 523.02. Applicant again failed to make a good faith effort to resolve any remaining discovery issues after Opposer supplemented the following discovery responses on August 19, 2013 (hereinafter referred as “Opposer’s Supplemental Discovery Responses”): (a) Opposer’s Third Supplement to Initial Disclosures; (b) Opposer’s Supplemental Responses to Applicant’s First Request for Production; and (c) Opposer’s Supplemental Answers to Applicant’s First Set of Interrogatories. Most recently, Applicant failed to make a good faith effort to resolve any remaining discovery issues prior to filing Applicant’s Modification.

The “meet and confer” requirements of 37 C.F.R. § 2.120 require the moving party or its attorney to make “a good faith effort, by conference or correspondence, to resolve with the other party or the attorney therefor the issues presented in the motion” prior to filing a motion. A motion to compel that does not comply with the “meet and confer” requirements of 37 C.F.R. § 2.120 should be denied. *See e.g., Giant Food, Inc. v. Standard Terry Mills, Inc.*, 231 USPQ 626 (TTAB 1986); *MacMillan Bloedel Ltd v. Arrow-M Corp.*, 203 USPQ 952 (TTAB 1979).

A. Applicant failed to make a good faith effort to resolve the discovery issues prior to filing his Motion

Opposer refers the Board to Opposer’s Response to Applicant’s Motion to Compel Discovery Responses filed on July 5, 2013. For the reasons stated therein, Applicant’s Motion is procedurally deficient because it does not include the statement under 37 C.F.R. § 2.120(e)(1) and TBMP § 523.02 that it made a good faith effort to resolve the issues prior to filing the Motion to Compel on June 20, 2013. Moreover, Applicant failed to make a good faith effort to resolve the discovery issues prior to filing the Motion to Compel on June 20, 2013 as required by

37 C.F.R. § 2.120(e)(1) and TBMP § 523.02. Opposer respectfully requests that Applicant's Motion to Compel be denied in its entirety.

B. Applicant failed to make a good faith effort to resolve any remaining discovery issues before and after Opposer supplemented its discovery responses

Applicant failed to make a good faith effort to resolve the discovery issues before and after Opposer's Supplemental Discovery Responses were served on August 19, 2013. Applicant's definition of the good faith "meet and confer" requirements of 37 C.F.R. § 2.120 means provide the answers Applicant wants or else face more motions to compel:

Please advise your client to revise its answers to the following questions within one week from the date of this correspondence. . . .

[Listing of 27 Interrogatories]

***I submit my Interrogatories are clear, relevant, narrow and unambiguous.
I advise this document shall be relied on in a second motion to compel.***

(Exh. A, E-mail from Joel Beling to Daniel Chalker (Aug. 7, 2013, 9:07PM CDT)) (emphasis added).

Please advise your client to revise its answers to the following Requests within one week from the date of this correspondence. . . .

[Listing of 269 Requests for Admission]

***I submit my Interrogatories are clear, relevant, narrow and unambiguous.
I advise this document shall be relied on in a motion to test the sufficiency of
your client's (lack of) admissions.***

(Exh. B, E-mail from Joel Beling to Daniel Chalker (Aug. 9, 2013, 9:52AM CDT)) (emphasis added). Opposer's attorney responded that Opposer was reviewing the responses and that they would be supplemented no later than August 19, 2013. (Exh. C, E-mail from Daniel Chalker to Joel Beling (Aug. 9, 2013, 10:54AM CDT)). Following service of Opposer's Supplemental Discovery Responses, Applicant continued his "my way or the highway" "meet and confer" approach the next day:

Dear Mr Chalker,

Thank you for your client's updated responses. ***I still have issues and will be taking them up with the Board, unless your client wishes to consent to the below-mentioned stipulation*** so that we can work together to resolve our differences. I note your client did not update its responses to any of my Requests for Admission despite its opportunity to do so.

Would your client consent to a mutual stipulation extending the discovery period for both parties by 6 months (I should have had your client's full document production more than a year ago, together with honest and complete responses to my Discovery Requests)? ***If your client does not consent, I'll be filing a motion with the Board in any event citing your client's lack of co-operation in discovery and your most recent supplements as evidence therefor.***

If your client consents, please advise and send a signed stipulation with space for my signature.

Also, will your client consent to suspension of proceedings for depositions on written question?

Please advise.

Mr Beling

(Exh. D, E-mail from Joel Beling to Daniel Chalker (Aug. 20, 2013, 1:00PM CDT)) (emphasis added).

From May 15, 2013 until the filing of this Response, Applicant's continued "my way or the highway" "meet and confer" approach falls well short of a good faith effort to resolve the issues in Applicant's Motion to Compel. Moreover, Applicant continues to accuse Opposer of dilatory practices (*See* Applicant's Motion to Compel and Applicant's Modification), when Opposer has merely objected to what Applicant is not entitled to under the Federal Rules of Civil Procedure.

Applicant's continuing disregard of 37 C.F.R. § 2.120(e)(1) should not be condoned, and his Motion to Compel and Modification should be denied in full for failure to comply in full with that rule.

II. APPLICANT'S INTERPRETATION OF RULE 2.120(e)(1) IS INACCURATE AND THE MODIFICATION IS MOOT

Applicant filed its Modification essentially seeking to modify his discovery requests to Opposer. However, 37 C.F.R. 2.120(e)(1) does not allow for a “modification of requests.” In fact, 37 C.F.R. 2.120(e)(1) allows for an order on a Motion to Compel “[I]f a party . . . fails to answer any question propounded in a discovery deposition, or any interrogatory, or fails to produce and permit the inspection and copying of any document or thing, the party entitled to disclosure or seeking discovery may file a motion to compel . . .”

Opposer has fully responded and/or objected to Applicant's hundreds of discovery requests providing that information which Applicant is entitled to pursuant to the Federal Rules of Civil Procedure. Opposer has not withheld any information from Applicant, nor denied Applicant the right to utilize available discovery tools to obtain discovery he is entitled to in this proceeding. However, Applicant uses this Modification to seek additional discovery through extended explanations of what information should be provided or produced.

Applicant's disregard of 37 C.F.R. § 2.120(e)(1) should not be condoned, and his Motion to Compel and Modification should be denied in full for failure to comply in full with that rule.

III. RESPONSE TO ISSUES WHICH STILL REQUIRE ADJUDICATION BY THE BOARD

As shown below, Applicant's Modification repeatedly refers to Opposer's answers as “incomplete, evasive and dishonest” or “completely false and a blatant suppression of evidence at the heart of the dispute.” (*See* Modification at 2, 4, 5, 6, 7.) A response is not evasive or incomplete just because it does not provide the answer Applicant wants. For example, many of the requests ask for details or documents relating to events that took place approximately eleven years ago, yet Applicant complains that Opposer's responses do not provide the details Applicant wants. (*See* Modification at 4, 9 and 12). The fact that Opposer does not remember specific details or only has a few documents from the time in question are not sufficient grounds for

Applicant's Motion to Compel. For the purposes of a motion to compel, the answers must be evasive or an incomplete disclosure. *See* FRCP 37(a)(4). Moreover, Applicant's attempt to modify and/or clarify his discovery requests supports Opposer's objections that those requests are overbroad, harassing, irrelevant and/or not reasonable calculated to lead to the discovery of evidence admissible at trial.

A. Interrogatories

INTERROGATORY NO. 4: Define in detail your understanding of the phrases "color works" and "works of color."

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer is not aware of any definition or special meaning within the printing industry of the phrases "color works" and "works of color." As a result, Opposer does not have a detailed understanding of the phrases "color works" and "works of color."

Applicant objects to the Opposer's response because it is "highly dishonest and evasive" and Applicant is seeking understanding of two phrases that Applicant has created in an attempt to prove its case:

The applicant relies on his arguments in his motion to compel. In addition the applicant submits that opposer's answer is highly dishonest and evasive, because the Interrogatory does not request the definitions of the phrases "color works" and "works of color" in the printing industry. Rather, it seeks opposer's understanding of the two phrases. The relevance of the phrase "color works" is obvious, while the phrase "works of color" is simply the expanded version of the phrase "color works." If opposer argues that the phrases "color works" and "works of color" are not relevant to this proceeding, then it has no grounds for opposing the applicant's "COLOR WARS" Mark and it has filed a frivolous, unmeritorious opposition.

(Applicant's Modification at 2).

The phrases "color works" and "works of color" were created by Applicant. Opposer is unaware of any definition or special meaning within the printing industry for these phrases. Opposer's answer is honest and given under oath. The fact that Opposer does not have an understanding of phrases created by Applicant for the purposes of this proceeding does not make

the answer evasive or incomplete. Moreover, an answer that Applicant does not agree with or want does not provide proper grounds for a Motion to Compel.

Lastly, the Interrogatory is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial because the phrases were created by Applicant for the purposes of this proceeding, and they do not have any definition or special meaning within the printing industry. As a result, Applicant's Motion to Compel and Modification for Interrogatory No. 4 should be denied in its entirety.

INTERROGATORY NO. 9: Describe in detail the similarities and/or points of confusion and/or deception between the word "wars" and the word "works."

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer objects to this Interrogatory because it is not reasonably calculated to lead to the discovery of evidence admissible at trial because the word "works" does not appear in either mark. The likelihood of confusion analysis in this proceeding involves the marks "COLORWORX" and "COLOR WARS."

Applicant objects to the Opposer's response because Applicant does not understand the likelihood of confusion analysis applicable to these proceedings. More specifically, the Federal Circuit requires that the marks must be compared in their entireties and not dissected. *See In re Nat'l Data Corp.*, 753 F.2d 1056, 1058 (Fed. Cir. 1985) (cited by TMEP 1207.01(b)). Yet, Interrogatory No. 9 requires Opposer to improperly dissect the marks:

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the word "works" is highly relevant to this proceeding because it is the actual spelling of part of the opposer's Mark, COLORWORX. Opposer's Mark is a compound word made up of two words, "color" and "worx." The word "worx" is simply an insignificant misspelling of the word "works," which is recognizable to all members of the public visually, semantically and aurally. One of the main points of difference between the opposer's mark and the applicant's mark is the distinction between the words "wars" and "worx," since both Marks share the word "color." Understanding the similarities and/or points of confusion and/or deception between the word "wars" and the word "worx" is arguably the crux of the entire opposition and is likely to lead to the discovery of an abundance of evidence admissible at trial.

(Applicant's Modification at 3).

An Interrogatory that requires Opposer to improperly apply the law regarding the likelihood of confusion analysis is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. As a result, Opposer's objections are proper, and Opposer's answer that the likelihood of confusion analysis in this proceeding involves the marks "COLORWORX" and "COLOR WARS" is not evasive or incomplete. As a result, Applicant's Motion to Compel and Modification for Interrogatory No. 9 should be denied in its entirety.

INTERROGATORY NO. 10: Identify all facts, laws, information, or materials that Opposer relies on to support the contention that Applicant's mark is the same as, or substantially the same as, Opposer's mark in visual appearance and in pronunciation.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, and requires Opposer to marshal its evidence prior to trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Notice of Opposition and Opposer's document production produced on May 24, 2012.

Opposer's Notice of Opposition explains specifically how the COLORWORX mark is used in interstate commerce as a trademark for a variety of printing goods and printing services including, but not limited to, business cards, letterhead, sell sheets, rack cards, postcards, brochures and posters since as early as August 2002. Applicant's description includes many of the same items for the COLOR WARS mark, including, but not limited to, brochures, stationery, cards, posters, graphic prints, and many additional items that are traditional print service items offered by Opposer. Opposer has consistently, through discovery and settlement offers, explained to Applicant exactly which items in Applicant's description help form the basis of this opposition. Opposer has not withheld any evidence relating to its contentions.

Moreover, the discovery period has not ended and Opposer has not made its preparations for trial, so Opposer does not have all the facts, laws, information or materials requested at this time. Opposer will supplement its response as and when required by the Federal Rules of Civil

Procedure. As a result, Applicant's Motion to Compel and Modification for Interrogatory No. 10 should be denied in its entirety.

INTERROGATORY NO. 13: Describe in detail the role and contributions made that each person identified in Interrogatory number 12 played in the selection, design and adoption of the "COLORWORX" mark.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Lisa Goebel, Bill Tignanelli, David Crysler and Cindy Wronski contributed to the selection and adoption of the mark designed by Rachel Maples.

Applicant's complaint about Opposer's answer is fundamentally based on an allegation that "20 traders have used part of the opposer's mark (either the design element or the term COLORWORX) before the opposer" that is not stated in the Interrogatory:

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the answer to this Interrogatory is critical to investigating the fraud allegations against the opposer. The applicant has alleged that the opposer has procured a trademark registration by fraud in that over 20 traders have used part of the opposer's mark (either the design element or the term COLORWORX) before the opposer, and that these third parties' details are part of the USPTO database. Ascertaining the role and contributions each of the four individuals identified in the opposer's answer played in the selection, design, and adoption of the "COLORWORX" mark is fundamental to determining the fraud allegations. The opposer's answer is utterly unresponsive, evasive and dishonest in that it simply lists the four individuals from Interrogatory No. 12 without describing their role and contributions.

(Applicant's Modification at 4).

A response is not evasive or incomplete just because it does not provide the answer Applicant wants. Moreover, the Interrogatory asks for details relating to events that took place approximately eleven years ago. Furthermore and as disclosed to Applicant, Rachel Maples no longer works for Opposer and her contact information is unknown. The fact that Opposer does not remember specific details or have access to such details from the time in question are not sufficient grounds for Applicant's Motion to Compel. Opposer has fully and honestly responded to the Interrogatory under oath. In addition, Opposer goes into other details in its answer to

Interrogatory No. 14 regarding how Opposer came to use the word “Color” in its mark. Opposer’s answer is not evasive or incomplete.

Moreover, Applicant’s attempt to modify and/or clarify his discovery requests supports Opposer’s objections that those requests are overbroad, harassing, irrelevant and/or not reasonable calculated to lead to the discovery of evidence admissible at trial. As a result, Applicant’s Motion to Compel and Modification for Interrogatory No. 13 should be denied in its entirety.

INTERROGATORY NO. 14: Describe in detail the rationale, philosophy and ideas behind the selection, design and adoption of each feature and/or part of the “COLORWORX” mark, including the logo, words, style of lettering, visual appearance, sound, compound/composite nature and misspelling.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer Answers as follows: Opposer rebranded a line of products in 2002 that was initially branded with the “INSTACOLOR” mark. The mark “COLORWORX” incorporates part of the old brand and is reflective of the four-color printing process used by Opposer. Opposer has made a reasonable inquiry and except for the answers to this Interrogatory, more specific details are not known or readily obtainable by Opposer as the events in question occurred approximately eleven (11) years ago.

Applicant’s complaint about Opposer’s answer is fundamentally based on questions that are not stated in the Interrogatory:

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the opposer’s answer is incomplete, evasive and dishonest. Opposer has not described how it created, selected or adopted its COLORWORX Mark, either the logo or the term COLORWORX. Did the opposer invent the term “Colorworx” (as it has claimed in an answer to a previous Interrogatory) or did it copy the term? There is no description of the rationale, philosophy and ideas in relation to the logo, words, style of lettering, visual appearance, sound, compound/composite nature and misspelling. Moreover, the opposer has produced several emails from 2002 concerning the selection of different variations of the term “Colorworx” and design (with different designs to the one in its registered Mark) and its claims that it cannot locate more specific details after a reasonable inquiry are completely false and a blatant suppression of evidence at the heart of the dispute, especially the fraud claims.

(Applicant’s Modification at 4-5).

A response is not evasive or incomplete just because it does not provide the answer Applicant wants. Moreover, the Interrogatory asks for details relating to events that took place approximately eleven years ago. Furthermore and as disclosed to Applicant, Rachel Maples no longer works for Opposer and her contact information is unknown. The fact that Opposer does not remember specific details or have access to such details from the time in question are not sufficient grounds for Applicant's Motion to Compel. Opposer has fully and honestly responded to the Interrogatory under oath. Opposer's answer is not evasive or incomplete.

Moreover, Applicant's attempt to modify and/or clarify his discovery requests supports Opposer's objections that those requests are overbroad, harassing, irrelevant and/or not reasonable calculated to lead to the discovery of evidence admissible at trial. As a result, Applicant's Motion to Compel and Modification for Interrogatory No. 14 should be denied in its entirety.

INTERROGATORY NO. 15: Describe in detail your understanding of the connections between each aspect of your answer to Interrogatory No. 14 and the works of color you sell, promote, advertise and distribute, including but not limited to business cards, letterhead, rack cards, postcards, brochures, and posters.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer Answers as follows: The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation. Moreover, the phrase "understanding of the connections" is ambiguous and vague. Opposer states that Opposer's "COLORWORX" mark is used in connection with printing services provided by Opposer.

Applicant objects to the Opposer's response because it is "highly dishonest, evasive and incomplete," and Applicant is seeking to connect Opposer's mark and products to a phrase that Applicant has created in an attempt to prove its case:

The applicant relies on his arguments in his motion to compel. The opposer's answer is again highly dishonest, evasive and incomplete. The applicant submits that the phrase "works of color" is not ambiguous, overbroad, harassing, irrelevant and vague because the Interrogatory then lists specific works of color which the opposer has expressly

admitted to producing and selling under its COLORWORX mark: “business cards, letterhead, rack cards, postcards, brochures, and posters.” The phrase “understanding of the connections” is not ambiguous or vague because it seeks the opposer’s view or understanding of how different parts of its Colorworx Mark and design relate or connect to products the opposer has admitted selling under the Mark.

(Applicant’s Modification at 5).

The phrase “works of color” was created by Applicant. Opposer is unaware of any definition or special meaning within the printing industry for this phrase. Moreover, the phrase “understanding of the connections” is ambiguous and vague to the point that Applicant has to explain its alleged meaning in Applicant’s Modification. The fact that Opposer does not have an understanding of phrases created by Applicant for the purposes of this proceeding does not make the answer evasive or incomplete. Moreover, an answer that Applicant does not agree with or want does not provide proper grounds for a Motion to Compel.

Lastly, the Interrogatory is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial, because the phrase was created by Applicant for the purposes of this proceeding and it does not have any definition or special meaning within the printing industry. As a result, Applicant’s Motion to Compel and Modification for Interrogatory No. 15 should be denied in its entirety.

INTERROGATORY NO. 16: Identify every opinion, legal or otherwise, requested or received by you, regarding the right to use the marks “COLORWORX,” “COLOR WORX,” “COLORWORKS,” or “COLOR WORKS,” including the identity of the persons requesting the opinion, the date and substance of the opinion, and the persons receiving the opinion.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

Opposer maintains its assertion of the attorney-client and work-product privileges pursuant to the Federal Rules of Evidence, Rule 502. The attorney-client privilege protects communications between an attorney and his client seeking legal opinion. The attorney work product privilege protects documents created by an attorney, on behalf of a client, during the process of a developing

Opposer’s Response to Applicant’s Modification of Requests Sought
Under Motion to Compel Pursuant to Trademark Rule 2.120(e)(1)

matter and is not discoverable. All information and/or documents that are not privileged have been produced in this proceeding. A privilege log was produced on August 27, 2012. As a result, Applicant's Motion to Compel and Modification for Interrogatory No. 16 should be denied in its entirety.

INTERROGATORY NO. 17: Describe in detail any instances in which you have been involved which have called into question, created conflict in respect of, or challenged the right to use the marks "COLORWORX," "COLOR WORX," "COLORWORKS," or "COLOR WORKS."

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer Answers as follows: Opposer filed a Notice of Opposition on February 10, 2012 against Pioneer Supply Company, Inc. for the Mark "PSC COLORWORKS", Application Serial No. 85/374,011, under Opposition No. 91203773. A default judgment was granted by TTAB on September 11, 2012 due to failure of Pioneer Supply Company, Inc. to answer the Notice of Opposition.

Applicant's complaint about Opposer's answer is fundamentally based on facts or questions that are not stated in the Interrogatory and an incorrect assumption that it is impossible for the answer to be complete:

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that this answer is dishonest and incomplete. It beggars belief to suggest that there has only been a single instance in 11 years wherein the opposer's Colorworx Mark has been questioned, or called into conflict or challenged, given the many individuals, groups, or companies which use the marks "COLORWORX," "COLOR WORX," "COLORWORKS," or "COLOR WORKS" in the United States. See petitioner's second amended petition to cancel for examples.

A response is not evasive or incomplete just because it does not provide the answer Applicant wants. Opposer has fully and honestly responded to the Interrogatory under oath. Opposer's answer is not evasive or incomplete. In light of Applicant's statement regarding Opponent's answer, Opposer further points out that Applicant is on a mere fishing expedition. As a result, Applicant's Motion to Compel and Modification for Interrogatory No. 17 should be denied in its entirety.

INTERROGATORY NO. 19: Identify and describe all facts, laws, information, or materials that Opposer found, discovered, became aware of and/or knew about before, during and after its registration of the COLORWORX mark involving use of the marks “COLORWORX,” “COLOR WORX,” “COLORWORKS,” or “COLOR WORKS.”

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

Subject to, and without waiving, the foregoing objections, Opposer Answers as follows: Opposer objects to this Interrogatory as being ambiguous, overbroad, harassing and vague because the Interrogatory does not provide sufficient information for Opposer to know what “COLORWORX,” “COLOR WORX,” “COLORWORKS,” or “COLOR WORKS” marks are being referred to. Opposer filed a Notice of Opposition on February 10, 2012 against Pioneer Supply Company, Inc. for the Mark “PSC COLORWORKS”, Application Serial No. 85/374,011, under Opposition No. 91203773. A default judgment was granted by TTAB on September 11, 2012 due to failure of Pioneer Supply Company, Inc. to answer the Notice of Opposition.

Applicant’s complaint about Opposer’s answer is fundamentally based on facts or questions that are not stated in the Interrogatory as the Interrogatory does not sufficiently identify what marks the Interrogatory is referring to:

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the opposer’s response is blatantly evasive, dishonest and incomplete, feigning ignorance of “what ‘COLORWORX,’ ‘COLOR WORX,’ ‘COLORWORKS,’ or ‘COLOR WORKS’ marks are being referred to.” The Interrogatory is plain, self-explanatory and obvious on its face and simply requests the opposer’s knowledge or awareness of any “use[s] of the marks ‘COLORWORX,’ ‘COLOR WORX,’ ‘COLORWORKS,’ or ‘COLOR WORKS’”. The applicant’s arguments for the Board breaching the attorney-client and work-product privileges are contained in the motion to compel.

(Applicant’s Modification at 7).

If Applicant had specific marks in mind, they should have been identified so that Opposer could answer the question. Applicant’s Modification shows that the Interrogatory is fatally vague and ambiguous because Opposer is supposed to know what marks Applicant is referring to. A response is not evasive or incomplete just because it does not provide the answer Applicant wants. Opposer has fully and honestly responded to the Interrogatory under oath. Opposer’s answer is not evasive or incomplete.

Opposer maintains its assertion of the attorney-client and work-product privileges pursuant to the Federal Rules of Evidence, Rule 502. The attorney-client privilege protects communications between an attorney and his client seeking legal opinion. The attorney work product privilege protects documents created by an attorney, on behalf of a client, during the process of a developing matter and is not discoverable. All information and/or documents that are not privileged have been produced in this proceeding. A privilege log was produced on August 27, 2012. As a result, Applicant's Motion to Compel and Modification for Interrogatory No. 19 should be denied in its entirety.

B. Request for Production

Regarding Requests for Production 1-4 (*See* Modification, pgs. 2 and 7-8), the Board did not accept Opposer's Expert Designation, and thus, Opposer's argument for expert information and additional responses is moot.

Opposer specifically responds to Applicant's specific arguments below:

REQUEST 5: Produce all photographs, videotapes, drawings, and other tangible things that pertain in any way to the subject matter of this suit.

RESPONSE: Opposer refers Applicant to all of the documents produced in this proceeding Bates labeled ENNI 0001 – ENNI 1563.

Despite the fact that the Request does not ask for specific types of documents, Opposer produced 1563 pages of documents, which included proposed drawings of the COLORWORX mark created by a graphic artist over 10 years ago. The graphic artist is no longer employed by Opposer, and there are no additional documents in existence. A response is not evasive or incomplete just because it does not provide the answer Applicant wants. As a result, Applicant's Motion to Compel and Modification for Request No. 5 should be denied in its entirety.

REQUEST 8: Produce all oral or written statements made by You or Your representatives concerning this suit.

RESPONSE: None.

The applicant relies on his arguments in his motion to compel. In addition the Applicant submits that the opposer has not provided any written correspondence, including emails, made by it or its representatives concerning this suit. The applicant's arguments for the Board breaching the attorney-client and work-product privileges are referred to in the motion to compel and incorporated by reference.

Other than documents that are blatantly and obviously protected from disclosure, all responsive information and/or documents have been produced in this proceeding. In light of Applicant's statement regarding Applicant's answer, Opposer further points out to the Board that Applicant is on a mere fishing expedition. The fact that Applicant does not agree with or like the response is not grounds for a Motion to Compel. As a result, Applicant's Motion to Compel and Modification for Request No. 8 should be denied in its entirety.

REQUEST 9: Produce all documents and things relating to the creation, consideration, design, development, selection, adoption, and first use of the "COLORWORX" mark or any work of color (including black and white) or service.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to documents Bates labeled ENNI 0480 – 0481 and ENNI 1563 produced herewith, as well as documents previously produced showing representative specimens. Opposer has made a reasonable inquiry and except for the produced documents and prosecution history of U.S. Trademark Registration Number 3,372,884 for Opposer's "COLORWORX" mark, no other documents and things are known or readily obtainable by Opposer as the events in question occurred approximately eleven (11) years ago.

A response is not evasive or incomplete just because it does not provide the documents Applicant wants. Moreover, the Request asks for documents relating to events that took place approximately eleven years ago. The fact that Opposer does not have any additional documents beyond those already produced is not sufficient grounds for Applicant's Motion to Compel. Opposer has fully and honestly responded to the Request. Opposer's response is not evasive or incomplete. As a result, Applicant's Motion to Compel and Modification for Request No. 9 should be denied in its entirety.

REQUEST 12: Produce all documents and things relating to the distribution channels through which works of color (including black and white) or services relating to Opposer's "COLORWORX" mark are advertised, marketed, sold, or promoted.

RESPONSE: Opposer is currently offering goods and services worldwide via the Internet and through qualified dealers. Opposer refers Applicant to Opposer's document production produced in this proceeding. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation.

The phrase "works of color" was created by Applicant. Opposer is unaware of any definition or special meaning within the printing industry for this phrase. The fact that Opposer does not have an understanding of phrases created by Applicant for the purposes of this proceeding does not make the response evasive or incomplete. Moreover, a response that Applicant does not agree with or want does not provide proper grounds for a Motion to Compel. The response given by Opposer is as complete as possible.

Lastly, the Request is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial because the phrase was created by Applicant for the purposes of this proceeding and it does not have any definition or special meaning within the printing industry. As a result, Applicant's Motion to Compel and Modification for Request No. 12 should be denied in its entirety.

REQUEST 13: Produce all documents and things relating to the classes of customers to whom You advertise, market, sell, or promote works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer is currently offering goods and services worldwide via the Internet and through qualified dealers. Opposer refers Applicant to Opposer's document production produced in this proceeding. Further, Opposer refers Applicant to Opposer's Answers and Supplemental Answers to Applicant's First and Second Set of Interrogatories. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation.

The phrase "works of color" was created by Applicant. Opposer is unaware of any definition or special meaning within the printing industry for this phrase. The fact that Opposer does not have an understanding of phrases created by Applicant for the purposes of this

proceeding does not make the response evasive or incomplete. Moreover, a response that Applicant does not agree with or want does not provide proper grounds for a Motion to Compel. The response given by Opposer is as complete as possible.

Lastly, the Request is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial because the phrase was created by Applicant for the purposes of this proceeding and it does not have any definition or special meaning within the printing industry. As a result, Applicant's Motion to Compel and Modification for Request No. 13 should be denied in its entirety.

REQUEST 14: Produce all documents and things relating to the yearly dollar and unit volume of sales to date and projected future dollar and unit volume of sales for each of the works of color (including black and white) or services produced by Opposer in connection with the "COLORWORX" mark.

RESPONSE: Opposer objects to this Request as it is overbroad, irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Annual Reports, available to the public, and Bates labeled ENNI 0482 – 1560 produced herewith. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation.

REQUEST 15: Produce all documents and things relating to variable and fixed costs for sales of works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer objects to this Request as it is overbroad, irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Annual Reports, available to the public, and Bates labeled ENNI 0482 – 1560 produced herewith.

REQUEST 16: Produce all documents and things relating to gross and net profits from sales of works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer objects to this Request as it is overbroad, irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation. Subject to, and without waiving, the foregoing objections, Opposer refers

Applicant to Opposer's Annual Reports, available to the public, and Bates labeled ENNI 0482 – 1560 produced herewith.

REQUEST 17: Produce all documents and things relating to the yearly cost to You of advertising, marketing, selling, and promoting works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer objects to this Request as it is overbroad, irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Annual Reports, available to the public, and Bates labeled ENNI 0482 – 1560 produced herewith.

REQUEST 20: Produce all documents and things relating to Your yearly expenses to date and planned future expenses corresponding to each type of adverting and promotion used for works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer objects to this Request as it is overbroad, irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. The phrase "works of color" is ambiguous, overbroad, harassing, irrelevant and vague because this phrase would include anything having at least one color without limitation. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Annual Reports, available to the public, and Bates labeled ENNI 0482 – 1560 produced herewith.

REQUEST 43: Produce all documents and things relating to the financial health of the ColorWorx mark, including all documents and things submitted to and received from the Internal Revenue Service and all accounting documents.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Annual Reports, available to the public, and Bates labeled ENNI 0482 – 1560 produced herewith.

Other than what is available in the public domain, Opposer is not entitled to financial information, whether related to the COLORWORX mark, or to Ennis. Such information is not reasonably calculated to lead to the discovery of evidence admissible at trial because Opposer's financial information does not relate to an element of the likelihood of confusion analysis. Opposer maintains that its objections are valid. As a result, Applicant's Motion to Compel and Modification for Request Nos. 14-17, 20 and 43 should be denied in its entirety.

REQUEST 32: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 9 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Notice of Opposition.

Applicant objects to the Opposer's response because Applicant does not understand the likelihood of confusion analysis applicable to these proceedings. More specifically, the Federal Circuit requires that the marks must be compared in their entirety and not dissected. *See In re Nat'l Data Corp.*, 753 F.2d 1056, 1058 (Fed. Cir. 1985) (cited by TMEP 1207.01(b)). Yet, Interrogatory No. 9 to which Request No. 32 refers requires Opposer to improperly dissect the marks.

A Request that requires Opposer to improperly apply the law regarding the likelihood of confusion analysis is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. As a result, Opposer's objections are proper and As a result, Applicant's Motion to Compel and Modification for Request No. 32 should be denied in its entirety.

REQUEST 36: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 13 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to documents Bates labeled ENNI 0480 – 0481 and 1563 produced in this proceeding, Opposer's Supplemental Disclosures, and Opposer's Supplemental answers to Applicant's First and Second Set of Interrogatories. Opposer has made a reasonable inquiry and except for the produced documents and prosecution history of U.S. Trademark Registration Number 3,372,884 for Opposer's "COLORWORX" mark, no other documents and things are known or readily obtainable by Opposer as the events in question occurred approximately eleven (11) years ago.

REQUEST 37: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 14 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to documents Bates labeled ENNI 0480 – 0481 and 1563 produced in this proceeding, Opposer’s Supplemental Disclosures, and Opposer’s Supplemental answers to Applicant’s First and Second Set of Interrogatories. Opposer has made a reasonable inquiry and except for the produced documents and prosecution history of U.S. Trademark Registration Number 3,372,884 for Opposer’s “COLORWORX” mark, no other documents and things are known or readily obtainable by Opposer as the events in question occurred approximately eleven (11) years ago.

A response is not evasive or incomplete just because it does not provide the answer Applicant wants. Moreover, the Interrogatory to which the Requests refer to asks for details relating to events that took place approximately eleven years ago. The fact that Opposer does not have documents (other than those produced) from the time in question are not sufficient grounds for Applicant’s Motion to Compel. Opposer has fully and honestly responded to the Request under oath. Opposer’s response is not evasive or incomplete.

Moreover, Applicant’s attempt to modify and/or clarify his discovery requests supports Opposer’s objections that those requests are overbroad, harassing, irrelevant and/or not reasonably calculated to lead to the discovery of evidence admissible at trial. As a result, Applicant’s Motion to Compel and Modification for Requests No. 36 and 37 should be denied in their entirety.

REQUEST 38: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 15 of Applicant’s First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer’s Supplemental answers to Applicant’s First and Second Set of Interrogatories.

The Request refers to an Interrogatory that uses the phrase “works of color”, which was created by Applicant. Opposer is unaware of any definition or special meaning within the printing industry for this phrase. Moreover, the phrase “understanding of the connections” in the

Interrogatory is ambiguous and vague to the point that Applicant has to explain its alleged meaning in Applicant's Modification. The fact that Opposer does not have an understanding of phrases created by Applicant for the purposes of this proceeding does not make the answer evasive or incomplete. Moreover, an answer that Applicant does not agree with or want does not provide proper grounds for a Motion to Compel.

Lastly, the Request is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial because the phrase was created by Applicant for the purposes of this proceeding and it does not have any definition or special meaning within the printing industry. As a result, Applicant's Motion to Compel and Modification for Request No. 38 should be denied in its entirety.

REQUEST 39: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 16 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

Opposer maintains its assertion of the attorney-client and work-product privileges pursuant to the Federal Rules of Evidence, Rule 502. The attorney-client privilege protects communications between an attorney and his client seeking legal opinion. The attorney work product privilege protects documents created by an attorney, on behalf of a client, during the process of a developing matter and is not discoverable. All information and/or documents that are not privileged have been produced in this proceeding. A privilege log was produced on August 27, 2012. As a result, Applicant's Motion to Compel and Modification for Request No. 39 should be denied in its entirety.

REQUEST 40: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 17 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Supplemental answers to Applicant's First and Second Set of Interrogatories. Opposer has equal or greater access to the documents requested through the U.S. Trademark Trial and Appeal Board.

A response is not evasive or incomplete just because it does not provide the answer Applicant wants. Opposer has fully and honestly responded to the Request. Opposer's response is not evasive or incomplete. In light of Applicant's statement regarding Opponent's response, Opposer further points out that Applicant is on a mere fishing expedition. As a result, Applicant's Motion to Compel and Modification for Request No. 40 should be denied in its entirety.

REQUEST 42: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 19 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

Applicant's complaint about Opposer's response to this Request and the answer to the Interrogatory this Request refers to is fundamentally based facts or questions that are not stated in the Interrogatory as the Interrogatory does not sufficiently identify what marks the Interrogatory is referring to. If Applicant had specific marks in mind, they should have been identified so that Opposer could answer the question. Applicant's Modification shows that the Interrogatory is fatally vague and ambiguous because Opposer is supposed to know what marks Applicant is referring to. A response is not evasive or incomplete just because it does not provide the answer Applicant wants. Opposer has fully and honestly responded to the Interrogatory under oath. Opposer's answer is not evasive or incomplete.

Opposer maintains its assertion of the attorney-client and work-product privileges pursuant to the Federal Rules of Evidence, Rule 502. The attorney-client privilege protects communications

between an attorney and his client seeking legal opinion. The attorney work product privilege protects documents created by an attorney, on behalf of a client, during the process of a developing matter and is not discoverable. All information and/or documents that are not privileged have been produced in this proceeding. As a result, Applicant's Motion to Compel and Modification for Request No. 42 should be denied in its entirety.

IV. CONCLUSION

Applicant failed to make a good faith effort to resolve the discovery issues prior to filing the Motion to Compel on June 20, 2013 and again after Opposer supplements its discovery responses as required by 37 C.F.R. § 2.120(e)(1) and TBMP § 523.02, and is now attempting to continue discovery by modifying his requests. However, 37 C.F.R. 2.120(e)(1) does not allow for a "modification of requests." In fact, 37 C.F.R. 2.120(e)(1) allows for an order on a Motion to Compel. Opposer respectfully requests that Applicant's Motion to Compel and Modification of Requests Under Motion to Compel Pursuant to Trademark Rule 2.120(e)(1) be denied in their entirety.

Dated: September 16, 2013

Mr Daniel Chalker and Ms Jesica Flores
Attorneys-at-Law
Chalker Flores

Dear attorneys,

Re: Opposition No. 91203884 and Cancellation No. 92055374

I refer to the below-mentioned Interrogatories and seek honest and complete answers from your client as part of my "meet and confer" requirements under the Trademark Rules.

The below-mentioned Interrogatories are relevant to your client's credibility and honesty in fulfilling its Discovery obligations, to Chalker Flores' former attorney's (lack of) compliance with the Federal Rules of Civil Procedure, and to the fraud claims, the genericness and descriptiveness claims, the unable to distinguish claim and your client's claims in its opposition.

I note it has been between one month and one year since your client's statutory deadline to answer my Interrogatories and your client has failed to honestly and completely answer these critical requests.

Please advise your client to revise its answers to the following questions within one week from the date of this correspondence. Alternatively, if your client and the former attorneys in your firm are happy with their responses, please indicate that they stand by their objections and responses.

-Registrant's Objections and Answers to Petitioner's First Set of Interrogatories dated 13 July 2012
Interrogatories: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12

-Registrant's Objections and Answers to Petitioner's Second Set of Interrogatories dated 25 July 2012
Interrogatories: 13, 14, 15, 16, 17

-Opposer's Objections and Answers to Applicant's Second Set of Interrogatories dated 27th June 2013
Interrogatories: 20, 21, 22, 23, 24, 25, 26, 27, 28, 29

I submit my Interrogatories are clear, relevant, narrow and unambiguous.

I advise this document shall be relied on in a second motion to compel discovery.

I look forward to your client's honesty and co-operation.

Regards,

/JOEL BELING/

Attorneys-at-Law
Chalker Flores

Dear attorneys,

Re: Opposition No. 91203884 and Cancellation No. 92055374

I refer to the below-mentioned Requests for Admission and seek honest and complete answers from your client as part of my "meet and confer" requirements under the Trademark Rules.

The below-mentioned Requests are relevant to your client's credibility and honesty in fulfilling its Discovery obligations, to Chalker Flores' former attorney's (lack of) compliance with the Federal Rules of Civil Procedure, and to the fraud claims, the genericness and descriptiveness claims, the unable to distinguish claim and your client's claims in its opposition.

I note it has been between one month and one year since your client's statutory deadline to answer my Requests honestly and sufficiently.

Please advise your client to revise its answers to the following Requests within one week from the date of this correspondence. Alternatively, if your client and the former attorneys in your firm are happy with their responses, please indicate that they stand by their objections and responses.

-Opposer's Objections and Answers to Applicant's First Request for Admissions dated 11 June 2012
Requests: 3, 4, 9, 11, 12, 13, 14, 15, 16, 17, 19, 20, 21, 22, 23, 24, 29, 30, 31, 32, 33, 34, 36, 37, 38, 39, 40, 41

-Opposer's Objections and Answers to Applicant's Second Request for Admissions dated 25th July 2012
Requests: 42, 43, 44, 45, 46, 47, 48, 50, 51, 52, 53, 54, 55, 56, 57, 58, 60, 61, 62, 63, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 77, 78, 79

-Opposer's Objections and Answers to Applicant's Third Request for Admissions dated 13 August 2012
Requests: 93, 94, 95, 96, 97, 98

-Opposer's Objections and Answers to Applicant's Fourth Request for Admissions dated 28 June 2013
Requests: 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 124, 127, 128, 129, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 142, 146, 147, 149, 150, 151, 152, 153, 154, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 193, 194, 195, 196, 198, 199, 200, 201, 203, 204, 206, 207, 208, 209, 211, 212, 214, 215, 216, 217, 218, 220, 221, 223, 224, 225, 226, 227, 229, 230, 232, 233, 235, 236, 237, 238, 239, 241, 242, 243, 245, 246, 247, 248, 249, 250, 251, 253, 254, 255, 256, 257, 259, 260, 261, 262, 263, 265, 266, 267, 268, 269, 271, 272, 273, 274, 276, 277, 278, 279, 280, 282, 283, 284, 285, 286, 287, 288, 289, 290, 292, 293, 295, 296, 297, 298, 299, 300, 301, 303, 304, 305

-Registrant's Objections and Responses to Petitioner's First Request for Admissions dated 13th July 2012
Requests: 1, 2, 3, 4, 5, 6, 7, 8, 9, 12, 13, 14, 19, 20, 21, 22, 23, 24, 25, 27, 28, 29, 30, 31, 32, 33, 34, 35, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50

I submit my Requests are clear, relevant, narrow and unambiguous.

I advise this document shall be relied on in a motion to test the sufficiency of your client's (lack of) admissions.

I also seek a stipulation with respect to the filing of any subsequent motion to test the sufficiency of admissions and compliance with Trademark Rule §2.120(h)(1), that, by virtue of your client's failure to reasonably admit such a voluminous number of Requests for Admission, that full copies of the challenged Requests for Admission as well as the answers thereto may be referred to by date, document title and number if they are already of record, and, if they are not already of record, that they may be referred to by date, document title and number with the full challenged Requests for Admission as well as the answers thereto attached as an exhibit.

I look forward to your client's honesty and co-operation.

Regards,

/JOEL BELING/

Mr. Beling,

As I mentioned in my August 5, 2013 e-mail, we are working with our client to review and supplement our responses to your discovery requests. We will provide the supplemental responses to you no later than August 19.

We continue to be disappointed by your unprofessional and disparaging assertions regarding our client and our law firm. We obviously disagree with your inflammatory statements and ask that you eliminate such counterproductive statements from your correspondence and pleadings. We also disagree that your discovery requests are clear, relevant, narrow and unambiguous.

9 August 2013

Mr Daniel Chalker and Ms Jesica Flores
Attorneys-at-Law
Chalker Flores

Dear attorneys,

Re: Opposition No. 91203884 and Cancellation No. 92055374

I refer to the below-mentioned Requests for Admission and seek honest and complete answers from your client as part of my "meet and confer" requirements under the Trademark Rules.

The below-mentioned Requests are relevant to your client's credibility and honesty in fulfilling its Discovery obligations, to Chalker Flores' former attorney's (lack of) compliance with the Federal Rules of Civil Procedure, and to the fraud claims, the genericness and descriptiveness claims, the unable to distinguish claim and your client's claims in its opposition.

I note it has been between one month and one year since your client's statutory deadline to answer my Requests honestly and sufficiently.

Please advise your client to revise its answers to the following Requests within one week from the date of this correspondence. Alternatively, if your client and the former attorneys in your firm are happy with their responses, please indicate that they stand by their objections and responses.

-Opposer's Objections and Answers to Applicant's First Request for Admissions dated 11 June 2012
Requests: 3, 4, 9, 11, 12, 13, 14, 15, 16, 17, 19, 20, 21, 22, 23, 24, 29, 30, 31, 32, 33, 34, 36, 37, 38, 39, 40, 41

-Opposer's Objections and Answers to Applicant's Second Request for Admissions dated 25th July 2012
Requests: 42, 43, 44, 45, 46, 47, 48, 50, 51, 52, 53, 54, 55, 56, 57, 58, 60, 61, 62, 63, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 77, 78, 79

-Opposer's Objections and Answers to Applicant's Third Request for Admissions dated 13 August 2012
Requests: 93, 94, 95, 96, 97, 98

-Opposer's Objections and Answers to Applicant's Fourth Request for Admissions dated 28 June 2013
Requests: 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 124, 127, 128, 129, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 142, 146, 147, 149, 150, 151, 152, 153, 154, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 193, 194, 195, 196, 198, 199, 200, 201, 203, 204, 206, 207, 208, 209, 211, 212, 214, 215, 216, 217, 218, 220, 221, 223, 224, 225, 226, 227, 229, 230, 232, 233, 235, 236, 237, 238, 239, 241, 242, 243, 245, 246, 247, 248, 249, 250, 251, 253, 254, 255, 256, 257, 259, 260, 261, 262, 263, 265, 266, 267, 268, 269, 271, 272, 273, 274, 276, 277, 278, 279, 280, 282, 283, 284, 285, 286, 287, 288, 289, 290, 292, 293, 295, 296, 297, 298, 299, 300, 301, 303, 304, 305

-Registrant's Objections and Responses to Petitioner's First Request for Admissions dated 13th July 2012
Requests: 1, 2, 3, 4, 5, 6, 7, 8, 9, 12, 13, 14, 19, 20, 21, 22, 23, 24, 25, 27, 28, 29, 30, 31, 32, 33, 34, 35, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50

I submit my Requests are clear, relevant, narrow and unambiguous.

I advise this document shall be relied on in a motion to test the sufficiency of your client's (lack of) admissions.

I also seek a stipulation with respect to the filing of any subsequent motion to test the sufficiency of admissions and compliance with Trademark Rule §2.120(h)(1), that, by virtue of your client's failure to reasonably admit such a voluminous number of Requests for Admission, that full copies of the challenged Requests for Admission as well as the answers thereto may be referred to by date, document title and number if they are already of record, and, if they are not already of record, that they may be referred to by date, document title and number with the full challenged Requests for Admission as well as the answers thereto attached as an exhibit.

I look forward to your client's honesty and co-operation.

Regards,

/JOEL BELING/

Dear Mr Chalker,

Thank you for your client's updated responses. I still have issues and will be taking them up with the Board, unless your client wishes to consent to the below-mentioned stipulation so that we can work together to resolve our differences. I note your client did not update its responses to any of my Requests for Admission despite its opportunity to do so.

Would your client consent to a mutual stipulation extending the discovery period for both parties by 6 months (I should have had your client's full document production more than a year ago, together with honest and complete responses to my Discovery Requests)? If your client does not consent, I'll be filing a motion with the Board in any event citing your client's lack of co-operation in discovery and your most recent supplements as evidence therefor.

If your client consents, please advise and send a signed stipulation with space for my signature.

Also, will your client consent to suspension of proceedings for depositions on written question?

Please advise.

Mr Beling

Dear Mr. Beling:

Attached please find the following discovery responses:

Opposer's Third Supplement to Initial Disclosures;
Opposer's Supplemental Responses to Applicant's First Request for Production; and
Opposer's Supplemental Answers to Applicant's First Set of Interrogatories.

The additional documents referenced in the discovery responses will be shipped to you via Federal Express tomorrow, August 20, 2013.

Last, please find a copy of Opposer's Notice of Discovery being filed with the Trademark Trial and Appeal Board.

If you should have any questions, please do not hesitate to contact us. Thank you.

v.

Ennis, Inc.

**APPLICANT'S REPLY TO OPPOSER'S RESPONSE TO APPLICANT'S
MODIFICATION OF REQUESTS SOUGHT UNDER MOTION TO COMPEL
PURSUANT TO TRADEMARK RULE 2.120(e)(1)**

To: Ennis Inc. 2441 Presidential Parkway, Midlothian, TX 76065, United States.

The Applicant hereby files this Reply to Opposer's Response to Applicant's Modification of Requests Sought Under Motion to Compel Pursuant to Trademark Rule 2.120(e)(1) (hereinafter referred to as "Opposer's Response").

1. Improper and Inappropriate Matters Raised by the Opposer

The Opposer's Response improperly and inappropriately refers to a number of irrelevant matters which are clearly beyond the scope of the applicant's motion to compel. Firstly, Exhibits A, B and C refer to Discovery Requests which are not currently before the Board. The opposer's inclusion of these

Exhibits is a clear waste of the Board's and the applicant's time and resources. Secondly, the Opposer's Response refers to settlement offers, which are clearly "without prejudice." Opposer's Response, at 8.

2. *The Opposer's Baseless "Meet and Confer" Submissions*

The Opposer's Response alleges the applicant failed to "meet and confer" with the opposer prior to filing the motion to compel. Opposer's Response, at 2-4. The applicant clearly met and conferred with the opposer prior to filing the motion to compel. The correspondence documenting the applicant's good faith attempts to resolve the discovery dispute is included as exhibits to the motion to compel. If the opposer or the opposer's current legal counsel takes issue with the manner in which the opposer's former legal counsel (Mr. Scott Myer and Mr. Thomas Jacks, both of whom are partners at Chalker Flores LLP) conducted discovery on the opposer's behalf, then perhaps the opposer or the opposer's current legal counsel should consider discussing their issues with Messrs Myer and Jacks, instead of wasting the Board's and the applicant's time and resources with frivolous submissions. The applicant is entitled to rely on the correspondences certified by Messrs Myer and Jacks on behalf of the opposer because both are qualified legal counsel, in fact holding themselves out as specialists in intellectual property law.

Moreover, the applicant points out that the opposer made the same baseless "meet and confer" submissions in its opposition to the motion to compel (*see* TTABVUE Doc. #30), then proceeded to completely undercut the force of those submissions by revising its answers to the applicant's interrogatories, revealing the identities of seven individuals with discoverable information which it had been concealing for the previous 13 months, and producing over 1100 (mostly irrelevant) documents which it had been blatantly concealing for the previous 13 months, despite a clear legal obligation to produce them. *See* TTABVUE Doc. #33.

Finally, in reply to the opposer's assertion that the applicant failed to "meet and confer" with it after the opposer supplemented its discovery responses on the 19th August, 2013 (after 13 months of dishonesty, non-cooperation, stonewalling, evasiveness, incomplete responses, and burying of evidence), the applicant points out that the Board's Order dated 22nd August, 2013 does not require the applicant to

“meet and confer” with the opposer again; it simply requires the applicant to inform the Board in writing of any issues which do not require adjudication pursuant to Trademark Rule 2.120(e)(1). TTABVUE Doc. #35, at 1.

3. *Modification of the Applicant’s Requests*

Contrary to the opposer’s submissions in its Response, the applicant submits that it is allowed to modify its requests under 37 C.F.R. 2.120(e)(1). Put simply, the opposer has responded to the applicant’s discovery requests in a manner which is highly dishonest, dilatory, evasive, and incomplete and which demonstrates a blatant intent to conceal evidence. If this submission was not true, then the entirety of the opposer’s supplementary discovery dated 19th August, 2013 would be redundant. The opposer has provided the identities of seven individuals with discoverable information, revised all of its answers to the applicant’s interrogatories, and produced over 1100 (mostly irrelevant) documents which it had been hitherto concealing. The applicant filed his motion to compel based on the discovery responses he had received from the opposer as at the 20th June, 2013. Because the Board scrutiny triggered by the filing of the applicant’s motion to compel has *forced* the opposer to show a modicum of honesty, co-operation and punctuality, the opposer’s supplemented discovery responses dated 19th August, 2013 bear little resemblance to those which were provided to the applicant on the 11th June, 2013. *See* TTABVUE Docs. 26 & 33. The opposer cannot be allowed to benefit from its own wrongdoing. Logic, fairness and public policy also militate toward allowing the applicant to modify his discovery requests. On these bases, the applicant should be allowed to modify his discovery requests.

4. *The Opposer’s Credibility/Selective Memory*

The applicant submits that the opposer’s response that it “does not remember specific details or only has a few documents from the time in question” and “does not remember specific details or have access to such details from the time in question” is a complete falsehood and fabrication.

Opposer's Response, at 5, 9 & 11. In essence, the opposer is stating that each of the eight representatives it has identified in its *Third* Supplement to Initial Disclosures dated 19th August 2013 (the opposer has to keep supplementing its responses and disclosures because it keeps concealing evidence and being caught out) – Steve Osterloh, Vice President of Marketing; Bill Tignanelli, General Manager, Admore; Lisa Goebbel, Marketing Manager, Admore; David Crysler, General Manager of Colorworx Brand; Cindy Wronski, Data Processing Director, Admore; Rachel Maples, Former Graphic Designer; Angela Bowers, Former Customer Service Representative; and Zack Smith, Former Marketing Manager – does not remember how the opposer's COLORWORX Mark and design was created. The corollary, if the opposer's submissions are to be believed, is that Ennis Inc. is now selling goods and services under a brand and has a current trademark registration for a mark the origins of which are completely unknown. The opposer's argument runs as follows:

Yes, we did create the Colorworx Mark and the design element the subject of this proceeding but we can't remember how we created it. We've been in business 103 years, we have over 6,000 employees worldwide, we help serve over 40,000 global distributors and we currently run over 50 facilities across more than 20 states, Canada and Mexico,¹ but we honestly have no idea how we created our Colorworx Mark and the design element. We just don't. We can't remember.

Strangely, another inference which may be drawn from the opposer's claims of memory loss is that there are at least five current executives or managers walking around Ennis Inc.'s facilities with long-term memory issues in relation to events which occurred in or prior to 2002. These individuals, based on the opposer's Third Supplement to Initial Disclosures, are Steve Osterloh, Vice President of Marketing; Bill Tignanelli, General Manager, Admore; Lisa Goebbel, Marketing Manager, Admore; David Crysler, General Manager of Colorworx Brand; and Cindy Wronski, Data Processing Director, Admore. Stranger still, Ennis' executives and managers' "memory loss" seems to be narrowly confined to events in 2002

¹ <http://www.ennis.com/about/investor-relations>; accessed September 23, 2013.

which bear upon the applicant's trademark fraud claims. Notwithstanding the obvious risk management and corporate governance issues, the applicant submits that the opposer's claimed memory loss is simply a case of *selective memory*, a desperate and dishonest attempt by Ennis' executives, managers and former employees to avoid a finding of trademark fraud against the company, and that the opposer must be compelled to answer all Interrogatories and produce all documents in relation to the creation of the Colorworx Mark and the design element. See Sara Marie Andrzejewski. (2011). "Leave Little Guys Alone!" Protecting Small Businesses From Overly Litigious Corporations and Trademark Infringement Suits." *Journal of Intellectual Property Law* 19, 117-142; Office of Governmental Affairs – United States Patent and Trademark Office, *Report to Congress: Trademark Litigation Tactics and Federal Government Services to Protect Trademarks and Prevent Counterfeiting* (April 2011). In any event, the applicant would love each of the opposer's eight witnesses listed in its Third Supplement to Initial Disclosures to swear and produce affidavits stating on oath that they have no memory of how they created their COLORWORX Mark and the design element.

5. *Procedural Issue*

In the Board's Order dated 22nd August, 2013, the Board retroactively suspended proceedings to the 15th July, 2013 because this was the purported "filing date of the motion." TTABVUE Doc. #35, at 1. This is, respectfully, incorrect. The applicant's motion to compel was filed on the 20th July, 2013, a fact which is borne out by the TTABVUE entry, as well as the opposer's response thereto. See TTABVUE Docs. #29 & 30.

Conclusion

For the above reasons, the applicant's motion to compel should be granted and the Board should compel the opposer to respond to the relevant Interrogatories and Requests for Production, without objection and within 30 days of the Board's order. The applicant also seeks a further and more definite statement of all documents in the opposer's privilege log dated August 27, 2012, and a privilege log of all

documents over which Ennis claims privilege from August 27, 2012 to the date of the Board's decision concerning the present motion to compel, as well as *production* of those documents. Finally, as a procedural matter, the applicant seeks the retroactive suspension of proceedings to the 20th July, 2013.

Dated: September 23, 2013

Respectfully submitted,

JOEL BELING

v.

Joel L. Beling d/b/a Supa Characters Pty Ltd

**APPLICANT'S MOTION FOR RECONSIDERATION OF THE TRADEMARK TRIAL AND
APPEAL BOARD'S DECISION DATED 12TH NOVEMBER 2013**

The Applicant, Joel Beling, hereby files this Motion for Reconsideration of the Board's decision dated November 12 (hereinafter referred to as "the Decision") pursuant to Trademark Rule 2.127(b), 37 C.F.R. §2.127(b); TBMP 518 and respectfully requests the Board to reconsider the following issues.¹

THE BOARD'S ALLEGED VIOLATIONS OF THE RULES OF NATURAL JUSTICE, THE FEDERAL ADMINISTRATIVE PROCEDURES ACT ("the APA") 5 U.S.C. § 557(c)(3), AND DENIALS OF PROCEDURAL FAIRNESS AND A FAIR TRIAL
Reconsideration Issue 1: The Board has clearly fallen into error and/or clearly abused its discretion by violating the principle of natural justice, *audi alteram partem*, and § 557(c)(3) of the APA by failing to particularize the legal basis for each of the decisions it has made. One of the two planks of the common law concept of natural justice is the Latin maxim *audi alteram partem*, hear the other side, which has been a fundamental and sacrosanct principle of law for centuries. In short, it means that no person shall be condemned, punished or have any legal right compromised by a court of law without having heard that person. *See* 5 U.S.C. § 557(c)(3) & *Caritativo v People of State of California* 357 US 549 (1958). The Board adjudicated a number of complex issues in applicant's motion to compel. Both parties fully briefed the motion citing relevant law, the applicant more so than the opposer. The applicant's legal submissions included the applicant's reliance on statutory and case law in its submission to compel the production of privileged documents (Doc. #29, at 13-17); the applicant's submission on the

¹ For the record, the applicant alleges no attorney misconduct in this motion against Ennis Inc.'s current and former attorneys, from Chalker Flores, LLP: Edwin Flores, Scott Myer, Thomas Jacks, Daniel Chalker and Jessica Flores.

law of estoppel in all its forms with respect to the opposer's expert disclosures (Doc. #36, at 8); the legal doctrine of Chinese Walls with respect to the effect of the resumption of proceedings on the applicant's need to "meet and confer" with the opposer (Doc. #32, at 3); and the applicant's submission on the opposer's failure to make substantive submissions regarding the merits of the motion in its opposition (Doc. #32, at 4). Yet, with the exception of the Board's one-sentence reference to production of privileged material as "impertinent" (Doc. #39, at 6), the Board has completely failed, contrary to the rules of natural justice and § 557(c)(3) of the APA, to consider the applicant's submissions and completely failed to disclose reasons which explain the path of reasoning why the applicant's legal submissions were rejected. The Board's failure to consider the applicant's legal submissions confers a gargantuan procedural advantage to the opposer and favors large corporate interests over the interests of individuals and small businesses. See V. S. Mani, *International Adjudication: Procedural Aspects*. Martinus Nijhoff Publishers, 1980; Office of Governmental Affairs– USPTO's *Report to Congress: Trademark Litigation Tactics and Federal Government Services to Protect Trademarks and Prevent Counterfeiting* (April 2011) ("Report to Congress").

Reconsideration Issue 2: The Board has clearly fallen into error and/or clearly abused its discretion by denying the applicant a fair trial by failing in toto to particularize the legal basis for each of the decisions it has made, contrary to § 557(c)(3) of the APA. The applicant relies on the submissions made under **Reconsideration Issue 1**, which are incorporated by reference. The Applicant further submits that the Board has cited no legal basis or offered a sufficient and reasonable explanation for its imposition of sanctions barring the applicant from further written discovery and further motions to compel regarding written discovery.

Reconsideration Issue 3: The Board has committed a clear error of law and/or abused its discretion by taking into account irrelevant information in its decision that "Applicant has abused the discovery process and is barred from serving further written discovery or filing further motions to compel regarding written discovery." Doc. #39, at 6. It is submitted that the Board's decision is solely or primarily explicable on the basis of the opposer's submissions and reproduction of the applicant's

communications on pages 3 and 4 of its reply/opposition to the applicant's response to the Board's Order. Doc. #37, at 3-4. It is submitted that this entire submission made by the opposer, running two pages, is wholly irrelevant to the motion to compel the Board was adjudicating because it relates to discovery requests which the applicant had not even filed before the Board. *See* Doc. #26 & Ex. 1. The following quotations from the passage confirm the opposer has introduced irrelevant material in a (successful) attempt to unfairly influence the Board to bar the applicant from "serving further written discovery or filing further motions to compel regarding written discovery": the opposer's reference to the "[Listing of 27 interrogatories]", which are not the subject of any motion to compel and therefore not part of the record (*see* Doc. #26 & Ex. 1); the opposer's reference to the applicant's statement that "this document shall be relied on in a second motion to compel," which clearly and expressly indicates that the interrogatories which the applicant challenged were not currently before the Board and therefore would be the subject of "*a second motion to compel*" (opposer's emphasis); the opposer's reference to "[Listing of 269 Requests for Admission]," which are clearly not part of the record and neither the subject of a motion to compel nor a motion to test the sufficiency of response to admission request under TBMP § 524; the opposer's reference to the applicant's statement that "this document shall be relied on in a motion to test the sufficiency of your client's (lack of) admissions," which is self-explanatory; the opposer's reference to the applicant's alleged "'my way or the highway' 'meet and confer' approach the next day," which is inflammatory, irrelevant to the "meet and confer" attempts in the Exhibits to the motion to compel (Doc. #29), and intended (successfully) to prejudice the Board against the applicant; the opposer's reference to the applicant's comment that "your client did not update its responses to any of my Requests for Admission despite its opportunity to do so," which is again wholly irrelevant to the motion to compel; the opposer's reference to the applicant's statement that "***If your client does not consent, I'll be filing a motion with the Board in any event citing your client's lack of co-operation in discovery and your most recent supplements as evidence therefore***" (opposer's bold-face and italics), which is wholly irrelevant to the present motion to compel; the opposer's second reference to "Applicant's continued 'my way or the highway' 'meet and confer' approach falls well short of a good faith effort to resolve the issues in

Applicant's Motion to Compel," which is again inflammatory, irrelevant to the "meet and confer" attempts in the Exhibits to the motion to compel (Doc. #29), and intended (successfully) to prejudice the Board against the applicant; and finally, the opposer's reference to settlement offers (Doc. #37, at 8), for which the opposer has offered no reasonable basis for inclusion in its response.

Thus, it is submitted that the opposer has included irrelevant material in an (successful) attempt to unfairly influence the Board to bar the applicant's attempt to take discovery. The Board has relied on this information and arrived at the erroneous conclusion that the "Applicant has abused the discovery process and is barred from serving further written discovery or filing further motions to compel regarding written discovery." Doc. #39, at 6. Even if, taken at their highest, the applicant's good faith "meet and confer" were grossly deficient in complying with the requirements of 37 C.F.R. § 2.120, the appropriate time for the opposer to raise and challenge the validity of these attempts is at some date de futuro, once the applicant has filed a second motion to compel or motion to test the sufficiency of response to admission request. The opposer's inclusion of this clearly irrelevant material was for the sole or primary purpose of causing prejudice to the applicant. The Board has taken into account this irrelevant material and, by barring the applicant from serving further written discovery requests or filing further motions to compel, acted in a way which severely prejudices the applicant. The applicant raised these issues with the Board and the submission was not considered at all. Doc. #38, at 1-2.

Reconsideration Issue 4: The Board has clearly fallen into error or clearly abused its discretion by miscalculating the date of suspension of proceedings, which has the effect of unfairly limiting the applicant's time for discovery. The applicant clearly raised this issue in its Reply (Doc. #38, at 5), but the Board has completely failed consider or provide written reasons for its decision in respect of the reset trial dates contrary to § 557(c)(3) of the APA. The Board retroactively suspended proceedings to the 15th July, 2013, when the motion was purportedly filed (Doc. #35, at 1), when in fact they should have been suspended to the 20th June, 2013, when the applicant in fact first filed the motion (Doc. #29).

Reconsideration Issue 5. The Board has clearly fallen into error or clearly abused its discretion by failing to consider at all the applicant’s submissions regarding the opposer’s failure to produce the requested documents until approximately 13 months after they were requested, contrary to § 557(c)(3) of the APA. See Doc. #38, at 2. The *Report to Congress* (at 20) impliedly raised the issue of aggressive dilatory litigation tactics by trademark owners on the intellectual property legal community and small business and individuals in actual litigation:

(iv) Size and Resource Imbalances

One commenter acknowledged that trademark owners should have the right to protect their marks, but stated that the *aggressive tactics used by overreachers presents a problem for the entire intellectual property community by threatening legitimate activities and clogging the legal system with invalid claims*. Another commenter noted that “small companies and individuals are placed in a difficult position where surrender of valid trademarks that are being lawfully used is the only rational financially-feasible option available” (emphasis added).

The Board Interlocutory Attorney, Ms. Elizabeth Dunn, picked up these concerns in her email to the applicant dated August 22, 2013, in which she noted the “[t]he Board’s limited resources.” See Exhibit 1 to the Declaration in Petition for Disqualification dated December 10, 2013, filed herewith. It is submitted the opposer’s delayed discovery supplementation, approximately 13 months after it was requested, is the type of abusive litigation tactic foreshadowed in the *Report to Congress* and should not be condoned. Such dilatory litigation tactics undermine the applicant’s right to a fair trial and fair discovery, the applicant’s right to be heard, and the applicant’s right to take “follow up” discovery. See TBMP § 403.05(a) & *Miss Universe Pageant v Petite Productions Inc.*, 17 USPQ2d 1067.

Reconsideration Issue 6. The Board has clearly fallen into error or clearly abused its discretion by failing to consider at all the applicant’s submissions regarding the opposer’s failure to disclose the identities of individuals with discoverable information until approximately 13 months after they were requested, contrary to § 557(c)(3) of the APA. See Doc. #38, at 2. Such submissions are relevant to the applicant’s right to a fair trial and fair discovery, the applicant’s right to be heard, and the applicant’s right to take further discovery, as well as the applicant’s submissions that the opposer has

engaged in abusive litigation practices. The applicant relies on his submissions on aggressive dilatory litigation tactics in **Reconsideration Issue 5**, which are referred to and incorporated by reference.

Reconsideration Issue 7. **The Board has clearly fallen into error or clearly abused its discretion by failing to consider at all the opposer's failure to supplement its discovery production of documents relating to expert witnesses or purported expert witnesses in violation of the**

requirements of Fed. R. Civ. P. 26(e)(1)(A). In its filing dated August 21, 2013, the opposer held out Mr. Steve Osterloh as an expert witness. Doc. #34. While the opposer has supplemented its responses in relation to some of the applicant's discovery requests for production, the opposer has completely failed to produce documents possessed by Mr. Osterloh as an expert witness as required by Fed. R. Civ. P.

26(e)(1)(A). *See* Doc. #33. The applicant submits, as he generally did in his filing dated September 23, 2013 (Doc. #38, at 8), that the opposer is estopped under the law of equitable estoppel from denying that Mr. Osterloh is an expert witness even though the Board has ruled him not to be an expert witness. In particular, with respect to the four elements of an equitable estoppel: (1) *the party to be estopped must know the facts*- in its discovery responses dated June 11, 2012, the opposer represented that it was not relying on any expert witnesses at that stage (Doc. #26, Opposer's Objections and Responses to Applicant's First Request for Production, Responses to Requests 1-4); (2) *they must intend that their conduct shall be acted on or must so act that the party asserting the estoppel has a right to believe it is so intended*- the opposer intend that its conduct (representations) shall be acted on and failed to supplement its discovery responses with respect to expert witnesses as required under Fed. R. Civ. P. 26(e)(1)(A); (3) *the latter must be ignorant of the true facts*- the applicant was ignorant of the fact that the opposer was relying on an expert witness, Mr. Osterloh and had him in the opposer's employee the whole time; and (4) *they must rely on the former's conduct to their injury*- the applicant relied on the opposer's representations by not requesting documents or propounding interrogatories or requests for admissions in relation to the opposer's expert witness and has been denied an opportunity for a fair trial and fair discovery. *U.S. v. Georgia-Pacific Co.*, C.A. 9th, 1970, 421 F.2d 92, 96 (quoting *Hampton v. Paramount Pictures Corp.*, C.A. 9th, 1960, 279 F.2d 100, 104). *See also, TRW, Inc. v. FTC*, C.A. 9th, 1981, 647 F.2d 942, 950-51.

Reconsideration Issue 8. **The Board has erred by failing to consider at all the applicant’s submissions regarding the improper and inappropriate matters raised by the opposer, contrary to § 557(c)(3) of the APA.** *See* Doc. #38, at 1-2. Such submissions related to the opposer’s criticism of attempts by the applicant to “meet and confer” with the opposer in relation to discovery requests which were not and have never been part of the file in this proceeding, as well as the opposer’s criticism of the applicant’s refusal to accept settlement offers made by the opposer. The Board has failed to take into account these submissions in toto, yet expressly criticizes the applicant for submitting “more than a dozen exhibits with no relationship to the motion.” Doc. #39, at 4.

Reconsideration Issue 9. **The Board has erred by failing to consider at all the applicant’s motion to compel in Doc. #17 and the applicant’s motion to exceed the page limit in Doc. #14, contrary to § 557(c)(3) of the APA.** The applicant’s Certificate of Mailing for the motion to compel in Doc. #17 is dated July 10, 2012, which date precedes the Board’s orders dated July 13, 2012 (Doc. #13) and July 17, 2012 (Doc. #15), while the Board ruled that: “No consideration will be given to this paper, or any motion to compel which subsequently is filed, until the pleadings are closed. *At that time the Board will reset the time for Ennis, Inc. to respond to the motion to exceed page limits*” (emphasis added). Doc. #15, at 2. Yet in the Board’s order dated May 15, 2013, there is no reference to the motion to compel or “the time for Ennis, Inc. to respond to the motion to exceed page limits.”

ALLEGED CLEAR ERRORS RELATING TO THE APPLICANT’S “MEET AND CONFER” REQUIREMENTS UNDER TRADEMARK RULE 2.120(e)(1) AND TBMP § 523.02

Reconsideration Issue 10. **The Board has clearly fallen into error or clearly abused its discretion by ruling that the applicant failed to comply with the threshold “meet and confer” requirements of Trademark Rule § 2.120 and TBMP § 523.02 (Doc. #39, 3-5) when in fact the applicant’s letter dated June 12, 2012 is and was *already part of the record*, viz. Exhibit 2 in Doc. #17.** The applicant has certainly not “abused the discovery process” (Doc. #39, at 6) because the Board, the opposer and the public have had access to the disputed letter since at least July 18, 2012 on the public record, for more than 13 months *before* the Board commenced adjudicating the motion to compel. Doc.

#35. The applicant's good faith attempt dated June 12, 2012 clearly outlines the concerns the applicant has with the opposer's responses, including listing the particular responses in issue, the boilerplate objections lacking any particularity, the lack of answers to some of the requests, especially in relation to the applicant's fraud claims. Indeed, the applicant goes on to describe further deficiencies in the opposer's responses in Exhibits 8 and 11 to the motion to compel. Docs. #17 & 29. Exhibit 8 refers to the specific Requests for Production and links these to the opposer's first supplement to initial disclosures, while Exhibit 11 refers to the specific discovery responses which need supplementation and provides reasons why they are deficient, viz. paragraphs 2 (in relation to issues in dispute in the opposition), 3 (in relation to the applicant's fraud claims) and 5 (in relation to allegedly privileged material). Paradoxically, and conceding the applicant's good faith attempts to meet and confer were sufficient, the Board goes on to adjudicate the merits of the motion to compel in its findings. *Id.*, at 6. This ruling, it is submitted, is fundamentally inconsistent and demonstrates the flawed basis of the Board's reasoning on the threshold "meet and confer" attempts.

Reconsideration Issue 11. The Board has clearly fallen into error or clearly abused its discretion by failing to consider at all the applicant's submissions regarding Chinese Walls and the inconsequential effect of the resumption of proceedings after one year and the opposer's change of legal counsel on the applicant's "meet and confer" attempts, contrary to § 557(c)(3) of the APA.

Doc. #32, at 3. The Board has ruled that "an equally strong basis for denial is the failure of applicant to communicate with opposer regarding its discovery needs following the resumption of proceedings after almost a year." Doc. #39, at 5. The applicant made detailed submissions regarding these issues which were neither considered, analyzed nor explicated in the Board's reasons in the Decision.

Reconsideration Issue 12. The Board has clearly fallen into error and/or clearly abused its discretion because the opposer's was estopped from relying on the applicant's alleged failure to comply with 37 C.F.R. § 2.120 and TBMP § 523.02 under the law of equitable estoppel as a result of the opposer's significant and voluminous supplementation of its discovery responses. In both its opposition to the motion to compel and its opposition to the applicant's response to the Board's inquiry,

the opposer argued that the applicant's good faith attempts to "meet and confer" with the opposer were insufficient or substandard. *See* Docs. #30 & 37. The Board agreed. Doc. #39, at 3-5. However, with respect to the four elements of an equitable estoppel cited *supra*: (1) the opposer knew its discovery production and responses to the applicant's interrogatories were grossly insufficient; (2) the opposer expressly asserted in its responses to the applicant's good faith attempt to confer with the opposer, "Joel, We continue to stand by our objections. However, in a good faith effort to resolve this discovery dispute, we are attempting to gather more documents and will provide those to you next week." (Email from Mr. Jacks to applicant, Exhibit 23 in Doc. #29) (*Ennis never provided the documents*); (3) the applicant did not know the opposer intended to significantly supplement its responses; and (4) the applicant relied on Mr. Jacks' email to his injury (the Board denying the motion to compel) and did not pursue further good faith attempts to "meet and confer" after Messrs Jacks and Myer withdrew as the opposer's legal counsel and the Board denied the motion to compel. *See **Reconsideration Issue 7*** and the cases cited thereunder. The applicant also relies on the opposer's supplemented discovery responses, which may hardly be characterized as de minimis, to argue that the opposer is estopped from arguing the applicant's good faith "meet and confer" attempts were procedurally deficient: the opposer produced approximately 1100 documents, including its annual reports and some innocuous emails pertaining to the creation of its COLORWORX Mark; the opposer supplemented all of its responses to the applicant's interrogatories; and the opposer disclosed the identities of an additional seven witnesses, which it had previously been concealing. In short, the opposer is estopped from taking unfair advantage of the applicant's failure to pursue further good faith attempts to "meet and confer" upon the resumption of proceedings when, through the opposer's false language in its emails to the applicant in mid-2012 and conduct in significantly and voluminously supplementing its discovery responses, the opposer has induced the applicant to not pursue further good faith attempts to "meet and confer" upon the resumption of proceedings, which resulted in the applicant being injured, namely, by the Board denying the motion to compel. Finally, for sake of completeness, the opposer's false statements in mid-2012 are also caught by the law of *estoppel by misrepresentation*. *See Schweiker v. Hansen*, 1981, 101 S.Ct. 1468, 450 U.S. 785.

Reconsideration Issue 13: The Board has clearly fallen into error or clearly abused its discretion

by ruling that the subject matter of the applicant's declaration of June 20, 2013 was "not the subject of a discussion with opposer." Doc. #39, at 4. The Applicant's declaration in fact pertains in part to the Discovery Conference dated April 24, 2012 the applicant had with the opposer! Doc. #29, Declaration, at ¶¶ 2-3. Paragraph 4 of the declaration pertains to Ennis' homepage and annual reports, of which Ennis may vaguely be aware and which were specifically raised with the opposer in the applicant's opposition to the motion to dismiss (Doc. #25, at 5, 7, 25) and specifically responded to by the opposer. Doc. #22, at 5. Paragraph 5 of the declaration pertains to a search of the Ennis' COLORWORX Mark on the USPTO's TARR site which the *opposer* filed with the Board to commence the opposition! Doc. #1. Paragraph 6 pertains to the Ennis' COLORWORX website, of which, again, Ennis may vaguely be aware, while paragraph 7 pertains to email communications the applicant had with the opposer! It is submitted that the Board can take judicial notice of the fact that the opposer is aware of the opposer's annual reports, the opposer is aware of the opposer's website, and that the opposer is aware that the opposer is emailing the applicant. Logic and common sense may also support this argument. It is submitted the Board appears very reluctant to accept the truth about the opposer's abusive approach to discovery, for the applicant raised the issue of the opposer's non-disclosure of its annual reports on September 18, 2012 (Doc. #25, at 25), yet they were only produced to the applicant on August 19, 2013, 14 months after they were requested. Doc. #33.

CLEAR ERRORS OF LAW REGARDING ENNIS' ALLEGED FRAUD AND THE DISCLOSURE OF PRIVILEGED DOCUMENTS

Reconsideration Issue 14: The Board has erred by denying the applicant's motion to compel

privileged material on the basis that the request was "impertinent." Doc. #39, at 6. The applicant submits there is overwhelming evidence to demonstrate on the preponderance of the evidence, much less compelling prima facie evidence, that the opposer has committed fraud on the USPTO by swearing a declaration in an application for registration that was false in a material particular. The applicant relies on the opposer's refusal to produce the declaration it submitted to the USPTO to procure the COLORWORX registration despite numerous requests, Exhibits 9 and 10 of the original motion to compel (which are not

irrelevant as the Board ruled), as well as the following four different creation stories it has provided to explain the origins of the COLORWORX component of its Mark at various times during the current proceeding:

14.1. Version One: “We know the answer but object to answering that question on four grounds.” Interrogatory No. 14 in applicant/petitioner’s First Set of Interrogatories to opposer/registrant served on June 12, 2012 and the response:

INTERROGATORY NO. 14: Describe in detail the rationale, philosophy and ideas behind the selection, design and adoption of each feature and/or part of the “COLORWORX” mark, including the logo, words, style of lettering, visual appearance, sound, compound/composite nature and misspelling.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial

14.2. Version Two: “We alone create the word Colorworx.” Interrogatory No. 8 in applicant/petitioner’s First Set of Interrogatories to opposer/registrant served on June 12, 2012:

INTERROGATORY NO. 8: Describe in detail how the compound word “COLORWORX” in your registration differs from the words “Color Works” in terms of meaning, appearance, sound and commercial impression.

RESPONSE: The mark “COLORWORX” differs from the words “Color Works” in terms of meaning, appearance, sound and commercial impression because the mark “COLORWORX” is a neologism and had no meaning prior to its adoption by Registrant.

14.3. Version Three: “We copied the word Colorworx from another trader or traders.” In its Motion to Dismiss, the opposer/registrant argued:

General trademarking principals maintain that once a mark has been abandoned, the mark returns to the public domain and may be appropriated for use by other actors in the marketplace in accordance with basic rules of trademark priority. See 15 U.S.C. § 1115(b)(2); *ITC Ltd. v. Punchgini, Inc.*, 482 F.3d 135, 147 (2d Cir. 2007). Once Creative Hairdresser’s, Inc. abandoned its mark in the year 2000, nearly eight (8) years before the USPTO issued a registration for the Mark, Registrant and all other persons and entities seeking to use such word mark were free to use the term “Colorworx” in commerce on or in connection with their goods or services [Doc. #19 ¶ 20].

Here, the opposer argues not only that it was “free to use the term ‘Colorworx’” but even cites statute and case law to justify its position that it had “appropriated [the Colorworx Mark] for use...in the marketplace in accordance with basic rules of trademark priority.” *Loc. Cit.*

14.4. Version Four: The Amnesia Defense or “We don’t remember.” In its response to the applicant’s response to the Board inquiry with respect to the creation of its COLORWORX Mark and the design element, the opposer stated that it “does not remember specific details or only has a few documents from the time in question” and “does not remember specific details or have access to such details from the time in question.” Doc. #37, at 5, 9 & 11. *Res ipsa loquitur*.

The applicant also relies on the opposer’s responses to Requests 93-98 (inclusive) of the Applicant’s Third Request for Admissions to the opposer, which are highly inculpatory and demonstrate significant dishonesty in the opposer’s discovery responses. Doc. #26. Thus, it is respectfully submitted there is at the very least compelling prima facie evidence for the Board to compel the opposer to produce the privileged material sought in the motion to compel under the crime-fraud exception to the attorney-client privilege rule.

Reconsideration Issue 15. **The Board has clearly fallen into error or clearly abused its discretion by failing to disclose the path of reasoning which led to the Board’s decision that the applicant’s motion to compel privileged material on the basis that the request was “impertinent.”** Doc. #39, at 6. The applicant made detailed submissions, citing both legislation and case law, justifying why the Board should compel the opposer to disclose privileged material. Doc. #29, at 13-17. However, these submissions were neither considered, analyzed nor explicated in the Board’s reasons for decision.

CLEAR ERRORS OF LAW AND ABUSES OF DISCRETION REGARDING MODIFICATION OF REQUESTS AND NEW REQUESTS
Reconsideration Issue 16: **The Board has clearly fallen into error or clearly abused its discretion by ruling that all of the applicant’s Requests for Production were “new discovery requests.”** Doc. #39, at 3. The applicant cannot overemphasise this pivotal point: the only “new requests” which the applicant pursued in his filings in relation to the opposer’s supplementation of its responses were those in relation to the opposer’s expert witnesses (i.e. Requests for Production Nos. 1-4), and these were not even “new” in the sense of newly served, merely new to the motion to compel. They were served on the 11 April 2012 (see Doc. #26), at exactly the same time as the applicant’s other requests for production, approximately 12 months prior to the filing of the motion to compel. The applicant sought to modify his requests on the

basis that the opposer claimed it had an expert witness, Mr. Osterloh (Doc. #34), yet it had failed to produce any documents in relation to that witness and had previously claimed in discovery responses that it was not relying on an expert witness. All the other requests for production – that is, Requests for Production Nos. 5, 8, 9, 12, 13, 14, 15, 16, 17, 20, 43, 32, 36, 37, 38, 39, 40, 42 - still required adjudication by the Board (and were argued under the relevant heading, “ISSUES WHICH STILL REQUIRE ADJUDICATION BY THE BOARD”; see Doc. #36, at 7-13), were *definitely not new requests*, and were the subject of numerous good faith “meet and confer” attempts. See Exhibits 8, 11, 18 in Doc. #29. Significantly, these requests seek, inter alia, many documents in relation to the sales and advertising spend figures for goods and services sold under the opposer’s COLORWORX Mark which the opposer has hitherto failed to produce, as well as documents in relation to the applicant’s fraud claims, including the declaration the opposer signed when applying for registration of the COLORWORX Mark and search results for other similar Marks which the opposer has hitherto failed to produce. The applicant submits it would be an egregious denial of justice if the opposer was not compelled to produce these documents, which were definitely not new. The applicant reiterates, for sake of completeness, *the only “new requests” were those in relation to the opposer’s expert witnesses, and these were not newly served, but only new to the motion to compel.* See **Reconsideration Issues 10 & 11.**

Reconsideration Issue 17. **The Board has clearly fallen into error or clearly abused its discretion by denying the motion to compel on the basis that the applicant has attempted to modify his requests.** Doc. #39, at 3. The Applicant submits that the Board’s ruling is patently illogical because, by definition, *any* response to the opposer’s discovery supplementation is a modification to the Requests. With the exception of its Requests to Produce relating to expert witnesses (*see, supra*), the applicant has definitely not attempted to modify its Requests. The applicant’s original requests in the motion to compel stand; what the Board, with respect, misunderstands is that the applicant is explaining the discrepancy between the documents or information the Requests seek and the opposer’s response thereto and responding to the opposer’s objections. If the opposer’s and the Board’s reasoning is followed through to its logical conclusion, then, *any* response to *any* of the opposer’s responses or objections is moot, since

the response ipso facto proves the opposer's point. An opposer may therefore respond insufficiently, evasively or dishonestly, as the opposer has done systematically in this proceeding, and then argue that the Requests are, for example, vague, overbroad or ambiguous and thus needed an explanation of the Request from the applicant, which it has provided.

Reconsideration Issue 18. **The Board's ruling denying the applicant's attempt to modify his requests does not disturb or undermine at all the validity of the discovery requests and submissions in the motion to compel filed on July 20, 2013.** Doc. #29. Put simply, if the Board wishes to completely disregard the applicant's submissions in its response to the Board's order dated August 31, 2013 on the basis that the applicant has attempted to modify his requests, then the Board is completely within its rights to do so and the Board has not abused its discretion. However, the Board must still consider the applicant's Requests and submissions in the original motion to compel in light of the applicant's update of the issues which still require adjudication. In this regard, the applicant clearly informed the Board that all of the Requests for Production in the motion to compel (Doc. #29) and Interrogatories 4, 9, 10, 13, 14, 15, 16, 17, & 19 still required adjudication. Doc. #36, at 2-13.

ENNIS INC.'S ALLEGED TRADEMARK BULLYING²

Reconsideration Issue 19. **The Board has clearly fallen into error or clearly abused its discretion by failing to consider at all the applicant's submissions regarding the opposer's abusive litigation tactics and the *Report to Congress*, which identifies an important policy issue affecting the Trademark Trial and Appeal Board and the USPTO generally.** See Doc. #32, at 2, which is incorporated by reference. Ennis has expressly sought to disavow its responses certified by its former attorneys of record, Messrs Myer and Jacks, to the applicant's good faith attempts to "meet and confer." (See Doc.#30, at 2-3) and its insistence that the applicant had to meet and confer de integrow upon resumption of proceedings was abusive, onerous and unfair. The applicant, like many trademark

² For the record, the applicant reiterates it alleges no attorney misconduct in this motion against Ennis Inc.'s current and former attorneys, from Chalker Flores, LLP: Edwin Flores, Scott Myer, Thomas Jacks, Daniel Chalker and Jessica Flores. Petitioner makes the following submissions pursuant to Fed. R. Civ. P. 11(b)(1), (b)(2), and (b)(3).

individual and small-business applicants, cannot afford to engage legal counsel and should not suffer prejudice as a result of the opposer's former attorneys' poor forensic judgments.

Table 1 shows other abusive or coercive litigation tactics allegedly used by Ennis in connection with the motion to compel.

Table 1. Alleged Abusive Trademark Litigation Tactics in Discovery

1. *Pseudo-production*: the opposer produces documents already in the public domain as bona fide responses to requests for production. *E.g.*, Docs. #26 & 33, viz. the opposer's production of its Annual Reports 14 months after they were requested. *See* **Reconsideration Issue 12**, *supra*, which is incorporated by reference.
2. *White-Flag Arguments*: the opposer introduces settlement offers into its legal argument without a reasonable, good-faith basis. *E.g.*, Doc.#37, at 8. *See* **Reconsideration Issues 3 & 22**, *infra* & *supra*, which are incorporated by reference.
3. *Blame the Applicant*: the opposer refuses to make a reasonable, good faith effort to respond to the applicant's requests and blames the applicant for inappropriate behavior. *E.g.*, Doc. #29, Exhibits 25, 26.
4. *Threaten to file a motion for a protective order*: the opposer uses the threat of a protective order in an attempt to deter the applicant from continuing with reasonable, good-faith attempts to take discovery when the opposer knows it has not made a reasonable, good faith effort to respond to the applicant's discovery requests. *E.g.*, Ex. 2, *infra*.
5. *No Answer*: The opposer simply objects to the discovery request without providing an answer, thereby forcing the applicant to waste time, effort and resources to pursue an answer. *E.g.*, Doc. #26, *passim*, e.g., Opposer's Objections and Responses to Applicant's Third Request for Admissions, Opposer's Objections and Responses to Applicant's First Set of Interrogatories.
6. *Boilerplate or frivolous objections*: The opposer offers the same boilerplate objections to

every discovery request without ensuring that each objection is responsive to the Request or unreasonably objects on the basis that the discovery request requires the opposer to marshal its evidence prior to trial or that the request is not calculated to lead to evidence admissible at trial. *E.g.*, Docs. #21 & 26.

7. *Play Dumb*: the opposer pretends not to understand words or phrases in an applicant's discovery request to avoid responding. *E.g.*, Docs. #36 & 37, with respect to applicant's use of the phrase "works of color" and "understanding of the connections."
8. *Claim Amnesia*: the opposer claims it has no memory of the events because they happened a long time ago. *E.g.*, Docs. 37 & 38 (at 3-4).
9. *Poisoned Red Herrings*: the opposer raises issues clearly irrelevant to the applicant's motion in its response in an attempt to prejudice the Board against the applicant. *E.g.*, Docs #37 & 38 (at 1-2) & **Reconsideration Issue 3**, which is incorporated by reference.
10. *Broken Promises*: the opposer makes promises regarding discovery issues, such as the production of documents, it knows it will not keep. *E.g.*, Doc. #29, Exhibit 23.
11. *Blame your attorneys*: the opposer implicitly blames its current or former attorneys for failure to comply with the applicant's discovery requests. *E.g.*, Doc.#30, at 2-3 and **Reconsideration Issue 19**, which is incorporated by reference.
12. *AWOL or MIA Witnesses*: the opposer claims a key witness has left the opposer's employ with no forwarding address, thereby forcing the applicant to expend time, money and effort to track the witness down. *E.g.*, Ex. 3, *infra*, with respect to witness Rachel Maples.
13. *Concealment of Evidence*: the opposer simply hides the document and denies all knowledge of its existence. *E.g.*, Docs. #29 & 37, with respect to, inter alia, sales and advertising spend figures for goods and services sold under the COLORWORX Mark; the statement of use the opposer submitted to the USPTO concerning use in commerce exclusively or substantially exclusively for five consecutive years to procure the

COLORWORX registration; search results in clearing the name COLORWORX for adoption by the opposer.

14. *Document Dumping*: the opposer produces a large amount of non-responsive documents. *E.g.*, Doc. #33. The opposer produced over 1000 pages of the opposer's annual reports which the applicant obtained at least 14 months previously and which contain no financial information relating specifically to the COLORWORX Mark.
15. *Politician-like Answering*: the opposer responds to an Interrogatory by answering a question that was not asked. *E.g.*, Doc. #36, Interrogatory No. 2, with respect to the printing industry, which was not asked, at 2, *infra*,
16. *Threats about costs*: the opposer falsely asserts the applicant will have to pay the opposer's legal or other costs in order to coerce the applicant into complying with the opposer's demands. Doc. #29, Exhibit 26.
17. *Overdesignation of documents under the Board's Standard Protective Order*: the opposer dishonestly and incorrectly overdesignates documents under the SPO to avoid producing otherwise discoverable documents. *E.g.*, Doc. #37, opposer's arguments in relation to Requests 14, 15, 16, 17, 20, 43, at 13, with respect to sales figures. Thus far, the opposer has produced no evidence that goods or services sold under the COLORWORX Mark have made even a single sale.
18. *Prima Facie Answering/Lying by Omission*: the opposer appears to answer the Interrogatory by providing some, usually surface and innocuous, information but avoids providing any incriminating information. *E.g.*, Doc. #36, at Interrogatory 13, with respect to the creation of the COLORWORX Mark.
19. *Blanket Denials*: the opposer refuses to admit matters which it reasonably should admit, despite its knowledge of the evidence against it. *E.g.*, Doc. #26. Applicant's First Request for Admissions to Opposer, dated June 11, 2012, with respect to search results for the

term COLORWORX.

- 20 *Bad Grammar*: the opposer blames the applicant for the opposer's failure to respond completely or sufficiently to the discovery request on the grounds that the applicant's request is ambiguous, vague, overbroad, ungrammatical or poorly phrased. *E.g.*, Doc. #37, Responses to Interrogatory 15, with respect to "understanding of the connections" and "works of color."
- 21 *Shields-as-Swords*: the opposer claims privilege (e.g., attorney-client privilege, work-product privilege, trade secret/commercially sensitive designations under the TTAB's Standard Protective Order) in unreasonable and overreaching ways to protect itself from incriminating discovery responses. *E.g.*, Doc. #36, Request for Production 42, at 13, with respect to search results; **Reconsideration Issue 14.**
- 22 *Incomplete Privilege Logs*: the opposer produces a privilege log which is grossly insufficiently particularized as to date, author, and subject matter of the document. *E.g.*, Doc. #29, Exhibits 27.
- 23 *Blind Applicant*: the opposer claims the document or thing requested was already produced to the applicant. *E.g.*, Doc. #36. Applicant's First Request for Production to Opposer, Request 9, with respect to the creation of the Colorworx Mark.
- 24 *Heavily Qualified Admissions*: the opposer admits the applicant's request for admission which it should admit completely but qualifies it so heavily that the admission is practically worthless. *E.g.*, Ex. 1, *infra*, Request No. 150.
- 25 *Recitals of law*: the opposer cites the law in lieu of a detailed response on the evidence in dispute. *E.g.*, Doc. #36, Response to Interrogatory No. 9, at 3.
- 26 *Unreasonable Inquiry*: the opposer claims to be unable to respond to the request despite a "reasonable inquiry", thereby forcing the applicant to expend time, money and effort to investigate the issue in dispute. *E.g.*, Doc. #36, Request 9, at 9, with respect to creation of

the opposer's mark.

- 27 *Stalling*: the opposer claims it is still gathering documents or that they will be produced when the opposer has no intention of producing them. *E.g.*, Doc. #29, Exhibit 23.
- 28 *Practically Irrefutable Claims*: the opposer objects on a basis which the applicant cannot refute without wasting significant time, money and effort. *E.g.*, Doc. #36, Response to Interrogatory No. 13, with respect to Rachel Maples; Response to Interrogatory No. 4, with respect to the printing industry.
- 29 *Prove it*: the opposer propounds discovery requests to the applicant to identify or produce evidence for its case which the opposer has knowingly concealed from the applicant, despite numerous relevant requests for production of the same evidence from the applicant. *E.g.*, Ex. 4, *infra*, with respect to the applicant's fraud claims against the opposer.
- 30 *Procedural Deficiencies*: When the opposer cannot succeed on the merits, it argues the applicant's motion suffers from ostensibly fatal procedural deficiencies. Docs. # 30 & 37.
- Reconsideration Issues 10, 11, 12 & 13**, *supra*, which are incorporated by reference.

Public and USPTO policy dictates that large corporations such as Ennis should not be allowed to use their wealth and resources to engage and *instruct* specialist intellectual property legal counsel to use abusive litigation tactics to obstruct and frustrate legitimate attempts to take discovery. The Report to Congress observed (at 19):

Regarding actual litigation experiences, some of those relative few with direct experience on the subject opined that *discovery and deposition processes were too costly for many small businesses and provided a means for a party to thwart progress in a case and to drain resources from an adversary* (emphasis added).

Abusive litigation tactics during discovery have the effect of significantly increasing the legal costs of small businesses and individuals applying for trade marks, as well as wasting their time and resources. Moreover, such abusive litigation tactics alter the nature of the dispute from a purely legal one on the merits to a war of attrition based on who has the deepest pockets, the most time, and the greatest will

power. See Sara Marie Andrzejewski. (2011). “Leave Little Guys Alone!” Protecting Small Businesses From Overly Litigious Corporations and Trademark Infringement Suits.” *Journal of Intellectual Property Law* 19, 117-142. The TTAB, as the administrative appellate arm of the USPTO, has “a responsibility to do something to discourage or prevent aggressive trademark litigation tactics.” *Report to Congress*, at 20.

Reconsideration Issue 20. **The Board has clearly fallen into error or clearly abused its discretion by barring the applicant from conducting further written discovery or filing further motions to compel because it is fundamentally unfair to force a foreign pro se applicant to spend money on discovery depositions to achieve justice.** Discovery depositions necessarily involve certain costs such as hiring a court reporter and paying for transcripts, which are calculated by time and page. See Exhibit 5, *infra*, for two examples. In other words, the more questions a party asks, the greater the cost. The applicant cannot afford this cost. It would bankrupt him. Public and USPTO policy dictates that access to justice be available to all litigants, irrespective on their means, and a ruling barring written discovery, the procedural norm in disputes involving foreign litigants [*McCarthy on Trademarks and Unfair Competition* § 20:114 (4th ed.)], means that the applicant cannot afford to pursue further discovery via discovery depositions, and therefore, cannot afford to defend his interests. In other words, the Board’s ruling barring written discovery but allowing discovery depositions is a de facto denial of the right to take discovery. The *Report to Congress* observed (at 19):

(ii) Actual Litigation Issues

Regarding actual litigation experiences, some of those relative few with direct experience on the subject opined that *discovery and deposition processes were too costly for many small businesses and provided a means for a party to thwart progress in a case and to drain resources from an adversary* (emphasis added).

By way of analogy from criminal law arguendo, the Board’s ruling can be compared to a judge granting an impecunious defendant bail, but setting bail excessively at one million dollars. The ruling appears fair on paper, but in practice the ruling is substantively unfair and a de facto refusal of bail because the defendant cannot afford the bail. U.S. Const. Amend. VIII. (“Excessive bail shall not be required...”).

Reconsideration Issue 21. **The Board has clearly fallen into error or clearly abused its discretion by failing to provide a legal definition of the word “abuse,” both as a verb and a noun, in**

the context of abusive litigation tactics during discovery which warrant sanctions, contrary to § 557(c)(3) of the APA. The Board ruled that the “Applicant has *abused* the discovery process and is barred from serving further written discovery or filing further motions to compel regarding written discovery” (emphasis added). Doc. #39, at 6. In this context, the Board is using the word “abuse” as a verb, to find that the applicant has “abused” the discovery process. However, the Board failed in toto to define the word “abuse” either generally or in the context of discovery as a verb or a noun and failed in toto to list the types of conduct generally or in the context of discovery which constitutes “abuse.”

Abusive litigation tactics were the subject of the USPTO’s seminal *Report to Congress*, published in April, 2011, and implicate larger public policy issues of trademark bullying and the difficulties faced by individuals, small businesses and foreign applicants when confronted by corporations such as Ennis which attempt to use their wealth and resources to “undertake enforcement measures based on an unreasonable interpretation of the scope of their rights for the purpose of intimidating potential violators into compliance with the mark owner’s demands.” *Report to Congress*, at 1. The Board’s ruling that the “Applicant has abused the discovery process,” which resulted in sanctions barring the applicant “from serving further written discovery or filing further motions to compel regarding written discovery,” has serious consequences for, and causes significant prejudice to, the applicant’s legal rights, yet the Board offers its decision in a vacuum, completely failing to define the word “abuse” either generally or in the context of discovery and completely failing to list the types of conduct generally or in the context of discovery which constitute “abuse.”

Reconsideration Issue 22. The Board has clearly fallen into error or clearly abused its discretion by ruling that settlement offers are irrelevant. The applicant notes that the opposer raised the issue of settlement offers *sua sponte* with the Board, effectively arguing that the applicant refused to agree with the opponent’s reasonable settlement offer. Doc. #37, at 8. The Board picked up the ball and made a formal decision in relation to settlement offers. Doc. #39, Note 1, at 4-5. The *Report to Congress* (at 9) identified a number of “[a]dditional [e]nforcement [c]onsiderations”:

Once a problematic mark has been identified, before taking enforcement measures, a prudent trademark owner typically conducts some due diligence and takes into account a number of considerations... Additional considerations may include the distinctiveness and strength of the mark being enforced, how similar the third-party mark is to the owner's mark, the nature of the third-party use (e.g., directly competitive or ancillary), the trademark owner's expansion plans for its mark, and the resources the owner has available for enforcement... Additionally, the perceived level of risk presented by the third-party mark and the desired outcome of the enforcement effort typically affects both the approach and the tone of the enforcement effort.

The applicant submits, pursuant to Fed. R. Civ. P. 11(b)(1), (b)(2), and (b)(3), that the opposer's settlement offer dated June 25, 2012, should be taken into account in a new law which adds another exception to Federal Rule of Evidence 408(b) aimed at protecting small businesses and individuals from corporations which "undertake enforcement measures based on an unreasonable interpretation of the scope of their rights for the purpose of intimidating potential violators into compliance with the mark owner's demands." *Report to Congress*, at 1; Ex. 6, *infra*. In Ennis's settlement offer dated 25 June 2012, the opposer sought the applicant's consent to be placed in the same position the parties were in prior to the commencement of litigation by the opposer. The applicant coins the phrases *20/20 Hindsight Settlement Offers*, or *Day Zero Settlement Offers*, in submitting that settlement offers made by the opposer and all opposers in general which aim to place the parties in the exact position they were in prior to the opposer's commencement of litigation, ought to be deemed relevant and admissible evidence against the opposer in either a motion to dismiss, motion for summary judgment or in final briefs and be considered sufficient grounds alone for the entering of judgment against the opposer in the action(s) commenced by the opposer. Such 20/20 Hindsight or Day 0 settlement offers confirm that the opposer has in fact adopted "an unreasonable interpretation of the scope of their rights" and that therefore there was no reasonable prospects of success at the time litigation was commenced if the opposer has satisfied its due diligence requirements; in other words, the opposer has engaged in trademark bullying. *Id.* The applicant also submits that all corporations represented by a competent attorney should be peremptorily barred from filing opposition, cancellation or other relevant proceedings against small business and individuals applying for trademarks without legal representation unless they can offer prima facie proof they have served two demand letters on the small business or individual: the first advising the small business or

individual of the corporation's rights in a given Mark, the likelihood of confusion with the applicant's Mark, and a request to "cease and desist" using or applying to use that Mark; and the second, advising the individual or small business that unless they withdraw the application for registration of a Mark within two weeks of the date of the correspondence, litigation will be commenced without further notice to the individual or small business.

In the present proceeding, the opposer failed to instruct its legal counsel to "set forth its demands in a cease-and-desist letter," which would have "put the alleged violator on notice of the mark owner's rights and the violator's perceived rights violation." *Id*, at 9. The applicant's response, such as the one given to another potential opposer as shown in Exhibit 7 (submitted pursuant to Fed. R. Civ. P. 11(b)(1), (b)(2), and (b)(3)), would have presented "compelling facts or legal points that the mark owner may not have known or failed to consider" and the opposer would likely have "decide[d] to pursue settlement or drop its claims altogether" as it proposed in its letter shown in Exhibit 7. *Id*, at 9-10. *The Report to Congress* went on (at 13-15, *passim*):

Evaluating the Reasonableness of Enforcement Efforts: Coercive Behavior vs. Defense of a Right A trademark owner must walk a fine line between being too zealous in enforcing its rights and not being zealous enough....In view of the mark owner's obligation to police violations, aggressive enforcement of one's trademark rights does not automatically equate to abuse or bullying..."most trademark owners are not setting out to assert dubious claims or be bullies when they initiate enforcement measures."...While no legal requirement exists to search a mark's availability before adopting it, it generally makes business sense to do so, as it can save time and money by eliminating potential marks that are, for one or more reasons, problematic (e.g., an identical or highly similar mark is already registered or in use for identical or closely related products or services) and reduce the chance of being on the receiving end of an enforcement action. Sometimes, smaller or less experienced businesses skip this crucial clearance step and later learn as a result of an enforcement action that their chosen mark is not available.

It is submitted that in this case Ennis has in fact set out to assert a dubious and unmeritorious claim and be bullies when they initiated enforcement measures against the applicant. The opposer failed to search the availability of the of the term COLORWORX either generally or on the USPTO register of trademarks before adopting it, and has refused to produce documents concerning its search attempts, if any. Doc. #29, at 12-17. It now faces a large number of fraud claims. It has also refused to produce financial documents regarding the sales and advertising of

goods and services sold under the COLORWORX Mark. *Id.*, at 21-22. For 13 months since the commencement of the discovery period, the opposer refused to produce all but the most innocuous of documents relating to its COLORWORX Mark. Indeed, to date, the opposer has produced no documents to prove that the opposer has made even a single sale of goods or services under the COLORWORX MARK. When the applicant challenged the validity of the opposer's rights to its Mark through a counterclaim, the opposer adopted the "coercive" tactic of filing a motion to dismiss. Doc. #19. Until August 19, 2013 when the opposer supplemented its discovery responses, the opposer persisted in its abusive litigation tactics. Ennis has still failed to produce to the applicant the declaration it filed with the USPTO when it applied for the registration of the COLORWORX Mark, still yet to produce documents relating to its search attempts before adopting its Mark, still failed to explain how it chose or adopted the word COLORWORX, and still failed to produce any financial documents relating to the sales and advertising of goods sold under the COLORWORX Mark. Doc. #29. In this respect, Ennis continues to employ abusive, dilatory litigation tactics against the applicant.

Reconsideration Issue 23: Pursuant to Fed. R. Civ. P. 11(b)(1), (b)(2), and (b)(3), the applicant submits that the Board has clearly fallen into error and/or clearly abused its discretion by violating the applicant's due process rights under the Due Process Clause of the Fifth Amendment to the Constitution by failing to follow the correct adjudication procedures in arriving at each of the decisions it has made (or failed to make), which will likely have the effect of depriving the applicant of property to be produced under the COLOR WARS Mark. The Fifth Amendment commands the federal government that "No person shall be...deprived of life, liberty, or *property*, without due process of law..." (emphasis added). U.S. Constitution, Amendment 5. By failing to consider the applicant's legal submissions and state any or any sufficient reasons for decision, the Board has violated the APA 5 U.S.C. § 557(c)(3) and the Due Process Clause of the Fifth Amendment to the Constitution. *See every Reconsideration Issue herein.* Pursuant to Fed. R. Civ. P. 11(b)(1), (b)(2), and (b)(3), the applicant submits that the current inaccessibility of the Due Process Clause of the Fifth Amendment to the

Constitution foreign citizens is, in the context of trademark law, bad law. As a matter of federal, public and economic policy, foreign nationals wishing to trade in the United States should be granted due process rights as trademark applicants or opposers consistent with their American counterparts, which would promote trade with foreign nations, which in turn would stimulate investment in the American economy. See, e.g., Jeffrey Schott and Cathleen Cimino, “Crafting a Trade and Investment Partnership: What Can Be Done,” Policy Brief 13-8, Peterson Institute for International Economics, March 2013. The applicant further relies on the USPTO policy concern to prevent abusive litigation tactics used by corporations which bully individual applicants and small businesses, especially foreign applicants acting pro se, who may lack the knowledge about American trademark law or resources to engage legal counsel to defend their legal rights. *Report to Congress*, at 1.

PRAYER: For the above reasons, the applicant’s motion for reconsideration of the Board’s decision denying the applicant’s motion to compel should be granted and the Board should compel the opposer to respond to the relevant Interrogatories and Requests for Production, without objection and within 30 days of the Board’s order. The applicant also seeks a further and more definite statement of all documents in the opposer’s privilege log dated August 27, 2012, and a privilege log of all documents over which Ennis claims privilege from August 27, 2012 to the date of the Board’s decision on the reconsideration, as well as *production* of those documents. The Board, as the administrative appellate arm of the USPTO, has “a responsibility to do something to discourage or prevent aggressive trademark litigation tactics” and should write a decision condemning Ennis’s conduct, as particularized herein. *Report to Congress*, at 20.

Dated: December 10, 2013

Respectfully submitted,

By: /Joel Beling/

Joel L. Beling, 1 Mirboo Court, Dallas, Victoria, 3047, Australia

Applicant

EXHIBITS³

³ The exhibits attached to the motion are included pursuant to Fed. R. Civ. P. 11(b)(1), (b)(2), and (b)(3); on the basis that the opposer referred to the applicant's "meet and confer" letters in its Reply (Doc. #37) which reference the documents shown in some of the Exhibits; on the basis that failure to consider the Exhibits would be a clear abuse of discretion contrary to public and USPTO policy against abusive litigation tactics and protecting the rights of pro se applicants and small businesses against corporations represented by specialist intellectual property legal counsel; on the basis that they are *necessary* enlargements of the record in the interests of justice as particularized herein and in the applicant/petitioner's petition for disqualification dated 10 December, 2013, filed herewith.

**OPPOSER'S OBJECTIONS AND RESPONSES TO
APPLICANT'S FOURTH REQUEST FOR ADMISSIONS**

To: Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, 1 Mirboo Court, Dallas, Victoria 3047, Australia.

Pursuant to Rule 36 of the Federal Rules of Civil Procedure, Ennis, Inc. ("Opposer") hereby serves its Objections and Responses to Applicant's Fourth Request for Admissions on Joel L. Beling d/b/a Supa Characters Pty Ltd ("Applicant").

**I.
OBJECTIONS APPLICABLE TO ALL
ADMISSIONS, INSTRUCTIONS AND DEFINITIONS**

Opposer agrees to respond to Applicant's Fourth Request for Admissions to the extent that Opposer is required to do so by the Federal Rules of Civil Procedure and the applicable case law, and to the extent that such are not otherwise objectionable.

Opposer objects to Applicant's Fourth Request for Admissions to Opposer and its attendant definitions and instructions to the extent they purport to differ from or expand the requirements of the Federal Rules of Civil Procedure and the Trademark Rules (37 C.F.R. Part 2).

Opposer objects to Applicant's Fourth Request for Admissions to Opposer to the extent the definitions and instructions purport to assign to the words therein defined meanings other than those in common usage. Opposer will use the commonly accepted definition of words and phrases in answering the Interrogatories.

Opposer hereby objects to all of the above-referenced definitions in each and every request in which they are used as if objected to on the above-stated basis individually, and Opposer responds to all Admissions listed below subject to, and without waiving, the above-stated objections.

II. OBJECTIONS AND RESPONSES TO REQUEST FOR ADMISSIONS

REQUEST NO. 99: All of the contents in Opposer's 2000 Annual Report are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only as of the date of the document referenced in this Request and to the extent the document referenced in this Request is identical to any public disclosure made by Opposer; otherwise, Denied.

REQUEST NO. 100: All of the contents in Opposer's 2001 Annual Report are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only as of the date of the document referenced in this Request and to the extent the document referenced in this Request is identical to any public disclosure made by Opposer; otherwise, Denied.

REQUEST NO. 101: All of the contents in Opposer's 2002 Annual Report are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only as of the date of the document referenced in this Request and to the extent the document referenced in this Request is identical to any public disclosure made by Opposer; otherwise, Denied.

REQUEST NO. 102: All of the contents in Opposer's 2003 Annual Report are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only as of the date of the document referenced in this Request and to the extent the document referenced in this Request is identical to any public disclosure made by Opposer; otherwise, Denied.

REQUEST NO. 103: All of the contents in Opposer's 2004 Annual Report are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only as of the date of the document referenced in this Request and to the extent the document referenced in this Request is identical to any public disclosure made by Opposer; otherwise, Denied.

REQUEST NO. 104: All of the contents in Opposer's 2005 Annual Report are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only as of the date of the document referenced in this Request and to the extent the document referenced in this Request is identical to any public disclosure made by Opposer; otherwise, Denied.

REQUEST NO. 105: All of the contents in Opposer's 2006 Annual Report are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only as of the date of the document referenced in this Request and to the extent the document referenced in this Request is identical to any public disclosure made by Opposer; otherwise, Denied.

REQUEST NO. 106: All of the contents in Opposer's 2007 Annual Report are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only as of the date of the document referenced in this Request and to the extent the document referenced in this Request is identical to any public disclosure made by Opposer; otherwise, Denied.

REQUEST NO. 107: All of the contents in Opposer's 2008 Annual Report are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only as of the date of the document referenced in this Request and to the extent the document referenced in this Request is identical to any public disclosure made by Opposer; otherwise, Denied.

REQUEST NO. 108: All of the contents in Opposer's 2009 Annual Report are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only as of the date of the document referenced in this Request and to the extent the document referenced in this Request is identical to any public disclosure made by Opposer; otherwise, Denied.

REQUEST NO. 109: All of the contents in Opposer's 2010 Annual Report are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only as of the date of the document referenced in this Request and to the extent the document referenced in this Request is identical to any public disclosure made by Opposer; otherwise, Denied.

REQUEST NO. 110: All of the contents in Opposer's 2011 Annual Report are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only as of the date of the document referenced in this Request

and to the extent the document referenced in this Request is identical to any public disclosure made by Opposer; otherwise, Denied.

REQUEST NO. 111: All of the contents in Opposer's 2012 Annual Report are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only as of the date of the document referenced in this Request and to the extent the document referenced in this Request is identical to any public disclosure made by Opposer; otherwise, Denied.

REQUEST NO. 112: All of Opposer's responses to Applicant's Discovery Requests in this document are true and correct in every particular.

RESPONSE: Opposer objects to this Request because it is ambiguous, vague and overbroad as it fails to properly identify specific "responses" and specific "Applicant's Discovery Requests." Moreover, Opposer objects to this Request to the extent it limits Opposer's rights to supplement its discovery responses in accordance with Federal Rules of Civil Procedure and the Trademark Rules (37 C.F.R. Part 2) in the event such responses are found to be inaccurate.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that "Opposer's responses to Applicant's Discovery Requests in this document" means the objections and responses to Applicant's Fourth Request for Admissions to Opposer contained herein; otherwise, Denied because this Request does not provide sufficient detail for Opposer to admit or deny this Request beyond the foregoing response. Opposer reserves the right to supplement its responses in the event such responses are found to be inaccurate.

REQUEST NO. 113: Opposer would like to change some of its responses to Applicant's previous Discovery Requests.

RESPONSE: Opposer objects to this Request because seeks information that is protected from discovery by the attorney-client, attorney work product and party communication exemptions. In addition, Opposer objects to this Request because it is ambiguous, vague and overbroad as it fails to properly identify specific "responses" and specific "Applicant's previous Discovery Requests." Moreover, Opposer objects to this Request to the extent it limits Opposer's rights to supplement its discovery responses in accordance with Federal Rules of Civil Procedure and the Trademark Rules (37 C.F.R. Part 2) in the event such responses are found to be inaccurate.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Deny only to the extent that "its responses to Applicant's previous Discovery Requests" means Opposer's Objections and Responses to Applicant's First Request for Admissions (June 11, 2012), Opposer's Objections and Answers to Applicant's First Set of Interrogatories (June 11, 2012), Opposer's

Objections and Response to Applicant's First Request for Production, Opposer's Objections and Responses to Applicant's Second Request for Admissions (July 25, 2012), Opposer's Objections and Responses to Applicant's Third Request for Admissions (August 13, 2012); otherwise, Denied because this Request does not provide sufficient detail for Opposer to admit or deny this Request beyond the foregoing response. Opposer reserves the right to supplement its responses in the event such responses are found to be inaccurate.

REQUEST NO. 114: At the time it made its Discovery responses to Applicant's previous Discovery requests, Opposer was aware that its responses and/or answers were on oath.

RESPONSE: Opposer objects to this Request because it is ambiguous, vague and overbroad as it fails to properly identify specific "Discovery responses" and specific "Applicant's previous Discovery Requests."

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that the Federal Rules of Civil Procedure and the Trademark Rules (37 C.F.R. Part 2) require discovery responses and/or answers to be made under oath, and "its responses and/or answers" to "Applicant's previous Discovery requests" means Opposer's Objections and Answers to Applicant's First Set of Interrogatories (June 11, 2012); otherwise, Denied because this Request does not provide sufficient detail for Opposer to admit or deny this Request beyond the foregoing response.

REQUEST NO. 115: All of the documents certified by Mr. Scott A. Myer, Ennis Inc.'s attorney, in this proceeding under the Federal Rules of Civil Procedure have contained true and correct responses or answers in every particular.

RESPONSE: Opposer objects to this Request because it is ambiguous, vague and overbroad as it fails to properly identify specific documents and fails to define what "certified by Mr. Scott A. Myer, Ennis Inc.'s attorney, in this proceeding" means. Moreover, Opposer objects to this Request to the extent it limits Opposer's rights to supplement its discovery responses and answers in accordance with Federal Rules of Civil Procedure and the Trademark Rules (37 C.F.R. Part 2) in the event such responses and answers are found to be inaccurate.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that "All of the documents certified by Mr. Scott A. Myer" means that Mr. Scott A. Meyer signed a Certificate of Service certifying that a true and correct copy of Opposer's discovery responses were served on Applicant, and "responses and answers" means Opposer's Objections and Responses to Applicant's First Request for Admissions (June 11, 2012), Opposer's Objections and Answers to Applicant's First Set of Interrogatories (June 11, 2012), Opposer's Objections and Response to Applicant's First Request for Production (June 11, 2012), and Opposer's Objections and Responses to Applicant's Second Request for Admissions (July 25, 2012); otherwise, Denied because this Request does not provide sufficient detail for Opposer to admit or deny this Request beyond the foregoing response. Opposer reserves the right to supplement its responses and answers in the event such responses and answers are found to be inaccurate.

REQUEST NO. 116: All of the documents certified by Mr. Thomas G. Jacks, Ennis Inc.'s attorney, in this proceeding under the Federal Rules of Civil Procedure have contained true and correct responses or answers in every particular.

RESPONSE: Opposer objects to this Request because it is ambiguous, vague and overbroad as it fails to properly identify specific documents and fails to define what "certified by Mr. Thomas G. Jacks, Ennis Inc.'s attorney, in this proceeding" means. Moreover, Opposer objects to this Request to the extent it limits Opposer's rights to supplement its discovery responses and answers in accordance with Federal Rules of Civil Procedure and the Trademark Rules (37 C.F.R. Part 2) in the event such responses and answers are found to be inaccurate.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that "documents certified" means that Mr. Thomas G. Jacks signed a Certificate of Service certifying that a true and correct copy of Opposer's discovery responses were served on Applicant, and "responses and answers" means Opposer's Objections and Responses to Applicant's Third Request for Admissions (August 13, 2012); otherwise, Denied because this Request does not provide sufficient detail for Opposer to admit or deny this Request beyond the foregoing response. Opposer reserves the right to supplement its responses and answers in the event such responses and answers are found to be inaccurate.

REQUEST NO. 117: All of the documents overseen or managed by Mr. Edwin Flores, Ennis Inc.'s attorney, in this proceeding under the Federal Rules of Civil Procedure have contained true and correct responses or answers in every particular.

RESPONSE: Opposer objects to this Request because it seeks information that is protected from discovery by the attorney-client, attorney work product and party communication exemptions. In addition, Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Moreover, Opposer objects to this Request because it is ambiguous, vague and overbroad in that it does not properly identify specific "documents overseen or managed by Mr. Edwin Flores, Ennis Inc.'s attorney, in this proceeding." Furthermore, Opposer objects to this Request to the extent it limits Opposer's rights to supplement its discovery responses and answers in accordance with Federal Rules of Civil Procedure and the Trademark Rules (37 C.F.R. Part 2) in the event such responses and answers are found to be inaccurate.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot admit or deny this Request without disclosing information (e.g., documents that may or may not have been overseen or managed by an attorney, etc.) that is protected from discovery by the attorney-client, attorney work product and party communication exemptions; otherwise, Opposer refers Applicant to Opposer's responses to Request Nos. 112, 113, 115 and 116 above.

REQUEST NO. 118: All of your responses to Applicant's Interrogatories under the Federal Rules of Civil Procedure have contained true and correct answers in every particular.

RESPONSE: Opposer objects to this Request because it is harassing and duplicative of Request Nos. 113, 115 and 116 above. In addition, Opposer objects to this Request because it is ambiguous, vague and overbroad in that it fails to properly identify specific “responses” and specific “Applicant’s Interrogatories.” Moreover, Opposer objects to this Request to the extent it limits Opposer’s rights to supplement its discovery responses and answers in accordance with Federal Rules of Civil Procedure and the Trademark Rules (37 C.F.R. Part 2) in the event such answers are found to be inaccurate.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that “your responses to Applicant’s Interrogatories” means Opposer’s Objections and Answers to Applicant’s First Set of Interrogatories (June 11, 2012); otherwise, Denied because this Request does not provide sufficient detail for Opposer to admit or deny this Request beyond the foregoing response. Opposer reserves the right to supplement its responses and answers in the event such answers are found to be inaccurate.

REQUEST NO. 119: At the time you gave your answers to Applicant’s Interrogatories, you were aware that your answers were on oath pursuant to Rule 33(b)(3) of the Federal Rules of Civil Procedure.

RESPONSE: Opposer objects to this Request because it is harassing and duplicative of Request No. 114 above. In addition, Opposer objects to this Request because it is ambiguous, vague and overbroad in that it fails to properly identify specific “answers” and specific “Applicant’s Interrogatories.” Moreover, Opposer objects to this Request to the extent it limits Opposer’s rights to supplement its discovery responses and answers in accordance with Federal Rules of Civil Procedure and the Trademark Rules (37 C.F.R. Part 2) in the event such answers are found to be inaccurate.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that “your answers to Applicant’s Interrogatories” means Opposer’s Objections and Answers to Applicant’s First Set of Interrogatories (June 11, 2012); otherwise, Denied because this Request does not provide sufficient detail for Opposer to admit or deny this Request beyond the foregoing response. Opposer reserves the right to supplement its responses and answers in the event such answers are found to be inaccurate.

REQUEST NO. 120: At the time he certified each of your documents served on applicant and the Board in this proceeding, Mr. Thomas G. Jacks was aware that he could be subjected to sanctions for answers or responses which failed to comply with Fed. R. Civ. P. 11.

RESPONSE: Opposer objects to this Request because it seeks information that is protected from discovery by the attorney-client, attorney work product and party communication exemptions. In addition, Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Moreover, Opposer objects to this Request because it is ambiguous, vague and overbroad in that it fails to identify specific documents or define what “certified each of your documents” means.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that Thomas G. Jacks was aware of Fed. R.

Civ. P. 11 and Rule 11(d) states “This rule does not apply to disclosures and discovery requests, responses, objections, and motions under Rules 26 through Rule 37”, and “certified each of your documents” and “answers or responses” mean that Mr. Thomas G. Jacks signed a Certificate of Service certifying that a true and correct copy of Opposer’s Objections and Responses to Applicant’s Third Request for Admissions (August 13, 2012) was served on Applicant; otherwise, Denied because this Request does not provide sufficient detail for Opposer to admit or deny this Request beyond the foregoing response.

REQUEST NO. 121: At the time he certified each of your documents served on applicant and the Board in this proceeding, Mr. Scott. A. Myer was aware that he could be subjected to sanctions for answers or responses which failed to comply with Fed. R. Civ. P. 11.

RESPONSE: Opposer objects to this Request because it seeks information that is protected from discovery by the attorney-client, attorney work product and party communication exemptions. In addition, Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Moreover, Opposer objects to this Request because it is ambiguous, vague and overbroad in that it fails to identify specific documents or define what “certified each of your documents” means.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that Scott A. Meyer was aware of Fed. R. Civ. P. 11 and Rule 11(d) states “This rule does not apply to disclosures and discovery requests, responses, objections, and motions under Rules 26 through Rule 37”, and “certified each of your documents” and “answers or responses” mean that Mr. Scott A. Meyer signed a Certificate of Service certifying that a true and correct copy of Opposer’s Objections and Responses to Applicant’s First Request for Admissions (June 11, 2012), Opposer’s Objections and Answers to Applicant’s First Set of Interrogatories (June 11, 2012), Opposer’s Objections and Response to Applicant’s First Request for Production (June 11, 2012), and Opposer’s Objections and Responses to Applicant’s Second Request for Admissions (July 25, 2012) were served on Applicant; otherwise, Denied because this Request does not provide sufficient detail for Opposer to admit or deny this Request beyond the foregoing response.

REQUEST NO. 122: At the time he managed or oversaw the certifications of each of your documents served on applicant and the Board in this proceeding, Mr. Edwin Flores was aware that he could be subjected to sanctions for answers or responses which failed to comply with Fed. R. Civ. P. 11.

RESPONSE: Opposer objects to this Request because it seeks information that is protected from discovery by the attorney-client, attorney work product and party communication exemptions. In addition, Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Moreover, Opposer objects to this Request because it is ambiguous, vague and overbroad in that it does not properly identify specific “documents” or define what “certifications of each of your documents” means.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that Mr. Edwin Flores was aware of Fed. R.

Civ. P. 11 and Rule 11(d) states “This rule does not apply to disclosures and discovery requests, responses, objections, and motions under Rules 26 through Rule 37”; otherwise, Opposer cannot admit or deny this Request without disclosing information (e.g., documents or certifications that may or may not have been managed or overseen by an attorney, etc.) that is protected from discovery by the attorney-client, attorney work product and party communication exemptions.

REQUEST NO. 123: You are is in the business of manufacturing, designing, and selling business forms and other printed business products primarily to distributors located in the United States.

RESPONSE: Opposer objects to this Request because it is overbroad, vague, and ambiguous as it is not limited to Opposer’s COLORWORX mark.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted.

REQUEST NO. 124: For many decades since its creation in 1909, Ennis Inc. was one of the nation’s leaders in the manufacture of business forms.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposer’s predecessor was created in 1909 and Opposer manufactures business forms; otherwise, Denied as worded.

REQUEST NO. 125: Your name was at one stage Ennis Business Forms.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that at one time Opposer’s name was Ennis Business Forms, Inc; otherwise, Denied as worded.

REQUEST NO. 126: You then changed your name to Ennis, dropping the words “Business Forms.”

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposer’s name was changed to Ennis, Inc.; otherwise Denied as worded.

REQUEST NO. 127: Since the digital age began, however, you became aware that your core business, that is, the manufacture of standardized business forms, was becoming obsolete.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposer no longer solely manufactures standardized business forms; otherwise, Denied as worded.

REQUEST NO. 128: The drop in your profits caused by the gradual obsolescence of your standardized forms business was a major blow to your business.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted to the extent Opposer is unable to offset the obsolescence of its standardized business forms, it will be unable to increase sales and profits; otherwise, Denied as worded.

REQUEST NO. 129: In order to offset the decreases in profits because of the obsolescence of your standardized business forms products, you were eager to provide products which offered custom and color print jobs.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposer no longer solely manufactures standardized business forms and currently provides custom and color print jobs; otherwise, Denied as worded.

REQUEST NO. 130: Improvements in the cost and quality of printing technology were enabling some of your competitors to gain access to products of complex design and functionality at competitive costs.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted.

REQUEST NO. 131: Your competitors' access to improved printing technologies was one factor which forced you to provide products and services which satisfy customers' short run color needs in order to enable your distributors to attract new customers and retain existing customers.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to

Opposer's COLORWORX mark. The "short run color needs" of Ennis Inc's customers is irrelevant to this matter and, therefore, Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer admits competitors' have access to improved printing technologies and it provides products and services which satisfy customers' short run color needs in order to enable distributors to attract new customers and retain existing customers; otherwise, Denied as worded.

REQUEST NO. 132: You faced the following challenges in the Print Segment of your business: transformation of your portfolio of products; excess production capacity and price competition within our industry; and economic uncertainties.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer admits that it faces the following challenges: transformation of its portfolio of products, excess production capacity and price competition within our industry, and continued economic uncertainties; otherwise, Denied as worded.

REQUEST NO. 133: Because of the need to transform its portfolio of products, excess production capacity and price competition within your industry, and economic uncertainties, it was necessary for you to take risks in order to gain a competitive edge.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer admits that it faces the following challenges: transformation of its portfolio of products, excess production capacity and price competition within our industry, and continued economic uncertainties; otherwise, Denied as worded.

REQUEST NO. 134: Because of the need to transform your portfolio of products, excess production capacity and price competition within its industry, and economic uncertainties, it was necessary for you to introduce new products within a short amount of time in order to enable its distributors to attract new customers and retain existing customers.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to

Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer admits it provides products and services which satisfy customers' needs in order to enable distributors to attract new customers and retain existing customers; otherwise, Denied as worded.

REQUEST NO. 135: You aimed to transform your product offerings to continue to provide innovative, unique and valuable solutions to your customers on a proactive basis.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposer endeavors to proactively provide innovative, unique and valuable solutions to its customers; otherwise, Denied as worded.

REQUEST NO. 136: But you did not always achieve the goal of transforming your product offerings to continue to provide innovative, unique and valuable solutions to your customers on a proactive basis.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied as worded.

REQUEST NO. 137: It was not always possible for you to expand your growth targeted products and develop new market niches.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied as worded.

REQUEST NO. 138: As a result of intense competition in the printing industry and declining profits in the Print Segment, you were more willing to take risks in developing custom and color print jobs.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to

Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent the words and phrases in this Request are taken from Opposer's discovery, documents, publications or website content, and only to the extent such words and phrases are used in context at the time the discovery, documents, publications or website content was created; otherwise, Denied as worded.

REQUEST NO. 139: Your Print Segment faced intense competition to gain market share since your competition has often followed a strategy of selling their products at or below cost in order to cover some amount of fixed costs, especially in distressed economic times.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted.

REQUEST NO. 140: You felt threatened by the competition posed by low price, high value office supply chain stores which offer standardized business forms, checks and related products.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted to the extent low price, high value office supply chain stores offer standardized business forms, checks and related products at competitive prices; otherwise, Denied as worded.

REQUEST NO. 141: There is intense competition in the printing industry with respect to the sale of presentation products.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent the words and phrases in this Request are taken from Opposer's discovery, documents, publications or website content, and only to the extent such words and phrases are used in context at the time the

discovery, documents, publications or website content was created; otherwise, Denied as worded.

REQUEST NO. 142: Because of the threat posed by low price, high value office supply chain stores, you were eager to provide products and services which satisfy customers' short run color needs in order to enable your distributors to attract new customers and retain existing customers.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer admits it provides products and services which satisfy customers' short run color needs in order to enable distributors to attract new customers and retain existing customers; otherwise, Denied as worded.

REQUEST NO. 143: Your COLORWORX brand and design was one solution developed by you to meet its short run color needs.

RESPONSE: The "short run color needs" of Ennis Inc's distributors is irrelevant to this matter and, therefore, Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent the words and phrases in this Request are taken from Opposer's discovery, documents, publications or website content, and only to the extent such words and phrases are used in context at the time the discovery, documents, publications or website content was created; otherwise, Denied as worded.

REQUEST NO. 144: Goods and services you sold under your "COLORWORX" brand were originally designed to serve the short run color needs of your distributors.

RESPONSE: The "short run color needs" of Ennis Inc's distributors is irrelevant to this matter and, therefore, Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent the words and phrases in this Request are taken from Opposer's discovery, documents, publications or website content, and only to the extent such words and phrases are used in context at the time the discovery, documents, publications or website content was created; otherwise, Denied as worded.

REQUEST NO. 145: You have used the slogan "Uniqueness is the mark of success" in relation to your business.

RESPONSE: Opposer objects to this Request because it is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent the words and phrases in this Request are taken from Opposer's discovery, documents, publications or website content, and only to the extent such words and phrases are used in context at the time the discovery, documents, publications or website content was created; otherwise, Denied as worded.

REQUEST NO. 146: You have used the slogan "Uniqueness is the mark of success" in relation to your business when you knew when you applied for and obtained the trademark registration for the COLORWORX mark with the United States Patent and Trademark Office that other traders use the marks "ColorWorx," "Color Worx," "Colorworks," and/or "Color Works" marks in commerce in general and/or in the printing industry in particular in the United States.

RESPONSE: Opposer objects to this Request because it is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 147: Goods and services you sold under the "COLORWORX" brand are currently designed to serve the short run color needs of your distributors and private printers.

RESPONSE: The "short run color needs" of Ennis Inc's distributors is irrelevant to this matter and, therefore, Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer admits it sells goods and services under the "COLORWORX" mark to serve the needs of its distributors and private printers; otherwise, Denied as worded.

REQUEST NO. 148: The downturn in the economy and turmoil in the credit markets in 2009 and 2010 have created highly competitive conditions in the printing industry in an already over-supplied, price-competitive industry.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted.

REQUEST NO. 149: The recessionary conditions of 2009 and 2010, and the resultant volatile and challenging economic climate had an adverse effect on your business.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer admits as a result of the recessionary conditions of 2009 and 2010, the economic climate has been volatile and challenging; otherwise, Denied as worded.

REQUEST NO. 150: As a result of the recessionary conditions of 2009 and 2010, and the resultant volatile and challenging economic climate, you were willing to take calculated risks in order to combat decreased demand and intense price competition.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent the words and phrases in this Request are taken from Opposer's discovery, documents, publications or website content, and only to the extent such words and phrases are used in context at the time the discovery, documents, publications or website content was created; Opposer admits as a result of the recessionary conditions of 2009 and 2010, the economic climate has been volatile and challenging; otherwise, Denied as worded.

REQUEST NO. 151: Judging on net sales data in the Printing Segment for the 2011, 2010 and 2009 fiscal years, you were not able, in the 2010 and 2011 fiscal years, to successfully combat the combined effect of the economic recession and the adoption of digital technologies.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent the words and phrases in this Request are taken from Opposer's discovery, documents, publications or website content, and only to the extent such words and phrases are used in context at the time the discovery, documents, publications or website content was created; otherwise, Denied as worded.

REQUEST NO. 152: The private printers and/or distributors you sell your goods and services to in the United States possess specialized knowledge of the printing business, since they sell printed goods and printing services to their own customers.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent the words and phrases in this Request are taken from Opposer's discovery, documents, publications or website content, and only to the extent such words and phrases are used in context at the time the discovery, documents, publications or website content was created; otherwise, Denied as worded.

REQUEST NO. 153: Basing an Opposition to Applicant's COLOR WARS mark on your COLORWORX logo and design was an action of bad faith by you because you knew that Registrant's distributors and private printers are not everyday consumers or members of the public, but professional, experienced printers who have worked in the printing industry for many years.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)1.

REQUEST NO. 154: At the time you signed the oath for application to register your Colorworx Mark and the design element, there was in fact another use of the same or a confusingly similar design element, namely the red circle and gray "X" design used by the Xerox Corporation (www.xerox.com), which also offers printing goods and services and is one of the leaders in the printing industry.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "the red circle and gray 'X' design" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 155: In your Response to Office Action dated September 11, 2006, you described your crosshairs logo as an "X."

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer admits the statement “. . . the design portion of the mark is stylized so that the cross-hairs of the target design resemble the letter ‘X’ of the word portion of the Applicant’s mark” is stated in the Response to Office Action dated September 11, 2006; otherwise, Denied as worded.

REQUEST NO. 156: You first used the design element in your COLORWORX mark in August 2002.

RESPONSE: Admitted that Opposer’s mark COLORWORX was first used at least as early as August 2002.

REQUEST NO. 157: At the time you signed the oath in your application to register the COLORWORX mark and the design element, the Xerox Corporation had legal rights in the COLORWORX mark superior to yours in its “X” design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “its design element” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge about alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 158: The Xerox Corporation has been in business in the United States since 1906.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer’s COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge about alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 159: The Xerox company’s use of its red circle and gray “X” design predates your use of the design in your COLORWORX Mark.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Opposer objects to this Request because “the red circle and gray ‘X’ design” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 160: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that the Xerox Corporation had rights in the “X” design superior to yours, and either believed that a likelihood of confusion would result from your use of its mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “the ‘X’ design” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 161: Both your and Xerox’s design elements contain Xs and there is an obvious likelihood of confusion.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “Xerox’s design elements” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted to the extent that some of Xerox’s marks contain X’s; Denied as to any obvious likelihood of confusion.

REQUEST NO. 162: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose the above alleged facts to the USPTO, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “above alleged facts” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)2.

REQUEST NO. 163: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another of the same or a confusingly similar mark at the time the oath

was signed, namely, the crosshairs design used by the Four Colour Print Group (www.fourcolour.com), which also offers printing goods and services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “the crosshairs design” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 164: At the time you signed the oath in your application to register the COLORWORX mark and the design element, the Four Colour Print Group had legal rights in the COLORWORX mark superior to yours in its design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “its design element” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 165: The Four Colour Print Group has been in business in the United States since 1985.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer’s COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 166: The Four Colour Print Group’s use of its design element predates your use of your design.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “its design element” and “your design” are vague and ambiguous as they are not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 167: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that the Four Colour Print Group had rights in the crosshairs design superior to yours, and either believed that a likelihood of confusion would result from applicant's use of its mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “crosshairs design” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 168: Both your and the Four Colour Print Group’s design elements contain crosshairs logos and there is an obvious likelihood of confusion.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “design elements” and “crosshairs logos” are vague and ambiguous as they are not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied as to any obvious likelihood of confusion. Opposer cannot otherwise truthfully admit or deny the remainder of this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded..

REQUEST NO. 169: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose the above alleged facts to the USPTO, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “above alleged facts” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)3.

REQUEST NO. 170: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark design element, namely, the crosshairs design used by Spectrum Color Printing & Mailing (www.spectrumcolorprinting.com).

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “crosshairs design” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded..

REQUEST NO. 171: Spectrum Color Printing & Mailing also offers printing goods and services identical to registrant’s such as flyers, brochures, booklets, posters, rack cards and doorhangers.

RESPONSE: Opposer objects to this Request because it is overbroad, vague, and ambiguous because it does not limit the request to Opposer’s COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded..

REQUEST NO. 172: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Spectrum Color Printing & Mailing had legal rights in the design element superior to yours and you either believed that a likelihood of confusion would result from your use of its mark or had no reasonable basis for believing otherwise

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “design element” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied as to any belief that a likelihood of confusion would result from Opposer’s use of its mark at the time Opposer signed the oath in Opposer’s

application to register the COLORWORX mark. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 173: Spectrum Color Printing & Mailing has been in business in the United States since 1985.

RESPONSE: Opposer objects to this Request because it assumes facts not in evidence, is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 174: Spectrum Color Printing's use of its design element predates your use of the design element in the COLORWORX Mark.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "design element" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 175: Both your and Spectrum Color Printing & Mailing's design elements contain crosshairs logos and there is an obvious likelihood of confusion.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "design elements" and "crosshairs logos" are vague and ambiguous as they are not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied as to any belief that a likelihood of confusion. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts

regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded..

REQUEST NO. 176: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “design elements” and “these facts” are vague and ambiguous as they are not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)4.

REQUEST NO. 177: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark design element, namely, the circle and “X” design used by the Microsoft Corporation (www.xbox.com).

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “circle and ‘X’ design” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 178: The Microsoft Corporation is one of the leaders in the computing industry.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny the remainder of this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 179: Your presentation products are based on digital and computing technology.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent Opposer offers products based on digital and computing technology, and to the extent the words and phrases in this Request are taken from Opposer's discovery, documents, publications or website content, and only to the extent such words and phrases are used in context at the time the discovery, documents, publications or website content was created; otherwise, Denied as worded.

REQUEST NO. 180: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that the Microsoft Corporation had rights in the design portion of your COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of the design portion or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 181: The Microsoft Corporation has sold its X-box brand in the United States since 2001.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 182: Microsoft's use of its design element predates Registrant's use of its design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "its design element" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 183: Both your and Microsoft's design elements contain circles and Xs and there is an obvious likelihood of confusion.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “Microsoft’s design elements” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted to the extent some of Microsoft’s marks appear to contain some circles or Xs; otherwise, Denied as to any obvious likelihood of confusion.

REQUEST NO. 184: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “these facts” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)5.

REQUEST NO. 185: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark design element, namely, the crosshairs logo used by Smartpress.com (www.smartpress.com), which offers printing products similar to Registrant.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “crosshairs logo” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 186: Smartpress.com has sold its printing goods and services under the crosshairs design in the United States prior to August 2002.

RESPONSE: Opposer objects to this Request because it is overbroad, vague, and ambiguous because it does not limit the request to Opposer’s COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “crosshairs design” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 187: Smartpress.com's use of its crosshairs design element predates Registrant's use of its design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "crosshairs design element" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 188: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Smartpress.com had rights in the design element of your mark superior to yours, and either believed that a likelihood of confusion would result from your use of the mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 189: Both your and Smartpress.com's design elements contain crosshairs logos and there is an obvious likelihood of confusion.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "Smartpress.com's design elements" and crosshairs logos are vague and ambiguous as they are not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied as to any obvious likelihood of confusion. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 190: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “design elements” and “these facts” are vague and ambiguous as they are not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)6.

REQUEST NO. 191: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the mark “COLORWORKS” (<http://colorworksnyc.com/>), used in commerce by a New York company specializing in “Prints, Postcards, and Retouching.”

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 192: You have alleged on oath that you works in the printing industry and produce postcards.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “alleged on oath that you works” is vague and ambiguous as it is not defined or described with sufficient detail and not limited to Opposer’s COLORWORX mark.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposer is in the printing industry and produce postcards.

REQUEST NO. 193: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Mr. Barna had legal rights in the COLORWORX Mark superior to yours in that he has been using his COLROWORKS mark since approximately the early 1980s.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 194: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Mr. Barna had rights in the COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of your COLORWORX mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 195: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “these facts” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)7.

REQUEST NO. 196: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the mark “COLORWORX” used in commerce by Creative Hairdressers Inc.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 197: Creative Hairdressers Inc., on November 25, 1998, filed an Application to register the word COLORWORX with the USPTO, and was assigned serial number 75595803.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that the USPTO TESS records indicate that U.S. Trademark Application Serial Number 75595803 for the mark COLORWORX was filed by Creative Hairdressers Inc. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 198: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Creative Hairdressers Inc had legal rights in the COLORWORX mark superior to yours in that its goods and services were similar and/or closely related to your services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 199: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Creative Hairdressers Inc had rights in the COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of the COLORWORX mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 200: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “these facts” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)8.

REQUEST NO. 201: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of “COLORWORKS” owned by Clariant AG Corporation Switzerland.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 202: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Clariant AG Corporation had legal rights to the COLORWORX mark superior to yours, in that it was the owner of Registration No.2783206 with respect to plastic coloration.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2783206 for the mark COLORWORKS is owned by Clariant AG Corporation Switzerland. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 203: Plastic coloration is similar and/or closely related to your services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “services” is vague and ambiguous as it is not defined or described with sufficient detail, and because it is overbroad, vague, and ambiguous as it is not limited to Opposer’s COLORWORX mark.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 204: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Clariant AG Corporation had rights in the COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of the COLORWORX mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 205: Clariant AG Corporation's mark was registered on November 11, 2003, earlier than your registration date for your COLORWORX mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "AG Corporation's mark" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposers COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2783206 for the mark COLORWORKS registered on November 11, 2003, was registered to Clariant AG Corporation. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 206: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "these facts" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)9.

REQUEST NO. 207: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of "COLORWORKS" owned by New Order Organizers LLC.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 208: At the time you signed the oath in your application to register the COLORWORX mark and the design element, New Order Organizers LLC had legal rights in the COLORWORX mark superior to yours, in that it used the COLORWORKS mark in commerce prior to your first use with respect to the almost identical printed goods which you, including storage and organization systems comprising binders, folders, stickers, labels, adhesive notes.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 209: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that New Order Organizers LLC had rights in the COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of the COLORWORX mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 210: New Order Organizers LLC mark was registered on June 2, 2009 (Registration No.3632494).

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 3632494 for the mark COLORWORKS was registered to New Order Organizers LLC on June 2, 2009. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties.

Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 211: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “these facts” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)10.

REQUEST NO. 212: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of “COLORWORKS” owned by Horizon International Inc.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 213: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Horizon International Inc had legal rights in the COLORWORX mark superior to yours, in that it was the owner of Registration No.2615133 with respect to apparatus, tools and machine tools.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2615133 for the mark COLORWORKS was registered to Horizon International Inc. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 214: Apparatus, tools and machine tools are similar and/or closely related to Registrant's services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer is unable to admit or deny this Request as the Request is not comprehensible; otherwise, Denied.

REQUEST NO. 215: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Horizon International Inc had rights in the COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of its mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 216: Horizon International Inc mark was registered on September 3, 2002 with a filing date of October 17, 2001, earlier than your registration date for your COLORWORX mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "Horizon International Inc mark" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposers COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2615133 for the mark COLORWORKS registered on September 3, 2002, was registered to Horizon International Inc. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 217: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "these facts" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)11.

REQUEST NO. 218: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of “GALLERY COLORWORKS” owned by Tacony Corporation.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 219: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Tacony Corporation had legal rights in the COLORWORX mark superior to yours, in that it was the owner of Registration No.2524890 with respect to computer software in relation to embroidering.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2524890 for the mark GALLERY COLORWORKS was registered to Tacony Corporation. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded..

REQUEST NO. 220: Computer software in relation to embroidering is similar and/or closely related to your services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial, and because it is overbroad, vague, and ambiguous as it is not limited to Opposer’s COLORWORX mark.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer is unable to admit or deny this Request as the Request is not comprehensible; otherwise, Denied.

REQUEST NO. 221: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Tacony Corporation had rights in the COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of the COLORWORX mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 222: Tacony Corporation's mark was registered on January 1, 2002, with a filing date of February 5, 2001, earlier than your registration date for your COLORWORX mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "Tacony Corporation's mark" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposers COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2524890 for the mark GALLERY COLORWORKS registered on January 1, 2002, was registered to Tacony Corporation. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 223: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "these facts" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)12.

REQUEST NO. 224: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of "COLORWORKS" owned by Duncan Enterprises Corporation.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 225: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Duncan Enterprises Corporation had legal rights in the COLORWORX mark superior to yours, in that first used the mark in commerce with respect to an instructional book for children in class 16.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “the mark” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 226: An instructional book for children in class 16 is similar and/or closely related to your services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial, and because it is overbroad, vague, and ambiguous as it is not limited to Opposer’s COLORWORX mark.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 227: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Duncan Enterprises Corporation had rights in the COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of the COLORWORX mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 228: Duncan Enterprises Corporation's mark was first used in commerce in approximately May 2000, earlier than Registrant's registration date for your COLORWORX mark and the design element and alleged first use in commerce.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "Duncan Enterprises Corporation's mark" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposers COLORWORX mark registered on January 22, 2008, and to the extent the USPTO TESS records indicate that the COLORWORKS mark in U.S. Trademark Application Serials No. 76052896 alleges a date of first use of May 2000. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 229: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "these facts" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)13.

REQUEST NO. 230: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of "COLOR WORKS" owned by Sherwin-Williams Automotive Finishes Corporation.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and

the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded..

REQUEST NO. 231: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Sherwin-Williams Automotive Finishes Corporation had legal rights in the COLORWORX mark superior to yours, in that it was the owner of Registration No.2453770 with respect to display racks for paint color cards.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2453770 for the mark COLOR WORKS was registered to Sherwin-Williams Automotive Finishes Corporation. Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 232: Display racks for paint color cards are similar and/or closely related to Registrant's services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 233: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Sherwin-Williams Automotive Finishes Corporation had rights in the COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of the COLORWORX mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 234: Sherwin-Williams Automotive Finishes Corporation's mark was registered on May 22, 2001, earlier than Registrant's registration date for the COLORWORX mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Opposer objects to this Request because “Sherwin-Williams Automotive Finishes Corporation’s mark” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposers COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2453770 for the mark COLOR WORKS registered on May 22, 2001 to Sherwin-Williams Automotive Finishes Corporation. Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 235: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “these facts” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)14.

REQUEST NO. 236: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of “COLORWORKS” owned by Sherwin-Williams Automotive Finishes Corporation.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 237: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Sherwin-Williams Automotive Finishes Corporation had legal rights in the COLORWORX mark superior to yours, in that it was the owner of Registration No.2476288 with respect to paint color cards.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2476288 for the mark COLOR WORKS was registered to Sherwin-Williams Automotive Finishes Corporation. Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 238: Paint color cards are similar and/or closely related to Registrant's services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 239: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Sherwin-Williams Automotive Finishes Corporation had rights in the COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of the COLORWORX mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 240: Sherwin-Williams Automotive Finishes Corporation's mark was registered on March 28, 2000, earlier than Registrant's registration date for the COLORWORX mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "Sherwin-Williams Automotive Finishes Corporation's mark" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposers COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2476288 for the mark COLOR WORK registered on March 28, 2000, was registered to Sherwin-Williams Automotive

Finishes Corporation. Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 241: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “these facts” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)15.

REQUEST NO. 242: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of “COLOR WORKS” owned by Deandra K. Vallier (Serial No. 75617896).

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted to the extent that the USPTO TESS records indicate that U.S. Trademark Application Serial Number 75617896 for the mark COLOR WORKS was filed by Deandra K. Vallier. Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 243: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Deandra K. Vallier had legal rights in the COLORWORX mark superior to yours, in that she used her mark on cosmetic eye drops.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 244: Cosmetic eye drops are similar and/or closely related to your services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial, and because it is overbroad, vague, and ambiguous as it is not limited to Opposer's COLORWORX mark.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 245: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Deandra K. Vallier had rights in the mark superior to yours, and either believed that a likelihood of confusion would result from your use of the COLORWORX mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "the mark" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 246: Deandra K. Vallier's COLOR WORKS mark was filed on January 12, 1999, earlier than Registrant's registration date for your COLORWORX mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposers COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Application Serial Number 75617896 for the mark COLOR WORKS was filed on January 12, 1999 by Deandra K. Vallier. Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 247: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "these facts" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)16.

REQUEST NO. 248: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of “COLOR WORKS” owned by Mars Inc.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded..

REQUEST NO. 249: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Mars Inc. had legal rights in the COLORWORX mark superior to yours, in that it was the owner of Registration No.2451486 with respect to candy vending machines.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2451486 for the mark COLOR WORKS is owned by Mars, Incorporated. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 250: Candy vending machines are similar and/or closely related to your services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial, and because it is overbroad, vague, and ambiguous as it is not limited to Opposer’s COLORWORX mark.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 251: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Mars Inc. had rights in the COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of the COLORWORX mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 252: Mars Inc.'s mark was registered on May 15, 2001, earlier than Registrant's registration date for its COLORWORX mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "Mars Inc.'s mark" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposer's COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2451486 for the mark COLOR WORKS was registered on May 15, 2001 to Mars, Incorporated. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 253: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "these facts" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)17.

REQUEST NO. 254: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of "COLORWORKS" owned by Tarkett Inc.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of

alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 255: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Tarkett Inc. had legal rights in the COLORWORX mark superior to yours, in that it was the owner of Registration No.2313535 with respect to sheet vinyl and vinyl tile flooring.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that the USPTO TESS records indicate that Tarkett Inc. was the owner of U.S. Trademark Registration No. 2313535 for the mark COLORWORKS. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 256: Sheet vinyl and vinyl tile flooring are similar and/or closely related to your services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial, and because it is overbroad, vague, and ambiguous as it is not limited to Opposer's COLORWORX mark.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 257: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Tarkett Inc. had rights in the COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of the COLORWORX mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 258: Tarkett Inc.'s mark was registered on February 1, 2000, earlier than your registration date for the COLORWORX mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "Tarkett Inc.'s mark" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposers COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate U.S. Trademark Registration No. 2313535 for the mark COLORWORKS registered on February 1, 2000 to Tarkett, Inc. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 259: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “these facts” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)18.

REQUEST NO. 260: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of “COLORWORKS” owned by Mars Inc.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 261: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Mars Inc. had legal rights in the COLORWORX mark superior to yours, in that it was the owner of Registration No.2103537 with respect to candy.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that the USPTO TESS records indicate that Mars, Incorporated was the owner of U.S. Trademark Registration No. 2103537 for the mark COLORWORKS. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or

knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 262: Candy is similar and/or closely related to your services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial, and because it is overbroad, vague, and ambiguous as it is not limited to Opposer's COLORWORX mark.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 263: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Mars Inc. had rights in the COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of the COLORWORX mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 264: Mars Inc.'s mark was registered on October 7, 1997, earlier than Registrant's registration date for its COLORWORX mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposer's COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Registration No. 2103537 for the mark COLORWORKS registered to Mars, Incorporated on October 7, 1997. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 265: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "these facts" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)19.

REQUEST NO. 266: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of “COLORWORKS” owned by Mars Inc.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 267: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Mars Inc. had legal rights in the COLORWORX mark superior to yours, in that it was the owner of Registration No.2115953 with respect to display cases for candy products

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that the USPTO TESS records indicate that Mars, Incorporated was the owner of U.S. Trademark Registration No. 2115953 for the mark COLORWORKS. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 268: Display cases for candy products are similar and/or closely related to Registrant’s services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 269: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Mars Inc. had legal rights in the COLORWORX mark superior to yours and you either believed that a likelihood of confusion would result from your use of its mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied as to any belief that a likelihood of confusion would result from Opposer's use of its mark at the time Opposer signed the oath in Opposer's application to register the COLORWORX mark. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 270: Mars Inc.'s mark was registered on November 25, 1997, earlier than Registrant's registration date for its COLORWORX mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "Mars Inc.'s design" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposer's COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Registration No. 2115953 for the mark COLORWORKS registered on November 25, 1997 to Mars, Incorporated. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 271: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "these facts" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)20.

REQUEST NO. 272: At the time you signed the oath for application to register its COLORWORX and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of "COLOR WORKS" owned by Deandra K. Vallier (Serial No. 75463213).

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that the USPTO TESS records indicate that U.S. Trademark Application Serial Number 75463213 for the mark COLORWORKS was filed by Deandra K. Vallier. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 273: At the time You signed the oath in your application to register the COLORWORX mark and the design element, Deandra K. Vallier had legal rights in the COLORWORX mark superior to yours, in that she used her mark on ophthalmic preparations, which are similar and/or closely related to Registrant's services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied to the extent ophthalmic preparations, are alleged to be similar and/or closely related to Registrant's services. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 274: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Deandra K. Vallier had rights in the COLORWORX mark superior to yours, and either believed that a likelihood of confusion would result from your use of the mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 275: Deandra K. Vallier mark was filed on April 6, 1998, earlier than Registrant's registration date for its COLORWORX mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "Deandra K. Vallier mark" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposer's COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Application Serial Number 75463213 for the mark COLOR WORKS was filed by Deandra K. Vallier on April 6, 1998. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 276: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "these facts" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)21.

REQUEST NO. 277: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark to your COLORWORX mark (excluding the design element), namely, the use in commerce of "COLORWORKS" owned by Owens-Corning Fibreglass Technology Inc.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded..

REQUEST NO. 278: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Owens-Corning Fibreglass Technology Inc. had legal rights in the COLORWORX mark superior to yours, in that it used its mark in commerce with respect to computer programs for use in selecting color schemes for the exterior of a house, and roofing shingles, vinyl siding and non-metal windows and doors.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded..

REQUEST NO. 279: Computer programs for use in selecting color schemes for the exterior of a house, and roofing shingles, vinyl siding and non-metal windows and doors are similar and/or closely related to your services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial, and because it is overbroad, vague, and ambiguous as it is not limited to Opposer's COLORWORX mark.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 280: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Owens-Corning Fibreglass Technology Inc. had rights in the COLROWORX mark (excluding the design element) superior to yours, and you either believed that a likelihood of confusion would result from your use of its mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 281: Owens-Corning Fibreglass Technology Inc. mark was filed on January 13, 1997 (serial number 75224752), earlier than Registrant's registration date for its COLORWORX mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "Owens-Corning Fibreglass Technology Inc. mark" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposers COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Application Serial Number 75224752 for the mark COLORWORKS was filed on January 13, 1997 by Owens-Corning Fiberglass Technology Inc. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or

readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 282: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “these facts” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)22.

REQUEST NO. 283: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark (excluding the design element), namely, the use in commerce of “COLORWORKS” owned by Colorworks Collegiate Painters Inc.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 284: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Colorworks Collegiate Painters Inc had legal rights in the COLORWORKS Mark superior to yours, in that it was the owner of Registration No.2210089 with respect to painting services, which are similar and/or closely related to Registrant’s services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2210089 for the mark COLORWORKS indicates Colorworks Collegiate Painters, Inc. is the owner. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 285: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Colorworks Collegiate Painters Inc had rights in the COLORWORKS mark superior to yours, and either believed that a likelihood of confusion would result from your use of the mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 286: Colorworks Collegiate Painters Inc's mark was registered on December 15, 1998, earlier than your registration date for the COLORWORX mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "Colorworks Collegiate Painters Inc's mark" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposers COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2210089 for the mark COLORWORKS registered on December 15, 1998 to Colorworks Collegiate Painters, Inc. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 287: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "these facts" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)23.

REQUEST NO. 288: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark at the time the

oath was signed, namely, the use in commerce of “COLORWORKS” owned by Colorworks Film Graphics Corporation.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 289: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Colorworks Film Graphics Corporation had legal rights in the COLORWORX mark superior to yours in the word COLORWORKS, in that it was the owner of Registration No. 2349187 with respect to computer generated color prints, which are similar and/or closely related to your services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2349187 for the mark COLORWORKS indicates FLM Graphics Corporation is the owner. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 290: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Colorworks Film Graphics Corporation had rights in the COLORWORKS mark superior to yours, and either believed that a likelihood of confusion would result from your use of the mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 291: Colorworks Film Graphics Corporation’s mark was registered on May 16, 2000, earlier than the registration date for your COLORWORX Mark and the design element.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “Colorworks Film Graphics Corporation’s mark” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposers COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2349187 for the mark COLORWORKS registered on May 16, 2000 to FLM Graphics Corporation. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 292: At the time you signed the oath to register your COLORWORX mark and design, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “these facts” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied

IV(A)24.

REQUEST NO. 293: At the time you signed the oath for application to register your Colorworx and design trademark, there was in fact another use of the same or a confusingly similar mark to your COLORWORX mark (excluding the design element), namely, the use in commerce of “COLORWORKS” owned by Circle of Beauty Inc.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 294: You have stated on oath that you invented the word COLORWORX, the word having no meaning prior to your adoption of it.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent the words and phrases in this Request are taken from Opposer’s discovery, documents, publications or website content, and only to the extent such words and phrases are used in context at the time the

discovery, documents, publications or website content was created; otherwise, Denied as worded.

REQUEST NO. 295: The existence of Circle of Beauty Inc.'s COLORWORKS mark is evidence to rebut the claim that you invented the word COLORWORX.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 296: At the time you signed the oath in your application to register the COLORWORX mark and the design element, Circle of Beauty Inc. had legal rights in the COLORWORX mark superior to yours, in that it was the owner of Registration No.2000638 with respect to cosmetics, which are similar and/or closely related to Registrant's services.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied as to the allegation that cosmetics are similar and/or closely related to Registrant's services. Admitted only to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2000638 for the mark COLORWORKS indicates Circle of Beauty, Inc. is the owner. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 297: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that Circle of Beauty Inc. had rights in the COLORWORX mark (excluding the design element) superior to yours, and either believed that a likelihood of confusion would result from your use of its mark or had no reasonable basis for believing otherwise

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 298: Circle of Beauty Inc.'s mark was registered on 17 September 1996, earlier than your registration date for the COLORWORX mark plus design.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because "Circle of Beauty Inc.'s mark" is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted that Opposers COLORWORX mark registered on January 22, 2008, and to the extent that the USPTO TESS records indicate that U.S. Trademark Registration Number 2000638 for the mark COLORWORKS registered on September 17, 1996 to Circle of Beauty, Inc. Opposer cannot otherwise truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of the data contained in the USPTO TESS records and alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 299: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “these facts” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

IV(A)25.

REQUEST NO. 300: At the time you signed the oath for application to register the Colorworx and design trademark, there was in fact another use of the same or a confusingly similar COLORWORX mark and design at the time the oath was signed, namely, the mark “COLORWORX” and design used in commerce by a Canadian printing company run by President and CEO, Shawn Barrett, which offers the identical services as you.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 301: Mr Barrett’s company uses the slogan “Whether it be print, web design, logo creation, typesetting or branding, Colorworx is the only place you need to contact...With more than 10 years experience in the industry, our knowledge allows our clients to leave their projects in our hands and trust that they will be completed to the highest level of satisfaction”).

RESPONSE: Opposer objects to this Request because it is overbroad, vague, and ambiguous because it does not limit the request to Opposer’s COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 302: Mr Barrett's company uses the tagline "Printing made easy" (www.colorworx.ca).

RESPONSE: Opposer objects to this Request because it is overbroad, vague, and ambiguous because it does not limit the request to Opposer's COLORWORX mark. Opposer further objects to the request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admitted only to the extent the tagline "Printing made easy" appears on the website www.colorworx.ca. Opposer cannot truthfully admit or deny the remainder of this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 303: At the time you signed the oath in your application to register the COLORWORX mark and the design element, the Californian print company using the word COLORWORX and design had legal rights in the COLORWORX mark superior to yours, insofar as this company had been using its COLORWORX mark and design for more than 10 years.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer cannot truthfully admit or deny this Request because Opposer does not have sufficient information or knowledge to admit or deny the truth of alleged facts regarding third parties. Opposer has made a reasonable inquiry and the information known to or readily obtainable by Opposer is insufficient to admit or deny this Request as worded.

REQUEST NO. 304: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you knew that the Californian print company had rights in the COLORWORX mark and design superior to yours, and either believed that a likelihood of confusion would result from your use of its mark or had no reasonable basis for believing otherwise.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 305: At the time you signed the oath in your application to register the COLORWORX mark and the design element, you, in failing to disclose these facts to the U.S. Patent and Trademark Office, intended to deceive the USPTO and procure a registration to which you were not entitled.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer objects to this Request because “these facts” is vague and ambiguous as it is not defined or described with sufficient detail.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied.

REQUEST NO. 306: Your answer to the following Interrogatory, dated July 13, 2012, is **not** true and correct in every particular:

INTERROGATORY NO. 8: Describe in detail how the compound word “COLORWORX” in your registration differs from the words “Color Works” in terms of meaning, appearance, sound and commercial impression.

ANSWER: The mark “COLORWORX” differs from the words “Color Works” in terms of meaning, appearance, sound and commercial impression because the mark “COLORWORX” is a neologism and had no meaning prior to its adoption by Registrant.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied. Opposer reserves the right to supplement its response.

REQUEST NO. 307: The following legal submission which you made to the Trademark Trial and Appeal Board in your Reply in Support of Motion to Dismiss, dated September 16, 2012, is inconsistent with your claim that “the mark ‘COLORWORX’ is a neologism and had no meaning prior to its adoption” by you:

General trademarking principals maintain that once a mark has been abandoned, the mark returns to the public domain and may be appropriated for use by other actors in the marketplace in accordance with basic rules of trademark priority. See 15 U.S.C. § 1115(b)(2); ITC Ltd. v. Punchgini, Inc., 482 F.3d 135, 147 (2d Cir. 2007). Once Creative Hairdresser’s, Inc. abandoned its mark in the year 2000, nearly eight (8) years before the USPTO issued a registration for the Mark, Registrant and all other persons and entities seeking to use such word mark were free to use the term “Colorworx” in commerce on or in connection with their goods or services [Doc. #19 ¶ 20].

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Denied. Opposer reserves the right to supplement its response.

REQUEST NO. 308: Your answer to the following Request for Production, dated June 11, 2012, is **not** true and correct in every particular:

REQUEST 6: Produce copies of complaints or petitions in any action filed by or against You in which the allegations are similar to those of this suit.

RESPONSE: Opposer objects to this Request as Applicant has equal or greater access to the complaint or petition filed in Joel L. Beling d/b/a Supa Characters Pty Ltd v. Ennis, Inc.; Cancellation No. 92055374.

RESPONSE: Opposer objects to this Request because it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial.

Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Admit only to extent the response does not identify Ennis, Inc. v. Pioneer Supply Company, Inc., Opposition No. 91203773, which Applicant has equal access. Opposer will supplement its responses.

Dated: June 28, 2013

**OPPOSER'S OBJECTIONS AND ANSWERS
TO APPLICANT'S SECOND SET OF INTERROGATORIES**

To: Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, 1 Mirboo Court, Dallas, Victoria 3047, Australia.

Ennis, Inc. ("Opposer") serves these objections and answers to Applicant, Joel L. Beling d/b/a Supa Characters Pty Ltd's, Second Set of Interrogatories ("Applicant") as authorized by Federal Rule of Civil Procedure 33 and Trademark Rule 2.120(d), 37 C.F.R. § 2.120(d).

I.
OBJECTIONS APPLICABLE TO ALL
INTERROGATORIES, INSTRUCTIONS AND DEFINITIONS

Opposer agrees to answer Applicant's Interrogatories to the extent that Opposer is required to do so by the Federal Rules of Civil Procedure and the applicable case law, and to the extent that such are not otherwise objectionable.

Opposer objects to the definitions and instructions set forth in Applicant's First Set of Interrogatories to the extent that it purports to assign to the words therein defined meanings other than those in common usage. Opposer will use the commonly accepted definition of words and phrases in answering the Interrogatories.

Opposer hereby objects to all of the above-referenced definitions in each and every Interrogatory in which they are used as if objected to on the above-stated basis individually, and Opposer answers all Interrogatories listed below subject to, and without waiving, the above-stated objections.

II.
OBJECTIONS AND ANSWERS TO INTERROGATORIES

INTERROGATORY NO. 20:

Which of your answers to my Discovery Requests in this consolidated proceeding are **not** true and correct in every particular?

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer answers as follows: all answers to discovery are true and correct to the best of the knowledge of person verifying such answers.

INTERROGATORY NO. 21:

Identify each person who has participated in or contributed to answering my Discovery Requests to you in this consolidated proceeding, including the present Discovery Requests.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer answers as follows:

Scott A. Meyer
Thomas G. Jacks
Daniel J. Chalker
Steven Osterloh

INTERROGATORY NO. 22:

For each of your answers to Requests 93-98 (inclusive) in my Third Request for Admissions (in document dated August 13, 2012), identify each person who participated in or contributed to giving the answers.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer answers as follows:

Scott A. Meyer
Thomas G. Jacks
Steven Osterloh

INTERROGATORY NO. 23:

Identify each person who participated in or contributed to giving your answer to the following Interrogatory, dated July 13, 2012:

INTERROGATORY NO. 8: Describe in detail how the compound word “COLORWORX” in your registration differs from the words “Color Works” in terms of meaning, appearance, sound and commercial impression.

ANSWER: **The mark “COLORWORX” differs from the words “Color Works” in terms of meaning, appearance, sound and commercial impression because the mark “COLORWORX” is a neologism and had no meaning prior to its adoption by Registrant.**

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer answers as follows:

Scott A. Meyer
Thomas G. Jacks
Steven Osterloh

INTERROGATORY NO. 24:

Identify each person who participated in or contributed to making the following legal submission to the Trademark Trial and Appeal Board, which was filed by you in your Reply in Support of Motion to Dismiss, dated September 16, 2012:

General trademarking principals maintain that once a mark has been abandoned, the mark returns to the public domain and may be appropriated for use by other actors in the marketplace in accordance with basic rules of trademark priority. See 15 U.S.C. § 1115(b)(2); ITC Ltd. v. Punchgini, Inc., 482 F.3d 135, 147 (2d Cir. 2007). Once Creative Hairdresser’s, Inc. abandoned its mark in the year 2000, nearly eight (8) years

before the USPTO issued a registration for the Mark, Registrant and all other persons and entities seeking to use such word mark were free to use the term “Colorworx” in commerce on or in connection with their goods or services [Doc. #19 ¶ 20].

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer answers as follows:

Scott A. Meyer
Thomas G. Jacks
Steven Osterloh

INTERROGATORY NO. 25:

You have given some conflicting answers in previous discovery requests as to how exactly you created your COLORWORX mark and the design element. Once and for all, describe in detail how you created your COLORWORX mark and the design element?

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

INTERROGATORY NO. 26:

What is Scott A. Myer’s (Ennis Inc’s attorney) complete understanding of the certification standards when filing documents under the Federal Rules of Civil Procedure in Trademark Trial and Appeal Board opposition or cancellation proceedings?

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

INTERROGATORY NO. 27:

What is Thomas G. Jacks’s (Ennis Inc’s attorney) complete understanding of the certification standards when filing documents under the Federal Rules of Civil Procedure in Trademark Trial and Appeal Board opposition or cancellation proceedings?

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

INTERROGATORY NO. 28:

What is Edwin Flores’ (Ennis Inc’s attorney) complete understanding of the certification standards when filing documents under the Federal Rules of Civil Procedure in Trademark Trial and Appeal Board opposition or cancellation proceedings?

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

INTERROGATORY NO. 29:

Identify each person who participated in or contributed to giving your answer to the following Request for Production, dated June 11, 2012:

REQUEST 6: Produce copies of complaints or petitions in any action filed by or against You in which the allegations are similar to those of this suit.

RESPONSE: Opposer objects to this Request as Applicant has equal or greater access to the complaint or petition filed in Joel L. Beling d/b/a Supa Characters Pty Ltd v. Ennis, Inc.; Cancellation No. 92055374.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer answers as follows:

Scott A. Meyer
Thomas G. Jacks
Steven Osterloh

OPPOSER'S OBJECTIONS AND ANSWERS TO
APPLICANT'S SECOND SET OF INTERROGATORIES

PAGE 7

VERIFICATION

STATE OF TEXAS

§

§

COUNTY OF ELLIS

§

BEFORE ME, the undersigned Notary Public, on this day personally appeared Steven Osterloh, who being by me duly sworn on his oath deposed and stated follows:

1. My name is Steven Osterloh. I am over the age of 21 years old, have never been convicted of a felony or crime of moral turpitude, and am fully qualified to make this affidavit.

2. I am the Vice President of Marketing of Ennis, Inc. In that capacity, I am duly qualified and authorized in all respects to make this affidavit.

3. I have read the above and foregoing Opposer's Objections and Answers to Applicant's Second Set of Interrogatories, and every statement contained in that document is within my personal knowledge and is true and correct.

STEVEN OSTERLOH, Affiant

SUBSCRIBED AND SWORN TO BEFORE ME on this 27 day of June, 2013, to certify which witness my hand and official seal.

Mr. Beling,

First, any discovery extension would have to be mutual. So, we would oppose any motion that is one-sided. Second...

Moreover, since your discovery requests to date has been overly broad in their scope going well past the specific issues before the Board, which constitutes harassment, we will file a motion for a protective order if you serve any additional discovery on my client (emphasis added). So, we see no need to extend the discovery deadline and we will oppose any motion to extend the deadlines.

We disagree with your characterizations of my client's responses to your discovery. However, we are in the process of reviewing my client's responses to your discovery requests and will voluntarily supplement them in the next couple of weeks...

Thank you,
Daniel

Subject: RE: Opposition No. 91203884; Cancellation No. 92055374

Mr Chalker,

I intend to file a motion to the Board to extend the discovery period for me but not for your client for the original length of the discovery period given your client's egregious failure to comply and co-operate with my discovery requests. I write as part of my "meet and confer" requirements under the Trademark Rules. As a general matter, does your client intend on producing any further material to me voluntarily (it has only produced product samples, advertisements and my COLOR WARS prosecution history)? Does it intend on amending any of its Interrogatory answers or answers to my Requests for Admission? I envisage it will take about 3 months to go through all of your client's dishonest, evasive or incomplete responses.

Please advise.

Thank you.

Mr Beling

Ennis, Inc.

Opposer

v.

Joel L. Beling d/b/a Supa Characters Pty Ltd

Applicant

Opp. No. 91203884

OPPOSER'S THIRD SUPPLEMENT TO INITIAL DISCLOSURES

To: Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, 1 Mirboo Court, Dallas,
Victoria 3047, Australia.

In accordance with the Federal Rules of Civil Procedure, Ennis, Inc. ("Opposer") hereby submits its Opposer's Third Supplement to Initial Disclosures to Joel L. Beling d/b/a Supa Characters Pty Ltd ("Applicant") as required by Federal Rule of Civil Procedure 26(a)(1), local rule and/or order of the Trademark Trial and Appeal Board ("Board").

A. Individuals with Discoverable Information

1. The names, addresses (work and home), and telephone numbers (work and home) of individuals likely to have discoverable information – along with the subject matter of that information - that Opposer may use to support its claims or defenses are:

The following person(s) or entities may have discoverable information that the Opposer may use to support its position. While these person(s) or entities may have discoverable information, it

makes no representations as to its intent to rely upon this information in this action. Furthermore, Opposer has not yet determined the witnesses to be called in this action, and will make those disclosures pursuant to the Board's further orders.

Applicant; knowledge of Applicant's business operations, attempted registration of and use of the infringing mark COLOR WARS in commerce.

B. Relevant Documents & Tangible Things

2. In addition to any documents attached and identified as exhibits to Opposer's Notice of Opposition, the following is a list of documents, data compilations, and tangible things in Opposer's possession, custody, or control, described by category and location, that Opposer may use to support its claims or defenses:

Documents evidencing the use of "COLORWORX" mark in commerce.

Documents evidencing the products and services offered by Opposer utilizing the "COLORWORX" mark.

Documents evidencing the geographic area where the "COLORWORX" mark is used.

Documents evidencing filings with the USPTO related to Registration No. 3,372,884 ("COLORWORX").

Documents evidencing filings with the USPTO related to Applicant's Application for the Mark "COLOR WARS".

Documents produced by ENNIS, INC. in this matter.

Please note that Opposer's investigation and case preparation are ongoing, continuing efforts and that Opposer therefore reserves its rights to use any relevant documents subsequently obtained or prepared, and any such non-privileged documents will be produced. Further, Opposer makes no representations as to its intent to rely upon any of these disclosed documents in this action, and will make the disclosures of said documents as per the Board's future order.

C. Information Related to Calculation of Damages

3. All non-privileged documents used in computing each category of damages claimed by Opposer.

Opposer refers Applicant to the documents produced pursuant to paragraph B(2). Further, as this case is ongoing and the damages continue to accrue and because it is anticipated that additional documents will be obtained through the discovery process, any additional non-privileged documents used in computing each category of damages claimed by Opposer will be produced as a supplement to this initial disclosure as required by Federal Rule of Civil Procedure 26(a)(1), local rule and/or order of the Trademark Trial and Appeal Board.

D. Insurance

4. Any insurance agreement under which an insurance business may be liable.

Not applicable.

Dated: August 19, 2013

OPPOSER'S SECOND SET OF INTERROGATORIES TO APPLICANT

To: Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, 1 Mirboo Court, Dallas, Victoria 3047, Australia.

Ennis, Inc. ("Opposer") serves these interrogatories on Joel L. Beling d/b/a Supa Characters Pty Ltd ("Applicant") as authorized by Federal Rule of Civil Procedure 33 and Trademark Rule 2.120(d), 37 C.F.R. § 2.120(d). Applicant must serve an answer to each Interrogatory separately and fully, in writing and under oath, within 30 days after service.

DEFINITIONS AND INSTRUCTIONS

The following terms have the following meanings, unless the context requires otherwise:

1. “Opposer” and/or “Ennis” as well as a party’s full or abbreviated name or a pronoun referring to a party, means the party, and where applicable, the party’s agents, representatives, officers, directors, employees, partners, corporate agents, subsidiaries, affiliates, or any other person acting in concert with the party or under the party’s control, whether directly or indirectly, including any attorney.

2. “You” or “your” means Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, as well as its agents, employees, and all other persons acting on behalf of Applicant or its successors, predecessors, heirs, beneficiaries or assigns.

3. “Communication” means the transmittal of information in the form of facts, ideas, inquiries, or otherwise.

4. “Identify (person).” When referring to a person, “identify” means to give, to the extent known, the person’s full name, present or last known address, telephone number, and, when referring to a natural person, the present or last known place of employment. Once a person has been identified in compliance with this paragraph, only the name of that person needs to be listed in response to later discovery requesting the identification of that person.

5. “Identify (document).” When referring to a document, “identify” means to give, to the extent known, the following information: (a) the type of document; (b) the general subject matter of the document; (c) the date of the document; (d) the authors, addressees, and recipients of the document; (e) the location of the document; (f) the identity of the person who has custody of the document; and (g) whether the document has been destroyed, and if so, (i) the date of its destruction, (ii) the reason for its destruction, and (iii) the identity of the person who destroyed it.

6. “Any” should be understood in either its most or its least inclusive sense as necessary to bring within the scope of the discovery request all responses that might otherwise be construed to be outside of its scope.

7. “And/Or.” The connectives “and” and “or” should be construed either disjunctively or conjunctively as necessary to bring within the scope of the discovery request all responses that might otherwise be construed to be outside of its scope.

8. “Number.” The use of the singular form of any word includes the plural and vice versa.

9. “Possession, custody, or control” of an item means that the person either has physical possession of the item or has a right to possession equal or superior to that of the person who has physical possession of the item.

10. “Person” means any natural person, corporation, firm, association, partnership, joint venture, proprietorship, governmental body, or any other organization, business, or legal entity, and all predecessors or successors in interest.

11. “COLOR WARS” defines the mark COLOR WARS, U.S. Trademark Application Serial No. 85/324,443, applied for by Joel L. Beling d/b/a Supa Characters Pty Ltd.

12. “COLORWORX” defines the mark COLORWORX®, U.S. Trademark Registration No. 3,372,884 and includes a variety of printing goods and printing services that are international Class 40 products manufactured and put into the stream of commerce by Ennis, Inc.

13. “Identify” or “describe” when referring to a person, means you must state the following:

- a. The full name.
- b. The present or last known residential address and residential telephone number.
- c. The present or last known office address and office telephone number.
- d. The occupation, job title, employer, and employer’s address at the time of the event or period referred to in each particular interrogatory.
- e. In the case of any entity, identify the officer, employee, or agent most closely connected with the subject matter of the interrogatory and the officer who is responsible for supervising that officer or employee.

14. “Identify” or “describe” when referring to a document, means you must state the following:

- a. The nature (e.g., letter, handwritten note) of the document.
- b. The title or heading that appears on the document.
- c. The date of the document and the date of each addendum, supplement, or other addition or change.
- d. The identity of the author and of the signer of the document, and of the person on whose behalf or at whose request or direction the document was prepared or delivered.
- e. The present location of the document, and the name, address, position or title, and telephone number of the person or persons having custody of the document.

15. “Document” means all written, typed, or printed matter and all magnetic, electronic, or other records or documentation of any kind or description in your actual possession, custody, or control, including those in the possession, custody, or control of any and all present or former directors, officers, employees, consultants, accountants, attorneys, or other agents, whether or not prepared by you, that constitute or contain matters relevant to the subject matter of the action.

16. Wherever in the following interrogatories Applicant is asked to identify documents, it is requested that the documents be identified by stating:

- a. general type of document, *e.g.*, letter, memorandum, report, miscellaneous, notes, etc.;
- b. date;
- c. author;
- d. organization, if any, with which author was connected;
- e. addressee or recipient;

- f. other distributees;
- g. organization, if any, with which addressee or recipient, or distributees were connected;
- h. general nature of the subject matter to extent that Applicant can do so without divulging matter considered by it to be privileged;
- i. present location of such document and each copy thereof known to Applicant, including the title, index number and location, if any, of the file in which the document is kept by the Applicant or the file from which such document was removed, if removed for the purposes of this case, and the identity of all persons responsible for the filing or other disposition of the document.

17. Should Applicant deem to be privileged any documents concerning information which is requested by any of the following interrogatories, Applicant shall list such documents and supply information as requested concerning such documents and additionally shall indicate that they claim privilege therefore, briefly state the nature of the document, the sender, the author, the recipient of each copy, the date, the name of each person to whom the original or any copy was circulated, the names appearing on any circulation list of Applicant associated with such document, a summary statement of the subject matter(s) of such document in sufficient detail to permit the Court to conduct an analysis to reach a determination of any claim of privilege or exclusion and separate indication of the basis for assertion of privilege or the like for each such document.

18. Wherever in the following interrogatories Applicant is asked to identify a product, it is requested that the product be identified by stating the catalog, stock, model or the like number or designation, the trademark, name, type, grade, and any other designation customarily used by the party concerned to designate such product, and to distinguish it from others made by the same or a different producer.

19. Each of the separate interrogatories herein is deemed to seek separate answers and responses as of the date they are answered. However, these interrogatories shall be deemed to be continuing and any additional information relating in any way to these interrogatories and to events occurring or documents existing prior to the filing of the Opposition herein which Applicant acquires or which becomes known to Applicant up to and including the close of discovery shall be furnished to Opposer within a reasonable time after such information is acquired or becomes known. Applicant's response to these interrogatories is to be promptly supplemented to include subsequently acquired information in accordance with the requirements of Fed. R. Civ. P. 26(e).

INTERROGATORIES

INTERROGATORY NO. 18: Identify all facts, laws, information, or materials that provide any evidence that Opposer made any statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX[®] that were a false representation regarding a material fact.

ANSWER:

INTERROGATORY NO. 19: Identify all facts, laws, information, or materials that provide any evidence that any statements made to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX[®] were false.

ANSWER:

INTERROGATORY NO. 20: Identify all facts, laws, information, or materials that provide any evidence that Opposer intended to deceive the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX[®] by making false representations regarding a material fact.

ANSWER:

INTERROGATORY NO. 21: Identify all facts, laws, information, or materials that provide any evidence that the United States Patent and Trademark Office relied on any false representations regarding a material fact made by Opposer in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX[®].

ANSWER:

INTERROGATORY NO. 22: Describe in detail why an amendment of the goods listed in International Class 016 in U.S. Trademark Application Serial No. 85/324,443 for Applicant's mark "COLOR WARS" to specify that the goods are related to, in the field of, about, featuring, in the nature of, concerning, dealing with or directed to "superhero and cartoon characters" is objectionable to You.

ANSWER:

INTERROGATORY NO. 23: Identify all facts, laws, information, or materials that provide any evidence that the combination of design and word elements in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX[®] is generic for printing services.

ANSWER:

INTERROGATORY NO. 24: Identify all facts, laws, information, or materials that provide any evidence that the combination of design and word elements in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® is merely descriptive of Opposer's printing services.

ANSWER:

INTERROGATORY NO. 25: Identify all facts, laws, information, or materials that provide any evidence that the combination of design and word elements in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® describes an ingredient, quality, characteristic, function, feature, purpose or use of Opposer's printing services.

ANSWER:

INTERROGATORY NO. 26: Identify all facts, laws, information, or materials that provide any evidence that the combination of design and word elements in Opposer's mark COLORWORX® is not capable of distinguishing Opposer's printing services.

ANSWER:

OPPOSER’S SECOND REQUEST FOR ADMISSIONS TO APPLICANT

To: Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, 1 Mirboo Court, Dallas, Victoria 3047, Australia.

Pursuant to Rule 36 of the Federal Rules of Civil Procedure, Ennis, Inc. (“Opposer”) hereby serves its First Request for Admissions on Joel L. Beling d/b/a Supa Characters Pty Ltd (“Applicant”), to be answered within thirty (30) days from receipt of these Requests.

A. DEFINITIONS

The following definitions shall have the following meanings, unless the context requires otherwise:

1. “Opposer” and/or “Ennis” as well as a party’s full or abbreviated name or a pronoun referring to a party, means the party, and where applicable, the party’s agents, representatives, officers, directors, employees, partners, corporate agents, subsidiaries, affiliates, or any other person acting in concert with the party or under the party’s control, whether directly or indirectly, including any attorney.

2. “You” or “your” means Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, as well as its agents, employees, and all other persons acting on behalf of Applicant or its successors, predecessors, heirs, beneficiaries or assigns.

3. “Document” means all written, typed, or printed matter and all magnetic, electronic, or other records or documentation of any kind or description in your actual possession, custody, or control, including those in the possession, custody, or control of any and all present or former directors, officers, employees, consultants, accountants, attorneys, or other agents, whether or not prepared by you, that constitute or contain matters relevant to the subject matter of the action.

4. “Possession, custody, or control” of an item means that the person either has physical possession of the item or has a right to possession equal or superior to that of the person who has physical possession of the item.

5. “Person” means any natural person, corporation, firm, association, partnership, joint venture, proprietorship, governmental body, or any other organization, business, or legal entity, and all predecessors or successors in interest.

6. “COLOR WARS” defines the mark COLOR WARS, U.S. Trademark Application Serial No. 85/324,443, applied for by Joel L. Beling d/b/a Supa Characters Pty Ltd.

7. “COLORWORX” defines the mark COLORWORX[®], U.S. Trademark Registration No. 3,372,884 and includes a variety of printing goods and printing services that are international Class 40 products manufactured and put into the stream of commerce by Ennis, Inc.

8. “Identify” or “describe” when referring to a person, means you must state the following:

- a. The full name.
- b. The present or last known residential address and residential telephone number.
- c. The present or last known office address and office telephone number.
- d. The occupation, job title, employer, and employer’s address at the time of the event or period referred to in each particular interrogatory.
- e. In the case of any entity, identify the officer, employee, or agent most closely connected with the subject matter of the interrogatory and the officer who is responsible for supervising that officer or employee.

9. “Identify” or “describe” when referring to a document, means you must state the following:

- a. The nature (e.g., letter, handwritten note) of the document.
- b. The title or heading that appears on the document.
- c. The date of the document and the date of each addendum, supplement, or other addition or change.
- d. The identity of the author and of the signer of the document, and of the person on whose behalf or at whose request or direction the document was prepared or delivered.
- e. The present location of the document, and the name, address, position or title, and telephone number of the person or persons having custody of the document.

B. REQUESTS FOR ADMISSIONS

Admit or deny the following:

REQUEST NO. 33: Applicant's mark "COLOR WARS" refers to superheroes created by Applicant that have superpowers based colors and are trying to conquer the universe by making his or her color the most dominant by erasing the other colors.

RESPONSE:

REQUEST NO. 34: "Superhero and cartoon characters" are specified in twenty-four (24) of the goods listed in International Class 016 in U.S. Trademark Application Serial No. 85/324,443 for Applicant's mark "COLOR WARS."

RESPONSE:

REQUEST NO. 35: Opposer's printing services results in printed paper goods.

RESPONSE:

REQUEST NO. 36: The only alphanumeric differences between Opposer's mark COLORWORX[®] and Applicant's mark "COLOR WARS" are a space after the word "COLOR", the third "O" is changed to an "A", and the "X" is changed to a "S".

RESPONSE:

REQUEST NO. 37: "COLORWORX" and "COLOR WARS" are similar in appearance.

RESPONSE:

REQUEST NO. 38: "COLORWORX" and "COLOR WARS" are similar in sound.

RESPONSE:

REQUEST NO. 39: "COLORWORX" and "COLOR WARS" are similar in commercial impression.

RESPONSE:

REQUEST NO. 40: The buyers who purchase printed services are the same or similar to buyers who purchase paper printed goods.

RESPONSE:

REQUEST NO. 41: The design element (i.e., the portion of the mark excluding the word “COLORWORX”) in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® is not generic for printing services.

RESPONSE:

REQUEST NO. 42: The combination of design and word elements in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® is not generic for printing services.

RESPONSE:

REQUEST NO. 43: The design element (i.e., the portion of the mark excluding the word “COLORWORX”) in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® is not merely descriptive of Opposer’s printing services.

RESPONSE:

REQUEST NO. 44: The combination of design and word elements in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® is not merely descriptive of Opposer’s printing services.

RESPONSE:

REQUEST NO. 45: The design element (i.e., the portion of the mark excluding the word “COLORWORX”) in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® does not describe an ingredient, quality, characteristic, function, feature, purpose or use of Opposer’s printing services.

RESPONSE:

REQUEST NO. 46: The combination of design and word elements in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® does not describe an ingredient, quality, characteristic, function, feature, purpose or use of Opposer’s printing services.

RESPONSE:

REQUEST NO. 47: Applicant has no evidence that the combination of design and word elements in Opposer's mark COLORWORX[®] is generic for printing services.

RESPONSE:

REQUEST NO. 48: Applicant has no evidence that the combination of design and word elements in Opposer's mark COLORWORX[®] is merely descriptive of Opposer's printing services.

RESPONSE:

REQUEST NO. 49: Applicant has no evidence that the combination of design and word elements in Opposer's mark COLORWORX[®] is descriptive of an ingredient, quality, characteristic, function, feature, purpose or use of Opposer's printing services.

RESPONSE:

REQUEST NO. 50: Applicant has no evidence that the combination of design and word elements in Opposer's mark COLORWORX[®] is not capable of distinguishing Opposer's printing services.

RESPONSE:

REQUEST NO. 51: Applicant has no evidence that Opposer made any statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX[®] that were a false representation regarding a material fact.

RESPONSE:

REQUEST NO. 52: Applicant has no evidence that Opposer knew that any statements made to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX[®] were false.

RESPONSE:

REQUEST NO. 53: Applicant has no evidence that Opposer intended to deceive the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® by making false representations regarding a material fact.

RESPONSE:

REQUEST NO. 54: Applicant has no evidence that the United States Patent and Trademark Office relied on any false representations regarding a material fact made by Opposer in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX®.

RESPONSE:

REQUEST NO. 55: Applicant has no evidence that any damage proximately resulted from reliance on any false representations regarding a material fact made by Opposer in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX®.

RESPONSE:

REQUEST NO. 56: If U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® was canceled, Opposer would still have common law trademark rights to the mark “COLORWORX” shown in U.S. Trademark Registration No. 3,372,884.

RESPONSE:

REQUEST NO. 57: The owner of a common law trademark can file a notice of opposition with the U.S. Trademark Trial and Appeal Board.

RESPONSE:

Dated: August 20, 2013

OPPOSER'S SECOND REQUEST FOR PRODUCTION TO APPLICANT

To: Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, 1 Mirboo Court, Dallas, Victoria 3047, Australia.

Ennis, Inc. ("Opposer") serves these Requests for Production on Joel L. Beling d/b/a Supa Characters Pty Ltd ("Applicant") as authorized by Federal Rule of Civil Procedure 34 and Trademark Rule 2.120(d), 37 C.F.R. § 2.120(d).

DEFINITIONS AND INSTRUCTIONS

The following terms have the following meanings, unless the context requires otherwise:

1. "Opposer" and/or "Ennis" as well as a party's full or abbreviated name or a pronoun referring to a party, means the party, and where applicable, the party's agents, representatives, officers, directors, employees, partners, corporate agents, subsidiaries, affiliates, or any other person acting in concert with the party or under the party's control, whether directly or indirectly, including any attorney.

2. “You” or “your” means Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, as well as its agents, employees, and all other persons acting on behalf of Applicant or its successors, predecessors, heirs, beneficiaries or assigns.

3. “Communication” means the transmittal of information in the form of facts, ideas, inquiries, or otherwise.

4. “Identify (person).” When referring to a person, “identify” means to give, to the extent known, the person’s full name, present or last known address, telephone number, and, when referring to a natural person, the present or last known place of employment. Once a person has been identified in compliance with this paragraph, only the name of that person needs to be listed in response to later discovery requesting the identification of that person.

5. “Identify (document).” When referring to a document, “identify” means to give, to the extent known, the following information: (a) the type of document; (b) the general subject matter of the document; (c) the date of the document; (d) the authors, addressees, and recipients of the document; (e) the location of the document; (f) the identity of the person who has custody of the document; and (g) whether the document has been destroyed, and if so, (i) the date of its destruction, (ii) the reason for its destruction, and (iii) the identity of the person who destroyed it.

6. “Any” should be understood in either its most or its least inclusive sense as necessary to bring within the scope of the discovery request all responses that might otherwise be construed to be outside of its scope.

7. “And/Or.” The connectives “and” and “or” should be construed either disjunctively or conjunctively as necessary to bring within the scope of the discovery request all responses that might otherwise be construed to be outside of its scope.

8. “Number.” The use of the singular form of any word includes the plural and vice versa.

9. “Possession, custody, or control” of an item means that the person either has physical possession of the item or has a right to possession equal or superior to that of the person who has physical possession of the item.

10. “Person” means any natural person, corporation, firm, association, partnership, joint venture, proprietorship, governmental body, or any other organization, business, or legal entity, and all predecessors or successors in interest.

11. “COLOR WARS” defines the mark COLOR WARS, U.S. Trademark Application Serial No. 85/324,443, applied for by Joel L. Beling d/b/a Supa Characters Pty Ltd.

12. “COLORWORX” defines the mark COLORWORX®, U.S. Trademark Registration No. 3,372,884 and includes a variety of printing goods and printing services that are international Class 40 products manufactured and put into the stream of commerce by Ennis, Inc.

13. “Identify” or “describe” when referring to a person, means you must state the following:

- a. The full name.
- b. The present or last known residential address and residential telephone number.
- c. The present or last known office address and office telephone number.
- d. The occupation, job title, employer, and employer’s address at the time of the event or period referred to in each particular interrogatory.
- e. In the case of any entity, identify the officer, employee, or agent most closely connected with the subject matter of the interrogatory and the officer who is responsible for supervising that officer or employee.

14. “Identify” or “describe” when referring to a document, means you must state the following:

- a. The nature (e.g., letter, handwritten note) of the document.
- b. The title or heading that appears on the document.
- c. The date of the document and the date of each addendum, supplement, or other addition or change.
- d. The identity of the author and of the signer of the document, and of the person on whose behalf or at whose request or direction the document was prepared or delivered.
- e. The present location of the document, and the name, address, position or title, and telephone number of the person or persons having custody of the document.

15. “Document” means all written, typed, or printed matter and all magnetic, electronic, or other records or documentation of any kind or description in your actual possession, custody, or control, including those in the possession, custody, or control of any and all present or former directors, officers, employees, consultants, accountants, attorneys, or other agents, whether or not prepared by you, that constitute or contain matters relevant to the subject matter of the action.

16. Wherever in the following interrogatories Applicant is asked to identify documents, it is requested that the documents be identified by stating:

- a. general type of document, *e.g.*, letter, memorandum, report, miscellaneous, notes, etc.;
- b. date;
- c. author;
- d. organization, if any, with which author was connected;
- e. addressee or recipient;
- f. other distributees;
- g. organization, if any, with which addressee or recipient, or distributees were connected;
- h. general nature of the subject matter to extent that Applicant can do so without divulging matter considered by it to be privileged;
- i. present location of such document and each copy thereof known to Applicant, including the title, index number and location, if any, of the file in which the document is kept by the Applicant or the file from which such document was removed, if removed for

the purposes of this case, and the identity of all persons responsible for the filing or other disposition of the document.

17. "Relate" or "relating to" as used herein includes, without limitation, referring to, alluding to, responding to, concerning, connected with, commenting on, in respect of, about, regarding, discussing, describing, measuring, reflecting, supporting, analyzing, explaining, constituting, evidencing, or pertaining to.

18. "Privilege." If Applicant relies on any privilege or the work product doctrine in objecting to these Requests or in failing to produce a requested document, please state in the response to the Request that the Applicant is invoking a privilege, specify which privilege or doctrine is being invoked and the nature and reasons supporting the claim of privilege.

19. "Attorney-Client Privilege." If Applicant invokes the attorney-client privilege, please provide the following additional information for each document not disclosed or information withheld, to the extent that providing this information will not destroy the privilege.

- a. the name and job title of the author of the document or communication;
- b. the name and job title of every person who received the document or a copy of it, or who was present when the communication was made or who overheard it;
- c. the relationship between the author(s) and each person who received the document or a copy of it or who was present when the communication was made or who overheard it;
- d. whether the primary purpose of the document or communication was to seek or provide legal advice or services;
- e. the date of the document or communication;
- f. the subject matter(s) addressed in the document or communication;
- g. whether the document or communication was transmitted in confidence; and
- h. a brief statement as to why the document or communication is protected by the attorney-client privilege.

REQUESTS FOR PRODUCTION

REQUEST 40: Produce all documents and things that provide any evidence that the design element (i.e., the portion of the mark excluding the word "COLORWORX") in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® is generic for printing services.

RESPONSE:

REQUEST 41: Produce all documents and things that provide any evidence that the combination of design and word elements in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® is generic for printing services.

RESPONSE:

REQUEST 42: Produce all documents and things that provide any evidence that the design element (i.e., the portion of the mark excluding the word “COLORWORX”) in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® is merely descriptive of Opposer’s printing services.

RESPONSE:

REQUEST 43: Produce all documents and things that provide any evidence that the combination of design and word elements in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® is merely descriptive of Opposer’s printing services.

RESPONSE:

REQUEST 44: Produce all documents and things that provide any evidence that the design element (i.e., the portion of the mark excluding the word “COLORWORX”) in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® describes an ingredient, quality, characteristic, function, feature, purpose or use of Opposer’s printing services.

RESPONSE:

REQUEST 45: Produce all documents and things that provide any evidence that the combination of design and word elements in U.S. Trademark Registration No.

3,372,884 for the mark COLORWORX[®] describes an ingredient, quality, characteristic, function, feature, purpose or use of Opposer's printing services.

RESPONSE:

REQUEST 46: Produce all documents and things that provide any evidence that the combination of design and word elements in Opposer's mark COLORWORX[®] is not capable of distinguishing Opposer's printing services.

RESPONSE:

REQUEST 47: Produce all documents and things that provide any evidence that Opposer made any statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX[®] that were a false representation regarding a material fact.

RESPONSE:

REQUEST 48: Produce all documents and things that provide any evidence that any statements made to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX[®] were false.

RESPONSE:

REQUEST 49: Produce all documents and things that provide any evidence that Opposer intended to deceive the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® by making false representations regarding a material fact.

RESPONSE:

REQUEST 50: Produce all documents and things that provide any evidence that the United States Patent and Trademark Office relied on any false representations regarding a material fact made by Opposer in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX®.

Joel,

I apologize for the late response, I have been out for the holiday. I have attached our deposition rates. Please let me know if you would like to use our services or if you have any questions. I would like to check with you on where in Texas you would need us because I may need to refer you to another firm if the location is too far from us.

Thanks,

Rachel Shrode

Re: Big 5 Trademark

Dear Mr. Beling:

Our office represents Big 5 Sporting Goods, a California corporation with over 400 retail stores located throughout the western part of the United States of America. Our client is the owner of U.S. Trademark Registration No. 1,929,798 for the mark BIG 5 for retail sporting goods and wearing apparel stores and No. 2,749,742 for the mark BIG 5 SPORTING GOODS for retail stores featuring sporting goods and wearing apparel (copies enclosed). Our client's marks are very well-known in this country. Your pending U.S. trademark Application Nos. 85/324,466 and 85/975,778 to register BIG 5 FIVE (plus design) for a wide variety of goods, including hunting related items and clothing, which are sold in our client's stores, has caused our client concern.

The term "Big 5" as used in your trademark applications in combination with the illustrations of the "Big 5" big game animals is not objectionable to our client. Our client is concerned, however, with the way in which your mark might be used. This concern is heightened by the exceedingly large number of goods covered by your application and the nature of those goods. Should you or a licensee of your mark use just the word portion of the mark without the pictorial representations of the "Big 5" animals or sufficient verbiage to clearly indicate a reference to the five big game animals, confusion with our client's well-known name and mark would be very likely. If that were to occur, our client would strenuously object to your use of the Big 5 name and take appropriate action to protect its marks. To prevent such an occurrence, we request that you carefully monitor your use of your mark with our client's rights in mind. While our client believes that careful monitoring will avoid a likelihood of confusion, they also will monitor this situation.

Mr. Joel L. Beling
dba Supa Characters Pty. Ltd.
November 15, 2011

Subject: Big 5 Trademark

Dear Mr Lyon,

Thank you for your letter dated 15 November, 2011.

I advise I am the Director of a superhero licensing company - called Supa Characters Pty Ltd - much like Disney, Marvel and DC Comics.

My interest in the Big Five trademark extends only to superheroes based on the big five game animals in Africa (do a search on the Australia trademark register to confirm my Australian trademarks). Without the animals, my trademark would be useless and unmarketable.

Thus, while I appreciate your client's concern, I believe that we can successfully run our businesses without conflict and interference.

Should you have any queries, please do not hesitate to contact me.

Yours sincerely,

Joel Beling

v.

Joel L. Beling D/B/A Supa Characters Pty Ltd

**PETITION FOR DISQUALIFICATION OF THE CHIEF JUDGE OF THE
TRADEMARK TRIAL AND APPEAL BOARD, THE THREE-MEMBER BOARD
PANEL ASSIGNED TO ADJUDICATE ENNIS INC.'S MOTION TO DISMISS, AND
INTERLOCUTORY ATTORNEY ELIZABETH DUNN, AND PETITION ALLEGING
JUDICIAL AND ATTORNEY MISCONDUCT**

Petitioner, Joel L. Beling, hereby files this petition for disqualification of the Chief Judge of the Trademark Trial and Appeal Board, the Honorable Gerard F. Rogers (“the Chief Judge”), the three-member Board panel assigned to adjudicate Ennis Inc.’s motion to dismiss (“the panel”), and Interlocutory Attorney Elizabeth Dunn (“Ms. Dunn”)¹ pursuant to 28 U.S.C. §§ 455(a), 455(b)(1), the ABA Code of Judicial Conduct (1990, 2007) (“the 1990 Code”/“the 2007 Code”), the ABA Model Code of Professional Responsibility² (“the MCPR”), and the Administrative Procedure Act (“the APA”), Pub.L 79-404, 60 Stat. 237.³ The petitioner alleges judicial and attorney misconduct against the above individuals in this petition pursuant to Fed. R. Civ. P. 11(b)(1), (b)(2), and (b)(3); pursuant to Ms. Dunn’s procedural advice in her email dated December 4, 2013 (Ex. 1) that “[A] request for disqualification of Board attorneys or judges is uncommon and there is no established practice for submitting such a request”; and pursuant to the rule laid down in *In re Schenck*, 870 P.2d 185, at 195 (Or. 1993) (rejecting judge’s argument that

¹ When the petitioner refers to allegations that the panel and Ms. Dunn have violated 28 U.S.C. § 455(a), the petitioner includes the Chief Judge if his Honor was and is part of the panel.

² *In re Littell*, 260 Ind. 187, 294 N.E.2d 126 (1973) (A judge can be disbarred or otherwise disciplined by the bar as an attorney for misconduct committed in his or her capacity as a judge).

³ For sake of completeness, Ms. Dunn must also comply with the cited authorities because she is deemed a judge since she is performing a judicial or quasi-judicial role and may be classified as a “judicial candidate” pursuant to Preamble(3) of the 2007 Code.

his denial of a motion to disqualify was challengeable on mandamus or on appeal, but not sanctionable under the code of judicial conduct). To avoid repetition, for each ground below, it is alleged that the impugned act or omission might reasonably question the impartiality of the judicial or quasi-judicial member involved pursuant to 28 U.S.C. § 455(a).

GROUND 1: The panel has committed an egregious legal error and violated Rules 1, 1A, 2, 2A, 3B(1), 3B(2), 3B(5), 3B(7), 3B(8), 3C(1)2 of the 1990 Code, Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5) & (6) of the MRPR, by failing to sign their decision dated May 15, 2013, which omission may be characterized as an egregious legal error. In re Quirk, 705 So. 2d at 178 (adopted egregious legal error as one of the exceptions to the general rule that legal error is not sanctionable, stating that even a single instance of serious legal error, particularly one involving the denial to individuals of their basic or fundamental rights, may amount to judicial misconduct). A number of authorities clearly state that potentially dispositive motions, such as Ennis' motion to dismiss, are decided, finalized and signed by a three-member Board panel, with one judge authoring the ruling on the motion:

Board Members also decide potentially dispositive motions filed in inter partes cases. Inter partes proceedings before the Board are, for the most part, procedurally analogous to federal district court litigation and are governed by the Federal Rules of Civil Procedure, except where specific Trademark Rules of Practice govern. These motions are decided by three-member Board panels in the same manner as such panels would decide an inter partes case after a full trial, with one judge authoring the ruling on the motion... Motions to dismiss filed pursuant to Rule 12(b) of the Federal Rules of Civil Procedure (Federal Rules) are common in inter partes cases. For example, the defendant in an opposition or cancellation proceeding may move to dismiss under Rule 12(b)(6) of the Federal Rules on the ground that the opposition or petition for cancellation fails to state a claim on which relief can be granted. *The motion simply tests the sufficiency of the pleadings and is decided by a three-member Board panel...* The TTAB panel then comes to a conclusion regarding how the motion should be decided, and the Interlocutory Attorney Examiner drafts an opinion based on the instructions received at that case conference. **The draft decision is then circulated among the three-member panel and the decision eventually is finalized and signed by the panel** (emphasis added).

Krugman, Gary, *Trademark Trial and Appeal Board Practice and Procedure* (2011-2012 Ed.); §§ 1:6, 1:7, 1:14; West's Key Number Digest, Trademarks Key 1280, 1287; *McCarthy on Trademarks and*

The panel's failure to finalize and sign the decision dated May 15, 2013 demonstrates, respectfully, an absolute lack of transparency in Board decision-making and a violation of the petitioner's basic and fundamental right to procedural fairness and a fair trial, since the petitioner was deprived of the panel's expertise in adjudicating a dispositive motion involving complex issues of, inter alia, trademark fraud. Regrettably, the panel's failure to sign the decision means that it suffers from a fatal procedural deficiency which renders the decision void *ab initio*.

GROUND 2: Ms. Dunn has committed an egregious legal error and violated Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, Canons 1, 8 & 9 and DR 1-102(A)(1), (4), (5), (6), DR 1-103(A) & DR 8-102(B), DR 8-103(A) of the MRPR, by adjudicating and signing the decision dated May 15, 2013. *Quirk, supra*. Although an interlocutory attorney may draft the decision adjudicating a potentially dispositive motion after receiving instructions from the panel at the case conference, the decision must always be finalized and signed by the panel:

In addition to ruling on nondispositive motions, the Interlocutory Attorney Examiner often has the responsibility of drafting decisions on potentially dispositive motions, including motions to dismiss and motions for summary judgment. Many such motions are assigned to Interlocutory Attorney Examiners, who review the motion papers and meet with the TTAB panel of three judges to discuss the case and the issues presented by the motions. The TTAB panel then comes to a conclusion regarding how the motion should be decided, and the Interlocutory Attorney Examiner drafts an opinion based on the instructions received at that case conference. **The draft decision is then circulated among the three-member panel and the decision eventually is finalized and signed by the panel...** *Decisions on motions to dismiss pursuant to Rule 12(b) of the Federal Rules of Civil Procedure and Trademark Rule 2.132 are routinely drafted by interlocutory attorney Examiners for signature by three Board Members* (emphasis added).

Krugman, *supra*, § 1:14; West's Key Number Digest, Trademarks Key 1280, 1287; *McCarthy on Trademarks and Unfair Competition* § 20:129 (4th ed.); Trademark Law Practice Forms §§ 13:127, 13:129.

Ms. Dunn's adjudication, finalization and signing of the decision dated May 15, 2013 was, respectfully, an act which grossly exceeded her power and authority as an Interlocutory Attorney. Trademark Rule 2.127(c); *In re Jefferson*, 753 So. 2d 181 (La. 2000) (judge removed for, inter

alia, deliberately disobeying orders of a “supernumerary judge”). The decision itself reveals that Ms. Dunn’s possessed actual knowledge that Ennis’ motion to dismiss was a potentially dispositive motion: (“Because the Board’s grant of the motion to dismiss would dispose of this proceeding, the Board will not exercise its authority in this instance.” Doc. #27, at 3.)

Subsequent email communications with Ms. Dunn reveal that she possessed actual knowledge that her authority to act on motions was and is confined to non-dispositive motions. Ex. 1, December 4, 2013, Email to petitioner. In fact, the contested, potentially dispositive motion involved novel and complex issues of, inter alia, trademark fraud law and Ms. Dunn was clearly out of her depth of experience in adjudicating and signing the motion. *See, e.g., **GROUND 11 & 27.*** Moreover, the *ultra vires* act was fundamentally unfair, both procedurally and substantively, because the three-judge panel system ensures one judge can throw a casting vote in the event of a split decision between the other two judges, meaning that the petitioner was denied this basic and fundamental right to procedural fairness and the right to a fair trial. *Quirk, supra.*

GROUND 3: Ms. Dunn, has committed an egregious legal error and violated § 455(b)(1) of 28 U.S.C., Canon 3(E)(1) of the 1990 Code, Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (4), (5), (6), DR 1-103(A) & DR 8-102(B), DR 8-103(A) of the MRPR, by acting on, adjudicating and signing her decisions dated May 15, 2013 and November 12, 2013, when she had “personal knowledge of disputed evidentiary facts concerning the proceeding,” viz. the allegations in paragraphs 314-318 and 324-328 in petitioner’s second amended petition to cancel. Doc. #18. It is submitted the proper and fair procedure that Ms. Dunn should have followed was to file a declaration or affidavit concerning the disputed evidentiary issues and either disqualify herself or request she be disqualified by the Board pursuant to 28 U.S.C. § 455(b)(1), none of which she did. The disputed evidentiary facts involve Ms Dunn’s participation in the Discovery Conference in the present proceeding on April 24, 2012, which was also attended by the petitioner and Mr. Thomas Jacks, Ennis’s former attorney. *See* petitioner’s Declaration, *infra*. During the teleconference, Mr.

Jacks stated Ennis was involved in another matter before the Board involving similar allegations and that the mark Ennis had opposed was COLORWORKS “with a ‘K-S.’” *Id.* at ¶ 3. Petitioner submits - and has declared to this effect - that Ms Dunn heard this and therefore has “personal knowledge of disputed evidentiary facts concerning the proceeding.” Yet in its discovery answers, Ennis denied there were any proceedings with similar allegations to the present proceeding. Doc. #26, Opposer’s Response and Objections to Applicant’s First Request for Production dated June 11, 2012, Request No. 6. Petitioner submits that Ms. Dunn is a witness to Mr. Jacks’ admission relating to his client’s involvement in another similar proceeding and can give direct evidence in relation to the issues of Ennis giving false evidence on oath or certification.⁴ *See, e.g.*, Doc #18, ¶ 324-328. Yet the two Board decisions signed by Ms Dunn fail to consider any of these issues. Since Ms Dunn had personal knowledge of dispute evidentiary fact in this proceeding at the time she adjudicated and signed her decision, disqualification was *mandatory*. *Renteria v. Schellpeper*, D. Neb. 1996, 936 F.Supp. 691. (If one of grounds specifically enumerated in statute applies, disqualification of judge is mandatory whether or not reasonable person would question judge's impartiality.)

GROUND 4: In the alternative to GROUND 1 & 2, the petitioner respectfully submits that the Chief Judge has committed an egregious legal error under *Quirk* and violated Rule 2.2, 2.5 & 2.6 of the 2007 Code and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5) & (6) of the MRPR, by failing to set a three-member Board panel to adjudicate Ennis’ motion to dismiss. Krugman describes the relevant procedure as follows:

All final decisions are issued by a three-judge panel, with one of the judges authoring the decision. The Chief Administrative Trademark Judge is responsible for allocating decision writing responsibilities to the judges with respect to these proceedings. **The Chief Judge also sets panels for decisions**, sets panels for oral hearings...(emphasis added).

Krugman, *supra*, § 1:5; West’s Key Number Digest, Trademarks Key 1280, 1287.

⁴ For the record, the petitioner alleges no attorney misconduct in this proceeding in the present petition against Ennis’ former or current attorneys.

The good faith evidentiary bases the petitioner relies on in support of this ground are the petitioner's email exchanges with Ms. Dunn on December 4 & 5, 2013 and the record. Ex. 1, *infra*. In particular, the petitioner asked Ms. Dunn for "the names of the three administrative trademark judges who have been assigned to this proceeding by the Chief Judge. [The petitioner relies] on the Board's duty to be open and transparent in its decision-making." Ms. Dunn's reply was unequivocal:

The Chief Judge assigns a panel of three administrative trademark judges when trial and briefing has concluded, and the case is ready for final decision. Because consolidated Opp. No. 91203884 remains in the discovery stage, **no panel has been assigned**...I am the Board attorney assigned to this proceeding, **I have issued interlocutory orders, and my name appears at the beginning of those orders** (emphasis added). Ex. 1.

The petitioner followed up his request for the names of the three judges or adjudicators who decided Ennis' motion to dismiss in his email to Ms. Dunn the following day, but received no responsive answer. *Id.* The petitioner relies on Ms. Dunn's trusted position, unblemished character and strong credibility as a Board Interlocutory Attorney for at least a decade, as well as her intimate knowledge of the administrative and decisional history of this consolidated proceeding, to allege against the Chief Judge "[the absence of] the legal knowledge, skill, thoroughness, and preparation reasonably necessary to perform the [Chief] judge's responsibilities of office." 2007 Model Code, Rule 2.5, Comment 1. In addition, the record also establishes beyond reasonable doubt that the Chief Judge failed to set a panel to adjudicate Ennis' motion to dismiss, a potentially dispositive motion, because there is no reference anywhere on the record to anyone other than Ms. Dunn adjudicating Board decisions.

GROUND 5: In the alternative to GROUND 4, the petitioner respectfully submits that the Chief Judge has committed an egregious legal error under *Quirk* and committed willful misconduct by knowingly omitting to set a three-member Board panel to adjudicate Ennis' motion to dismiss, contrary to Rules 1.1, 2.2, 2.3 & 2.6 of the 2007 Code and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5) & (6) of the MRPR. GROUND 4 is referred to and

incorporated by reference. Put simply, given the Chief Judge's vast experience, it is utterly fanciful and patently untenable to suggest that his Honor failed to set a three-member Board panel to adjudicate Ennis' motion to dismiss by virtue of incompetence or negligence.

GROUND 6: The petitioner respectfully submits that the Chief Judge has committed an egregious legal error under *Quirk* and violated Rule 2.12 of the 2007 Code and Canons 1, 8 & 9, DR 1-102(A)(1), (2), (4), (5) & (6) of the MRPR, by failing to supervise the adjudication and signing of the Board decision dated May 15, 2013.

GROUND 1-3 are referred to and incorporated by reference. A single Interlocutory Attorney signed a Board decision on a potentially dispositive motion. *Res ipsa loquitur*.

GROUND 7: The petitioner respectfully submits that the Chief Judge has violated Rule 3D of the 1990 Model Code, Rule 2.15 of the 2007 Model Code and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5) & (6) of the MRPR, by failing to take or initiate appropriate disciplinary measures against the panel and Ms. Dunn for unprofessional conduct as particularized in this petition of which the Chief Judge became aware. See, e.g., *In re Gassman*, Unreported Determination (N.Y. Comm'n, 1986); *In Re Laurie*, No. 84-CC5, (Ill. Cts. Comm'n 1985) (judge suspended for failing to report proffered gifts by attorneys); *In re Bloom*, Determination N.Y. Comm'n, Jan 20, 1995) (judge censured for knowingly giving inaccurate testimony in an attorney disciplinary proceeding). **GROUND 1-4 are referred to and incorporated by reference. Thus, it is respectfully submitted the Chief Judge's alleged failure to set and supervise a Board panel to adjudicate the motion to dismiss, or alleged failure to supervise a runaway Interlocutory Attorney (Ms. Dunn) intent on acting on, adjudicating and signing alone a Board decision on a potentially dispositive motion, or failure to report the panel and Ms. Dunn to the relevant disciplinary authorities in respect of the above acts and omissions, demonstrates gross incompetence, denies the petitioner its fundamental rights to procedural fairness and a fair trial, undermines the integrity of the position of Chief Judge, brings the judiciary in general and**

the Board in particular into disrepute, reduces public confidence in the legal system, and undermines the fair administration of justice.

GROUND 8: It is submitted that the tone and language Ms. Dunn used to describe the respective acts and omissions of Ennis and the petitioner violates Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (4), (5), (6), DR 1-103(A) & DR 8-103(A) of the MRPR. On the one hand, Ms. Dunn describes the petitioner's pleadings as "awkwardly written" and "ridiculously long," *literally* ridiculing them through the use of the word "ridiculous" (Doc. #27, at 6); the genericness and other claims as "garbled" (*Id.* at 5); the "remainder" of the claims (none of which are considered individually) as "rambling" (*Id.* at 6); and the omission of a good faith attempt to "meet and confer" with Ennis concerning the motion to compel as abusive (Doc. #39, at 6). In short, the tone and content of Ms. Dunn's communications to the petitioner, a pro se litigant, may be characterized as disparaging, ridiculing and unfair on any objective view of an adjudicator describing a pro se litigant's pleadings. On the other hand, Ms. Dunn fails to make even a single negative or adverse comment on Ennis' patently false discovery responses ((Docs. #18, 25 & 26); its indirect admission that its discovery responses to the petitioner's discovery requests were not true and correct (Doc. #26); its concealment of documents and the identities of witnesses for 13 months despite the petitioner's numerous discovery requests (Doc. #38); its boilerplate objections to the petitioner's discovery requests (Doc. #26); its failure to produce any financial documents relating to goods and services sold under its COLORWORX Mark (Docs. #29 & 36); its failure to produce its statement of use submitted to the USPTO at the time of applying for registration of the COLORWORX mark ((Docs. #29 & 36); its failure to produce any documents relating to searches and clearances it conducted before applying for registration of the COLORWORX Mark (Docs. #29 & 36); and its abusive litigation tactic of seeking to avoiding reliance on its former attorneys' responses to the petitioner's good faith attempts to "meet and confer" and other alleged abusive litigation tactics (Doc. #32 & Reconsideration Issue 19 in the motion for reconsideration dated December 10,

2013,⁵). In short, it is submitted Ms. Dunn has blatantly covered up Ennis' dishonest, dilatory and abusive conduct.

GROUND 9: The panel and Ms. Dunn knowingly, willfully and in bad faith falsified and improperly extrapolated their orders in the Board's decisions dated July 13 & 17, 2012 concerning "any subsequent motion to compel" to responses to all motions in Ms. Dunn's *ultra vires* decision dated May 15, 2013, contrary to Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5), (6), DR 1-103(A) & DR 8-103(A) of the MRPR. Docs. #13, 15 & 27. *Cannon v. Comm'n on Judicial Qualifications*, 537 P.2d 898, at 909 (Cal. 1975) (The presence of bad faith can render an exercise of legal judgment judicial misconduct. "Bad faith" in this context means "acts within the lawful power of a judge which nevertheless are committed for a corrupt purpose, i.e., for any purpose other than the faithful discharge of judicial duties"). In particular, in the latter decision the panel and Ms. Dunn claimed it made a number of orders "**[w]hen served with a motion**" relating to single responses, page limits, etc (emphasis added). Doc. #27, at 2. In fact, in her decision dated July 13, 2012, Ms. Dunn makes three orders [(a)-(c)] which are book-ended by the express limitation "**[w]ith respect to any subsequent motion to compel**, the Board advises Mr. Beling as follows" and "That is, if Mr. Beling chooses to file **another motion to compel**, he cannot submit again the exhibits already of record. **Any new motion to compel** must..." (emphasis added) Doc #13, at 8-9. This improper extrapolation is fundamentally dishonest, runs afoul of the principle of retrospective punishment, and denies the petitioner the right to a fair trial.

GROUND 10: The panel and Ms. Dunn refused to consider petitioner's opposition to the motion to dismiss on the basis that petitioner has disregarded orders that the Board never in fact made, or, alternatively, made only in relation to "any subsequent motion to compel."

⁵ Hereinafter, when petitioner refers to a "**Reconsideration Issue**," it refers to this motion, which is incorporated by reference into the ground for disqualification or judicial and attorney misconduct.

Doc. #27, at 2. **GROUND 9** and the allegations of judicial and attorney misconduct therein are referred to and incorporated by reference.

GROUND 11: The panel and Ms. Dunn misinterpreted petitioner’s arguments and ruled that petitioner’s trademark fraud allegations in paragraphs 45-212 of his second amended petition to cancel are legally sufficient on the basis of a liberal reading of the pleading. Doc. #27, at 5. In particular, the Board has ruled that petitioner’s “fraud claim[s] that Ennis made material misrepresentations regarding its exclusive right to use the mark COLORWORX *and* design, and not just the term COLORWORX” (emphasis added) are legally sufficient. Doc #27, at 5. Yet this is not what petitioner alleged at all for the vast majority of his trademark fraud allegations against Ennis. *See* Doc #18, ¶¶44-217. Petitioner clearly *apportioned* his allegations of trademark fraud against Ennis with respect to either the term COLORWORX *or* the design element. *See* headings in Doc #18, at 18, 24, 45. Thus, the Board’s decision construing petitioner’s pleadings as legally sufficient on the basis of a “liberal” reading of the pleading under current law on trademark fraud is clearly untenable because the Board’s ruling is the polar opposite of the current legal position, which requires trademark fraud allegations to relate to the “mark as a whole,” as Ennis have submitted. Docs. #19 & 21.

GROUND 12: The panel and Ms. Dunn’s ruling in its decision dated May 15, 2013 that “the Board has the authority to grant [Ennis’] motion to dismiss as conceded” and that the petitioner failed to file a brief in response to Ennis’ motion to dismiss, violates Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5), (6), DR 1-103(A) & DR 8-103(A) of the MRPR. Doc. #27, at 3. This is a clear legal error, untenable on any reasonable view, and therefore falls into the category of bad faith or egregious legal error. *In re Benoit* 487 A.2d 1158, at 1163 (Me. 1985) (A judicial decision constitutes a violation if a reasonably prudent and competent judge would consider that conduct obviously and seriously wrong in all the circumstances). The proper and reasonable interpretation of Trademark Rule 2.127(a) is that where a party, as the literal words suggest, “*fails to file* a brief in response to

a motion” (emphasis added), the Board “may treat the motion as conceded.” *See Caminetti v United States*, 242 U.S. 470 (1917) and *Church of the Holy Trinity v United States*, 143 U.S. 457 (1892) regarding the Plain Meaning Rule: if the statutory language is plain, there is no need for further interpretive aids. The *purpose* of the Rule, to treat as conceded uncontested motions so as not to waste the Board’s time and resources, also supports this interpretation and does not lead to an absurd result. *Green v Bock Laundry Machine Co.*, 490, U.S. 504, 528 (1990) (courts look to broader context of body of law, including express and inferred purposes, when interpreting statute). Petitioner vigorously contested the motion, which traversed virgin territory in fraud law, by filing a detailed opposition supported by authority, along with a motion to exceed the page limited, which type of motion the Board has *never* granted petitioner.

GROUND 13: The panel and Ms. Dunn ruled that the subject matter of the applicant’s declaration of June 20, 2013 was “not the subject of a discussion with opposer,” in violation of Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5), (6), DR 1-103(A) & DR 8-103(A) of the MRPR. *See Reconsideration Issue 13.*

GROUND 14: Ms. Dunn failed to responsively reply in her email dated December 5, 2013 to the petitioner’s good faith attempt dated December 4, 2013 to “meet and confer” with her regarding some of the issues the subject of this petition for disqualification, in violation of Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5), (6), DR 1-103(A) & DR 8-103(A) of the MRPR and § 557(d)(1)(C) of the APA. *See Ex. 1.*

GROUND 15: Ms. Dunn failed to provide sufficient and reasonable procedural advice in her email dated December 4, 2013 to the petitioner’s request for procedural advice concerning how to file a petition for judicial disqualification in his email dated December 4, 2013, in violation of Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5), (6), DR 1-103(A) & DR 8-103(A) of the MRPR.

Instead of providing the requested procedural advice concerning the filing of a public petition or motion which would form part of the record, Ms Dunn provided the email address of the managing interlocutory attorney, Mr. Kenneth Solomon. *See* Ex. 1. In attempting to so channel the petitioner's grievances, it is respectfully submitted Ms. Dunn desired to conceal her commission of numerous examples of judicial and attorney misconduct, apparent bias, abuses of discretion and legal errors, as particularized herein, from public scrutiny.

GROUND 16: The Panel and Ms. Dunn should be disqualified on the basis that they have failed to make public on the USPTO's "TTAB Summaries" webpage (found under the Board Receipts and Issued Decisions heading) the decision dated May 15, 2013, in violation of Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5), (6), DR 1-103(A) & DR 8-103(A) of the MRPR. It goes without saying that fundamental tenets of Board decisions are that they demonstrate transparency, accountability, and fairness. By failing to make public on the Board's website the Board's decision dated May 15, 2013, a decision on a potentially dispositive motion, the Board has undermined the transparency, accountability and fairness of the Board's decision-making process in particular and the USPTO's decision-making process in general.

GROUND 17: Ms. Dunn should be disqualified on the basis that she requested the petitioner not to respond to her email dated November 14, 2013 (Ex. 1), which violates Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 of the MRPR. In this email, which was in response to a request for procedural information concerning depositions on written questions, Ms Dunn wrote "Please do not respond to this message..." Ex. 1. The petitioner had a number of follow-up procedural questions for Ms. Dunn in response to her email relating to the timing of discovery depositions and the filing of a motion to suspend proceedings pending review of Ennis' discovery responses. Yet this opportunity to clarify further procedural matters was deterred by Ms. Dunn, in her request that the petitioner "not respond to this message." Interlocutory attorneys are a key, perhaps the only, source of information on legal

procedure in Board opposition or cancellation procedures for some pro se litigants, the protection of whom is a primary focus in the USPTO's *Report to Congress*. The petitioner has clearly suffered prejudice through Ms. Dunn's firm request not to ask follow-up procedural questions, *after a single email*.

GROUND 18: Ms. Dunn unnecessarily, improperly and inappropriately initiated an ex parte telephone communication with the opposer's attorneys in her decision dated July 13, 2012, contrary to Rule 3B(7) of the 1990 Model Code, Rule 2.2, 2.5 & 2.9 of the 2007 Model Code, Canons 1, 8 & 9 and DR 1-102(A)(1), (4), (5), (6), DR 1-103(A) & DR 8-103(A) of the MRPR, and §§ 554(d)(1), 557(d)(1)(A), 557(d)(1)(B), 557(d)(1)(C) of the APA. Declaration & Ex. 1, *infra*; *In re Schenck* 879 P.2d 863 (1994) 320 Or. 94 ("A communication may concern procedure as well as substantive law and still be on the merits of the cause"). In this decision, Ms Dunn wrote: "*Ennis is ordered to inform the Board by phone at the number listed above when its answer has been filed. At that time the Board will reset dates in this consolidated proceeding*" (emphasis added). Doc. #13, at 9. It is respectfully submitted that this ex parte communication with Ennis's legal counsel was completely unnecessary, improper and inappropriate, because Ms. Dunn would have received notification of the opposer's response through the ESTTA, just as she receives the petitioner's filings through the ESTTA. More importantly, telephone communications lend themselves to complete freedom of unrecordable or undocumentable communication between the Board and the opposer's attorneys which the petitioner would never be able to ascertain. *Wells v Del Norte Sch. Dist.*, 753 P.2d 770 (Colo. 1987) (Even though there was no evidence of any inappropriate discussion, an appearance of impartiality was created that necessitated disqualification). Indeed, when asked about the conversation, Ms. Dunn failed to answer responsively. Ex. 1, Email to petitioner dated December 5, 2013. *See also* Ms. Dunn's email to petitioner dated July 9, 2012, wherein she states: "Ex parte communications to the Board by the parties regarding anything but procedural information *creates the appearance of impropriety*" (emphasis added).

GROUND 19: The panel and Ms. Dunn’s ruled in the Board’s decision dated November 12, 2013 that the petitioner failed to comply with the threshold “meet and confer” requirements of Trademark Rule § 2.120 and TBMP § 523.02 (Doc. #39, 3-5), when in fact the applicant’s letter dated June 12, 2012 is and was *already part of the record*, viz. Exhibit 2 in Doc. #17. Doc. #39, at 3-6. This violates Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5), (6), DR 1-103(A) & DR 8-103(A) of the MRPR. *See Reconsideration Issue 10.*

GROUND 20: The panel and Ms. Dunn’s ruled in the Board’s decision dated November 12, 2013 that the subject matter of the petitioner’s declaration of June 20, 2013 was “not the subject of a discussion with opposer.” This violates Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5), (6), DR 1-103(A) & DR 8-103(A) of the MRPR. *See Reconsideration Issue 13.*

GROUND 21: The panel and Ms. Dunn’s ruling on the petitioner’s motion to compel in the Board’s decision dated November 12, 2013 denying the petitioner’s motion to compel privileged material on the basis that the request was “impertinent,” constitutes an egregious legal error under *Quirk*, and violates Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5), (6), DR 1-103(A) & DR 8-103(A) of the MRPR. *See Reconsideration Issues 1 & 14.*

GROUND 22: Ms. Dunn’s failure to disclose in her December 4 & 5, 2013 emails to the petitioner the identities of the panel Board members who adjudicated and finalized the decision on Ennis’ potentially dispositive motion to dismiss, improperly and inappropriately signed by Ms. Dunn on May 15, 2013, violates Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5), (6), DR 1-103(A) & DR 8-103(A) of the MRPR. *See Declaration & Ex. 1, infra.*

GROUND 23: In her email to the parties dated December 4, 2013, Ms. Dunn knowingly made a false statement that “no panel has been assigned” in this proceeding, contrary to

Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (4), (5), (6), DR 1-103(A), DR 8-102(B) & DR 8-103(A) of the MRPR. *Bloom, supra*; Ex. 1. Ms. Dunn’s statement to the effect that there have been no administrative trademark judges adjudicating or involved in any of the motions filed in this proceeding is allegedly false because the first sentence on Page 4 of Ms. Dunn’s ruling dated May 15, 2013 begins with the subject pronoun “We.” *Res ipsa loquitur*. Unless (it is not alleged) Ms. Dunn’s knowledge of the English language is so poor that she does not understand the difference between the subject pronouns “I” and “we” (in which case she should be disqualified on the basis of gross incompetence pursuant to Rule 2.5 of the 2007 Code), the logical inference is that Ms. Dunn acted on, adjudicated, finalized and signed the May 15, 2013 decision in concert with the panel.

GROUND 24: In her email to the parties dated December 4, 2013, Ms. Dunn knowingly made a misleading statement that “I am the Board attorney assigned to this proceeding, I have issued interlocutory orders, and my name appears at the beginning of those orders[,]” contrary to Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (4), (5), (6), DR 1-103(A), DR 8-102(B) & DR 8-103(A) of the MRPR.

Bloom, supra; Ex. 1. Ms. Dunn’s statement to the effect that the panel had not been assigned to this proceeding and that she alone was solely responsible for acting on, adjudicating, finalizing and signing all orders made by the Board in this proceeding to date is misleading because of the following factors: 1) her reference to “We” on Page 4 of the decision on the pleadings, *res ipsa loquitur*; (2) the standard Board procedure that a Board panel of three members adjudicates and signs decisions on potentially dispositive motions; (3) the length of time Ms. Dunn took to hand down her bad faith decision on the pleadings (it beggars belief to suggest she received no advice from a Board member(s) in eight months and that she concealed the pleadings from the Board for this period); (4) the (relative) sophistication of the ruling given the complexity of the issues raised; (5) Ms. Dunn’s position as an Interlocutory Attorney and the limited powers conferred on her by the Trademark Rules of Practice; (6) the pattern of legal errors (some egregious)

manifested in the May 15, 2013 decision resurfaced in the November 12, 2013 decision, thereby constituting judicial misconduct under *Quirk*; and (7) Ms. Dunn's evasive response (again formed after a delay and made in consultation with the panel) in her email dated December 5, 2013 to petitioner's email dated December 4, 2013. *See, infra*. In summary, Ms. Dunn's false and misleading statements (*see* **GROUND 23**) to the parties creates an appearance of impropriety, and undermines public confidence in the integrity and impartiality of the judiciary.

PATTERNS OF (EGREGIOUS) LEGAL ERROR

It is respectfully submitted that the panel and Ms. Dunn have engaged in four distinct patterns or practices of legal error, which are one of the identified exceptions to the "mere legal error" rule in *Quirk* which elevate legal errors simpliciter to the level of judicial misconduct. *Supra*. To date, four main patterns emerge from the panel and Ms. Dunn's adjudications: (1) a refusal and failure to consider the petitioner's legal submissions and give any or any sufficient reasons for decision; (2) an abusive, unfair and apparently biased application of the Board's powers to impose sanctions under Fed. R. Civ. P. 11; (3) a bad faith intent to limit the petitioner's time, ability and methods of further amending his claims and taking discovery; and (4) the bad faith adjudication of old, previously served discovery requests as "new requests." Patterns (1), (2) and (3), petitioner submits, constitute especially serious examples of judicial misconduct because they entail patterns of egregious legal errors under *Quirk*. All four patterns, it is submitted, violate Rules 1.1, 1.2, 2.2, 2.3, 2.5, 2.6 and 2.7 of the 2007 Code, and Canons 1, 8 & 9 and DR 1-102(A)(1), (2), (4), (5), (6), DR 1-103(A), & DR 8-103(A) of the MRPR.

Pattern 1: The Panel and Ms. Dunn's refusal and failure to consider the petitioner's legal submissions and give any or any sufficient reasons for decision

Reconsideration Issue 1 is referred to and incorporated by reference. To avoid repetition, petitioner submits **GROUND 25-35**, *infra*, violate § 557(c)(3) of the APA.

GROUND 25: The Panel and Ms. Dunn’s failure to consider petitioner’s

opposition to registrant’s motion to dismiss, motion to divide, motion to exceed the page limit, motion to compel, and Ennis’ discovery responses on the record in their decision dated May 15, 2013. Docs. #16, 17, 21, 26. First, on a motion to dismiss, the court may consider the pleading, matters of public record, materials necessarily embraced by the pleading, and exhibits attached to the pleading, such as a declaration. *AstraZeneca Pharm. LP v. Apotex Corp.*, 101 U.S.P.Q.2d 1675, 1680 n.5 (Fed. Cir. 2012) (“the district court was entitled to examine documents integral to or explicitly relied upon in the complaint in evaluating motions to dismiss”). Here, the documents not considered by the Board were matters of public record; furthermore, they were documents necessarily embraced by the pleading and were on the proceeding file. Second, these documents directly contradicted Ennis’ arguments in its motion to dismiss. For example, the submissions in relation to the “relevant market” (where Ennis claimed a reputation in its mark in relation to “the general public”); the submissions in relation to goods and services sold in the United States (Ennis claimed rights in its mark “worldwide”); the submissions in relation to apportionment of a mark and rights to portions of a mark (Ennis specifically claimed rights to portions of its mark). *See* Doc #19, at ¶8-13, 16-21, 31, 34; Doc #26. Third, the motion to dismiss was a potentially dispositive motion which involved a novel and fundamental issue of law, namely whether trademark fraud allegations can be apportioned to focus on parts of a registrant’s mark under 15 U.S.C. § 1064(3). *See* Doc #25, ¶28-59 and Doc #19, ¶8-14, 16-21. Fourth, the Board has *never* granted petitioner a motion to exceed the page limit. It is submitted as a matter of law that every party which appears before the Board is allowed *at least one* motion which exceeds the page limit. If not, the entire section motion is redundant. Fifth, in her procedural advice to petitioner dated August 27, 2013 regarding filing the opposition to the motion, Ms. Dunn made *no reference whatsoever* to not being allowed to file a motion to exceed page limits or to the relevant TBMP or Trademark Practice Rule governing motions, despite the fact that there was already a motion to exceed page limit on the record and a

decision in relation the motion. Docs. #14 & 15. Sixth, there was clear and convincing evidence of discovery misconduct by Ennis disclosed in its discovery responses;⁶ indeed Ms. Dunn placed these on the record when they are not normally considered until the testimony periods and then only under certain strict conditions. Doc. #26. Seventh, the decision to not consider these documents flies in the face of current legal policy against corporations' abusive litigation tactics in oppositions against small businesses and individuals, as articulated in the Office of Governmental Affairs– USPTO's *Report to Congress: Trademark Litigation Tactics and Federal Government Services to Protect Trademarks and Prevent Counterfeiting* (April 2011) ("Report to Congress"). *Catchpole v. Brannon*, 36 Cal. App. 4th 237. (It may be indicative of bias if a judge holds beliefs about the law that run counter to legal policy and therefore interfere with a party's right to a fair and impartial trial). Therefore, petitioner was and is entitled to a decision, with detailed references to authority, as to, inter alia, the applicability of 15 U.S.C. § 1064(3) and plagiarism law and practice to his claims for cancellation. *See* Docs. #25 & 26.

GROUND 26: The Panel and Ms. Dunn's failure to consider at all the applicant's motion to compel in Doc. #17 and the applicant's motion to exceed the page limit in Doc. #14. *See* Reconsideration Issue 9.

GROUND 27: The Panel and Ms. Dunn's failure to disclose a path of reasoning which led to the decision dated May 15, 2013 that petitioner's allegations of trademark fraud in paragraphs 45-212 of his second amended petition to cancel were legally sufficient. Put simply, Ennis' motion to dismiss was a potentially dispositive motion and involved a novel and fundamental issue of law, namely whether trademark fraud allegations can be apportioned to focus on parts of a registrant's mark under 15 U.S.C. § 1064(3). The Panel and Ms. Dunn completely failed to provide a legal basis for their decision.

⁶ Again, for the record, the petitioner alleges no attorney misconduct in this proceeding in the present petition against Ennis' former or current attorneys.

GROUND 28: The panel and Ms. Dunn’s failure to sufficiently consider the petitioner’s claims for cancellation in paragraphs 218-330 of the second amended petition to cancel (Doc. #18) and failure to give any sufficient reasons for striking out these paragraphs in the Board’s decision dated May 15, 2013. In light of Ennis’ brief response to petitioner’s claims for cancellation in Ennis’ motion to dismiss (Doc. #19) and reply (Doc. #22), petitioner submits that these claims should be treated as conceded. Rather, the entirety of the panel and Ms. Dunn’s analysis and reasons for decision consists of a single sweeping, vague and insufficiently particularized sentence: “With respect to the remainder of the second amended petition to cancel (§218-370), the rambling, improper, and irrelevant allegations do not state claims for cancellation, and to the extent they pertain to any cause of action, those causes lie outside the Board’s jurisdiction and are STRICKEN.” Doc #27, at 6. In its submitted that this single sentence demonstrates a gross lack of transparency and accountability in a Board decision and denies the petitioner the right to a fair trial. Public policy dictates that the public in general and parties in particular are entitled to know, with detailed reasons for decision supported by authority, why a particular claim was adjudicated legally sufficient or insufficient. In paragraphs 218-330, Petitioner has cited a number of authorities, including cases decided by the Board and the Board’s principal reviewing Court, yet the Board has failed to distinguish a single authority with superior, controlling precedents.

GROUND 29: The panel and Ms. Dunn’s complete failure to disclose the path of reasoning which led to the Board’s decision dated November 12, 2013 that the applicant’s motion to compel privileged material was “impertinent.” See Reconsideration Issue 15.

GROUND 30: The panel and Ms. Dunn’s complete failure to consider at all in the Board’s decision dated November 12, 2013 the petitioner’s submissions regarding the opposer’s abusive litigation tactics and the legal policy elucidated in the *Report to Congress. Catchpole, supra*. See Reconsideration Issue 19.

GROUND 31: The panel and Ms. Dunn’s complete failure to consider the petitioner’s submissions in the motion to compel in the Board’s decision dated November 12, 2013 regarding the opposer’s failure to produce the majority of the requested documents at all or, with respect to a few of the requested documents and disclosing the identities of individuals with discoverable information, until at least approximately 13 months after they were requested. *See* Reconsideration Issues 5 & 6.

GROUND 32: The panel and Ms. Dunn’s complete failure to consider the petitioner’s submissions in the motion to compel in the Board’s decision dated November 12, 2013 regarding the opposer’s failure to supplement its discovery production of documents relating to expert witnesses or purported expert witnesses in violation of the requirements of Fed. R. Civ. P. 26(e)(1)(A). *See* Reconsideration Issue 7.

GROUND 33: The panel and Ms. Dunn’s complete failure to consider the petitioner’s submissions in the motion to compel in the Board’s decision dated November 12, 2013 regarding the improper and inappropriate matters raised by the opposer, *See* Reconsideration Issue 8.

GROUND 34: The panel and Ms. Dunn’s complete failure to consider the petitioner’s submissions in the motion to compel in the Board’s decision dated November 12, 2013 regarding Chinese Walls and the inconsequential effect of the resumption of proceedings after one year and the opposer’s change of legal counsel on the applicant’s “meet and confer” attempts. *See* Reconsideration Issue 11.

GROUND 35: The panel and Ms. Dunn’s complete failure to provide a legal definition of the word “abuse,” both as a verb and a noun, in the context of abusive litigation tactics during discovery which warrant sanctions, in their decision dated November 12, 2013. *See* Reconsideration Issue 21.

Pattern 2: The Panel and Ms. Dunn's unfair, abusive and apparently biased application of the Board's powers to impose sanctions under Fed. R. Civ. P. 11

To avoid repetition, petitioner submits **GROUND 36-41**, *infra*, violate § 557(c)(3) of the APA. Such bullying and patently unfair conduct evidences a clear failure to comply with procedural and due process requirements, denies the petitioner the right to a fair trial, violates USPTO legal policy (*Catchpole, supra*), brings the judiciary into disrepute, subverts the fair administration of justice and undermines the integrity of the judiciary. Pursuant to Fed. R. Civ. P. 11(b)(1), (b)(2), and (b)(3), petitioner submits, relying on each of the grounds articulated in this petition, that this proceeding exemplifies one of the very rare cases in which members of a court or tribunal (in this case the Board) have formed an agreement of two or more persons to engage in judicial misconduct in furtherance of, inter alia, Ennis' "enforcement measures based on an unreasonable interpretation of the scope of their rights [in its COLORWORX Mark] for the purpose of intimidating potential violators into compliance with the mark owner's demands." *Report to Congress*, at 1. Further, on the record, one of the adjudicators, Ms. Dunn, has taken a number of concrete steps or committed a number of overt acts in furtherance of the scheme. Petitioner also submits the panel and Ms. Dunn's pattern of ordering sanctions reveals that it is in large part acting out of pique, revenge and otherwise bad faith, in response to the petitioner's critical (but in substance justified) comments in the pleadings. *Quirk, supra* (If a judge acts out of pique or to exact revenge, the judge's decision loses the protection of the "mere legal error" rule).

GROUND 36: The panel and Ms. Dunn abused the Rule 11 sanctions power by barring the petitioner from "seeking to amend the petition to cancel." Doc #27, at 9. Petitioner relies on Ennis' discovery responses and the following two Board authorities. Doc. #26. *Turbo Sportswear, Inc. v. Marmot Mountain Ltd.*, 77 U.S.P.Q.2d 1152 (T.T.A.B. 2005) is authority for the proposition that amendment of pleadings can be allowed for addition of fraud claims based on evidence discovered during the testimony period. Ennis' apparently false written disclosures and discovery responses emanate from the discovery period, with ample time for further discovery by

both parties. Secondly, motions for leave to amend pleadings filed prior to the plaintiff's testimony period are not found to be prejudicial because discovery is either still open or can be reopened. *Focus 21 Int'l, Inc. v. Pola Kasei Kogyo Kabushiki Kaisha*, 22 U.S.P.Q.2d 1316 (T.T.A.B. 1992).

GROUND 37: The panel and Ms. Dunn abused the Rule 11 sanctions power by failing to particularize its finding that petitioner's conduct in this proceeding was sufficient to attract both sanctions and a warning regarding Fed. R. Civ. P. 11 sanctions. Doc. #27, at 8. While the Board has quoted the entirety of FRCP 11(b), *there is absolutely no link between the provision and petitioner's conduct in this proceeding alleged to constitute grounds for the warning*. It is submitted that, taken at its highest, the most that can reasonably be said is that petitioner made critical submissions in the pleadings which were and are more than substantiated by the evidence as it stood. *See* Docs. #26; Ennis' answers to petitioner's Interrogatories and Requests for Admission cited in Doc #25; and petitioner's Declaration, *infra*.

GROUND 38: The panel and Ms. Dunn's consideration of irrelevant information in its decision dated November 12, 2013 (at 6), that "Applicant has abused the discovery process and is barred from serving further written discovery or filing further motions to compel regarding written discovery." *See Reconsideration Issue 3*.

GROUND 39: The panel and Ms. Dunn abused the Rule 11 sanctions power by ruling that the applicant "abused the discovery process" and, as a result, barring the applicant from conducting further written discovery or filing further motions to compel. Doc. #39, at 6. Firstly, there is no sound legal basis for either the finding or the sanctions. Secondly, it is fundamentally unfair to force a foreign pro se applicant to spend money on discovery depositions to achieve justice. *Catchpole, supra*. *See Reconsideration Issues 3, 10 & 21*.

GROUND 40: The panel and Ms. Dunn's ordering of sanctions against the petitioner simultaneously with the warning about sanctions. Doc. #27, at 7-9; Declaration, *infra*. This is fundamentally unfair as the petitioner was not aware of Fed. R. Civ. P. 11 at the time it filed its

documents; had no warning before sanctions were ordered; and the substance of the relevant comments had a solid legal basis. *See* Doc. #26.

GROUND 41: The panel and Ms. Dunn’s failure to order sanctions against Ennis *sua sponte* or in response to petitioner’s submissions. Docs. #18, 21, 25, 26, 27 & 39. **GROUND 8** is referred to and incorporated by reference.

Pattern 3: The panel and Ms. Dunn’s bad faith intent to limit the petitioner’s time, ability and methods of further amending his claims and taking discovery.

GROUND 42: The petitioner refers to the grounds under Pattern 2, *supra*, and **Reconsideration Issue 4** which are incorporated by reference.

Pattern 4: The panel and Ms. Dunn’s clearly erroneous adjudication of the petitioner’s old, previously served discovery requests as “new requests.”

GROUND 43: The panel and Ms. Dunn refused and failed to consider Ennis’ answers to petitioner’s discovery requests on the ground that they were “new discovery requests” in their decision dated May 15, 2013. Doc #27, at 2. Petitioner points out that no new discovery requests were served on Ennis after the Board made its order suspending proceedings on July 13, 2012. Doc. #13. Ennis’ answers to petitioner’s discovery requests which petitioner filed with the Board as part of his submissions on the pleadings, were served on Ennis on either July 9 or July 10, 2012. Doc. #26.

GROUND 44: The panel and Ms. Dunn refused and failed to consider Ennis’ answers to petitioner’s discovery requests on the ground that they were “new requests” in their decision dated November 12, 2013. *See* Reconsideration Issue 16.

PRAYER

WHEREFORE, for the reasons particularized above, petitioner respectfully submits the Chief Judge, the three-member Board panel, and Interlocutory Attorney, Ms. Dunn, should be disqualified and referred to the appropriate disciplinary forum for investigation of allegations of judicial and attorney misconduct. Further, petitioner respectfully requests the Board to quash, vacate and set aside all of the panel and Ms. Dunn’s decisions in the present proceeding which

show clear errors of law, abuses of discretion and/or procedural deficiencies, such decisions to be referred to the Board's principal reviewing court for adjudication de novo. *Judici officium suum excedenti non paretur.*

Ennis Inc.

v.

Joel L. Beling D/B/A Supa Characters Pty Ltd

**DECLARATION BY JOEL L. BELING IN SUPPORT OF PETITION FOR
DISQUALIFICATION OF THE CHIEF JUDGE OF THE TRADEMARK TRIAL AND
APPEAL BOARD, THE THREE-MEMBER BOARD PANEL ASSIGNED TO
ADJUDICATE ENNIS INC'S MOTION TO DISMISS, AND INTERLOCUTORY
ATTORNEY ELIZABETH DUNN, AND PETITION ALLEGING JUDICIAL AND
ATTORNEY MISCONDUCT**

1. I am the applicant and petitioner in the present proceeding. I submit this declaration pursuant to Trademark Rule 2.20. It contains a statement of the facts relevant to the petition, in support of my Petition to the Director dated June 7, 2013. For the record, I make no allegations of attorney misconduct in this declaration or in the petition to disqualify, *supra*.

2. On April 24, 2012 I participated in the Discovery Conference for this matter along with Mr. Thomas G. Jacks, former attorney for Ennis Inc. ("Ennis"), and Ms. Elizabeth Dunn, Board Interlocutory Attorney. Subjects discussed included the pleadings, priority, settlement, legal representation, ACR (accelerated case resolution), and a stipulation as to service, most of which are discussed in the Board's order dated April 26, 2012.

3. Another subject discussed at the Discovery Conference in this proceeding was whether there were any other similar proceedings on foot. That is, proceedings which involved similar issues to those which were before the Board. Mr. Jacks advised Ms. Dunn and me that there was in fact another similar opposition proceeding on foot that involved Ennis' COLORWORX mark and design, and that his client was the opposer. I asked Mr. Jacks what the issues were and he said

the other mark was COLOR WORKS with a “K-S.” We moved on to different topics for a couple of minutes and then I asked Mr. Jacks what the file number was for the opposition proceeding involving the similar allegations to the present suit and he replied that he did not have the file in front of him. We then moved on to other subjects.

4. For the reasons particularized in my petition to disqualify, I believe that at the time Board Interlocutory attorney, Ms Dunn, wrote the Order, she had, as particularized in paragraphs 2 and 3 of this declaration, “personal knowledge of disputed evidentiary facts concerning the proceeding” when she adjudicated issues related to my motions to compel and should have made a declaration or affidavit concerning the disputed evidentiary issues and disqualified herself or been disqualified by the Board pursuant to 28 U.S.C. § 455(b)(1). I also believe, for the reasons particularized in my petition to disqualify, that Ms. Dunn’s orders in relation to my motions to compel might reasonably question the impartiality of the three-member Board panel and Ms. Dunn pursuant to 28 U.S.C. § 455(a).

5. With respect to my motion to compel in Doc. # 17 of the proceeding file, I had some problems filing the motion through the ESTTA. I emailed Ms. Dunn about this on the 8th July, 2012 (American Eastern Time) and she replied via emails dated the 8th and 9th July, 2012 (American Eastern Time), stating that I should post the document and attach a Certificate of Mailing to show the date the document was posted. *See* Exhibit 1, which contains an email history of Ms. Dunn’s communications with the parties.

6. Significantly, there is no record of Ms. Dunn’s ex parte telephone communications with the opposer following her decision dated July 13, 2012, which she herself initiated on the record. Doc. #13. I believe this conduct, to borrow Ms. Dunn’s own words from her email dated July 9, 2013, “creates the appearance of impropriety.” Exhibit 1. When I met and conferred with Ms. Dunn in my email dated December 5, 2013 in a good faith effort to clarify the particulars of this improper ex parte telephone communication, Ms. Dunn, in her email dated December 6, 2013, refused and failed to answer responsively. I invite Ms. Dunn to comply with § 557(c)(3) of the

Administrative Procedure Act and respond *in detail to each and every issue* I have raised in this Declaration and the petition to disqualify. Where relevant, I also invite Ms. Dunn to respond in an affidavit or declaration.

7. On the morning of the 10th July, 2012 (Australian Eastern Standard Time) I attended the Campellfield Australia Post outlet and posted the motion to compel which is shown in Doc. #17. This motion included the letter I wrote to the opposer dated June 12, 2012, which is the basis of the Board's denial of the motion to compel on the basis that I failed to meet and confer with the opposer in good faith. Doc. #39. My letter dated June 12, 2012 is marked as Exhibit 2 and is also shown in Doc. #17. At the time I signed the Certificate of Mailing dated 10th July, 2012, I was not aware that Board proceedings are run on American Eastern Time and I signed the Certificate of Mailing according to Australian Eastern Standard Time, which would have been on the 9th July, 2012, American Eastern Time. *See* Doc. #26 for other examples. I posted the motion to compel and Exhibit 2 to via standard international post as I could not afford to use international registered mail or international express post.

8. At the time of filing my motion to compel in Doc. #17 and motion to exceed the page limit in Doc. #14, and to this day, Ennis' failure to cooperate in discovery and produce requested documents in a reasonably timely fashion or at all has been very stressful, frustrating, costly and time-consuming.

9. At the time of filing my second amended petition to cancel (Doc. #18) and opposition to the motion to dismiss (Doc. #21), I was not aware of how Fed. R. Civ. P. 11 operated in practice. I am not certain, because of the delay of some 15 months, but if my memory serves me correctly, I do not believe I had even read Fed. R. Civ. P. 11 at the time I filed my pleadings.

10. Finally, where relevant, I invite the Chief Judge and the three-member Board panel to reply to my filings and declaration by affidavit or declaration.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief. Executed this 10th day of December, 2013.

Subject: RE: Opposition No. 91203884

Dear Ms Dunn,

On page 9 of your ruling dated July 12, 2013, you ordered as follows: "Ennis is ordered to inform the Board by phone at the number listed above when its answer has been filed. At that time the Board will reset dates in this consolidated proceeding." I invite you to provide an explanation as to why you initiated an ex parte communication with a party to the litigation by a medium of communication which was inaccessible to the other party when you would have received Ennis' answer via the ESTTA. I also invite you to explain in detail to whom you spoke from or representing Ennis, the length of the conversation, and the subject matter of the conversation.

Furthermore, I note that the Board decision dated May 15, 2013 signed by you and you alone was a motion potentially dispositive of the proceeding- a fact acknowledged by you on page 3 of the decision. Therefore, and please correct me if I am wrong, it would appear you had absolutely no authority to adjudicate, let alone sign, the order pursuant to Trademark Rule 2.127(c). I invite you to explain with reference to authority the legal basis for your involvement in acting on, adjudicating and signing the Board's decision dated May 15, 2013.

In addition, you have stated below that there have been no administrative trademark judges adjudicating or involved in any of the motions filed in this proceeding. The first sentence on page 4 of the ruling begins with the subject pronoun "We." I invite you to list the names of the other adjudicators to whom you referred. I also invite you to list the names of each person with whom you consulted to adjudicate the decision signed by you dated May 15, 2013. Further, I renew my request to you to list the names of the panel of three administrative trademark judges with whom you have consulted in this proceeding.

Finally, I seek confirmation that at all material times while adjudicating motions in the present proceeding, you were familiar with and understood the rules of natural justice - the rule against bias (*nemo iudex in causa sua*) and the right to a fair hearing (*audi alteram partem*) - and the Model Code of Conduct for United States Judges and that these applied to you in the present proceeding since you were authorized to perform judicial functions.

I again advise I will be relying on this email. I thank you in advance for your co-operation.

Mr Beling

Subject: RE: Opposition No. 91203884

Dear Mr. Beling,

The Chief Judge assigns a panel of three administrative trademark judges when trial and briefing has concluded, and the case is ready for final decision. Because consolidated Opp. No. 91203884 remains in the discovery stage, no panel has been assigned.

Pursuant to Trademark Rule 2.127(c) "Interlocutory motions, requests, and other matters not actually or potentially dispositive of a proceeding may be acted upon by a single Administrative Trademark Judge of the Trademark Trial and Appeal Board or by an Interlocutory Attorney of the Board to whom authority so to act has been delegated." I am the Board attorney assigned to this proceeding, I have issued interlocutory orders, and my name appears at the beginning of those orders.

A request for disqualification of Board attorneys or judges is uncommon and there is no established practice for submitting such a request. If you have a complaint about my performance, you may contact the Managing Interlocutory Attorney, Kenneth Solomon, who is my direct supervisor. His phone number is 571-272-4295 and his email address is Kenneth.Solomon@uspto.gov.

Dear Ms Dunn,

Can you please advise me:

1. the procedure for filing a petition for judicial disqualification, including the Trademark Rule of Practice under which to file the petition; and
2. the names of the three administrative trademark judges who have been assigned to this proceeding by the Chief Judge. I rely on the Board's duty to be open and transparent in its decision-making.

For completeness, I will be relying on this email in said petition.

Thank you,

Mr Beling

Dear Mr. Beling,

The procedure for deposition for written questions is appropriate to witnesses located outside the United States, not the parties who wish to depose them. It is not correct that the deposition on written questions procedure avoids the expense of a court reporter and transcription. Once the parties have agreed on the content of the written deposition questions, the deposing party hires a court reporter to swear in the witness, read the questions, record the answers, and produce the written transcript. See Trademark Rule 2.124.

If you wish to avoid personal travel expenses, you may file a motion to conduct oral depositions by telephone. As with any deposition, you will need to arrange and pay for a court reporter to swear in the witnesses, record the testimony, and produce the written transcript. In lieu of the court reporter reading the written questions, you will ask the questions yourself by phone, and counsel for Ennis may be present in person or by telephone for cross-examination.

I have provided this procedural information by email, with copies to opposing counsel, but as you have previously been advised, the Board proceeding must be conducted on the written record. Please do not respond to this message, and be sure to file your motion in the proceeding file.

Subject: RE: Opposition No. 91203884

Dear Ms Dunn,

I refer to page 6 of your decision dated November 12, 2013, relevantly reproduced below:

"Applicant has abused the discovery process and is barred from serving further written discovery or filing further motions to compel regarding written discovery. If applicant wishes to schedule discovery depositions, it may do so."

As a procedural matter, I seek clarification of the following issues:

1. Whether I am allowed to serve depositions on written questions on some of the opposer's witnesses. The basis for the request is, amongst other things, these witnesses' claimed memory loss regarding the creation of the opposer's COLORWORX Mark and design, which is relevant to my fraud claims;
2. The procedure regarding scheduling discovery depositions of the opposer's witnesses. As a foreign litigant, I cannot afford the cost to fly to the United States, hiring conference rooms, notaries, recording equipment, court reporters, etc, and seek the Board's leave to conduct depositions on written questions. As you are aware, I am an impoverished pro se litigant opposed by Ennis, a large, high net worth American corporation represented by Chalker Flores, LLP, a powerful law firm of intellectual property specialists and I am having difficulty completely understanding American law and procedure. I note that you made the opposer's responses to my Third Request for Admissions of record (see TTABVue Doc. #26) and I would like to explore these issues further in discovery. I submit that my request accords with procedural fairness, natural justice and my right to a fair trial, including a fair discovery period.

I thank you in anticipation of your assistance.

The Board's limited resources do not permit expending effort to compel production of information which has already been produced.

Failure to follow the rule cited in the order may result in sanctions.

The Board now bars further email communications. Among other things, it delays the Board's issuance of orders on contested motions.

As stated in the order, proceedings are suspended pending the Board's decision on the motion.

Hello,

I got back from vacation yesterday. I will be issuing a suspension order on the motion to compel, and that will bar any other motion being filed. As the Board has previously advised, we will not address piecemeal filings.

I have not looked at the file in detail but it appears that the motion to compel was ready for decision on 7/15, and it will probably be decided by September 30. This is an ESTIMATE.

Thank you.

v.

Joel L. Beling D/B/A Supa Characters Pty Ltd

MOTION FOR SUSPENSION OF PROCEEDINGS

Petitioner, Joel L. Beling, pursuant to Trademark Rule 2.117(c) and TBMP § 510, hereby files this motion for suspension of proceedings for six (6) months following the Board's decision in respect of the above petition for disqualification and the motion for reconsideration dated December 10, 2013, filed herewith (whichever is first decided), pending an appeal to the Court of Appeals for the Federal Circuit.

Petitioner asserts "good cause" as the basis of the motion, namely the prejudice the petitioner will suffer if its appeal is not heard in a timely fashion. As the basis for its submissions on prejudice, petitioner refers the Board to Patterns 1-3 (inclusive) in the petition for disqualification, *supra*, which are incorporated by reference. Petitioner submits this motion prematurely on the basis of the Board's previous rulings, particularized in the petition for disqualification.

This petition, and the likely appeal, is conditional on the relief sought in the petition for disqualification and the motion for reconsideration not being granted by the Board. In the appeal, petitioner will be relying on Rules 18 and 21 of the Federal Rules of Appellate Procedure, which, it is envisaged, will take some time to prepare given the large record in the current proceeding.

PRAYER

For the above reasons, petitioner seeks the suspension of proceedings for six (6) months following the Board's decision in respect of the above petition for disqualification and the motion for reconsideration dated December 10, 2013, filed herewith (whichever is first decided), pending an appeal to the Court of Appeals for the Federal Circuit.

Dated: December 10, 2013

Respectfully submitted,

By: /Joel Beling/

v.

Joel L. Beling d/b/a Supa Characters Pty Ltd

APPLICANT'S REPLY TO DOC. #64

Applicant, Joel Beling, hereby files this reply to the opposer's Doc. #64 and respectfully requests the Board to consider the following issues.¹

I. THE OPPOSER'S PATTERN OF FAILING TO COOPERATE AND RESPOND

Opposer has an extensive prior history of failing to cooperate and respond to applicant's motions and communications. Opposer failed to respond to applicant's first two attempts to meet and confer in relation to the current motion dated January 14 and 16, 2014 (*see* Doc. #63, Ex. 1), as well as to applicant's Docs. #8, 40, 41, 42, 45, 46, 48, 50, 51, 52, 60, and 61, all of which the opposer apparently conceded as meritorious pursuant to Trademark Rule 2.127(a).

With respect to Exhibit C of opposer's response, opposer's email clearly states, "I hope to have an answer by the end of the week." Applicant waited for this implied deadline to pass, and then a further period of four days, but, consistent with opposer's previous abusive litigation tactics of *broken promises*, *stalling* and *no answer*, opposer failed to respond. *See* Opposer's 30 Alleged Abusive Trademark Litigation Tactics in Discovery in Doc. #40, at 15-19. Opposer now asserts, using the abusive litigation tactics of *blame the applicant* and *bad grammar*, that applicant was somehow mistaken and that the opposer's phrase "by the end of the week" actually meant "by the end of next week or some week de futuro." *Id.*

¹ For the record, the applicant alleges no attorney misconduct in this motion against Ennis Inc.'s current and former attorneys.

Opposer further criticizes applicant for failing to contact opposer to get an update or discuss applicant's proposed stipulation between February 5, 2014 and filing the motion on February 11, 2014. It is not applicant's duty to chase opposer when a response from opposer is necessary and reasonably required, and opposer has again clearly violated its duty to cooperate with the opposing party, a pattern of conduct which has been evident since the commencement of litigation, when opposer undertook "enforcement measures based on an unreasonable interpretation of the scope of [its] rights for the purpose of intimidating [the applicant] into compliance with the [opposer's] demands." Office of Governmental Affairs—USPTO's *Report to Congress: Trademark Litigation Tactics and Federal Government Services to Protect Trademarks and Prevent Counterfeiting* (April 2011) ("*Report to Congress*"), at 1. See also Reconsideration Issue 22 in Doc. #40, at 21-24 and opposer's settlement offer dated June 25, 2012 in Ex. 6, in which opposer offered to completely withdraw its opposition in exchange for the withdrawal of applicant's cancellation petition. Applicant hereby renews its submission on a new law regarding settlement offers. In short, an attorney's word is his bond, and if opposer's attorney states he hopes "to have an answer by the end of the week," it is incumbent on him, not the applicant, to advise if this situation changes.

II. CREATING A LEVEL PLAYING FIELD: THE TALE OF THE TAPE

Firstly, the entirety of opposer's response and cross-motion should be denied because they completely fail to address the basis for applicant's motion, namely, the USPTO legal policy articulated in the *Report to Congress*, which both opposer and the Board are avoiding like the plague. The *Report* (at 20) impliedly raised the issue of aggressive dilatory litigation tactics by trademark owners on the intellectual property legal community and small business and individuals in actual litigation:

(iv) Size and Resource Imbalances

One commenter acknowledged that trademark owners should have the right to protect their marks, but stated that the *aggressive tactics used by overreachers presents a problem for the entire intellectual property community by threatening legitimate activities and clogging the legal system with invalid claims*. Another commenter noted that "small companies and individuals are placed in a difficult position where surrender of valid trademarks that are being lawfully used is the only rational financially-feasible option available" (emphasis added).

Applicant raised this issue with opposer in its email dated February 23, 2014 (*see* Ex. 1), but opposer, using a variation of the abusive litigation tactic of *concealment of evidence*, concealed the email from the Board in its response. Doc. #40. at 16. In this email, applicant clearly spelled out the basis for creating a level playing field, but opposer ignored the email in an attempt to preserve and reinforce its advantages in size, resources and legal skills:

Mr Chalker,

Your request for mutual stipulations is predicated on a number of false assumptions, namely, that the parties have equal resources, time and legal knowledge.

My company's working capital is about \$150.00, my company earned \$0 the last financial year, I cannot afford a lawyer, and this is my first American case. By contrast, Ennis has \$150 million in working capital, earned almost \$25 million (net) the last financial year, and has engaged a specialist American legal counsel who has appeared in at least 100 trials.

When my company has \$150 million in working capital and earned almost \$25 million in the previous financial year, and either myself or the American lawyers I engage have appeared in at least 100 trials, I will happily reconsider your request for mutual stipulations.

In the interim, I respectfully refer you to the USPTO's 2011 *Report to Congress*, regarding the legal policy governing abusive litigation tactics in trademark proceedings between corporations and small businesses.

Mr Beling

Applicant's Email to Opposer dated February 23, 2014.

Thus, a party-neutral stipulation or order, as proposed by opposer, would only be wholly appropriate *if and only if the parties had equal or similar sizes and resources*. Since the parties do not have equal or similar sizes or resources, the Board should, pursuant to USPTO policy as articulated in the *Report to Congress*, create a level playing field by granting applicant's motion and denying opposer's cross-motion.

Secondly, applicant's motion is not premature because, if the Board denies the motion (which would be contrary to USPTO policy as articulated in the *Report to Congress*), applicant will need time to learn the rules concerning the introduction of evidence. Opposer claims applicant's motion is 89 days

premature yet opposer's specialist legal counsel, as shown in Exhibit 2,² has had *almost 20 years* to become *au fait* with the rules for the introduction of evidence in Board *inter partes* proceedings. By contrast, this is applicant's first American case.

**III. PROPOSED NEW LAW ON THE BOARD'S EXERCISE OF DISCRETION IN
PROCEEDINGS INVOLVING CORPORATIONS AND SMALL BUSINESSES/INDIVIDUALS
IN REPLY TO OPPOSER'S SUBMISSIONS REGARDING PARTY-NEUTRAL ORDERS**

Applicant makes the following submissions pursuant to the legal policy articulated in the *Report to Congress* and Fed. R. Civ. P. 11(b)(1), (b)(2), and (b)(3), with a view to creating a new law protecting trademark applicants from abusive litigation tactics. Applicant refers the Board to a number of helpful suggestions "to discourage or prevent aggressive trademark litigation tactics," discussed in the *Report to Congress*, which are reproduced in Figure 1, *infra*.

² www.chalkerflores.com/chalker-daniel-j

(v) Suggestions for USPTO or TTAB Actions

Even though relatively few respondents had direct experience with litigation in the TTAB or the courts, many nonetheless provided suggested actions for USPTO and TTAB, or the courts, to consider. Most commenters opined that USPTO has a responsibility to do something to discourage or prevent aggressive trademark litigation tactics, with a minority stating that this

³⁴ According to the *AIPLA Report of the Economic Survey*, 2009, on average, law firms charge \$1,440 to perform a trademark clearance search, analysis, and opinion, \$867 to prepare and file a trademark application, and \$1,678 for prosecution of a trademark registration. These costs are in addition to a wide variety of advertising or marketing expenses used to promote a mark.

should be left to the courts. Some commenters expressed the viewpoint that the issue was the sole responsibility of the USPTO.

Many commenters suggested that the TTAB amend its rules to provide for sanctions against such tactics and to proactively prevent such tactics. One commenter proposed additional scrutiny for parties “known to use” such tactics and another proposed that USPTO substantially increase fees for filing oppositions and cancellations, with a reduced fee for smaller entities. Others proposed that the agency encourage settlement agreements to lessen the burden on the parties, and closely monitor the progress of proceedings to prevent undue delay and costs, with one commenter opining that the duration of the average *inter partes* proceeding is a powerful incentive for a small business to concede.

The comments included several suggestions that USPTO raise awareness of the protections available from and provide information on how to respond to aggressive tactics.

Figure 1. Suggestions for USPTO or TTAB Actions. *Report to Congress*, at 20-21.

In this spirit, applicant submits that the rule laid down in *McDermott v. San Francisco Women's Motorcycle Contingent*, 81 USPQ2d 1212, 1212 n.2 (TTAB 2006), which requires strict compliance with the Trademark Rules of Practice and, where applicable, the Federal Rules of Civil Procedure, by all parties before the Board, whether or not they are represented by counsel, is bad law. It is respectfully submitted that a better, more egalitarian law should require that the Board *must* adopt a flexible approach to decision-making against the legally represented party where a pro se applicant (either an individual or small business) has a significant legal background and a very flexible approach to decision-making

against the legally represented party where a pro se applicant (either an individual or small business) does not have a significant legal background. The Trademark Rules of Practice, Federal Rules of Civil Procedure and Trademark Board Manual of Procedure are highly complex and technical documents with which, as this proceeding amply demonstrates, even experienced American attorneys who are intellectual property specialists and the Board itself cannot competently comply. Docs. #34 & 35, with respect to the opposer's erroneous designation of an expert witness and Docs. #27 & 41, with respect to the Board Interlocutory attorney improperly signing the Board's May 15, 2013 decision on a potentially dispositive motion contrary to Trademark Rule 2.127(c), which has rendered the decision on the pleadings fatally flawed and rendered all documents filed and ruled on thereafter null and void, significantly wasting the parties' time, money and effort and necessitating a rehearing.

In this light, consistent with the letter and spirit of Trademark Rule 2.123(a)(2), applicant seeks leave to introduce its evidence during the relevant testimony periods by way of declaration(s) or affidavit(s), without the need to file Notices of Reliance, with the opposer granted leave to object to any aspect of the applicant's testimony or evidence during the relevant testimony period and to cross-examine via written questions as provided by Trademark Rule 2.124. With respect to the opposer's testimony and evidence, opposer has not shown good cause for departing from current Board procedure under Trademark Rule 2.123(a)(1) for local parties introducing testimony and evidence by way of testimonial deposition. In addition to its gargantuan size and resource advantages, opposer is simply seeking to piggyback atop applicant's motion to procure further procedural, tactical and financial benefits, thereby exacerbating the inequities between the parties. Finally, opposer has completely failed to address Trademark Rules 2.123(a)(2) and 2.124 in its response.

IV. CONCLUSION

Opposer's response and cross-motion are without merit and inequitable insofar as opposer is attempting to exploit its preexisting size, resource and legal advantages in order to procure further procedural, tactical and financial benefits. The legal policy expressed in the *Report to Congress* and the Trademark Rules clearly support an approach to the introduction of testimony and evidence which does

not afford applicant preferential treatment, but rather, attempts to create a more level playing field between the parties. Applicant's proposed new law is one step in this direction. Thus, applicant requests that the Board:

- (1) Grant Applicant's Motion in its entirety;
- (2) Deny Opposer's Cross-Motion in its entirety;
- (3) Grant Applicant leave to cross-examine opposer's witnesses by telephone if opposer is ordered to introduce its testimony and evidence by deposition upon oral examination.

Dated: March 2, 2014

Respectfully submitted,

By: /Joel Beling/

Mr Chalker,

Your request for mutual stipulations is predicated on a number of false assumptions, namely, that the parties have equal resources, time and legal knowledge.

My company's working capital is about \$150.00, my company earned \$0 the last financial year, I cannot afford a lawyer, and this is my first American case. By contrast, Ennis has \$150 million in working capital, earned almost \$25 million (net) the last financial year, and has engaged a specialist American legal counsel who has appeared in at least 100 trials.

When my company has \$150 million in working capital and earned almost \$25 million in the previous financial year, and either myself or the American lawyers I engage have appeared in at least 100 trials, I will happily reconsider your request for mutual stipulations.

In the interim, I respectfully refer you to the USPTO's 2011 *Report to Congress*, regarding the legal policy governing abusive litigation tactics in trademark proceedings between corporations and small businesses.

Mr Beling

Mr. Beling,

As I previously indicated, the stipulations must be mutual. If you cannot agree to that, we will oppose all your efforts to circumvent the rules.

I have no idea what you are referring to with your statement "meet and confer with respect to Mr. Osterloh's discovery deposition."

v.

Joel L. Beling d/b/a Supa Characters Pty Ltd

**APPLICANT/PETITIONER’S MOTION FOR DISCOVERY PURSUANT TO FED. RULE. CIV.
P 56(f)**

Applicant/Petitioner, Joel Beling, hereby files this motion for discovery pursuant to Federal Rule of Civil Procedure 56(f) and TBMP § 528.06 and respectfully requests the Board to consider the following issues.

**APPLICANT/PETITIONER CANNOT COMPREHENSIVELY OPPOSE THE MOTIONS
WITHOUT FIRST TAKING DISCOVERY¹**

Ennis has filed two motions for summary judgment in respect of the opposition and cancellation proceedings, respectively. Docs. #69 & 70. Applicant/petitioner submits, with respect to some areas of Ennis’ two motions for summary judgment, that it cannot comprehensively oppose the motions without first taking discovery. Applicant/petitioner refers the Board to the Declaration of Joel Beling dated March 15, 2014, *infra*, which shows that applicant/petitioner cannot present by affidavit or declaration facts essential to comprehensively justify applicant/petitioner’s opposition to the motions for summary judgment and that the information sought to be discovered is completely within the control of Ennis and not available by other means. TBMP § 528.06: “In lieu of an affidavit, a party may submit a declaration meeting the requirements of 37 CFR § 2.20. [Note 5.] ”

In particular, the areas of inquiry needed to obtain the information necessary to enable applicant/petitioner to respond to the motions for summary judgment are the following: (1) the creation of

¹ For reasons as to why these issues were not explored in discovery proper, *see* Docs. #60 & 61.

Ennis' COLORWORX Mark, including the term COLORWORX and the design element; (2) the creation of the word COLORWORX, including its meaning, by other traders prior to Ennis' adoption of the term in its mark the subject of this proceeding; and (3) the creation of the cross-hairs design, including its meaning, by other traders prior to Ennis' adoption of the design.

PRAYER

Applicant/petitioner respectfully seeks a reasonable time to take the discovery as particularized above and moves that proceedings be suspended pending such discovery.

Dated: March 15, 2014

Respectfully submitted,

By: /Joel Beling/

Ennis Inc.

v.

Joel L. Beling d/b/a Supa Characters Pty Ltd

**DECLARATION BY JOEL L. BELING IN SUPPORT OF MOTION FOR DISCOVERY
PURSUANT TO FED. RULE. CIV. P 56(f)**

1. I am the applicant and petitioner in the present proceeding. I submit this declaration pursuant to Trademark Rule 2.20. It contains a statement of the facts relevant to the motion, in support of my motion for discovery pursuant to Fed. Rule. Civ. P 56(f) dated March 15, 2014.
2. For the record, I allege no attorney misconduct in this motion against Ennis Inc.'s current and former attorneys.
3. I believe that, with respect to some areas of Ennis' two motions for summary judgment, that I cannot comprehensively oppose the motions without first taking discovery.
4. I believe that the following facts show that I cannot present by affidavit or declaration facts essential to comprehensively justify my opposition to the motions for summary judgment and that the information sought is completely within the control of Ennis and not available by other means.
5. In particular, the areas of inquiry needed to obtain the information necessary to enable me to comprehensively respond to the motions for summary judgment are the following: (1) the creation of Ennis' COLORWORX Mark, including the term COLORWORX and the design element; (2) the creation of the word COLORWORX, including its meaning, by other traders prior to Ennis' adoption of the term in its mark the subject of this proceeding; and (3) the creation of the cross-hairs design, including its meaning, by other traders prior to Ennis' adoption of the design.

6. With respect to area of inquiry no. (1), the creation of Ennis' COLORWORX Mark, including the term COLORWORX and the design element, Ennis has provided seven (7) different creation stories to explain the origins of the COLORWORX component of its Mark at various times during the proceeding:

Version One: “We know the answer but object to answering that question on four grounds.”

Interrogatory No. 14 in applicant/petitioner's First Set of Interrogatories to opposer/registrant served on June 12, 2012 and the response (Doc. #26):

INTERROGATORY NO. 14: Describe in detail the rationale, philosophy and ideas behind the selection, design and adoption of each feature and/or part of the “COLORWORX” mark, including the logo, words, style of lettering, visual appearance, sound, compound/composite nature and misspelling.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial

Version Two: “We alone create the word Colorworx.” Interrogatory No. 8 in applicant/petitioner's

First Set of Interrogatories to opposer/registrant served on June 12, 2012 (Doc. #26):

INTERROGATORY NO. 8: Describe in detail how the compound word “COLORWORX” in your registration differs from the words “Color Works” in terms of meaning, appearance, sound and commercial impression.

RESPONSE: The mark “COLORWORX” differs from the words “Color Works” in terms of meaning, appearance, sound and commercial impression because the mark “COLORWORX” is a neologism and had no meaning prior to its adoption by Registrant.

Version Three: “We copied the word Colorworx from another trader or traders.” In its motion to dismiss, the opposer/registrant argued:

General trademarking principals maintain that once a mark has been abandoned, the mark returns to the public domain and may be appropriated for use by other actors in the marketplace in accordance with basic rules of trademark priority. See 15 U.S.C. § 1115(b)(2); *ITC Ltd. v. Punchgini, Inc.*, 482 F.3d 135, 147 (2d Cir. 2007). Once Creative Hairdresser's, Inc. abandoned its mark in the year 2000, nearly eight (8) years before the USPTO issued a registration for the Mark, Registrant and all other persons and entities seeking to use such word mark were free to use the term “Colorworx” in commerce on or in connection with their goods or services [Doc. #19 ¶ 20].

Here, Ennis argues not only that it was “free to use the term ‘Colorworx’” but even cites statute and case law to justify its position that it had “appropriated [the Colorworx Mark] for use...in the marketplace in accordance with basic rules of trademark priority.” *Loc. Cit.*

Version Four: “We know the answer but, despite giving you three different answers as to how we created the Colorworx portion of our Mark in the past, we again object to answering that question on four grounds.” Ennis’ response to Interrogatory No. 25 in Applicant’s Second Set of Interrogatories to Opposer dated June 27, 2013:

INTERROGATORY NO. 25: You have given some conflicting answers in previous discovery requests as to how exactly you created your COLORWORX mark and the design element. Once and for all, describe in detail how you created your COLORWORX mark and the design element?

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

See Doc. #40 for full document.

Version Five: “Lisa Goebel, Bill Tignanelli, David Crysler and Cindy Wronski each contributed to the selection and adoption of the term COLORWORX and Rachel Maples designed the logo.” In Ennis’ supplemented responses to applicant’s Interrogatories and Requests for Production dated August 19, 2013 (Doc. #33), Ennis answered as follows:

INTERROGATORY NO. 13: Describe in detail the role and contributions made that each person identified in Interrogatory number 12 played in the selection, design and adoption of the “COLORWORX” mark.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Lisa Goebel, Bill Tignanelli, David Crysler and Cindy Wronski contributed to the selection and adoption of the mark designed by Rachel Maples.

Version Six: The Amnesia Defense or “We don’t remember.” In its response dated September 16, 2013 to the applicant’s response to the Board inquiry with respect to the creation of its COLORWORX Mark and the design element, the opposer stated that it “does not remember specific details or only has a few documents from the time in question” and “does not remember specific details or have access to such details from the time in question.” Doc. #37, at 5, 9 & 11. *Res ipsa loquitur.*

Version Seven: “Lisa Goebel, Bill Tignanelli, David Crysler and Cindy Wronski in fact did not contribute to the selection and adoption of the term COLORWORX as we previously said, but some people who used to work at a subsidiary of our company a long time ago created the Mark

but we do not know who they are and cannot identify them from company records.”² In its answer to Question 4 in Ennis’ correspondence dated January 13, 2014, *infra* (see Doc. #66, for the full document), Ennis gave the following response:

QUESTION 4: Describe in detail how Ennis created the COLORWORX component of its Mark?

ANSWER: The following answer is designated **HIGHLY CONFIDENTIAL** pursuant to the Protective Order signed by the Parties on January 10, 2014.

The word component of the COLORWORX mark was selected by InstaColor personnel in Denver before the InstaColor product line was moved to Michigan in 2002 and re-branded to COLORWORX. Steven Osterloh, Bill Tignanelli, Lisa Goebel and Cindy Wronski do not know who created the word component of the COLORWORX mark. Rachel Maples, a former graphic designer for Ennis, designed the logo component of the COLORWORX mark. David Crysler, Bill Tignanelli, Lisa Goebel and Steven Osterloh participated in selecting the logo component of the COLORWORX mark in July 2002. Thereafter, the COLORWORX mark was incorporated into marketing materials to promote the re-branded product line and have been in continuous use since.

In his deposition, Steven Osterloh said it was possible to ascertain who possibly created the word portion of the COLORWORX Mark. Osterloh Dep. 13:54:14 19-22, *infra*.

7. I also rely on the opposer’s responses to Requests 93-98 (inclusive) of the Applicant’s Third Request for Admissions to the opposer, which are highly inculpatory and demonstrate significant dishonesty in Ennis’ discovery responses. Doc. #26.

8. Thus, I believe that discovery is needed to comprehensively oppose Ennis’ motions for summary judgment as Ennis has still not identified – that is, provided the *name(s)* of an individual or group of individuals - who in fact created the Colorworx portion of its Mark despite providing seven (7) different answers in response to questions or issues raised in this proceeding.

² This answer was (over)designated by Ennis as **HIGHLY CONFIDENTIAL** pursuant to the parties’ Protective Order dated January 10, 2014, but was declassified by Ennis after negotiations. See Exhibit 1.

9. With respect to the design element, Ennis has refused to answer questions concerning other traders' use of the cross-hairs logo. The following examples from the deposition of Steven Osterloh on January 13, 2014 are illustrative:³

14:29:41 19 Q. (BY MR. BELING) Mr. Osterloh, I'll discuss
14:29:43 20 Exhibit 11, which is printouts from a website called
14:29:47 21 smartpress.com on the 7th of January, 2014, which I've
14:29:53 22 served on Mr. Chalker, and it's relevant to the creation
14:29:57 23 of the design portion of your mark.
14:30:03 24 Do you recall reading any documents from
14:30:07 25 the Smart Press company and their sales of printed goods

14:30:15 1 and services, such as business cards, brochures,
14:30:19 2 envelopes and calendars?
14:30:20 3 MR. CHALKER: Object to the question --
14:30:21 4 Well, first object to the exhibit, as it is not before
14:30:25 5 Mr. Osterloh. Object to the question, as it is outside
14:30:29 6 the scope of the Notice of Deposition and irrelevant.
14:30:33 7 A. No, I do not recall it.

14:30:44 8 Q. (BY MR. BELING) Mr. Osterloh, how would you
14:30:46 9 describe the design portion of Ennis's COLORWORX mark?
14:30:53 10 A. I would design (sic) it as the four primary
14:30:57 11 colors that are used to -- or that, I'm sorry, that are
14:31:00 12 used in the process known as four-color process
14:31:04 13 printing, and surrounded -- I'm sorry, surrounding a
14:31:10 14 cross hair. I believe it's in a circle.

14:31:12 15 Q. Okay. And what is your opinion concerning the
14:31:18 16 use of the cross hairs logo in printing?
14:31:23 17 A. I don't understand the question.

14:31:28 18 Q. Is that a popular logo or design in the
14:31:32 19 printing industry or are you the only company that uses
14:31:36 20 the cross hairs logo?

14:31:38 21 MR. CHALKER: I object to that question, as
14:31:39 22 it's asking the witness to speculate about facts not
14:31:44 23 into evidence.

14:31:46 24 A. There was two questions there. Can I answer
14:31:48 25 them separately?

14:31:49 1 Q. (BY MR. BELING) Of course.

14:31:50 2 THE WITNESS: Could you repeat them,
14:31:52 3 ma'am?

14:32:05 4 (RECORD READ BY THE REPORTER.)

14:32:05 5 A. As far as popularity, I -- I don't know if it's
14:32:09 6 popular or not. Have I seen that in use by other
14:32:13 7 companies? Yes, I have. But I can't tell you about its
14:32:18 8 popularity.

³ See Exhibit 2 for deposition pages.

14:32:21 9 Q. (BY MR. BELING) Which other companies have you
 14:32:23 10 seen the cross hairs logo used by in the printing
 14:32:28 11 industry?
 14:32:29 12 A. I don't recall those off the top of my head.
 14:32:33 13 Q. But there's at least several?
 14:32:35 14 A. That have used a cross hairs within their logo?
 14:32:39 15 Q. Yes.
 14:32:40 16 A. I would say yes.
 14:32:41 17 Q. Okay. Exhibit 12, which I've served on
 14:32:53 18 Mr. Chalker on the 8th or 9th of January, 2014, contains
 14:32:59 19 printouts which I made from the website fourcolour.com.
 14:33:08 20 And fourcolour.com sells book services or prints books,
 14:33:17 21 and my question is: Are you aware of the Four Colour
 14:33:24 22 Print Group?
 14:33:27 23 MR. CHALKER: Object to the question and
 14:33:29 24 the exhibit, as it's outside the Notice of the
 14:33:31 25 Deposition and it's irrelevant.
 14:33:34 1 A. No, I'm not familiar with them.
 14:33:37 2 Q. (BY MR. BELING) Okay. Do you have any
 14:33:44 3 knowledge of the logo used by the Four Colour Print
 14:33:48 4 Group, which is also a cross hairs logo?
 14:33:51 5 MR. CHALKER: I renew my objection.
 14:33:54 6 A. I am able to see a -- on Exhibit 12, I'm able
 14:33:58 7 to see a black-and-white version of that, yes, I am.
 14:34:02 8 Q. (BY MR. BELING) Okay. So it appears that, like
 14:34:13 9 you said, the cross hairs logo is quite popular in the
 14:34:16 10 printing industry, and that other companies use a
 14:34:19 11 colored version of the cross hairs logo as well?
 14:34:23 12 MR. CHALKER: Object to the question as
 14:34:24 13 leading.
 14:34:25 14 A. I don't believe I admitted or offered factual
 14:34:28 15 information to say that it was popular. I believe I
 14:34:31 16 stated that I've seen it before.
 14:34:37 17 MR. BELING: Madam Court Reporter, can
 14:34:38 18 you please read out the witness's evidence regarding
 14:34:43 19 popularity and the logo -- the cross hairs logo in the
 14:34:48 20 printing industry? It was about two or three minutes
 14:34:50 21 ago.
 14:35:17 22 THE REPORTER: Yes, sir. Give me a minute
 14:35:17 23 to find it.
 14:35:21 24 (RECORD READ BY THE REPORTER.)
 14:35:21 25 Q. (BY MR. BELING) Mr. Osterloh, if I put the
 14:35:24 1 proposition to you that the logo in front of you is, in
 14:35:27 2 fact, colored like the COLORWORX logo, like Ennis's
 14:35:33 3 COLORWORX logo, would you dispute that?
 14:35:36 4 MR. CHALKER: Objection that the exhibit is
 14:35:37 5 not in color; that it calls for Mr. Osterloh to
 14:35:41 6 speculate; and it also assumes evidence that -- or
 14:35:47 7 assumes facts that are not in evidence; and it's related
 14:35:51 8 to -- it's irrelevant to this proceeding.
 14:35:57 9 A. With it being black and white, I would not feel

14:36:00 10 comfortable answering that question.
 14:36:02 11 MR. BELING: Okay. Well, for the record,
 14:36:05 12 I served a color copy on Mr. Chalker on the 8th or 9th
 14:36:10 13 of January, 2014.
 14:36:15 14 MR. BELING: Madam Court Reporter, you've
 14:36:17 15 got the Exhibits 13, 14, and 15, don't you?
 14:36:22 16 THE REPORTER: I have 13 and 15 in front of
 14:36:22 17 me, and I believe Mr. Osterloh saw 14 earlier, sir.
 14:36:22 18 Q. (BY MR. BELING) Mr. Osterloh, does Ennis, Inc.
 14:36:53 19 have any affiliation or ties to any of the businesses
 14:36:57 20 I've questioned you about in the last half an hour to
 14:37:00 21 one hour?
 14:37:01 22 A. Without looking those accounts up specifically
 14:37:04 23 in our account list, I would not know that answer.
 14:37:10 24 Q. But those names that I've mentioned don't ring
 14:37:13 25 a bell?
 14:37:14 1 A. Those names don't ring a bell. But we have
 14:37:18 2 tens of thousands of customers, so that is not out of
 14:37:24 3 the ordinary (emphasis added).

10. With respect to area of inquiry nos. (2) & (3), the creation of the word COLORWORX, including its meaning, by other traders prior to Ennis' adoption of the term in its mark the subject of this proceeding, and the creation of the cross-hairs design, including its meaning, by other traders prior to Ennis' adoption of the design, respectively, Ennis has also refused to answer questions in relation to these topics.

11. Given that I served Ennis with documents relating to these issues in the second week of January, 2014, and Ennis alone knows the answers to the questions, I believe I need to take further discovery in order to comprehensively oppose the motions for summary judgment [since I can only rely on admissions and not denials to discovery requests under TBMP 528.05(a)(1)].

12. Ennis' answers with respect to areas of inquiry (2) and (3) are as follows, again from the Osterloh deposition⁴:

⁴ *Id.*

14:16:39 16 Q. I'll put it to you in more detail, so it may
14:16:44 17 jog your memory. Exhibit 6 is a printout of the website
14:16:50 18 colorworksnyc.com, and Colorworks is spelled with a K-S
14:17:00 19 and it's one word. And it's a printing and retouching
14:17:04 20 business, run by Joe Barna, B-A-R-N-A.
14:17:12 21 Do you recall reading any documents
14:17:14 22 pertaining to that website?
14:17:16 23 MR. CHALKER: I object to the question, as
14:17:17 24 the exhibit is not before Mr. Osterloh, so he can't
14:17:20 25 testify as to what that document may or may not contain
14:17:28 1 MR. BELING: I was asking about his
14:17:29 2 memory of whether he's seen it in the past, not whether
14:17:33 3 he has it now.
14:17:34 4 A. Again, my attorneys have sent all these
14:17:37 5 documents to me. So have I received it? I would say
14:17:40 6 yes. Do I recall that specific document? No, I do not.
14:17:44 7 Q. (BY MR. BELING) Okay. Do you have any evidence
14:17:52 8 to contradict or dispute the fact that Joe Barna has
14:17:59 9 over 30 years' experience in photography and printing
14:18:06 10 using the name Colorworks with a K-S?
14:18:10 11 MR. CHALKER: Object to the question, as
14:18:11 12 it's irrelevant, in that whoever that is has no relation
14:18:15 13 to the -- this proceeding.
14:18:20 14 A. No, I'm not familiar with Mr. Barna or his
14:18:25 15 history.
14:18:26 16 MR. BELING: It's -- it's relevant to the
14:18:27 17 creation of the COLORWORX mark.
14:18:32 18 MR. CHALKER: I disagree, in that
14:18:33 19 Mr. Osterloh has already testified as to the creation of
14:18:36 20 the -- the mark.
14:18:40 21 MR. BELING: And I'm putting contrasting
14:18:42 22 versions to the witness to ascertain his response.
14:18:51 23 Q. (BY MR. BELING) Mr. Osterloh, do you have any
14:18:53 24 evidence to dispute the fact that the Colorworks New
14:18:59 25 York City company offers for sale services, including
14:19:05 1 prints, postcards, and business cards?
14:19:07 2 MR. CHALKER: Object to the question, as
14:19:09 3 it's irrelevant and outside the scope of this proceeding
14:19:14 4 or the Notice of Deposition.
14:19:15 5 A. Again, without looking at those documents, I --
14:19:17 6 I can't say that that is fact. I'm not aware of it.
14:19:21 7 Don't recall.
14:19:22 8 Q. (BY MR. BELING) Okay. All these documents were
14:19:30 9 produced to Mr. Chalker, your legal counsel, so -- and
14:19:35 10 you've given evidence that he's provided you with those
14:19:39 11 documents. So I'm just asking about your memory because
14:19:42 12 of the -- the technical difficulties we have in
14:19:44 13 obtaining the exhibits.
14:19:46 14 MR. CHALKER: I believe that he's testified
14:19:47 15 that he does not remember specifics about those
14:19:50 16 documents.

14:19:57 17 Q. (BY MR. BELING) I'll move on to Exhibit 7,
14:20:00 18 which is printouts from the website colorworx.ca, and
14:20:06 19 the Colorworx is spelled W-O-R-X, which I've served on
14:20:11 20 Mr. Chalker, and the printouts are made on the 7th of
14:20:15 21 January, 2014.
14:20:17 22 Mr. Osterloh, do you have any knowledge
14:20:18 23 about a Canadian company called Colorworx selling
14:20:23 24 printing services, including business cards, flyers,
14:20:29 25 envelopes, and posters?
14:20:31 1 MR. CHALKER: Object to the question, as
14:20:33 2 the exhibit is not before Mr. Osterloh; and also object
14:20:36 3 that it's not relevant to this proceeding and that it
14:20:40 4 falls outside the scope of the discovery notice.
14:20:44 5 A. Was that previously supplied or just supplied
14:20:48 6 as an exhibit?
14:20:49 7 Q. (BY MR. BELING) It was -- the document was
14:20:51 8 served on Mr. Chalker on the 8th or 9th of January 2014,
14:20:57 9 and you have given evidence that you've received all
14:21:02 10 those documents.
14:21:03 11 A. Yes, that is correct. No, but I do not recall
14:21:06 12 reviewing or have recollection of that document.
14:21:09 13 Q. Okay. From your general knowledge as
14:21:15 14 Vice President of Marketing, are you aware that there is
14:21:19 15 a Canadian company called Colorworx, with Colorworx
14:21:24 16 spelled as a single word with R-X, also offering
14:21:28 17 printing services, including business cards, flyers,
14:21:32 18 envelopes and posters, on-line --
14:21:35 19 A. No.
14:21:36 20 Q. -- to other countries, including the
14:21:37 21 United States?
14:21:38 22 A. No, I was not.
14:21:42 23 Q. Okay. Are you aware that Mr. Shawn Barrett, a
14:21:49 24 Canadian citizen, is CEO of Colorworx and that he has
14:21:56 25 owned the COLORWORX brand for 13 years?
14:21:59 1 MR. CHALKER: I object to this line of
14:22:01 2 questioning, as that it's outside the Notice of
14:22:03 3 Deposition and irrelevant.
14:22:04 4 A. No, I have already stated I -- I don't know
14:22:06 5 this company and have no knowledge of it or this Mr.
14:22:10 6 Shawn -- I don't recall his last name. -- that's the CEO
14:22:13 7 of it.
14:22:14 8 Q. (BY MR. BELING) Shawn Barrett.
14:22:16 9 A. No, I have no knowledge of him.
14:22:18 10 Q. Okay. I'll move on to Exhibit 8. And
14:22:31 11 Exhibit 8, which I've served on Mr. Chalker, contains
14:22:36 12 printouts which are made from the website
14:22:39 13 colorworksinc -- That Colorworks is spelled
14:22:42 14 W-O-R-K-S. -- inc.com, and the printout was on the 7th
14:22:50 15 of January.
14:22:53 16 And my question to you, Mr. Osterloh, is:
14:22:57 17 Are you aware of a company called Colorworks, that's

14:23:00 18 R-K-S, Graphics Services, Inc., which offers offset
14:23:07 19 printing, digital printing, and large-format display
14:23:11 20 printing?
14:23:12 21 MR. CHALKER: Object to the question as the
14:23:14 22 exhibit is not before Mr. Osterloh, the line of
14:23:16 23 questioning is irrelevant and out of the scope of the
14:23:20 24 Notice of Deposition.
14:23:22 25 A. No, I do not.

14:23:30 1 Q. (BY MR. BELING) But you've --
14:23:30 2 A. Again -- I apologize. To the best of my
14:23:32 3 recollection, no, I do not.
14:23:34 4 Q. Okay. But you've stated previously you were
14:23:37 5 served with all those -- my discovery production by
14:23:41 6 Mr. Chalker, but you may not have perused it; is that
14:23:45 7 correct?
14:23:45 8 A. No, I didn't say I didn't peruse it. I have
14:23:50 9 been given all those documents. As you can understand,
14:23:54 10 over this couple of year period, there's been hundreds
14:23:57 11 of pages. I don't recall each and every page that I've
14:24:00 12 read, and some of them have been read multiple times. I
14:24:04 13 do not recall this, though. No, I do not.
14:24:07 14 Q. Okay. If I was to say to you that there are
14:24:10 15 some pages out of "The Colorworks Story," and that this
14:24:16 16 particular company created the term "Colorworks" in the
14:24:19 17 early 1990s, would that jog your memory?
14:24:23 18 MR. CHALKER: Object to --
14:24:24 19 A. No, it would not.
14:24:26 20 MR. CHALKER: I object to the question, as
14:24:28 21 it is irrelevant and outside the scope of the Deposition
14:24:32 22 Notice, and Mr. Osterloh has testified that he does not
14:24:38 23 have knowledge about -- or recall specific things about
14:24:41 24 the documents that you have produced.
14:24:47 25 Q. (By MR. BELING) Mr. Osterloh?

14:24:53 1 A. No, I have not.
14:25:01 2 Q. I'll move on to Exhibit 9, which I've also
14:25:06 3 served on Mr. Chalker around the 8th or 9th of January,
14:25:10 4 2014. And Exhibit 9 is printouts which I made from the
14:25:14 5 website ilovetocreate.com.
14:25:19 6 And Mr. Osterloh, do you have any knowledge
14:25:22 7 about a company called I Love to Create, which is
14:25:28 8 selling services related to printed lesson plans and
14:25:36 9 classroom art projects under the term "Colorworks,"
14:25:40 10 "Colorworks" being spelled with a W-O-R-K-S?
14:25:45 11 MR. CHALKER: Object to the question, as
14:25:46 12 the exhibit is not before Mr. Osterloh. Objection to
14:25:49 13 the line of questioning, as it's outside the Notice of
14:25:52 14 Deposition, and it is irrelevant to the proceedings.
14:25:55 15 A. No, I do not have any recollection of that
14:25:58 16 company.

14:26:00 17 Q. (BY MR. BELING) Okay. Moving on to Exhibit 10,
14:26:09 18 which is printouts from the website folders4success.com,
14:26:15 19 on the 7th of January, 2014, which I've served on
14:26:19 20 Mr. Chalker on the 8th or 9th of January, 2014. And
14:26:25 21 this printout shows the term "ColorWorks," with a
14:26:32 22 W-O-R-K-S, being sold by Debbie Carney, who runs a
14:26:42 23 business called New Order Organizers.
14:26:46 24 Mr. Osterloh, are you aware of that
14:26:49 25 business run by Ms. Carney, New Order Organizers?

14:26:53 1 MR. CHALKER: Object to the exhibit, as
14:26:55 2 it's not before Mr. Osterloh. Object to the question,
14:26:59 3 in that it's outside the Notice of Deposition, and also
14:27:03 4 irrelevant to this proceeding.

14:27:06 5 A. I am not.

14:27:15 6 Q. (BY MR. BELING) Mr. Osterloh, are you aware of
14:27:18 7 your -- any obligation or practice to read any exhibits
14:27:22 8 or documents in production relating to the topics listed
14:27:27 9 in the Notice of Deposition prior to arriving today?

14:27:32 10 THE WITNESS: Could you repeat that
14:27:33 11 question, please, ma'am?

14:27:50 12 (RECORD READ BY THE REPORTER.)

14:27:50 13 A. Was I given notice that I needed to read and

14:27:53 14 study? No, I was not. Did I review the documents?

14:27:58 15 Yes, I did. Did I review all hundreds and hundreds of

14:28:04 16 pages? No, I did not. I primarily reviewed the

14:28:07 17 documents that we've submitted over the last few days

14:28:10 18 and over the weekend that we supplied. That was my

14:28:14 19 understanding that the questions would be surrounding

14:28:16 20 those specific topics. You're asking me about topics

14:28:20 21 that I was not expecting to answer.

14:28:23 22 Q. (BY MR. BELING) I'm asking about topics in

14:28:25 23 relation to the creation of the COLORWORX mark.

14:28:28 24 A. Understood.

14:28:29 25 MR. CHALKER: But Mr. Beling, it's our

14:28:31 1 position that the documents that you're presenting, that

14:28:34 2 those are outside of the topics which you put forth in

14:28:39 3 your Notice.

14:28:42 4 MR. BELING: But this goes to the creation

14:28:45 5 of the COLORWORX mark.

14:28:46 6 MR. CHALKER: That was not our

14:28:47 7 interpretation of the topics that you listed. I mean,

14:28:51 8 as -- as the discovery that we supplemented, Ennis was

14:28:57 9 not aware of any searches that were conducted. As a

14:29:01 10 result, I mean, you are producing evidence that they

14:29:07 11 were unaware of. This is the first they've seen of it.

14:29:11 12 You did not include in your Notice that you were going

14:29:18 13 to be asking questions about your document production.

14:29:22 14 MR. BELING: I included in my Notice that

14:29:24 15 I'd be discussing creation of the COLORWORX mark, and

14:29:27 16 these documents --
14:29:27 17 MR. CHALKER: And Mr. Osterloh has
14:29:28 18 testified to that effect.
14:29:41 19 Q. (BY MR. BELING) Mr. Osterloh, I'll discuss
14:29:43 20 Exhibit 11, which is printouts from a website called
14:29:47 21 smartpress.com on the 7th of January, 2014, which I've
14:29:53 22 served on Mr. Chalker, and it's relevant to the creation
14:29:57 23 of the design portion of your mark.
14:30:03 24 Do you recall reading any documents from
14:30:07 25 the Smart Press company and their sales of printed goods

14:30:15 1 and services, such as business cards, brochures,
14:30:19 2 envelopes and calendars?
14:30:20 3 MR. CHALKER: Object to the question --
14:30:21 4 Well, first object to the exhibit, as it is not before
14:30:25 5 Mr. Osterloh. Object to the question, as it is outside
14:30:29 6 the scope of the Notice of Deposition and irrelevant.
14:30:33 7 A. No, I do not recall it.
14:30:44 8 Q. (BY MR. BELING) Mr. Osterloh, how would you
14:30:46 9 describe the design portion of Ennis's COLORWORX mark?
14:30:53 10 A. I would design (sic) it as the four primary
14:30:57 11 colors that are used to -- or that, I'm sorry, that are
14:31:00 12 used in the process known as four-color process
14:31:04 13 printing, and surrounded -- I'm sorry, surrounding a
14:31:10 14 cross hair. I believe it's in a circle.
14:31:12 15 Q. Okay. And what is your opinion concerning the
14:31:18 16 use of the cross hairs logo in printing?
14:31:23 17 A. I don't understand the question.
14:31:28 18 Q. Is that a popular logo or design in the
14:31:32 19 printing industry or are you the only company that uses
14:31:36 20 the cross hairs logo?
14:31:38 21 MR. CHALKER: I object to that question, as
14:31:39 22 it's asking the witness to speculate about facts not
14:31:44 23 into evidence.
14:31:46 24 A. There was two questions there. Can I answer
14:31:48 25 them separately?

14:31:49 1 Q. (BY MR. BELING) Of course.
14:31:50 2 THE WITNESS: Could you repeat them,
14:31:52 3 ma'am?
14:32:05 4 (RECORD READ BY THE REPORTER.)
14:32:05 5 A. As far as popularity, I -- I don't know if it's
14:32:09 6 popular or not. Have I seen that in use by other
14:32:13 7 companies? Yes, I have. But I can't tell you about its
14:32:18 8 popularity.
14:32:21 9 Q. (BY MR. BELING) Which other companies have you
14:32:23 10 seen the cross hairs logo used by in the printing
14:32:28 11 industry?
14:32:29 12 A. I don't recall those off the top of my head.
14:32:33 13 Q. But there's at least several?
14:32:35 14 A. That have used a cross hairs within their logo?

14:32:39 15 Q. Yes.
14:32:40 16 A. I would say yes.
14:32:41 17 Q. Okay. Exhibit 12, which I've served on
14:32:53 18 Mr. Chalker on the 8th or 9th of January, 2014, contains
14:32:59 19 printouts which I made from the website fourcolour.com.
14:33:08 20 And fourcolour.com sells book services or prints books,
14:33:17 21 and my question is: Are you aware of the Four Colour
14:33:24 22 Print Group?
14:33:27 23 MR. CHALKER: Object to the question and
14:33:29 24 the exhibit, as it's outside the Notice of the
14:33:31 25 Deposition and it's irrelevant.
14:33:34 1 A. No, I'm not familiar with them.
14:33:37 2 Q. (BY MR. BELING) Okay. Do you have any
14:33:44 3 knowledge of the logo used by the Four Colour Print
14:33:48 4 Group, which is also a cross hairs logo?
14:33:51 5 MR. CHALKER: I renew my objection.
14:33:54 6 A. I am able to see a -- on Exhibit 12, I'm able
14:33:58 7 to see a black-and-white version of that, yes, I am.
14:34:02 8 Q. (BY MR. BELING) Okay. So it appears that, like
14:34:13 9 you said, the cross hairs logo is quite popular in the
14:34:16 10 printing industry, and that other companies use a
14:34:19 11 colored version of the cross hairs logo as well?
14:34:23 12 MR. CHALKER: Object to the question as
14:34:24 13 leading.
14:34:25 14 A. I don't believe I admitted or offered factual
14:34:28 15 information to say that it was popular. I believe I
14:34:31 16 stated that I've seen it before.
14:34:37 17 MR. BELING: Madam Court Reporter, can
14:34:38 18 you please read out the witness's evidence regarding
14:34:43 19 popularity and the logo -- the cross hairs logo in the
14:34:48 20 printing industry? It was about two or three minutes
14:34:50 21 ago.
14:35:17 22 THE REPORTER: Yes, sir. Give me a minute
14:35:17 23 to find it.
14:35:21 24 (RECORD READ BY THE REPORTER.)
14:35:21 25 Q. (BY MR. BELING) Mr. Osterloh, if I put the
14:35:24 1 proposition to you that the logo in front of you is, in
14:35:27 2 fact, colored like the COLORWORX logo, like Ennis's
14:35:33 3 COLORWORX logo, would you dispute that?
14:35:36 4 MR. CHALKER: Objection that the exhibit is
14:35:37 5 not in color; that it calls for Mr. Osterloh to
14:35:41 6 speculate; and it also assumes evidence that -- or
14:35:47 7 assumes facts that are not in evidence; and it's related
14:35:51 8 to -- it's irrelevant to this proceeding.
14:35:57 9 A. With it being black and white, I would not feel
14:36:00 10 comfortable answering that question.
14:36:02 11 MR. BELING: Okay. Well, for the record,
14:36:05 12 I served a color copy on Mr. Chalker on the 8th or 9th
14:36:10 13 of January, 2014.
14:36:15 14 MR. BELING: Madam Court Reporter, you've
14:36:17 15 got the Exhibits 13, 14, and 15, don't you?

14:36:22 16 THE REPORTER: I have 13 and 15 in front of
14:36:22 17 me, and I believe Mr. Osterloh saw 14 earlier, sir.
14:36:22 18 Q. (BY MR. BELING) Mr. Osterloh, does Ennis, Inc.
14:36:53 19 have any affiliation or ties to any of the businesses
14:36:57 20 I've questioned you about in the last half an hour to
14:37:00 21 one hour?
14:37:01 22 A. Without looking those accounts up specifically
14:37:04 23 in our account list, I would not know that answer.
14:37:10 24 Q. But those names that I've mentioned don't ring
14:37:13 25 a bell?
14:37:14 1 A. Those names don't ring a bell. But we have
14:37:18 2 tens of thousands of customers, so that is not out of
14:37:24 3 the ordinary (emphasis added).

13. Since the answers to the above issues are within the exclusive control of Ennis and not available by other means, I believe I need an order granting discovery in order to comprehensively oppose Ennis' motions for summary judgment.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge and belief. Executed this 15th day of March, 2014.

Dated: March 15, 2014

Respectfully submitted,

JOEL BELING

Mr. Beling,

We withdraw our designation that the answer to question 4 in the answers in lieu of deposition dated January 13, 2014 is highly confidential and subject to the Protective Order.

Daniel

Subject: Applicant's Third Meet and Confer Attempt

Mr Chalker,

I write for the third time regarding your client's designation of the creation of the Colorworx portion of its Mark as highly confidential. I vigorously dispute this. Your client has had no problem answering this question in the past (Doc. #26) and the highly confidential designation appears to be a mask to conceal your client's fraud in procuring its Mark with the USPTO. Please explain your client's basis for this designation. I will be filing a motion with the Board within the next 72 hours if I do not hear from you.

Mr Beling

From: joelbeling@hotmail.com
To: dchalker@chalkerflores.com; jflores@chalkerflores.com
Subject: Applicant's Second Meet and Confer Attempt
Date: Fri, 7 Mar 2014 21:44:15 +0000

Mr Chalker,

I write for the second time (see below) with regard to your client's designation of the creation of the word component of its Colorworx mark as highly confidential. This is clearly inappropriate and improper under the Protective Order because your client has happily answered questions on this topic throughout the litigation (see motions to compel and your client's discovery responses). I submit that your client has engaged in an abusive litigation tactic by so concealing its answer.

Please advise your client's view regarding amending its designation.

I will be filing a motion contesting your client's designation in due course.

Mr Beling

From: joelbeling@hotmail.com
To: dchalker@chalkerflores.com; jflores@chalkerflores.com
Subject: Applicant's First Meet and Confer Attempt
Date: Thu, 6 Mar 2014 17:22:18 +0000

Mr Chalker,

I refer to your designation of the answer to Q.4 in your answers in lieu of deposition dated January 13, 2014 (on the creation of the word component of Ennis' COLORWORX Mark) as HIGHLY CONFIDENTIAL and formally contest this designation under the Protective Order dated January 10, 2014. I see no basis for this designation since Ennis has publicly given the answers to the same question, and questions relating to the creation of its MARK generally, without objection in the past. Please justify the basis.

I advise I will be contesting the basis of your designation with the Board but seek your client's consent to make the answer to this question public.

I look forward to your client's response.

Mr Beling

v.

JOEL L. BELING d/b/a
SUPA CHARACTERS PTY LTD

TELEPHONIC ORAL DEPOSITION OF

STEVEN KENNETH OSTERLOH, JR.

JANUARY 13, 2014

VOLUME 1 OF 1

TELEPHONIC ORAL DEPOSITION OF STEVEN KENNETH
OSTERLOH, JR., produced as a witness duly sworn by me at
the instance of the Applicant, was taken in the above
styled and numbered cause on JANUARY 13, 2014, from 1:11
PM to 2:58 PM, before Beth Howard, CSR in and for the
State of Texas, reported by Machine Shorthand, at
Continental Court Reporters, Inc., 1412 Main Street,
Suite 900, Dallas, Texas, pursuant to the Federal Rules
of Civil Procedure, Notice of Deposition, Protective
Order, and the provisions stated on the record or
attached hereto.

CONTINENTAL COURT REPORTERS, INC.
(214) 742-4949

14:16:39 16 Q. I'll put it to you in more detail, so it may
14:16:44 17 jog your memory. Exhibit 6 is a printout of the website
14:16:50 18 colorworksnyc.com, and Colorworks is spelled with a K-S
14:17:00 19 and it's one word. And it's a printing and retouching
14:17:04 20 business, run by Joe Barna, B-A-R-N-A.

14:17:12 21 Do you recall reading any documents
14:17:14 22 pertaining to that website?

14:17:16 23 MR. CHALKER: I object to the question, as
14:17:17 24 the exhibit is not before Mr. Osterloh, so he can't
14:17:20 25 testify as to what that document may or may not contain.

CONTINENTAL COURT REPORTERS, INC.
(214) 742-4949

14:17:28 1 MR. BELING: I was asking about his
14:17:29 2 memory of whether he's seen it in the past, not whether
14:17:33 3 he has it now.

14:17:34 4 A. Again, my attorneys have sent all these
14:17:37 5 documents to me. So have I received it? I would say
14:17:40 6 yes. Do I recall that specific document? No, I do not.

14:17:44 7 Q. (BY MR. BELING) Okay. Do you have any evidence
14:17:52 8 to contradict or dispute the fact that Joe Barna has
14:17:59 9 over 30 years' experience in photography and printing
14:18:06 10 using the name Colorworks with a K-S?

14:18:10 11 MR. CHALKER: Object to the question, as
14:18:11 12 it's irrelevant, in that whoever that is has no relation
14:18:15 13 to the -- this proceeding.

14:18:20 14 A. No, I'm not familiar with Mr. Barna or his
14:18:25 15 history.

14:18:26 16 MR. BELING: It's -- it's relevant to the
14:18:27 17 creation of the COLORWORX mark.

14:18:32 18 MR. CHALKER: I disagree, in that
14:18:33 19 Mr. Osterloh has already testified as to the creation of
14:18:36 20 the -- the mark.

14:18:40 21 MR. BELING: And I'm putting contrasting
14:18:42 22 versions to the witness to ascertain his response.

14:18:51 23 Q. (BY MR. BELING) Mr. Osterloh, do you have any
14:18:53 24 evidence to dispute the fact that the Colorworks New
14:18:59 25 York City company offers for sale services, including

14:19:05 1 prints, postcards, and business cards?

14:19:07 2 MR. CHALKER: Object to the question, as
14:19:09 3 it's irrelevant and outside the scope of this proceeding
14:19:14 4 or the Notice of Deposition.

14:19:15 5 A. Again, without looking at those documents, I --
14:19:17 6 I can't say that that is fact. I'm not aware of it.
14:19:21 7 Don't recall.

14:19:22 8 Q. (BY MR. BELING) Okay. All these documents were
14:19:30 9 produced to Mr. Chalker, your legal counsel, so -- and
14:19:35 10 you've given evidence that he's provided you with those
14:19:39 11 documents. So I'm just asking about your memory because
14:19:42 12 of the -- the technical difficulties we have in
14:19:44 13 obtaining the exhibits.

14:19:46 14 MR. CHALKER: I believe that he's testified
14:19:47 15 that he does not remember specifics about those
14:19:50 16 documents.

14:19:57 17 Q. (BY MR. BELING) I'll move on to Exhibit 7,
14:20:00 18 which is printouts from the website colorworx.ca, and
14:20:06 19 the Colorworx is spelled W-O-R-X, which I've served on
14:20:11 20 Mr. Chalker, and the printouts are made on the 7th of
14:20:15 21 January, 2014.

14:20:17 22 Mr. Osterloh, do you have any knowledge
14:20:18 23 about a Canadian company called Colorworx selling
14:20:23 24 printing services, including business cards, flyers,
14:20:29 25 envelopes, and posters?

14:20:31 1 MR. CHALKER: Object to the question, as
14:20:33 2 the exhibit is not before Mr. Osterloh; and also object
14:20:36 3 that it's not relevant to this proceeding and that it
14:20:40 4 falls outside the scope of the discovery notice.

14:20:44 5 A. Was that previously supplied or just supplied
14:20:48 6 as an exhibit?

14:20:49 7 Q. (BY MR. BELING) It was -- the document was
14:20:51 8 served on Mr. Chalker on the 8th or 9th of January 2014,
14:20:57 9 and you have given evidence that you've received all
14:21:02 10 those documents.

14:21:03 11 A. Yes, that is correct. No, but I do not recall
14:21:06 12 reviewing or have recollection of that document.

14:21:09 13 Q. Okay. From your general knowledge as
14:21:15 14 Vice President of Marketing, are you aware that there is
14:21:19 15 a Canadian company called Colorworx, with Colorworx
14:21:24 16 spelled as a single word with R-X, also offering
14:21:28 17 printing services, including business cards, flyers,
14:21:32 18 envelopes and posters, on-line --

14:21:35 19 A. No.

14:21:36 20 Q. -- to other countries, including the
14:21:37 21 United States?

14:21:38 22 A. No, I was not.

14:21:42 23 Q. Okay. Are you aware that Mr. Shawn Barrett, a
14:21:49 24 Canadian citizen, is CEO of Colorworx and that he has
14:21:56 25 owned the COLORWORX brand for 13 years?

14:21:59 1 MR. CHALKER: I object to this line of
14:22:01 2 questioning, as that it's outside the Notice of
14:22:03 3 Deposition and irrelevant.

14:22:04 4 A. No, I have already stated I -- I don't know
14:22:06 5 this company and have no knowledge of it or this Mr.
14:22:10 6 Shawn -- I don't recall his last name. -- that's the CEO
14:22:13 7 of it.

14:22:14 8 Q. (BY MR. BELING) Shawn Barrett.

14:22:16 9 A. No, I have no knowledge of him.

14:22:18 10 Q. Okay. I'll move on to Exhibit 8. And
14:22:31 11 Exhibit 8, which I've served on Mr. Chalker, contains
14:22:36 12 printouts which are made from the website
14:22:39 13 colorworksinc -- That Colorworks is spelled
14:22:42 14 W-O-R-K-S. -- inc.com, and the printout was on the 7th
14:22:50 15 of January.

14:22:53 16 And my question to you, Mr. Osterloh, is:
14:22:57 17 Are you aware of a company called Colorworks, that's
14:23:00 18 R-K-S, Graphics Services, Inc., which offers offset
14:23:07 19 printing, digital printing, and large-format display
14:23:11 20 printing?

14:23:12 21 MR. CHALKER: Object to the question as the
14:23:14 22 exhibit is not before Mr. Osterloh, the line of
14:23:16 23 questioning is irrelevant and out of the scope of the
14:23:20 24 Notice of Deposition.

14:23:22 25 A. No, I do not.

CONTINENTAL COURT REPORTERS, INC.
(214) 742-4949

14:23:30 1 Q. (BY MR. BELING) But you've --

14:23:30 2 A. Again -- I apologize. To the best of my
14:23:32 3 recollection, no, I do not.

14:23:34 4 Q. Okay. But you've stated previously you were
14:23:37 5 served with all those -- my discovery production by
14:23:41 6 Mr. Chalker, but you may not have perused it; is that
14:23:45 7 correct?

14:23:45 8 A. No, I didn't say I didn't peruse it. I have
14:23:50 9 been given all those documents. As you can understand,
14:23:54 10 over this couple of year period, there's been hundreds
14:23:57 11 of pages. I don't recall each and every page that I've
14:24:00 12 read, and some of them have been read multiple times. I
14:24:04 13 do not recall this, though. No, I do not.

14:24:07 14 Q. Okay. If I was to say to you that there are
14:24:10 15 some pages out of "The Colorworks Story," and that this
14:24:16 16 particular company created the term "Colorworks" in the
14:24:19 17 early 1990s, would that jog your memory?

14:24:23 18 MR. CHALKER: Object to --

14:24:24 19 A. No, it would not.

14:24:26 20 MR. CHALKER: I object to the question, as
14:24:28 21 it is irrelevant and outside the scope of the Deposition
14:24:32 22 Notice, and Mr. Osterloh has testified that he does not
14:24:38 23 have knowledge about -- or recall specific things about
14:24:41 24 the documents that you have produced.

14:24:47 25 Q. (By MR. BELING) Mr. Osterloh?

14:24:53 1 A. No, I have not.

14:25:01 2 Q. I'll move on to Exhibit 9, which I've also
14:25:06 3 served on Mr. Chalker around the 8th or 9th of January,
14:25:10 4 2014. And Exhibit 9 is printouts which I made from the
14:25:14 5 website ilovetocreate.com.

14:25:19 6 And Mr. Osterloh, do you have any knowledge
14:25:22 7 about a company called I Love to Create, which is
14:25:28 8 selling services related to printed lesson plans and
14:25:36 9 classroom art projects under the term "Colorworks,"
14:25:40 10 "Colorworks" being spelled with a W-O-R-K-S?

14:25:45 11 MR. CHALKER: Object to the question, as
14:25:46 12 the exhibit is not before Mr. Osterloh. Objection to
14:25:49 13 the line of questioning, as it's outside the Notice of
14:25:52 14 Deposition, and it is irrelevant to the proceedings.

14:25:55 15 A. No, I do not have any recollection of that
14:25:58 16 company.

14:26:00 17 Q. (BY MR. BELING) Okay. Moving on to Exhibit 10,
14:26:09 18 which is printouts from the website folders4success.com,
14:26:15 19 on the 7th of January, 2014, which I've served on
14:26:19 20 Mr. Chalker on the 8th or 9th of January, 2014. And
14:26:25 21 this printout shows the term "ColorWorks," with a
14:26:32 22 W-O-R-K-S, being sold by Debbie Carney, who runs a
14:26:42 23 business called New Order Organizers.

14:26:46 24 Mr. Osterloh, are you aware of that
14:26:49 25 business run by Ms. Carney, New Order Organizers?

14:26:53 1 MR. CHALKER: Object to the exhibit, as
14:26:55 2 it's not before Mr. Osterloh. Object to the question,
14:26:59 3 in that it's outside the Notice of Deposition, and also
14:27:03 4 irrelevant to this proceeding.

14:27:06 5 A. I am not.

14:27:15 6 Q. (BY MR. BELING) Mr. Osterloh, are you aware of
14:27:18 7 your -- any obligation or practice to read any exhibits
14:27:22 8 or documents in production relating to the topics listed
14:27:27 9 in the Notice of Deposition prior to arriving today?

14:27:32 10 THE WITNESS: Could you repeat that
14:27:33 11 question, please, ma'am?

14:27:50 12 (RECORD READ BY THE REPORTER.)

14:27:50 13 A. Was I given notice that I needed to read and
14:27:53 14 study? No, I was not. Did I review the documents?
14:27:58 15 Yes, I did. Did I review all hundreds and hundreds of
14:28:04 16 pages? No, I did not. I primarily reviewed the
14:28:07 17 documents that we've submitted over the last few days
14:28:10 18 and over the weekend that we supplied. That was my
14:28:14 19 understanding that the questions would be surrounding
14:28:16 20 those specific topics. You're asking me about topics
14:28:20 21 that I was not expecting to answer.

14:28:23 22 Q. (BY MR. BELING) I'm asking about topics in
14:28:25 23 relation to the creation of the COLORWORX mark.

14:28:28 24 A. Understood.

14:28:29 25 MR. CHALKER: But Mr. Beling, it's our

14:28:31 1 position that the documents that you're presenting, that
14:28:34 2 those are outside of the topics which you put forth in
14:28:39 3 your Notice.

14:28:42 4 MR. BELING: But this goes to the creation
14:28:45 5 of the COLORWORX mark.

14:28:46 6 MR. CHALKER: That was not our
14:28:47 7 interpretation of the topics that you listed. I mean,
14:28:51 8 as -- as the discovery that we supplemented, Ennis was
14:28:57 9 not aware of any searches that were conducted. As a
14:29:01 10 result, I mean, you are producing evidence that they
14:29:07 11 were unaware of. This is the first they've seen of it.
14:29:11 12 You did not include in your Notice that you were going
14:29:18 13 to be asking questions about your document production.

14:29:22 14 MR. BELING: I included in my Notice that
14:29:24 15 I'd be discussing creation of the COLORWORX mark, and
14:29:27 16 these documents --

14:29:27 17 MR. CHALKER: And Mr. Osterloh has
14:29:28 18 testified to that effect.

14:29:41 19 Q. (BY MR. BELING) Mr. Osterloh, I'll discuss
14:29:43 20 Exhibit 11, which is printouts from a website called
14:29:47 21 smartpress.com on the 7th of January, 2014, which I've
14:29:53 22 served on Mr. Chalker, and it's relevant to the creation
14:29:57 23 of the design portion of your mark.

14:30:03 24 Do you recall reading any documents from
14:30:07 25 the Smart Press company and their sales of printed goods

14:30:15 1 and services, such as business cards, brochures,
14:30:19 2 envelopes and calendars?

14:30:20 3 MR. CHALKER: Object to the question --
14:30:21 4 Well, first object to the exhibit, as it is not before
14:30:25 5 Mr. Osterloh. Object to the question, as it is outside
14:30:29 6 the scope of the Notice of Deposition and irrelevant.

14:30:33 7 A. No, I do not recall it.

14:30:44 8 Q. (BY MR. BELING) Mr. Osterloh, how would you
14:30:46 9 describe the design portion of Ennis's COLORWORX mark?

14:30:53 10 A. I would design (sic) it as the four primary
14:30:57 11 colors that are used to -- or that, I'm sorry, that are
14:31:00 12 used in the process known as four-color process
14:31:04 13 printing, and surrounded -- I'm sorry, surrounding a
14:31:10 14 cross hair. I believe it's in a circle.

14:31:12 15 Q. Okay. And what is your opinion concerning the
14:31:18 16 use of the cross hairs logo in printing?

14:31:23 17 A. I don't understand the question.

14:31:28 18 Q. Is that a popular logo or design in the
14:31:32 19 printing industry or are you the only company that uses
14:31:36 20 the cross hairs logo?

14:31:38 21 MR. CHALKER: I object to that question, as
14:31:39 22 it's asking the witness to speculate about facts not
14:31:44 23 into evidence.

14:31:46 24 A. There was two questions there. Can I answer
14:31:48 25 them separately?

14:31:49 1 Q. (BY MR. BELING) Of course.

14:31:50 2 THE WITNESS: Could you repeat them,
14:31:52 3 ma'am?

14:32:05 4 (RECORD READ BY THE REPORTER.)

14:32:05 5 A. As far as popularity, I -- I don't know if it's
14:32:09 6 popular or not. Have I seen that in use by other
14:32:13 7 companies? Yes, I have. But I can't tell you about its
14:32:18 8 popularity.

14:32:21 9 Q. (BY MR. BELING) Which other companies have you
14:32:23 10 seen the cross hairs logo used by in the printing
14:32:28 11 industry?

14:32:29 12 A. I don't recall those off the top of my head.

14:32:33 13 Q. But there's at least several?

14:32:35 14 A. That have used a cross hairs within their logo?

14:32:39 15 Q. Yes.

14:32:40 16 A. I would say yes.

14:32:41 17 Q. Okay. Exhibit 12, which I've served on
14:32:53 18 Mr. Chalker on the 8th or 9th of January, 2014, contains
14:32:59 19 printouts which I made from the website fourcolour.com.
14:33:08 20 And fourcolour.com sells book services or prints books,
14:33:17 21 and my question is: Are you aware of the Four Colour
14:33:24 22 Print Group?

14:33:27 23 MR. CHALKER: Object to the question and
14:33:29 24 the exhibit, as it's outside the Notice of the
14:33:31 25 Deposition and it's irrelevant.

14:33:34 1 A. No, I'm not familiar with them.

14:33:37 2 Q. (BY MR. BELING) Okay. Do you have any
14:33:44 3 knowledge of the logo used by the Four Colour Print
14:33:48 4 Group, which is also a cross hairs logo?

14:33:51 5 MR. CHALKER: I renew my objection.

14:33:54 6 A. I am able to see a -- on Exhibit 12, I'm able
14:33:58 7 to see a black-and-white version of that, yes, I am.

14:34:02 8 Q. (BY MR. BELING) Okay. So it appears that, like
14:34:13 9 you said, the cross hairs logo is quite popular in the
14:34:18 10 printing industry, and that other companies use a
14:34:19 11 colored version of the cross hairs logo as well?

14:34:23 12 MR. CHALKER: Object to the question as
14:34:24 13 leading.

14:34:25 14 A. I don't believe I admitted or offered factual
14:34:28 15 information to say that it was popular. I believe I
14:34:31 16 stated that I've seen it before.

14:34:37 17 MR. BELING: Madam Court Reporter, can
14:34:38 18 you please read out the witness's evidence regarding
14:34:43 19 popularity and the logo -- the cross hairs logo in the
14:34:48 20 printing industry? It was about two or three minutes
14:34:50 21 ago.

14:35:17 22 THE REPORTER: Yes, sir. Give me a minute
14:35:17 23 to find it.

14:35:21 24 (RECORD READ BY THE REPORTER.)

14:35:21 25 Q. (BY MR. BELING) Mr. Osterloh, if I put the

14:35:24 1 proposition to you that the logo in front of you is, in
14:35:27 2 fact, colored like the COLORWORX logo, like Ennis's
14:35:33 3 COLORWORX logo, would you dispute that?

14:35:36 4 MR. CHALKER: Objection that the exhibit is
14:35:37 5 not in color; that it calls for Mr. Osterloh to
14:35:41 6 speculate; and it also assumes evidence that -- or
14:35:47 7 assumes facts that are not in evidence; and it's related
14:35:51 8 to -- it's irrelevant to this proceeding.

14:35:57 9 A. With it being black and white, I would not feel
14:36:00 10 comfortable answering that question.

14:36:02 11 MR. BELING: Okay. Well, for the record,
14:36:05 12 I served a color copy on Mr. Chalker on the 8th or 9th
14:36:10 13 of January, 2014.

14:36:15 14 MR. BELING: Madam Court Reporter, you've
14:36:17 15 got the Exhibits 13, 14, and 15, don't you?

14:36:22 16 THE REPORTER: I have 13 and 15 in front of
14:36:22 17 me, and I believe Mr. Osterloh saw 14 earlier, sir.

14:36:22 18 Q. (BY MR. BELING) Mr. Osterloh, does Ennis, Inc.
14:36:53 19 have any affiliation or ties to any of the businesses
14:36:57 20 I've questioned you about in the last half an hour to
14:37:00 21 one hour?

14:37:01 22 A. Without looking those accounts up specifically
14:37:04 23 in our account list, I would not know that answer.

14:37:10 24 Q. But those names that I've mentioned don't ring
14:37:13 25 a bell?

CONTINENTAL COURT REPORTERS, INC.
(214) 742-4949

14:37:14	1	A. Those names don't ring a bell. But we have
14:37:18	2	tens of thousands of customers, so that is not out of
14:37:24	3	the ordinary.

NOTICE OF OPPOSITION

Opposer, ENNIS, INC., a Texas corporation, having offices at 2441 Presidential Parkway, Midlothian, Texas 76065 (“Ennis” and/or “Opposer”), believes that it will be damaged by registration of the mark shown in Application Serial No. 85/324,443 by Joel L. Beling d/b/a Supa Characters Pty Ltd, having a listed business address of 1 Mirboo Court, Dallas, Victoria 3047, Australia (“Beling” and/or “Applicant”), and hereby opposes the same and requests that the registration to the Application be refused.

As grounds for opposition, Opposer alleges as follows:

1. On May 18, 2011, Applicant filed an application to register the mark COLOR WARS in International Classes 016, 028 and 041 for the following as shown in Application Serial No. 85/324,443 (the “Applicant’s Mark”):

International Class: 016

Adhesive bands for stationery or household purposes; Adhesive foils stationery; Adhesive tape dispensers for household or stationery use; Adhesive tapes for stationery or household purposes; Adhesive tapes for stationery purposes; Adhesives for stationery and household use; Adhesives for stationery or household purposes; Adhesives for stationery purposes; Adhesives in the form of tape for stationery; Art prints; Automatic paper clip dispensing machines for office or stationery use; Books in the field of superhero and cartoon characters; Brochures about superhero and cartoon characters; Cartoon prints; Cartoon strips; Color pencils; Color prints; Colorboard; Colored craft and art sand; Coloring books; Comic books; Comic magazines; Comic strips; Comic strips appearing in newspapers and other media; Comic strips' comic features; Comics; Desk mounted stationery cabinets; Desktop stationery cabinets; Dispensers for adhesive tapes for stationery or household purposes; Educational publications, namely, educational learning cards, flash cards, activity cards, workbooks, textbooks, activity books, story books, puzzle books, printed puzzles, teacher guides, manuals, posters and educational booklets in the field of superhero and cartoon characters; Envelopes for stationery use; File pockets; Glitter glue for stationery purposes; Glitter pens for stationery purposes; Glue for stationery or household purposes; Glue for stationery or household use; Glue pens for stationery purposes; Glue sticks for stationery or household use; Graphic fine art prints; Graphic prints and representations; Gummed tape for stationery or household use; Liquid paint felt tip marking and coloring applicators; Magazine columns about superhero and cartoon characters; Magazine sections in the field of superhero and cartoon characters; Magazine supplements to newspapers in the field of superhero and cartoon characters; Magazines in the field of superhero and cartoon characters; Newsletters in the field of superhero and cartoon characters; Newspaper cartoons; Newspaper comic strips; Office paper stationery; Office stationery; Organizational kit used in planning the design and apparel for special events containing color selection sample sheets, planning folders and fabric swatches; Organizational kits containing calendars, stationery, planning folders, templates and printed guidelines for planning social events; Organizers for stationery use; Packaged kits comprising printed instructional, educational, and teaching materials for educational activities in the field of superhero and cartoon characters; Paper stationery; Paper stationery with inspirational messages imprinted thereon; Partially printed forms; Paste for handicraft, for stationery or household purposes (banjaku-nori); Paste for stationery or household purposes; Pastes and other adhesives for stationery or household purposes; Pencil ornaments; Personalized coloring books for children; Photographic prints; Pictorial prints; Polyester film for use as a paper substitute for dry toner xerographic imaging, namely, laser printing, color copier printing, dry toner printing, screen printing, and offset printing; Print engravings; Print letters and blocks; Printed art reproductions; Printed calendars; Printed certificates; Printed certificates for sports and/or entertainment fans; Printed certificates in the field of sports and/or entertainment; Printed children's coloring pages; Printed collector cards made primarily of paper and also including metal; Printed collector cards

made primarily of paper but also including metal; Printed emblems; Printed forms; Printed graphs; Printed greeting cards with electronic information stored therein; Printed holograms; Printed material in the nature of color samples; Printed materials, namely, curricula in the field of superhero and cartoon characters; Printed materials, namely, journals featuring superhero and cartoon characters; Printed materials, namely, novels and series of fiction books and short stories featuring scenes and characters based on video games; Printed materials, namely, press releases featuring superhero and cartoon characters; Printed materials, namely, written articles in the field of superhero and cartoon characters; Printed matter, namely, paper signs, books, manuals, curriculum, newsletters, informational cards and brochures in the field of superhero and cartoon characters; Printed music books; Printed news releases in the field of superhero and cartoon characters; Printed pamphlets, brochures, manuals, books, booklets, leaflets, flyers, informational sheets and newsletters, adhesive backed stickers, and kits comprising one or more of the foregoing materials in the field of superhero and cartoon characters; Printed paper labels; Printed paper signs; Printed patterns; Printed periodicals in the field of movies; Printed periodicals in the field of music; Printed periodicals in the field of plays; Printed periodicals in the field of tourism; Printed wine and beer bottle labels incorporating a feature that changes color in response to fluctuation in temperature of the contents of the bottle to which the label is affixed; Prints; Prints in the nature of superhero and cartoon characters; Protractors; Publications, namely, brochures, booklets, and teaching materials in the field of superhero and cartoon characters; Publications, namely, books, journals, magazines and comic books in the fields of superhero and cartoon characters; Red algae gelatine glue, for stationery or household purposes (funori); Reinforced stationery tabs; Seals; Self-adhesive tapes for stationery and household purposes; Souvenir programs concerning superhero and cartoon characters; Stationery; Stationery boxes; Stationery cases; Stationery folders; Stationery writing paper and envelopes; Stationery-type portfolios; Stickers; Syndicated columns dealing with superhero and cartoon characters; Syndicated magazine sections dealing with superhero and cartoon characters; Syndicated newspaper columns dealing with superhero and cartoon characters; Workbooks directed to superhero and cartoon characters

International Class: 041

Educational and entertainment services, namely, a continuing program about superhero and cartoon characters accessible by radio, television, satellite, audio, video and computer networks; Educational and entertainment services, namely, providing motivational and educational speakers; Entertainment and education services in the nature of a series of short shows featuring superhero and cartoon characters distributed to mobile handsets, which may include video, text, photos, illustrations or hypertext; Entertainment and education services in the nature of live dance and musical performances; Entertainment and education services, namely, providing recognition and incentives by way of celebrations and awards to girls from underserved communities who have completed their high school careers successfully and who are going on to college; Entertainment and educational services in the nature of on-line competitions in the field of entertainment, education, culture, sports, and other non-business and non-commercial fields; Entertainment and educational services, namely, providing a website that displays various requests, reviews, recommendations, rankings, trackings, votes, and information relating to uncreated, unreleased, new, special, popular, and rare products, services, and events in the fields of pop culture, entertainment, education, and sports, all exclusively for non-business and non-commercial transactions and purposes; Entertainment and educational services, namely, providing advice and information for music, video and film concept and

script development; Entertainment and educational services, namely, the presentation of seminars, lectures, workshops and panel discussions, and ongoing television and radio talk shows all in the field of public interest concerning superhero and cartoon characters; Entertainment and educational services, namely, the presentation of seminars, workshops and panel discussions, and ongoing television and radio shows all in the field of superhero and cartoon characters; Entertainment in the nature of on- going television programs in the field of superhero and cartoon characters; Entertainment in the nature of visual and audio performances by superhero and cartoon characters; Entertainment in the nature of visual and audio performances, and musical, variety, news and comedy shows; Entertainment in the nature of visual and audio performances, namely, musical band, rock group, gymnastic, dance, and ballet performances; Entertainment in the nature of visual and audio performances by an actor; Entertainment information; Entertainment information services, namely, providing information and news releases about a musical artist; Entertainment media production services for motion pictures, television and Internet; Entertainment services in the nature of a non-fiction television programming series on topics relating to family stories told by family members to preserve their heritage; Entertainment services in the nature of on-going television programs in the field of children's entertainment; Entertainment services, namely, displaying a series of films; Entertainment services, namely, planning and conducting a series of film festivals; Entertainment services, namely, providing a web site featuring non-downloadable musical performances, musical videos, related film clips, photographs, and other multimedia materials featuring superhero and cartoon characters; Entertainment, namely, a continuing superhero and cartoon characters; show broadcast over television, satellite, audio, and video media; Film and video film production; Film and video production; Film and video production consulting services; Film production; Film studios; Media production services, namely, video and film production; Motion picture film production; Multimedia entertainment services in the nature of development, production and post-production services in the fields of video and films; Multimedia entertainment services in the nature of recording, production and post-production services in the fields of music, video, and films; Operating of film studios; Production of DVDs, videotapes and television programs featuring superhero and cartoon characters; Production of films; Production of television and radio programmes; Production of television programs; Providing information and articles in the field of film, filmmaking, and entertainment via a global computer network; Providing online non-downloadable comic books and graphic novels; Provision of information relating to distribution of television shows, motion picture film and radio shows; Provision of information relating to television, motion picture film, audio and radio production; Provision of non-downloadable films and movies via a video-on-demand service; Provision of non-downloadable films and television programmes via a video-on-demand service; Special effects animation services for film and video; Television, video and movie filming services

2. Opposer is the owner of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX[®] (“Opposer’s Mark”). Opposer’s Mark is valid, subsisting, and in full force and effect. Since as early as August, 2002, Opposer, its predecessors, or its related companies have continuously used the COLORWORX Mark in interstate commerce as a trademark for a variety of printing goods and printing services including, but not limited to, business cards, letterhead, sell sheets, rack cards, postcards, brochures and posters (“Opposer’s Goods”). Opposer’s Mark has also continuously appeared in substantial advertising and promotion of Opposer’s printing goods and printing services, such that the mark is closely identified with Opposer’s Goods and has gained very valuable public recognition. Opposer has established an outstanding reputation as to the quality of its products sold under the COLORWORX Mark.

3. Opposer has continuously used its Mark in interstate commerce since long prior to any date upon which Applicant can rely. By virtue of its sales of high-quality products bearing Opposer’s Mark in interstate commerce, its expenditures of considerable sums for promotional activities and the excellence of its products, Opposer has developed significant goodwill in its Mark and a valuable reputation.

4. Opposer’s trademark rights for the COLORWORX Mark has priority over Applicant’s Mark, inasmuch as Opposer has continuously used its Mark since it commenced use of its Mark, and Applicant’s application lists a filing date of May 18, 2011, and is listed as an intent-to-use application claiming priority pursuant to Section 44(d) of the Trademark Act, 15 U.S.C. § 1126.

5. Applicant’s Mark so resembles Opposer’s Mark that has been and is currently used, as to be likely to cause confusion, or cause mistake, or to deceive, in violation of Section

2(d) of The Trademark Act, 15 U.S.C. §1052(d), when used on or in connection with Applicant's Goods.

6. Under the circumstances, registration of Applicant's Mark will injure Opposer by causing the trade and/or purchasing public to be confused and/or deceived into believing that Applicant's Goods are those of Opposer or are sponsored by Opposer, to Opposer's damage and detriment, and will place a cloud over Opposer's title to its COLORWORX Mark in violation of Section 2(d) of the Trademark Act, 15 U.S.C. §1052(d).

7. Opposer's COLORWORX Mark was well established long before the filing date of Applicant's subject application, and at the time that Applicant filed the subject Application. Registration of Applicant's Mark would diminish and dilute the distinctive quality of Opposer's rights in its COLORWORX Mark in violation of 15 U.S.C. §1125(c). Moreover, registration of Applicant's Mark would diminish the advertising value of Opposer's Mark, and such registration would, in the event of any quality problems involving the goods offered by Applicant, tarnish the distinctiveness of Opposer's Mark.

8. Applicant's Mark is the same as, or substantially the same as, Opposer's Mark, including in visual appearance and in pronunciation.

9. Applicant's Mark is likely to and/or has diluted and lessened the capacity of Opposer's Mark to identify and distinguish Opposer's Goods.

10. Applicant's Mark so resembles Opposer's continuously used and well-known Mark as to be likely, when used in connection with the goods as set forth in Applicant's application, to lessen the capacity of Opposer's Mark to identify and distinguish Opposer's Goods.

11. The subject application should be refused because Opposer's rights of continuing its present use of its Mark in commerce are, or would be, threatened by Applicant's registration of Applicant's Mark for Applicant's Goods, and because Opposer's business would otherwise be damaged by Applicant's registration of Applicant's Mark for Applicant's Goods.

WHEREFORE, Opposer believes that it will be damaged by registration of Applicant's COLOR WARS mark and prays that the Trademark Trial and Appeal Board sustain this opposition and refuse to register Application Serial No. 85/324,443 with prejudice.

Dated: February 15, 2012

)	
Petitioner)	

OPPOSER’S MOTION FOR SUMMARY JUDGMENT

Opposer, Ennis, Inc., by and through its undersigned counsel hereby moves, pursuant to Fed. R. Civ. P. 56 and TBMP § 528.02 for entry of summary judgment in Opposer’s favor in Opposition No. 91203884 on the grounds that there is no genuine dispute as to any material fact and Opposer is entitled to judgment as a matter of law.

In accordance with TBMP § 528.03, Opposer requests that the Trademark Trial and Appeal Board (the “Board”) suspend the Opposition pending a decision on the Motion for Summary Judgment, and if summary judgment is denied that the proceeding dates be reset.

I. SUMMARY JUDGMENT STANDARD

“A party may move for summary judgment, identifying each claim or defense — or the part of each claim or defense — on which summary judgment is sought. The court shall grant summary judgment if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law.” Fed. R. Civ. P. 56(a). The Board encourages the summary judgment procedure in appropriate situations. *See, e.g., Sweats*

Fashions Inc. v. Pannill Knitting Co., 833 F.2d 1560, 4 USPQ2d 1793 (Fed. Cir. 1987). Summary judgment is appropriate when “there is an absence of evidence to support the nonmoving party.” TBMP § 528.01 (citing *Celotex Corp. v. Catrett*, 477 U.S. 317, 323-24 (1986)).

“The types of evidence that may be submitted in support of, or in opposition to, a motion for summary judgment include ‘depositions, documents, electronically stored information, affidavits or declarations, stipulations (including those made for purposes of the motion only), admissions, interrogatory answers, or other materials,’ affidavits or declarations, and other materials in the record.” TBMP § 528.05(a)(1). Copies printed from the USPTO’s TSDR or TESS database may also be submitted as evidence. *See* TBMP § 528.05(d)-(e). These “materials may be submitted as attachments or exhibits to a party’s brief or affidavit in support of the motion.” *Id.* Denials, unsupported arguments or statements, and unsupported conclusions do not raise genuine issues of material fact. *See, e.g., Sweats Fashions Inc. v. Pannill Knitting Co.*, 833 F.2d 1560, 4 USPQ2d 1793, 1797 (Fed. Cir. 1987); *Levi Strauss & Co., Genesco, Inc.*, 742 F.2d 1401, 222 USPQ 939, 941 (Fed. Cir. 1984).

II. STATEMENT OF ISSUES TO BE DECIDED BY THE COURT

The issues in Opposition No. 91203884 are: (1) whether Opposer has standing to bring the Opposition; (2) whether Opposer will likely be damaged by the registration of Applicant’s mark COLOR WARS in International Classification 016; and (3) whether Applicant is entitled under law to register its mark COLOR WARS in International Classification 016, or alternatively, if Applicant is required to amend its description of goods and services in International Classification 016.

III. STATEMENT OF UNDISPUTED MATERIAL FACTS

Opposer is the owner of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and design for printing services. (Exhibit A).

Opposer's U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and design for printing services comprises the term COLORWORX and a design element. (Exhibit A).

Opposer filed U.S. Trademark Application Serial No. 78/698,743 for the mark COLORWORX and design for printing services on August 23, 2005. (Exhibit A; Exhibit B)

Opposer first used the mark COLORWORX and design for printing services at least as early as August 2002. (Exhibit A; Exhibit C).

Opposer has continuously used the mark COLORWORX and design for printing services since at least as early as August 2002. (Exhibit C).

Applicant filed U.S. Trademark Application Serial No. 85/324,443 for the mark COLOR WARS for classes 016, 028 and 041 on May 18, 2011 based on an intent to use the mark in commerce. (Exhibit D).

Applicant amended the identification of some of the goods and services in U.S. Trademark Application Serial No. 85/324,443 to be limited to the "field of superhero and cartoon characters" on May 18, 2011. (Exhibit E).

Applicant's U.S. Trademark Application Serial No. 85/324,443 for the mark COLOR WARS for classes 016, 028 and 041 was published for Opposition on May 18, 2011. (Exhibit F).

Opposer timely filed this opposition to Applicant's U.S. Trademark Application Serial No. 85/324,443 for the mark COLOR WARS for class 016 on February 15, 2012. (Notice of Opposition).

IV. OPPOSER HAS STANDING

Opposer, Ennis, Inc., is the owner of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and design, who has a real interest in the outcome of the proceeding, and who believes that it would be damaged by the registration of the COLOR WARS mark. (Exhibit A; Exhibit C). Applicant admits that Opposer's trademark rights for the mark COLORWORX and design has priority over Applicant's mark COLOR WARS. (Exhibit G-1, Request for Admission No. 9 and Exhibit G-2, Response to Request for Admission No. 9).

There is no genuine dispute as to any material fact regarding Opposer's standing and Opposer is entitled to judgment as a matter of law that Opposer has standing to bring this Opposition.

V. OPPOSER IS LIKELY TO BE DAMAGED BY REGISTRATION

Registration of Applicant's mark COLOR WARS will likely damage or harm Opposer for at least the following reasons:

1. The identification of goods in International Classification 016 of U.S. Trademark Application Serial No. 85/324,443 for the mark COLOR WARS lists numerous items that are printed goods and are not restricted to the 'field of superhero and cartoon characters.' Many of these non-field restricted printed goods fall within the target market of Ennis and its distributors under the mark COLORWORX and design.
2. The mark COLOR WARS is very similar to COLORWORX used in the mark COLORWORX and design in that they sound much the same when spoken, and visually a space is added between the R and W, the third O is replaced by an A and the X is replaced by a S.

3. Ennis views the non-field restricted printed goods and the similarity of the words as an intention to use the mark COLOR WARS within the printing industry.

4. If the mark COLOR WARS was used within our traditional business segment, there would be significant confusion due to both terms beginning with “COLOR W”.

5. Mr. Beling’s efforts to cancel our mark COLORWORX and design reinforces our concern that he may target our market using the mark COLOR WARS.

6. Mr. Beling’s refusal to agree to not use the mark COLOR WARS to market or sell printing within our traditional market segment further reinforces our concern that he may target our market using the mark COLOR WARS.

6. Mr. Beling’s refusal to amend the identification of goods in International Classification 016 of U.S. Trademark Application Serial No. 85/324,443 for the mark COLOR WARS to restrict the printed goods to the ‘field of superhero and cartoon characters’ further reinforces our concern that he may target our market using the mark COLOR WARS.

7. Mr. Beling’s contempt for U.S. companies and the U.S. legal system as evidenced by pleadings and communications further reinforces our concern that he may target our market using the mark COLOR WARS.

(Exhibit C). Applicant’s conduct in this proceeding provides a reasonable basis for Opposer’s belief that damage or harm is likely. *Id.*

There is no genuine dispute as to any material fact that Opposer believes that the registration of Applicant's mark COLOR WARS in International Classification 016 will damage or harm Opposer. Opposer is entitled to judgment as a matter of law that Opposer is likely to be damaged or harmed by the registration of Applicant's mark COLOR WARS in International Classification 016.

VI. LIKELIHOOD OF CONFUSION

A. A LIKELIHOOD OF CONFUSION EXISTS

The relevant likelihood of confusion factors in this proceeding are the similarity of the appearance and sound of the marks, the goods/services provided or intended to be provided under the marks, and any likelihood of expansion of Applicant's goods/services.

Applicant's mark COLOR WARS is similar in appearance and sound because they sound much the same when spoken, and visually a space is added between the R and W, the third O is replaced by an A and the X is replaced by a S. (Exhibit C; *compare* Exhibit A *with* Exhibit D).

Applicant's mark COLOR WARS includes goods that result from printing services:

Adhesive bands for stationery or household purposes; Adhesive foils stationery;

Adhesive tape dispensers for household or stationery use; Adhesive tapes for stationery or household purposes; Adhesive tapes for stationery purposes;

Adhesives for stationery and household use; Adhesives for stationery or household purposes; Adhesives for stationery purposes; Adhesives in the form of

tape for stationery; Art prints; Automatic paper clip dispensing machines for office or stationery use; Books in the field of superhero and cartoon characters;

Brochures about superhero and cartoon characters; Cartoon prints; Cartoon strips;

Color pencils; Color prints; Colorboard; Colored craft and art sand; Coloring

books; Comic books; Comic magazines; Comic strips; Comic strips appearing in newspapers and other media; Comic strips' comic features; Comics; Desk mounted stationery cabinets; Desktop stationery cabinets; Dispensers for adhesive tapes for stationery or household purposes; Educational publications, namely, educational learning cards, flash cards, activity cards, workbooks, textbooks, activity books, story books, puzzle books, printed puzzles, teacher guides, manuals, posters and educational booklets in the field of superhero and cartoon characters; Envelopes for stationery use; File pockets; Glitter glue for stationery purposes; Glitter pens for stationery purposes; Glue for stationery or household purposes; Glue for stationery or household use; Glue pens for stationery purposes; Glue sticks for stationery or household use; Graphic fine art prints; Graphic prints and representations; Gummed tape for stationery or household use; Liquid paint felt tip marking and coloring applicators; Magazine columns about superhero and cartoon characters; Magazine sections in the field of superhero and cartoon characters; Magazine supplements to newspapers in the field of superhero and cartoon characters; Magazines in the field of superhero and cartoon characters; Newsletters in the field of superhero and cartoon characters; Newspaper cartoons; Newspaper comic strips; Office paper stationery; Office stationery; Organizational kit used in planning the design and apparel for special events containing color selection sample sheets, planning folders and fabric swatches; Organizational kits containing calendars, stationery, planning folders, templates and printed guidelines for planning social events; Organizers for stationery use; Packaged kits comprising printed instructional, educational, and teaching

materials for educational activities in the field of superhero and cartoon characters; Paper stationery; Paper stationery with inspirational messages imprinted thereon; Partially printed forms; Paste for handicraft, for stationery or household purposes (banjaku-nori); Paste for stationery or household purposes; Pastes and other adhesives for stationery or household purposes; Pencil ornaments; Personalized coloring books for children; Photographic prints; Pictorial prints; Polyester film for use as a paper substitute for dry toner xerographic imaging, namely, laser printing, color copier printing, dry toner printing, screen printing, and offset printing; Print engravings; Print letters and blocks; Printed art reproductions; Printed calendars; Printed certificates; Printed certificates for sports and/or entertainment fans; Printed certificates in the field of sports and/or entertainment; Printed children's coloring pages; Printed collector cards made primarily of paper and also including metal; Printed collector cards made primarily of paper but also including metal; Printed emblems; Printed forms; Printed graphs; Printed greeting cards with electronic information stored therein; Printed holograms; Printed material in the nature of color samples; Printed materials, namely, curricula in the field of superhero and cartoon characters; Printed materials, namely, journals featuring superhero and cartoon characters; Printed materials, namely, novels and series of fiction books and short stories featuring scenes and characters based on video games; Printed materials, namely, press releases featuring superhero and cartoon characters; Printed materials, namely, written articles in the field of superhero and cartoon characters; Printed matter, namely, paper signs, books, manuals, curriculum, newsletters,

informational cards and brochures in the field of superhero and cartoon characters; Printed music books; Printed news releases in the field of superhero and cartoon characters; Printed pamphlets, brochures, manuals, books, booklets, leaflets, flyers, informational sheets and newsletters, adhesive backed stickers, and kits comprising one or more of the foregoing materials in the field of superhero and cartoon characters; Printed paper labels; Printed paper signs; Printed patterns; Printed periodicals in the field of movies; Printed periodicals in the field of music; Printed periodicals in the field of plays; Printed periodicals in the field of tourism; Printed wine and beer bottle labels incorporating a feature that changes color in response to fluctuation in temperature of the contents of the bottle to which the label is affixed; Prints; Prints in the nature of superhero and cartoon characters; Protractors; Publications, namely, brochures, booklets, and teaching materials in the field of superhero and cartoon characters; Publications, namely, books, journals, magazines and comic books in the fields of superhero and cartoon characters; Red algae gelatine glue, for stationery or household purposes (funori); Reinforced stationery tabs; Seals; Self-adhesive tapes for stationery and household purposes; Souvenir programs concerning superhero and cartoon characters; Stationery; Stationery boxes; Stationery cases; Stationery folders; Stationery writing paper and envelopes; Stationery-type portfolios; Stickers; Syndicated columns dealing with superhero and cartoon characters; Syndicated magazine sections dealing with superhero and cartoon characters; Syndicated newspaper columns dealing with superhero and cartoon characters; Workbooks directed to superhero and cartoon characters

(Exhibit D). As a result, Applicant's goods overlap and are confusingly similar to the printing services provided by Opposer under its mark COLORWORX and design mark.

Applicant plans on licensing and/or selling his COLOR WARS mark and brand to anyone and everyone that is interested:

INTERROGATORY NO. 22: Describe in detail why an amendment of the goods listed in International Class 016 in U.S. Trademark Application Serial No. 85/324,443 for Applicant's mark "COLOR WARS" to specify that the goods are related to, in the field of, about, featuring, in the nature of, concerning, dealing with or directed to "superhero and cartoon characters" is objectionable to You.

ANSWER: [objections omitted]

Apart from the above objections, the applicant responds as follows. Because the applicant's business is not limited to "superhero and cartoon characters." There are many possible versions of the COLOR WARS Mark and Brand which do not involve superheroes and cartoon characters. The concept, story and characters underpinning the COLOR WARS Mark are entirely adaptable to suit the needs of the third party licensor. For example, if Disney wished to license the COLOR WARS Mark and characters, then the version produced in the recently produced documents would be the first version presented to Disney. Another version could involve children playing at a kindergarten whose crayons are accidentally dropped in a stream contaminated by radioactive waste and other toxic chemicals. Each child is mysteriously blinded to all colors except for the color of the crayon they picked up from the stream. The kindergarten collapses as a result of an earthquake and the children have to save the kindergarten teacher with the limited vision they

possess. For another example, if a famous clothing company such as Dolce & Gabbana or Gucci wished to license the Mark, the COLOR WARS brand could be adapted to dispense with all the superhero and cartoon features and instead focus on the human versions of the respective color-based characters, or even different versions of a single color, e.g., the Blue Bravado, the Blue Brawler, the Blue Brain, the Blue Bimbo, the Blue Whale, the Blue Mechanic, the Blue Fireman, etc. Likewise, if the Wm. Wrigley Jr. Company wished to license the Mark, the concept, characters and story could be amended to market and sell Skittles confectionary without any superhero or cartoon characters. For example, each Skittle turns into a live-action child based on a color and fights the other characters inside a packet of Skittles. This could be a sixty-second advertisement wherein the Skittles fight inside the packet and then continue the fight inside the mouth of a happy child. The possibilities are endless. The phrase “superhero and cartoon characters” was only used in the application for the COLOR WARS Mark because of the format of the application. The applicant had and has no intention to so limit the COLOR WARS Mark and brand.

(Exhibit H). As a result, Applicant’s intended goods and services are likely to expand into and directly conflict with the printing services provided by Opposer under its mark COLORWORX and design mark.

Based on the foregoing, a likelihood of confusion exists because the marks are similar in appearance and sound, the goods/services provided or intended to be provided under the marks are similar (if not identical in some cases), and it is likely that Applicant will expand its goods/services to enter Opposer’s market. As a result, Opposer submits that a likelihood of

confusion is undisputed in this Opposition, and Opposer is entitled to judgment as a matter of law that there is a likelihood of confusion between Opposer's mark COLOR WORX and design for printing services and Applicant's mark COLOR WARS in International Classification 016 for a multitude of goods.

B. OPPOSER'S COMMON LAW TRADEMARK RIGHTS SUPPORT
OPPOSER'S MOTION FOR SUMMARY JUDGMENT

Opposer claims common law trademark rights to Opposer's unregistered word mark COLORWORX as well as the design mark itself with respect to printing services:

9

9 Q. (BY MR. BELING) Okay. Would you agree that

10 Ennis claims express trademark rights to portions of its

11 COLORWORX mark?

12 MR. CHALKER: Object to the question as

13 leading. Go ahead and answer.

14 A. Yes.

15 Q. (BY MR. BELING) Okay. What -- what aspects of

16 Ennis's COLORWORX mark does Ennis claim rights to?

17 A. The printing services aspect.

18 Q. Okay. But in terms of the actual mark, that

19 is, the term "COLORWORX" and the design elements,

20 what -- what aspects of -- of those two portions does

21 Ennis claim rights to?

22 A. The words "COLORWORX" and the design mark that

23 we've submitted and use in commerce.

24 Q. Okay. And what, if any, rights or claims

25 regarding the two distinct portions of the mark? Do

10

1 you -- do you claim the rights to each portion

2 separately, or how -- how would you characterize your

3 claims to the rights in the mark?

4 MR. CHALKER: Object to the question as

5 it's irrelevant, in that the trademark is the mark in

6 its entirety. Go ahead and answer.

7 MR. BELING: Okay.

8 THE WITNESS: Could you repeat that,

9 please?

10 MR. BELING: Yes.

11 THE WITNESS: No, I apologize.

12 MR. BELING: Sorry. What was that,

13 Mr. Chalker?

14 THE WITNESS: I asked the court reporter to

15 repeat the question, please.

16 MR. BELING: Okay. Will she repeat it or

17 do you want me to say it?

18 THE REPORTER: Just a moment, please.

19 (RECORD READ BY THE REPORTER.)

20 A. I believe, if I'm -- I'd have to go back and
21 check, but I believe that we have the rights to the
22 word, as well as the design mark. So we claim them
23 independently, yes.
24 Q. (BY MR. BELING) Okay.
25 A. But that's my recollection.

11

1 Q. Okay. So you're not claiming -- like, you are
2 claiming, obviously, rights to the mark as a whole, but
3 you are also claiming rights to the two distinct
4 portions?
5 A. I -- We claim the rights to the word,
6 "COLORWORX," all one word, as well as to the design mark
7 itself. Separately, yes.

(Exhibit I)

Opposer's common law trademark rights provide further evidence that: (1) Opposer has standing; (2) Registration of Applicant's mark COLOR WARS will likely damage or harm Opposer; and (3) a likelihood of confusion exists because the marks are similar in appearance and sound, the goods/services provided or intended to be provided under the marks are similar (if not identical in some cases), and it is likely that Applicant will expand its goods/services to enter Opposer's market.

As a result, Opposer submits that a likelihood of confusion is undisputed in this Opposition, and Opposer is entitled to judgment as a matter of law that there is a likelihood of

confusion between Opposer's mark COLORWORX and design for printing services and Applicant's mark COLOR WARS in International Classification 016 for a multitude of goods.

C. ALTERNATIVELY, A LIKELIHOOD OF CONFUSION CAN BE MINIMIZED BY AMENDING APPLICANT'S IDENTIFICATION OF GOODS AND SERVICES

The USPTO required Applicant to amend some of its goods and services to recite the limitation of "in the field of superhero and cartoon characters." (Exhibit F). Although Applicant has refused to further amend his application to settle this proceeding (Exhibit H, Interrogatory No. 22), Opposer believes that such an amendment would minimize the likelihood of confusion assuming Applicant actually restricted its goods/services accordingly. (Exhibit C).

As a result, Opposer is, alternatively, entitled to judgment as a matter of law that a likelihood of confusion between Opposer's mark COLOR WORX and design for printing services and Applicant's mark COLOR WARS in International Classification 016 for a multitude of goods will be minimized if the Board enters an Order amending Applicant's identification of goods in International Classification to:

Adhesive bands for stationery or household purposes; Adhesive foils stationery;
Adhesive tape dispensers for household or stationery use; Adhesive tapes for
stationery or household purposes; Adhesive tapes for stationery purposes;
Adhesives for stationery and household use; Adhesives for stationery or
household purposes; Adhesives for stationery purposes; Adhesives in the form of
tape for stationery; Art prints; Automatic paper clip dispensing machines for
office or stationery use; Books in the field of superhero and cartoon characters;
Brochures about superhero and cartoon characters; Cartoon prints; Cartoon strips;

Color pencils; Color prints **in the field of superhero and cartoon characters**;
Colorboard; Colored craft and art sand; Coloring books; Comic books; Comic
magazines; Comic strips; Comic strips appearing in newspapers and other media;
Comic strips' comic features; Comics; Desk mounted stationery cabinets; Desktop
stationery cabinets; Dispensers for adhesive tapes for stationery or household
purposes; Educational publications, namely, educational learning cards, flash
cards, activity cards, workbooks, textbooks, activity books, story books, puzzle
books, printed puzzles, teacher guides, manuals, posters and educational booklets
in the field of superhero and cartoon characters; Envelopes for stationery use **in**
the field of superhero and cartoon characters; File pockets **in the field of**
superhero and cartoon characters; Glitter glue for stationery purposes; Glitter
pens for stationery purposes; Glue for stationery or household purposes; Glue for
stationery or household use; Glue pens for stationery purposes; Glue sticks for
stationery or household use; Graphic fine art prints; Graphic prints and
representations **in the field of superhero and cartoon characters**; Gummed tape
for stationery or household use; Liquid paint felt tip marking and coloring
applicators; Magazine columns about superhero and cartoon characters; Magazine
sections in the field of superhero and cartoon characters; Magazine supplements
to newspapers in the field of superhero and cartoon characters; Magazines in the
field of superhero and cartoon characters; Newsletters in the field of superhero
and cartoon characters; Newspaper cartoons; Newspaper comic strips; Office
paper stationery **in the field of superhero and cartoon characters**; Office
stationery **in the field of superhero and cartoon characters**; Organizational kit

used in planning the design and apparel for special events containing color selection sample sheets, planning folders **in the field of superhero and cartoon characters** and fabric swatches; Organizational kits containing calendars, stationery, planning folders, templates and printed guidelines for planning social events; Organizers for stationery use; Packaged kits comprising printed instructional, educational, and teaching materials for educational activities in the field of superhero and cartoon characters; Paper stationery **in the field of superhero and cartoon characters**; Paper stationery with inspirational messages imprinted thereon **in the field of superhero and cartoon characters**; Partially printed forms **in the field of superhero and cartoon characters**; Paste for handicraft, for stationery or household purposes (banjaku-nori); Paste for stationery or household purposes; Pastes and other adhesives for stationery or household purposes; Pencil ornaments; Personalized coloring books for children; Photographic prints; Pictorial prints **in the field of superhero and cartoon characters**; Polyester film for use as a paper substitute for dry toner xerographic imaging, namely, laser printing, color copier printing, dry toner printing, screen printing, and offset printing; Print engravings; Print letters and blocks; Printed art reproductions; Printed calendars **in the field of superhero and cartoon characters**; Printed certificates **in the field of superhero and cartoon characters**; Printed certificates for sports and/or entertainment fans **in the field of superhero and cartoon characters**; Printed certificates in the field of sports and/or entertainment **in the field of superhero and cartoon characters**; Printed children's coloring pages **in the field of superhero and cartoon characters**;

Printed collector cards made primarily of paper and also including metal in the field of superhero and cartoon characters; Printed collector cards made primarily of paper but also including metal in the field of superhero and cartoon characters; Printed emblems in the field of superhero and cartoon characters; Printed forms in the field of superhero and cartoon characters; Printed graphs in the field of superhero and cartoon characters; Printed greeting cards with electronic information stored therein in the field of superhero and cartoon characters; Printed holograms in the field of superhero and cartoon characters; Printed material in the nature of color samples in the field of superhero and cartoon characters; Printed materials, namely, curricula in the field of superhero and cartoon characters; Printed materials, namely, journals featuring superhero and cartoon characters; Printed materials, namely, novels and series of fiction books and short stories featuring scenes and characters based on video games; Printed materials, namely, press releases featuring superhero and cartoon characters; Printed materials, namely, written articles in the field of superhero and cartoon characters; Printed matter, namely, paper signs, books, manuals, curriculum, newsletters, informational cards and brochures in the field of superhero and cartoon characters; Printed music books; Printed news releases in the field of superhero and cartoon characters; Printed pamphlets, brochures, manuals, books, booklets, leaflets, flyers, informational sheets and newsletters, adhesive backed stickers, and kits comprising one or more of the foregoing materials in the field of superhero and cartoon characters; Printed paper labels in the field of superhero and cartoon characters; Printed paper signs in

the field of superhero and cartoon characters; Printed patterns in the field of superhero and cartoon characters; Printed periodicals in the field of movies involving superhero and cartoon characters; Printed periodicals in the field of music involving superhero and cartoon characters; Printed periodicals in the field of plays involving superhero and cartoon characters; Printed periodicals in the field of tourism involving superhero and cartoon characters; Printed wine and beer bottle labels incorporating a feature that changes color in response to fluctuation in temperature of the contents of the bottle to which the label is affixed involving superhero and cartoon characters; Prints in the field of superhero and cartoon characters; Prints in the nature of superhero and cartoon characters; Protractors; Publications, namely, brochures, booklets, and teaching materials in the field of superhero and cartoon characters; Publications, namely, books, journals, magazines and comic books in the fields of superhero and cartoon characters; Red algae gelatine glue, for stationery or household purposes (funori); Reinforced stationery tabs; Seals; Self-adhesive tapes for stationery and household purposes; Souvenir programs concerning superhero and cartoon characters; Stationery in the field of superhero and cartoon characters; Stationery boxes in the field of superhero and cartoon characters; Stationery cases in the field of superhero and cartoon characters; Stationery folders in the field of superhero and cartoon characters; Stationery writing paper and envelopes in the field of superhero and cartoon characters; Stationery-type portfolios in the field of superhero and cartoon characters; Stickers in the field of superhero and cartoon characters; Syndicated columns dealing with

superhero and cartoon characters; Syndicated magazine sections dealing with superhero and cartoon characters; Syndicated newspaper columns dealing with superhero and cartoon characters; Workbooks directed to superhero and cartoon characters.

(emphasis added).

VII. INTERNATIONAL CLASSIFICATIONS 028 AND 041

Applicant filed a Motion to Divide with respect to International Classifications 028 and 041 on July 18, 2012 after the proceedings were suspended. As a result, the Board did not consider Applicant's Motion to Divide. (Order of May 15, 2013 at 2). Since the proceedings were resumed on May 15, 2013, Opposer expected Applicant to file another Motion to Divide; but no such motion was filed. Opposer reiterates its withdrawal of its opposition to applicant's mark COLOR WARS in International Classifications 028 and 041. Accordingly, the Board may grant Opposer leave to amend its Notice of Opposition, allow Applicant to file a new Motion to Divide, or order that International Classifications 028 and 041 are divided out of Application Serial No. 85/324,443 upon payment of the required fees by Applicant.

VIII. CONCLUSION

For all the reasons stated above, that there is no genuine dispute as to any material fact and Opposer is entitled to judgment as a matter of law.

More specifically, Opposer prays that the Board grants Opposer's Motion for Summary Judgment in its entirety by: (1) finding Opposer has standing to bring the Opposition; (2) finding Opposer will likely be damaged by the registration of Applicant's mark COLOR WARS in International Classification 016; (3) finding Applicant is not entitled under law to register its mark COLOR WARS in International Classification 016, or alternatively, Applicant is required

to amend its description of goods and services in International Classification 016 as specified above; and (4) granting all other and further relief to which Opposer is justly entitled. Entry of judgment in favor of Opposer in Opposition No. 91203884 is requested in its entirety.

Trademark/Service Mark Application, Principal Register

Serial Number: 78698743

Filing Date: 08/23/2005

To the Commissioner for Trademarks:

MARK: COLORWORX (stylized and/or with design, see [mark](#))

The literal element of the mark consists of COLORWORX.

The applicant, Ennis, Inc., a corporation of Texas, residing at 2441 Presidential Pkwy , Midlothian, Texas, United States, 76065, requests registration of the trademark/service mark identified above in the United States Patent and Trademark Office on the Principal Register established by the Act of July 5, 1946 (15 U.S.C. Section 1051 et seq.), as amended.

The applicant, or the applicant's related company or licensee, is using the mark in commerce, and lists below the dates of use by the applicant, or the applicant's related company, licensee, or predecessor in interest, of the mark on or in connection with the identified goods and/or services. 15 U.S.C. Section 1051(a), as amended.

International Class 040: Printing Services

In International Class 040, the mark was first used at least as early as 08/00/2002, and first used in commerce at least as early as 08/00/2002, and is now in use in such commerce. The applicant is submitting or will submit one specimen for *each class* showing the mark as used in commerce on or in connection with any item in the class of listed goods and/or services, consisting of a(n) Applicant's service brochure.

[Specimen - 1](#)

[Specimen - 2](#)

The applicant hereby appoints Conrad C. Pitts of Pitts & Eckl, P.C. , 401 E. Tuscaloosa Street, Florence, Alabama, United States, 35630 to submit this application on behalf of the applicant.

The USPTO is authorized to communicate with the applicant or its representative at the following email address: djtucker@ipwatch.com.

A fee payment in the amount of \$325 will be submitted with the application, representing payment for 1 class(es).

Declaration

The undersigned, being hereby warned that willful false statements and the like so made are punishable by

fine or imprisonment, or both, under 18 U.S.C. Section 1001, and that such willful false statements, and the like, may jeopardize the validity of the application or any resulting registration, declares that he/she is properly authorized to execute this application on behalf of the applicant; he/she believes the applicant to be the owner of the trademark/service mark sought to be registered, or, if the application is being filed under 15 U.S.C. Section 1051(b), he/she believes applicant to be entitled to use such mark in commerce; to the best of his/her knowledge and belief no other person, firm, corporation, or association has the right to use the mark in commerce, either in the identical form thereof or in such near resemblance thereto as to be likely, when used on or in connection with the goods/services of such other person, to cause confusion, or to cause mistake, or to deceive; and that all statements made of his/her own knowledge are true; and that all statements made on information and belief are believed to be true.

AFFIDAVIT OF STEVEN OSTERLOH
IN SUPPORT OF OPPOSER'S/REGISTRANT'S MOTION FOR SUMMARY
JUDGMENT

STATE OF OKLAHOMA §
 §
COUNTY OF OKLAHOMA §

BEFORE ME, the undersigned notary public, on this day personally appeared STEVEN OSTERLOH, known to me to be the person whose name is subscribed below, and upon his oath, deposed and stated as follows:

“My name is Steven Kenneth Osterloh. I am over the age of twenty-one (21) years, am of sound mind, and have never been convicted of a crime or offense involving moral turpitude. I am fully authorized and competent to execute this Affidavit and am not disqualified by law from making this Affidavit. All facts stated herein are within my personal knowledge, and under penalty of perjury, I declare they are true and correct.

“I am Vice President of Marketing of Ennis, Inc. (“Ennis”). I have been employed by Ennis for fifteen (15) years.

“I participated in the selection of the design component of the mark COLORWORX and design in July 2002.

“The mark COLORWORX and design was first used in connection with printing services at least as early as August 2002 and has been in continuous use since then.

“I reviewed the U.S. Trademark Application for the mark COLORWORX and design (Serial No. 78/698,743), including the Declaration, prior to the filing of the application. The Declaration of U.S. Trademark Application for the mark COLORWORX and design (Serial No. 78/698,743) was signed with my electronic signature.

“At the time U.S. Trademark Application Serial No. 78/698,743 was filed, I had a good faith belief that Ennis was entitled to use the mark COLORWORX and design in commerce for printing services, and to the best of my knowledge and belief at the time, no other person, firm, corporation, or association had superior rights to use the mark COLORWORX and design in commerce for printing services, either in the identical form thereof or in such near resemblance thereto as to be likely, when used on or in connection with the goods/services of such other person, to cause confusion, or to cause mistake, or to deceive.

“At the time U.S. Trademark Application Serial No. 78/698,743 was filed, I did not have

any intent to deceive the United States Patent and Trademark Office by signing the Declaration or by the filing the U.S. Trademark Application for the mark COLORWORX and design (Serial No. 78/698,743).

“Ennis believes that it will be harmed or damaged by the registration of the mark COLOR WARS for at least the following reasons:

1. The identification of goods in International Classification 016 of U.S. Trademark Application Serial No. 85/324,443 for the mark COLOR WARS lists numerous items that are printed goods and are not restricted to the ‘field of superhero and cartoon characters.’ Many of these non-field restricted printed goods fall within the target market of Ennis and its distributors under the mark COLORWORX and design.
2. The mark COLOR WARS is very similar to COLORWORX used in the mark COLORWORX and design in that they sound much the same when spoken, and visually a space is added between the R and W, the third O is replaced by an A and the X is replaced by a S.
3. Ennis views the non-field restricted printed goods and the similarity of the words as an intention to use the mark COLOR WARS within the printing industry.
4. If the mark COLOR WARS was used within our traditional business segment, there would be significant confusion due to both terms beginning with “COLOR W”.
5. Mr. Beling’s efforts to cancel our mark COLORWORX and design reinforces our concern that he may target our market using the mark COLOR WARS.
6. Mr. Beling’s refusal to agree to not use the mark COLOR WARS to market

or sell printing within our traditional market segment further reinforces our concern that he may target our market using the mark COLOR WARS.

6. Mr. Beling's refusal to amend the identification of goods in International Classification 016 of U.S. Trademark Application Serial No. 85/324,443 for the mark COLOR WARS to restrict the printed goods to the 'field of superhero and cartoon characters' further reinforces our concern that he may target our market using the mark COLOR WARS.

7. Mr. Beling's contempt for U.S. companies and the U.S. legal system as evidenced by pleadings and communications further reinforces our concern that he may target our market using the mark COLOR WARS.

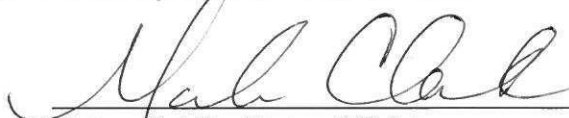

"I believe that the likelihood of confusion, mistake or deception between the mark COLORWORX and design for printing services (U.S. Trademark Registration No. 3,372,884) and the mark COLOR WARS for goods in International Classification 016 (U.S. Trademark Application Serial No. 85/324,443) and the resulting harm or damage to Ennis can be minimized by amending the description of various printed goods in U.S. Trademark Application Serial No. 85/324,443 to recite 'in the field of superhero and cartoon characters.'

"Affiant says nothing further."

Steven Kenneth Osterloh

SUBSCRIBED AND SWORN TO BEFORE ME BY Steven Kenneth Osterloh on the 10 day of March, 2014, to certify which witness my hand and seal of office.

Notary Public, State of Oklahoma

OPPOSER'S FIRST REQUEST FOR ADMISSIONS TO APPLICANT

To: Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, 1 Mirboo Court, Dallas, Victoria 3047, Australia.

Pursuant to Rule 36 of the Federal Rules of Civil Procedure, Ennis, Inc. ("Opposer") hereby serves its First Request for Admissions on Joel L. Beling d/b/a Supa Characters Pty Ltd ("Applicant"), to be answered within thirty (30) days from receipt of these Requests.

A. DEFINITIONS

The following definitions shall have the following meanings, unless the context requires otherwise:

1. "Opposer" and/or "Ennis" as well as a party's full or abbreviated name or a pronoun referring to a party, means the party, and where applicable, the party's agents, representatives, officers, directors, employees, partners, corporate agents, subsidiaries, affiliates, or any other person acting in concert with the party or under the party's control, whether directly or indirectly, including any attorney.

2. "You" or "your" means Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, as well as its agents, employees, and all other persons acting on behalf of Applicant or its successors, predecessors, heirs, beneficiaries or assigns.

3. "Document" means all written, typed, or printed matter and all magnetic, electronic, or other records or documentation of any kind or description in your actual possession, custody, or control, including those in the possession, custody, or control of any and all present or former directors, officers, employees, consultants, accountants, attorneys, or other agents, whether or not prepared by you, that constitute or contain matters relevant to the subject matter of the action.

4. "Possession, custody, or control" of an item means that the person either has physical possession of the item or has a right to possession equal or superior to that of the person who has physical possession of the item.

5. "Person" means any natural person, corporation, firm, association, partnership, joint venture, proprietorship, governmental body, or any other organization, business, or legal entity, and all predecessors or successors in interest.

6. "COLOR WARS" defines the mark COLOR WARS, U.S. Trademark Application Serial No. 85/324,443, applied for by Joel L. Beling d/b/a Supa Characters Pty Ltd.

7. "COLORWORX" defines the mark COLORWORX[®], U.S. Trademark Registration No. 3,372,884 and includes a variety of printing goods and printing services that are international Class 40 products manufactured and put into the stream of commerce by Ennis, Inc.

8. "Identify" or "describe" when referring to a person, means you must state the following:

- a. The full name.
- b. The present or last known residential address and residential telephone number.
- c. The present or last known office address and office telephone number.
- d. The occupation, job title, employer, and employer's address at the time of the event or period referred to in each particular interrogatory.
- e. In the case of any entity, identify the officer, employee, or agent most closely connected with the subject matter of the interrogatory and the officer who is responsible for supervising that officer or employee.

9. "Identify" or "describe" when referring to a document, means you must state the following:

- a. The nature (e.g., letter, handwritten note) of the document.
- b. The title or heading that appears on the document.
- c. The date of the document and the date of each addendum, supplement, or other addition or change.
- d. The identity of the author and of the signer of the document, and of the person on whose behalf or at whose request or direction the document was prepared or delivered.
- e. The present location of the document, and the name, address, position or title,

and telephone number of the person or persons having custody of the document.

B. REQUESTS FOR ADMISSIONS

Admit or deny the following:

REQUEST NO. 1: Opposer is the owner of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX®.

RESPONSE:

REQUEST NO. 2: Opposer, or its related companies, has continuously used the COLORWORX® mark in interstate commerce for a variety of printing goods and printing services.

RESPONSE:

REQUEST NO. 3: Since August, 2002, Opposer's mark, COLORWORX®, has continuously appeared in substantial advertising and promotion of Opposer's printing goods and printing services.

RESPONSE:

REQUEST NO. 4: Opposer's mark, COLORWORX®, is closely identified with Opposer's goods and has gained very valuable public recognition.

RESPONSE:

REQUEST NO. 5: Opposer has used the mark, COLORWORX®, within the last three years.

RESPONSE:

REQUEST NO. 6: Opposer has continuously used its mark, COLORWORX®, in interstate commerce since long prior to any date upon which Applicant can rely.

RESPONSE:

REQUEST NO. 7: Applicant's application was filed on May 18, 2011.

RESPONSE:

REQUEST NO. 8: Applicant's Application is listed as an intent-to-use application.

RESPONSE:

REQUEST NO. 9: Opposer's trademark rights for the COLORWORX® mark has priority over Applicant's mark, COLOR WARS.

RESPONSE:

REQUEST NO. 10: Opposer has not abandoned the mark COLORWORX®.

RESPONSE:

REQUEST NO. 11: Opposer currently provides "letterhead" bearing the mark COLORWORX®.

RESPONSE:

REQUEST NO. 12: Opposer has provided "business cards" bearing the mark COLORWORX® since August of 2002.

EXHIBIT H

OPPOSER'S MOTION FOR SUMMARY JUDGMENT
(OPPOSITION NO. 91203884)

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE TRADEMARK TRIAL AND APPEAL BOARD**

In re Registration No. 3,372,884 (COLORWORX), Registered January 22, 2008

Opposition No. 91203884

Ennis Inc.

v.

Joel L. Beling d/b/a Supa Characters Pty Ltd

Cancellation No. 92055374

Joel L. Beling d/b/a Supa Characters Pty Ltd

v.

Ennis, Inc.

**APPLICANT'S OBJECTIONS AND RESPONSES TO OPPOSER'S SECOND SET OF
INTERROGATORIES**

To: Ennis Inc. 2441 Presidential Parkway, Midlothian, TX 76065, United States.

**I.
OBJECTIONS APPLICABLE TO ALL
INTERROGATORIES, INSTRUCTIONS AND DEFINITIONS**

Applicant agrees to answer Opposer's Interrogatories to the extent that Applicant is required to do so by the Federal Rules of Civil Procedure and the applicable case law, and to the extent that such are not otherwise objectionable.

Applicant further objects to the definitions and instructions set forth in Opposer's Second Set of Interrogatories to the extent that it purports to assign to the words therein defined

meanings other than those in common usage. Applicant will use the commonly accepted definition of words and phrases in answering the Interrogatories.

Applicant hereby objects to all of the above-referenced definitions in each and every Interrogatory in which they are used as if objected to on the above-stated basis individually, and Applicant answers all Interrogatories listed below subject to, and without waiving, the above-stated objections.

INTERROGATORIES

INTERROGATORY NO. 18: Identify all facts, laws, information, or materials that provide any evidence that Opposer made any statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® that were a false representation regarding a material fact.

ANSWER: The applicant objects to the Interrogatory on the grounds that it requires the applicant to marshal his evidence before trial. The applicant further objects to this Interrogatory on the basis that the opposer has shown bad faith during discovery, namely, by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all documents and other evidence and refused and failed to answer all Interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX mark, despite numerous Requests from the applicant to produce these documents and other evidence and answer these Interrogatories. The applicant again invites the opposer to produce all documents and other evidence and answer all interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX Mark. In addition, the opposer has shown bad faith during discovery by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all financial documents concerning the sales, advertising and marketing relating to goods and services allegedly sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant again invites and requests the opposer to produce all documents and other evidence in relation to the sales, advertising, marketing and other financial information relating to goods and services sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant further objects on the grounds that the opposer has no bona fide intent to prosecute the opposition since it has attempted, in this proceeding, to "undertake enforcement measures based on an unreasonable interpretation of the scope of [its] rights [in the Colorworx Mark] for the purpose of intimidating [the applicant] into compliance with the mark owner's

demands” and failed, until now, to take follow up discovery for 18 months. Office of Governmental Affairs– USPTO’s *Report to Congress: Trademark Litigation Tactics and Federal Government Services to Protect Trademarks and Prevent Counterfeiting* (April 2011) (“*Report to Congress*”).

Apart from the above objections, the Applicant refers the opposer to the documents already produced to it, as well as the documents recently produced; to the evidence, arguments, laws, Marks, companies (and associated websites of such companies, to which the opposer has equal access) in the applicant/petitioner’s second amended petition to cancel; to all of the opposer’s responses and lack of candid and complete response to the applicant’s discovery requests; to current trademark laws on fraudulent marks of which the opposer has a better understanding than the applicant.

INTERROGATORY NO. 19: Identify all facts, laws, information, or materials that provide any evidence that any statements made to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX[®] were false.

ANSWER: The applicant objects to the Interrogatory on the grounds that it requires the applicant to marshal his evidence before trial. The applicant further objects to this Interrogatory on the basis that the opposer has shown bad faith during discovery, namely, by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all documents and other evidence and refused and failed to answer all Interrogatories in relation to the Opposer’s statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX mark, despite numerous Requests from the applicant to produce these documents and other evidence and answer these Interrogatories. The applicant again invites the opposer to produce all documents and other evidence and answer all interrogatories in relation to the Opposer’s statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX Mark. In addition, the opposer has shown bad faith during discovery by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all financial documents concerning the sales, advertising and marketing relating to goods and services allegedly sold under the mark “COLORWORX” shown in U.S. Trademark Registration No. 3,372,884. The applicant again invites and requests the opposer to produce all documents and other evidence in relation to the sales, advertising, marketing and other financial information relating to goods and services sold under the mark “COLORWORX” shown in U.S. Trademark Registration No. 3,372,884. The applicant further objects on the grounds that the opposer has no bona fide intent to prosecute the opposition since it has attempted, in this proceeding, to “undertake enforcement measures based on an unreasonable interpretation of the scope of [its] rights [in the Colorworx Mark] for the purpose of intimidating [the applicant] into compliance with the mark owner’s demands” and failed, until now, to take follow up discovery for 18 months. *Report to Congress*.

Apart from the above objections, the Applicant refers the opposer to the documents already

produced to it, as well as the documents attached hereto; to the evidence, arguments, laws, Marks, companies (and associated websites of such companies, to which the opposer has equal access) in the applicant/petitioner's second amended petition to cancel; to all of the opposer's responses and lack of candid and complete responses to the applicant's discovery requests; to current trademark laws on fraudulent marks of which the opposer has a better understanding than the applicant.

INTERROGATORY NO. 20: Identify all facts, laws, information, or materials that provide any evidence that Opposer intended to deceive the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® by making false representations regarding a material fact.

ANSWER: The applicant objects to the Interrogatory on the grounds that it requires the applicant to marshal his evidence before trial. The applicant further objects to this Interrogatory on the basis that the opposer has shown bad faith during discovery, namely, by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all documents and other evidence and refused and failed to answer all Interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX mark, despite numerous Requests from the applicant to produce these documents and other evidence and answer these Interrogatories. The applicant again invites the opposer to produce all documents and other evidence and answer all interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX Mark. In addition, the opposer has shown bad faith during discovery by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all financial documents concerning the sales, advertising and marketing relating to goods and services allegedly sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant again invites and requests the opposer to produce all documents and other evidence in relation to the sales, advertising, marketing and other financial information relating to goods and services sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant further objects on the grounds that the opposer has no bona fide intent to prosecute the opposition since it has attempted, in this proceeding, to "undertake enforcement measures based on an unreasonable interpretation of the scope of [its] rights [in the Colorworx Mark] for the purpose of intimidating [the applicant] into compliance with the mark owner's demands" and failed, until now, to take follow up discovery for 18 months.

Apart from the above objections, the Applicant refers the opposer to the documents already produced to it, as well as the documents recently produced; to the evidence, arguments, laws, Marks, companies (and associated websites of such companies, to which the opposer has equal access) in the applicant/petitioner's second amended petition to cancel; to all of the opposer's responses and lack of candid and complete response to the applicant's discovery requests; to current trademark laws on fraudulent marks of which the opposer has a better understanding than the applicant.

INTERROGATORY NO. 21: Identify all facts, laws, information, or materials that provide any evidence that the United States Patent and Trademark Office relied on any false representations regarding a material fact made by Opposer in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX®.

ANSWER: The applicant objects to the Interrogatory on the grounds that it requires the applicant to marshal his evidence before trial. The applicant further objects to this Interrogatory on the basis that the opposer has shown bad faith during discovery, namely, by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all documents and other evidence and refused and failed to answer all Interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX mark, despite numerous Requests from the applicant to produce these documents and other evidence and answer these Interrogatories. The applicant again invites the opposer to produce all documents and other evidence and answer all interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX Mark. In addition, the opposer has shown bad faith during discovery by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all financial documents concerning the sales, advertising and marketing relating to goods and services allegedly sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant again invites and requests the opposer to produce all documents and other evidence in relation to the sales, advertising, marketing and other financial information relating to goods and services sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant further objects on the grounds that the opposer has no bona fide intent to prosecute the opposition since it has attempted, in this proceeding, to "undertake enforcement measures based on an unreasonable interpretation of the scope of [its] rights [in the Colorworx Mark] for the purpose of intimidating [the applicant] into compliance with the mark owner's demands" and failed, until now, to take follow up discovery for 18 months. *Report to Congress.*

Apart from the above objections, the Applicant refers the opposer to the documents already produced to it, as well as the documents recently produced; to the evidence, arguments, laws, Marks, companies (and associated websites of such companies, to which the opposer has equal access) in the applicant/petitioner's second amended petition to cancel; to all of the opposer's responses and lack of candid and complete response to the applicant's discovery requests; to current trademark laws on fraudulent marks of which the opposer has a better understanding than the applicant.

INTERROGATORY NO. 22: Describe in detail why an amendment of the goods listed in International Class 016 in U.S. Trademark Application Serial No. 85/324,443 for Applicant's mark "COLOR WARS" to specify that the goods are related to, in the field of, about, featuring, in the nature of, concerning, dealing with or directed to "superhero and cartoon characters" is objectionable to You.

ANSWER: The applicant objects to the Interrogatory on the grounds that it requires the applicant to marshal his evidence before trial. The applicant further objects to this Interrogatory on the basis that the opposer has shown bad faith during discovery, namely, by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all documents and other evidence and refused and failed to answer all Interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX mark, despite numerous Requests from the applicant to produce these documents and other evidence and answer these Interrogatories. The applicant again invites the opposer to produce all documents and other evidence and answer all interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX Mark. In addition, the opposer has shown bad faith during discovery by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all financial documents concerning the sales, advertising and marketing relating to goods and services allegedly sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant again invites and requests the opposer to produce all documents and other evidence in relation to the sales, advertising, marketing and other financial information relating to goods and services sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant further objects on the grounds that the opposer has no bona fide intent to prosecute the opposition since it has attempted, in this proceeding, to "undertake enforcement measures based on an unreasonable interpretation of the scope of [its] rights [in the Colorworx Mark] for the purpose of intimidating [the applicant] into compliance with the mark owner's demands" and failed, until now, to take follow up discovery for 18 months. *Report to Congress.*

Apart from the above objections, the applicant responds as follows. Because the applicant's business is not limited to "superhero and cartoon characters." There are many possible versions of the COLOR WARS Mark and Brand which do not involve superheroes and cartoon characters. The concept, story and characters underpinning the COLOR WARS Mark are entirely adaptable to suit the needs of the third party licensor. For example, if Disney wished to license the COLOR WARS Mark and characters, then the version produced in the recently produced documents would be the first version presented to Disney. Another version could involve children playing at a kindergarten whose crayons are accidentally dropped in a stream contaminated by radioactive waste and other toxic chemicals. Each child is mysteriously blinded to all colors except for the color of the crayon they picked up from the stream. The kindergarten collapses as a result of an earthquake and the children have to save the kindergarten teacher with the limited vision they possess. For another example, if a famous clothing company such as Dolce & Gabbana or Gucci wished to license the Mark, the COLOR WARS brand could be adapted to dispense with all the superhero and cartoon features and instead focus on the human versions of the respective color-based characters, or even different versions of a single color, e.g., the Blue Bravado, the Blue Brawler, the Blue Brain, the Blue Bimbo, the Blue Whale, the Blue Mechanic, the Blue Fireman, etc. Likewise, if the Wm. Wrigley Jr. Company wished to license the Mark, the concept, characters and story could be amended to market and sell Skittles confectionary without any superhero or cartoon characters. For example, each Skittle turns into a

live-action child based on a color and fights the other characters inside a packet of Skittles. This could be a sixty-second advertisement wherein the Skittles fight inside the packet and then continue the fight inside the mouth of a happy child. The possibilities are endless. The phrase “superhero and cartoon characters” was only used in the application for the COLOR WARS Mark because of the format of the application. The applicant had and has no intention to so limit the COLOR WARS Mark and brand.

INTERROGATORY NO. 23: Identify all facts, laws, information, or materials that provide any evidence that the combination of design and word elements in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX[®] is generic for printing services.

ANSWER:

The applicant objects to the Interrogatory on the grounds that it requires the applicant to marshal his evidence before trial. The applicant further objects to this Interrogatory on the basis that the opposer has shown bad faith during discovery, namely, by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all documents and other evidence and refused and failed to answer all Interrogatories in relation to the Opposer’s statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX mark, despite numerous Requests from the applicant to produce these documents and other evidence and answer these Interrogatories. The applicant again invites the opposer to produce all documents and other evidence and answer all interrogatories in relation to the Opposer’s statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX Mark. In addition, the opposer has shown bad faith during discovery by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all financial documents concerning the sales, advertising and marketing relating to goods and services allegedly sold under the mark “COLORWORX” shown in U.S. Trademark Registration No. 3,372,884. The applicant again invites and requests the opposer to produce all documents and other evidence in relation to the sales, advertising, marketing and other financial information relating to goods and services sold under the mark “COLORWORX” shown in U.S. Trademark Registration No. 3,372,884. The applicant further objects on the grounds that the opposer has no bona fide intent to prosecute the opposition since it has attempted, in this proceeding, to “undertake enforcement measures based on an unreasonable interpretation of the scope of [its] rights [in the Colorworx Mark] for the purpose of intimidating [the applicant] into compliance with the mark owner’s demands” and failed, until now, to take follow up discovery for 18 months. *Report to Congress*.

Apart from the above objections, the Applicant refers the opposer to the documents already produced to it, as well as the documents attached hereto; to the evidence, arguments, laws, Marks, companies (and associated websites of such companies, to which the opposer has equal access) in the applicant/petitioner’s second amended petition to cancel; to all of the opposer’s responses and lack of candid and complete and to the applicant’s discovery requests; to current

trademark laws on generic marks of which the opposer has a better understanding than the applicant.

INTERROGATORY NO. 24: Identify all facts, laws, information, or materials that provide any evidence that the combination of design and word elements in U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX[®] is merely descriptive of Opposer's printing services.

ANSWER:

The applicant objects to the Interrogatory on the grounds that it requires the applicant to marshal his evidence before trial. The applicant further objects to this Interrogatory on the basis that the opposer has shown bad faith during discovery, namely, by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all documents and other evidence and refused and failed to answer all Interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX mark, despite numerous Requests from the applicant to produce these documents and other evidence and answer these Interrogatories. The applicant again invites the opposer to produce all documents and other evidence and answer all interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX Mark. In addition, the opposer has shown bad faith during discovery by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all financial documents concerning the sales, advertising and marketing relating to goods and services allegedly sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant again invites and requests the opposer to produce all documents and other evidence in relation to the sales, advertising, marketing and other financial information relating to goods and services sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant further objects on the grounds that the opposer has no bona fide intent to prosecute the opposition since it has attempted, in this proceeding, to "undertake enforcement measures based on an unreasonable interpretation of the scope of [its] rights [in the Colorworx Mark] for the purpose of intimidating [the applicant] into compliance with the mark owner's demands" and failed, until now, to take follow up discovery for 18 months. *Report to Congress.*

Apart from the above objections, the Applicant refers the opposer to the documents already produced to it, as well as the documents attached hereto; to the evidence, arguments, laws, Marks, companies (and associated websites of such companies, to which the opposer has equal access) in the applicant/petitioner's second amended petition to cancel; to all of the opposer's responses and lack of candid and complete responses to the applicant's discovery requests; to current trademark laws on merely descriptive marks of which the opposer has a better understanding than the applicant.

INTERROGATORY NO. 25: Identify all facts, laws, information, or materials that provide any evidence that the combination of design and word elements in U.S. Trademark Registration

No. 3,372,884 for the mark COLORWORX[®] describes an ingredient, quality, characteristic, function, feature, purpose or use of Opposer's printing services.

ANSWER:

The applicant objects to the Interrogatory on the grounds that it requires the applicant to marshal his evidence before trial. The applicant further objects to this Interrogatory on the basis that the opposer has shown bad faith during discovery, namely, by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all documents and other evidence and refused and failed to answer all Interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX mark, despite numerous Requests from the applicant to produce these documents and other evidence and answer these Interrogatories. The applicant again invites the opposer to produce all documents and other evidence and answer all interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX Mark. In addition, the opposer has shown bad faith during discovery by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all financial documents concerning the sales, advertising and marketing relating to goods and services allegedly sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant again invites and requests the opposer to produce all documents and other evidence in relation to the sales, advertising, marketing and other financial information relating to goods and services sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant further objects on the grounds that the opposer has no bona fide intent to prosecute the opposition since it has attempted, in this proceeding, to "undertake enforcement measures based on an unreasonable interpretation of the scope of [its] rights [in the Colorworx Mark] for the purpose of intimidating [the applicant] into compliance with the mark owner's demands" and failed, until now, to take follow up discovery for 18 months. *Report to Congress*.

Apart from the above objections, the Applicant refers the opposer to the documents already produced to it, as well as the documents attached hereto; to the evidence, arguments, laws, Marks, companies (and associated websites of such companies, to which the opposer has equal access) in the applicant/petitioner's second amended petition to cancel; to all of the opposer's responses and lack of candid and complete responses to the applicant's discovery requests; to current trademark laws on generic and merely descriptive marks of which the opposer has a better understanding than the applicant.

INTERROGATORY NO. 26: Identify all facts, laws, information, or materials that provide any evidence that the combination of design and word elements in Opposer's mark COLORWORX[®] is not capable of distinguishing Opposer's printing services.

ANSWER:

The applicant objects to the Interrogatory on the grounds that it requires the applicant to marshal his evidence before trial. The applicant further objects to this Interrogatory on the basis that the opposer has shown bad faith during discovery, namely, by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all documents and other evidence and refused and failed to answer all Interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX mark, despite numerous Requests from the applicant to produce these documents and other evidence and answer these Interrogatories. The applicant again invites the opposer to produce all documents and other evidence and answer all interrogatories in relation to the Opposer's statements to the United States Patent and Trademark Office in the filing, prosecution and post-registration filings of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX and the creation of the COLORWORX Mark. In addition, the opposer has shown bad faith during discovery by knowingly, willfully and dishonestly concealing and continuing to conceal from the applicant all financial documents concerning the sales, advertising and marketing relating to goods and services allegedly sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant again invites and requests the opposer to produce all documents and other evidence in relation to the sales, advertising, marketing and other financial information relating to goods and services sold under the mark "COLORWORX" shown in U.S. Trademark Registration No. 3,372,884. The applicant further objects on the grounds that the opposer has no bona fide intent to prosecute the opposition since it has attempted, in this proceeding, to "undertake enforcement measures based on an unreasonable interpretation of the scope of [its] rights [in the Colorworx Mark] for the purpose of intimidating [the applicant] into compliance with the mark owner's demands" and failed, until now, to take follow up discovery for 18 months. *Report to Congress*.

Apart from the above objections, the Applicant refers the opposer to the documents already produced to it, as well as the documents attached hereto; to the evidence, arguments, laws, Marks, companies (and associated websites of such companies, to which the opposer has equal access) in the applicant/petitioner's second amended petition to cancel; to all of the opposer's candid and complete responses to the applicant's discovery requests; to current trademark laws on generic and merely descriptive marks of which the opposer has a better understanding than the applicant.

13:17:02 13 leading. Go ahead and answer.

13:17:05 14 A. Yes.

13:17:05 15 Q. (BY MR. BELING) Okay. What -- what aspects of
13:17:11 16 Ennis's COLORWORX mark does Ennis claim rights to?

13:17:19 17 A. The printing services aspect.

13:17:22 18 Q. Okay. But in terms of the actual mark, that
13:17:26 19 is, the term "COLORWORX" and the design elements,
13:17:32 20 what -- what aspects of -- of those two portions does
13:17:37 21 Ennis claim rights to?

13:17:40 22 A. The words "COLORWORX" and the design mark that
13:17:45 23 we've submitted and use in commerce.

13:17:48 24 Q. Okay. And what, if any, rights or claims
13:17:55 25 regarding the two distinct portions of the mark? Do

13:18:01 1 you -- do you claim the rights to each portion
13:18:06 2 separately, or how -- how would you characterize your
13:18:09 3 claims to the rights in the mark?

13:18:12 4 MR. CHALKER: Object to the question as
13:18:13 5 it's irrelevant, in that the trademark is the mark in
13:18:19 6 its entirety. Go ahead and answer.

13:18:24 7 MR. BELING: Okay.

13:18:24 8 THE WITNESS: Could you repeat that,
13:18:25 9 please?

13:18:26 10 MR. BELING: Yes.

13:18:27 11 THE WITNESS: No, I apologize.

13:18:32 12 MR. BELING: Sorry. What was that,
13:18:32 13 Mr. Chalker?

13:18:35 14 THE WITNESS: I asked the court reporter to
13:18:35 15 repeat the question, please.

13:18:35 16 MR. BELING: Okay. Will she repeat it or
13:18:35 17 do you want me to say it?

13:18:59 18 THE REPORTER: Just a moment, please.

13:18:59 19 (RECORD READ BY THE REPORTER.)

13:18:59 20 A. I believe, if I'm -- I'd have to go back and
13:19:02 21 check, but I believe that we have the rights to the
13:19:05 22 word, as well as the design mark. So we claim them
13:19:09 23 independently, yes.

13:19:11 24 Q. (BY MR. BELING) Okay.

13:19:13 25 A. But that's my recollection.

13:19:16 1 Q. Okay. So you're not claiming -- like, you are
13:19:20 2 claiming, obviously, rights to the mark as a whole, but
13:19:23 3 you are also claiming rights to the two distinct
13:19:27 4 portions?

13:19:29 5 A. I -- We claim the rights to the word,
13:19:33 6 "COLORWORX," all one word, as well as to the design mark
13:19:39 7 itself. Separately, yes.

13:19:41 8 Q. Separately. Okay. Thank you. Did Ennis
13:19:44 9 create its COLORWORX mark from scratch?

13:19:48 10 A. Are you -- Do you mean the word or the design?

13:19:53 11 Q. The word and the design.

13:19:57 12 A. I was not involved in the creation of the word
13:20:03 13 "COLORWORX," so I can't answer on that. On the design,
13:20:08 14 yes, we did design that from scratch.

13:20:13 15 Q. Okay. But you have knowledge of the business
13:20:17 16 affairs of InstaColor and Admore, and that would put you
13:20:25 17 in a position to be able to answer whether Ennis created
13:20:28 18 the COLORWORX portion of its mark from scratch?

13:20:32 19 A. My understanding of the information I've been
13:20:34 20 able to collect is that a division of our organization,
13:20:38 21 a division called Adams McClure, actually came up with
13:20:42 22 that word, and my understanding is they came up with it
13:20:54 23 from scratch. But I do not have direct knowledge of
13:20:49 24 that, nor recollection, because it happened more than
13:20:51 25 ten years ago.

**OPPOSER’S REPLY/RESPONSE TO APPLICANT’S RESPONSE TO
OPPOSER’S MOTION FOR SUMMARY JUDGMENT AND CROSS-MOTION FOR
SUMMARY JUDGMENT**

Opposer, Ennis, Inc., by and through its undersigned counsel hereby submits its response to Applicant’s Reply/Response to Opposer’s Motion for Summary Judgment and Cross-Motion for Summary Judgment (hereinafter referred to as “Applicant’s Response/Cross-Motion”).

I. ADDITIONAL ISSUES RAISED BY APPLICANT

Applicant raised additional issues that were not part of Opposer’s Motion for Summary Judgment: (4) Applicant’s request for reconsideration of his motion for judicial disqualification (TTABVUE #60); (5) Applicant’s amendment to his petition to the Director for judicial disqualification (TTABVUE #61); and (6) Applicant’s Motion to Amend (TTABVUE #104). (Applicant’s Response/Cross-Motion at 1 (Section 1), 14 (Section 8), 15-16 (Sections 9-11)).

Opposer objects to additional issues (4) and (5) with respect to Applicant’s request for reconsideration of his motions for judicial disqualification and Applicant’s amendment to his petition to the Director for judicial disqualification, respectively, because such issues are not decidable on summary

judgment and they are an unpleaded issue in Applicant's Answer. "A party may not obtain summary judgment on an issue that has not been pleaded." TBMP § 528.07(a). As a result, judicial disqualification is not an issue to be decided by summary judgment under Fed. R. Civ. P. 56(a). As a result, Petitioner's Cross-Motion for Summary Judgment on additional issue (4) should be denied. Applicant's additional issues (4) and (5) do not establish any issues of material fact with respect to the grounds sought in Opposer's Motion for Summary Judgment. As a result, Opposer's Motion for Summary Judgment should be granted, and Applicant's Cross-Motion for Summary Judgment should be denied.

With respect to additional issue (6), the parties have briefed the issue and Applicant's Motion to Amend is pending determination by the Board.

II. APPLICANT'S OBJECTIONS AND MOTION TO EXCLUDE OPPOSER'S EVIDENCE ARE NOT NEW AND HAVE BEEN DENIED BY THE BOARD

Applicant objected and moved to exclude the Affidavit of Steven Osterloh dated March 10, 2014 as evidence from Opposer's Motion for Summary Judgment because Opposer is allegedly estopped from introducing the evidence and supplementing the evidence as a result of Opposer's initial objections to Applicant's discovery requests. (Applicant's Response/Cross-Motion at 2-3 (Section 2)). Applicant raised these same objections to the same Affidavit in Applicant/Petitioner's Motion to Exclude Evidence from Opposer/Registrant's Motions for Summary Judgment on April 11, 2014. These issues were fully briefed by the parties on April 11, 2014, April 28, 2014 and May 9, 2014, and the Board denied Applicant's Motion on September 30, 2014 (Order at 4-5, TTABVUE #103). More specifically, the Board "compared Ennis' discovery responses and the Osterloh deposition with the Osterloh affidavit, and find no inconsistency which would support a finding that Ennis now relies on evidence which was improperly withheld from Beling during discovery." (Order at 5, TTABVUE #103). Applicant's objections to the Affidavit of Steven Osterloh dated March 10, 2014 are the same, and the Affidavit is the same. As a result, Applicant's objections and Motion to exclude the Affidavit of Steven Osterloh dated March 10, 2014 as evidence from Opposer's Motion for Summary Judgment should be denied once again.

III. OPPOSER HAS STANDING

There are two requirements for standing in an inter parties opposition: The opposer/petitioner must have (1) “a ‘real interest’ in the proceedings” and (2) “a ‘reasonable’ basis for his belief of damage.” *Ritchie v. Simpson*, 170 F.3d 1092, 1095 (Fed Cir. 1999). The standing requirement is not onerous. *See, e.g., Yamaha Int’l Corp. v. Hoshino Gakki Co., Ltd.*, 231 USPQ 926, 931 (TTAB 1986), *aff’d*, 840 F.2d 1572 (Fed. Cir. 1988).

Applicant alleges that Opposer does not have standing because Opposer does not have a real interest in the outcome of the proceeding and Opposer will not be damaged by the registration of Applicant’s mark. (Applicant’s Response/Cross-Motion at 4-12 (Sections 4-5)). Applicant’s evidence and arguments are flawed and do not raise any disputed material facts with respect to Opposer’s Motion for Summary Judgment.

A. APPLICANT’S ALLEGED EVIDENCE DOES NOT RAISE ANY DISPUTED MATERIAL FACTS REGARDING WHETHER OPPOSER HAS A REAL INTEREST IN THE PROCEEDINGS

Applicant argues that an isolated statement taken out of context from an email sent by one of Opposer’s attorneys is an admission that Opposer lacks standing. (Applicant’s Response/Cross-Motion at 4-5 (Section 4.1.1)). The e-mail string involves a discovery dispute between the parties and one of the numerous instances in which Applicant accused Opposer of fraud and Opposer’s attorneys of conspiracy to commit fraud. (*See* Exhibit A-1). In response to Applicant’s accusations, Mr. Jacks wrote “We would prefer not to involve the TTAB in this matter but if you continue to disparage our client and our firm, we will be forced to do so.” (Exhibit A-1 at 1). This statement is not an admission of any sort; much less an admission the Opposer lacks standing. Instead, this is another instance of Applicant’s selective manipulation of facts and circumstance to achieve his goals. As a result, the communications in Exhibit A-1 do not raise any disputed material facts with respect to Opposer’s Motion for Summary Judgment, and do not constitute any evidence or admission that Opposer lacks standing.

Applicant argues that a failure to oppose Applicant's other trademark applications evidences a lack of standing. (Applicant's Response/Cross-Motion at 5 (Section 4.1.2)). Applicant states that U.S. Trademark Application Serial Nos. 85/324,453 and 85/324,457 are related to the COLOR WARS mark that is being opposed, but omits significant factual distinctions. *Id.* These other two applications do not recite any goods in International Classification 016. U.S. Trademark Application Serial No. 85/324,453 for the mark COLOR WARS: MY FAVOURITE COLOUR IS BLUE/BLACK/CYAN/BROWN/PINK/YELLOW/WHITE/VIOLET/RED/ORANGE/GREEN/GRAY was filed in International Classification 025. Likewise, U.S. Trademark Application Serial No. 85/324,457 for the mark COLOR WARS: COLOUR-LECTION: VOTE BLUE!/BLACK!/CYAN!/BROWN!/PINK!/YELLOW!/WHITE!/VIOLET!/RED!/ORANGE!/GREEN!/GRAY! BLUE/BLACK/CYAN was filed in International Classification 025. As a result, the existence of these two applications and Opposer's decision not to oppose these applications do not raise any disputed material facts with respect to Opposer's Motion for Summary Judgment, and do not constitute any evidence or admission that Opposer lacks standing.

Applicant argues that Opposer's sales to its distributors are not sales to the general public, which constitutes evidence and an admission that Opposer lacks standing. (Applicant's Response/Cross-Motion at 5-8 (Sections 4.1.3-4.1.4)). Applicant appears to argue that Opposer cannot have an interest in these proceedings or belief it will likely be damaged by the registration of Applicant's mark because Opposer provides its goods and services to the general public through its distributors. (Applicant's Response/Cross-Motion at 7-8). Notably, the registration of a mark that may reasonably damage sales to a distributor would naturally and reasonably damage the provider of goods/services to that distributor, which is sufficient to provide standing in an opposition. *See Universal Oil Prods. Co. v. Rexall Drug & Chem. Co.*, 463 F.2d 1122 (CCPA 1972) (parent company has standing to oppose based on use of a wholly owned subsidiary). Moreover, Applicant incorrectly applies a "likelihood of damage" standard instead of a "reasonable belief of damage" standard. (Applicant's Response/Cross-Motion at 7) ("thus there is no likelihood of damage to oppose from the registration of applicant's COLOR WARS mark").

As a result, Applicant's alleged evidence does not raise any disputed material facts with respect to Opposer's Motion for Summary Judgment, and does not constitute any evidence or admission that Opposer lacks standing.

Applicant argues that Opposer's withdrawal of its opposition to Applicant's mark in international classifications 028 and 041 is an admission that Opposer lacks standing. (Applicant's Response/Cross-Motion at 8-9 (Section 4.1.5)). Applicant ignores the fact that an opposer may oppose any of the international classifications in a trademark application and is not required to oppose all the international classifications. *See e.g., Turbo Sportswear Inc. v. Marmot Mountain Ltd.*, 77 USPQ2d 1152 at n.4, n.5 (TTAB 2005) (opposing two classes out of four in two separate applications). Opposer has maintained its opposition to the registration of Applicant's mark in International Classification 016. Opposer's withdrawal of its opposition to International Classifications 028 and 041 do not provide any evidence or admission that Opposer lacks standing to oppose the registration of Applicant's mark in International Classification 016, and do not raise any disputed material facts with respect to Opposer's Motion for Summary Judgment.

Applicant argues that Opposer's failure to respond to some of Applicant's motions and filings is an admission that Opposer lacks standing. Opposer's decision not to file a response any specific filing is not a concession that Applicant's filings are meritorious. For example, many of Applicant's listed filings involve attempts to suspend the proceedings or disqualify judges/attorneys of the Board. Opposer's failure to file a response to any of Applicant's motions or petitions for judicial disqualification do not constitute any agreement or concession under Trademark Rule 2.127(b), because Trademark Rule 2.127(b) applies to motions that are dispositive of matters affecting the non-responding party, and a party is not required to respond to a motion filed by another party to disqualify or recuse a judge. Opposer's litigation strategy to file or not file response to some of Applicant's motions and filings does not provide any evidence or admission that Opposer lacks standing, and does not raise any disputed material facts with respect to Opposer's Motion for Summary Judgment.

Applicant argues that Opposer's claim of common law rights and secondary meaning are admissions that Opposer lacks standing. (Applicant's Response/Cross-Motion at 9-10 (Section 4.1.7-4.1.10)). Applicant attempts to use Opposer's discovery responses as evidence of no harm and no likelihood of confusion, when in fact, they provide evidence of secondary meaning and distinctiveness with respect to Opposer's mark COLORWORX and design, and Opposer's common law trademark rights to Opposer's unregistered word mark COLORWORX and/or unregistered design mark. Such evidence further supports Opposer's standing and substantive grounds for opposing the registration of Applicant mark, even though Opposer has pleaded and proved sufficient evidence of standing without relying on its evidence of secondary meaning, distinctiveness and common law trademark rights. Opposer's evidence of secondary meaning, distinctiveness and common law trademark rights does not provide any evidence or admission that Opposer lacks standing, and does not raise any disputed material facts with respect to Opposer's Motion for Summary Judgment.

B. APPLICANT'S ALLEGED EVIDENCE DOES NOT RAISE ANY DISPUTED MATERIAL FACTS REGARDING WHETHER OPPOSER HAS A REASONABLE BASIS FOR ITS BELIEF OF DAMAGE

Applicant referred to and incorporated by reference its arguments in Section 4.1.1-4.1.10. (Applicant's Response/Cross-Motion at 10 (Section 5.1)). Opposer hereby refers to and incorporates by reference its reply to Applicant's arguments in Sections 4.1.1-4.1.10 as detailed above.

Applicant states that "applicant's COLOR WARS range refers to highly distinctive color-based characters, stories and concepts." (Applicant's Response/Cross-Motion at 10 (Section 5.2)). Applicant's statement supports a finding that an amendment of Applicant's description of goods could minimize the likelihood of confusion and allow the parties to coexist.

Applicant describes Applicant's mark COLOR WARS as having "a soft sounding ending" and the literal element of Opposer's mark COLORWORX as having "a harder-sounding ending." (Applicant's Response/Cross-Motion at 11 (Section 5.3)). Opposer disagrees that there is any material difference in the sound of a "S" and a "X" at the end of a mark. Applicant argues that WORX means

WORKS (Applicant's Response/Cross-Motion at 11 (Section 5.4)) in which case both marks would phonetically end in a "S". As a result, Applicant's analysis of the sound of the marks does not raise any disputed material facts.

Applicant's likelihood of confusion analysis is primarily based on dissecting Opposer's mark COLORWORX and design into separate word elements of COLOR and WORX. (Applicant's Response/Cross-Motion at 11 (Section 5.4)). This is contrary to the first factor in the likelihood of confusion analysis, which requires examination of "the similarity or dissimilarity of the *marks in their entirety* as to appearance, sound, connotation and commercial impression." *In re E. I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973) (emphasis added). Applicant does not analyze the connotation and commercial impression of the literal elements of the marks in their entirety. Applicant's focus on any differences in meaning between WORX and WARS instead of COLORWORX and COLOR WARS is improper. As a result, Applicant's erroneous likelihood of confusion analysis regarding the appearance of the marks and the meaning of a portion of each mark does not raise any disputed material facts.

Applicant argues that there is little possibility of impulse buying of Opposer's goods (Applicant's Response/Cross-Motion at 11 (Section 5.5)), but fails to provide any evidence of the buyers of Applicant's goods. As set forth in Opposer's Motion for Summary Judgment, Applicant's actions and discovery responses indicate that he may expand his goods/services under the COLOR WARS mark into Opposer's market. (TTABVUE #107 at 5, 10-11). Applicant again admits that he intends to expand his goods and services to be provided under the mark COLOR WARS, and there is "overlap in a small number of printing goods" (Applicant's Response/Cross-Motion at 13 (Section 6.1)). These statements support Opposer's Motion for Summary Judgment on the issues that the services provided under Opposer's mark COLORWORX and design are similar or overlap the goods Applicant intends to provide under the mark COLOR WARS, and Opposer will likely be damaged by the registration of Applicant's mark COLOR WARS in International Classification 016.

Applicant's arguments in Sections 5.6-5.8 do not provide any evidence or raise any disputed material facts relevant to Opposer's Motion for Summary Judgment.

**C. OPPOSER HAS SUBMITTED SUFFICIENT EVIDENCE TO PROVE
STANDING**

Opposer has submitted evidence proving that Opposer is the owner of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX® ("Opposer's Mark"), who has a real interest in the outcome of this proceeding, and has a reasonable belief that it would be damaged by the registration of Applicant's COLOR WARS mark in International Classification No. 016. (TTABVUE #107, Exhibits A (Registration information) and B (Affidavit of Steven Osterloh)). Applicant admits that Opposer's trademark rights for the COLORWORX Mark has priority over Applicant's COLOR WARS Mark. (TTABVUE #107, Exhibit G-1 (Request for Admission No. 9) and Exhibit G-2 (Response to Request for Admission No. 9)).

Moreover, Opposer has submitted evidence that the registration of Applicant's mark COLOR WARS will likely damage or harm Opposer for at least the following reasons in the Affidavit of Steven Osterloh. (TTABVUE #107, Exhibit B at 3-4). Applicant's conduct in this proceeding provides a reasonable basis for Opposer's belief that damage or harm is likely. *Id.*

As a result, the foregoing evidence provides sufficient evidence that Opposer has standing to oppose the registration of Applicant's mark and there are no disputed material facts with respect to Opposer's standing.

**IV. APPLICANT'S LIKELIHOOD OF CONFUSION ANALYSIS DOES NOT RAISE ANY
DISPUTED MATERIAL FACTS**

Applicant referred to and incorporated by reference its arguments in Sections 4 and 5. (Applicant's Response/Cross-Motion at 13 (Section 6.1)). Opposer hereby refers to and incorporates by reference its reply to Applicant's arguments in Sections 4 and 5 as detailed above.

Applicant argues that its "intent to expand his mark to printing goods and services, opposer's primary market, is wholly irrelevant in light of" the alleged differences in the marks. Opposer disagrees

and submits that Applicant's statements provide further evidence to support Opposer's Motion for Summary Judgment.

Applicant's improper legal analysis and admissions do not establish any issues of material fact with respect to the grounds sought in Opposer's Motion for Summary Judgment. As a result, Opposer's Motion for Summary Judgment should be granted, and Applicant's Cross-Motion for Summary Judgment should be denied.

V. APPLICANT'S AMENDMENT TO HIS APPLICATION IS UNDISPUTED

Applicant states that he was forced to amend his application and the amendment was an unintended stipulation. (Applicant's Response/Cross-Motion at 13 (Section 7)). These opinions do not change the fact that Applicant entered the amendment.

VI. CONCLUSION

For all the reasons stated above, that there is no genuine dispute as to any material fact and Opposer is entitled to judgment as a matter of law.

More specifically, Opposer prays that the Board denies Applicant's Cross-Motion for Summary Judgment and grants Opposer's Motion for Summary Judgment in its entirety by: (1) finding Opposer has standing to bring the Opposition; (2) finding Opposer will likely be damaged by the registration of Applicant's mark COLOR WARS in International Classification 016; (3) finding Applicant is not entitled under law to register its mark COLOR WARS in International Classification 016, or alternatively, Applicant is required to amend its description of goods and services in International Classification 016 as specified; and (4) granting all other and further relief to which Opposer is justly entitled. Entry of judgment in favor of Opposer in Opposition No. 91203884 is requested in its entirety.

**EXHIBIT A
DECLARATION OF DANIEL J. CHALKER
IN SUPPORT OF OPPOSER'S REPLY/RESPONSE TO APPLICANT'S RESPONSE TO
OPPOSER'S MOTION FOR SUMMARY JUDGMENT AND CROSS-MOTION FOR
SUMMARY JUDGMENT**

The undersigned, DANIEL J. CHALKER, hereby submits the following Declaration pursuant to Trademark Rule 2.20 and declares the following:

"My name is Daniel J. Chalker. I am over the age of twenty-one (21) years, am of sound mind, and have never been convicted of a crime or offense involving moral turpitude. I am fully authorized and competent to execute this Declaration and am not disqualified by law from making this Declaration. All facts stated herein are within my personal knowledge, and under penalty of perjury, I declare they are true and correct.

"I am a founding partner of Chalker Flores, LLP and lead attorney representing Opposer, Ennis, Inc., in the above-referenced cancellation proceeding.

"Exhibit A-1, attached hereto, is a true and accurate print out of a string of e-mails

between Tom Jacks and Joel Beling between June 21, 2012 and June 28, 2012.

“Declarant says nothing further.”

Joel,

As we have done throughout this matter, we are actively searching for additional documents and will continue to supplement our production according to the Federal Rules of Civil Procedure. I cannot and will not promise that the supplementation, if any, will occur by Tuesday 5 pm, CST.

Additionally, I am extremely disappointed in the lack of professionalism demonstrated in your email below and throughout this matter. Your continued accusations that our client and our firm committed fraud on the USPTO and that we are trying to hide evidence are unfounded and reckless. We have treated you with respect and our actions have been ethical and professional. We understand that you are emotionally involved in this matter but respectfully request that you afford us the same professionalism that we have consistently shown you.

We would prefer not to involve the TTAB in this matter but if you continue to disparage our client and our firm, we will be forced to do so. As always, we are available to further discuss any issues with you by phone.

Tom,

Thank you. Please provide all your documents and answers to all interrogatories and requests for admissions by Tuesday 5pm, CST time.

Amongst other live issues, it should be borne in mind that fraud is a very, very serious allegation and I am giving your client the opportunity to clear its name. Concealing evidence and violating the Federal Rules of Civil Procedure only confirms suspicions of fraud. I'm sure Ennis Inc doesn't want to undo 103 years of hard work, destroy its public reputation and decimate its stock value with a couple of years of criminal activity perpetrated to offset the obscelensce of standard business forms and the resultant massive drop in profits.

Of course, I need not remind you of Chalker Flores' alleged role in conspiracy to commit fraud on the USPTO and other

offences.

I fully disclosed my case when I absolutely did not want to. Please show me the same courtesy and abide by the law.

I will be relying on this correspondence in a Motion to Compel all discovery responses and requests not satisfactorily disclosed by you and on the question of my reasonable expenses in filing the motion.

This is the last time I will be communicating to you before filing my motion to compel on Tuesday evening, CST time. Please do the right thing and answer all my Discovery Requests completely.

Remember, this is YOUR action. Prove it.

Joel

LETTER TO CONGRESS

The Department of Commerce is pleased to transmit this report on Trademark Litigation Tactics.

On March 17, 2010, President Obama signed S. 2968, Trademark Technical and Conforming Amendment Act of 2010, into law as Public Law 111-146. The new law tasked the Department of Commerce, in consultation with the Intellectual Property Enforcement Coordinator (IPEC), to study the extent to which small businesses may be harmed by abusive trademark enforcement tactics. Working with the IPEC, we developed the enclosed report and recommendations.

In introducing the study, Vermont Senator Patrick Leahy said:

“I am concerned that large corporations are at times abusing the substantial rights Congress has granted them in their intellectual property to the detriment of small businesses. We saw a high-profile case like this in Vermont last year involving a spurious claim against Rock Art Brewery. When a corporation exaggerates the scope of its rights far beyond a reasonable interpretation in an attempt to bully a small business out of the market that is wrong.”

Trademarks add tremendous value to the U.S. economy. Nine of the top ten global brands in the world hail from the United States.¹ Recognizing that a trademark is a property right that an owner has a duty to police, this report discusses trademark litigation tactics generally and the specific issue of whether, in otherwise rightfully policing marks, some trademark owners may undertake enforcement measures based on an unreasonable interpretation of the scope of their rights for the purpose of intimidating potential violators into compliance with the mark owner’s demands.

In connection with studying this specific issue, the Department of Commerce’s United States Patent and Trademark Office (USPTO) undertook significant outreach to stakeholders and small businesses, including a request for comments period that spanned more than four months. The 79 comments received reflected a diverse range of views, yet few explicitly addressed whether and to what extent trademark abuse is a significant problem.

Ultimately, because trademark enforcement is a private property rights litigation issue, if abusive tactics are a problem, such tactics may best be addressed by the existing safeguards in the litigation system in the U.S. and by private sector outreach, support, and education relating to these issues. However, to the extent small businesses are disproportionately adversely affected by such tactics because they lack the funds to hire counsel to defend against them, we believe the Federal Government can undertake the following actions:

1. Engage the private sector about providing free or low-cost legal advice to small businesses via *pro bono* programs and intellectual property rights clinics;
2. Engage the private sector about offering continuing legal education programs focused on trademark policing measures and tactics;

¹ Interbrand, Best Global Brands 2010, (<http://www.interbrand.com/en/best-global-brands/Best-Global-Brands-2010.aspx>).

3. Enhance Federal agency educational outreach programs by identifying resources that enable small businesses to further their understanding of trademark rights, enforcement measures, and available resources for protecting and enforcing trademarks.

We look forward to continuing to work with Congress, Federal agencies, and all stakeholders, including small businesses, to improve the protection and enforcement of trademarks and other intellectual property.

Sincerely,

Gary Locke
Secretary of Commerce

I. Introduction

On March 17, 2010, President Obama signed S. 2968, Trademark Technical and Conforming Amendment Act of 2010, into law as Public Law 111-146. Included in the new law was the requirement for a study and report, due one year later, on the effect of abusive trademark litigation tactics on small businesses. The study and report was to be completed by the Department of Commerce (DOC), in consultation with the Intellectual Property Enforcement Coordinator (IPEC).

SEC. 4. STUDY AND REPORT.

(a) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, the Secretary of Commerce, in consultation with the Intellectual Property Enforcement Coordinator, shall study and report to the Committee on the Judiciary of the Senate and the Committee on the Judiciary of the House of Representatives on— (1) the extent to which small businesses may be harmed by litigation tactics ~~by corporations attempting~~ ***the purpose of which is***² to enforce trademark rights beyond a reasonable interpretation of the scope of the rights granted to the trademark owner; and (2) the best use of Federal Government services to protect trademarks and prevent counterfeiting.

(b) RECOMMENDATIONS.—The study and report required under paragraph (1) shall also include any policy recommendations the Secretary of Commerce and the Intellectual Property Enforcement Coordinator deem appropriate.

To address the study and report objectives, the DOC and the United States Patent and Trademark Office (USPTO) reviewed data and research materials regarding trademark litigation tactics, including tactics that may impact small businesses. In addition, USPTO requested feedback from U.S. trademark owners, practitioners, and others regarding their experiences with enforcement tactics, especially those involving an attempt to enforce trademark rights beyond a reasonable interpretation of the scope of the rights granted to the trademark owner. The USPTO conducted outreach to small businesses via an intellectual property awareness campaign event, and also conducted outreach to industry via a large industry organization. Finally, USPTO consulted with its own private advisory board, the Trademark Public Advisory Committee.

Because evaluating whether trademark rights have been enforced beyond a reasonable scope requires an understanding of fundamental trademark law principles and enforcement strategies, this report begins by providing basic background information about trademark rights and the typical ways in which, and reasons why, those rights are enforced in the United States. Against this background, the report next addresses trademark enforcement tactics and in doing so summarizes comments received from U.S. trademark owners, practitioners, and others in response to questions posted on USPTO's web site³ requesting feedback regarding their experiences with litigation tactics, especially those involving an attempt to enforce trademark

² The language shown in bold italicized text was amended by S. 3689, "Copyright Cleanup, Clarification and Corrections Act of 2010" which was signed into law on December 9, 2010 as Public Law No. 111-295. Section 6(h) states: "TRADEMARK TECHNICAL AMENDMENTS ACT.—Section 4(a)(1) of Public Law 111–146 is amended by striking “by corporations attempting” and inserting “the purpose of which is.”

³ http://www.uspto.gov/trademarks/notices/litigation_tactics.jsp

rights beyond a reasonable interpretation of the scope of the trademark owner's rights. The topic of abusive trademark litigation tactics was also discussed at a public roundtable. Finally, the report provides an overview of the various Federal Government resources available to stakeholders to protect and enforce trademarks in the United States and the types of services the Government provides to help prevent counterfeiting in the United States.

II. Trademark Enforcement and Marketplace Impact⁴

Any discussion of trademark litigation tactics, and a study of their impact on small businesses, must begin with understanding what a trademark is, the scope of the right, and how the right is defended. Also, an examination of trademark litigation tactics must be made in the context of all litigation tactics, to determine if trademark litigation presents any unique or unusual issues.

A. Background on Trademark Rights

1. Trademarks and Their Purpose

The term “trademark”⁵ is defined broadly as including: “any word, name, symbol, or device, or any combination thereof—(1) used by a person...to identify and distinguish his or her goods, including a unique product, from those manufactured or sold by others and to indicate the source of the goods, even if that source is unknown.”⁶ In essence, a trademark is anything that functions as a source identifier to consumers.

Trademarks serve as indications of origin and quality. They represent the “goodwill” or reputation a business and its products and services enjoy with the public. Businesses rely on their marks to identify their products and services and distinguish them from those of their competitors. The public relies on marks to distinguish among competing producers and as guarantees of quality. As the Seventh Circuit has explained:

The fundamental purpose of a trademark is to reduce consumer search costs by providing a concise and unequivocal identifier of the particular source of particular goods. The consumer who knows at a glance whose brand he is being asked to buy knows whom to hold responsible if the brand disappoints and whose product to buy in the future if the brand pleases. This in turn gives producers an incentive to maintain high and uniform quality, since otherwise the investment in their trademark may be lost as customers turn away in disappointment from the brand. A successful brand, however, creates an incentive in unsuccessful competitors to pass off their inferior brand as the successful brand by adopting a confusingly similar trademark, in effect appropriating the goodwill

⁴ This section provides a general overview of basic trademark law principles. It is not intended to constitute legal advice. Interested parties should consult qualified legal counsel to obtain advice on a case-by-case basis.

⁵ The terms “trademark” or “mark” as used in this report refer generally to both trademarks and service marks. A trademark identifies the source of goods, while a service mark identifies the source of services. *See* 15 U.S.C. § 1127.

⁶ 15 U.S.C. § 1127.

created by the producer of the successful brand. The traditional and still central concern of trademark law is to provide remedies against this practice.⁷

Indeed, when Congress enacted the Lanham Act in 1946, 15 U.S.C. § 1051 *et seq.* (“Trademark Act”), it explained that the statute served dual purposes:

One is to protect the public so it may be confident that, in purchasing a product bearing a particular trade-mark which it favorably knows, it will get the product which it asks for and wants to get. Secondly, where the owner of a trade-mark has spent energy, time, and money in presenting to the public the product, he is protected in his investment from its misappropriation by pirates and cheats.⁸

Thus, the Trademark Act protects against use of marks that are likely to cause confusion, mistake, or to deceive consumers as to the source, sponsorship, or approval of goods or services.⁹ It also protects owners of famous marks against dilution through blurring or a tarnishing of their image even absent a likelihood of confusion.¹⁰

2. All Trademarks Are Not Created Equal

Trademarks are categorized along a spectrum of distinctiveness. On the one end are generic terms for the category of goods or services that can never be protected as trademarks. On the other end are fanciful or coined terms that are inherently the strongest kind of mark and generally afforded the broadest scope of protection.¹¹ Placement on the distinctiveness spectrum determines eligibility for and affects the scope of trademark protection.¹² Marks that are categorized on the inherently distinctive side of the spectrum -- fanciful/coined, arbitrary, suggestive -- are immediately protectable, while those falling into the merely descriptive category are non-distinctive and unprotectable unless they acquire secondary meaning.

In general, the more distinctive a mark is, the stronger it is and the greater the scope of protection the mark will receive in court against uses of the same or similar marks. Because all trademarks do not receive or deserve the same scope of protection, the type of mark a business selects will have a direct effect on its ability to protect the mark.

Trademark rights are not static, however. A mark’s distinctiveness and strength can change over time based on use of the mark by the owner and the perception of the mark by consumers. For

⁷ *Ty Inc. v. Perryman*, 306 F. 3d 509, 510 (7th Cir. 2002); *see also* 1 Anne Gilson LaLonde, GILSON ON TRADEMARKS (“Gilson”) § 1.03 (2010).

⁸ Senate Rep. No. 79-1333 at 3, 5 (1946).

⁹ 15 U.S.C. §§ 1114, 1125(a).

¹⁰ 15 U.S.C. § 1125(c).

¹¹ *See Abercrombie & Fitch Co. v. Hunting World, Inc.*, 537 F.2d 4, 9 (2d Cir. 1976) (setting forth the classic formulation of: fanciful/coined – arbitrary – suggestive – descriptive – generic).

¹² *McGregor-Doniger Inc. v. Drizzle Inc.*, 599 F.2d 1126, 1131 (2d Cir. 1979) (“The strength or distinctiveness of a mark determines both the ease with which it may be established as a valid trademark and the degree of protection it will be afforded”).

example, an inherently “weak” mark can become strong and receive a broader scope of protection due to commercial success and widespread use in commerce (e.g., increased channels of trade, wider geographic use, expansion of the brand to other goods and services).¹³ Conversely, if a trademark owner does not diligently police proper use of its mark (e.g., by competitors, the public, and the media), a term that was originally coined and thus inherently the strongest type of trademark, can become generic and fall into the public domain. The trademark landscape is littered with distinctive terms that were once registered as trademarks, but became generic, including “cellophane”¹⁴ for a transparent wrapping, “escalator”¹⁵ for moveable staircases, “trampoline”¹⁶ for a rebound tumbler, and “yo-yo”¹⁷ for a spinning toy on a string. Because trademarks rights may be lost or severely weakened if unauthorized third-party usage goes unchecked, enforcement efforts are essential to maintaining the rights.

B. Policing and Enforcing Trademark Rights

Trademark owners have a legal right and an affirmative obligation to protect their trademark assets from misuse.¹⁸ If the owner does not proactively police the relevant market and enforce its rights against violators, the strength of the mark, the owner’s ability to exclude others from using the same or similar marks in the marketplace, and the value of the asset all will diminish.¹⁹ Failure to take action may result in consumers being confused or deceived as to the source or sponsorship of goods or services, harm to the owner’s reputation, and lost sales. A trademark owner is not required to object to all unauthorized uses that might conflict, for not every third-party use poses the same risk of eroding distinctiveness in the marketplace.²⁰ However, widespread unauthorized uses may cause the mark to lose its trademark significance altogether

¹³ See, e.g., *E. Remy & Co., S.A. v. Shaw Ross Int’l Imports, Inc.*, 756 F.2d 1525, 1533 (11th Cir. 1985).

¹⁴ *DuPont Cellophane Co., Inc. v. Waxed Products Co., Inc.*, 85 F.2d 75 (2d Cir. 1936).

¹⁵ *Haughton Elevator Co. v. Seeberger*, 85 USPQ 80 (Comm. Pat. 1950).

¹⁶ *Nissen Trampoline Co. v. American Trampoline Co.*, 193 F. Supp. 745 (S.D. Iowa 1961).

¹⁷ *Donald F. Duncan, Inc. v. Royal Tops Mfg Co., Inc.*, 343 F.2d 655 (7th Cir. 1965).

¹⁸ See generally, 2 J. Thomas McCarthy, MCCARTHY ON TRADEMARKS AND UNFAIR COMPETITION § 11:91 (4th ed. 2010) (“McCarthy”); see also 1 McCarthy § 2:15 (“A trademark is a kind of property, but a very delicate property right it is. Great care must be taken in the nature of its use, and in the manner in which it is assigned or licensed, lest the significance of the mark be lost.”)

¹⁹ See 2 McCarthy § 11:91 (“The only way a trademark owner can prevent the market from becoming crowded with similar marks is to undertake an assertive program of policing adjacent “territory” and suing those who edge to close.”); see also *Morningside Group Ltd. v. Morningside Capital Group, L.L.C.*, 182 F.3d 133, 139 (2d Cir. 1999) (“[T]he successful policing of a mark adds to its strength to the extent that it prevents weakening of the mark’s distinctiveness in the relevant market.”).

²⁰ As the USPTO’s Trademark Trial and Appeal Board has observed: “[I]t is entirely reasonable for the [trademark owner] to object to the use of certain marks in use on some goods which it believes would conflict with the use of its marks . . . while not objecting to use of a similar mark on other goods which it does not believe would conflict with its own use.” *Chicago Bears Football Club Inc. v. 12th Man/Tennessee LLC*, 83 USPQ2d 1073, 1082 (TTAB 2007), quoting *McDonald’s Corp. v. McKinley*, 13 USPQ2d 1895, 1899-1900 (TTAB 1989).

and fall into the public domain.²¹ Thus, diligent enforcement of trademark rights is necessary to help prevent others from unfairly trading off the mark owner's goodwill and reputation and to protect the public from mistakenly believing that the mark owner authorizes, endorses, sponsors, or is somehow affiliated with another business.

1. Detecting Potential Violations

In view of the potential harms that failure to police rights violations can cause to the public and the trademark owner, mark owners must be proactive in monitoring registration activity at the USPTO and marketplace uses to discover potential trademark violations. For example, trademark owners may search and monitor:

- newly filed trademark applications;
- published trademark applications;
- recently issued registrations;
- domain name registrations;
- the Internet, including Internet auction and news sites;
- new company names;
- competitors' marks and marketing materials; and
- other uses of trademarks in business.

Small businesses and startup companies that are still in the early phases of developing goodwill in their marks may not have many resources to devote to detecting infringements. But they can still exercise vigilance by asking employees to keep an eye out for trademark violations and by periodically searching the Internet and USPTO's database of applications and registrations.

When resources permit, trademark owners or their counsel often will contract with a commercial trademark watch service provider to do much of the monitoring for them. The trademark owner will set the parameters of the search in order to create an individualized watch strategy based on the owner's budget and trademark protection needs. A very distinctive mark with wide use in commerce may benefit from a broad search for potentially conflicting marks, while a highly suggestive or descriptive mark may warrant only a limited search. A typical set of weekly or monthly watch service reports might include several newly filed trademark applications in the United States, several foreign trademark applications that have been published for opposition, as well as a number of domain names that include marks or terms that may conflict with the trademark being protected by the watch service.

2. Evaluating Potential Violations

Once unauthorized uses of the same or similar marks have been identified, the trademark owner typically consults trademark counsel to evaluate the matter and help determine whether action

²¹ See, e.g., *Freecycle Network, Inc. v. Oey*, 505 F.3d 898, 906, USPQ2d 1530 (9th Cir. 2007) (observing that "trademark owners are free (and perhaps wise) to take action to prevent their marks from becoming generic and entering the public domain--e.g., through a public relations campaign or active policing of the mark's use."); *BellSouth Corp. v. DataNational Corp.*, 60 F.3d 1565, 1570 (Fed. Cir. 1995) ("While the 'Walking Fingers' logo may once have been a strong candidate for trademark protection, through common usage by virtually all classified directory publishers it can no longer be understood to represent a source of the directories. Instead . . . [it] now identifies the product — classified telephone directories — generally."); see generally 3 McCarthy §17:8.

should be taken, and if so, the best course of action to protect the owner's rights and further the owner's business goals. The first step in determining whether a particular use constitutes a potential rights violation is to consider the available legal theories and examine whether the elements of a claim (under Federal or state law) can be established.

The most common of these theories is trademark infringement. Trademark infringement is the commercial use of the same or similar mark by another that is "likely to cause confusion" among actual or potential customers of the products or services at issue. To prevail on a claim of infringement, the plaintiff must establish that it owns the mark, has priority of use over the defendant's use of the allegedly infringing mark, and that a likelihood of confusion as to source or sponsorship exists. In general, likelihood of confusion is evaluated on a case-by-case basis, considering the totality of circumstances.

Each circuit court of appeals has its own multi-factor test for evaluating likelihood of confusion necessary to ground a trademark infringement claim. While the articulation of the factors varies somewhat, all of the tests address the same basic types of factors.²² These factors include the similarity of the marks, the similarity or relationship of the respective goods and/or services, the strength (inherent and marketplace) of the asserted mark, the commonality of trade channels and advertising methods, the sophistication of purchasers, whether the accused mark was adopted in bad faith, and the existence of actual confusion.

Although no one factor is necessarily controlling, two key factors are the similarity between the marks and the proximity of the goods and/or services. Average purchasers retain only a general, rather than specific, impression of trademarks. Thus, to qualify as "similar," marks need not be identical. Rather, the marks need only be sufficiently similar in the overall commercial impression they convey (e.g., they share sufficient similarities in one or more of the following factors: appearance, sound, or meaning). Likewise, the respective goods/services do not have to be identical or even competitive, and need only be related (e.g., they are of the same type, in the same field, used together, or marketed through the same channels of trade). Generally speaking, the *more* similar the marks, the *less* related the goods and/or services need to be to find a likelihood of confusion and the *less* similar the marks, the *more* related the goods and/or services need to be to find a likelihood of confusion.

Enforcement actions are not, however, limited to those uses that are likely to cause confusion. A reasonable interpretation of the scope of trademark rights also includes those uses that are likely to cause dilution²³ -- uses that are likely to tarnish²⁴ the reputation of or blur²⁵ the source-

²² See 4 McCarthy §§ 24:30-24:43 (listing factors by circuit).

²³See 15 U.S.C. § 1125(c) ("Subject to the principles of equity, the owner of a famous mark that is distinctive, inherently or through acquired distinctiveness, shall be entitled to an injunction against another person who, at any time after the owner's mark has become famous, commences use of a mark or trade name in commerce that is likely to cause dilution by blurring or dilution by tarnishment of the famous mark, regardless of the presence or absence of actual or likelihood of confusion, of competition, or of actual economic injury.") To qualify for federal dilution protection, the mark owner must establish its mark is famous under the factors set out in the statute amongst the general consuming public of the United States. Many states also have laws that protect against dilution of marks.

²⁴ Compare *Kraft Food Holdings Inc. v. Helm*, 205 F. Supp.2d 946 (N.D. Ill. 2002) (injunction barring use of King Velveeda on adult web site as dilution by tarnishment of Velveeta cheese products) to *Starbucks Corp. v. Wolfe's Borough Coffee Inc.*, 588 F.3d 97 (2d Cir. 1009) (Charbucks line of high quality coffee not found to tarnish Starbucks, in fact, Charbucks may make Starbucks line more desirable).

identifying function of a mark that qualifies as “famous” by lessening the distinctiveness and selling power of the famous mark. It also includes those uses that constitute cybersquatting, or are otherwise an act of “unfair competition,” such as false advertising.²⁶

3. Additional Enforcement Considerations

Once a problematic mark has been identified, before taking enforcement measures, a prudent trademark owner typically conducts some due diligence and takes into account a number of considerations. For example, because prevailing on an infringement claim requires the mark owner to establish ownership and priority of use of its mark, mark owners often will investigate the third-party’s use to determine whether the mark owner has superior rights, before taking action. Additional considerations may include the distinctiveness and strength of the mark being enforced, how similar the third-party mark is to the owner’s mark, the nature of the third-party use (e.g., directly competitive or ancillary), the trademark owner’s expansion plans for its mark, and the resources the owner has available for enforcement.

Additionally, the perceived level of risk presented by the third-party mark and the desired outcome of the enforcement effort typically affects both the approach and the tone of the enforcement effort. For example, in many cases a mark owner will be satisfied with an outcome where the violator ceases use of the challenged mark. In other cases, monetary relief will also be desired, particularly if intentional copying exists and the unauthorized user has profited from its infringing activities. In still other circumstances, the trademark owner may be willing to permit the unauthorized party to continue use, but subject to certain limitations, such as modifications to the challenged mark or the manner in which it is used, or geographically restricted use of the mark. Or the mark owner may only desire to keep the Federal register clear of similar marks. For example, where a third-party application or registration lists goods or services within the mark owner’s scope of use, but the mark owner does not believe that the third-party’s actual marketplace use is likely to cause confusion, the mark owner may not object to continued use of the third-party mark, but will object to its presence on the register.

4. Typical Enforcement Measures

Once the mark owner has committed to challenge a particular unauthorized mark, the course of action taken depends on the situation presented. The mark owner typically will first set forth its demands in a cease-and-desist letter, pursue settlement, and later may initiate a civil action.

a. Cease-and-Desist Letters

Trademark enforcement efforts usually begin with sending a demand letter, also known as a “cease-and-desist letter.” The cease-and-desist letter serves to put the alleged violator on notice of the mark owner’s rights and the violator’s perceived rights violation. The normal goal of such

²⁵ See e.g., *Visa Intl. Serv. Assn. v. JSL Corp.*, (9th Cir. 2010) (dilution of the credit card company’s mark by blurring was likely since Visa and eVisa – a mark used in connection with a multilingual educational and information service – were virtually identical, the common “e” prefix did not distinguish the marks, and two products would be competing for association with the word “Visa”).

²⁶ See 15 U.S.C. § 1125(a)-(d).

a letter is to obtain early resolution of the matter and spare both parties the time and expense of a civil litigation or *inter partes* proceeding before USPTO's Trademark Trial and Appeal Board.

The typical format of a cease-and-desist letter notifies the alleged infringer of the mark owner's rights, explains why the mark owner believes confusion (or if appropriate, dilution) is occurring, or likely to occur if the alleged infringer continues use of its mark, and sets forth the mark owner's demands that the alleged infringer take certain actions (e.g., ceasing use, abandoning applications, surrendering domain names, obliterating the mark from existing products, limiting use to a certain manner and scope, paying profits, and the like). The letter also usually requests a response by a specified date or within a specific time frame.

The demands in the letter and the tone (threatening or conciliatory) may vary depending on the facts and circumstances presented. If a violation is sufficiently problematic that the mark owner is prepared to litigate immediately, the letter may threaten such litigation if the violator fails to comply with the demands set forth in the letter. The letter may even be accompanied by a courtesy copy of a complaint that has been or will be filed if the matter cannot be expeditiously resolved to the satisfaction of the mark owner.

Upon receiving a demand letter, the recipient may respond on its own or consult with trademark counsel. Often, counsel will send a "hold" letter to buy time to investigate the merits of the mark owner's claims, consult with the client, and prepare a response.

Responses to a cease-and-desist letter generally fall into three main categories:

- 1) The alleged violator agrees to comply with the mark owner's demands and/or stops using the offending trademark. If this occurs, the parties may memorialize this in writing with either a written response letter that resolves the matter, or if the matter is more complex, via a settlement agreement.
- 2) The alleged violator does not respond within the specified time frame. At this point, the mark owner often will send a follow-up letter. If no response is forthcoming, the mark owner will either decide to drop its effort and acquiesce in that party's use, or the mark owner will continue to pursue the matter by filing a lawsuit (typically in a Federal district court). If the owner's concern relates solely to efforts to register a mark, the owner may opt to file a proceeding with USPTO's TTAB to petition to cancel a registration or oppose an application, instead of filing a district court action.
- 3) The alleged infringer denies the allegations of infringement and/or asserts various legal defenses justifying its ability to use its mark, files a declaratory judgment action, or offers a compromise solution for going forward. If the response presents compelling facts or legal points that the mark owner may not have known or failed to consider, the owner may decide to pursue settlement or drop its claims altogether (e.g., if it turns out the alleged infringer can show that it has priority of use). If the mark owner does not believe settlement is possible, the mark owner usually will continue to pursue the matter by filing a lawsuit or initiating a cancellation or opposition proceeding with USPTO's TTAB.

b. Settlement/License Agreements

If the trademark dispute can be resolved amicably, the parties may enter into a settlement agreement. If the parties believe their marks can co-exist, the agreement terms may include

provisions governing use and/or registration of the marks aimed at reducing the potential for confusion in the marketplace. For example, settlement agreements may include terms governing the manner and format in which the alleged infringer's mark may be used (e.g., a particular font or stylization, with a disclaimer, etc.), the products and services on which it may be used, and the geographic areas in which it may be used. In matters where the alleged infringer will cease use of the mark but requires time to transition to a new mark, the agreement typically will include terms addressing the length of time the alleged infringer has to phase out use of its mark.

In appropriate circumstances, a trademark owner may choose to grant a license for the use of its mark by the alleged infringer. When done properly, licensing can enhance trademark recognition and rights. Licensing can also be an effective way to end litigation or a cost-effective alternative to litigation.

Settlement and license agreements usually enable the mark owner to exercise some control over how and by whom its marks are used, thereby protecting the owner's trademark rights and even strengthening them.

c. Litigation

If the alleged violator does not respond to a cease-and-desist letter or settlement talks are not successful, the mark owner may decide to file a lawsuit seeking to enjoin the unauthorized use. As noted earlier, the most common cause of action mark owners assert in civil actions is trademark infringement. The Trademark Act authorizes suit to be brought for infringement of either federally registered or common law trademark rights.²⁷ In addition to infringement, there are several other legal theories, such as dilution, that may be available to trademark owners under Federal and/or state law, depending on the particular facts presented. The mark owner may also assert state and/or common law infringement and unfair competition claims.

Alternatively, if the disputed mark is the subject of a Federal registration or pending application, the mark owner may choose to initiate, respectively, an *inter partes* cancellation or opposition proceeding at USPTO's Trademark Trial and Appeal Board instead of filing a civil litigation. The TTAB's jurisdiction is limited to determining the right to keep an existing registration or obtain a new registration based on a pending application.²⁸ Because of the limited focus on registration rights, the claims and defenses that can be asserted in TTAB proceedings necessarily are fewer in number than in Federal district courts. For example, claims alleging unfair competition based on the manner of one's use of a mark cannot be asserted in a TTAB proceeding, and the Board cannot be asked to enjoin another's use of a mark. Apart from the more limited scope of claims and defenses, trial of TTAB cases also is conducted differently than in the courts. TTAB trials never involve a jury and do not involve in-court presentation of witnesses and evidence. Rather, the trial is conducted primarily by mail and without direct supervision of the Board. The TTAB proceedings do not have all the "bells and whistles" of Federal court litigation, and are designed to be less complex and less expensive than full-blown civil litigation.

²⁷ 15 U.S.C. §§ 1114, 1125(a).

²⁸ See 15 U.S.C. §§ 1067, 1068.

(i) Available Remedies and Deterrents to Coercive Behavior

The Trademark Act provides for a variety of remedies in a civil action.²⁹ The most typical remedy is injunctive relief prohibiting use of the infringing mark. Courts have considerable discretion in fashioning an appropriate injunction. Along with an injunction, a court may order other non-monetary relief, including the destruction of infringing articles,³⁰ corrective advertising, and cancellation of Federal registrations.³¹

Monetary remedies may also be available, including an accounting of the infringer's profits, damages sustained by the plaintiff, and the costs of the action.³² Depending on the circumstances of the case, a court may award increased or trebled actual damages where infringement is willful, and attorneys' fees in exceptional cases.³³ Where the infringement involves willful use of a "counterfeit" of a registered mark, statutory damages of up to U.S. \$2,000,000 may be awarded and an award of attorneys' fees imposed, unless the infringer proves extenuating circumstances.³⁴

Courts have broad discretion to award or withhold monetary relief according to the equities and circumstances of the case.³⁵ Generally, the more aggravated the defendant's conduct, the more likely the court is to grant monetary relief. For example, where the infringement is deliberate and defendant's use of the mark is intentionally misleading, or where substantial damage has been inflicted on the plaintiff, damages and an accounting are typically appropriate.

One particular remedy that appears to be targeted specifically at unreasonable trademark litigation behavior is the award of attorneys' fees. In trademark cases, attorneys' fees are potentially available under the Trademark Act, but only in "exceptional cases."³⁶ In general, "cases that award attorneys' fees under 15 U.S.C. § 1117(a) involve truly egregious, purposeful infringement, or other purposeful wrongdoing"³⁷ or behavior that goes "beyond the pale of acceptable conduct."³⁸

In cases of trademark infringement, courts generally look to the legislative history, which indicates that "exceptional" means "where the acts of infringement can be characterized as

²⁹ 15 U.S.C. § 1117. These remedies are not available in TTAB proceedings.

³⁰ 15 U.S.C. § 1118.

³¹ 15 U.S.C. § 1119.

³² 15 U.S.C. § 1117(a).

³³ *Id.*

³⁴ 15 U.S.C. § 1117(b), (c).

³⁵ 15 U.S.C. § 1117.

³⁶ 15 U.S.C. § 1117(a).

³⁷ *Badger Meter, Inc. v. Grinnell Corp.*, 13 F.3d 1145, 1159 (7th Cir. 1994).

³⁸ *Aromatique Inc. v. Gold Seal Inc.*, 28 F.3d 863 (8th Cir. 1994).

‘malicious,’ ‘fraudulent,’ ‘deliberate,’ or ‘willful.’”³⁹ In determining whether a defendant is entitled to an award of attorneys’ fees, courts may consider the objective merits of plaintiff’s claims and whether the suit was vexatious or brought to harass.⁴⁰ Where a plaintiff legitimately tests the boundaries of the law and a court rejects the claim, this generally does not warrant an award of fees.

When Congress amended § 1117(a) of the Trademark Act in 1975 to provide for awards of attorneys’ fees in exceptional cases, it recognized that trademark claims and resulting litigation tactics are subject to abuse by *either* party. The legislative history of the 1975 amendment notes that attorneys’ fees award were intended to protect and serve successful plaintiffs and also to permit prevailing defendants to recover attorney fees to “provide protection against unfounded suits brought by trademark owners for harassment and the like.”⁴¹

Courts further recognize that parties big or small can take unfair advantage of the litigation process. For example, the Seventh Circuit recently attempted to fashion a more balanced test for the award of attorneys’ fees, concluding that:

[A] case under the Lanham Act is ‘exceptional,’ in the sense of warranting an award of reasonable attorneys’ fees to the winning party, if the losing party was the plaintiff and was guilty of abuse of process in suing, or if the losing party was the defendant and had no defense yet persisted in the trademark infringement or false advertising for which he was being sued, in order to impose costs on his opponent.⁴²

Thus, the potential for an award of attorneys’ fees is an existing deterrent to misuse of the litigation process in trademark disputes.

C. Marketplace Impact

1. Evaluating the Reasonableness of Enforcement Efforts: Coercive Behavior vs. Defense of a Right

A trademark owner must walk a fine line between being too zealous in enforcing its rights and not being zealous enough. The stronger a mark and the more goodwill that attaches to it, the more aggressive an owner is expected and entitled to be in asserting its rights against others.⁴³

³⁹ H. R. Rep. No. 524, 93d Cong., 1st Sess. 2 (1973); S. Rep. No. 93-1400, 93d Cong., 2d Sess. 2 (1974).

⁴⁰ See generally 5 McCarthy §§ 30:98-30:101 (discussing situations meriting award of attorney fees).

⁴¹ S. Rep. No. 93-1400, 93rd Cong., 2d Sess. (1974); see also *Mattel, Inc. v. Walking Mountain Productions*, 2004 WL 145100 (C.D. Cal. 2004) (in granting defendant costs and over \$1.5 million in attorneys’ fees, the court stated that: “Plaintiff had access to sophisticated counsel who could have determined that such a suit was objectively unreasonable and frivolous. Instead, it appears Plaintiff forced Defendant into costly litigation . . .), on remand from 353 F.3d 792 (9th Cir. 2003) (noting that Mattel’s claims against a photographer who used Barbie’s image in his artwork “may have been groundless or unreasonable” thus warranting an award of attorneys’ fees).

⁴² *Nightingale Home Healthcare, Inc. v Anodyne Therapy, LLC.*, 626 F.3d 958, 963-64 (7th Cir. 2010).

⁴³ See, e.g., *James Burrough, Ltd. v. Leshner*, 309 F. Supp. 1154, 1161 (S.D. Ind. 1969) (in an infringement action involving the BEEFEATER gin mark, the court explained: “Any coercion involved, or monopolization effected, is no more than plaintiffs are entitled to exert and effect under the law.”).

In view of the mark owner's obligation to police violations, aggressive enforcement of one's trademark rights does not automatically equate to abuse or bullying. In fact, as suggested by some of those who provided public comments, most trademark owners are not setting out to assert dubious claims or be bullies when they initiate enforcement measures. They are simply trying to protect the strength of their marks and their reputation, and avoid the erosion of rights that may result from inaction. Likewise, most alleged infringers are not acting in bad faith. In fact, many act out of ignorance of the law or a misunderstanding of the scope of the owner's trademark rights.⁴⁴

Thus, when it comes to the reasonableness of enforcement efforts, what is considered reasonable will usually depend on which side of the action an entity sits. While those on the receiving end of enforcement actions may view them as coercive or an unjustifiable exercise of the mark owner's rights, the mark owner typically views these actions as legitimate and necessary to protect its rights.⁴⁵

Mark owners may, however, sometimes be too zealous and end up overreaching.⁴⁶ Sometimes they may have an over-inflated view of the strength of the mark and thus the scope of their rights (e.g., they consider their mark famous when it may not actually qualify as famous).⁴⁷ Other times, they mistakenly believe that to preserve the strength of their mark they must object to *every* third-party use of the same or similar mark, no matter whether such uses may be fair uses or otherwise non-infringing. They may lose sight of the fact that the effectiveness of enforcement is not measured by how frequently they enforce, but rather by the effect that taking or failing to take action has in the marketplace. "The real question is public perception of plaintiff's mark, not a battle count of how often it has sued others."⁴⁸

⁴⁴ While no legal requirement exists to search a mark's availability before adopting it, it generally makes business sense to do so, as it can save time and money by eliminating potential marks that are, for one or more reasons, problematic (e.g., an identical or highly similar mark is already registered or in use for identical or closely related products or services) and reduce the chance of being on the receiving end of an enforcement action. Sometimes, smaller or less experienced businesses skip this crucial clearance step and later learn as a result of an enforcement action that their chosen mark is not available. *See generally* 1 Gilson § 3.01[2].

⁴⁵ *See, e.g., Procter & Gamble Co. v. Johnson & Johnson, Inc.*, 485 F. Supp. 1185, 1207 (S.D.N.Y. 1980) (in a suit where the mark owner lost, the court noted: "[Procter & Gamble] cannot be faulted for zealously protecting [its] trademark interest. Indeed, the trademark law not only encourages but requires one to be vigilant on pain of losing exclusive rights. . . . [I]n going to war . . . P & G was entitled to use all the ammunition it had."), *aff'd without op.*, 636 F.2d 1203 (2d Cir. 1980); *see also Tamko Roofing Prods., Inc. v. Ideal Roofing Co., Ltd.*, 282 F.3d 23, 34 (1st Cir. 2002) (noting that a mark owner's "failure to enforce their rights may result in the weakening of these rights over time").

⁴⁶ *See* 6 McCarthy § 31:100 (providing the author's views regarding indiscriminate enforcement efforts).

⁴⁷ *See e.g., Esquire, Inc. v. Esquire Slipper Mfg. Co., Inc.*, 243 F.2d 540, 545 (1st Cir. 1957) (observing that an owner's zeal in enforcing its mark "may not have been justified by the mark's intrinsic strength, but its zeal may well have been born of over-enthusiasm for its relatively weak mark rather than an attempt to browbeat and coerce."); *see also* 6 McCarthy § 31:101.

⁴⁸ 2 McCarthy § 11:91.

2. Examining the Scope of the Asserted Problem

Abusive litigation tactics, in the sense of those tactics employed in litigating a civil action through to trial in district court, do not appear to be a significant problem, since historically only approximately 1.5% of all trademark cases filed ever reach trial and the majority are disposed of before a case reaches the pretrial phase.⁴⁹ To the extent trademark owners engage in tactics unwarranted by a reasonable interpretation of the scope of the rights they actually possess, it would appear the root of any problem that may exist are the tactics engaged in during pre-litigation or pre-trial enforcement efforts.

Generally, information about pre-litigation enforcement efforts and pre-trial litigation tactics is not made public. For example, the number of trademark-related cease-and-desist letters sent by mark owners is not publicly available.⁵⁰ Nor are there reliable statistics on the size of the entities sending and receiving such letters or the number or percent that result in termination of use of the challenged mark. Similarly, for those trademark disputes that do get decided by the courts, reliable data concerning the number of cases in which the challenger lost or in which attorneys' fees were awarded is not readily available.

Given the limited data available, it is extremely difficult to determine the extent to which trademark owners may be purposefully overreaching when enforcing their rights, and doing so with sufficient regularity for it to qualify as a significant problem. It is even more difficult to determine whether alleged coercive litigation tactics are disproportionately used against small businesses or whether such tactics have a more harmful impact on small businesses. For this reason, the USPTO solicited public comments to better assess the existence of and/or extent of this problem.

3. Soliciting Public Comment

In connection with the commissioned study, USPTO requested feedback from U.S. trademark owners, practitioners, and others regarding their experiences with litigation tactics, especially those involving an attempt to enforce trademark rights beyond a reasonable interpretation of the scope of the owner's rights.

The USPTO posted a notice requesting comments on the USPTO web site in early October 2010.⁵¹

⁴⁹ See <http://www.uscourts.gov/Statistics/FederalJudicialCaseloadStatistics.aspx> (publishing tables from 2001 to 2010 of Federal Judicial Caseload Statistics; Table C-4 sets forth cases terminated, by nature of suit and action taken).

⁵⁰ We note that the Chilling Effects Clearinghouse, <http://www.chillingeffects.org/>, a joint project of the Electronic Frontier Foundation and Harvard, Stanford, Berkeley, University of San Francisco, University of Maine, George Washington School of Law, and Santa Clara University School of Law clinics, is actively compiling a database of cease-and-desist letters alleging trademark rights violations.

⁵¹ It is noted that in USPTO's request for comments posted on October 6, 2010, the term "bullies" was used and described as "a trademark owner that uses its trademark rights to harass and intimidate another business beyond what the law might be reasonably interpreted to allow." The posting was later amended to remove the terminology "bullies" and "bullying," as it was determined that it was more appropriate to use the language appearing in the Trademark Technical and Conforming Amendment Act of 2010; namely, "litigation tactics."

Notice of USPTO's request for comments was also posted on the www.StopFakes.gov web site. Additionally, through the National Institute of Science and Technology's (NIST) Manufacturing Extension Partnership (MEP), the Notice was sent to small businesses around the U.S., as well as to manufacturing assistance centers for dissemination via their list servers. The Notice was also sent to thousands of USPTO stakeholders via the USPTO's independent inventor newsletter, *The Inventor's Eye*.

The USPTO also coordinated with the U.S. Commercial Service, the trade promotion "arm" of the U.S. Department of Commerce's International Trade Administration, to hold a roundtable on Trademark Litigation Tactics on February 10, 2011, in Detroit, Michigan. The roundtable, titled "Is There a Bull in the Trademark Shop?," was held at Wayne State University in Detroit, Michigan, and was part of a day-long seminar designed to educate small businesses about protecting intellectual property in the global marketplace. Attending the roundtable were senior staff from the USPTO as well as law students, practitioners, and several small business owners located in the Michigan area. During the roundtable, the importance of the study was discussed and all attendees were encouraged to provide feedback about their own trademark litigation experiences. Additional topics covered during the discussion and raised by way of audience questions/participation included trademark selection strategies, social media's role in influencing the debate, and tips on how to avoid trademark litigation.

In addition, USPTO reached out to the U.S. Small Business Administration's (SBA's) Office of Advocacy which scheduled a roundtable on this subject. However, the roundtable was canceled due to a lack of participant interest.

The period for responding to the USPTO's request for comments was originally scheduled to close on January 7, 2011, and was subsequently extended through February 14, 2011. At the close of the four-month comment period, 79 comments were received. The questions posed and the comments received are discussed below.

a. Questions Posed

The USPTO formulated its request for comments to gain both opinions and accounts of personal experiences relating to trademark enforcement and litigation tactics. The questions also sought to address each of the variety of forums in which such tactics may arise. In addition, USPTO's request welcomed suggestions to address any additional perceived problems.

The following questions were posed:

1. Please identify whether you are a trademark owner or practitioner, and the general size and nature of your business or trademark practice, including the number of trademark applications and registrations your business has, or your practice handles. Please note that USPTO will fully consider any comments you submit, even if you choose not to identify yourself in a particular manner.
2. In approximately the last 5 years, please describe any instances of which you have first-hand knowledge where a small business may have been the target of litigation tactics attempting to enforce trademark rights beyond a reasonable interpretation of the scope of the rights granted to the trademark owner.

3. Please describe situations where you have been involved in receiving a cease-and-desist letter. Anecdotal information might include, but is not limited to, a description of whether the letter resulted in the small business ceasing its use of one or more marks, or whether the sender of the cease-and-desist letter withdrew or abandoned its demands against the small business owner.
4. Please describe situations where you have been involved in trademark litigation in state or Federal courts. Anecdotal information might include, but is not limited to, a description of whether the lawsuit settled on the basis of the small business agreeing to cease its use of one or more marks, or on the basis of the plaintiff withdrawing or abandoning its trademark-related allegation(s). Alternatively, relevant information might include whether such lawsuits resulted in a court judgment and the nature of the judgment (such as requiring the small business to cease its use of one or more marks, assessing monetary liability (damages, lost profits, or attorneys' fees) against the small business, requiring the plaintiff to pay the defendant's attorneys' fees, or imposing sanctions against the plaintiff under Rule 11 of the Federal Rules of Civil Procedure).
5. Please describe situations where you have been involved in opposition or cancellation proceedings instituted at the USPTO against small business owners. Anecdotal information might include, but is not limited to, a description of whether the proceedings settled on the basis of the small business agreeing to abandon its application(s) for one or more marks, or whether the proceedings settled on the basis of the plaintiff withdrawing or abandoning its notice of opposition or cancellation petition. Alternatively, relevant information might include a description of whether such proceedings resulted in a decision by USPTO Trademark Trial and Appeal Board (TTAB) refusing to register/canceling one or more marks owned by the small business, or whether such proceedings resulted in the TTAB imposing sanctions against the plaintiff under Rule 11 of the Federal Rules of Civil Procedure.
6. Do you think trademark owners currently encounter the problem of other trademark owners using their trademark rights to harass and intimidate another business beyond what the law might be reasonably interpreted to allow? If so, how significant is the problem?
7. Do you think aggressive litigation tactics are more pervasive in the trademark area than in other areas of the law?
8. Do you think USPTO has a responsibility to do something to discourage or prevent aggressive trademark litigation tactics? If yes, what should USPTO do?
9. Do you think U.S. courts have a responsibility to do something to discourage or prevent aggressive trademark litigation tactics? If yes, what should U.S. courts do?
10. What other U.S. agencies may have a responsibility to do something about the problem?
11. Do you think Congress has a responsibility to do something to discourage or prevent aggressive trademark litigation tactics? If yes, what should Congress do?
12. Please provide any other comments you may have.

b. Comments Received

In response to the request for comments, USPTO received feedback from 79 interested parties. The comments reflected a diverse range of views. Of the 79 comments received, 33 were from small business owners, 13 were from attorneys, 4 were from professors, 2 were from attorneys on behalf of small business owners, 4 were from intellectual property organizations, including one that surveyed its membership and reported the results, and 23 were from other interested parties. Comments were received from major intellectual property stakeholder organizations, including the American Bar Association Intellectual Property Law Section, the American Intellectual Property Law Association, the International Trademark Association, and the Intellectual Property Owners Association. The American Bar Association Intellectual Property Law Section surveyed its membership on aggressive litigation tactics using its own questions, and over 270 members appear to have responded to the organization's survey. In summarizing the results of its survey, the organization noted that aggressive litigation tactics appear not to be unique to the trademark field, that judges should address any problems with such tactics in particular cases in lieu of any systemic attempt to address the problems, and that the consensus of those surveyed was that no legislative action is needed.

Most of the direct respondents claimed at least some degree of first-hand knowledge of instances where unduly aggressive trademark litigation or pre-litigation tactics (e.g., cease-and-desist letters) were targeted at a small business. Many of these were directly involved in the issuance or receipt of cease-and-desist letters. Significantly, relatively few had direct experience with litigation in the courts or USPTO's Trademark Trial and Appeal Board (TTAB). When asked if they currently encounter the problem of other trademark owners using their trademark rights to harass and intimidate another business beyond what the law might be reasonably interpreted to allow (e.g., is "trademark bullying a problem"), few commenters explicitly addressed whether and to what extent this issue is a significant problem. Given the limited number of comments and the varied nature of the commenters own experiences, the comments may be better viewed as anecdotal.

(i) Cease-and-Desist Letters and Pre-Litigation Issues

With respect to cease-and-desist letters, many of the comments acknowledged regular use of these letters in the trademark field. A handful of small business owners explained that they withdrew their trademark applications after receiving a cease-and-desist letter because they lacked the time or financial resources to litigate against a larger, wealthier company. This imbalance of resources was a common theme among many of the comments concerned with the threat of litigation, including one noting that litigation is too expensive to be a realistic option for many small businesses.⁵² Other commenters, however, recognized that cease-and-desist letters

⁵² According to the AIPLA Report of the Economic Survey, 2009, trademark infringement litigation costs total on average \$384,000 when less than \$1 million is at issue, \$857,000 when \$1-\$25 million is at issue and \$1,746,000 when over \$25 million is at issue.

have a legitimate purpose, explaining that most are sent in good faith, and only a small percentage result from overzealous protection of a mark. Some commenters explained that trademark owners have an obligation to police their marks, and the cease-and-desist letter is a necessary, cost-effective part of the process.

(ii) Actual Litigation Issues

Regarding actual litigation experiences, some of those relative few with direct experience on the subject opined that discovery and deposition processes were too costly for many small businesses and provided a means for a party to thwart progress in a case and to drain resources from an adversary. In contrast, others recognized that in Federal court proceedings, Rule 11 of the Federal Rules of Civil Procedure provides an effective mechanism to combat overreaching.

Some of these commenters with direct litigation experience expressed concern that all the safeguards present in Federal courts are not available in TTAB proceedings. Specifically, one commenter contrasted the power of a Federal judge to hold a party accountable and impose sanctions for bad conduct with the more limited array of options available to a TTAB judge to combat overreaching in TTAB litigation. Other commenters provided a different viewpoint and stated that both the courts and TTAB offer effective options to combat bad conduct and stressed the need to better educate the public and small business owners about legal protections already built into the system.⁵³

(iii) How Tactics in IP Cases Compare to Other Types of Cases

The American Bar Association Intellectual Property Section inquired in its survey if aggressive litigation tactics are more pervasive in the trademark area than in other areas of the law. Of the 196 respondents to this question, 44% opined that aggressive litigation tactics are no more or less pervasive in trademark law than in other areas of the law.

⁵³ There are similarities and differences between district court and TTAB proceedings. For example, both the TTAB and courts apply Federal Rule 11. But unlike the courts, the TTAB does not make awards of costs and fees.

The responses to USPTO's request for comments reflected mixed viewpoints on whether aggressive litigation tactics are more pervasive or worse in the trademark realm than in other areas. Many conceded a lack of perspective to compare various areas of law. Several commenters stressed that allegations of improper litigation tactics are not unique to trademark law, and a minority of respondents noted that they do not believe a problem exists in trademark

enforcement litigation. For example, one attorney noted, “Many areas of civil law could be described as aggressive (i.e., insurance defense, medical malpractice, product liability). It is unreasonable and unwarranted to target the area of trademark law. Much of trademark litigation is not so much ‘aggressive’ as it is necessarily proactive.” One comment also noted that the presence of social media, and the potential publicity generated thereby, reduces the incidence of improper conduct. This comment raises the question whether, and suggests the possibility that, social media web sites act as checks on overzealous litigation because users of social media reveal and publicize the identities of alleged overreachers. However, a number of commenters on this issue opined that aggressive tactics are more prevalent in the trademark area, with multiple comments indicating that some trademark owners seem to feel compelled to challenge *all* uses of their marks.

(iv) Size and Resource Imbalances

One commenter acknowledged that trademark owners should have the right to protect their marks, but stated that the aggressive tactics used by overreachers presents a problem for the entire intellectual property community by threatening legitimate activities and clogging the legal system with invalid claims. Another commenter noted that “small companies and individuals are placed in a difficult position where surrender of valid trademarks that are being lawfully used is the only rational financially-feasible option available.” Yet another party explained that this is a growing problem within the field of trademarks and that the parties engaging in improper conduct are not limited to parties of any particular size, with both large and small businesses on both sides of the proceedings. One small business owner explained that overreaching with claims can sometimes lead to the demise of a business, as the potential costs for rebranding can force a small business out of the marketplace.⁵⁴

(v) Suggestions for USPTO or TTAB Actions

Even though relatively few respondents had direct experience with litigation in the TTAB or the courts, many nonetheless provided suggested actions for USPTO and TTAB, or the courts, to consider. Most commenters opined that USPTO has a responsibility to do something to discourage or prevent aggressive trademark litigation tactics, with a minority stating that this

⁵⁴ According to the *AIPLA Report of the Economic Survey*, 2009, on average, law firms charge \$1,440 to perform a trademark clearance search, analysis, and opinion, \$867 to prepare and file a trademark application, and \$1,678 for prosecution of a trademark registration. These costs are in addition to a wide variety of advertising or marketing expenses used to promote a mark.

should be left to the courts. Some commenters expressed the viewpoint that the issue was the sole responsibility of the USPTO.

Many commenters suggested that the TTAB amend its rules to provide for sanctions against such tactics and to proactively prevent such tactics. One commenter proposed additional scrutiny for parties “known to use” such tactics and another proposed that USPTO substantially increase fees for filing oppositions and cancellations, with a reduced fee for smaller entities. Others proposed that the agency encourage settlement agreements to lessen the burden on the parties, and closely monitor the progress of proceedings to prevent undue delay and costs, with one commenter opining that the duration of the average *inter partes* proceeding is a powerful incentive for a small business to concede.

The comments included several suggestions that USPTO raise awareness of the protections available from and provide information on how to respond to aggressive tactics.

(vi) Suggestions for the Courts

Turning to the courts, the majority of commenters with suggestions for improvements took the position that courts also bear a responsibility to discourage or prevent aggressive litigation tactics. Specific suggestions ranged from proposals that attorneys’ fees and sanctions should be more readily assessed, to a proposal for *pro bono* legal counsel for small businesses, to a proposal that the court system provide an initial screening of claims to reject frivolous lawsuits at the outset. Those holding the minority view either believe no problem exists with the current system or that the courts already have tools to effectively deal with such overreaching tactics. One comment noted that although existing remedies are available, courts are generally reluctant to use them. Rather than invoking a “one size fits all” approach, one comment expressed that “curbing abusive trademark litigation practices should be left to the judiciary on a case-by-case basis.”

(vii) Suggestions for Other Federal Agencies, Non-Federal Organizations, and Congress

Many commenters proposed the involvement of other Federal agencies to help address these issues, including the U.S. Department of Justice, U.S. Department of State, U.S. Customs and Border Protection, U.S. Small Business Administration (SBA), Federal Communications Commission (FCC), and Federal Trade Commission (FTC). One commenter suggested a hotline monitored by the FTC or USPTO. Others also proposed involvement from bar associations, the SBA, and the Better Business Bureau to help educate small businesses and assist in these types of difficult situations.

Finally, most commenters opined that Congress has a responsibility to discourage or prevent aggressive trademark litigation tactics, with a minority noting that there is no problem to address or that the issue does not require legislative action.

Many respondents expressed concern that the Federal trademark anti-dilution laws may be abused where the asserted marks have very dubious claims to the “famous” status required for such claims.

As stated in one comment, if every trademark owner utilized aggressive litigation tactics, including cease-and-desist letters, “under the presumption that its marks were ‘famous,’ then those marks would for all practical purposes be ‘trademarks in gross,’ enforceable as to all goods and services.” Some commenters therefore proposed that the anti-dilution laws be amended to prevent such misuse.

One commenter proposed that Congress enact legislation providing standards for sending cease-and-desist letters. Another respondent suggested that Congress amend the Trademark Act to eliminate the current provision for the registration of descriptive terms that have acquired distinctiveness, so that descriptiveness would constitute an absolute bar to registration. Yet another argued for legislative reform to prevent any trademark protection of common terms or phrases. Several comments proposed Congressional hearings on these issues.

One comment proposed legislative reform to address trademark use in the context of artistic works, noting the lack of a statutory affirmative defense to trademark infringement that would protect this type of use. The commenter opined that such legislative reform could prevent many improper trademark claims against artists. Finally, another commenter proposed that Congress codify a trademark misuse defense to allegations of trademark infringement, so that courts could dismiss lawsuits when it is demonstrated that the plaintiff is attempting to use its mark for anti-competitive purposes or otherwise in violation of the law.

III. Federal Government Resources to Protect Intellectual Property and Prevent Counterfeiting

Start-up businesses and small and medium-sized enterprises (SMEs) are principal sources of innovation and are vital to U.S. economic growth. Statistics show that small businesses created more than 5.5 million new jobs in the United States during the 1990s. In the current global economy, protecting innovations in the United States and abroad is important for small businesses as they seek to develop a market presence overseas. The United States Government has many resources available to assist SMEs with intellectual property issues. Those resources that relate to trademark protection and counterfeit prevention in the U.S. market are discussed in this section of the report.

The Department of Commerce’s International Trade Administration’s (ITA) Office of Intellectual Property Rights (OIPR) and U.S. and Foreign Commercial Service (USFCS) work with U.S. firms to help them protect their intellectual property domestically and abroad by offering comprehensive, customized solutions to international trade challenges. The USPTO, responsible

for granting and administering patents and trademarks, works with SMEs to assist them in protecting their intellectual property. Other Federal Government entities, including the U.S. International Trade Commission (USITC) and the Small Business Administration (SBA), all work to protect and enforce intellectual property on behalf of all intellectual property rights (IPR) stakeholders. The National Intellectual Property Rights Coordination Center (IPR Center) works to deter, interdict, and investigate threats arising from the movement of illegal goods into and out of the United States. Collectively, the Federal agencies discussed below work together to assist small businesses in protecting and enforcing their intellectual property, including trademarks.

A. Department of Commerce's International Trade Administration's Office of Intellectual Property (OIPR)

The Department of Commerce (DOC) has undertaken numerous activities to assist SMEs in protecting and enforcing IPR, both in the United States and abroad. OIPR develops and coordinates ITA input on trade-related intellectual property rights policies, programs and practices, and assists companies to overcome challenges to protecting and enforcing their IPR.

StopFakes.gov: The most comprehensive tool available to assist SMEs is the StopFakes.gov web site. ITA, on behalf of U.S. intellectual property agencies, launched the web site (www.StopFakes.gov) in 2004 to provide updates and links to Executive Branch IPR programs. ITA continues to manage this resource, which houses useful information for SMEs.

(1-866-999-HALT): The DOC manages a hotline under the Strategy for Targeting Organized Piracy (STOP) initiative to help SMEs protect their intellectual property rights in the United States and abroad. This hotline is answered by USPTO experts, who work with OIPR to help businesses secure and enforce their IPR, including by ensuring that U.S. businesses enjoy the full benefits of bilateral and multilateral IPR related trade agreements.

Online SME IPR Training Modules: OIPR worked with the USPTO, the SBA, and the Foreign Commercial Service (FCS) to develop an online training program for SMEs to learn how to evaluate, protect, and enforce their IPR. The program is available for free online at www.StopFakes.gov. The module has been translated into Spanish and French to broaden our domestic and foreign outreach with this tool.

Outreach and Seminars: OIPR regularly conducts outreach and training events about how companies can protect and enforce IPR in the U.S. and overseas. Outreach events are conducted in-person and via webinar.

Protecting IPR at Trade Fairs: The DOC developed a program to promote IPR protection at domestic and international trade fairs. The DOC is educating trade fair attendees, exhibitors, and organizers about the value of IPR, raising awareness of IPR issues at trade fairs, and promoting IPR protection at trade fairs and pavilions that the DOC operates, certifies, or supports.

B. United States Patent and Trademark Office

Trademark Resources: The USPTO web site contains considerable information on the trademark searching, prosecution, and maintenance process. USPTO's Trademark Assistance Center provides general information about the trademark registration process and responds to inquiries about the status of trademark applications and registrations. This information is also available on the USPTO web site through which SMEs can access the Trademark Electronic Search System to search for potentially conflicting federally registered marks and pending

applications. The USPTO posts on its home page information about TTAB proceedings, including information about the Board's Accelerated Case Resolution, arbitration, and mediation options.

IPR Awareness: The USPTO offers several IPR awareness programs that are tailored to the most critical IP issues for small businesses. For example, since 2005, USPTO has offered free Intellectual Property Awareness Campaign (IPAC) "IP Basics" programs to more than 1,000 SMEs in various cities throughout the U.S. These events include presentations on how to protect and enforce trademarks domestically and internationally. USPTO also offers China "Road shows" to businesses throughout the U.S. In addition, USPTO Global Intellectual Property Academy (GIPA) has produced six modules on intellectual property protection and enforcement in five languages; namely, English, Spanish, French, Arabic, and Russian. These web-based seminars cover all areas of intellectual property protection, including trademarks and geographical indications.

Patent Trademark Depository Libraries (PTDL): The USPTO has a network of Patent Trademark Depository Libraries (PTDL), which are a rich local resource for small businesses, research and development firms, university and governmental laboratories, and independent inventors and entrepreneurs. Services at the libraries are free, and include assistance in accessing and using patent and trademark documents, training on USPTO databases, obtaining access to the USPTO web site, and hosting public seminars on intellectual property topics for novice and experienced innovators. There are 82 PTDLs in 46 states, the District of Columbia, and Puerto Rico.

C. Department of Commerce's CommerceConnect

Announced in 2009, CommerceConnect is a one-stop-shop initiative in which Commerce Department employees are cross-trained so that they can connect firms to the full menu of Commerce programs and can link business owners with other Federal, state, local, and nonprofit resources. The effort is designed to cut through red tape and simplify access to services and resources that can help companies grow, create jobs, and become more efficient. CommerceConnect offers an integrated and comprehensive portfolio of Federal, state, local, and non-profit business assistance resources including more than 70 U.S. Department of Commerce programs -- many at no cost to U.S. entrepreneurs and businesses. Trained CommerceConnect specialists can assess clients' business needs -- including issues related to intellectual property protection -- and refer them to appropriate resources.

D. U.S. Small Business Administration

SBA provides non-monetary support to small businesses to assist them in developing their businesses. SBA partners with a non-profit organization known as Service Corps of Retired Executives (SCORE). SCORE members are trained to serve as counselors, advisors, and mentors to aspiring entrepreneurs and business owners. These services are offered at no fee as a community service. As part of this association, retired executives assist entrepreneurs and small businesses in the formation and growth of their enterprises. There are 389 SCORE chapters in urban, suburban, and rural communities in the U.S. and U.S. Territories. Through SBA's partnership with SCORE, businesses may use SCORE's web site to identify potential mentors on "intellectual property," "patents," "trademarks," and "copyright" subject areas. Through their ASK SCORE online program, online workshops on IPR are available and users can connect with successful executives with a breadth of experience in intellectual property issues.

E. U.S. International Trade Commission

The U.S. International Trade Commission (USITC) investigates claims regarding intellectual property rights violations stemming from importation of goods, including allegations of patent and trademark infringement. Section 337, 19 U.S.C. § 1337, declares it unlawful to import items that infringe utility and design patents, as well as registered and common law trademarks, and registered copyrights. USITC provides information on Section 337 at www.usitc.gov/trade_remedy/int_prop/index.htm. USITC also has a Trade Remedy Assistance Office (TRAO) that provides information to small businesses concerning the remedies and benefits available under U.S. trade laws and assists eligible small businesses in preparing and filing a Section 337 complaint.

F. National Intellectual Property Rights Coordination Center

The National Intellectual Property Rights Coordination Center (IPR Center) is a task force that uses expertise of its member agencies to share information, develop initiatives, and conduct investigations related to intellectual property theft. As an integrated task force, the IPR Center uses the expertise of its member agencies to share information, develop initiatives, coordinate enforcement actions, and conduct investigations related to IP theft. The IPR Center is accessible to users, including members of the general public, industry, trade associations, law enforcement, and government agencies. All of the said entities are encouraged to report violations of intellectual property rights through the IPR Center web site. The information provided is reviewed by IPR Center staff and disseminated for appropriate investigative response and tactical use to IPR Center partners.

The units have embedded interagency representation from the following key investigative authorities:

- U.S. Immigration and Customs Enforcement;
- U.S. Customs and Border Protection;
- Federal Bureau of Investigation;
- Food and Drug Administration-Office of Criminal Investigations;
- U.S. Postal Inspection Service;
- Department of Commerce International Trade Administration;
- United States Patent and Trademark Office; and
- Government of Mexico Tax Administration Service.

The IPR Center also coordinates and provides domestic and international IPR outreach and training to law enforcement, industry, and the public. For example, Operation Joint Venture conducts outreach and disseminates information to private industry regarding IPR issues.

IV. Recommendations⁵⁵

After careful review of the available information regarding trademark litigation tactics and comments received from concerned intellectual property stakeholders, it is unclear whether small businesses are disproportionately harmed by enforcement tactics that are based on an unreasonable interpretation of the scope of an owner's rights. Indeed, the 79 comments received in response to USPTO's request for comments reflected a diverse range of views on the subject, yet few explicitly addressed whether and to what extent unreasonable enforcement of trademark rights is a significant problem.

Ultimately, because trademark enforcement is a private property rights litigation issue, if abusive tactics are a problem, such tactics may best be addressed by the existing safeguards in the litigation system and by private sector outreach, support and education relating to these issues. However, to the extent small businesses are disproportionately adversely affected by such tactics because they lack the funds to hire counsel to defend against them, the Department of Commerce, in consultation with the Intellectual Property Enforcement Coordinator, will undertake the following actions:

- Engage the private sector about providing free or low-cost legal advice to small businesses via *pro bono* programs and IPR clinics;
- Engage the private sector about offering continuing legal education programs focused on trademark policing measures and tactics; and
- Enhance Federal agency educational outreach programs by identifying resources that enable small businesses to further their understanding of trademark rights, enforcement measures, and available resources for protecting and enforcing trademarks.

Each of these recommendations is discussed below.

A. Intellectual Property Rights Counseling for Small Businesses

As our research and several submissions point out, there are sufficient mechanisms in place to deter or punish those who resort to abusive trademark litigation tactics. Specifically, attorneys' fees appear to be a deterrent to trademark litigation abuse because trademark owners know that a successful defendant may recover legal fees where the plaintiff's allegations of trademark infringement are so baseless as to be frivolous.

From the submissions, it seems that the costs associated with securing trademark counsel to respond to trademark enforcement efforts has the greatest negative impact on small businesses. For example, the expense of hiring an attorney to challenge a frivolous cease-and-desist letter may be too much for a small business to absorb, or the esoteric issues may simply be too daunting, thereby preventing the small business from even attempting to mount an entirely legitimate challenge to a threat of litigation. In such cases, small businesses may instead chose to

⁵⁵ Although the legislation called on the Secretary of Commerce and the IPEC to make any "policy recommendations" they deemed appropriate, the Department of Commerce herein commits to adopt policies it has identified as likely to assist trademark owners enforce their rights reasonably and assist small businesses navigate these complex intellectual property issues.

give in to the trademark owner's baseless demands without a fight. We conclude, therefore, that small business owners could benefit from private sector programs offering low-cost or free trademark advice to help them respond to frivolous claims of trademark infringement.

The Department of Commerce, in consultation with the Intellectual Property Enforcement Coordinator, will engage stakeholders and bar associations to investigate the possibility of the private sector providing comprehensive low-cost or *pro bono* legal assistance to small business owners to help them respond to frivolous claims of trademark infringement. An example of an existing program on which such an initiative could be modeled is the one offered by the Export Legal Assistance Network (ELAN), a program established by the Federal Bar Association to offer free export legal advice, and supported by the U.S. Department of Commerce and the U.S. Small Business Administration. Through this program, small businesses can obtain an initial legal consultation from knowledgeable lawyers versed in the legal aspects of international trade free of charge. Applying this model to the present facts, knowledgeable trademark lawyers could provide legal advice to small businesses at a reduced rate or free of charge to help them determine if a claim of trademark infringement has any merit and, in cases where the claim is baseless, to help them formulate a response.

In addition, the Department of Commerce, in consultation with the Intellectual Property Enforcement Coordinator, will engage in discussions with universities, bar associations, and intellectual property rights organizations regarding development of additional *pro bono*/legal clinic IPR programs geared specifically toward small business owners and independent inventors. Such clinics can provide low-cost or free trademark advice to help small businesses respond to frivolous claims of trademark infringement, and should be considered as well. For example, USPTO is considering expansion of its already established law school clinic program. In August 2008, the USPTO launched a Law School Clinical Certification Program that allows law students to practice before the Agency in patent and trademark prosecution matters under the strict guidance of a Law School Clinical faculty Supervisor. Currently, 15 schools in the program offer trademark prosecution services. In the first year of the program, students filed a total of 37 trademark applications on behalf of clinic clients. Given the success of this pilot, USPTO is investigating additional *pro bono* models that will expand assistance.

B. Engage the Private Sector about Offering Continuing Legal Education Programs Focused on Trademark Policing Measures and Tactics

As noted above, trademark owners are under an obligation to protect their trademarks, because if the owner does not police the relevant mark and enforce its rights against infringers, the strength and value of the mark could be diminished. As the submissions indicate, many skilled practitioners believe that under existing case law they are obliged to err on the side of sending a cease-and-desist letter to protect their clients' rights. Evaluating when a cease-and-desist letter is necessary and the demands such a letter should contain can be a difficult decision.

Increasing efforts to educate trademark lawyers about how to appropriately protect a client's mark can help address this problem and reduce the number of inappropriate cease-and-desist letters. We note that the intellectual property bar associations have the expertise and infrastructure to provide continuing legal education programs to lawyers dealing with the issues of infringement and proper protection of trademark rights, including best practices for cease-and-desist letters.

Accordingly, the Department of Commerce, in consultation with the Intellectual Property Enforcement Coordinator, will convene a meeting of interested stakeholders, including interested

intellectual property bar associations, to discuss the feasibility of providing continuing legal educational programs focused on trademark policing measures and tactics.

C. Educate Small Businesses about Intellectual Property Rights and Available Protection and Enforcement Resources

The Department of Commerce, in consultation with the Intellectual Property Enforcement Coordinator, will work to enhance educational outreach to provide small businesses with information about intellectual property rights and to identify resources they need to protect and enforce such rights.

Educating small businesses about the IP system at large, both in the United States and abroad, and about Federal Government resources available to assist them in the IP context, could help decrease the use and the effectiveness of any overly aggressive trademark litigation tactics, and would be responsive to the public input received. IPR awareness was repeatedly highlighted by commenters as an area where small businesses need assistance and look to the Federal Government more generally for guidance. A number of comments reflected or suggested the need for many small businesses to build a better understanding of trademark rights and the relevant legal framework. Achieving better IPR awareness could favorably impact litigation tactics from the perspective of an enforcer, who may benefit from understanding that some situations do not merit the use of aggressive litigation tactics and that the law may not require them. Another favorable impact could stem from a better educated accused infringer, who may benefit from background knowledge to assess the propriety of the accused use and to understand the rationale behind the trademark enforcement efforts taking place. Thus, the Department of Commerce will take steps to increase awareness of resources available to small businesses to help them obtain and protect their intellectual property rights.

Opposition No. 91205751

DC Comics

v.

Joel L. Beling d/b/a Supa
Characters Pty Ltd.

"Mr. McGee, don't make me angry. You wouldn't like me when I'm angry." David Banner, a/k/a The Incredible Hulk ("A Death in the Family," Season 1, Episode 2 of "The Incredible Hulk" American Television Series, Nov. 27, 1977).

"When sanctionable conduct is found, although the Board does not impose monetary sanctions or award attorneys' fees or other expenses, the Board has authority to enter other appropriate sanctions, up to and including the entry of judgment." Central Mfg. Inc. v. Third Millennium Technology Inc., 61 USPQ2d 1210, 1213 (TTAB 2001).

Michael B. Adlin, Interlocutory Attorney:

This is, to put it mildly, an unusual case. Pro se applicant, an individual who claims to be an Australian criminal lawyer,¹ seeks registration of SUPER DOGS, in standard characters and with DOGS disclaimed, for an exceedingly wide variety of goods and services, including

¹ There is no indication that applicant is a lawyer admitted to practice in the United States or before the Office. In addition, as explained herein, applicant's filings reveal that he is not particularly familiar with Board rules or procedures. Accordingly, the Board very strongly recommends that applicant retain an attorney entitled to practice before the Office to represent him in this proceeding. Because it appears that applicant may ignore this advice, information for pro se parties is included at the end of this order.

comic books, clothing, action figures, dog races, film studios, a rock group and "a continuing super hero and other characters based on dogs show (sic) broadcast over television."² In its notice of opposition, opposer alleges prior use and registration of, *inter alia*, SUPERMAN, KRYPTO THE SUPERDOG and SUPER FRIENDS, and that use of applicant's mark would be likely to cause confusion with, and dilute, opposer's marks. Pursuant to the Board's institution order of June 25, 2012, applicant's answer was due August 4, 2012. Applicant failed to timely file an answer, however, and therefore on August 20, 2012, the Board issued a notice of default.

This case now comes up for consideration of applicant's response to and motion to set aside the notice of default, filed August 21, 2012, and opposer's cross-motion for default judgment, filed August 24, 2012. Both motions are contested.

The opening paragraph of applicant's response to the notice of default is unambiguous. "Applicant specifically states that he received the Notice of Opposition from Opposer by standard post on the 26th of June 2012." Applicant's Response ¶ 1. Applicant also makes clear that he was fully aware of his obligation to answer the notice of

² Application Serial No. 85325751, filed May 20, 2011, under Sections 44(e) and 1(b), with priority claims under Section 44(d) based on Australian registrations.

opposition, and the consequences of not doing so: "In order to avoid a judgment by default against Applicant, Applicant diligently checked the Board's TTABVue website at least every couple of days from the 26th June 2012 to ascertain if the Schedule had been uploaded online." Id. ¶ 3. In any event, applicant claims that he did not receive the Board's institution order, even though it was sent to him by e-mail and regular mail at his e-mail and postal addresses of record, and neither the e-mail nor the mailed order were returned as undeliverable. Id. ¶¶ 2-3, 5. Based on his alleged non-receipt of the institution order, applicant argues that it would be inappropriate to enter default judgment against him. Applicant's response to the notice of default includes a [proposed] answer to the notice of opposition, in which applicant denies the salient allegations therein.

In its response and cross-motion, opposer argues that applicant has not established good cause for setting aside the notice of default, and that default judgment is appropriate, because contrary to applicant's allegations, the Board's institution order was available on TTABVue on June 25, 2012. Unlike applicant, opposer introduces evidence supporting its contention regarding the availability of the institution order on TTABVue, in the form of the Declaration of James D. Weinberger ("Weinberger

Dec."), opposer's attorney, who testifies that he "observed the Scheduling [institution] Order on the TTABVue website" on June 25, 2012 and "several times" between August 6 and 9, 2012. Weinberger Dec. ¶¶ 2, 3.³ Opposer also points out that applicant made the conscious decision to take no action in response to the notice of opposition which he admits receiving on June 26, 2012.

In his "response to opposer's opposition" and cross-motion (hereinafter "Reply"), applicant does not address opposer's evidence regarding the availability of the institution order on TTABVue, but contends that he has a "genuine intent to vigorously contest the Opposition." Applicant's Reply ¶ 2. Specifically, applicant points out that he is involved another Board proceeding, Opposition No. 91203884, in which he specifically cites his "intent to trade in commerce" goods under the SUPER DOGS mark. Id.⁴ Similarly, applicant cites his August 6, 2012 press release, which is attached to applicant's response to the notice of default, in which applicant claims that he "specializ[es] in the creation of high concept, marketable characters for licensing use in film, television, comic books and merchandising." Response Ex. A. In that press release, applicant appears to boast that he "is currently involved in

³ This is consistent with Board practice and the manner in which TTABVue operates.

⁴ Applicant is also a party to Cancellation No. 92055374.

hostile trademark litigation with a number of major players in the entertainment industry and American business at large." And applicant relies on an e-mail he sent to major American and international publications, claiming that he has a "new superhero character licensing company."⁵ Reply Ex. A.

"However the issue [of default] is raised, the standard for determining whether default judgment should be entered against the defendant for its failure to file a timely answer to the complaint is the Fed. R. Civ. P. 55(c) standard." TBMP §§ 312.01, 508 (3d ed. rev. 2012). Under Fed. R. Civ. P. 55(c), default may be set aside "for good cause." As a general rule, good cause will be found where the defendant's delay has not been willful or in bad faith, where prejudice to the plaintiff is lacking, and where the defendant has a meritorious defense. See Fred Hyman Beverly Hills, Inc. v. Jacques Bernier, Inc., 21 USPQ2d 1556 (TTAB 1991). Moreover, the Board is reluctant to grant judgments by default, because the law favors deciding cases on their

⁵ When read together, applicant's filings with the Board, his involved application, the press release and the e-mail suggest that applicant has a unique business model, one which some might consider analogous to that of what some in the patent realm call a "non-practicing entity" or NPE. See, Overstock.com, Inc. v. Furnace Brook, LLC, 420 F.Supp.2d 1217, 78 USPQ2d 1934 (D. Utah 2005), aff'd, 191 Fed.Appx. 959 (Fed. Cir. 2006). Others might view applicant's business model as a reverse form of a controversial trademark litigation tactic. See USPTO Request for Comments: Trademark Litigation Tactics, available here: http://www.uspto.gov/trademarks/litigation_study.jsp.

merits. See Paolo's Associates Limited Partnership v. Paolo Bodo, 21 USPQ2d 1899 (Comm'r 1990).

Here, applicant's claim that he was unaware of the Board's institution order prior to issuance of the notice of default appears dubious at best. Indeed, applicant admits to reviewing the docket for this proceeding on TTABVue well prior to August, and Mr. Weinberger's sworn testimony, which is entirely consistent with the Board's standard practices and the functioning of TTABVue in every case of which the Board is aware, establishes that the institution order was available for applicant's review from June 25, 2012 forward. Nevertheless, on this occasion and perhaps no other for the duration of this proceeding, applicant is entitled to the benefit of the doubt, and applicant claims that his failure to timely answer was inadvertent. Furthermore, applicant's delay is relatively short and opposer has not established that it would be prejudiced if default judgment is denied. Finally, applicant's [proposed] answer to the notice of opposition establishes that applicant has a meritorious defense.

For all of these reasons, applicant's motion to set aside default is hereby **GRANTED**, opposer's cross-motion for default judgment is hereby **DENIED** and applicant's [proposed] answer is accepted and made of record and is now applicant's

operative pleading herein.⁶ Applicant is again advised to retain counsel, and whether he does or not, he is also advised to proceed with extreme caution.⁷ Conferencing, disclosure, discovery, trial and other dates are reset as follows:

Deadline for Discovery Conference	October 1, 2012
Discovery Opens	October 1, 2012
Initial Disclosures Due	October 31, 2012
Expert Disclosures Due	February 28, 2013
Discovery Closes	March 30, 2013
Plaintiff's Pretrial Disclosures	May 14, 2013
Plaintiff's 30-day Trial Period Ends	June 28, 2013
Defendant's Pretrial Disclosures	July 13, 2013
Defendant's 30-day Trial Period Ends	August 27, 2013
Plaintiff's Rebuttal Disclosures	September 11, 2013
Plaintiff's 15-day Rebuttal Period Ends	October 11, 2013

⁶ Neither the "supplement to defendant's answer," filed August 28, 2012, nor applicant's motion to extend his time to file petitions to cancel, filed September 9, 2012, will be given any consideration. Indeed, the Board does not accept surreplies. See, Trademark Rule 2.127(a) (after the movant's reply brief, "[t]he Board will consider no further papers in support of or in opposition to a motion"); TBMP § 502.02(b) (3d ed. rev. 2012). Furthermore, the Trademark Rules govern the timing and permissibility of counterclaims, and it is premature to seek application or interpretation of the Rules given that there is no [proposed] counterclaim(s) for the Board to consider; moreover, the Board does not issue advisory opinions. See, e.g., Trademark Rule 2.106(b)(2)(i); TBMP §§ 313, 605.03(f).

⁷ According to the AusEphrase website, the phrase "on thin ice" is used in Australia: http://www.e-phrased.com.au/index.php/expression_detail/on_thin_ice/.

In each instance, a copy of the transcript of testimony together with copies of documentary exhibits, must be served on the adverse party within thirty days after completion of the taking of testimony. Trademark Rule 2.125.

Briefs shall be filed in accordance with Trademark Rule 2.128(a) and (b). An oral hearing will be set only upon request filed as provided by Trademark Rule 2.129.

Pro Se Information

Applicant is reminded that he will be expected to comply with all applicable rules and Board practices during the remainder of this case. The Trademark Rules of Practice, other federal regulations governing practice before the Patent and Trademark Office, and many of the Federal Rules of Civil Procedure govern the conduct of this opposition proceeding. Applicant should note that Patent and Trademark Rule 10.14 permits any person or legal entity to represent himself in a Board proceeding, though it is generally advisable for those unfamiliar with the applicable rules to secure the services of an attorney familiar with such matters.

If applicant does not retain counsel, then he will have to familiarize himself with the rules governing this proceeding. The Trademark Rules are codified in part two of Title 37 of the Code of Federal Regulations (also referred

to as the CFR). The CFR and the Federal Rules of Civil Procedure are likely to be found at most law libraries, and may be available at some public libraries. Finally, the Board's manual of procedure will be helpful.

On the World Wide Web, applicant may access most of these materials by logging onto <http://www.uspto.gov/> and making the connection to trademark materials.

Applicant must pay particular attention to Trademark Rule 2.119. That rule requires a party filing any paper with the Board during the course of a proceeding to serve a copy on his adversary, unless the adversary is represented by counsel, in which case, the copy must be served on the adversary's counsel. The party filing the paper must include "proof of service" of the copy. "Proof of service" usually consists of a signed, dated statement attesting to the following matters: (1) the nature of the paper being served; (2) the method of service (e.g., e-mail, first class mail); (3) the person being served and the address used to effect service; and (4) the date of service. Also, applicant should note that any paper he is required to file herein must be received by the Patent and Trademark Office by the due date, unless one of the filing procedures set forth in Trademark Rules 2.197 or 2.198 is utilized. These rules are in part two of Title 37 of the previously discussed Code of Federal Regulations.

Files of TTAB proceedings can be examined using TTABVue, accessible at <http://ttabvue.uspto.gov/ttabvue/v>. After entering the 8-digit proceeding number, click on any entry in the prosecution history to view that paper in PDF format.

The third edition of the Trademark Trial and Appeal Board Manual of Procedure (TBMP) has been posted on the USPTO web site at:
http://www.uspto.gov/trademarks/process/appeal/Preface_TBMP.jsp.

FOIL STAMPING

Foil stamping is a special kind of printing procedure where heat, pressure, and a metallic paper (foil) is used to create different shiny designs and graphics on various materials. Foil stamping gives the stamped design a shiny and incredible look and is increasingly becoming the preferred method of printing in many an industry.

Foil stamping is also referred to as hot stamping (because of the use of heat), foil printing, dry stamping, and leaf stamping. There are various types of foil stamping that can be used depending on your design needs.

Foil stamping is called dry printing because it does not use any sort of ink for printing purposes. It is a dry stamping process where ink, some sort of magnetism, or plates are not used to print letters and pictures as is used in traditional printing methods. In place of all these things, foil stamping uses dies or carved metal plates, heat, and foil in the stamping process.

In the foil stamping process, the die or the sculpted metal plate comes in contact with the foil and transfers a thin layer of the foil film onto the intended surface. As the metal plate is heated, the foil sticks to the surface only in the design of the plate and in the required areas with the desired imprint.

INKS & SUSTAINABLE PRINTING

Up until recently, the printing industry has used petroleum-based inks, which have two primary environmental drawbacks. First, they are made using a non-renewable resource (petroleum). Second, petroleum-based inks release Volatile Organic Compounds (VOCs); VOCs reduce indoor air quality and can have negative short- and long-term health effects. Fortunately, an environmentally responsible alternative is available: soy inks, which are derived from soy beans. This alternative was originally developed for use in newspaper printing, but has spread to the printing of other items, such as your business cards, marketing collateral, and product catalogs. So what are the actual benefits of using soy inks instead of petroleum-based inks? And, how will it affect the colors on your printed piece?

- Soy inks are more sustainable - they come from a renewable resource, unlike petroleum
- Soy inks are more environmentally friendly - some actually release zero VOCs (this is what we use at Colorworx)
- Paper printed with soy inks can be deinked more easily, making it easier to recycle
- Spot colors are available, so you can still get the exact color you need in your logo. You actually get colors that are brighter and more vivid.

What does this mean for you? This is a simple but important step in greening your printing. Make sure that all of your printing is done using soy inks. You'll still get the great color that you want (except for fluorescent and metallic colors, which are petroleum-based), but with twice the environmental benefit - fewer emissions during the production process, and the paper will be easier to recycle afterwards.

Now, what can be easier than that?

YOUR BUSINESS CARD

Your business card is a statement that speaks volumes about you – and your organization. A business card should be an object of pride. It should convey a personality, and be something you're proud to hand over. After all, people don't buy a company these days- they buy the people. We've read hundreds of times that business card is a great way of making a good first impression. And yet experience has taught us that, in reality, they often say very little about who we are.

* In Japan the exchange of cards is a formal occasion; it's a ritual that is steeped in honor and tradition. Individuals greet and bow heads, then the cards are exchanged and the details are studied. The names are read aloud in turn, ensuring correct pronunciation. It's a business transaction, yet it's imbued with sense of personal respect for everyone involved.

From fun to serious, minimal to maximal – but there is a common thread throughout each designed with pride, and that can only command respect.

FAQS

CONTACT

PRINTING TERMS

Bleed - A bleed occurs when your color or image extends off of the printed piece, typically bleeds are created when the printed piece is trimmed.

CMYK - Cyan, Magenta, Yellow and Black are the colors used in 4 color process printing. On the printing press they are run in a specific order. Black, Cyan, Magenta and Yellow, the most transparent of the four and containing the most varnish in the formula is yellow and is laid down last. The most opaque color, black, is laid down first. Following this sequence allows for brighter imaging and better control of color.

Color Densitometer - A piece of equipment used by press personnel to determine the density of the ink color being laid down on the printed sheet. It has a numerical digital read out and the higher the readout on the densitometer, the greater the amount of ink that is being laid down on the sheet. While there is a wide variance in the numbers used, the average range is:

Cyan and Magenta reading around 135 to 145..... Yellow around 105 and Black anywhere from 175 to 210..... This is only a generalization and the densities that are run should be left up to the press personnel.

Color Density - The amount of ink printed on the sheet.

CTP - Computer to Plate. A process that bypasses the use of film when creating the image that is receptive to ink on the printing plate.

Emboss - Impressing an image by forming the paper using a die that is cast in the shape of the image you want to create. When pressure is applied, the paper takes the form of the die.

Film - A sheet of material that is processed with the image on it. This material will be placed over the printing plate and with the use of light, burning the image into the printing plate, determining the ink receptive areas of the plate.

Halftone - The screening of a continuous tone image, converting the image into different sized, yet, equally spaced dots.

Impression - Each time the sheet passes through the press and is printed, it is an impression. The terminology is useful in production scheduling and estimating because it determines the quantity of the run and the efficiency and speed of the press and the operator.

Large Format - A term that describes the printing of large sized substrates. Printed pieces would include large posters, POP(Point of Purchase) signage and banners. The printers that are used are typically inkjet or IRIS printers. This is an evolutionary segment of the print world and the technology, chemistries and equipment are constantly changing.

Moiré - A pattern that is created from incorrect screen angles seen in the CMYK printing process

Offset - The printing process that uses a blanket to receive the ink from the plate and then impresses it onto a sheet of paper as the paper passes between the blanket and a hard steel cylinder called an impression cylinder.

Perfect Bind - A type of binding that combines the cover and the inside pages on the spine with glue. Magazine examples that are perfect bound are Photoshop User, Mac Design, Graphic Arts Monthly and Communication Arts.

Registration - The alignment of dots in relation to each other. When the cyan, magenta, yellow and black plates are aligned and brought into focus, the printed piece is considered to be in register.

RIP - Raster Image Processing..... a computer language that arranges the dots, solids, lines and type in a particular pattern concerning densities and angles. The function of the RIP is to send instructions to the film processor, telling the processor where to place each item and what angle each item is to be placed in relation to the other items on the film or combination of films used in creating the image.

Saddle Stitch - The binding of a book using wire staples on the binding edge to hold the book together. Some magazine and flyer examples are PC Connection, Micro Warehouse and the Java Developers Journal.

Score - A crease that is impressed into the paper. Scoring will allow for exact folding on heavier stocks and helps to eliminate the cracking of some substrates.

Separations - In four color process printing you have a continuous tone image that is separated into four different colors,

Debbie Carney's Summary

New Order Organizers has been offering both Business and Residential organizing services to clients in Northeast Ohio since 1990. Student organizing services has become a major focus since 2006, and today all of our services are also available to clients located in the Toledo, Ohio and Michigan areas.

One of our top priorities is to provide students with the tools, terms, and methodologies that they need to help them organize, manage, and process their school work - by themselves. Our ultimate goal is to share these methodologies with parents and educators in an effort to implement standardized organizational processes and procedures in school systems.

Specialties
 Paper and Electronic Information Management
 Productivity Training
 Business, Residential and Student Organizing

Debbie Carney's Experience

Owner

New Order Organizers LLC

January 1990 - Present (24 years 1 month)

New Order Organizers has been offering both Business and Residential organizing services to clients in Northeast Ohio since 1990. Many of our training programs are also available virtually.

In 2006, New Order Organizers expanded to include a Student Services Division, with the addition of Joan Dvorak, Learning Specialist. Together, we have developed a program that combines organizing principles and study skill methodologies to help students, including those who have ADHD, dyslexia and other learning problems, succeed in school.

COLORWORKS!™ Folders 4 Success is a new, tested and proven patent-pending product. It is not just a product, it's a system designed specifically to teach students how to manage, process, and organize their school papers...by themselves!
