Social media have set a stage for a chorus of new voices to contribute to trademark meaning. In early 2011, the Tupperware Brands Corporation ("Tupperware") created a Facebook page to promote an image of environmental sustainability and good citizenship.ⁿ¹ It promised to donate a dollar to the Boys and Girls Clubs of America every time a Facebook member clicks on an icon to show she "likes" its page.ⁿ² It also provided a discussion forum for public comments - both positive and negative. Instead of relying on its marketing department and sales representatives to tout its message, Tupperware invited consumers to participate in rewriting a modern version of its brand narrative. In an effort to steer the [*1493] direction of this message, Tupperware used two marks belonging to others (Facebook and the Boys and Girls Clubs) to bolster its image. This example illustrates new online norms that are pressuring traditional trademark doctrine to change. This pressure is bound to increase as across the Internet, more and more social media sites reflect a profusion of similar uses.

Much trademark doctrine leans too heavily on the assumption that brands are created by trademark owners and imposed on a silent and easily confused public audience. The consumer investment model offers a different perspective.ⁿ³ With this balancing tool, trademark doctrine can be brought back in line with commercial reality. Because so many brands fail, the model is built on the foundation that consumers must invest a mark with meaning and resources (like time, creative energy and money) in order for a brand to succeed. Because of this investment, the model provides that consumers should be entitled to some return, at least in the form of a safe zone to use the marks they helped create as informational tools.

The Tupperware example demonstrates that the model can now be extended further. In addition to openly recruiting consumer participation in the brand narrative, other brands are referenced to update the Tupperware story. Facebook is used to modernize and "coolify"ⁿ⁴ the products, and as a platform for telling an energy efficient story. The Boys and Girls Clubs give Tupperware's reputation a charitable dimension and invites the ethic of generosity into its community. In this way, corporations are acting more and more like consumers. To build a personal reputation, individuals have always relied on brands, such as the names of the schools we attended. Now, through social media, many personal brand preferences have become part of our online reputations. Modern corporate branding mimics this consumer trend, and we see many organizations like Tupperware using the brands of others to bolster their image, grow their community, sell their products and positively affect their brand value. Much of this piggy-backing on other brands in social media occurs without express permission. This trend requires rethinking notions of trademark law thought to require brand owners to police their mark and stop all unauthorized brand uses, especially those that result in a commercial benefit to a person who uses a brand without its owner's permission.

[*1494] Part I first defines the terms "social media" and "social networking" as used in this analysis. Next, it briefly outlines how the expansion of trademark doctrine led to creation of the consumer investment model as a mechanism to keep consumer interests in play when trademark issues are decided. It also shows that the model is more relevant than ever as online social networks amplify consumer power over brands. Previously, marketing departments viewed consumers as a passive audience to their carefully controlled brand narrative trumpeted over television, radio or print advertisements. Now, consumer participation is essential to the rise and fall of a brand. Even the richest corporate brand owners cannot escape the effects of consumer power of brands in social media. Part I illustrates this new dynamic through the short life of Disney's "SEAL Team 6" trademark applications. After that, Part I explores how social networking on the Internet creates new opportunities for consumers to invest in brands. It demonstrates how consumers are using brands in new ways, such as props to bolster their reputation in online profiles. As we will see in the following Part, individuals are not the only ones using the brands of others in social media.

Part II shows how corporate brand owners are permitting consumers to help write their brand stories through social media. Brand owners are acting just like consumers, using the brands of others to bolster their corporate reputations and connect with their audience. Many of these commercial uses of third-party brands are unauthorized. Consequently, the nature of online social networking has resulted in brand owners being forced to loosen control over a wide array of trademark use.

Part III explains how these new trends will affect trademark law. As consumer investment in trademarks expands through social media, courts will be confronted with the task of rethinking trademark doctrine that is premised on trademark owners having sole control of the brand narrative. The multitude of unauthorized uses of brands in social media will require a re-examination of the duty to police. It should also prompt reflection on the scope of actions that may be the subject of trademark infringement liability. If the trademark litigation docket is to be kept within reasonable bounds, these new norms will require toleration of consequential expressive, informational and even some commercial use of marks that are not authorized by brand owners. Trademark law would benefit substantially from a clear statutory safe harbor exempting unauthorized uses that communicate truthful information.

[*1495]

I. Social Media and Consumer Power over Brands

Before turning to social media and the consumer investment model, it will be useful to situate the discussion within the larger framework of social network analysis that is used to study connections among individuals and groups in society. ⁿ⁵ This structural approach preceded the Internet by decades. ⁿ⁶ It gave us the famous small world phenomenon, better known as six degrees of separation. ⁿ⁷ This idea of the close connectedness of distant individuals seemed much more startling in the pre-Internet environment. Social scientists apply social network analysis in fields as diverse as epidemiology, software development and economics. ⁿ⁸ These studies describe social networks as composed of "nodes" connected by "ties." ⁿ⁹ The nodes may be individual people or groups such as a corporation, government body or a community. ⁿ¹⁰ The ties can consist of anything that flows between individuals or groups. ⁿ¹¹ A tie can be a good, a service, information, friendship, a technological tool, such as a website, or a brand.

Not all participants in a social network act in the same way. Ties tend to be "asymmetrically reciprocal," meaning that the content and intensity on each side of the tie is generally different. ⁿ¹² For example, when friendship is a tie between two people, one person may be more deeply attached than the other. Similarly, when two people (nodes) use an Internet social network site like Facebook as a tie, one person may communicate more than the other, making the relationship asymmetrically reciprocal. When brands act as ties, the trademark owner may invest more resources in repeating a consistent story and may contribute more to the conversation than any other individual. Despite this asymmetry, consumers continue to serve as nodes in the social network, building ties with each other and the brand owner by contributing stories to the brand narrative. Although the ties may be asymmetrically reciprocal, sometimes, as seen in the SEAL Team 6 [*1496] example below, the aggregate effect of individual contributions in a social network may have a decisive effect on a mark.

In current popular discourse, the term "social network" has developed a different meaning from that used by social scientists. Dictionary.com defines it as "Any website designed to allow multiple users to publish content themselves."ⁿ¹³ To distinguish between these two concepts, this Article will use "social media" to refer to website services that offer individuals other than the brand owners a platform for participating in conversations about brands. "Social media" will include services like Facebook, Twitter and Google+ that allow individuals to use brand preferences as props in constructing their online reputations. Social media will also encompass online stores (like Amazon.com and eBay) and review sites (like CNET) that enable consumers to form ties through brands by sharing comments about products and services. The term "social network" will be used to refer to a system that links groups or individuals through ties. The discussion will focus on the role of trademarks as ties and pay particular attention to how trademarks function as ties when consumers use them to share information over the Internet. While "social network" will be broad enough to embrace all interpersonal connections that use trademarks as ties, the term "social media," as defined here, requires a connection to cyberspace.

Corporate reputation is deeply embedded in brand perceptions. Therefore, trademark owners do what they can to control the qualities and stories associated with their trademarks. To protect the value of this intellectual property, trademark claims are often asserted to prevent harm from unauthorized use. As the Internet creates new opportunities to use brands for expressive and informational purposes, courts sometimes find themselves stuck in a pre-Internet box of brand perception in which the trademark owner is thought to have exclusive rights to control the brand by stamping out all unauthorized uses, especially those that involve commercial transactions.ⁿ¹⁴ This view is premised on the doctrinal assumption that brand value is solely created by the trademark owner.ⁿ¹⁵

[*1497] The consumer investment model is predicated on the idea that trademarks are frequently used as ties to create and maintain social connections.ⁿ¹⁶ This phenomenon is not new. Nonetheless, the Internet has created many new opportunities for social networking using trademarks as ties. In view of these recent trends and in deference to the current lay meaning of social networks, this analysis will focus on the effects that Internet-based social networking has had on trademark practices and how these new practices are likely to influence trademark law. Many of the examples will come from Facebook because by 2011, it became the most used social media site.ⁿ¹⁷

A. The Consumer Investment Model Is Needed To Shrink Bloated Trademark Doctrine To Conform with Contemporary Marketing Practices

Until the 1920s, federal trademark rights extended only so far as necessary to protect unfair competition that led to consumer confusion.ⁿ¹⁸ Such a view permitted use of the same brand on non-competing products or services if the context made it clear that they came from different sources.ⁿ¹⁹ Under the old trademark regime, a bail bondsman named James could sell his services as "James Bond" with little risk of liability. Because the bail bondsman does not compete with the novel and movie franchise, consumer confusion would not be likely. Beginning in the 1920s, courts expanded the foundation for trademark liability to include confusion about sponsorship or affiliation.ⁿ²⁰ The Lanham Act codified both bases as grounds for infringement.ⁿ²¹ Under this broader standard, the bail bondsman has a much more difficult time disproving consumer confusion. Still, he might escape liability because the services he offers are so different from Ian Fleming's novels and films that consumers would not believe they are affiliated.

[*1498] Because liability in such cases turned on unpredictable consumer perceptions, practical certainty was elusive. The likelihood of succeeding in trademark litigation was difficult to predict. It also became difficult to advise clients about the risks of registering trademarks with the United States Patent and Trademark Office ("USPTO") because likelihood of confusion with another mark was a bar to registration.ⁿ²² Discontent with the uncertainty of liability based on consumer confusion, corporate America lobbied for broader trademark protection.ⁿ²³ Congress responded with new legislation. In 1995, it enacted a federal dilution law to protect famous marks against uses that diminished their distinctiveness.ⁿ²⁴ In 1999, Congress created liability for cybersquatting so that an Internet domain name could be seized and transferred to the brand owner if it incorporated a trademark in bad faith.ⁿ²⁵ This legislation substantially broadened opportunities for stopping the unauthorized use of trademarks, because no longer was consumer deception - or even confusion - a predicate for trademark liability.ⁿ²⁶ Trademark doctrine began to tip so far in favor of

brand owners that courts began to find liability from all sorts of unauthorized uses of marks, especially if such uses resulted in a commercial benefit.ⁿ²⁷

If someone begins offering "James Bond" bail bond services in 2012, he may still escape liability for trademark infringement if consumer confusion is not found, but he would have a much tougher time avoiding liability under the federal dilution statute because his business could be found to lessen the distinctiveness of the famous James Bond marks.ⁿ²⁸ If he used the name "James Bond" in his [*1499] website's domain name, he would risk liability for cybersquatting.ⁿ²⁹ With dilution and cybersquatting as part of a trademark owner's arsenal of weapons to protect brands, mark owners have much more power to silence unauthorized uses even if those uses do not in any way diminish sales of their products or services. In view of this trend, balancing forces are needed to preserve the rights of non-mark owners to use brands for descriptive, informational and expressive purposes.

Toward this goal, I proposed the consumer investment model in 2010 as a theoretical framework for bringing consumer interests back into trademark law.ⁿ³⁰ The model demonstrates that because consumers invest marks with meaning and economic value, trademark law should provide them with a return in the form of permitted uses.ⁿ³¹ At a minimum, it supports a view of trademark law that gives consumers the freedom to use marks to express themselves and find information.ⁿ³² Consumers contributed to trademark value long before social networking on the Internet became ubiquitous. The phenomenon has exploded in the twenty-first century. Internet-based social networks are creating whole new areas of unauthorized use, and in doing so, provide interesting new applications for the consumer investment model.

Social media have given consumers unprecedented opportunities to saturate trademarks with new meaning. Empowered by Internet technology, consumers can infuse a brand with buzz, investing it with magnetism and economic value, or they can force a trademark into oblivion even against the wealthiest content owners.ⁿ³³ One commentator observed that "the separate nature of many brand relationships - the 'them' and 'us' - is obsolete."ⁿ³⁴

B. Consumer Criticism on Social Media Convinces Disney To Withdraw "SEAL Team 6" Trademark Applications

The quick demise of Disney's plans for the "SEAL Team 6" mark provides an excellent example of how social networks are facilitating unprecedented public power over brands. A brief look at [*1500] the historical moment in which Disney filed the application is necessary to understand why the life of this trademark was so short. On May 1, 2011, President Obama announced the assassination of Osama bin Laden in Pakistan and his burial at sea.ⁿ³⁵ The American reaction to the death of bin Laden was spontaneous, jubilant and patriotic.ⁿ³⁶ In Washington, D.C., people gathered on Pennsylvania Avenue in front of the White House to shout "U-S-A!"ⁿ³⁷ At the time of the announcement, the Philadelphia Phillies were in the ninth inning of a game against the New York Mets when the crowd began to chant "U-S-A" and did not stop until the game was over.ⁿ³⁸ At the site of the former World Trade Center towers in New York, a crowd gathered to sing "God Bless America," and someone remarked how throughout this event, "everyone was uniting."ⁿ³⁹

The moment was unusual. In a harshly divided political climate, agreement on this issue transcended political differences. Although not all Americans celebrated the death of bin Laden or thought it was handled appropriately, public opinion polls showed near unanimous support for the military action. USA Today and the Gallup Corporation found that "overwhelming majorities of all subgroups of the American population approve of Sunday's action [death of bin Laden], including 97% of Republicans and 95% of Democrats."ⁿ⁴⁰ A Washington Post/Pew Research poll showed that "nearly all Republicans (96%), as well as 82% of Democrats and 88% of independents give the military a great deal of credit."ⁿ⁴¹

[*1501] The covert fighting forces of the United States Navy are known as SEAL Teams.ⁿ⁴² Since the 1960s, the Navy created different numbered SEAL teams to handle especially dangerous missions.ⁿ⁴³ Because their missions are so highly classified, the unit names and the identities of the members who belonged to them were closely guarded secrets.ⁿ⁴⁴ The team that carried out the mission against bin Laden was from the elite unit known as SEAL Team 6.ⁿ⁴⁵

Before 2011, the Navy never publicly acknowledged the existence of these special forces. Off the public radar, they trained intensely and carried out the most dangerous covert military operations. ⁿ⁴⁶

On May 2, 2011, the news media reported that SEAL Team 6 conducted the bin Laden mission, and the nation learned the unit name for these anonymous heroes. ⁿ⁴⁷ On May 3, 2011, Disney Enterprises, Inc. filed three federal trademark applications stating it intended to use the mark "SEAL TEAM 6" for educational and entertainment services, ⁿ⁴⁸ clothing, ⁿ⁴⁹ toys, games, Christmas Tree ornaments and stockings. ⁿ⁵⁰ By May 14, 2011, the news media found Disney's trademark applications and pounced on them. ⁿ⁵¹ In response to a short piece about the trademark application published by the Huffington Post on May 14, 2011, over 900 readers posted comments, and over 43,000 people indicated through Facebook that they "liked it." ⁿ⁵² On May 16, 2011, Jon Stewart reported on The Daily Show:

[*1502]

Putting a trademark on Seal Team 6, it's like trying to copyright the guys who stormed the beaches of Normandy, or the Statue of Liberty, or putting a patent on Patton; it belongs to all of us, not to mention Disney filed this claim only two days after the story was released. ⁿ⁵³

Immediately, the story went viral. The Daily Show sent out two messages on Twitter, and 148 people republished them in their own Twitter feeds. ⁿ⁵⁴ By July 13, 2011, The Daily Show's SEAL Team 6 segment had been viewed 94,000 times. ⁿ⁵⁵

The reaction to the trademark applications reverberated through traditional media as well. On May 19, 2011, a newspaper editorial in the Washington Times characterized Disney's "SEAL Team 6" trademark applications as greedy and unpatriotic and argued that "the patent office ought to reject this crass and unpatriotic attempt to convert such noble sacrifice into tawdry knickknacks." ⁿ⁵⁶ Public outrage fueled the critical fire. On a news website, Disney was criticized with comments such as, "I certainly hope they fail in this effort. Disney has NO business cashing in on what our brave men and women do for pennies a month." ⁿ⁵⁷ Another post read: "Disgraceful action by Disney to turn a real crisis in America to a form of entertainment on the screen. We are at war!! Dumb. This is not a game!!" ⁿ⁵⁸ By May 26, 2011, seven different Facebook pages or groups advocated a boycott of Disney in reaction to the trademark **[*1503]** applications. ⁿ⁵⁹ One person commented on Facebook that "if anyone should profit from the heroic work of our military, it should be the military families and retired service members - not a soulless and clearly tasteless multinational corporation." ⁿ⁶⁰ A critical Fox News report did not permit comments but had over 6,000 "likes" on Facebook. ⁿ⁶¹ A Wall Street Journal article featured comments showing anger over the greed and arrogance of Disney and prompted over 2,000 "likes" on Facebook. ⁿ⁶²

On May 13, 2011, the Navy applied to register "SEAL Team" as a collective mark indicating membership in "an organization of the Department of the Navy that develops and executes military missions involving special operations strategy, doctrine, and tactics." ⁿ⁶³ The Disney trademark application still may have matured to registration because the Navy's collective mark did not involve the sales of any goods or services, and therefore the USPTO may have found that confusion was not likely. ⁿ⁶⁴ Nonetheless, on May 25, 2011, Disney withdrew its trademark applications for "SEAL Team 6." Disney claims that it took this action "in deference to the Navy's application." ⁿ⁶⁵ However, if it were truly concerned about the Navy's interests, it would not have filed the applications at all. The historical record suggests that consumer perceptions influenced Disney's decision. The USPTO database indicates that Disney has filed over 4,700 trademark applications. ⁿ⁶⁶ For one reason or another, Disney **[*1504]** eventually abandoned over 2,290 of them. ⁿ⁶⁷ Only 15 of these 2,290 applications were abandoned within six months of the application date, and only five (including the three SEAL Team 6 marks) were abandoned within three months. ⁿ⁶⁸ These facts demonstrate that it is highly unusual for Disney to abandon a trademark application so quickly. A Nexis search for all six of the quickly abandoned marks showed media reports about the "SEAL Team 6" marks, but none of the others. ⁿ⁶⁹ This information suggests that the "SEAL Team 6" applications mark the first time that Disney withdrew trademark applications so quickly in response to significant public pressure. Such a media storm over a trademark application never happened to Disney before the age of social media.

The quick demise of Disney's "SEAL Team 6" trademark applications provides a fascinating insight into how social networking has shifted the trademark balance of power. Criticism for mark owners is nothing new. But social media not only work as a mirror of public perception, they are a perfect platform for spreading critical fire. Social media can amplify consumer voices like nothing we have seen before. The intensity of the criticism on popular social media sites like Facebook spread the story and made it possible for many consumers to express their contempt.

This dynamic can benefit brand owners like Disney if they are listening and care what their audience thinks. By responding to consumer criticism, they empower consumer voices and recreate the brand as a focal point for a real interactive community. Not wanting to alienate a broad audience, Disney realized that abandoning the "SEAL TEAM 6" trademark applications was necessary in order to stop the negative narrative. In this way, consumers steered a huge corporation in a different direction. That power could not have been exerted without Internet search technology to find the information in the first place and social media to reflect strong public criticism and immediately communicate this message to Disney.

[*1505] Not long ago, trademark applications for future products were seen only by trademark lawyers. In the twenty-first century, Internet search technology has made them easy for anyone to find, and social media have made them potential targets for public comment. As a result, brand owners are confronting something they have never seen before. Even before a product is launched, consumers can publish their immediate reaction to a brand, and public perception can prompt a takedown. In the sections that follow, I will explore how this dynamic affects existing brands as well. Social media hold vast potential to facilitate public organization around brand meaning. Consumer investment in trademarks has become such a powerful force that even coffers as rich as Disney's are not enough to create a protectable trademark when public opinion demands a different result.

C. Social Media Provide New Ways for Consumers To Invest in Trademarks

Trademarks are repositories of meaning that consumers use to construct a sense of personal identity and reputation.ⁿ⁷⁰ By listing schools and employers in resumes, we rely on brands to communicate qualifications. The marks signal specific messages about individual talent and experience. It is not just the Ivy League education that students may want when they apply to an elite college or graduate school. They (and their parents) know that an Ivy League brand in a resume will reap professional benefits for the rest of their lives. Before the Internet, these educational brands were especially important in a printed resume distributed on fine quality paper at moments of professional or educational transition. Through online profiles, these brands are always present on professional websites and in social media sites like Facebook. To the consumer, they have become more valuable, serving as a constant and efficient means to display credentials and reconnect with former classmates and colleagues.

In this way, social media sites expand the resume effect of using brands to define one's sense of self and construct a public persona. In addition to efficiently transmitting information about schools attended and employers, social media provide users with opportunities to create a much more detailed public profile. Many of the meaningful details are provided by trademarks. Brands serve as [*1506] permanent ties on social media sites, creating constant opportunities to connect with people who attended our schools or worked for the same employers long after those institutions are no longer part of our daily lives.

Social media also provide a stage for public demonstration of private preferences. Most of my friends do not know my preferred charities or that I carry Burt's Bees lip balm in my bag, but they will find out if I "like" these brands on Facebook because these preferences would become part of my online profile. With social media, even the private act of reading links personal reputation with corporate brands. When a user posts a link to an article, she sends a message about the quality and perspective of information she prefers. The Internet provides potential employers with a host of publicly available information, including brand preferences, outside the scope of what job applicants choose to include on their resumes.ⁿ⁷¹

In a world with social media, we routinely choose many brands to construct our personal reputations in addition to

those that appear on our formal resumes. Trademarks have historically facilitated social networking by providing consumers with symbols they can use to connect to a community with similar preferences. For a Beatles fan, the band's name gives him an informational tool to find books, music and merchandise. He might also use the mark expressively to show his appreciation and loyalty. If he bought licensed merchandise, like a T-shirt or bumper sticker, his expression will echo the brand owner's message. Alternatively, he may print a T-shirt with the message "Still Pissed at Yoko." He may display a Beatles bumper sticker on his car or have the band's name tattooed on his body. Generally, these expressive uses require him to make a purchase and then communicate his passion for the Beatles by displaying his allegiance. Without going on the Internet, his message will be heard only by those who see him in person.

Social media have empowered consumers to use trademarks to gain more information, make a broader expressive impact and connect to a larger, more dispersed community. With the click of a mouse, the Beatles fan may indicate on Facebook that he "likes" the band. This stated preference automatically becomes part of his personal profile. In January 2012, the Beatles Facebook page had [*1507] 23,751,315 fans.ⁿ⁷² In becoming fans, these Facebook members took a bit of the Beatles magic and made it part of their own online image. In this way, social media provide an unprecedented platform for anyone to create a public persona using brands as props. In social media, the brand can be recruited as a powerful tie in seconds without buying anything. If a Beatles fan posts a message on the official page, his thoughts will be accessible by a much larger audience than he encounters in his daily life. This use of brands occurs repeatedly by consumers seeking to connect to a much broader community linked by a common interest in a trademarked product or service. In the realm of social media, a consumer does not have to buy anything to use the mark of another to make these connections and bolster his online reputation.

Long distance friends, family and business associates may not see us often enough to keep up with our brand preferences, but Facebook has changed all that. For example, the Beatles fan may meet professional acquaintances at a conference and not have the opportunity to share musical tastes. Ties may be cultivated through social media and brands after everyone returns home. In an effort to extend his professional network, he may become Facebook friends with these new contacts. If he has joined the Beatles community on Facebook or uses Twitter to spread Beatles news, his new acquaintances will learn something important about his personal life that he has chosen to broadcast as part of his public persona. And they do not need to go to the trouble to look at his profile. His preferences will be accessible on the friends' news feed as he circulates updates. His appreciation for the band will also be apparent to his Facebook friends if they visit the Beatles page because his photo will be displayed in the margin along with a those of any other friends who also like the Beatles.

A major difference between social networking in physical space and cyberspace is the vast potential opportunity for consumers to create communities linked by brand preferences.ⁿ⁷³ The Internet gives consumers the ability to reach beyond their close circle of friends and family to build networks among acquaintances and strangers based on [*1508] common interests.ⁿ⁷⁴ Many of these communities use brands as "social glue," connecting consumers to each other through social media.ⁿ⁷⁵ Not all of these pages are consumer controlled. Some Facebook group sites that appear to be consumer driven are actually controlled by the brand owner. Pages for branded products may be created by any Facebook user, but only an "authorized representative" of the brand may contribute content to them.ⁿ⁷⁶

However, the Internet does enable consumers to share ideas about brands that trademark owners would never authorize. Facebook permits users to organize a boycott of a branded product and express one's allegiance to the protest. In the wake of the BP oil spill in the Gulf of Mexico, hundreds of thousands of Facebook users took the time to "like" a Boycott BP site.ⁿ⁷⁷ Those who visit it will see an array of critical consumer commentary and links to relevant news articles. This site empowers critical consumers to show that a decade of resources sunk into crafting the BP brand as environmentally friendly was destroyed as the Gulf Oil disaster unfolded, and its "green positioning was revealed as nothing more than a marketing game."ⁿ⁷⁸

Consumer investment in trademarks is growing through the use of online social media. Social media create new platforms that intensify "participatory, collaborative, and socially-linked behaviors whereby consumers serve as creators and disseminators of branded content."ⁿ⁷⁹ None of these themes would emerge without the participation of brand

owners themselves. The next Part will explore how social networking is affecting trademark practices from their perspective.

[*1509]

II. Social Media and Collaborative Corporate Branding

In social media, corporate brand owners are acting like consumers, using the marks of others as social networking ties, often without authorization. This general dynamic reflects another reason why the consumer investment model works so well in the Internet environment. It defines a "consumer" broadly - as anyone other than the trademark owner - including both individuals and other corporate brand owners.ⁿ⁸⁰ Social media provide strong empirical support for this definition, for in this realm corporations mimic individuals, using the brands of others to enhance their reputations and express their story.

This new landscape creates an array of challenges for brand owners. Before the rise of social media, marketing campaigns were created by a marketing team, pre-recorded and repeated to a silent consumer audience.ⁿ⁸¹ Television, print and radio advertisements were vehicles for telling a uniform, controlled story. To modernize brand strategies for social media, many companies are abandoning that model or using it in connection with more participatory advertising techniques.ⁿ⁸² The result is more collaborative branding where individual consumers, other corporations and trademark owners all contribute to a brand's story.ⁿ⁸³

Two emerging trends reflect less brand owner control and increased consumer investment in trademarks. First, trademark owners are encouraging consumers to step out of the audience and participate in the brand narrative, even though brand owners cannot always control the trajectory of that path. As a result, branding [*1510] strategies have begun to resemble conversations instead of canned performances. Second, in an effort to regain some control, or at least channel consumer energy in a particular direction, mark owners are linking their brand meaning to marks of third parties over which they have little, if any, control. This Section will explain these two trends, and the next Section will show how they are putting new pressures on trademark doctrine.

A. Inviting the Audience to the Drafting Table

The popularity of social media is tempting brand owners to create an online presence in order to attract technologically savvy consumers and keep them interested.ⁿ⁸⁴ This temptation carries with it substantial risk. When trademark owners use social media to build consumer communities, they are entering unfamiliar and potentially hostile territory in which they do not have absolute control over their intellectual property.ⁿ⁸⁵ To succeed in this realm, trademark owners must shift their perspective. In social media, brand owners find themselves forced to accept a wide array of uses over which they have little, if any, control. To have a presence on Facebook and Twitter, which have become so popular with consumers, trademark owners can no longer think of themselves as sole authors of the story associated with their brand. Social media forces them to let go of that myth as brand reliance on consumer investment becomes more open than ever before, and brands become linked with many stories authored by consumers and other brand owners.

In this way, effective use of social media transforms brand owners from proselytizers into "learning organizations."ⁿ⁸⁶ Brand narratives once authored by a corporate marketing department now evolve through social media in which "consumers gain an equal if not greater say than marketers in what the brand looks like and how it behaves."ⁿ⁸⁷ This strategy may be necessary for brand owners to participate in online social networks that use their brand as a tie, but a "brand[]" cannot be controlled centrally or in a top-down manner [*1511] in these circumstances."ⁿ⁸⁸ Consequently, this loosening of brand control invites significant risks.

The marketing scholar Susan Fournier recently observed that "critical consumers networked together can wreak havoc on a brand."ⁿ⁸⁹ The marketing landscape is littered with examples of brands forced to take unexpected turns in response to consumer feedback. Frito-Lay tried to infuse their Sun Chips brand with a green narrative about personal

health and environmental sustainability by creating 100% biodegradable chip bags.ⁿ⁹⁰ When consumers complained on Facebook that the new bags sounded like chain saws, the company withdrew the biodegradable bags and went back to the lab to develop a quieter version.ⁿ⁹¹ And as we saw in the SEAL Team 6 example, if consumers reject the brand or have critical feedback, the brand may be irreparably damaged, even if its owner does nothing to compromise the mark's integrity.ⁿ⁹²

In the fall of 2011, Netflix decided to keep its streaming service as Netflix but divide its DVD delivery service into a new site and brand called "Qwikster."ⁿ⁹³ In response to livid consumer opposition, Netflix stated on its blog that it heard the consumer message that "two websites would make things more difficult, so we are going to keep Netflix as one place to go for streaming and DVDs. This means no change: one website, one account, one password ... in other words, no Qwikster."ⁿ⁹⁴ Like we saw in the SEAL Team 6 story, consumer reaction voiced through social media brought down Qwikster even before the service associated with it was launched.

If the risks to a brand are so great, lucrative benefits must exist as a counterbalance to make social media marketing worthwhile. The benefits are apparent in the quick success of social media brands themselves where the branding strategy looks a lot like community development. Success for social media marks is dependent on the [*1512] ability to attract members and keep them engaged.ⁿ⁹⁵ In 2011, Facebook was considered the most valuable social media site because it hosted the most active users.ⁿ⁹⁶ Social media marks demonstrate that brand value is a direct function of how much consumers invest in it. Facebook's user base expanded substantially over the past seven years: first passing the 1 million mark in 2004, 12 million in 2006, 50 million in 2007, doubling to 100 million in 2008, reaching 350 million in 2009, 500 million in 2010 and 750 million in 2011.ⁿ⁹⁷ During the same period, projections of the company's value grew from an estimated \$ 52 million in 2006, \$ 150 million in 2007, \$ 777 million in 2009 and \$ 4.2 billion in 2011. These numbers show that this immense value was not built solely by Mark Zuckerberg and his team. Without large investments of consumer resources, especially time, Facebook would not have achieved such dominance.ⁿ⁹⁸ In 2011, "Americans spent more time with Facebook than with the next four largest Web brands combined."ⁿ⁹⁹ Other electronic service sites like Google, Groupon, Foursquare, eBay, Craigslist and CNET also demonstrate that consumer investment of resources is critical to the success of an online mark.ⁿ¹⁰⁰

Twenty-first century branding strategies embrace the idea that a product or service that enables consumers to participate in a like-minded community will be more successful. Some new products are being designed to create independent social networks to facilitate connections among fans. For example, the 2011 version of the Nintendo DS has built-in software that signals its owner when [*1513] another gamer is nearby.ⁿ¹⁰¹ The Blu electronic cigarette, introduced in 2011, delivers water vapor with nicotine.ⁿ¹⁰² In an effort to profit from the camaraderie of people who gather to share a cigarette away from smoke-free buildings, the Blu cigarette packs, "when they get within 50 feet of one another, ... vibrate and flash a blue light."ⁿ¹⁰³

Owners of established brands encourage their fans to connect through social media in order to attract conversations about their brands among younger, technologically savvy consumers.ⁿ¹⁰⁴ Current branding strategy relies heavily on the idea that the best brand press comes straight from other consumers.ⁿ¹⁰⁵ Trademark owners can give online users the opportunity to endorse their brand by permitting individuals to express opinions about their products. Expressions of support can take many forms. If a brand owner has a Facebook page, Facebook members may indicate that they "like" a branded product or service. For example, Facebook members may write comments on the Coca-Cola wall. Some social media sites, like Facebook, give brand owners total control over the commentary that appears on the official page. In contrast, Coca-Cola touts the fact that its page was developed by consumers and although the Coca-Cola Company now controls it, the original creators were hired to manage it.ⁿ¹⁰⁶

[*1514] The owner of a Facebook page may delete critical commentary,ⁿ¹⁰⁷ but if it does, it risks alienating its fan base and defeating the goal of creating an authentic online community. Brand managers that use social media in a "top-down" strategy risk "making themselves look separate, going against transparency and oneness ... [and consequently] weakened through appearing 'above' one's supporters."ⁿ¹⁰⁸ Genuinely collaborative social media may create a strong sense of community between brand owners and fans to facilitate meaningful conversations in which

brands can respond to consumer concerns. Like most relationships, "authenticity is the critical currency in establishing transparency." ⁿ¹⁰⁹ If a brand owner can muster up the courage to respond to criticism, it will gain credibility with consumers. Alternatively, it can censor consumer speech on its page and deal with the fallout that will inevitably appear somewhere else on the Internet. In the world of social media, "what happens in Vegas stays on YouTube." ⁿ¹¹⁰ Ignoring consumer concerns may be the greater harm driving brand owners to assume the risks and potential benefits of inviting consumers to step out of the audience and take a seat at the drafting table of brand development. The following Section demonstrates that other corporate brand owners may be present as well.

B. Writing a Brand Story with Marks Belonging to Others

Consumer investment must become part of the theoretical framework we use to evaluate trademark law because it is becoming a ubiquitous feature in the marketing landscape. Instead of focusing on product and service qualities, many advertisements promote brands as shared experiences and community-building tools. Companies unaccustomed to this approach may create a sense of community instantly by linking their brand to a social media mark, like Facebook, which is owned by someone else. For example, as publishers struggle to compete with a host of alternative electronic entertainment, they are attempting to boost sales by linking private reading to electronic social media. In advertisements for the 2011 Nook e-Reader, Barnes and Noble promoted its social networking features that permit [*1515] Facebook and Twitter friends to "follow" what a Nook owner is reading. ⁿ¹¹¹

Even brands that embraced consumer investment by relying on traditional social networking are now turning to online social media to keep their brands alive. Tupperware has relied on consumer sales representatives to demonstrate and sell their products for years. ⁿ¹¹² By using in-person social connections for decades, Tupperware has demonstrated its faith in active consumer investment and social networking between its sales force and their friends. It avoided traditional advertising models in which consumers merely observe or listen to a corporate message. ⁿ¹¹³ Shared personal experiences among friends were essential to the brand's success. In order to keep consumers buying and selling its products, the company sought to encourage online consumer investment through social media such as Facebook and Twitter. ⁿ¹¹⁴ When Tupperware was poised to launch its new interactive Facebook site, its advertising executive, Julie Levinthal, described the move as "the coolification of the brand" designed to transform the reputation from "June Cleaver, 1950's brand, which it's not." ⁿ¹¹⁵ These strategies do far more than display advertisements. They are "meant to create an interactive community and destination for people who sell Tupperware, buy Tupperware or want to become part of the sales force. It's about moving from brand awareness to helping people become brand advocates." ⁿ¹¹⁶

The Tupperware example also illustrates a new type of consumer investment in trademarks. It is not just individuals who are using the brands of others on the Internet. Brand owners are also constructing their online reputations using marks belonging to other companies. This phenomenon of piggy-backing on third-party brands for commercial purposes takes many forms. Some social media marks are built on a collection of third-party brands. The website Makeup Alley hosts reviews of branded cosmetic products. It has "quietly come to be the standard bearer for the unvarnished truth about beauty products online." ⁿ¹¹⁷ Consumers know that a product may not meet [*1516] expectations touted in an advertisement, and product reviews in magazines may not be the best source for unbiased product information because the writers and editors may not be invited to the next big fashion event if they write a critical review. ⁿ¹¹⁸ Therefore, as one Makeup Alley reader noted, "If you're looking for an unconflicted source, you'll probably look to a fellow consumer." ⁿ¹¹⁹ Brands like Makeup Alley are built on the ability to leverage consumer conversations about famous brands. Trademark law's tolerance for such unauthorized but commercial use of third-party brands is essential for business models like this site to exist and prosper.

In an environment where brand criticism is inevitable and easy to publicize, one way for a brand owner to maintain some control is to participate in consumer conversations. ⁿ¹²⁰ To do so, the brand owner may step into an existing community by linking itself to a popular brand owned by someone else. Relying on third-party social media marks to create a brand community is interesting because not only does it require consumer investment, it links the value of a brand with the narrative of a third-party's social networking mark. By creating a page on Facebook, a corporate brand owner like Tupperware can benefit from both the narrative of a cool social media brand like Facebook and its

membership base. In this way, social media have created a fascinating new dynamic for trademark doctrine, because suddenly, many corporations are routinely using the brands of others for commercial purposes. When a company asks for its fans to "follow it" on Twitter or "like it" on Facebook, it is using the brand of a separate social media company for the commercial purposes of modernizing its reputation and attracting technologically savvy consumers.

Through social media, trademark owners may raise the stature of their brands through cross-licensing arrangements in which brands owned by multiple parties will appear in a single advertisement.ⁿ¹²¹ [*1517] The partnership between Facebook and Zynga (owners of the popular game Farmville) has been "enormously lucrative for both companies."ⁿ¹²² Companies selling more traditional products and services are also trying to get into this cross-branding game. In the spring of 2011, American Express launched an advertising campaign called "social currency" in which members share stories about items they purchased through rewards points.ⁿ¹²³ The ads claim to feature real Twitter posts such as, "Just ordered the Wii on @amazon using Rewards Points."ⁿ¹²⁴ To give consumers a feeling of connection to the American Express brand, the company is relying on two sets of brands belonging to other corporations. First, it uses the social networking service marks Facebook and Twitter to tout its online presence on a platform where its consumers already spend time. Second, the ads incorporate more traditional product (Wii) and service (Amazon) marks. Through this cross-branding strategy, American Express is linking its narrative to the stories of marks owned by separate corporations.

The theme of using a third-party's brand in social media presents itself in many other variations. One popular variation on this piggy-backing theme is featuring a name brand product as a charitable incentive. In the spring of 2011, Tupperware attempted to attract fans by promising that the celebrity Kelly Clarkson would donate one dollar to the Boys and Girls Clubs of America every time a Facebook member indicated they "like" the Tupperware page.ⁿ¹²⁵ An alternative variation is to offer someone else's product as a prize. Apple, Inc. does not negotiate a license with everyone who offers an iPod as a prize or incentive.ⁿ¹²⁶ Yet Apple products are often featured in raffles, membership drives and contests.ⁿ¹²⁷ Another variation is to offer [*1518] discounts for someone else's products and services.ⁿ¹²⁸ Online coupon services, like LivingSocial and Groupon, built their marks by providing consumers with discounts for branded products and services.ⁿ¹²⁹ Through these communities, consumers can save money on branded products they already use or explore new options at a lower cost. Deeper discounts are available to those who succeed in convincing their friends to take advantage of the bargain as well.ⁿ¹³⁰ The website Foursquare, launched in 2009, offers its members the opportunity to check in to restaurants, museums, concerts and other locations, and multiple check-ins can lead to discounts.ⁿ¹³¹ In May 2010, the Pew Research Center found that only four percent of U.S. consumers would share their location.ⁿ¹³² To grow the size of its community, Foursquare partnered with American Express to offer discounts to members of both groups.ⁿ¹³³ "To start, American Express will offer deals at Sports Authority and the clothing retailer H&M, along with a few restaurants in New York, like Union Square Cafe and the barbecue joint Blue Smoke."ⁿ¹³⁴ All of these coupon services use third-party social media marks to grow their business models as well. They provide ready-made links so that consumers can easily tell their Facebook friends or Twitter followers about a deal they just landed.

Sometimes, elaborate cross-licensing supports a cross-branding campaign, such as the American Express advertisement. However, for the use of social media brands, contests, and charitable donations, third-party brands are often used without permission of the brand owner. Social media creates a stage on which both corporations, as well as individual consumers, may make unauthorized use of marks belonging to others as props in constructing their online reputation. Piggy-backing on other marks through social media sites has become [*1519] so common that, in many instances, marks are used without obtaining a license or questioning if one is necessary.

Third-party use of social media brands has the potential for providing financial benefits to both consumers and other brand owners. Yet there is clearly a cost to the trademark owner. The individual narrative of each mark becomes inextricably linked with those in the cross-branding arrangement. Some loss of content control happens as well. For example, the Coca-Cola Facebook page does not offer the creative freedom of a private website. It must adhere to the look and feel of Facebook.ⁿ¹³⁵

The success of social media brands demonstrates that the consumer investment model is an important tool to understanding trademark value. Social media present a new and interesting twist to this theme. Instead of relying on an outdated paradigm in which the trademark owner believes it created the mark on its own and should therefore reap all the benefits, social media brands reflect the consumer investment model in which no brand succeeds without significant investment from consumers. In addition to relying on the time and expressive work of consumers, many social media brands also become successful because they provide a forum for businesses to use the brands of others to engage through social media and bolster their online reputations.

III. New Norms in Social Media Foretell Change to Trademark Doctrine

The consumer investment model provides a framework for recognizing that because consumers contribute to brand value, trademark doctrine should tolerate some return on their investment by shielding at least their expressive and informational uses from liability. In social media, businesses are also increasingly using the brands of others for informational, brand-building and commercial purposes. As consumers and businesses invest in the brands of others, trademark doctrine will have to adjust to a new commercial reality. The consumer investment model may provide a tool for balancing important informational interests to sort out which uses trademark law should permit. The model would support trademark liability for counterfeit goods and other situations in which consumers are confused or deceived about the source of a product or service. Such cases compromise investments of time, money and meaning made by [*1520] consumers and brand owners. However, other examples may dictate a different result. At present, trademark law does not provide any clear answers on the extent to which one business may use the mark of another.

In this murky sea of unauthorized trademark use, Congress should define the boundaries of safe harbors. If it does not enact clarifying legislation, courts will have to decide these issues on a case by case basis using current doctrine. Applying a view of trademark doctrine that seeks to stamp out all unauthorized uses may lead to results that make no sense in view of current practices. Some courts find liability whenever the mark of another is used in a way that results in a commercial benefit to someone else.ⁿ¹³⁶ Contemporary trademark doctrine contains a strong current of intolerance for such unauthorized uses. William Landes and Richard Posner explained that "if the law does not prevent it, free riding may destroy the information capital embodied in a trademark, and the prospect of free riding may therefore eliminate the incentive to develop a valuable trademark in the first place."ⁿ¹³⁷ They made this point in the context of passing off - where a competitor uses a famous brand to trick consumers into believing that its counterfeit products come from a well-known source. Some courts have extended this thinking to stop "free riding," even against noncompetitive uses.ⁿ¹³⁸ Other courts have used this formula as a way to avoid inquiring into consumer perceptions. Most famously, the U.S. Court of Appeals for the Fifth Circuit adopted the following standard in *Boston Professional Hockey Ass'n v. Dallas Cap & Emblem Manufacturing, Inc.*ⁿ¹³⁹: "The argument that confusion must be as to the source of the manufacture of the emblem itself is unpersuasive, where the trademark, originated by the team, is the triggering mechanism for the sale of the emblem."ⁿ¹⁴⁰ Under this standard, any time a trademark triggered a sale for someone else, the trademark owner would win even if it presented no evidence of consumer confusion. Many courts and advocates rely on *Boston Hockey* to assert strong trademark rights against alleged infringers.ⁿ¹⁴¹

Trademark law was not intended to be so broad that any time a mark triggered a sale, liability could be imposed. Such a formulation ignores consumer perceptions. The consumer investment model is one lens through which we can see the doctrinal deficiencies. It requires balancing consumer interests before determining trademark liability. Because consumers invest marks with value, others should be able to use the brand for informational purposes even if the use results in a commercial benefit as long as no confusion or deception occurs.

For example, when the *Raleigh News & Observer* runs a headline that Duke University lost a basketball championship to the University of North Carolina ("UNC"), the use of the collegiate marks in a leading headline may trigger sales of more newspapers and generate more advertising revenue on its website. The use of the Duke and UNC mark provide a commercial benefit to the paper, and therefore, a strict application of *Boston Hockey*'s "triggering the sale" standard would result in trademark liability. However, the resulting commercial benefit to the *News & Observer* is not the type of harm trademark law was meant to address. The use is commercial, but it is also truthful and

informational. Although it is possible that the Duke brand may be momentarily harmed and the UNC brand may benefit, the changes in brand perception would be the result of truthful informational speech, not use of the mark as the source for the newspaper or any other consumer confusion or deception. Shielding such use from liability protects the future of the brand as an information tool. Balanced against these important expressive interests, the commercial use does not unfairly compromise [*1522] investments made by the brand owner and ensures that consumers use the branded symbols they helped create as information tools.

Every time a brand owner encourages its fans to "follow it" on Twitter or "like it" on Facebook, the brand owner is using the mark of an unrelated social media company for a commercial benefit. Under the Boston Hockey standard, each of these uses could "trigger a sale" and therefore create a risk of trademark liability. If such use constitutes potential trademark infringement, one may wonder why the social networking sites have permitted this ubiquitous use of their brands. At first glance, these unauthorized uses look like free riding that results in a direct commercial benefit to the unauthorized user. Tupperware did not contribute to the huge investment Facebook made in developing its community. The Tupperware brand need not pay for its Facebook page, or the new opportunities to connect with the community Facebook has established.ⁿ¹⁴² Its presence on Facebook is for a wholly commercial purpose. However, examined from the perspective of the social media company, it becomes clear that each use creates mutually beneficial brand growth. Facebook encourages such uses by corporate brand owners because it gives Facebook members more ties (in the form of popular brands) through which to bond with online friends. Facebook also benefits from brand value and fan loyalty it did not create. Using the brands of others for commercial purposes is a new norm in social media. For this reason, the Boston Hockey standard has become an anachronism. Examination of consumer perceptions should be a necessary prerequisite to trademark liability. Courts that have relied on Boston Hockey should abandon this precedent. The continued application of the "triggering a sale" standard could silence some expressive and commercial uses that should be protected by a safe harbor.

The notion that all unauthorized uses may be silenced has led some overzealous trademark owners to use litigation or the threat of litigation to silence critical commentary. Proof of even a small amount of confusion can result in trademark liability. Therefore, a brand owner betting it can prove that even ten percent of consumers are confused about a use has a viable trademark claim.ⁿ¹⁴³ As Eric Goldman noted:

[*1523]

To these companies, trademark law is a cure-all tonic for their marketplace travails, and trademark doctrine is so plastic and amorphous that defendants have some difficulty mounting a proper defense. As a result, all too frequently, the threat of a trademark lawsuit causes the intermediary to capitulate and excise valuable content from the Internet.ⁿ¹⁴⁴

In an overzealous effort to maintain control of the brand narrative, some trademark owners attempt to stop informational uses by consumers. For example, in *Lifestyle Lift Holding, Inc. v. Real Self, Inc.*,ⁿ¹⁴⁵ a cosmetic and plastic surgery clinic sued a website providing a forum for doctors and patients to comment on cosmetic treatments.ⁿ¹⁴⁶ The RealSelf website contained consumer reviews, many of which were highly critical of LifeStyle Lift.ⁿ¹⁴⁷ Lifestyle Lift claimed that by hosting reviews that mentioned its name, RealSelf created confusion about whether the two companies were affiliated.ⁿ¹⁴⁸ The complaint alleged claims for trademark infringement, false designation of origin [*1524] and unfair competition.ⁿ¹⁴⁹ RealSelf denied liability and asserted that Lifestyle Lift had littered its website with fake positive reviews.ⁿ¹⁵⁰ RealSelf counterclaimed for breach of its terms of service contract and asserted false advertising and unfair competition claims. Soon after the initial pleadings were filed, the case settled, and Lifestyle Lift's litigation strategy backfired.ⁿ¹⁵¹ Media reports indicated that Lifestyle Lift had, in fact, "ordered employees to pretend they were satisfied customers and write glowing reviews of its face-lift procedure on Web sites One e-mail message ... told employees to 'devote the day to doing more postings on the Web as a satisfied client.' " ⁿ¹⁵² Soon after the New York Attorney General began investigating the fake reviews, Lifestyle Lift agreed to pay \$ 300,000 in penalties to the state.ⁿ¹⁵³

Although the informational use of marks by consumers has become a reality of the Internet marketplace, its place in

trademark law is still not adequately protected. Trademark bullying may be deterred when litigation strategies like this one fail to take down truthful information. However, no opinion was issued in the case and brand owners may question whether Lifestyle Lift's strategy would succeed if one does not post fake reviews. Sites that host consumer reviews may have rational concerns about whether fighting such litigation would be worth the cost of hiring attorneys to appear in federal court. Many commentators assert that such informational uses, sometimes referred to as nominative fair use, are beyond the scope of a trademark owner's reach.ⁿ¹⁵⁴ Unfortunately, not all jurisdictions have adopted this defense. A well-defined safe harbor for genuine consumer commentary would substantially improve trademark doctrine.

Another trademark principle worth re-examining is the duty to police unauthorized brand uses. As one judge bluntly stated, "trademark law requires that the trademark owner police the quality of the goods to which the mark is applied, on pain of losing [*1525] the mark entirely."ⁿ¹⁵⁵ This bold assertion cannot be supported empirically. Not every unauthorized use must be stopped to avoid such dire consequences.ⁿ¹⁵⁶ "The owner of a mark is not required to constantly monitor every nook and cranny of the entire nation and to fire both barrels of his shotgun instantly upon spotting a possible infringer."ⁿ¹⁵⁷ However, failure to police can weaken a brand. Many third-party uses on other goods and services of varying quality may lessen a brand's distinctiveness and dilute its meaning. As the unauthorized use of brands on the Internet increases, keeping a mark distinctive and strong can become a daunting and expensive task. So how much policing is enough? What this duty means in the context of social media is an evolving question that has created much practical uncertainty.

For example, after years of permitting iPod giveaways, Apple, Inc. recently attempted to reassert control over the unauthorized use of its brands.ⁿ¹⁵⁸ Should Apple be able to use trademark law to stop a fitness center from offering new members the chance to win an iPod? The fitness center is using Apple's brand for the commercial benefit of attracting new paying members. Under the Boston Hockey trademark liability standard, if the use triggers a membership sale, it could result in trademark liability even if new members would not be confused about whether the fitness classes are offered by Apple. Requiring Apple to sue over all such uses that result in a commercial benefit would result in a huge drain on the company's resources. Imposing a duty to police in this circumstance is wholly unjustified. It creates doctrinal cover for trademark bullying even if the act at issue poses no risk that the third-party use will be evidence of abandonment or even a loss of the mark's distinctiveness and strength.ⁿ¹⁵⁹ The ubiquity of such innocuous use raises important questions about whether new norms have created the necessity of re- [*1526] examining trademark law's duty to police.ⁿ¹⁶⁰ Assuming no deception occurred, the consumer investment model supports a safe harbor for such uses. Because the public's investment of resources and meaning fueled the popularity of Apple's brand, consumers should have the right to use the brand name to describe the contest prize even if the informational use may lead to a commercial benefit for another business.

Another principle of trademark law, the first sale doctrine, may provide the fitness center with a defense. Someone who buys a branded product may sell it or give it away, and the reseller may advertise that he sells a branded product or service without getting a license.ⁿ¹⁶¹ However, the reseller must be cautious not to confuse consumers into thinking they are an authorized dealer or are connected with the brand owner.ⁿ¹⁶² If confusion about source, sponsorship or affiliation may result, the reseller risks liability for trademark infringement or false advertising.ⁿ¹⁶³ The consumer investment model would support liability if the fitness center engages in false advertising or conduct that could lead to confusion about whether it is affiliated with Apple. If the fitness center unfairly deceives or confuses consumers (perhaps by offering counterfeit iPods or used iPods claimed to be new), then the consumer investment model would support liability. In such situations, Apple's interest aligns with the public interest. When consumers are deceived about the source or quality of a brand, their informational investment is harmed in much the same way that the brand owner's interests are harmed. However, if a use is primarily informational and no confusion is likely, the investment consumers put into making the mark famous requires tolerance of such unauthorized use. Because the fame of Apple's brands was built in partnership with enthusiastic consumers, it is not surprising that consumers and businesses would want to celebrate the brand by offering an iPod as a contest prize.

Courts will be repeatedly confronted with litigants testing the boundaries of trademark law in social media. If all commercial benefits cannot be controlled by the brand owner, where are courts to draw the line? Another issue to be

tested is when informational and [*1527] expressive uses justify toleration of some conduct that would normally support trademark liability. The Supreme Court has recognized that some consumer confusion may be tolerated in order to preserve the ability to use descriptive words, even if one company asserts trademark rights in them.ⁿ¹⁶⁴ The consumer investment model provides a theoretical foundation for arguing that if consumer interests are taken into account as part of the trademark policy balance, some confusion may be tolerated in order to preserve Internet functionality and other informational interests.

Some recent authority suggests that courts may be willing to adjust trademark doctrine in this way. For example, the dispute in *Tiffany (NJ) Inc. v. eBay Inc.*ⁿ¹⁶⁵ resulted from eBay's efforts to profit from sales of genuine Tiffany products available on its site despite its knowledge that many members of the eBay community were trying to sell counterfeit Tiffany items.ⁿ¹⁶⁶ The court found that eBay's informational use of Tiffany's mark on its website and as a sponsored link (through advertisements it bought from several search engines) was not a sufficient basis to impose trademark liability.ⁿ¹⁶⁷ The U.S. Court of Appeals for the Second Circuit decided it "need not address the viability of the [nominative fair use] doctrine,"ⁿ¹⁶⁸ yet applied the doctrine's two basic principles in stating

that eBay's use of Tiffany's mark on its website and in sponsored links was lawful. eBay used the Tiffany mark to describe accurately the genuine Tiffany goods offered for sale on its website. And none of eBay's uses of the mark suggested that Tiffany was affiliated itself with eBay or endorsed the sale of its products through eBay's website.ⁿ¹⁶⁹

The auction site's efforts to avoid the sale of counterfeits helped absolve it from vicarious liability. Only the false advertising claim was remanded for additional fact finding. This case reflects a doctrinal approach that is worlds away from the simplistic Boston Hockey view. Under that standard, eBay would have lost because its use of the Tiffany mark triggered commercial benefits for eBay. The Second Circuit's more thoughtful approach inquired into consumer [*1528] perceptions and balanced informational interests before concluding that eBay's conduct did not support liability. This analysis is flexible enough to be consistent with modern advertising practices in social media. The consumer investment model supports the Second Circuit's approach. Some unauthorized uses - even for commercial purposes - might escape liability if a small measure of consumer confusion is outweighed by another overriding consumer interest.

Conclusion

Social media have shifted the trademark balance of power. Brands were once used to tell a set story to a passive audience. All that has changed. In social media, the brand owner no longer has exclusive control. The audience participates in shaping the brand narrative. Both consumers and businesses contribute to these stories by using the brands of others for an array of informational, expressive and commercial purposes. Critical consumer speech can force a mark owner to change product or service features or abandon a brand entirely. Social media have also empowered people to use the brands of others as props in their own narratives. On individual online profiles, the brands of our schools, employers and favorite products and services have become ubiquitous in defining our reputations. Social media also provide consumers with easily accessible opportunities to use brands for favorite products and services as ties in social networking. This increased use of brands is made possible by open Internet architecture, social media platforms and, most importantly, loosening the reins of brand owner control.

Corporate America is also embracing this trend, adopting new advertising norms for social media. Many brand owners are encouraging consumers to use social media to participate in the brand narrative. In building a broader community around their brand, they are also relying on marks belonging to others such as brands for social media, charitable organizations or products that may be used as a contest prize. These new norms have required corporate brand owners to loosen their tight grip on brand control. This changed balance of power creates new risks. Consumers may steer a mark away from a planned marketing path or take it down altogether.

Welcoming consumers to participate in developing the story of a brand has its benefits. Social media give brand owners an open window into the world of consumer perceptions and a platform to respond. Rather than serving as a prop in a story experienced by a silent audience, the brand becomes a tie in a social network where brand owners can connect with the public. In this way, brands that [*1529] once offered the impression of a community can now create an authentic community with meaningful reciprocal communications. This new landscape may benefit the brand owner's bottom line. Patrons who believe that brand owners are listening, reflecting and responding to consumer feedback may deepen their allegiance.

Trademark doctrine was not based on a foundation that can easily accommodate these new norms. Rather, it was founded on the idea that the owner controls the story about the quality of goods or services associated with a brand. For trademark doctrine to evolve with advances in communication technology, the consumer investment model is a necessary doctrinal addition. It will give courts a mechanism to balance consumer informational interests, bringing public concerns back into trademark law. Keeping consumer interests as a balancing force in trademark doctrine has become of greater importance since new advertising norms have given consumer voices much more deference.

To practically achieve this goal of bringing public interests back into trademark doctrine, courts and legislatures could begin with the following changes to trademark law. First, the outdated and simplistic Boston Hockey standard should be expressly overruled. Not every unauthorized use of a trademark that triggers a sale should be the basis of trademark liability. Second, a clear statutory safe harbor should be created for nominative fair use. Third, the malleable likelihood of confusion standard should not be available to silence consumer commentary. In *Lifestyle Lift*, the plaintiff posted fake reviews on the defendant's website and then tried to use trademark litigation to silence genuine ones. Consumer interests will be much better protected if trademark law is available to sanction false and deceptive speech without shutting down stages for sharing genuine critical opinions. Calibrating the appropriate balance will not be easy. As illustrated in *Tiffany*, the Internet business that does not create deceptive content - but may inadvertently host it - should not be held responsible. In order for truthful consumer information to be available, a clear exclusion from liability should be applied when an Internet-based seller has made significant efforts to keep deceptive information contributed by others off its site.ⁿ¹⁷⁰ Liability should be [*1530] available against the person who posted the content, but not against the Internet service hosting it, especially if it did what it could to take down content that it had reason to know was deceptive. Adopting these doctrinal bright lines would go far in keeping the Internet open for meaningful consumer discussion using the branded symbols that, thanks to social media, create so many ties in today's social networks.

n76. Facebook Pages Terms, Facebook (last revised Feb. 29, 2012), http://www.facebook.com/terms_pages.php ("Any user may create a Page; however, only an authorized representative of the subject matter may administer the Page. Pages with names consisting solely of generic or descriptive terms will have their administrative rights removed.").

n77. Boycott BP, Facebook, <http://www.facebook.com/pages/Boycott-BP/119101198107726> (last visited May 6, 2011).

n78. Fournier & Avery, *supra* note 33, at 198.

n79. *Id.* at 194.

n80. Gerhardt, *supra* note 15, at 500 n.2.

n81. Fournier & Avery, *supra* note 33, at 206 ("We've moved from a world where the brand set the agenda, to a world where consumers decide if - and when - brands are invited in Our brand assets are mercurial; they are slipping from our grasp.").

n82. See Yan, *supra* note 34, at 690 ("Organizations must consider their contact with audiences along the lines of the operator answering the telephone or the flight attendant seeing to the passenger."); Natasha Singer, *On Campus, It's One Big Commercial*, N.Y. Times, Sept. 11, 2011, at B1 ("The real change on campus is that companies are marketing through students, not to them Traditional marketing techniques - like national advertising campaigns on MTV or in Rolling Stone - don't resonate with college students the way they used to, says Matt Britton, chief executive of Mr. Youth, a marketing agency in Manhattan.").

n83. Fournier and Avery's article takes this argument quite far by calling the new trend "open source" branding. Fournier & Avery, *supra* note 33, at 194. However, in true open source models, the subject of the collaborative effort is offered to the public at no cost. See The Open Source Definition, Open Source Initiative, www.opensource.org (last visited May 6, 2012). Because the brand owners still charge handsomely for their branded products, the metaphor is not yet an exact fit.

n84. See *infra* notes 104-06.

n85. Copyright control is also at issue. YouTube creates all sorts of community connections through video clip commentary. Even the conservative publishing industry is dipping its toe in social networking and letting go just a bit of control over its copyrighted content. The Barnes & Noble Nook e-Reader permits a book to be loaned for a couple of weeks. David Pogue, *Moving Forward in E-Readers*, N.Y. Times, June 9, 2011, at B1.

LEXISNEXIS SUMMARY:

... Sullivan, I show that First Amendment law that grants corporations speech rights also demands room for robust speech about corporate citizens as public figures. ... The public, political debates by and about corporations, the nature of manufacturing, and the effect of purchasing decisions indicate that corporations may qualify as public figures or be part of a discussion of public concern more often than one might expect. ... Gertz Citizens United, the entity, as possible public figure Entity Person Corporation Public or Private Private Private Prominence in Society Yes Yes Thrust to forefront for No Yes particular controversy in order to influence the resolution of the issues involved Significantly greater access to No Yes media General Public Figure No No Limited Public Figure No Yes It is the use of speech rights that matters. ... First, plaintiffs often bring state dilution claims as part of their lawsuits, but the Act does not reach state dilution laws and trademark infringement claims. ... If so, Nike was making a statement about its products, not general labor issues, and one could limit Nike's commercial speech and factual statements while still allowing Nike to speak about general politics. ... Consumers may wish to take up causes and go after corporations in court, but regulations allowing consumers to police corporate speech are few and suspect under the Court's views on restricting corporate speech. ... Corporations may use reputation laws to thwart speech about corporations.

TEXT:

[*456]

INTRODUCTION

Corporations no longer exist in a purely commercial world. Corporate policies intersect with and shape a host of political issues, from fair trade to gay rights to organic farming to children's development to gender bias to labor and

more. Thus Google urges countries to embrace gay rights; Mattel launches a girl power campaign; activists question Nike's labor practices, McDonald's food processing, and Shell Oil's business practices; and bloggers police the Body Shop's claims about its manufacturing practices.ⁿ¹ The social, political, and commercial have converged, and corporate reputations rest on social and political matters as much as, if not more than, commercial matters.

The proposition that corporations are people for First Amendment purposes reveals that, if so, corporations are often public figures.ⁿ² Like other public figures, corporations affect public affairs, take political positions, engage in matters of public concern and controversy, and have reputations. A foundational commitment of free speech law, perhaps the foundational commitment, is that public figures don't and can't own their reputations. Yet through trademark and commercial speech doctrines, corporations have powerful control over their reputations. [*457] If corporations are people for free speech purposes, as a constitutional matter, their control over their reputations can be no greater than the control other public figures have. Recognizing corporations as public figures has broad implications for defamation, libel, trademark, and other corporate reputation-protection doctrines. These shifts achieve symmetry in the law and ensure that speech rights are properly balanced. Corporations cannot have it both ways. Corporations want and receive many of the same legal rights as natural persons. They should be subject to the same limits as other powerful, public figures.

Part I of this Article establishes the nature of corporate citizenry and speech. Although *Citizens United v. Federal Election Commission*ⁿ³ is well-known as it relates to federal election law and super PACs, its statements regarding the nature of corporations as persons and the scope of corporate speech rights are equally, and perhaps more, important. Part I focuses on the contours of First Amendment law and corporate speech as they intersect to treat corporations as members of society engaging in politics. I argue that economic decisions by corporations and consumers have become influential to many political decisions, and may be political decisions themselves, such that corporations of almost any size engage in politics. Combining the logics of *Citizens United* and *New York Times Co. v. Sullivan*,ⁿ⁴ I show that First Amendment law that grants corporations speech rights also demands room for robust speech about corporate citizens as public figures.

Despite First Amendment jurisprudence and the public-figure nature of corporations, certain laws squash critical speech about corporations. Part II demonstrates how these laws shield the reputations of public-figure corporations. First Amendment jurisprudence makes decentralized authority a virtue.ⁿ⁵ This tenet prefers a wide range of information sources and debate to help society question those in power and as a vital element of the political process. That is part of why reputation-protection doctrines meet constitutional challenges: such doctrines erect barriers to questioning public officials and figures.ⁿ⁶ Nonetheless, commercial speech and trademark doctrines limit information from many sources and protect reputations.ⁿ⁷ [*458] The very premise that commercial matters, and by extension trademark law, are not political reveals the flaw. Once deemed a matter of commercial speech, constitutional scrutiny is lower.ⁿ⁸ Currently, limits on the way people comment on and criticize corporations are allowed because of the mistaken belief that politics are not in play. A corporate public figure is, however, political. Just as we would not limit the ability to question and identify human public figures for speech, we should not do so for corporate public figures. But that is what the law enables.

For example, the factors that permit a corporation to bring a dilution claim - national fame and being a household name - track that "rare" creature in First Amendment law, the general-purpose public figure.ⁿ⁹ Dilution law, however, shields the reputation of the nationally famous corporation. Thus, a nationally famous corporate person is treated differently than its natural-person counterpart and may use that fame to quash speech rather than having that fame open the door to more speech about it. This result is at least perverse, and I argue it is unconstitutional.

Trademark law's confusion doctrine also favors a corporation's speech about the corporation over other speech. Trademark law's approach to reputation protection follows an overstated, narrow view that almost all speech not from the corporation leads to reputational harm and consumer confusion.ⁿ¹⁰ When considered misleading commercial speech, critical commentary involving trademarks is easily banned because such speech receives less First Amendment protection than noncommercial speech. Under this view, speech not from the corporation is misleading and must be

eliminated in the name of protecting consumers from any confusion, even if consumers are the ones trying to share information about the corporation [*459] or its products and services.ⁿ¹¹ Instead of many voices questioning corporate public figures, society ends up with an impoverished ability to discuss and challenge them.

Given increased ability for speech by corporations, we need to rebalance speech rules and increase our ability to speak about corporations. I conclude that the logic of the Supreme Court's jurisprudence regarding corporate speech and public figures requires that the law recognize a corporate public figure doctrine. In Part III I set out what a corporate public figure doctrine would look like in practice. I show that corporations can often qualify as either general-or limited-purpose public figures and address the implications of such a result.

The powerful, public, and political nature of corporations demands that we ensure an increased ability to speak about them. An ever-widening range of sources - newspapers, radio, television, blogs, ratings sites, social media reviews, and more - offers society numerous ways to understand and debate any issue. Corporations vigorously use those resources to speak and persuade society about corporate goods and services, political candidates, and social policies, and the Supreme Court has ensured that they may do so. Yet laws protecting corporate reputation interfere with anyone else's ability to speak about those same corporations. A corporate public figure doctrine would allow increased speech about the corporation, provide more information to both the political-and the consumer-information marketplace, and reorder speech laws so that corporations have speech rights and obligations in balance with natural persons.

I. SPEECH BY A CORPORATION: FROM CORPORATE PERSONHOOD TO CORPORATE CITIZENRY

Citizens United provides a clear statement that, as far as speech is concerned, the law affords corporations much the same rights as people.ⁿ¹² An underlying, driving force in the [*460] analysis is that corporations are members of society that participate in our democracy.ⁿ¹³ This vision embraces the corporation as engaging in public life, acting for political ends, and having a reputation. If corporations seek to be recognized as participants in society with commensurate speech rights, they are claiming a type of citizenship, which we must understand. It turns out that the nature of these citizens indicates they are often public figures.

A. Corporate Speakers

The Supreme Court has taken the broad approach that almost any corporation has speech rights in the eyes of the law. A close reading of Citizens United reveals that the Supreme Court believes that corporations have the same speech rights as natural people.ⁿ¹⁴ Given that the case was about a narrow question concerning what constitutes "electioneering communication,"ⁿ¹⁵ and ostensibly was to resolve some incoherence in campaign finance jurisprudence,ⁿ¹⁶ it is odd that the Court went to great lengths to discuss the First Amendment rights of corporations and the idea that corporations have the same speech rights as people. Why the Court chose to reach beyond the narrow election law issue and whether that was the correct approach are good questions but are better explored by others.ⁿ¹⁷ Here, examining how the Court reached its conclusion about corporate speech reveals the Court's unwillingness to draw distinctions not only between corporations and people but also among types of corporations.

None of the several possible objections to this result worked for the Court. One could argue that corporations simply do not have speech rights. Yet, as Justice Kennedy's opinion [*461] pointed out, "the Court has recognized that First Amendment protection extends to corporations," and in political speech cases that protection persists.ⁿ¹⁸ One could argue that corporations are not really part of political debates the same way people are. To rebuff that position, the Court painted a picture of corporations as "contributing to the "discussion, debate, and the dissemination of information and ideas" that the First Amendment seeks to foster."ⁿ¹⁹

For the Court, when it comes to speech, all corporations are equal and can be important in the public sphere. The word corporation evokes images of large, profit-maximizing entities with hundreds, if not thousands, of employees, worth millions, if not billions, of dollars. Yet, a contention that only certain corporations are important enough to have

speech rights fails. As Justice Scalia explained, the corporate form encompasses many entities including "colleges, towns and cities, religious institutions, and guilds." ⁿ²⁰ As with large, for-profit corporations, one can appreciate the importance and role of these institutions in society. Large or small, for-profit or non-profit, type of industry - none of these metrics matter. After all, the corporation at issue, Citizens United, was a small, non-profit corporation with "an annual budget of about \$ 12 million." ⁿ²¹ Its income was based on individual and some corporate donations. ⁿ²² It was quite different than even number 500 on the Fortune 500, ⁿ²³ which had a market capitalization of around \$ 2.8 billion and \$ 283 million in profits in one year alone. ⁿ²⁴ Nonetheless, Citizens United was characterized like so many "corporations and voluntary associations [that] actively petitioned the Government and expressed their views in newspapers and pamphlets" since the beginning of our country. ⁿ²⁵ That such a small entity does not map to the possibly august stature and power of more familiar entities is [*462] irrelevant. Just as the Court explained that "the identity of the speaker is not decisive in determining whether speech is protected," ⁿ²⁶ it layered in an idea that the type of corporation does not matter. By conflating all corporations as being equal, one can declare, "To exclude or impede corporate speech is to muzzle the principal agents of the modern free economy. We should celebrate rather than condemn the addition of this speech to the public debate." ⁿ²⁷ A small, political corporation is the same as Apple, Exxon, Microsoft, IBM, Chevron, GE, Google, and Wal-Mart. All corporations are now equally "the principal agents of the modern free economy." ⁿ²⁸ Thus we have a picture of all corporations as having the same speech rights as natural persons. We also start to see corporations as participants in public debate and vital parts of our political and economic life, which is a step toward recognizing the possible public-figure nature of corporations.

B. Corporations Speak About Matters of Public Importance

Citizens United and New York Times Co. v. Sullivan asked the same question: what are the limits when someone, corporate or otherwise, speaks about a public figure? ⁿ²⁹ The principles offered in Citizens United trace back in part to Sullivan. On the surface, Sullivan involved quite a different matter than Citizens United. Sullivan addressed "the extent to which the constitutional protections for speech and press limit a State's power to award damages in a libel action brought by a public official against critics of his official conduct." ⁿ³⁰ Citizens United addressed speech by a corporate entity in an election context. ⁿ³¹ But both cases address corporate speech about a public figure. As this chart shows, the factual parallels between Citizens United and Sullivan are striking.

[*463]

	Citizens United ⁿ³²	Sullivan ⁿ³³
Entity	Activist political entity (non-profit)	Press (for-profit); activist political entity (non-profit)
Purpose	Advocate defeat of candidate	Highlight racial injustice/ raise money
Object of Speech	Candidate for office	Public official
Accuracy of Speech	"Extended criticism The narrative may contain more suggestions and arguments than facts" ⁿ³⁴	"It is uncontroverted that some of the statements contained in the paragraphs were not accurate descriptions of events which occurred in Montgomery." ⁿ³⁵
Medium	Pre-paid video on demand:	Newspaper advertisement

"The movie, in essence, is a
feature-length negative
advertisement that urges
viewers to vote against
Senator Clinton for
President." ⁿ³⁶

[*464] Both cases engage with questions regarding the truth of speech about public figures, the importance of speech about public matters, whether the medium of speech matters, and whether the identity of the speaker allows for limits on speech. Both entities addressed a political matter, called out behaviors by public figures, stretched the truth, were inaccurate in some instances, and used a paid form of mass communication to reach an audience. And, both cases favored more speech and less protection for laws shielding the reputation of a public figure.

As a constitutional matter, the ability to criticize public officials trumps reputation protection and is to be fostered; ⁿ³⁷ the medium of the message does not matter. The medium in *Sullivan* was a paid commercial advertisement in *The New York Times*. When urged that the speech was not protected because of the medium used, the Court ignored the medium and looked to its content, which "communicated information, expressed opinion, recited grievances, protested claimed abuses, and sought financial support on behalf of a movement whose existence and objectives are matters of the highest public interest and concern." ⁿ³⁸ In addition, the *Sullivan* Court advanced the idea that not just the press, but anyone should be able to "promulgate ... information and ideas" broadly. ⁿ³⁹ Prohibiting something as creative as buying an advertisement to advance a point of view would "shackle the First Amendment in its attempt to secure "the widest possible dissemination of information from diverse and antagonistic sources."" ⁿ⁴⁰ The Court favors enabling, not hindering, many voices, which can and should use almost any means to reach as many people as possible, especially when those voices are new and challenging.

[*465] Even when criticism lacks accuracy or may be libel per se - that is, words that "tend to injure a person['s] ... reputation" or "bring [him or her] into public contempt" ⁿ⁴¹ - in political matters, laws protecting reputation lose out. ⁿ⁴² The tolerance for speech, even speech that has inaccuracies or that challenges opinions, is high because "public men, are, as it were, public property, and discussion cannot be denied and the right, as well as the duty, of criticism must not be stifled." ⁿ⁴³ As with mediums, the context of the message matters more than the label. ⁿ⁴⁴ When facing a tradeoff between protecting reputation and possibly limiting debate on public issues, the debate "should be uninhibited, robust, and wide-open," even if that exchange "includes vehement, caustic, and sometimes unpleasantly sharp attacks on government and public officials." ⁿ⁴⁵

Combining the logic of *Citizens United* with *Sullivan* allows for some observations. First, the provision of an outlet for expression for those who may not have the same distribution reach as the traditional press is necessary to permit the dissemination of a wide range of ideas and opinions, even, and perhaps especially, those that challenge and "antagonize" us. ⁿ⁴⁶ Second, corporations have broad speech rights. Like natural persons, corporations can use all mediums, including paid advertisements in newspapers and video-on-demand services, to reach the public about matters of public concern. ⁿ⁴⁷ Third, laws that protect the reputation of or limit this ability to speak about public figures are suspect and likely to be ruled unconstitutional. ⁿ⁴⁸ Fourth, thus far in the analysis, corporations are the speakers. The result is an explicit goal to expand commentary [*466] on public affairs, including commentary by corporations. ⁿ⁴⁹ If corporations can speak freely about public figures, corporations, just like natural people, may become public figures because of their speech and position in society.

C. The Politics of Products and Processes

Corporations have gained speech rights, and the exercise of those rights leads to obligations and limits on those rights. The same politics and logic of privatization that have moved corporations to being at perhaps an apex of importance in

our society and politics demands that society have a greater ability to question and probe corporations. Corporations touch vast areas of individual and political life. As Justice Scalia has said, corporations are "the principal agents of the modern free economy."ⁿ⁵⁰ How individuals engage with the modern free economy can also affect the politics of that economy, either indirectly or through express political acts.ⁿ⁵¹ This dynamic reveals a problem. Private market behaviors are supposed to "serve [an] expansive evaluative function," but "consumers [must] receive an informational context that is appropriately robust for the role they are being asked to serve."ⁿ⁵² The Supreme Court has said that we need to have an "unfettered interchange of ideas for the bringing about of political and social changes desired by the people."ⁿ⁵³ It thus has championed many voices speaking about public figures. That same reasoning applies when corporations and their goods or services are where that political activity takes place. When the Court acknowledged that consumer interest "in the free flow of commercial information ... may be as keen, if not keener by far, than his interest in the day's most urgent political debate,"ⁿ⁵⁴ it seemed to separate commercial and [*467] political information when in fact it captured the importance of commercial information as political and connected to public decision making.ⁿ⁵⁵ Such information allows people to know "who is producing and selling what product, for what reason, and at what price."ⁿ⁵⁶ The public interest at stake is enabling well-informed decision making, based not only on price but on the who and the why of production, so that "intelligent opinions as to how that system ought to be regulated or altered" are possible.ⁿ⁵⁷ The Court connected commercial information to political matters and how we order society.ⁿ⁵⁸ Thus, I argue that the distinction between commercial and political has collapsed so much that the need to ensure a high flow of information about corporations and their goods and services is great, regardless of the label on such information. Furthermore, just as distinctions between public figures and public officials make no sense, as policy is no longer set through "formal political institutions" but through "a complex array of boards, committees, commissions, corporations, and associations, some only loosely connected with the Government,"ⁿ⁵⁹ so too for corporations.ⁿ⁶⁰ Distinctions between human public figures and corporate public figures make no sense. Recognizing corporations as public figures increases safeguards that ensure information about these important actors will be available to society.

The public, political debates by and about corporations, the nature of manufacturing, and the effect of purchasing decisions indicate that corporations may qualify as public figures or be part of a discussion of public concern more often than one might expect.ⁿ⁶¹ If so, rules that impose liability or damages without fault are not allowed by the Constitution.ⁿ⁶² A possible objection to corporations being treated as public figures is that they are private and their work is not about matters of public [*468] concern.ⁿ⁶³ And yet from *Citizens United*, one has a vision of corporations as often fully engaged in public debate with "voices that best represent the most significant segments of the economy."ⁿ⁶⁴ Objections that corporations are private miss the point. Private, natural people may become public figures. Any person who is a public official involved with public affairs "runs the risk of closer public scrutiny than might otherwise be the case," and a private figure may be a public figure subject to similar scrutiny.ⁿ⁶⁵ In *Gertz v. Robert Welch, Inc.*, the seminal case regarding a private individual - that is, someone not elected or appointed to public office - being deemed a public figure, the Supreme Court set out the key question: one must examine whether the person "voluntarily injects himself or is drawn into a particular public controversy and thereby becomes a public figure for a limited range of issues."ⁿ⁶⁶ The Court's description of the characteristics and ways in which someone becomes a public figure shows why some corporations are likely to be seen as public figures:

For the most part those who attain [public figure] status have assumed roles of especial prominence in the affairs of society. Some occupy positions of such persuasive power and influence that they are deemed public figures for all purposes. More commonly, those classed as public figures have thrust themselves to the forefront of particular public controversies in order to influence the resolution of the issues involved. In either event, they invite attention and comment.ⁿ⁶⁷

This description of general-purpose public figures seems to foreshadow Justice Scalia's proclamation about the general importance of corporations almost forty years later.

Furthermore, corporations can distribute their messages in ways that matter for constitutional analysis. In *Gertz*, the Court relied on public figures' "significantly greater access to the channels of effective communication and hence ... more realistic opportunity to counteract false statements than private [*469] individuals normally enjoy" to support the idea that public figures must be subject to more, not less, speech about them.ⁿ⁶⁸ Corporations often have access and resources to counteract any speech about them that may be false or troubling. In *United States v. Alvarez*, the Court recently addressed a regulation of false speech and struck it down in part because four Justices believed that "the dynamics of free speech, of counterspeech, of refutation, can overcome [a] lie."ⁿ⁶⁹ Justice Breyer's concurrence, which Justice Kagan joined, acknowledged the power of more accurate information to "counteract the lie."ⁿ⁷⁰ *Alvarez* saw average citizens' ability to engage in counter-speech as enough power to combat a lie. Given corporations' concentrated wealth, newfound power to create super PACS, and ability to employ sophisticated public relations and communications campaigns either through in-house or hired companies, corporations can rival, if not exceed, the access many human political figures can afford. In other words, corporations can engage in counter-speech as needed and so can meet the counter-speech criteria for being a public figure.ⁿ⁷¹

Connecting *Citizens United* and *Gertz* shows that corporations can be general-purpose public figures easily and, short of that, often can be limited-purpose public figures. This chart helps illustrate the connection.

[*470]

	<i>Gertz</i>	<i>Citizens United</i> , the entity, as possible public figure
Entity	Person	Corporation
Public or Private	Private	Private
Prominence in Society	Yes	Yes
Thrust to forefront for particular controversy in order to influence the resolution of the issues involved	No	Yes
Significantly greater access to media	No	Yes
General Public Figure	No	No
Limited Public Figure	No	Yes

It is the use of speech rights that matters. In expanding corporate speech rights, the Supreme Court has not differentiated between national and smaller, unknown corporations.ⁿ⁷² Just as with natural persons, all corporations may speak. And just as with natural persons, a corporate speaker who is not a general-purpose public figure may become a limited public figure through its participation in society and exercise of speech rights.ⁿ⁷³ For example, *Citizens United* was not a public figure in general;ⁿ⁷⁴ it would, however, have met the limited-purpose public figure criteria. *Citizens United* certainly "thrust [itself] to the forefront of particular public controversies in order to influence the resolution of the issues involved."ⁿ⁷⁵ *Citizens United*, the corporate person, used its resources to "enjoy significantly [*471] greater access to the channels of effective communication"ⁿ⁷⁶ as it partnered with cable services to offer an expensive video-on-demand (VOD) version of its communication.ⁿ⁷⁷ Any corporation can engage in similar behaviors. As such, one can see that corporations can often become limited public figures.

In addition, the Court addressed whether a corporation's ability to influence the resolution of an issue could be restricted in *Sorrell v. IMS Health Inc.*ⁿ⁷⁸ There the Court further cemented a corporation's ability to speak and influence matters, as it protected corporate speech even if its marketing was more persuasive than other speech.ⁿ⁷⁹

Corporations use their greater resources to speak and persuade, and the Supreme Court blesses such activity just as it would for individuals. That many corporations may behave as and qualify as public figures, especially when they choose to speak, seems clear. But when someone speaks about corporate public figures, the question of when a corporation or its practices are the subject of public concern arises.

The way society makes and uses goods can influence the global marketplaceⁿ⁸⁰ and has political implications.ⁿ⁸¹ That is why we need to be able to speak about corporations as much as corporations are allowed to speak about whatever they wish to speak. What we buy, what we use, how we make, and how we use have moved beyond pure, personal cost evaluations.ⁿ⁸² Today the idea that purchasing choices are "purely private concerns"ⁿ⁸³ is less clear and often inaccurate. Even when a corporation [*472] is not the direct, obvious provider of a governmental service, the move toward making markets a key way in which we organize society blurs, if not eliminates, the line between the public and private nature of corporations. Corporations are major political and economic actors. Consumers are voting for policy through the market and "may well come to view such preferences as their most appropriate mechanism for influencing the policies and conditions of a globalized world."ⁿ⁸⁴ Not all corporations will qualify as public figures, and not all business processes will qualify as public concerns. Matters of purely private concern will remain subject to less speech protection.ⁿ⁸⁵ Yet, consider questions about diamond-mining practices, child labor issues, oil drilling methods, food-production methods' effect on health, and corporate outsourcing policies.ⁿ⁸⁶ Corporations' role in these matters is precisely why Justice Scalia was correct in his assessment about the importance of corporations in society.ⁿ⁸⁷ Furthermore, corporations often embrace environmental, organic, fair-trade, fair-labor, or other positions as part of their overall image as corporate citizens.ⁿ⁸⁸ They also lobby on all manner of regulatory matters related to the way they conduct their respective businesses. These issues are of public concern.ⁿ⁸⁹

Given consumer activism and the greater ability to share information about a good and whether to purchase it, corporations and consumers face increased claims about whether exercising a purchasing choice is wise or good from a political point of view. For example, the locavore movement focuses on eating food grown within 100 miles of where one lives.ⁿ⁹⁰ It also tries to [*473] reduce fossil fuel use in growing and delivering food.ⁿ⁹¹ The movement is connected to sustainability goals and issues, but some debate the movement's effectiveness for environmental goals.ⁿ⁹² Regardless, the shift has changed the way people and companies such as Google approach buying and consuming food.ⁿ⁹³ Even the paper-or-plastic question of fifteen years ago is not as simple today. Some consumers may believe that paper is better than plastic for the environment but face evidence that one is merely choosing between two products that are harmful to the environment.ⁿ⁹⁴ The potential options don't stop there. What about biodegradable plastic bags?ⁿ⁹⁵ Perhaps compostable bags are the best choice? Some believe that bring-your-own-bag (BYOB), i.e., using a reusable bag, is the best environmental choice.ⁿ⁹⁶ Cities, counties, and even states may pass laws banning certain materials or levying a charge for use of one material over another.ⁿ⁹⁷ Companies making the bags lobby about what is the correct choice. Companies, such as Whole Foods, may choose one option before a law is passed to signal a commitment [*474] to a political ideal.ⁿ⁹⁸ News outlets report on the matter,ⁿ⁹⁹ as do online sources.ⁿ¹⁰⁰ Some statements challenge beliefs and claims about bags.ⁿ¹⁰¹ Food production and recycling are but two areas where commerce, corporations, and politics intersect. For example, energy, health care, "Made in the U.S.A," birther claims, and marriage equality have all been part of public battles where activists across the political spectrum have urged consumers to vote with their dollars.ⁿ¹⁰²

The jurisprudence that demands increased corporate speech rights also mandates increasing the ability to speak about corporations when they exercise those rights. Several doctrines, however, limit speech about corporations and act as reputation shields. In essence, when the corporation, rather [*475] than a natural person, is the subject of speech, it is allowed to save face, which it should not be allowed to do.

II. SPEECH ABOUT THE CORPORATION: AGAINST SAVING CORPORATE FACE

A cluster of laws and doctrines protects corporate reputation despite the constitutional desire for more speech about public figures. The Lanham Act favors reduced speech about corporations and raises barriers to speech based on the idea that distortion is a harm to be prevented. Part of the problem is that the subject matter of corporate reputational

laws is traditionally understood as a type of commercial speech, which receives less protection than other speech.ⁿ¹⁰³ That position underestimates the way in which these laws also act as reputation-protection laws. For example, trademarks have moved far beyond the commercial sphere. Trademarks have become brands; that is, they now are more about allowing corporations to protect reputation and persona than preventing unfair competition and advancing consumer protection.ⁿ¹⁰⁴ Precisely because trademarks have become reputation devices, trademark law runs into constitutional speech problems.ⁿ¹⁰⁵ In fact, corporate reputation doctrines reach conclusions that run contrary to the Supreme Court's speech jurisprudence. We do not question and hamper the ability of a critic to challenge a public figure. We do, however, question and limit the ability to critique a corporate public figure. When choosing between saving corporate face and the right to speak about a corporation or its goods and services, the right to speak should trump.

[*476]

A. The Nature of Corporate Face

Corporations have a being; it is their brand and all that goes with it. A corporation's word mark is its given name - its logo, its face.ⁿ¹⁰⁶ Google, Mattel, and Rolex can be the names of political figures just as Hillary Clinton, Mitt Romney, and Barack Obama are names of political figures. The bitten apple, interlocked Gs, and golden arches can be the faces of political figures just as pictures of George W. Bush and Bill Clinton capture the faces of political figures.ⁿ¹⁰⁷ Beyond these familiar aspects, corporations see themselves not only as people but as having identities, personalities, and souls personified by their brands.ⁿ¹⁰⁸ Corporations speak of injury to their reputations in much the same way people refer to reputational injuries in libel.ⁿ¹⁰⁹ This self-perception conforms to corporations' claims to greater recognition as people in the speech context and elsewhere. Like a person, corporations seem to assert:

He hath disgraced me, and hindered me half a million; laughed at my losses, mocked at my gains, scorned my nation, thwarted my bargains, cooled my friends, heated mine enemies; and what's his reason? I am a [Corp.].ⁿ¹¹⁰

as they wage campaigns against those who might use their marks and logos to criticize.

[*477] Like Shylock, corporations seek revenge.ⁿ¹¹¹ Like Sullivan, corporations seek to prevent speech about their public roles and acts. Mattel may be the most notorious example of such behaviors. In two cases, Mattel went after uses of Barbie that depicted the icon in ways to which Mattel objected.ⁿ¹¹² The artists commented on Barbie and on society's view of women.ⁿ¹¹³ Although the cases came out in favor of the speech, the defendants spent the equivalent of millions of dollars defending the suits.ⁿ¹¹⁴ Mark holders also try to shut down consumer gripe sites, sites that criticize the corporation behind the mark.ⁿ¹¹⁵ Tactics include sending cease-and-desist letters to "wear down" critics and taking advantage of the "disparity" in legal skills between the corporation and the critic.ⁿ¹¹⁶ Some have called these behaviors [*478] trademark bullying.ⁿ¹¹⁷ In the case of the small artist and Mattel, only pro bono representation made the defense possible.ⁿ¹¹⁸ After an appeal and remand the defendants won an award of "\$ 1,584,089 in attorney's fees and \$ 241,797.09 in costs."ⁿ¹¹⁹ Despite that victory, the overall result is incorrect. The tactics match the ones at issue in Sullivan: "There is no doubt that these Southern officials were hoping to use libel law to curb press coverage of the civil rights movement."ⁿ¹²⁰ The claims in Sullivan totaled \$ 3 million, the claims against the New York Times for other reporting on Birmingham were for another \$ 3.15 million, and the press in general faced close to \$ 300 million in potential libel damages.ⁿ¹²¹ The Court recognized that the suits were chilling speech.ⁿ¹²² By using cease-and-desist letters and strategic lawsuits that, even when decided correctly, impose terrifying costs, mark holders generate the sort of chilling effects First Amendment doctrine seeks to remove.ⁿ¹²³

Like natural people, corporations claim personal rights but do not wish to be subject to appropriate limits on those rights.ⁿ¹²⁴ Rather than having many sources for information about a corporation, a corporation prefers to be the central and only source of information about the corporation and not to be criticized.ⁿ¹²⁵ That ideal, however, runs contrary to

the Supreme [*479] Court's preference for more, not less, speech about public figures.

Once corporate reputation laws enter the picture, an imbalance in corporate speech law emerges. Imagine telling Citizens United, the entity, that it could not speak about then-Senator Clinton or, if allowed to speak, could not in any way mislead or be aggressive in its claims, let alone use then-Senator Clinton's name or face to deliver the political message. Corporate reputation laws open this possibility all too easily when it comes to speaking about the corporation.ⁿ¹²⁶ None of which is to say these laws ignore speech entirely. Rather, they have a narrow view of speech and fail to accommodate it well.

B. Barriers to Speech About Public-Figure Corporations

The traditional lines between commercial and non-commercial speech, between corporation and person, and between private and public are gone.ⁿ¹²⁷ Nonetheless, threats to speech about public-figure corporations persist. For example, trademark law was once separate from constitutional concerns, because trademarks were easily understood as commercial speech. In essence, commercial speech is speech that proposes a commercial transaction.ⁿ¹²⁸ Such speech - if truthful, non-misleading, and about lawful activity - can be regulated as long as the regulation serves a substantial government interest, directly advances that interest, and is no more extensive than necessary to serve that interest.ⁿ¹²⁹ Noncommercial speech, however, "even if false, can only be regulated under much more [*480] limited circumstances."ⁿ¹³⁰ Thirty years ago Robert Denicola asserted, "The information conveyed through the use of a trademark generally relates not to the momentous philosophical or political issues of the day, but rather to the details of prospective commercial transactions - the source or quality of specific goods or services."ⁿ¹³¹ Thus, limits on commercial speech were considered "exempt from constitutional scrutiny."ⁿ¹³² When Denicola wrote about trademarks and speech, he faced unsettled "doctrine and policy" regarding the justifications for trademark protection including a growing turn to a property approach to trademarks, as seen in stronger misappropriation and dilution theories of trademark.ⁿ¹³³ The ideas of corporate speech were nowhere near as developed as today, yet he already saw that "trademark law must ultimately respond to basic constitutional interests."ⁿ¹³⁴ Given expanded trademark protection, expanded corporate speech, and the politics of products and processes, the world of 1982 is gone, and the concerns motivating Denicola thirty years ago have come to fruition.

These concerns have converged and provide corporations with a speech advantage.ⁿ¹³⁵ Today the information conveyed through a trademark often concerns the political issues of the [*481] day, especially when considering source and quality of goods and services.ⁿ¹³⁶ A paradox arises here because of the idea of trademark law as consumer-protection law.ⁿ¹³⁷ In the political realm, the scale tips to more information, even inaccurate information, as the foundation for rich debate and, over time, informed decision making. In the commercial realm, speech is limited, in part because it is not seen as being on par with political speech, and in part to limit information to accurate and true statements that enhance the marketplace and, *arguendo*, consumer welfare.ⁿ¹³⁸ Often the law does not protect untruthful speech, and the First Amendment allows laws that limit speech as a way to "insure that the stream of commercial information flows cleanly as well as freely."ⁿ¹³⁹ In words that seem to echo trademark law's likelihood of confusion test, the Supreme Court has said, "There can be no constitutional objection to the suppression of commercial messages that do not accurately inform the public about lawful activity. The government may ban forms of communication more likely to deceive the public than to inform it."ⁿ¹⁴⁰ Trademark law arguably protects consumers by removing misleading speech and improving information in the marketplace.ⁿ¹⁴¹ A presumption here is that truth in commercial contexts is easier to find and offer than in political [*482] contexts.ⁿ¹⁴² Commerce is also presumed to be apolitical; often it is not. Speech rules from *Citizens United* and *Sorrell* unfetter a corporation's ability to speak about political stances and the politics of their products. The shift allows corporations to use aggressive and pervasive advertising across the full range of media, such as television, radio, the Internet, mobile displays, billboards, infomercials, and print, to achieve their goals. At the same time, a corporation would prefer not to have others use the same means to criticize them. Current laws about corporate criticism play right into this strategy, as they hinder the ability to use speech to question and police corporations.

For example, dilution law explicitly protects corporate reputation; yet, as I argue, a corporation qualifying for

dilution protection is also a public figure, and as such dilution claims are constitutionally prohibited. Dilution protects famous marks.ⁿ¹⁴³ Federal dilution law defines famous marks as marks "widely recognized by the general consuming public of the United States as a designation of source of the goods or services of the mark's owner."ⁿ¹⁴⁴ It is a reputation law that seeks to eliminate "blurring" or "tarnishment" of the mark.ⁿ¹⁴⁵ Uses that may transfer recognition from one realm to another are prohibited unless coming from the mark holder.ⁿ¹⁴⁶ Factors indicating that a mark is famous include amounts spent and areas reached by advertising, how much and where goods and services have been sold, and the extent of actual recognition.ⁿ¹⁴⁷ This language comes from a recent revision, which was designed, in part, to move away from dilution protection for "niche" marks, or locally famous marks, and make dilution protection [*483] only available for national brands that have "household" recognition.ⁿ¹⁴⁸

Perhaps to the surprise of corporations that lobbied for dilution protection, marks meriting dilution protection correspond to general corporate public figures.ⁿ¹⁴⁹ A human is "a general purpose public figure only if he or she is a well-known celebrity, his name a household word... . They are frequently so famous that they may be able to transfer their recognition and influence from one field to another."ⁿ¹⁵⁰ A corporation that qualifies for dilution protection is, like a human general public figure, by definition nationally or "widely" known like a "celebrity," a "household" name, and its recognition and influence - what dilution law calls "fame" - is easily applied to many realms.ⁿ¹⁵¹ Unlike the way the law treats human public figures, dilution law is a shield for the corporate public figure. The essence of a dilution claim is that, unlike confusion-based trademark doctrines, holders of famous marks can sue junior users "regardless of the presence or absence of actual or likely confusion, of competition, or of actual economic injury."ⁿ¹⁵² The classic rationale that regulation of false or misleading speech is allowed evaporates with dilution, for dilution does not require that the speech deceive or confuse consumers and never even asks whether it was false.ⁿ¹⁵³ As part of dilution's reputation-protection structure, an act that may transfer recognition from one realm to another - a criteria that tips toward allowing more speech about a natural person - is prohibited. As Rebecca Tushnet has argued, dilution law enables mark holders "to stabilize [*484] the meaning of a mark," rather than face the "robust competition in the marketplace of ideas" the First Amendment fosters, and it "favors meanings approved by established producers above meanings offered by challengers."ⁿ¹⁵⁴ This image protectionism is exactly the opposite of what First Amendment law requires when a public figure is at stake.

Dilution law fails to accommodate the criticism that should be possible for a public figure. Federal dilution law lists some exemptions for certain types of speech, such as fair use, comparative advertising, and news commentary.ⁿ¹⁵⁵ The exemptions seem to enable commentary this Article seeks to foster, but do not go far enough. First, plaintiffs often bring state dilution claims as part of their lawsuits, but the Act does not reach state dilution laws and trademark infringement claims.ⁿ¹⁵⁶ Second, the exemptions simply do not cover what they should, and analysis ends up asking traditional, fact-intensive trademark law questions, such as whether the use was for the defendant's goods or services or to designate source in a confusing manner, murky issues regarding whether a parody was properly made, and difficult questions of fair use, rather than focusing on the criticism and commentary inquiries needed for speech about public figures.ⁿ¹⁵⁷ In one case the use of Louis Vuitton marks to make and sell a handbag-styled, plush chew toy for a dog was deemed a parody and allowed.ⁿ¹⁵⁸ In contrast, when Hyundai used Louis Vuitton marks in a television advertisement by altering the mark to LZ and placing the altered mark on a basketball that appeared for one second in a thirty-second commercial, the court found that Hyundai had diluted the Louis Vuitton mark.ⁿ¹⁵⁹ Hyundai claimed it was using the mark to comment on the changing meaning of luxury, and the commercial showed ironic images challenging what luxury means, such as "policemen eating caviar in a patrol car; large yachts parked beside modest homes; ... [and] an inner-city basketball game played on a lavish marble court with a gold hoop."ⁿ¹⁶⁰ That did [*485] not matter. Hyundai was not able to meet the fair use exemption, because it was not commenting solely on Louis Vuitton, and there was intent to use the mark.ⁿ¹⁶¹ The inquiry incorrectly focused on intent to misappropriate the mark rather than asking whether the use was to make a false statement about the company - an inquiry that would allow the speech instead of preventing it.ⁿ¹⁶² And, a more general problem appears. As one commentator has put it, the exemptions make the analysis "ambiguous" and thus defeat the goal of increased speech, because the hurdles put us in a world of late case resolution and uncertainty about liabilityⁿ¹⁶³ - the opposite of what we should want if we are to be able to question corporate public figures.

Trademark law encounters further problems as it tries to protect consumers from false and misleading speech. A core understanding of trademark law today is that its purpose is to "facilitate the transmission of accurate information to the market."ⁿ¹⁶⁴ But the source of that transmission is the mark holder.ⁿ¹⁶⁵ Mark holders, not consumers, bring trademark suits.ⁿ¹⁶⁶ The idea is that the mark holder will police its mark, and consumers benefit as a result. In the rare cases where there truly is passing off - using a mark to deceive consumers about what they are buying - trademark law protects consumers,ⁿ¹⁶⁷ and the concerns of this Article are not present. As a constitutional matter, the ideal of protecting consumers by preserving the [*486] quality of information in the marketplace appears sound, but when probed the ideal falls apart.

The current system allows the object of the speech to control the content of that speech, which is a backwards result for public figures. We would not allow Sullivan or Hillary Clinton to dictate whether and how people could comment on them as public figures. Yet, trademark law relies on mark holders to decide when the public should be able to see or hear an opinion about the mark holder. As with the defamation suit at issue in Sullivan, trademark law enables threatening letters and lawsuits that chill speech.ⁿ¹⁶⁸ Trademark enforcement practices, including sending cease-and-desist letters and increasing numbers of "strike suits" designed to force quick settlements, are "standard practice in the face of virtually any use," even legal uses.ⁿ¹⁶⁹ If a case reaches a court, the test applied - the likelihood of confusion test - asks whether the use in question is "likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association" between the plaintiff and defendant or their products.ⁿ¹⁷⁰ The test is, however, quite poor at accommodating speech.ⁿ¹⁷¹ The multifactor test is fact-intensive, requires experts, and is rarely amenable to summary judgment.ⁿ¹⁷² In addition, because trademark law embraces consumers as dullards who are easily confused when purchasing,ⁿ¹⁷³ almost any hint of confusion, even in expression cases, can be found to be an infringing use.ⁿ¹⁷⁴ The Lanham Act is subject to a broad reading, and courts grant injunctions with a small showing or belief that some use of a mark "indicates a trademark owner's mere approval of a defendant's product or service."ⁿ¹⁷⁵ Confusion analysis thus chills speech "regardless of the ultimate outcome."ⁿ¹⁷⁶

[*487] Another speech problem occurs when commercial and noncommercial speech mix. In *Nike, Inc. v. Kasky*, after allegations that Nike "mistreated and underpaid workers at foreign facilities," Nike engaged in a campaign to protect its image, including taking out advertisements, issuing press releases, writing op-eds, and sending letters to university presidents and athletic directors, some of its main constituents or customers.ⁿ¹⁷⁷ Kasky, a private citizen, claimed Nike had made false and misleading statements about its labor practices and sued Nike for unfair and deceptive practices under California law.ⁿ¹⁷⁸ Despite all the advertising and marketing efforts in its campaign, Nike argued its speech was noncommercial, because it did "more than propose a commercial transaction" and was related to more than just "economic interests of the speaker and its audience."ⁿ¹⁷⁹ Nike claimed it was engaging in a general public debate and offering its "opinion on matters of public concern."ⁿ¹⁸⁰ If accepted, Nike's speech would have come under the heightened scienter required before one can find tort liability for such speech.ⁿ¹⁸¹ Yet Nike's communication was an advertisement, concerned a product, and had an economic motivation, and thus arguably fit the definition of commercial speech.ⁿ¹⁸² If so, Nike was making a statement about its products, not general labor issues, and one could limit Nike's commercial speech and factual statements while still allowing Nike to speak about general politics.ⁿ¹⁸³ This view ignores, however, that many people buy goods based on politics. To say that Nike's speech was not political is incorrect. As Justice Breyer explained in his dissent, Nike was responding to claims about "a matter that [was] of significant [*488] public interest and active controversy" and where advocacy for action had been made.ⁿ¹⁸⁴ Nike's speech was simultaneously commercial speech and political speech, with the two aspects "inextricably intertwined."ⁿ¹⁸⁵

The political nature of commerce indicates that a corporation should be allowed to speak, but allowing someone to police that speech through lawsuits would be disfavored. Justice Breyer claimed the choice was binary, between First Amendment protection only for truthful commercial speech and the First Amendment commitment to protecting "the liberty to discuss publicly and truthfully all matters of public concern" as well as creating "breathing space" for speech on matters of public concern, including "potentially incorporating certain false or misleading speech."ⁿ¹⁸⁶ The tradeoff is the familiar one from *Citizens United*: truth testing or more speech on public matters. Breyer sided with more speech. He indicated a statute that allows an individual to bring a suit for false advertising when the individual has suffered no

harm would be unconstitutional, because the threat of such suits would chill corporate speech.ⁿ¹⁸⁷ He further questioned the general idea of a private attorney general being able to go after mixed political speech.ⁿ¹⁸⁸ Breyer noted that such a law would handicap commercial speakers - often corporations - in ways noncommercial speakers were not.ⁿ¹⁸⁹ Although Justice Breyer's analysis is consistent with the idea that laws favoring less speech are likely unconstitutional, it highlights that, yet again, corporate speech is protected, while avenues to challenge corporations are closed.

Like other public figures, corporations need policing. Consumers may wish to take up causes and go after corporations in court, but regulations allowing consumers to police corporate speech are fewⁿ¹⁹⁰ and suspect under the Court's views on restricting corporate speech. All that remains to discipline a corporation is speech about the corporation. That solution, however, reveals the asymmetry of commercial speech law when a [*489] consumer tries to talk about a corporation. Speech about a corporation is often subject to greater, not less, regulation, because of the conceit that the subject matter is less important than non-commercial speech. Justice Breyer recognized a potential harm of having a private attorney general being able to go after mixed political speech,ⁿ¹⁹¹ but given that corporations are the private actors bringing trademark suits, they too are private attorneys general who may go after mixed speech about them. Again, corporations receive the benefits of speech, but without the limits placed on natural persons. Corporations speak with almost no limits. Corporations may use reputation laws to thwart speech about corporations. And, lawsuits to hold corporations accountable for their assertions are not allowed. The confluence of these results narrows the number of speakers about a corporation. The Supreme Court's speech jurisprudence, however, favors "decentralization" - reducing barriers to speech about public figures and increasing the number of decentralized sources of information, not limiting them.

C. The Virtue of Decentralized Authority

Decentralization is supposed to help society have more perspectives - even false or distorting ones and especially critical, challenging ones - so that debate can take place. Corporate reputation laws, however, work to limit the numbers of speakers about a corporation in the name of advancing truthful speech.ⁿ¹⁹² That position is untenable when considering a public-figure corporation. Citizens United examined the truth-value of speech as a question of distortion - "the corrosive and distorting effects of immense aggregations of wealth that are accumulated with the help of the corporate form and that have little or no correlation to the public's support for the corporation's political ideas."ⁿ¹⁹³ The truth-value of speech arises in Sullivan as both factual-error and defamation issues.ⁿ¹⁹⁴ Taken together, these cases show that First Amendment law not only tolerates turbulence about issues and possibly confusing statements from myriad [*490] sources about public figures and/or public matters, but also embraces that muddiness as a way to have a larger debate that is not subject to only one view of an issue.ⁿ¹⁹⁵ Put differently, the Court seeks to increase the amount of information and puts less weight on the information's truth-value.ⁿ¹⁹⁶

The possibility of a speaker, corporate or otherwise, being so powerful as to distort speech simply does not matter in the decentralized approach to speech. Citizens United rejected the concept of antidistortion in favor of allowing more, not less speech. Antidistortion was designed to prevent corporations "from obtaining 'an unfair advantage in the political marketplace' by using 'resources amassed in the economic marketplace.'"ⁿ¹⁹⁷ That a corporation may amass great wealth and use it is not a surprise. Mitigating such a possibility might even be laudable. But individuals can also amass similar wealth, and the First Amendment does not turn on financial status.ⁿ¹⁹⁸ Furthermore, the Court noted that the antidistortion ideal would apply to a media corporation and allow Congress to ban such a corporation's speech.ⁿ¹⁹⁹ According to the Court, "By suppressing the speech of manifold corporations, both for-profit and nonprofit, the Government prevents their voices and viewpoints from reaching the public and advising voters on which persons or entities are hostile to their interests."ⁿ²⁰⁰ Thus, the antidistortion rule, if followed, would deny corporations the right to speak in the same way that individuals speak and be tantamount to censorship that prevents the public from receiving information.ⁿ²⁰¹ Such a rule could not stand. In the face of virulent factions, banning one or the other faction "destroys [*491] the liberty" of some factions and is "worse than the disease."ⁿ²⁰² It is better to have more speech by all manner of speakers and let the public determine "what is true and what is false."ⁿ²⁰³ All of these points fit into the view that the

solution to possibly distorting views is to have all speak rather than have a centralized decision about what speech to allow.

The antidistortion approach to speech was doomed for another reason: the Court's high tolerance for false, inaccurate statements in the realm of political speech. The antidistortion perspective may be correct that certain corporate views could overwhelm other speakers' voices and possibly eliminate precisely the wide range of speech the Citizens United Court vaunted. Antidistortion principles also sought to manage the way in which large corporate donations can corrupt the political process.ⁿ²⁰⁴ The perspective that certain corporate speech will be false and distort the factual record cannot, however, get around Sullivan. Recall that Sullivan involved a claim of libel and left the defendants with truth as a defense.ⁿ²⁰⁵ The Court resoundingly rejected truth testing in favor of speech. When the First Amendment is at issue, "any test of truth - whether administered by judges, juries, or administrative officials - and especially one that puts the burden of proving truth on the speaker" is not recognized.ⁿ²⁰⁶ Such tests would force the speaker to assess and prove the truth of statements; that endeavor, even for true statements, presents great uncertainty and potential costs such that speakers would self-censor for fear of actions and possible judgments against them.ⁿ²⁰⁷ Truth matters, but under the actual malice standard set forth in Sullivan, a defendant must speak "with knowledge that [the publication] was false or with reckless disregard of whether it was false or not."ⁿ²⁰⁸ This standard permits a huge range of speech by punishing only the most egregious false statements. Such a standard accommodates [*492] the fact that "erroneous statement is inevitable in free debate."ⁿ²⁰⁹ The standard also ensures that "constitutional protection [for speech] does not turn upon "the truth, popularity, or social utility of the ideas and beliefs which are offered."ⁿ²¹⁰ Furthermore, "injury to ... reputation," even if based on "utterances containing 'half-truths' and 'misinformation,'" is not sufficient to trump speech about public officials.ⁿ²¹¹ The Sullivan Court, like the Citizens United Court more than 45 years later, championed the ability of anyone - corporation, association, or individual - to criticize public officials (and by extension public figures) and discuss public affairs. Rules that interfere with that ability are likely unconstitutional.

At the same time, the Court's free speech jurisprudence reflects a dedication to a type of symmetry when considering what speech is allowed and how speech is made. Sullivan recognized that public officials have broad immunity against libel if the statement is made as part of the official's duties.ⁿ²¹² In a move to rebalance speech rights, the Sullivan Court held that "it would give public servants an unjustified preference over the public they serve, if critics of [public officials] did not have a fair equivalent of the immunity granted to the officials themselves."ⁿ²¹³ Justice Goldberg's concurrence in Sullivan adds another dimension to this symmetry. The underlying logic seems to be that if the press was able to smear the public official, and the official had little ability to counter that speech, a distortion problem may be present.ⁿ²¹⁴ That was not the case, because public officials have sufficient means for counter-speech through the media.ⁿ²¹⁵ Because there was symmetry regarding speech platforms, there should be "an absolute privilege for criticism of official conduct" by citizens and the press.ⁿ²¹⁶ Citizens United and Sorrell also rejected rules that distinguish amongst speakers [*493] and instead favored applying the same speech rules to all.ⁿ²¹⁷ One way to understand Citizens United's rejection of the antidistortion ideal is as a peculiar form of symmetry. The Court adhered to the idea that all manners of speech in all mediums are equal, and its discussion of the way in which any and all speakers may soon avail themselves of a range of mediums, including the Internet, tracks a desire to avoid carve-outs for a specific type of speaker or medium and instead treat all the same.ⁿ²¹⁸ For the Court, the possibility of all having the same options to speak is more important than whether one speaker may be better at, or have more powerful ways of, using those options.

Furthermore, the Supreme Court's recent decision in *United States v. Alvarez* supports the idea that even when faced with false statements of fact that involve misuse of a powerful symbol - the Medal of Honor - corrective counter-speech is favored over restricting speech.ⁿ²¹⁹ The parallel to the interests advanced for dilution and trademark confusion claims was strong.ⁿ²²⁰ In those areas, however, if a plaintiff can show a dilution or a likelihood of confusion when another uses the plaintiff's mark, harm is presumed and an injunction is issued.ⁿ²²¹ In contrast, not only did Justice Kennedy reject the general position "that false statements receive no First Amendment protection,"ⁿ²²² he rejected the claim that the government interest in protecting the integrity of the award - not "diluting the value [*494] and meaning of military honors," and not letting misuse tarnish the symbol - was sufficient to overcome the interest in

free speech.ⁿ²²³ For Kennedy, the claimed harm - protecting the symbol's value and reducing public confusion about the symbol - lacked connection to the remedy.ⁿ²²⁴ Instead of the restriction on speech like that which trademark law fosters, Alvarez looked to counter-speech and better information sources for people to check potentially false statements as ways to cure the possible confusion and harm the false use of the symbol might create.ⁿ²²⁵

Yet corporate reputation doctrines are asymmetrical to, and reach different conclusions for, the same questions the Court addresses in public figure speech cases. The following chart illustrates the divergence in treatment.

	Antidistortion/ Politics	Confusion/Commerce Law
Truth Test	No	Yes
Reputation Protection	No	Yes
Allows Muffling of Voices	No	Yes
Tolerance for Inaccuracy	Yes	No

The very doctrine that the Supreme Court rejects - the antidistortion doctrine - because it "muffled ... voices"ⁿ²²⁶ and "deprived [the electorate] of information, knowledge and opinion vital to its function,"ⁿ²²⁷ reappears in trademark law under the guises of dilution and likelihood of confusion doctrines. Only here the roles are reversed. The corporate speaker is privileged and shielded from scrutiny as it presses its views about [*495] itself, while everyone else faces hurdles to speak.ⁿ²²⁸ Like the world before Sullivan, the public figure is protected and has superpowers, whereas the speaker is unprotected and faces penalties for speech.ⁿ²²⁹ Instead of relying on the more powerful speaker to use its resources for counter-speech, challenging speech is simply quashed. Beyond the traditional speech rules under which people operate, corporations use trademark law to protect their name, face, and reputation. Trademark law privileges the mark holder's view of its mark and the information the corporation offers for processing its version of the truth over others' and suppresses challenges to what the mark stands for lest those challenges confuse consumers, even in cases where the "protection doesn't protect consumers."ⁿ²³⁰ This position makes little sense for speech about a corporate public figure.

If corporations are afforded the same speech rights as and against individuals and across all mediums, individuals should have the same rights against corporations. Given corporations' important role in society as speakers, as shapers of our world, and as influencers of politics, the law should allow for more discussion about corporations' business practices, goods, and services - not less. As between a corporation's access to media and ability to present a message on an issue and an individual's, a corporation often has greater access to the media to respond - not less. Yet glaring areas of the law undermine, if not negate, the ability to speak about corporations. These laws protect corporate reputation and interfere with the Court's commitment to speech symmetry. They favor a corporation's speech about its goods, services, and the corporation itself while suppressing other speech about the corporation. They embrace antidistortion principles, rather than rejecting them. If the principles of decentralized provision of information - including information about political matters, regardless of some inaccuracies, [*496] and matters related to corporations - are to have force, laws that protect corporation reputation have to be rethought.

III. ESTABLISHING THE CORPORATE PUBLIC FIGURE DOCTRINE

Public-figure jurisprudence should shape the way we govern commentary about corporations. Thus, I propose a corporate public figure doctrine. Dissolving lines about what is commercial speech, expanding corporate power to stop speech, and shrinking ways to police corporations demand increased speech about corporations and lead to one conclusion: we need a safe harbor for speech about corporations. A corporate public figure doctrine provides the contours of such a safe harbor. Such a doctrine creates the possibility for more speech about corporations and rebalances free speech law so that corporate speech rights are subject to the same obligations and limits as the speech rights of

natural persons.

A. Increasing Speech

A corporate public figure doctrine would ensure high information flow and public debate about the politics of commerce.ⁿ²³¹ How much information we allow into a debate involves an inherent tradeoff. First Amendment law and corporate reputation law strive to balance between judgment calls about what is good information that allows us to make better decisions, and bad information that hinders our ability to understand an issue.ⁿ²³² Corporate reputation law tends to limit information and privileges corporations as sources of information.ⁿ²³³ First Amendment jurisprudence favors the provision of more information by individuals, groups, and the press and relies on the ability of people to parse amongst different pieces of information, even inaccurate information, instead of restricting information flow.ⁿ²³⁴ The First Amendment's actual malice [*497] test reflects the choice for more information, not less. Actual malice requires that the defendant knew the publication was false or made with "reckless disregard of whether it was false or not."ⁿ²³⁵ Given the passions involved in political and public issues, the standard requires something more than "ill will or 'malice' in the ordinary sense of the term."ⁿ²³⁶ It does not matter that the allegedly defamatory material is published with an eye toward profit.ⁿ²³⁷ The core issue is whether the defendant "made the false publication with a 'high degree of awareness of ... probable falsity,' or must have 'entertained serious doubts as to the truth of his publication.'"ⁿ²³⁸ Thus it seems that most assertions about a public-figure corporation would be privileged unless someone offered an outright lie and knew it was a lie.ⁿ²³⁹

The Lanham Act is the missing piece of corporate reputation doctrine, where applying actual malice runs into problems but should not. Indeed, the actual malice threshold has been applied to limit some corporate reputation doctrines. Trade libel and slander of title actions - sometimes collectively known as injurious falsehoodsⁿ²⁴⁰ - have been held constitutional when limited to cases involving knowingly false statements and a [*498] showing of actual malice.ⁿ²⁴¹ Actual malice is the threshold for liability in a trade libel case involving a public figure under the Restatement of Torts, and Judge Sack offers it as the probable requirement in his treatise on First Amendment law.ⁿ²⁴² Applying actual malice standards to trademark and false advertising law would track how the Court manages other corporate reputation doctrines. The section of the Lanham Act that addresses false advertising "creates a cause of action strikingly similar to, and that may act as a substitute for, one for injurious falsehood."ⁿ²⁴³ The section concerning trademarks uses almost the exact same language as the false advertising provisions.ⁿ²⁴⁴ Yet trademark and false advertising law are treated quite differently than other corporate reputation laws, with injunctions being common, no intent requirement for deception, and no requirement for special damages related to the speech at issue.ⁿ²⁴⁵ These doctrinal results directly conflict with how we treat public figures. They work to protect corporate public-figure reputation rather than to allow society to scrutinize them as it might any other public figure.

The use of actual malice standards when speaking about corporate public figures allows consumers, commenters, the press, and others to engage in unfettered speech about corporations. This approach rebalances the current system, which favors expanded, barely restricted corporate speech but limits speech about corporations. Such an approach could arguably place all corporate speech beyond the reach of not only much of trademark and false advertising law, but also agencies that regulate corporate speech.ⁿ²⁴⁶ In that sense, Rebecca Tushnet identifies precisely the problem this Article tries to address. [*499] Current Supreme Court jurisprudence seems to go to the heart of commercial speech and consumer protection ideals and eviscerates them in favor of more speech and corrective speech by all.ⁿ²⁴⁷ I am not saying this turn is necessarily desirable, and I acknowledge its problems.ⁿ²⁴⁸ Rather, I believe that First Amendment jurisprudence has gone this route. This shift requires that we offer proper protection for those who would speak about corporate practices. When increased speech is all that remains, barriers to such speech should be torn down.

B. Enabling Speech About the Corporate Public Figure

A few hypothetical situations help illustrate how a corporate public figure doctrine would operate. Suppose Corporation A (CA) is a leading maker of tractor equipment. CA's tractors may be used for a variety of purposes. On the one hand, customers may use the tractors to increase their farms' yield and reduce labor needs to allow for

investment in costlier but more environmentally friendly farm techniques.ⁿ²⁴⁹ On the other hand, some customers may use the tractors to tear down forests, fill in wetlands, or remove settlements.ⁿ²⁵⁰ Now consider Corporation B (CB), a leading maker of toys for girls. CB's doll is the most popular doll for girls. On the one hand, the doll is part of a campaign for girl power and has promoted positive careers, from surgeon to fashion designer to producer to an African-American female Presidential candidate.ⁿ²⁵¹ On the other [*500] hand, the doll may be seen as lacking anatomical normality, promoting consumerism, and at times offering images of girls as unable to handle mathematics.ⁿ²⁵² A third corporation, Corporation C (CC), is a leading soda pop maker. It has promoted its products as being all-American and "Classic."ⁿ²⁵³ It has also altered its ingredients over time. At one point, the soda had a little cocaine in it.ⁿ²⁵⁴ Later, CC switched from using sugar as a sweetener to corn syrup.ⁿ²⁵⁵ In addition, CC has issued reports on its commitment to sustainability.ⁿ²⁵⁶

Now, suppose that someone criticized any of these corporations by making broad claims regarding their practices, the honesty of their assertions, their role in culture, and so on. The critic used print, the Internet, and local radio advertisements to further the campaign. The critic also used the corporation's trademarks in the campaign - a practice sometimes compared to hijacking - because they are the name and face of the corporation.ⁿ²⁵⁷ In some cases, the critic may be using the marks in advertisements for the critic's products, such as when SodaStream, a maker of do-it-yourself soft drink machines, used Coke bottles and cans in a marketing campaign to highlight container waste and landfill created by soda makers' products.ⁿ²⁵⁸ Comparative advertising parodies are another possibility. In *Deere & Co. v. MTD Products, Inc.*, MTD animated Deere's mark so that it was smaller than the original mark and [*501] ran away.ⁿ²⁵⁹ Criticism via a product is another option. In *Coca-Cola Co. v. Gemini Rising, Inc.*, the defendant offered a poster styled like a Coca-Cola ad that read "Enjoy Cocaine" in contrast to Coca-Cola's "Enjoy Coca-Cola" mark,ⁿ²⁶⁰ a commentary that seems appropriate given that cocaine was once an ingredient in the drink. Sometimes the commentary will be about a corporate image and how its products shape society. For example, Barbie was used in music and art to critique images of femininity and consumer society.ⁿ²⁶¹ The antibrand movement has reworked brands to expose child labor (Old Navy), the dangers of cigarettes (Joe Camel), Dow Chemical's inaction after the Bhopal disaster, British Petroleum's responsibility for the Gulf of Mexico, and more.ⁿ²⁶² And suppose a given corporation threatened to sue or sued the speaker.ⁿ²⁶³ How would the issue turn out? Under current doctrine, the critic would face large costs and injunctions, and possibly need to reach an appellate court before the speech was vindicated.ⁿ²⁶⁴ Like the defendants in *Deere* and *Gemini*, some defendants might lose after a long, expensive battle, because, as described above, the inquiry focuses on the incorrect questions about misappropriation of the mark and confusion of consumers rather than whether the statements are false and whether the issue is about a corporate public figure.ⁿ²⁶⁵ Under the proposed approach, a defendant would argue that the corporations are public figures, and that they must meet the actual malice standard under *Sullivan*.ⁿ²⁶⁶

The advantages here are two-fold. In determining whether a plaintiff is a public figure, courts may use an evidentiary hearing.ⁿ²⁶⁷ That early determination allows a court to resolve cases where actual malice is not at issue and saves considerable [*502] costs.ⁿ²⁶⁸ If the plaintiff has not argued there was actual malice but only negligence, and the defendant cedes negligence, and if all other elements are in place, the case turns on whether the plaintiff is a public figure.ⁿ²⁶⁹ If the plaintiff is a public figure, she loses; if not, she wins.ⁿ²⁷⁰ The actual malice determination is subtler but has similar benefits. Actual malice requires clear and convincing evidence.ⁿ²⁷¹ Under *Sullivan*, defendants do not have an immediate bonus regarding burden of proof to prevent litigation costs.ⁿ²⁷² Rather, the higher standard makes summary judgment a favored strategy, because plaintiffs have a difficult time overcoming that standard.ⁿ²⁷³ The standard results in potentially early resolution and thus lower costs.ⁿ²⁷⁴ As such, a corporate public figure doctrine enables earlier determination of the speech issues.

An examination of what the public figure analysis for corporations would look like illustrates how the approach would work and why it should increase the amount of information about corporations rather than reduce it, as is the case today.

Corporations can qualify as either general-or limited-purpose public figures. Under standard public figure doctrine, the general-purpose public figure is the exception, and the limited-purpose figure status is more likely.ⁿ²⁷⁵

Corporations, however, can fit into either category rather easily. ⁿ²⁷⁶ Determining whether the plaintiff is a public figure and what type of public [*503] figure, general-or limited-purpose, is a question of law. ⁿ²⁷⁷ The Court of Appeals of the District of Columbia has explained:

A person becomes a general purpose public figure only if he or she is a well-known celebrity, his name a household word. Such persons have knowingly relinquished their anonymity in return for fame, fortune, or influence. They are frequently so famous that they may be able to transfer their recognition and influence from one field to another. Thus, it is reasonable to attribute a public character to all aspects of their lives. ⁿ²⁷⁸

If CA is Caterpillar; CB, Mattel; and CC, Coca-Cola, they qualify as general-purpose public figures quite well. ⁿ²⁷⁹ Although corporations are not giving up anonymity, they seek and, in these examples, attain "fame, fortune, and influence." ⁿ²⁸⁰

An additional way to analyze the issue is to ask whether the corporations' marks would qualify for federal dilution protection. As explained above, dilution protects famous marks of corporations with much the same levels of "fame, fortune, and influence," and the same ability "to transfer their recognition and influence from one field to another" as human public figures. ⁿ²⁸¹ If a corporation has a viable dilution claim, courts should find that the corporation is also a general-purpose public figure. ⁿ²⁸²

Even if one chooses to avoid declaring a famous corporation a general-purpose public figure, or if CA, CB, and CC were not Caterpillar, Mattel, and Coca-Cola, but instead were local corporations, they may often be limited-purpose public figures. Courts have applied a three-part test to determine whether someone is a limited-purpose public figure. ⁿ²⁸³ First, the controversy must be determined "because the scope of the controversy in which the plaintiff involves himself defines the scope of the [*504] public personality." ⁿ²⁸⁴ The issue must be public such that "persons actually [are] discussing it" and must affect more people than just the ones directly involved in it. ⁿ²⁸⁵ Criticisms about CA's approach to the environment, CB's approach to women's place in society, or CC's approach to health are issues people discuss in the news, on blogs, and elsewhere. They also reach more than the disputants. For these examples, the first prong would be met.

Second, the plaintiff must have more than a "trivial or tangential" role in the controversy. ⁿ²⁸⁶ Whether the role was more than trivial will turn on whether the corporations asserted some influence on outcomes or made statements about the issues at hand. ⁿ²⁸⁷ In our examples, Caterpillar, Mattel, and Coca-Cola have all taken public stands by touting their roles in sustainability, ⁿ²⁸⁸ empowering girls and women, ⁿ²⁸⁹ and health matters. ⁿ²⁹⁰ So even if not deemed general-purpose corporate figures, they would meet this part of the evaluation. If, however, a corporation of any size - national, state, or local - has not made statements on an issue, would it still be a limited-purpose public figure? Answering that question would require investigation of facts about lobbying, public relation campaigns, and similar acts that demonstrate the role of the company. ⁿ²⁹¹ It does not [*505] take much for a corporation's acts to make it a limited-purpose public figure. The question turns on whether the corporation's activity could foreseeably generate public attention. ⁿ²⁹² A corporation's local interactions, activities, and policies, such as community-development projects, advocacy on city and county councils, negotiated tax breaks, employment policies, and so on, would favor treating even a somewhat unknown corporation as a limited public figure. ⁿ²⁹³ One might wish to say that the corporation did not seek the limelight but, like a person, a corporation cannot say it did not want the attention. ⁿ²⁹⁴

Last, the germaneness question would follow a similar fact inquiry, but a corporation's greater general power to shape policy as compared to an individual indicates that many issues could be germane more often than expected. The issue must be "germane to the plaintiff's participation in the controversy." ⁿ²⁹⁵ If the statements about the corporation were about the issues on which it spoke or where it had influence, they would, of course, be germane. ⁿ²⁹⁶ A broad claim that Mattel supports war or Coca-Cola hates same-sex marriage rights or Caterpillar dislikes NASA's space program would not seem to be germane. For human defamation plaintiffs, courts will not allow a private person to be

deemed a limited-purpose public figure unless the statement has some connection to the controversy, and "misstatements wholly unrelated to the controversy" are not protected.ⁿ²⁹⁷ But claims that selling goods from or investing in former apartheid South Africa supported racism helped change policy at both the corporate and state level, which in turn sped the decline of that regime.ⁿ²⁹⁸

[*506] The recent Chick-fil-A gay rights debate illustrates how quickly a topic can become germane. The President of Chick-fil-A was quoted as saying "he endorses 'the biblical definition of the family unit.'" ⁿ²⁹⁹ The issue quickly turned into an indictment of the company in general. Some mayors claimed they would not allow the restaurant to open in their cities.ⁿ³⁰⁰ Other political candidates urged people to eat more Chick-fil-A to show support for the company's president and his family.ⁿ³⁰¹ Although the president seemed to separate his beliefs from how he ran his workplace, some argued that because he made money from the restaurants, and then he and the company donated to conservative financial groups that oppose gay rights, protesting and boycotting Chick-fil-A would help gay rights.ⁿ³⁰² The examples and the process issues discussed above show that corporations are influencing public policy, and consumers are asked to vote with their dollars as a way to support or protest a given policy. Thus, a claim that failing to offer same-sex rights in the workplace undermines LGBT rights or choosing to offer such rights undermines family values could be germane as a general matter. As another example, after Google, Nabisco, and J. C. Penney chose to support gay and lesbian rights, they faced some consumer backlash and received some consumer support.ⁿ³⁰³ Thus, one might argue that any large company that employs many people ought to support or reject gay rights. Indeed, [*507] the Chick-fil-A controversy resulted in a commitment not to support and donate to anti-gay groups.ⁿ³⁰⁴ Inquiring into a corporation's social policies is just as germane as inquiring into a public official's social policies.ⁿ³⁰⁵ The topics become germane as a corporation chooses its policy for such matters and participates in controversy when it makes such decisions. The way in which a corporation makes its goods, offers it services, and runs its business are analogous to a public official's fitness-for-office question - just as our commercial decisions are analogous to our political decisions.
n306

Corporations can wield enough power that they often influence and alter the course of human events at the international, national, state, and local level. Determining what is germane is difficult, because corporations have burst the bounds of the limited commercial actor. As corporations' importance increases and we are asked to use the market to express and support political ideas, many issues could be deemed germane. In sum, whether a corporation is a limited-purpose public figure should be a broad, lenient inquiry. The increased deference to corporate speech and the reasons supporting such increased power to speak push the corporation into the public figure realm and lead to the need for an increased ability to question the corporation.

Under *Citizens United*, however, corporations have the same speech rights as people.ⁿ³⁰⁷ Thus, corporations will be able to assert claims about other corporations.ⁿ³⁰⁸ In such a world, corporations will have to engage in lawsuits or even more spending for counter-speech, i.e., more advertising, as they [*508] launch broad claims about each other.ⁿ³⁰⁹ These activities are arguably already part of our media and advertising landscape.ⁿ³¹⁰ Consumers and activists may also hurl broad claims about a corporation into the fray.ⁿ³¹¹ As such, consumers will have to sort an ever-increasing stack of information and must be able to parse that information to use it.ⁿ³¹² That result maps to the world of deference to speech by all speakers and reliance on counter-speech that the Supreme Court has embraced.ⁿ³¹³

Put differently, the world of centralized information sources is no longer our world.ⁿ³¹⁴ With the advent of blogs, ratings sites, and social media reviews, consumers look to a range of speech sources to determine the truth.ⁿ³¹⁵ With greater sources of information and lower costs to find it, the law has perhaps moved to an all-out information war model rather than one with paternal notions of centralized information sources.ⁿ³¹⁶ The Supreme Court's preference for increased speech by all, and its embrace of information technology and counter-speech to correct a false claim instead of banning the speech, points to a new world where all speak, and it is believed that the mixing and mashing of ideas will allow the best answers to arise to [*509] correct falsehoods and lead our decisions.ⁿ³¹⁷ If so, and if corporations are to have even greater power to speak, we must protect the ability for such a distributed marketplace of ideas and information to function. Right now, corporations can speak more than ever before, maintain privileges as central sources of information about themselves, and wield great power to suppress speech about their affairs.ⁿ³¹⁸ Applying a

corporate public figure doctrine to corporate reputation law enables all to participate in the marketplace of ideas. Failing to do so upsets the balance required to ensure that all information is shared and available to society, not just one side's view.

CONCLUSION

Free speech law is unbalanced. In *Citizens United* the Supreme Court embraced corporate speech rights about politics. In *Sorrell*, the Court further championed a corporation's right to speak about commerce. A commitment to having more sources of information available to individuals and society as they make decisions underlies part of the Court's justifications for these decisions. But the role of corporations in society was an important aspect of the decisions as well. Corporations are indeed important actors in society. As the Court has said, corporations are key parts of our politics and economy. Corporate policies about labor, the environment, gay rights, and more shape our society and the options for how we live. As society moves to an ever-increasing reliance on the market and private provision of goods, corporations become all the more important for political matters. Consumers and corporations now lobby the market and society about what to buy based on social and political reasons as much as, if not more than, pure price and quality pleas. Corporate rights to do so are clear; others' rights to question and offer counter-speech to corporate claims are not. When consumers or other groups question a corporation, corporations can and do use corporate reputation laws to prevent such speech. Corporations thus have increased speech rights while speech about them is unduly limited. This mistake can be cured once we understand that if corporations have speech rights like people, corporations must be treated like the people to whom they are often most similar: public figures.

[*510] Reordering free speech law to recognize corporate public figures would meet its core goals: increasing the overall amount of information in the marketplace and preventing a public figure from using reputation laws to squelch speech about them. Once that is done, corporations will be like people - able to lobby, persuade, advertise, and engage in politics, and open to the same scrutiny as any other person who does likewise.

n1. See *infra* note 177 and accompanying text; *infra* Part III.B.

n2. This Article follows the logic of expanded speech rights for corporations to its conclusion. It shows that if such expansion is at hand, certain outcomes are required. Nonetheless, there are reasons to question whether such an expansion is well grounded or wise. Several other authors have excellent discussions of why corporations are different than individuals for speech and other purposes. See C. Edwin Baker, *The First Amendment and Commercial Speech*, 84 *Ind. L. Rev.* 981, 987-90 (2009) (arguing that commercial entities are "created for ... instrumental purposes" and have "a morally different status than living, flesh-and-blood people"); see also Patricia Nassif Fetzer, *The Corporate Defamation Plaintiff as First Amendment "Public Figure": Nailing the Jellyfish*, 68 *Iowa L. Rev.* 35, 65-69 (1982) (tracing the Supreme Court's different approaches to corporate personhood depending on the question presented); cf. *Gertz v. Robert Welch, Inc.*, 418 U.S. 323, 341 (1974) (connecting the protection of someone's good name to dignity). Ashutosh Bhagwat has made a strong argument that the nature of an association matters for constitutional analysis of whether a corporate entity has speech rights. Ashutosh Bhagwat, *Associational Speech*, 120 *Yale L.J.* 978, 1023-25 (2011). A corporate entity not engaging in associational speech should not be afforded the same

protection as one engaged in other speech, including commercial speech. *Id.* Bhagwat defines associational speech as "speech that is meant to induce others to associate with the speaker, to strengthen existing associational bonds among individuals including the speaker, or to communicate an association's views to outsiders (including government officials)." *Id.* at 981. As I argue, corporate commercial claims have become political, associational, and commercial at the same time, which is why maintaining boundaries on corporate speech has become difficult.

n6. See *infra* Part II.B.

n7. See *infra* Part II.B.

n8. *Cent. Hudson Gas & Elec. Corp. v. Pub. Serv. Comm'n*, 447 U.S. 557, 562-63 (1980) ("The Constitution ... accords a lesser protection to commercial speech than to other constitutionally guaranteed expression." (citation omitted)).

n9. Cf. *Gertz v. Robert Welch, Inc.*, 418 U.S. 323, 345 (1974) ("Truly involuntary public figures must be exceedingly rare... . Some occupy positions of such persuasive power and influence that they are deemed public figures for all purposes.").

n10. See Mark McKenna, A Consumer Decision-Making Theory of Trademark Law, 98 Va. L. Rev. 67, 69 (2012).

n11. See McKenna, *supra* note 10, at 70 ("Indeed, courts routinely say that trademark law targets 'confusion of any kind.'" (footnote omitted)).

n12. See *Citizens United v. Fed. Election Comm'n*, 558 U.S. 310, 343 (2010) ("The Court has thus rejected the argument that political speech of corporations or other associations should be treated differently under the First Amendment simply because such associations are not 'natural persons.'" (citations omitted)); *id.* at 386 (Scalia, J., concurring); *cf. id.* at 394 (Stevens, J., dissenting) ("The basic premise underlying the Court's ruling is ... the proposition that the First Amendment bars regulatory distinctions based on a speaker's identity, including its 'identity' as a corporation."). The law regarding whether corporations have many, if not all, the same rights as people is complex and changing. That debate will be important, but it is well beyond the scope of this Article, which seeks to show the way the Court's First Amendment jurisprudence and the current nature of corporations should affect corporations' status as public figures.

n62. *Post*, *supra* note 55, at 11.

n63. Cf. *Dun & Bradstreet, Inc. v. Greenmoss Builders, Inc.*, 472 U.S. 749, 762 (1985) (granting a business credit report "no special protection" when the speech was "solely in the individual interest of the speaker and its business audience"); Deana Pollard Sacks, *Snyder v. Phelps: A Prediction Based on Oral Arguments and the Supreme Court's Established Speech-Tort Jurisprudence*, 2010 *Cardozo L. Rev.* de.novo 418, 426-27 (noting that private matters are of "reduced constitutional value" and receive less "First Amendment protection from tort liability").

n64. *Citizens United v. Fed. Election Comm'n*, 588 U.S. 310, 354 (2010).

n65. *Gertz v. Robert Welch, Inc.*, 418 U.S. 323, 344-45 (1974).

n66. *Id.* at 351.

n67. *Id.* at 345.

n68. *Id.* at 344.

n69. *United States v. Alvarez*, 132 S. Ct. 2537, 2549 (2012) (plurality opinion).

n70. *Id.* at 2556 (Breyer, J., concurring).

n71. See Lyrrisa Barnett Lidsky, *Silencing John Doe: Defamation & Discourse in Cyberspace*, 49 *Duke L.J.* 855, 909-10 (2000) (noting a corporation's ability to engage in counter-speech supports treating the corporation as a limited-purpose public figure under *Gertz*).

n72. See, e.g., *Citizens United v. Fed. Election Comm'n*, 558 U.S. 310, 354-56 (2010) (holding that the expenditures ban unconstitutionally silences both non-profit and for-profit organizations, as well as corporations both large and small).

n73. See *Gertz*, 418 U.S. at 351 (noting one becomes a limited-purpose public figure by "injecting oneself ... into a particular public controversy").

n74. At the time of the Citizens United decision, Citizens United, the corporation, was not a household name and lacked prominence in society.

n75. Gertz, 418 U.S. at 351.

n76. Id. at 344.

n77. Citizens United, 558 U.S. at 320 (noting Citizens United was to pay \$ 1.2 million to make the VOD programming available at no extra charge to the viewer).

n78. 131 S. Ct. 2653, 2670 (2011).

n79. Id. ("Absent circumstances far from those presented here, the fear that speech might persuade provides no lawful basis for quieting it.").

n80. See Kysar, *supra* note 52, at 529 (explaining that "globalization ... has enhanced the flow of information, not merely goods, and information regarding processes increasingly is finding its way downstream"); id. at 641 (noting that consumers are responding accordingly, since "consumer preferences may be heavily influenced by information regarding the manner in which goods are produced").

n81. See Stan Karas, *Privacy, Identity, Databases*, 52 Am. U. L. Rev. 393, 438 (2002) ("Consumption patterns may identify one as a liberal, moderate Republican, radical feminist, or born-again Christian.").

n82. See *Va. State Bd. of Pharmacy v. Va. Citizens Consumer Council, Inc.*, 425 U.S. 748, 765 (1976).

n83. See *Dun & Bradstreet, Inc. v. Greenmoss Builders, Inc.*, 472 U.S. 749, 759 (1985).

n84. Kysar, *supra* note 52, at 535.

n85. See, e.g., *Dun & Bradstreet*, 472 U.S. at 759 ("Speech on matters of purely private concern is of less First Amendment concern.").

n86. See generally Naomi Klein, *No Logo* (2002) (arguing corporations and their brand strategies have political implications).

n87. See *supra* note 50 and accompanying text.

n88. See, e.g., Margaret Chon, *Marks of Rectitude*, 77 *Fordham L. Rev.* 2311, 2315 (2009) ("Marks now express - whether implicitly or explicitly - environmental, human rights, and labor characteristics, as well as classic health and safety standards ...").

n89. See *infra* notes 284-94 and accompanying text.

n90. Margot Roosevelt, *Local-Food Movement: The Lure of the 100-Mile Diet*, *Time*, June 11, 2006, <http://content.time.com/time/magazine/article/0,9171,1200783,00.html>. See generally Pallavi Gogoi, *The Rise of the 'Locavore'*, *Bloomberg Businessweek* (May 20, 2008), <http://www.businessweek.com/stories/2008-05-20/the-rise-of-the-locavorebusinessweek-business-news-stock-market-and-financial-advice> (detailing the rise of the local food movement, which Gogoi defines as food grown within 250 miles of where one lives).

n91. Gogoi, *supra* note 90 (noting concern over "food miles" and "carbon footprints").

n92. Compare Vasile Stanescu, *"Green" Eggs and Ham? The Myth of Sustainable Meat and the Danger of the Local*, 8 *J. for Critical*

Animal Stud. 8, 8 (2010) (arguing that the locavore movement needs to be "reunderstood and rearticulated"), with Kathy Rudy, Locavores, Feminism, and the Question of Meat, 35 J. Am. Culture 26, 26 (2012) (offering a "qualified endorsement of local eating").

n93. See, e.g., Marion Nestle, What Google's Famous Cafeterias Can Teach Us About Health, The Atlantic, July 13, 2011, <http://www.theatlantic.com/health/archive/2011/07/what-googles-famous-cafeterias-can-teach-us-about-health/241876/> (noting how Google's food program is "designed to promote ... environmental values").

n94. See, e.g., Anne Thompson, Paper or Plastic - What's the Greener Choice?, NBC News (May 7, 2007 7:37 PM), http://www.nbcnews.com/id/18538484/ns/nightly_news/t/paper-or-plastic-whats-greener-choice/ (stating paper bags create more air pollution, while plastic bags produce more solid waste).

n95. See, e.g., BusinessGreen, Europe Considers Plastic Bag Ban, Guardian Environment Network (May 20, 2011, 11:23 AM), <http://www.guardian.co.uk/environment/2011/may/20/europe-plastic-bag-ban> (distinguishing between plastic bags that will biodegrade naturally and those that will not).

n96. See, e.g., Thompson, *supra* note 94.

n97. See, e.g., David Zahniser & Abby Sewell, L.A. OKs Ban on Plastic Bags at Checkout, L.A. Times, May 24, 2012, <http://articles.latimes.com/2012/may/24/local/la-me-0524-bag-ban-20120524> (noting that Los Angeles is the largest city to pass such a ban, while San Jose, San Francisco, Long Beach, and Santa Monica already have such bans in place).

n98. See A Better Bag, Whole Foods Market, <http://www.wholefoodsmarket.com/mission-values/environmental-stewardship/better-bag> (last visited Nov. 2, 2013) (noting that reusable bags are the "eco-nomical" option).

n99. See, e.g., Jane Black, Plastic Bags Headed for a Meltdown, Wash. Post, Feb. 6, 2008, at F1.

n100. See, e.g., Paper vs. Plastic - The Shopping Bag Debate, Greenfeet Blog (Feb. 25, 2009, 2:51 PM), <http://web.archive.org/web/20120125030733/http://blog.greenfeet.com/index.php/paper-vs-plastic-the-shopping-bag-debate/reducing-your-footprint/121>

(accessed by searching for original URL in the Internet Archive index).

n101. Compare Myth: Paper Is Better than Plastic, reuseit.com, <http://web.archive.org/web/20130208060558/http://www.reuseit.com/learn-more/myth-busting/why-paper-is-no-better-than-plastic> (last visited Nov. 2, 2013) (accessed by searching for original URL in the Internet Archive index) (challenging the contention that paper is better than plastic), and Do Plastic Bag Bans Help the Environment?, NPR (Jun. 5, 2012, 12:00 PM), <http://www.npr.org/2012/06/05/154354092/do-plastic-bags-bans-help-the-environment> (noting that with bag choice, "everything is [a] tradeoff[]"), with Top 10 Myths About Plastic Grocery Bags, Am. Progressive Bag Alliance, http://www.plasticsindustry.org/files/about/fbf/myths%2Bfacts_grocerybags.pdf (last visited Nov. 2, 2013) (highlighting trade group's claim about plastic bags' impact on environment).

n102. See, e.g., Justin Gillis, To Fight Climate Change, Students Aim at Portfolios, N.Y. Times, Dec. 5, 2012, at B1-B2 (energy); Janean Chun, John Metz Denny's Obamacare Surcharge Stirs Big Mess for Restaurant Chain, Huffington Post (Nov. 20, 2012, 9:01 AM), http://www.huffingtonpost.com/2012/11/20/john-metz-denny-s-obamacare-surcharge-_n_2146735.html (health care); Tim Cuplan, Foxconn Plans American Expansion as Clients Seek Made in U.S.A., Bloomberg (Dec. 6, 2012, 10:01 AM), <http://www.bloomberg.com/news/2012-12-06/foxconn-plans-american-expansion-as-clients-seek-made-in-u-s-a-.html> (made in the U.S.A.); Nate C. Hindman, At 'Dump the Trump' Macy's Rally Sparks Fly, Huffington Post (Nov. 21, 2012, 11:21 AM), http://huffingtonpost.com/2012/11/21/trump-macys-dump-the-trump_n_2170136.html (birther claims); *infra* notes 299-304 and accompanying text (gay marriage and same-sex rights).

n103. Post, *supra* note 55, at 41.

n104. See, e.g., Dan Burk & Brett McDonnell, Trademarks and the Boundaries of the Firm, 51 Wm. & Mary L. Rev. 345, 361 (2009) (noting that a trademark is a reputational asset).

n105. See, e.g., Rochelle Cooper Dreyfuss, Expressive Genericity: Trademarks as Language in the Pepsi Generation, 65 Notre Dame L. Rev. 397, 398 (1990) (noting the "Constitution ... favors public access to the tools of expression," which include trademarks); Laura Heymann, The Public's Domain in Trademark Law: A First Amendment Theory of the Consumer, 43 Ga. L. Rev. 651, 715 (2009) (arguing that trademark law deserves First Amendment protection); Lisa P. Ramsey, Increasing First Amendment Scrutiny of Trademark Law, 61 SMU L. Rev. 381, 381 (2008) (stressing that "trademarks consist of language").

n106. See Robert C. Denicola, Trademarks as Speech: Constitutional Implications of the Emerging Rationales for the Protection of Trade Symbols, 1982 Wis. L. Rev. 158, 198 ("Famous trademarks are the functional equivalent of famous names ... [a trademark] functions as the visual 'likeness' of its incorporeal owner as well.").

n107. Cf. *id.* at 195-96 ("Famous trademarks offer a particularly powerful means of conjuring up the image of their owners, and thus become an important, perhaps at times indispensable, part of the public vocabulary.").

n108. See, e.g., Marcel Danesi, *Brands* 33 (2006) (explaining that brands are personalities with identities); cf. Celia Lury, *Brands: The Logos of the Global Economy* 24, 33-34 (2004) (discussing brand personality as reflecting the internal connection between the brand and employees who become "the soul" of the brand, as well as reflecting consumer needs).

n109. Despite corporations' greater ability to claim personhood, they do not have the same dignity interests as people, and thus the issues at stake for a person bringing a libel claim are not the same as for a corporation. See generally Baker, *supra* note 2. Baker summarizes the argument that "respect for individual autonomy does not require protecting the speech of artificially created and instrumentally valued commercial entities." *Id.* at 990. I argue here that those reasons are being ignored or are eroding so that corporate reputation claims are starting to function like dignity interests.

n110. William Shakespeare, *Merchant of Venice* act 3, sc. 1; see also *Milkovich v. Lorain Journal Co.*, 497 U.S. 1, 12 (1990) ("But he that filches from me my good name Robs me of that which not enriches him, And makes me poor indeed." (quoting William Shakespeare, *Othello* act 3, sc. 3)).

n111. See William Shakespeare, *Merchant of Venice* act 3, sc. 1 ("And if you wrong us, shall we not revenge?"). The rest of Shylock's speech asks whether he, a Jewish man, does not have eyes, hands, organs; is not subject to the elements; would not laugh if tickled, bleed if pricked; just as any other Christian and impliedly any other person. *Id.* Corporations as of yet do not have such capabilities, but they can and do seek revenge. See, e.g., Steve Silberman, *Mattel's Latest: Cease-and-Desist Barbie*, *Wired*, Oct. 28, 1997, <http://www.wired.com/culture/lifestyle/news/1997/10/8037> (reporting that a Mattel attorney allegedly claimed the company wanted a defendant's house); cf. Deven R. Desai & Sandra L. Rierson, *Confronting the Genericism Conundrum*, 28 *Cardozo L. Rev.* 1789, 1839-42 (2007) (addressing abusive trademark litigation spawned by policing requirement); K.J. Greene, *Abusive Trademark Litigation and the Incredible Shrinking Confusion Doctrine - Trademark Abuse in the Context of Entertainment Media and Cyberspace*, 27 *Harv. J.L. & Pub. Pol'y* 609, 631-38 (2004) (examining instances of abusive trademark litigation); Mark A. Lemley, *Property, Intellectual Property, and Free Riding*, 83 *Tex. L. Rev.* 1031, 1045-46 (2005) (discussing the damages available to trademark and other intellectual property holders for misuse of their intellectual property).

n112. See *Mattel, Inc. v. Walking Mountain Prods.*, 353 F.3d 792 (9th Cir. 2003) (criticism of Barbie by juxtaposing a nude Barbie and various kitchen appliances); *Mattel, Inc. v. MCA Records, Inc.*, 296 F.3d 894 (9th Cir. 2002) (reference to Barbie in a song by the band Aqua).

n113. See *Walking Mountain*, 353 F.3d 792; *MCA Records*, 296 F.3d 894.

n114. The artist in one case sought expenses and fees of \$ 1.6 million after prevailing. *Walking Mountain*, 353 F.3d at 815.

n115. Jonathan L. Schwartz, *Making the Consumer Watchdog's Bark as Strong as Its Gripe: Complaint Sites and the Changing Dynamic of the Fair Use Defense*, 16 Alb. L.J. Sci. & Tech. 59, 70-72 (2006); Hannibal Travis, *The Battle for Mindshare: The Emerging Consensus that the First Amendment Protects Corporate Criticism and Parody on the Internet*, 10 Va. J.L. & Tech. 1, 3-5 (2005).

n116. Schwartz, *supra* note 115, at 71-72.

n117. See, e.g., Leah Chan Grinvald, *Shaming Trademark Bullies*, 2011 Wis. L. Rev. 625; Irina D. Manta, *Bearing Down on Trademark Bullies*, 22 Fordham Intell. Prop. Media & Ent. L.J. 853 (2012).

n118. The artist in the case was represented by the ACLU. See *Walking Mountain*, 353 F.3d at 795.

n119. *Mattel, Inc. v. Walking Mountain Prods.*, No. CV99-8543RSWL(RZX), 2004 WL 1454100, at 4 (C.D. Cal. June 21, 2004).

n120. Papandrea, *supra* note 37, at 237.

n121. *Id.*

n122. *New York Times Co. v. Sullivan*, 376 U.S. 254, 300-01 (1964) (Goldberg, J., concurring in the result).

n123. See Lidsky, *supra* note 71, at 859-61 (examining how corporations use defamation suits to chill speech, especially by those without resources to defend against such suits).

n124. See, e.g., John Stuart Mill, *On Liberty* 21-22 (Ticknor & Fields, 2d ed. 1863) (noting the way in which people invoke the government as vindicating or interfering with rights depending on the issue and perspective rather than following a general principle).

n125. See Stacey L. Dogan & Mark A. Lemley, *Parody as Brand* 10-11 (Stanford Law Sch. Pub. Law and Legal Theory Research Paper Series, Working Paper No. 2,170,498, 2012), available at http://papers.ssrn.com/sol3/papers.cfm?abstract_id=2170498##. A tradition of clearing rights and aggressive suits against those who use intellectual property in ways rights holders dislike undermines First Amendment protection for many creators. See Jennifer E. Rothman, *The Questionable Use of Custom in Intellectual Property*, 93 Va. L. Rev. 1899, 1911-16 (2007). Even major studios pay high fees to identify and clear rights and to obtain expensive errors and omissions insurance, regardless of First Amendment defenses. *Id.* at 1915-16. Documentarians and individual filmmakers face the same costs and often forego use of and references to famous people (because of the right of publicity), copyrighted material, and trademarks, because otherwise the film cannot be made. *Id.* The culture forces requesting permission, which is the opposite of what should happen when public figures and concerns are at hand.

n126. Lidsky, *supra* note 71, at 945 ("Powerful corporate plaintiffs will use libel law to intimidate their critics into silence and, by doing so, will blunt the effectiveness of the Internet as a medium for empowering ordinary citizens to play a meaningful role in public discourse.").

n127. This point has greater force today, but the Supreme Court has acknowledged the issue for First Amendment analysis since at least 1967. See *Curtis Publ'g Co. v. Butts*, 388 U.S. 130, 163-64 (1967).

n128. *Va. State Bd. of Pharmacy v. Va. Citizens Consumer Council, Inc.*, 425 U.S. 748, 762 (1976).

n129. *Cent. Hudson Gas & Elec. Corp. v. Pub. Serv. Comm'n*, 447 U.S. 557, 564 (1980).

n130. Rebecca Tushnet, *Trademark Law as Commercial Speech Regulation*, 58 S.C. L. Rev. 737, 738 (2007) [hereinafter *Tushnet, Trademark Law*].

n131. Denicola, *supra* note 106, at 158-59; accord *Qualitex Co. v. Jacobson Prods. Co.*, 514 U.S. 159, 163-64 (1995) ("Trademark law ... 'reduces the customer's costs of shopping and making purchasing decisions,' ... for it quickly and easily assures a potential customer that this item - the item with this mark - is made by the same producer as other similarly marked items that he or she liked (or disliked) in the past." (alteration in original) (quoting 1 J. Thomas McCarthy, *McCarthy on Trademarks and Unfair Competition* § 2:01[2] (3d ed. 1994)); William M. Landes & Richard A. Posner, *Trademark Law: An Economic Perspective*, 30 J.L. & Econ. 265, 265-66 (1987) (arguing that trademarks are justified as promoting economic efficiency).

n132. Denicola, *supra* note 106, at 159.

n133. *Id.* at 160, 172, 183. But see Ramsey, *supra* note 105, at 395 (differentiating between protection doctrines for trademarks as commercial speech and trademarks as noncommercial speech).

n134. Denicola, *supra* note 106, at 160.

n135. Corporations are sensitive to speech protection imbalances when they hinder corporate ability to advance a message. One understanding of the recently decided *Kasky v. Nike, Inc.* case, 45 P.3d 243 (Cal. 2002), cert. dismissed, 539 U.S. 654 (2003), is a claim that "it was unfair that Nike's critics could say almost anything, subject only to the lax constraints of defamation law, while Nike's responses were subject to strict liability for falsehood." Rebecca Tushnet, *Fighting Freestyle: The First Amendment, Fairness, and Corporate Reputation*, 50 B.C. L. Rev. 1457, 1465 (2009) [hereinafter Tushnet, *Fighting Freestyle*].

n136. See Deven R. Desai, *From Trademarks to Brands*, 64 Fla. L. Rev. 981, 1039-40 (2012) (discussing anti-branding and political actions based on corporate policies).

n137. See, e.g., Burk & McDonnell, *supra* note 104, at 352 ("Trademark law contains a substantial component of consumer protection ...").

n138. Cf. *United States v. Alvarez*, 132 S. Ct. 2537, 2544-45 (2012) (plurality opinion) (discussing distinctions in false statement of fact cases and their value to society).

n139. *Va. State Bd. of Pharmacy v. Va. Citizens Consumer Council, Inc.*, 425 U.S. 748, 771-72 (1976); see Tushnet, *Trademark Law*, *supra* note 130, at 737-38.

n140. *Cent. Hudson Gas & Elec. Corp. v. Pub. Serv. Comm'n*, 447 U.S. 557, 563 (1980) (emphasis added).

n141. See Mark A. Lemley & Mark McKenna, *Irrelevant Confusion*, 62 *Stan. L. Rev.* 413, 414 (2010) ("When it works well, trademark law facilitates the workings of modern markets by permitting producers to accurately communicate information about the quality of their products to buyers If competitors can falsely mimic that information, they will confuse consumers, who won't know whether they are in fact getting a high quality product. Indeed, some consumers will be stuck with lemons."). For some, the claim is that when it comes to passing off in trademark, the consumer is ill-equipped to protect herself. See Lillian R. BeVier, *Competitor Suits for False Advertising Under Section 43(a) of the Lanham Act: A Puzzle in the Law of Deception*, 78 *Va. L. Rev.* 1, 20 (1992).

n142. Cf. Rebecca Tushnet, *Truth and Advertising: The Lanham Act and Commercial Speech Doctrine*, in *Trademark Law and Theory: A Handbook of Contemporary Research* 294, 312 (Graeme B. Dinwoodie & Mark D. Janis eds., 2008) (noting that with political speech we "presume a fully rational citizen," but those opposed to regulation "presume a careful and competent consumer," whose conduct is "plainly inconsistent with the behavior of idealized speech-evaluators"); Richard H. Weisberg, *The First Amendment Degraded: Milkovich v. Lorain and a Continuing Sense of Loss on Its 20th Birthday*, 62 *S.C. L. Rev.* 157, 179-80 (2010) (arguing a proper reading of *Sullivan* accepts a thinking, deliberating audience).

n143. 15 U.S.C. § 1125(c)(1) (2012).

n144. *Id.* § 1125(c)(2)(A).

n145. See Rebecca Tushnet, *Gone in Sixty Milliseconds: Trademark Law and Cognitive Science*, 86 *Tex. L. Rev.* 507, 564 (2008) [hereinafter *Tushnet, Gone in Sixty Milliseconds*].

n146. 15 U.S.C. § 1125(c)(1).

n147. Tushnet, *Gone in Sixty Milliseconds*, *supra* note 145, at 514.

n148. See Barton Beebe, *A Defense of the New Federal Trademark Antidilution Law*, 16 *Fordham Intell. Prop. Media & Ent. L.J.*, 1143, 1157-58 (2006).

n149. See Sandra L. Rierson, *The Myth and Reality of Dilution*, 11 *Duke L. & Tech. Rev.* 212, 214 (2012) ("Properly viewed, the federal dilution statute is a legislative precursor to the type of corporate personification underlying the Supreme Court's analogous treatment of corporate speech under the First Amendment in *Citizens United* and is equally misplaced." (footnote omitted)).

n150. *Tavoulareas v. Piro*, 817 F.2d 762, 772 (1987) (en banc) (quoting *Waldbaum v. Fairchild Publ'ns, Inc.*, 627 F.2d 1287, 1293 (D.C. Cir. 1980)) (internal quotation marks omitted).

n151. See, e.g., Mark P. McKenna, *Testing Modern Trademark Law's Theory of Harm*, 95 *Iowa L. Rev.* 63, 117 (2009).

n152. 15 U.S.C. § 1125(c)(1) (2012). Federal dilution law has been revised since its initial passage in 1995. Under the revision, a claim may still only be brought by the holder of a famous mark, but the junior user's use must be "likely to cause dilution by blurring or dilution by tarnishment of the famous mark" for there to be a remedy under the cause of action. See *id.*

n153. See Tushnet, *Trademark Law*, *supra* note 130, at 738.

n209. *Id.* at 271.

n210. *Id.*

n211. *Id.* at 272-73.

n212. *Id.* at 282 (recognizing "the utterance of a federal official to be absolutely privileged if made 'within the outer perimeter' of his duties" (quoting *Barr v. Mateo*, 360 U.S. 564, 575 (1959))).

n213. *Id.* at 282-83 (emphasis added).

n214. See *id.* at 304-05 (Goldberg, J., concurring in the result).

n215. *Id.* (arguing that even in the face of "unsubstantiated opinions or deliberate misstatements," a public official should and could engage in counter-speech because she could avail herself of her "equal if not greater access than most private citizens to media of communication").

n216. *Id.* at 304.

n217. *Sorrell v. IMS Health Inc.*, 131 S. Ct. 2653, 2664 (2011); *Citizens United v. Fed. Election Comm'n*, 558 U.S. 310, 353-54 (2010).

n218. See *Citizens United*, 558 U.S. at 350-52, 364 ("There is no precedent supporting laws that attempt to distinguish between corporations which are deemed to be exempt as media corporations and those which are not.").

n219. Both the opinion by Justice Kennedy, which three Justices joined, and the concurring opinion by Justice Breyer, which one Justice joined, look to more information and corrective speech as better ways to solve inaccurate statements than bans on false speech. *United States v. Alvarez*, 132 S. Ct. 2537, 2549 (2012) (plurality opinion); *id.* at 2556 (Breyer, J., concurring).

n220. *Id.* at 2554 (Breyer, J., concurring) ("Statutes prohibiting trademark infringement present, perhaps, the closest analogy to the present statute."). Justice Breyer makes the connection between trademark law and the case but conflates confusion doctrine and dilution doctrine.

n221. See, e.g., Sandra L. Rierson, IP Remedies After eBay: Assessing the Impact on Trademark Law, 2 Akron Intell. Prop. J. 163, 164 (2008) ("In trademark law, like patent law (at least prior to the eBay decision), the case law reflects a strong presumption that injunctive relief goes hand-in-hand with a finding of liability - either in the form of trademark infringement or, more recently, dilution.").

n222. Alvarez, 132 S. Ct. at 2545 (plurality opinion).

n223. Id. at 2545-49.

n224. Id. at 2549.

n225. Id.; id. at 2560 (Alito, J., dissenting).

n226. Citizens United v. Fed. Election Comm'n, 558 U.S. 310, 354 (2010) (quoting McConnell v. Fed. Election Comm'n, 540 U.S. 93, 25758 (2003)).

n227. Id. (quoting United States v. Congress of Indus. Orgs., 335 U.S. 106, 144 (1948)).

n228. Accord Tushnet, *Gone in Sixty Milliseconds*, supra note 145, at 56 ("Dilution is a doctrine that favors meanings approved by established producers above meanings offered by challengers... [To] the extent that truthful commercial speech promotes democratic values, [it is] antidemocratic.").

n229. Cf. Tushnet, *Trademark Law*, supra note 130, at 749 ("If it is true that commercial speech is as relevant and vital to modern citizens as political speech, then suppressing competition is analogous to silencing political opponents and certainly merits skepticism. Like partisan officials deciding which political speech to pursue, trademark owners may see harm where there is only competition.").

n230. Tushnet, *Running the Gamut*, *supra* note 175, at 1360.

n231. See, e.g., *Bose Corp. v. Consumers Union of U.S., Inc.*, 466 U.S. 485, 503-04 (1984) ("The First Amendment presupposes that the freedom to speak one's mind is not only an aspect of individual liberty - and thus a good unto itself - but also is essential to the common quest for truth and the vitality of society as a whole.").

n232. Cf. *Post*, *supra* note 55, at 34 ("Democratic legitimation requires that the speech of all persons be treated with toleration and equality. Democratic competence, by contrast, requires that speech be subject to a disciplinary authority that distinguishes good ideas from bad ones.").

n233. See *supra* Part II.A.

n234. See, e.g., *St. Amant v. Thompson*, 390 U.S. 727, 732 (1968) ("But to insure the ascertainment and publication of the truth about public affairs, it is essential that the First Amendment protect some erroneous publications as well as true ones.").

n235. *New York Times Co. v. Sullivan*, 376 U.S. 254, 280 (1964).

n236. *Harte-Hanks Commc'ns, Inc. v. Connaughton*, 491 U.S. 657, 666 (1989).

n237. *Id.* at 667 ("If a profit motive could somehow strip communications of the otherwise available constitutional protection, our cases from *New York Times* to *Hustler Magazine* would be little more than empty vessels.").

n238. *Id.* (citations omitted) (quoting *Garrison v. Louisiana*, 379 U.S. 64, 74 (1964); *St. Amant*, 390 U.S. at 730).

n239. Alvarez, however, points to a preference for corrective speech rather than a ban, even when an outright lie is the issue. *United States v. Alvarez*, 132 S. Ct. 2537, 2549 (2012) (plurality opinion). Lyrrisa Lidsky has argued that the standard undermines actual malice's power when applied to non-media defendants and offers the opinion that privilege is an alternative defense for non-media speakers. See Lidsky, *supra* note 71, at 915-18. Relying on fact and opinion distinctions means that the gross, hyperbolic statement is protected and misstatement of fact, a key part of what Sullivan protected, is lost. See Weisberg, *supra* note 142, at 183. Reliance on the fact-opinion distinction reverts the law to the pre-Sullivan era and demands truth-testing. *Id.* Truth-testing is part of the way that current corporate reputation laws thwart speech. Applying actual malice to corporate public figures allows the sort of aggressive claims and misstatement of facts at issue in *Sullivan* and *Citizens United* and avoids the truth-testing problems the opinion inquiry raises. It also maps to the idea that the audience is able to sort statements to find the truth. See *id.*; *infra* notes 312-17 and accompanying text.

n240. See 2 Robert D. Sack, *Sack on Defamation* § 13:1.1 (4th ed. 2011).

n241. See, e.g., *Unelko Corp. v. Rooney*, 912 F.2d 1049, 1057-58 (9th Cir. 1990) (trade libel); *SCO Group, Inc. v. Novell, Inc.*, 692 F. Supp. 2d 1287, 1296 (D. Utah 2010) (slander of title); see also Brief of Professors Eugene Volokh and James Weinstein as Amici Curiae in Support of Petitioner at 5, *United States v. Alvarez*, 132 S. Ct. 2537 (2012) (No. 11-210).

n242. See Restatement (Second) of Torts § 623A cmt. d (1977); 2 Sack, *supra* note 240, § 13:1.4 ("A public plaintiff probably must, under the First Amendment, prove 'actual malice' in a disparagement case as in a libel or slander case.").

n243. 2 Sack, *supra* note 240, § 13:2.

n244. See Tushnet, *Fighting Freestyle*, *supra* note 135, at 1475 n.82 ("The language barring falsity and misleading representation is the same in the statute, and courts have interpreted both provisions to require a showing of likely deception.").

n245. See 2 Sack, *supra* note 240, § 13:2.

n246. Tushnet, *Fighting Freestyle*, *supra* note 135, at 1479.

n247. See Rebecca Tushnet, *It Depends on What the Meaning of "False" Is: Falsity and Misleadingness in Commercial Speech Doctrine*, 41 Loy. L.A. L. Rev. 227, 257 (2007) ("The consequence of turning false advertising law into a subtopic of First Amendment law would be a substantial, possibly near-total, contraction of its scope.").

n248. Cf. *id.* ("Advocates of full constitutional protection for commercial speech need to explain what they mean when they say that commercial fraud would still be actionable in their proposed constitutional regime.").

n249. Cf., e.g., Code of Conduct: Environment and Sustainability, Caterpillar, <http://www.caterpillar.com/company/strategy/code-of-conduct/commitment/environment-and-sustainability> (last visited Nov. 2, 2013) ("We strive to create stockholder value by providing customers with solutions that improve the sustainability of their operations.").

n250. See, e.g., Blake Sobczak, *Caterpillar Pulled from Social Indexes*, Associated Press, June 27, 2012, available at <http://bigstory.ap.org/article/caterpillar-pulled-social-indexes> (describing Israeli military's use of "armor-plated Caterpillar bulldozers to raze Palestinian houses").

ARTICLE: AMENDING THE ECONOMIC ESPIONAGE ACT TO REQUIRE THE DISCLOSURE OF NATIONAL SECURITY-RELATED TECHNOLOGY THEFTS

NAME: David Orozco+

BIO:

+ Assistant Professor of Legal Studies, The College of Business, Florida State University, dorozco@fsu.edu. The author appreciates the feedback received at the Florida State University's Center for Insurance Research, and the Academy of Legal Studies in Business 2012 Annual Conference.

LEXISNEXIS SUMMARY:

... To complicate matters, foreign, state-sponsored actors commit trade secret theft using increasingly sophisticated data collection techniques. ... International Trade Commission, the Federal Circuit Court of Appeals affirmed the ITC's authority under Section 337 to apply domestic law to trade secret misappropriation occurring outside of the United States if the products related to those trade secrets were imported into the United States. ... The general reaction following Caremark was that directors would face greater liability for deficient oversight of business performance, such as the mismanagement of trade secrets. ... Accordingly, because of the increasing technological competence and sophistication of foreign states and organizations, export control laws should regulate not only actual goods, but also the technology behind these goods. ... Mandated disclosure would help to address the underreporting of foreign trade secret theft, which impedes the EEA's goal of deterrence; inspire better trade secret management practices; protect whistleblowers from retaliation by their employers retaliation; and encourage cooperation between companies that develop sensitive technologies and federal law enforcement agencies, which is necessary to safeguard the nation's critical infrastructure and knowledge-based assets.

TEXT:

[*878] Emerging trends indicate that the pace of economic espionage and trade secret theft against U.S. corporations is accelerating. There appears to be multiple vectors of attack for persons and governments seeking to steal trade secrets. Foreign competitors of U.S. corporations, some with ties to foreign governments, have increased their efforts to steal trade secret information through the recruitment of current or former employees. Additionally, there are indications that U.S. companies, law firms, academia, and financial institutions are experiencing cyber intrusion activity against electronic repositories containing trade secret information. Trade secret theft threatens American businesses, undermines national security, and places the security of the U.S. economy in jeopardy. These acts also diminish U.S. export prospects around the globe and put American jobs at risk.

As an Administration, we are committed to continuing to be vigilant in addressing threats--including corporate and state sponsored trade secret misappropriation--that jeopardize our status as the world's leader for innovation and creativity. ⁿ¹

The White House issued this statement regarding its strategy to combat trade secret theft in February of 2013. ⁿ² This new strategy emphasizes the growing problem of foreign state-sponsored data breaches. ⁿ³ Recently, private companies and government agencies--ranging from Google to the U.S. [*879] Chamber of Commerce--have reported network breaches by overseas entities seeking to gain access to strategic information. ⁿ⁴

The increasing vulnerability of domestic networks to state-sponsored groups underscores the related problem of trade secret theft committed by foreign actors. ⁿ⁵ Overseas-based trade secret theft poses increasing financial and security risks to the United States. ⁿ⁶ Although measuring specific loss is almost impossible, trade secret theft costs the United States between two and four hundred billion dollars annually. ⁿ⁷ Despite its financial significance, trade secret theft goes largely unnoticed because it is widely under-reported. ⁿ⁸ The various laws in place to protect trade secrets are ineffective due to the unavailability of a private cause of action, which impedes enforcement. ⁿ⁹

[*880] To complicate matters, foreign, state-sponsored actors commit trade secret theft using increasingly sophisticated data collection techniques. ⁿ¹⁰ Some actors actively target technologies that directly affect national security. ⁿ¹¹ Digital information, cultural attitudes favoring open access to information and transparency, use of the Internet and mobile devices to communicate sensitive information, and the outsourcing and globalization of business all contribute to the increase of both domestic and foreign trade secret theft. ⁿ¹²

Given the serious risk and greater frequency of data breaches, policymakers have begun to take on a more active regulatory and oversight role. For example, U.S. Senator Joe Lieberman proposed legislation to protect critical infrastructure from a cyber warfare attack. ⁿ¹³ Similarly, Congress recently approved increased criminal penalties for trade secret theft. ⁿ¹⁴ Finally, in 2011, U.S. Senator Chris Coons and former U.S. Senator Herb Kohl proposed additional legislation to provide a federal private cause of action for companies harmed by trade secret theft. ⁿ¹⁵

[*881] Furthermore, the Office of the National Counterintelligence Executive (ONCIX), which coordinates with several agencies and branches of government to track the impact of industrial espionage on American competitiveness and security, ⁿ¹⁶ reported to Congress that trade secret theft through cyber technology "represent[s] significant and growing threats to the nation's prosperity and security." ⁿ¹⁷ ONCIX's findings reinforce the government's interest in cyber security and emphasize the need for the recently proposed and enacted legislation.

Defense-related technologies are a prime target for trade secret theft. For example, the Department of Defense (DOD) conducts approximately \$ 400 billion in business with private defense contractors annually, which provides access to and allows contractors to collect and maintain sensitive information and intellectual property. ⁿ¹⁸ Consequently, the DOD requires contractors to file suspicious contact reports whenever they encounter activity that signals a possible threat. ⁿ¹⁹ However, although private contractors working with the DOD are frequently targeted, only ten percent of contractors actually file reports when they detect suspicious activity. ⁿ²⁰ This scenario is troubling because if trade secret theft victims fail to report the crime, regulatory laws will not be enforced and harmful activity will not be deterred. ⁿ²¹

To ameliorate the harmful effects of the under-enforcement of trade-secret theft penalties and network vulnerabilities, this Article proposes an amendment to the Economic Espionage Act of 1996 (EEA), a federal statute that criminalizes industrial espionage and trade secret theft. ⁿ²² The proposed [*882] amendment to the EEA seeks to make two changes to the existing law. First, the proposed amendment imposes both civil and criminal penalties for the failure to report trade secret theft involving technology restricted by export control laws. Second, the proposed amendment establishes a whistleblower defense to encourage parties to report suspected trade secret thefts or violations of the duty to disclose.

Part I of the Article discusses the federal and state laws that protect trade secrets and the nexus between trade secrets and national security. Part II demonstrates that the existing laws are largely unsuccessful in preventing, deterring, or remedying trade secret theft against U.S. companies. Part II also examines the tension between the duty to preserve confidential information under agency law and the immunity granted to officers and directors under the fiduciary oversight doctrine developed by the Delaware courts. Part III discusses the policy justifications for amending the EEA to impose an affirmative duty to report suspected trade secret thefts. Finally, Part IV discusses the proposed amendment to the EEA and the expected positive impact that this change will have on trade secret management practices.

I. TRADE SECRET LAW AND THE RELATIONSHIP BETWEEN TRADE SECRETS AND NATIONAL SECURITY

Trade secrets are a form of intellectual propertyⁿ²³ that dates to the Middle Ages.ⁿ²⁴ The term "trade secret" encompasses a broad spectrum of information that can include customer lists,ⁿ²⁵ technical data,ⁿ²⁶ recipes,ⁿ²⁷ and methods of [*883] conducting business.ⁿ²⁸ Trade secrets can be critical intangible assets in a knowledge-based economy.ⁿ²⁹ Companies expend considerable resources to generate and protect trade secrets,ⁿ³⁰ especially information that is valuable, rare, inimitable, and non-substitutable (VRIN).ⁿ³¹ A VRIN resource has the potential to generate long-term and sustainable competitive advantage for companies.ⁿ³²

Theft of a company's trade secrets can occur in two ways: (1) inbound trade secret theft, and (2) outbound trade secret theft.ⁿ³³ Inbound trade secret theft occurs when trade secrets are brought into a company, with or without the company's knowledge.ⁿ³⁴ Outbound trade secret theft, conversely, occurs when a company's own trade secrets leave the company without its consent.ⁿ³⁵ This Article is primarily concerned with imposing an affirmative duty to disclose outbound trade secret theft.

[*884] *A. Regulation of Trade Secrets and Protection Against Trade Secret Misappropriation*

1. Federal Law

a. The Economic Espionage Act

The EEA was enacted in 1996 as a response to the rising economic value of information, the lack of adequate federal criminal sanctions, and the inability of state criminal laws to deter trade secret theft.ⁿ³⁶ The EEA was also meant to address the rise in post-Cold War, state-sponsored industrial espionage.ⁿ³⁷ The Federal Bureau of Investigation (FBI) estimated that, at the time the EEA was enacted, nearly twenty-five countries had developed methods by which to illegally acquire the United States' industrial secrets.ⁿ³⁸

Under the EEA, a "trade secret" encompasses "all forms and types of financial, business, scientific, technical, economic, or engineering information."ⁿ³⁹ This type of information includes "patterns, plans, compilations, program devices, formulas, designs, prototypes, methods, techniques, processes, procedures, programs, or codes, whether tangible or intangible, and whether or how stored, compiled, or memorialized physically, graphically, photographically, or in writing."ⁿ⁴⁰ This information only qualifies as a trade secret if "(A) the owner thereof has taken reasonable measures to keep such information secret; and (B) the information derives independent economic value, actual or potential, from not being generally known to, and not being readily ascertainable through proper means by, the public."ⁿ⁴¹

The EEA criminalizes misappropriation of information that meets the statutory criteria of a trade secret.ⁿ⁴² The EEA prohibits both the theft of trade secrets, undertaken by either domestic or foreign actors,ⁿ⁴³ as well as industrial espionage committed for the benefit of foreign state actors.ⁿ⁴⁴ Although the EEA authorizes the Department of Justice (DOJ) to initiate civil proceedings to enjoin violations of the Act, it does not create a private cause of action for the aggrieved parties.ⁿ⁴⁵ Consequently, victims of misappropriation must work with the U.S. Attorney's Office to obtain relief. Penalties for misappropriating [*885] trade secrets include imprisonment and fines assessed against the

offending individuals and organizations. ⁿ⁴⁶ Congress recently amended the EEA to increase its monetary penalties for misappropriation. ⁿ⁴⁷

b. The International Trade Commission and Section 337 of the Tariff Act of 1930

Under Section 337 of the Tariff Act of 1930, the International Trade Commission (ITC) has the authority to consider unfair trade practices, including trade secret misappropriation involving imported products. ⁿ⁴⁸ In *TianRui Group Co. v. International Trade Commission*, the Federal Circuit Court of Appeals affirmed the ITC's authority under Section 337 to apply domestic law to trade secret misappropriation occurring outside of the United States if the products related to those trade secrets were imported into the United States. ⁿ⁴⁹ Commentators largely agree that the ITC is a more attractive, expedient, and powerful regulator of foreign trade secret theft, particularly for larger companies that can shoulder the litigation expenses. ⁿ⁵⁰ Indeed, if the ITC rules in favor of the trade secret owner, it may issue an "exclusionary order" that prevents the defendant from shipping the implicated goods into the United States. ⁿ⁵¹ However, the ITC is not likely to play an adjudicatory role in cases affecting national security, which involve information that will benefit a [*886] foreign state rather than information that can be used to develop or influence export markets. ⁿ⁵² Misappropriation of information relating to national security is outside of the exclusive jurisdiction of the ITC. ⁿ⁵³

c. The Computer Fraud and Abuse Act

The Computer Fraud and Abuse Act (CFAA) is a federal statute that criminalizes a broad range of actions related to the unauthorized access of a protected computer, or a computer used in or affecting interstate or foreign commerce. ⁿ⁵⁴ The CFAA criminalizes, *inter alia*, the unauthorized use of a protected computer to obtain information or to commit fraud. ⁿ⁵⁵ The statute imposes both criminal and civil penalties, including compensatory damages and equitable relief for the wronged parties. ⁿ⁵⁶ The CFAA has a broad scope, as it prohibits the unauthorized access of a computer, regardless of whether the computer stores trade secret information. ⁿ⁵⁷

Additionally, the CFAA specifically criminalizes the use of a protected computer to obtain national security information. ⁿ⁵⁸ 18 U.S.C. § 1030(a)(1) [*887] prohibits the use of a protected computer without authorization or in excess of authorization and the subsequent willful supply of the information obtained to an unauthorized recipient. ⁿ⁵⁹ The statute also prohibits the willful retention of that information. ⁿ⁶⁰ However, despite the CFAA's national security provision, the statute is rarely used to prosecute national security cases because, according to the DOJ, other anti-espionage statutes offer a better precedential foundation and broader enforcement coverage. ⁿ⁶¹

2. State Law

Each state has enacted laws, both statutorily and judicially, that protect trade secrets. ⁿ⁶² Trade secret protection largely depends on the state's substantive definition of a trade secret and the actions that constitute a violation of the property rights to a trade secret, or the "misappropriation" of the trade secret. ⁿ⁶³

Forty-six states have adopted the Uniform Trade Secrets Act (UTSA) to define, regulate, and protect trade secrets. ⁿ⁶⁴ Under the UTSA, a trade secret is information that

[*888] derives independent economic value, actual or potential, from not being generally known to, and not being readily ascertainable by proper means by, other persons who can obtain economic value from its disclosure or use, and [] is the subject of efforts that are reasonable under the circumstances to maintain its secrecy. ⁿ⁶⁵

The "information" in question can be "a formula, pattern, compilation, program, device, method, technique, or process." ⁿ⁶⁶ A trade secret under the UTSA largely parallels the definition of a trade secret in the EEA. ⁿ⁶⁷

Although there is little state law that protects against outbound theft, all states impose civil penalties for inbound

trade secret theft. ⁿ⁶⁸ For example, trade secrets can be misappropriated in a UTSA jurisdiction in two ways. First, misappropriation may constitute "acquisition of a trade secret of another by a person who knows or has reason to know that the trade secret was acquired by improper means. ⁿ⁶⁹ Second, a trade secret is misappropriated if it is disclosed

without express or implied consent by a person who

(A) used improper means to acquire knowledge of the trade secret; or

(B) at the time of disclosure or use, knew or had reason to know that his knowledge of the trade secret was

(I) derived from or through a person who had utilized improper means to acquire it;

(II) acquired under circumstances giving rise to a duty to maintain its secrecy or limit its use; or

(III) derived from or through a person who owed a duty to the person seeking relief to maintain its secrecy or limit its use; or

(C) before a material change of his [or her] position, knew or had reason to know that it was a trade secret and that knowledge of it had been acquired by accident or mistake. ⁿ⁷⁰

Acquiring a trade secret by "improper means" includes "theft, bribery, misrepresentation, breach or inducement of a breach to maintain secrecy, or [*889] espionage through electronic or other means." ⁿ⁷¹ The definition of misappropriation under the UTSA is narrower than its counterpart in the EEA. ⁿ⁷²

Although they have not adopted the UTSA, Massachusetts, ⁿ⁷³ New York, ⁿ⁷⁴ North Carolina, ⁿ⁷⁵ and Texas ⁿ⁷⁶ each regulate trade secret misappropriation in a similar way. Many states have also enacted statutes that criminalize trade secret theft; however, there are significant obstacles to enforcing these statutes, including limited state budgets and jurisdiction that is restricted by the state's borders. ⁿ⁷⁷

[*890] 3. *Private Protection of Trade Secrets*

In addition to the common law and state and federal statutory regimes designed to deter and rectify trade secret theft, owners of sensitive information often use private legal and non-legal mechanisms to preemptively secure information. For example, companies often employ non-disclosure agreements, confidentiality agreements, and covenants-not-to-compete to add layers of protection to their confidential data. ⁿ⁷⁸ Additionally, companies may use property systems such as patents or copyrights, in conjunction with trade secrets, to increase information security. ⁿ⁷⁹ Finally, companies may use non-legal mechanisms used to protect trade secrets, such as well-designed human resource and compliance systems, ⁿ⁸⁰ protected networks, and encryption devices. ⁿ⁸¹

B. National Security Implications

According to ONCIX, trade secret theft by foreign agents has clear and significant implications for national competitiveness because many of the country's most profitable and rapidly-growing industries are targeted for trade secret theft. ⁿ⁸² For example, ONCIX states that clean technologies--energy -generating technologies that reduce carbon dioxide emissions--are highly valued targets for acquisition. ⁿ⁸³ Clean technologies have been linked to long-term energy security, ⁿ⁸⁴ and investments in these technologies have grown quickly as a result. ⁿ⁸⁵ Similarly, pharmaceuticals, nanotechnology, and agricultural technologies--all of which are industries characterized by high [*891] research and development costs--are also targeted frequently for theft. ⁿ⁸⁶ Loss of trade secrets in these quickly-evolving areas of business has a direct impact on national competitiveness. As one government enforcement official explained, "[w]e've already lost our manufacturing base. . . . Now we're losing our R. & D. base. If we lose that, what do we fall back on?" ⁿ⁸⁷

Trade secrets also significantly affect national security if they relate to classified information or information pertaining to military technologies. ONCIX stated that the "illicit transfer of technology with military applications to a hostile state [or organization] could endanger the lives of US and allied military personnel." ⁿ⁸⁸ Some military technologies are especially susceptible to trade secret theft; for example, according to ONCIX and the DOD,

Autonomous Underwater Vehicles (AUVs) are routinely targeted for theft. ⁿ⁸⁹

Many technologies related to national security are categorized as dual-use technologies, or technologies that can be used for both military and non-military purposes. ⁿ⁹⁰ Consequently, many dual-use technologies are regulated under export control laws rather than trade secret laws. For example, the Export Administration Act of 1979 authorizes the President to control U.S. exports for the purpose of national security. ⁿ⁹¹ The Department of Commerce's Bureau of Industry Security (BIS) is responsible for administering and enforcing the Export Administration Act. ⁿ⁹²

[*892] The Department of Commerce defines an export as "any item that is sent from the United States to a foreign destination." ⁿ⁹³ Under the Department's regulations, the method of exportation is immaterial; the item may be classified as an export if it is sent via regular mail, hand carry, facsimile, the Internet, by telephone, or delivered in person. ⁿ⁹⁴ Because trade secret theft is increasingly committed by foreign actors targeting a broad array of technologies that are regulated by export controls, many thefts have, as a practical matter, the same effect as the unauthorized exportation of goods. ⁿ⁹⁵

The BIS has the authority to regulate military technologies, dual-use technologies, and even some purely commercial technologies with export controls. ⁿ⁹⁶ Regulated technologies are categorized with an Export Control Classification Number (ECCN), which identifies items based on the nature of the product. ⁿ⁹⁷ ECCNs allow exporters to determine the "reasons for control," which transactions require an export license (based on the country of destination), and which license exceptions, if any, apply. ⁿ⁹⁸

II. THE CHALLENGES OF ENFORCING TRADE SECRET MISAPPROPRIATION LAWS

A. Under-Enforcement

Trade secrets can be difficult to manage and protect. First, the protection of trade secrets hinges on fiduciary relationships, which trigger mutual and corresponding duties. ⁿ⁹⁹ Unlike patents, trademarks, designs, and copyrights, the safeguarding of trade secrets largely depends on individuals' ability to uphold the legal duties that arise from fiduciary relationships. ⁿ¹⁰⁰

[*893] Trade secrets, like other intangible assets, are non-excludable; ⁿ¹⁰¹ absent vigorous monitoring and expensive judicial enforcement, trade secrets are freely accessible. ⁿ¹⁰² To successfully plead trade secret misappropriation, the plaintiff must overcome a defense of independent derivation, under which the defendant claims that he discovered the trade secret through reverse engineering, or through other permissible means. ⁿ¹⁰³ The burden is also on the plaintiff to prove that he expended reasonable efforts to preserve secrecy. ⁿ¹⁰⁴ This standard can be challenging to satisfy in cases in which the plaintiff [*894] created the protected information with the help of third parties, especially if the value of the information has appreciated over time. ⁿ¹⁰⁵

Similarly, significant hurdles impede the enforcement of criminal trade secret laws. Indeed, many believe that the DOJ imposes substantial prerequisites for enforcement under the EEA. ⁿ¹⁰⁶ According to some accounts, U.S. attorneys' offices have imposed a six- or seven-figure loss requirement as a precondition for prosecution. ⁿ¹⁰⁷ The DOJ is also hesitant to criminally prosecute cases unless a civil remedy is unavailable. ⁿ¹⁰⁸ Additionally, there are several other factors that discourage parties from pursuing an EEA claim, such as the higher burden of proof necessary to criminally convict under the EEA, the possibility of a lengthy grand jury investigation, the federal government's exclusive management of important litigation issues, the forfeiture of the attorney-client privilege and work-product immunity afforded by civil trials, and the lack of monetary damages. ⁿ¹⁰⁹ These restrictions may prevent firms from reporting trade secret theft, compounding the public safety concerns surrounding the theft of information affecting national security.

Despite the difficulty in addressing trade secret theft, civil litigation of domestic trade theft is on the rise, demonstrating the importance of trade secret information. ⁿ¹¹⁰ However, this increase reflects only domestic civil suits, not claims brought under the EEA. ⁿ¹¹¹ Indeed, although ONCIX reports that trade [*895] secret theft by foreign

actors is growing at a considerable pace,ⁿ¹¹² this type of trade secret theft is rarely prosecuted.ⁿ¹¹³ The restrictions imposed by the DOJ and the EEA itself likely discourage injured parties from reporting violations and from using the statute as an enforcement mechanism. The failure to report trade secret theft and to enforce trade secret laws, in turn, motivates trade secret thieves to continue engaging in this profitable activity.ⁿ¹¹⁴

B. Market Failures

Given their status as valuable property rights, the marketplace should, in theory, provide adequate incentives to safeguard and enforce trade secrets. Evidence indicates that, although prosecution of domestic trade secret thefts has increased, cases involving foreign actors remain unenforced.ⁿ¹¹⁵ This disparity, according to a market efficiency theory, is caused by (1) cross-border enforcement costs; (2) negative reputational impact; and (3) inadequate information technology (IT) and compliance capabilities.

1. Cross-Border Enforcement Costs

Pursuing civil remedies in foreign trade secret theft cases under the EEA is often prohibitively expensive. First, the complexities that arise during the discovery process can significantly raise litigation costs.ⁿ¹¹⁶ To further complicate matters, each country has its own trade secret law and hiring local counsel with adequate knowledge of a foreign jurisdiction's legal system and [*896] paying for translation services can raise costs substantially.ⁿ¹¹⁷ Similarly, attempting to gather evidence abroad can pose unique challenges that require patience, creativity, and significant resources.ⁿ¹¹⁸

Because it is so difficult to litigate, foreign trade secret theft is best reserved for federal authorities to address under the appropriate criminal statutes and with the aid of government intelligence information and enforcement mechanisms. The U.S. government is especially interested in discovering the sources of the theft of sensitive information because of the national security concerns.ⁿ¹¹⁹ The U.S. government, unlike private companies, has the intelligence capabilities needed to uncover the sources of this theft.ⁿ¹²⁰ Private companies, on the other hand, are either unable to trace the party's identity or unwilling to do so.ⁿ¹²¹ It is also increasingly difficult for private companies to distinguish between cyber crime, trade secret theft, and the collection of economic or technological information by foreign intelligence services.ⁿ¹²²

2. Reputational Costs

When a company discovers that a trade secret has been stolen, more often than not the company will choose not to seek legal remedy. According to ONCIX, a company may keep a security breach private because it could "tarnish a company's reputation and endanger its relationships with its investors, bankers, suppliers, customers and other stakeholders."ⁿ¹²³ An empirical study using an event study methodology confirmed that the value of a publicly traded company can decrease by millions of dollars when the company announces that it has decided to work with federal officials to prosecute a case under the EEA.ⁿ¹²⁴ Many companies, absent regulations requiring affirmative disclosure, elect to remain silent and allow the theft to go unpunished.ⁿ¹²⁵ Moreover, the unavailability of civil damages under the EEA [*897] to offset these reputational costs provides little incentive for private companies to report theft.ⁿ¹²⁶

3. Inadequate IT and Compliance Capabilities

Some business managers view investment in IT programs as an unnecessary cost.ⁿ¹²⁷ Indeed, companies may reach a level of sophistication at which investment in IT safeguards has a negative impact on the company's ability to compete with market prices.ⁿ¹²⁸ However, IT capabilities have a demonstrably positive effect on business strategy and have a significant impact on a company's bottom line.ⁿ¹²⁹ The perception of investment in IT as a cost driver may, therefore, lead to suboptimal investments in IT capabilities meant to safeguard a company's most valuable technologies and knowledge-based assets.ⁿ¹³⁰

Accordingly, it is crucial for businesses to integrate IT security programs into their top leadership team, as well as

into legal and compliance departments. ⁿ¹³¹ Multifunctional coordination of IT resources is important for security because it can contribute to successful legal outcomes in the event of a breach, ⁿ¹³² as well as to help companies proactively keep track of information moving within and in and out of the organization. ⁿ¹³³ To compound the problem, companies increasingly rely on a "high velocity" and contingent workforce, which may facilitate the movement of sensitive information. ⁿ¹³⁴ The highly mobile state of information in modern business justifies investment [*898] in state-of-the-art IT security programs and the addition of IT representatives to various levels and departments within an organization.

C. Agency-Related Legal Impediments

In addition to market failures and high transaction costs, deficiencies in the general legal framework result in poor management and enforcement of trade secret laws and insufficient reporting of trade secret theft. The two most problematic impediments to the enforcement of trade secret laws are the inadequate protection of whistleblowers and lax corporate governance requirements.

1. Inadequate Protection of Whistleblowers

None of the existing trade secret statutory regimes require a party to report a suspected trade secret theft. ⁿ¹³⁵ Additionally, none of the statutes provide whistleblower protection for an individual who discloses trade secret theft and consequently faces retaliation from his employer. ⁿ¹³⁶

Although the majority of states have enacted laws to shield public employees from retaliation by their employers, few states extend that protection to employees of private companies. ⁿ¹³⁷ Moreover, state whistleblower laws vary significantly in the level of protection offered to employees. ⁿ¹³⁸ Employers are also able to circumvent whistleblower protection laws by hiring at-will employees, who can be fired at any time and for any reason--including purely retaliatory discharge--without exposing the employer to liability. ⁿ¹³⁹

Because there is no affirmative legal duty to disclose trade secret theft, existing state laws largely fail to protect employees who report trade secret theft. Many state whistleblower laws, however, require the disclosure to be of violations of law committed by the employer in order for the employee to qualify for protection from retaliation. ⁿ¹⁴⁰ Consequently, without a duty to [*899] report trade secret theft and corresponding protection for the disclosing employee, an employer is free to take action against employees revealing trade secret theft without violating any law.

Conversely, federal law offers a patchwork of whistleblower protection, but only in cases in which the specific statute grants immunity from retaliation. ⁿ¹⁴¹ The federal law that could offer the most protection to whistleblowers of trade secret misappropriation is Section 806 of the Sarbanes-Oxley Act. ⁿ¹⁴² Section 806 provides a civil remedy to any employee who suffers retaliation for reporting a securities fraud or violation, or the violation of any provision of federal law prohibiting fraud against shareholders. ⁿ¹⁴³ Section 806 applies to companies "with a class of securities registered under Section 12 of the Securities Exchange Act of 1934 . . . or that [are] required to file reports under [*900] Section 15(d) of the Securities Exchange Act of 1934." ⁿ¹⁴⁴ However, Section 806 would likely fail to offer relief to an employee suffering from retaliation by his employer as a consequence of disclosing trade secret theft because the failure to report trade secret misappropriation has never been classified as a fraud on a company's shareholders. ⁿ¹⁴⁵ Furthermore, because Section 806 applies to only the small subset of public companies registered under Section 12, many of the companies most vulnerable to trade secret theft--those companies developing technologies that affect national security--fall outside of the statute's reach. ⁿ¹⁴⁶

2. Ineffective Corporate Fiduciary Law

A basic tenet of American law is that a corporation's directors and executives have a fiduciary duty to the organization. The fiduciary relationship is created by the law of agency, under which the agent agrees to act on the principal's behalf and is subject to the principal's control. ⁿ¹⁴⁷ This relationship creates duties and corresponding rights between the parties. ⁿ¹⁴⁸

Existing corporate fiduciary laws are poorly equipped to address cases involving trade secret theft, particularly those cases involving a foreign state -sponsored entity. Consequently, if a foreign actor misappropriates trade secrets as the result of the breach of a corporate fiduciary duty, there is no adequate safeguard to establish liability.

a. The Business Judgment Rule and Trade Secret Misappropriation

Directors of a corporation are legally required to oversee fundamental transactions, such as the sale of the business, a merger, changes to the capital structure, and the appointment and compensation of the chief executive officer.ⁿ¹⁴⁹ These decisions are fundamental transactions of the corporation and are therefore evaluated under the business judgment rule.ⁿ¹⁵⁰ The business [*901] judgment rule protects the directors or officers if they act with adequate information, in good faith, and with the subjective belief that their action was in the best interests of the corporation.ⁿ¹⁵¹

The business judgment rule rests on the assumption that managers and directors have "skills, information[,] and judgment not possessed by reviewing courts, and [that] there is great social utility in encouraging the allocation of assets and the evaluation and assumption of economic risk by those with such skill and information."ⁿ¹⁵² Generally, courts avoid second-guessing legitimate business decisions.ⁿ¹⁵³ Delaware courts, for example, subscribe to the contractarian approach to corporate governance, which allows companies to determine their rights and responsibilities contractually, rather than rely on the legislature to allocate them statutorily.ⁿ¹⁵⁴

As a consequence of the contractarian approach, Delaware courts apply the business judgment rule only in cases in which corporate directors act affirmatively; cases in which directors simply fail to act fall outside of the [*902] scope of the business judgment rule.ⁿ¹⁵⁵ Delaware courts instead evaluate inaction under the duty of loyalty, which requires plaintiffs to specifically plead that the directors or officers of the corporation intentionally acted against--or chose not to act in--the corporation's best interests.ⁿ¹⁵⁶ Corporate directors or officers are, therefore, free from liability under most state corporate governance laws if they pay only cursory attention to trade secret reporting or management practices, even if they are grossly negligent in their inaction.

b. The Oversight Doctrine and Trade Secret Misappropriation

Corporate governance law related to business processes, such as trade secret management, may also fall under the "oversight doctrine," which has been developed over the years by Delaware courts.ⁿ¹⁵⁷ The oversight doctrine protects directors and some officers from personal liability unless they breach the duty of loyalty owed to the corporation.ⁿ¹⁵⁸

The oversight doctrine stands for the proposition that the duty of loyalty may be breached if a director or officer neglects to impose information and reporting requirements.ⁿ¹⁵⁹ In *In re Caremark*, the Delaware Court of Chancery explained that "a director's obligation includes a duty to attempt in good faith to assure that a corporate information and reporting system . . . exists and that [*903] failure to do so under some circumstances may . . . render a director liable for losses caused by non-compliance with applicable legal standards."ⁿ¹⁶⁰

The general reaction following *Caremark* was that directors would face greater liability for deficient oversight of business performance, such as the mismanagement of trade secrets.ⁿ¹⁶¹ However, the oversight doctrine was narrowed in subsequent cases, and it became clear that oversight issues would be assessed under the higher duty of loyalty standard. Indeed, in *Stone v. Ritter*, the Delaware Supreme Court refined *Caremark's* mandate by outlining the evidence required to establish liability in business-oversight cases.ⁿ¹⁶² *Stone* requires the plaintiff to show that either "(a) the directors utterly failed to implement any reporting or information system or controls; or (b) having implemented such a system or controls, consciously failed to monitor or oversee its operations thus disabling themselves from being informed of risks or problems requiring their attention."ⁿ¹⁶³

However, in practice, the test articulated in *Stone* offers little chance of recovery. If the company has some type reporting system in place, it is not liable unless the plaintiff satisfies the difficult burden of proving that the director intentionally relinquished his monitoring responsibilities.ⁿ¹⁶⁴ Consequently, the oversight doctrine often protects the

director from liability so long as a control system exists, even if trade secret misappropriation or other harm results from an outdated or inadequate oversight mechanism that falls well behind the industry's best practices. ⁿ¹⁶⁵ As explained in *Caremark*, director liability based on the duty of oversight "is possibly the most difficult theory in corporation law upon which a plaintiff might hope to win a judgment." ⁿ¹⁶⁶

[*904] III. POLICY JUSTIFICATIONS FOR AMENDING THE ECONOMIC ESPIONAGE ACT

The gap in the enforcement of trade secret protection laws, especially in situations of foreign trade secret theft, indicates that the EEA should be amended to increase protection of trade secret information. This could best be accomplished by imposing an affirmative duty of disclosure of trade secret misappropriation that affects national security. ⁿ¹⁶⁷

In American jurisprudence, affirmative legal duties are generally an exception to the rule favoring negative duties. ⁿ¹⁶⁸ It is well accepted that a governmental demand to perform is significantly more burdensome than a command to refrain from harmful action. ⁿ¹⁶⁹ As a result, the imposition of an affirmative duty requires strong public policy justifications. ⁿ¹⁷⁰ The public policy justifications for imposing an affirmative duty to disclose trade secret theft are detailed below.

However, it is important to note that American law also recognizes that clearly defining the scope of an affirmative duty to perform minimizes the governmental intrusion. ⁿ¹⁷¹ Here, the duty is clearly defined as a duty to report a trade secret theft if the theft applies to any technology that affects national security. ⁿ¹⁷² This requirement would not impose an obligation to prevent the theft, or correct the harm arising from the theft. Rather, the duty is simply to disclose the theft to an enforcement agency, which would then decide whether to pursue the matter if it involves a state-sponsored attack, a threat to national security, or if it would be useful to intelligence-gathering agencies.

A. Protection of the Public Interest

An affirmative duty to act must be justified by a significant public interest. ⁿ¹⁷³ In the case of trade secret misappropriation, the significant public interest is the substantial value of information and the impact of the theft of that information on public welfare and national security.

Many state governments have recognized the public interest in information security and have imposed affirmative disclosure duties in analogous cases of information theft. For example, several states require companies to disclose [*905] breaches of data security. ⁿ¹⁷⁴ California was the first state to enact such a disclosure requirement with the Security Breach Notification Act. ⁿ¹⁷⁵ Other states followed suit and enacted similar legislation, and now forty-six states impose notification requirements. ⁿ¹⁷⁶ This trend suggests that more, if not all, states will adopt such legislation in the future.

Similarly, several members of Congress recently proposed the Cybersecurity Act of 2012, which was written to protect critical domestic infrastructure from cyber warfare attacks. ⁿ¹⁷⁷ Had Congress passed the Act, it would have imposed an affirmative duty on companies that control critical infrastructure to report any "significant cyber incidents affecting critical cyber infrastructure." ⁿ¹⁷⁸

Additionally, some corporate governance laws impose an affirmative duty on managers in situations in which nondisclosure of information would cause significant harm to the corporation. ⁿ¹⁷⁹ For example, the Sarbanes-Oxley Act requires the Chief Executive Officer (CEO) of an organization to certify the correctness of financial statements and that the company has promulgated adequate internal controls. ⁿ¹⁸⁰ Likewise, the Securities and Exchange Commission (SEC) requires directors to take affirmative steps to ensure that the corporation's communications with the public are truthful. ⁿ¹⁸¹

[*906] B. Protection of Critical Technologies with a Unified National Policy

Adding a disclosure requirement to the EEA would also be consistent with the policy goals of export control laws. Export control laws are aimed at regulating the export of tangible goods to prevent the use of those goods in a manner that may harm national interests. ⁿ¹⁸² From a policy perspective, however, the laws' emphasis on actual goods fails to ensure the protection of the underlying technology involved in creating the goods, allowing for recreation of the goods through reverse engineering. ⁿ¹⁸³

Policymakers are increasingly recognizing the eroding distinction between goods and the underlying technology used to create them, viewing the nation's infrastructure as a combination of tangible and intangible components. ⁿ¹⁸⁴ Accordingly, because of the increasing technological competence and sophistication of foreign states and organizations, ⁿ¹⁸⁵ export control laws should regulate not only actual goods, but also the technology behind these goods. This can be accomplished by amending the EEA. Requiring disclosure of the misappropriation of trade secret information will help to increase protection of the intellectual property associated with the manufacturing of some exported goods.

C. Expansion of Protection for Explicit Knowledge

The importance of explicit knowledge to the modern economy provides additional justification for amending the EEA to address trade secret misappropriation. The rapid evolution toward a knowledge-based economy has had a significant impact on business, society, and national competitiveness. ⁿ¹⁸⁶ One of the key challenges in this environment is to [*907] incentivize innovation, which is accomplished by protecting knowledge-based assets that are non-rivalrous and non-excludable. ⁿ¹⁸⁷ Accordingly, the legal system has evolved to provide some measure of security and efficiency in the marketplace of ideas. ⁿ¹⁸⁸ Enforcement costs and ease of replication, however, pose significant challenges to innovators who wish to protect their intellectual property. ⁿ¹⁸⁹ The problem is compounded when business is conducted overseas in jurisdictions that do not adequately protect knowledge. ⁿ¹⁹⁰

Trade secrets are especially vulnerable to this type of knowledge theft because companies routinely memorialize information. In its tacit form, knowledge is difficult to perceive and replicate. ⁿ¹⁹¹ The information used to develop important technologies, therefore, is often made explicit to extract its full value. ⁿ¹⁹² However, when knowledge is made explicit and recorded, it is substantially easier to misappropriate the information. ⁿ¹⁹³ The codification of trade secret information creates an exact blueprint for replication and, if the information is misappropriated, the technology can easily be "reverse-engineered." ⁿ¹⁹⁴

Lastly, the process of creating a technology is often a key ingredient to using the technology. For example, a manufacturing process may be the main source [*908] of competitive advantage for innovative manufacturing firms. ⁿ¹⁹⁵ If the process is tacit, it can be very difficult to replicate. ⁿ¹⁹⁶ Companies, however, often seek to record processes and business methods to increase the store of knowledge within the company. ⁿ¹⁹⁷ Often, this methodology is classified as a trade secret. ⁿ¹⁹⁸ Consequently, the misappropriation of a process-based technology may completely undermine the company's competitive advantage. ⁿ¹⁹⁹

IV. AMENDING THE ECONOMIC ESPIONAGE ACT TO REQUIRE DISCLOSURE OF TRADE SECRET MISAPPROPRIATION IN CASES INVOLVING NATIONAL SECURITY

The EEA should be amended to require disclosure of suspected outbound trade secret theft. The amendment would read as follows:

No person with reasonable knowledge that a violation of this Act has been or is being committed with respect to technologies that are subject to export regulations shall fail to report such information to a federal law enforcement agency.

Whoever violates this section shall be fined not more than \$ or imprisoned more than years, or both.

The proposed amendment would both serve the policy goals explained above and encourage better data security to protect trade secret information and, as a consequence, national security.

The technologies affected by the amendment are those that qualify as trade secrets under the EEA. ⁿ²⁰⁰ The technologies and products that are regulated by export laws but that are not considered trade secrets by the EEA are excluded by the amendment. Technologies that both qualify as trade secrets under the EEA and are subject to export control, however, are covered by the amendment.

Although some whistleblower laws require *actual* knowledge of a violation, ⁿ²⁰¹ the proposed amendment imposes a lesser mens rea standard by [*909] requiring reasonable knowledge of a violation. Several data security breach and whistleblower statutes impose a similar reasonable knowledge standard. ⁿ²⁰² A reasonable knowledge requirement is appropriate because although trade secret misappropriation can be difficult to ascertain due to the thieves' efforts to conceal the activity, ⁿ²⁰³ there are still indicators that signal trade secret theft. For example, a company's IT department may have knowledge of a data breach that would lead a reasonable person to conclude that trade secrets were accessed or obtained.

The proposed amendment also imposes a substantial penalty on any individual who fails to report a suspected trade secret theft. As with many other white collar offenses, prosecutors may evaluate the defendant's level of culpability and conclude that imposing a fine is more appropriate than criminal penalties. ⁿ²⁰⁴ Likewise, judges may rely on the organizational sentencing guidelines to impose the most effective fine.

Prosecutors may also reach a settlement agreement that defers or avoids criminal prosecution if the defendant agrees to institute a compliance program. ⁿ²⁰⁵ Such compliance programs typically encompass: (1) a written policy related to the legal issue distributed throughout the company; (2) employee training; (3) improved recordkeeping; (4) compliance certification at all organizational levels; (5) internal audits and, sometimes, external monitoring; (6) improved screening of third party agents; and (7) a mechanism for rapid and thorough investigation if the defendant suspects a violation. ⁿ²⁰⁶

The proposed amendment imposes an affirmative duty to report suspected theft to federal enforcement authorities rather than to a superior within the organization. This avoids the harm that might occur if the organization fails to take action. Requiring a party to report the theft directly to a public [*910] enforcement agency such as the FBI ⁿ²⁰⁷ will help to alleviate the problems caused by companies failing to report suspected trade secret theft. ⁿ²⁰⁸

The proposed amendment also protects whistleblowers who comply with the statute's disclosure requirement from retaliation by their employers. Likewise, if an individual within an organization has knowledge that another individual within the organization has violated the amendment by failing to report a suspected trade secret theft, he may alert law enforcement with immunity from retaliation by the organization. Immunity under the amendment is afforded by the existing federal obstruction of justice statute, which states that:

Whoever knowingly, with the intent to retaliate, takes any action harmful to any person, including interference with the lawful employment or livelihood of any person, for providing to a law enforcement officer any truthful information relating to the commission or possible commission of any Federal offense, shall be fined under this title or imprisoned not more than 10 years, or both. ⁿ²⁰⁹

The proposed amendment will also improve data security practice among organizations that develop the affected technologies. Most companies go to great lengths to avoid prosecuting trade secret thefts because of the burdens imposed by the EEA. ⁿ²¹⁰ The proposed amendment provides government enforcement and prosecuting agencies with the opportunity to prosecute previously unreported theft, which in turn will help to improve data security. Increased prosecution of the EEA will signal that lax security practices will likely lead to sanctions under the amendment. ⁿ²¹¹ To avoid the difficulties associated with prosecuting trade secret theft under the EEA, companies will be more willing to increase security to avoid reporting suspected trade secret theft in the first place.

[*911] In sum, organizations would have an additional and powerful incentive to create programs to encourage compliance with the amendment's reporting requirement. ⁿ²¹² Entities that develop technologies relevant to national

security would implement more robust network security programs and better human resource practices in order to safeguard trade secrets and avoid the penalties for failing to report a breach. Additionally, under the federal sentencing guidelines, an organization may implement a compliance program that bolsters data security as part of a settlement agreement with the Department of Justice. ⁿ²¹³

V. CONCLUSION

Trade secret law protects the owner of valuable knowledge from misappropriation of the information by third parties. The current legal regime is largely designed to protect trade secrets from theft by domestic actors. As a consequence, the current regime fails to protect many trade secrets that are stolen by foreign state-sponsored entities. This problem is compounded when the misappropriated trade secrets involve technologies that affect national security.

Amending the EEA to mandate disclosure of suspected trade secret thefts related to any technology that is subject to export restriction would help to protect information relevant to national security. Mandated disclosure would help to address the underreporting of foreign trade secret theft, which impedes the EEA's goal of deterrence; inspire better trade secret management practices; protect whistleblowers from retaliation by their employers retaliation; and encourage cooperation between companies that develop sensitive technologies and federal law enforcement agencies, which is necessary to safeguard the nation's critical infrastructure and knowledge-based assets.

ⁿ⁴ *See* Siobhan Gorman, *China Hackers Hit U.S. Chamber*, WALL ST. J., (Dec. 21, 2011), <http://online.wsj.com/article/SB10001424052970204058404577110541568535300.html> (reporting a cyber attack on the U.S. Chamber of Commerce's computer network, resulting in the theft of "everything stored on its systems"); John Markoff, *Hackers Said to Breach Google*

Password System, N.Y. TIMES, April 20, 2012, at A1, A3 (reporting that Chinese hackers stole Google's intellectual property and compromised the email accounts of two human rights activists in China). As a result of the breach of its password system, Google announced on its security blog that it would alert users if the company suspected that a cyber attack had compromised any of its users' Gmail accounts. Eric Grosse, *Security Warnings for Suspected State-Sponsored Attacks*, GOOGLE ONLINE SECURITY BLOG (June 5, 2012, 12:04 PM), <http://google/onlinesecurity.blogspot.com/2012/06/security-warnings-for-suspected-state.html>. According to Google's Vice President of Security Engineering,

[w]e are constantly on the lookout for malicious activity on our systems, in particular attempts by third parties to log into users' accounts unauthorized. When we have specific intelligence--either directly from users or from our own monitoring efforts --we show clear warning signs and put in place extra roadblocks to thwart these bad actors.

Today, we're taking that a step further for a subset of our users, who we believe may be the target of state-sponsored attacks. . . .

You might ask how we know this activity is state-sponsored. We can't go into the details without giving away information that would be helpful to these bad actors, but our detailed analysis--as well as victim reports--strongly suggest the involvement of states or groups that are state-sponsored.

n51 19 U.S.C. § 1337(d)(1) ("If the Commission determines, as a result of an investigation under this section, that there is a violation of this section, it shall direct that the articles concerned, imported by any person violating the provision of this section, be excluded from entry into the United States, unless, after considering the effect of such exclusion upon the public health and welfare, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, and United States consumers, it finds that such articles should not be excluded from entry."); see also Colleen V. Chien & Mark A. Lemley, *Patent Holdup, The ITC, and the Public Interest* 105, 122 (Stanford Law School. Working Paper No. 2022168, 2012), available at http://papers.ssrn.com/sol3/papers.cfm?abstract_id=2022168 (arguing that the ITC should apply economic and public policy analyses to its exclusion order decisions).

n52 See ADMINISTRATION STRATEGY, *supra* note 1, Appx. B (describing several cases of trade secret theft and economic espionage involving technical military data stolen to improve Chinese defense systems); ONCIX REPORT, *supra* note 3, at 4-5 (noting that foreign actors, especially from China and Russia, focus their economic espionage and trade secret misappropriation efforts on information related to national security and military intelligence).

n53 See 19 U.S.C. § 1337 (delineating the authority of the ITC to investigate import violations that affect the industry and commerce of the United States).

n54 Computer Fraud and Abuse Act of 1984, Pub. L. No. 98-473, 98 Stat. 2190-91 (codified at 18 U.S.C. § 1030 (2006)) (criminalizing unauthorized access of a computer containing sensitive information). Specific reference to "protected computers" was added to § 1030 in 1996. Economic Espionage Act of 1996. Pub. L. No 104-294, § 201, 110 Stat. 3488, 3491-92 (codified at 18 U.S.C. § 1030). A "protected computer" is a computer

- (A) exclusively for the use of a financial institution or the United States Government, or, in the case of a computer not exclusively for such use, used by or for a financial institution or the United States Government and the conduct constituting the offense affects that use by or for the financial institution or the Government; or
- (B) which is used in or affecting interstate or foreign commerce or communication, including a computer located outside the United States that is used in a manner that affects interstate or foreign commerce or communication of the United States.

18 U.S.C. § 1030(e)(2).

n55 18 U.S.C. § 1030(a)(4) (explaining that an individual violates § 1030(a)(4) if he "knowingly and with intent to defraud, accesses a protected computer without authorization, or exceeds authorized access, and by means of such conduct furthers the intended fraud and obtains anything of value, unless the object of the fraud and the thing obtained consists only of the use of the computer and the value of such use is not more than \$ 5,000 in any 1-year period").

n56 18 U.S.C. § 1030(e)(11) (defining damages as "any reasonable costs to any victim, including the cost of responding to an offense, conducting a damage assessment, and restoring the data, program, system or information to its condition prior to the offense, and any revenue lost, cost incurred, or consequential damages incurred because of interruption of service").

n57 18 U.S.C. § 1030(a) (listing the information and sources of information protected by the statute and failing to limit that protection to trade secrets).

n58 18 U.S.C. § 1030(a)(1). This section provides that any individual who

having knowingly accessed a computer without authorization or exceeding authorized access, and by means of such conduct having obtained information that has been determined by the United States Government pursuant to an Executive order or statute to require protection against unauthorized disclosure for reasons of national defense or foreign relations, or any restricted data, as defined in paragraph y. of section 11 of the Atomic Energy Act of 1954, with reason to believe that such information so obtained could be used to the injury of the United States, or to the advantage of any foreign nation willfully communicates, delivers, transmits, or causes to be communicated, delivered, or transmitted, or attempts to communicate, deliver, transmit or cause to be communicated, delivered, or transmitted the same to any person not entitled to receive it, or willfully retains the same and fails to deliver it to the officer or employee of the United States entitled to receive it . . . shall be punished as provided in subsection (c) of this section.

18 U.S.C. § 1030(a).

n59 18 U.S.C. § 1030(a)(1).

n61 H. MARSHALL JARRETT & MICHAEL W. BAILIE, PROSECUTING COMPUTER CRIMES 15 (2d ed.), <http://www.justice.gov/criminal/cybercrime/docs/ccmanual.pdf> (last visited August 23, 2013) (explaining that Assistant United States Attorneys rarely charge § 1030(a)(1) violations because of "the close similarities between sections 1030(a)(1) and 793(e)," and that, "[i]n situations where both statutes are applicable, prosecutors may tend towards using section 793(e), for which guidance and precedent are more prevalent").

n62 See David W. Slaby et al., *Trade Secret Protection: An Analysis of the Concept "Efforts Reasonable Under the Circumstances to Maintain Secrecy"*, 5 SANTA CLARA COMPUTER & HIGH TECH. L.J. 321, 322-23 (1989) (noting that modern trade secret protection is based on the codification of common law decisions).

n63 See Michael J. Hutter, *Trade Secret Misappropriation: A Lawyer's Practical Approach to the Case Law* 1 W. NEW. ENG. L. REV. 1, 9 (1978) (explaining that classification as a trade secret under the controlling law and "acquisition of the secret by a third party by improper conduct or unfair means" are prerequisites for liability for trade secret misappropriation).

n64 MELVIN F. JAGER, *TRADE SECRETS LAW* § 3.29 (2013) (noting that every state except Massachusetts, New York, North Carolina, and Texas has adopted the UTSA).

n65 UNIF. TRADE SECRETS ACT § 1(4) (1986).

n66 *Id.*

n67 Pooley, Lemley & Toren, *supra* note 12 at 188-89 (comparing the UTSA and the EEA); *see also supra* notes 39-41 and accompanying text (detailing the definition of a trade secret under the EEA).

n68 See RESTATEMENT (THIRD) OF UNFAIR COMPETITION § 40 (1995) (defining "appropriation" of trade secrets as the receipt of the information by an unauthorized individual or in an unlawful manner); UNIF. TRADE SECRETS ACT § 1(2) (defining "misappropriation" in the same manner). Each state has developed a trade secret enforcement scheme based on the UTSA or the Restatement. Craig L. Ulrich, *The Economic Espionage Act: Reverse Engineering and the Intellectual Property Public Policy*, 7 MICH. TELECOMM. & TECH. L. REV. 147, 163-64 (2001).

n69 UNIF. TRADE SECRETS ACT § 1(2)(i).

n70 UNIF. TRADE SECRETS ACT § 1(2)(ii).

n71 UNIF. TRADE SECRETS ACT § 1(1).

n72 Pooley, Lemley & Toren, *supra* note 12 at 188-89 (comparing the UTSA and the EEA); *see also supra* notes 42-44 and accompanying text (noting that the EEA prohibits any unlawful access to information that meets the statutory definition of "trade secret").

n73 MASS. GEN. LAWS ANN. ch. 266, § 30(4) (West 2008) (defining "trade secret" as "anything tangible or intangible or electronically kept or stored, which constitutes, represents, evidences or records a secret scientific, technical, merchandising, production or management information, design, process, procedure, formula, invention or improvement").

n74 New York trade secret protection is entirely common law based, and adopts the definition of a trade secret provided by Section 757 of the Restatement of Torts. *Ashland Mgmt. Inc. v. Janien*, 82 N.Y.2d 395, 407 (1993) (relying on the Restatement and state precedent to adjudicate a trade secret misappropriation case); Michael J. Hutter, *The Case for Adoption of a Uniform Trade Secrets Act in New York* 10 ALB. L.J. SCI. & TECH 1, 6 (1999) (stating that New York has not adopted a statutory regime to regulate trade secrets and instead relies on "common law principles derived from the First Restatement of Torts"). The Restatement defines a trade secret as

any formula, pattern, device or compilation of information which is used in one's business, and which gives him an opportunity to obtain an advantage over competitors who do not know or use it. It may be a formula for a chemical compound, a process of manufacturing, treating or preserving materials, a pattern for a machine or other device, or a list of customers.

RESTATEMENT (FIRST) OF TORTS § 757 cmt. b (1939).

n75 N.C. GEN. STAT. § 66-152(3) (2011) (defining a "trade secret" as "business or technical information, including but not limited to a formula, pattern, program, device, compilation of information, method, technique, or process that (a) Derives independent actual or potential commercial value from not being generally known or readily ascertainable through independent development or reverse engineering by persons who can obtain economic value from its disclosure or use; and (b) Is the subject of efforts that are reasonable under the circumstances to maintain its secrecy").

n76 Like New York, Texas regulates trade secrets with common law decisions based on the Restatement of Torts. *In re Bass*, 113 S.W.3d 735, 739 (Tex. 2003) (quoting RESTATEMENT (FIRST) OF TORTS § 757 cmt. b) ("To determine whether a trade secret exists, this Court applies the Restatement of Torts' six-factor test.").

n77 Pooley, Lemley & Toren, *supra* note 12 at 186 (stating that twenty-four states have criminal trade secret theft statutes, but that "the applicability of these state criminal laws is limited by jurisdiction and lack of state resources, particularly in cases with international ramifications").

n89 DEFENSE SECURITY SERVICE, TARGETING U.S. TECHNOLOGIES 16 (2011), available at <http://www.dss.mil/counterintel/2011-unclassified-trends.pdf> (describing AUVs as "a class of underwater vessels capable of submerged, self-propelled locomotion using various enabling technologies to navigate and perform diverse tasks").

n90 DEPARTMENT OF COMMERCE, INTRODUCTION TO COMMERCE DEPARTMENT EXPORT CONTROLS 1 (2010) [hereinafter DEPT OF COMMERCE], *available at* http://www.bis.doc.gov/index.php/forms-documents/doc_view/142-eccn-pdf.

n91 Export Administration Act of 1979, Pub. L. No. 96-72, §§ 3(2)(B), 5(a)(1), 93 Stat. 503, 504, 506 (codified at 50 U.S.C. App. §§ 2402, 2404) (authorizing the President to "prohibit or curtail the export of any goods or technology subject to the jurisdiction of the United States or exported by any person subject to the jurisdiction of the United States," to the extent necessary "to further significantly the foreign policy of the United States or to fulfill its declared international obligations").

n92 *See* DEPT OF COMMERCE, *supra* note 90. The BIS enforces the Export Administration Act by issuing Export Administration Regulations (EARs). *Id.* An important aspect of these regulations is the Commerce Control List (CCL), which includes all of the technologies that fall under the EARs. *Id.* at 3. These technologies include broad categories such as: nuclear technologies, materials, chemicals, microorganisms, materials processing technologies, electronics, computers, telecommunications, information security, sensors and lasers, navigation and avionics, marine and propulsion systems. *Id.*; *see also* 15 C.F.R. § 777 Supp. 1 (2012) (containing the full Commerce Control List).

n93 DEPT OF COMMERCE, *supra* note 90, at 2.

n94 *Id.*

n95 *Compare* ONCIX REPORT, *supra* note 3, at 1, 8-9 (noting that economic, scientific, and military data are subject to trade secret theft and predicting that dual-use technologies such as clean technologies, advanced manufacturing techniques, healthcare and pharmaceutical technologies, agricultural technology, and energy and national resource information will be increasingly vulnerable to misappropriation), *with* DEPT OF COMMERCE, *supra* note 90, at 1-2 (noting that dual-use technologies and chemicals, materials processing, computers, and telecommunications and information security are all subject to export controls), *and* 15 C.F.R. § 777 Supp. 1 (listing other scientific technologies in the Commerce Control List regulated by export laws).

n96 DEPT OF COMMERCE, *supra* note 90, at 1.

n97 *Id.* at 3.

n98 *Id.* at 5-6 (providing instructions for determining whether a license is necessary for a particular good or technology and whether a licensing exception applies).

n99 See RESTATEMENT (THIRD) OF AGENCY § 1.01(e) (2005). Contracts such as non-disclosure agreements, confidentiality agreements, and covenants not to compete may supplement the default duties arising under agency. See *id.* ("In addition to an agent's fiduciary duties, the agent has a duty to fulfill specific contractual undertakings" imposed by the principal).

n100 The need for fiduciary controls is because trade secrets do not possess traditional *in rem* property characteristics. See RESTATEMENT (FIRST) OF TORTS § 757 cmt. a (1939) (rejecting the idea that the prohibition of trade secret misappropriation is based in the owner's property right in the information); MILGRIM, *supra* note 23, at § 2.01 (noting that the "property" right in a trade secret is the right to use and disclose the information).

n101 See MILGRIM, *supra* note 23, at § 2.01 ("[N]either the owner of a trade secret or a copyright can use its rights to prevent genuine independent development by others."). See generally CARL SHAPIRO & HAL R. VARIAN, INFORMATION RULES: A STRATEGIC GUIDE TO THE NETWORK ECONOMY 1-19 (1999) (discussing the "information economy"). Although other categories of intangible property--such as patents, trademarks, and copyright--face challenges involving non-excludability and costly enforcement, protection of these other forms of intellectual property is not as under-enforced as protection of trade secrets because of measures to reduce enforcement costs. See, e.g., David L. Schwartz, *The Rise of Contingent Fee Representation in Patent Litigation*, 64 ALA. L. REV. 335, 346, 351-55 (2012) (describing the rise of contingent-fee agreements in patent litigation). Rather, protection of this information is often vigorously enforced. For example, policymakers in the field of trademark law have held hearings on the aggressive enforcement and policing of trademarks by large companies against smaller companies and individuals, leading to what is termed "trademark bullying." See Trademark Technical and Conforming Amendment Act of 2010, Pub. L. No. 111-146, § 4(a)(1), 124 Stat. 66, 70 (requiring the U.S. Patent and Trademark Office to study and report to Congress "the extent to which small businesses may be harmed by litigation tactics by corporations attempting to enforce trademark rights beyond a reasonable interpretation of the scope of the rights granted to the trademark owner"). The under-enforcement of trade secret law, therefore, is an anomaly.

n102 Cf. SHAPIRO & VARIAN, *supra* note 101, at 4-5 (explaining that, because of the ease with which intellectual property can be copied, owners of intellectual property keep the information closely guarded and protect their rights with increased protection). In 2011, the American Intellectual Property Law Association (AIPLA) conducted surveys to determine the costs of intellectual property litigation. AM. INTELL. PROP. ASS'N, REPORT OF THE ECONOMIC SURVEY 2011 (2011). The survey found that, in cases in which the amount in controversy was less than \$ 25 million, the cost of trade secret litigation through trial was \$ 1.3 million. *Id.* If the amount in controversy exceeded \$ 25 million, the cost of litigation increased to \$ 3.2 million. *Id.*

n103 See, e.g., *Int'l Election Sys. Corp. v. Shoup*, 452 F. Supp. 684, 709-10 (E.D. Pa. 1978) (dismissing the plaintiff's trade secret theft claim because the defendant established that it developed its own market to sell its product, rather than misappropriating the plaintiff's customer list data). Reverse engineering is "the process of studying an item in hopes of obtaining a detailed understanding of the way it works," and is "used to create duplicate or superior products without the benefit of having the plans for the original item." Uhrich *supra* note 68 at 155-56.

n104 See 18 U.S.C. § 1839(3)(A) (2006) (requiring the owner of information to "take [] reasonable measures to keep such information secret" for the information to be classified as a trade secret); UNIF. TRADE SECRETS ACT § 1(4) (1986) (requiring that the information be "the subject of efforts that are reasonable under the circumstances to maintain its secrecy" for the information to be classified as a trade secret); RESTATEMENT (FIRST) OF TORTS § 757 cmt. b (1939) ("The subject matter of a trade secret must be secret.").

n105 Bishara & Orozco, *supra* note 31, at 1011. A recent high-profile example of a company's failure to keep data secret involved hackers stealing LinkedIn account users' passwords. Nicole Perlroth, *Lax Security at LinkedIn is Laid Bare*, N.Y. TIMES, June 11, 2012, at B1. The

media widely reported that the breach was the result LinkedIn's out-of-date and inadequate security systems. *See, e.g., id.*

n106 Pooley, Lemley & Toren, *supra* note 12, at 210-11 (noting that an Assistant U.S. Attorney's decision to prosecute a trade secret misappropriation case is subject to DOJ approval, from either the Attorney General, the Deputy Attorney General, or an Assistant Attorney General from the Criminal Division). U.S. Attorneys' offices consider a number of factors in determining whether a trade secret case will be prosecuted, including "(a) whether the information was clearly a trade secret; (b) whether the information was technical or scientific in nature; (c) evidence of criminal conduct and intent; (d) evidence of the information's monetary value; (e) the availability of other remedies; and (f) whether the misappropriation was promptly reported." *Id.* at 211.

n107 Victoria Slind-Flor, *Industry Spying Still Flourishes*, NAT'L L.J., Mar. 29, 2000, at B8; *see also* Pooley, Lemley & Toren, *supra* note 12, at 214 (indicating that "the monetary loss to the victim must be great enough to merit criminal investigation and prosecution," greater than \$ 100,000 in some districts).

n108 Pooley, Lemley & Toren, *supra* note 12, at 215.

n109 Joseph N. Hosteny, *The Economic Espionage Act: A Very Mixed Blessing*, INTELL. PROP. TODAY, Feb. 1998, 7-8, <http://www.hosteny.com/articles/espionage.html>.

n110 David S. Almeling et al., *A Statistical Analysis of Trade Secret Litigation in State Courts*, 46 GONZ. L. REV. 57, 66-68 (2011) [hereinafter *State Court Analysis*] (finding that trade secret litigation in federal courts is increasing at an exponential rate, but at the same time is increasing at only a modest rate in state courts).

n111 David S. Almeling et al., *A Statistical Analysis of Trade Secret Litigation in Federal Courts*, 45 GONZ. L. REV. 291, 303-04 (2009) [hereinafter *Federal Court Analysis*]. The Almeling study of trade secret litigation in federal courts concluded that concerns about foreign trade secret misappropriation "may be overblown" because most trade secret theft is committed by domestic actors. *Id.* This statement, however, does not take into account the central problem of foreign trade secret theft, which is that the victim is often reluctant to pursue claims of foreign theft due to the inordinate costs of litigation. *See supra* notes 106-09 and accompanying text (discussing the barriers to trade secret law litigation and enforcement). Moreover, there is a fundamental difference between domestic theft and foreign state-sponsored theft, adding to the disparity between the number of domestic theft cases and foreign theft cases. While the majority of plaintiffs in domestic theft cases know the defendants, *State Court Analysis*, *supra* note 110, at 69 (noting that domestic thieves are often former employees or business partners), data thieves in cases involving foreign actors are usually anonymous, *Federal Court Analysis*, *supra*, at 303.

n112 ONCIX REPORT, *supra* note 3, at 1.

n113 *See id.* at 5 (reporting that only seven cases were adjudicated under the EEA in 2010).

n114 *See id.* at 4 (estimating that a company's trade secret can be worth \$ 20 million and that trade secret theft and economic espionage are responsible for the loss of up to \$ 400 billion each year).

n115 *See State Court Analysis, supra* note 110, at 66-68 (tracking the increase in trade secret theft litigation in state and federal courts); ONCIX REPORT, *supra* note 3, at 5 (reporting that there were only seven prosecutions under the EEA in 2010); *Federal Court Analysis, supra* note 111, at 303-04 (noting that third parties, such as foreign actors, "comprise a small percentage of alleged misappropriators").

n116 *See* J. Benjamin Bai & Gupoing Da. *Strategies for Trade Secret Protection in China*, 9 Nw. J. TECH & INTELL. PROP. 351, 362 (2011) (explaining that there is no U.S.-style discovery process in China and discussing other technical hurdles that make discovery in foreign trade secret litigation more cumbersome than in domestic litigation).

n117 *See* R. Doak Bishop. *International Litigation in Texas: Obtaining Evidence in Foreign Countries*, 19 HOUS. L. REV. 361, 361 (1982).

n128 Joseph S. Nye, Jr., *Nuclear Lessons for Cybersecurity?*, STRATEGIC STUD. Q. 18, 28 (2011) (noting that "[f]irms have an incentive to provide for their own security up to a point, but the competitive pricing of their products limits" those expenditures).

n129 Bird, *supra* note 127, at 10.

n130 See Nye, *supra* note 128, at 28-29 (concluding that there is "an underinvestment in security from the national perspective").

n131 See Russell Beck & Matt Karlyn, *IT Security: A Practical Approach to Protecting Trade Secrets*, CIO (Nov. 11 2009), http://www.cio.com/article/507359/IT_Security_A_Practical_Approach_to_Protecting_Trade_Secrets?page=3&taxonomyId=3187 (advocating for cooperation between business owners and directors, legal counsel, and IT departments to protect their companies from trade secret theft).

n132 See David Orozco, *Legal Knowledge as an Intellectual Property Management Resource*, 47 AM. BUS. L.J. 687, 687-94 (2010) (discussing the importance of integrating legal and managerial knowledge as a source of competitive advantage); David Orozco, *Rational Design Rights Ignorance*, 46 AM. BUS. L.J. 573, 603-04 (2009) (discussing how companies can obtain unique and rare intellectual property outcomes by reducing coordination costs within the firm).

n133 ONCIX REPORT, *supra* note 3, at i, 3 (noting that businesses are often uninformed of how information moves within and outside of the boundaries of the organization and that "[m]any companies are unaware when their sensitive data is pilfered").

n134 Bishara & Orozco, *supra* note 31, at 1004.

n135 *See supra* Part I.A. and accompanying text (detailing the federal and state regulation of trade secrets).

n136 *See* 18 U.S.C. § 1030 (2006) (no protection for whistleblowers); 18 U.S.C. §§ 1831-39 (2006 & Supp. 2012) (same); 19 U.S.C. § 1337 (2006) (same); UNIF. TRADE SECRETS ACT (1986) (same).

n137 Elletta Sangrey Callahan & Terry Morehead Dworkin. *The State of State Whistleblower Protection*, 38 AM. BUS. L.J. 99, 111 (2000); Kevin Rubenstein. Note, *Internal Whistleblowing and Sarhanes-Oxley Section 806: Balancing the Interests of Employee and Employer*, 52 N.Y.L. SCH. L. REV., 637, 643 (2007) ("Most states offer general whistleblower protection to public employees, while a minority of states provide the same protection to all workers.").

n138 Rubenstein. *supra* note 137.

n139 *Id.* at 640 (observing that a "[s]trict application of [the at-will] doctrine would allow an employer to terminate a whistleblower without facing any liability even if the discharge was purely for retaliatory purposes").

n140 For example, New York's whistleblower protection statute states that:

An employer shall not take any retaliatory personnel action against an employee because such employee . . . discloses, or threatens to disclose to a supervisor or to a public body an activity, policy, or practice *of the employer* that is in violation of law, rule or regulation which violation creates and presents a substantial and specific danger to the public health or safety, or which constitutes health care fraud.

N.Y. LAB. LAW § 740(2)(a) (McKinney 2002 & Supp. 2013) (emphasis added).

n141 Some federal statutes offer protection for whistleblowers who charge or testify against their employers for violating the particular statute. *See, e.g.*, 15 U.S.C. § 15(a) (2006) (prohibiting the discharge of an employee who reports violation of the Clayton Act); 15 U.S.C. § 2622(a) (2006) (prohibiting the discharge of an employee who reports violation of the Toxic Substances Control Act); 18 U.S.C. § 1514A (2006 & Supp. 2012) (prohibiting the discharge of an employee who reports violation of the Sarbanes-Oxley Act); 29 U.S.C. § 158(a)(4) (2006) (prohibiting the discharge of an employee who reports violation of the National Labor Relations Act); 29 U.S.C. § 206(d) (2006) (prohibiting the discharge of an employee who reports violation of the Equal Pay Act); 29 U.S.C. § 215(a)(3) (2006) (prohibiting the discharge of an employee who reports violation of the Fair Labor Standards Act); 29 U.S.C. § 623(d) (2006) (prohibiting the discharge of an

employee who reports violation of the Age Discrimination in Employment Act); 29 U.S.C. § 660(c) (2006) (prohibiting the discharge of an employee who reports violation of the Occupational Safety and Health Act); 29 U.S.C. §§ 1132(a), 1140 (2006 & Supp. 2012) (prohibiting the discharge of an employee who reports violation of the Employee Retirement Income Security Act); 29 U.S.C. § 2615 (2006) (prohibiting the discharge of an employee who reports violation of the Family and Medical Leave Act); 31 U.S.C. § 3730(h) (2006 & Supp. 2011) (prohibiting the discharge of an employee who reports violation of the False Claims Act); 42 U.S.C. § 300j-9(i)(1) (2006) (prohibiting the discharge of an employee who reports violation of the Safe Drinking Water Act); 42 U.S.C. § 12203(a) (2006) (prohibiting the discharge of an employee who reports violation of the Americans with Disabilities Act); 42 U.S.C. § 2000e-3(a) (2006) (prohibiting the discharge of an employee who reports violation of the Civil Rights Act of 1964); 42 U.S.C. § 5851(a) (2006) (prohibiting the discharge of an employee who reports violation of the Energy Reorganization Act); 42 U.S.C. § 6971(a) (2006) (prohibiting the discharge of an employee who reports violation of the Solid Waste Disposal Act); 42 U.S.C. § 7622(a) (2006) (prohibiting the discharge of an employee who reports violation of the Clean Air Act); 42 U.S.C. § 9610(a) (2006) (prohibiting the discharge of an employee who reports violation of the Comprehensive Environmental Response, Compensation, and Liability Act).

n142 Sarbanes-Oxley Act of 2002, Pub. L. No. 107-204, § 806, 116 Stat. 745, 802-04 (codified at 18 U.S.C. § 1514A).

n143 § 806, 116 Stat. at 802.

n144 *Id.*

n145 *Cf.* Rustad, *supra* note 9, at 474 (noting that there is no affirmative duty to report trade secret misappropriation); Rubenstein, *supra* note 137, at 647 (asserting that Sarbanes-Oxley protects employees reporting violations of securities laws, which excludes trade secret misappropriation).

n146 *See* § 806, 116 Stat. at 802 (protecting only employees of companies registered under the Securities and Exchange Act of 1934).

n147 RESTATEMENT (THIRD) OF AGENCY § 1.01 (2005).

n148 *Id.* at § 1.01 cmt. e (discussing the rights and duties of the agency relationship).

n149 *See, e.g., In re Caremark*, 698 A.2d 959, 968 (Del. Ch. 1996) (requiring the board of directors to authorize "significant corporate acts"); *see also* DEL. CODE ANN., tit. 8, 141(a) ("The business and affairs of every corporation organized under this [statute] shall be managed by or under the direction of a board of directors, except as may be otherwise provided in this [statute] or in its certification of incorporation.").

n150 *See* Smith v. Van Gorkom, 488 A.2d 858, 872-73, 893 (Del. 1985) (holding that the directors of the defendant corporation breached their duty of care to the corporation by failing to fully investigate before approving a merger), *overruled on other grounds* by Gantler v. Stephens, 965 A.2d 695, 713 & n. 54 (Del. 2009); *Caremark*, 698 A.2d at 967 (explaining that the business judgment rule is applied to cases involving harmful decisions by the board of directors).

n151 Aronson v. Lewis, 473 A.2d 805, 812 (Del. 1984), *overruled on other grounds* by Brehm v. Eisner, 746 A.2d 244, 254 (Del. 2000); *see also* *Caremark*, 698 A.2d at 967 ("[C]ompliance with a director's duty of care can never appropriately be judicially determined by reference to the content of the board decision that leads to a corporate loss, apart from consideration of the good faith or rationality of the process employed.").

n152 *In re* J.P. Stevens & Co. S'holders Litig., 542 A.2d 770, 780 (Del. Ch. 1988) (quoting Solash v. Telex Corp., C.A. No. 9518, 1988 WL 3587, at *8 (Del. Ch. Jan. 19, 1988)).

n153 *See* Hal R. Arkes & Cindy A. Schipani, *Medical Malpractice v. The Business Judgment Rule: Differences in Hindsight Bias*, 73 OR. L. REV. 587, 587 (1994) (describing the rules in place to prevent "retrospective evaluations" of "negligent business decisions"). Courts are keenly aware of the potential to engage in hindsight bias, or "the tendency for people with knowledge of an outcome to exaggerate the extent to which they believe the outcome could have been predicted." *Id.*

n154 Sandra K. Miller, *What Fiduciary Duties Should Apply to the LLC Manager After More than a Decade of Experimentation?*, 32J. CORP. L. 565, 569 (2007) (noting that contractarian states, including Delaware, "expressly defer to the parties' agreement" in resolving corporate disputes). The contractarian approach rests on the perception of the corporation as a collection of contracts or agreements by which the corporation can be governed. *See generally* Frank H. Easterbrook & Daniel R. Fischel, *The Corporate Contract*, 89 COLUM. L. REV. 1416, 1426, 1428 (1989) ("The arrangements among the actors constituting the corporation usually depend on contracts and on positive law, not on corporate law or the status of the corporation as an entity."). *See also* Melvin A. Eisenberg, *The Conception That the Corporation is a Nexus of Contracts, and the Dual Nature of the Firm*, 24 J. CORP. L. 819, 822-23 (1999) (describing the corporation as a "nexus of reciprocal agreements" relied upon to govern the company); Thomas S. Ulen, *The Coasean Firm in Law and Economics*, 18 J. CORP. L. 301, 318-28 (1993) (arguing that corporations use contracts to address both internal and external affairs). Rather than favoring mandatory and uniform public regulation, contractarians favor private market-ordering transactions that allow shareholders and directors to opt in or out of regulations. *See* J. Robert Brown, Jr. & Sandeep Gopalan, *Opting Only In: Contractarians. Waiver of Liability Provisions, and the Race to the Bottom* 42 IND. L. REV. 285, 285-86 (2009).

n155 *Aronson*, 473 A.2d at 813. In practice, although the duty of care liability standard for affirmative decisions is perceived as lax, the Delaware Legislature tempered the standard by amending the Delaware General Corporation Law "to allow for an optional charter provision to exculpate directors for violations of the duty of care." *See* Hillary A. Sale, *Delaware's Good Faith*, 89 CORNELL L. REV. 456, 466 (2004). This amendment allows a corporation to elect whether or not it wishes to immunize corporate directors and officers from any duty of care liability whatsoever. *Id.* Many corporations today provide this liability waiver.

n156 *See* Stone v. Ritter, 911 A.2d 362, 367 & n.9. 370 (Del. 2006) (requiring the plaintiff to plead specific factual allegations, rather than conclusory, general, or speculative statements). This specificity standard also requires the plaintiff include specific facts that indicate intent, which can be a difficult hurdle to overcome. *Id.*

n157 See Nadelle Grossman, *The Duty to Think Strategically* 28-29 (Jan. 1, 2012) (Marquette Univ. Law Sch., Working Paper No. 11-19) [hereinafter *Duty to Think Strategically*], available at http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1919145. Delaware law has significant influence over general corporate governance law because most public corporations are incorporated in Delaware. Nadelle Grossman, *Director Compliance with Elusive Fiduciary Duties in a Climate of Corporate Governance Reform*, 12 FORDHAM J. CORP. & FIN. L. 393, 397 (2007). Other jurisdictions often look to Delaware law for guidance. *Id.*

n158 See *Stone*, 911 A.2d at 370 (holding that a director breaches his duty of loyalty under the oversight doctrine if he *completely* neglects to enact a risk monitoring system, or he enacts a system but consciously fail to monitor it). It remains unclear whether officers are held to the same standard as directors. Although the existing Delaware cases involved actions by both directors and officers, the cases interpreting the oversight doctrine exclusively mention the duties imposed on and breached by directors. See *Duty to Think Strategically*, *supra* note 157, at 32-33.

n159 *In re Caremark*, 698 A.2d 970, 970-71 (Del. Ch. 1996).

n160 *Id.*

n161 See, e.g., Charles M. Elson & Christopher J. Gyves, *In re Caremark: Good Intentions, Unintended Consequences*, 39 WAKE FOREST L. REV. 691, 691 (2004) (predicting that, following *Caremark*, "boards that fail to establish effective corporate compliance procedures may face substantial liability").

n162 911 A.2d at 370 ("We hold that *Caremark* articulates the necessary conditions predicate for director oversight liability.").

n163 *Id.*

n164 See *id.* (emphasizing the disjunctive nature of the test articulated in *Caremark*).

n165 See William W. Bratton, *Lyondell: A Note of Approbation*, 55 N.Y.L. SCH. L. REV., 561, 570-72 (2010) (arguing that Delaware's "lesser rather than [] greater" approach in *Caremark* and *Stone* "slams down the book of best practices" because it requires "knowing and complete failure" to fulfill responsibilities); see also Perloth, *supra* note 105 (arguing that, because there are no legal consequences for negligent monitoring, some companies have "a devil-may-care attitude toward data"). Increasing corporate liability for business-related trade secrets may be appropriate, but considering a change in state corporate fiduciary law is beyond the scope of this Article.

n166 *In re Caremark*, 698 A.2d 959, 967 (Del. Ch. 2006).

n167 *See infra* Part IV (proposing the text of the amendment and discussing its provisions and the benefits of imposing an affirmative duty to disclose).

n168 Paul H. Robinson, *Criminal Liability for Omissions: A Brief Summary and Critique of the Law in the United States*, 29 N.Y.L. SCH. L. REV., 101, 104 (1984) (describing the "general reluctance in the United States to impose affirmative duties").

n169 *Id.*

n170 *Id.* (arguing that an affirmative duty must be both justified by strong public policy benefits and "imposed in a way that minimizes the extent of the intrusion").

n171 *Cf. id.* (noting that the rule against affirmative duties is based, in part, on the difficulty of defining the scope of the duty, which makes the duty difficult to enforce).

n172 *See infra* Part V (providing the text of the proposed amendment).

n173 Robinson, *supra* note 168, at 104-05 (explaining that the public interest, including the health and safety of the public, can justify an affirmative duty).

n174 *See* Andrew B. Serwin, *Poised on the Precipice: A Critical Examination of Privacy Litigation*, 25 SANTA CLARA COMP. & HIGH TECH. L.J. 883, 884 (2009) (detailing the states that have enacted security breach laws that "mandate public disclosure of data incidents").

n175 *Id.* The statute requires

[a]ny person or business that conducts business in California, and that owns or licenses computerized data that includes personal information, shall disclose any breach of the security of the system following discovery or notification of the breach in the security of the data to any resident of California whose unencrypted personal information was, or is reasonably believed to have been, acquired by an unauthorized person. The disclosure shall be made in the most expedient time possible and without unreasonable delay, consistent with the legitimate needs of law enforcement, as provided in subdivision (c), or any measures necessary to determine the scope of the breach and restore the reasonable integrity of the data system.

CAL. CIV. CODE § 1798.82(a) (West 2009 & Supp. 2013).

n176 Serwin, *supra* note 174.

n177 Cybersecurity Act of 2012, S.3414, 112th Cong. (2012). The Act was originally introduced as S.2105, but the Senate voted on the version of the Act introduced as S.3414. 158 CONG. REC. S.5919 (daily ed. Aug. 2, 2012). The Act ultimately failed a vote of cloture and was not passed. *Id.*; see *supra* note 13 and accompanying text (detailing the progression of the Act and its re introduction in 2013).

n178 Cybersecurity Act of 2012, S.3414, 112th Cong. § 102(b)(4) (2012). "Critical cyber infrastructure" includes infrastructures that affect life-sustaining services and the U.S. economy. S.3414, § 102(b)(3)(B).

n179 See *Duty to Think Strategically*, *supra* note 157, at 27 (explaining that the duties of loyalty and care require affirmative actions by directors of corporations).

n180 Sarbanes-Oxley Act of 2002, Pub. L. No. 107-204, § 906, 116 Stat. 745, 806 (codified at 18 U.S.C. § 1350(2006)).

n181 Conduct of Certain Former Officers and Directors of W.R. Grace & Co., Exchange Act Release No. 34,39157, [1997 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 85,963, at 89,893 (Sept. 30, 1997) (asserting that an officer or director of a public company has "substantial obligations" and that "[i]f an officer or director knows or should know that his or her company's statements concerning particular issues are inadequate or incomplete, he or she has an obligation to correct that failure").

n182 See, e.g., Export Administration Act of 1979, Pub. L. No. 96-72, § 3(2), 93 Stat. 503, 504 (codified at 50 U.S.C. App. § 2402 (2006)) (controlling the export of goods that "would make a significant contribution to the military potential of any other country or combination of countries which would prove detrimental to the national security of the United States").

n183 Reverse engineering is an accepted form of recreating the item in question without misappropriating the information underlying its creation. Ulrich, *supra* note 68, at 156-57 (noting that reverse engineering is "implicitly accepted" by trade secret law).

n184 See NAT'L COUNTERINTELLIGENCE EXECUTIVE, NATIONAL COUNTERINTELLIGENCE STRATEGY OF THE UNITED STATES OF AMERICA 4 (2007) [hereinafter NCIX STRATEGY], available at <http://www.fas.org/irp/ops/ci/cistrategy2007.pdf> ("In collaboration with our colleagues throughout the government, the counterintelligence community will protect our vital national assets--critical infrastructure, sensitive technologies, key resources, networks, and knowledge--from intelligence-related attack.").

n185 ONCIX REPORT, *supra* note 3, at 1, 5-6 (describing the sophisticated techniques foreign actors use to misappropriate sensitive information).

n186 *See* ADMINISTRATIVE STRATEGY, *supra* note 1, at 1-2 (describing intangible assets and intellectual property as "the innovation that drives the American economy and supports jobs in the United States" and noting that this information affects American businesses and the economy, national security, and economic competitiveness); SHAPIRO & VARIAN, *supra* note 101, at 4 (discussing the value of information).

n187 SHAPIRO & VARIAN, *supra* note 101, at 4 (arguing that owners of intellectual property are unable to recover the high production cost of information without the enforcement of their intellectual property rights).

n188 *See, e.g.*, 17 U.S.C. § 501 (2006) (prohibiting the infringement of copyrights); 18 U.S.C. 1831-32 (2006) (protecting trade secrets from misappropriation); 35 U.S.C. 271 (2006 & Supp. 2012) (prohibiting the infringement of patents).

n189 SHAPIRO & VARIAN, *supra* note 101, at 3-4 (noting that intellectual property rights do not "confer complete power to control information" because the ability to copy and instantly send information around the world has made enforcement difficult).

n190 *See, e.g.*, Bai & Da, *supra* note 116, at 362-63 (stating that, even though China has implemented many laws and regulations to protect trade secrets, significant challenges exist due to technical and procedural aspects of the Chinese legal system).

n191 *SEE* IKUJIRO NONAKA & HIROAKA TAKEUCHI, THE KNOWLEDGE-CREATING COMPANY: HOW JAPANESE COMPANIES CREATE THE DYNAMICS OF INFORMATION 8 (1995) (explaining that tacit knowledge, in part, consists of "hard-to-pin-down skills or crafts captured in the term 'know-how'").

n192 *Id.* ("Explicit knowledge can be expressed in words and numbers, and easily communicated and shared in the form of hard data, scientific formulae, codified procedures, or universal principles.").

n193 *Id.* at 8-9. Conversely, tacit knowledge is internalized and cannot be easily transmitted through formula or code. *Id.*

n194 For example, some codified technologies such as software are copied or reverse engineered when the source code is misappropriated. See Markoff *supra* note 4, at A1 (predicting that the theft of Google's software system will provide the hackers with the information needed to replicate--"reverse engineer"--Google's system).

n195 See TianRui Grp. Co. v. Int'l Trade Comm'n, 661 F.3d 1322, 1324-25 (Fed. Cir. 2011); David Orozco, *Administrative Patent Levers*, 117 PENN. ST. L. REV. 1, 8-9 (2012) (noting that business methodology and "fundamental business techniques" are important economic resources).

n196 See NONAKA & TAKEUCHI, *supra* note 191, at 8-9 (explaining that tacit knowledge is internal and not easily disseminated).

n197 See Orozco, *supra* note 195, at 8-14 (explaining that some business methods can be converted into explicit knowledge, which takes the form of a utility patent).

n198 See, e.g., *TianRui Grp. Co.*, 661 F.3d at 1325 (classifying a manufacturing process as a trade secret).

n199 See *id.* (emphasizing the need for a remedy for the misappropriation of a business process).

n200 See 18 U.S.C. § 1839(3) (2006).

n201 See, e.g., N.Y. LAB. LAW § 740(2)(a) (McKinney 2002 & Supp. 2013) (prohibiting retaliatory action against an employee where the employee discloses or threatens to disclose a practice that "is in violation of law" (emphasis added)).

n202 See, e.g., 18 U.S.C. § 1514A(a)(1) (2006 & Supp. 2012) (prohibiting retaliation of an employee who reports violation of securities laws); CAL. CIV. CODE § 1798.82(a) (West 2009 & Supp. 2013) (requiring disclosure if an individual reasonably believes that a data breach has occurred); N.H. REV. STAT. ANN. § 275-E.2 (2008) (prohibiting retaliation against an employee who "has reasonable cause to believe" that the employer has violated the law); see also *Passaic Valley Sewerage Comm'rs v. Dep't of Labor*, 992 F.2d 474, 474-75 (3d Cir. 1993) (considering whether an employee's allegations against his employer were reasonable under the Clean Water Act, which would provide him immunity from retaliation).

n203 See Rusted, *supra* note 9, at 481-82 (highlighting the measures taken by computer hackers to preserve anonymity, including "false email headers, offshore sites, and anonymous e-mailers").

n204 *Cf.* 15 U.S.C. § 78dd-2(a), (g) (2006) (basing the defendant's penalty on his level of culpability).

n205 Virginia G. Maurer & Ralph E. Maurer, Rethinking Compliance Settlements and the Foreign Corrupt Practices Act (2012) (unpublished paper) (on file with author) (discussing the prevalence of DOJ settlements in relation to the Foreign Corrupt Practices Act).

n206 *Id.*

n207 Counterintelligence efforts to protect U.S. economic interests are the FBI's second priority, after terrorism. *Counterintelligence: Economic Espionage*, FEDERAL BUREAU OF INVESTIGATION, <http://www.fbi.gov/about-us/investigate/counterintelligence/economic-espionage> (last visited Sept. 8, 2013). To achieve this high priority, the FBI has a dedicated Economic Espionage Unit. *Id.*

n208 *See supra* Part 11 and accompanying text (discussing the under-enforcement of trade secret laws).

n209 18 U.S.C. 1513(e) (2006 & Supp. 2011).

n210 *See supra* notes 106-109 and accompanying text (detailing the difficulties in litigating a claim under the EEA).

n211 Given the close nexus between employment, American competitiveness and trade secrets, the political climate has been receptive to greater trade secret enforcement actions. *See, e.g.*, Press Release. Department of Justice, Department of Justice Joins in Launch of Administration's Strategic Plan on Intellectual Property Enforcement as Part of Ongoing IP Initiative (June 22, 2010), *available at* <http://www.justice.gov/opa/pr/2010/June/10-ag-722.html>. (reporting that the DOJ has increased efforts and resources to prosecute trade secret cases in response to the Obama Administration's first-ever Joint Strategic Plan on Intellectual Property Enforcement, which resulted in a new DOJ Task Force on Intellectual Property).

n212 A firm's audit committee and compliance director would appropriately oversee compliance with this amendment.

n213 Maurer & Maurer, *supra* note 205.

ARTICLE: THE TANGLED WEB: A CASE AGAINST NEW GENERIC TOP-LEVEL DOMAINS

NAME: Joseph P. Smith III *

BIO:

* University of Richmond School of Law, L'13.

LEXISNEXIS SUMMARY:

... Specifically, it dismisses ICANN's argument that new generic top-level domains are necessary, exposes the conflict between private ownership of generic top-level domains and trademark law, discusses the detrimental effect new generic top-level domains will have on the FTC's ability to prosecute online fraud, and addresses the persistent ethical concerns raised by the apparent conflicts of interest between ICANN officials and new generic top-level domain applicants. ... It proposes that ICANN implement a small pilot program rather than continue its plan of examining the roughly 2000 applications it received for new generic top-level domains, that ICANN increase the transparency of the organization in two ways, and that ICANN tweak its Trademark Clearinghouse procedure to balance the power between trademark owners and Internet users. ... At the outset, the chairman noted that the "threshold question has not been answered whether the introduction of new gTLDs provides potential benefits to consumers that will not be outweighed by the potential harms." ... Because of this similarity, trademark rights are a prerequisite for suit under ACPA or the UDRP to remove infringing domain names. ... While most of the new generic top-level domains have not yet been opposed, seven generic top-level domains are being hotly contested by Amazon and Google, exemplifying why generic terms should not be sold to private companies.

HIGHLIGHT: Joseph P. Smith III, *The Tangled Web: A Case Against New Generic Top-Level Domains*, <http://jolt.richmond.edu/v20i3/article10.pdf>.

"If we had a reliable way to label our toys good and bad, it would be easy to regulate technology wisely. But we can rarely see far enough ahead to know which road leads to damnation." ⁿ¹

TEXT:

I. INTRODUCTION

P1 Is the "dot-com" era over as we know it? On June 13, 2012, the Internet Corporation for Assigned Names and Numbers ("ICANN") revealed the list of applied-for new generic top-level domains. ⁿ² Top-level domains are the words at the end of a website's address, such as <.com>. ICANN is a non-profit organization responsible for managing the Internet's system of unique identifiers, including domain names. ⁿ³ ICANN describes itself as the definer of

"policies for how the 'names and numbers' of the Internet should run." ⁿ⁴ It is structured on a multi-stakeholder model including "registries, registrars, Internet Service Providers (ISPs), intellectual property advocates, commercial and business interests, non-commercial and non-profit interests, representation from more than 100 governments, and a global array of individual Internet users." ⁿ⁵ ICANN contracts with generic top-level domain registries and registrars to manage the Internet's domains. ⁿ⁶ Each registrar is required to enter into a register accreditation agreement with ICANN, which gives registrars the ability to register new domains. ⁿ⁷

P2 The list of new generic top-level domains is staggering--ICANN received nearly 2000 applications for the new domains by March 2012. ⁿ⁸ With the expansion of generic top-level domains, domain registrars and large corporations like Google and Apple jumped at the opportunity to own a piece of the expanding Internet. ⁿ⁹ Currently, only a few generic top-level domains are used by the masses--<.com>, <.org>, <.gov> for example. However, new generic top-level domains add nearly limitless terms, including <.app>, <.music>, and <.esq>. The amount of applicants paying the \$ 185,000 application fee suggests that companies are confident that an Internet expansion will be successful. To date, ICANN has delegated over 250 new generic top-level domains. But debate continues as to the value and dangers of massively broadening the available generic top-level domain names available.

P3 ICANN touts many benefits of the new generic top-level domains, while ignoring the many consequences that outweigh these benefits. These benefits include greater trademark protection for brands, a more competitive online market, and the ability for niche online markets to flourish. However, those benefits look less appealing when weighed against the negatives, including conflicts with principles of trademark law, increased difficulty for the Federal Trade Commission in prosecuting online fraud, necessity concerns, and ethical issues between ICANN and new generic top-level domain applicants.

P4 This article's purpose is to provide a general understanding of the legal and financial implications of the new generic top-level domains. By looking at the history and functionality of generic top-level domains, the reader will hopefully have the requisite background to understand the implications of adding new top-level domains. The article discusses the following topics.

P5 Section III of this article examines the positive and negative implications of introducing new generic top-level domains. This section discusses ICANN's stated policy goals in introducing new generic top-level domains, it addresses the potential benefits of introducing new top-level domains based on economic and trademark rationales, and it analyzes the negative implications of introducing new generic top-level domains and why these negative effects outweigh any positives. Specifically, it dismisses ICANN's argument that new generic top-level domains are necessary, exposes the conflict between private ownership of generic top-level domains and trademark law, discusses the detrimental effect new generic top-level domains will have on the FTC's ability to prosecute online fraud, and addresses the persistent ethical concerns raised by the apparent conflicts of interest between ICANN officials and new generic top-level domain applicants.

P6 Section IV of this article proposes three remedial measures that attempt to alleviate some of the problems addressed in Part C of section III. It proposes that ICANN implement a small pilot program rather than continue its plan of examining the roughly 2000 applications it received for new generic top-level domains, that ICANN increase the transparency of the organization in two ways, and that ICANN tweak its Trademark Clearinghouse procedure to balance the power between trademark owners and Internet users.

II. A DOMAIN NAMES PRIMER

P7 To understand the implications of ICANN's introduction of new generic top-level domains, an introductory discussion of the history of top-level domains is helpful. This section will first answer the question "what is a domain name and how does it work?" Next, it discusses the development of legal rights attached to domain names and domain ownership. Finally, the article will examine where a domain name is located for the purposes of jurisdiction and review

of the two types of domain name dispute resolutions, and discusses the applicability of each.

A. What is a Domain Name?

P8 A domain name in simple terms is the combination of words and numbers that lead an Internet user to a website.ⁿ¹⁰ The Internet allows users to look up websites through its Domain Name System ("DNS") using a uniform resource locator ("URL") to direct users to specific websites.ⁿ¹¹ The DNS uses a tree-like hierarchy to organize URLs.ⁿ¹² Commonly, a URL has three parts: a protocol (or third-level domain), a server name (or second-level domain), and a resource ID (top-level domain).ⁿ¹³ For example, Google's URL is <www.google.com>. The most common protocol is <www>, which is an abbreviation for World Wide Web.ⁿ¹⁴ To the right of the protocol is a domain name.ⁿ¹⁵ A domain name is a combination of alphanumeric characters used by an Internet browser to identify a website.ⁿ¹⁶ In the Google example, <google> is the domain name. To the right of the domain name is the top-level domain.ⁿ¹⁷ A top-level domain is used to categorize websites.ⁿ¹⁸ In the Google example, <.com> is the top-level domain. The two most common types of top-level domains are generic top-level domains and country code top-level domains.ⁿ¹⁹ Generally, country code top-level domains are two-letter identifiers; e.g., <.fr> for France.ⁿ²⁰ Because country code top-level domains are not changing, this article will focus on generic top-level domains. Top-level domains expanded only slightly in the early years of the Internet. In the 1980's, the Internet only had seven generic top-level domains: <.com>, <.edu>, <.gov>, <.int>, <.mil>, <.net>, and <.org>.ⁿ²¹ In 1995, the Federal Networking Council (FNS) birthed the modern Internet when it passed a resolution defining it as a "the global information system that is logically linked together by a globally unique address space."ⁿ²² Within a year, the Internet became the world's fastest communicator of news, entertainment, and research. In 2001-2002, seven additional generic top-level domains were introduced: <.biz>, <.info>, <.name>, <.pro>, <.aero>, <.coop>, and <.museum>.ⁿ²³ At the same time users were discovering the power of the Internet, businesses were discovering the increasing value of domain name ownership. For example, the domain <www.business.com> was sold for \$ 7.5 million in 1999.ⁿ²⁴ As businesses realized the value of domain name ownership, domain name disputes quickly followed.

B. Domain Name Ownership

P9 During the initial advancement of domain name law, a "personal property" theory was developed by courts to determine who owns a domain name. The Supreme Court of Virginia set the stage for this theory's proliferation, becoming the first court to consider whether property rights attach to domain names in *Network Solutions, Inc. v. Umbro International, Inc.*ⁿ²⁵ The issue in *Umbro* was whether the contractual right to use a domain name can be garnished to settle a default judgment.ⁿ²⁶ After receiving a default judgment against Canada Inc., Umbro filed suit in Fairfax Circuit Court against the domain registrar Network Solutions as a garnishee of Canada Inc., the debtor.ⁿ²⁷ Network Solutions responded that it had no money or other garnishable property belonging to the Canadian debtor and that the domain names registered by the debtor were non-garnishable contracts.ⁿ²⁸ The lower court found that the debtor's domain names were "valuable intangible property" subject to garnishment, and ordered Network Solutions to deposit control of the domains to the court.ⁿ²⁹ The Supreme Court of Virginia did not reach the issue of whether the domain name was a form of personal property because Network Solutions acknowledged that it was during oral argument;ⁿ³⁰ however, the case nonetheless enabled subsequent judicial opinions to explore the personal property theory of domain ownership.

P10 After *Umbro*, federal courts began adopting the "personal property" theory of domain name ownership. In *Kremen v. Cohen*, the Ninth Circuit treated a domain name as analogous to a document.ⁿ³¹ Gary Kremen lost his domain, <sex.com>, when a bankruptcy lawyer sent a fraudulent letter to Network Solutions claiming that Kremen wished to abandon the domain.ⁿ³² Kremen subsequently filed suit against Network Solutions in the Northern District of California.ⁿ³³ The district court granted summary judgment in favor of Network Solutions, holding, in part, that the domain was "intangible property" to which conversion does not apply. Kremen appealed to the Ninth Circuit.ⁿ³⁴

P11 On appeal, the Ninth Circuit reversed the district court and held that California case law allowed a claim of

conversion for any species of property, including domain names. ⁿ³⁵ Network Solutions argued that no property right existed because the domain is refreshed every twelve hours as the information is broadcast online. ⁿ³⁶ The Ninth Circuit rejected this argument by an analogy to shares of stock, reasoning that "[w]hether a document is updated by inserting and deleting particular records or by replacing an old file with an entirely new one is a technical detail with no legal significance." ⁿ³⁷ This rule allowed Kremen to successfully argue that his domain was his personal property and thus within the scope of California conversion law. ⁿ³⁸

P12 Because domain names are personal property, each domain name must have an owner. However, before any ownership rights will attach, the domain name must be registered. ⁿ³⁹ To register a domain name, an interested party must submit an application containing a potential top-level and second-level domain to a registrar. ⁿ⁴⁰ If the application is registered, it is added to the registry's WHOIS database. ⁿ⁴¹ ICANN defines the "registered name holder" as the person whose name appears in the WHOIS domain database. ⁿ⁴² Courts have also considered the issue of domain name ownership, and have generally followed the ICANN definition. ⁿ⁴³

C. Physical Location of Domain Names and Dispute Mechanisms

P13 With the addition of numerous generic top-level domains, it is increasingly important to understand how domain owners can protect their trademarks online. After accepting the theory that domain names are personal property, the next question to be answered is where domains are located for lawsuit purposes. Congress answered this question through legislation interpreted by the courts. The Anti-Cybersquatting Consumer Protection Act ("ACPA") ⁿ⁴⁴ provides evidence of Congress' acceptance for the "personal property" theory of domain name rights while also establishing the location of domain names. ⁿ⁴⁵ Under the ACPA, a person is liable for improper domain registration if that person registers a domain that infringes a valid trademark under certain conditions. ⁿ⁴⁶ First, the alleged infringer must have a bad faith intent to profit from the trademark. ⁿ⁴⁷ Second, the alleged infringer must register, traffic in, or use a domain name that is identical or confusingly similar to the trademark, or dilutive of the trademark if the mark is famous. ⁿ⁴⁸

P14 The ACPA provides for *in rem* jurisdiction of domain names "in the judicial district in which the domain name registrar, domain name registry, or other domain name authority that registered or assigned the domain name is located." ⁿ⁴⁹ The Second Circuit interpreted this language as showing Congress' intent for domain names to exist as intangible property located in two locations: (1) at the location of the domain name registrar, and (2) at the location of the registry. ⁿ⁵⁰

P15 The ACPA provides one mechanism for resolving domain name disputes, while the alternative option is an administrative action brought under ICANN's Uniform Domain-Name Dispute-Resolution Policy ("UDRP"). The UDRP requires parties to submit to a mandatory administrative hearing when the following three conditions are met: (1) the respondent's domain name is identical or confusingly similar to the complainant's trademark; (2) the respondent has no legitimate rights or interests in respect to the domain name; and (3) the respondent's domain name has been registered and is being used in bad faith. ⁿ⁵¹ First, UDRP resolution is faster (and likely cheaper) than litigation under the ACPA. ⁿ⁵² There is no discovery process and a large percentage of UDRP complaints go unanswered. ⁿ⁵³ Complainants are additionally advantaged by the fact that the UDRP panels have not allowed the assertion of equitable defenses. ⁿ⁵⁴ If successful, the only remedy provided by the UDRP is cancellation of the respondent's domain name and transfer to the complainant. ⁿ⁵⁵

P16 While litigation pursuant to the ACPA affords complainants much broader remedies than the UDRP, it also requires the costs and difficulties of traditional litigation. A successful ACPA plaintiff will have the option of statutory damages and temporary or permanent injunctions. ⁿ⁵⁶ In certain cases, a court may also award costs and reasonable attorney's fees. ⁿ⁵⁷ However, an ACPA complainant must first establish *in personam* jurisdiction. ⁿ⁵⁸ Defendants can also raise the equitable defenses otherwise not allowed under the UDRP. ⁿ⁵⁹ The ACPA and UDRP are not mutually exclusive options; a concurrent ACPA suit is permissible with a UDRP action. ⁿ⁶⁰

III. THE ARGUMENTS FOR AND AGAINST NEW GTLDS

P17 Now that ICANN is delegating new generic top-level domains, the stage is set to analyze their positive and negative effects. ICANN champions the introduction of new generic-top level domains, claiming that widespread expansion of generic top-level domains will benefit businesses and consumers. It has ignored, however, many real concerns expressed by its own advisory board, the United States Federal Trade Commission, and interested parties from around the world.

P18 This section examines the positive and negative implications of introducing new generic top-level domains. First, this section examines the policy rationales supporting ICANN's introduction of new generic top-level domains. Then, it discusses the potential benefits of introducing new top-level domains based on economic and trademark rationales. Finally, an analysis of the negative implications of introducing new generic top-level domains demonstrates why these negative effects outweigh any benefits.

A. Policy Rationales for Expansion

P19 ICANN offers five policy justifications for offering new generic top-level domains. For the reasons set forth below, these policy rationales are lackluster at best.

P20 According to ICANN, the expansion is consistent with all prior expansions of generic top-level domains.ⁿ⁶¹ In essence, the expansion is happening because all prior expansions have been successful. Additionally, ICANN claims that "[t]here are no technical impediments to the introduction of new top-level domains as evidenced by the most recent addition of the two previous rounds."ⁿ⁶² In other words, because the new top-level domains were introduced smoothly, the introduction of 2,000 more top-level domains will also work smoothly.

P21 ICANN also claims that expanding the domain name space to accommodate more scripts and symbols in top-level domains will give end users more choices about the nature of their presence on the Internet.ⁿ⁶³ For example, Chinese users will now be able to use Chinese symbols in their domain names.ⁿ⁶⁴ This will allow the domain owner to create a web address that is targeted only towards users who can understand the language.

P22 Further, ICANN asserts that "[t]here is demand for additional top-level domains as a business opportunity."ⁿ⁶⁵ As I will discuss in detail in Part B below, the <.com> domain is almost monopolistic with its dominance online. ICANN assumes that by introducing more top-level domains, the additional choices for domain registrants will decrease the power of the <.com> top-level domain and lower prices for consumers.

P23 "No compelling reason has been articulated to not proceed with accepting applications for new top-level domains."ⁿ⁶⁶ While the accuracy of this statement is subjective to say the least, ICANN believes that new top-level domains will do nothing but good for the Internet as a whole. It will also fill ICANN's pockets with roughly \$ 30 million in surplus application fees; an issue discussed in detail in Part C below.

B. The Benefits of New gTLDs

P24 New generic top-level domains will have some benefits as they are added to the Internet. Prior to the expansion, the Internet had only twenty-two generic top-level domains.ⁿ⁶⁷ ICANN and supporters of the new generic top-level domains advocate for new generic top-level domains for four reasons. First, it will give companies increased brand control and presence online. Second, it will increase top-level domain competition by spreading market power. Third, it will allow for the creation of niche marketplaces, thus lowering consumer search costs. Finally, the difficult application process will ensure high-quality applicants administer new generic top-level domains.

1. Brand Control

P25 One reason ICANN advocates for new generic top-level domains is that it will increase brand control for companies.ⁿ⁶⁸ A company's branding could benefit from new generic top-level domains in a few different ways. For example, a company with the financial strength and capability can operate its own <brand> generic top-level domain and control all usage of its trademark in domain names.ⁿ⁶⁹ By owning its own top-level domain, a company can reduce the amount of characters needed to find certain products within a brand's website. Rather than <www.amazon.com/kindle>, Amazon could direct its users to <kindle.amazon>. It could do the same for each product it offers within its <.amazon> top-level domain. Additionally, consumers from any country could potentially find a company with its own top-level domain more easily because as long as the consumer knows the brand name, a consumer can type <.brand>. According to ICANN, both of these benefits to trademark owners outweigh any potential risk of increased cyber-squatting.ⁿ⁷⁰

2. Increased Competition

P26 ICANN advocates for new generic top-level domains because it will spread market power away from the <.com> top-level domain and thus increase competition.ⁿ⁷¹ In a letter to the United States Department of Commerce, the Department of Justice's Antitrust Division advised that as of 2008, VeriSign, the owner of the <.com> generic top-level domain had significant market power.ⁿ⁷² The DOJ was concerned that because the <.com> domain was so powerful, it raised concerns of whether Verisign had developed a monopoly on domain names.ⁿ⁷³ The DOJ concluded that the introduction of new generic top-level domains would shift some of that market power away from <.com>.ⁿ⁷⁴ By doing so, consumers and potential registrants would see the benefits through more competitive pricing and increased variety.ⁿ⁷⁵ Whereas previously companies such as Verisign have been able to set prices for domains within the <.com> top-level domain, now successful applicants can offer lower prices and help decrease Verisign's market power. Therefore, it is plausible that new generic top-level domains will help increase competition and decrease the price of domain names online.

3. Creation of Niche Marketplaces

P27 ICANN claims that new generic top-level domains will allow for new online business models by creating niche marketplaces that decrease consumer search costs.ⁿ⁷⁶ For example, as more companies began selling digital copies of music online, the top-level domain <.music> could plausibly become the domain under which all companies offer their services. Apple could use <itunes.music>, Google could use <google.music>, and Amazon could use <amazon.music>. This arrangement would benefit both the user and business because the user would be able to find multiple online music sellers more quickly, and the visibility of each music seller would be greater as well. Smaller companies who only offer services in a single market would also benefit from the creation of new niche marketplaces their exposure to consumers would be increased. By searching for the specific top-level domain like <.music>, a user will not only find Apple's music store, but can also shop for lesser known music stores which may have previously been too difficult to find within the broad <.com> domain. With niche marketplaces, both consumers and businesses can benefit by decreased search costs.

4. Qualified New Registrars

P28 Because the application process is so grueling, ICANN is ensuring that only qualified applicants will administer new generic top-level domains. ICANN's "gTLD Applicant Guidebook" contains directions to apply for a new generic top-level domain.ⁿ⁷⁷ The period in which to apply for a generic top-level domain was January 12 through April 12, 2012.ⁿ⁷⁸ After submission, applications are reviewed in three stages.

P29 The first stage of the review process requires the applicant to meet a set of administrative requirements before any substantive review of the application commences.ⁿ⁷⁹ The application is then posted on ICANN's website for a public comment period lasting sixty days.ⁿ⁸⁰ During this comment period, the Government Advisory Committee may also

notify the applicant that the generic top-level domain may be problematic, either because it violates international law or concerns other sensitive issues. ⁿ⁸¹

P30 Next, the "Initial Evaluation" period begins in which the application is reviewed to determine: (1) if it will cause any problems with the structure of the DNS, and (2) if the applicant is capable of managing the generic top-level domain. ⁿ⁸² These two requirements will help ICANN determine whether a potential generic top-level domain will crash the Internet.

P31 Besides its own review of each applicant, ICANN also created formal public objection period for approximately seven months after it posts the list of completed applications that occurs during the initial evaluation. ⁿ⁸³ If an objecting party meets the standing requirement, ICANN will hear objections. ⁿ⁸⁴ This will allow the public to voice any concerns that ICANN may have missed.

P32 Finally, if the applicant survives the preceding periods, the application moves into a "transition to delegation" period. ⁿ⁸⁵ During the transition to delegation, the applicant must enter into a registry agreement with ICANN. ⁿ⁸⁶ At this time, ICANN and the applicant will contract to operate the top-level domain in the same manner that all current top-level domains operate. The applicant must also perform a "technical set-up," where it shows that it can operate a functional top-level domain before the domain is entered into ICANN's database. ⁿ⁸⁷ If the applicant meets all of these requirements, the domain becomes eligible for entry into ICANN's generic top-level domain database. ⁿ⁸⁸

C. The Negative Implications of New gTLDs

P33 While there are positives, the negative implications of introducing new generic top-level domains far outweigh these positives. The following subsections discuss four distinct reasons that ICANN should not introduce more new generic top-level domains at this time. First, ICANN's own Government Advisory Committee has questioned the necessity and likelihood of success for new generic top-level domains. Second, by issuing new generic-top level domains to private companies, a core principle of trademark law is violated. Third, the FTC has warned ICANN that new generic top-level domains will greatly increase the difficulty of prosecuting cases of online fraud. Finally, ICANN's actions regarding the introduction of new generic top-level domains, thus far, have raised serious ethical concerns about the organization's ability to fairly oversee the project.

1. Doubts of Necessity

P34 Many doubts have been raised about whether the new generic top-level domains are even necessary. ICANN advocates for the new generic top-level domains out of a business necessity due to scarcity of second-level domains within the current generic top-level domains. This necessity is questionable and regardless of the fact that ICANN has offered no evidence to support this claim, two counter arguments significantly undercut the validity of the claim. First, ICANN's own Government Advisory Committee ("GAC") chairman openly questioned the necessity for new generic top-level domains in a letter to ICANN's Chairman of the Board in 2007. ⁿ⁸⁹ Second, the Supreme Court rejected a similar argument with regard to colors as trademarks in *Qualitex Co. v. Jacobson Products. Co.*, an argument that also can apply to domain names. ⁿ⁹⁰

P35 In a letter to ICANN's former Chairman of the Board, the former GAC Chairman raised apparently continuing concerns by the GAC about the introduction of new generic top-level domains. ⁿ⁹¹ At the outset, the chairman noted that the "threshold question has not been answered whether the introduction of new gTLDs provides potential benefits to consumers that will not be outweighed by the potential harms." ⁿ⁹² The GAC chairman noted that in 2006 the ICANN Board of Directors requested an economic benefit analysis study of new generic top-level domains, which at the time of the letter had yet to occur. ⁿ⁹³ He was also concerned that the introduction of new generic top-level domains would lead to a creation of monopolies rather than an increase in competition. ⁿ⁹⁴ The GAC warned that a likelihood of "end user confusion" could result from the introduction of new generic top-level domains, which I further discuss in the

"Trademark Concerns" section below. ⁿ⁹⁵ The GAC chairman criticizes ICANN for its failure to address the lack of awareness of the new generic top-level domains by many smaller businesses and Internet users as a whole. ⁿ⁹⁶ The GAC chairman urges ICANN to simplify the application and objection process, and also be more transparent about how it intends to spend the predictably large surplus earned from application fees. ⁿ⁹⁷ Based on all of these issues, it becomes clearer that ICANN has not established a necessity for new generic top-level domains.

P36 ICANN fails to make a valid argument that the new generic top-level domains are running out of space for new second-level domains when it is compared to a similar argument made about trademarks. In 1995, the Supreme Court rejected an argument that scarcity should bar colors from trademark protection. ⁿ⁹⁸ The respondent in *Qualitex* argued that the array of colors is limited and therefore colors should not be afforded trademark protection to prevent any unfair competition. ⁿ⁹⁹ The Court dismissed the argument, noting that the mixing of colors could produce nearly limitless choices for competitors to use in their own products. ⁿ¹⁰⁰ Compared to the color argument in *Qualitex*, ICANN's concern of second-level domain scarcity should be questioned. Second-level domains are composed of both numbers and letters. The potential combinations of numbers and letters in second-level domains are nearly limitless. While a random assortment of numbers and letters may not make a good domain, ICANN cannot claim that the domains are running out. Moreover, unless trademarks themselves are running out, it does not logically follow that <.com> cannot be added to each newly registered mark. While the same trademark is sometimes issued for completely separate products, in that situation the trademark owner could use the trademark name and product type as its domain name. For example, Delta is a trademark for both faucets and airlines. While <delta.com> can only be used for one company, the other could merely adopt the domain <deltaairlines.com> or <deltafaucets.com>. Under this scrutiny, ICANN's claim of scarcity should be given little credence.

2. Conflict with Trademark Law

P37 ICANN's introduction of new generic top-level domains conflicts with the well-established trademark doctrine that prevents ownership of generic terms. Domain names are treated under the law as extensions of trademark rights, but are even more exclusive in the sense that once the domain is issued, no one else can use it. ⁿ¹⁰¹ The rationale behind excluding generic marks is that if one person owned the rights to a generic term, it would prevent a competitor from using the term that identifies its product. ⁿ¹⁰² Examples of generic terms include lamps, cars, etc. Because of this similarity, trademark rights are a prerequisite for suit under ACPA or the UDRP to remove infringing domain names. ⁿ¹⁰³

P38 Courts use a "levels of distinctiveness" test to determine if a mark is eligible for trademark protection. ⁿ¹⁰⁴ There are four levels of distinctiveness. ⁿ¹⁰⁵ Generic marks are terms used to identify a particular type of product, and are never available for trademark protection. Trademarks lower consumers' search costs, allow the owner to develop goodwill in his company, and provide marketing advantages. An important notion of trademark law is that trademarks identify a producer of goods or services, not a type of goods or services. ⁿ¹⁰⁶ Trademark rights exist through use, but only distinctive marks are available for trademark protection. ⁿ¹⁰⁷ Both the UDRP and ACPA require trademark ownership for a complainant to succeed in a domain name dispute, ⁿ¹⁰⁸ and with this fact in mind, the next section will explain why the new generic top-level domains violate these principles.

P39 ICANN accepted applications for hundreds of generic terms as new generic top-level domains. ⁿ¹⁰⁹ These new domains include <.art>, <.computer>, <.pizza>, and <.restaurant>, just to name a few. ⁿ¹¹⁰ While most of the new generic top-level domains have not yet been opposed, seven generic top-level domains are being hotly contested by Amazon and Google, exemplifying why generic terms should not be sold to private companies. By allowing these companies to own generic terms as part of generic top-level domains, the company will have an online monopoly on a generic term and could lead to serious issues of unfair competition.

P40 For example, if Amazon operates the <.app> top-level domain and refuses to allow Google to register a domain under <.app>, Google is unable to compete in the <.app> marketplace. Google and Amazon have both bid on the

domains <.app>, <.cloud>, <.game>, <.movie>, <.music>, and <.play>. ⁿ¹¹¹ All of these terms would fall within the generic category of *Zatarains*' levels of distinctiveness test. ⁿ¹¹² The *Zatarains* court was worried about disadvantaging competitors by allowing generic terms to be trademarked, but ICANN seems to have done the complete opposite. Both Google and Amazon make legitimate use of the term "apps." Either one would be significantly disadvantaged if they were no longer allowed to use the term. If Amazon were given trademark protection in the term "app," Apple would likely be an infringer unless it shut down its "App Store." Luckily, *Zatarains* foresaw this result, and courts across the United States followed this example to set the boundaries of trademark rights. While a trademark on a generic term is not identical to ownership of a generic titled top-level domain, the economic effects would be quite similar.

P41 ICANN announced that the creation of niche' marketplaces as one of its objectives in creating new generic top-level domains. Assuming this becomes common practice, the generic top-level domain owner would presumably license a second-level domain to any interested companies offering products in the niche. But take Amazon for example, who is asserting itself as the only permissible user of the <.app> top-level domain. ⁿ¹¹³ Amazon is only one of many companies who provide "apps," yet it intends to own the entire <.app> registry and prevent any other company from using it. Specifically, Amazon claims in its application that <.app> may not be delegated or assigned to third party organizations, institutions, or individuals. ⁿ¹¹⁴ Amazon is purporting to own the <.app> top-level domain and prevent others who offer "apps" from participating in the new marketplace. Amazon is claiming a trademark right, vis-à-vis its exclusion from others in using a generic term and in effect will have a monopoly in the <.app> marketplace as warned by the GAC in 2009. ⁿ¹¹⁵

3. Enforcement Concerns

P42 The Federal Trade Commission ("FTC") offers a third opposition to the new generic top-level domains because new domains will magnify the already difficult challenge of protecting consumers from online fraud. ⁿ¹¹⁶ In a letter to the CEO and Chairman of ICANN's Board of Directors, the FTC addressed its concern over the effects new generic top-level domains will have on FTC enforcement of online fraud prevention. ⁿ¹¹⁷ The FTC warned that "[f]raudsters will be able to register the misspellings of businesses, including financial institutions, in each of the new gTLDs, create copycat websites, and obtain sensitive consumer data with relative ease before shutting down each site and launching a new one." ⁿ¹¹⁸ The FTC also expressed concerns that the potential for bad actors to obtain and operate top-level registries will significantly increase, even with ICANN's background check procedures. ⁿ¹¹⁹ ICANN has already proven to be negligent in its management of the WHOIS database, in turn obstructing FTC investigations into the owners of fraudulent websites. ⁿ¹²⁰ The FTC suggested that ICANN make certain changes to protect the public from the dangers of new generic top-level domains. It urged ICANN to implement the new generic-top level domain program as a pilot program and only approve a small number of the initial generic top-level domains. ⁿ¹²¹ The FTC encouraged ICANN to hire more compliance staff to strengthen its contractual compliance program. ⁿ¹²² It also recommended that ICANN develop a new program to monitor the consumer issues bound to arise from the implementation of the first round of new generic top-level domains. ⁿ¹²³ Additionally, the FTC requested that ICANN assess its application's risk of consumer harm as part of the application review process. ⁿ¹²⁴ Finally, the FTC advised ICANN to improve the accuracy of its WHOIS databases, potentially including a registrant verification procedure to help the FTC locate and prosecute bad actors. ⁿ¹²⁵ I will advocate for some of these recommendations in Section IV of this article.

4. Ethical Concerns

P43 Beyond the substantive concerns of the introduction of new generic top-level domains, advocates have raised serious ethical concerns about ICANN's Board of Directors. In 2011, two members of the ICANN Board joined for-profit domain holding corporations within a month of leaving ICANN. ⁿ¹²⁶ Because the ICANN bylaws have no restrictions on the Board members after they leave, their employees are more susceptible to conflicts of interests when moving to private companies. ⁿ¹²⁷ Criticisms of ICANN's ethics policies are worldwide and continuing, and are evidenced by a letters sent to ICANN from many new generic top-level domain applicants.

P44 Applicants for the <.africa> top-level domain have continually notified ICANN of a conflict of interest between a competing applicant and ICANN's Government Advisory Committee. On July 18, 2012, DotConnectAfrica ("DCA") advised ICANN as to this conflict. ⁿ¹²⁸ DCA noted that a member of ICANN's GAC also sat on the Board of Directors for KeNIC, a corporation competing with DCA for the <.africa> top-level domain. ⁿ¹²⁹ DCA provided evidence that the GAC Board member has publicly opposed the DCA in various discussions about the <.africa> top-level domain, and it requested that she remove herself from the GAC where she played a role in determining what new generic top-level domains applications are accepted. ⁿ¹³⁰ Even more troubling is the attachment to the DCA email--a prior email dated April 7, 2011 raising the same concerns about the same GAC Board member. ⁿ¹³¹ If this conflict was an isolated incident it would be less severe, but the problem is more widespread.

P45 On July 6, 2012, the CEO of BRS Media exposed another conflict of interest on the GAC with regards to the <.radio> top-level domain. ⁿ¹³² According to the letter, the European Broadcasting Union ("EBU") was admitted to the GAC while it has a pending application for the <.radio> top-level domain. ⁿ¹³³ The BRS CEO requested that the EBU step down from its position on the GAC Board immediately to resolve the glaring conflict of interest. ⁿ¹³⁴ In light of all of these problems, ICANN should implement certain remedial measures to help alleviate these concerns.

IV. REMEDIAL MEASURES FOR NEW GTLDS

P46 As it seems unlikely that ICANN will heed the advice of the FTC and its own GAC, this section offers three remedial measures that ICANN could take now to address some of the concerns expressed in Section III above. First, ICANN should implement a small pilot program rather than continue its plan of examining the roughly 2000 applications it received for new generic top-level domains. This proposal is supported by evidence of success in similar pilot programs created by the United States Patent and Trademark Office, and suggestions by the Federal Trade Commission. Second, ICANN should increase the transparency of the organization in two ways. ICANN should release publicly a detailed plan that explains how ICANN plans to spend its expected \$ 30 million surplus from the new generic top-level domain applications. Additionally, ICANN should expand its conflicts of interest policy to include related committees and organizations participating in the application process. Finally, ICANN cancel the Uniform Rapid Suspension mechanism, which creates an even higher likelihood of trademark bullying without any new protections for domain users. These proposals are discussed in detail below.

A. Implementation via a Pilot Program

P47 ICANN needs to implement the new generic top-level domain through a pilot program to minimize any negative effects, rather than hastily introduce thousands of top-level domains. ICANN noted in the "gTLD Applicant Guidebook" that it can add a maximum of 1000 new generic top-level domains per year. ⁿ¹³⁵ During its four-month application period, ICANN received 1,930 applications. ⁿ¹³⁶ With 2,000 applications to review, a perfect implementation of these new generic top-level domains would take two years. ⁿ¹³⁷ This two-year period, however would be assuming that ICANN is actually able to add 1000 new generic top-level domains per year. During this time, ICANN will presumably accept more applications and develop a backlog of new generic top-level domains.

P48 ICANN should narrowly implement the new generic top-level domains. To mitigate the risks noted above in Section III, ICANN should begin by implementing only a small number of uncontested generic top-level domains owned by experienced registries. By choosing uncontested generic top-level domains, it will lessen the possibility of legal action. Experienced registries will likely have fewer growing pains while administering a new generic top-level domain. The resources ICANN planned to use implementing mass new generic top-level domains can instead be spent on analysis of the pilot generic top-level domains and use this knowledge to better craft the full-scale new generic top-level domain program. If the results of the pilot program are promising, ICANN will already have thousands of applications to review and implement. At the same time, it can accept new applications in good faith, with the pilot program serving as a model for the likely success of further expansion. If the pilot program proves unworkable, ICANN will have saved an enormous amount of resources by limiting its implementation to the piloted generic top-level

domains.

P49 ICANN should use The United States Patent and Trademark Office ("PTO") as a model for implementing the new generic top-level domains as a pilot program. The PTO constantly introduces changes to its procedures through pilot programs and its efforts have been successful. ⁿ¹³⁸ For example, The PTO introduced the "Enhanced First Action Interview Pilot Program" in October of 2009. ⁿ¹³⁹ Because of the program's success, the PTO has extended the program three times and now expanded the program to all technologies. ⁿ¹⁴⁰ Based on these expansions, the PTO has proved the workability of pilot programs on large-scale technological applications, and ICANN should follow the PTO's lead.

B. Increased Transparency

P50 ICANN must also address the ethical concerns of various interested parties by increasing the transparency of its operations. It can do so in the following ways. Regarding its surplus applications profits discussed above in Section III, ICANN should issue a detailed public statement explaining how it will allocate the funds earned from the new generic top-level domain program. Additionally, ICANN should conduct a full-scale review of all parties with any say in the new generic top-level domain application process, and remove anyone with even tenuous conflicts of interest.

1. Allocation of Funds from the new gTLD Applications

P51 ICANN expects to net \$ 140 million from the new generic top-level domain program according to its budget that it released for the fiscal year of 2012-13. ⁿ¹⁴¹ As a non-profit, ICANN receives special tax treatment in exchange for it not earning a profit for its owners. ⁿ¹⁴² However, in its budget, ICANN only forecasted revenues based on the assumption that it would receive 500 new generic top-level domain applications. ⁿ¹⁴³ In fact, the application number is closer to 2,000. ⁿ¹⁴⁴

P52 Because of the greater number of applications, ICANN's budget must be adjusted upward to account for those numbers. Based on ICANN's budget methodology for the 500 applications, the 2,000 applications will net ICANN of \$ 337 million, while predicting a likely operating cost of \$ 156 million. ⁿ¹⁴⁵ It budgets another \$ 150 million in operating costs, leaving a surplus of roughly \$ 30 million on this single round of new generic top-level domain applications. ⁿ¹⁴⁶ Obviously, ICANN cannot make \$ 30 million in profit and continue to remain a nonprofit business. According to the budget, ICANN plans to "initiate a policy development process to define with the community the purpose and mechanism of administration of such excess" with any surplus that remains. ⁿ¹⁴⁷ This statement is vague so I suggest the following as to how ICANN should spend its surplus and remain a non-profit.

P53 With a conservative estimate of \$ 30 million in surpluses, the time has come for ICANN to define the mechanism of administration of such excess. First, ICANN should analyze how best to lower costs for applicants. As a non-profit, ICANN should not be charging more for its services than required to recoup costs. After recouping its costs, ICANN should use some of the surplus to initiate a cost-effectiveness study for the first round of applications and use the findings to lower application costs.

P54 ICANN should also use some of the surplus to strengthen the WHOIS database and hire more compliance staff, as recommended by the FTC in its letter to the Board. ⁿ¹⁴⁸ The FTC noted in its letter to ICANN that both the WHOIS database and the amount of work for the compliance staff will change dramatically as a result of the 2000 new top-level domain applications. ⁿ¹⁴⁹ The WHOIS database will have to be updated constantly to add all of the new second-level domain registrant information under each new generic top-level domain. ⁿ¹⁵⁰ This job will be handled by the compliance staff. Therefore, ICANN will clearly need to hire many more compliance staff members if it hopes to add the new generic top-level domains efficiently and effectively. ⁿ¹⁵¹

2. Conflicts of Interest Program

P55 ICANN needs to develop a comprehensive ethics review program to address the persistent issues raised by various interested parties. On August 20, 2011, the Washington Post published an article exposing a "revolving door" conflict of interest problem with two members of the ICANN Board of Directors.ⁿ¹⁵² The article detailed the quick transition from an ICANN board-member to a director of a private-sector company with active applications for new generic top-level domains.ⁿ¹⁵³ This board-members move was questioned as a conflict of interest because he had previously had direct access to the success of his new company's top-level domain application.ⁿ¹⁵⁴ Further, his former colleagues at ICANN are more likely to choose his company's application with all else being equal.

P56 In response to the Washington Post article, Oregon Senator Ron Wyden wrote a letter to the United States Department of Commerce and National Telecommunications and Information Administration calling for stricter regulations on the ethical obligations of ICANN.ⁿ¹⁵⁵ The Senator has raised concerns about the lack of oversight regarding former ICANN employees transitioning to private firms with generic top-level domain applications.ⁿ¹⁵⁶

P57 As a likely result from the mounting governmental and media pressures, ICANN announced a new conflict of interest policy on May 6, 2012.ⁿ¹⁵⁷ The policy is comprehensive in theory, mirroring standard corporate conflict of interest policies. The policy encourages all members of any ICANN affiliated organization to disclose any conflicts of interest it has with current top-level domain applications.ⁿ¹⁵⁸ This policy is ineffective, however as evidenced by the two conflicts of interest noted subsequent to the May 6, 2012 adoption of the policy and discussed in Section III above. At least two separate Advisory Committee conflicts of interest have been discovered subsequent to ICANN's new conflicts of interest policy.ⁿ¹⁵⁹ Both of these conflicts involved members of the GAC also having an interested stake in new gTLD applications.ⁿ¹⁶⁰

P58 To rectify the more recent conflicts of interest, ICANN needs to require members of its Government Advisory Committee to adhere to a strict conflict of interest policy, rather than merely "encourage" it.ⁿ¹⁶¹ Exemplifying ICANN's failure to remedy this issue, ICANN held an ethics and conflicts of interest panel in June of 2012 and failed to address any concerns about GAC.ⁿ¹⁶² Note that this date is after the letter from Senator Wyden and after the DotConnectAfrica scandal discussed above in Section III. ICANN must address the GAC concerns immediately if it plans to continue reviewing the remaining applications. To address this ethical concern, ICANN should institute a mandatory background check of all GAC members and cross-reference those findings with every applicant for the new generic top-level domain. Under this simple approach, the issues addressed by DotConnectAfrica and Senator Wyden will happen without a bad faith act from an individual. Therefore, at the very least, ICANN will not be turning a blind eye to the shady dealings happening legally within its own organization.

C. Removing the Rapid Uniform Suspension Mechanism

P59 Finally, ICANN should restructure the Trademark Clearinghouse procedure to balance protection of trademarks with usability of the Internet for both providers and users. To best balance the interests of trademark owners and without overburdening registrars or users, ICANN should remove the Rapid Uniform Suspension mechanism.

P60 The Trademark Clearinghouse is a database of trademarks from all over the world for use in the new generic top-level domain program. The Trademark Clearinghouse is designed to protect the rights of trademark owners.ⁿ¹⁶³ Currently, the Clearinghouse offers one adversarial dispute proceeding for trademark owners called the Rapid Uniform Suspension mechanism.ⁿ¹⁶⁴

P61 The Uniform Rapid Suspension ("URS") mechanism is unnecessary and gives too much power to trademark owners. Because the UDRP already serves the same function as the URS, albeit at a slower pace, the URS serves no other purpose than to allow a trademark owner to bully domain registrants who cannot afford to quickly respond to the complaints.

P62 According to ICANN, the URS was created to compliment the UDRP by providing trademark owners with a quick resolution to clear-cut trademark infringement by suspension of the infringing domain. ⁿ¹⁶⁵ Filing a URS complaint will cost a trademark holder \$ 500 dollars. ⁿ¹⁶⁶ The complainant must allege in his complaint entitlement of relief based upon: (1) the registrant's domain is identical or substantially similar to the complainant's valid trademark that is in current use; (2) the registrant has no legitimate right or interest in the domain name; and (3) the domain was being registered and used in bad faith. ⁿ¹⁶⁷ The complaints are reviewed by an administrative review to determine if it meets the above threshold requirements. ⁿ¹⁶⁸ If the panel determines that the complaint satisfies the requirements, it will issue "Lock Notice" with the registrar of the domain within two days of the complaint's filing. ⁿ¹⁶⁹ Within twenty-four hours, the registrar will lock the domain and notify both parties. ⁿ¹⁷⁰ The registrant has fourteen days to respond to the complaint and, similar to a UDRP response, no affirmative defenses or discovery requests are permitted. ⁿ¹⁷¹ Unlike the UDRP, the remedy for a URS complaint is a suspension of the website for the remainder of its registration period but not a transfer of the domain to the complainant. ⁿ¹⁷²

P63 ICANN has not offered any convincing reasons to add the URS and it should not be implemented for the following reasons. The UDRP complainants already have a 90% success rate. ⁿ¹⁷³ With this much success, it is hard to argue that a more trademark-friendly mechanism is needed for even faster resolutions. Moreover, as the UDRP thresholds are easy to meet and without allowing respondent's the ability to raise affirmative defenses, a defendant has even less of a chance of success. ⁿ¹⁷⁴

P64 The quick and cheap process of URS will only decrease the chances even further for any successful defense. ⁿ¹⁷⁵ The URS complaints will cost approximately \$ 500 to file, as opposed to the \$ 4000 or more under the UDRP and will not require an attorney to prosecute the complaint. ⁿ¹⁷⁶ The lesser cost of URS complaints will likely lead to an increase of URS filings as compared to UDRP filings.

P65 To make matters worse, the two-day review period will increase the likelihood of administrative error. More errors will lead to more appeals and a greater waste of resources.

P66 Based on ICANN's URS Update presentation in October 2012, the main objective of the URS is to give trademark owners quicker remedies for infringement. ⁿ¹⁷⁷ While the URS will clearly promote that goal, it will also waste resources that could be better spent improving transparency or implementation of the new generic top-level domain program itself.

P67 Overall, the URS does not offer enough benefits to outweigh the negative implications of giving trademark owners such a powerful adversarial option for domain disputes. Without any statistics to justify the addition of a quicker dispute mechanism, ICANN should continue to direct complainants to the UDRP or ACPA for dispute resolution.

V. CONCLUSION

P68 The Internet has afforded businesses and consumers the ability to interact with unbelievable speed and convenience. Domain ownership allows businesses to take their storefront directly to the consumer, whether at home or anywhere else with an Internet connection. The original generic top-level domains undoubtedly help users immediately identify whether the site they are visiting is for-profit, non-profit, educational, or part of the government. However, the introduction of thousands of new generic top-level domains will likely blur the distinctions of these top-level domains and cause much more detriment than any potential benefit they could provide.

P69 New generic top-level domains will have some benefits for Internet users. They could lead to increased brand control and better marketing opportunities for businesses. New generic top-level domains could increase competitiveness by spreading the market power of the <.com> domain, likely affording consumers more options at better prices. They may also create niche marketplaces for products and community groups, which could lead to lower search costs for consumers and increased visibility for smaller businesses.

P70 The negative implications are more concrete, however, and far outweigh any of the potential benefits to new generic top-level domains. ICANN's own Government Affairs Committee doubts the necessity or economic benefit of introducing new generic top-level domains. The private ownership of generic terms as top-level domains creates a conflict with existing trademark law and could lead to unfair competition. The FTC warns that new generic top-level domains will increase the already difficult task of policing and prosecuting online fraud. Evidence also shows unethical actions taken by ICANN officials that raise serious questions about the fairness of new generic top-level domain applications.

P71 Regardless of the potential consequences, new generic top-level domains are coming in droves. New generic top-level domain applicants should expect a slow and expensive process throughout their pursuit. New domain registrants should expect trademark owners to have more power than ever in suspending registered domains if the domain is similar to a registered trademark. ICANN should expect to earn much more money than allocable under its proposed budget to remain a non-profit. The media should expect at least a few more conflicts of interest to arise between ICANN advisory board members and new generic top-level domain applicants. Above all else, everyone should expect a tangled web as the intricacies of thousands of new generic top-level domains are introduced to the Internet.

NOTE: TRADEMARKS FOR THE CURE: WHY NONPROFITS NEED THEIR OWN SET OF TRADEMARK RULES

NAME: LAUREN BEHR**LEXISNEXIS SUMMARY:**

... Unfortunately for nonprofits with trademarks, the Lanham Trademark Act ("Lanham Act" or "Act"), the federal statutory scheme that outlines the trademark registration process and provides protection from infringement, offers no special protection for nonprofits. ... Because confusion causes of action are available to all trademark holders, the KP Make-Up holding allows a fair use defense to be raised not only where consumers are confused as to the source of goods in the market, but also where potential donors are confused about which nonprofit they are supporting. ... The court reasoned that the older Children of the World organization would likely succeed on the merits of trademark infringement and dilution claims, and that it would suffer irreparable harm to its ability to distinguish its services and to prevent dilution of goodwill associated with the mark. ... Later the same year, Sue Prom, who started a small dog sledding fundraiser for breast cancer called "Mush for the Cure" received a letter from Komen's attorneys, challenging her application for a trademark and requesting that she change the name of her event because the two organizations fundraise for the same cause. ... Although this provision does not prevent all smaller groups from being subject to litigation, it does punish those trademark holders who bring trademark actions in bad-faith.

HIGHLIGHT:

Abstract: When the Lanham Trademark Act was originally drafted in 1946, it is unlikely that Congress contemplated that trademarks would be used not only by commercial businesses but also by large nonprofits with a national reach. Today, several nonprofits have grown into highly recognizable brands that wish to protect their valuable trademarks, both to ensure that donations reach their intended recipients and to preserve their good reputation in the eyes of the public. Nonprofit charities, though, undoubtedly have very different goals than for-profit enterprises and yet they are subject to the exact same set of trademark laws. This Note argues that, in light of the fundamental differences between commercial businesses and charitable organizations, amendments to the Lanham Trademark Act are necessary. By carving out special rules for nonprofits within the Lanham Act, these charitable entities will receive the trademark protection they need and can focus on their charitable endeavors.

TEXT:**[*243] INTRODUCTION**

Trademark turf wars between profitable corporations make up a great deal of intellectual property litigation.ⁿ¹ Recently, Apple filed a suit to enjoin Amazon from using the trademarked "Appstore" as part of the new Kindle Fire

hardware.ⁿ² It is highly unlikely that Apple will face criticism for filing this action, as it is expected that a highly visible, hugely profitable entity like Apple would vigorously and zealously guard its [*244] brand.ⁿ³ Yet, when well-known charitable organizations take similarly aggressive action, public response is often notably different.ⁿ⁴

In late 2010, the world's leading breast cancer charity, Susan G. Komen for the Cure ("Komen"), found itself harshly judged in the court of public opinion when national media outlets ran a story that Komen had sent letters to a number of much smaller charities demanding that they not use the phrase "for the cure" in their fundraising efforts.ⁿ⁵ Long-time Komen supporter and comedian Stephen Colbert lampooned the organization's legal maneuvering on his show and many donors expressed their disapproval on Komen's social media sites.ⁿ⁶ Other large, well-known nonprofits, including the Wounded Warriors Project and the University of Notre Dame, have also been criticized for using trademark litigation to aggressively protect their brand.ⁿ⁷

Often, these disputes over nonprofit trademarks are settled out of court because organizations either do not have the resources to wage lengthy legal battles or do not wish to divert resources away from their philanthropic objectives.ⁿ⁸ As a result, there is relatively little guidance from courts for addressing infringement cases when the parties are not commercial businesses.ⁿ⁹

[*245] Given the fundamental differences between nonprofit organizations and for-profit commercial enterprises, it seems reasonable that the law might provide a different set of trademark rules for charitable groups and perhaps provide even greater protection for the marks of well-known nonprofits that work to serve a substantial number of people.ⁿ¹⁰ After all, federal tax law provides charitable groups with tax-exempt status because a nonprofit's earnings all go into the organization and do not benefit private shareholders.ⁿ¹¹

Unfortunately for nonprofits with trademarks, the Lanham Trademark Act ("Lanham Act" or "Act"), the federal statutory scheme that outlines the trademark registration process and provides protection from infringement, offers no special protection for nonprofits.ⁿ¹² In fact, based on the plain language of the statute, nonprofits may actually be barred from bringing claims for dilution, which is one of the most common infringement problems.ⁿ¹³ Further, the 2004 U.S. Supreme Court ruling in *KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc.* now permits a defendant to prevail even where there is some confusion between two trademarks.ⁿ¹⁴ In the nonprofit world, this holding essentially could allow the concurrent use of similar trademarks despite the potential for donor confusion that could lead to funds ending up with an unintended recipient.ⁿ¹⁵

This Note argues that although there is not much case law or statutory law applying specifically to nonprofit trademark litigation, the time is ripe for an amendment to the Lanham Act that lays out specific protections for nonprofits and their trademarks.ⁿ¹⁶ Komen, a global organization with a reach and media presence that could not have been imagined when the Lanham Act was enacted in 1946, relies largely on its recognizable brand to continue carrying out its mission.ⁿ¹⁷ By aggressively protecting its brand, Komen avoids donor confusion and is able to maintain its reputation and continue its work as the world's leading [*246] organization for breast cancer research and fundraising.ⁿ¹⁸ Thus, large nonprofits have the same strong interest in protecting their brands as for-profit companies--and perhaps an even greater one--because the work of these organizations affects the greater public as both potential donors and recipients.ⁿ¹⁹

Part I of this Note provides a brief overview of the general principles and objectives of trademark law.ⁿ²⁰ Part II first explores how an organization's charitable involvement affects the trademark analysis and then examines recent actions involving charitable entities.ⁿ²¹ Lastly, Part III explains why charitable trademarks are deserving of enhanced protection, and proposes changes to the Lanham Act and the trademark application process that apply specifically to nonprofits.ⁿ²²

I. TRADEMARK RIGHTS IN AMERICAN LAW

The idea of protecting marks that identify the source of goods or services is well established in the law.ⁿ²³

Currently, in the United States, trademark holders may only use the mark in connection with a specified organization, good, or service, but may control the mark for as long as they are using it, which makes trademark rights particularly powerful.ⁿ²⁴

This Part explains both the principles behind trademark law and how the Lanham Act protects source-identifying marks.ⁿ²⁵ Section A discusses the overarching purpose of trademark law and the protections it provides and details the Lanham Act's legislative history.ⁿ²⁶ Section B explains the registration process for trademarks under the Lanham Act.ⁿ²⁷ Finally, Section C describes how trademark holders assert their rights and the claims they may raise in infringement actions.ⁿ²⁸

A. The Principles and Purposes of Trademark Law and the Lanham Act

In order to protect consumers and trademark holders throughout the United States, Congress enacted the Lanham Act in 1946.ⁿ²⁹ The Act established a federal trademark registration system and provided uniform protections to trademark holders.ⁿ³⁰ Prior to the Lanham Act, trademark law was a mix of state common law and federal statutes, which led to inconsistent judicial decisions about the rights of trademark holders.ⁿ³¹ These inconsistent decisions, combined with the increasing nationalization of the U.S. economy, led Congress to determine that state common law did not provide producers and consumers with adequate, uniform protection of their marks.ⁿ³² The Act adopted most common law elements of trademark protection but also broadened trademark protection by adding a constructive notice rule that significantly expanded the geographic scope of trademark rights.ⁿ³³

Trademark law aims to protect the general public from confusion about the origin of goods and services in the market.ⁿ³⁴ Consumers (or donors, in the case of a nonprofit organization) closely associate a strong mark with the trademark holder's product or organization.ⁿ³⁵ The mark allows for a quick identification, which prevents confusion, mistake, and deception about the entity behind the mark and signals any positive public connotations associated with the mark.ⁿ³⁶ When a person sees a trademark, it allows them to identify the source of the product and to quickly distinguish it from others.ⁿ³⁷ Thus, the trademark provides an assurance of consistent quality and reduces an individual's search costs.ⁿ³⁸

Furthermore, trademark law protects the investment and effort of the trademark holder.ⁿ³⁹ Sellers and organizations expend considerable time and resources building their brands and developing the goodwill of the public.ⁿ⁴⁰ Expending money to maintain and improve a product's quality thereby increases the value of the trademark.ⁿ⁴¹ Trademark rights protect this effort by preventing other companies or organizations from capitalizing on the recognition and goodwill that another's mark has earned.ⁿ⁴²

The Lanham Act defines a trademark as, "any word, name, symbol, or device, or any combination thereof" that is used by the holder of the mark to distinguish the holder's organization or goods in the marketplace.ⁿ⁴³ Both the courts and the U.S. Patent and Trademark Office have interpreted this language broadly and granted trademark protections not only to images and names, but also to colors, sounds, and even scents.ⁿ⁴⁴

Although the original purpose of the Act was to protect both consumers and sellers from misrepresentation and fraud in the marketplace, the Act ultimately created a strong policy favoring trademark holders by establishing a cause of action for trademark infringement.ⁿ⁴⁵ Section 1125 of the Lanham Act explicitly states that infringers "shall be liable in a civil action by any person who believes that he or she is or is likely to be damaged by such [infringing] act," thereby providing trademark holders with a federal cause of action.ⁿ⁴⁶ In interpreting the Lanham Act, the U.S. Supreme Court has recognized that trademarks must be protected because they (1) help consumers identify specific goods, services or organizations; (2) guarantee a certain standard of quality of the product related to a particular trademark; and (3) provide useful tools for advertising and sales, where the trademark is associated with a widely known product or organization.ⁿ⁴⁷

B. Registering Trademark Rights Under the Lanham Act

The federal trademark registration process, as laid out in § 1051 of the Lanham Act, provides the best option for national nonprofits like Komen. ⁿ⁴⁸ Federal registration makes the most sense for large, far-reaching nonprofits because it extends a trademark holder's exclusive rights throughout the United States. ⁿ⁴⁹ Further, a federally registered trademark serves as clear proof of the holder's exclusive right to use the trademark across the entire United States, thus making the mark far easier to protect. ⁿ⁵⁰ Additionally, a federally registered mark provides constructive notice to any would-be infringers across the country because trademark registrations are accessible to the public. ⁿ⁵¹ It is important to note, though, that no registration is required to establish trademark rights if a mark is capable of identifying its source to the public. ⁿ⁵²

The ease of establishing protection and the ultimate strength of the trademark are tied to the mark's distinctiveness. ⁿ⁵³ The strength of a **[*251]** mark is a key factor for many courts in analyzing confusion causes of action under § 1125(a). ⁿ⁵⁴ To assess a trademark's distinctiveness, courts have classified trademarks into four categories: arbitrary and fanciful, suggestive, descriptive, and generic. ⁿ⁵⁵

Trademarks that come under the umbrella of the first two categories are considered intrinsically distinctive and therefore, they can be registered without showing any secondary meaning in relation to their sources. ⁿ⁵⁶ Fanciful marks have been completely fabricated by the mark holders and have no dictionary meaning, such as "Clorox" for bleach or "Xerox," for copying equipment. ⁿ⁵⁷ Arbitrary marks, by contrast, are commonly used words that in no way describe the goods or services to which they are attached. ⁿ⁵⁸ For example, the term "Apple" is an arbitrary mark for computer products but would be generic for the fruit and other products using apples as an ingredient. ⁿ⁵⁹

Although less strong than arbitrary or fanciful marks, suggestive marks are also considered inherently distinctive as they convey only an indirect impression of the goods or services to which they are attached. ⁿ⁶⁰ These marks thus require the consumer to use "imagination, thought and perception" to determine the source behind the mark. ⁿ⁶¹ Examples of marks that courts have determined to be suggestive include "Citibank" for banking services and "Wite-Out" for correction fluid. ⁿ⁶²

[*252] Conversely, descriptive marks describe a quality, characteristic, or function of the attached product or service. ⁿ⁶³ These marks only receive trademark protection if they have acquired a secondary meaning such that the public mentally connects the mark with a specific source. ⁿ⁶⁴ Examples of descriptive marks include "Super Glue" for fast-drying glue and "Yellow Pages" for phone directories with yellow pages. ⁿ⁶⁵

Finally, generic terms and images are per se ineligible for trademark protection because they are overly general and therefore do not signify a particular source or organization to the public. ⁿ⁶⁶ The test for genericness is "whether the public perceives the term primarily as the designation of the article." ⁿ⁶⁷ Formerly protected trademarks such as "asprin," "thermos," and "trampoline" no longer receive trademark protection because the public uses these terms to describe the actual article to which the mark was attached instead of the entity behind the product. ⁿ⁶⁸

C. Asserting Federal Trademark Rights

A trademark holder may bring an infringement claim for action that is likely to cause confusion or the dilution of his or her mark, or both. ⁿ⁶⁹ Originally, trademark law only addressed infringing activity that was likely to cause confusion, but Congress amended the Lanham Act in 1996 to include a new cause of action, "dilution." ⁿ⁷⁰ This amendment was intended to protect trademark holders from unauthorized uses of their marks that could potentially diminish the value and strength of a mark's reputation, even if there was no potential for confusion. ⁿ⁷¹

This Section begins by discussing infringement claims for consumer confusion, and the factors courts use to assess the likelihood of confusion. **[*253]** ⁿ⁷² It then explores the more recent dilution amendments, and how they broaden the scope of trademark protection. ⁿ⁷³

1. Confusion Claims

Because the federal trademark system was established to protect both consumers and trademark holders, § 1125(a) of the Lanham Act provides a cause of action for trademark holders against anyone who uses a trademark, without the holder's permission, in any way that is reasonably likely to cause confusion in the minds of consumers.ⁿ⁷⁴ When considering a trademark infringement claim, courts use a two-step analysis: a plaintiff must first establish that they have a valid and enforceable trademark, and then must show that the mark was used in a way that is likely to confuse consumers as to its source.ⁿ⁷⁵

The federal courts of appeals each use their own slightly different multi-factor balancing tests as a flexible guide to decide whether a defendant's use of a registered mark will cause confusion in the market.ⁿ⁷⁶ For example, the U.S. Court of Appeals for the Second Circuit applies an eight factor test, first laid out in 1961 in *Polaroid Corp. v. Polarad Electronics Corp.*, in confusion causes of action.ⁿ⁷⁷ These eight independent elements, generally referred to as the *Polaroid* factors, are: (1) the strength of the senior mark, (2) the similarity of the marks, (3) the proximity of the parties; (4) the likelihood the prior holder "will bridge the gap," (5) the evidence of actual confusion, (6) the intent of the defendant, (7) the quality of the defendant's product, and (8) the buyer's sophistication.ⁿ⁷⁸ The court in *Polaroid* also noted that other factors may be taken into account depending on the complexity of the issues in a particular case.ⁿ⁷⁹

[*254] Although different circuits use slightly different factors in their tests, the circuits are similar in that each factor is weighed independently in a highly fact-specific inquiry to determine whether the defendant infringed the plaintiff's trademark.ⁿ⁸⁰ Accordingly, no single factor is decisive.ⁿ⁸¹ Moreover, because the lists of factors are non-exhaustive, there is no guaranteed uniformity in how the tests are applied both within and among the circuits, and courts are allowed to take into consideration any facts and circumstances relevant to the particular case.ⁿ⁸²

The confusion analysis became even more complicated in 2004 with the Supreme Court's holding in *KP Make-Up*, which involved the availability of a fair use defense for trademark infringement.ⁿ⁸³ The fair use defense is available to would-be infringers under § 1115(b)(4).ⁿ⁸⁴ The statute provides a defense for the use of a protected mark where "the use . . . charged to be an infringement is a use . . . of a term or device which is descriptive of and used fairly and in good faith only to describe the goods or services of such party, or their geographic origin."ⁿ⁸⁵ Essentially, this affirmative defense is available where the alleged infringer (1) did not use plaintiff's mark as its own trademark, (2) used the mark in good faith without intent to capitalize on its similarity to the plaintiff's mark, and (3) used the mark only as a means of describing its own goods or services.ⁿ⁸⁶

Prior to this decision, a potentially infringing defendant could not raise a fair use defense until the defendant clearly proved that there was no potential for confusion.ⁿ⁸⁷ In *KP Make-Up*, the Court held that a fair [*255] use defense could stand even where some confusion existed or was likely to exist.ⁿ⁸⁸ Thus, under this holding, a defendant who has used another's trademark without permission may successfully raise a fair use defense even when the purported "fair use" creates confusion.ⁿ⁸⁹

Because confusion causes of action are available to all trademark holders, the *KP Make-Up* holding allows a fair use defense to be raised not only where consumers are confused as to the source of goods in the market, but also where potential donors are confused about which nonprofit they are supporting.ⁿ⁹⁰ There are often a great number of both large and small charities working on behalf of similar causes, and therefore tremendous potential for public confusion regarding the names of nonprofit organizations.ⁿ⁹¹ Under *KP Make-Up*, it is possible that two organizations could have very similar marks and the second user might be permitted to keep using the mark even where donors were confused and misdirecting contributions, provided that the second user used the mark for description and in good faith.ⁿ⁹²

It should be noted that there is not much case law in this area because most nonprofit confusion claims are not fully litigated to decision.ⁿ⁹³ Charities often opt to settle out of court because they either lack the funding to wage a full legal battle or do not want to divert funds from their mission.ⁿ⁹⁴ When nonprofit cases do actually reach trial, courts have generally expressed great concern over confusion in the nonprofit context.ⁿ⁹⁵

[*256] 2. Dilution: Expanding Trademark Protection for Senior Mark Holders

Congress amended the Lanham Act in 1996 by adding the Federal Trademark Dilution Act (FTDA), which expanded trademark infringement claims beyond situations involving directly competing marks.ⁿ⁹⁶ This significant amendment established a federal cause of action against use that could tarnish or devalue a senior user's mark.ⁿ⁹⁷ The new amendment aimed primarily to protect senior trademark holders that had expended significant money and effort in developing brands and establishing goodwill from the "lessening ... [of] the capacity of [their] famous mark," even where there was no genuine threat of confusion with a competing brand or organization.ⁿ⁹⁸

Whereas trademark infringement law up until this point had focused primarily on protecting the public from confusion about the source behind the mark, the anti-dilution amendment sought to expressly safeguard "the trademark owner's investment in the goodwill that is embodied in a mark," even where there was no chance for confusion.ⁿ⁹⁹ With the passage of this amendment, Congress allowed even greater protection to the most famous trademark holders by establishing a cause of action rooted in the idea that where a mark is so prevalent [*257] in the public, even non-competing uses could diminish the mark's effectiveness.ⁿ¹⁰⁰

A decade after passing the initial anti-dilution legislation, Congress broadened its scope by passing the Trademark Dilution Revision Act (TDRA).ⁿ¹⁰¹ The TDRA requires only a mere likelihood of dilution rather than proof of actual dilution.ⁿ¹⁰² Thus, this recent amendment perpetuated the expansion of federal statutory protection for senior trademark holders.ⁿ¹⁰³

Although the anti-dilution amendment provides a powerful tool for most senior mark holders, its power may be significantly hindered in the charitable nonprofit context.ⁿ¹⁰⁴ Dilution claims may only be brought in commercial settings under § 1125(c) of the Lanham Act, unlike confusion claims which have no such restriction.ⁿ¹⁰⁵ Therefore, as [*258] nonprofits operate outside the commercial world, a charitable organization may not, based on the plain language of § 1125(c), pursue a dilution claim even if the group reasonably believed that it was suffering because another organization was chipping away at its well-known and respected name.ⁿ¹⁰⁶

Despite the plain language of the statute, courts have, in some instances, found trademark infringement for dilution in nonprofit cases.ⁿ¹⁰⁷ These courts were less concerned with a strict statutory interpretation, and more concerned about the tarnishment of recognizable charitable organizations, which could impair their ability to carry out their missions.ⁿ¹⁰⁸ The courts in these cases opted to reach their decisions not by focusing on stringent plain language, but by remaining true to the legislative intent behind the dilution amendments, which was to broaden trademark protection for senior mark holders and their valuable brands.ⁿ¹⁰⁹

II. TRADEMARKS FOR A CAUSE

Given the markedly different objectives of commercial entities and nonprofits, one might reasonably think that different rules would apply in situations involving the trademark rights of a charitable organization.ⁿ¹¹⁰ Indeed, the tax code treats nonprofit organizations differently than commercial enterprises, rewarding these organizations with a preferential tax status because they aim to benefit the public good and rely on the donations of others.ⁿ¹¹¹ Yet the Lanham Act contains no special provisions for nonprofit trademarks.ⁿ¹¹²

[*259] Section A of this Part explores the legal and social consequences that arise when two nonprofit organizations, both presumably trying to perform socially beneficial work, become engaged in a trademark battle.ⁿ¹¹³ Section B then describes the recent, highly publicized controversy that stemmed from Susan G. Komen for the Cure's zealous attempts to protect its trademarks.ⁿ¹¹⁴

A. Turf Wars: Court Involvement in Nonprofit Trademark Actions

Case law involving trademark disputes between nonprofit organizations is somewhat sparse because nonprofit organizations often prefer to reach a settlement rather than face a protracted legal battle that directs resources away from

their overarching missions. ⁿ¹¹⁵ In the rare event that a case involving charities is litigated to a final judgment, courts have typically found for more well-established organizations, which are at risk of losing out on misdirected donations when smaller organizations begin to use similar names. ⁿ¹¹⁶

In 2000, in *Deborah Heart & Lung Center v. Children of the World Foundation*, the U.S. District Court for the District of New Jersey granted the plaintiff organization an injunction against the defendant's continued use of the "Children of the World" mark in connection with the defendant's competing charitable fundraising and medical services. ⁿ¹¹⁷ The Deborah Heart and Lung Center Foundation operated a global outreach program, known as "Children of the World," that provided life-saving surgeries for children with congenital heart defects. ⁿ¹¹⁸ The organization had no registered trademark that would clearly establish [*260] rights to the name "Children of the World," but offered evidence showing that it had operated using this name for nearly thirty years. ⁿ¹¹⁹ The defendant organization, which was two years old at the time, also provided congenital heart surgeries to needy children in Latin America and Eastern Europe and had a registered trademark for "Children of the World Foundation." ⁿ¹²⁰

The court reasoned that the older Children of the World organization would likely succeed on the merits of trademark infringement and dilution claims, and that it would suffer irreparable harm to its ability to distinguish its services and to prevent dilution of goodwill associated with the mark. ⁿ¹²¹ Considering the likelihood of whether an average individual would "confuse or associate the parties' services and marks with one another based on the overall impression created by the mark as a whole," the court found that the marks were confusingly similar, as the names were not identical, but very close to one another, and the organizations directly competed for the same donors. ⁿ¹²²

The court also found that allowing two similarly named organizations fighting for a similar cause to exist concurrently would be likely to dilute the plaintiff's goodwill with donors, as it was well established as the only program of that name for twenty-eight years. ⁿ¹²³ The plaintiff's organization was relatively famous for a number of years before the defendant arrived on the scene and the court believed that the similarity between the two organization's names would lessen the plaintiff's capacity to distinguish its organization and services. ⁿ¹²⁴

Some courts, including the *Children of the World* court, have found an increased likelihood of confusion when the senior mark is famous. ⁿ¹²⁵ These courts reasoned that when a mark is well-known to a [*261] large percentage of the general public, potential donors or buyers are far more likely to mentally connect the similar secondary use of a mark to the more recognizable senior trademark holder, thereby leaving it open for tarnishment by the secondary user. ⁿ¹²⁶

The *Children of the World* court was extremely concerned about this confusion in infringement cases involving nonprofits. ⁿ¹²⁷ The court asserted that nonprofit trademarks should receive enhanced judicial protection because of the public's strong interest in ensuring that individual contributions are received by the intended organization. ⁿ¹²⁸ Further, the court determined that the prospective harm to the defendant or the greater public interest served by the defendant's organization could be ameliorated simply by allowing for a short grace period while the defendant transitioned to a new, non-infringing name. ⁿ¹²⁹

A somewhat similar case arose in 2009, when the U.S. District Court for the District of Nebraska was presented with a nonprofit trademark battle in *WWP, Inc. v. Wounded Warriors, Inc.* ⁿ¹³⁰ The two charitable organizations, both dedicated to supporting injured veterans, became locked in a lengthy litigation over allegedly misdirected donations and the domain name woundedwarriors.org. ⁿ¹³¹ Wounded Warriors, Inc., an Omaha, Nebraska charity, owned the domain name but the Wounded Warrior Project of Jacksonville, Florida, a larger and older group, argued that scores of its supporters donated money to the other group's site thinking it was going to the Florida charity, which owned the similar domain names, woundedwarrior.org and woundedwarriorproject.org. ⁿ¹³² Wounded Warriors Project contended that it had become "synonymous with veteran service to this generation of wounded veterans" due to aggressive marketing and endorsements by Bob Costas, Bill O'Reilly, Jimmy [*262] Buffet, and the NFL, whereas the other organization marketed itself only on its website. ⁿ¹³³ The organization alleged that this publicity prompted donors to mistakenly contribute to the other charity's website. ⁿ¹³⁴

Donations to Wounded Warriors, Inc. had increased dramatically since the launch of the woundedwarriors.org website and the organization admitted during discovery that it had cashed checks for misdirected donations. ⁿ¹³⁵ A jury awarded a \$ 1.7 million verdict to the plaintiff and issued a permanent injunction barring the use of the problematic domain name by the defendant. ⁿ¹³⁶ On appeal, the court upheld the jury verdict, citing the significant donation increases for the defendant and the much larger national profile of the Wounded Warrior Project. ⁿ¹³⁷ Further, the verdict reiterated the strong public interest in donors' gifts reaching their intended destination organizations. ⁿ¹³⁸

Usually, however, trademark disputes like the ones in *Children of the World* and *Wounded Warriors* settle before proceeding to court. ⁿ¹³⁹ A recent example of such a dispute involved the federally trademarked "Sunshine Kids Foundation," an organization which puts on recreational programming nationwide for children with cancer. ⁿ¹⁴⁰ The Sunshine Kids Foundation filed suit against the Sunshine Kids Club of California, which provides programming for children with disabilities, when it discovered that multiple donors had unintentionally sent money to the California organization, believing it was affiliated with the Sunshine Kids Foundation. ⁿ¹⁴¹ The California group drained a large percentage of its resources in fighting a name change before heeding [*263] to counsel's advice to end the legal proceeding by changing its name to Sunshine Connection. ⁿ¹⁴²

Although it is regrettable that the California group had to divert funding away from its worthwhile programming to wage a legal battle, it is likely, based on the existing case law, that, had the case progressed to trial, the court would have found for the federally trademarked Sunshine Kids Foundation because of concerns about donors confusing the smaller group with a more prominent organization. ⁿ¹⁴³ Thus, in opting to rebrand, the California Sunshine Kids likely saved itself from spending further resources on a fight that it was likely to lose. ⁿ¹⁴⁴

B. *The Komen Conundrum: Lawsuits for the Cure?*

The most interesting and publicized recent dispute in the nonprofit trademark landscape involves Susan G. Komen for the Cure. ⁿ¹⁴⁵ Komen is the most well-known and highly-funded organization devoted to fighting breast cancer in the world. ⁿ¹⁴⁶ Since its inception in 1982, Komen has invested over \$ 1.9 billion in breast cancer research and services for women affected by the disease. ⁿ¹⁴⁷ The organization funds programs in over fifty countries worldwide and is synonymous all over the world with breast cancer research and awareness. ⁿ¹⁴⁸ In a January 2010 survey of over nine thousand American consumers, Komen was ranked as the second most-trusted nonprofit brand and was the number one charity to which respondents said they would direct their dollars, a distinction the organization has held for three years. ⁿ¹⁴⁹

[*264] The organization's signature event, the Susan G. Komen Race for the Cure, was first held in 1983 and is now the world's largest breast cancer fundraising event. ⁿ¹⁵⁰ In 2010, there were 146 Komen races worldwide with over 1.6 million participants and one hundred thousand volunteers. ⁿ¹⁵¹ As the Race for the Cure increased in national and global prominence, Komen began registering trademarks for many of its other events including "Fly for the Cure," "Craft for the Cure," "Couture for the Cure," "Ski for the Cure," "Nurses for the Cure," "Salsa Para La Cure," and "Collect for the Cure," to name a few. ⁿ¹⁵² Although Komen does not have a registered trademark for the phrase "for the cure," a mark need not be registered to receive protection if it is sufficiently tied to one source, and it is clear from the vast number of various constructions of "for the cure" that the organization views the phrase as inextricably linked to its brand and fundraising potential. ⁿ¹⁵³

In August 2010, national media picked up a story outlining Komen's dispute with the organization "Uniting Against Lung Cancer," which planned to hold an event entitled "Kites for a Cure." ⁿ¹⁵⁴ Uniting Against Lung Cancer received a letter from Komen's lawyers requesting that it change the name of the event to "Kites for a Cause," or another name. ⁿ¹⁵⁵ The letter also warned the organization against any use of "for the cure" in conjunction with its signature color pink. ⁿ¹⁵⁶ Uniting Against Lung Cancer refused to change the event name and retained its own attorneys. ⁿ¹⁵⁷ After many months, the organization reached a settlement with Komen in which they agreed to only use the phrase "for a Cure" in conjunction with the words "lung cancer" to make the distinction clear. ⁿ¹⁵⁸

Later the same year, Sue Prom, who started a small dog sledding fundraiser for breast cancer called "Mush for the Cure" received a letter from Komen's attorneys, challenging her application for a trademark [*265] and requesting that she change the name of her event because the two organizations fundraise for the same cause. ⁿ¹⁵⁹ Prom, whose event raises money for the National Breast Cancer Foundation (NBCF), was urged by the NBCF to apply for a trademark to protect the event in the hopes of avoiding dealings with the Komen legal team. ⁿ¹⁶⁰

Just a few months after being named one of America's most trusted charities, Komen's new label as a trademark bully dealt a serious blow to its carefully crafted image. ⁿ¹⁶¹ Prom told her story to the national press, explaining that her organization could not afford to rebrand apparel and posters or to fight Komen in court. ⁿ¹⁶² She accused Komen of using donor funds, which should go to the fight against breast cancer, for legal battles. ⁿ¹⁶³ As the story gained momentum, Komen found itself facing a significant public backlash. ⁿ¹⁶⁴

Komen's attorney insisted that the organization tried to be "reasonable" and never had shut down or intended to shut down any smaller charity. ⁿ¹⁶⁵ The company issued a statement saying that the steps it took to protect its trademarks were simply to avoid donor confusion, which is a common problem with similarly named organizations. ⁿ¹⁶⁶ [*266] Still, shortly after Prom's appearance on the NBC Nightly News and amid an onslaught of negative publicity, including a front page Wall Street Journal article and a lampoon by Steven Colbert, Komen withdrew its opposition to the Mush for a Cure trademark application. ⁿ¹⁶⁷

III. CLARIFYING THE CONFUSION: HOW FAIRLY TO APPLY TRADEMARK LAW IN CASES INVOLVING CHARITABLE ORGANIZATIONS

The timing of Komen's decision to withdraw its objection to Mush for a Cure's name strongly indicates that Komen's decision was motivated by bad press and was not related to the merits of its claim. ⁿ¹⁶⁸ Although Komen may have made a smart business decision, the organization had every reason to protect its brand from another group using a similar name. ⁿ¹⁶⁹ The potential for confusion is quite clear--a donor looking for a charity funding research and support for breast cancer patients could reasonably assume that an organization with "for a cure" or "for the cure" was affiliated with the well-known Susan G. Komen for the Cure or one of its many subgroups like Nurses for the Cure or Ski for the Cure. ⁿ¹⁷⁰ Further, in the case of famous nonprofits, it seems highly likely that where there are concerns about confusion, there would be simultaneous concerns about dilution of an organization's reputation. ⁿ¹⁷¹

This Part argues that nonprofits require their own set of trademark rules with some enhanced protections because their objectives are [*267] markedly different from the commercial businesses that were at the forefront of the minds of the legislators who drafted the Lanham Act. ⁿ¹⁷² Section A discusses how nonprofits are different from commercial organizations, and why they therefore require different protections. ⁿ¹⁷³ Section B advocates moving away from the multi-factor tests for confusion claims, as they are designed for the commercial sector, as well as for restricting the holding in *KP Make-Up*, which allows for a fair use defense to trademark infringement even where marks are confusingly similar, to cases involving for-profit companies. ⁿ¹⁷⁴ Section C proposes an amendment to the Lanham Act that would allow nonprofits to bring dilution claims, which they are barred from doing under current law. ⁿ¹⁷⁵ These proposed changes, though small, would help to ensure that large charitable organizations like Komen, whose work is hugely beneficial to society, are adequately protected from losing donations due to donor confusion and from harm to their brand reputation because of dilution. ⁿ¹⁷⁶ Finally, Section D explores how to protect smaller nonprofits that often face much larger, well-known organizations in trademark disputes, so that they are not burdened by litigation and can focus their considerably smaller war chests on their charitable goals. ⁿ¹⁷⁷

A. Why the Law Needs to Protect "For the Cure" and Its Valuable Counterparts

Nonprofit organizations need and deserve specialized trademark protection because their work benefits more than just one business or company and is distinctly different than the for-profit model that Congress had in mind when designing the Lanham Act. ⁿ¹⁷⁸ Charities work to perform a social good, not to turn a profit. ⁿ¹⁷⁹ Accordingly, the law should seek to avoid both the public confusion that leads to donations ending up in the wrong hands and the tarnishment

of a mark that occurs [*268] when the public mistakenly associates a respected organization with a lesser one. ⁿ¹⁸⁰

Although the basic concern is the same for nonprofits as for commercial enterprises, namely that confusion will result in money being funneled to incorrect recipients, the problem of misdirected funds is graver in the nonprofit context. ⁿ¹⁸¹ Because both nonprofit and for-profit organizations invest substantial resources to develop strong marks, there should be greater concern when philanthropic donations reach the wrong destination, as opposed to when a consumer purchases the wrong product because two logos look alike. ⁿ¹⁸² As the U.S. District Court for the District of New Jersey observed in 2000 in *Deborah Heart & Lung Center v. Children of the World Foundation*, there is a strong public interest in ensuring that donors, who are performing a social good, receive assurance that their money is going to its intended destination, which will make them more likely to donate in the future. ⁿ¹⁸³

Further, donors generally would like their money to run to its highest and best use, which might be to the well-established charities with the scale and scope to help more people. ⁿ¹⁸⁴ Larger, more far-reaching organizations have more at stake in maintaining their good reputations. ⁿ¹⁸⁵ Therefore, because of the strong public interest in ensuring that potential donors can rely on marks to identify organizations and that large, trusted nonprofits are protected from reputational [*269] harm, nonprofits require their own trademark rules that provide enhanced protection for larger organizations. ⁿ¹⁸⁶

B. Fixing the Confusing Confusion Standard

Case law indicates that the likelihood of confusion between different nonprofits using similar marks is great, especially where the two groups are working on behalf of similar causes. ⁿ¹⁸⁷ In analyzing the likelihood of confusion, the circuits use different multi-factor tests. ⁿ¹⁸⁸ Some courts weigh certain factors more heavily than others, often giving greater weight to how the two marks relate in the commercial marketplace. ⁿ¹⁸⁹ Ideally, a new section of the Lanham Act, dealing exclusively with nonprofits, would still allow confusion claims, but the courts would not use the multi-factor tests and instead would perform a case-by-case analysis of the pertinent facts and circumstances. ⁿ¹⁹⁰ This type of case-by-case analysis works best in the context of nonprofit trademarks because these cases are often not litigated to a final judgment, and it is therefore unlikely that a court could reliably promulgate a test based on a small sample of prior decisions. ⁿ¹⁹¹

Further, a new nonprofit amendment to the Lanham Act should not allow a fair use defense where there is any potential for confusion between nonprofit groups, thereby effectively limiting to the commercial world the U.S. Supreme Court's 2004 holding in *KP Permanent Make-Up v. Lasting Impression I, Inc.*, which allowed an infringing defendant to prevail on a fair use defense, ⁿ¹⁹² even where some confusion [*270] was likely. ⁿ¹⁹³ In that case, two similar companies marketing permanent make-up products to individuals trying to cover up scars became locked in a dispute over the term "microcolors." ⁿ¹⁹⁴ The *KP Make-Up* court held that a fair use defense could succeed even where some source confusion is present. ⁿ¹⁹⁵

KP Make-Up, and similar cases in which a consumer may be confused as to the source of a product but ultimately ends up with a similar product, is vastly different than nonprofit trademark confusion cases in which larger charitable organizations could potentially lose money and donors' money falls into the wrong hands. ⁿ¹⁹⁶ The potential social harm of allowing confusion in these cases is much more significant, and thus the *KP Make-Up* holding, which allows for some consumer confusion, should not apply to nonprofit trademarks. ⁿ¹⁹⁷

C. Allowing Dilution Claims in the Nonprofit Context

The legislative history behind the anti-dilution amendments clearly indicates that Congress intended to significantly expand federal statutory protection for senior trademark holders. ⁿ¹⁹⁸ Komen and other large, well-known nonprofits are exactly the types of organizations that could be seriously affected by dilution. ⁿ¹⁹⁹ The Lanham Act, however, requires that dilutive acts be "commercial" in nature. ⁿ²⁰⁰ This language [*271] could be construed to exclude charitable nonprofits from raising dilution claims, even though the legislative intent seemingly aims to protect all

well-known or famous marks. ⁿ²⁰¹ At least one court has allowed a nonprofit organization to prevail on a dilution claim, but the current Lanham Act does not guarantee that nonprofits in other jurisdictions would be successful in bringing dilution claims. ⁿ²⁰²

The nonprofit amendment to the Lanham Act would allow charitable organizations to bring dilution claims, without requiring courts to grapple with whether the use of a mark was commercial enough in nature to fall under § 1125(c). ⁿ²⁰³ Dilution can seriously chip away at the work and reputation of large, well-known organizations, and is a serious concern for a famous group like Komen. ⁿ²⁰⁴ Even where there is not confusion as to the source of a mark, dilution reduces the ability of the famous mark to identify the organization behind the mark, thereby tarnishing the effectiveness of the mark and undercutting the organization's investment in creating and publicizing the mark. ⁿ²⁰⁵ Moreover, allowing these dilution claims furthers the clear legislative intent of expanding trademark protection for highly recognizable marks. ⁿ²⁰⁶

D. Preventing Trademark "Bullying"

When the Komen trademark disputes story was picked up by the national media in early 2011, the narrative seemed largely the same in every piece--the large nonprofit with extensive resources was "bullying" a smaller group that was also trying to fight for the same cause. ⁿ²⁰⁷ In reality, Komen was not trying to shut down or bankrupt other charities, but was protecting its well-established reputation because of legitimate [*272] concerns about misdirected donations and dilution. ⁿ²⁰⁸ Although the trademark bully label might have been unfair, it is cause for concern that smaller organizations, which have less resources and less access to legal expertise, could be pulled into court for burdensome litigation. ⁿ²⁰⁹

The smaller groups, though, do have the protection of § 1117 of the Lanham Act, which awards attorney's fees to defendants in cases of gross misuse of the statutory protections in which trademark holders have frivolously or maliciously attacked another entity. ⁿ²¹⁰ Although this provision does not prevent all smaller groups from being subject to litigation, it does punish those trademark holders who bring trademark actions in bad-faith. ⁿ²¹¹

In addition to this recourse, a change could be made to the application process for charitable groups filing for favorable federal tax-exempt status. ⁿ²¹² To gain this favorable tax status, new charitable organizations must fill out a lengthy application questionnaire detailing financial information, charitable goals, and specific activities. ⁿ²¹³ The questionnaire also asks whether the new group owns any intellectual property, including trademarks. ⁿ²¹⁴ Amending this questionnaire to require that any new charitable organization search its name and any other identifying mark on the U.S. Trademark registration site before proceeding with its application could help cut down on nonprofit trademark infringement. ⁿ²¹⁵ This search requirement would provide [*273] notice to groups that they might want to seek permission before using a mark to avoid a possible infringement action. ⁿ²¹⁶

This amendment to the 501(c)(3) application would in no way eliminate all trademark infringement, but it might scale back some infringement on the part of smaller groups, thereby reducing the number of cease and desist letters sent by larger organizations like Komen. ⁿ²¹⁷ In turn, fewer large nonprofits would be labeled as trademark bullies and feel obligated to withdraw their potentially legitimate claims because of bad press, even when they are simply trying to maintain goodwill with established donors and carry out their laudable objectives. ⁿ²¹⁸

CONCLUSION

The 2011 media storm that besieged Susan G. Komen for the Cure when it attempted to assert and defend its trademark highlights a need for trademark law amendments that apply specifically to nonprofits. The Lanham Act, designed over fifty years ago with the commercial sector in mind, did not envision large nonprofits that operate remarkably like businesses, but with vastly different goals. As a result, nonprofit trademark holders must navigate a confusing intellectual property landscape, never entirely sure whether or not the law does or should apply to them. The potential for brand tarnishment of well-established groups that are often in the position to help the greatest number of

people and deserve to have their reputation protected, is great. Further, there is a strong public interest in ensuring that when people make charitable contributions, the funds reach their intended destinations and the public feels confident enough to donate again, thereby facilitating further social good.

A small amendment to the Lanham Act indicating that, in the case of nonprofits, donor confusion is not acceptable and that dilution claims are not limited to the commercial sector would not only allow charitable organizations to better protect their marks, but would also provide some much-needed clarity. As nonprofits continue to grow and are able to reach more and more citizens due to the Internet and social media, the time is ripe to revisit this issue and establish guidelines for [*274] these organizations, so that they can worry less about legal problems and focus more on their laudable social goals.

n18 See *id.* Komen released a statement on its website explaining,

If we've been perhaps a bit overzealous in protecting our name, it's because we feel a huge responsibility to our family of volunteers and donors and all of those who are helped by our mission to discover and deliver the cures for breast cancer.

. . . .

It would be a disservice to all those who put their trust in us if we did not take responsible steps to protect our name. We believe it is critical for people to understand where their donations are going, and we feel an obligation to our donors to make that as clear as possible. The millions of people who either support us or benefit from our programs know and trust our name - Susan G. Komen for the Cure. We want them to continue to feel confident that their money is being used to fight and treat breast cancer and to fund the best scientific research.

n92 See *KP Make-Up*, 543 U.S. at 124; Ward, *supra* note 8, at 317 (explaining that smaller charitable organizations have a greater chance of defeating a senior organization's trademark infringement claim by fair use "because there is no longer a requirement to show that consumer confusion is not likely" under *KP Make-Up*).

n93 See Ward, *supra* note 8, at 297 ("Many organizations settle in the face of impossible legal fees, and as a result there is almost no case law analysis where larger organizations sue small nonprofits.").

n94 See *id.*; Marks, *supra* note 4.

n95 See *WWP, Inc. v. Wounded Warriors Family Support, Inc. (Wounded Warriors II)*, 028 F.3d 1032, 1043-44 (2d Cir. 2011) ("[A nonprofit entity's] financial credit--its ability to raise funds, its general reputation, the reputation of those managing and supporting it, are all at stake if its name is used by some other organization and the two become confused in the minds of the public."); *Children of the World*, 99

F. Supp. 2d at 494 ("[T]he public also has a right to know to whom they are giving their money and who is administering these services."); *Cancer Research Inst., Inc. v. Cancer Research Soc'y. Inc.*, 694 F. Supp. 1051, 1055-56 (S.D.N.Y. 1988) ("In the Court's view, the level of recognition and achievement arrived at by plaintiff entitles it to protection from later formed organizations using confusingly similar names.").

n96 Federal Trademark Dilution Act of 1995, Pub. L. No. 104-98, § 3(a), 109 Stat. 985, 986 (1996) (codified at 15 U.S.C. § 1125(c) (2006)); see Blake R. Bertagna, *Poaching Profits: An Examination of the Ability of a Trademark Owner to Recover Infringer's Profits Under the Lanham Act as Amended in 1999*, 16 TEX. INTELL. PROP. L.J. 257, 261-62 (2008) (discussing the initial question of how to better protect mark holders that led to the adoption of the FTDA).

n97 See LAFRANCE, *supra* note 35, § 3.05 (describing the legislative history and intent behind the passage of the FTDA); see also Bertagna, *supra* note 96, at 266-67 (explaining that Congress recognized that the dilution of well-known marks had become a greater problem during the 1990s and enacted the dilution amendment to better protect "those marks with such powerful consumer associations that even non-competing uses can impinge on their value"). The term "senior user" means the entity or individual who first used a trademark in the public. See *A & H Sportswear, Inc. v. Victoria's Secret Stores, Inc.*, 237 F.3d 198, 210, 212 (3d Cir. 2000); *Children of the World*, 99 F. Supp. 2d at 49.

n98 See 15 U.S.C. § 1125(c); see also Bertagna, *supra* note 96, at 266-68 (explaining the FTDA's broadening of trademark protection and describing the remedies now available under the Lanham Act).

n99 See LAFRANCE, *supra* note 35, § 3.05 (differentiating between the protections provided by traditional trademark law and those provided by the anti-dilution amendment).

n100 See 15 U.S.C. § 1125(c); MCCARTHY, *supra* note 23, § 5:10-11 (discussing the effects of the amendment to the anti-dilution laws). The Ninth Circuit offered the following example of how dilution can occur even in non-competing markets:

For example, if a cocoa maker began using the "Rolls Royce" mark to identify its hot chocolate, no consumer confusion would be likely to result. Few would assume that the car company had expanded into the cocoa making business. However, the cocoa maker would be capitalizing on the investment the car company had made in its mark. Consumers readily associate the mark with highly priced automobiles of a certain quality. By identifying the cocoa with the Rolls Royce mark, the producer would be capitalizing on consumers' association of the mark with high quality items. Moreover, by labeling a different product "Rolls Royce," the cocoa company would be reducing the ability of the mark to identify the mark holder's product. If someone said, "I'm going to get a Rolls Royce," others could no longer be sure the person was planning on buying an expensive automobile. The person might just be planning on buying a cup of coffee. Thus, the use of the mark to identify the hot chocolate, although not causing consumer confusion, would cause harm by diluting the mark.

Playboy Enters. v. Welles, 279 F.3d 796, 805-06 (9th Cir. 2002).

n101 See Trademark Dilution Revision Act of 2006, Pub. L. No. 109-312 (2006) (codified at 15 U.S.C. § 1125(c) (2006)).

n102 See *id.*

n103 See Leah Chan Grinvald, *Shaming Trademark Bullies*, 2011 Wis. L. REV. 625, 638-40 (discussing the effects of expanding statutory protection for famous mark holders).

n104 See Ward, *supra* note 8, at 310.

n105 See 15 U.S.C. § 1125(c). The statute states in pertinent part:

Subject to the principles of equity, the owner of a famous mark that is distinctive, inherently or through acquired distinctiveness, shall be entitled to an injunction against another person who, at any time after the owner's mark has become famous, commences use of a mark or trade name *in commerce*, that is likely to cause dilution by blurring or dilution by tarnishment of the famous mark, regardless of the presence or absence of actual or likely confusion, of competition, or of actual economic injury. . . . The following shall not be actionable as dilution by blurring or dilution by tarnishment under this subsection . . . any noncommercial use of a mark.

Id. (emphasis added).

n106 See Ward, *supra* note 8, at 310 (explaining the statutory limitations on dilution claims in nonprofit actions).

n107 See *Rd. Dawgs Motorcycle Club of the U.S., Inc. v. "Cuse" Rd. Dawgs, Inc.*, 679 F. Supp. 2d 259, '285 (N.D.N.Y. 2009) (considering, as a factor in the confusion analysis, whether the senior trademark could be tarnished as a result of the public associating it with the newer similar mark); *Children of the World*, 99 F. Supp. 2d at 493 (holding that an older, well-known nonprofit's goodwill with donors was likely to be tarnished as a result of a newer organization, working on behalf of the same cause, using a similar name).

n108 See *Rd. Dawgs*, 679 F. Supp. 2d at 285; *Children of the World*, 99 F. Supp. 2d at 493.

COMMENT: Reprotection for Formerly Generic Trademarks

NAME: Peter J. Brody+

BIO: + BA 2011, Emory University; JD Candidate 2015, The University of Chicago Law School.

TEXT:

[*475]

Introduction

Trademark rights are defined by public perception. If the public identifies a particular mark with a given firm, that mark is protectable; however, if the public understands the mark to refer to a class of products, the mark is "generic" and not protectable. The status of a mark is not fixed - a mark that has trademark significance in 2014 might become generic in 2015. ⁿ¹ The loss of a mark can be a significant blow to the former owner, and it occurs frequently enough to have a name: genericide. ⁿ²

Consider, for example, *Firefly Digital Inc v Google Inc.* ⁿ³ In 2002, Firefly started selling a website content management system "under the term 'WEBSITE GADGET,' and marketing and selling its add-on applications under the term 'GADGET.'" ⁿ⁴ In 2009, Firefly registered "GADGET" with the US Patent and Trademark Office (PTO), ⁿ⁵ which constitutes prima facie evidence of the trademark's validity and serves to identify Firefly. ⁿ⁶ Firefly sued Google in federal court in Louisiana, alleging that Google's use of the term "gadget" in conjunction with its iGoogle product constituted trademark infringement. ⁿ⁷ Google raised a defense of [*476] genericness and, relying on a consumer survey, proved that "gadget" no longer held trademark significance. ⁿ⁸ Google prevailed, and the mark was canceled. ⁿ⁹

But if a term can move from trademarked to generic status, could it also shift back to protected status? At some time, the use of "gadgets" on websites may fall into disfavor. ⁿ¹⁰ Firefly might then want to restart its business, using a name with which it is familiar (like "gadget"). While it would be able to use the term, it might be unable to assert trademark protection in it ever again. In some courts, Firefly would be precluded from relitigating the issue of trademark significance. ⁿ¹¹

The courts of appeals that have attempted to make sense of the possibility of former trademarks regaining legal protection have not reached a consensus. Some, in contrast to the Fifth Circuit, have acknowledged the possibility that a formerly generic term might assume trademark significance. ⁿ¹² However, many others have rejected all attempts at reprotection of a generic term, either through rote application of the "de facto secondary meaning doctrine" or under color of issue preclusion. ⁿ¹³

This Comment argues that terms previously adjudicated to be generic ought to be eligible for reProtection upon a showing of competent evidence. Courts should use the changed-circumstances exception to issue preclusion to avoid a procedural bar to claims that have a chance of success. Finally, to protect defendants from burdensome litigation, courts should turn to the fee-shifting provision of § 35(a) of the Lanham Act - if a party brings a suit attempting to assert a right in a term adjudicated to be generic and loses, that party has sued based on something that it does not own, and the victorious defendant should be compensated for the costs of litigation.

This Comment proceeds as follows: Part I begins with background on how a trademark is obtained. It then discusses the process of genericide. Part II outlines the division between the courts of appeals that allow for the possibility that a mark might [*477] return to protected status and those that block reProtection claims. Part III argues that formerly generic terms should be eligible for reProtection and outlines a method by which courts might discourage potentially abusive litigation.

I. Protecting and Losing a Trademark

The owner of a trademark does not acquire protection simply by creating the mark. Rights are contingent on both use and the public's understanding. This Part examines the background rules that govern the protection of a mark as a trademark and the process by which a protected mark can lose its protected status.

A. Obtaining and Protecting a Trademark

As defined by the Lanham Act, the federal trademark statute, a trademark is "any word, name, symbol, or device, or any combination thereof" that serves to "distinguish [a producer's] goods ... from those manufactured or sold by others and to indicate the source of the goods, even if that source is unknown."ⁿ¹⁴ The property right conferred by ownership of a trademark is contingent on its use in commerce, meaning that trademarks are lost if branded products or services are not sold.ⁿ¹⁵

Marks are often classified on a spectrum of strength. Generally, "the stronger the mark, the more likely it is that encroachment on it will produce confusion."ⁿ¹⁶ Strong protection is afforded to "fanciful,"ⁿ¹⁷ "arbitrary,"ⁿ¹⁸ and "suggestive"ⁿ¹⁹ marks. [*478] By contrast, protection is denied to generic marks. "A generic term is one that refers to the genus of which the particular product is a species."ⁿ²⁰ For example, "cola" has long been held to be a generic term.ⁿ²¹

"Descriptive" marks occupy a middle position. "A mark is [] descriptive if it immediately conveys information concerning a quality or characteristic of the product or service."ⁿ²² Courts explaining descriptive marks often use the example of All-Bran cereal - the name provides consumers with information about the product and is therefore descriptive.ⁿ²³ As a baseline principle, descriptive marks are not protected.ⁿ²⁴ However, they may attain protected status by taking on "secondary meaning."ⁿ²⁵ Secondary meaning is acquired through a shift in public perception: "If because of association with a particular product or firm over a period of time a word has come to stand in the minds of the public as a name or identification for that product or firm, the word is said to have acquired a secondary meaning."ⁿ²⁶ For example, the term "5-Hour Energy" describes the effects of an energy drink but has been held to have acquired secondary meaning.ⁿ²⁷ Non-word marks may also gain protection on a showing of secondary meaning - the color pink, for example, is protected when applied to home insulation because of its close association with Owens-Corning.ⁿ²⁸

[*479] This Comment is chiefly concerned with whether a given term is generic, which is a binary question.ⁿ²⁹ If generic, it is not protectable.ⁿ³⁰ The question of distinctiveness - whether the mark is generic or protectable - is a question of fact.ⁿ³¹ Courts consider the "primary significance" of the term, asking "whether consumers think the term represents the generic name of the product ... or a mark indicating merely one source of that product."ⁿ³² If the answer is the name of a product class, protection is denied; if the answer is a particular producer, the mark remains valid.ⁿ³³

Trademark holders may register their marks.ⁿ³⁴ If registered with the PTO, marks are protected against

infringement by § 32 of the Lanham Act.ⁿ³⁵ Generic marks are not eligible for registration, and marks are canceled if they become generic.ⁿ³⁶ However, registration is not a necessary condition for relief since all terms with trademark significance are protected against misappropriation by competitors.ⁿ³⁷ The holder of any trademark (registered or not) may vindicate its property right through litigation under § 43(a) of the Lanham Act.ⁿ³⁸

B. Genericide: The Loss of Trademark Rights

Unlike patents and copyrights, trademarks are theoretically perpetual.ⁿ³⁹ As long as the mark "is used to distinguish and [*480] identify," it may be protected.ⁿ⁴⁰ Professor William Landes and Judge Richard Posner note that this "makes economic sense."ⁿ⁴¹ The full price of a product to a consumer is a function of the nominal (dollar) price and the cost of finding the product.ⁿ⁴² Landes and Posner suggest that trademarks reduce the latter, which they call "search costs."ⁿ⁴³ They explain: "To make the producer of a good give up the name before he ceased selling the good would impose added search costs on consumers because the information embodied in the trademark would disappear."ⁿ⁴⁴ This result would leave firms with a choice: increase the total cost of goods to consumers or lower the nominal price (and therefore the firm's profits) to compensate consumers (and maintain a stable all-in price).ⁿ⁴⁵ As long as the trademark retains its source-identifying significance, it makes little sense to assign the mark an arbitrary end date.

The incentive that trademarks provide to "maintain [] goods and services at defined and persistent qualities" also continues to exist as long as the brand has value.ⁿ⁴⁶ Were a brand to have an expiration date, a company might lower quality as the end date approaches in an attempt to strip every last bit of value from the mark. As such, theoretically perpetual rights are the best way to lower consumer costs and give producers an incentive to maintain constant quality.

[*481] Because trademarks allow consumers to rely on a consistent level of quality and make it possible for producers to charge higher prices, firms have a strong incentive to prevent genericide.ⁿ⁴⁷ Genericide can strip all value from a mark, leaving its former owner with nothing.ⁿ⁴⁸ Even well-known terms might become generic - the term "yellow pages" was once granted trademark protectionⁿ⁴⁹ but now plainly is the general term for any commercial phone directory.ⁿ⁵⁰ Other formerly protected terms that are now generic include "shredded wheat,"ⁿ⁵¹ "shuttle"ⁿ⁵² (to describe an airline service), "super glue,"ⁿ⁵³ and "yo-yo."ⁿ⁵⁴

But genericide can be avoided.ⁿ⁵⁵ For example, "stakeholders wishing to prevent their marks from falling into genericness should consistently use a generic signifier along with the mark."ⁿ⁵⁶ Perhaps the two most famous examples of companies that have used this tactic are "Sanka," which saved its mark by promoting the term "decaf," and "Xerox," which protected its mark by popularizing the word "copier."ⁿ⁵⁷ As a practical matter, though, trademarks often suffer from their own [*482] success. This is a long-recognized phenomenon,ⁿ⁵⁸ and the Lanham Act explicitly acknowledges this possibility.ⁿ⁵⁹

II. Courts Disagree about the Possibility of Reprotection

Once a mark is relegated to generic status, must it stay that way? Courts disagree whether an earlier finding of genericness can be circumvented or whether relitigation is barred. Some courts have accepted the possibility that a term might return to trademark significance. The courts that hold otherwise do not agree as to why terms may not return to protection: some have dismissed reprotection as impossible, while others have used issue preclusion to avoid a direct ruling on the question. Were reprotection possible, the universe of marks currently consigned to generic status but not in meaningful use would be available for productive purposes. After providing background on the leading example of reprotection, this Part examines the respective positions taken by courts that allow reprotection, those that bar it, and the PTO.

A. The "Singer" Cases

The paradigmatic example of a reclamation of a generic term is that of "Singer."ⁿ⁶⁰ The Singer Manufacturing Company, after losing the patent to its sewing machines, attempted to protect its dominant market position through

trademark.ⁿ⁶¹ It brought suit against June, a rival sewing machine manufacturer, alleging that the Singer company "had an exclusive right to the word 'Singer' as a trade name and 'designation' for [] sewing machines."ⁿ⁶² In an 1896 decision, the Supreme Court disagreed. It found "conclusive proof that, as a whole, the Singer machines represented a general class, and were known to the public under that comprehensive name and no other" - that is, the Court [*483] determined that "Singer" was the generic name for all sewing machines of a particular type.ⁿ⁶³

By 1953 the sewing machine market had changed. Singer brought suit against a small repair shop, claiming that the shop had infringed a trademark in the term "Singer."ⁿ⁶⁴ The Fifth Circuit, in *Singer Manufacturing Co v Briley*,ⁿ⁶⁵ essentially affirmed the district court,ⁿ⁶⁶ which had concluded that Singer had - "by the constant and exclusive use of the name 'Singer' in designating sewing machines and other articles manufactured and sold by it and in advertising the same continuously and widely - recaptured from the public domain the name 'Singer.'" ⁿ⁶⁷ This was no mistake - the district court explicitly acknowledged the earlier Supreme Court decision but found that Singer had done enough to change the public's perception of its term.ⁿ⁶⁸ The saga of "Singer," then, demonstrates that it is possible for a mark to be reclaimed.

The Singer result is not wholly anomalous, though it is - so far - the only time that a US court of appeals has accepted a mark's return to trademark significance.ⁿ⁶⁹ The decision is also only questionably good law - its understanding of how meaning might shift has been implicitly repudiated by its own circuit.ⁿ⁷⁰

[*484]

B. Courts Divide over Reprotection

Despite the Singer cases, the courts of appeals have failed to arrive at a consensus as to whether a formerly generic mark can be protected. Those courts that have addressed this issue appear to be split into three groups. Within the first group, which recognizes the possibility of reprotection, the cases can be further divided by outcome. The Federal Circuit has allowed for the relitigation of a (possibly) generic term as a component of a larger mark. A later district court decision returned the same term to trademark significance. Separately, the Eleventh and First Circuits have acknowledged the possibility that a term might be reprotected, but they have so far applied issue preclusion to block actual reprotection.

The other two groups take a less favorable view of reprotection. The second group of courts applies issue preclusion as an insurmountable bar to reprotection, though courts in this group may be motivated by another rationale - the de facto secondary meaning doctrine. The third group of courts expressly applies the de facto secondary meaning doctrine as an absolute bar to renewed trademark protection for formerly generic terms, symbols, and trade dress. This Section first provides background on issue preclusion and then explores the positions taken by these three groups of courts.

1. Issue preclusion and the changed-circumstances exception.

In many instances, whether a mark can be reprotected turns on the preliminary inquiry whether the claim is blocked by issue preclusion. The doctrine of issue preclusion is premised on promoting the efficient use of judicial resources and predictability in case outcomes.ⁿ⁷¹ It accomplishes these goals by preventing the relitigation of factual issues that were already resolved by courts. Put broadly, "once an issue is actually and necessarily determined by a court of competent jurisdiction, that determination is conclusive in subsequent suits based on a different cause [*485] of action involving a party to the prior litigation."ⁿ⁷² Generally, for preclusion to apply:

(1) The issues in both proceedings must be identical, (2) the issue in the prior proceeding must have been actually litigated and actually decided, (3) there must have been a full and fair opportunity for litigation in the prior proceeding,

and (4) the issue previously litigated must have been necessary to support a valid and final judgment on the merits.ⁿ⁷³

When these requirements are met, a defendant may rely on the previous determination of fact. In federal court, the defendant need not be the same party against whom the claim was made in the first instance - "courts have adopted a rule that nonmutual issue preclusion is permitted unless it would be unfair."ⁿ⁷⁴

There are, however, limited exceptions to the doctrine of issue preclusion. The Supreme Court has held that issue preclusion may be avoided through the familiar doctrine of changed circumstances. Issue preclusion applies when "controlling facts and applicable legal rules remain unchanged," but not when "the situation is vitally altered between the time of the first judgment and the second."ⁿ⁷⁵ It is true that the circumvention of issue preclusion must be limited - "rare would be the case in which counsel could not conjure up some factual element that had changed between adjudications."ⁿ⁷⁶ But significant factual or legal changes that take place over time can allow a party to avoid being held to a prior determination of fact.ⁿ⁷⁷ When factual determinations are contextual - such as a finding that something had not occurred "to date" - courts have proven willing to circumvent issue preclusion.ⁿ⁷⁸ As such, while issue preclusion is a barrier to subsequent litigation, it is not an absolute and unthinking bar. The next two sections consider the approaches of [*486] the two groups of courts that have examined the interaction between issue preclusion and the possibility of reproofection.

2. Courts that might allow reproofection in changed circumstances.

In three instances, federal courts of appeals have reasoned that it might be possible for a party asserting ownership in a trademark to avoid preclusion.ⁿ⁷⁹ In one of these instances, a relatively limited finding by the court of appeals was applied and extended by a district court to grant reproofection. In the others, reproofection remained squarely a theoretical possibility. This Section describes those cases and then evaluates the guidance that they provide for future litigants hoping to reestablish legal protection for a formerly generic mark.

a) The Federal Circuit's limited holding and its application. The Federal Circuit has noted that preclusion might be circumvented when the formerly generic term is a component of another mark.ⁿ⁸⁰ The term "opry," a folksy mispronunciation of "opera," has been in commercial use (in conjunction with "country music performances of various types") since at least 1927.ⁿ⁸¹ In 1982, WSM, the putative owner of the term, brought an action in the Western District of Missouri to enjoin Dennis Hilton, the operator of Country Shindig Opry, from using the term.ⁿ⁸² The suit backfired. By looking at what "buyers understand by the word for whose use the parties are contending"ⁿ⁸³ and WSM's use of the mark,ⁿ⁸⁴ the court determined that "'opry' is a generic word which connotes in the minds of the public a country music [*487] performance that includes dancing and comedy routines."ⁿ⁸⁵ On this basis, WSM's mark for "opry" was canceled.ⁿ⁸⁶ The Eighth Circuit affirmed.ⁿ⁸⁷

Eight years later, "opry" came up again in litigation, this time at the Federal Circuit. In *Opryland USA Inc v Great American Music Show, Inc*,ⁿ⁸⁸ the court took an appeal from the Trademark Trial and Appeal Board's ("TTAB" or "the Board") denial of cancellation of the term "The Carolina Opry."ⁿ⁸⁹ Among other issues, the court considered the Board's application of preclusion.ⁿ⁹⁰ The Federal Circuit declined to directly reach the issue of reproofection, reasoning that "whether 'opry' has been recaptured as a trademark is not the subject of these opposition and cancellation proceedings, which deal with the registrability of the CAROLINA OPRY marks."ⁿ⁹¹ But the court continued: "Opryland is not estopped from showing the public perception of 'opry', as a significant component of the marks at issue. The Board erred in holding that Opryland could not present evidence of the present public perception of the term 'opry'."ⁿ⁹² The Federal Circuit's finding, then, was limited. By recognizing that "opry" might have trademark significance as part of a larger phrase, the court accepted the possibility that generic words can shift in meaning and that issue preclusion might be avoided. But the court's opinion is narrow insofar as it did not rule on whether "opry" might be protected on its own, or even whether circumstances had changed to allow for that possibility to be litigated.

The District Court for the Middle District of Tennessee, which accepts the possibility that formerly generic terms might take on trademark significance,ⁿ⁹³ has taken this ruling further. In litigation between Gaylord Entertainment

Company, which claimed to own the mark at issue, and Gilmore Entertainment Group, which was using the terms "The Carolina Opry" and [*488] "Opry" in commerce,ⁿ⁹⁴ the court held that "opry" is a protected term.ⁿ⁹⁵

The court returned "opry" to trademark significance in two rulings: first, it addressed a summary judgment motion, and then it issued final judgment. Gilmore had moved for summary judgment, arguing that "opry" was a generic termⁿ⁹⁶ and that a finding of genericness was mandated by issue preclusion.ⁿ⁹⁷

The court justified its decision to avoid the application of preclusion on two grounds. First, it rejected the applicability of *WSM, Inc v Hilton*.ⁿ⁹⁸ The court pointed to an earlier case, *WSM, Inc v Bailey*,ⁿ⁹⁹ which the district court read as standing for the proposition "that 'Opry' was not a generic term."ⁿ¹⁰⁰ Because the Middle District of Tennessee decided that case, the court reasoned that it was "required to follow its own precedent."ⁿ¹⁰¹ As such, it ignored *Hilton* and determined that "Gaylord is not collaterally estopped from litigating the primary significance to the relevant public of the term 'Opry' today."ⁿ¹⁰²

Second, the court used the changed-circumstances exception to avoid preclusion. In doing so, the court read the Federal Circuit opinion in *Opryland USA* as holding "that Gaylord was not collaterally estopped from litigating the generic nature of 'Opry' due to potential changed circumstances."ⁿ¹⁰³ By downplaying the "as a significant component of the marks in issue" language from *Opryland USA*,ⁿ¹⁰⁴ the Middle District of Tennessee was able to draw on the *Opryland USA* decision to support its use of the changed-circumstances exception.ⁿ¹⁰⁵

In issuing its final judgment, the Middle District of Tennessee stated its conclusion directly: "The OPRY mark is well known and famous, and serves to identify Gaylord as the sole source of the goods and services sold in connection with the [*489] OPRY mark."ⁿ¹⁰⁶ As such, Gaylord is now the owner of the "opry" mark and has the federal registration to prove it.ⁿ¹⁰⁷

b) Circuits that have accepted the theoretical possibility, but not the practical occurrence, of reProtection. Other courts of appeals have recognized that it might be possible to reprotect a mark that is not part of a larger term or phrase. However, these courts have accepted only the theoretical possibility of reProtection. The most recent court to consider this possibility was the Eleventh Circuit in *Miller's Ale House, Inc v Boynton Carolina Ale House, LLC*.ⁿ¹⁰⁸ Miller's Ale House - or rather its predecessor, Ale House Management - first attempted to assert trademark protection in the unregistered term "ale house," arguing that the term was not generic when applied to "institutions that serve both food and beer."ⁿ¹⁰⁹ The Fourth Circuit blocked this claim, adjudicating "ale house" to be generic.ⁿ¹¹⁰

Miller's was undeterred by the rejection of its mark. A decade later, Miller's attempted to assert a trademark for "ale house," this time in a different circuit.ⁿ¹¹¹ Looking back to the Fourth Circuit decision, the Eleventh Circuit considered the application of issue preclusion.ⁿ¹¹² Given the weakness of the evidence that Miller's presented in the case at bar - declarations from two customers, some employee statements, and advertising expenditures - the court found that "Miller's evidence fails to indicate any change at all in the public perception of the term 'ale house.'"ⁿ¹¹³ In its decision, the court explained its rationale for allowing the presentation of evidence: because "certain issues in trademark law are more likely than others to be altered across time," "fact-intensive issues such as ... secondary meaning may entail a wholly different inquiry."ⁿ¹¹⁴ The court further clarified that preclusion is not an absolute bar, and that "it must be theoretically possible, where circumstances warrant," for a party to reassert rights in a mark.ⁿ¹¹⁵

[*490] The First Circuit has also left the door open for relitigation of a determination that a mark is generic. The court did so in litigation concerning the term "Lite" in reference to beer. In 1977, the Seventh Circuit held that, since the properly spelled adjective "light" was generic, the word "lite" was generic as well.ⁿ¹¹⁶ Miller Brewing then litigated the same issue before the First Circuit in 1981. On the face of the decision, the First Circuit's ruling in *Miller Brewing Co v Falstaff Brewing Corp*ⁿ¹¹⁷ appears to fall squarely in line with courts that bar reProtection. The court explained that "under no circumstances is a generic term susceptible of de jure protection under § 43(a) of the Lanham Act, 15 USC § 1125(a) or under the law of unfair competition."ⁿ¹¹⁸ The court continued, quoting Judge Henry Friendly and taking an apparently hard line against the possibility of reProtection:

No matter how much money and effort the user of a generic term has poured into promoting the sale of its merchandise and what success it has achieved in securing public identification, it cannot deprive competing manufacturers of the product of the right to call an article by its name.ⁿ¹¹⁹

But Falstaff left the door open for the possible reProtection of a generic term. First, the First Circuit "assumed that a judgment determining a state of facts existing in the 1970's may not preclude a fresh determination of a state of facts existing in the 1980's."ⁿ¹²⁰ Then, by reference to the Singer cases, the court acknowledged the possibility that a term might cease to have generic meaning.ⁿ¹²¹ The new meaning could then be recognized in subsequent litigation holding the term to be protected. Essentially, the Falstaff court's position can be summed up as follows: no one may appropriate a currently generic term for his or her own exclusive use. However, if a term is no longer generic, factual reconsideration may allow for trademark protection.

[*491] c) Guidance for future litigants. While Miller's Ale House, Opryland USA, and Falstaff appear to stand for the principle that trademarks might be reclaimed from generic status, the cases provides little guidance to future litigants hoping to reassert rights in a mark. In Opryland USA, the Federal Circuit allowed for the reconsideration of the generic status of a term, but only as a component of a mark that had not previously been adjudicated to be generic.ⁿ¹²² As such, an attempt to reprotect a mark on its own is clearly distinguishable, and Opryland USA provides at best limited support. The applicability of Miller's Ale House and Falstaff to future cases is similarly limited. Both opinions disposed of the issue of reProtection relatively quickly, and so the courts' respective analyses provide future litigants with little direction on how to assert such a claim.ⁿ¹²³

These three courts have further contributed to the confusion surrounding the possibility of reProtection by providing limited guidance as to what evidence might be sufficient to warrant reProtection. The Federal Circuit was the least helpful: it simply declined to set a standard.ⁿ¹²⁴ The Eleventh Circuit was slightly more helpful. While it noted that "there is no clear standard for [this] situation," it did provide a word of caution: "Were changed perception sufficient to warrant the elevation of a ... generic term to trademark status, such change would have to be radical."ⁿ¹²⁵ The First Circuit also limited the possibility of reclamation to a very rare situation:

Where a generic association of a word or term has become obsolete and is discoverable only by resort to historical sources or dictionaries compiled on historical principles to preserve from oblivion obsolete words, then, from the viewpoint of trademark and like law, the word or term is no longer a generic word.ⁿ¹²⁶

This standard is so high as to be practically insurmountable.ⁿ¹²⁷ It is also incompatible with the Fifth Circuit's ruling in Briley, in [*492] which the "Singer" mark remained as both the company's name and part of the company's marketing throughout an intervening period of genericness.ⁿ¹²⁸ Furthermore, the First Circuit's standard is self-defeating. If a party wants to reclaim a mark, it stands to reason that the mark is not in "oblivion" and thus is not subject to protection under this definition.

If the standards for protecting a formerly generic mark are either extremely vague or so demanding as to be impossible to meet, when might a party be able to assert a reProtection right at all? It is unclear whether any of these courts of appeals will ever actually allow for reProtection in practice. Still, the fact that these courts have acknowledged the possibility of protection for formerly generic terms is a step toward allowing it.

3. Courts that view issue preclusion as a complete bar to reProtection.

Not all courts agree that the changed-circumstances exception is available in the trademark context. Some courts use the language of issue preclusion to erect a per se bar to reProtection. But because issue preclusion must be able to

account for factual variation, it is possible that another legal doctrine can best explain these decisions.

The Seventh Circuit has adopted the per se bar to reProtection under the guise of issue preclusion. First, in *Miller Brewing Co v G. Heileman Brewing Co*,ⁿ¹²⁹ the earlier case involving light beer, the court considered whether "a misspelled version of the word 'light' can become a trademark for a 'less filling, low-calorie beer.'" ⁿ¹³⁰ The misspelling did not help Miller Brewing - the court considered "light" in connection with beer, determined that the term was generic, and applied that genericness to the misspelling. ⁿ¹³¹

Two years later, Miller Brewing tried again to convince the Seventh Circuit that it had a right to "lite." ⁿ¹³² Finding that the conditions required to establish issue preclusion were present, the court barred the suit and set out a position on the interaction between genericness and issue preclusion:

[*493]

For purposes of the law of collateral estoppel, [the G. Heileman Brewing] decision was a final determination that "LITE" is generic and therefore not entitled to trademark protection. That determination is an insuperable obstacle to Miller's claims based on its ownership of trademark rights in "LITE" in that case, and all other cases. ⁿ¹³³

The court was almost certainly right about the status, at the time, of the term "lite" - it would have been impossible for Miller Brewing to reclaim the generic term, which was in wide use, just two years after the same court had adjudged it to be generic.

What is important, though, is the court's "insuperable obstacle ... [in] all other cases" language. ⁿ¹³⁴ It casts genericism as a factual finding that cannot be changed no matter what evidence of usage is presented. ⁿ¹³⁵ However, the court was confronting essentially the same circumstances as the First Circuit had faced in *Falstaff* - the status of the term "lite" in the late 1970s. While both courts were likely right about the applicability of issue preclusion to the cases at hand, why is it that a determination of preclusion might be avoided in one circuit but not another? It appears that the Seventh Circuit's conception of issue preclusion, as applied to formerly generic trademarks, does not include an exception for changed factual circumstances. While it nominally applies preclusion, then, the Seventh Circuit might be relying on another legal doctrine.

The Fifth Circuit has also held that a mark, once generic, cannot shed that status and become protected. The court took this position - without even acknowledging the *Singer* cases - in *Texas Pig Stands, Inc v Hard Rock Cafe International, Inc*,ⁿ¹³⁶ which involved a dispute over the use of the words "pig sandwich." ⁿ¹³⁷ *Texas Pig Stands* was not the first time that those words had been the subject of trademark litigation. Approximately sixty years prior, the corporate predecessor of *Texas Pig Stands* brought suit in Texas state court against a competitor for using the term. ⁿ¹³⁸ In 1930, the Court of Civil Appeals of Texas issued a conflicted decision: it held that "the words 'pig [*494] sandwiches' are purely common English words, generic, denoting no fact of ownership or common source by which it can be identified by dealings or associations," ⁿ¹³⁹ but also that the term was unprotectable as "essentially descriptive" and without secondary meaning. ⁿ¹⁴⁰ This contradiction is important - unlike generic terms, it is clear that descriptive terms might later shift in meaning and take on trademark significance. ⁿ¹⁴¹

The Texas state court's confusing opinion in 1930 led the Fifth Circuit to decline to apply issue preclusion in *Texas Pig Stands*. ⁿ¹⁴² Reasoning backward from the facts before it, the Fifth Circuit recognized that a factual change in the meaning of "pig sandwich" might have occurred, and it therefore viewed the term as descriptive. ⁿ¹⁴³ Had the Court of Civil Appeals of Texas been clearer, though, the Fifth Circuit might have reached a different conclusion. Indeed, the Fifth Circuit wrote that a determination that the term "pig sandwiches" was generic in 1930, "if standing alone, would collaterally estop all litigation in [the] case." ⁿ¹⁴⁴ The court reached this conclusion because it understood a finding of genericness to be a factual determination that is impossible to change. ⁿ¹⁴⁵ Like the Seventh Circuit, then, the Fifth Circuit claims to rely on the doctrine of issue preclusion while drawing conclusions that are inconsistent with that doctrine. Therefore, it seems that some other legal principle does the actual work of barring reProtection. It is that

possible driver of these decisions to which this Section now turns.

4. The de facto secondary meaning doctrine as a barrier to reProtection.

Other courts bar reProtection without using issue preclusion. These courts apply the de facto secondary meaning doctrine as an absolute barrier.ⁿ¹⁴⁶ The name of the doctrine itself makes little sense - it is apparently a holdover from other areas [*495] of trademark law - but courts use it to justify the decision to "disregard [] evidence that a designation has some trademark significance."ⁿ¹⁴⁷

Generally, the de facto secondary meaning doctrine mandates that "the repeated use of ordinary words functioning within the heartland of their ordinary meaning, and not distinctively, cannot give [a producer] a proprietary right over those words."ⁿ¹⁴⁸ But, confusingly, not all courts mean the same thing when they invoke the de facto secondary meaning doctrine. Professor J. Thomas McCarthy recognizes two interpretations of the doctrine: a "regular strength" version and a "super strength" version.ⁿ¹⁴⁹

The regular-strength framing makes sense and is consistent with the fundamental principles of trademark law. Under this conception of the doctrine, "evidence that only a minority of persons use [a] term to identify and distinguish one source" does not create a trademark.ⁿ¹⁵⁰ Essentially, this branch of the doctrine holds that, if a term has not taken on primary significance through majority usage, it is not a trademark.ⁿ¹⁵¹

The super-strength version is both more problematic and more common. In this framing, once a mark has become generic, "then it must always thereafter remain a generic name, regardless of changes in customer perception."ⁿ¹⁵² Even total association between a mark and a producer in the public's view would not support trademark protection.ⁿ¹⁵³ This position has been adopted by the Second,ⁿ¹⁵⁴ Third,ⁿ¹⁵⁵ Fourth,ⁿ¹⁵⁶ Ninth,ⁿ¹⁵⁷ and DC Circuits.ⁿ¹⁵⁸ [*496] The First Circuit has also hinted at this understanding of the de facto secondary meaning doctrine, but in a way that is not entirely inconsistent with Falstaff.ⁿ¹⁵⁹

The super-strength version of the doctrine is problematic insofar as it does not recognize that a generic term that takes on producer-identifying primary significance no longer functions as a generic term. No one is being "deprived ... of the right to call an article by its name"ⁿ¹⁶⁰ - the word in question is no longer the name of the article but instead is the name of an article made by a particular producer.

While the Fifth and Seventh Circuits nominally apply preclusion, it is the impulse behind the super-strength version of the de facto secondary meaning doctrine that likely animates those circuits' opinions and truly poses the bar to reProtection. If the doctrine of issue preclusion includes an "out" for those cases in which relying on an outdated factual determination would simply be incorrect - that is, when circumstances have truly changed - it cannot be the case that a prior determination is "insuperable."ⁿ¹⁶¹ The Seventh Circuit's statement that the initial assessment of the fact is "insuperable,"ⁿ¹⁶² and the Fifth Circuit's statement that a formerly generic mark can "never attain trademark protection,"ⁿ¹⁶³ are effectively applications of the de facto secondary meaning doctrine. Once this point is assumed, the application of preclusion makes more sense: instead of being theoretically unavailable, the changed-circumstances exception is just practically impossible to take advantage of. As such, the end result is no different whether achieved under color of preclusion or the de facto secondary meaning doctrine, but the underlying logic of the de facto secondary meaning doctrine truly does the work.

[*497]

C. ReProtection at the PTO

While courts have not completely embraced reProtection, the PTO allows the registration of formerly generic marks.ⁿ¹⁶⁴ The PTO is the federal government's expert body on patent and trademark issues.ⁿ¹⁶⁵ The TTAB is the venue within the PTO that "acts as an administrative appellate body reviewing final decisions of a Trademark Examiner as to

registration,"ⁿ¹⁶⁶ though appeal may be taken from a TTAB decision to the Federal Circuit. Alternatively, a civil action may be filed in a US district court.ⁿ¹⁶⁷ As such, TTAB decisions provide a window into the way that the PTO approaches the doctrine of issue preclusion and the doctrine's application to marks previously adjudicated to be generic.

The Board takes a relatively permissive position toward the preclusion of subsequent applications for trademark protection:

There is nothing to preclude an applicant from attempting a second time in an ex parte proceeding to register a particular mark if conditions and circumstances have changed since the rendering of the adverse final decision in the first application. The question generally in the second proceeding is whether changes in facts and circumstances do exist and, if so, whether they can support the registration sought.ⁿ¹⁶⁸

The Board's approach is more than theoretical. In 2008, it considered a second application for a trademark in the term "hotels.com" (made, unsurprisingly, by the company Hotels.com). Even though much of the evidence in the second proceeding was the same as that presented in the first, Hotels.com brought forward a new public-understanding survey.ⁿ¹⁶⁹ This "constituted a [*498] change in facts sufficient to avoid application of the doctrine of res judicata."ⁿ¹⁷⁰ Ultimately, the Board again denied registration,ⁿ¹⁷¹ but its willingness to reexamine the issue evidences an understanding that words can shift in significance and that trademark law ought to account for this fact.

In other cases, the Board has applied the de facto secondary meaning doctrine to bar the registration of terms previously adjudicated as generic.ⁿ¹⁷² However, McCarthy suggests that the Board's approach to de facto secondary meaning is not the unthinking bar to re-protection that it is in some courts.ⁿ¹⁷³ McCarthy suggests that the Board uses the de facto secondary meaning doctrine not as an absolute barrier, but as shorthand to reject claims when only "a few customers view the designation as a trademark."ⁿ¹⁷⁴ Essentially, the Board has stated that de facto secondary meaning exists when a mark has not actually achieved the primary significance required for trademark protection. This application of the regular-strength de facto secondary meaning doctrine is not inconsistent with the principle that marks can shift in meaning over time.ⁿ¹⁷⁵ The Board understands that the significance of marks can change and that they might accordingly achieve protectable status upon a finding of sufficient factual change.

III. Issue Preclusion Should Not Bar the Protection of Formerly Generic Terms

Despite the muddled body of law surrounding formerly generic marks, courts should be receptive to the possibility of re-protection. While re-protection might not be appropriate very often, allowing for relitigation of generic status would be broadly beneficial. For example, it is possible that America Online ("AOL"), in an attempt to reboot its e-mail service, would begin [*499] an advertising campaign hoping to capitalize on nostalgia for its "You have mail" (or "You've got mail") slogan. While AOL would be within its rights to do that, so would every other firm - the phrase has been held to be generic.ⁿ¹⁷⁶ Forcing the term to stay generic has little value: it is unlikely that, after many years of this advertising campaign, anyone would associate the phrase with any company other than AOL. Why should an adjudication from 2001 prevent the company from extracting the full value of a term that it popularized?

Courts should use the changed-circumstances exception to issue preclusion to allow - when appropriate - for reassessment of terms previously determined to be generic. Though this works against the finality rationale underpinning issue preclusion, courts can ameliorate this concern by using the fee-shifting provision in § 35(a) of the Lanham Act.

A. The Social Benefits of Reclamation

One commentator put the question bluntly: "What interest is served by such a rule denying trademark protection to words that are not generic now, but were generic in the distant past?"ⁿ¹⁷⁷ Whatever that interest may be, it is far

outweighed by the potential gains from permitting reProtection. Allowing for the possibility of reProtection yields substantial economic benefits and does not undermine the linguistic justifications for genericism.

1. The economic benefits of reProtection.

The fundamental economic rationale for the denial of trademark protection for generic marks is that allowing protection would grant one producer a de facto monopoly, imposing costs on all other market participants. While this is undoubtedly reason enough to deny protection to marks as they become generic, the rationale does not hold up in the context of marks that are no longer generic.ⁿ¹⁷⁸

[*500] Professor Landes and Judge Posner describe the problem: a producer able to trademark a currently generic term "would reduce the amount of [words in common with other producers that describe features of the product generally] available to competitors," allowing the producer to "earn rents because of the added costs to his rivals of periphrasis" and imposing deadweight loss on the market.ⁿ¹⁷⁹ The added costs to competitors arise because, if "competitors cannot legally designate their product by the term that most consumers call it, other strategies must be developed to overcome this impediment and to convince customers that these competing brands are also the "real thing." "ⁿ¹⁸⁰ For example, it would be far more difficult for Napoleon to compete if only Weber could call its product a "grill." The deadweight loss might be mitigated somewhat through licensing but, as Landes and Posner suggest, this would merely "transform a social cost into a transfer payment to the firm appropriating the generic term" and would not eliminate all loss - "there would be costs of negotiating and enforcing the trademark licenses and of obtaining generic trademarks ... in the first place."ⁿ¹⁸¹ Allowing protection of currently generic terms might also decrease innovation by incentivizing rent-seeking behavior.ⁿ¹⁸²

The economic rationale behind reducing marks to generic status does not hold when considering their reProtection in appropriate circumstances. The fact that the party asserting protection in a term is able to meet the requisite burden of proof - whatever that may be - demonstrates that the term is not generating value as a signifier of a whole class of goods for the consuming public. Instead, it is a signifier of a particular producer. Declining to protect a formerly generic term may even be affirmatively harmful, because "erroneously failing to protect [a] word when it ... serves as a source-identifying mark might be very costly if consumers end up confused about a competing [*501] firm's product."ⁿ¹⁸³ Consider the Singer cases: when the primary significance of the mark was the entire class of sewing machines, the public derived the greatest utility from denying protection. But years later, when the term had fallen into disuse, and alternate terms were used to signify a class of sewing machines, the public was able to benefit from the reProtection of the term. Singer reclaimed its term by investing in advertising, thereby demonstrating to the public that its name was a brand.ⁿ¹⁸⁴ ReProtection therefore decreased search costs, because consumers could rely on the brand name and quickly make an association between the term "Singer" and a set level of quality. Only de jure reProtection can fully achieve this goal - without it, other producers could call their machines "Singers" and appropriate some of the value of the mark. Singer might still choose to invest in advertising but would certainly invest less than if full reProtection were possible. The ability to bring a lawsuit against trademark infringement, then, is important in fully incentivizing search-cost-reducing conduct.

Keeping open the possibility of reProtection might also create better incentives for firms with trademarks by reducing the cost of genericide. Trademarks are valuable assets - for some firms, a trademark is the most valuable asset that the company owns.ⁿ¹⁸⁵ Landes and Posner note that "generic status is achieved gradually."ⁿ¹⁸⁶ Between the introduction of a fanciful mark, for example, and its ultimate - though by no means certain - slide into generic status, "there will be an interval duration during which some consumers will still think of the trademarked name as the name of a particular brand though others are already thinking of it as the name of the product."ⁿ¹⁸⁷ During this period, a firm might believe that the public understands its mark to refer to the firm itself but have well-founded concerns that a jury might conclude otherwise. This phenomenon is currently occurring with the word "google." It obviously refers to the [*502] name of a search engine but can also refer to the act of searching the Internet.ⁿ¹⁸⁸ Google is apparently already concerned that it might lose its mark to genericness,ⁿ¹⁸⁹ and it is possible that, at some point, the company will.

The incentive to pursue litigation in this circumstance might vary: a firm would likely sue for large-scale infringement, but a smaller-scale violation of a trademark right might be allowed to persist for fear of losing an asset forever.ⁿ¹⁹⁰ Consider the trade name litigation in *Closed Loop Marketing, Inc v Closed Loop Marketing, LLC*.ⁿ¹⁹¹ The plaintiff began to use the name "Closed Loop Marketing" in 2001, while the defendant entered the market and began to use the same name in 2003.ⁿ¹⁹² The plaintiff brought suit for infringement, and the name was adjudicated to be generic.ⁿ¹⁹³ Even if the plaintiff brought the suit expecting to lose the rights to the name, the wholesale appropriation of a firm's name is a major harm, and an attempt must be made to rectify it. However, in a less harmful case, in which the likelihood of confusion is lower - for example, involving the name "Closed Loop Jewelry" - the firm might not have brought the suit, as the risk that the name would be adjudicated to be generic might outweigh the expected gains from litigation. This disincentive to bring suit is costly. It robs marks of their ability to signify the source of a good, increasing search costs for consumers and necessitating a decrease in price to offset the increased search costs.ⁿ¹⁹⁴ The disincentive would be lessened if a determination that a mark was generic were reversible, as firms in the marginal case would see greater expected value in asserting their trademark rights in the first instance.

[*503] The reverse of this problem also exists: in *Microsoft Corp v Lindows.com, Inc*,ⁿ¹⁹⁵ Microsoft brought suit under the Lanham Act based on the apparent similarity between "Windows," which was a registered trademark, and "Lindows," the name of a Linux operating system.ⁿ¹⁹⁶ The court rejected Microsoft's application for a preliminary injunction on the ground that Microsoft failed to show that it was likely to succeed on the merits. The court saw "roughly equal bodies of evidentiary support" on both sides of the genericness issue.ⁿ¹⁹⁷ In the face of possible evidence that "Windows" had been generic in the 1980s, Microsoft also asked for a ruling as to whether it could attempt to prove that the term was no longer generic.ⁿ¹⁹⁸ The court applied the super-strength de facto secondary meaning doctrine to reject this possibility, stating that "if the WINDOWS trademark was generic in 1985, then it cannot be valid," even if it had since taken on primary significance.ⁿ¹⁹⁹ In the face of these rulings, Microsoft settled - by paying \$ 20 million in exchange for an agreement that Lindows would change its name - rather than face the possibility of a determination that "Windows" is generic.ⁿ²⁰⁰ While Microsoft may still have settled the suit in the absence of the ruling that genericness was permanent, it likely would have settled for less - the possibility of reprotection would have expanded the set of Microsoft's possible favorable outcomes and thus reduced the amount that it was willing to pay to avoid litigation.

Barring the protection of formerly generic trademarks that have achieved source-identifying significance also imposes the inverse of the problem that Landes and Posner identified concerning genericide - there may be a period in which the primary significance of the mark is, in fact, a producer, but the mark is still deemed generic.ⁿ²⁰¹ That producer will be disincentivized from further investment in the term because it would be limited in its ability to internalize the benefits. In the case of AOL and [*504] "You have mail," for example, the company might invest a suboptimal amount in the marketing opportunity for fear of being unable to exclude free riders. To be sure, firms already have incentives to invest in generic terms - the side benefits often outweigh the risks of nonprotection - but promoting further investment in the term encourages the use of a former mark that otherwise lies fallow.ⁿ²⁰²

2. Reprotection is consistent with the linguistic justification for trademark.

The creation of trademarks (and the subsequent slide of terms to generic classification) has linguistic benefits. As Professors Deven Desai and Sandra Rierson note:

We may find a trademarked word so pervasive and useful that we begin to use it in noncommercial contexts and indeed not as a trademark at all. We may incorporate a trademarked term into our everyday language ... as a way to convey more than the trademark meaning of the term.ⁿ²⁰³

Allowing reprotection is consistent with this linguistic justification. A firm that has committed its resources to pulling a mark back from generic status has, in effect, imbued meaning into a word that was otherwise not being used. However,

if the word were in common usage, only a herculean effort would make recapture even close to possible, and it is likely that any such effort would fail. As is true in a case of first protection, "the existence of an alternative generic signifier is necessary for a mark to become protectable" - without it, the primary significance of the term will still be the generic product-class identification.ⁿ²⁰⁴ Society will likely have already benefitted from this phenomenon once, through the popularization of another term: firms often (sometimes successfully) use alternative signifiers to stave off genericide.ⁿ²⁰⁵ For example, when Xerox used "copier" to save its trademark, society benefitted: it gained a word to describe a product and retained the cost-lowering benefits of the "Xerox" [*505] trademark.ⁿ²⁰⁶ Reprotection can allow a firm to add value to a term not in common usage without depriving society of a name to refer to a class of goods.

B. Changed Circumstances

Given the broad benefits of reprotection, courts ought to reduce the procedural hurdles that parties seeking reprotection face. If a litigant can present evidence demonstrating that the significance of a mark is not identifying a class of goods but instead a particular producer, a previous holding of genericness should not bar litigation.

1. Courts should be willing to consider changed circumstances.

As noted in Part II.B.1, a changed-circumstances exception to issue preclusion exists to allow for reassessment after major shifts in underlying facts. A showing that a mark once held to be generic no longer has generic meaning, but instead holds producer-identifying significance, is a change to the "controlling facts."ⁿ²⁰⁷ The denial of protection that stems from a finding of genericness is fundamentally a factual inquiry, and if a party is able to show that the answer to the question of primary significance (or any other evidentiary threshold)ⁿ²⁰⁸ has changed, the party must be given an opportunity to demonstrate the changed consumer association to a jury.ⁿ²⁰⁹ The Eleventh, First, and Federal Circuits have acknowledged as much when addressing the possibility that a mark might be reprotected. For example, the Eleventh Circuit's willingness to hear evidence on the status of the term "ale house" indicates that the governing fact - the status of the mark in the mind of the public - might change.ⁿ²¹⁰

Courts acknowledge that issue preclusion might be avoided in other areas of trademark law. In the context of descriptive terms, courts accept that secondary meaning might change over time. For example, in the Fifth Circuit case *Test Masters Educational Services, Inc v Singh*,ⁿ²¹¹ the court declined to set "precise [*506] time contours for the re-litigation of secondary meaning" but acknowledged that it might be relitigated upon sufficient factual change.ⁿ²¹² The Eighth Circuit has held that a factual change that occurs over a shorter time frame - the acquisition of incontestable statusⁿ²¹³ - is sufficient to render the "application of collateral estoppel [] ... inappropriate."ⁿ²¹⁴ If other shifts in factual determinations can be sufficient to avoid preclusion, courts should treat genericism the same way.

Finally, the fact that the PTO accepts the registration of marks previously denied as generic is strong evidence that preclusion ought to be avoided in appropriate situations.ⁿ²¹⁵ The PTO understands that words do not have constant meaning - they shift with consumer usage patterns, trends, and market developments.ⁿ²¹⁶ It makes little sense to maintain a hard-line rule against reprotection of a term when the PTO - a specialized body tasked with the assessment of marks - understands that the significance of terms can and does change over time.

The changed-circumstances exception need not apply to all cases; it can still function as a screen for the weakest attempts at demonstrating that a mark is no longer generic. For example, even though its decision ultimately relied on the de facto secondary meaning doctrine, the Seventh Circuit was likely correct in applying preclusion in *Miller Brewing Co v Joseph Schlitz Brewing Co*.ⁿ²¹⁷ It is hard to believe that, in the two years between the determination that "light" was generic and the Joseph Schlitz Brewing litigation, the term shifted in primary significance.ⁿ²¹⁸ Additionally, qualifying for the changed-circumstances exception does not necessarily mean that the term is no longer [*507] generic. Consider *In re Hotels.com LP*.ⁿ²¹⁹ The TTAB moved past the preclusion barrier, considered the evidence, and maintained its holding that the term in question was generic.ⁿ²²⁰ As such, simply allowing an issue to proceed to trial does not automatically mean that the mark has assumed trademark significance.

Still, courts should take a relatively liberal approach to avoiding the application of changed circumstances: new evidence that is directly probative of consumer understanding (like a survey) or shifts in market structure that might easily change how consumers understand a word should be a sufficient basis to find changed circumstances and avoid preclusion. For example, the District Court for the District of Rhode Island, in *Miller Brewing Co v Falstaff Brewing Corp*,ⁿ²²¹ took a functional approach: it saw dramatic changes in the structure of the market (the light-beer market was just starting to develop and was expanding rapidly) and concluded that earlier decisions were inapplicable.ⁿ²²² The evidence presented in response to the motion for summary judgment in *Gaylord Entertainment v Gilmore Entertainment Group*ⁿ²²³ is also a good guide to what is sufficient to find changed circumstances. The court did not explicitly rely on the evidence of primary significance, but it should have (and the evidence may have informed its finding of changed circumstances anyway).ⁿ²²⁴ The survey evidence presented should have been enough to show changed circumstances: the evidence indicated a 60 percent association between "1-800-THE-OPRY" and Gaylord's business among country music listeners, the relevant market.ⁿ²²⁵ The court should have taken a liberal approach by accepting this evidence without delving into the suitability of the survey methods.

The TTAB also takes a relatively permissive approach in allowing for the reexamination of an attempted registration previously denied as generic. In *In re Hotels.com*, the presence of new survey evidence, which qualified as changed circumstances, was enough to avoid issue preclusion.ⁿ²²⁶ But the TTAB did not look at the survey's methodology before finding changed circumstances; [*508] in fact, it noted "deficiencies" after it avoided issue preclusion.ⁿ²²⁷ Similarly, in *In re Johanna Farms, Inc.*,ⁿ²²⁸ the TTAB reexamined a mark previously adjudicated to be generic when it was presented with new survey evidence.ⁿ²²⁹

2. Courts should abandon inordinate proof barriers to reprotection.

Although the Eleventh and First Circuits have left open the possibility that formerly generic signifiers might regain protection, the standards of proof that they set are nearly insurmountable. The Eleventh Circuit requires "radical" change,ⁿ²³⁰ while the First Circuit reasons that a mark can regain protection only after it becomes obsolete.ⁿ²³¹ But because reprotection produces a number of benefits, courts should work to make it possible. As one commentator notes: "If it only takes 51% of the consuming public to make a company lose a trademark, why should it take more than 51% of the consuming public ... to get it back?"ⁿ²³² The Lanham Act includes the primary-significance test as the statutory line-drawing mechanism in determining whether a mark is generic.ⁿ²³³ It is consistent with the fundamental structure of trademark law, then, to use that test as the dividing line in all instances.

The super-strength de facto secondary meaning doctrine should also be discarded. The doctrine acknowledges that facts can change and that marks adjudicated to be generic can take on trademark significance - if they could not, courts would not need this doctrine to serve as a barrier. To even be subject to rejection because it has only de facto secondary meaning (under the super-strength version of the doctrine), a mark must undergo two steps: First, it must be - either by genericide or by virtue of never having been protected - generic. Second, the mark must take on primary significance; however, the super-strength version of the de facto secondary meaning doctrine still stands as a rote bar to registration of precisely those marks for which [*509] "exclusive use of a generic term [by a producer] causes customers to associate the term with that specific source."ⁿ²³⁴ While a descriptive term would be protectable, the doctrine provides that a formerly generic term is not.

The doctrine persists as a denial of protection, grounded in the idea that, regardless of "how much money and effort the user of a generic term has poured into promoting the sale of its merchandise and what success it has achieved in securing public identification, it cannot deprive competing manufacturers of the product of the right to call an article by its name."ⁿ²³⁵ But as one commentator correctly argues, the super-strength de facto secondary meaning doctrine "is unsound and at odds with fundamental principles of trademark law... . Once a mark has acquired sufficient secondary meaning such that its primary significance is to identify a producer, that mark is no longer generic. It has become a mark."ⁿ²³⁶ Courts should not rely on the automatic bar provided by the doctrine when facts have changed - rather, they should give full consideration to the factual circumstances that they face.

C. Protecting Defendants

It is true that issue preclusion serves to prevent litigants from relitigating in the hope of attaining a different result. Cutting away the doctrine's protection without providing a replacement would destabilize trademark law, because users of generic terms would more frequently be subject to challenge. Professor McCarthy, a supporter of allowing trademark status to return to "formerly generic names," suggests that courts "are fearful that opening the door even a crack will allow spurious claims of trademark status for generic names based on shaky and unreliable evidence of customer perception."ⁿ²³⁷ Weakening the bar provided by issue preclusion might also create a problem of offensive litigation: large firms might file suits asserting rights in marks that they no longer own against smaller market entrants, hoping to use the costs of litigation as a way of restraining [*510] competition.ⁿ²³⁸ However, through the fee-shifting provision of § 35(a) of the Lanham Act, these problems can be minimized.

1. Using fee-shifting to protect defendants.

Allowing litigants to escape issue preclusion would pose a finality issue: a business will never be able to completely rely on a prior determination of a trademark's generic status. It is valuable for firms to be able to look to past adjudications of the status of a term and rely on the court's determination - otherwise, a transaction cost is imposed on new entrants and on the judicial system, which must bear the expense of repeated litigation. But this potential problem can be limited by employing the one-way-fee-shifting provision of the Lanham Act, imposing the expense of a losing attempt to assert a right to a mark previously adjudicated as generic on the party bringing the suit. This would deter specious claims by increasing the expected cost of litigation and encourage defendants to fully litigate claims that they might otherwise settle (through the corresponding reduction in expected litigation costs).

Section 35(a) of the Lanham Act provides that "the court in exceptional cases may award reasonable attorney fees to the prevailing party."ⁿ²³⁹ Use of this provision would encourage parties to bring suit asserting protection in a generic mark only in meritorious cases. It is true that large firms would still have some incentive to bring litigation aimed at driving competitors from the market. But the prospect of paying double the normal cost of a lawsuit would decrease this incentive, even if it would not wholly eliminate it. The unpredictability of cost in the first place would also decrease the incentive to sue. Predictable legal costs are valuable from a decisionmaking perspective, so anything that increases risk - as one-way fee-shifting does - would decrease the incentive to bring a lawsuit.ⁿ²⁴⁰

[*511] Courts of appeals are hardly in agreement as to what actually constitutes an "exceptional case."ⁿ²⁴¹ But division between the circuits should not serve as a bar to the provision of attorneys' fees - under any interpretation, fees should be available against a plaintiff that loses in an attempt to claim a still-generic mark. For example, the circuits are split as to whether bad faith is a necessary condition to the award of fees.ⁿ²⁴² In the circuits that do not require bad faith, fees are generally awarded in accordance with broad equitable principles.ⁿ²⁴³ One consideration is whether a party has made a "groundless" or "unreasonable" claim.ⁿ²⁴⁴ In *Secalt S.A. v Wuxi Shenxi Construction Machinery Co.*,ⁿ²⁴⁵ the Ninth Circuit affirmed a holding that a suit was unreasonable because the plaintiffs could not provide "any evidence to support their assertion that the trade dress was not functional."ⁿ²⁴⁶ Given the parallels between functionality and genericness, this is akin to a plaintiff coming to court with no evidence that the mark at issue is not generic. As a determination that the mark was generic would already exist in a case for reProtection, courts could easily expand this principle to cover situations in which plaintiffs bring insufficient evidence - defined as any quantity that does not support a finding of protection. It is apparent that a losing attempt to reassert trademark protection in a term lacks merit, particularly because the party began the lawsuit in full view of a determination that it had no right to the mark to begin with.

[*512] Some courts require even less. In construing the Lanham Act's fee-shifting provision, the DC Circuit has treated those cases that are "uncommon [and] not run-of-the-mine" as "exceptional."ⁿ²⁴⁷ It is certainly the case that an attempt to reestablish the protected status of a trademark is not common, and it would not likely be attempted frequently. The DC Circuit, among other courts, has also recognized that "economic coercion" can support the discretionary award of fees.ⁿ²⁴⁸ While the DC Circuit considered abusive forum selection to be "economic coercion,"

the principle behind its decision holds in the spurious-reprotection context: if the plaintiff makes choices in litigation with the aim of compelling a result because its opponent cannot afford another outcome, an award of fees is warranted. ⁿ²⁴⁹ This principle applies with equal force in the context of reprotection, and fees should be available.

In circuits in which bad faith is required, ⁿ²⁵⁰ courts look at similar considerations but require "a high degree of culpability." ⁿ²⁵¹ Viewed against a baseline of no litigation, a meritless claim of right in a generic term needlessly increases attorneys' fees. If the plaintiff loses, the court effectively has determined that the plaintiff sued based on a right that it did not have. The existing adjudication that the mark at issue is generic is - unless the plaintiff can rebut it - ex ante evidence that the plaintiff has no cognizable right. ⁿ²⁵² On this basis, courts should use their discretion to find that the plaintiff proceeded in bad faith. This would have the effect of deterring competition-suppressing litigation.

Awarding fees against a plaintiff that pursues unsuccessful reprotection litigation is also consistent with the purpose of the Lanham Act's fee-shifting provision: "Awarding attorney's fees to a prevailing defendant is meant to "provide protection against unfounded suits brought by trademark owners for harassment [*513] and the like." ⁿ²⁵³ Courts should consider an unsuccessful attempt at reprotection to be unfounded even if the plaintiff has some evidence to support its claim, because such evidence was brought in the face of a prior judicial adjudication that the mark was not protected.

If the plaintiff wins, it is not necessary to use § 35(a) to shift fees in the opposite direction (onto defendants) - the second user of the mark will be subject to the remedies set out in § 35. The Lanham Act grants the power to award both damages and injunctions. ⁿ²⁵⁴ To avoid surprise, and in keeping with the equitable principles set out in the legislative history of the statute, ⁿ²⁵⁵ courts might allow damages only if the mark has been reregistered. A user who has reproprotected a mark but who has not reregistered it could be allowed injunctive relief, but not monetary recovery. ⁿ²⁵⁶ This would have two benefits. First, firms would be incentivized to initially reassert their mark to an examining attorney at the PTO. Second, firms using a term in commerce would be able to rely on the fact that potential losses would be limited. To be sure, firms will incur a cost if they are forced to stop using a particular term. But this cost is small and will be uniform throughout the market - all firms will have to use a new generic signifier (because the firm that reproprotects a mark will want to ensure that it does not lose the mark again). As such, any competitive harm will be minimal.

2. The remaining issue of weaponization.

While one-way fee-shifting will eliminate many of the issues raised by the circumvention of issue preclusion, it might not solve the problem of weaponization. The abuse of intellectual property rights is a problem in copyright ⁿ²⁵⁷ and patent law, ⁿ²⁵⁸ so [*514] it stands to reason that the clarification of a right creates a potential for offensive litigation in the trademark context as well. In this revised trademark regime, a large firm might make a claim of infringement, premised on reprotection, against a competitor in an attempt to financially burden that competitor's use of a generic term. But several factors - beyond the normal backstop of FRCP 11 ⁿ²⁵⁹ - combine to minimize this problem.

The incentive to bring abusive litigation will be decreased by the fact that only a formal adjudication that the mark is no longer generic can return the term to protected status. While a firm might be able to drive a smaller competitor into a settlement and a name change, a settlement will not create a property right that the large firm can enforce against all competitors. ⁿ²⁶⁰ And because the plaintiff will not begin the suit with a clearly defined property right, it is likely that, instead of the defendant paying the plaintiff (as would be expected in a typical patent, trademark, or copyright settlement), settlements will take the same form as the Lindows settlement: with the plaintiff paying the defendant. ⁿ²⁶¹ A series of lawsuits and settlements aimed at essentially buying back a trademark would be an inefficient way to clear the market of competition - it might work if one other firm were using the generic signifier that the large firm hopes to adopt, but in a multiproducer market, substantial effort and expense would be required. A firm that actually hopes to own the mark will likely wait until it has a meaningful chance of success.

As noted above, allowing for a changed-circumstances exception to issue preclusion does not mean that the

doctrine would never apply. ⁿ²⁶² Consider the term "ale house." When Miller's brought suit the second time, it was clear that the term [*515] was still generic - and it is hard to imagine that the term could ever escape generic status. ⁿ²⁶³ The court's application of preclusion was thus entirely appropriate. Future courts should take the same approach. When the evidence presented does not show that the significance of the mark has changed - as in Miller's Ale House, in which the plaintiff presented two customer statements and a few employee declarations ⁿ²⁶⁴ - courts should not hesitate to apply issue preclusion in response to a motion for summary judgment.

It is true that the cost of proceeding to summary judgment can be onerous. ⁿ²⁶⁵ While the costs would be recoverable through the fee-shifting provision discussed above, the out-of-pocket expense may be too great for a small party to bear. But when a party attempts to reclaim a generic mark, the burden at summary judgment falls on that party to bring competent evidence showing that the mark is not generic. ⁿ²⁶⁶ The party making purportedly generic use has no obligation to show that the mark remains generic, and the mere fact that a plaintiff has enough new evidence to avoid the changed-circumstances preclusion barrier does not guarantee victory at summary judgment. If the plaintiff cannot show change, the only costs that the party making generic use of the term will incur are the costs of discovery and of preparing and filing a summary judgment motion under Rule 56. ⁿ²⁶⁷ On the whole, then, the cost of litigating the case to summary judgment - when preclusion might be applied - will be minimal in the context of an abusive action. ⁿ²⁶⁸ If the party [*516] bringing suit can come up with competent survey evidence to support its point - which is likely not difficult - the defendant has the option to commission its own survey (a short-term expense that may be alleviated in part by fee-shifting). And if, viewing the evidence in the light most favorable to the nonmoving party, the plaintiff's survey does appear to show that the term is not generic, the possibility that the term has actually been reclaimed is worth the expense to the defendant of going to trial.

Only the truly contested cases, then, will require the full expense of trial. It is possible that, in some cases, a small firm with a meritorious defense will be forced to abandon litigation (or accept an unfavorable settlement) for want of financing. That a party might not be able to fully finance its litigation is a risk inherent in the American legal system - a system that forces even victorious parties to pay their own expenses necessarily burdens those with few resources. ⁿ²⁶⁹ But because of the nature of the evidentiary burdens at the summary judgment stage and the disincentive provided by the fee-shifting provisions, nonmeritorious cases are unlikely. Weighed against the broad social benefits that will accrue from allowing the possibility of reprotection, this is a cost worth bearing.

Conclusion

A finding of genericness ought not to be the final word in the life of a mark. If a generic term falls into disuse and primary significance can be reestablished, society benefits from the term's reprotection as a trademark. In such a case, issue preclusion ought not to be a bar to reprotection. Proper incentives and a reduction of abusive litigation can instead be achieved through the use of one-way fee-shifting. Through this mechanism, society can take advantage of the stock of disused formerly generic terms without risking anticompetitive behavior by dominant market players.

n44. Landes and Posner, *The Economic Structure of Intellectual Property Law* at 186 (cited in note 15).

n45. In this way, trademarks allow firms to charge higher nominal prices. For example, say Tide (a company with a strong trademark) can sell its detergent for \$ 5. Consumers know what they are getting when they buy Tide, so search costs are low - a look at the bottle and the name tells consumers what they need to know. A company with no trademark would have to provide more information about the product. This increases search costs. That company therefore cannot succeed in the market if it charges \$ 5: Tide's all-in price to the consumer is (\$ 5 + X), where X is the search cost, while the unbranded detergent costs (\$ 5 + some multiple of X). The company selling unbranded detergent must lower its nominal price to present the same all-in price to the consumer.

n266. See *Celotex Corp v Catrett*, 477 US 317, 331 (1986) (Brennan dissenting) ("The burden of production imposed by Rule 56 requires the moving party to make a prima facie showing that it is entitled to summary judgment.").

n267. See FRCP 56(c)(1)(B).

n268. It is true that if the costs of proceeding to summary judgment are small, the deterrent effect provided by fee-shifting will also be small. But in all cases, fee-shifting will increase the expected cost of a suit, diminishing the incentive to bring it. Without fee-shifting, the expected cost to the plaintiff would be: $(y \times \text{value of winning}) - ((1-y) \times \text{plaintiff's cost of losing})$, where y is the percentage chance of victory. With fee-shifting, the expected cost moves to $(y \times \text{value of winning}) - ((1-y) \times (\text{plaintiff's cost of losing} + \text{defendant's litigation expenses}))$. In any given case, the addition of the defendant's litigation expenses lowers the total expected value of the lawsuit. Attorneys Mark Liang and Brian Berliner present a more sophisticated model of litigation incentives in a one-way-fee-shifting system. See Liang and Berliner, 18 Va J L & Tech at 96-99 (cited in note 240).

PORTLAND DIVISION**

2012 U.S. Dist. LEXIS 153434

**October 25, 2012, Decided
October 25, 2012, Filed**

PRIOR HISTORY: Coach, Inc. v. Siskiyou Buckle Co., 2012 U.S. Dist. LEXIS 113665 (D. Or., Aug. 10, 2012)

CORE TERMS: new trial, matter of law, jury's award, infringement, equitable, renewed, renew, jury to find, jury instructions, legally sufficient, evidentiary basis, miscarriage of justice, notice requirement, actual damages, reconsideration, speculation, reputation, favorable, nonmoving, excessive, notice, chain, attorney's fees, trademark, catalog

COUNSEL: [*1] For Plaintiffs: Christopher E. Hawk, Gordon & Rees LLP, Portland, OR; Brent H. Blakely, Blakely Law Group, Hollywood, CA.

For Defendant: Donald A. Bick, Donald A. Bick, P.C., Eugene, OR.

JUDGES: MARCO A. HERNANDEZ, United States District Judge.

OPINION BY: MARCO A. HERNANDEZ

OPINION

OPINION & ORDER

HERNANDEZ, District Judge:

On June 7, 2012, after a two-day trial, the jury awarded \$75,000 to Plaintiffs Coach, Inc. and Coach Services, Inc. on its trademark infringement claim against Defendant Siskiyou Buckle Co., Inc. Defendant renewed his motion for judgment as a matter of law on Plaintiffs' third claim for false designation of origin and fifth claim for common law unfair competition. Dkt. #100, 101. I denied both motions. August 10, 2012 Op. & Order (Dkt. #109). Judgment was entered on August 10, 2012. Defendant now renews again his motion for judgment as a matter of law, or in the alternative, moves for a new trial. Dkt. #112. I deny the motion.

STANDARDS

I. Judgment as a Matter of Law

In analyzing a motion for judgment as a matter of law ("JMOL"), the evidence must be viewed in the light most favorable to the nonmoving party, and all reasonable inferences must be drawn in favor of that party. *Horphag Research, Ltd. v. Pellegrini*, 337 F.3d 1036, 1040 (9th Cir. 2003). [*2] To grant a motion for JMOL, the court must find "no legally sufficient evidentiary basis for a reasonable jury to find" in favor of the nonmoving party. Fed. R. Civ. P. 50(a)(1).

A JMOL is proper when the evidence permits only one reasonable conclusion and the conclusion is contrary to that reached by the jury. *Ostad v. Or. Health Scis. Univ.*, 327 F.3d 876, 881 (9th Cir. 2003). The court may not substitute its view of the evidence for that of the jury. *Costa v. Desert Palace, Inc.*, 299 F.3d 838, 859 (9th Cir. 2002), *aff'd*, 539 U.S. 90, 123 S. Ct. 2148, 156 L. Ed. 2d 84 (2003). The court is not permitted to make credibility determinations and it may not weigh the evidence. *Id.* Additionally, as the Supreme Court notes, the court must "disregard all evidence favorable to the moving party that the jury is not required to believe." *Reeves v. Sanderson Plumbing Prods., Inc.*, 530 U.S. 133, 151, 120 S. Ct. 2097, 147 L. Ed. 2d 105 (2000).

Under Rule 50(b), a party who has made a motion for JMOL at the close of all the evidence may renew the motion after entry of judgment. Fed. R. Civ. P. 50(b). However, "[a] party cannot raise arguments in its post-trial motion for judgment as a matter of law under Rule 50(b) that it did not raise in its pre-verdict Rule 50(a) [*3] motion." *Freund v. Nycomed Amersham*, 347 F.3d 752, 761 (9th Cir. 2003).

II. New Trial

The court may grant a new trial "on all or some of the issues-and to any party . . . after a jury trial, for any reason for which a new trial has heretofore been granted in an action at law in federal court[.]" Fed. R. Civ. P. 59(a)(1)(A).

Historically recognized grounds include, but are not limited to, claims that the verdict is against the weight of the evidence, that the damages are excessive, or that, for other reasons, the trial was not fair to the party moving. We have held that the trial court may grant a new trial only if the verdict is contrary to the clear weight of the evidence, is based upon false or perjurious evidence, or to prevent a miscarriage of justice.

Molski v. M.J. Cable, Inc., 481 F.3d 724, 729 (9th Cir. 2007) (citation and internal quotation marks omitted). Erroneous jury instructions, as well as the failure to give adequate instructions, may be the basis for a new trial under Rule 59(a). *Murphy v. City of Long Beach*, 914 F.2d 183, 187 (9th Cir. 1990). The trial court has discretion in deciding whether to grant a new trial. *Freund v. Nycomed Amersham*, 347 F.3d 752, 764 n.13 (9th Cir. 2003).

DISCUSSION

I. [*4] Judgment as a Matter of Law

Under Rule 50, Defendant previously renewed his motions for JMOL on July 2, 2012. The motions were denied and judgment was entered in favor of Plaintiff. Defendant now *renews for a second time* his motion for JMOL, also under Rule 50. Defendant raises several issues, including reconsideration of the court's ruling regarding the notice requirement under 15 U.S.C. § 1111, whether Defendant's profits may be considered when there is no willful infringement, the sufficiency of evidence regarding actual confusion, and reducing the jury's award of damages by using the court's discretion.

I have already ruled on the notice requirement issue that was raised in Defendant's previous renewed motion for JMOL. Aug. 10, 2012 Op. & Order, 4. I decline to reconsider my ruling, and moreover, Rule 50 is not the proper rule under which to request reconsideration.¹ As for the other issues that Defendant raises, Defendant did not move for JMOL on these issues before or after the verdict. Defendant has waived these arguments. *Freund*, 347 F.3d at 761.

¹ To the extent that Defendant argues that I mischaracterized his arguments, it does not change my conclusion that there was a legally [*5]

sufficient evidentiary basis for a reasonable jury to find in favor of Plaintiff on the notice issue.

II. New Trial

In the alternative, Defendant moves for a new trial or remittitur to reduce the jury's award of damages. Defendant argues that a new trial is warranted because "the verdict is contrary to the clear weight of the evidence, is based on evidence which is false, ... and is necessary to prevent a miscarriage of justice." Def.'s Memo. Supp. Mot. JMOL and New Tr. ("Def.'s Memo."), 26. I am not persuaded that the verdict is contrary to the clear weight of the evidence. Plaintiff introduced evidence of its product catalogs that showed products featuring the CC mark and the notice of registration towards the back of the catalog. See, e.g., Tr. Exs. 16, 17, 18, 20. Viewing the trial exhibits, I do not agree with Defendant's argument that Mr. Lau's testimony is false.

Defendant further argues that the jury award was based on "speculation or guesswork", that "the court must review the verdict given the equitable considerations" in determining damages, that "based on equitable principles the award must be either nothing, or at least reduced", and that Defendant has not had the opportunity [*6] to present evidence of "equitable matters." Def.'s Memo., 27-29. First, Defendant has not explained how the jury award is based on speculation. The jury was instructed to calculate damages based on actual damages and Defendant's profits. Jury Instructions (Dkt. #87), 9-10. For actual damages, the jury was allowed to consider

a) the injury to the Plaintiff's reputation; b) the injury to Plaintiff's goodwill, including injury to the Plaintiff's general business reputation; c) the lost profits that the Plaintiff would have earned but for the Defendant's infringement. Profit is determined by deducting all expenses from gross revenue; d) the expense of preventing customers from being deceived; and e) the cost of future corrective advertising reasonably required to correct any public confusion caused by the infringement.

Id. There was also evidence that Defendant sold approximately 85,000 key chains for 75 cents each and that each key chain cost 32 cents for Defendant. Tr. 1032-33. Considering all the evidence in the trial record, substantial evidence supports the jury's award in this case. I do not consider the \$75,000 jury award to be excessive and decline to exercise my discretion under [*7] 15 U.S.C. § 1117 to reduce the jury award.

Finally, Defendant accuses Plaintiff of "trademark bullying" and requests attorney's fees. Def.'s Memo., 30. Defendant does not cite to any persuasive authority in support of this argument, nor did he prevail in this case. The request for attorney's fees is denied.

CONCLUSION

Based on the foregoing, Defendant's motion for judgment as a matter of law or in the alternative, a new trial (#112) is denied.

IT IS SO ORDERED.

Dated this day 25 of October, 2012.

NOTE: The Anticybersquatting Consumer Protection Act and the Uniform Domain Name Dispute Resolution Policy:
The First Decade: Looking Back and Adapting Forward

NAME: Tenesa S. Scaturro*

BIO: * William S. Boyd School of Law, J.D. Candidate May 2011. My deepest thanks to John L. Krieger, Professor Mary LaFrance, Ian Ballon, and the Nevada Law Journal Editorial Board.

LEXISNEXIS SUMMARY:

... Ten years after the enactment of the ACPA and UDRP, these important statutory and regulatory frameworks no longer adequately protect consumers and trademark owners dealing with new issues such as social-squatting, private domain name registration services, registrar liability, international registrars, and reverse domain name hijacking and are ill-equipped to address future issues. ... The court reasoned that confusion was likely because the domain name contains Cardservice's exact mark, both parties use the Internet to provide services, and Cardservice's customers are likely to assume that the domain name belongs to Cardservice, especially upon seeing similar services at McGee's website. ... Specifically, Congress noted that the FTDA no longer adequately addressed cybersquatting: "While the FTDA has been useful in pursuing cybersquatters, cybersquatters have become increasingly sophisticated as the case law has developed and now take the necessary precautions to insulate themselves from liability." ... To help the courts determine what constitutes bad faith under the ACPA, Congress provided a non-exhaustive list of factors: (1) the registrant has no apparent trademark rights in the domain name, (2) the domain name does not contain any of the registrant's legal names, (3) the registrant has not made any (a) bona fide non-commercial or (b) fair use of the domain name, (4) the registrant has used the domain name in a commercial manner, (5) the trademark was distinctive or famous at the time the registrant registered the domain name, (6) the registrant has registered other domain names containing the trademarks of others, and (7) the registrant has offered the domain name for sale.

"The only constant is change, continuing change, inevitable change, which is the dominant factor in society today. No sensible decision can be made any longer without taking into account not only the world as it is, but the world as it will be."

TEXT:

[*877]

I. Introduction

The telephone book has gone the way of the Betamaxⁿ² and the Walkman.ⁿ³ Technology forces an almost continuous evolution of products and services - the latest and greatest quickly becomes a relic. Today, instead of the telephone book, there is yellowpages.com; instead of the Betamax, we have Blu-ray;ⁿ⁴ instead of the Walkman, we have the iPod.ⁿ⁵ Technology, and more specifically, the Internet, has forever changed the way consumers live their lives. Indeed, consumers increasingly use technology to make their lives easier - using the convenience of the Internet to purchase items previously bought at brick-and-mortar stores. Undeniably, the Internet plays a huge role in our everyday [*878] lives: today, there are more than 1.5 billion web usersⁿ⁶ and more than 192 million domain names registered.ⁿ⁷

Most businesses rely on the Internet, too, to sell their products or services or as a method of advertising and providing information to consumers.ⁿ⁸ Businesses tend to use their corporate, product, or service trademarks in domain names to create a strong presence on the Internet and to help consumers find them more easily.ⁿ⁹ They have been successful: in 2009, online retail sales accounted for approximately \$ 155 billion and are projected to grow to \$ 250 billion dollars by 2014.ⁿ¹⁰ Perhaps even more staggering: it is estimated that Internet research influenced \$ 917 billion of overall retail sales.ⁿ¹¹ Globally, this revenue stream is so important that in 2010, businesses paid an estimated \$ 29.8 billion for paid search advertising.ⁿ¹²

This influx of consumer and business use of the Internet has led to some interesting legal issues, including copyright infringement, phishing, spam, cybersquatting, and much more. As the Internet and related technology constantly evolve and rapidly change, the law governing this area is slow to adapt.ⁿ¹³ In 1999, Congress took steps to protect online consumers from deceptive practices of cybersquatters by enacting the Anticybersquatting Consumer Protection Act (ACPA). Also in 1999, the Internet Corporation for Assigned Names and Numbers (ICANN) promulgated a regulatory structure for alternative dispute resolution for cybersquatting, known as the Uniform Domain Name Dispute Resolution Policy (UDRP).

Ten years after the enactment of the ACPA and UDRP, these important statutory and regulatory frameworks no longer adequately protect consumers and trademark owners dealing with new issues such as social-squatting, private domain name registration services, registrar liability, international registrars, and reverse domain name hijacking and are ill-equipped to address future issues.

Part II of this Note provides an overview and background information about domain names and cybersquatting. Part III discusses pre-ACPA and pre-UDRP cases and the reasons for enacting these new legal frameworks. Part IV [*879] discusses the enactment of ACPA and UDRP, the first cases decided under the new legal frameworks, and compares the ACPA and UDRP. Part V discusses new Internet-related issues and shows how the ACPA and UDRP are not equipped to handle these needs. Finally, Part VI offers suggestions for the future of cyberlaw.

II. Looking Back: The Basics of Domain Names and Cybersquatting

A. Domain Name Basics

The Internet Corporation for Assigned Names and Numbers (ICANN)ⁿ¹⁴ is a non-profit organization responsible for coordinating domain names and their associated identifiers.ⁿ¹⁵ It also coordinates related technological policy development, among other things.ⁿ¹⁶ Domain names are unique, similar to street addresses or telephone numbers,ⁿ¹⁷ and are available on a "first-come, first-served basis."ⁿ¹⁸ Domain names primarily identify the owner of the website,ⁿ¹⁹ and they primarily consist of two parts: the second-level domain and the top-level domain.ⁿ²⁰ The second-level domain is a term or series of termsⁿ²¹ - for example, "google," - and the generic top-level domain (also known as gTLDⁿ²² or TLD) is the enterprise identifier - for example, ".com" for commercial or ".gov" for government.ⁿ²³

Each TLD has a registry associated with it that is responsible for maintaining the TLD's database.ⁿ²⁴ In turn, each registry has numerous registrars that register domain names.ⁿ²⁵ A person seeking to register a domain name (known as

the registrant) visits the website of the domain name registrar, completes the domain-name registration information, pays a registration fee, and is the proud new owner of a domain name.ⁿ²⁶ The information provided by the registrant to [*880] the registrar is collected into a publically accessible database, known as the "WhoIs" record.ⁿ²⁷

ICANN requires each registrar to maintain eight pieces of information in the WhoIs record, including the registrant's name, postal address, e-mail addresses, telephone number, the creation date of registration, and the expiration date of registration, among other information.ⁿ²⁸ The WhoIs record allows the public to determine the contact information for the registrant in order to communicate about legal, business, or technical issues.ⁿ²⁹ Some domain name registrars, such as GoDaddy.com and eNom, also provide private registration services through affiliate companies, which shield the registrant's information from public display.ⁿ³⁰

B. Cybersquatter Basics

Cybersquatters are individuals or companies that register domain names containing the trademarks of others for the purpose of profiting from the goodwill associated with the trademark, or by selling the domain name to the trademark owner or its competitors.ⁿ³¹ Aside from this standard definition of cybersquatting, the practice has evolved to include at least three other categories: the "cyberpirate," the "typosquatter," and the "pseudo-cybersquatter."ⁿ³² The cyberpirate, rather than intending to resell a domain name to the trademark owner or highest bidder, uses the notoriety and goodwill of the trademark to drive traffic to the website.ⁿ³³ The cyberpirate earns revenue by either selling advertising space on the website or generates fees for diverting traffic to third-party websites.ⁿ³⁴

The typosquatter registers common misspellings of trademarks to route the web user who misspells their intended domain name to another website.ⁿ³⁵ For example, typosquatters looking to prey on web users seeking information on Hewlett-Packard, Harry Potter, Looney Tunes, and Scooby Doo have registered <hewlittpackard.com>,ⁿ³⁶ <harypotter.com>, <looneytoonies.com>, and <scobydoo.com>.ⁿ³⁷ Typosquatters will typically link these domain names to websites containing Google ads or other third-party sponsored ads, which web [*881] users will inadvertently click on and generate revenue for the typosquatter.ⁿ³⁸ Finally, the pseudo-cybersquatter merely registers the domain name without a website and does not offer the domain name for sale.ⁿ³⁹

III. Technology and Trademark Law Converge: Pre-ACPA Tools to Combat Cybersquatters

Prior to the enactment of the ACPA, courts and litigants relied on the Trademark Act of 1946 (the Lanham Act) and the Federal Trademark Dilution Act (FTDA) to deal with cybersquatters.ⁿ⁴⁰ Although both the Lanham Act and FTDA were useful tools in fighting cybersquatters, neither statute adequately addressed domain names.

A. Trademark Infringement under The Lanham Act

The Lanham Act provides a remedy for trademark infringement when a person uses, without permission, a registered trademark to advertise or sell goods and services in a way that is likely to cause consumer confusion.ⁿ⁴¹ To succeed on a trademark infringement claim under the Lanham Act, the trademark owner must prove that there is a likelihood of confusion between the trademark and the allegedly infringing trademark. To determine whether a likelihood of confusion exists, courts examine (1) the strength or distinctiveness of the mark, (2) the similarity of the marks, (3) the similarity of the goods [*882] and services the marks identify, (4) the similarity of the facilities the parties use in their businesses, (5) the similarity of advertising used by the parties, (6) the defendant's intent, and (7) whether there is actual confusion.ⁿ⁴²

Cardservice International v. McGeeⁿ⁴³ is an early example of the application of trademark infringement principles to domain name registration. There, plaintiff Cardservice International, a provider of credit-processing services, owned federal trademark registrations for "Cardservice International."ⁿ⁴⁴ McGee also provided credit-processing services through his sole proprietorship.ⁿ⁴⁵ McGee registered the <cardservice.com> domain name, which he used to advertise merchant credit-card-processing services.ⁿ⁴⁶ Cardservice filed suit against McGee, alleging trademark infringement,

unfair competition, common law unfair competition, misappropriation, and unjust enrichment.ⁿ⁴⁷ McGee made the preliminary argument that he was entitled to keep the domain name because domains are issued on a first come, first served basis.ⁿ⁴⁸ The court rejected his argument, stating that the registrar's policy is "subject to ... liability ... provided for by federal law."ⁿ⁴⁹

The court analyzed the likelihood-of-confusion factors and found that McGee's <cardservice.com> domain name was likely to confuse the consuming public.ⁿ⁵⁰ The court reasoned that confusion was likely because the domain name contains Cardservice's exact mark, both parties use the Internet to provide services, and Cardservice's customers are likely to assume that the <cardservice.com> domain name belongs to Cardservice, especially upon seeing similar services at McGee's website.ⁿ⁵¹

Courts have also found a likelihood of confusion in domains names such as <victoriassecrets.net> (confusingly similar to VICTORIA'S SECRET),ⁿ⁵² <playmatelive.com> (confusingly similar to PLAYMATE),ⁿ⁵³ and <audisport.com> (confusingly similar to AUDI).ⁿ⁵⁴

B. Trademark Dilution under the FTDA

Another tool in the trademark owner's pre-ACPA and pre-UDRP arsenal was a claim for dilution under the FTDA. Congress had domain names in mind when it enacted the FTDA.ⁿ⁵⁵ Trademark dilution begins with the idea that [*883] trademarks, in addition to identifying the source of goods, also provide consumers with information about the quality of those goods.ⁿ⁵⁶ For example, consumers purchasing products bearing the VICTORIA'S SECRET trademark understand the quality they will receive based upon their existing knowledge of the products and the extensive advertising by Victoria's Secret.

To succeed on a dilution claim under the FTDA, the trademark owner must prove: (1) the trademark at issue is famous, (2) the defendant is making commercial use of the trademark, (3) the defendant's use of the trademark began after the trademark became famous, and (4) the defendant's use dilutes the quality of the mark.ⁿ⁵⁷ Dilution "lessens the capacity of a famous mark to identify and distinguish goods or services, regardless of the presence or absence of (1) competition between the owner of the famous mark and other parties, or (2) likelihood of confusion, mistake, or deception."ⁿ⁵⁸ Examples of trademarks that are famous for the purpose of trademark dilution under the FTDA include BUDWEISER,ⁿ⁵⁹ TOYS "R" US,ⁿ⁶⁰ and PORSCHE.ⁿ⁶¹

Prior to the enactment of the Anticybersquatting Consumer Protection Act, the FTDA was a favored vehicle for relief in domain name cases because it does not require the showing of likelihood of confusion that is required under the Lanham Act.ⁿ⁶² However, remedies under the Lanham Act and the FTDA were uncertain and often very expensive to prosecute.ⁿ⁶³ Although Congress had domain names in mind when it enacted the FTDA,ⁿ⁶⁴ cybersquatters became more sophisticated and tailored their behavior to find refuge in loopholes of the FTDA.ⁿ⁶⁵

Dennis Toeppen is one notorious cybersquatter who attempted to exploit a potential loophole in the FTDA. Toeppen registered more than one hundred domain names, which contained trademarks such as Delta, Neiman Marcus, Eddie Bauer, and Panavision.ⁿ⁶⁶ Toeppen then attempted to sell the domain names to the trademark owners at exorbitant prices.ⁿ⁶⁷ One such case was Panavision International, L.P. v. Toeppen.ⁿ⁶⁸ There, Toeppen registered <panavision.com> and linked the domain name to a website containing photos of the City of Pana, Illinois.ⁿ⁶⁹ When Panavision notified Toeppen that he was [*884] violating Panavision's trademark rights, Toeppen offered to sell the domain name for \$ 13,000 with an agreement that he would refrain from registering other domain names containing Panavision's trademarks.ⁿ⁷⁰ When Panavision declined Toeppen's offer, Toeppen registered another domain name containing one of Panavision's trademarks.ⁿ⁷¹ Panavision filed suit against Toeppen alleging dilution under the FTDA and related state law claims.ⁿ⁷² Toeppen argued that the mere registration of a domain name did not constitute "commercial use," as required under the FTDA.ⁿ⁷³ The court found that Toeppen's registration of a domain name, combined with offering the domain name for sale to the trademark owner, constituted "commercial use" under the FTDA.ⁿ⁷⁴ Some commentators argue that this holding stretched the idea of what constituted "commercial use" too far,

rendering the FTDA as the catch-all statute for misuse of trademarks. ⁿ⁷⁵

Panavision highlighted a major flaw with the FTDA. Absent "commercial use" of a domain name, a cybersquatter merely registers a domain name and sits on this "cyber realty," precluding the trademark owner from using domain names containing its trademarks. ⁿ⁷⁶ Stated another way, a cybersquatter could avoid liability under the FTDA by registering a domain name containing a famous trademark and waiting for the trademark owner to come calling with a purchase price. ⁿ⁷⁷ This square peg, round-hole application of the FTDA against cyberpirates eventually gave way to the enactment of the ACPA.

IV. Evolution of Technology and Cybersquatting

Congress recognized the flaws in the Federal Trademark Dilution Act highlighted in Panavision. Specifically, Congress noted that the FTDA no longer adequately addressed cybersquatting: "While the [FTDA] has been useful in pursuing cybersquatters, cybersquatters have become increasingly sophisticated as the case law has developed and now take the necessary precautions to insulate themselves from liability." ⁿ⁷⁸ Congress also noted that cyberpiracy, which was becoming very common, could negatively affect businesses in a number of ways. ⁿ⁷⁹ For example, a cybersquatter could register a domain name containing a trademark and link that domain name to a website offering illegal [*885] or offensive material, which would tend to tarnish the trademark. ⁿ⁸⁰ Further, a cybersquatter causes "lost business opportunities" ⁿ⁸¹ for the trademark owner from the registration of the domain name because the trademark holder is unable to use its trademarks that it has spent substantial resources advertising. Moreover, some cybersquatters registered domain names merely for the purpose of making a profit by selling the domain names to the trademark owners. ⁿ⁸² The culmination of these new issues gave way to Congress' enactment of the ACPA and ICANN's implementation of the UDRP as an alternative dispute resolution to address cybersquatting.

A. The ACPA

On November 29, 1999, President Clinton signed the ACPA into law, which provides liability for cybersquatting when a person who, with a bad faith intent to profit, registers, traffics in, or uses a famous or distinctive trademark as a domain name. ⁿ⁸³

Four elements must be met to prove cybersquatting under the ACPA: (1) the registrant has a bad faith intent to profit, (2) the registrant registers, traffics in, or uses a domain name, (3) the domain name is famous or distinctive, and (4) the domain name is identical or confusingly similar, or in the case of a famous mark, dilutive. ⁿ⁸⁴

1. Understanding the Elements

Under the first element of the ACPA, the domain name registrant must have a bad faith intent to profit to be liable for cybersquatting. To help the courts determine what constitutes bad faith under the ACPA, Congress provided a non-exhaustive list of factors: (1) the registrant has no apparent trademark rights in the domain name, (2) the domain name does not contain any of the registrant's legal names, (3) the registrant has not made any (a) bona fide non-commercial or (b) fair use of the domain name, (4) the registrant has used [*886] the domain name in a commercial manner, (5) the trademark was distinctive or famous at the time the registrant registered the domain name, (6) the registrant has registered other domain names containing the trademarks of others, and (7) the registrant has offered the domain name for sale. ⁿ⁸⁵

Although the rights of trademark owners were a significant concern in enacting the ACPA, Congress intended there to be a balance between the property interests of trademark owners and the rights of web users to lawfully use trademarks for "comparative advertising, comment, criticism, parody, news reporting, [and] fair use," among other things. ⁿ⁸⁶ Therefore, Congress provided a safe harbor exception for domain name registrants that "believe[] and had reasonable grounds to believe that the use of the domain name was a fair use or otherwise lawful." ⁿ⁸⁷ Courts have found that "otherwise lawful" uses of domain names include so-called "gripe sites" ⁿ⁸⁸ and parody. ⁿ⁸⁹ However,

because most domain name registrants could conjure up lawful reasons for their use of domain names, the registrant's reasonable belief requires more than just plausibility. ⁿ⁹⁰ As one court noted, "All but the most blatant cybersquatters will be able to put forth at least some lawful motives for their behavior. To hold that all such individuals may qualify for the safe harbor would frustrate Congress' purpose by artificially limiting the statute's reach." ⁿ⁹¹

Under the second ACPA element, a registrant must register, traffic in, or use a domain name. Although undefined by the ACPA, the registering of a domain name appears self-explanatory on its face. Similarly, use is undefined within the ACPA. However, traffics in has challenged courts interpreting this provision of the ACPA. ⁿ⁹² The ACPA provides an illustrative definition of what this entails: "'Traffics in' refers to transactions that include, but are not limited to, sales, purchases, loans, pledges, licenses, exchanges of currency, and any other transfer for consideration or receipt in exchange for consideration." ⁿ⁹³ One court has interpreted this language to mean "a direct transfer or receipt of ownership interest in a domain name." ⁿ⁹⁴

Under the third ACPA element, the trademark contained within the domain name must be famous or distinctive. A trademark is famous "if it is [*887] widely recognized by the general consuming public ... as a designation of source of the goods or services of the mark's owner." ⁿ⁹⁵ Among the factors that courts can consider to determine whether a trademark is famous are (1) the duration, extent, and geographic reach of advertising; (2) the amount, volume, and geographic extent of sales; and (3) the extent of actual recognition of the trademark. ⁿ⁹⁶ A trademark is distinctive if it is either inherently distinctive or has acquired secondary meaning, that is to say that the consuming public "associates the mark with a particular source." ⁿ⁹⁷

Under the fourth, and final, ACPA element, the domain name must contain a mark that is identical or confusingly similar to the trademark owner's mark or, in the case of a famous mark, dilutes the trademark owner's mark. This is a narrower test than the likelihood-of-confusion test for trademark infringement under the Lanham Act. ⁿ⁹⁸ To determine whether a domain name is confusingly similar, all that is required is a simple comparison to the trademark at issue. ⁿ⁹⁹ Courts will find a domain name is confusingly similar to a trademark if "consumers might think that [the domain name] is used, approved, or permitted by the mark holder." ⁿ¹⁰⁰

It is irrelevant that a consumer can resolve any confusion by visiting the website. ⁿ¹⁰¹ Minor differences, such as the inclusion or exclusion of a hyphen, the addition of minor or generic words, or typographical errors between the domain name and the trademark are also irrelevant. ⁿ¹⁰² Indeed, "unless words or letters added to the plaintiff's mark within the domain name clearly distinguish it from the plaintiff's usage, allegations that a domain name incorporates a protected mark generally will suffice to satisfy the 'identical or confusingly similar to' requirement." ⁿ¹⁰³ Examples of domain names that have been found to be confusingly similar to trademarks include <4fordparts.com> (confusingly similar to FORD), <jaguarcenter.com> (confusingly similar to JAGUAR), and <volvoguy.com> (confusingly similar to VOLVO). ⁿ¹⁰⁴

2. First Cases under the ACPA

Sporty's Farm, LLC v. Sportsman's Market, Inc. ⁿ¹⁰⁵ was the first appellate court decision interpreting the newly enacted ACPA and analyzing the illustrative statutory bad faith factors. ⁿ¹⁰⁶ Sportsman's is a well-known mail-order catalog [*888] company that caters to aviation enthusiasts and pilots. ⁿ¹⁰⁷ Sportsman's began using the logo "sporty" in the 1960s and registered the trademark with the United States Patent and Trademark Office. ⁿ¹⁰⁸ In 1995, Arthur Hollander, a pilot who received Sportsman's catalogs, registered the <sportys.com> domain name. ⁿ¹⁰⁹ In 1996, Hollander formed a Christmas tree company that he named Sporty's Farm and began advertising this business on the <sportys.com> website. ⁿ¹¹⁰ In March 1996, Sporty's Farm filed a declaratory relief action and Sportsman's countersued for trademark infringement, dilution, and unfair competition. ⁿ¹¹¹ Congress enacted the ACPA while the case was pending. ⁿ¹¹²

The Second Circuit noted that the "unique circumstances of the case ... do not fit neatly into the [ACPA] factors" ⁿ¹¹³ but that Congress allowed courts to consider other factors to determine bad faith. ⁿ¹¹⁴ The Second Circuit reasoned

that Sporty's Farm had a bad-faith intent to profit because Hollander was fully aware of the "sporty" mark because he received the Sportsman's catalog bearing that name and created another unrelated company to use the <sportys.com> domain name after the lawsuit was initiated to attempt to shield himself from liability.ⁿ¹¹⁵ Additionally, the court discredited Sporty Farms' assertion that the domain name (and thus the corporate name) was selected to pay tribute to a childhood dog, Spotty.ⁿ¹¹⁶ The court found that there was "overwhelming evidence" that Sporty's Farm had acted with a bad faith intent to profit from registration of the <sportys.com> domain name.ⁿ¹¹⁷

Shields v. Zuccariniⁿ¹¹⁸ was the first case that held typosquatting is a violation of the ACPA. There, Shields was a cartoon artist who drew "Joe Cartoon," which he licensed and marketed for use on mugs, t-shirts, and other items sold at gift stores nationwide for fifteen years.ⁿ¹¹⁹ Shields also owned the <joecartoon.com> domain name that received approximately seven hundred thousand visitors per month.ⁿ¹²⁰ Zuccarini, a wholesaler of domain names,ⁿ¹²¹ registered <joescartoon.com>, <joecarton.com>, <joescartons.com>, <joescartoons.com>, and <cartoonjoe.com>.ⁿ¹²² Zuccarini linked these domain names to websites advertising other websites and "mousetrapped"ⁿ¹²³ web users into clicking a succession of advertisements.ⁿ¹²⁴ Mousetrapping occurs when a [*889] web user reaches an unintended website and is inundated with a plethora of "pop up"ⁿ¹²⁵ or "pop under"ⁿ¹²⁶ ads. These "pop up" and "pop under" ads make it difficult for web users to browse away from the websites they were trying to access to stop the advertisements from appearing.ⁿ¹²⁷

Zuccarini generated revenue from each click on an advertiser's ad,ⁿ¹²⁸ resulting in average yearly revenue of almost \$ 1 million.ⁿ¹²⁹ Shortly after Shields filed suit, Zuccarini changed the websites to reflect a political commentary criticizing the violent nature of Shields's cartoon.ⁿ¹³⁰ Zuccarini claimed his post-service conduct fell under the safe harbor provision of the ACPAⁿ¹³¹ because he reasonably believed his political commentary was lawful.ⁿ¹³² The court rejected his safe harbor defense as "incredible" because Zuccarini changed the websites to reflect political commentary after being served with notice of the complaint.ⁿ¹³³ Zuccarini's argument was especially "incredible" in light of his owning thousands of domain names, including typographically misspelled domain names containing the names of celebrities such as Gwyneth Paltrow, Ricky Martin, and Britney Spears.ⁿ¹³⁴ The court enjoined Zuccarini from using the domain names pending litigation.ⁿ¹³⁵ Shields ultimately prevailed on a motion for summary judgment,ⁿ¹³⁶ which the court of appeals affirmed.ⁿ¹³⁷

Trademark holders are very concerned about typosquatters and engage in defensive domain name registration - registering domain names for the simple purpose of blocking typosquatters - to combat the problem.ⁿ¹³⁸ Overall, defensive domain name registrations cost businesses an estimated \$ 1.6 billion.ⁿ¹³⁹

[*890]

B. The UDRP

While Congress prepared to enact the ACPA, the U.S. government investigated the possibility of creating an alternative dispute resolution policy, the Uniform Domain Name Dispute Resolution Policy, to address cybersquatters. In 1999, the National Telecommunications and Information Administration (NTIA) requested that World Intellectual Property Organization (WIPO) conduct a study on domain name and trademark issues.ⁿ¹⁴⁰ WIPO completed the study, which included a suggestion of a uniform dispute resolution procedure for handling domain name issues.ⁿ¹⁴¹ The result was the Uniform Domain Name Dispute Resolution Policy (UDRP), which ICANN adopted on August 26, 1999, and implemented on October 24, 1999.ⁿ¹⁴² The UDRP is an alternative dispute resolution process and was created as an "effective, predictable alternative to court litigation for rights holders."ⁿ¹⁴³

One court explained that the UDRP "creates a contract-based scheme for addressing disputes between domain name registrants and third parties challenging the regulation and use of their domain names."ⁿ¹⁴⁴ Another court has described the UDRP as "an administrative alternative dispute resolution policy which creates a procedure specifically designed to provide a fast and cheap means for resolving domain name disputes."ⁿ¹⁴⁵ Indeed, the UDRP has become "the most important alternative dispute resolution procedure for domain names."ⁿ¹⁴⁶

ICANN, as the accreditation organization for domain name registrars, ⁿ¹⁴⁷ mandates that registrars, as a condition of accreditation, must require domain name registrants to adhere to the UDRP. ⁿ¹⁴⁸ Upon the registration or renewal of a domain name, the domain name registrant represents and warrants that

(a) the statements that [the registrant] made in [the] Registration Agreement are complete and accurate; (b) to [the registrant's] knowledge, the registration of the domain name will not infringe upon or otherwise violate the rights of any third party; (c) [the registrant is] not registering the domain name for an unlawful purpose; and (d) [the registrant] will not knowingly use the domain name in violation of any applicable [*891] laws or regulations. It is [the registrant's] responsibility to determine whether [the registrant's] domain name registration infringes or violates someone else's rights. ⁿ¹⁴⁹

1. Understanding the Elements

Under the UDRP, the complainant must prove three elements in order to warrant the transfer or cancellation of the domain name: ⁿ¹⁵⁰ (1) the domain name must be identical or confusingly similar to the complainant's trademark, (2) the domain name registrant has no legitimate interest in the domain name, and (3) the domain name has been registered and is being used in bad faith. ⁿ¹⁵¹ The UDRP provides an illustrative list of evidence of bad faith, including registration of a domain name for the purpose of selling it to the trademark owner or its competitor, having a pattern of registering domain names to prevent the trademark owner from doing so, registering domain names to disrupt the trademark owner's business, and intentionally attempting to cause consumer confusion. ⁿ¹⁵²

2. First Case under the UDRP

The first case decided under the newly enacted UDRP was *World Wrestling Federation Entertainment, Inc. v. Bosman*. ⁿ¹⁵³ There, Bosman registered the <worldwrestlingfederation.com> domain name, which incorporated World Wrestling Federation Entertainment's WORLD WRESTLING FEDERATION trademark. Three days after registering the domain name, Bosman e-mailed the World Wrestling Federation Entertainment (WWF) and offered to sell the domain name for \$ 1,000 dollars. In his e-mail, Bosman asserted that the payment was a fee for his time and money and that it would also serve as "consideration ... 'for the right of current ownership of the domain name.'" ⁿ¹⁵⁴ The WIPO panel did not hesitate to find that the domain name was identical or confusingly similar to WWF's trademark and that Bosman had no legitimate interest in the domain name. ⁿ¹⁵⁵ The panel instead focused its analysis on whether the domain name had been registered and used in bad faith. ⁿ¹⁵⁶

Although Bosman had registered the domain name and offered it for sale to WWF, Bosman did not develop a website for the domain name, and thus the panel questioned whether this would be enough to constitute bad faith use. The panel consulted the illustrative list of evidence of bad faith provided by WIPO, ⁿ¹⁵⁷ and determined that offering the domain name for sale constituted bad faith use. The panel concluded by stating that the WWF had no desire to engage in litigation with its fans and had "engaged in this proceeding ... to [*892] protect [WWF's] intellectual property interests while preserving the relationship between complainant and its fans at a minimal cost to all concerned." ⁿ¹⁵⁸ This alternative dispute resolution procedure is an important tool for trademark owners who wish to recover intellectual property rights while minimizing alienation of consumers and fans. ⁿ¹⁵⁹

C. Comparing the ACPA and the UDRP

Although not mutually exclusive, ⁿ¹⁶⁰ the ACPA and UDRP differ considerably in jurisdictional requirements, evidentiary requirements, availability and technical knowledge of the adjudicator, the cost and timing of proceedings,

and the remedies available.

1. Jurisdiction ⁿ¹⁶¹

Although generally quick and inexpensive, proceeding under the UDRP has a few drawbacks. First, a trademark owner must consent to jurisdiction in subsequent litigation where either the registrant or registrar of the domain name is located. ⁿ¹⁶² If the registrant files suit, jurisdiction may play a vital role in the proceedings where circuits are split on certain aspects of the law. ⁿ¹⁶³ This is especially problematic if the registrant or registry is located overseas, forcing the trademark owner to litigate in a foreign, and probably unfamiliar, court. ⁿ¹⁶⁴ Conversely, if the trademark owner files suit under the ACPA, as long as the registrant is subject to the court's jurisdiction, the trademark owner has its preference of jurisdiction. ⁿ¹⁶⁵

2. Evidentiary Requirements

As a practical matter, the type of cybersquatter and domain name infringement at issue is relevant to determine whether to proceed under the ACPA or the UDRP. Under the ACPA, a plaintiff must prove the registrant has a bad faith intent to profit from registering, using, or trafficking in a domain name. ⁿ¹⁶⁶ Under the UDRP, the claimant must prove bad faith registration and use of a domain name. Thus, if a plaintiff has difficulty proving bad faith intent to profit, but can easily prove bad faith, a UDRP action is preferable. ⁿ¹⁶⁷ The UDRP requires the registration and use of a domain name, whereas the ACPA requires use, registration or trafficking in a domain name. ⁿ¹⁶⁸ Both the UDRP [*893] and ACPA require a showing that the domain name is identical or confusingly similar. However, the ACPA has the added option of showing likelihood of dilution. ⁿ¹⁶⁹ Finally, the ACPA applies to famous or distinctive trademarks, whereas the UDRP applies to any trademark. ⁿ¹⁷⁰

3. Adjudicator

Currently, there are four ICANN-accredited arbitration organizations: the Asian Domain Name Dispute Resolution Centre, the National Arbitration Forum (NAF), WIPO, and the Czech Arbitration Court. ⁿ¹⁷¹ NAF and WIPO are the two main arbitration organizations for domain name disputes in the United States. Arbitrators, who are private attorneys that are typically experts in trademark law, oversee UDRP proceedings. ⁿ¹⁷² UDRP arbitrators generally have been favorable to trademark owners. ⁿ¹⁷³ In 2009, 1,759 domain name dispute cases were filed with NAF, ⁿ¹⁷⁴ while 2,107 were filed with WIPO. ⁿ¹⁷⁵ In 2009, 310 panelists from 46 countries handled the 2,107 domain name dispute cases filed with WIPO. ⁿ¹⁷⁶ Of those cases, 1,331 resulted in a transfer of the domain name to the complainant. ⁿ¹⁷⁷ A recent study reports that NAF has approximately 141 panelists and approximately 83 percent of cases conclude with the transfer of the domain name to the complainant. ⁿ¹⁷⁸

In contrast, ACPA suits are typically filed in federal court with a judge that might not have much, if any, knowledge of the specialized area of trademark law. ⁿ¹⁷⁹ Statistics on the success of ACPA lawsuits are difficult to locate but are likely have as little consistency and success as any other type of litigation.

4. Cost and Timing

There is a considerable disparity in the cost and timing of UDRP proceedings compared to an ACPA suit. UDRP proceedings, which include only a complaint and answer with no additional discovery or motion practice, typically resolve within six to twelve weeks of filing and typically are much less [*894] expensive than filing a federal lawsuit. ⁿ¹⁸⁰ The amount of time that a federal suit will take depends on whether the registrant appears and contests the complaint. As with other federal lawsuits, if the defendant does not respond at all, the plaintiff can seek entry of default judgment, which expedites the case and lessens the cost. ⁿ¹⁸¹ Default judgments are also common in UDRP proceedings, as one-third to one-half of domain name registrants simply do not respond to the complaint. ⁿ¹⁸²

5. Remedies

The ACPA and UDRP are not mutually exclusive.ⁿ¹⁸³ For example, the UDRP is non-binding, which means the parties involved can commence litigation under the ACPA either before or after the proceeding.ⁿ¹⁸⁴ As one court noted, "UDRP proceedings are structured specifically to permit the domain-name registrant two bites at the apple."ⁿ¹⁸⁵ The only remedy available under the UDRP is the cancellation or transfer of the domain name.ⁿ¹⁸⁶ By contrast, the remedies under the ACPA include injunctive relief;ⁿ¹⁸⁷ election of actual or statutory damages;ⁿ¹⁸⁸ the possibility of attorneys' fees;ⁿ¹⁸⁹ and forfeiture, cancellation, or transfer of the domain name.ⁿ¹⁹⁰ The ACPA also provides for in rem proceedings.ⁿ¹⁹¹

At first blush, the ACPA remedies seem very tantalizing, given the range of remedies and possibility of statutory damages and attorneys' fees, especially in comparison with the extremely limited remedy available under the UDRP. However, there are important caveats to most of the categories of remedies under the ACPA. First, most plaintiffs elect to receive statutory damages rather than actual damages. Statutory damages under the ACPA deter wrongful conduct and provide an adequate remedy for trademark owners.ⁿ¹⁹² The statutory damages provision of the ACPA provides:

In a case involving a violation of section 1125(d)(1) of this title, the plaintiff may elect, at any time before final judgment is rendered by the trial court, to recover, instead of actual damages and profits, an award of statutory damages in the amount of not less than \$ 1,000 and not more than \$ 100,000 per domain name, as the court considers just.ⁿ¹⁹³

[*895] In determining the amount of statutory damages, the court has wide discretion in the award amount and is restricted only by the statutory maximum and minimum.ⁿ¹⁹⁴ In assessing statutory damages, courts take into account the egregiousness of the cybersquatter, including whether the cybersquatter provided false or misleading registration information,ⁿ¹⁹⁵ whether the cybersquatter is a "serial cybersquatter" who has displayed a pattern of registering domain names containing the trademarks of others,ⁿ¹⁹⁶ and whether the cybersquatter's behavior demonstrates contempt for the court or judicial proceedings.ⁿ¹⁹⁷ A court of appeals will overturn a lower court's award of statutory damages only for an abuse of discretion.ⁿ¹⁹⁸ Moreover, because liability under the ACPA requires a finding of bad faith, damages are non-dischargeable in bankruptcy proceedings.ⁿ¹⁹⁹

Although permitted by statute, the court will award attorneys' fees only in exceptional cases.ⁿ²⁰⁰ However, a finding of "bad faith" does not necessarily mean that the defendant acted with the "malicious, fraudulent, willful or deliberate behavior necessary for an award of attorney fees" under the ACPA.ⁿ²⁰¹

V. New Issues ... or, the Times Are Still a Changin'

Some commentators argue that the ACPA has become a relic since the popularity of search engines such as Google gained widespread popularity.ⁿ²⁰² It is true that new issues have developed that the ACPA has been unable to answer. Among these new concerns are "social squatting," private domain name registration services, registrar liability for services that arguably fall outside of the registrar's duties, issues with international registrars, and reverse domain name hijacking.

A. Social Squatting

Trademark owners should be concerned about over the growing popularity of social networking websites and the increased opportunity for trademark misuse. In 2010, the average U.S.-based Internet user visited a social networking **[*896]** website, spending in excess of four hours per month on these websites.ⁿ²⁰³ February 2009 marked the first time social networking exceeded the use of web-based e-mail.ⁿ²⁰⁴ This rapid influx of social networking is generating heightened concern over "social squatting," sometimes known as "identity squatting" and username hijacking - essentially forms of online impersonation.ⁿ²⁰⁵ Social-squatters pose a variety of concerns for trademark owners. Once the squatter is comfortably in control of a Twitter or Facebook space using a trademark, he can then use the space to

provide false or misleading brand or product information or offer counterfeit goods and services, among other things. n206 As one commentator notes, "usernames" will become the new "domain names." n207

In June 2009, Facebook allowed its users to register vanity web addresses to allow for a more convenient method to locate users. n208 Facebook announced the availability of vanity web addresses a few short days before launching the program, forcing trademark owners to act very quickly to secure their products and brand names. n209 More than five million usernames were registered in twenty-four hours. n210 Among the vanity web addresses registered were <facebook.com/dellcomputers>, <facebook.com/iphones>, and <facebook.com/Nasa>. n211 Facebook, recognizing the likelihood of username-squatting, implemented a strict no-transfer policy as to usernames, which will prevent username-squatters from holding names for ransom. n212 Trademark owners are concerned about Facebook's trademark policies. For example, Facebook's trademark policy requires the trademark owner to provide trademark [*897] registration information, which suggests that common law trademark rights are not enough for enforcement under Facebook's policy. n213

In May 2009, Major League Baseball manager Tony LaRussa sued Twitter when someone created a Twitter account (<twitter.com/TonyLaRussa>) impersonating him. n214 LaRussa alleged seven causes of action, including trademark dilution and cybersquatting. n215 LaRussa's was apparently the first suit against Twitter. The case settled with undisclosed terms shortly after filing.

The question the court would have undoubtedly asked had the case gone to trial is whether the mere inclusion of a username would cause confusion. Interestingly, Twitter's trademark policy allows for clear parody uses, but will take down any Twitter page "if there is a clear intent to mislead others through the unauthorized use of a trademark." n216 Facebook and Twitter have the potential to be bigger problems than domain name abuse because it costs the user nothing to register usernames with Facebook and Twitter. n217

Social squatting is uncharted legal territory. n218 Although no courts have addressed application of the UDRP or ACPA to social squatters, it does not [*898] appear that either will apply. n219 Social networking sites such as Facebook and Twitter provide usernames and subdomains, n220 which do not appear to fall within the UDRP or ACPA, which apply only to domain names. n221

B. Private Registration Services

Many domain name registrars now offer private registration services. n222 Some of the domain name registrars that offer privacy registration services do so under a subsidiary or affiliated company, undoubtedly for the purpose of distancing themselves from liability. n223 For an additional fee, these services allow registrants to shield their identification from the WhoIs record. n224 A domain name registered using a private registration service will list the privacy service as the registrant and provide an e-mail address, such as domainname@ acmeprivacyservice.com, which will privately route to the correct e-mail address of the registrant. n225 Although there are undoubtedly legitimate purposes for the use of a domain name privacy registration service, n226 these services have become the calling card of cybersquatters. n227 Indeed, private registration services "stifle accountability" of registrants that are operating infringing websites. n228

In this situation, it is impossible to tell from the WhoIs record where the registrant is located to determine whether the trademark owner can bring an in personam or in rem suit. One possible solution to this issue is to contact the domain name registrar to let them know that the domain name is in dispute. This may be sufficient for the registrar to unmask the registrant's information. n229 [*899] If the registrar does not unmask the registrant's information, the trademark owner can file an in rem suit or file suit against the registrar. n230 Once the complaint is filed, the registrar will unmask the registrant's information and the trademark owner can file an amended complaint dismissing the registrar and adding the registrant as the proper defendant. n231

C. Registrar Liability

The ACPA provides a safe harbor to domain name registrars for registering domain names containing the trademarks of others.ⁿ²³² One commentator suggests that, by virtue of agency principles, a registrar's privacy service that is listed as the registrant in the WhoIs database would fall outside of the ACPA's safe harbor provision because the registrar is acting as the registrant.ⁿ²³³ At least one court has rejected this rationale.ⁿ²³⁴ However, registrars arguably exceed the boundaries of their typical role when they collect an additional fee for substituting registrant information for their own.ⁿ²³⁵ To date, the federal courts have not held that a registrar is liable for offering private registration services,ⁿ²³⁶ although at least one UDRP panel has indicated that the use of a privacy registration service, in addition to other evidence, may constitute bad faith.ⁿ²³⁷

Registrar liability becomes an even bigger question when a domain name registrar offers "parking" services for the domain names it registers. When a registrant registers a domain name, some registrars will offer to provide a "parking" page for a fee while the registrant is developing the website.ⁿ²³⁸ One court has explained that parking services "aggregate[] numerous domain names from individual domain registrants and contracts with an advertising service ... to license and monetize [the] domain names."ⁿ²³⁹ Domain name monetization [*900] is "the practice of using a domain name for commercial gain by generating revenue from Internet advertising located on a webpage."ⁿ²⁴⁰

Parking pages that utilize monetization rely on Internet users to click on advertising links listed on the website. Once the Internet user clicks on the link, the advertiser is charged a fee for the click and the parking service receives a portion of the fee,ⁿ²⁴¹ of which the parking service pays a percentage to the domain name registrant.ⁿ²⁴² In some cases, parking services "key" the advertising links to words found in a domain name.ⁿ²⁴³ For example, if a domain name contains the word "lasvegas," the advertising links will be "keyed" to goods and services located in or near Las Vegas, Nevada, such as attractions and entertainment in Las Vegas. Taking the example one step further, if the domain name contained a trademark, for example MGM GRAND, the advertising links would not only include advertising for goods and services in Las Vegas, but would likely also contain links to other Las Vegas resorts, such as the Venetian or the Wynn. If an Internet user attempts to reach a domain name containing MGM GRAND, and sees advertisements for other, similar services, perhaps at a better price or offering different amenities, that user might be diverted from its intended target, the MGM Grand. When the Internet user intends to reach the MGM GRAND website and reaches a cybersquatter's parking page instead, two critical events occur. First, the cybersquatter (and the parking service) generate income based on the improper use of the trademark. Second, the Internet user may elect another service provider found in the advertising links, thus depriving the trademark owner of the opportunity to provide services.

To date, no court has directly ruled on liability for registrars that provide parking services. However, one court stated in dicta that it was "troubled, to say the least" by a registrar's assertion that it is shielded from liability for cybersquatting under § 1114(2)(D)(iii), despite the registrar earning revenue from hits on the parking page.ⁿ²⁴⁴ That court did not reach a determination on liability because the trademark at issue was neither famous nor distinctive.ⁿ²⁴⁵

D. International Registrars

Sophisticated cybersquatters have found ways to exploit jurisdictional issues with cybersquatting.ⁿ²⁴⁶ To circumvent the system, U.S. registrants register domain names through registrars located in foreign countries that are not [*901] obligated to honor U.S. court orders.ⁿ²⁴⁷ Trademark owners in this situation have several options. First, they can file a lawsuit in the location of the registryⁿ²⁴⁸ (in the case of ".com," the Eastern District of Virginia, where VeriSign, the ".com" registry, is located) seeking preliminary and permanent injunctive relief. The preliminary and permanent injunctive orders should include language that the registry or current registrar shall transfer the domain name at issue to the trademark owner.ⁿ²⁴⁹ In this case, the registry is a "thin registry,"ⁿ²⁵⁰ meaning that VeriSign can only move the domain name to another registrar, which will then have to move the domain name into the trademark owner's domain name account.ⁿ²⁵¹ If a foreign registrar declines to follow the U.S. court order, the domain name will not be on registrar-hold, which would prohibit the moving of the domain and the registrant will have the ability to move or transfer the domain name to other registrars, requiring the trademark owner to chase the domain name from registrar to

registrar.ⁿ²⁵² The generic description of "current registrar" in the injunction orders is important to allow for the possibility of registrar changes during the pendency of litigation.ⁿ²⁵³ Alternatively, the trademark owner can file a UDRP proceeding or file an in rem lawsuit to recover the domain name.

E. Reverse Domain Name Hijacking

In reverse domain name hijacking cases, unlike other issues within cybersquatting, the lawful trademark owner is the "bad guy." Reverse domain name hijacking occurs when a trademark owner attempts to force a domain name registrant to transfer a lawfully obtained domain name.ⁿ²⁵⁴ One commentator calls reverse domain name hijacking a form of trademark bullying where "a trademark owner uses his trademark rights to harass and intimidate another beyond what the law might be reasonably interpreted to allow."ⁿ²⁵⁵ Former circuit judge and current Supreme Court Justice Sonia Sotomayor authored the opinion in *Storey v. Cello Holdings, LLC*, in which she described reverse domain name hijacking as "the overreaching use of the mechanisms established to remedy cybersquatting against a registrant with a legitimate interest in his domain name."ⁿ²⁵⁶ Court cases involving reverse domain name hijacking are limited.ⁿ²⁵⁷ However, a search of the National Arbitration Forum domain decisions [*902] reveals that reverse domain name hijacking is often alleged in those proceedings.ⁿ²⁵⁸ Under Rule 15(e) of the Rules for the UDRP,

if after considering the submissions the Panel finds that the complaint was brought in bad faith, for example in an attempt at Reverse Domain Name Hijacking or was brought primarily to harass the domain-name holder, the Panel shall declare in its decision that the complaint was brought in bad faith and constitutes an abuse of the administrative proceeding.ⁿ²⁵⁹

In order to sustain a claim of reverse domain name hijacking under the UDRP, the respondent must show that the claimant knew of the respondent's legitimate interest and brought the proceeding in bad faith.ⁿ²⁶⁰ Arbitrators presiding over UDRP proceedings rarely grant claims of reverse domain name hijacking.ⁿ²⁶¹ To be sure, a search of WIPO decisions where reverse domain name hijacking was found reveals only thirty-two cases as of early March 2011.ⁿ²⁶² However, this does not mean that reverse domain name hijacking is not an ongoing concern for domain name registrants. Rather, it is highly likely that instances of reverse domain name hijacking are merely unreported or underreported.ⁿ²⁶³ The ACPA does not explicitly address reverse domain name hijacking.

VI. Adapting Forward: Suggestions for the Future

Although it has been a short ten years since Congress enacted the ACPA and ICANN implemented the UDRP, in technology years, it has been an eternity. Technology moves fast - much faster than the law. Indeed, each release of a new top-level domain opens the door to another wave of cybersquatting for trademark owners.ⁿ²⁶⁴ Some commentators suggest that an online dispute resolution procedure, similar to the UDRP for domain names, is the wave of the [*903] future.ⁿ²⁶⁵ Although such a procedure may ultimately be the wave of the future, much can be done to address current issues by the enactment of state cybersquatting laws and amendments to the ACPA and UDRP.

A. Deterrents under State Law

States should enact some form of cybersquatting prevention statute that either mimics the ACPA or provides some minimum threshold of protection. A handful of jurisdictions have already enacted statutes to deal with cybersquatting,ⁿ²⁶⁶ but protection under these state statutes is often limited in scope compared to the ACPA. States could remedy this by carving out protection for state-registered trademarks to provide smaller trademark owners, which may not have a famous or distinctive trademark, with some level of protection.

Utah's legislation, passed in 2009, is an example of state legislation that is aggressive, but stops short by limiting protections to small businesses. The Utah E-Commerce Integrity Act (the Utah Act) ⁿ²⁶⁷ largely follows the language of the ACPA with a couple of notable exceptions. First, although the statute provides for the same statutory damages as provided under the ACPA (not less than \$ 1,000 and not more than \$ 100,000 per domain name) the legislation provides for presumed statutory damages in the amount of \$ 100,000 per domain name "if there is a pattern and practice of infringements committed willfully for commercial gain." ⁿ²⁶⁸ This provision will undoubtedly serve as an enormous deterrent for cybersquatters.

Another significant addition to the Utah Act is that it provides for liability that reaches beyond the domain name registrant. Liability under the Utah Act casts a wide net over anyone acting as the registrant's agent or representative and the domain name registrar and the domain name registry, provided that assistance was knowingly provided to the registrant. ⁿ²⁶⁹ Unsurprisingly, this legislation has the support of the Coalition Against Domain Name Abuse (CADNA), ⁿ²⁷⁰ whose membership is comprised of companies such as Dell, Verizon Communications, and Nike. ⁿ²⁷¹ CADNA anticipates that the Utah legislation will get the ball rolling for similar changes at the federal level. ⁿ²⁷²

[*904]

B. Amendments to the ACPA

The ACPA can stretch to reach the contours of new technological issues since its enactment in 1999. Congress intended the ACPA to provide a remedy for "a narrow class of wrongdoing." ⁿ²⁷³ However, courts have customarily treated the ACPA as a flexible statute. ⁿ²⁷⁴ Moreover, because of the availability of large statutory damages, trademark owners are incentivized to shape their claims to fit within the ACPA. ⁿ²⁷⁵ It is clear that the ACPA cannot adequately serve the future needs of consumers and trademark owners. Congress should amend the ACPA to address new technological advances and provide trademark owners and the courts with flexibility.

1. Damages

Congress should follow the lead of the Utah Act and provide presumed statutory damages for cybersquatters with a pattern and practice of infringement. Some cybersquatters are in the business of registering mass amounts of domain names and selling them for a profit. Amending the ACPA to include presumed statutory damages for the most brazen cybersquatters would act as a significant deterrent that will benefit all trademark owners. Moreover, the ACPA amendment should codify the common law rule that ACPA judgments are not dischargeable in bankruptcy. This amendment, too, will act as a significant cybersquatter deterrent.

2. Registrar Liability

Congress should amend the ACPA to provide a remedy against domain name registrars who knowingly offer pay-per-click services via parking pages that are keyed to trade off of the goodwill of trademarks. Specifically, the second element of the ACPA should provide a supplemental cause of action to include a registrar that uses a domain name to generate revenue. The amendment should be drafted in such a way that the registrar would maintain its safe harbor for registering a domain name, but would be liable for providing pay-per-click services utilizing the famous or distinct trademarks of others.

To protect registrars from broad liability for offering parking services, the statute should provide a five-day "claw back" provision. This provision would function similar to the "notice and take down" procedure found in the Digital Millennium Copyright Act. ⁿ²⁷⁶ A trademark owner would provide the registrar with notice that its trademarks are being used in the parking page, along with a copy of a federal trademark registration, or copy of a court order declaring the trademarks to be famous or distinctive in the absence of a registration. The registrar would then have five business days to remove the parking page. Failure to remove the parking page would expose the registrar to liability under the ACPA.

[*905] Moreover, the ACPA should require a domain name registrar to disable the website upon receiving a verified notice of cybersquatting dispute. Although registrars do not wish to be the arbiters of trademark rights, requiring them to take the website down, subject to the current safe harbor provisions, would be in the best interest of consumers. If the cybersquatter claims a legitimate use and provides evidence of the same (such as a business license or state trademark registration) the registrar would be permitted to reinstate the website pending resolution of the dispute by the courts.

With regard to private registration services, Congress should amend the ACPA to require the immediate cancellation of the registration service upon a verified notice of a cybersquatting dispute. Although many privacy registration services reserve the right to cancel the service upon notice of a dispute, many require the filing of a complaint before they will do so. This requirement adds an extra layer of complication for trademark owners. As such, the ACPA should provide that a verified notice of cybersquatting dispute is sufficient to cancel the privacy service.

3. Subdomains, Usernames, and E-mail Addresses

Congress should amend the ACPA to include bad faith use of subdomains, usernames, and e-mail addresses. The amendment should empower Internet service providers to take down or disable websites containing subdomains, usernames or e-mail addresses containing the famous or distinctive trademarks of others upon a verified notice of infringement. Often usernames and e-mail addresses are used in conjunction with phishing or pharming scams, as well as the sale of counterfeit goods. Although this category of Internet-related conduct does not fall squarely within the dominion of "cybersquatting," it is closely related and similarly stands to cause consumer confusion.

4. Reverse Domain Name Hijacking

To balance the protections afforded under the ACPA, Congress should amend the ACPA to include a prohibition on reverse domain name hijacking. Trademark owners with famous or distinctive trademarks are typically large companies with significant financial and legal resources. Indeed, these trademark owners are in a position to demand that a domain name be turned over to them, even in the case of a lawfully registered domain name (either registered before the trademark became famous or distinctive, or subject to a fair use defense) under the threat of litigation. Some trademark owners are no longer as concerned with consumer confusion and they merely feel entitled to own all domain names containing their trademarks. If taken to task, these reverse domain name hijacking trademark owners would likely lose a claim under the ACPA, with lawful domain name registrants incurring legal fees to defend themselves.

In order to discourage reverse domain name hijacking, Congress should amend the ACPA to include a statutory damage award, plus attorneys' fees, against any trademark owner that engages in reverse domain name hijacking. The amendment should provide that reverse domain name hijacking is available as an affirmative defense or as an affirmative cause of action. Including an [*906] award of attorneys' fees is appropriate for two reasons. First, reverse domain name hijacking is arguably bad faith conduct that fits into the overall purpose of the ACPA. Second, recovery of attorneys' fees would encourage attorneys to represent lawful domain name registrants on a contingency basis, thereby giving lawful domain name registrants a real chance to succeed on the merits.

5. International Registrars

The Internet and cybersquatters are worldwide in scope, yet laws and regulations have focused on and in the United States. Indeed, savvy U.S.-based cybersquatters will often choose foreign registrars specifically to evade liability under the ACPA. Although trademark owners can recover a domain name under the UDRP, they have to submit to the foreign registrar's jurisdiction for post-UDRP judicial review. Thus, it would be useful to have an international treaty, such as the Berne Convention that addresses copyrights, to deal with cybersquatters and to allow for the recovery of the domain name as well as damages. For example, it would be useful to have an international agreement regarding the transfer of domain names between foreign registrars and U.S. registrars and/or an agreement regarding honoring U.S. court orders regarding domain transfers. Full consideration of existing treaties and other international duties and obligations should

be evaluated to see whether similar obligations exist in other contexts.

6. Trademark Ombudsman

Although the amendments identified above should provide considerable deterrent and protection to trademark owners, Congress could amend the ACPA to provide for a "trademark ombudsman" within the United States Patent and Trademark Office to assist trademark owners in their fights against cybersquatters.

During the trademark application process, a trademark owner could elect to have their trademark added to the ombudsman program for an additional fee. Once a trademark is registered, the trademark ombudsman would notify ICANN of the trademark registration, which would then be added to a database that is accessible to domain name registrars. Whenever a domain name is registered that contains the trademark or comes close to the trademark (for instance, typosquatting), an e-mail notification would be generated and sent to the trademark owner. By participating in the trademark ombudsman program, the trademark owner would agree to exhaust administrative remedies under the UDRP prior to filing suit, unless extenuating circumstances existed. If there is a particularly egregious domain registration and use, the trademark owner could request an exemption from going through the UDRP prior to proceeding to litigation. This program would help keep down the costs associated with litigation for all the parties involved.

C. Amendments to the UDRP

The UDRP seems to have fulfilled its chief purpose, yet there is room for improvement with amendment of the UDRP. First, to have consistent rulings in UDRP cases, each case should be given precedential value. One complaint [*907] among commentators is that UDRP decisions have no value beyond the cases in which they are rendered, and decisions can be inconsistent. ⁿ²⁷⁷ Amending the UDRP to give these decisions precedential value would alleviate this concern.

Second, ICANN should amend the UDRP's rules regarding the number of respondents allowed per complaint. Currently, the UDRP requires that the complaint name only one respondent. ⁿ²⁷⁸ In order to make the UDRP more cost effective and efficient, ICANN should amend the UDRP to allow trademark owners to recover multiple domain names registered by multiple registrants in one proceeding. This amendment would provide trademark owners a more cost efficient and expeditious return of their domain names.

A recent UDRP panel has addressed the inverse situation: multiple complainants with one respondent. ⁿ²⁷⁹ That panel determined that allowing multiple complainants to file against one respondent is

consistent with the aim of the UDRP to combat cybersquatting in as efficient and cost effective a manner as is fairly possible. However the test must be applied judiciously and depending upon the circumstances of particular cases may require the exercise of a panel's discretion in adapting it as appropriate. ⁿ²⁸⁰

ICANN should amend the UDRP consistent with this panel's holding to allow for the multi-complainant situation.

VI. Conclusion

Cybersquatters are a serious threat to trademark owners and consumers. Cybersquatters exploit consumer confusion by using famous or distinctive trademarks of others in their domain names and damage the goodwill and reputation of those trademarks. The Anticybersquatting Consumer Protection Act and Uniform Domain Name Dispute Resolution Policy have provided a good framework for combating cybersquatters. In general, the ACPA is more favorable in

remedy with statutory damages and the possibility of attorneys' fees, but is costly and time-consuming to prosecute. By contrast, the UDRP is generally inexpensive and quick, but with very limited remedies. Both the ACPA and UDRP have different burden of proof requirements, which means the type of cybersquatting may determine the best route to proceed.

As technology advances and cybersquatters become more sophisticated and identify loopholes in current law, the current statutory and regulatory framework becomes inadequate. Congress enacted the ACPA to apply to a narrow class of conduct, which the courts continue to stretch beyond those [*908] narrow bounds. In light of new technological advances, Congress needs to revisit the ACPA to ensure strong consumer protection, protection of trademark owners, and the rights of lawful domain name registrants.

n41. 15 U.S.C. § 1114(1) provides:

any person who shall, without the consent of the registrant -

(a) use in commerce any reproduction, counterfeit, copy, or colorable imitation of a registered mark in connection with the sale, offering for sale, distribution, or advertising of any goods or services on or in connection with which such use is likely to cause confusion, or to cause mistake, or to deceive; or

(b) reproduce, counterfeit, copy, or colorably imitate a registered mark and apply such reproduction, counterfeit, copy or colorable imitation to labels, signs, prints, packages, wrappers, receptacles or advertisements intended to be used in commerce upon or in connection with the sale, offering for sale, distribution, or advertising of goods or services on or in connection with which such use is likely to cause confusion, or to cause mistake, or to deceive ...

Under 15 U.S.C § 1125, claims of trademark infringement apply to:

(a)(1) Any person who, on or in connection with any goods or services, or any container for goods, uses in commerce any word, term, name, symbol, or device, or any combination thereof, or any false designation of origin, false or misleading description of fact, or false or misleading representation of fact, which -

(A) is likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of such person with another person, or as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities by another person, or

(B) in commercial advertising or promotion, misrepresents the nature, characteristics, qualities, or geographic origin of his or her or another person's goods, services, or commercial activities

n216. Twitter Support, Trademark Policy, Twitter (Jan. 14, 2009), <http://support.twitter.com/entries/18367-trademark-policy>. In June 2009, Twitter launched its "Verified Accounts" program. Pete Cashmore, Twitter Launches Verified Accounts, Mashable (June 11, 2009), <http://mashable.com/2009/06/11/twitter-verified-accounts-2/>. The goal of the Verified Accounts program "is to limit user confusion by making it easier to identify authentic accounts on Twitter." Twitter Help Center, About Verified Accounts, Twitter, <http://support.twitter.com/groups/31-twitter-basics/topics/111-features/articles/119135-about-verified-accounts> (last visited Apr. 2, 2011). In late 2010, Twitter suspended the program pending release of a more user-friendly system. Peter Kafka, Twitter Trusts, No Longer Verifies, MediaMemo (Nov. 30, 2010, 10:19 AM), <http://mediamemo.allthingsd.com/20101130/twitter-trusts-no-longer-verifies/>.

n217. Lichtenberg & Solomon, *supra* note 208, at 39.

n218. Steven Seidenberg, Names' Sake: Social Media Pose Trademark Threats for Companies, *Inside Couns.*, Sept. 1, 2009, at 24, 24, available at <http://www.insidecounsel.com/Issues/2009/September-2009/Pages/Names-Sake.aspx?k=names'+sake>. On January 1, 2011, California SB 1411 went in to effect, prohibiting "E-personation." One legislator noted that prior California law was insufficient to deal with current technology. See Fact Sheet: Senate Bill 1411 (Simitian) Criminal "E-personation," http://www.senatorsimitian.com/images/uploads/SB_1411_Fact_Sheet.pdf (last visited Apr. 2, 2011). Specifically, SB 1411 criminalizes anyone who "credibly impersonates another actual person through or on an Internet Web site or by other electronic means for purposes of harming, intimidating, threatening, or defrauding another person" Cal. Penal Code § 528.5(a) (West Supp. 2011). The law defines "electronic means" to include creating an e-mail or social networking account utilizing another person's name. Id. § 528.5(c). Such conduct is punishable by a fine not to exceed \$ 1,000 or imprisonment not to exceed one year, or both a fine and imprisonment. Id. § 528.5(d). The new law also explicitly permits victims to pursue other civil remedies. Id. § 528.5(e). In 2009, Texas enacted a similar law. See Tex. Penal Code Ann. § 33.07 (West Supp. 2010).

n219. Seidenberg, *supra* note 218, at 27.

n220. A subdomain is an unregistered portion of a domain name. For example, in the domain name "<www.store.apple.com>," the "store" portion is the subdomain. See also 1-1 McGrady on Domain Names, *supra* note 16, § 1.07[7][a][i].

ARTICLE: What's Mine is Mine but What's Yours is Ours: IP Imperialism, the Right of Publicity, and Intellectual Property Social Justice in the Digital Information Age

NAME: Lateef Mtima*

BIO: * Professor of Law, Howard University School of Law and Founder and Director of the Institute for Intellectual Property and Social Justices. I would like to thank Zalika Headley, HUSL ' 12, for her research assistance in the preparation of this article. Any errors are my own.

LEXISNEXIS SUMMARY:

... Not only do varying regional values make it difficult to discern what publicity interests will be recognized in a particular case, but even where the right of publicity interests are relatively concrete, courts appear eager to subjugate such interests in favor of competing social utilities, and consequently the outcomes of right-of-publicity disputes can be extremely difficult to predict. ... The misappropriation or other inequitable exploitation of the publicity rights of members of marginalized groups, which have fewer entrepreneurial/access to wealth opportunities presents an especially inviting opportunity for a social justice oriented application of the right of publicity, since such unfair exploitation undermines the enunciated social utility/ justice goals of the right of publicity as well as ecumenical principles of justice. ... Subsequent to Bell's death, Brooks discovered that The Topps Trading Company ("Topps"), a well-known purveyor of sports trading cards and memorabilia, had engaged in various unauthorized uses of her father's image, whereupon she undertook extensive efforts to determine the full scope of Topps' unauthorized activities: Topps' first contact with Brooks occurred in late 2004. ... In fact, under Rogers, the assessment of the relevance of the plaintiff's persona is dispositive in resolving First Amendment/publicity disputes because, unlike false endorsement claims, there is no secondary assessment as to whether the use is also prohibitively confusing. ... In balancing the defendant's asserted First Amendment claims against the plaintiffs' publicity rights, the court delineated the property interests and social utilities encompassed by the right of publicity: What the right of publicity holder possesses is not a right of censorship, but a right to prevent others from misappropriating the economic value generated by the celebrity's fame through the merchandising of the "name, voice, signature, photograph, or likeness" of the celebrity. Sony reasoned that, because it had used a copyrighted recording of Laws' voice, her state misappropriation rights were subsumed within the copyrights attendant to that recording. ... Unlike the courts in Brown and Laws, the Facenda court did not presume that the social utility interests that appeared to conflict with the plaintiff's publicity rights were superior to the social utility objectives which underlie the right of publicity, or, for that matter, that these competing interests were even socially significant.

HIGHLIGHT: "THAT the individual shall have full protection in person and in property is a principle as old as the common law; but it has been found necessary from time to time to define anew the exact nature and extent of such protection. Political, social, and economic changes entail the recognition of new rights, and the common law, in its

eternal youth, grows to meet the demands of society." ⁿ¹

TEXT:

[*323]

PART I: INTRODUCTION

The classic conflict over enforcement of intellectual property rights continues today as a struggle between the "IP haves" and the so-called "IP have-nots." ⁿ² Those nations that have canonized the products of their creative and innovative endeavors as forms of property insist that these boundaries be held sacrosanct by all others. ⁿ³ The societies and communities that have not applied such status to their cultural and inventive output, however, often regard such restrictions as incomprehensible, unreasonable, or simply unfair. ⁿ⁴ While there can be many reasons for hostility toward intellectual property protection, a frequent cause is that intellectual property characterization and [*324] rights enforcement seem to be promoted and respected only when it serves the interests of those invested in particular intellectual property regimes. ⁿ⁵

While some scholars and commentators attempt to analyze and pose solutions to these conflicts as problems of technological and cultural incompatibility (i.e., technologically and economically advanced societies naturally appreciate the need for strong intellectual property ("IP") rights; unsophisticated, developing societies do not get it, but with education they can be uplifted into the fold), ⁿ⁶ the issue is really not that complex. Many contemporary IP rights conflicts are simply the result of enduring attitudes of [*325] Western Imperialism. ⁿ⁷ Summarily put: that which I possess, and which incidentally provides me some measure of power, dominance, or other advantage, should be afforded protected, property-right status, and that status should be recognized and revered by universal law. On the other hand, that which you possess, should I desire it, should be ecumenically acknowledged as freely available to any and all who are capable of developing and applying it to "productive" use (such as the use that I intend to undertake). ⁿ⁸

In other words, what's mine is mine; what's yours is ours.

Today, such attitudes and policies of Western "IP Imperialism" not only account for many international clashes over intellectual property rights and protections, but also fuel many domestic IP controversies in the American digital information society. ⁿ⁹ Although the vested, corporate purveyors of intellectual property commodities consistently call for stronger IP protections whenever their property interests are at stake, when it comes to outsider inventive [*326] or expressive endeavors, they typically take the opposite position. ⁿ¹⁰ Public engagement in new technological uses for traditional, corporate-controlled intellectual properties should be restricted and curtailed; unauthorized commercial development and exploitation of newer and non-traditional intellectual properties should be unrestricted and encouraged. And, if intellectual property protection is to be extended into new areas, any attendant property rights and interests should be made subordinate to the IP rights and other interests that sustain and perpetuate the entrenched IP establishment. ⁿ¹¹

Some current conflicts in the still-developing field of publicity rights provide illustrative examples of the IP Imperialist viewpoint. As a relatively new and innately personal kind of intellectual property, publicity rights are usually beyond the immediate reach of corporate IP entities. Consequently, it is in the best interest of these entities for publicity rights to be narrowly construed. The more narrow the scope of the right of publicity, the more likely that many new and existing means for commercially misusing individual [*327] personas and images will be held outside the parameters of the right, and thus available for exploitation by anyone with the means to develop and commercialize these uses. ⁿ¹² When new technological uses are introduced in connection with intellectual property under corporate dominion, however, it is vehemently argued that these uses should be relegated to the province and control of the IP rights holder. ⁿ¹³

This article discusses how IP Imperialism is a socially and politically pernicious policy that contravenes the social utility and social justice objectives underlying American intellectual property law, ⁿ¹⁴ including those mores advanced

through the right of publicity. Part II briefly discusses the origins and evolution of IP Imperialism in the American intellectual property psyche and its historical role in the formation of American IP law and policy.ⁿ¹⁵ Part III focuses specifically on the right of publicity, its doctrinal facets and social [*328] utility/social justice functions, and its potential to be utilized as a counterweight to the IP Imperialist agenda.ⁿ¹⁶

In Part IV, four cases are analyzed as presenting important opportunities to further IP social justice through the right of publicity.ⁿ¹⁷ The first three cases demonstrate how such opportunities can be lost when courts fail to consider the IP social utility and social justice functions of publicity rights.ⁿ¹⁸ The fourth case, however, illustrates how IP social utility/social justice cognizance can lead to more socially balanced (and counter-imperialistic) outcomes.ⁿ¹⁹

Finally, Part V attempts to construct an IP social justice framework for evaluating and resolving right of publicity claims.ⁿ²⁰ This Part delineates a right of publicity social justice analytical spectrum, and identifies important IP social justice issues and opportunities that courts should be sensitive to in adjudicating right of publicity conflicts and disputes.ⁿ²¹

PART II: THE RISE OF AMERICAN IP IMPERIALISM

A. Early American IP Policies: What's Yours is Ours

In America's nascent years, quasi-imperialistic attitudesⁿ²² toward intellectual property rights were seen as serving the country's immediate interests as a developing nation. The colonial pioneers did not have much intellectual property of their own to protect,ⁿ²³ but there was a storehouse of pre-existing [*329] protected material that could be critical to the new nation's cultural advancement and technological development.ⁿ²⁴ The great works of literature and innovative technological achievements of the day were considered to emanate from Europe, and the colonists did not see anything wrong with appropriating these achievements in the cause of American national progress.ⁿ²⁵ Having fought a war to gain independence from British control, America's leaders and populace were not overly concerned with the trivialities of foreign rights in intangible property, especially if such rights stood in the way of nation building.ⁿ²⁶ And surely if it seemed reasonable to capture, enslave, and otherwise subjugate and degrade other people in the cause of American agricultural and industrial "progress," the misappropriation of a few stories and songs was hardly an affront to the national conscience.ⁿ²⁷

[*330] Thus, notwithstanding the fact that the Founding Fathers provided for the granting of intellectual property rights in the very first article of the Constitution,ⁿ²⁸ American disregard for the intellectual property rights of others prevailed throughout the nineteenth century.ⁿ²⁹ As American inventors and authors became increasingly prolific in their own inventive and creative output, however, the attitudes toward protection for domestic innovative and expressive works evolved and the social benefit of providing secular incentives and rewards to authors and inventors began to be appreciated. With the advent of revolutionary means of mass production and distribution of such creations, the commoditization perception of intellectual property began to take root in the American socio-economic psyche:

To bring the lively arts to an increasingly eager public, a new American arts system and new "arts industries" grew dramatically during the first three decades of the twentieth century... Music of all kinds made its way onto molded shellac 78 rpm discs, introduced by Columbia Records in 1904; by 1921 record sales totaled \$ 16 million, a figure that would increase tenfold over the next decade. In 1920 there were 20,000 silent movie theaters operating across the country, screens fed, in mid-decade, by fifteen film studios... [*331] But cultural change always exacts a price. The rise of vernacular art made possible by technology enriched America's expressive life, but the market-driven system producing films, records, and broadcasts evolved with little attention to the way the creation and distribution of art in America linked up to "Life, Liberty, and the Pursuit of Happiness." The problem lay not with these transforming technologies, and certainly not with the blues musicians, movie stars, and vaudevillians who provided early cultural "content." Instead, the public interest was subverted by the business practices that made up the rules and laid out the

playing field for producing and consuming our modern mainstream culture. ⁿ³⁰

Intellectual property protection became recognized as vital to American technological and cultural progress, ⁿ³¹ and, moreover, safeguarding the means of production and distribution of IP commodities would soon be regarded as equally important as stimulating the production of intellectual property output. ⁿ³² And thus the American IP Commoditization Precept was born. American intellectual property law and policy would become dominated by attitudes that regarded intellectual property works primarily as commodities to be invested in and commercially exploited for profit. ⁿ³³ The aspirations and innovations of human hearts and minds were reduced to mere chattel.

[*332]

B. America as IP Super-Power: What's Mine is Mine

Germinated in the latter years of the nineteenth century, the American IP Commoditization Precept flowered into full-blown IP Imperialism in the twentieth century. In the global market place, the United States not only took its place in the international IP community, ⁿ³⁴ but became a staunch advocate for the recognition of strong intellectual property rights, particularly as the nation shifted from a goods-based economy to an information-based one. ⁿ³⁵ **[*333]** Recognition of and respect for the expressive and innovative endeavors of others, however, especially those of non-Western cultures, did not keep pace. ⁿ³⁶ Most incendiary to many third world and other developing nations **[*334]** was the fact that the United States and the former Colonial Powers sought to define unilaterally what would qualify as protectable intellectual property. ⁿ³⁷ At the same time, they showed little respect for the sovereign and national rights in the properties the West desired, such as the natural and indigenous cultural resources they continued to pilfer from many non-Western countries without even the pretense of fair compensation. ⁿ³⁸

[*335] Domestically there was little challenge to the IP Commoditization aspects of American IP Imperialism. For one thing, the American public seemed to have access to as much IP products as it desired at affordable prices. ⁿ³⁹ Additionally, there were few options available for interacting with **[*336]** IP products other than as pre-packaged, static commodities. Books, movies, and music recordings were entertaining and often even inspiring; pharmaceuticals were inexpensive and cured most routine ills; even the public's favorite celebrities were "manufactured," managed, and marketed by entertainment conglomerates. ⁿ⁴⁰ As with most mass-produced commodities in the industrial age, the public had little say in how intellectual property products were manufactured or what products would be made available, nor could it "tweak" or customize that which was offered to suit their individual likings. Like children at the end of a hyperactive summer day, the public happily consumed what was put in front of it, so long as it was familiar, or at least superficially gratifying, unconcerned with either the ultimate cost or process involved in the preparation of the intellectual property repast. Nor did there seem to be any cause for alarm over growing corporate claims of absolute dominion over the IP to which they held legal rights. In possession of an ever-growing bundle of legal titles to IP works, what was theirs was theirs and the right of control over their property was to be respected by all. ⁿ⁴¹

C. Digital Information Technology: The Challenge to IP Imperialism and Commoditization

The advent of digital information technology presented the first major challenge to both American IP Imperialism policies and the American IP Commoditization Precept. Through the Internet and related technological advances, people in many non-Western and developing nations gained unprecedented access to American intellectual property and began utilizing this material as the building blocks for further expressive and innovative works. ⁿ⁴² **[*337]** Concededly, this new access was sometimes abused to undertake unauthorized commercial exploitation and other acts of IP piracy. ⁿ⁴³ For American and other Western IP stakeholders, the "what's mine is mine" imperialist bastion was no longer an unassailable rampart. ⁿ⁴⁴ Moreover, some non-Western **[*338]** nations and various marginalized groups and communities would seize upon Western "digital vulnerability" to gain bargaining leverage with which to redress the "what's yours is ours" part of the IP Imperialism equation, ⁿ⁴⁵ and to otherwise explore digital information technology

as a means for addressing other intellectual property social deficiencies and injustices.ⁿ⁴⁶

[*339] Just as the developing nations began to challenge American IP Imperialism, the American public began to question the IP Commoditization Precept: for the first time, private individuals gained the ability to interact with commercially produced IP product in non-passive ways.ⁿ⁴⁷ With digital information technology liberating many expressive works from static formats and offering new methods for using and re-using existing works to produce new works and even new forms of intellectual property, the American public became unwilling to forego these creative and pedagogical boons solely on the say-so of the IP Commoditization establishment.ⁿ⁴⁸ A national grassroots movement to restore the public interest to the core of American IP policy began to take hold, and a growing cross-section of IP stakeholders demanded that the IP Commoditization Precept give way to the Constitution's intellectual property mandates of cultural and innovative progress.ⁿ⁴⁹

[*340] Predictably, the American Digital Cultural Revolution has been met with demands for even greater IP protections from the entrenched IP corporate community; predictably, but not consistently.ⁿ⁵⁰ Because digital information technology not only provides new uses for traditional intellectual property product, but has also engendered new kinds and forms of intellectual property outside of IP conglomerate control, in the unwavering tradition of American IP Imperialism many members of that community would prefer that little or no "IP law and order" be extended to these new frontiers. Consequently, it is not unusual to find some of the most ardent corporate supporters of stronger IP rights as the means for incorporating digital information technology into the global IP framework actually arguing against strong IP protection when it comes to regulating digital information IP interests currently outside their control.ⁿ⁵¹

Some recent right-of-publicity disputes provide good examples of this IP Imperialist ambidexterity. As a relatively new form of intellectual property, the parameters and contours of these rights were still being charted as digital information technology disrupted a plethora of timeworn IP pretexts and assumptions.ⁿ⁵² Consequently, much of the right of publicity law terrain, both within and outside of the digital information context, is plainly unsettled, and like the robber barons of old, many IP Imperialists are eager to preserve this "Oklahoma land-grab" state of affairs until they can stake their claims to these new IP territories. However, as discussed in the next Part, the right of publicity offers much more than new opportunities for IP Imperialist expansion. Particularly in the digital information context, it can instead be utilized to achieve important IP social utility and social justice goals. A brief examination of the development of the right, and the application of IP social justice tenets in its interpretation and application, elucidates its full social utility/social justice potential.

PART III: THE RIGHT OF PUBLICITY: A DIGITAL AGE OPPORTUNITY FOR IP SOCIAL JUSTICE

A. The Origins of the Right of Publicity

In many ways, the right of publicity is something of the IP bastard child, the unplanned progeny of the intersection of tort right of privacy with trademark, [*341] which is itself the "black sheep" of federal intellectual property law.ⁿ⁵³ The genesis of publicity rights can be traced to the landmark law review article by two jurisprudential Young Turks, Samuel D. Warren and Louis D. Brandeis, who defied convention and called for judicial recognition of "a right to be let alone."ⁿ⁵⁴ Perturbed with the press's growing encroachment upon private matters and the consequential public fascination with sensationalism, Warren and Brandeis' observations could well have been made in the present day:

Of the desirability - indeed of the necessity - of some such protection, there can, it is believed, be no doubt. The press is overstepping in every direction the obvious bounds of propriety and of decency. Gossip is no longer the resource of the idle and of the vicious, but has become a trade, which is pursued with industry as well as effrontery. To satisfy a prurient taste the details of sexual relations are spread broadcast in the columns of the daily papers. To occupy the indolent, column upon column is filled with idle gossip, which can only be procured by intrusion upon the domestic circle. The intensity and complexity of life, attendant upon advancing civilization, have rendered necessary some retreat from the world, and man, under the refining influence of culture, has become more sensitive to publicity, so that

solitude and privacy have become more essential to the individual; but modern enterprise and invention have, through invasions upon his privacy, subjected him to mental pain and distress, far greater than could be inflicted by mere bodily injury. ⁿ⁵⁵

Although the right of privacy was not immediately welcomed by the courts, ⁿ⁵⁶ gradually courts began to accept the principle that individuals were entitled to some protection from intrusion upon their lives and personas, culminating in a pivotal decision by the Second Circuit Court of Appeals, wherein the right of publicity was recognized as a distinct species of the right of privacy. In *Haelan Laboratories, Inc. v. Topps Chewing Gum, Inc.*, the [*342] plaintiff entered into an exclusive contract with a professional baseball player to place his photograph on trading cards. ⁿ⁵⁷ The defendant, however, induced the baseball player to allow it to also use his photograph on trading cards and thereby breach his exclusive agreement. ⁿ⁵⁸ The defendant argued that the baseball player had no legally recognized property interest in his image that he could have assigned to the plaintiff, and consequently the plaintiff had no legal interest that the defendant could have invaded. ⁿ⁵⁹ The Court of Appeals disagreed:

We think that in addition to and independent of [a] right of privacy ... a man has a right in the publicity value of his photograph, i.e., the right to grant the exclusive privilege of publishing his picture... . This right might be called a 'right of publicity.' For it is common knowledge that many prominent persons (especially actors and ball-players), far from having their feelings bruised through public exposure of their likenesses, would feel sorely deprived if they no longer received money for authorizing advertisements, popularizing their countenances, displayed in newspapers, magazines, busses, trains and subways. This right of publicity would usually yield them no money unless it could be made the subject of an exclusive grant which barred any other advertiser from using their pictures. ⁿ⁶⁰

Finally, in 1960 Dean Prosser published a seminal article charting the various judicial conceptions of privacy rights in which he outlined four categories of judicially accepted privacy interests, ⁿ⁶¹ describing the latter-most interest as the right to protect one's image or likeness from misappropriation. ⁿ⁶² Thereafter, both the Restatement (Second) of Torts and the Restatement [*343] (Third) of Unfair Competition included the right of publicity, enumerating the elements of the cause of action. ⁿ⁶³

B. Enforcing the Right of Publicity

In general, the right of publicity assures individuals the right to determine when or if others may utilize or exploit their images or personas, as well as the right to participate in the commercial benefits that might be derived from such uses:

The right of publicity is an intellectual property right of recent origin which has been defined as the inherent right of every human being to control the commercial use of his or her identity. [It] is a creature of state law and its violation gives rise to a cause of action for the commercial tort of unfair competition. ⁿ⁶⁴

[*344] Although the right of publicity is now widely recognized, ⁿ⁶⁵ identifying its parameters continues to be difficult. This is partly due to varying regional privacy customs and values, but the fact that publicity rights often seem to conflict with some of society's most cherished and respected legal and social mores also causes difficulty. The most obvious of these conflicts is with the First Amendment. American society has a revered interest in promoting the accurate discourse of historic and public events, including the roles of public and private individuals in such events. If individuals were to possess an absolute right to determine when their images or personas could be used or referenced by others, they could effectively censor public discussion and even historical accounts of actual events. ⁿ⁶⁶

Consequently, the right of publicity is often said to end where the First Amendment begins:

The right of publicity cannot be used to prevent someone's name or picture in news reporting. It cannot be used to prevent the use of identity in an unauthorized biography. It cannot prevent use of identity in an entertainment parody or satire, such as that of Rich Little or Saturday Night Live.ⁿ⁶⁷

[*345] In addition to preserving public discourse and historical accuracy, First Amendment concerns also tend to prioritize freedom of artistic expression over publicity interests. For example in *Rogers v. Grimaldi*, the Second Circuit Court of Appeals affirmed dismissal of both the right of publicity and the false endorsement claims brought by film legend Ginger Rogers, as precluded by First Amendment interests.ⁿ⁶⁸ Rogers brought suit in connection with the use of her name in the title of a film, *Ginger and Fred*.ⁿ⁶⁹ The gist of Rogers's claims was that, even though the film was not about the famous Rogers and Astaire dance team, the phrase "Ginger and Fred" invoked her famous persona when used as the title of a film and therefore falsely traded upon her persona to market a work to which she had no connection.ⁿ⁷⁰

In dismissing Rogers' claims, the court ruled that any invocation of her persona in this instance was artistically relevant to the film because, while the movie was not about Rogers or her former co-star, the title did have some artistic, expressive relationship to the content of the film - a satiric social commentary on the Hollywood Glamour Age - and was not merely a disguised attempt by the defendant to trade upon Rogers's celebrity as a means to promote his product.ⁿ⁷¹ Consequently, the use was protected by the First Amendment:

In light of the [state's] concern for the protection of free expression, [the court] would not expect [the state] to permit the right of publicity to bar the use of a celebrity's name in a movie title unless the title was "wholly unrelated" to the movie or was "simply a disguised commercial advertisement for the sale of goods or services." Here ... the title "Ginger and Fred" is clearly related to the content of the movie and is not a disguised advertisement for the sale of goods or services or a collateral commercial product.ⁿ⁷²

[*346] If it seems that, in a "battle of social utilities," the First Amendment will always prevail over publicity rights, perhaps one reason for this impression is that whereas the social function of freedom of speech is obvious, the social utility underlying the right of publicity may seem comparatively obscure. The First Amendment promotes democratic discourse and liberty, as well as the unfettered expressive use of facts and ideas; in comparison, what lofty social goals does the right of publicity promote? Indeed, some scholars have found it difficult to find any social utility justification for the right of publicity.ⁿ⁷³ Thus, prescribing the right of the publicity can be challenging because courts seem to delineate the right by negative implication, often construing the right as only covering whatever is "left over" after the important social utilities underlying the First Amendment and higher pecking order social mores have been satisfied.

Unsurprisingly, this difficulty in definition leads to difficulty in enforcement. Not only do varying regional values make it difficult to discern what publicity interests will be recognized in a particular case, but even where the right of publicity interests are relatively concrete, courts appear eager to subjugate such interests in favor of competing social utilities, and consequently the outcomes of right-of-publicity disputes can be extremely difficult to predict.

The subjugation, and resulting obfuscation, of right-of-publicity interests, however, is not ineluctable. While at first blush the right of publicity may not seem an especially socially relevant form of intellectual property,ⁿ⁷⁴ **[*347]** upon closer analysis it becomes clear that the right of publicity can service important social functions. To identify these functions, however, one must adjust the analytical lens to account for a social justice perspective of the intellectual property law.

C. The Social Utility and Social Justice Objectives of the Right of Publicity

A social justice interpretation of intellectual property law begins with the identification of social injustices and inequities relevant to a particular area of intellectual property protection. For example, IP Imperialistic exploitation of the expressive output of a marginalized sub-community can be assessed for its impact on copyright law's objective to

"promote the progress of the arts and sciences." Such exploitation at best nullifies the economic incentive to create, and, at worst, affirmatively discourages such acts as fixation and dissemination by members of exploited groups who have cause to view such activities as rendering their works more vulnerable to misappropriation.ⁿ⁷⁵ Such instances illustrate intellectual property social utility/social justice interdependence,ⁿ⁷⁶ a concept that has been explored in various important intellectual property contexts.ⁿ⁷⁷ The social justice implications appurtenant [*348] to mass-digitization of copyrighted text and Internet file sharing have been explored by copyright scholars and in major copyright controversies.ⁿ⁷⁸ Similar issues have been analyzed in the context of global health crises and pandemics, and other problems relevant to the development of patentable inventions,ⁿ⁷⁹ and enforcement of patents and trademarks in connection with pharmaceutical drugs.ⁿ⁸⁰

[*349] As is the case with other intellectual property rights, the right of publicity can be and has been invoked in the cause of concrete social utility objectives. Even the right's harshest critics would acknowledge that the right has been invoked for the socially cognizant purpose of protecting individual privacy and personal dignity.ⁿ⁸¹ In this regard, practitioners and the courts have yet to mine the full social potential of the right of publicity. For example, the problem of negative racial, ethnic, and gender stereotypes implemented through the unauthorized use of individual images or personas could be brought within the ambit of the right. Uses that result in depictions or representations that are not negative per se, but may be culturally offensive or sacrilegious, might also be analytically accessible through right of publicity doctrine.

It is possible to redress, or at least curtail, these and similar social inequities through the right of publicity. The social utility objectives that undergird the right of publicity can be interpreted to encompass pertinent remedial social justice goals, such as eradicating negative stereotypes and depictions, and culturally offensive representations, at least where individually recognizable personas are involved. Thus, the right to control the use and exploitation of one's persona can be an instrument wielded to achieve a social as well as individual monetary benefit. In such cases, an analytical interdependence between right-of-publicity social utility and remedial social justice is identified, and the law can be responsively utilized and shaped to advance socially propitious goals.ⁿ⁸² In this way, socially progressive and equitable policies [*350] can be pursued and achieved through strategic invocation and application of right-of-publicity law and doctrine.

In fact, the United States Supreme Court has articulated an extremely important and time-honored social utility/justice function in connection with the right of publicity.ⁿ⁸³ As the Court has observed, the right of publicity provides an incentive to individuals to invest effort and resources in the development and stylization of personal attributes and innovations, and to pursue activities and accomplishments of public and popular interest, with the possibility of celebrity, public renown, and attendant commercial reward.ⁿ⁸⁴

Moreover, the Court observed that social objectives of the right of publicity are as important as those promoted by patent and copyright laws, and are not always outweighed by those underlying the First Amendment.ⁿ⁸⁵ This [*351] is especially true where an individual's publicity interest would be completely eviscerated by a purported First Amendment use:

Wherever the line in particular situations is to be drawn between media reports that are protected and those that are not, we are quite sure that the First and Fourteenth Amendments do not immunize the media when they broadcast a performer's entire act without his consent. The Constitution no more prevents a State from requiring respondent to compensate petitioner for broadcasting his act on television than it would privilege respondent to film and broadcast a copyrighted dramatic work without liability to the copyright owner.ⁿ⁸⁶

When considered in the context of IP social utility, the social justice function of publicity rights becomes even more significant. Consistent with the Supreme Court's observations, subsequent courts have recognized that in instances of a conflict between the First Amendment rights and the right of publicity, free speech interests are not the only social utilities to be protected:

Having recognized the high degree of First Amendment protection for noncommercial speech about celebrities, we need not conclude that all expression that trenches on the right of publicity receives such protection. The right of publicity, like copyright, protects a form of intellectual property that society deems to have some social utility. "Often considerable money, time and energy are needed to develop one's prominence in a particular field. Years of labor may be required before one's skill, reputation, notoriety or virtues are sufficiently developed to permit an economic return through some medium of commercial promotion. For some, the investment may eventually create considerable commercial value in one's identity."

[*352] The present case exemplifies this kind of creative labor. Moe and Jerome (Curly) Howard and Larry Fein fashioned personae collectively known as The Three Stooges, first in vaudeville and later in movie shorts, over a period extending from the 1920's to the 1940's. The three comic characters they created and whose names they shared - Larry, Moe, and Curly - possess a kind of mythic status in our culture. Their journey from ordinary vaudeville performers to the heights (or depths) of slapstick comic celebrity was long and arduous. Their brand of physical humor - the nimble, comically stylized violence, the "nyuk-nyuks" and "whoop-whoop-whoops," eye-pokes, slaps and head conks - created a distinct comedic trademark. Through their talent and labor, they joined the relatively small group of actors who constructed identifiable, recurrent comic personalities that they brought to the many parts they were scripted to play.ⁿ⁸⁷

Resourceful ingenuity and creativity exercised under challenging socio-economic conditions often spur the development, refinement, and stylization of personal attributes and individual innovations, which can in turn engender enormous popular culture interest and concomitant commercial potential.ⁿ⁸⁸ However, institutionalized barriers to information, financial capital, and legal support often preclude marginalized innovators from taking a full advantage of commercial exploitation while facilitating exploitation by majority enterprises and concerns.ⁿ⁸⁹ The misappropriation or other inequitable exploitation of the publicity rights of members of marginalized groups, which have fewer entrepreneurial/access to wealth opportunitiesⁿ⁹⁰ presents an especially inviting opportunity for a social justice oriented application of the right of publicity, since such unfair exploitation undermines the enunciated social utility/ **[*353]** justice goals of the right of publicity as well as ecumenical principles of justice.ⁿ⁹¹

To properly assess and balance right-of-publicity interests against other important societal goals, and thereby delineate socially productive parameters for publicity rights, it is necessary to identify important social utility functions underlying the right of publicity. Invocation of the overarching social utility goals of intellectual property law is a cogent mechanism for resolving IP disputes in the digital information age and balancing constituent interests and competing social objectives.ⁿ⁹² Moreover, when courts evaluate intellectual property disputes within the context of social productivity and efficacy, their reasoning typically illuminates a functional interdependence between IP social utility and IP social justice: socially propitious mechanisms **[*354]** also tend to be socially just ones (and vice versa). Accordingly, the proper adjudication of right-of-publicity claims can achieve a beneficial social utility/social justice balance - one that is disrupted where the assessment is "IP social justice insensitive" or outright IP Imperialist in perspective.ⁿ⁹³

Some courts have found it difficult to achieve proper social utility balance in publicity disputes because they fail to accord proper weight to the social justice attributes of the right of publicity or to otherwise assess the full range of social utility interests at issue.ⁿ⁹⁴ The failure to appreciate these social justice objectives and concerns has caused some courts to needlessly and unfairly restrict right-of-publicity interests and sometimes inadvertently service IP Imperialistic agendas.ⁿ⁹⁵

[*355] The next Part discusses four cases involving analyses relevant to creating a more socially cognizant application of publicity laws. In the first three cases, courts' uninformed perceptions of the social utility objectives of the right of publicity led to unduly narrow, and in some instances patently unjust, applications of the law. In the final case, however, the court's analysis demonstrates how these issues can be assessed in a more socially efficacious manner.

PART IV: THE RIGHT OF PUBLICITY AND JUDICIAL "SOCIAL JUSTICE MYOPIA"

As discussed in Part III, a significant challenge to proper enforcement of publicity rights is a persistent misperception that certain, hallowed social objectives, such as those promoting free and open discourse, in disputes over the unauthorized exploitation of publicity rights. While these social interests are obviously important, there can also be competing and equally important publicity-based social utility and social justice interests at stake. Society's interest in promoting notable achievements, social equity, and economic empowerment (particularly in connection with marginalized members of society) through innovative undertakings and/or the development and exploitation of individualized styles and personas can be just as important as society's interest in unbridled expression. Consequently, to preserve social utility objectives of the right of publicity, it is essential that right-of-publicity practitioners and commentators assist the courts in identifying the full range of social utility and social justice interests involved in right of publicity cases.

The four cases discussed in this Part explore the issue of heightening judicial awareness of social utility/social justice functions of the right of publicity. The first case explores the issue of judicial insensitivity to the right of publicity social utility and social justice as a threshold matter.ⁿ⁹⁶ Where a court all but fails to acknowledge the important social function of publicity rights, virtually any competing social interest will appear to outweigh the publicity right holder's interests and can lead to inequitable and unjust results. The remaining cases analyze the problem of balancing the acknowledged [*356] social utilities of the right of publicity against other social interests.ⁿ⁹⁷ In these cases, the issue is according proper weight to the social function of the right of publicity, so as to ensure an achievement of appropriate balance of all the pertinent social interests and objectives.

A. Identifying Opportunities for the Right of Publicity Social Justice: *Brooks v. Topps Co.*ⁿ⁹⁸

The dispute in *Brooks v. Topps Co.* presented a prime opportunity for a social justice application of the right of publicity.ⁿ⁹⁹ However, the decision is a paradigm of judicial insensitivity to the social utility function of the right of publicity. In *Brooks*, Connie Brooks, the daughter of deceased African-American Baseball Hall of Famer James Bell, brought right of publicity and false endorsement claims in connection with the unauthorized use of her father's image on baseball trading cards.ⁿ¹⁰⁰ Before his death, Bell had actively exploited his celebrity persona:

Bell granted the National Baseball Hall of Fame permission to use his name and likeness on various products. In 1989, he contracted with Gartlan USA, Inc., to autograph cards that the company would sell along with figurines in his likeness. Following Bell's death, [the plaintiff] granted commercial licenses to use Bell's name and images of him. In or around 1994 and 2001, Brooks licensed Bell's name to the Upper Deck Company ... for use on baseball cards... . From approximately September 17, 1993 through June 1, 1994, she licensed Bell's name and a particular image of him to Rodrigues Studio for use on clothing and prints. She also entered into a licensing agreement with General Mills to permit it to print Bell's name and likeness on Wheaties Boxes sold around February 1996. Around mid-1996, she licensed Bell's "name and likeness" to a company called Crown Crafts, for use on throw blankets.ⁿ¹⁰¹

Subsequent to Bell's death, Brooks discovered that The Topps Trading Company ("Topps"), a well-known purveyor of sports trading cards and memorabilia, had engaged in various unauthorized uses of her father's image, whereupon she undertook extensive efforts to determine the full scope of Topps' unauthorized activities:

[*357] Topps's first contact with Brooks occurred in late 2004. Brian Koeberle ("Koeberle"), acting on behalf of Topps, contacted Brooks by telephone to ask if she would license her father's name and likeness for baseball cards to be published in 2005. At this time Brooks did not know, and Koeberle did not mention, that Topps had previously published seven cards depicting Bell. After several telephone conversations, Koeberle sent Brooks an unsolicited proposed license agreement. Under this draft, dated December 17, 2004, Topps would have paid Brooks \$ 5,000 for the non-exclusive right to use Bell's name and image on its trading cards for the year 2005. Koeberle stated in the cover

letter that Brooks had agreed in the telephone call to this offer, but she had not done so. Brooks rejected this agreement.

In early 2005, a friend told Brooks that Topps might have sold a Bell card. Brooks asked Topps about this. On February 15, 2005, she received a letter from Philip J. Carter ("Carter"), Director of Sports/Player Licensing at Topps, enclosing the 2004 eTopps card and one of the 2004 Tribute Hall of Fame cards and saying that Carter was still looking for other cards Topps may have published depicting Bell. Brooks called Carter and told him she wanted Topps to stop engaging in any conduct relating to Bell, requested compensation for the two cards Topps had printed in 2004, and asked if Topps had printed any other Bell cards.

In mid-2005, a friend of Brooks showed her one of the 2001 Topps Bell cards. Brooks immediately contacted Carter, who asked questions about the card and said he knew nothing about it but would look into it. In response to further inquiries from Brooks, Carter said he was unable to find any information about the 2001 card or any other Bell card.

On June 26, 2005, Topps offered Brooks \$ 35,000 to sign a settlement agreement and release of liability ("Settlement Agreement"). She refused and asked again for an accounting of all of the Bell cards Topps had published.

On December 27, 2005, Brooks wrote a letter to Carter demanding a retraction of the erroneous Nickname Statement, a luncheon in her father's honor, and full information about all of the Bell cards Topps had published. Carter responded by offering to publish a correction of the Nickname Statement and to discuss publishing another Bell card on condition that Brooks sign the Settlement Agreement.

By letter dated January 31, 2006, Adam Zucker, Carter's successor, provided Brooks with a list of "all cards of Cool Papa Bell produced by Topps from 2001-2005." ⁿ¹⁰²

[*358] Although there was no dispute as to Topps' unauthorized conduct, Topps moved for summary judgment on the grounds that the statute of limitations had run. ⁿ¹⁰³ The motion was granted by the court:

The relevant New York cause of action, an action for right of publicity claims ... has a one-year statute of limitations... . Under the single publication rule, this limitations period runs from the date of an offending item's publication, and "the dissemination of that same offending item thereafter does not give rise to a new cause of action, nor does it refresh the running of the statute of limitations."

The first publication of the most recent baseball card at issue...occurred on November 1, 2004. Brooks filed her lawsuit more than one year later, on March 27, 2006. ⁿ¹⁰⁴

The court was unmoved by Brooks' arguments that the limitations period should be tolled in light of Topps' evasive actions:

[Brooks] argues that the discovery rule, under which the statute of limitations would run from the date on which she discovered or reasonably could have discovered the defendant's actions, should apply here. Brooks does not contend that New York courts have ever found that a right of publicity claim accrues upon discovery, but argues that it should be adopted here in order to avoid depriving her of "a reasonable chance to assert a valid claim."

... .

... Brooks' request for such an extension is rejected. Under New York law, statutes of limitations "cannot be deemed arbitrary or unreasonable solely on the basis of a harsh effect."

Brooks next argues that Topps should be estopped from asserting a statute of limitations defense because it concealed the existence of certain cards from her.

...

December 7, 2005 was at least arguably within the limitations period for the non-disclosed 2004 cards. There is no evidence, however, that Topps made affirmative misrepresentations to Brooks within one year of the date the cards were published.ⁿ¹⁰⁵

[*359] The court's latter finding seems not only cursory, but also social utility/justice blind. A reasonable fact-finder could have concluded that Topps had indeed engaged in a well-timed subterfuge, which conveniently came to a halt (and with a comprehensive listing of all unauthorized uses of Bell's image) just weeks after the limitations period ran. In addition, Bell's daughter had commenced the litigation as a pro se litigant. These facts would seem to indicate that a weighing of the relevant equities strongly supported the tolling of the statute.ⁿ¹⁰⁶

Unfortunately, the court seemed concerned only with the social utilities underlying the limitation rules, which is particularly unsatisfying because few, if any, of these utilities were actually implicated in the litigation. For example, the operative facts covered a relatively short and recent time period, and thus the typical concerns over stale evidence, faulty memories, or unavailable witnesses were not an issue.ⁿ¹⁰⁷ Moreover, not only does the court's **[*360]** decision fail to promote statute of limitations' objectives, it undermines the policies underlying the right of publicity, as well as general notions of social justice, and further promotes IP imperialist overreaching. Defendant Topps is a major purveyor of IP products that aggressively protects its own IP rightsⁿ¹⁰⁸ but apparently has no qualms about engaging in the brazenly illegal use of an African American baseball legend's image and persona. The result here is a paradigmatic reinforcement of the "what's mine is mine but what's your is ours" robber baron view of IP rights.

One explanation for the court's narrow approach may be insensitivity to the social utilities underlying Bell's publicity rights, of which the court seems to take no notice. There was little societal benefit in allowing the pirated use of Bell's image. However, there were important social utilities to be served in protecting the rights of a socially marginalized African-American sports figure, who achieved a successful baseball career and developed a celebrity persona despite being denied many social and legal rights and advantages.ⁿ¹⁰⁹ As the Supreme Court observed in *Zacchini*, providing encouragement for this kind of social productivity is one of the central purposes underlying publicity rights.ⁿ¹¹⁰

The Brooks decision demonstrates the need for threshold sensitivity to the social utility/justice bases of the right of publicity. In this case, where the countervailing social utilities were virtually non-existent, recognition of these important functions of publicity rights would almost certainly have resulted in the opposite outcome.

B. Balancing First Amendment and Right of Publicity Social Utility: *Brown v. Electronic Arts, Inc.*ⁿ¹¹¹

Even when courts acknowledge the social utility of the right of publicity, they often fail to afford it an appropriate weight, when measured against competing social objectives. Arguably, the most challenging balancing problems are those involving First Amendment rights. Despite the Supreme **[*361]** Court's admonitions in *Zacchini*, many courts demonstrate almost Pavlovian deference to free speech claims, when confronted with a First Amendment defense to a claim of misappropriation of publicity rights.ⁿ¹¹²

Brown v. Electronic Arts, Inc., provides a recent example.ⁿ¹¹³ In *Brown*, NFL Hall of Famer Jim Brown brought a suit claiming both Lanham Act false endorsement and state law invasion of privacy (publicity) in connection with the use of his likeness in the Madden NFL video game series.ⁿ¹¹⁴ Brown alleged that [the defendant] misappropriated his

name, identity, and likeness by including him in the games as a player on two 'historic' teams." ⁿ¹¹⁵ Although the company did not use Brown's name and jersey number in the games, Brown argued that the defendant had merely made superficial changes to the subject avatar to avoid liability:

In the games, virtual players on current NFL teams wear the names and numbers of real-life players, whereas players on historical teams are anonymous, represented by numbers and roster positions... .

... The character who purportedly represents Brown in the game is anonymous, and wears jersey number 37; Brown wore number 32... . Brown and his doppelganger have "nearly identical" statistics. ⁿ¹¹⁶

In its defense, the defendant argued, *inter alia*, that its unauthorized use constituted a literary expression protected by the First Amendment. ⁿ¹¹⁷ In resolving the dispute, the court predicated its analysis on *Rogers v. Grimaldi*. ⁿ¹¹⁸ [*362] The court began by noting that the defendant's use was a "literary expression" under the First Amendment. ⁿ¹¹⁹ "It is well established that 'video games are a form of expression protected by the First Amendment.'" ⁿ¹²⁰ Having found the use to be an expressive one, the court then applied the *Rogers* "relevance of the use to the work" standard, noting that, in its view, the level of relevance of the persona to the subject work need merely be "above zero" to sustain the unauthorized use. ⁿ¹²¹ Finally, the court observed that, in a game involving manipulation of virtual athletes and franchises, "use of a legendary NFL player's likeness in a game about NFL football is clearly relevant." ⁿ¹²² Consequently, having found the use of Brown's persona relevant to the video game (and not merely a contrived invocation of Brown's celebrity to market or advertise the game) the court (i) ruled for defendant on Brown's false endorsement claim ⁿ¹²³ and allowed the use, ⁿ¹²⁴ and (ii) declined [*363] jurisdiction over Brown's state law publicity claim and dismissed the complaint. ⁿ¹²⁵

Although the *Brown* court resolved only the false endorsement claim, its findings regarding the relevance of Jim Brown's persona to the subject work is also key to balancing First Amendment and publicity rights interests under the *Rogers* test. In fact, under *Rogers*, the assessment of the relevance of the plaintiff's persona is dispositive in resolving First Amendment/publicity disputes because, unlike false endorsement claims, there is no secondary assessment as to whether the use is also prohibitively confusing. ⁿ¹²⁶ In this regard, publicity rights are narrower than false endorsement rights, since if the unauthorized use is found expressively relevant, the right of publicity analysis is over and the use is allowed.

While the *Brown* court invokes established mechanisms ⁿ¹²⁷ in assessing the plaintiff's claims, its selection and application of these mechanisms reflects a misunderstanding of the social utility interests implicated in the dispute. To start, the *Brown* court misstates, and arguably misapplies, the *Rogers* test. Whereas the *Rogers* court sought to determine whether the use of Ginger Rogers' name in the title of a movie was "'wholly unrelated'" to the film, ⁿ¹²⁸ the *Brown* court rearticulates the *Rogers* test as calling for a level of relevance that is only "'above zero.'" ⁿ¹²⁹ Not only does such a standard essentially eliminate the relevance assessment, it all but guarantees that the unauthorized use of any notable individual's persona will always be permitted [*364] on First Amendment grounds. ⁿ¹³⁰ Under the *Brown* re-interpretation of *Rogers*, the use of Jim Brown's persona in any work concerning football, sports, movie stars, or even popular trends of the 1960s or 1970s would be permissible under the First Amendment because Jim Brown's personal accomplishments are "relevant" to each of those subjects (and many others). Even the personas of non-celebrities would be vulnerable to boundless unauthorized exploitation under *Brown*, as any notable achievement will have more than "zero relevance" to any work or product which involves the same subject matter. ⁿ¹³¹

The *Brown* court seems to miss the point of the *Rogers* test. In *Rogers*, the defendant's parody-like use of Ginger Rogers's name infused the defendant's use with the kind of relevance to the defendant's film that negated any inference that the invocation of Ginger Rogers's persona was merely a "disguised advertisement" to promote the movie. ⁿ¹³² Indeed, with only minimal investigation, Ginger Rogers's fans would quickly discover that the film had nothing to do with the iconic movie star, and thus the title "Ginger and Fred" is not likely to induce Ginger Rogers's fans to buy tickets to the film. By contrast, the key "relevance" of Jim Brown's persona to *Madden NFL* is that its inclusion fulfills the game's promise that players will have the opportunity to "compete" against Jim Brown. While this use is certainly

"relevant" to the work, it is principally "relevant" to generating consumer interest in purchasing and playing Madden NFL. Unlike Rogers, Brown does not appear to distinguish between expressive/artistic relevance and commercial/promotional relevance.

In reducing the Rogers relevance test to an "above zero" standard, the Brown court failed to account for the fact that, although Jim Brown's football exploits are indeed an important and "relevant" part of football history, not [*365] every invocation of Brown's accomplishments or attributes is undertaken for its historical value. The replication of Jim Brown's "statistical attributes" as an avatar in a commercially distributed video game or similar product might otherwise be undertaken primarily for its commercial marketing appeal, or perhaps even for a combination of promotional and expressive purposes.ⁿ¹³³ In such cases, an "above zero" relevance standard overlooks any exploitative purpose or effects arising from the use of the persona, and all but the most blatant misappropriations of an individual's publicity rights become permissible.ⁿ¹³⁴ [*366] Thus, the social utilities underlying the right of publicity are unduly diminished under Brown.

As troubling as the Brown court's misapplication of Rogers is, however, it is not the most problematic deficiency in the court's analysis. The court's most significant error is the fact that it relied upon the Rogers test in the first place. Rogers involved the use of a person's name in the title of a work; Brown concerns the use of aspects of an individual's persona in the expressive work itself. The appropriate test for assessing a purported First Amendment use of a persona within an expressive work is not Rogers, but rather is the transformative test first enunciated in *Comedy III Productions, Inc., v. Gary Saderup, Inc.*ⁿ¹³⁵

In *Comedy III*, the defendant reproduced the photographic likenesses of the Three Stooges onto t-shirts, which he sold commercially.ⁿ¹³⁶ In response to claims for infringement upon the Three Stooges' publicity rights, defendant argued that he had a First Amendment right to engage in his use - in essence, a right to "express himself" by reproducing and disseminating the Three Stooges' images.ⁿ¹³⁷ In balancing the defendant's asserted First Amendment claims against the plaintiffs' publicity rights, the court delineated the property interests and social utilities encompassed by the right of publicity:

What the right of publicity holder possesses is not a right of censorship, but a right to prevent others from misappropriating the economic value generated by the celebrity's fame through the merchandising of the "name, voice, signature, photograph, or likeness" of the celebrity.

... .

When artistic expression takes the form of a literal depiction or imitation of a celebrity for commercial gain, directly trespassing on the right of publicity without adding significant expression beyond that trespass, the state law interest in protecting the fruits of artistic labor outweighs the expressive interests of the imitative artist.

[*367]

We ask, in other words, whether a product containing a celebrity's likeness is so transformed that it has become primarily the defendant's own expression rather than the celebrity's likeness.ⁿ¹³⁸

Given that the defendant had reproduced exact replicas of the Three Stooges' likenesses, the court held that the images had been in no way "transformed" and that "the marketability and economic value of [the defendant's] work derives primarily from the fame of the celebrities depicted. While that fact alone does not necessarily mean the work receives no First Amendment protection, we can perceive no transformative elements in [the defendant's] works that would require such protection."ⁿ¹³⁹

Recently, in *No Doubt v. Activision Publishing, Inc.*, the court applied the Comedy III test to facts analogous to those at issue in *Brown*.ⁿ¹⁴⁰ In *No Doubt*, a computer-generated likeness of the rock band No Doubt was used in certain ways in a video game without the band's permission.ⁿ¹⁴¹ Since the use of No Doubt's persona was within the subject work, the court did not apply the Rogers test for evaluating titles, but instead applied the Comedy III transformative test.ⁿ¹⁴² The defendant argued that it satisfied the Comedy III test because it made various expressive contributions in creating the video game, but the court disagreed with that interpretation of the transformative test.ⁿ¹⁴³ Notwithstanding the defendant's expressive contributions to the game as a whole, the court found that the defendant had not altered or transformed No Doubt's image, and thus the video game simply depicted the band "doing what they do" (performing rock music):

In [the video game] *Band Hero* ... no matter what else occurs in the game during the depiction of the No Doubt avatars, the avatars perform rock songs, the same activity by which the band achieved and maintains its fame. Moreover, the avatars perform those songs as literal recreations of the band members. That the avatars can be manipulated to perform at fanciful venues including outer space or to sing songs the real band would object to singing, or that the avatars appear in the context of a videogame that contains many other creative elements, does not transform the avatars into anything other [*368] than exact depictions of No Doubt's members doing exactly what they do as celebrities.ⁿ¹⁴⁴

Comedy III and *No Doubt* therefore hold that where the use of an individual's persona in a work merely depicts the individual "as she is," the defendant has not undertaken any expressive transformation of the persona and is merely exploiting the individual's recognizable likeness, i.e., the marketability and commercial value derives from the fame of the depicted celebrity:ⁿ¹⁴⁵

[*369] Activision's use of life-like depictions of No Doubt performing songs is motivated by the commercial interest in using the band's fame to market *Band Hero*, because it encourages the band's sizeable fan base to purchase the game so as to perform as, or alongside, the members of No Doubt. Thus, insofar as the depiction of No Doubt is concerned, the graphics and other background content of the game are secondary, and the expressive elements of the game remain "manifestly subordinated to the overall goal of creating a conventional portrait of [No Doubt] so as to commercially exploit [its] fame."ⁿ¹⁴⁶

Such were also the circumstances *Brown*: the plaintiff was simply depicted "doing what he does"ⁿ¹⁴⁷ in order to generate consumer interest in the video game. As the Supreme Court noted in *Zacchini*, however, "no social purpose is served by having the defendant get free some aspect of the plaintiff that would have market value and for which he would normally pay."ⁿ¹⁴⁸

[*370] Finally, the *Brown* decision also demonstrates how a "knee-jerk" First Amendment categorization of a mixed promotional/expressive use of a persona in an unauthorized work can inadequately address the societal and constituent interests implicated in such a use.ⁿ¹⁴⁹ Moreover, the failure to employ a more socially nuanced approach tends to promote IP imperialist overreaching. Whereas the NFL and its licensees aggressively protect their copyright and trademark interests, but it seems publicity rights of others are fair game - or, at least, subject to narrow interpretation and application.ⁿ¹⁵⁰ Aiding and abetting such IP Imperialist stratagems may serve IP conglomerate interests, but contravenes right-of-publicity social utility and undermines pervasive respect for the IP regime.ⁿ¹⁵¹

C. Reconciling Competing Intellectual Property Social Utilities: *Laws v. Sony Music Entertainment, Inc.*ⁿ¹⁵²

Courts are increasingly confronted with another difficult social-utility balancing problem in resolving right-of-publicity disputes: preserving any authorized copyright interests that favor allowing the unauthorized use of publicity rights subsumed within the copyrighted work. A wholly unauthorized expressive work may require the invocation of the First Amendment to insulate the unauthorized publicity use. However, an authorized expressive [*371] work will implicate traditional copyright interests, such as the right to reproduce or distribute the work, which may conflict with any legitimate publicity rights also present in the work. Similar to the First-Amendment-versus-right-of-publicity cases,

courts seem to have difficulty placing publicity interests on par with copyright interests, often displaying a "knee-jerk" deference to copyright claims.

Laws v. Sony Music Entertainment, Inc., provides a particularly interesting example of the problem. The publicity interests involved in the case, although subtle, are extremely significant from an IP social justice perspective. The plaintiff, Debra Laws, was an Elektra recording artist and Elektra held the copyrights in Laws' sound recordings.ⁿ¹⁵³ When Laws initially signed with Elektra, however, the company expressly agreed that "'we or our licensees shall not, without your prior written consent, sell records embodying the Masters hereunder for use as premiums or in connection with the sale, advertising or promotion of any other product or service.'" ⁿ¹⁵⁴

Elektra subsequently granted Sony a license to sample a segment from one of Laws' recordings into a song by singer artist Jennifer Lopez, whereupon Laws brought suit against Sony for misappropriation of her name and voice.ⁿ¹⁵⁵ Sony ultimately moved for summary judgment on the grounds that Laws' suit was essentially one for unauthorized reproduction of her copyrighted sound performance, which Sony argued was preempted by copyright law.ⁿ¹⁵⁶ Laws argued, however, that her misappropriation claims were substantively different from claims for copyright infringement:

Laws ... contends that the subject matter of a copyright claim and a right of publicity claim are substantively different. She argues that a copyright claim protects ownership rights to a work of art, while a right of publicity claim concerns the right to protect one's persona and likeness. Sony, by contrast, contends that the subject matter of a right of publicity in one's voice is not different from a copyright claim when the voice is embodied within a copyrighted sound recording. Sony argues that once a voice becomes part of a sound recording in a fixed tangible medium it comes within the subject matter of copyright law.ⁿ¹⁵⁷

[*372] Sony reasoned that, because it had used a copyrighted recording of Laws' voice, her state misappropriation rights were subsumed within the copyrights attendant to that recording.ⁿ¹⁵⁸ The court agreed:

We think it is clear that federal copyright law preempts a claim alleging misappropriation of one's voice when the entirety of the allegedly misappropriated vocal performance is contained within a copyrighted medium... .

... .

... [Moreover] Sony did not use Laws's image, name, or the voice recording in any promotional materials. Her state tort action challenges control of the artistic work itself and could hardly be more closely related to the subject matter of the Copyright Act.ⁿ¹⁵⁹

The court further held that, to the extent that Laws' state law claims required an "extra element" beyond those that constitute a claim for copyright infringement, these elements were insufficiently distinctive to avoid copyright preemption:

Laws contends that her right of publicity claim under California Civil Code § 3344 requires proof of a use for a "commercial purpose," which is not an element of a copyright infringement claim. She concedes that a right which is the "equivalent to copyright" is one that is infringed by the mere act of reproduction; however, she argues that her claim is not based on Sony's mere act of reproduction, but "is for the use of ... Laws'[s] voice, the combination of her voice

with another artist, and the commercial exploitation of her voice and name in a different product without her consent."

... .

[However,] the mere presence of an additional element ([in this case] "commercial use") ... is not enough to qualitatively distinguish Laws's right of publicity claim from a claim in copyright. The extra element must transform the nature of the action. Although the elements of Laws's state law claims may not be identical to the elements in a copyright action, the underlying nature of Laws's state law claims is part and parcel of a copyright claim. ⁿ¹⁶⁰

[*373] While Laws is in some ways a close analytical case, the Laws court, much like the Brown court, seems unduly deferential to the copyright interests implicated in the case - almost to the point of ignoring settled federal intellectual property law preemption precedent. ⁿ¹⁶¹ Once again a court has failed to give proper weight to the full range of social utilities that support the plaintiff's right of publicity interests.

With respect to the defendant's copyright claims, the court's preemption analysis certainly leaves something to be desired. The court's reading of the additional-element test is unduly constrained. Moreover, the court seems to presume that the presence of a copyright in the original sound recording used by Sony completely negates the possibility of additional, alternative intellectual property rights and interests in, as well as non-copyright uses for, the work. Courts and commentators have long recognized the possibilities for co-existing intellectual property rights in a single work, and have afforded due consideration to each such interest. ⁿ¹⁶² In a reactionary effort to protect the sanctity of copyright, the court overlooks the fact that a copyrighted work can be used for a primarily promotional purpose unrelated to the work itself or its expressive message. ⁿ¹⁶³

While Sony's sampling use of Laws' recording certainly involved some expressive intentions and effects, it was also arguably a use undertaken to provide "street cred" to the Jennifer Lopez recording and thereby to promote it (and Lopez) to the "urban" and R&B commercial markets. As in No Doubt and Brown, the plaintiff's persona is incorporated in to the work depicting plaintiff "doing what she does" in order to enhance consumer interest in the work. From this perspective, the right of publicity social utilities seem at least as important as the copyright-expressive social utilities at issue. Moreover, when considering the issue of intellectual property social justice, the **[*374]** Lopez promotional impact becomes a critical factor in balancing the interests at stake in the dispute. Consistent with the tradition of American IP Imperialism, the recording industry has a long history of using the creative talents, innovations, and stylizations of African-American artists to promote the records and careers of white artists. ⁿ¹⁶⁴ This may well have been the reason **[*375]** Laws negotiated the "no promotional use in connection with other artists" clause of her contract. ⁿ¹⁶⁵ As a "cross-over" recording artist, Jennifer Lopez has been marketed to majority audiences and has enjoyed a multifaceted entertainment career in the recording, television, movie, and now fragrance industries. ⁿ¹⁶⁶ To the extent that Lopez's mega-celebrity is fueled by the vocal stylings of a lesser-known African-American R&B recording artist, the right of publicity social justice implications warrant serious consideration - certainly more consideration than that given by the Laws court.

While the problem of mixed "expressive/promotional" use of publicity rights is as challenging here as in the First Amendment context, once again it is not intractable. In the next case, the Third Circuit Court of Appeals also confronts the problem and demonstrates a right-of-publicity social utility/social justice sensitivity more highly attuned than that demonstrated in the cases discussed thus far.

D. Assessing the "Social Utility Authenticity" of Publicity Defenses: *Facenda v. N.F.L. Films, Inc.* ⁿ¹⁶⁷

In *Facenda v. N.F.L. Films, Inc.*, the court confronted the same intersection of copyright and right of publicity problem that was at issue in Laws. ⁿ¹⁶⁸ However, this court employed a more nuanced analysis and reached a very different outcome. ⁿ¹⁶⁹ In this case, the estate of well-known football commentator John Facenda brought suit when the NFL used portions of Facenda's voice-over work from previously authorized copyrighted programs in a new, unauthorized program concerning the football video game Madden NFL 06. ⁿ¹⁷⁰ In essence, the NFL "sampled" portions of Facenda's

voice-over recordings from one program into another. Facenda's Estate claimed that the "use of Facenda's voice falsely suggested that Facenda endorsed the video game" and also violated Facenda's right of publicity under Pennsylvania law. ⁿ¹⁷¹ Just as Sony argued in *Laws*, the NFL argued that the copyrights it [*376] held in the original NFL programs that Facenda narrated gave it the right to reuse portions of those works in subsequent expressive works. ⁿ¹⁷²

As did the court in *Brown*, the Facenda court began its false endorsement analysis by invoking the Rogers test. ⁿ¹⁷³ It first considered the threshold question as to whether the unauthorized use was in fact expressive, as opposed to merely promotional:

Before considering whether either prong of the Rogers test applies, however, we must decide whether the television production is a "work[] of artistic expression," as understood in the context of construing the [plaintiff's persona rights] narrowly to avoid a conflict with the First Amendment

... .

The Estate contends that the [new] program is commercial speech, and we agree. Our Court has "three factors to consider in deciding whether speech is commercial: (1) is the speech an advertisement; (2) does the speech refer to a specific product or service; and (3) does the speaker have an economic motivation for the speech." ⁿ¹⁷⁴

In short, the court did not presume that, because Facenda's voice was reproduced in an expressive work, the defendant's use of Facenda's voice was expressive. Instead, upon finding the NFL's subsequent use to be more promotional than expressive in nature, the court distinguished the facts from those in *Rogers* (which involved a parody-like use of the plaintiff's persona), and instead applied the traditional, trademark likelihood-of-confusion analysis (as tailored to false-endorsement claims). ⁿ¹⁷⁵ Finding it likely that consumers [*377] would believe that Facenda had endorsed Madden NFL 06, the court held in favor of Facenda's estate. ⁿ¹⁷⁶

With regard to plaintiff's right of publicity claim, the court acknowledged that:

By using the sound clips of Facenda's voice ... the NFL was exercising its exclusive right to make derivative works of those sound clips under § 106(2). In effect, it was "sampling" itself, making a collage, taking a small piece of an old work and using it in a new work - as when a hip-hop group samples the drum part from James Brown's "Funky Drummer." ⁿ¹⁷⁷

Nonetheless, if the right of publicity is qualitatively different from the derivative work right, it is not preempted. "In other words, for a state-law claim to be preempted by copyright law, it must protect (1) an exclusive right in (2) a work within copyright's subject matter." ⁿ¹⁷⁸

In direct contrast to the findings in *Laws*, the Facenda court concluded that Facenda's publicity rights were distinct from copyright because:

The requirement under the [state] statute that Facenda's voice have "commercial value," provides an additional element beyond what a copyright-infringement claim requires... .

... [In addition,] does Facenda's voice fall under the subject matter of copyright? The Court of Appeals for the Ninth Circuit has stated, in the context of vocal imitations, that "[a] voice is not copyrightable..." We hold that Facenda's voice is outside the subject matter of copyright. ⁿ¹⁷⁹

[*378] Finally, having distinguished Facenda's publicity rights from the NFL's copyright claims, the court directly addressed the apparent conflict between the competing rights:

In some situations ... the right of publicity clashes with the exploitation of a defendant's copyright. Unlike the plaintiffs in cases involving vocal imitations, Facenda collaborated with the NFL to create the copyrighted sound recordings at issue... this gives the NFL a stronger preemption defense than the vocal-imitation defendants... Where a defendant in a right-of-publicity claim obtained a copyright in a work featuring the plaintiff, courts must separate legitimate exploitations of what Congress intended to be a copyright holder's exclusive rights from particular uses that infringe the right of publicity. ⁿ¹⁸⁰

Thus, even where the right of publicity is qualitatively different from a copyright exclusive right (and therefore not automatically preempted), enforcement of the publicity right may interfere with the copyright holder's exploitation and use of one or more of her exclusive rights. In such a case, the right of publicity might be preempted on that basis. To determine whether Facenda's publicity rights conflicted with the NFL's exclusive copyrights in the original program, the court set forth an analytical road map:

First, we look to how the copyrighted work featuring the plaintiff's identity is used. Surveying the case law, [David] Nimmer finds that when defendants use the work "for the purposes of trade," such as in an advertisement, plaintiffs' right-of-publicity claims have not been held to be preempted.

... .

The second part of Nimmer's framework addresses the way that contracts affect the preemption analysis. Nimmer proposes that courts should examine the purpose of the use to which the plaintiff initially consented when signing over the copyright in a contract. He argues that the proper question in cases involving advertising and a contract between the plaintiff and the defendant - such as our case - is whether the plaintiff "collaborated in the creation of a copyrighted advertising product." If the plaintiff did collaborate in that fashion, then the party holding the copyright is in a very strong position to contend that allowing the plaintiff to assert a right of publicity against use of its likeness in advertising would interfere with the rights it acquired. If, on the other hand, the plaintiff did not collaborate specifically in the creation of advertising content, then the plaintiff is in a strong position to assert continuing control over the use of his image. ⁿ¹⁸¹

[*379] Just as was the case in *Laws*, (i) Facenda had not collaborated in the creation of the subsequent program, and (ii) he expressly reserved his publicity rights when he agreed to narrate the original NFL programs. ⁿ¹⁸² Moreover, the court had already determined, in connection with the disposition of Facenda's false endorsement claim, that the NFL's later use was more promotional than expressive in nature. ⁿ¹⁸³ Accordingly, the court concluded that the NFL did not have a legitimate copyright expectation that it would be able to use Facenda's voice work in the original program for subsequent promotional purposes unrelated to the original program. ⁿ¹⁸⁴ Consequently, the court held that Facenda's right of publicity was not preempted by the NFL's copyrights in the original programs. ⁿ¹⁸⁵

[*380]

PART V: PROMOTING SOCIAL JUSTICE THROUGH THE RIGHT OF PUBLICITY: A FRAMEWORK FOR ENFORCING THE RIGHT AND BALANCING COUNTERVAILING SOCIAL UTILITIES

Although the court in *Facenda* does not expressly rest its decision on a social justice interpretation and application of right-of-publicity law, its reasoning is consistent with intellectual property social justice mandates and illustrates the benefits of a socially balanced approach to right-of-publicity disputes. Unlike the courts in *Brown* and *Laws*, the *Facenda* court did not presume that the social utility interests that appeared to conflict with the plaintiff's publicity rights were superior to the social utility objectives which underlie the right of publicity, or, for that matter, that these competing interests were even socially significant. Instead the court endeavored to assess the social utility authenticity of the asserted copyright claims and then weighed it against the plaintiff's publicity interests. This careful approach restores the right of publicity to its proper place in the intellectual property pantheon:

[A] defendant's ownership of copyright or a license of copyright in a particular photograph, motion picture or phonorecord of plaintiff should not be a defense to assertion of infringement of plaintiff's right of publicity. A copyright, no more than any other property right, cannot be a license to trample on other people's rights. A copyrighted book or motion picture is certainly capable of defaming people, yet no one seriously argues that because the book or film is copyrighted, its contents are free from claims of libel under state law... .

All of these sorts of liability for violation of state law in one way or another "interfere" with the federal "rights" of a copyright owner. That an owner of property is not completely free to do as he or she wishes with the property should be no news to the owner of any property right.ⁿ¹⁸⁶

By pausing to determine the nature and extent of the copyright legal and social interests at issue and then carefully considering whether they are, in fact, directly in conflict with the plaintiff's publicity interests, the *Facenda* [*381] court uncovered the true tension between the parties' respective intellectual property rights. The defendant's desire to use its copyright to commercially exploit aspects of *Facenda*'s persona was at direct odds with the plaintiff's desire to obtain compensation for the promotional (non-copyright) use of that persona. Once the presumption of "copyright social superiority" was removed from the equation, a more accurate and equitable balancing of the parties' interests could be achieved - and the right of publicity's social justice objectives more properly served. Equity favors that plaintiffs benefit from the commercial exploitation of their personas:

The right of publicity is not restricted to superstar, nationally known athletes and entertainers. It applies to everyone. For example, it applies to the long distance runner who won an Olympic medal twenty years ago, is now selling insurance in Iowa and whose name and accomplishments are printed today on a box of breakfast cereal to help sell the cereal. Who is more entitled to that commercial value? The former Olympian or the breakfast cereal conglomerate?... .

Look at the recent cases involving well-known celebrities. How would you decide which party is most deserving and whether the award of damages distributed wealth "upwards"? Would you pick Samsung Electronics, a Korean electronics firm with \$ 10 billion in annual sales as more deserving than letter turner Vanna White? Would you pick Frito-Lay, with \$ 4.4 billion a year in sales and which is owned by Pepsi Cola, with \$ 25 billion of sales a year, as more deserving of the marketing value of Tom Waits' voice than Tom Waits himself? I would not.ⁿ¹⁸⁷

[*382]

A. A Right of Publicity Social Justice Framework

A social-justice sensitive-interpretation of the right of publicity not only promotes the IP social objectives of inclusion and empowerment, it also invigorates the doctrinal foundations of the right such that it stands on par with the other rights that comprise the American IP regime. As illustrated by *Facenda*, appreciation for publicity right social utility/social justice interdependence removes the stigma of "IP Illegitimacy" and grants publicity rights a status equal to that enjoyed by its IP forbears. Many right-of-publicity adjudications, however, often indicate a lack of effective social justice divination tools essential to achieving such results.

Right-of-publicity jurisprudence could benefit from the development of an analytical framework through which the social utilities that undergird publicity rights might be more concretely identified and assessed, particularly where competing social objectives are involved. Based upon the analyses of the litigation disputes discussed herein, as well as other publicity cases, courts should consider following four evaluative steps:

Identify and evaluate the specific publicity social utilities and social justice interests at issue;

Identify and evaluate any competing social utility/social justice interests;

Select and properly apply an appropriate social balancing test; and

Consider the equities and the rule of *eBay vs. Mercexchange, L.L.C.*ⁿ¹⁸⁸ in balancing the respective rights and social interests.

B. Identifying the Pertinent Right of Publicity Social Utility and Social Justice Concerns

While the identification and evaluation of publicity right social utilities may seem an obvious initial step in adjudicating publicity disputes, many courts seem to overlook it, especially when the publicity defendant raises the First Amendment banner. Courts routinely review the legal elements of the right of publicity cause of action and typically end their analysis of the plaintiff's interests there. Once potentially contrary social considerations are introduced, some courts seem to simply take for granted that any analogous publicity interests are comparatively inferior. This is one reason why the right of publicity fares so poorly when courts undertake to "balance" the competing social interests in these disputes. Given the at best perfunctory review of the publicity social function, especially as compared with the almost pious analysis generally afforded even nominal First Amendment arguments, it should come as no surprise that the publicity social interest weighs in as a bantam-class amateur facing off against a heavy-weight champion - the fight is over before the first bell rings.

Right-of-publicity advocates should assist courts in becoming more cognizant of any relevant publicity social utility and social justice interests that [*383] could affect publicity litigation outcomes. The court in *Parks* did not have to look far to find an important right of publicity social utility/social justice interest in the case before it: she was sitting in the plaintiff's chair.ⁿ¹⁸⁹ However, not all right-of-publicity plaintiffs have the status of a Civil Rights icon, and there is a need for greater social insight, intuition, and common sense in the adjudication of these disputes.ⁿ¹⁹⁰ Disregard for right of publicity social justice increases the likelihood of miscarriages of justice both as a matter of intellectual property rights enforcement and as a matter of general fairness, justice, and equality before the law. Proper appreciation for the social functions of publicity rights will better enable courts to avoid patently unjust outcomes such as that in *Brooks* and similar cases. Moreover, it will enhance judicial capability to fulfill the overarching policy objectives supporting the inclusion of publicity rights in the intellectual property positive law regime.ⁿ¹⁹¹

C. Identifying and Evaluating Competing Social Utilities and Interests

Unlike right of publicity social utilities, courts almost always afford serious weight to the First Amendment and non-publicity IP social utilities which arise in publicity disputes. The problem is that great deference is [*384] sometimes afforded to such interests with little assessment as to the extent of their actual presence or vulnerability in a

specific publicity conflict. All assertions of the First Amendment do not raise identical sets of policy questions and concerns. As demonstrated by the analyses undertaken in cases such as *Parks* and *Facenda*, it is important that courts resist the urge to react viscerally to invocations of free speech or "superior" intellectual property rights and policies, and instead strive to uncover the precise nature and extent of the non-publicity social utilities actually implicated by the specific facts and equities before them.

D. Applying an Appropriate Balancing Test

Even when a court has properly considered all of the pertinent social utilities and interests in a publicity dispute, it can still reach an erroneous decision if it fails to select and properly apply an appropriate balancing-of-the-interests test. As discussed in connection with the *Brown* case, the various judicial balancing tests are not interchangeable.ⁿ¹⁹²

While many of the leading balancing tests were conceived with First Amendment concerns in mind, courts must be mindful that these tests are also intended to protect legitimate publicity interests.ⁿ¹⁹³ The task is not limited to assessing the impact on free speech if the unauthorized use is precluded; it also entails assessing the impact on publicity rights if the unauthorized use is allowed.ⁿ¹⁹⁴

The importance of this point becomes evident in considering judicial interpretations and applications of the leading publicity-balancing test, the *Comedy III* transformative test.ⁿ¹⁹⁵ The purpose of the transformative test is just as its name implies: to assess the extent the plaintiff's image or persona is transformed in the defendant's work.ⁿ¹⁹⁶ Accordingly, the court's inquiry should focus on any expressive embellishments that the defendant has added to the plaintiff's image or persona to determine whether the result is more the defendant's expressive creation (permissible) than it is merely a depiction or replication of the plaintiff (impermissible). Some courts, however, employ the transformative test to evaluate and weigh the overall expressive quality of the defendant's work, which misconstrues the purpose of the test. While an overall assessment of the defendant's expressive contributions may be relevant to analyzing whether the work is copyrightable, it says little or nothing about the impact of those contributions on the plaintiff's image and concomitant publicity interests. For example, today it is possible to insert the image [*385] of Ginger Rogers and Fred Astaire dancing in to a variety of new settings and contexts, some of which may be highly creative. Unless these new settings transform Rogers and Astaire's individual images, however, it is their publicity interests that are being traded upon, notwithstanding the fact that defendant's work may be highly creative and artistic as a whole.ⁿ¹⁹⁷ The issue is particularly troublesome when courts are called upon to apply existing tests to unauthorized publicity persona uses that are mixed promotional/expressive uses. *Facenda* meets this challenge by applying the *Rogers* tests to expressive works that are advertisements. Where the work is not an advertisement, however, it seems appropriate to apply the *Comedy III* test to assess whether the defendant has so transformed the plaintiff's persona such that the commercial value or appeal of the result is not derived from plaintiff's persona. In this regard, *Comedy III*, *No Doubt*, and *Keller*, properly focus on changes to the plaintiff's image, as opposed to defendant's creative contributions to the work as a whole.

Courts misapply right-of-publicity balancing tests when they use them only to evaluate the First Amendment or other expressive merits of a defendant's unauthorized work. Again, it is an undue emphasis on these countervailing social utilities that is the source of the confusion. Regardless of how highly expressive a work is, the court must still consider the other side of the balance - the impact of defendant's use on the plaintiff's publicity interests - even if only to affirm that these interests are ultimately outweighed by the competing social concerns.ⁿ¹⁹⁸

[*386]

E. Balancing the Legal Rights and Social Equities

Finally, in balancing the competing interests, it is important that the relevant equities be included on the scales. Particularly where a weighing of the competing social utilities presents a close case, consideration of the relevant equities should tip the scales toward the side of social justice. Had the social equities been considered in *Brooks*, the

plaintiff's undeniably unclean hands in its willful violation of Brooks' publicity rights, and subsequent acts to conceal its misconduct, would have supported a tolling of the limitations period to allow the plaintiff to proceed with an indisputably valid claim.ⁿ¹⁹⁹

Courts must also become more vigilant toward disguised IP Imperialist maneuvers to annex individual publicity interests (as well as other intellectual property rights) into their IP empires. A thorough assessment of the social utility authenticity of a publicity defendant's claims is particularly critical when the defendant is a major purveyor of IP commodities and the plaintiff is a member of a marginalized group for whom right of publicity incentives and benefits can provide a vital avenue for economic empowerment and social advancement.ⁿ²⁰⁰

[*387] A weighing-of-the-equities approach not only promotes IP social justice by restraining IP Imperialist overreaching and supporting socially valuable encroachments upon publicity rights, it is also consistent the Supreme Court's directive in *eBay v. Mercexchange, L.L.C.*,ⁿ²⁰¹ that infringement upon intellectual property rights does not automatically mandate injunctive relief.ⁿ²⁰² This approach not only preserves an individual publicity plaintiff's interests, but also serves to protect society's social interests as a whole. Unless the weighing of the equities mandates injunctive relief, the fact that the equities in a particular case favor the right of the publicity plaintiff will not preclude the unauthorized use of her persona altogether. Instead, consistent with the Supreme Court's observations in *Zacchini*, it will merely assure her a portion of the revenues generated by the unauthorized use.ⁿ²⁰³

[*388]

PART VI: CONCLUSION

It is high time that the bench and bar revisit the social mandate of the Constitution that the intellectual property law promote the progress of the arts and sciences and thereby serve the greater societal good:

Intellectual property rights are not merely technical matters. They increasingly involve crucial questions not only of economic interest, competitiveness, and market power, but also of environmental sustainability, human development, ethics and international human rights. We need to start using intellectual property to reduce and eliminate hunger and poverty, to safeguard the environment, to halt the loss of biodiversity, to empower women, and to ensure food and social security.ⁿ²⁰⁴

Courts adjudicating right-of-publicity disputes should carefully consider the social utility goals underlying these rights, as they serve important social goals and promote social justice as an element of the intellectual property regime. Judicial recognition of the functional interdependence of right of publicity social utility and social justice not only restrains socially unproductive IP Imperialism, but also promotes inclusion and participation in the IP regime. The pursuit of such socially balanced applications of the intellectual property law will only enhance the social benefits to be obtained through the development of new intellectual properties and their exploitation in the digital information age.

In the late nineteenth century, Anthony Trollope blamed American book piracy on 'the book-selling leviathans.' A century later, Professor Jessica Litman told us that 'the only way that copyright laws get passed in this country is for all of the lawyers who represent the current stakeholders to get together and hash out all of the details among themselves.' Since then, commentators have discussed at length the gaps between the 'copyright-rich' and 'copyright-poor' and between the haves and have-nots in the copyright system... Today, a copyright divide exists between those who have stakes in the existing copyright regime and those who do not. On one side of the divide are the stakeholders, who are eager to protect what they have under the existing regime... On the other side of the divide are the nonstakeholders. These nonstakeholders neither understand nor believe in the copyright system... Unless the nonstakeholders understand why copyright needs to be protected and until they become stakeholders or potential stakeholders, they will not be eager to abide by copyright laws or to consent to stronger copyright protection." (emphasis added)).

n7. See Doris Estelle Long, *Traditional Knowledge and the Fight for the Public Domain*, 5 J. Marshall Rev. Intell. Prop. L. 617, 620 (2006) ("One of the interesting things in talking to indigenous peoples about the public domain is the response they provide. The concept of the public domain does not currently exist in many indigenous communities except in the form of 'your public domain' versus 'my cultural heritage.' When asked, indigenous peoples often respond with the same question. 'How come "public domain" is my stuff? Yours is copyrightable and mine is in the public domain. How did that happen?' The answer, of course, is that we have developed a nice approach to protection. New works get protected. Their works have been around too long. Therefore, we all get to use them."); Imperialism Definition, Dictionary.com, <http://dictionary.reference.com/browse/imperialism> (last visited Oct. 8, 2012) ("The policy of extending the rule or authority of an empire or nation over foreign countries, or of acquiring and holding colonies and dependencies.").

See Christopher May, *Commodifying the 'Information Age': Intellectual Property Rights, the State and the Internet*, 1 SCRIPT-ed, no. 3, 2004, at 408, 411 (U.K.), available at <http://www.law.ed.ac.uk/ahrc/script-ed/issue3/May.doc> ("While the [TRIPs] agreement imposes a complex and wide ranging set of requirements on signatories, at the core is a particular set of norms regarding the treatment of knowledge as property. These norms underpin the entire agreement and are based on the notion that the private ownership of knowledge as property is a major spur to continued economic development and social welfare. They further emphasise the development of knowledge as an individualised and proprietorial endeavour, and the legitimate reward of such individualised effort. Most obviously TRIPs includes a robust norm of commodification of knowledge and information, which in itself should alert us to the fact that the 'information age' is capitalist business-as-usual, utilising previously established legal structures to ensure that capitalists' ability to commodify important and profitable assets and resources continues into the so-called 'information age.'").

n21. See *infra* Part V.

n22. While America's IP policies were certainly self-serving at this point, they were only "quasi-imperialistic" given that (i) there was no "what's mine is mine" element to those policies at this juncture, and (ii) the imperialistic element of conquest was absent. Given the historical relationship between America and her former colonial rulers, the misappropriation in this instance was more akin to underage teens taking the keys to the family car without permission.

n23. Bill Ivey, *Arts, Inc.: How Greed and Neglect Have Destroyed Our Cultural Rights* 3 (2008) ("Before 1900 the American extension of [its] cultural mainstream, when measured against its European antecedents, came up short - a thin trickle compared to its Old World headwaters. In the eighteenth and nineteenth centuries the artistic achievements dotted across our hardscrabble frontier didn't add up to anything approximating the scope and quality found in Europe. True, colonial artisans designed a few gracefully rendered utilitarian objects - well-crafted furniture and elegantly understated silverware and serving pieces; in addition, some notable buildings executed in the classical revival style were scattered through Washington, DC, and other big cities. A few master painters of landscapes and portraits had emerged but not a unique New World vision. America still measured itself against European leadership in the visual arts.").

n24. See, e.g., Gibbons, *supra* note 2, at 936-40 (discussing widespread American IP piracy during the nation's formative era.); Yu, *The Copyright Divide*, *supra* note 2, at 336-44 (same).

n25. Such misappropriation policies, however, were a double-edged sword. See Ivey, *supra* note 23, at 3 ("By the mid-1800s an indigenous American literary voice could be heard, but even writers who had been at work for decades had only begun to achieve recognition that approached that of their European and English counterparts. (This situation was abetted by the widespread piracy of English titles by U.S. publishers. By ignoring copyright and paying no royalties to European and British authors, prices of U.S. editions of foreign works were consistently lower than their homegrown counterparts.)"); Yu, *The Copyright Divide*, *supra* note 2, at 345.

n26. See Charles H. Norchi, Symposium, *The Legal Architecture of Nation-Building: An Introduction*, 60 Me. L. Rev. 281, 289 (2008) ("Nation-builders drafting constitutional texts and codified laws must sift through both the myth system and the operational code in order to determine which processes of community decisions are both authoritative and controlling. A newly drafted constitution may be a myth while what people actually do in informal settings is the accepted code of operation.").

n27. See, e.g., Kenneth M. Stampp, *The Peculiar Institution: Slavery in the Ante-Bellum South* 196-97 (1956) ("In the customary phraseology of the ante-bellum codes, South Carolina's slaves were 'deemed, held, taken, reputed and adjudged in law to be chattels personal, in the hands of their owners and possessors and their executors, administrators and assigns, to all intents, constructions and purposes whatsoever.' Slaves had the attributes of personal property everywhere, except in Louisiana (and Kentucky before 1852) where they had the attributes of real estate."). Indeed, even as America began to appreciate the need for protecting her own intellectual property, her domestic intellectual property policies reflected the nation's imperialistic ancestry. See also Keith Aoki, *Distributive and Syncretic Motives in Intellectual Property Law (With Special Reference to Coercion, Agency, and Development)*, 40 U.C. Davis L. Rev. 717, 740-41 (2007) ("The American patent system encouraged a more diverse composition of inventors through broadened access to opportunities for investing in, exploiting, and deriving income from inventive activity. However, because of the historical realities of race and slavery, the extent of this beneficial distributive impact on black inventors was illusory at best The early American patent system beckoned many poor white inventors to achieve wealth and recognition through a quasi-egalitarian patent system that facilitated investment in their lucrative ideas. The same opportunities did not await black inventors, whose contributions white society tended to ignore when the commercial value of a black invention was uncertain. In cases where commercial promise was more readily apparent, black inventions were subject to appropriation without attribution. State laws governing property and contract expressly precluded slaves from applying for or holding property. Presumably, this proscription included slaves being precluded from owning patents.").

n28. U.S. Const. art. I, § 8, cl. 8 (bestowing upon Congress the authority "to promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries.").

n29. See, e.g., Steven Wilf, *Copyright and Social Movements in Late Nineteenth-Century America*, 12 *Theoretical Inquiries L.* 123, 125 (2011). Indeed the United States politely declined participation in the Berne Convention and similar international intellectual property treaties and agreements.

n30. Ivey, *supra* note 23, at 7, 9.

n31. Wilf, *supra* note 29, at 125-26.

n32. Ivey, *supra* note 23, at 11-12 ("Movies, records, and broadcasts became America's dominant expressive forms, but in most instances there was no single 'author' of these new arts products. So who would own the musical or dramatic content? The obvious answer was to place ownership and control of the finished product - the film, radio show, or disc - with the corporation that had assembled the creative team, financed the project, and distributed it to audiences... . The groundwork was firmly in place to permit corporations to, in effect, create and own the rights to new works of art... . Because corporations own or control some of the most representative and influential American art products of the past one hundred years, it should be no surprise that questions of ownership, access, gatekeeping, and price continually challenge any effort to understand and advance our cultural rights.").

n33. See, e.g., Doris Estelle Long, "Democratizing" Globalization: Practicing the Policies of Cultural Inclusion, 10 *Cardozo J. Int'l & Comp. L.* 217, 218 (2002) ("Culture and intellectual property appear to have gotten a divorce during the latter decades of the Twentieth Century."); Victoria F. Phillips, Symposium, Commodification, Intellectual Property and the Quilters of Gee's Bend, 15 *Am. U. J. Gender Soc. Pol'y & L.* 359, 370-75 (2007); May, *supra* note 8, at 411 ("The rights of capitalists to commodify information and knowledge as they see fit are ... regarded as the naturally 'just' rights of ownership. This attempts to raise commercial rights to exploit information and knowledge to the same level as human rights. Although this may be legitimate it is hardly uncontroversial, given that sometimes the exercise of these commercial rights is at the cost of the human rights of users."). These attitudes and policies directly contradict the express social utility mandates of the Constitutional Intellectual Property Clause. See, e.g., Lateef Mtimba & Steven D. Jamar, Fulfilling the Copyright Social Justice Promise: Digitizing Textual Information, 55 *N.Y.L. Sch. L. Rev.* 77, 80-86 (2010); David S. Olson, Taking the Utilitarian Basis for Patent Law Seriously: The Case for Restricting Patentable Subject Matter, 82 *Temp. L. Rev.* 181, 183 (2009); Edward T. Saadi, Sound Recordings Need Sound Protection, 5 *Tex. Intell. Prop. L.J.* 333, 335-36 (1997) ("The United States Constitution explicitly grants to Congress the power to pass laws governing copyright. The purpose behind this grant of authority is to encourage the creation of works of artistic and scientific value by providing the incentive of an exclusive monopoly over the benefits of that creation for a limited time. The congressional purpose in granting these exclusive rights was purely utilitarian; it was not based upon the natural rights of authors in their works."); Stacy F. Michelle Fowler, Note, To Protect and ... To Profit: The Trademarking of the LAPD as an Example of Expanding Intellectual Property Rights, 74 *S. Cal. L. Rev.* 1623, 1627, 1632 (2001); McDonald, Comment, Copyright for Sale: How the Commodification of Intellectual Property Distorts the Social Bargain Implicit in the Copyright Clause, 50 *How. L.J.* 541, 543 (2007).

Research Serv., RL 34292, Intellectual Property Rights and International Trade 10-12 (2011), available at <http://www.ieeeusa.org/policy/eyeonwashington/2011/documents/iptradeagreements.pdf>; Peter Drahos, Comm'n on Intell. Prop. Rights, Developing Countries and International Intellectual Property Standard-Setting, at 10, available at http://www.iprcommission.org/papers/pdfs/study_papers/sp8_drahos_study.pdf ("The disappointments of the 1970s in intellectual property standard-setting led the US in the 1980s to adopt a strategy of forum-shifting... In fora such as WIPO, UNCTAD and UNESCO, the US faced the problem that developing country blocs could defeat its proposals on intellectual property or advance their own. The US began to argue the issue of intellectual property protection should become the subject of a multilateral trade negotiation within the General Agreement on Tariffs and Trade (GATT). The GATT was a forum in which the US was the single most influential player. Largely due to the efforts of the US and the US big business community the Ministerial Declaration, which in 1986 launched the Uruguay Trade Round, listed the trade-related aspects of intellectual property rights as a subject for negotiation."); Anita B. Frohlich, Copyright Infringement in the Internet Age - Primetime for Harmonized Conflict-of-Laws Rules?, 24 *Berkeley Tech. L.J.* 851, 856 (2009) (noting that "the accession of the United States to the Berne Convention initiated a gradual reconsideration of international copyright law while contemporaneously creating new challenges when foreign copyright law was involved."); Marshall Leaffer, International Copyright from an American Perspective, 43 *Ark. L. Rev.* 373, 383 (1990); May, *supra* note 8, at 410 ("In addition to the advantages to be gained by having a tougher multilateral enforcement mechanism, the US government (alongside allies in the EU) wanted to move the international regulation of IPRs into the new WTO (from the WIPO) because their negotiators felt that they were more likely to gain agreements to their advantage by linking these issues to the international trade regime."); Peter S. Menell, Intellectual Property and the Property Rights Movement, 30 *Reg. Mag.*, no. 5, 2007, at 36, 37, available at <http://www.cato.org/pubs/regulation/regv30n3/v30n3-6.pdf>.

n36. See Ilias, *supra* note 35, at 28; Drahos, *supra* note 28, at 2 ("[With regard to] developing countries['] [ability to] influence outcomes in the international intellectual property standard-setting process ... [developing countries] have comparatively little influence. The main reason lies in the continued use of webs of coercion by the US and EU, both of which remain united on the need for strong global standards of intellectual property protection."); Marci A. Hamilton, The TRIPS Agreement: Imperialistic, Outdated, and Overprotective, 29 *Vand. J. Transnat'l L.* 613, 615-16 (1996); Long, Traditional Knowledge and the Fight for the Public Domain, *supra* note 7, at 617, 619 (2006) ("If you were to ask me what the role of the United States is in the protection of the traditional knowledge, I would essentially say 'not a whole lot.'"); J. H. Reichman, Intellectual Property in International Trade: Opportunities and Risks of a GATT Connection, 22 *Vand. J. Transnat'l*

L. 747, 813 (1989), available at http://scholarship.law.duke.edu/cgi/viewcontent.cgi?article=1400&context=faculty_scholarship; Steve Lohr, *New Economy: The Intellectual Property Debate Takes a Page from 19th-Century America*, N.Y. Times, Oct. 14, 2002, available at <http://www.nytimes.com/2002/10/14/business/new-economy-intellectual-property-debate-takes-page-19th-century-america.html>. Various commentators have explored this problem as one of "cultural imperialism," which is generally understood to denominate the externally imposed prioritization of Western cultural values over competing values held by non-Western cultures. See, e.g., Ho, *supra* note 6, 467-70 (employing the term "patent imperialism" to reference the issue in the biopiracy context). While cultural imperialism (and of course racism) provide the collective foundation for Western colonialism and Post-War political imperialism, IP imperialism is only partially derived from a false sense of racial and cultural superiority. IP imperialism stratagems are further "legitimized" by unabashed self-interest coupled with a deliberate cognizance of the concomitant power and resources to fuel those interests. See, e.g., Rosemary J. Coombe, Symposium, *The Recognition of Indigenous Peoples' and Community Traditional Knowledge in International Law*, 14 St. Thomas L. Rev. 275, 281 (2001) ("To the extent that patents on innovations derived from traditional knowledge may only be challenged after they have been granted, an enormous financial and administrative burden is put upon indigenous people and the NGOs that represent community interests. For example, it took organized international ecofeminists five years and hundreds of thousands of dollars to successfully challenge the Grace Company's neem-based patents and they were dealing with a very clear case of appropriation of widely known, published prior art. Although litigation serves an important symbolic role in helping to focus the public's attention on this issue, continuous monitoring and challenging of patents requires resources that are well beyond the capacities of all but the most well-funded NGOs."). From this perspective, IP imperialism is not "inherently evil," but rather a quasi-aristocratic principle of privilege and entitlement, perpetrated behind a facade of public interest and global uplift.

n37. See Long, "Democratizing" Globalization: Practicing the Policies of Cultural Inclusion, *supra* note 33, at 220-22, 224 ("Since at least the negotiation of the Agreement on Trade Related Aspects of Intellectual Property (TRIPS) as part of the Uruguay Round under GATT, a growing divide between the forces of 'traditional' copyright and those who seek broader protection for all cultural works has opened. Debates over the right to protect works of cultural patrimony or indigenous art or literature under 'traditional' copyright, or even its desirability continue with no clear indication of when a satisfactory conclusion might be expected. This division is merely one example of a much broader rift between developed and developing countries regarding the standards and scope of works which should be subject to protection under domestic intellectual property laws... The North-South debates are also more problematic because behind this division is a history of economic, political and cultural imperialism that makes the power imbalance seem not only unfair, but, more importantly, an unfortunate continuation of past practices, albeit in a different guise."); Jo Recht, *Intellectual Property in Indigenous Societies: Culture, Context, Politics, and Law*, 6 Dartmouth L.J. 277, 282-83 (2008), ("Western assumptions about ownership and authorship, and the assignment of most indigenous knowledge to the 'public domain,' allow non-indigenous actors to create their own protectible [sic], derivative subject matter from indigenous raw materials. IPR is double-edged, and both edges cut off indigenous protections and rights. Thus, a Western pharmaceutical company may appropriate indigenous knowledge about a medicinal plant that is deemed by Western intellectual property law to be in the 'public domain,' and then create commercial products to which it has exclusive rights. The royalties go to the Western company rather than to the indigenous keepers of the knowledge, and the exclusive rights that the company might apply for under Western patent law will make the end products inaccessible to the indigenous population.").

n38. See Recht, *supra* note 37, at 283 ("When non-technological products are considered, such as songs, images, paintings, or other forms of traditional cultural expression, outside actors, whether individual or corporate, can take indigenous products deemed by Western law to be free to the public, and establish exclusive rights in the derivative works created from them. This is not an accident: the intellectual property system was expanded and developed in the nineteenth century by the European imperial powers, who used it to preserve for themselves the resources of their colonies. In the contemporary context, one commentator has noted that 'WIPO and TRIPS have focused on teaching the poor how to protect the intellectual property of the West.' Conventional intellectual property law, therefore, provides neither a sword nor a shield to protect indigenous subject matter."); May, *supra* note 5, at 419 ("While the powerful states continue to ensure their capitalists' (intellectual) property is safe-guarded, others will be increasingly threatened by the information age's commodification of their remaining national resources by international Capital (through bio-piracy and the 'theft' of traditional knowledge, for instance). Thus, the 'information age' both enhances the power of states that can effectively control their jurisdiction, and contributes to the weakness of those that do not."); See also Drahos, *supra* note 35, at 8 ("The Berne system was run to suit the interests of copyright exporters. Each successive revision of the Berne brought with it a higher set of copyright standards. By the time many countries shed their colonial status, they were confronted by a Berne system that was run by an Old World club of former colonial powers to suit their economic interests. Former colonial powers continued to watch over their former colonies. When eleven Sub-Saharan states joined Berne they were 'so totally dependent economically and culturally upon France (and Belgium) and so inexperienced in copyright matters that their adherence was, in effect, politically dictated by the 'mother country' during the aftermath of reaching independence."); Ho, *supra* note 6, at 433, 505-06 ("Although there is technically no intellectual property infringement in a country that does not have intellectual property laws - for one cannot break a law that does not exist - industry advocates nonetheless successfully claimed that piracy of intellectual property rights was occurring and depriving the U.S. of

its just profits. In other words, the piracy argument underlying enactment of TRIPS ignored the strict legal parameters of intellectual property laws."); Penny Hess, All Diamonds are Blood Diamonds: The Truth About the Diamond Trade, African People's Solidarity Comm. at 1-2 (2006), available at [http://apscuhuru.org/analysis/diamonds/diamonds web. pdf](http://apscuhuru.org/analysis/diamonds/diamonds%20web.pdf); Moyiga Nduru, Avocados, Diamonds at Core of Anti-Israel Trade Campaign, Inter Press Serv. News Agency, Jan. 26, 2007, available at <http://ipsnews.net/africa/nota.asp?idnews=36331>.

n39. Ivey, *supra* note 23, at 7-9 ("New 'arts industries' grew dramatically during... the twentieth century... . Today, DVDs, movies-on-demand, satellite radio, the iPod, and ring-tones top off the transition begun a century ago: Americans can engage the performing arts on our own terms, on our own timetable, at home, in the car, or while strolling or jogging in the park... . And today DVDs are released mere weeks - sometimes only a few days - after a film has opened on the big screen. The cache of live theater and music on tour persists, but most citizens consume most performing arts through some form of technology - usually technology that delivers music, drama, and dance right into the living room or the family car.").

See, e.g., Menell, Intellectual Property and the Property Rights Movement, *supra* note 35, at 36, 42; Ruth Okediji, Givers, Takers, and Other Kinds of Users: A Fair Use Doctrine For Cyberspace, 53 Fla. L. Rev. 107, 108 (2001) ("Information technology has empowered ordinary users to become part of the creative process both by its interactive nature and the very architecture of the pennon of the information society, the Internet.").

n43. Ilias, *supra* note 35, at 12-15; Long, "Democratizing" Globalization: Practicing the Policies of Cultural Inclusion, *supra* note 33, at 229 ("E-commerce, or at least the promise of electronic commerce, has become the new paradigm for globalization. While figures on Internet growth and its global penetration remain subject to dispute, the reality is that the growth of the Internet as a global communication and marketing medium is unprecedented. Moreover, such penetration is not limited to the so-called developed countries. To the contrary, of the ten fastest growing countries for Internet penetration for the year 2001, almost all of them are so-called developing countries."); Wendy M. Pollack, Note, Tuning In: The Future of Copyright Protection for Online Music in the Digital Millennium, 68 Fordham L. Rev. 2445, 2445-46 (2000) ("Digitization of copyrighted materials permits instantaneous, simplified copying methods that produce nearly perfect copies of originals. These copies can be digitally delivered to thousands of Internet users. Decentralization and anonymity in cyberspace have allowed for the widespread dissemination of copyrighted materials without permission from their owners."); China's Piracy Hurting Its Own Industries, NBCNews.com (July 7, 2006), <http://www.msnbc.msn.com/id/13617619/ns/business-world-business/t/chinas-piracy-hurting-its-own-industries/>.

n44. See, e.g., Stephen M. Pinkos, Piracy of Intellectual Property: Hearing Before the S. Comm. on the Judiciary Subcomm. on Intellectual Property, 112th Cong. (2012), available at <http://www.uspto.gov/smallbusiness/pdfs/USPTOTestimony-Judiciary Subcommittee on Intellectual Property.pdf>; Michael Wines, China to Begin Crackdown on Pirated Software in 2011, *Int'l Herald Trib.*, Jan. 8, 2011, available at <http://www.nytimes.com/2011/01/08/business/global/08piracy.html>; Editorial, Internet Piracy and How to Stop It, *N.Y. Times*, June 9, 2011, at A26, available at <http://www.nytimes.com/2011/06/09/opinion/09thu1.html>. Moreover, some commentators have argued that such developing-nation unauthorized uses are not only equitable but a more effective means of technology transfer when compared to policies of direct foreign aid. See Gibbons, *supra* note 2, at 952, 954 ("[A] free marketplace in unlicensed intellectual property is more likely to promote economic development in developing countries than either direct foreign aid or incentivized technology transfer. Further, one lesson that may be drawn from history is that those countries that have successfully transitioned from developing or agricultural economies to developed or industrial economies all did so during periods of lax or no transnational enforcement of intellectual property rights. In fact, the development norm in history was not the enforcement of intellectual property rights but, instead, the positive flouting of the intellectual property rights of non-citizens as an aid to national development... . The question to be asked may be whether unlicensed uses are more efficient in promoting developmental goals than direct foreign aid or incentives for technology transfer. A market-driven policy for intellectual property or technology transfer that permits access to and use of intellectual property in response to market demand for technology or information in a local developing country's markets will promote development more efficiently than either direct foreign aid or technology transfers. History teaches that uncompensated intellectual property transfers (piracy) as a developmental policy may have much to commend it because uncompensated transfers may mark an attempt to return to the well-worn paths that led to past successful economic development.").

n45. See K.J. Greene, "Copynorms," *Black Cultural Production, and the Debate Over African-American Reparations*, 25 *Cardozo Arts & Ent. L.J.* 1179, 1180-81 (2008) ("The institutional music industry has resorted to copyright infringement lawsuits to stem massive Internet piracy in recent years... . The 'copynorms' rhetoric the entertainment industry espouses shows particular irony in light of its long history of piracy of the works of African-American artists, such as blues artists and composers. For many generations, black artists as a class were denied the fruits of intellectual property protection - credit, copyright royalties and fair compensation. Institutional discrimination teamed with intellectual property and contract law resulted in the widespread under-protection of black artistic creativity. Similarly, black inventors created technical and scientific works that impacted early American industries. Evidence exists that black inventors also faced similar divestiture in the industrial marketplace. The mass appropriation of the work of black artists and inventors reflects the systemic subordination based on race that characterized most of U.S. history."). The full meaning of the adage "those who seek equity must do equity" is beginning to resonate within the Western IP Imperialist's regimes. See, e.g., Long, *Traditional Knowledge and the Fight for the Public Domain*, *supra* note 7, 617, 628 (2006) ("Explor[ing] the imperialism of the 19th century and the imperialism that is being applied to traditional knowledge today[,] the rhetoric of the two is frighteningly similar. We can avoid some of the pitfalls of those earlier years if we consider diverse approaches. Access to knowledge, human rights, intellectual property rights, etc. take the best of those approaches and devise a regime that makes sense for all parties.").

Probs.* 203, 203-04 (1954), available at <http://scholarship.law.duke.edu/cgi/viewcontent.cgi?article=2596&context=lcp> ("Well known personalities...do not seek the 'solitude and privacy' which Brandeis and Warren sought to protect... . However, although the well known personality does not wish to hide his light under a bushel of privacy, neither does he wish to have his name, photograph, and likeness reproduced and publicized without his consent or without remuneration to him.").

n61. William L. Prosser, *Privacy*, 48 *Cal. L. Rev.* 383, 389 (1960), available at http://www.californialawreview.org/assets/pdfs/misc/prosser_privacy.pdf. Dean Prosser enumerated the following four categories of invasion of privacy: "intrusion upon the plaintiff's seclusion or solitude, or into his private affairs;" "public disclosure of embarrassing private facts about the plaintiff;" "publicity which places the plaintiff in a false light in the public eye;" and "appropriation, for the defendant's advantage, of the plaintiff's name or likeness." *Id.*

n62. *Id.* This is the interest the Haelan court denominated as the right of publicity. 202 F.2d at 868.

n63. Restatement (Third) of Unfair Competition § 46 (1995); Restatement (Second) of Torts § 652C (1977).

n64. *ETW Corp. v. Jireh Publ'g, Inc.* 332 F.3d 915, 928 (6th Cir. 2003) (citing *McCarthy, Rights of Publicity and Privacy*, supra note 56, § 1:3); See also *Memphis Dev. Found. v. Factors Etc., Inc.*, 616 F.2d 956, 957 (6th Cir. 1980) ("The famous have an exclusive legal right during life to control and profit from the commercial use of their name and personality."). Particularly insofar as celebrities are concerned, the right to control use and exploitation of one's image or persona can also be asserted under the Lanham Act, through the cause of false endorsement. False endorsement occurs where a person's image or persona is used in association with a product in a way that is likely to mislead the consuming public as to that person's sponsorship or approval of the product:

A false endorsement claim based on the unauthorized use of a celebrity's identity is a type of false association claim, for it alleges the misuse of a trademark, i.e., a symbol or device such as a visual likeness, vocal imitation, or other uniquely distinguishing characteristic, which is likely to confuse consumers as to the plaintiff's sponsorship or approval of the product.

Waits v. Frito-Lay, Inc., 978 F.2d 1093, 1110 (9th Cir. 1992). "When ... a celebrity brings a false endorsement suit under Section 43(a), his 'celebrity persona' functions as the 'mark.'" *Brown v. Elec. Arts, Inc.* Case No. 2:09-cv-01598-FMC-RZx, 2009 U.S. LEXIS 131387, at 7 (C.D. Cal. Sept. 23, 2009); See also *White v. Samsung Elecs. Am., Inc.*, 971 F.2d 1395, 1400 (9th Cir. 1992). Likelihood of confusion is generally the controlling issue. See *Wynn Oil Co. v. Thomas*, 839 F.2d 1183, 1186 (6th Cir. 1988) (enumerating an eight factor false endorsement likelihood of confusion test: (1) the level of recognition that the plaintiff has among the segment of the society for whom the defendant's product is intended; (2) the relatedness of the fame or success of the plaintiff to the defendant's product; (3) the similarity of the likeness used by the defendant to the actual plaintiff; (4) evidence of actual confusion; (5) marketing channels used; (6) likely degree of purchaser care; (7) defendant's intent in selecting the mark; and (8) likelihood of expansion of the product lines (citing *AMF, Inc., v. Sleekcraft Boats*, 599 F.2d 341, 348-49 (9th Cir. 1979)). Because right of publicity and false endorsement claims are often raised simultaneously and substantively overlap, the disposition of the one is often difficult to segregate from the resolution of the other. Nonetheless, the principal distinctions between false endorsement and right of publicity claims are (i) "trademark status" for the plaintiff's persona, and (ii) the requirement of a likelihood of confusion of the public as to the plaintiff's endorsement of the defendant's product.

n65. See *McCarthy, Rights of Publicity and Privacy*, supra note 56, at § 6:3; See also Gregory L. Curtner et al. *Show and Tell: Misappropriation of the Right of Publicity, in Counseling Clients in the Entertainment Industry 2011*, at 263, 271 (PLI Intell. Prop. Course Handbook Ser. No. 1040, 2011).

n66. *Time, Inc. v. Hill*, 385 U.S. 374, 389 (1967); *Mason v. Jews for Jesus*, No. 06 Civ. 6433 (RMB), 2006 WL 3230279 (S.D.N.Y. Nov. 8, 2006); *Arrington v. New York Times Co.*, 434 N.E.2d 1319, 1322-23 (N.Y. 1982); *Nussenzweig v. diCorcia*, 832 N.Y.S.2d 510 (N.Y. App. Div.), aff'd, 878 N.E.2d 589 (N.Y. 2007).

n67. J. Thomas McCarthy, *The Spring 1995 Horace S. Manges Lecture - The Human Persona as Commercial Property: The Right of Publicity*, 19 Colum.-VLA J.L. & Arts 129, 130-31 (1995); *Cardtoons, L.C. v. Major League Baseball Players Ass'n*, 95 F.3d 959, 969 (10th Cir. 1996) ("Parody trading cards receive full protection under the First Amendment. The cards provide social commentary on public figures, major league baseball players, who are involved in a significant commercial enterprise, major league baseball. While not core political speech ... this type of commentary on an important social institution constitutes protected expression."); See also *Vinci v. Am. Can Co.*, 591 N.E.2d 793, 794 (Ohio Ct. App. 1990) (per curiam) (permitting unauthorized use of athletes' personas where "the mention of the athletes' names within the context of accurate, historical information was incidental to the promotion of the ... partnership ... [and] reference to the athletes and their accomplishments was purely informational."). First Amendment interests similarly curtail false endorsement claims

under the Lanham Act. Thus, where a plaintiff raises a false endorsement claim, the interposition of the First Amendment as a defense requires that concerns regarding public confusion be counterbalanced against society's interest in promoting free expression. See *ETW Corp.*, 332 F.3d at 928, 936-37.

n68. 875 F.2d 994, 1004-05 (2d Cir. 1989).

n69. *Id.* at 996.

n70. *Id.* at 1000-01.

n71. *Id.* at 1005.

n72. *Id.* at 1004-05. In addition to First Amendment issues, the use of a person in literary expression can also implicate, and potentially conflict with, the copyright exclusive rights. See, e.g., *Dastar Corp. v. Twentieth Century Fox Film Corp.*, 539 U.S. 23, 31-33 (2003); *Fleischer Studios, Inc. v. A.V.E.L.A., Inc.*, 636 F.3d 1115, 1119 (9th Cir. 2011). The problem of copyright/right of publicity overlaps and conflicts is discussed in Part IV, *infra*.

n73. See, e.g., K.J. Greene, *The Right of Publicity: Is the Rent "Too Damn High"?*, in *Counseling Clients in the Entertainment Industry* 2011, at 279, 282 (PLI Intell. Prop. Ser. No. 1040, 2011); Stacey L. Dogan & Mark A. Lemley, *What the Right of Publicity Can Learn from Trademark Law*, 58 *Stan. L. Rev.* 1161, 1162 (2006); Michael Madow, *Private Ownership of Public Image: Popular Culture and Publicity Rights*, 81 *Cal. L. Rev.* 127, 178-215 (1993). One explanation for the less than charitable attitudes toward the right of publicity is of course the overreaching and often baseless suits brought by some celebrities Seeking to profit from even the most remote associations with their personas. See, e.g., *Lindsay Lohan & E-Trade Settle Milkaholic Baby Lawsuit*, *The Huffington Post*, Sept. 21, 2010, available at <http://www.huffingtonpost.com/2010/09/21/lindsay-lohan-ettrade-sett n 733657.html>. While the dissatisfaction with such abuses is understandable, in the present era of copyright and patent trolls, and the emerging issue of trademark bullying, the problem is by no means restricted to the right of publicity. Just as these abuses do not give rise to calls for the repeal of the copyright, patent, and trademark laws, however, right of publicity misuse is an insufficient basis upon which to do away with publicity rights altogether.

n74. See, e.g., Greene, *The Right of Publicity: Is the Rent "Too Damn High"?*, *supra* note 73, at 282 ("The right of publicity does not deliver the goods the way copyright and patent regimes do - copyright gives us movies, books, music, and patent gives us everything from BMW engine components to little blue pills for men of a certain age. Even trademark law's harshest detractors concede the efficacy of trademark law's prevention of consumer confusion in the marketplace of goods. In contrast ... publicity rights seem to do little more than to enrich

already rich artists and athletes, and to provide a lucrative platform for reality television stars such as Snooki and Paris Hilton.").

n75. See, e.g., Mtima, Copyright Social Utility and Social Justice Interdependence: A Paradigm for Intellectual Property Empowerment and Digital Entrepreneurship, *supra* note 46, at 126-27 ("The social engineering aspirations which underlie American copyright law were of sufficient importance to the Framers that they provided for their satisfaction in the very first Article of the Constitution. Included among those goals is a system for author incentives, intended to help fuel artistic output... . When the author incentive function is so widely corrupted that authors from significant segments of the population are systematically deprived of their copyright property rights and incentives, it is not only a problem of copyright social injustice, it also constitutes an assault upon the function of copyright social utility. Creative authors who do not benefit from the copyright regime have little incentive to participate in it. When marginalized groups and communities have no expectation of reward from copyright protection, their members lose the institutional incentive to produce artistic works.").

n76. *Id.*

n77. Indeed, the advent of digital information technology has sparked a general refocus of scholarly, policy, and professional attention toward social utility and social justice obligations of the intellectual property law as a whole. See, e.g., Rita Heimes, Trademarks, Identity, and Justice, 11 J. Marshall Rev. Intell. Prop. L. 133, 148 (2011) ("One measure of development and distributive justice, then, is in the mechanisms by which opportunities and access to capabilities are made available to all, means by which inequalities 'in the distribution of substantive freedoms and capabilities' are reduced. These freedoms and capabilities could well include property interests in intangibles such as intellectual property. Access to them could certainly assist with improved self-help, self-reliance, and self-confidence, the deprivation of which is a form of poverty." (quoting Amartya Sen, *Development as Freedom* 119 (Alfred A. Knopf, Inc. 1999))); Long, "Democratizing Globalization: Practicing the Policies of Cultural Inclusion, *supra* note 33, at 252 ("Just as human rights and the protection of culture have been raised to an area of international social justice, so too, the protection of the expressions of humankind's cultural creativity (intellectual property) is worthy of being protected as a matter of social justice, with all the requirements of access and fairness that such social justice requires.").

n78. See, e.g., *Authors Guild v. Google, Inc.*, 770 F. Supp. 2d 666, 679 n. 15 (S.D.N.Y. 2011) (discussing the social justice impact of the proposed Google Books settlement, stating that "supporters of the proposed settlement argue that it would 'serve[] copyright law's central purpose of advancing knowledge and culture by furthering copyright's social utility and social justice goals through inclusion of those who have been excluded. The Google Books Project furthers these goals by using an accepted copyright mechanism (i.e., a private, court-supervised settlement) to address the novel copyright problems presented by the new technologies, while still preserving the rights of copyright holders.'" (quoting Mtima, *Fulfilling the Copyright Social Justice Promise: Digitizing Textual Information*, *supra* note 33, at 79-80); See also James Grimmelman, *The Elephantine Google Books Settlement*, 58 J. Copyright Soc'y U.S.A. 497, 506-10 (2011) (discussing the terms of the Authors Guild settlement); Pamela Samuelson, *Symposium, Google Book Search and the Future Books in Cyberspace*, 94 Minn. L. Rev. 1308, 1319-51 (2010) (discussing potential effects of Authors Guild settlement on various aspects of society and economy).

n79. See, e.g., Madhavi Sunder, *From Goods to a Good Life: Intellectual Property and Global Justice* 175-78 (2012); *Bd. of Tr. of Leland Stanford Junior Univ. v. Roche Molecular Sys.*, 583 F.3d 832, 841 (Fed. Cir. 2009), *aff'd*, 131 S. Ct. 2188 (2011).

n80. See, e.g., Peter Maybarduk, Program on Information Justice and Intellectual Property, ACTA and Public Health, available at <http://digitalcommons.wcl.american.edu/cgi/viewcontent.cgi?article=1011&context=research>; Simone A. Rose, Symposium, On Purple Pills, Stem Cells, and Other Market Failures: A Case for a Limited Compulsory Licensing Scheme for Patent Property, 48 How. L.J. 579, 582 (2005). For an analysis of the social justice opportunities and obligations arising in connection with trademark rights See Heimes, *supra* note 77, at 148, 149, 152 ("The best arguments to support a social justice foundation in trademark and identity law rest on notions of preventing unfair competition and unjust enrichment. These policy goals for recognizing enforceable publicity rights in persona or identity protect the individual as effectively as the corporation. Few scholars have applied this analysis to trademark law, although as a feature of commercial activity trademarks are naturally connected to entrepreneurship and, logically, to personal empowerment. Because trademarks and publicity rights can serve as strong personal property interests, it bears considering, in examination of social and distributive justice principles, whether there is a justice-based argument to be made for helping individuals acquire and protect trademarks and publicity rights.").

n81. See *Parks v. LaFace Records*, 329 F.3d 437, 443 (6th Cir. 2003), wherein the civil rights icon brought an action Seeking to prevent the use of her name in a rap record using profanity and offensive language. Indeed, this was one of Warren and Brandeis's specific objectives in arguing for recognition of that right. See Warren, *supra* note 1, at 196.

n82. See, e.g., Jennifer L. Carpenter, Internet Publication: The Case for an Expanded Right of Publicity for Non-Celebrities, 6 Va. J.L. & Tech. 3, 11, 14 (2001) ("Scholars and courts have isolated four primary policy justifications for the right of publicity: providing incentives for creativity, allowing those who achieve notoriety to enjoy the fruits of their own labor, guarding against consumer deception, and preventing unjust enrichment... . The fourth ... rationale... for recognizing the right of publicity is that it prevents publishers from unfairly profiting from a celebrity's public reputation without sharing some of that profit with the celebrity who worked for that reputation. This moral argument reflects a basic societal belief that it is wrong for 'free-riders' or 'parasites' to appropriate (and profit from) another person's hard work."); Heimes, *supra* note 77, at 157 ("The philosophical reasons for promoting individual ownership of identity complement the economic ones, at least from a social justice perspective. One is morally entitled to self-define and even to commercialize one's own persona. At the same time, the opportunity to exploit identity for commercial gain ... by taking advantage of accidental fame - is one additional opportunity for empowerment through entrepreneurship... . In the social justice context, supporting these individual interests and values is warranted provided the broader societal interests in cultural development and freedom of expression are taken into consideration."); Roberta Rosenthal Kwall, The Right of Publicity vs. the First Amendment: A Property and Liability Rule Analysis, 70 Ind. L.J. 47, 55-56 (1994) ("The right of publicity has the potential for safeguarding from unauthorized use any marketable and publicly recognizable attribute of any individual, regardless of whether that person is a celebrity. Moreover, whatever the means through which an individual's persona comes to have value, that value should be attributable to the persona of the publicity plaintiff who has a right to participate in decisions about how her persona is utilized by others. This is the overall objective which the right of publicity tries to fulfill."); Spare the Mod: In Support of Total-Conversion Modified Video Games, *supra* note 49, at 801 ("The personality theory of intellectual property protection posits that the artist defines herself through art. The creation of artistic works binds the artist to her products. Accordingly, the artist ought to have moral rights over the use of her works.").

n83. *Zacchini v. Scripps-Howard Broad. Co.*, 433 U.S. 562, 573 (1977).

n84. *Id.* ("The State's interest in permitting a 'right of publicity' is in protecting the proprietary interest of the individual in his act in part to encourage such entertainment... . The State's interest is closely analogous to the goals of patent and copyright law, focusing on the right of the individual to reap the reward of his endeavors.").

n85. *Id.* at 576.

[A state's] decision to protect [a performer's] right of publicity ... rests on more than a desire to compensate the performer for the time and effort invested in his act; the protection provides an economic incentive for him to make the investment required to produce a performance of interest to the public. This same consideration underlies the patent and copyright laws long enforced by this Court.

Id.; See also Melissa B. Jacoby & Diane Leenheer Zimmerman, *Foreclosing on Fame: Exploring the Uncharted Boundaries of the Right of Publicity*, 77 N.Y.U. L. Rev. 1322, 1330 (2002) ("Celebrities 'create' their valuable personas in much the same way that a novelist creates a work of fiction or an inventor a new device. Thus, giving the famous individual a property right in this form of intellectual property has been explained as an incentive to promote future creativity, as a reward for a valuable service to the public, or as a means of preventing unjust enrichment."); Kwall, *supra* note 82, at 74 ("As a society, we can suffer two general types of harms from the toleration of unauthorized uses of an individual's persona. One type of harm focuses on the increased potential for consumer deception, and the other focuses on the increased potential for diminished incentives.").

n86. *Zacchini*, 433 U.S. at 574-74 (emphasis added).

n87. *Comedy III Prods., Inc. v. Gary Saderup, Inc.*, 21 P.3d 797, 804-05 (Cal. 2001). As discussed in Part IV, *infra*, the *Comedy III* court promulgated its own test for balancing right of publicity and First Amendment interests, the "transformative test". *Id.* at 808. Under the transformative test, a court examines the extent of the user's expressive transformation of the plaintiff's image or persona, to determine whether the user is trading upon the plaintiff's recognizable image or has transformed that image into a new expressive work. *Id.* Also in Part IV, the *Rogers* and *Comedy III* tests measure different social utilities, and selecting the appropriate test is critical to a proper balancing of right of publicity and First Amendment interests.

n88. See Heimes, *supra* note 77, at 151.

n89. *Id.* at 148-49.

n90. See Lateef Mtima, *Symposium, African-American Economic Empowerment Strategies for the New Millennium - Revisiting the Washington-Du Bois Dialectic*, 42 *How. L.J.* 391, 428-29 (1999); W. Sherman Rogers, *The Black Quest for Economic Liberty: Legal, Historical, and Related Considerations*, 48 *How. L.J.* 1, 59 (2004).

n91. See, e.g., K.J. Greene, Right of Publicity, Identify, and Performance, 28 Santa Clara Computer & High Tech. L.J. 865 (2011). The social utility goals that underlie the Lanham Act, including protection against unfair competition and consumer confusion, also resonate with the above-enumerated right of publicity social justice objectives. See Heimes, *supra* note 77, at 149. Not only should marginalized individuals derive the commercial benefits from the "persona properties" they develop, but the consuming public should not be misled into supporting products and business unaffiliated with individuals whom they admire and revere. Thus, right-of-publicity social justice can also be pursued and enforced through the companion federal false endorsement cause of action.

n92. See, e.g., *Id.* at 144 ("The relevance of protecting identity from misuse is heightened exponentially by technological advancements in digital communication. Images can be copied from one location, edited, and reposted to another in myriad new ways - some flattering but many not - by anonymous Internet users generally beyond the reach of the law."). Of course, advances in digital information technology also offer new and socially beneficial opportunities for the development, dissemination, and exploitation of information and ideas, innovative advances, and individual creative expression. The parameters of intellectual property protection must be continuously reassessed to ensure that they complement the immediate and potential boons of such advances, so that technological options and opportunities for social good are not impeded by legal sub-structures incompatible with unanticipated kinds and uses of intellectual property. See generally Jamar, *Crafting Copyright Law to Encourage and Protect User-Generated Content in the Internet Social Networking Context*, *supra* note 41, at 848-49 (advocating to modify the Copyright Act and codify current practice in the social media. Among other things, the author proposes to allow "noncommercial social network users to post links to and portions of copyrighted work without permission" and a "broad right to create and disseminate derivative works online for noncommercial purposes."); Lateef Mtima, *Tasini and its Progeny: The New Exclusive Right or Fair Use on the Electronic Publishing Frontier?* 14 *Fordham Intell. Prop. Media & Ent. L.J.* 369, 409-13 (2004); Rebecca Tushnet, *Worth a Thousand Words: The Images of Copyright*, 125 *Harv. L. Rev.* 683, 687-88 (2012) (discussing "ungovernability of images in copyright law" and advocating adopting the true "reproduction right" against the standard of exact or near-exact copying).

n93. IP Imperialist stratagems thus have the same deleterious effect in both the indigenous culture and marginalized communities contexts. See, e.g., Drahos, *supra* note 35, at 5 ("Does it matter if the capacity of [developing countries] to influence the [IP] standard-setting process remains weak? ... Since intellectual property rights are but one micro-tool of national policy it is difficult to isolate their importance as a variable in development. If, as the World Bank has suggested, development is about expanding the ability of people 'to shape their own futures' then we have a *prima facie* normative reason to be concerned about the loss of national sovereignty of developing countries over standards that impact on sectors such as agriculture, food, environment, health and education."); Recht, *supra* note 37, at 284, ("Protection of intellectual property in indigenous societies implicates issues of human rights, cultural survival, and physical subsistence of those societies. 'Primarily ... when we talk about protecting traditional knowledge we are talking about protecting the livelihoods of the poor.' In 1993, the UN Subcommittee on the Prevention of Discrimination and Protection of Minorities and its Working Group on Indigenous Populations produced 'The Study on the Protection of the Cultural and Intellectual Property of Indigenous Peoples,' which placed protection of indigenous knowledge into the context of human rights." (quoting Coombe, *supra* note 36, at 278)); See also Coombe, *supra* note 36, at 277-78 (discussing "international law-making efforts with respect to indigenous and traditional environmental knowledge").

n94. *Doe v. TCI Cablevision of Mo.*, No. ED 78785, 2002 WL 1610972, at 12 (E.D. Mo. 2002).

n95. For example some courts have observed that certain social utility objectives that underlie the right of publicity are less important where celebrity interests and incentives are involved. See, e.g., *Cardtoons, L.C. v. Major League Baseball Players Ass'n.*, 95 F.3d 959, 969 (10th Cir. 1996).

"Even without the right of publicity the rate of return of stardom in the entertainment and sports fields is probably high enough to bring forth a more than 'adequate' supply of creative effort and achievement." ... Celebrities would still be able to reap financial reward from authorized

appearances and endorsements. The extra income generated by licensing one's identity does not provide a necessary inducement to enter and achieve in the realm of sports and entertainment. Thus, while publicity rights may provide some incentive for creativity and achievement, the magnitude and importance of that incentive has been exaggerated.

Id. at 974 (quoting Madow, *supra* note 73, at 210). While this is true in some cases, it overlooks the realities faced by some members of marginalized communities. It is the prospect of attendant compensation that motivates an inner city youth to pursue a career as a professional athlete in the face of overwhelming statistics that she will likely not have a professional career. And even if she never makes it to the "majors" endorsement opportunities and other exploitation of personal celebrity can provide a path out of poverty, especially for those who also face institutionalized racial impediments.

n96. See *Brooks v. Topps Co.*, 86 U.S.P.Q.2d (BNA) 1361 (S.D.N.Y. 2007).

n97. See *Facenda v. N.F.L. Films, Inc.*, 542 F.3d 1007 (3d Cir. 2008); *Laws v. Sony Music Entm't, Inc.*, 448 F.3d 1134 (9th Cir. 2006); *Brown v. Elec. Arts, Inc.*, Case No. 2:09-cv-01598-FMC-RZx, 2009 U.S. Dist. LEXIS 131387 (C.D. Cal. Sept. 23, 2009).

n98. 86 U.S.P.Q.2d (BNA) 1361.

n99. Id.

n100. Id. at 1364.

n101. Id. at 1363.

n102. Id. at 1364 (emphasis added). In addition to producing the trading cards, Topps also affirmatively marketed that Bell endorsed the use of his name and image:

Topps issued promotional materials for both the 2001 and 2004 cards. The 2004 promotional materials contained two statements that Brooks notes in her opposition papers. One footnote in those materials stated in miniscule print that "although these players have agreed to provide these cards for Topps, we cannot guarantee that all autographs ... will be received in time for inclusion in this product.

Id.

n103. Id. at 1362.

n104. Brooks, 86 U.S.P.Q.2d (BNA) at 1365 (citations omitted).

n105. Id. at 1365, 1366 (citations omitted). The court also went out of its way to dismiss plaintiff's federal claims:

Personal names and photographs are not inherently distinctive, and therefore are "protected only if, thorough usage, they have acquired distinctiveness and secondary meaning."

"'Secondary meaning' is a term of art referencing a trademark's ability to identify the source of the product rather than the product itself." ... Factors that may be considered in determining whether a mark has developed secondary meaning include "(1) advertising expenditures, (2) consumer studies linking the mark to a source, (3) unsolicited media coverage of the product, (4) sales success, (5) attempts to plagiarize the mark, and (6) length and exclusivity of the mark's use."

Brooks has presented no evidence relating to four of these six factors. With respect to the fourth and sixth factors, she has described several commercial licensing arrangements, has offered documentary evidence corroborating the existence of one of them, but has provided no evidence of any sales made to the public by the licenses. While Brooks licensed Bell's name commercially on scattered occasions in 1993, 1994, 1996, and 2003, Brooks licensed the image of Bell at issue here on a single occasion. Given this record, no reasonable juror could find that "the public is moved in any degree to buy an article" displaying Bell's name or image based on the belief that it implies endorsement by his estate, Brooks, or by any unknown source.

Id. at 1367-68 (citations omitted). Id. it implies endorsement by his estate, Brooks, or by any unknown source.

n106. For an in-depth discussion of the court's disposition of Topps' limitations defense and an alternative analysis of the issue, see Ritu Narula, "Wait, I Didn't Even Know My Picture Was Taken!": Application of the Discovery Rule to a Right of Publicity Claim, 53 How. L.J. 859, 860-61 (2010).

n107. Id. at 879-81; see also *Christoff v. Nestle USA, Inc.*, 62 Cal. Rptr. 3d 122, 144 (Cal. Ct. App. 2007), *aff'd in part, rev'd in part*, 47 Cal. 4th 468 (2011) (wherein, in addressing the application of the statute of limitations, the court directed that on remand the trial court should instruct the jury to determine "whether a reasonable person in [the plaintiff's] position had a meaningful ability to discover the [unauthorized] use of his likeness."). A possible reason for the reluctance of the Brooks court to consider the tolling issue may be the lack of a framework through which to determine when publicity limitations periods should (or should not) be tolled. A proposal for such a framework is offered in Part V, *infra*.

n108. Indeed, the irony that the leading right of publicity case was brought by a trading card company seems to have escaped the court. See *Haelan Labs., Inc., v. Topps Chewing Gum, Inc.*, 202 F.3d 866 (2d Cir. 1953).

n112. *Rogers v. Grimaldi*, 875 F.2d 944, 1004 (2d Cir. 1989) (citations omitted). It has been observed that First Amendment concerns play a special role in the judicial curbing of publicity rights:

Because the right of publicity, unlike the Lanham Act, has no likelihood of confusion requirement, it is potentially more expansive than the Lanham Act. Perhaps for that reason, courts delineating the right of publicity, more frequently than in applying the Lanham Act, have recognized the need to limit the right to accommodate First Amendment concerns.

In particular, three courts, citing their concern for free expression, have refused to extend the right of publicity to bar the use of a celebrity's name in the title and text of a fictional or semi-fictional book or movie... .

... .

Commentators have also advocated limits on the right of publicity to accommodate First Amendment concerns.

n119. *Brown*, 2009 U.S. Dist. LEXIS 131387, at 11-12.

n120. Id. at 8. (quoting *Video Software Dealers Ass'n v. Schwarzenegger*, 556 F.3d 950, 958 (9th Cir. 2009)). Such automatic bestowal of literary expression status to video games, however, is not without criticism. See Ronald S. Katz, *Courts, Sports and Video Games: What's In A Game?*, Law360, Jan. 4, 2012, available at <http://www.manatt.com/uploadedFiles/News and Events/Newsletters/ManattSports/Courts,%20Sports%20and%20Videogames.pdf> ("[The Supreme Court's] sweeping references to character, plot and social messages [in connection with video games] are completely irrelevant to such videogames as Pong, which has as its only object getting a moving dot past a moving line. Pong expresses nothing. It's just a game and, as such, has no claim to First Amendment protection."). Video games run the gamut from Pong and Pac Man to World of Warcraft and involve differing degrees of expressive content. Moreover, as discussed below, focusing on the expressive value of the subject work misses the point in right of publicity disputes. The issue is not whether the work contains sufficient creative elements so as to be considered expressive, but rather to what extent has the defendant's expressive contributions transformed the plaintiff's image or persona. See *Comedy III Prods., Inc. v. Gary Saderup, Inc.*, 21 P.3d 797 (Cal. 2001).

n121. *Brown*, 2009 U.S. LEXIS 131387, at 10-11; *Rogers*, 875 F.2d 994.

n122. *Brown*, 2009 U.S. Dist. LEXIS 131387, at 8.

n123. *Id.* at 13-14. In connection with Brown's false endorsement claim, the court further found that, under *Rogers*, an unauthorized but relevant use of a persona could still be prohibited if the prospect of consumer confusion (as to whether Brown had in fact endorsed the video game) outweighed the public interest in free expression. *Id.* at 13. The court concluded that there was no such likelihood of confusion in the case before it. *Id.* at 14.

n124. *Id.* at 15.

The Madden NFL character that Brown alleges bears his likeness is one of thousands of virtual athletes in the games. Unlike most of the other characters, this virtual athlete is anonymous: he is identified only by a jersey number and his roster position as a running back. The character, and Brown's name, are not depicted on the games' packaging or in their advertising... Brown has not pointed to any Madden NFL promotional materials that feature his name or likeness.

Id. at 13.

n125. *Id.* at 15.

n126. *Rogers*, 875 F.2d at 999.

n127. *Brown*, 2009 U.S. Dist. LEXIS 131387, at 12. There is no shortage of tests for evaluating the parameters of the right of publicity as against the First Amendment. See *Hart v. Elec. Arts, Inc.*, 808 F. Supp. 2d 757, 775 (D.N.J. 2011) ("Courts throughout the United States have utilized up to eight 'balancing' tests that attempt to weigh the First Amendment rights of an author/creator against the right of publicity."). The variety of tests, their differing assessment emphases, and their derivation from other areas of intellectual property law suggest a compelling need for an overarching right of publicity social utility schema that retrofits the right into the intellectual property social utility regime.

n128. *Rogers*, 875 F.2d at 1004.

n129. *Brown*, 2009 U.S. LEXIS 131387, at 9-10 (quoting *E.S.S. Entm't 2000, Inc. v. Rock Star Videos, Inc.*, 547 F.3d 1095, 1100 (9th Cir. 2008)); c.f. *Grimaldi*, 875 F.2d at 1004 (quoting *Guglielmi v. Spelling-Goldberg Prods.*, 603 P.2d 454, 457 n.6 (Cal. 1979)).

n130. In *Rogers*, the relevance of Ginger Rogers' persona to the expressive work at issue was akin to that of parody: the film was about two fictional and unglamorous Italian dancer contemporaries of the Rogers and Astaire team, and was intended as a social commentary on Hollywood and television facades and hypocrisies. *Rogers*, 875 F.2d at 996-97. By comparison, a film on the history of dance throughout the world entitled *Ginger and Fred* should not satisfy the *Rogers* test merely because Rogers and Astaire's accomplishments are important in the field; such a result would conflate "historical" and "relevant" and render inert the *Rogers*' relevance requirement. See *id.* at 1001.

n131. See *Nature's Way Prods., Inc. v. Nature-Pharma, Inc.*, 736 F. Supp. 245, 253 (D. Utah 1990) (mem. op.) ("[Defendants] are using an historical fact to market a different product... . Defendants' historical exception argument, if granted, would work to cause essentially every right of publicity case to fail on the basis that every truthful reference to a famous person in connection with an advertised product could be considered to be 'historical information.' Because 'historical information' is being used in the instant case to market a product that is independent of the information itself, defendants' argument is without merit and is rejected."); *supra* text accompanying note 107.

n132. *Rogers*, 875 F.2d at 1004-05.

n133. The *Rogers* court made this observation in connection with the unauthorized use of a persona in the title of an artistic work. "Titles, like the artistic works they identify, are of a hybrid nature, combining artistic expression and commercial promotion. The title of a movie may be both an integral element of the film-maker's expression as well as a significant means of marketing the film to the public." *Rogers*, 875 F.2d at 998. Other courts have reached similar conclusions. See *Parks v. LaFace Records*, 329 F.3d 437, 447, 453-54, 561 (6th Cir. 2003) (discussing use of plaintiff's name as a song title and holding that "the First Amendment cannot permit anyone who cries 'artist' to have carte blanche when it comes to naming and advertising his or her works, art though it may be... . If the requirement of 'relevance' is to have any meaning at all, it would not be unreasonable to conclude that the title *Rosa Parks* is not relevant to the content of the song in question. The use of this woman's name unquestionably was a good marketing tool - *Rosa Parks* was likely to sell far more recordings than *Back of the Bus* - but its use could be found by a reasonable finder of fact to be a flagrant deception on the public regarding the actual content of this song and the creation of an impression that *Rosa Parks* ... had also approved or sponsored the use of her name on Defendants' composition... . We believe that Parks' right of publicity claim presents a genuine issue of material fact regarding the question of whether the title to the song is or is not 'wholly unrelated' to the content of the song. A reasonable finder of fact ... upon consideration of all the evidence, could find the title to be a 'disguised commercial advertisement' or adopted 'solely to attract attention' to the work." (citations omitted) (some emphasis added)). In sum, *Rogers* and *Parks* would not allow a promotional use of a publicity persona to provide the kind of connection to the defendant's work that would enable the unauthorized use to pass the "wholly unrelated" test. Moreover, these cases do not preclude the possibility of a mixed expressive/promotional use. There is no reason that aspects of a legendary football Hall of Famer persona could not be used in a similar hybrid manner in a football video game, thereby rendering the expression at least partially commercial speech in nature and diluting its First Amendment status. See McCarthy, *The Spring 1995 Horace S. Manges Lecture - The Human Persona as Commercial Property: The Right of Publicity*, *supra* note 67, at 137 ("Commercial speech ... is a form of free speech but is not given nearly as much protection as traditional political or entertainment speech."). In mixed expressive/promotional use situations, the issue may not be that of the plaintiff's publicity interests being at odds with a compelling societal interest in free speech, but rather simply one of deciding as between the plaintiff and the defendant how the fruits of the commercial exploitation of the plaintiff's persona should be allocated.

n134. See *Brown*, 2009 U.S. Dist. LEXIS 131387, at 12. "Zero relevant" commercial uses of an individual's persona, such as using Jim Brown's picture to sell cars or cookies would of course be actionable even under *Brown*. Limiting publicity claims to such infractions, however, improperly narrows the right and disregards its broader social benefits.

n135. *Comedy III Prods., Inc. v. Gary Saderup, Inc.*, 21 P.3d 797, 798 (Cal. 2001) (formulating "a balancing test between the First Amendment and the right of publicity based on whether the work in question adds significant creative elements so as to be transformed into something more than a mere celebrity likeness or imitation.").

n136. *Id.* at 800-01.

n137. *Id.* at 802.

n138. *Id.* at 807-09 (citations omitted) (footnotes omitted).

n139. *Id.* at 811.

n140. 122 Cal. Rptr. 3d 397, 400-01, 409 (Cal. Ct. App. 2011).

n141. *Id.* at 400, 402. No Doubt had agreed that their likenesses could be used in the game, but complained that Activision went beyond the parties' agreement and used their likenesses in ways they did not and would never consent to. *Id.*

n142. *Id.* at 406.

n143. *Id.* at 410.

n144. *Id.* at 410-11; accord *Keller v. Elec. Arts, Inc.*, 94 U.S.P.Q.2d (BNA) 1130, 113 (N.D. Cal. 2010) ("[Defendant's] depiction of Plaintiff in 'NCAA Football' is not sufficiently transformative to bar his California right of publicity claims as a matter of law. In the game, the quarterback for Arizona State University shares many of Plaintiff's characteristics. For example, the virtual player wears the same jersey number, is the same height and weight and hails from the same state. EA's depiction of Plaintiff is far from the transmogrification [in prior cases]. EA does not depict Plaintiff in a different form; he is represented as he what he was: the starting quarterback for Arizona State University. Further ... the game's setting is identical to where the public found Plaintiff during his collegiate career: on the football field.") (footnote omitted). In *Hart v. Elec. Arts, Inc.*, the New Jersey District Court applied the transformative test to another EA video game but reached a different result. 808 F. Supp. 2d 757, 787 (D.N.J. 2011). The court found a "transformation" despite the fact that the plaintiff's likeness was presented unaltered and in his professional/celebrity setting (the football field). *Id.* at 783. In arriving at this conclusion, the court focused on the defendant's contributions to the video game as a whole, including the fact that users can alter the plaintiff's image using "add-ons" designed by the defendant. *Id.* at 785. While the court acknowledged that "it Seemed ludicrous to question whether video game consumers enjoy and, as a result, purchase more EA-produced video games as a result of the heightened realism associated with actual players," it nonetheless concluded that the use was transformative and entitled to First Amendment protection. *Id.* at 783, 787. The problem with this analysis is that it seems to reach for some kind of "copyright gestalt," allowing the copyrightable elements of the game to color its ultimate characterization of the defendant's use of the plaintiff's image. However, the issue is not whether the game contains creative contributions. Nor is the issue whether the defendant provides users with the tools such that they might transform the plaintiff's image (whose image the court concedes is one of the reasons that users purchase the game in the first place). Rather, the issue is whether the defendant transformed the plaintiff's image in developing and marketing the game - which as the court expressly notes - the defendant did not do. *Id.* at 783. Therefore, under the *Hart* analysis, a celebrity-image coloring book would pass the transformative test, provided it included ancillary aesthetics and was sold complete with crayons.

n145. See *No Doubt*, 122 Cal. Rptr. 3d at 410-11, 415; *Comedy III Prods., Inc. v. Gary Saderup, Inc.*, 21 P.3d 797, 811 (Cal. 2001); see also *Keller*, 94 U.S.P.Q.2d (BNA) at 1135 (holding that the court's "focus must be on the depiction of Plaintiff in [the video game,] not the game's other elements.").

n146. *No Doubt*, 122 Cal. Rptr. 3d at 411 (quoting *Comedy III*, 21 P.3d at 810); see also *Comedy III*, 21 P.3d at 807 ("It is admittedly not a simple matter to develop a test that will unerringly distinguish between forms of artistic expression protected by the First Amendment and those that must give way to the right of publicity... . What the right of publicity holder possesses is not a right of censorship, but a right to prevent others from misappropriating the economic value generated by the celebrity's fame through the merchandising of the 'name, voice, signature, photograph, or likeness' of the celebrity."); Heimes, *supra* note 77, at 158 ("An individual's interests in identity protection should not be lesser than - or greater than - First Amendment interests or other social and cultural norms law seeks to foster and protect. They are central to the individual's rights to self-determination and freedom. Indeed, although courts are not as likely to recognize for non-celebrities the powerful publicity rights granted to [prominent individuals and celebrities], there is no justification under social justice theories to deprive other individuals of the right to prevent misappropriation of their identities or commercial exploitation by others. If we are to allow commodification of identity we should give universal access to such rights.").

n147. See *Brown v. Elec. Arts, Inc.*, Case No. 2:09-cv-01598-FMC-RZx, 2009 U.S. Dist. LEXIS 131387, 3 (C.D. Cal. 2010).

n148. *Zacchini v. Scripps-Howard Broad. Co.*, 433 U.S. 562, 576 (1977) (citing *Harry Kalven, Jr., Privacy in Tort Law - Were Warren and Brandeis Wrong?*, 31 *Law & Contemp. Probs.* 326, 331 (1966), available at <http://scholarship.law.duke.edu/cgi/viewcontent.cgi?article=3112&context=lcp>); See also *McCarthy*, *The Spring 1995 Horace S. Manges Lecture - The Human Person as Commercial Property: The Right of Publicity*, *supra* note 67, at 131 ("While some criticize the right of publicity as posing the danger of invading our free speech rights, in fact, for all practical purposes, the only kind of speech impacted by the right of publicity is commercial speech - advertising. Not news, not stories, not entertainment and not entertainment satire and parodys - only advertising and similar commercial uses.").

n149. See Keller, 94 U.S.P.Q.2d (BNA) at 1136 (holding that even where First Amendment protections are relevant to an unauthorized use, "it does not follow that these protections are absolute and always trump the right of publicity."). But cf. Hart, 808 F. Supp. 2d at 769-71 (wherein the court appears to offer a Hobson's choice of "either commercial speech or expressive use," overlooking the possibility a hybrid commercial motivation and result).

n150. Kaburakis, *supra* note 12; Thomas, *supra* note 12 (describing suit against the N.C.A.A. and its affiliates for allegedly "usurping the rights of former players to earn royalties when their likenesses and images are licensed by the N.C.A.A. for use in television advertisements, video games, apparel and other products"); see also Keller, 94 U.S.P.Q.2d (BNA) at 1132-33 (in which plaintiff alleges that the NCAA prohibits student athletes from commercially exploiting their personas, and, in turn, takes advantage of that prohibition to exploit their personas for its own pecuniary benefit).

n151. See, e.g., Comedy III, 21 P.3d at 811 (disallowing unauthorized use where "the marketability and economic value of [the resulting] work derives primarily from the fame of the celebrities depicted."); see also Spare the Mod: In Support of Total-Conversion Modified Video Games, *supra* note 49, at 800 ("A more fruitful approach within [the labor theory of intellectual property protections] may be to move away from traditional Lockean labor theory and toward an analysis based on equity theory. This approach focuses on distributive justice based on individual contributions to a joint venture. Equity theory essentially says that what is fair is what is proportional. When determining how to divide surpluses, individuals rely on a complex social index comprising empathetic preferences and a natural sense of fair play.") (footnotes omitted).

n155. *Id.* at 1137. Laws also commenced a breach of contract action against Elektra. *Id.* at 1143 n.5.

n156. *Id.* at 1136. Having assigned her copyrights to Elektra, Laws lacked standing to assert a copyright infringement claim against Sony.

Id. at 1147.

n157. Id. at 1139.

n158. Id.

n159. Laws, 448 F.3d at 1141-42.

n160. Id. at 1144 (citations omitted). For a similar copyright preemption analysis, see *Toney v. L'Oreal U.S.A., Inc.*, 384 F.3d 486, 491-92 (7th Cir. 2004) (holding that "because the exercise of the [defendant copyright holder's] rights to reproduce, adapt, publish, or display the photos would also infringe upon [the plaintiff's] right to publicity in her likeness in photographic form, her publicity right is equivalent to the rights encompassed by copyright listed in § 106.").

n161. See, e.g., *Kewanee Oil Co. v. Bicron Corp.*, 416 U.S. 470, 491 (1974) (holding that state trade secret law is not preempted by federal patent law); Leonard A. Wohl, Note, *Federal Preemption of the Right of Publicity in Sing-Alike Cases*, 1 *Fordham Intell. Prop. Media & Ent. L.J.*, 47, 50 (1990), available at <http://ir.lawnet.fordham.edu/cgi/viewcontent.cgi?article=1003&context=IPLj> (concluding that "federal copyright law does not preempt state law rights of publicity when such rights are infringed by imitation of a performer's voice within the context of a copyrighted musical work").

n162. *Dastar Corp. v. Twentieth Century Fox Film Corp.*, 539 U.S. 23, 37 (2003) (suggesting that plaintiff's film footage could have been protected both by copyright and by trademark law); *Kewanee Oil*, 416 U.S. at 470; *Mazer v. Stein*, 347 U.S. 201, 217 (1954) (holding that patentability of statuettes for use as bases for table lamps did not bar simultaneous copyright of the statuettes as works of art).

n163. One common example is the use of vintage, classic, or "art house" cinema posters to promote a specific movie theater. The theater may have no plans to actually show the subject films, but rather is attempting to promote itself as a venerable purveyor of important, high-quality cinematic entertainment.

n164. See, e.g., John Collis, *The Story of Chess Records* 117 (1998); Nelson George, *The Death of Rhythm and Blues* 108 (1988) ("Blacks

create and then move on. Whites document and then recycle. In the history of popular music, these truths are self-evident."); James Lincoln Collier, *The Making of Jazz: A Comprehensive History* 106 (1978); see also Olufunmilayo B. Arewa, *Copyright on Catfish Row: Musical Borrowing, Porgy and Bess, and Unfair Use*, 37 Rutgers L.J. 277, 350-51 (2006); Leslie Espinoza & Angela P. Harris, *Symposium, Afterword: Embracing the Tar-Baby - LatCrit Theory and the Sticky Mess of Race*, 10 La Raza L.J. 499, 512-13 (1998); Greene, "Copynorms," *Black Cultural Production, and the Debate over African-American Reparations*, *supra* note 45, at 1184-85, 1188-89 ("In the context of cultural production, Ellisonian invisibility is concrete in all its bitter irony. In the face of prolific and innovative Black musical creativity, 'Whites [in the 1920s] often vehemently denied that AfricanAmericans [sic] had made any contribution to the creation of jazz. New Orleans 'Dixieland' musicians ... made it a point of honor never to mix with Black musicians or acknowledge their talents.' In later years, it was widely conceded that 'though African-Americans had certainly invented ragtime and jazz, these musical styles were being brought to their highest levels by [White] outsiders.'") (quoting Burton W. Peretti, *Jazz in American Culture* 42-43 (1993)); Evans C. Anyanwu, *Note & Comment, Let's Keep it on the Download: Why the Educational Use Factor of the Fair Use Exception Should Shield Rap Music from Infringement Claims*, 30 Rutgers Computer & Tech. L.J. 179, 181-82 (2004); Neela Kartha, *Comment, Digital Sampling and Copyright Law in the Social Context: No More Colorblindness!!*, 14 U. Miami Ent. & Sports L. Rev. 218, 219-23, 232-34 (1997) ("The compulsory license made it possible for white artists to shanghai the African-American songbook. Pat Boone was notorious for covering Little Richard's music, and eventually, songs 'by niggers for niggers' realized a catalog value as great as those of Tin Pan Alley tunesmiths. Another unfortunate reality was that the Black songwriters and performers did not always understand the value of publishing rights which ended up being owned by white record companies. A great deal of revenue was generated by white groups covering Black hits... . Eric Clapton is an excellent example of an artist who reached long term fame using a lot of unoriginal music and styles taken from Black artists... . When he was with John Mayall's Bluesbreakers he recorded (blues artist) Freddie King's 'Hideaway,' Otis Rush and Willie Dixon's 'All Your Love,' Robert Johnson's 'Ramblin' On My Mind,' and later, with the rock group Cream, he recorded 'Crossroads,' another Robert Johnson song. When he was with Derek and the Dominos he recorded Willie Dixon's 'Evil,' Elmore James's 'The Sky Is Crying,' and later in his solo career he imitated reggae music. He recorded some music in Jamaica (not including 'I Shot the Sheriff') where he recorded Peter Tosh's 'Whatcha Gonna Do.' How would Eric Clapton's career fare a 'total concept and feel' analysis like that set forth in *Roth Greeting Cards v. United Card Co.*?" (citing 429 F.2d 1106, 1110 (9th Cir. 1970)); Henry Self, *Comment, Digital Sampling: A Cultural Perspective*, 9 UCLA Ent. L. Rev. 347, 352-53 (2002).

n165. Laws, 448 F.3d at 1136.

n166. Nicole La Porte, J. Lo, *The Sequel*, N.Y. Times, May 15, 2011, at ST1, available at <http://www.nytimes.com/2011/05/15/fashion/jennifer-lopez-the-peoples-pop-star.html?pagewanted=all>.

n167. 542 F.3d 1007 (3d Cir. 2008).

n168. *Id.*

n169. *Id.* at 1032.

n170. *Id.* at 1012-13.

n171. *Id.* at 1011-13.

n172. *Id.* at 1011. Just as *Laws* had, *Facenda* had expressly preserved his publicity rights, notwithstanding his assignment of any copyrights in the original programs:

Facenda signed a "standard release" contract stating that NFL Films enjoys "the unequivocal rights to use the audio and visual film sequences recorded of me, or any part of them ... in perpetuity and by whatever media or manner NFL Films ... Sees fit, provided, however, such use does not constitute an endorsement of any product or service."

Id. at 1012.

n173. *Facenda*, 542 F.3d at 1016.

n174. *Id.* at 1016-17 (citation omitted). Thus, although the work at issue was a narrative video program, unlike the court in *Brown*, the court here acknowledged that an expressive work can have a promotional purpose. Not only did this permit the court to distinguish between promotional and expressive relevance in a manner consistent with *Rogers*, the *Facenda* approach further allows for the recognition of mixed promotional/expressive uses of publicity personas.

n175. *Id.* at 1018 (citing 15 U.S.C. § 1125(a)(1)(A)). The court weighed the following factors: the level of recognition that the plaintiff has among the segment of the society for whom the defendant's product is intended; the relatedness of the plaintiff's fame or success to the defendant's product; the similarity of the likeness used by the defendant to the actual plaintiff; evidence of actual confusion; marketing channels used; likely degree of purchaser care; defendant's intent in selecting the plaintiff; and likelihood of expansion of the product lines. *Id.* at 1019.

n176. *Id.* at 1024-25. While the fact that the plaintiff's persona was used in the work itself and not in its title suggests that the Comedy III test would be applied, here the court found that the work was an infomercial and thus as a primarily promotional work, the *Rogers* test seemed the most appropriate. To the extent that the sampling in *Laws* was undertaken for promotional (urban marketing) and not artistic purposes, the use is promotional as well as expressive. While not an easy hair to split in a music sampling case, the *Facenda* court, unlike the *Laws* court, at least considered this a possibility. *Id.* at 1030.

n177. *Id.* at 1026.

n178. *Id.*

n179. *Facenda*, 542 F.3d at 1027-28 (citations omitted).

n180. *Id.* at 1028 (citations omitted).

n181. *Id.* at 1028-30 (citations omitted).

n182. *Id.* at 1031.

n183. *Id.* at 1030.

n184. *Id.* at 1031-32. Under David Nimmer's analysis, the NFL would probably be able to use *Facenda*'s voice work to promote the original program itself, as an anticipated use of the NFL's exclusive rights to reproduce, distribute, and display the program.

n185. *Facenda*, 542 F.3d 1032; accord, *Alberghetti v. Corbis Corp.*, 713 F. Supp. 2d 971 (C.D. Cal. 2010), *aff'd in part, rev'd in part*, Nos. 10-56311, 10-56400, 2012 WL 3646341 (9th Cir. Aug. 27, 2012). Interestingly, the *Facenda* court nonetheless expressed agreement with the ultimate decision in *Laws*, despite the fact that it differed in its disposition of virtually every substantive issue. Compare *Laws v. Sony Music Entm't, Inc.*, 448 F.3d 1134, 1143 (9th Cir. 2006) (dismissing the plaintiff's intellectual property claims and holding that "to the extent that *Laws* has enforceable, contractual rights regarding the use of *Elektra*'s copyright, her remedy may lie in a breach of contract claim against *Elektra* for licensing 'Very Special' without her authorization."), with *Facenda*, 542 F.3d at 1031-32 ("The NFL argues that *Facenda*'s only remedy should lie in contract. While we agree that *Facenda* could state a claim for breach of contract, we believe that he also retained his tort-derived remedy for violation of Pennsylvania's right-of-publicity statute. Parties may waive tort remedies via contract. It follows that

they may also preserve them."). Indeed, the proffered basis for the court's approval of Laws presents a factual mismatch.

We believe that Laws was rightly decided - Debra Laws sought to enforce a right that she had contracted away. We do not intend to express any disagreement with the Ninth Circuit Court of Appeals by distinguishing the facts of our case from those of Laws. Our case simply presents a different scenario than Laws. Just as Facenda did not, in the standard release contract, waive the right to bring a false-endorsement claim ... he did not grant the NFL the right to use his voice in a promotional television program. This contrasts with the situation in Laws. Debra Laws' voice was not used in an endorsement, but in a work of artistic expression.

... .

[Moreover,] having one's voice used as a sample in someone else's song may implicate a musician's identity. But listeners are probably less likely to assume that the sampled musician vouches for or approves of a new creative work that samples her work than consumers are likely to assume that an individual's presence in an advertisement reflects an active choice to endorse a product.

Facenda, 542 F.3d at 1032 & n.16. While the court initially appears to compare the respective contracts in the different cases, it ultimately distinguishes Laws on an entirely different basis.

n186. McCarthy, The Spring 1995 Horace S. Manges Lecture - The Human Persona as Commercial Property: The Right of Publicity, *supra* note 67, at 143-44 (footnote omitted).

n187. *Id.* at 141 (footnote omitted). The choice is especially poignant where members of marginalized groups have developed highly valuable publicity personas. See, e.g., Jacoby, *supra* note 85, at 1330-31 ("Tiger Woods is primarily a professional golfer and clearly is well-compensated for his performance on the golf course. But he reportedly earned an additional fifty to sixty million dollars in 2000 alone by licensing out the use of his face and his name to companies that want to use them to promote products. He has a contract with Nike, for example, to license sports gear and merchandise, like posters of Woods, to his fans and admirers. Woods, in fact, has set up a corporation, ETW, for the sole purpose of managing his publicity rights. Michael Jordan, before his last 'retirement' from professional basketball, was reported to have earned forty million dollars in a single year by allowing his name to be used in connection with sneakers, underwear, and telephone service.") (footnote omitted). The corporations that utilize the personas of these athletes earn billions through these marketing mechanisms, and it is difficult to see why the athletes themselves should not share in this wealth.

n194. *Id.*

n195. *Comedy III Prods., Inc. v. Gary Saderup, Inc.*, 21 P.3d 797, 797 (Cal. 2001); Franke, *supra* note 193, at 963.

n196. *Comedy III*, 21 P.3d at 808; Franke, *supra* note 193, at 970-71.

n197. Recently the New Jersey District Court made this error in *Hart v. Elec. Arts, Inc.*, 808 F. Supp. 2d 757 (D.N.J. 2011). In deciding whether the purveyor of a football video game had misappropriated the persona of a former college player, the court applied the transformative test to the game as whole, despite its conclusion that the plaintiff's image therein was readily recognizable and presented in his usual setting "doing what he does": playing football. *Id.* at 783, 787. The court thus confused the issue. The point of the transformative test is not to determine whether the defendant has made expressive, copyrightable contributions in general, but rather, whether the defendant's expressive contributions have so transformed the plaintiff's image so as to preclude a viable publicity claim.

n198. A notable weakness of the transformative test is that although it is derived from the copyright Fair Use test, which weighs four interdependent factors, the transformative test imports only one of its factors. Franke, *supra* note 193, at 968-69, 970. While the Comedy III court expressed skepticism towards reliance on the remaining three factors, they need not be imported verbatim. Borrowing further from the Fair Use test, those additional factors might be the nature of defendant's work (i.e., is it expressive or promotional), the extent that the plaintiff's image is used (whether the plaintiff is recognizable), and the impact on the market for the plaintiff's own use of her image.

n199. See *Brooks v. Topps Co.*, 86 U.S.P.Q.2d (BNA) 1361 (S.D.N.Y. 2007). The question of equitable tolling of limitations periods presents a prime example of the need to view publicity disputes through a socially equitable lens. Where the publicity interests of non-celebrities or members of marginalized groups are at stake, acts of misappropriation can be difficult to uncover. While the wealthy and influential celebrity may be well poised to police the exploitation of her persona, the law should not be fashioned or interpreted with only these kinds of publicity plaintiffs in mind. Many celebrities from marginalized groups, persons of historical significance, and the heirs and descendants of same simply lack the resources to monitor the media and commercial market place to protect their publicity interests - assuming that they are even fully aware that such interests exist. With respect to right of publicity limitations periods, the failure to consider the relevant equities can prove tantamount to a de facto license to misappropriate - steal now and pay later, but only if you get caught in time. In deciding whether to toll a publicity limitations period, a court could consider the ability of the plaintiff to police her publicity rights and/or uncover the specific misappropriation at issue; the extent of the defendant's efforts to obtain authorization for the unauthorized use or the basis for her belief that authorization was unnecessary; how open and notorious the unauthorized use was; and the amount of time that has passed since the unauthorized use was undertaken. These considerations could be weighed against evidence that the use was calculated to be undiscovered or that defendant took affirmative steps to prevent plaintiff's discovery of the unauthorized use.

n200. See Heimes, *supra* note 77, at 1 ("In 2010, Kevin Antoine Dodson, a resident of a housing project in Hunstville, Alabama, agreed to be interviewed by the local television news after an intruder entered the home he shared with his sister and her children. The news broadcasted quickly and went viral online, as Mr. Dodson's look, style, and unique manner of speaking attracted the attention of millions of people worldwide. Shortly thereafter, musicians and humorists calling themselves The Gregory Brothers created a song known as the "Bed Intruder Song" with an accompanying music video using clips from the television broadcast. The song was one of the most viewed videos on YouTube, quickly became a top iTunes download, and even rose to the Billboard magazine's top 100 list. According to The Gregory Brothers, they agreed to share some of the proceeds from their song's commercial success with Mr. Dodson. Mr. Dodson obviously acquired instant fame and notoriety. He set up his own website to receive donations and garner additional publicity, and as a result has purportedly raised enough money to move his family to a better house in a safer neighborhood.").

n202. See e.g., Menell, *Intellectual Property and the Property Rights Movement*, *supra* note 35, at 42 ("Even the Supreme Court's most stalwart property rights defenders resisted the effort to pull intellectual property into the traditional property tent. In a unanimous decision ... the Court ruled that injunctions should not be presumed in patent cases; rather courts should exercise equitable discretion in determining relief."); see also Paul M. Janicke, *Implementing the "Adequate Remedy at Law" for Ongoing Patent Infringement After eBay v. MercExchange*, 51 IDEA 163 (2011).

n203. See Kwall, *supra* note 82, at 65 (arguing for a monetary damages-only remedy for certain right-of-publicity infringements).

In light of the substantial support for the imposition of a liability rule approach in other areas of the law, it is surprising that this approach has never been invoked in the context of adjudicating conflicts between the right of publicity and the First Amendment. Indeed, resolution of this conflict is particularly suited to the imposition of a liability rule system since many situations will arise in which the defendant's use is in the public interest, but the plaintiff and defendant will be unable to negotiate privately an agreement permitting such use. The failure of these negotiations may be attributable to factors such as the plaintiff's adamant refusal to sell her persona, or the ability of the plaintiff to extract economic rents from the buyer due to the relative uniqueness of the desired commodity. In such instances, the adoption of a liability rule approach yields the most economically efficient result.

LEXISNEXIS SUMMARY:

... THE INTENT AND REALITY OF DILUTION In the 1920s, Frank Schechter, a trademark practitioner and academic, proposed a cause of action to protect the uniqueness of a mark as a way to remedy what he perceived to be arbitrary and harmful limitations on the reach of trademark infringement law. ... Rogers, a leading trademark scholar who is credited as the author of the Lanham Act, observed the following:

The notion that there is 'property' in trademarks as a separate thing was once quite generally entertained and for a while it served well enough, but it was very soon perceived that a trader's customers might be diverted by the imitation of things which were not trademarks and in which property rights could not be maintained, such as . . . the misuse of personal names, descriptive words and the like. ... The trial court granted summary judgment on plaintiff's trademark infringement and unfair competition claims, finding that the Moseleys' use of the mark "Victor's Little Secret" created no likelihood of consumer confusion. ... In the tarnishment context, the potential impact of the TDRA in elevating the importance of "association" between the defendant's mark and the plaintiff's famous one is even starker, even though the TDRA lists no specific factors for courts to consider in the context of a dilution by tarnishment claim. ... Black Bear's parody defense, as noted above, was rejected in part because the reference that it made to the Starbucks trademark was too subtle and indirect. ... If economic harm were the only, or even a primary, rationale motivating these claims, we would expect the holders of famous trademarks to be considerably less enthused about dilution laws. ... Similarly, speech that allegedly dilutes a famous trademark can provide useful information to consumers about the defendant's goods and services and thereby allow the defendant to more effectively compete. ... Doing Away With Trademark Dilution Statutes Perhaps the most obvious, yet least politically feasible, solution to the problems addressed in this Article would be to repeal the trademark dilution statutes, particularly the TDRA. ... Allowing claims for trade dress dilution under the TDRA, particularly as it is currently construed, enables

dominant market players like Levi Strauss to discourage competition by threatening and filing dilution suits when trademark or copyright infringement claims would fail.

TEXT:

[*212] INTRODUCTION

The cause of action for dilution, which punishes those who purportedly dilute the selling power of famous trademarks by blurring or tarnishing them, is a relatively new and controversial one. ⁿ¹ Trademark litigation has traditionally turned on claims of infringement, which require proof of a likelihood of confusion between the plaintiff's mark and that of the defendant. ⁿ² The interests of consumers and trademark holders are at least theoretically aligned in such actions: when the court prohibits infringement, consumers are better off because they are no longer duped into buying products they do not want, and trademark owners benefit because they no longer lose sales and have their reputations damaged by inferior products masquerading as the real thing. Dilution, by contrast, manifests no such convergence. A plaintiff may state a claim for dilution even though no one is likely to be confused; plaintiff and defendant do not compete; and plaintiff has incurred no actual economic injury. ⁿ³

[*213] Statutory dilution claims are traditionally justified on the theory that even non-confusing uses of a famous trademark (or similar mark) can nonetheless minutely dilute the source-identifying power of the targeted trademark. ⁿ⁴ The alleged harm from dilution is cumulative: unchecked, the dilutive activity subjects the trademark to death by a thousand cuts. ⁿ⁵ Both the original federal dilution statute of 1995 and its substantial enlargement in 2006 assume that the source-identifying capacity of a trademark is akin to a glass of water: spill a drop here, spill a drop there and eventually your glass is empty. This Article advances three claims. First, dilution statutes incorrectly assume that the source-identifying function of a trademark is akin to a rivalrous good (a good that is dissipated by use). If marks are nonrivalrous and therefore function more like words than disposable goods, the economic justification for the dilution cause of action ceases to exist.

Second, even if diluting but noninfringing uses of famous trademarks do impair the source identifying capacity of some marks, the social and transaction costs imposed by dilution law still outweigh the harm that it is designed to avert. Dilution claims inflict anticompetitive burdens and, as a result, may entrench dominant (often oligopolist) firms at the expense of market entrants. Dilution laws have serious non-economic costs as well, as they infringe upon protected speech without sufficient justification. For these reasons and others, dilution law causes more harm than it prevents.

[*214] Finally, the true foundation for dilution law lies in the misplaced fiction of corporate personality, not in alleged economic harms. We do not require trademark holders to prove actual economic injury in the context of a dilution claim because, in truth, there probably is none. Instead, we have granted the holders of famous trademarks the equivalent of a moral right to these marks: an extension of the rights granted to a creator of an expressive work in the copyright context. Trademark holders are vested in their brands, many of which are deliberately anthropomorphized, and the dilution statute reifies and protects these rights as a matter of federal law.

When dilution is recognized for what it really is, it becomes even harder to justify its existence. Although the Pillsbury Doughboy and Barbie may well be trademarks that are imbued with personality traits in the minds of consumers (as well as in the minds of their respective corporate parents), they do not have the type of creative "soul" that normatively warrants this type of protection. Properly viewed, the federal dilution statute is a legislative precursor to the type of corporate personification underlying the Supreme Court's analogous treatment of corporate speech under the First Amendment in *Citizens United* ⁿ⁶ and is equally misplaced. Trademark holders do not have an abstract moral right to ownership of particular words. Absent anticompetitive effects, those words properly remain in the public domain. By granting near-monopoly protection to famous marks, notwithstanding the absence of actual economic injury, the federal dilution statute turns competition on its head and serves to entrench and further concentrate economic power in the hands of dominant corporate firms at the expense of consumers and competitors alike. Dilution law should be repealed or, at the very least, reformed.

I. THE INTENT AND REALITY OF DILUTION

In the 1920s, Frank Schechter, a trademark practitioner and academic, proposed a cause of action to protect the uniqueness of a mark as a way to remedy what he perceived to be arbitrary and harmful limitations on the reach of trademark infringement law. Although the claim for dilution he proposed was not initially a powerful one, it has since become so. The Trademark Dilution Revision Act (TDRA) has expanded the scope and practical impact of the dilution cause of action. However, the economic justification for the dilution cause of action, which requires no proof of actual harm or damages, remains as elusive as ever.

[*215] A. The Origins of the Dilution Doctrine

The concept of trademark dilution arose at a time when the "needs of modern business" demanded the expansion of trademark law.ⁿ⁷ The cause of action for trademark dilution was one proposal to accomplish that goal. The desire to expand trademark law was achieved by the 1946 Lanham Act and subsequent amendments to it, but the emphasis then and, until recently, now was on trademark infringement, not dilution. The historical genesis of dilution claims has substantial significance for its contemporary breadth.

1. *The Rational Basis for Trademark Protection*

The cause of action for trademark dilution traces its roots to Frank Schechter's 1927 article in the *Harvard Law Review*, *The Rational Basis of Trademark Protection*.ⁿ⁸ In this article, Schechter observed that many courts had grown impatient with "old theories of trademark protection," which he believed were insufficient to "serve the needs of modern business."ⁿ⁹ Although Schechter agreed that trademark law needed to expand to keep pace with the evolution of consumer culture in the United States, he rejected a subjective approach that relied on "good conscience" and "judicial sensibilities" to achieve that result.ⁿ¹⁰ Instead, he argued for a new paradigm in trademark law, planting a seed that went on to become the cause of action for trademark dilution. Schechter argued that a trademark, especially a strong one, was injured by "the gradual whittling away or dispersion of the identity and hold upon the public mind of the mark" when the mark was used on non-competing goods.ⁿ¹¹ Schechter concluded that "the preservation of the uniqueness of a trademark should constitute the only rational basis for its protection."ⁿ¹²

[*216] The bulk of Schechter's article derides what he perceived to be the cumbersome limitations of trademark law as it existed in 1927. His chief complaint was that trademark law failed to prohibit copying a trademark so long as the copier did not place the mark upon goods that were directly competing with those manufactured by the original trademark holder.ⁿ¹³ At the time, many courts held that if two users of the trademark (or substantially similar marks) were not directly competing with each other, there could be no unfair competition and hence no trademark infringement.ⁿ¹⁴ Although this rule was fading in 1927, as evidenced by a growing trend toward narrowing its interpretation, Schechter was nonetheless impatient with the pace of change and [*217] rejected even nominal adherence to what he considered to be outdated, ineffectual rules.ⁿ¹⁵

2. *The Historical Backdrop of Schechter's Idea*

Although Schechter's dilution proposition has been lately characterized as a radical, property-based theory inconsistent with the mainstream of trademark law,ⁿ¹⁶ it may not have been considered radical at the time it was written. Indeed, it was arguably the opposite: a throwback to the mid-to-late nineteenth century view of trademarks. During this era, *only* "technical trademarks" (primarily fanciful or [*218] arbitrary marks) were protected against trademark infringement.ⁿ¹⁷ Schechter similarly argued that "arbitrary, coined or fanciful marks or names," such as Aunt Jemima's and Kodak, should be given a significantly broader degree of protection than "words or phrases in common use," such as Gold Medal and Universal.ⁿ¹⁸ Although Schechter's reasons for supporting a dilution cause of action diverged sharply from the justifications for the old common law regime, the end result was arguably not that different.

During this era, a great deal of legal argument focused on whether a given name for a good or service qualified as a "technical trademark." Most early trademark cases were decided by courts of equity, because courts of law were not empowered to award equitable relief, the typical form of remedy in a trademark infringement case. Equity courts based their jurisdiction on the plaintiff's property interest in the trademark.ⁿ¹⁹ If the plaintiff did not have a technical trademark, there was no property to protect and hence no jurisdiction. Similarly, early trademark statutes allowed registration of only those names that qualified as technical trademarks.ⁿ²⁰ Trade names or "non-technical trademarks," such as marks based on personal names, geographic terms, [*219] or descriptive words or phrases, could not be registered or infringed.ⁿ²¹ At least in theory, the degree to which a word or phrase was entitled to legal protection depended on whether it was classified as a technical trademark.ⁿ²² If the mark or name fit into this category, its owner held what many courts characterized as an exclusive property right in that trademark, creating a virtual monopoly on the part of the trademark holder.ⁿ²³

The United States Supreme Court characterized technical trademarks as the exclusive property of their owners during this period. In *The Trade-Mark Cases*, decided in 1879, the Court set forth this proposition in no uncertain terms:

The right to adopt and use a symbol or a device to distinguish the goods or property made or sold by the person whose mark it is, *to the exclusion of use by all other persons*, has been long recognized by the common law. . . and by the statutes of some of the States. *It* [*220] *is a property right*. . . . This *exclusive right* was not created by . . . Congress, and does not now depend upon it for its enforcement.
n24

In fact, trademarks' status as property led to the demise of the first federal trademark statute. The Supreme Court held that the law was unconstitutional because trademarks, as a form of property, were regulated by state law, and Congress had no power to define or regulate that property.ⁿ²⁵

As a result of the judiciary's characterization of trademarks as exclusive property, certain limitations inherent in modern trademark law did not apply to technical trademarks at the turn of the century. For example, the owner of a technical trademark did not have to show "likelihood of [consumer] confusion" to prove that a trademark had been infringed.ⁿ²⁶ Nor was the technical trademark owner required to demonstrate bad intent on the part of the defendant, proof of which was initially required in cases involving non-technical trademarks.ⁿ²⁷ [*221] Similarly, the dilution cause of action, both in Schechter's inception and its modern-day application, does not require the plaintiff to prove either of these elements.

By the time Schechter wrote his *Rational Basis* article, the all-or-nothing approach to trademark law was largely extinct. Courts in the United States quickly abandoned the formalist doctrine that attempted to demarcate a bright line between technical trademarks, designated as the exclusive property of their owners, and trade names, to which substantially fewer rights would attach. This model was found to be simultaneously under-and over-inclusive: trade names were given too little protection, whereas trademarks received too much.

The old model, which granted almost unlimited protection to technical trademarks and precious little to descriptive terms or other types of trade names, was under-inclusive because it did not always reach deliberately deceitful conduct. Courts of equity were reluctant to allow outright deception to go undeterred and unpunished, regardless of whether the aggrieved business owner had chosen a technical trademark as the name for his business. Accordingly, courts began to extend protection to non-technical trademarks, or trade names, when (1) those names had acquired secondary meaning (*i.e.*, the consuming public associated the trade name with a particular business);ⁿ²⁸ and (2) the [*222] plaintiff could prove fraud by the defendant.ⁿ²⁹ To establish fraud, most courts required the plaintiff to show that the defendant had deliberately attempted to pass off his goods as those of the plaintiff.ⁿ³⁰ However, most [*223] courts eventually dropped the fraud requirement, so long as the plaintiff could prove actual or likely confusion on the part of the consumer.ⁿ³¹

Similarly, the old model was over-inclusive because it granted overly broad, exclusive rights to technical trademark

holders. The extent of these rights almost immediately raised fears that trademark law created anti-competitive monopolies. ⁿ³² As one federal court observed in 1923: "Patents, copyrights, and trade-marks excite two deeply seated feelings. One is the feeling of anyone who has originated anything of his right to claim an exclusive property in it and to the trade growing out of it. The other is a hatred of monopoly." ⁿ³³ This desire to avoid granting monopolies to trademark owners led courts to adopt the now-familiar maxim that trademark rights are not held "in gross." ⁿ³⁴ Less than forty [*224] years after characterizing trademarks as an "exclusive" form of property, the Supreme Court gave a considerably more qualified definition of trademarks as property interest:

Common-law trademarks, and the right to their exclusive use, are, of course, to be classed among property rights, but only in the sense that a man's right to the continued enjoyment of his trade reputation and the good will that flows from it, free from unwarranted interference by others, is a property right, for the protection of which a trademark is an instrumentality. [T]he right grows out of use, not mere adoption. ⁿ³⁵

This push and pull resulted in the gradual conflation of the two categories of marks, as courts both expanded the protection given to trade names and limited the scope of rights accorded to technical trademarks. ⁿ³⁶ The judiciary essentially pulled both doctrines to a middle ground that was equally inhabited by both types of marks, and courts began to treat the two classes of common law marks essentially the same. ⁿ³⁷ In 1916, the Supreme Court embraced the merger of doctrine with regard to technical trademarks and trade names under the general rubric of unfair competition law:

Courts afford redress or relief upon the ground that a party has a valuable interest in the good-will of his trade or business. . . . The essence of the wrong consists of the sale of the goods of one manufacturer for those of another. *This essential element is the same in trade-mark cases as in cases of unfair competition unaccompanied by trademark infringement.* In fact, the common [*225] law of trademarks is but a part of the broader law of unfair competition. ⁿ³⁸

Schechter was thus bucking the trend when he argued for a different form of trademark protection for inherently distinctive marks. Schechter's dilution cause of action (although he never referred to it by that name) was reserved for fanciful or arbitrary marks; he did not intend that it would apply to words or terms that were not inherently distinctive. His argument for distinguishing the two classes of marks was directly contrary to the definite trend in favor of conflating them.

3. *Schechter: Legal Formalist, Realist, or Both?*

To be properly understood, Schechter's ideas must be analyzed in the context of his era. When Schechter published his famous thesis that became the genesis of the dilution doctrine, trademark law and the law in general were in a state of transition. The once-ubiquitous doctrine of legal formalism was fading, and legal realism, or positivism, was dawning over the American legal landscape. Moreover, the nation as a whole was also in a state of transition. American business was booming in 1927 as the nation basked in economic prosperity in the aftermath of World War I. Although the Great Depression loomed on the not-too-distant horizon, few could have conceived, let alone anticipated, a worldwide economic collapse in 1927.

The supposedly bright-line distinction between technical trademarks and trade names was typical of legal formalism, which permeated American jurisprudence during the late nineteenth century. The legal formalists believed that "the law was objective, unchanging, extrinsic to the social climate, and, above all, different from and superior to politics." ⁿ³⁹ In the formalist period, typically defined as lasting from [*226] 1873 to 1937, ⁿ⁴⁰ "results in individual cases were accomplished not by an assessment of competing principles and policies, but rather an 'automatic' application of rules deduced logically from greater principles that supposedly dictated a single, correct result in every case." ⁿ⁴¹ In sum, legal formalists favored supposedly objective, bright-line rules over balancing tests. ⁿ⁴² To determine whether a plaintiff could recover in a trademark infringement suit, the formalist jurist would only need to

determine whether the name in question qualified as a technical trademark. If it did, plaintiff had an exclusive property right therein and could preclude defendant from using the mark, much the same as he could prevent the defendant from trespassing on his real property.

Schechter's dilution proposal may be viewed as a plea to return to the certainty of bright-line rules preferred by the legal formalists.ⁿ⁴³ In *The Rational Basis of Trademark Protection*, Schechter decried the unpredictability of then-current trademark law. Dilution is, in fact, not that different than the formalist conception of trademark law at the turn of the century. The extent of rights attendant to the trademark under the modern dilution doctrine turns on whether the mark is characterized as famous,ⁿ⁴⁴ analogous to the designation of a mark as a technical trademark. Once a mark is deemed famous, in practice few limitations are placed on the trademark holder's ability to prevent others from using the mark. Schechter's dilution theory, as articulated in 1927, can be [*227] characterized as a proposal to re-propertyize certain categories of marks.ⁿ⁴⁵ The modern dilution doctrine serves that same function.

However, as Professor Robert Bone has argued, portraying Schechter as a legal formalist, yearning for the days of bright-line rules and easy answers, oversimplifies Schechter's dilution proposal.ⁿ⁴⁶ Schechter's push for a new paradigm in trademark law was openly driven by a pragmatic desire to serve the needs of modern business, a distinctly realist approach that was the polar opposite of the stated goals (though perhaps not the results achieved by) the formalists. Schechter "believed that dilution was the real reason to protect marks because it was the reason that fit the way marks actually functioned in the marketplace, and he urged judges to acknowledge this fact openly because doing so would produce better decisions."ⁿ⁴⁷ Therefore, Schechter is perhaps best characterized as a transitional figure between the formalist and realist eras. His dilution proposal embodied aspects of both legal philosophies.

4. Dilution's Temporary Demise

The desire to merge legal doctrine with regard to trademarks and trade names -- as described above, a marked departure from the legal regime proposed by Schechter -- was also born of the realist movement. The legal realists observed that technical trademarks and trade names functioned much the same in practice. Therefore, it made little sense to protect one more or less than the other. Edward S. Rogers, a leading trademark scholar who is credited as the author of the Lanham Act,ⁿ⁴⁸ observed the following:

The notion that there is 'property' in trademarks as a separate thing was once quite generally entertained and for a while it served well enough, but it was very soon perceived that a trader's customers might be diverted by the imitation of things which were not [*228] trademarks and in which property rights could not be maintained, such as . . . the misuse of personal names, descriptive words and the like.ⁿ⁴⁹

Three years after Schechter published his *Rational Basis* article, another "epoch making article"ⁿ⁵⁰ on the subject of trademark law appeared, this time in the Columbia Law Review, entitled *Trade-Marks and Trade Names -- An Analysis and Synthesis*.ⁿ⁵¹ The authors of the article, Milton Handler and Charles Pickett, argued that there was no "rational basis"ⁿ⁵² for the legal distinctions then existing between technical trademarks and trade names.ⁿ⁵³ Handler and Pickett were consummate realists who argued that the tenets of trademark law should derive from a realistic depiction of the way marks functioned in practice, not the formal label that was attached to a particular mark:

Whether or not there is property in trademarks or trade names seems to us a fruitless and unhelpful inquiry. Both types of mark frequently are the most valuable assets of a business. [] It is enough that plaintiff has a material interest which is worthy of protection. It does not matter much what label is tagged to it. . . . The approach to the law of trade-marks would probably be more realistic if courts entirely abandoned the property notion.ⁿ⁵⁴

However, Handler and Pickett, unlike Schechter, did not argue that trademark law needed a new paradigm. Although Handler and Pickett cited Schechter numerous times, they never discussed his specific [*229] proposal that became the dilution cause of action.ⁿ⁵⁵ Handler and Pickett's idea that *all* types of marks should be entitled to

protection under the likelihood of confusion standard, unlike Schechter's dilution proposal, came to fruition when Congress enacted the 1946 Lanham Act.

B. Trademark Law in the Modern Era

The 1946 Lanham Act codified and unified the law of trademarks in the United States, which had become strictly a creature of state law after the Supreme Court's 1938 decision in *Erie*.ⁿ⁵⁶ Although Schechter most likely would have been pleased by many of the developments codified in the federal statute,ⁿ⁵⁷ Congress did not embrace his claim for dilution. Instead, the Act reflected the predominant trend, as convincingly advocated by Handler and Pickett, of treating all types of marks essentially the same. Moreover, the Act preserved the likelihood of confusion standard for trademark infringement of *all* types of marks (until it was amended in 1995 to include a dilution cause of action).

The Lanham Act represented a triumph of legal realism, as it swept away many of the rules that, in the minds of many practitioners [*230] and academics, had artificially limited the scope of trademark law and its ability to prevent unfair competition. Edward S. Rogers explained the impact of the Act as follows:

Under the modern law . . . , unfair competition includes any act, not necessarily fraudulent, which artificially interferes with the normal course of trade to the disadvantage of another. There need be no competition if the artificial interference is present. It is true, of course, that most of the cases have arisen between competitors in business, but the fact of competition or its absence ought not to be controlling. *It is the nature or the result of the act, not the occupation of the actor which should determine its character.*ⁿ⁵⁸

The Act codified the merger of doctrine as to technical trademarks and trade names. Since 1946, the Lanham Act has extended trademark registration rights and other types of protection to descriptive marks, geographic marks, and other types of marks that were not considered "trademarks" under the common law, so long as they have acquired secondary meaning, or distinctiveness.ⁿ⁵⁹ Although the 1946 Lanham Act addressed many of Schechter's concerns about trademark law,ⁿ⁶⁰ it did not create a separate cause of action for fanciful and [*231] arbitrary marks. Instead, the 1946 Lanham Act created a single cause of action, trademark infringement, for all classes of valid trademarks, judged under the likelihood of confusion standard. Even today, the inherent strength of the mark, *i.e.*, whether the mark is descriptive, suggestive, arbitrary, or fanciful,ⁿ⁶¹ remains relevant to a claim of trademark infringement, but only as a factor in the likelihood of confusion analysis.ⁿ⁶²

The Lanham Act also addressed Schechter's dissatisfaction with the judiciary's reluctance to find trademark infringement when the senior and junior users' goods or services were not identical. The 1905 Trademark Act prevented registration of a mark that was likely to cause confusion with a mark that was already registered, but only if the marks were placed on goods of the "same descriptive properties" as those of the senior user.ⁿ⁶³ The Lanham Act of 1946 eliminated this requirement. Under the revised version of the Act, a junior user could not register or use a mark "in connection with the sale, offering for sale, or advertising of any goods or services on or in connection with which such use is likely to cause confusion or mistake or to deceive purchasers as to the source of origin of such goods or services."ⁿ⁶⁴ As a result, the courts have relegated the similarity (or lack thereof) between the types of goods or [*232] services offered by the plaintiff and defendant to a single factor in the multi-factor litmus test for likelihood of confusion.ⁿ⁶⁵

The scope of the likelihood of confusion standard was broadened again in 1962, when Congress eliminated even more qualifying language from the statute by deleting the reference to "purchasers."ⁿ⁶⁶ Although some courts have interpreted this deletion more narrowly,ⁿ⁶⁷ many have held that its effect has been to prohibit uses of a mark that result in a likelihood of confusion by third parties, not the purchaser of the relevant good or service (post-sale confusion)ⁿ⁶⁸ and confusion by the purchaser prior to (but not at) the point of sale (initial interest confusion).ⁿ⁶⁹ At the [*233] same time, Congress eliminated language from the Act referring to confusion "as to the source of origin" of the plaintiff's goods or services.ⁿ⁷⁰ As a result, the Act has been interpreted to prohibit confusion as to sponsorship or endorsement of a good or service, rather than its source.ⁿ⁷¹ Suffice it to say, Schechter would scarcely recognize the likelihood of

confusion standard as it exists today.

Schechter's desire to expand trademark law was therefore emphatically achieved by the 1946 Lanham Act, but not exactly in the manner he had envisioned. The cause of action he had proposed, however, did not die. Dilution materialized in state statutes as early as 1947, and many states still recognize a dilution cause of action.ⁿ⁷² Congress federalized dilution when it enacted the Federal Trademark Dilution Act (FTDA) in 1995.ⁿ⁷³ Federal dilution law was substantially revised in 2006, when Congress passed the Trademark Dilution Revision Act (TDRA).ⁿ⁷⁴ The dilution cause of action has thus existed for over sixty years, not as a substitute for trademark infringement (as Schechter proposed), but coexistent with it. Remarkably, it has persisted--and [*234] thrived--despite the lack of a convincing or even coherent explanation for its existence.

C. The Failure of the Traditional Justification for Trademark Dilution Law

The claim for dilution, as embodied in the TDRA, the FTDA, and numerous state statutes, derives from the notion that an "association" between the junior and senior users' marks, even in the absence of a likelihood of confusion, will diminish the distinctiveness of the senior mark, thereby reducing its value.ⁿ⁷⁵ Although some have argued that the dilution cause of action is justified by the same law and economics theories that traditionally support trademark infringement claims, those arguments have been subjected to vigorous critique. The attempt to rationalize dilution on the same terms as trademark infringement is akin to fitting a square peg into a round hole, and just as futile.

1. Dilution by Blurring

The TDRA defines dilution by blurring as an "association arising from the similarity between a mark or trade name and a famous mark that impairs the distinctiveness of the famous mark."ⁿ⁷⁶ The mark's distinctiveness is impaired, at least in theory, because the consumer's ability to recall the famous trademark is compromised due to the consumer's exposure to the mark in unrelated contexts. The effect of each dilutive use is cumulative and eventually can even result in the demise of the mark.ⁿ⁷⁷ Whether this phenomenon actually occurs in practice is the subject of substantial debate.

To understand how dilution is supposed to work, it is helpful to start with the law and economics explanation for a different cause of action: trademark infringement.ⁿ⁷⁸ This theory rests on the notion that trademarks are economically efficient because they act as a form of commercial shorthand.ⁿ⁷⁹ By quickly and effectively communicating [*235] information about goods or services to consumers, they reduce consumer search costs in the marketplace.ⁿ⁸⁰ The efficiency of a trademark depends on its ability to act as a source identifier: when the consumer sees the mark, she has to know that the good or service to which it is attached derives from a particular source, with certain known and attendant attributes.ⁿ⁸¹ For example, few people in the United States (and in many other nations around the globe) are forced to wonder what they will get when they order a hamburger at McDonald's. (R) For better or worse, when they see the Golden Arches, consumers know what to expect. Trademark infringement--using another's trademark (or a similar mark) in a manner that is likely to confuse consumers--is prohibited, at least in part, because it makes trademarks less reliable and, hence, less efficient.ⁿ⁸²

[*236] Prohibiting trademark infringement furthers other policy goals as well. In the classic case of passing off, the infringer injures the consumer by tricking her into buying something that she did not want: the consumer wanted to purchase product A, but instead she was lured into buying product B.ⁿ⁸³ Trademark infringement also harms the trademark holder by putting the "goodwill" associated with the mark, loosely defined as the mark's reputation with consumers, in the hands of someone outside the mark holder's control.ⁿ⁸⁴

[*237] For example, if a consumer sees the Golden Arches and thinks she is in McDonald's but, in reality, the restaurant is a "McDowell's" and serves food that does not taste as good as McDonald's, then both the consumer and McDonald's will potentially suffer.ⁿ⁸⁵ The consumer is harmed because she thought she paid for a McDonald's hamburger, but in fact she bought something different and, in this example, something worse. McDonald's is similarly harmed because the goodwill associated with its trademark has suffered a blow, at least as to this consumer. The

customer's experience with the imposter McDowell's has lowered her expectations as to quality associated with the McDonald's brand, and therefore she may buy her fast food somewhere else in the future. Moreover, the next time she sees the Golden Arches, she is not quite as sure about what she is going to get when she places an order.

The law and economics theory for trademark infringement does not easily transfer to a cause of action for dilution, because dilution, by definition, does not require the plaintiff to prove that consumers are likely to be confused.ⁿ⁸⁶ If the consumer is not confused (or even likely to be confused) by the defendant's use of a mark, then she has not been tricked into buying something that she does not want. Moreover, the [*238] mark holder's goodwill has not suffered, because the consumer knows that the goods or services are coming from two distinct sources, and neither is owned or endorsed by the other.ⁿ⁸⁷

Therefore, a claim for dilution by blurring does not further the policy goals of either preventing consumer fraud or preserving the mark owner's goodwill. Rather, the traditional justification for dilution by blurring focuses on the source identifying function of the mark and its ability to bolster economic efficiency in the marketplace.ⁿ⁸⁸ Commentators have argued that trademarks function less efficiently in the marketplace if the consumer makes multiple associations with a given mark, rather than just one. At least in theory, what Schechter characterized as the "uniqueness" of the famous mark is imperiled by these noninfringing uses. Professors Stacey Dogan and Mark Lemley give the following example:

Blurring takes a formerly unique mark (say, Exxon), which consumers can associate with the mark owner *without any necessary context*, and applies it to unrelated products -- say, Exxon pianos or Exxon carpets. Even if the consumer understands that these different Exxons are unrelated, the proliferation of Exxon-marked products may make it more difficult for consumers to figure out which company is responsible for any particular product.ⁿ⁸⁹

[*239] Dogan and Lemley conclude that blurring "can make it somewhat more difficult for consumers to associate a famous mark with its owner."ⁿ⁹⁰

The cause of action for dilution by blurring thus rests upon two critical assumptions: 1) using the same (or similar) marks on different goods or services, in contexts that will not support a cause of action for trademark infringement (because consumers are not likely to be confused), decreases consumers' ability to "associate [the famous mark] with the mark owner without any necessary context"ⁿ⁹¹; and 2) preserving consumers' ability to identify the famous trademark with the holder of the mark, absent context, has value and should be protected. Both of these statements are properly subject to substantial empirical challenge.

The first conclusion--that imbuing a famous trademark with multiple meanings devalues or weakens the original definition of the mark--requires the belief that trademarks do not behave like other words. Language is not immutable.ⁿ⁹² Countless words in the English language have multiple meanings and, outside the trademark context, few would suggest that additional or even derivative meanings necessarily sap strength from the word's original definition.ⁿ⁹³ Deven Desai and I have made a similar argument in the context of the [*240] genericism doctrine, reasoning that "unorthodox" uses of a trademark in noncommercial contexts should not necessarily indicate that a mark has fallen victim to genericide. In that piece, we gave the following example:

[T]he word 'snow' is defined as (1) 'precipitation in the form of . . . white ice crystals'; (2) 'a dessert made of stiffly beaten whites of eggs, sugar, and fruit pulp'; (3) cocaine or heroin; or (4) 'to deceive, persuade, or charm glibly.'ⁿ⁹⁴ Even though definitions 2-4 are fairly clearly derived from the first definition of the word 'snow,' their existence does not undermine . . . the validity of the word 'snow' as it refers to fluffy, white, frozen precipitation. We determine the meaning of the word by the context in which it is used.ⁿ⁹⁵

If the word "snow" were a famous trademark used to sell frozen precipitation, dilution by blurring could prevent the use of the word "snow" in other contexts, *e.g.*, to refer to a dessert, on the grounds that doing so would impede the

word's ability to identify the fluffy white stuff that is a form of precipitation rather than food. Using the word to refer to cocaine or heroin would additionally support a cause of action for dilution by tarnishment. Dilution laws presume that, unlike other words, trademarks are not resilient to multiple uses.

Trademark law has traditionally tolerated multiple uses of the same word in unrelated contexts, so long as these uses are not likely to cause consumer confusion. For example, United Airlines and United Van Lines have peacefully co-existed for years, as have marks like Champion spark plugs and Champion sportswear, Ace retail hardware stores and Ace bandages, Tropicana orange juice and the Tropicana Las Vegas hotel, and numerous others.ⁿ⁹⁶ Consumers use context to attach the appropriate meaning to the word being used, in commercial as well as noncommercial settings. For example, if a person were instructed to [*241] "make a reservation at the Tropicana," that person would be highly unlikely to think about orange juice.

Some empirical research has attempted to prove that the use of a famous trademark on an unrelated product does, in fact, impede the mark's effectiveness as a source identifier for the original user of the mark.ⁿ⁹⁷ Maureen Morrin and Jacob Jacoby conducted a study in which consumers were exposed to allegedly dilutive ads that used famous trademarks in unfamiliar contexts, *e.g.*, Heineken popcorn and Hyatt legal services.ⁿ⁹⁸ The consumers were then asked to identify the senior user's mark, *e.g.*, Heineken beer and Hyatt hotels.ⁿ⁹⁹ The results of the study were inconsistent between these two brands. The study showed that exposure to dilutive ads, as compared to exposure to unrelated ads, increased the amount of time required to identify the proper mark by 125 milliseconds (increasing the response time from 645 milliseconds to 770 milliseconds), as to the Heineken brand.ⁿ¹⁰⁰ However, exposure to dilutive ads had no measurable negative impact on response rates with regard to the Hyatt brand. In fact, response rates of study participants who were exposed to dilutive ads were 130 milliseconds faster than those of participants exposed to unrelated ones (decreasing the response time from 810 milliseconds to 680 milliseconds).ⁿ¹⁰¹

Although these studies are frequently cited as empirical evidence of a dilutive effect, their findings are less than convincing. The impact identified by these studies, even taken at face value, is objectively minimal, literally measured in milliseconds.ⁿ¹⁰² As Professor Daniel Klerman has argued, an increase in response time of 125 milliseconds (approximately one-tenth of a second), as in the Heineken example, is not economically significant.ⁿ¹⁰³ Moreover, the study results also [*242] demonstrate that the dilutive effect, even measured in milliseconds, does not impact all marks equally and should not be presumed. In the Hyatt example, for instance, exposure to dilutive ads appeared to reinforce rather than undermine the brand's distinctiveness. These findings tend to suggest, and Morrin and Jacoby have concluded, that the strongest, or most "famous" trademarks are more resilient and therefore less likely to suffer a dilutive effect,ⁿ¹⁰⁴ which is somewhat ironic given that those marks are the only ones entitled to protection from dilution.ⁿ¹⁰⁵

Another limitation of the study derives from the examples of dilution by blurring that it utilized. The facts supporting a dilution claim are typically not as clear-cut as those shown to survey respondents in the Morrin and Jacoby study. The 2006 amendments to the federal dilution statute (the TDRA) have been interpreted by the circuit courts to de-emphasize mark similarity.ⁿ¹⁰⁶ Marks like "Heineken popcorn" and "Hyatt legal services," which employ direct copies of famous marks on unrelated goods or services, are simply not the typical dilution case.ⁿ¹⁰⁷

Another question not addressed by this study is whether the effect measured in the laboratory persists in real-life commercial settings. As discussed above, when determining the meaning and the effectiveness of language, the power of context is difficult to overstate.ⁿ¹⁰⁸ The law and [*243] economics explanation of trademark law is based on the notion that trademarks function as source identifiers *in the commercial marketplace*. A mark's ability to act as a source identifier for the consumer *outside* that context, or in no context at all (a situation which is more likely to exist, if at all, in a controlled study rather than any ordinary consumer experience), is of questionable value.ⁿ¹⁰⁹ The aim of trademark law is not (and should not be) to preserve a mark's ability to identify a particular source in the abstract, outside the realm of commerce and indeed devoid of any context at all.

Context is crucial because trademarks are words—even though they are words that simultaneously function as

valuable corporate assets--and therefore do not behave in the same manner as more tangible forms of "property." Dilution by blurring stems from the premise that a trademark is essentially a rivalrous good: one that is depleted by use. Any child will tell you (in so many words) that candy, for example, is a rivalrous good. If one child takes a bite of a chocolate bar, then there is less chocolate to go around for everyone else. If everyone helps themselves to the chocolate, even by small bites, eventually the chocolate is gone. Dilution assumes that the source identifying capacity of a trademark similarly functions as a rivalrous good. In theory, the famous mark has a finite amount of source identifying capacity, which is depleted by non-infringing (yet commercial) uses on unrelated goods and services.

Trademarks, by contrast, may well be nonrivalrous goods. ⁿ¹¹⁰ Nonrivalrous goods, like information or scientific research, can be [*244] "consumed" by multiple people at the same time, without depletion and at low cost per additional consumer. Outside the context of trademark law, words or language would almost certainly be characterized as nonrivalrous. Words are not depleted and do not lose their expressive meaning due to overuse. In fact, the opposite is true: if the population stops using a word, its meaning may be permanently lost. Entire languages have died or become extinct due to lack of use. ⁿ¹¹¹ Moreover, some evidence suggests that repetition of a word actually reinforces (rather than detracts from) its meaning. ⁿ¹¹² Nor does the existence of homonyms (as in the case of the word "snow" discussed above) necessarily indicate that the word's primary or original definition is weak. The question is whether famous trademarks, which are both language and valued assets, behave more like words or tangible property in terms of their rivalrous or nonrivalrous characteristics.

Because trademarks are words, there is a strong argument that trademarks largely function like other words and therefore can be used in multiple contexts simultaneously, without depletion. Trademarks are less likely to behave like real estate or some other form of tangible property that is necessarily dissipated through use. Moreover, even assuming that the source-identifying function of a trademark is "whittled away" by allegedly diluting uses, the resulting chips are infinitesimally small, which is why trademark holders are not required to prove damages to prevail on a dilution claim. ⁿ¹¹³ If proof of actual damages were required, the cause of action would almost certainly be practically meaningless. ⁿ¹¹⁴ Trademark holders may be unable to prove damages in these types of cases because they simply do not have any. ⁿ¹¹⁵

[*245] 2. *Dilution by Tarnishment*

The TDRA also prohibits use of a trademark that is "likely to cause dilution by tarnishment [of a famous mark]." ⁿ¹¹⁶ Dilution by tarnishment is further defined as a use that "harms the reputation of the famous mark." ⁿ¹¹⁷ The language of the statute itself provides no further guidance as to what constitutes an actionable claim for dilution by tarnishment. Dilution by blurring and dilution by tarnishment are similar in that, as to both causes of action, the plaintiff need not prove likelihood of consumer confusion, actual economic injury, or actual dilution. ⁿ¹¹⁸ Moreover, both causes of action stem from the consuming public's "association" of the junior user's mark with that of the senior user. However, in a claim for dilution by tarnishment, the association between the two marks is actionable not because it harms the mark's distinctiveness, but because, in theory, it harms the mark owner's goodwill. As stated by the Second Circuit, "[t]he sine qua non of tarnishment is a finding that plaintiff's mark will suffer negative associations through defendant's use." ⁿ¹¹⁹

Dilution via tarnishment arguably increases consumer search costs in the same manner as a claim for dilution by blurring: by [*246] diminishing the mark's capacity as a source identifier. ⁿ¹²⁰ However, tarnishment is more commonly associated with an alternative policy justification for trademark law, the preservation of the mark owner's goodwill. ⁿ¹²¹ Unlike the injury suffered by a mark holder in a case of trademark infringement, the alleged injury to goodwill targeted by a cause of action for dilution by tarnishment is indirect, due to the lack of consumer confusion. The tarnishment claim arises from the fear that the famous trademark holder will suffer guilt by (admittedly indirect) association. In other words, the theory is that even though the consumer is unlikely to think that the trademark holder is the source of the junior user's unsavory or inferior product or service, she will nonetheless no longer have uniformly positive associations with the original trademark as a result of her exposure to the tarnishing use. ⁿ¹²² In a case of tarnishment, the consumer's distaste for the unsavory or inferior product has "rubbed off" on the famous trademark,

thereby damaging it. ⁿ¹²³

The concept of dilution by tarnishment has more intuitive appeal than the claim of dilution by blurring and therefore has proved to be less controversial (although not without its critics). ⁿ¹²⁴ Even if we assume that the tarnishment phenomenon of guilt by association does in fact occur, however, we still must wrestle with the difficult question of how it [*247] should be proven. Like dilution by blurring, the theory behind the cause of action for dilution by tarnishment is that tarnishing uses of a trademark cause the trademark holder an economic harm, albeit such a minor one that it may not be measurable in an individual case. Proving that consumers' exposure to an allegedly tarnishing use of a famous trademark has negatively impacted their opinion of the mark, or the opposite (lack of tarnishing effect), can be difficult if not impossible, at least not without spending large sums of money for experts and survey consultants.

In most cases, of course, the plaintiff bears the burden of proving its case. However, in tarnishment cases involving uses of a mark related to sex or the illegal use of drugs, courts rarely require trademark holders to prove harm to sustain a claim of dilution by tarnishment. In fact, courts have adopted a virtual *per se* rule regarding uses of trademarks in contexts involving pornography, finding almost uniformly that such uses tarnish the image of the mark holder. ⁿ¹²⁵ On the other hand, when the allegedly tarnishing use is a non-vulgar parody or generally does not relate in any way to sex or the illegal use of drugs, the dilution plaintiff is less likely to prevail. ⁿ¹²⁶

[*248] Proof of dilution by tarnishment, like dilution by blurring, is perhaps elusive because, at least in the typical case, no dilution has occurred. In other words, the trademark holder probably cannot prove that he has been harmed because, in fact, he has not been harmed. Even if he has suffered some economic harm, it may well be minute. However, as noted above, the burden of proof in these cases seems to be shifting from the plaintiff to the defendant. Although the TDRA purports to prevent unauthorized uses of a famous mark that are likely to "cause dilution" of it, it has eliminated the plaintiff's duty to prove economic harm altogether. ⁿ¹²⁷

D. The Expansion of Dilution Protection

At least initially, state legislatures and the United States Congress adopted the dilution cause of action to combat the problem of "hypothetical anomalies" such as "Dupont shoes, Buick aspirin tablets, Schlitz varnish, Kodak pianos, [and] Bulova gowns." ⁿ¹²⁸ Schechter, in theorizing the need for a dilution cause of action, cited similar examples: "[i]f 'Kodak' may be used for bath tubs and cakes, 'Mazda' for cameras and shoes, or 'Ritz-Carlton' for coffee, these marks must inevitably be lost in the commonplace words of the language, despite the originality and ingenuity in their contrivance, and the vast expenditures in advertising them" ⁿ¹²⁹ In other words, the cause of action was considered necessary to combat the perceived harm caused by the use of well-known trademarks to sell unrelated goods by someone other than the owner of the well-known trademark. Trademark holders arguably needed the dilution cause of action to prevent such uses, because they fell outside the scope of trademark infringement law. Even today, courts consider the proximity of goods when determining whether consumers are likely to be confused by defendant's use of the plaintiff's trademark. ⁿ¹³⁰ Like the trademark infringement standard, the modern [*249] dilution doctrine has evolved far beyond its historical roots and the stated reasons for its existence.

The current version of the federal trademark dilution statute, the TDRA, prohibits the use of any "famous" mark that is "likely to cause dilution by blurring." ⁿ¹³¹ A "famous" mark is defined by statute as one which is "widely recognized by the general consuming public of the United States" as a designation of source. ⁿ¹³² The Act defines dilution by blurring as an "association arising from the similarity between a mark or trade name and a famous mark that impairs the distinctiveness of the famous mark." ⁿ¹³³ The TDRA does not require proof of "actual dilution," in contrast to the 1995 version of the Act (as interpreted by the Supreme Court). ⁿ¹³⁴ The Act lists six non-exclusive factors that courts may consider in determining whether dilution by blurring is likely to occur. ⁿ¹³⁵

The TDRA also includes a cause of action for "dilution by tarnishment," which is defined as an "association arising from the similarity between a mark or trade name and a famous mark that harms [*250] the reputation of the famous mark." ⁿ¹³⁶ The 1995 version of the statute, the FTDA, did not explicitly prohibit dilution by tarnishment, although it

was generally interpreted as having that effect.ⁿ¹³⁷ Unlike a cause of action for dilution by blurring, the TDRA suggests no specific factors for a court to consider when determining whether dilution by tarnishment has occurred.

The TDRA also identifies certain types of trademark use that are not actionable: 1) fair use, 2) news reporting, and 3) noncommercial use.ⁿ¹³⁸ Unlike the FTDA, the TDRA specifically includes parodies or criticism of a famous trademark within its definition of "fair use."ⁿ¹³⁹ However, the TDRA excludes from fair use protection any use of a mark that serves as a "designation of source" for the defendant's "own goods or services."ⁿ¹⁴⁰

Although commentators initially heralded the TDRA as a "sensible and progressive reform of American federal antidilution protection,"ⁿ¹⁴¹ it has expanded the dilution cause of action in some ways that were perhaps unanticipated by its drafters. Under the TDRA's likelihood of dilution standard, particularly as the courts have interpreted it, proof of association between plaintiff's and defendant's respective marks has become tantamount to proof of dilution. Even when the competing marks are not substantially similar, proof of association may be enough to avoid summary judgment on a dilution claim. The TDRA also allows claims for dilution of trade dress and lawsuits between [*251] competitors, which again draws dilution away from the narrowly prescribed paradigm that it was initially intended to address.

1. The Decline in Relevance of Mark Similarity and the Increase in Significance of Mark Association

The hypothetical case envisioned by the legislatures that enacted dilution statutes was one in which a defendant copied, essentially verbatim, a well-known trademark and used it to sell his own (unrelated) goods or services, thereby diluting the distinctiveness of the well-known trademark.ⁿ¹⁴² Although imagined cases of "Buick aspirin" and "Dupont shoes" may be the inspiration for dilution law,ⁿ¹⁴³ they bear little resemblance to most of the published cases in which a defendant's use of plaintiff's trademark has been found to dilute but not infringe, particularly under the TDRA. In the majority of cases, the mark used by the defendant is not identical to the plaintiff's famous trademark. Rather, defendant's use of the mark is better characterized as a play on words deriving from plaintiff's famous trademark. In far too many cases, evidence of "mental association" between plaintiff's and defendant's marks has become tantamount to proof of dilution itself.

When Congress amended the Act and passed the TDRA, it modified the statutory language in a manner that effectively decreased the importance of mark similarity and increased the relevance of mark association in dilution cases. It did so largely in response to the Supreme Court's decision in *Moseley*, which interpreted the former version of the federal dilution statute, the FTDA. In this case, the Supreme Court held that, when the competing marks were not identical, the plaintiff had to prove *more than* mere association between them to demonstrate that defendant had "impaired the distinctiveness" of and thereby diluted plaintiff's famous trademark.ⁿ¹⁴⁴ The "actual dilution" standard articulated in *Moseley* was roundly criticized by the holders of famous trademarks.ⁿ¹⁴⁵

In *Moseley*, the plaintiff, owner of the admittedly famous Victoria's Secret trademark, sued Victor and Cathy Moseley, proprietors [*252] of a business named "Victor's Little Secret," for trademark infringement and dilution.ⁿ¹⁴⁶ The trial court granted summary judgment on plaintiff's trademark infringement and unfair competition claims, finding that the Moseleys' use of the mark "Victor's Little Secret" created no likelihood of consumer confusion.ⁿ¹⁴⁷ However, the trial court granted summary judgment in favor of Victoria's Secret on the dilution claim, and the Sixth Circuit affirmed.ⁿ¹⁴⁸ The Supreme Court reversed and remanded, holding that evidence of "association" between the two marks was insufficient to prove dilution.

Plaintiff introduced only one piece of evidence that its famous trademark had been diluted and tarnished by the Moseleys' use of the name "Victor's Little Secret." An army colonel, who happened upon an advertisement for the grand opening of the Moseleys' store, "was offended by what he perceived to be an attempt to use a reputable company's trademark to promote the sale of 'unwholesome, tawdry merchandise,'" and therefore sent a copy of the ad to Victoria's Secret.ⁿ¹⁴⁹ The Supreme Court observed that the colonel's "mental association" between Victor's Little Secret and Victoria's Secret did not impair the distinctiveness of or tarnish the Victoria's Secret trademark:

There is a complete absence of evidence of any lessening of the capacity of the VICTORIA'S SECRET mark to identify and distinguish goods or services sold in Victoria's Secret stores or advertised in its catalogs. The officer was offended by the ad, but it did not change his conception of Victoria's Secret. His offense was directed entirely at petitioners, not at respondents. ⁿ¹⁵⁰

The Court in *Moseley* specifically rejected the notion that mere association between non-identical marks was sufficient to prove dilution. In reaching this conclusion, it commented upon an earlier Fourth Circuit opinion holding that a slogan adopted by the state of Utah, "The Greatest Snow on Earth," did not dilute the famous slogan of the Ringling [*253] Brothers Barnum & Bailey Circus, "The Greatest Show on Earth." ⁿ¹⁵¹ The Supreme Court endorsed the Fourth Circuit's conclusion that Ringling Brothers had not proved dilution merely because it had shown that Utah's slogan, which admittedly was not identical to "The Greatest Show on Earth," nonetheless invoked an association with it:

[M]ental association will not necessarily reduce the capacity of the famous mark to identify the goods of its owner, the statutory requirement for dilution under the FTDA. For even though Utah drivers may be reminded of the circus when they see a license plate referring to the 'greatest snow on earth,' it by no means follows that they will associate 'the greatest show on earth' with skiing or snow sports, or associate it less strongly or exclusively with the circus. 'Blurring' is not a necessary consequence of mental association. (Nor, for that matter, is 'tarnishing'.) ⁿ¹⁵²

The FTDA, as interpreted by the Supreme Court, therefore made it difficult for a plaintiff to prove dilution of a famous trademark in cases where the marks in question were not identical, even if plaintiff could show that consumers "associated" the defendant's mark with that of the plaintiff. ⁿ¹⁵³ In the wake of *Moseley*, many courts held that "[a] plaintiff cannot prevail on a state or federal dilution claim unless the marks at issue are 'very' or 'substantially similar.'" ⁿ¹⁵⁴ Although *Moseley* may have temporarily sounded the death knell for dilution cases involving non-identical marks, the impact of the decision was decidedly short lived. Congress amended the federal trademark dilution statute, largely [*254] in response to the *Moseley* decision, and redefined the standard of proof in these cases. ⁿ¹⁵⁵

Under the TDRA, a plaintiff need only prove a likelihood of dilution to prevail on a claim seeking injunctive relief. ⁿ¹⁵⁶ The Act directs courts to consider "all relevant factors" in assessing likelihood of dilution. ⁿ¹⁵⁷ However, it identifies only six "relevant" factors, and in practice the vast majority of courts confine their analysis to these six factors. Three of the six factors relate to the overall strength of the plaintiff's mark, and, in that sense, overlie the factors considered relevant to determine whether the mark is famous. ⁿ¹⁵⁸ The remaining three factors relate to (1) the degree of similarity between the marks, (2) defendant's intent to create an association with the famous mark (or lack thereof), and (3) any evidence of "actual association" between the marks. ⁿ¹⁵⁹ The impact of these statutory amendments, at least in comparison to the Supreme Court's interpretation of the FTDA, has been to de-emphasize the importance of mark similarity ⁿ¹⁶⁰ and to increase the significance of evidence of "association" between the two marks.

Professor Thomas McCarthy has characterized the six TDRA factors as "both incomplete and misleading" because none of them "directs attention to the crucial issue: is there a likelihood that this defendant's mark is likely to be a use that 'impairs the distinctiveness of [*255] the famous mark?'" ⁿ¹⁶¹ He concludes that, "[l]ike a signpost pointing in the wrong direction, the list of factors directs attention away from the key issue of whether there is a likelihood of damage to the famous mark." ⁿ¹⁶² In the wake of the TDRA, few courts require dilution plaintiffs to prove much beyond the mere fact that consumers "associate" defendant's mark with that of the plaintiff, even when the marks in question are far from identical.

The Second Circuit's decision in *Starbucks Corp. v. Wolfe's Borough Coffee, Inc.* ⁿ¹⁶³ illustrates many of the changes arising from the TDRA. In this case, the owner of another undeniably famous trademark, Starbucks, sued a small business, Black Bear Microroastery ("Black Bear"), for federal trademark infringement, dilution, and related state law claims. ⁿ¹⁶⁴ Black Bear was sued because it sold a dark roasted coffee under the name "Charbucks Blend" and "Mr. Charbucks" (the "Charbucks marks"). ⁿ¹⁶⁵ The trial court, after a bench trial, ruled in favor of Black Bear, finding no likelihood of confusion and no likelihood of dilution under federal or state law. ⁿ¹⁶⁶ The Second Circuit affirmed the

judgment as to the trademark infringement claim, but reversed and remanded on the claim asserted under the TDRA.ⁿ¹⁶⁷

In the *Starbucks* case, the district court determined that the two trademarks in question, Starbucks and Charbucks, were only "minimally similar" due to the differences in the context in which they were presented to the consumer (*e.g.*, packaging and logos).ⁿ¹⁶⁸ The court of appeals agreed.ⁿ¹⁶⁹ The Second Circuit nonetheless reversed the trial court's decision in part because the trial court had given too much weight to the similarity factor. The circuit court reasoned that if Congress had wanted to require "substantial similarity" between the competing marks to establish a dilution claim, it would have put those words in the TDRA, [*256] and it did not do so.ⁿ¹⁷⁰ In other words, because Congress did nothing to indicate that the "degree of mark similarity" was more important than the other listed factors, the trial court could not give it special weight. The Ninth Circuit has reached the same conclusion.ⁿ¹⁷¹

The Second Circuit in *Starbucks* also critiqued the district court for giving too little weight to the evidence presented regarding "association" between the plaintiff's and defendant's marks. Although the court found that Black Bear did have an "intent to associate" its coffee with Starbucks, it did not weigh that factor in favor of a likelihood of dilution finding because it determined that Black Bear did not act "in bad faith."ⁿ¹⁷² The Second Circuit noted that the TDRA does not require or even mention evidence of "bad faith" in the context of this factor, and it was therefore error to consider it.ⁿ¹⁷³ Similarly, it held that the district court erred in failing to take into account evidence of "actual association" between the two marks. That evidence was a survey finding that 30.5% of 600 consumers surveyed thought of "Starbucks" when they heard the name "Charbucks."ⁿ¹⁷⁴ That evidence of actual association, under the TDRA, was significant. In some district court cases, courts have issued injunctive relief when the only proof of dilution, other than some similarity between the marks, has been defendant's intent to associate with the famous mark of the plaintiff.ⁿ¹⁷⁵

[*257] In the tarnishment context, the potential impact of the TDRA in elevating the importance of "association" between the defendant's mark and the plaintiff's famous one is even starker, even though the TDRA lists no specific factors for courts to consider in the context of a dilution by tarnishment claim. In one of the few appellate cases that has considered the tarnishment provisions of the TDRA, the Sixth Circuit concluded that proof of association equates proof of tarnishment, citing the legislative history of the TDRA as well as Congress's specific concern that the "actual dilution" standard articulated by the Supreme Court in *Moseley* "creates an undue burden for trademark holders who contest diluting uses and should be revised."ⁿ¹⁷⁶

The Sixth Circuit case interpreting the TDRA's tarnishment provisions features none other than Victor and Carol Moseley.ⁿ¹⁷⁷ Although the Supreme Court held that summary judgment on plaintiff's dilution claim was inappropriate under the FTDA,ⁿ¹⁷⁸ on remand the FTDA did not apply. When the same facts were analyzed under the TDRA, the Sixth Circuit (and the district court) reached the opposite conclusion.ⁿ¹⁷⁹

In analyzing the Moseleys' case for the second time, the circuit court noted that "[t]here appears to be a clearly emerging consensus . . . that the creation of an 'association' between a famous mark and lewd or bawdy sexual activity disparages and defiles the famous mark and reduces the commercial value of its selling power."ⁿ¹⁸⁰ The court [*258] concluded that, when plaintiff can show a "clear semantic association" between a new mark that is used to sell "sex-related products" and the famous one, this association creates "a kind of rebuttable presumption, or at least a very strong inference" that the new mark is likely to tarnish the famous one.ⁿ¹⁸¹ If the presumption is established, the owner of the new mark has "the burden of coming forward with evidence that there is no likelihood or probability of tarnishment."ⁿ¹⁸² In effect, the court conflated the blurring factors of mark similarity and mark association, creating a rule that if the marks are similar enough to create a "semantic association" between them, the likelihood of dilution is presumed, even when, as in this case, the court finds that the tarnishing effect on plaintiff's famous trademark is "somewhat speculative."ⁿ¹⁸³ The opinion effectively shifts the burden of proof in a dilution by tarnishment case from the plaintiff to the defendant so long as the plaintiff can show an "association" between the two marks.ⁿ¹⁸⁴ Perhaps predictably, when the burden of proof was shifted in this case, the Moseleys could not produce evidence *disproving* that their use of the mark "Victor's Little Secret" had tarnished the image of the famous Victoria's Secret trademark.ⁿ¹⁸⁵

In sum, one effect of the TDRA has been to *decrease* the relevance of mark similarity in trademark dilution cases and to *increase* the significance of proof of mark association. Although dilution laws may have been conceived as necessary to prevent a defendant from using a mark identical to plaintiff's famous one (evading liability for trademark infringement by placing the mark on unrelated goods), this type of case does not appear to be common. Moreover, if such misuse of a mark does occur, it is rarely the case that dilution constitutes plaintiff's only viable claim. Rather, at least in recent cases decided under the TDRA, dilution seems to have relevance as a cause of action primarily when defendant's [*259] mark is *not* particularly similar to the plaintiff's, such that the *dissimilarity* between them precludes, at least in part, a finding of trademark infringement.ⁿ¹⁸⁶ In this type of case, proof of mental association between the two marks goes a long way towards proving a likelihood of dilution, and it may be dispositive in cases involving claims of tarnishment.

2. Dilution by Competitors

In addition to mark identity, the other hallmark of the traditional dilution claim—at least as articulated by those who enacted the dilution statutes—has been the use of a famous mark to sell unrelated goods or services. As discussed above, Schechter's original "rational basis" theory was largely born of frustration with the limitations of trademark infringement law of his era, particularly because it did not always offer relief when the defendant placed its mark on goods that were not of the "same descriptive properties" as those of the plaintiff.ⁿ¹⁸⁷ It is therefore not surprising that he cited Kodak bath tubs and Mazda shoes as examples of the harm that dilution was intended to prevent.ⁿ¹⁸⁸ Dilution claims are, however, often litigated under the TDRA in cases where plaintiff and defendant are not selling goods or services in radically different markets and, in fact, may be competitors.ⁿ¹⁸⁹

[*260] In these cases, the defendant typically chooses a trademark for his business that creates an association with the plaintiff's famous mark for the purpose of communicating information about his own business to the consuming public. In some of these cases, the defendant is a relatively small business owner who is attempting to tell consumers that, at some level, his business and that of the famous trademark holder are similar. The desire to create an association with the famous mark is not the same as a desire to "pass off" one's goods as those of the mark holder. In other words, the defendant does not intend to trick the public into buying his goods instead of the plaintiff's. If such facts were proven, the case would undoubtedly be one of trademark infringement, without the need to resort to a trademark dilution claim.ⁿ¹⁹⁰ However, as discussed above, evidence of an "intent to associate" alone currently constitutes powerful evidence of a likelihood of dilution. It is perhaps not surprising, then, that those with the most incentive to create this kind of association (competitors) may find themselves defending a trademark dilution lawsuit.

The trademark case filed by coffee behemoth Starbucks against Black Bear squarely illustrates this phenomenon. Starbucks and Black Bear both sell coffee, although not in comparable amounts. Black Bear is described as a "family-run business that 'manufactures and sells . . . roasted coffee beans and related goods via mail order, internet order, and at a limited number of New England supermarkets.'" ⁿ¹⁹¹ Black Bear operates one retail outlet and occasionally hires part-time workers.ⁿ¹⁹² The Starbucks trademark, on the other hand, is associated with "8,700 retail locations in the United States, Canada, and 34 foreign countries and territories."ⁿ¹⁹³ Moreover, Starbucks coffee is sold in "hundreds of [*261] restaurants, supermarkets, airlines, sport and entertainment venues, motion picture theaters, hotels, and cruise ship lines."ⁿ¹⁹⁴

The district court understandably found that Black Bear's choice of the names "Mr. Charbucks" and "Charbucks Blend" for its coffee product was intended to invoke an association with the famous Starbucks mark.ⁿ¹⁹⁵ In its appellate brief, Starbucks claimed that Black Bear adopted "Charbucks" as a mark "because there 'could not have been a more perfect way for [Black Bear] to grab the attention of consumers.'" ⁿ¹⁹⁶ In addition to invoking a general association with the famous coffee retailer, the name was apparently chosen to convey information about this particular blend of coffee. The owner of Black Bear testified that "[t]he inspiration for the term Charbucks comes directly from Starbucks' tendency to roast its products more darkly than that of other major roasters."ⁿ¹⁹⁷ The slogans accompanying the name emphasized that the blend was dark roasted, promising that the coffee was "[r]oasted to the Extreme . . . For those who like the extreme."ⁿ¹⁹⁸ The name and the slogan can be interpreted as suggesting that the

Black Bear coffee blend, like some Starbucks coffee, is dark roasted, but better than Starbucks. ⁿ¹⁹⁹ This is a form of comparative advertising, one in which a small competitor attempts to enter a market to challenge a dominant competitor.

The *Moseley* case similarly involved parties operating in related if not identical markets. The Moseleys, who had one store in [*262] Elizabethtown, Kentucky and no employees, sold adult videos and "adult novelties," including women's lingerie, which accounted for approximately five percent of total sales. ⁿ²⁰⁰ The plaintiff, which operated over 750 Victoria's Secret stores and reported annual sales in excess of \$ 1.5 billion at the time of the litigation, described its product as "moderately priced, high quality, attractively designed lingerie sold in a store setting designed to look like a wom[a]n's bedroom." ⁿ²⁰¹ Testimony in the case indicated that Victoria's Secret attempts to create and maintain a "sexy and playful" image. ⁿ²⁰²

Although Victoria's Secret and the Moseleys may not have shared the same business model, this case is hardly one of Kodak pianos or Dupont shoes. As the record in the case plainly illustrated, the Victoria's Secret trademark has deliberately cultivated sexual connotations, ⁿ²⁰³ which is most likely why the Moseleys initially chose the names "Victor's Secret" and "Victor's Little Secret" for their business. Although there was little evidence of any likelihood of confusion between the two businesses, which is why summary judgment was granted on the trademark infringement claim, both companies tried to cultivate a sex-related image. By using a name evoking an association with the famous Victoria's Secret trademark, the Moseleys attempted to convey precisely such an image to their potential customers.

It should not be surprising that dilution cases arise in contexts wherein the plaintiff's goods or services bear some resemblance to those of the defendant. A defendant who copies a mark like "Kodak" onto an unrelated item such as a piano receives a limited amount of benefit from doing so, given that the specific attributes of a Kodak camera have little significance in terms of assessing the attractiveness of a large musical instrument. Moreover, to the extent the Kodak piano appealed to the consumer because she was misled into believing that the owner of the Kodak trademark somehow endorsed the product, the defendant would be liable for trademark infringement, and a claim for dilution would be unnecessary.

[*263] However, a play on words that associates with a famous brand in a related market--like Victor's Little Secret or Mr. Charbucks-- may signal certain information to the consumer about the product, particularly given the almost universal recognition of famous brands. These types of names, when presented in contexts clarifying that the famous trademark holder is not the source of the relevant good or service, also have the benefit of avoiding the creation of a likelihood of confusion, *i.e.*, trademark infringement. If this type of word play is actionable, dilution is the most likely claim.

3. *Dilution of Trade Dress*

Dilution claims have also arisen outside the classic formulation of identical marks on unrelated goods in cases involving trade dress. Although the FTDA did not specifically refer to trade dress dilution, some courts did apply the Act in trade dress cases. ⁿ²⁰⁴ The TDRA explicitly applies to cases involving trade dress. ⁿ²⁰⁵ Although the number of trade dress dilution cases is relatively small, they deserve mention because, given the nature of the claim, they tend to arise in the context of disputes between competitors. Defendant's trade dress is unlikely to allegedly dilute that of plaintiff if the parties are in unrelated industries.

An early case involving a claim of trade dress dilution was brought by the maker of a product that is certainly "famous" to the parents of young children: the Goldfish cracker, a product of Pepperidge Farms. ⁿ²⁰⁶ The goldfish shape of the cracker, which Pepperidge Farms claimed as its trade dress, ⁿ²⁰⁷ was allegedly diluted by a new brand of cracker manufactured by Nabisco that included, among other shapes, a [*264] cracker in the shape of a fish. ⁿ²⁰⁸ In the ensuing lawsuit, Pepperidge Farms alleged that Nabisco's cracker mix both infringed and diluted its trade dress in the Goldfish cracker. Its infringement claim failed at the trial court level, but its dilution claim prevailed and was upheld on appeal.

The Second Circuit concluded that the Nabisco crackers were "likely to dilute" the distinctiveness of the Pepperidge Farms goldfish. The court explicitly considered and rejected the argument that dilution was not an appropriate cause of action in a case between two competitors, as snack food giants Pepperidge Farms and Nabisco undoubtedly are. First, it noted that the express language of the FTDA contained no such limitation; to the contrary, the statute provided that dilution could occur "*regardless of the presence or absence of . . . competition between the owner of the famous mark and other parties.*" ⁿ²⁰⁹ The TDRA contains essentially identical language. ⁿ²¹⁰ Moreover, the court reasoned that "the closer the products are to one another, the greater the likelihood of both confusion and dilution. The senior user has a right to the antidilution law's remedy in either case." ⁿ²¹¹

4. The Limitations of Fair Use

When it was enacted, the TDRA's definition of "fair use" was widely perceived to be more generous than that encompassed in the FTDA. Unlike the FTDA, the TDRA does contain an express affirmative defense for parodies. ⁿ²¹² However, the Act exempts from parody protection any mark used "as a designation of source for the [defendant's] own goods or services." ⁿ²¹³ As a result of that exemption and the constrictive interpretation of fair use by many courts, the fair use [*265] defense under the TDRA remains inadequate to insulate from liability many uses of a famous trademark that should not be actionable.

In the context of trademark law, courts have defined "parody" as "a simple form of entertainment conveyed by juxtaposing the irreverent representation of the trademark with the idealized image created by the mark's owner." ⁿ²¹⁴ Simply stated, parodies use trademarks (often famous ones) to make fun of the companies who "own" those marks and may profit from them to an enormous degree. Historically, trademark holders have not appreciated this type of humor and often consider it to constitute dilution, particularly dilution by tarnishment. ⁿ²¹⁵ At least to some degree, however, the First Amendment protects "successful" parodies. ⁿ²¹⁶

The predecessor to the TDRA, the FTDA, did not contain an explicit statutory exemption from liability for fair use in the form of parody. ⁿ²¹⁷ Rather, if parody was exempted from statutory liability at all, it was because it fell within the scope of the general "noncommercial use" exemption. ⁿ²¹⁸ This omission was heavily criticized for its potential [*266] negative impact on the right of free speech. ⁿ²¹⁹ In response to that criticism, the TDRA exempts from liability any "fair use" of a mark designed to identify and parody, criticize, or comment upon "the famous mark owner or the goods or services of the famous mark owner." ⁿ²²⁰ However, this statutory exemption does not apply when the defendant has used the plaintiff's mark "as a designation of source" for her "own goods or services." ⁿ²²¹

To be considered "successful" and hence not actionable as trademark infringement or dilution, a parody must copy the original trademark only so much as is necessary to communicate to the public that it is making fun of the trademark (and/or its owner) and is not a message originating from the trademark holder itself. "Thus, '[a] parody relies upon a difference from the original mark, presumably a humorous difference, in order to produce its desired effect.'" ⁿ²²² In a case that contains perhaps the most thorough judicial analysis of the TDRA's parody provisions to date, the Fourth Circuit held that Haute Diggity Dog's use of the mark "Chewy Vuitton" for its own brand of dog toys was a successful parody of the famous trademark held by Louis Vuitton, maker of luxury purses. ⁿ²²³ The court concluded that Haute Diggity Dog's parody of Louis Vuitton succeeded because it "undoubtedly and deliberately conjures up the famous [Louis Vuitton] marks and trade dress, but at the same time, it communicates that it is not the [Louis Vuitton] product." ⁿ²²⁴ Even though the parody was "successful," however, the statutory language designed to protect parodies did not apply.

The court in *Louis Vuitton* held that a finding of a successful parody does not guarantee immunity from liability under the TDRA's fair use exemption from liability, which by its plain language does not apply when defendant's mark is being used as a designation of source for [*267] its goods, as in this case. ⁿ²²⁵ Moreover, it did not discuss the First Amendment in its analysis of the defendant's parodic use of the Louis Vuitton trademark. Rather, the court considered the parodic nature of Haute Diggity Dog's use of the Louis Vuitton mark in balancing the statutory factors for dilution by blurring. ⁿ²²⁶ In affirming the trial court's grant of summary judgment in favor of Haute Diggity Dog on the dilution

by blurring claim, the court of appeal speculated that the Chewy Vuitton parody might actually increase, rather than decrease, the distinctiveness of the Louis Vuitton mark: "[B]y making the famous mark an object of the parody, a successful parody might actually enhance the famous mark's distinctiveness by making it an icon. The brunt of the joke becomes yet more famous." ⁿ²²⁷ The court also paid scant attention to Louis Vuitton's dilution by tarnishment claim, for which it had little to no evidentiary support. ⁿ²²⁸

The scope of the TDRA's parody exemption, at least as interpreted by the Fourth Circuit, appears to be quite narrow and still raises First Amendment concerns. ⁿ²²⁹ Because the statute's fair use defense categorically excludes all parodies that function as trademarks, ⁿ²³⁰ courts must engage in a fact-specific weighing of factors in these types of cases to determine whether the use will "impair the distinctiveness" of the famous trademark or harm its reputation. ⁿ²³¹ Although the court in [*268] *Louis Vuitton* ultimately concluded that the Chewy Vuitton parody would have neither effect, that result was not a foregone conclusion. ⁿ²³²

Moreover, subtle yet potentially humorous references to a famous trademark are not likely to be considered successful parodies. For example, in *Charbucks*, the Second Circuit found that Black Bear's reference to the Starbucks trademark was at best a "subtle satire" and therefore too indirect to be considered a parody. ⁿ²³³ Under the specific language of the Act, the business owner who wishes to choose a trademark that parodies but does not dilute is therefore faced with a difficult task. A parody, by its very nature, evidences an "intent to associate" with a famous trademark. ⁿ²³⁴ That intent to associate, however, is one of the factors that tends to show a likelihood of dilution by blurring. ⁿ²³⁵ If the parody is ultimately deemed unsuccessful--either because it is not considered humorous by the judge or jury, fails to sufficiently distinguish itself from the famous trademark, or any other reason--efforts to associate with the mark owner will almost certainly not be viewed in a favorable light. The would-be parodist must thus choose a name that invokes the original in a humorous way, directly enough so that the humor is apparent, but not so directly as to leave himself open to a claim of trademark infringement or dilution. If the reference is too *indirect* the parody defense will likewise fail, as it did in the *Starbucks* case.

The statute's fair use exemption for comparative advertising ⁿ²³⁶ likewise does not appreciate subtlety. Comparative advertising has long been considered a fair use defense to a claim alleging misuse of a trademark, both in the infringement and dilution contexts. ⁿ²³⁷ However, if the comparative advertising is not stated in an obvious way, the purveyor of the advertisement will not be insulated from liability. The *Starbucks* case illustrates this principle as well. Black Bear's parody defense, as [*269] noted above, was rejected in part because the reference that it made to the Starbucks trademark was too subtle and indirect. Somewhat ironically, the parody claim was also rejected because the court interpreted Black Bear's message, as communicated via the *Charbucks* marks, as one of comparative advertising (casting Starbucks in a positive rather than a negative light) rather than humor. The court described the *Charbucks* logo as a "beacon to identify *Charbucks* as a coffee that competes at the same level and quality as Starbucks in producing dark-roasted coffees." ⁿ²³⁸ If Black Bear had made this statement directly-- "this coffee competes at the same level and quality as Starbucks in producing dark-roasted coffees"--rather than using the *Charbucks* marks as a "beacon" to convey the same message, presumably its use would have been protected from a dilution claim as a matter of law.

In sum, the TDRA has led trademark dilution law far away from its *Rational Basis* roots. Because Congress has eliminated the requirement of proving "actual dilution," it is now difficult to determine what exactly the plaintiff is required to prove to sustain a claim of dilution. Proof of association (and intent to create the same) between the two marks clearly goes a long way. Fair use is often an ineffective safety valve. Proof of harm caused by dilution may be difficult to come by because, in fact, dilution causes no economic harm. These results are profoundly problematic.

II. THE MORAL PREDICATE OF DILUTION

As discussed above, the economic justification for the dilution cause of action is weak at best. However, despite the less than convincing evidence of the harm it is supposed to address, the cause of action has expanded rather than contracted in recent years. Given that the holders of famous trademarks are typically corporate entities with a duty to maximize shareholder value, it therefore may seem facially surprising that they would champion the dilution cause of

action and often spend vast sums of money litigating these claims. The economic harm caused by dilution, assuming it exists, is almost certainly dwarfed by the cost of enforcement. If economic harm were the only, or even a primary, rationale motivating these claims, we would expect the holders of famous trademarks to be considerably less enthused about dilution laws.

A better explanation for the existence of dilution law, as well as its practical utilization, is that it confers a moral right upon the corporations that create, nurture, and profit from famous trademarks. [*270] Like the authors of creative works, these corporate entities would like to control all uses of their marks, particularly those that are offensive to them, and not just those that cause them economic harm. For example, when testifying before Congress on the subject of the Federal Trademark Dilution Act, counsel for Warner Brothers Studios said, "[T]he trademark owner, who has spent the time and investment needed to create and maintain the property, should be the sole determinant of how that property is to be used in a commercial manner." ⁿ²³⁹ Dilution, at least as currently construed, comes close to granting this wish.

A. Moral Rights in the United States

A moral right is one that does not (unlike most intellectual property law in the United States) depend upon an economic or utilitarian framework to justify its existence. Moral rights are based on the personal rights of the creator, with the idea being that the creator of an artistic work should retain some amount of control over it, even if he does not "own" the work. Moral rights primarily encompass (1) the right of attribution (the right to be named as the author of the work) and (2) the right of integrity (the right to prevent others from mutilating the work or to present it in a manner not approved by the author). ⁿ²⁴⁰ The right of attribution broadly "gives the author the right to control the association of his name with the work," including the right "not to associate his name with the work," and the right to be anonymous. ⁿ²⁴¹ The right of integrity, sometimes referred to as the "right of respect," enables the author to prevent any modification or distortion of his work that misrepresents his "vision or concept." ⁿ²⁴² In sum, these rights "function [*271] to safeguard the author's meaning and message, and thus are designed to increase an author's ability to safeguard the integrity of her texts." ⁿ²⁴³

Perhaps as a result of the lack of economic or utilitarian justification for moral rights, moral rights have gained limited traction in the United States. Although other U.S. laws may be interpreted as indirectly supporting the moral rights of the author, the statute that most explicitly protects the rights of attribution and integrity is the Visual Artists Rights Act, or VARA, which was appended to the Copyright Act in 1990. ⁿ²⁴⁴ VARA was enacted in an effort to comply with the Berne Convention, which the United States had signed two years earlier. ⁿ²⁴⁵ The Berne Convention requires its signatories to provide authors with the moral rights of attribution and integrity:

Independently of the author's economic rights, and even after the transfer of the said rights, the author shall have the right to claim authorship of the work and to object to any distortion, mutilation or other modification of, or other derogatory action in relation to, the said work, which would be prejudicial to his honor or reputation. ⁿ²⁴⁶

VARA is largely regarded as insufficient to satisfy the United States' obligations under the Berne Convention. ⁿ²⁴⁷ Although VARA [*272] does provide for basic rights of attribution and integrity, ⁿ²⁴⁸ it does not apply to all types of authorial works. As its name implies, VARA's protections extend solely to authors of works of "visual art." ⁿ²⁴⁹ A work of visual art is defined as a "painting, drawing, print, or sculpture" and some photographs. ⁿ²⁵⁰ VARA's exclusion of entire categories of works, such as sound recordings and books, is probably the most obvious way in which it conflicts with the Berne Convention. ⁿ²⁵¹ VARA also allows an author to waive (but not transfer) her rights. ⁿ²⁵² VARA's waiver provisions are arguably inconsistent with Berne's definition of a moral right, which is said to exist "[i]ndependently of the author's economic rights, and even after the transfer of the said rights." ⁿ²⁵³ Traditionally, moral rights have been considered inalienable and nonwaivable, owing to their intrinsically personal nature. ⁿ²⁵⁴ As a result of these and other limitations, one commentator has characterized VARA as the "Mini Me" of moral rights laws. ⁿ²⁵⁵

The federal trademark statute (the Lanham Act) makes no specific reference to moral rights or the right of attribution or integrity. However, Section 43(a) of the Act, which prohibits "false designations of origin,"ⁿ²⁵⁶ has been cited as a source of moral rights protection.ⁿ²⁵⁷ At [*273] least in some cases, Section 43(a) has been successfully invoked to prevent a "mutilated" version of the author's work from being presented under the author's name.ⁿ²⁵⁸ In one such case, the Second Circuit reasoned that "[t]o deform [the author's] work is to present him to the public as the creator of a work not his own, and thus makes him subject to criticism for work he has not done."ⁿ²⁵⁹

However, the Supreme Court in *Dastar Corp. v. Twentieth Century Fox Film Corp.*ⁿ²⁶⁰ interpreted Section 43(a) narrowly, thereby thwarting its extension into the moral rights arena. The key question in this case was whether the defendant could edit and repackage footage from plaintiff's television series (the copyright for which had expired) and sell it under defendant's name, with no mention of plaintiff. In essence, plaintiff argued that Section 43(a) of the Lanham Act protected the moral right of attribution via a cause of action for "reverse passing off." The Supreme Court rejected the argument that the author of the original work (the television series) constituted the "origin" of the goods in that case, rather than the producer of the videotapes containing edited footage from the original work.ⁿ²⁶¹ The Court reasoned that extending the Lanham Act in this manner would "conflict with the law of copyright, which addresses [the right of attribution] specifically," in VARA.ⁿ²⁶² Absent Congressional intent explicitly to the contrary, the Court concluded that "[t]he right to copy, and to copy without attribution, once a copyright has expired . . . passes to the public."ⁿ²⁶³ *Dastar's* [*274] interpretation of Section 43(a) thus severely restricted its applicability in these types of cases.ⁿ²⁶⁴

Given the intensely personal nature of moral rights, it is hard to imagine why a corporation would want them. Moreover, as the Supreme Court's decision in *Dastar* illustrates, the Lanham Act itself does not guarantee moral rights, at least in literal terms. To understand the analogy between moral rights law and dilution, one first must consider the sometimes intensely personal relationship between corporate America and its brands.

B. Corporate America's Love Affair with the Brand

Corporate megabrands--the type of trademarks that are easily considered "famous" under the TDRA--are much more than source-identifiers for a particular product. These brands also derive a massive amount of value from their embodiment of expressive meanings, well beyond their concurrent roles as source identifiers and symbols of corporate goodwill.ⁿ²⁶⁵ The corporations that develop and promote these trademarks deliberately cultivate expressive meanings associated with a given mark. In doing so, the creators of the mark endeavor to generate a specific type of "emotional connection" with the consumer.ⁿ²⁶⁶ When the trademark is used in an unapproved manner that is inconsistent with the corporation's vision of its mark, the corporation's message becomes distorted. Corporations accordingly try to control the manner in which their marks are used to the full extent permitted by the dominant legal regime.

[*275] The famous trademarks that perhaps best illustrate this phenomenon are the anthropomorphized corporate children that have fictional personalities and "friends" on Facebook. For example, Mattel's iconic doll/trademark, Barbie, has over 2.5 million friends on the social media website Facebook and identifies herself as a Public Figure who is "[i]n a relationship" (presumably with Ken).ⁿ²⁶⁷ In one recent post, Barbie reported the following status: "Relaxing today with my tried and true solution . . . retail therapy!"ⁿ²⁶⁸ Sometimes her posts are more inspirational: "I've had over 130 careers and I don't plan on stopping! If you can dream it, you can be it!"ⁿ²⁶⁹ Barbie even comments on recent events.ⁿ²⁷⁰ She seems to think she is a real person.ⁿ²⁷¹ Mattel deliberately uses Barbie's online image to create a specific persona associated with the famous Barbie trademark.

Even corporate icon/trademarks less human-looking than Barbie, like the Pillsbury Doughboy and the Planters Peanut, similarly articulate scripted personalities that endeavor to create an emotional connection with the consumer. Pillsbury maintains a detailed set of official guidelines dictating the Doughboy's personality and what he can and cannot do.ⁿ²⁷² The Doughboy is described as "warm and sweet and enthusiastic and helpful."ⁿ²⁷³ Mr. Peanut is apparently more emotionally complex.ⁿ²⁷⁴ According to a Planters corporate officer, Mr. Peanut is "very classy and upscale" -- "someone you might meet at a celebrity [*276] party, or at a new club, or lounge or bar. And -- to your surprise -- he

talks to you! He engages you in conversation! So yes, he's got his top hat and monocle. But paradoxically, he's also quite approachable and down-to-earth." ⁿ²⁷⁵

Even brands that do not employ spokescharacters like the Planters peanut endeavor to cultivate "personality characteristics" to connect with the consumer. ⁿ²⁷⁶ For example, one marketing expert characterizes the Mercedes brand as "relatively 'assertive' and 'in control,' while BMW is more 'sexy' and desirable." ⁿ²⁷⁷ The Apple brand is considered "'creative'" and "'adventurous,'" while Red Bull (an energy drink) is "'adventurous' and 'brave,' if a bit 'arrogant.'" ⁿ²⁷⁸ These brand personalities enable the trademark holder to more effectively reach the target market for the products her brands are designed to sell.

One common feature of many brand guidelines is a keen concern for maintaining the "icon's moral hygiene." ⁿ²⁷⁹ Pillsbury's desire to keep the Doughboy morally flawless, for example, prevented him from appearing in a commercial sponsored by the California Milk Processor Board. As part of the Board's "Got Milk?" campaign, the planned ad featured an "all-American family" sitting down to enjoy a plate of freshly baked Pillsbury cookies. In the ad, the dad discovers, to his dismay, that someone has drunk the last of the milk. The culprit turns out to be a chagrined Doughboy, who promptly dashes off camera. Pillsbury would not, however, consent to the Doughboy being portrayed in this manner. Pillsbury's director of brand development explained why the company rejected the ad: "For some other character, taking the milk might be fine. . . . But not the Doughboy. He doesn't trick people. He doesn't take advantage. It's not in his character to do that." ⁿ²⁸⁰

[*277] Given Pillsbury's refusal to have the Doughboy portrayed as "mischievous" enough to drink the last of the milk, ⁿ²⁸¹ it is perhaps not surprising that the company filed a lawsuit when the Doughboy appeared in *Screw* magazine engaging in sexual intercourse and fellatio. ⁿ²⁸² In that case, Pillsbury prevailed on its state law dilution claim, ⁿ²⁸³ but the court declined to grant relief for "tarnishment of trade characters," which it characterized as a "theretofore unheard of cause of action." ⁿ²⁸⁴ In pleading this cause of action, Pillsbury claimed that the defendant had "altered the image" of the Doughboy, to whom it referred as its "corporate spokesman," in a way that made him "distasteful or even repulsive" to many Pillsbury customers. ⁿ²⁸⁵ Pillsbury's "tarnishment of trade character" cause of action clearly evinces a perceived entitlement to a type of moral right in its trademark Doughboy. Although the purported "trade character" cause of action was unsuccessful, Pillsbury got the same injunctive relief under a claim of dilution.

In a similar vein, toymaker Mattel sued artist Thomas Forsythe when he produced a series of photos that depicted "one or more nude Barbie dolls juxtaposed with vintage kitchen appliances" in "various absurd and often sexualized positions" ("Food Chain Barbie"). ⁿ²⁸⁶ The artist explained that the photos were intended to critique and lambaste the "objectification of women" and "conventional beauty myth" embodied by Barbie. ⁿ²⁸⁷ Forsythe earned less than \$3,700 in gross revenue from the Food Chain Barbie series of photographs, over half of which derived from sales to Mattel investigators. ⁿ²⁸⁸ The Ninth Circuit [*278] affirmed summary judgment for Forsythe on Mattel's trademark and trade dress dilution claims, holding that the works constituted a noncommercial fair use and were protected by the First Amendment. ⁿ²⁸⁹

Although Mattel and Pillsbury clearly have a tremendous economic stake in their brands, the amount of money and effort they invested in these lawsuits is disproportionate to the economic threat posed by these defendants. Particularly in the *Mattel* case, the artistic depictions of Barbie that offended the company received vastly greater circulation and publicity as a result of the lawsuit than ever would have been the case if the artist had been ignored. Moreover, the company spent more money litigating the claim than the economic harm caused by the artist, if any, could possibly justify. ⁿ²⁹⁰ Both lawsuits used claims for trademark dilution as a tool to preserve the perceived integrity of their famous trademarks, much like an artist who raises a claim of moral rights to prevent the mutilation or distortion of his work. In the United States, however, the corporate trademark holder is more likely to succeed on such a claim, under a theory of dilution, than would be the artist.

C. The Path to Moral Rights in Trademark

Given this country's hesitance to guarantee or enforce the moral rights of authors, even in the face of an international treaty compelling it to do so, it is difficult to imagine why the U.S. would be willing to extend such rights to corporations. ⁿ²⁹¹ If dilution is in fact a type of moral right, or at least analogous to one, then the immediate question becomes why it exists.

[*279] *1. Dilution as a "Moral" Right*

The cause of action for trademark dilution bears more than a passing resemblance to the author's moral right of integrity, the right to prevent others from mutilating or distorting the author's work. ⁿ²⁹² In a manner not unlike the author who has created a sculpture or work of literature, the companies who create and nurture famous trademarks have a genuine desire to maintain and enhance the image they have created for their brands. The author likewise has an intrinsically personal interest in ensuring that his vision for the work he created is not distorted by others, even those who may obtain a subsequent ownership interest in his work.

Dilution, at least in its modern conception, protects a corporation's right to preserve the "integrity" of a famous trademark by granting a broad power to restrict others' use of the mark, even when the trademark holder cannot show that it has been economically harmed by that use. As discussed above, if the trademark holder can prove that a consumer is likely to "associate" the famous trademark with that of the defendant, then that association is, in many cases, tantamount to proof of a likelihood of dilution. ⁿ²⁹³ Whether the cause of action for dilution is based on a theory of blurring or tarnishment, the effect is the same: the owner of the famous trademark obtains a considerable degree of control over the manner in which the mark can be used by others, even referentially, particularly in commercial settings.

2. Legislating Moral Rights in the Copyright and Trademark Arenas

One reason why trademark dilution has encountered less legislative resistance than moral rights in the copyright context is because dilution does not expressly bear the "moral rights" label. Dilution as a cause of action is instead justified under the same basic economic model that grounds claims for trademark infringement, *i.e.*, reduction of consumer search costs and preservation of goodwill. ⁿ²⁹⁴ Although some commentators have referred to dilution as a "moral right" in a trademark, ⁿ²⁹⁵ Congress and the courts have not. If the corporations **[*280]** who hold famous trademarks had directly asked Congress to pass legislation preserving their "moral rights" in those marks, they probably would have been considerably less successful.

The relative ease with which trademark dilution legislation was passed in the U.S. Congress, as compared to VARA, can also be explained, at least in part, through pure and simple politics. ⁿ²⁹⁶ The corporations that hold famous trademarks are some of the wealthiest and most influential companies in the United States. For example, in 2012, the three most valuable brands, Apple, IBM, and Google, ⁿ²⁹⁷ were all listed among the top 100 of the Fortune 500 companies. ⁿ²⁹⁸ These corporations are all members of the International Trademark Association (INTA), a group that describes itself as "a leading advocate for the interests of brand owners" ⁿ²⁹⁹ and "a powerful network of powerful brands." ⁿ³⁰⁰ Representatives of INTA and other advocacy groups that promote the interests of trademark holders, such as the American Intellectual Property Law Association (AIPLA), provided extensive testimony to Congress on the TDRA. ⁿ³⁰¹ By contrast, only a limited **[*281]** amount of opposing testimony was offered by free speech advocates such as the American Civil Liberties Union (ACLU). In passing the earlier version of the federal dilution law, the FTDA, Congress heard hardly any testimony, and all of it was in favor of the bill. ⁿ³⁰² Comparatively speaking, federal dilution legislation cut through Congress like a hot knife through butter.

By contrast, proponents of moral rights legislation in the copyright context faced a much stiffer opposition, in particular, the powerful entertainment and film industries. ⁿ³⁰³ Although, like the FTDA, VARA passed through Congress with little debate, that lack of debate did not evidence a lack of opposition. VARA passed on the last day of the Congressional session, and it was included in a bill that authorized eighty-five new federal judgeships. ⁿ³⁰⁴ Without that piece of legislative horse-trading (and the compromises that have weakened VARA's impact), ⁿ³⁰⁵ it is unclear whether and in what form VARA would have been passed.

3. *The Rhetoric of Moral Rights*

Substantive as well as political reasons help to explain the ease with which dilution has been accepted and implemented as a moral right, while those same types of rights have encountered so much hostility in the copyright context. First, dilution neatly fits into the rhetoric of the natural law of property rights and hostility to free riding on the efforts and property of others. These themes are pervasive in American jurisprudence, including intellectual property law. Moral rights in the copyright context, however, cut against that grain. Dilution is viewed as [*282] protecting property holders' rights against interlopers (*i.e.*, "pirates and cheats" ⁿ³⁰⁶). On the other hand, the moral rights of authors have been characterized as undermining property rights. Second, extensive moral rights protections in copyright law have been criticized for having a negative impact on the First Amendment rights of others, due to the restrictions moral rights may place on works that have otherwise entered the public sphere. ⁿ³⁰⁷ Although trademark dilution laws have also been criticized for their negative impact on that same public sphere and the First Amendment, that criticism has been more muted because these laws, by their nature and by statutory definition, typically impact commercial speech. At least until relatively recently, commercial speech has been entitled to limited First Amendment protection.

The rhetoric of property rights is prevalent in trademark law. ⁿ³⁰⁸ The Lockean notion that one should not reap where one has not sown has intuitive appeal, and has been cited as the true policy concern driving the development and expansion of trademark dilution law in the United States. ⁿ³⁰⁹ Although trademark law, at least in the modern era, has consistently warned that trademark rights are limited and do not exist "in gross," it is equally certain that the holders of famous trademarks view them as extremely valuable forms of property over which they should exercise considerable, if not complete, control. As explained by a spokesperson for Ralph Lauren, "We consider the Polo brands to be the [*283] essence of our company. They are our identity, our face, our worth -- in other words, our property. For Polo Ralph Lauren, and many other American companies, the most valuable piece of property that they own is their good name, or, as we say in the industry, their brand" ⁿ³¹⁰ Dilution law enables trademark holders to prevent others from free-riding on their "property," an idea that resonates in U.S. law, even though U.S. dilution law has never codified this policy goal, and it has been subject to vigorous critique. ⁿ³¹¹ In other nations' legal systems, such as the European Union and Japan, the desire to discourage and punish free-riders explicitly justifies and underlies trademark dilution statutes. ⁿ³¹²

[*284] In the copyright context, however, moral rights are controversial largely because they have been characterized as restricting the property rights of copyright owners, who often are *not* the original author(s) of the work. ⁿ³¹³ Under U.S. law, copyrights are alienable and transferrable. ⁿ³¹⁴ The notion that an author should be able to control the manner in which her work is used, even after she has sold her copyright in the work to someone else, contradicts the fundamental definition of what it means to "own" something in the United States. ⁿ³¹⁵ Some have argued that investment of moral rights in existing works might effect an unconstitutional taking of property (from the holder of the copyright). ⁿ³¹⁶ Therefore, moral rights law, in the copyright context, clashes with the rhetoric of property. Moreover, when legislation implementing the Berne Convention was debated in Congress, that clash generated considerable political opposition from powerful groups who purchase and hold large numbers of copyrights (*e.g.*, movie studios), who did not wish to have laws enacted that would constrain their ability to exploit their copyrights.

Moral rights in copyright law have also encountered resistance due to their perceived negative impact on the public domain. Unlike trademarks, which can continue to exist so long as they are being used, [*285] copyrights eventually expire. ⁿ³¹⁷ When they do, works of authorship pass into the public domain, for the public to use as they see fit, regardless of the desires of the author. ⁿ³¹⁸ Moreover, even during the life of the copyright, the statutory fair use doctrine and the First Amendment permit uses of copyrights that are arguably inconsistent with the concept of moral rights. ⁿ³¹⁹ For these reasons, not only copyright owners but also free speech advocates have opposed the adoption and vigorous enforcement of moral rights laws in the context of U.S. copyright law. ⁿ³²⁰

Free speech advocates have opposed the enactment and enforcement of dilution law as well, but their arguments have had less impact, in part for the political reasons discussed above. Moreover, as a substantive matter, free speech

arguments in the trademark context have had limited success because most trademark disputes arise in the commercial speech arena. When trademark holders have filed lawsuits to constrain noncommercial speech, specifically artistic speech that is more frequently the subject of copyright disputes, their arguments have met with limited success.ⁿ³²¹ Although dilution law undoubtedly imposes costs in terms of its impact on the right to free expression protected by the First Amendment, as discussed *infra*, those costs have often been downplayed (perhaps unjustifiably) because the speech constrained is commercial.ⁿ³²²

[*286] 4. *An Alternative Explanation: The Right of Publicity*

Trademark holders' rights under dilution law have also been analogized to the right of publicity.ⁿ³²³ The right of publicity (which exists under state law onlyⁿ³²⁴) gives an individual the ability to control others' use of his image or identity for commercial purposes.ⁿ³²⁵ The right of publicity has itself been characterized as a type of moral right, as it originated (at least in part) to protect the integrity of the individual.ⁿ³²⁶ Particularly in the case of anthropomorphized famous trademarks, like Barbie and the Pillsbury Doughboy, it is not difficult to see the parallels between an individual's right of publicity and a famous trademark holder's right to protection against dilution. If Vanna White has the right to enjoin Samsung's use of a wheel-spinning robot that evokes her image,ⁿ³²⁷ why shouldn't Barbie have the right to control others' commercial use of her image as well? Moreover, the right of publicity, like dilution lawsⁿ³²⁸ and unlike the *droit moral* in the copyright [*287] context,ⁿ³²⁹ arguably finds justification in the anti-free-riding impulse that permeates property law in the United States.ⁿ³³⁰

However, there are some key differences between the right of publicity and the dilution cause of action as well. At least in its modern conception and in the typical case, the right of publicity relates less to the individual's desire and ability to control her image and more to her ability to profit from it.ⁿ³³¹ Therefore, damages (in addition to injunctive relief) are routinely awarded as a form of relief in right of publicity cases.ⁿ³³² However, damages are the exception and not the rule in the context of dilution law. Under state dilution laws, an injunction was originally the *only* form of available relief. Even under the TDRA, damages are available only in cases of "willful" dilution, and injunctive relief remains the primary form of remedy.ⁿ³³³ Moreover, at least in most [*288] states, the right of publicity is freely alienable and transferable.ⁿ³³⁴ Trademarks generally are not. Under trademark law, at least in theory, the holder of a famous trademark cannot sell or even license it without also transferring the accompanying goodwill.ⁿ³³⁵ Transfers of interest without goodwill can lead to the invalidation of the trademark.

These doctrinal divergences derive from the variance in the theory and policy at the core of these respective doctrines. Although the right of publicity has origins in the right of privacy and other distinctly "moral" predicates, the doctrine in its current form is more about commodification than control. The basic theory behind most right-of-publicity cases is that the defendant has unjustly profited by using the plaintiff's image or likeness, without her consent. The right of publicity tort forces the defendant to pay plaintiff for the use of her image.

The desire to be compensated for economic harm (even under a theory of unjust enrichment) has never driven trademark holders' enthusiasm for the dilution claim. Although dilution laws are justified on [*289] the theory that dilution causes economic harm, that harm is acknowledged to be so inchoate and minute, at least in individual cases, as to be incapable of measure. Therefore, the cause of action exists "regardless of the presence or absence of . . . actual economic injury."ⁿ³³⁶ Famous trademark holders do not want alleged diluters to pay for the use of famous marks; they want such unauthorized uses to cease. As explained above, the most likely explanation for the trademark dilution claim -- one which is consistent with the elements of the cause of action and the typical forms of relief that it provides -- derives from the trademark holder's desire to *control* the manner in which others use (or evoke) the famous mark.

5. *Dilution and the Personification of Corporate America*

Despite their differences, the right of publicity and the copyright concept of moral rights do share one key trait: they are distinctly personal rights. Extending this type of right to the holders of famous trademarks, the vast majority (if not all) of which are corporations, continues the trend seen in other areas of the law, such as the First Amendment, in

which distinctions between the legal rights of natural persons and the corporate personality have faded. In *Citizens United*, the United States Supreme Court held that political speech, in the form of monetary campaign contributions made by corporate entities, was entitled to full First Amendment protection.ⁿ³³⁷ This opinion has been subject to vigorous critique, not just for its public policy implications in terms of campaign finance regulation, but also for its conclusion that corporations should enjoy the same First Amendment rights as individuals. Writing in dissent, Justice Stevens opined that "[t]he conceit that corporations must be treated identically to natural persons in the political sphere is not only inaccurate but also inadequate to justify the Court's disposition of this case."ⁿ³³⁸

[*290] The policy implications of extending moral rights to the corporate holders of famous trademarks--like the expansion of speech rights for corporate actors in *Citizens United*--are significant. If the point of dilution law is to allow the holders of famous trademarks to preserve the integrity of their marks and to prevent others from mutilating them, then logically they should not be required to prove actual harm, actual dilution of the mark's distinctiveness or goodwill, or actual damages. The harm caused by the violation of a moral right is inchoate and essentially incapable of economic proof. When the proper label is placed on the cause of action, however, a further, more fundamental question should be answered: Should we enforce a cause of action that enables corporations to protect their "moral rights" in a trademark? If so, should that cause of action look like the current version of the federal dilution law? The answer to those questions, as explained below, is "no."

III. DILUTION REFORM

Vindicating the moral rights of corporations may seem like a questionable legislative endeavor. However, if the dilution cause of action imposed no costs--in other words, if dilution laws were harmless, as some have perceived them to be--then the exact nature of the interest they are intended to protect would be largely academic. Dilution laws do, however, impose substantial costs that must be considered in assessing whether the cause of action should continue to exist, at least in its current form. Those costs, particularly the negative impact on speech and competition created by the enforcement of these laws, outweigh their benefits. Although the outright repeal of the TDRA is unlikely, the statute should be amended or at least narrowly construed to minimize the externalities that it imposes.

A. Why Dilution Laws Matter

The practical effect of a dilution cause of action is difficult to precisely identify. Few complaints solely assert a cause of action for trademark dilution. Moreover, famous trademarks are entitled to such a broad degree of protection in trademark infringement actions that the dilution claim is typically superfluous.ⁿ³³⁹ Perhaps as a result, empirical data from the ten-year period preceding enactment of the TDRA (1996-2006) [*291] indicated declining rates of enforcement of dilution claims in federal courts.ⁿ³⁴⁰ Based on this data, Professor Clarissa Long concluded that "[i]n the federal courts, . . . dilution cases are not exactly a juggernaut."ⁿ³⁴¹ An empirical study of cases decided in the year following the enactment of the TDRA yielded similar results, leading Professor Barton Beebe to opine that the dilution claim remained superfluous and that anti-dilution law had "no appreciable effect on the outcomes of federal trademark cases or the remedies issuing from those outcomes."ⁿ³⁴²

The characterization of dilution claims as superfluous hardly constitutes a ringing endorsement.ⁿ³⁴³ As Professor Beebe and others have argued, famous trademark holders may not "need" dilution protection in the vast majority of cases, given the scope of modern trademark infringement law. If dilution claims imposed no costs, their superfluous nature would at least potentially render them harmless if not helpful.

However, dilution claims tend to matter the most when their potential for negative impact on speech and competition hits its peak: cases in which the plaintiff cannot prove trademark infringement, even under today's broad standards. Conversely, in such cases the likelihood that the trademark holder has suffered any significant economic injury reaches its nadir. The manner in which courts have interpreted the TDRA (in addition to the language of the Act itself) has exacerbated this problem. Moreover, the mere threat of a dilution suit in federal court, with the possibility of being forced to pay plaintiff's attorney fees in addition to your own, is often more than enough to chill protected speech

and potentially suppress competition. As a result, the cost of superfluous or even frivolous dilution claims may be substantial.

B. The Externalities of Modern Dilution Law

Dilution laws come close to granting trademark rights "in gross." Traditionally, trademark law has not reached this far, primarily because (1) unlike copyrights and patents, trademarks are not constitutionally sanctioned monopolies; and (2) also unlike copyrights and patents, [*292] trademarks do not have an expiration date; they endure so long as they continue to be used to identify the mark holder's goods or services. ⁿ³⁴⁴ The expansive rights granted by trademark dilution laws have been justified or at least excused on the grounds that, in practical application, they impose little in terms of costs. ⁿ³⁴⁵ In other words, protecting trademark holders against dilution has been characterized as creating few significant externalities. This view of trademark dilution law, however, underestimates its capacity to harm.

1. *The Clash between Dilution Law and the Value of Speech*

The famous trademarks that are most likely to qualify for dilution protection, *e.g.*, Google and Coca-Cola, are ironically the marks that objectively need dilution protection the *least*. Empirically speaking, their fame insulates them from dilution, as the brand is so well established in the consumer's mind that it is difficult to budge. ⁿ³⁴⁶ Moreover, their sheer ubiquity makes it easy to argue, whatever the context, that another's use of the same or a similar mark will lead to a likelihood of consumer confusion.

These marks are also the ones that carry with them the *most* potential for expressive use. ⁿ³⁴⁷ The famous brands that are entitled to protection under the TDRA are not just "mega-valuable corporate assets"; they also are part of contemporary culture and, as such, embody a host of linguistic meanings. ⁿ³⁴⁸ As discussed above, the corporations [*293] that seek dilution protection for famous marks definitely comprehend these trademarks' significance beyond their commercial function and attempt to cultivate (and control) that aspect of their meaning. ⁿ³⁴⁹

The staggering value of these brands ⁿ³⁵⁰ derives in large part from their expressive function. "Brands can become symbols by which people define and express themselves, such that people spend money far beyond the cost of the utility of the good to reinforce that identity or have that means of expression." ⁿ³⁵¹ For example, a Louis Vuitton purse signals that the consumer who owns it is in the company of celebrities and others who can afford to pay \$ 1000 for a purse (and are willing to do so). ⁿ³⁵² Although the purse is hopefully well constructed, it is highly unlikely that the majority of the purchase price derives from the value of the labor and materials required to make it. Reduction in consumer search costs and goodwill does not account for billions of dollars in brand value.

Famous trademarks may also take on expressive meanings that are not deliberately created by their corporate handlers, and which may be neutral or even negative in terms of their impact on brand value. For example, the word "Barbie" not only signals a doll manufactured by Mattel, complete with the image Mattel would like her to represent, but also functions expressively when used to refer to a beautiful yet "empty-headed" woman. ⁿ³⁵³ The pop band Aqua undoubtedly intended to tap into the unofficial expressive meaning of Barbie when it produced the hit song *Barbie Girl*, as the lyrics demonstrate. ⁿ³⁵⁴ As is often the case, [*294] Mattel was not amused and filed suit for trademark infringement and dilution. Although the court ultimately held that the use of the Barbie mark in a song was not actionable because it was a constitutionally protected parody, the language of the FTDA (the governing statute at the time) by no means clearly embraced the "Barbie Girl" song as a fair use. ⁿ³⁵⁵ Moreover, the litigation was enormously contentious and hence expensive, prompting Judge Kozinski to end his opinion by advising the parties "to chill." ⁿ³⁵⁶

The federal dilution statute, both in its current version (the TDRA) and its previous incarnation (the FTDA), provides scant room for these types of expressive uses, particularly in commercial contexts. Although the TDRA more clearly exempts parodies from dilution liability than did the FTDA, the statutory exemption does not apply when the parody is embodied within a trademark. ⁿ³⁵⁷ As a result, at least one circuit court has held that parodies that are also trademarks are protected only if they do not dilute. ⁿ³⁵⁸ Although the court in that case found no dilution, it is far from

certain that every court will reach the same conclusion, given the fact-specific nature of the inquiry. For example, in the *Barbie Girl* case, the court concluded that the *Barbie Girl* song was in fact "dilutive" and insulated from liability only because it constituted a "noncommercial use" of Mattel's trademark.ⁿ³⁵⁹ The narrow scope of the fair use defense therefore raises serious First Amendment concerns.ⁿ³⁶⁰

Even outside noncommercial or obviously expressive uses of trademarks, *i.e.*, in the realm of purely commercial speech, the dilution cause of action still impacts First Amendment rights. Some [*295] commentators have convincingly argued that the dilution cause of action fails the Supreme Court's *Central Hudson* test for commercial speech and therefore violates the First Amendment.ⁿ³⁶¹ Commercial speech is protected under the First Amendment if it concerns lawful activity and it is not misleading.ⁿ³⁶² Speech that constitutes trademark infringement is not protected because the likelihood of consumer confusion that it creates renders it misleading.ⁿ³⁶³ Because a dilution claim does not require proof of likelihood of confusion, the speech it targets is not misleading and, therefore, should be entitled to constitutional protection.

Moreover, speech that allegedly dilutes may be affirmatively valuable to both consumers and competitors. In *Central Hudson*, the government claimed that the speech at issue (advertisements by a monopolistic electric company) was not entitled to constitutional protection because, even though the speech was non-misleading, it was not "of any worth," as it did not convey useful information to consumers.ⁿ³⁶⁴ The Court rejected that argument, reasoning that "[e]ven in monopoly markets, the suppression of advertising reduces the information available for consumer decisions and thereby defeats the purpose of the First Amendment."ⁿ³⁶⁵ Similarly, speech that allegedly dilutes a famous trademark can provide useful information to consumers about the defendant's goods and services and thereby allow the defendant to more effectively compete.

When a proprietor chooses a name for her business (*i.e.*, a trademark) that taps into the expressive meaning of a famous mark, without creating a likelihood of consumer confusion, both the proprietor and the consumer stand to benefit. By associating herself and her [*296] business with the famous trademark, the proprietor increases the efficiency of her new mark by conveying useful information about the good or service to which it is attached.ⁿ³⁶⁶ The consumer benefits because the mark more effectively reduces search costs. For example, a person who sees an ad for "Victor's Little Secret" has some idea of what is for sale, without knowing anything about the store other than its name. Yet an intent to associate with a famous mark weighs in favor of a finding that the proprietor of such a business has diluted the famous mark.ⁿ³⁶⁷ The TDRA thus undoubtedly (and intentionally) discourages such associative uses, thereby suppressing speech.

If commercial speech is protected, then the regulation restricting it must directly advance a "substantial government interest."ⁿ³⁶⁸ The Supreme Court has clarified that "[t]his burden is not satisfied by mere speculation or conjecture; rather, a governmental body seeking to sustain a restriction on commercial speech must demonstrate that the harms it recites are real and that its restriction will in fact alleviate them to a material degree."ⁿ³⁶⁹

Dilution laws do not appear to directly advance a substantial government interest. By their express terms, the TDRA and state dilution laws do not require a finding that the plaintiff has been economically harmed. They are not designed to protect consumers in any meaningful way. Although the TDRA prohibits uses of famous trademarks that "cause" dilution of those marks, the plaintiff need not prove that any such dilution or actual harm has occurred to prevail under this statute. The alternative, more realistic, explanation for dilution laws is that they exist to facilitate the preservation and control of corporate persona and image, as embodied in famous trademarks. While corporations may have a substantial interest in achieving this end, the government does not. For these reasons, the dilution cause of action raises significant First Amendment concerns.

The corporations that "own" famous trademarks cultivate and profit enormously from the expressive meanings that these marks convey. Much like an artist who has crafted a great sculpture, these trademark holders wish to control all uses of their creations, especially [*297] those they find offensive. However, in the absence of any real economic injury to the trademark holder (and certainly not any measurable one), the control granted via the dilution cause of

action should take into account the costs that go along with it. Prohibiting others from tapping into these expressive meanings, even in commercial settings, is a substantial externality of the dilution cause of action and arguably one of Constitutional proportion.

2. The Impact of Trademark Dilution Law on Competition

The expressive function of famous trademarks is enormously valuable, both for the holders of such marks and the public at large. Preventing proprietors from tapping into those expressive meanings in developing their own trademarks, when such uses do not cause a likelihood of confusion with the original mark holder, deprives the proprietor of an efficient trademark and negatively impacts his ability to compete. Current dilution doctrine, particularly under the TDRA and recent interpretations of that statute, poses more direct threats to competition as well. Although suits between direct competitors were not originally envisioned under the dilution cause of action, such lawsuits are in fact often the cases in which dilution claims matter the most. When a trademark infringement claim fails because the facts will not support it, dilution is a useful stand-in. In such cases, it may be difficult if not impossible to distinguish the kind of association between two marks that constitutes actionable dilution from the "injury" that a trademark holder suffers as a result of regular competition. The extent to which dilution laws suppress competition should be recognized as a cost and considered in examining the scope of the doctrine.

Lawsuits between competitors, based on the use of their respective trademarks, have traditionally been resolved under the rubric of the trademark infringement cause of action, specifically the likelihood of confusion standard. The interests of consumers and the plaintiff are largely aligned in such cases: both are harmed by trademark infringement. ⁿ³⁷⁰ At least in theory, the dilution claim should have no impact in these lawsuits. In such suits, one would expect that a dilution claim would be superfluous. ⁿ³⁷¹ However, the plain language of the TDRA (and its predecessor, the FTDA) does not bar its application in lawsuits between competitors and, in fact, says the opposite. ⁿ³⁷² Dilution [*298] claims are becoming increasingly relevant in such lawsuits, to the detriment of competition.

As discussed previously, some courts have interpreted the TDRA's six-factor test for dilution as eliminating the "substantial similarity" test from trademark dilution analysis. ⁿ³⁷³ As a result, in some cases a trademark dilution claim has survived summary judgment or other adjudication when a trademark infringement claim has not, often because the marks in question were not similar enough to support an infringement claim. In essence, the dilution claim picks up where infringement leaves off, resulting in potential liability, or at least the inability to win the case on a summary judgment motion, in a case where the plaintiff would otherwise be expected to lose. Such cases may do more to create "unfair competition" than eliminate it.

A recent case involving Levi Strauss and Abercrombie & Fitch illustrates how suits between direct competitors, particularly in the context of trade dress dilution, poses problems. ⁿ³⁷⁴ Both Strauss and Abercrombie sell blue jeans that are adorned with pocket stitching. ⁿ³⁷⁵ The pocket stitching by Strauss, the plaintiff, is considered famous, and in fact would be easily recognized by most American consumers. Strauss alleged that Abercrombie's pocket stitching infringed and diluted Strauss's famous design. Analyzing the infringement claim in this lawsuit would have required an answer to the following question: Would a person encountering Abercrombie's pocket stitching on the backside of a pair of jeans likely be confused into thinking that the jeans were in fact made by Strauss? The answer to that question was apparently "no."

The dilution claim, by contrast, poses a much more difficult question: After encountering Abercrombie's pocket stitching on the backside of a pair of jeans (which the consumer would not be likely to mistake for Levi's), would the consumer think of Strauss just as quickly the next time she saw Strauss pocket stitching, or would her response time be slower because her mind had been "polluted" by subconscious images of the Abercrombie design? As an empirical matter, that question is exceedingly difficult to answer, ⁿ³⁷⁶ but, more importantly, it is unclear how this kind of "mental pollution" differs from the desired [*299] effect generated by legitimate competition. ⁿ³⁷⁷ Of course Abercrombie wants to pollute the customer's mind with images of its own jeans in addition to the ones sold by Levis; that is the point of competition. If Abercrombie is prohibited from provoking these kinds of associations, its ability to

compete will be compromised. Although Strauss might like to prevent all other jeans makers from adorning the backsides of jeans, lest such adornments intrude upon the "uniqueness" of the Strauss trademark, it is unclear why this is a desirable result from anyone's perspective other than Strauss.

The trade dress utilized by a competitor may often bear some resemblance to the plaintiff's because the two parties are, in fact, competitors, *i.e.*, they produce goods or services in the same market. Particularly given that the "substantial similarity" test no longer acts as a robust gate-keeper in the dilution analysis, ⁿ³⁷⁸ the danger presented by trade dress cases like *Levi Strauss* is that courts and juries will have difficulty distinguishing between the type of "association" that tends to prove actionable dilution under the TDRA and the association between products that is deliberately and legitimately generated in the course of competition. ⁿ³⁷⁹

The existence of a trade dress dilution claim also implicates the doctrine of aesthetic functionality, an affirmative defense that exists to ensure that trade dress protection does not negatively impact free competition. ⁿ³⁸⁰ When trademark protection is extended beyond the [*300] "precise expression of a decorative style," there is a danger that competitors will lose access to "basic elements" of the style that are important to competition in the relevant market and hence should remain part of the public domain. ⁿ³⁸¹ Granting too wide a swath of trade dress protection risks depriving competitors of a sufficient range of alternative designs, thereby hindering their ability to compete. ⁿ³⁸² In such cases, it is not unusual for the market entrant to be aware of or "inspired by" the more famous trade dress, ⁿ³⁸³ but that type of awareness or intent should not suggest actionable infringement or dilution.

The same issue may arise in cases involving word marks, particularly when a small business owner desires to compete with the owner of a famous trademark. The small business owner may want, both understandably and legitimately, to draw upon the expressive meaning of the famous trademark to communicate a message about his own business. The proprietor may also wish to convey to consumers, through his own trademark, that he not only is competing with the famous trademark holder, but that his product is better than the famous one. If such claims were made directly--*e.g.*, my coffee is better than Starbucks--they would almost certainly be considered comparative advertising and hence a fair use of the Starbucks trademark. ⁿ³⁸⁴ However, when the proprietor attempts to convey the same message in a more subtle or humorous way--*e.g.*, by selling a blend called "Mr. [*301] Charbucks"--he may be subject to a claim of trademark dilution. ⁿ³⁸⁵ Both instances of comparative advertising threaten the uniqueness of the Starbucks mark in the same way. When the more subtle or humorous use of the mark does not cause a likelihood of confusion, it is unclear why it should be actionable.

In sum, dilution claims may negatively impact competition when they are raised in cases between competitors. The cost of allowing such claims is particularly evident when the trademark infringement claim that accompanies the dilution one is weak and perhaps does not survive, and only the dilution claim keeps the case in court. These costs should also be considered in construing the TDRA and contemplating its future.

3. The Cost of Trademark Bullying

The final dilution externality involves the phenomenon of trademark "bullying." ⁿ³⁸⁶ The true impact of dilution law cannot be measured by tallying the number of cases in which it appears as a standalone cause of action or by any alternative measure that focuses on complaints filed (or published decisions). ⁿ³⁸⁷ A more accurate account must consider the number of times the dilution claim is threatened and attempt to gauge the impact of those threats, a certain percentage of which are objectively meritless, on consumer behavior. Like the harm caused by dilution itself, this injury is difficult if not impossible to accurately measure. However, the phenomenon of trademark overreaching in the form of threatened lawsuits of questionable merit is real, and it is exacerbated by the existence of the federal dilution cause of action. This, too, is a cost to be considered in assessing the externalities of dilution.

[*302] As Deven Desai and I have elsewhere observed, "Typically, the threat of litigation alone (even when ever so lightly implied) by a corporate giant is sufficient to dissuade a person from making fair use of a trademark." ⁿ³⁸⁸ Frequently, when small businesses like Victor's Little Secret and Black Bear Coffee receive a cease-and-desist letter

from the likes of Victoria's Secret and Starbucks, threatening to sue them in federal court, they will do whatever is necessary to prevent such lawsuit from being filed. Cease-and-desist letters typically demand that the recipient change the name of her business and/or her website. Given the level of financial resources, time, and energy required to defend a federal lawsuit, even a "winnable" one, most people would rationally choose to change the name of their business. Moreover, given the inherent ambiguity of dilution law, discerning the winnable cases from the unwinnable ones poses a challenge for even the most competent of lawyers.

The website Chillingeffects.org, a joint project of the Electronic Frontier Foundation and various law school clinics, acts as a depository for a wide range of demand letters in all areas of intellectual property law.ⁿ³⁸⁹ A recent example taken from this website illustrates the type of over-reaching that often appears in such letters. The letter was sent by the National Pork Board, an agency representing purveyors of "The Other White Meat," a slogan that is a federally registered trademark. The recipient was The Lactivist Breastfeeding Blog, which was selling t-shirts and other merchandise bearing the slogan "The Other White Milk." The National Pork Board threatened suit for both trademark infringement and dilution, claiming that "even were this use of the slogan 'The Other White Milk' found to be not confusing, which we think is unlikely, this slogan nevertheless damages National Pork Board's rights in the famous mark THE OTHER WHITE MEAT, because the slogan significantly dilutes the distinctiveness of the mark."ⁿ³⁹⁰ The letter ends by demanding that the Breastfeeding Blog (1) destroy all of the t-shirts and promotional [*303] materials bearing the offending slogan; (2) cease use of the slogan on any website; and (3) agree to never again use the slogan "The Other White Milk."ⁿ³⁹¹

Even a person who knows little about trademark law can probably figure out that consumers who buy "The Other White Milk" t-shirts are not likely to be confused: the average consumer will not mistakenly believe that the shirts are sold or endorsed by the National Pork Board. Even though the law is far from crystal clear, the standard is at least intuitive. However, understanding what dilution is, let alone whether a t-shirt like the one referenced in this letter is "likely to dilute," is entirely another matter. The inchoate nature of dilution makes it difficult for anyone, particularly a layman, to separate the cases that have merit from those that do not.

The provisions in the TDRA that allow for recovery of damages and attorney's fees in cases involving "willful dilution" make it even more likely that a threat of suit will chill uses of a trademark that do not, in fact, dilute it. The TDRA permits recovery of profits and attorney's fees, in the case of dilution by blurring, whenever "the person against whom the injunction is sought willfully intended to trade on the recognition of the famous mark."ⁿ³⁹² It is unclear how a willful intent to "trade on the recognition of the famous mark" differs from an intent to "associate" with the famous mark, one of the factors courts consider in assessing a dilution claim. Whenever a person makes a referential use of a trademark, at least in a commercial context, that person is arguably attempting to "trade on the recognition of the famous mark." Even the purveyors of t-shirts bearing the slogan "The Other White Milk" were in some sense attempting to sell more t-shirts by trading off the recognition of the allegedly famousⁿ³⁹³ slogan, "The Other White Meat." If the pro-pork [*304] slogan were not recognizable to the average consumer, the pro-lactation slogan would not be funny. In fact, the cease-and-desist letter from the National Pork Board included a promise to "recover from you a judgment for all of your profits in connection with any infringing sale as well as all of [the National Pork Board's] reasonable attorney's fees and costs" in the event its demands were not met.ⁿ³⁹⁴ The average person, business proprietor, or non-profit organization simply cannot risk the possibility of being stuck with that kind of bill.ⁿ³⁹⁵

In assessing the externalities of dilution, therefore, we must assume that some fair uses of famous trademarks will be suppressed. Due to the inherently amorphous nature of the dilution claim, a potential defendant has a low ability to assess her real exposure and, given the potential penalties and costs, a high incentive to avoid the risk of litigation.

C. Proposals for Reforming Dilution Law in the United States

For these reasons and others, federal trademark dilution law is, at the very least, in need of reform. Dilution does not cause measurable economic harm to the holders of famous trademarks (hence the statute's explicit exemption from proving any such harm). Moreover, enforcing dilution law, at least in its current state, imposes costs by negatively

impacting speech and competition. Dilution laws essentially extend a form of moral right protection to the holders of famous trademarks, the vast majority of which are corporations. At the very least these laws need to be narrowly construed and statutorily reformed, and potentially abolished outright.

1. Doing Away With Trademark Dilution Statutes

Perhaps the most obvious, yet least politically feasible, solution to the problems addressed in this Article would be to repeal the trademark dilution statutes, particularly the TDRA. The moral rights theory may help to explain why famous mark holders *want* dilution protection, but it does not tell us why they should *get* it. In the copyright context, moral rights exist to preserve uniquely personal interests in artistic creation. In the words of Professor Kwall, moral rights protect the "honor, dignity, and artistic spirit of the author in a fundamentally [*305] personal way." ⁿ³⁹⁶ Works of art may embody "the author's intrinsic dimension of creativity," which emanates from "inner drives that exist in the human soul." ⁿ³⁹⁷ Although corporations may embrace their brands with fervor and take pride in their creation, neither corporations nor their trademarks possess the type of "human soul" that cries out for protection via a moral right.

If dilution law is forced to justify its own existence on traditional trademark (*i.e.*, economic) grounds, it almost certainly is a loser. The benefits gained by dilution enforcement, which are slim at best, are outweighed by the attendant costs, including those that are occasioned by the inevitable overreaching that it enables. If the holder of a famous trademark is injured by another's use of its mark, trademark infringement law, particularly in the breadth of its modern application, should be more than adequate to prevent real economic injury. Even in trademark infringement cases, the famous trademark holder can obtain injunctive relief without proving anything beyond a likelihood of confusion; harm is presumed. ⁿ³⁹⁸ Moreover, to the extent another has intentionally harmed the mark's reputation by making false statements about the famous trademark or the mark holder, tort law should provide a remedy. ⁿ³⁹⁹ From the plaintiff's perspective, dilution is an attractive cause of action, at least in part, because the evidentiary hurdle a plaintiff must clear to state a claim is low. Whether mark holders should be entitled to such broad [*306] protection, particularly given the impact of these claims on the First Amendment rights of others, is dubious.

The TDRA, then, is the legal equivalent of a sledgehammer levied against a gnat. When there are plenty of fly swatters lying about, perhaps it is time to put away the sledgehammer. Whether a proposal to do away with dilution statutes is feasible, from a political standpoint, however, is another matter. As discussed above, the corporate holders of famous trademarks feel deeply entitled to dilution protection, and they have lobbied hard (and successfully) to get it. For this reason, the dilution cause of action is unlikely to go away any time soon.

2. Amending the TDRA

Given that the TDRA is likely to be part of the legal landscape of trademarks for some time to come, it may be more productive to focus on minimizing its negative externalities. Although dilution law may continue to be superfluous and hence unnecessary, its attendant costs could be reduced by modifying the statute.

When Congress amended the federal dilution statute in 2006, it weighted the scales too heavily in favor of plaintiffs claiming trademark dilution. The TDRA is essentially flawed because it eliminated the plaintiff's burden of proving "actual dilution" without clearly establishing what plaintiffs do have to prove to prevail in these cases. By elevating the importance of evidence indicating "association" between the parties' marks and de-emphasizing the significance of mark similarity, the courts have extended dilution protection in cases that essentially state weak trademark infringement claims. Once the plaintiff has proven that his trademark is truly "famous" and that consumers may "associate" defendant's mark with his own, he has gone a long way toward proving a likelihood of dilution. That burden is too light.

The Act should be amended to codify the "identical or substantially similar" standard previously adopted by many courts in assessing claims under the FTDA. ⁿ⁴⁰⁰ This rule had the advantage of eliminating claims that were based on non-infringing but arguably referential uses of famous marks. ⁿ⁴⁰¹ Perhaps more importantly, a requirement that the defendant's mark be "identical or substantially similar" to the plaintiff's mark would provide at least the potential for

[*307] obtaining summary judgment in appropriate cases. This result is less likely to occur when the court must engage in the intensely factual process of weighing the statutory factors, of which mark similarity is just one.

Harmful dilution litigation under the TDRA could also be curtailed by restricting the availability of dilution claims in cases between competitors. This end could be achieved by deleting the language in the statute indicating that it applies "regardless of the presence or absence of . . . competition" ⁿ⁴⁰² and replacing it with a statutory factor targeting the level of competition between the parties. A high level of competition between the parties would tend to suggest that a likelihood of dilution did not exist. Addressing the competition issue by adding a factor rather than an outright prohibition of dilution claims between competitors would avoid the "coverage gap" problem posited by the Second Circuit in *Nabisco*; *i.e.*, that a plaintiff would have no remedy under either infringement or dilution due to an insufficient level of competition for one claim but too much for the other. ⁿ⁴⁰³ Whether this objection has any merit, particularly given the marginal relevance of competition under modern infringement law, is questionable. However, the factorial approach (as opposed to a ban) would allow the courts to weigh the degree of competition appropriately, according to the facts in a given case.

To further reduce the negative impact of dilution law on competition, the Act should be amended to eliminate dilution of trade dress as a cause of action. ⁿ⁴⁰⁴ As discussed above, trade dress dilution claims are likely to arise in cases involving competitors, such as the recent Ninth Circuit case involving two competitors in the blue jeans market, Levi Strauss and Abercrombie & Fitch. Non-competitors, because they do not offer the same types of products or services, are unlikely to use even vaguely similar trade dress. Allowing claims for trade dress dilution under the TDRA, particularly as it is currently construed, enables dominant market players like Levi Strauss to discourage competition by threatening and filing dilution suits when trademark or copyright infringement claims would fail. If the plaintiff is economically harmed in these types of cases, the alleged harm or loss of market share is more likely to flow from the effects of desirable [*308] competition, not the claimed dilution of the source-identifying capacity of the famous trade dress.

The Act should also be amended to eliminate the availability of damages and attorney's fees in cases of "willful" dilution. If the prospect of damages and attorney's fees is deemed necessary to prevent parties from acting in bad faith, then the statute should be amended to explicitly require a finding of bad faith in such cases. By contrast, the current statute is ambiguous, as almost any dilution claim may carry with it a credible threat of damages and attorney's fees in addition to injunctive relief. The attorney's fee provision significantly increases the likelihood that the threat of dilution will be used to suppress fair uses of famous trademarks.

Finally, the TDRA's fair use exemption needs to be strengthened. Specifically, the requirement that the fair use exemption be limited to uses "other than as a designation of source for the person's own goods or services" should be eliminated. A trademark, like the Chewy Vuiton dog toy, may simultaneously function as both a source identifier and a parody. A trademark may also communicate a subtle comparative advertising message, like Mr. Charbucks coffee. These uses should be protected as a matter of law. To the extent these marks are perceived as harmful to the more famous trademarks to which they refer, that injury, if any, is outweighed by the harms to both speech and competition that result from the suppression of their use.

3. *Re-interpreting the TDRA*

In the absence of Congressional action to modify or repeal the TDRA, the judiciary should interpret the Act differently. At a bare minimum, the TDRA should be read narrowly to minimize the negative impacts of over-enforcement on speech and competition.

The conflict between the TDRA and the First Amendment presents a strong justification for construing the Act narrowly (and its exemptions broadly). ⁿ⁴⁰⁵ Some courts have recognized that "where the unauthorized use of a trademark is part of an expressive work, such as a parody, the Lanham Act *must* be construed narrowly." ⁿ⁴⁰⁶ Although [*309] parodies and other forms of noncommercial speech reside closer to the heart of the First Amendment,

non-misleading commercial speech is also entitled to First Amendment protection. ⁿ⁴⁰⁷ Trademark injunctions necessarily suppress speech because they force the defendant to refrain from using certain language. ⁿ⁴⁰⁸ Moreover, a broad construction of the dilution cause of action can negatively impact competition. Therefore, courts should narrowly construe the TDRA.

This duty to narrowly construe dilution laws should inform the courts' interpretation of the factors-based approach to assessing likelihood of dilution. First, even if the TDRA is not amended to codify the "identical or substantially similar standard," courts should still heavily emphasize this factor when considering a likelihood of dilution claim. The Act specifies that courts may consider "all relevant factors," including the six that are listed. ⁿ⁴⁰⁹ In any given case, one or more of the listed factors may be more relevant than others, and some will routinely carry more weight. ⁿ⁴¹⁰ The mere fact that the statute suggests six nonexclusive factors, without more, does not compel the court to give each factor equal weight.

Second, even if the TDRA is not amended to include a factor referencing the level of competition between the parties, courts should [*310] consider such evidence regardless. As noted above, the statute instructs courts to consider "all" relevant factors in assessing likelihood of dilution; the six listed factors are not meant to be all-inclusive. The level of competition between the parties is relevant to determine whether the defendant's use of plaintiff's mark is likely to dilute it. This solution would admittedly face a potential hurdle, given that the statute specifies that a mark holder is entitled to an injunction against another who uses her mark in a way that is likely to dilute it, "regardless of the presence or absence of . . . competition." ⁿ⁴¹¹ However, that language could be read as precluding competition (or lack thereof) from acting as an absolute affirmative defense to a dilution claim. The statute should not preclude courts from considering the level of competition when determining whether a likelihood of dilution has occurred in the first place.

Third, the courts should not create presumptions or shift the burden of proof to the defendant merely because one of the factors listed in the statute weighs in favor of the plaintiff. For example, the Sixth Circuit's recent opinion in *Moseley II* reads into the TDRA a presumption or strong inference of dilution when plaintiff has shown a "semantic association" between its famous mark and a mark used by defendant to sell "sex-related" products. ⁿ⁴¹² In doing so, the court shifted the burden of proof to the defendant to *disprove* tarnishment when such association can be shown. ⁿ⁴¹³ This presumption or inference appears nowhere in the statute, and, particularly given the First Amendment issues discussed above, the courts should not place it there. The burden of proof should remain with the plaintiff.

Finally, courts should construe the damages and attorney's fee provisions of the statute narrowly as well. Even though the words "bad faith" do not appear in the statute, they should be read into it, as some circuits have done in the context of trademark infringement claims. ⁿ⁴¹⁴ Attorney's fee awards are "subject to the discretion of the court and the principles of equity," ⁿ⁴¹⁵ which gives the courts broad leeway in [*311] determining whether the case presents "exceptional circumstances" ⁿ⁴¹⁶ justifying such an award. Attorney's fee awards in particular should be reserved for cases in which one of the parties has truly acted in an abusive manner. ⁿ⁴¹⁷

CONCLUSION

This Article proposes a new way of looking at the cause of action for dilution. The dilution cause of action imbues corporations with a broad "moral" right to control and exclude others from the expressive sphere surrounding their famous trademarks. In enforcing this right, we impose costs on those who are excluded and controlled, both in terms of their right to speak freely and compete fairly. When the dilution doctrine is viewed for what it really is, or at least what it has become, it becomes apparent that the law causes more harm than good. It should either be abolished or substantially reformed.

FOOTNOTES:

n1 Although state anti-dilution laws started appearing in the 1940's, *see infra* note 72, the first federal dilution statute was passed in 1995. Federal Trademark Dilution Act (FTDA), 15 U.S.C. § 1125(c) (1995). The act was substantially revised and renamed in 2006. *See* Trademark Dilution Revision Act (TDRA), 15 U.S.C. § 1125(c) (2006).

n2 *See* 15 U.S.C. §§ 1114(1)(a) & 1125(a)(1)(A) (2006) (requiring proof of likelihood of confusion for an infringement claim).

n3 *See* 15 U.S.C. § 1125(c)(1) (permitting liability "regardless of the presence or absence of actual or likely confusion, of competition, or of actual economic injury").

n4 This presumed damage may arise from either "dilution by blurring," which exists when similarity between two marks impairs the distinctiveness of the more famous one, 15 U.S.C. § 1125(c)(2)(B), or "dilution by tarnishment," which typically exists when the defendant uses a famous trademark in an unwholesome context. 15 U.S.C. § 1125(c)(2)(C).

n5 Numerous cases have embraced the idea that the harm caused by dilution is a gradual, cumulative one. *See, e.g.,* Acad. of Motion Picture Arts and Sciences v. Creative House Promotions, Inc., 944 F.2d 1446, 1457 (9th Cir. 1991) (describing dilution as the "gradual 'whittling away'" of a mark's value); Ameritech, Inc. v. Am. Info. Technologies Corp., 811 F.2d 960, 965 (6th Cir. 1987) (describing dilution as a "gradual diminution in the mark's distinctiveness," which "corrodes the senior user's interest in the trademark"); Allied Maint. Corp. v. Allied Mech. Trades, Inc., 369 N.E.2d 1162, 1164 (N.Y. 1977) (describing purpose of New York's anti-dilution statute as prevention of "the 'whittling away' of an established trade-mark's selling power and value"); Augusta Nat., Inc. v. Northwestern Mut. Life Ins. Co., 193 U.S.P.Q. 210, 222 (S.D. Ga. 1976) (reasoning that if defendant were allowed to use the term "Ladies' Masters" to describe a women's golf tournament, "there is reasonable certainty that the value of plaintiff's mark will be eroded; a little now, more later, until the 'magic' of the [original] Masters will be mortally dissipated if not completely dispelled").

n6 Citizens United v. FEC, 130 S. Ct. 876 (2010); *see infra* text accompanying notes 337-338.

n7 Frank I. Schechter, *The Rational Basis of Trademark Protection*, 40 HARV. L. REV. 813, 813 (1927). In the introduction to his article, Schechter opined that judicial impatience with "old theories of trademark protection" were "indicative of a desire to keep abreast of and to serve the needs of modern business." *Id.*

n8 *Id.* For a thorough and compelling analysis of Schechter's article, see Robert G. Bone, *Schechter's Ideas in Historical Context and Dilution's Rocky Road*, 24 SANTA CLARA COMP. & HIGH TECH. L.J. 469 (2008).

n9 Schechter, *supra* note 7, at 813; *see also id.* at 824 (observing that "the proper expansion of trademark law has been hampered by obsolete conceptions both as to the function of a trademark and as to the need for its protection").

n10 *Id.* at 813.

n11 *Id.* at 825. Schechter further argued that, the stronger the mark, the greater the need for protection against this type of harm: "The more distinctive or unique the mark, the deeper its impress upon the public consciousness, and the greater its need for protection against vitiation or dissociation from the particular product in connection with which it has been used." *Id.*

n12 *Id.* at 831.

n13 *Id.* at 821-24. Schechter's second major critique focused on the territoriality principle of trademark law. Under the common law, a trademark holder had priority in its mark only in the geographic location in which the mark was being used. To Schechter's great dissatisfaction, many courts interpreted this territoriality principle quite narrowly, in one case holding that "a nationally known chain of theatres, with a branch in Boston, did not extent its market, or rather its audience, to [other cities in Massachusetts]." *Id.* at 824 (citing *Loew's Boston Theatres Co. v. Lowe*, 143 N.E. 496 (Mass. 1924)); *see also id.* (discussing similar cases). The Supreme Court recognized the

territoriality principle in trademark law in *United Drug Co. v. Theodore Rectanus Co.*, 248 U.S. 90, 101 (1918), and *Hanover Milling Co. v. Metcalf*, 240 U.S. 403, 415 (1916). Schechter argued that these decisions were based on "an antiquated neighborhood theory of trade" and that, even in 1927, consumers tended to shop "far from home" and therefore relied on trademarks "as symbols of quality and guarantees of satisfaction." Schechter, *supra* note 7, at 824.

n14 Schechter, *supra* note 7, at 824 n.52 (citing cases). In a case that classically illustrates this principle, the Seventh Circuit refused to enjoin the use of the mark "Borden" on ice cream, even though a different company had developed the trademark and had used it for years to sell condensed milk, because the original trademark holder had never used the mark to sell ice cream. *Borden Ice Cream Co. v. Borden's Condensed Milk Co.*, 201 F. 510, 514 (7th Cir. 1912). The court reasoned that, even if the public was deceived by this use of the "Borden" name, such use was not actionable unless it actually diverted sales from the original mark holder (which it could not, given that the company did not manufacture ice cream). *Id.* at 513-15; *see also, e.g.*, *Corning Glass Works v. Corning Cut Glass Co.*, 90 N.E. 449, 450 (N.Y. 1910) (refusing to enjoin defendant's use of the name "Corning Cut Glass Co." in part because plaintiff manufactured glass products, but did not cut glass and therefore did not compete with defendant).

n15 Schechter, *supra* note 7, at 813, 823-24 (comparing cases). The 1905 version of the federal trademark statute prohibited registration of marks that were so similar to currently registered marks "of the same descriptive properties" as to "be likely to cause confusion or mistake in the mind of the public or to deceive purchasers." Trade-Mark Act of 1905, 15 U.S.C. § 85 (1905) (repealed 1946). Many courts expressed frustration with the ambiguousness of this statutory language. *See, e.g.*, *Philco Corp. v. Phillips Mfg. Co.*, 133 F.2d 663, 672 (7th Cir. 1943) (observing that "[i]t would be difficult to choose words more ambiguous than this phrase"); *B.F. Goodrich Co. v. Hockmeyer*, 40 F.2d 99, 101 (C.C.P.A. 1930) (noting that the phrase "has given the courts considerable concern," leading to inconsistency and arbitrary decision-making). Some courts interpreted the phrase "descriptive properties" expansively; others did not. *See, e.g.*, *Rosenberg Bros. Co. v. Elliott*, 7 F.2d 962, 966 (3d Cir. 1925) (holding that men's suits and overcoats share the same descriptive properties as men's hats and caps, because they are worn together); *Philadelphia Inquirer Co. v. Coe*, 133 F.2d 385, 389 (D.C. Cir. 1942) (holding that magazine supplement section of Sunday newspaper shares the same descriptive properties as a stapled, tabloid weekly news magazine, reasoning that if "coffee can be classed with horse radish, fish with tea, [and] mouth washes with cold creams," then these publications clearly belong to the same class); *compare* *France Milling Co. v. Washburn-Crosby Co.*, 7 F.2d 304, 304, 306 (2d Cir. 1925) (concluding both parties were entitled to use the mark "Gold Medal," where one applied the mark to wheat, pancake and buckwheat flour, while the other applied the mark to pure or straight wheat flour) *with* *Arrow Distilleries v. Globe Brewing Co.*, 117 F.2d 347, 351 (4th Cir. 1941) (holding no infringement when defendant used the mark "Arrow" on cordials and liqueurs and plaintiff applied the mark to beer, because the manufacture of beer and ale and the manufacture of cordials and liqueurs are "separate industries").

n20 Only technical trademarks could be registered under the federal Trade-Mark Act of 1905, which specified that personal names, geographic terms and terms that were "descriptive of the goods with which they are used, or of the character or quality of such goods" could not be registered. Trade-Mark Act of 1905, 15 U.S.C. § 85 (1905) (repealed 1946). The 1905 Act was intended to codify, not alter, the common law of trademarks. Trade-Mark Act of 1905, 15 U.S.C. § 103 (1905) (repealed 1946) (clarifying that the Act did not "prevent, lessen, impeach, or avoid any remedy at law or in equity which any party aggrieved by any wrongful use of any trade-mark might have had if . . . this Act had not been passed").

n21 Trade-Mark Act of 1905, 15 U.S.C. § 85 (1905) (repealed 1946); *see also, e.g.*, *Candee, Swan & Co. v. Deere & Co.*, 54 Ill. 439, 466 (1870) (holding that plaintiff could not have a property interest in the name "Moline Plow" or the words "Moline, Ill.," despite evidence of secondary meaning, as others had a right to manufacture plows in Moline, Illinois, and similarly designate their origin).

n22 *See Church & Dwight Co. v. Russ*, 99 F. 276, 278-79 (C.C. Ind. 1900) (discussing differences between technical trademarks and trade names); Daniel M. McClure, *Trademarks and Unfair Competition: A Critical History of Legal Thought*, 69 TRADEMARK REP. 305, 316-17 (1979) (describing differences between technical trademarks and trade names in the context of late-nineteenth century legal formalism); Milton Handler & Charles Pickett, *Trade-Marks and Trade Names - An Analysis and Synthesis: I*, 30 COLUM. L. REV. 168, 168-70 (1930) (explaining the technical differences between trademarks and trade names) [hereinafter *Trade-Marks and Trade Names: Part I*]; Charles Grove Haines, *Efforts to Define Unfair Competition*, 29 YALE L. J. 1, 8 (1919) (observing that "[u]nfair competition is distinguishable from the infringement of trade-marks"); JAMES LOVE HOPKINS, THE LAW OF TRADEMARKS, TRADENAMES AND UNFAIR COMPETITION § 4 (4th ed. 1924) (opining that trademark rights are "broader and by far . . . more valuable" than rights to a trade name); RUDOLF CALLMAN, 2 THE LAW OF UNFAIR COMPETITION AND TRADEMARKS § 66.1 (1945) (quoting Handler & Pickett).

n23 *See, e.g.*, Kenneth J. Vandavelde, *The New Property of the Nineteenth Century: The Development of the Modern Concept of Property*, 29 BUFF. L. REV. 325, 343-44 (1980) (describing early treatment of trademarks as "absolute property"); McClure, *supra* note 22, at 317-19 (characterizing early treatment of technical trademarks as conferring monopolistic property rights); Grafton Dulany Cushing, *On Certain Cases Analogous to Trade-Marks*, 4 HARV. L. REV. 321, 322 (1890) (noting that "[a] trademark has become an absolute right").

n24 *The Trade-Mark Cases*, 100 U.S. 82, 92 (1879) (emphasis added). The Court concluded that "[t]hese propositions are so well

understood as to require neither the citation of authorities nor an elaborate argument to prove them." *Id.* See also *G. W. Cole Co. v. Am. Cement & Oil Co.*, 130 F. 703, 705 (7th Cir. 1904) (characterizing trademarks as "the exclusive property of [their] proprietor[s]"); *Derringer v. Plate*, 29 Cal. 292, 295 (1865) (observing that "[t]he trademark is property, and the owner's right of property in it is as complete as that which he possesses in the goods to which he attaches it, and the law protects him in the enjoyment of the one as fully as of the other. . . .").

n25 See *Trade-Mark Cases*, 100 U.S. at 93 (holding that "[a]s the property in trademarks and the right to their exclusive use rest on the laws of the States, and, like the great body of the rights of person and of property, depend on them for security and protection, the power of Congress to legislate on the subject . . . if such power exist at all, must be found in the Constitution of the United States. . . ."); see also *id.* at 96-97 (holding that the federal trademark statute, as written, was not authorized under the Commerce Clause of the United States Constitution).

n26 See *Milton Handler, Unfair Competition*, 21 IOWA L. REV. 175, 183-84 (1936) (observing that "[s]imulation of a tradename will be restrained only if there is a likelihood of confusion of the public," while "[c]ommercial usage of the identical trademark in the same business field is taboo, regardless of the element of confusion").

n27 See *Elgin Nat'l Watch Co. v. Illinois Watch Case Co.*, 179 U.S. 665, 674 (1901) (noting when "a plaintiff has the absolute right to the use of a particular word or words as a trademark, then, *if an infringement is shown, the wrongful or fraudulent intent is presumed*, and . . . the further violation of the right of property will. . . be restrained") (emphasis added); *Lawrence Mfg. Co. v. Tennessee Mfg. Co.*, 138 U.S. 537, 548 (1891) (noting that "fraudulent intent would be inferred" if plaintiff could prove infringement of a technical trademark); *Barton v. Rex-Oil Co.*, 2 F.2d 402, 404 (3d Cir. 1924) ("A technical trade-mark being treated as property, infringement thereof carries with it the presumption of fraud; but where no exclusive right to the use of a trade-mark exists, fraud -- unfair competition -- in the use of the mark by another must be proved. . . ."); see also *HOPKINS, supra* note 22, at § 118 (noting that, in technical trademark cases, defendant's good faith was relevant to the issue of punitive damages only, not liability); *McClure, supra* note 22, at 317-18 (noting that in contrast to trade name cases, trademark infringement does not require proof of fraudulent intent); *Milton Handler & Charles Pickett, Trade-Marks and Trade Names -- An Analysis and Synthesis: II*, 30 COLUM. L. REV. 759, 769-70 (1930) [hereinafter *Trade-Marks and Trade Names: Part II*]; *Handler, supra* note 26, at 184 ("A trademark will be protected even against innocent infringement; a tradename, only against fraudulent simulation.").

n28 See generally *RESTATEMENT (FIRST) OF TORTS: DEFINITION OF TRADE NAME* § 716 (b) cmt. b (1938) (stating that a trade name has acquired "secondary meaning" when "a substantial number of present or prospective purchasers understand the designation, when used in connection with goods, services, or a business, not in its primary lexicographical sense, but as referring to a particular place or association"); *HARRY D. NIMS, THE LAW OF UNFAIR COMPETITION AND TRADE-MARKS* § 50 (3d ed. 1929) ("In the absence of secondary meaning, the law of unfair competition does not protect a name which is based on or is truly descriptive of the construction common to, or characteristics of an article."); see also *Standard Oil Co. of Maine v. Standard Oil Co. of N.Y.*, 45 F.2d 309, 310 (1st Cir. 1930) (holding that appellee was entitled to protection against "unfair or fraudulent use" of the names "Standard Oil" and "Standard Oil Company" in competition, because the names had acquired secondary meaning.); *Computing Scale Co. v. Standard Computing Scale Co.*, 118 F. 965, 967 (6th Cir. 1902) (holding that when a word "is incapable of becoming a valid trade-mark. . . yet has by use come to stand for a particular maker or vendor, its use by another in this secondary sense will be restrained as unfair and fraudulent competition. . . ."); *Am. Waltham Watch Co. v. U.S. Watch Co.*, 53 N.E. 141, 142 (Mass. 1899) (holding that, although "Waltham" was not a valid trademark, it had acquired secondary meaning and hence was entitled to protection from unfair competition).

n29 For example, in a case decided at the turn of the century, the California Supreme Court affirmed an injunction in favor of plaintiff, whose business operated under the name "Mechanics' Store," because the name had acquired secondary meaning and defendant had chosen a similar name for the purpose of poaching plaintiff's customers. *Weinstock, Lubin & Co. v. Marks*, 42 P. 142, 145, 146 (Cal. 1895). Plaintiff's name, "Mechanics' Store," was admittedly descriptive and ineligible for protection as a technical trademark. *Id.* at 144. The court found that defendant had acted with fraudulent intent when he chose the name "Mechanical Store," by seeking to deceive "the public, and especially plaintiff's customers, and thereby secur[e] the advantages and benefits of the good will of plaintiff's business." *Id.* The court reasoned that "it is a fraud on a person who has established a business for his goods, and carries it on under a given name. . . , for some other person to assume the same name or mark, or the same with a slight alteration, in such a way as to induce persons to deal with him in the belief that they are dealing with a person who has given a reputation to that name or mark." *Id.* See also *Cushing*, *supra* note 23, at 332 (arguing that in "cases analogous to trade-marks," for example, cases involving common law trade names, "fraud is the gist of the action"); *HOPKINS*, *supra* note 22, at § 22 ("While fraud is presumed from the wrongful use of a trademark it must be proven, directly or by inference, in all cases of unfair competition which do not involve a technical trademark."); *Vandeveld*, *supra* note 23, at 345 (observing that trade names were not considered property and therefore would be protected only to prevent fraud).

n30 See, e.g., *Hilson Co. v. Foster*, 80 F. 896, 897 (C.C.N.Y. 1897) (holding that "[n]o man has a right to use names, symbols, signs or marks which are intended, or calculated, to represent that his business is that of another," and "[f]raud should be clearly proved"); *Drive It Yourself Co. v. North*, 130 A. 57, 59 (Md. App. 1925) (use of "merely generic or descriptive" words may be enjoined only if there is "actual fraud or intent to deceive"); *DERENBERG*, *supra* note 19, at 53 (noting that, "until about [1916], [the courts] always sought to discover and to stress in unfair competition cases -- as opposed to trade-mark infringement cases -- the elements of an intentional fraud as the basis of their jurisdiction"); *McClure*, *supra* note 22, at 317 (noting that in an unfair competition claim plaintiff "was required to prove . . . fraudulent intent by the defendant").

n31 See, e.g., *Boice v. Stevenson*, 187 P.2d 648, 653 (Ariz. 1947) (holding that "[t]he universal test [of unfair competition] is whether the public is likely to be deceived") (citation omitted); *New York World's Fair v. World's Fair News*, 256 A.D. 373, 374 (N.Y. App. 1939) (holding that "[t]he determining factor is not that people have actually been deceived but that there is a likelihood of that happening") (citation omitted); *Sartor v. Schaden*, 101 N.W. 511, 513 (Iowa 1904) (holding that, even if a word is not "capable of becoming an arbitrary trade-mark," if it has acquired secondary meaning its use will be restrained if "confusion [of the public] has been or is likely to be produced"); see also *Handler & Pickett, Trade-Marks and Trade Names: Part I*, *supra* note 22, at 169 (holding that a competitor's use of trade names will be restrained only when such use "render[s] it likely that the public will confuse the products bearing the marks"); Zechariah Chafee, *Unfair Competition*, 53 HARV. L. REV. 1289, 1296-97 (1940) (noting that "[f]raud has been squeezed out of" cases involving trade names and trademarks); RUDOLF CALLMAN, 2 THE LAW OF UNFAIR COMPETITION AND TRADEMARKS § 66.1 (1945) (observing that the distinction between technical trademarks and trade names is "gradually disappearing"); see generally E.H. Schloper, Annotation, *Doctrine of Secondary Meaning in the Law of Trademark and of Unfair Competition*, 150 A.L.R. 1067, 1133 (1944) (noting split of authorities as to whether "it is necessary for the plaintiff to show actual fraud on the part of the defendant" in cases where plaintiff's rights in a trade name are predicated on secondary meaning).

n32 See *McClure*, *supra* note 22, at 306-08 (discussing tension between trademark protection and its potential for anticompetitive effects).

n33 *Loughran v. Quaker City Chocolate & Confectionery Co.*, 286 F. 694, 697 (E.D. Pa. 1923). Professor Zechariah Chafee, a noted First Amendment scholar, similarly observed, "It may seem shabby for a defendant to appropriate valuable ideas from the plaintiff . . . but in the words of the song: 'The best things in life are free.'" Chafee, *supra* note 31, at 1317-18.

n34 See *United Drug Co. v. Theodore Rectanus Co.*, 248 U.S. 90, 97 (1918) (holding that a trade-mark right is not "a right in gross or at large, like a statutory copyright or a patent for an invention").

n35 *Hanover Star Milling Co. v. Metcalf*, 240 U.S. 403, 413 (1916); see also *Loughran*, 286 F. at 697 (observing that "[m]ere dealers in commodities are prone to think themselves entitled to a . . . monopoly [like that extended to patents and copyrights] unlimited in time. This is a mistake. The only right they have is their right to sell their goods as such and to protection against the goods of another being palmed off upon their customers as theirs.").

n36 See, e.g., *Hanover*, 240 U.S. at 413; *Church & Dwight Co. v. Russ*, 99 F. 276, 278 (C.C. Ind. 1900) (observing that "[t]he tendency of the courts at the present time seems to be to restrict the scope of the law applicable to technical trademarks, and to extend its scope in cases of unfair competition") (citations omitted); Haines, *supra* note 22, at 21 (same).

n37 See RESTATEMENT OF TORTS, *supra* note 28, at § 717 cmt. a (stating that "there are no important differences between the protection given to the interest in trade-marks and that given to the interest in trade names"); Chafee, *supra* note 31, at 1298 (observing that, in 1940, the only important difference between trade names and technical trademarks related to federal registration, which was only allowed for technical trademarks under the 1905 Act).

n38 *Hanover*, 240 U.S. at 412-13 (emphasis added). Although trademark law is commonly referred to as a subset of the law of unfair competition, at least during the modern era, an argument can be made that the concept of unfair competition derived from trademark law rather than the other way around. Derenberg observed that "the law of unfair competition first developed at the beginning of the 20th century and was considered an outgrowth of trademark law." DERENBERG, *supra* note 19, at 39-40.

n39 WILLIAM M. WIECEK, *LIBERTY UNDER LAW: THE SUPREME COURT IN AMERICAN LIFE* 187 (1988); see also Morton J. Horwitz, *The Rise of Legal Formalism*, 19 AM. J. LEG. HIST. 251, 252 (1975) (characterizing legal formalism as "an intellectual system which gave common law rules the appearance of being self-contained, apolitical, and inexorable").

n40 Wiecek fixes the start date for the "judicial hegemony of the formalist era" as 1873, marked by two dissenting opinions in *The Slaughterhouse Cases*, 83 U.S. 36 (1872) (opinions of Justices Field and Bradley). WIECEK, *supra* note 39, at 115-16. The formalist era unofficially ended with a string of Supreme Court cases in 1937 that upheld the Constitutionality of President Franklin D. Roosevelt's New Deal legislation. *Id.* at 137-39.

n41 McClure, *supra* note 22, at 320.

n42 Although the formalist era supposedly ended in 1937, the philosophy has been reinvigorated to a certain extent by some modern-day conservatives. The Chief Justice of the United States Supreme Court, John Roberts, embraced formalism in colloquial terms when he famously told the United States Senate, "[I]t's my job to call balls and strikes and not to pitch or bat." *Roberts: 'My job is to call balls and strikes and not to pitch or bat,'* CNN POLITICS, (Sept. 12, 2005), http://articles.cnn.com/2005-09-12/politics/roberts.statement_1_judicial-role-judges-judicial-oath?_s=PM:POLITICS; *see generally* Frederick Shauer, *Formalism*, 97 YALE L. J. 509 (1988).

n43 *See* Barton Beebe, *The Semiotic Analysis of Trademark Law*, 51 UCLA L. REV. 621, 686 (2004) (arguing that Schechter "believed that antidilution protection would bring greater predictability to the law" by "returning it to formalism").

n44 15 U.S.C. § 1125(c)(2)(A) (2006) (restricting dilution protection to the owners of "famous" trademarks).

n45 *See, e.g.,* McClure, *supra* note 22, at 323-24 (characterizing Schechter's proposal as "[t]he furthest extension of the concept of 'protection of property' to expand protection of trademarks").

n46 Bone, *supra* note 8, at 483-85. Although Beebe ultimately characterizes Schechter's dilution proposal as a formalist one, he too observes that Schechter "had the critical instincts of a realist." Beebe, *supra* note 43, at 686.

n47 Bone, *supra* note 8, at 471.

n48 Edward S. Rogers, *The Lanham Act and the Social Function of Trademarks*, 14 LAW & CONTEMP. PROB. 173, 178-80 (1949) (describing Lanham Act history and Rogers' own role therein); *see generally* Walter J. Derenberg, *The Contribution of Edward S. Rogers to the Trademark Act of 1946 in Historical Perspective*, 62 TRADEMARK REP. 189 (1972).

n49 Edward S. Rogers, *New Concepts of Unfair Competition under the Lanham Act*, 38 TRADEMARK REP. 259, 260 (1948); *see also* Haines, *supra* note 22, at 21 (noting that cases affording relief to plaintiffs whose business names did not qualify as technical trademarks were based upon "principles of common honesty and sportsmanship").

n50 Chafee, *supra* note 31, at 1297; *see also* DERENBERG, *supra* note 19, at 42 (citing Handler & Pickett).

n51 The article was published in two parts, Handler & Pickett, *Trade-Marks and Trade Names: Part I*, *supra* note 22, and Handler & Pickett, *Trade-Marks and Trade Names: Part II*, *supra* note 27.

n52 Handler & Pickett, *Trade-Marks and Trade Names: Part I*, *supra* note 22, at 169

n53 Handler & Pickett, *Trade-Marks and Trade Names: Part II*, *supra* note 27, at 776

n54 *Id.* at 776 n.81. Handler and Pickett wrote that "[t]he and lawyer and business man, unlike the grammarian, is not primarily interested in etymology for its own sake." Handler & Pickett, *Trade-Marks and Trade Names: Part I*, *supra* note 22, at 180.

n55 *See, e.g.*, Handler & Pickett, *Trade-Marks and Trade Names: Part I*, *supra* note 22, at 176 n.24 (citing Schechter's critique of the rule limiting trademark protection in cases where marks were placed on dissimilar goods).

n56 Although the Supreme Court held the federal trademark *statute* unconstitutional in *The Trademark Cases*, 100 U.S. 82, 97 (1879), this decision did not eliminate the federal *common law* of trademarks. Until the Supreme Court famously overruled *Swift v. Tyson*, 41 U.S. 1 (1842), the federal courts were free to decide substantive issues of state law, unrestrained by the decisions of state courts, so long as those laws were not codified in a state statute. *See* *Erie R.R. Co. v. Tompkins*, 304 U.S. 64 (1938). Therefore, if a state had not adopted a trademark statute, a federal court hearing a trademark case in that state (under diversity jurisdiction) was free to interpret the applicable common law doctrines as it saw fit, even if its interpretation differed from that of the state courts. The *Erie* Doctrine -- which dictated that federal courts sitting in diversity were required to follow state law precedents, whether based on common law or statutes -- invalidated the federal common law of trademarks. *See* Rogers, *supra* note 48, at 263 (decrying the "chaos" created by *Erie's* invalidation of the "great body of Federal [common] Law dealing with trade-marks and unfair competition"); *accord* Chafee, *supra* note 31, at 1299, 1300 (predicting that the valuable and "great body of federal unfair competition law" would likely be "torn into pieces" as a result of *Erie*, rendering the United

States "a legal checkerboard" in this area of the law).

n57 Schechter died in 1937, ten years after publishing his famous article in the Harvard Law Review and approximately ten years before the Lanham Act was enacted. Therefore, his opinion of the evolution of trademark law, even in the relatively short term, will never be known.

n58 Rogers, *supra* note 48, at 262 (emphasis added).

n59 *Compare* Trade-Mark Act of 1905, 15 U.S.C. § 85 (1905) (repealed 1946) (stating "[t]hat no mark by which the goods of the owner of the mark may be distinguished from other goods of the same class shall be refused registration as a trade-mark on account of the nature of such mark unless such mark" was "descriptive of the goods with which they are used, or of the character or quality of such goods") *with* Lanham Act, 15 U.S.C. § 1052(f) (stating that, with certain exceptions, "nothing in this [statute] shall prevent the registration of a mark used by the applicant which has become distinctive of the applicant's goods in commerce" even if the mark is merely descriptive). However, the modern Lanham Act does not allow registration of generic words or phrases, regardless of whether they have acquired distinctiveness. 15 U.S.C. § 1064; *see also* Desai & Rierson, *supra* note 17, at 1809-10 (discussing the prohibition of registering generic names under the Lanham Act).

n60 For example, Schechter rejected the common law rule that trademark rights were limited to the mark holder's geographic area of use, i.e., those geographic areas in which the mark had acquired "goodwill." Schechter, *supra* note 7, at 824. The Lanham Act gave the holder of a registered mark nationwide priority in that mark, even if a junior user was the first to acquire goodwill in a given geographic area. Lanham Act, ch. 540, § 2(d), 60 Stat. 427, 428 (1946) (amended 1988). However, the Lanham Act does not automatically grant the senior user the right to enjoin others' use of its mark. To state a claim for infringement, the senior user must always prove likelihood of confusion between the two marks. *See, e.g.,* Dawn Donut Co. v. Hart's Food Stores, Inc., 267 F.2d 358, 361, 364 (2d Cir. 1959) (finding no likelihood of confusion and therefore no trademark infringement due to separate trading areas, where trading areas were only sixty miles apart).

n61 *See* Desai & Rierson, *supra* note 17, at 1805-10 (explaining the spectrum of marks).

n62 *See* Borinquen Biscuit Corp. v. M.V. Trading Corp., 443 F.3d 112, 121 (1st Cir. 2006); Polaroid Corp. v. Polarad Elecs. Corp., 287 F.2d 492, 495 (2d Cir. 1961); Interpace Corp. v. Lapp, Inc., 721 F.2d 460, 463 (3d Cir. 1983); Pizzeria Uno Corp. v. Temple, 747 F.2d 1522, 1527 (4th Cir. 1984); Exxon Corp. v. Texas Motor Exch. of Houston, Inc., 628 F.2d 500, 504 (5th Cir. 1980); Wynn Oil Co. v. Thomas, 839 F.2d 1183, 1186-87 (6th Cir. 1988); Barbecue Marx, Inc. v. 551 Ogden, Inc., 235 F.3d 1041, 1045 (7th Cir. 2000); Anheuser-Busch, Inc. v. Balducci Publ'n, 28 F.3d 769, 774 (8th Cir. 1994); AMF Inc. v. Sleekcraft Boats, 599 F.2d 341, 349 (9th Cir. 1979); Sally Beauty Co., Inc. v. Beautyco, Inc., 304 F.3d 964, 975-76 (10th Cir. 2002); Tana v. Dantanna's, 611 F.3d 767, 776 (11th Cir. 2010); *see also* Barton Beebe, *An Empirical Study of the Multifactor Tests for Trademark Infringement*, 94 CAL. L. REV. 1581, 1633-40 (2006) (discussing strength of the mark as a factor in likelihood of confusion analysis).

n63 Trade-Mark Act of 1905, 15 U.S.C. § 85 (1905) (repealed 1946).

n64 Trademark Act of 1946, ch. 540, § 43(a)(1)(A), 60 Stat. 444, 15 U.S.C. § 1125(a)(1)(A) (1946); *see also* Fleischmann Distilling Corp. v. Maier Brewing Co., 314 F.2d 149, 151 (9th Cir. 1963) (noting this distinction between the 1905 and 1946 versions of the statute); *id.* at 160-61 (finding likelihood of confusion between use of trademark "Black and White" for beer and Scotch whiskey).

n65 *See, e.g.*, Boston Duck Tours, LP v. Super Duck Tours, 531 F.3d 1, 35 (1st Cir. 2008); *Polaroid*, 287 F.2d at 495; Sabinsa Corp. v. Creative Compounds, LLC, 609 F.3d 175, 189 (3d Cir. 2010); *Pizzeria Uno*, 747 F.2d at 1535; Amstar Corp. v. Domino's Pizza, Inc., 615 F.2d 252, 261 (5th Cir. 1980); *Wynn Oil*, 839 F.2d at 1187; Ty, Inc. v. Jones Group, Inc. 237 F.3d 891, 899-900 (7th Cir. 2001); SquirtCo. v. Seven-Up Co., 628 F.2d 1086, 1091 (8th Cir. 1980); *Sleekcraft*, 599 F.2d at 350; Universal Money Ctrs., Inc. v. American Tel. & Tel. Co., 22 F.3d 1527, 1532-33 (10th Cir. 1994); Caliber Auto. Liquidators, Inc. v. Premier Chrysler, Jeep, Dodge, LLC, 605 F.3d 931, 939-40 (11th Cir. 2010); *see also* Beebe, *supra* note 62, at 1631-33 (discussing the competitive proximity factor in likelihood of confusion analysis).

n66 *See* S. Rep. No. 87-2107, at 4 (1962) *reprinted in* 1962 U.S.C.C.A.N. 2844, 2847 Under the current version of the statute, which has existed since 1962, the Lanham Act prohibits all uses of a trademark that are "likely to cause confusion, or to cause mistake, or to deceive." 25 U.S.C. § 1125(a)(1)(A) (2006).

n67 The legislative history of the 1962 amendments suggests that the word "purchasers" was deleted because "the provision actually relates to potential purchasers as well as to actual purchasers." S. Rep. No. 87-2107, at 4 (1962). As a result, some courts have held that, even under the current version of the Act, the focus remains on potential confusion on the part of actual or potential purchasers, not third parties. *See, e.g.*, Elec. Design & Sales, Inc. v. Elec. Data Sys. Corp., 954 F.2d 713, 716 (Fed. Cir. 1992) (construing the likelihood of confusion inquiry to generally turn on whether actual or potential purchasers are confused); Astra Pharmaceutical Prods. v. Beckman Instruments, 718 F.2d 1201, 1206 (1st Cir. 1983) (considering the classes of "prospective purchasers" in assessing the likelihood of confusion).

n68 *See, e.g.*, Ferrari S.P.A. *Esercizio* v. Roberts, 944 F.2d 1235, 1245 (6th Cir. 1991) ("the Act's protection is not limited to confusion at the point of sale"); A & H Sportswear, Inc. v. Victoria's Secret Stores, Inc., 237 F.3d 198, 216 (3d Cir. 2000); Lois Sportswear, USA v. Levi Strauss & Co., 799 F.2d 867, 872, 874 (2d Cir. 1986).

n69 *See, e.g.*, Network Automation, Inc. v. Advanced Sys. Concepts, Inc., 638 F.3d 1137, 1147-48 (9th Cir. 2011); Playboy Enters., Inc. v. Netscape Comm'n Corp., 354 F.3d 1020, 1024-26 (9th Cir. 2004); Gibson Guitar Corp. v. Paul Reed Smith Guitars, LP, 423 F.3d 539, 549 (6th Cir. 2005) (defining initial interest confusion as "when a manufacturer improperly uses a trademark to create initial customer interest in

a product"); *Perfumebay.com Inc. v. eBay, Inc.*, 506 F.3d 1165, 1176 (9th Cir. 2007); *Nissan Motor Co. v. Nissan Computer Corp.*, 378 F.3d 1002, 1018-20 (9th Cir. 2004).

n70 S. Rep. No. 87-2107, at 4 (1962).

n71 See, e.g., *Int'l Order of Job's Daughters v. Lindeburg and Co.*, 633 F.2d 912, 920 (9th Cir. 1980) (concluding that the name and emblem at issue were not trademarks partly due to lack of evidence showing customers being misled about sponsorship or endorsement); *Dallas Cowboys Cheerleaders, Inc. v. Pussycat Cinema, Ltd.*, 604 F.2d 200, 204 (2d Cir. 1979) (holding that the consumers' confusion about the mark owner's sponsorship or approval of use as sufficient for the confusion requirement).

n72 Massachusetts enacted the first dilution statute in 1947. Act of May 2, 1947, ch. 307, § 7a, 1947 Mass. Acts 300 (codified as amended at MASS. GEN. LAWS ANN. ch. 110H § 13 (West Supp. 2007)). New York, Illinois, and Georgia soon followed suit. See, e.g., N.Y. GEN. BUS. LAW § 368-d (1961 N.Y. Laws 1806, 1813) (recodified at N.Y. GEN. BUS. LAW § 360-1 (McKinney 1996 & Supp. 2008)); 140 ILL. COMP. STAT. ANN. P 22 (West 1986) (superseded by 765 ILL. COMP. STAT. ANN. §§ 1036/5, 1036/65 (West 2001)); GA. CODE ANN. § 10-1-451 (2000). See also Bone, *supra* note 8, at 497-504 (discussing evolution of state dilution law).

n73 Federal Trademark Dilution Act of 1995, Pub. L. No. 104-98, § 4, 109 Stat. 985, 986 (codified at 15 U.S.C. § 1127 (2000)), superseded in part by Trademark Dilution Revision Act of 2006, Pub. L. No. 109-312, § 2, 120 Stat. 1730 (codified at 15 U.S.C. § 1125(c) (2006)). Some commentators have argued that, even though dilution is now a federal claim, it remains a marginal cause of action that has little practical impact. See *infra* notes 339-342 and accompanying text.

n74 15 U.S.C. § 1125(c).

n75 See *infra* note 133.

n76 15 U.S.C. § 1125(c)(2)(B).

n77 See *infra* note 129 and accompanying text.

n78 See generally Desai & Rierison, *supra* note 17, at 1797-99 (discussing the traditional law and economics explanation of trademark law).

n79 See William M. Landes & Richard A. Posner, *Trademark Law: An Economic Perspective*, 30 J.L. & ECON. 265, 269 (1987) (noting that "a trademark conveys information that allows the consumer to say to himself, 'I need not investigate the attributes of the brand I am about to purchase because the trademark is a shorthand way of telling me that the attributes are the same as that of the brand I enjoyed earlier.'").

n80 See *Qualitex Co. v. Jacobson Prods. Co., Inc.*, 514 U.S. 159, 163-64 (1995) (stating that "trademark law . . . reduces the customer's costs of shopping and making purchasing decisions, for it quickly and easily assures a potential customer that *this* item--the item with this mark--is made by the same producer as other similarly marked items that he or she liked (or disliked) in the past") (citations omitted); see also *Misawaka Rubber & Woolen Mfg. Co. v. S.S. Kresge Co.*, 316 U.S. 203, 205 (1942) (observing that a trademark conveys to customers the "desirability of the commodity upon which it appears"); Ralph Folsom & Larry Teply, *Trademarked Generic Words*, 89 YALE L.J. 1323, 1336 (1980) (noting that trademarks help to reduce search costs and enhance distributional efficiency); Stephen L. Carter, Comment, *The Trouble with Trademark*, 99 YALE L.J. 759, 762 (1990) (arguing that "[t]he principal benefit of trademark protection is that it lowers consumer search costs").

n81 See 15 U.S.C. § 1127 (defining a trademark as a "word, name, symbol, or device" that is used to "identify and distinguish [the mark holder's] goods . . . from those manufactured or sold by others and to indicate the source of the goods, even if that source is unknown"); accord 1 J. THOMAS MCCARTHY, MCCARTHY ON TRADEMARKS AND UNFAIR COMPETITION § 3.1 (4th ed. 2005) ("[T]o become a 'trademark' is to identify the source of one seller's goods and distinguish that source from other sources[.]"); but see FRANK I. SCHECHTER, THE HISTORICAL FOUNDATIONS OF LAW RELATING TO TRADE-MARKS 150 (1925) (arguing that the consumer does not regard a trademark as an indication of origin "but rather as a guaranty that the goods purchased under the trade-mark will have the same meritorious qualities as those previously noted by him in his purchases of other goods bearing the same mark").

n82 Landes and Posner have observed that "[t]he benefits of trademarks in lowering search costs presuppose legal protection because the cost of duplicating someone else's trademark is small and the incentive to incur this cost in the absence of legal impediments will be greater the stronger the trademark." WILLIAM M. LANDES & RICHARD A. POSNER, THE ECONOMIC STRUCTURE OF INTELLECTUAL PROPERTY LAW 168 (2003).

n83 See *Amoskeag Mfg. Co. v. Spear*, 2 Sand. 599, 605-06 (N.Y. Sup. Ct. 1849) (observing that, when a trademark is infringed, "[t]he purchaser has imposed upon him an article that he never meant to buy"). Arguably, the consumer is not really injured if product B is equal to, or better than, product A in terms of quality, but this kind of consumer injury is not required to prove trademark infringement. See, e.g.,

Lois Sportswear, U.S.A., Inc. v. Levi Strauss & Co., 799 F.2d 867, 875 (2d Cir. 1986) (noting that defendant's manufacture of similar-quality goods (as opposed to goods of lesser quality) may actually increase the likelihood of confusion and therefore be more likely to infringe). Moreover, the trademark holder (here, the maker of product A) can decrease the quality of his own goods or services at will, without notice to the consumer, at any time. *See generally* Irene Calboli, *The Sunset of "Quality Control" in Modern Trademark Licensing*, 57 AM. U. L. REV. 341, 348 (2007) [hereinafter Calboli, *The Sunset of Quality Control*]; Elizabeth C. Bannon, *The Growing Risk of Self-Dilution*, 82 TRADEMARK REP. 570 (1992). For these reasons, several commentators have argued that the benefit to consumers provided by traditional trademark law has been overstated. *See, e.g.,* Ann Bartow, *Likelihood of Confusion*, 41 SAN DIEGO L. REV. 721, 730-32 (2004) (pointing out that, because a trademark imposes no "actual obligation" upon its holder, the mark's benefits to consumers are overstated, unless the consumers continually monitor the quality of the products bearing the trademark); *see also* Irene Calboli, *Trademark Assignment "with Goodwill": A Concept Whose Time Has Gone*, 57 FLA. L. REV. 771, 833-36 (2005) [hereinafter Calboli, *Trademark Assignment with Goodwill*] (arguing that trademarks should be transferable "with or without goodwill," in part because trademark owners have always had the ability to change the quality or nature of their products at will); Glynn S. Lunney, Jr., *Trademark Monopolies*, 48 EMORY L.J. 367 (1999) (further critiquing the traditional economic justification for trademark law).

n84 The "goodwill" associated with a trademark has been described by financier Warren Buffet (in the context of discussing the Sees Candies brand) as a "pervasive favorable reputation with consumers based on countless pleasant experiences that they have had with both product and personnel." Warren E. Buffet, *The Essays of Warren Buffet: Lessons for Corporate America*, 19 CARDOZO L. REV. 1, 173 (1997) (selected, arranged, and introduced by Lawrence E. Cunningham); *see also* Hanover Milling Co. v. Metcalf, 240 U.S. 403, 413 (1916) (reasoning that "a party has a valuable interest in the good will of his trade or business, and in the trademarks adopted to maintain and extend it"); *Hilson Co. v. Foster*, 80 F. 896, 897 (C.C.N.Y. 1897) ("Where the goods of a manufacturer have become popular not only because of their intrinsic worth, but also by reason of the ingenious, attractive and persistent manner in which they have been advertised, the good will thus created is entitled to protection."); SCHECHTER, *supra* note 81, at 144 (stating that, when a trademark is infringed, "the owner is robbed of the fruits of the reputation that he had successfully labored to earn"); Calboli, *Trademark Assignment with Goodwill*, *supra* note 83, at 785-95 (explaining the history and evolution of the concept of goodwill in trademark law); *see generally* Robert G. Bone, *Hunting Goodwill: A History of the Concept of Goodwill in Trademark Law*, 86 B.U.L. REV. 547 (2006).

n85 In the 1988 film *Coming to America*, comedian Eddie Murphy gets a job at a fast food restaurant called "McDowell's." *Coming to America* (Paramount Pictures 1988). The ongoing legal conflict between McDonald's and McDowell's is a humorous subplot in the movie. This conflict is summarized when the in-movie owner of McDowell's, Cleo McDowell, states: "Look . . . me and the McDonald's people got this little misunderstanding. See, they're McDonald's; I'm McDowell's. They got the Golden Arches; mine is the Golden Arcs. They got the Big Mac; I got the Big Mick. We both got two all-beef patties, special sauce, lettuce, cheese, pickles and onions, but their buns have sesame seeds. My buns have no seeds." *Id.*

n86 *See* 15 U.S.C. § 1125(c)(1) (specifying that dilution is actionable "regardless of the presence of absence of actual or likely confusion"); *see also* Starbucks Corp. v. Wolfe's Borough Coffee, Inc. 588 F.3d 97, 109 (2d Cir. 2009) (noting that "the absence of actual or even of a likelihood of confusion does not undermine evidence of trademark dilution"); *Franklin Mint Co. v. Manatt, Phelps & Phillips, LLP*, 109 Cal. Rptr. 3d 143, 170 (Cal. App. 2010) ("In the dilution context, likelihood of confusion is irrelevant.").

n87 As discussed *infra*, dilution by tarnishment proceeds on the theory that association with unsavory goods or services can damage a trademark holder's reputation or goodwill, even when consumers are not likely to be confused and therefore understand that the senior user is not the source of, and does not endorse, the offensive goods or services. *See infra* notes 116-127 and accompanying text.

n88 Judge Posner explained the consumer search cost rationale for dilution by blurring in *Ty Inc. v. Perryman*: "Suppose an upscale restaurant calls itself 'Tiffany.' There is little danger that the consuming public will think it's dealing with a branch of the Tiffany jewelry store if it patronizes this restaurant. But when consumers next see the name 'Tiffany' they may think about both the restaurant and the jewelry store, and if so the efficacy of the name as an identifier of the store will be diminished. Consumers will have to think harder--incur as it were a higher imagination cost--to recognize the name as the name of the store." *Ty Inc. v. Perryman*, 306 F.3d 509, 511 (7th Cir. 2002).

n89 Stacey L. Dogan & Mark A. Lemley, *What the Right of Publicity Can Learn from Trademark Law*, 58 STAN. L. REV. 1161, 1198 (2006) (emphasis added); *see also* Jerre B. Swann, Sr., *Dilution Redefined for the Year 2000*, 37 HOUS. L. REV. 729, 759 (2000) (defining dilution as "the difference between a brand with a meaning substantially in the abstract, and a brand with a substantial meaning only in context or after cueing").

n90 Dogan & Lemley, *supra* note 89, at 1198; *see also* Rebecca Tushnet, *Gone in Sixty Milliseconds: Trademark Law and Cognitive Science*, 86 TEX. L. REV. 507, 516 (2008) (describing dilution theory, in cognitive terms, as a "tragedy of the mental commons, in which a consumer's mind is overpopulated with meaning and her understanding of a brand descends into incoherence"); Stacey L. Dogan & Mark A. Lemley, *Trademarks and Consumer Search Costs on the Internet*, 41 HOUS. L. REV. 777, 790 (2004) (noting that the Federal Trademark Dilution Act focuses on uses that "increase consumer search costs" by blurring); Mark A. Lemley, *The Modern Lanham Act and the Death of Common Sense*, 108 YALE L. J. 1687, 1704 n.90 (1999) (arguing that "[t]he information consumers can obtain and process is in part a function of how clear the association between mark and product remains in their minds; 'clutter' therefore imposes real costs on consumers"); *see generally* Shahar J. Dilbary, *Famous Trademarks and the Rational Basis for Protecting "Irrational Beliefs"*, 14 GEO. MASON L. REV. 605 (2007).

n91 Dogan & Lemley, *supra* note 89, at 1198.

n92 *See* Shawn M. Clankie, *Brand Name Use in Creative Writing: Genericide or Language Right?*, in PERSPECTIVES ON PLAGIARISM AND INTELLECTUAL PROPERTY IN A POSTMODERN WORLD 253, 262 (Lide Buranen & Alice M. Roy eds., 1999) ("Language change and innovation are natural and, in general, unmanageable.").

n93 In the trademark context, multiple definitions of the same word are assumed to have dilutive effect. *See, e.g.*, Swann, *supra* note 89, at 759 (noting that "[d]ilution equals the diffusion of a singular definition in the dictionary of commercial terms").

n94 WEBSTER'S NINTH NEW COLLEGIATE DICTIONARY 1117 (1983).

n95 Desai & Rierson, *supra* note 17, at 1839.

n96 J. THOMAS MCCARTHY, 4 MCCARTHY ON TRADEMARKS AND UNFAIR COMPETITION § 24:11 (4th ed. 2005) (listing "well-known examples" of marks that can "peacefully co-exist without confusion"). A recent empirical study has shown that, in part due to the expansion of trademark infringement doctrine and anti-dilution law, brand sharing has declined significantly over the past fifty years. Robert Brauneis & Paul Heald, *Trademark Infringement, Trademark Dilution, and the Decline in Sharing of Famous Brands: An Introduction and Empirical Study*, 59 BUFF. J. INT'L L. 141 (2011); Robert Brauneis & Paul Heald, *The Myth of Buick Aspirin: An Empirical Study of Trademark Dilution by Product and Trade Names*, 32 CARDOZO L. REV. 255 (2011).

n97 Maureen Morrin & Jacob Jacoby, *Trademark Dilution: Empirical Measures for an Elusive Concept*, 19 J. PUB. POL'Y & MARKETING 265 (2000).

n98 *Id.* at 268.

n99 *Id.* at 268-69.

n100 *Id.* at 269.

n101 *Id.*

n102 *Id.* at 269-70.

n103 Daniel Klerman, *Trademark Dilution, Search Costs, and Naked Licensing*, 74 *FORDHAM L. REV.* 1759, 1765 (2006). Klerman calculates that, at the rate of \$ 250 an hour, the increase in search costs shown in the Heineken example would amount to less than a cent. *Id.* Some dilution proponents argue that even milliseconds of delay in associating a mark with its proper product are substantial enough to affect consumer purchasing decisions and therefore such delays cause real economic harm to trademark holders. *See* Tushnet, *supra* note 90, at 522 n.68 (citing a study demonstrating that "dilution-generated delayed response" is correlated with decreased probability that subjects would later choose the diluted brand).

n104 Morrin & Jacoby, *supra* note 97, at 270-71. Morrin and Jacoby found that "very strong brands are immune to dilution because their memory connections are so strong that it is difficult for consumers to alter or create new ones with the same brand name." *Id.* at 274; *see also* Klerman, *supra* note 103, at 1765 (citing Morrin's study as indicating some strong brands may be more "resistant to harm").

n105 *See* Barton Beebe, *A Defense of the New Federal Trademark Antidilution Law*, 16 *FORDHAM INTELL. PROP. MEDIA & ENT. L. J.* 1143, 1162-63 (2006).

n106 *See infra* notes 142-186 and accompanying text.

n107 The Morrin and Jacoby study examined one mark (Dogiva Dog Biscuits) that was not identical to the famous mark that it theoretically diluted (Godiva Chocolates). The Dogiva ad was included in the study to provide an example of tarnishment. Morrin & Jacoby, *supra* note 97, at 268. The study suggested that exposure to Dogiva Dog Biscuits delayed the study participant's ability to identify Godiva Chocolates by 73 milliseconds, if the participant had not been previously exposed to ads for Godiva chocolate. Curiously, when survey participants were exposed to Godiva and Dogiva ads, the delay in their response times increased to 129 milliseconds. *Id.* at 269.

n108 Tushnet, *supra* note 90, at 529-32 (discussing the impact of context in terms of the source-identifying power of trademarks and words in general). As Tushnet succinctly concludes, "When context is king, dilution loses much of its theoretical appeal." *Id.* at 529.

n109 As linguist Roger Shuy has written, "[w]ords in isolation seldom occur in our lives, except in spelling bees and grocery lists. Since humans commonly use context to disambiguate and figure out what is meant, it is reasonable to expect them to keep on doing this with trademarks." Roger Shuy, *Linguistic Thoughts on Trademark Dilution*, 5-6 (2003) (unpublished manuscript, on file with the author). *See also* Klerman, *supra* note 103, at 1765-66 (observing that "[c]onsumers just do not confront trademarks in the abstract very often, and, when they do, context usually makes the product category obvious").

n110 As Professor Boyle explains, "Unlike the earthly commons, the commons of the mind is generally 'non-rival.' Many uses of land are mutually exclusive. If I am using the field for grazing, it may interfere with your plans to use it for growing crops. By contrast, a gene sequence, an MP3 file, or an image may be used by multiple parties; my use does not interfere with yours. To simplify a complicated analysis, this means that the threat of overuse of fields and fisheries is generally not a problem with the informational or innovational commons." James Boyle, *The Second Enclosure Movement and the Construction of the Public Domain*, 66 LAW & CONTEMP. PROBS. 33, 41 (2003); *see also* Sonia Katyal, *Trademark Intersectionality*, 57 UCLA L. REV. 1601, 1663, 1695 (2010); Brett M. Frischmann, *An Economic Theory of Infrastructure and Commons Management*, 89 MINN. L. REV. 917, 946 (2005).

n111 *See generally* K. DAVID HARRISON, WHEN LANGUAGES DIE: THE EXTINCTION OF THE WORLD'S LANGUAGES AND THE EROSION OF HUMAN KNOWLEDGE (2007).

n112 *See* Tushnet, *supra* note 90, at 536 (describing one study as suggesting that "dilution does not harm many famous trademarks because adding associations to low-frequency words does not interfere with retrieval or recognition - and may even help"); *see also id.* at 540 ("By adding branches to a trademark's mental tree, multiple associations make it bigger, which improves availability in a well-forested mind.")

n113 15 U.S.C. § 1125(c)(1) (2006) (cause of action for dilution does not depend on "the presence or absence of . . . actual economic injury"); *see also* Miss. Code Ann. § 75-25-1 (2011) (same).

n114 Although the Supreme Court initially interpreted the FTDA to require proof of "actual dilution," it specified that, under this standard, plaintiffs were not required to prove "the consequences of dilution, such as an actual loss of sales or profits." *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418, 433 (2003). The revised statute, the TDRA, changed the standard of proof to one of likelihood of dilution and specifies that plaintiffs are not required to prove any "actual economic injury." 15 U.S.C. § 1125 (c)(1) (2006). The Subcommittee on Courts, the Internet, and Intellectual Property, in 2004 and 2005, heard testimony from a representative of the International Trademark Association, who argued that the "actual dilution" standard established in *Moseley* was too burdensome for trademark holders: "By the time measurable, provable damage to the mark has occurred much time has passed, the damage has been done, and the remedy, which is injunctive relief, is far less effective." H.R. Rep. No. 109-23, at 5 (2006), *reprinted in* 2006 U.S.C.C.A.N. 1091, 1093-94.

n115 Professor Farley has also proffered this explanation: "Let me suggest that trademark owners desire a likelihood of dilution standard rather than an actual dilution standard because they cannot prove actual dilution. There is a good reason that trademark owners cannot prove actual dilution. My thesis is that there is no such harm; it does not exist The main problem with dilution law is that it provides a remedy without a supportable theorization of the harm." Christine Haight Farley, *Why We are Confused about the Trademark Dilution Law*, 16 FORDHAM INTELL. PROP. MEDIA & ENT. L.J. 1175, 1184 (2006).

n116 15 U.S.C. § 1125 (c)(1).

n117 15 U.S.C. § 1125 (c)(2)(C).

n118 15 U.S.C. § 1125 (c)(1).

n119 Hormel Foods Corp. v. Jim Henson Prods., Inc., 73 F.3d 497, 507 (2d Cir. 1996).

n120 See Ty Inc. v. Perryman, 306 F.3d 509, 511 (7th Cir. 2002) (characterizing tarnishment as "a second form of dilution," reasoning that "[a]nalytically it is a subset of blurring, since it reduces the distinctness of the trademark as a signifier of the trademarked product or service"); see generally Layne T. Smith, Comment, *Tarnishment and the FTDA: Lessening the Capacity to Identify and Distinguish*, 2004 BYU L. REV. 825, 850-60 (2004).

n121 See *supra* notes 84-87 and accompanying text.

n122 Judge Posner explains the tarnishment phenomenon with the following example: Suppose a "striptease joint" adopts the name "Tiffany." "[C]onsumers will not think the striptease joint [is] under common ownership with the jewelry store. But because of the inveterate tendency of the human mind to proceed by association, every time they think of the word 'Tiffany' their image of the fancy jewelry store will be tarnished by the association of the word with the strip joint." *Ty Inc.*, 306 F.3d at 511.

n123 See Tushnet, *supra* note 90, at 522-23 (noting that "emotion drives cognition, meaning that negative associations may do real, even measurable harm" to a trademark holder, describing such associations as "poisoned fruit"); see also Stacey L. Dogan & Marc Lemley, *The Merchandising Right: Fragile Theory or Fait Accompli?*, 54 EMORY L.J. 461, 494 (2005) (describing dilution by tarnishment as a form of "subconscious pollution").

n124 See generally Jessica Taran, *Dilution by Tarnishment: A Case for Vulgar Humor*, 7 INTELL. PROP. L. BULL. 1 (2002); Regina Schaffer-Goldman, Note, *Cease-and-Desist: Tarnishment's Blunt Sword in its Battle against the Unseemly, the Unwholesome, and the Unsavory*, 20 FORDHAM INTELL. PROP. MEDIA & ENT. L. J. 1241 (2010).

n125 See, e.g., *Dallas Cowboys Cheerleaders, Inc. v. Pussycat Cinemas, Ltd.*, 604 F.2d 200, 204 (2d Cir. 1979) (enjoining use of Dallas Cowboy cheerleader uniforms in a pornographic film); *Kraft Foods Holdings, Inc. v. Helm*, 205 F. Supp. 2d 942, 948-50 (N.D. Ill. 2002) (holding that pornographic website's use of the mark "VelVeeda" was likely to tarnish the Velveeta trademark); *Victoria's Cyber Secret Ltd. P'ship v. V Secret Catalogue, Inc.*, 161 F. Supp. 2d 1339, 1355 (S.D. Fla. 2001) (holding that defendants' use of domain names "victoriassxsecret.com" and "victoriassxysecret.com" to sell "entertainment of a lascivious nature suitable only for adults" was likely to tarnish the Victoria's Secret trademark). When a defendant uses sexual imagery, particularly pornography, to mock the trademark holder or the mark itself in a manner that might otherwise be considered a parody, courts are typically not amused. See, e.g., *Pillsbury Co. v. Milky Way Prods., Inc.*, 215 U.S.P.Q. 125, 126, 134 (N.D. Ga. 1981) (enjoining use of Pillsbury Doughboy character in magazine which featured the Doughboy in various sexual positions); but see *Burnett v. Twentieth Century Fox Film Corp.*, 491 F. Supp. 2d 962, 972 (C.D. Cal. 2007) (dismissing claim of dilution by tarnishment by actress Carol Burnett based on lewd portrayal of her "Charwoman" character in an episode of the cartoon *Family Guy*, on grounds that use of Burnett's character was noncommercial parody).

n126 See, e.g., *Hormel Foods Corp. v. Jim Henson Prods., Inc.*, 73 F.3d 497, 506, 508 (2d Cir. 1996) (finding defendant's use of wild boar puppet named "Spa'am" in the movie *Muppet Treasure Island* did not dilute or tarnish the SPAM trademark (for lunch meat)). See also *infra* notes 223-228 and accompanying text (discussing *Louis Vuitton Malletier S.A. v. Haute Diggity Dog, LLC*, 507 F.3d 252 (4th Cir. 2007)).

n127 15 U.S.C. § 1125(c)(1) (2006).

n128 *Mead Data Cent., Inc. v. Toyota Motor Sales, U.S.A., Inc.*, 875 F.2d 1026, 1031 (2d Cir. 1989) (quoting the legislative history of New York's state dilution statute). The United States Congress similarly cited "DUPONT shoes, BUICK aspirin, and KODAK pianos" as hypothetical misuses of a trademark that a federal dilution cause of action would combat. H.R. Rep. 104-374, at 3 (1996), *reprinted in* 1996 U.S.C.C.A.N. 1029, 1030 (legislative history of Federal Trademark Dilution Act).

n129 Schechter, *supra* note 7, at 830. Schechter's statement here blurs the concepts of dilution and genericide, portraying the ultimate "death" of the trademark as the inevitable result of unchecked dilution. See Desai & Rierison, *supra* note 17, at 1842-44 (discussing the link between the dilution and genericide doctrines).

n130 See *supra* notes 63-65 and accompanying text.

n131 15 U.S.C. § 1125(c)(1).

n132 *Id.* at § 1125(c)(2)(A). The statute identifies four non-exclusive factors for courts to consider in determining whether a mark is "famous." *Id.* at § 1125(c)(2)(A)(i)-(iv). The TDRA narrowed the scope of famousness, as compared to the FTDA, by attempting to eliminate marks that had achieved only niche fame or regional fame from the scope of dilution protection. *See, e.g.,* Xuan-Thao Nguyen, *Fame Law: Requiring Proof of National Fame in Trademark Law*, 33 CARDOZO L. REV. 89, 94 (2011) (noting that the fame requirement "functions as a gatekeeper to prevent widespread treating of trademarks purely as property in trademark jurisprudence").

n133 15 U.S.C. § 1125(c)(2)(B). State dilution statutes have largely adopted the same definition of "dilution by blurring." *See, e.g.,* CAL. BUS. & PROF. CODE § 14202(l) (West 2008) (defining "dilution by blurring" as an "association arising from the similarity between a mark or a trade name and a famous mark that impairs the distinctiveness of the famous mark."); MISS. CODE ANN. § 75-25-1(l) (West 2011) (same); ALA. CODE 1975 § 8-12-6(3) (2012) (same).

n134 *See infra* notes 156-160 and accompanying text.

n135 The Act provides that courts may consider "all relevant factors" in "determining whether a mark or trade name is likely to cause dilution by blurring," including (but presumably not limited to) (1) "[t]he degree of similarity between the mark or trade name and the famous mark"; (2) "[t]he degree of inherent or acquired distinctiveness of the famous mark"; (3) "[t]he extent to which the owner of the famous mark is engaging in substantially exclusive use of the mark"; (4) "[t]he degree of recognition of the famous mark"; (5) "[w]hether the user of the mark or trade name intended to create an association with the famous mark"; and (6) "[a]ny actual association between the mark or trade name and the famous mark." 15 U.S.C. § 1125(c)(2)(B)(i)-(vi).

n136 15 U.S.C. § 1125(c)(2)(C).

n137 *Compare* *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418, 432 (2003) (noting the absence of any direct reference to tarnishment in the FTDA and questioning whether the statute actually embraced this cause of action, despite references to tarnishment in the legislative history), *with* *Kraft Foods Holdings, Inc. v. Helm*, 205 F. Supp. 2d 942, 948-50 (N.D. Ill. 2002) (holding that pornographic website's use of the mark "VelVeeda" was likely to tarnish the Velveeta trademark, in violation of the FTDA); *Victoria's Cyber Secret Ltd. P'ship v. V Secret Catalogue, Inc.*, 161 F. Supp. 2d 1339, 1355 (S.D. Fla. 2001) (holding that defendants' use of domain names "victoriasexsecret.com" and "victoriasexsecret.com" to sell "entertainment of a lascivious nature suitable only for adults" was likely to tarnish the Victoria's Secret trademark, in violation of the FTDA).

n138 15 U.S.C. § 1125(c)(3).

n139 *Id.* at § 1125(c)(3)(A)(ii).

n140 *Id.* at § 1125(c)(3)(A).

n141 Beebe, *supra* note 105, at 1144; *see also* Jennifer Files Beerline, Note, *Anti-Dilution Law, New and Improved: The Trademark Dilution Revision Act of 2006*, 23 BERKELEY TECH. L. J. 511, 513 (concluding that, "while imperfect, the TDRA is a vast improvement over the FTDA").

n142 *See supra* note 128 and accompanying text.

n143 *See* Mead Data Cent., Inc. v. Toyota Motor Sales, U.S.A., Inc., 875 F.2d 1026, 1031 (2d Cir. 1989) (quoting the legislative history of New York's state dilution statute).

n144 *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418, 433 (2003).

n145 *Trademark Dilution Revision Act of 2006: Hearing Before the Subcomm. On Courts, the Internet and Intellectual Property of the Comm. on the Judiciary*, 109th Cong. 6 (2005) (statement of Anne Gundelfinger on behalf of the International Trademark Association (INTA)).

n146 *Moseley*, 537 U.S. at 422. The name of the store was originally "Victor's Secret," but the Moseleys changed the name after receiving a letter from plaintiff's lawyer indicating that plaintiff believed that the name both infringed and diluted its federally registered trademark. *Id.* at 423.

n147 *Id.* at 425. Plaintiff did not appeal the court's ruling on the trademark infringement and unfair competition claims. *Id.* at 428.

n148 *Id.* at 425.

n149 *Id.* at 423. The advertisement in question promoted the sale of "'Intimate Lingerie for *every woman*'; 'Romantic Lighting'; 'Lycra Dresses'; 'Pagers'; and 'Adult Novelties/Gifts.'" *Id.*

n150 *Id.* at 434.

n151 170 F.3d 449, 463 (4th Cir. 1999).

n152 *Moseley*, 537 U.S. at 433-34.

n153 *Id.* at 434 (noting that the customer "did not change his conception of Victoria's Secret," despite being "offended by the ad"). In dicta, the Court suggested that, if the junior and senior marks were "identical," the plaintiff would have "circumstantial evidence" of actual dilution. *Id.*

n154 *Playtex Prods., Inc. v. Georgia-Pacific Corp.* 390 F.3d 158, 167 (2d Cir. 2004); *see also* *Thane Int'l, Inc. v. Trek Bicycle Corp.*, 305 F.3d 894, 905 (9th Cir. 2002) (referring to the "recently-established requirement that for a dilution claim to succeed, the mark used by the alleged diluter must be identical, or nearly identical, to the protected mark"); *Fed. Express Corp. v. Fed. Espresso, Inc.*, 201 F.3d 168, 176 (2d Cir. 2000) (same); *Luigino's, Inc. v. Stouffer Corp.*, 170 F.3d 827, 832 (8th Cir. 1999) ("To support an action for dilution by blurring, the marks must at least be similar enough that a significant segment of the target group of customers sees the two marks as essentially the same.") (internal citations omitted).

n155 See, e.g., *Starbucks Corp. v. Wolfe's Borough Coffee, Inc.*, 588 F.3d 97, 104 (2d Cir. 2009) (noting that the TDRA was passed "in response to" the Supreme Court's decision in *Moseley*).

n156 15 U.S.C. § 1125(c)(1) (2006).

n157 *Id.* at § 1125(c)(2)(B).

n158 These factors include "[t]he degree of inherent or acquired distinctiveness of the famous mark"; "[t]he extent to which the owner of the famous mark is engaging in substantially exclusive use of the mark"; and "[t]he degree of recognition of the famous mark." 15 U.S.C. § 1125(c)(2)(B)(ii)-(iv). These factors are essentially identical to three of the "famousness" factors listed in the former version of the statute, the FTDA. See 15 U.S.C. § 1125(c)(1)(A), (F)-(G) (superseded).

n159 15 U.S.C. § 1125(c)(2)(B)(v)-(vi).

n160 Some early post-TDRA cases suggested, and some commentators have argued, that the "identical mark presumption" should persist in the face of the TDRA's revised statutory language. See, e.g., Jeremy M. Roe, Note, *The Current State of Antidilution Law: The Trademark Dilution Revision Act and the Identical Mark Presumption*, 57 DEPAUL L. REV. 571, 590 (2008) (arguing that "courts should strictly enforce the use of the identical mark presumption"). However, post-TDRA case law appears to be trending in the opposite direction. See, e.g., *Levi Strauss & Co. v. Abercrombie & Fitch Trading Co.*, 633 F.3d 1158, 1166-71 (9th Cir. 2011) (discussing and distinguishing earlier post-TDRA cases).

n161 J. THOMAS MCCARTHY, 4 MCCARTHY ON TRADEMARKS AND UNFAIR COMPETITION § 24:119 (2011).

n162 *Id.*

n163 *Starbucks Corp. v. Wolfe's Borough Coffee, Inc.*, 588 F.3d 97 (2d Cir. 2009).

n164 Starbucks Corp. v. Wolfe's Borough Coffee, Inc., 559 F. Supp. 2d 472, 474 (S.D.N.Y. 2008).

n165 *Starbucks Corp.*, 588 F.3d at 103.

n166 *Id.* at 104.

n167 *Id.* at 109, 119. The original lawsuit against Black Bear was filed under the 1995 version of the Act, the FTDA. However, the revised Act (TDRA) went into effect after the bench trial in the case, and the case was reviewed under the TDRA by the Second Circuit on appeal. *Id.* at 104.

n168 *Id.* at 106-07 (describing differences between the two trademarks).

n169 *Id.*

n170 *See id.* at 108 (finding it significant that "the federal dilution statute does not use the words 'very' or 'substantial' in connection with the similarity factor").

n171 *See Levi Strauss & Co. v. Abercrombie & Fitch Trading Co.*, 633 F.3d 1158, 1172 (9th Cir. 2011) (concluding that "the plain language of 15 U.S.C. § 1125(c) does not require that a plaintiff establish that the junior mark is identical, nearly identical or substantially similar to the senior mark in order to obtain injunctive relief"). In this case, the district court dismissed the dilution claim because the advisory jury found that the two designs were not "identical or nearly identical." *Id.* at 1160. The Ninth Circuit reversed and remanded, holding that the court had misstated the degree of similarity necessary to support a dilution claim under the TDRA. *Id.* at 1159.

n172 588 F.3d at 109.

n173 *Id.*

n174 *Id.* Only about 3% of consumers who participated in the telephone survey thought Starbucks was the "possible source" of Charbucks. *Id.*

n175 *See, e.g.,* Hershey Co. v. Art Van Furniture Inc., 2008 WL 4724756 (E.D. Mich. 2008). In this case, the court issued a preliminary injunction to prevent defendant from advertising furniture with a picture of a brown couch emerging from a wrapper reminiscent of a Hershey candy bar (on the side of a furniture delivery van). *Id.* at *1. Although the court found no likelihood of confusion and therefore no likelihood of success on the merits of plaintiff's trademark infringement claim, it found defendant's mark was likely to dilute Hershey's famous trademark and trade dress, and therefore issued the injunction. *Id.* at *12, *14.

n176 V Secret Catalogue, Inc. v. Moseley, 605 F.3d 382, 387 (6th Cir. 2010) (citing U.S.C.C.A.N., 109th Cong. 2d Sess. 2006, Vol. 4, pp. 1091, 1092, 1097) [hereinafter *Moseley II*]. Of course, it is possible that the Sixth Circuit's decision in *Moseley II* will not be followed by other federal circuits, and that its expansive interpretation of dilution by tarnishment will ultimately die on the vine. At least one commentator has predicted that the tarnishment cause of action under the TDRA is actually "a much narrower cause of action than existed in pre-TDRA tarnishment case law." Sarah L. Burstein, *Dilution by Tarnishment: The New Cause of Action*, 98 TRADEMARK REP. 1189, 1189 (2008). However, given that the Sixth Circuit decision is the most comprehensive judicial interpretation of the TDRA tarnishment provision to date, particularly in the context of an allegedly tarnishing use with sexual connotations, its opinion should not be ignored and, at the very least, will constitute persuasive authority in other circuits.

n177 *Moseley II*, 605 F.3d at 382.

n178 *See supra* notes 144-150 and accompanying text.

n179 *Moseley II*, 605 F.3d at 387.

n180 *Id.* at 387-88 (6th Cir. 2010) (citing cases).

n181 *Id.* at 388. The "rebuttable presumption" language appears in the majority opinion, but it was rejected in the concurrence in favor of creating a "strong inference" of tarnishment. *Id.* at 390.

n182 *Id.* at 388. The court suggested that such proof could include "expert testimony or surveys or polls or customer testimony." *Id.*

n183 *Id.* at 389.

n184 One judge in the three-judge panel that decided *Moseley II* dissented and argued that the court had misinterpreted both the plain language and the legislative history of the TDRA in reaching this conclusion. *Id.* at 391-95 (Moore, J., dissenting).

n185 *Id.* at 388-89. The type of evidence cited by the court as helpful in disproving tarnishment -- expert testimony and consumer surveys -- is notoriously costly. *See, e.g.,* *Lon Tai Shing Co., Ltd. v. Koch & Lowy*, 19 U.S.P.Q.2d 1081, 1095 (S.D.N.Y. June 20, 1991) (estimating the cost of conducting consumer survey in the instant trademark case at approximately \$ 100,000).

n186 *See* Beebe, *supra* note 62, at 1623 (concluding, based on empirical data, that "the similarity of the marks factor is by far the most important factor in the multifactor test" for determining likelihood of confusion and trademark infringement).

n187 *See supra* notes 13-15 and accompanying text.

n188 Schechter, *supra* note 7, at 830.

n189 The application of the dilution doctrine in cases involving competitors is not without controversy. In his iconic trademark treatise, Professor McCarthy states, "[i]t is difficult to understand why an anti-dilution law is invoked when the parties operate in competitive or closely related product or service lines. The legal theory of anti-dilution was conceived to protect strong marks against a diluting use by a junior user in a product or service line far removed from that in which the famous mark appears. Thus, using the anti-dilution law when the parties are competitors in the same market sounds a dissonant and false note. Why the need to invoke the 'super weapon' of anti-dilution law to resolve what appears to be a garden variety infringement case." J. THOMAS MCCARTHY, 4 MCCARTHY ON TRADEMARKS AND UNFAIR COMPETITION § 24:72, at 24-136 (Supp. 12/2003). The Second Circuit rejected this reasoning (without citing McCarthy), based on the plain language of the FTDA: "In the absence of contrary legislative command, the fact that other remedies [such as trademark infringement] may be available to prevent a perceived ill does not seem to be sufficient reason to construe a statute as not reaching circumstances that fall squarely within its words. The fact that injured senior users may thus be given a choice of remedies is not sufficient reason to read into the antidilution statute limitations that Congress did not write." *Nabisco, Inc. v. PF Brands, Inc.*, 191 F.3d 208, 223 (2d Cir. 1999). Moreover, the court hypothesized that "failure to construe the antidilution statutes as reaching competing products may lead to a gap in coverage; the products might be found too far apart to support a finding of likelihood of confusion--(and therefore an infringement action)--yet too close together to permit a finding of dilution." *Id.*

n190 See Beebe, *supra* note 62, at 1628 (concluding, based on empirical data, "a finding of bad faith intent creates, if not in doctrine, then at least in practice, a nearly un-rebuttable presumption of a likelihood of confusion").

n191 *Starbucks Corp. v. Wolfe's Borough Coffee, Inc.*, 588 F.3d 97, 103 (2d Cir. 2009).

n192 *Id.*

n193 *Id.* at 102.

n194 *Id.*

n195 *Id.* at 109.

n196 Proof Brief for Plaintiff-Counter-Defendants-Appellants, *Starbucks Corp.*, 588 F.3d 97 (2006) (No. 06-0435-cv), 2006 WL 4846966 at *17. Black Bear did not admit that its choice of the Charbucks name was intended to invoke an association with Starbucks. In its appellate brief, Black Bear argued that it "chose the descriptor 'Charbucks Blend' as a humorous way to alert customers that the very dark roast was different from Black Bear's typical products." Brief for Defendant-Appellee, *Starbucks Corp.*, 588 F.3d 97 (2006) (No. 06-0435-cv), 2006 WL 4846967 at *3.

n197 *Starbucks Corp.*, 588 F.3d at 113.

n198 *Id.* at 103. Another slogan stated, "You wanted it dark . . . You've got it dark!" *Id.*

n199 The Second Circuit rejected Starbucks' claim that Black Bear's use of the name Charbucks resulted in tarnishment of the Starbucks trademark by evoking an image of "bitter, over-roasted coffee." *Id.* at 110. At least one pre-TDRA case did find dilution by tarnishment in a case between competitors, where the plaintiff's famous logo was used in defendant's comparative advertisement in a manner that mocked the plaintiff. *See Deere & Co. v. MTD Prods., Inc.*, 41 F.3d 39, 44-45 (2d Cir. 1994) (interpreting New York anti-dilution law).

n200 *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418, 424 (2003).

n201 *Id.* at 422-23.

n202 *Moseley II*, 605 F.3d 382, 394 (6th Cir. 2010) (Moore, J., dissenting).

n203 The dissent in *Moseley II* took note of Victoria's Secret advertisements for "'sexy little things' lingerie." *Moseley II*, 605 F.3d at 394. These ads urge customers to "'[b]e bad for goodness sake'" by wearing Victoria's Secret merchandise, specifically "'peek-a-boo's, bras and sexy Santa accessories.'" *Id.* The ads also encourage participation "in the store's 'panty fantasy,' which they describe as 'Very racy. Very lacy.'" *Id.*

n204 See, e.g., *Nabisco, Inc. v. PF Brands, Inc.*, 191 F.3d 208 (2d Cir. 1999); *I.P. Lund Trading ApS v. Kohler Co.*, 163 F.3d 27 (1st Cir. 1998) (considering FTDA trademark dilution claim regarding trade dress of KOHLER faucet); but see *Syndicate Sales, Inc. v. Hampshire Paper Corp.*, 192 F.3d 633, 639 (7th Cir. 1999) (expressing doubt as to whether trade dress falls within the scope of the FTDA).

n205 15 U.S.C. § 1125(c)(4) (2006).

n206 *Nabisco, Inc.*, 191 F.3d at 208. This case held that, under the 1995 version of the federal trademark dilution law (the FTDA), only proof of a "likelihood of dilution," rather than "actual dilution" was required. *Id.* at 214. The Supreme Court overruled this holding in *Moseley*, requiring proof of "actual dilution," but, as discussed above, that holding was in turn abrogated by the 2006 amendments to the Act (the TDRA). The TDRA explicitly requires proof only of a "likelihood of dilution" rather than "actual dilution." See *supra* notes 156-160 and accompanying text.

n207 *Nabisco, Inc.*, 191 F.3d at 212-13.

n208 Nabisco did not randomly choose to manufacture a cracker in the shape of a fish. The Nabisco product was designed as a joint promotion with Nickelodeon Television Network, to promote the Nickelodeon CatDog cartoon. *Id.* The cartoon featured a two-headed creature (half cat, half dog) that liked to eat fish (for the cat) and bones (for the dog). *Id.* The CatDog cracker mix was to contain crackers in the shape of the CatDog cartoon character and its favorite foods, fish and bones. *Id.* at 213.

n209 *Id.* at 222 (citing 15 U.S.C. § 1127(c)).

n210 See 15 U.S.C. § 1125(c)(1).

n211 *Nabisco, Inc.*, 191 F.3d at 222; see also *supra* note 189.

n212 See 15 U.S.C. § 1125(c)(3)(A)(ii) (providing that "[a]ny fair use" is not actionable dilution, including use in connection with "identifying and parodying, criticizing, or commenting upon the famous mark owner or the goods or services of the famous mark owner").

n213 15 U.S.C. § 1125(c)(3)(A).

n214 *Louis Vuitton Malletier S.A. v. Haute Diggity Dog, LLC*, 507 F.3d 252, 260 (4th Cir. 2007); see also *People for the Ethical Treatment of Animals v. Doughney*, 263 F.3d 359, 366 (4th Cir. 2001) (same).

n215 See, e.g., *Mattel, Inc. v. MCA Records, Inc.*, 296 F.3d 894, 902-03 (9th Cir. 2002) (alleging that the song "Barbie Girl" by the band Aqua tarnished the Barbie trademark because the song was "inappropriate for young girls"); *Haute Diggity Dog*, 507 F.3d 252, 264 (alleging that "Chewy Vuiton" dog toys were likely to tarnish the Louis Vuitton mark because the toys "pose a choking hazard for some dogs"); *Deere & Co. v. MTD Products, Inc.*, 41 F.3d 39, 44-45 (2d Cir. 1994) (alleging that MTD's portrayal of the John Deere logo as a fleeing, frightened deer amounted to dilution by tarnishment); *Jordache Enterprises, Inc. v. Hogg Wyld, Ltd.*, 828 F.2d 1482, 1486 (10th Cir. 1987) (alleging that the use of the name "Lardashe" on the seat of jeans "for larger women" amounted to tarnishment of the Jordache trademark).

n216 See *Mattel*, 296 F.3d at 902-07 (discussing tension between liability for dilution under the FTDA and the First Amendment in the context of parody).

n217 The FTDA definition of fair use was limited to "use of a famous mark by another person in comparative commercial advertising or promotion to identify the competing goods or services of the owner of the famous mark." 15 U.S.C. § 1125(c)(4)(A). The FTDA also contained a general exemption for "noncommercial uses" of a mark, which is identical to the language in the current version of the statute. *Id.* at (c)(2)(C).

n218 Both the FTDA and the TDRA contain a general exemption from dilution liability for "[a]ny noncommercial use of a mark." See 15 U.S.C. § 1125(c)(3)(C).

n219 See, e.g., Sarah Mayhew Schlosser, Note, *The High Price of (Criticizing) Coffee: The Chilling Effect of the Federal Trademark Dilution Act on Corporate Parody*, 43 ARIZ. L. REV. 931, 962 (2001) (criticizing the fact that trademark laws "emphasize economic and commercial factors over free speech").

n220 15 U.S.C. § 1125(c)(3)(A)(ii).

n221 *Id.* at (c)(3)(A).

n222 *Haute Diggity Dog*, 507 F.3d at 260 (quoting *Jordache Enterprises, Inc. v. Hogg Wyld, Ltd.*, 828 F.2d, 1482, 1486 (10th Cir. 1987)).

n223 *Id.* In a case interpreting state anti-dilution law, the court held that the use of the mark "Lardashe" for jeans was a successful parody of the "Jordache" jeans trademark. *Hogg Wyld*, 828 F.2d at 1482.

n224 *Haute Diggity Dog*, 507 F.3d at 260.

n225 *Id.* at 266.

n226 *Id.* at 267.

n227 *Id.* at 267 (citing cases).

n228 *Id.* at 268-69. Although Haute Diggity Dog's goods, specifically the Chewy Vuiton dog toy, were clearly of inferior quality when compared to luxury Louis Vuitton handbags, the evidence cited in the summary judgment motions (and consequently on appeal) regarding dilution by tarnishment focused on the peculiarly narrow claim that Louis Vuitton's reputation could be harmed because a dog could choke on the Chewy Vuiton toy. *Id.* Based on this limited evidence and argument, the court affirmed summary judgment on this claim. *Id.* at 269.

n229 See, e.g., Jesse A. Hofrichter, Note, *Tool of the Trademark: Brand Criticism and Free Speech Problems with the Trademark Dilution Revision Act of 2006*, 28 CARDOZO L. REV. 1923, 1940 (2007) ("While the vast majority of dilution cases do not implicate First Amendment issues, there have been a number of cases under federal and state anti-dilution statutes that have broached the topic[.]"); see also *infra* notes 346-360 and accompanying text.

n230 15 U.S.C. § 1125(c)(3)(A).

n231 Other circuits may of course choose to reject the test adopted by the Fourth Circuit in the *Haute Diggity Dog* case, either on statutory or Constitutional (First Amendment) grounds. See, e.g., *Starbucks Corp. v. Wolfe's Borough Coffee, Inc.*, 588 F.3d 97, 113 (2d Cir. 2009) (declining to decide whether to adopt the Fourth Circuit's analysis of the statutory exemption from liability for parodies, when defendant's parody is also used as a trademark).

n232 In contrast to the court's decision in *Haute Diggity Dog*, see *Deere & Co. v. MTD Products, Inc.*, 41 F.3d 39, 44 -45 (2d Cir. 1994) (finding trademark dilution where defendant used plaintiff's famous logo in a comparative advertisement that mocked plaintiff).

n233 *Starbucks Corp. v. Wolfe's Borough Coffee, Inc.*, 588 F.3d 97, 113 (2d Cir. 2009).

n234 See *Louis Vuitton Malletier S.A. v. Haute Diggity Dog, LLC*, 507 F.3d 252, 260 (4th Cir. 2007) ("A parody must convey two simultaneous--and contradictory--messages: that it is the original, but also that it is not the original and is instead a parody.") (citations omitted).

n235 15 U.S.C. § 1125(c)(2)(B)(v).

n236 See *id.* at (c)(3)(A)(i) (exempting from liability any "advertising or promotion that permits consumers to compare goods or services").

n237 *See, e.g.,* Smith v. Chanel, Inc., 402 F.2d 526, 565-66 (9th Cir. 1968).

n238 *Starbucks Corp.*, 588 F.3d at 113.

n239 *Federal Trademark Dilution Act of 1995: Hearing Before the Subcomm. On Courts and Intellectual Property of the H. Comm. on the Judiciary*, 104th Cong. 111 (1995) (statement of Nils Victor Montan, Vice President and Senior Intellectual Property Counsel, Warner Brothers).

n240 *See* ROBERTA ROSENTHAL KWALL, THE SOUL OF CREATIVITY: FORGING A MORAL RIGHTS LAW FOR THE UNITED STATES 6-7 (2010) (noting that "both the right of attribution and the right of integrity function to safeguard the author's meaning and message, and thus are designed to increase an author's ability to safeguard the integrity of her texts"); *see also* Edward J. Damich, *The Visual Artists Rights Act of 1990: Toward a Federal System of Moral Rights Protection for Visual Art*, 39 CATH. U. L. REV. 945, 958-64 (1990).

n241 Damich, *supra* note 240, at 949 (emphasis added); *see also* KWALL, *supra* note 240, at 5 ("The right of attribution safeguards the author's right to be recognized as the creator of the work."); *id.* at 87-110 (discussing the right to be anonymous or to use a pseudonym).

n242 Damich, *supra* note 240, at 949.

n243 KWALL, *supra* note 240, at 6.

n244 *See id.* at 25-35; Visual Artists Rights Act of 1990, Pub. L. No. 101-650 (tit. VI), 104 Stat. 5128 (codified in various sections of 17 U.S.C.).

n245 *See* KWALL, *supra* note 240, at 27-28 (discussing legislative history of VARA).

n246 Berne Convention for the Protection of Literary and Artistic Works art. 6bis(1), Sept. 9, 1886, 828 U.N.T.S. 221. Article 6bis further provides that "[t]he means of redress for safeguarding the rights granted by this Article shall be governed by the legislation of the country where protection is claimed." *Id.* at 6bis(3). The House Report on VARA observes that the United States joined the Berne Convention "[a]fter almost 100 years of debate," primarily due to "debate over the requirements of Article 6bis. The principal question was whether that article required the United States to enact new laws protecting moral rights." H.R. Rep. 101-514, 1990 U.S.C.C.A.N. 6915, 6917 (1990).

n247 See, e.g., KWALL, *supra* note 240, at 37 ("[T]here is a stark reality that we may not be in compliance with our obligations under the Berne Convention."); Damich, *supra* note 240, at 996 (characterizing VARA as "a step in the right direction," although it "does not meet the requirements of the Berne Convention"); Coree Thompson, Note, *Orphan Works, U.S. Copyright Law, and International Treaties: Reconciling Differences to Create a Brighter Future for Orphans Everywhere*, 23 ARIZ. J. INT'L & COMP. LAW 787, 805 (2006) ("VARA failed to . . . bring the United States into full compliance with the Berne Convention . . .").

n248 The House Report accompanying VARA states that the Act "provides . . . artists with the rights of 'attribution' and 'integrity.' The former ensures that artists are correctly identified with the works of art they create, and that they are not identified with works created by others. The latter allows artists to protect their works against modifications and destructions that are prejudicial to their honor or reputations." H.R. Rep. 101-514, 1990 U.S.C.C.A.N. 6915, 1990 WL 258818 (1990).

n249 17 U.S.C. § 106A (2006).

n250 17 U.S.C. § 101. Photos are covered only if produced "for exhibition purposes only," and then only if signed by the author. *Id.* Copies of the original, as to any type of work, are protected only if signed and consecutively numbered by the author; 200 is the maximum number of allowed copies. *Id.* The Act specifically excludes from the definition of a visual work of art, among other things, "applied art, motion picture or other audiovisual work, book, magazine, [and] newspaper." *Id.*

n251 See Damich, *supra* note 240, at 951-58 (discussing this aspect of VARA); KWALL, *supra* note 240, at 28 (describing this exclusion as problematic).

n252 17 U.S.C. § 106A(e).

n253 Berne Convention for the Protection of Literary and Artistic Works art. 6*bis*(1), Sept. 9, 1886, 828 U.N.T.S. 221.

n254 See Damich, *supra* note 240, at 966-67 (arguing that moral rights should not be waivable, due to their personal nature and the inequality of bargaining power likely to exist between artist and patron).

n255 See Dana L. Burton, *Artists' Moral Rights: Controversy and the Visual Artists Rights Act of 1990*, 13 VAND. J. ENT. & TECH. L. 463, 505 (2011).

n256 15 U.S.C. § 1125(a)(1).

n257 See KWALL, *supra* note 240, at 30-31 (describing Section 43(a) as a source of moral rights protection under US law).

n258 See, e.g., Gilliam v. American Broadcasting Co., Inc., 538 F.2d 14, 24-25 (2d Cir. 1976) (holding that re-broadcast of substantially edited or "mutilated" Monty Python scripts, attributed to Monty Python, constituted a false designation of origin and therefore violated Section 43(a)).

n259 *Id.* at 24 (internal citation omitted).

n260 Dastar Corp. v. Twentieth Century Fox Film Corp., 539 U.S. 23 (2003).

n261 *Id.* at 33-34.

n262 *Id.*

n263 *Id.* at 33. Similarly, in *Shakespeare Co. v. Silstar Corp. of America, Inc.*, 9 F.3d 1091, 1103 (4th Cir. 1993), the court observed that to preserve competition, "Congress . . . has therefore confined and limited the rewards of originality to those situations and circumstances comprehended by our patent, copyright, and trade-mark laws. When these statutory frameworks are inapplicable, originality per se remains unprotected and often unrewarded. For these reasons and with these limitations the bare imitation of another's product, without more, is permissible. And this is true regardless of the fact that the courts have little sympathy for a willful imitator." *Id.*

n264 *See generally* Justin Hughes, *American Moral Rights and Fixing the Dastar "Gap,"* 2007 UTAH L. REV. 659 (2007) (critiquing the Supreme Court's decision in *Dastar* and the lower courts' subsequent interpretation and application of it).

n265 *See infra* notes 346-355 and accompanying text.

n266 Ruth Shalit, *The inner Doughboy: How an army of admen battle to define and protect the true nature of the Jolly Green Giant, the Pillsbury Doughboy and other advertising spokescharacters*, SALON.COM (March 23, 2000, 12:00 PM), <http://www.salon.com/media/col/shal/2000/03/23/doughboy> (quoting David Altschul, president of the advertising division at Will Vinton Studios, as stating, "[w]e are focused on the emotional connection with the consumer"); *see also* Peter Walshe, *Brand Personality: Unlocking key traits for success and value*, in BRANDZ TOP 100 MOST VALUABLE GLOBAL BRANDS 45 (2012), http://www.millwardbrown.com/brandz/2012/Documents/2012_BrandZ_Top100_Report.pdf (concluding that "understanding a brand personality enables the brand owner to deliver a consistent brand experience that connects with consumers and leaves a deeper and more sustainable impression").

n267 *Barbie*, FACEBOOK, <https://www.facebook.com/#!/barbie> (last visited Aug. 15, 2012).

n268 *Id.* In the same vein, Barbie reports, "Woke up from a terrible nightmare that all of my shoes went missing! I was so happy to open my closet and see them safe and sound. Phew!" *Id.* (August 10, 2011).

n269 See *Barbie*, FACEBOOK, <https://www.facebook.com/#!/barbie> (last visited August 24, 2011).

n270 On August 23, Barbie commented on a rare East-coast earthquake: "O.M.D. Seems like my dolls on the East Coast and in Colorado experienced an LA-style quake! Hope everyone is safe and sound." *Id.*

n271 Studios have also established on-line identities for movie characters (e.g., Ricky Bobby, played by Will Ferrell in the film *Talladega Nights*). See Elizabeth Holmes, *On MySpace, Millions of Users Make 'Friends' with Ads*, WALL ST. J. Aug. 7, 2006 at B.1; see also *Ricky-Bobby*, FACEBOOK, <https://www.facebook.com/#!/pages/Ricky-Bobby/146097352118333> (last visited Aug. 15, 2012) (Facebook site for Ricky Bobby, self-identified "Athlete").

n272 Shalit, *supra* note 266.

n273 *Id.*

n274 Mr. Peanut also identifies himself as a Public Figure on Facebook. See *Mr. Peanut*, FACEBOOK, <https://www.facebook.com/mrpeanut> (last visited Aug. 15, 2012).

n275 Shalit, *supra* note 266. Other trademark icons are similarly invested with personalities. An advertising executive described the M&M characters as follows: "The red M&M - he's the calculating one. A little bit small-minded, a little ambitious and full of himself. Yellow is good hearted, but a bit slow on the uptake. Blue is closer to Woody Allen in terms of attitude. A little more wry, a little more understated. Occasionally a bit sarcastic." *Id.*

n276 Walshe, *supra* note 266, at 45.

n277 *Id.*

n278 *Id.* at 47.

n279 Ruth Shalit, *The Mr. Peanut Chronicles: Burned by past disasters, icon managers have learned the hard way that the suave mascot must never wear a wetsuit and that Ronald McDonald cannot hang out in bars*, SALON.COM (March 24, 2000), <http://www.salon.com/media/col/shal/2000/03/24/doughboy2>.

n280 Shalit, *supra* note 266.

n281 *Id.* According to the Milk Processor Board, one reason cited by Pillsbury for refusing the milk-and-cookies ad was the lack of the word "mischievous" in the Doughboy guidelines. "'Playful' is there. 'Mischievous' is not." *Id.*

n282 Pillsbury Co. v. Milky Way Prods., Inc., 215 U.S.P.Q. 125, 126 (N.D. Ga. 1981).

n283 *Pillsbury Co.*, 214 U.S.P.Q. at 135. The court reasoned that "[t]he basis for [the dilution] cause of action is the belief that the owner of these marks should not have to stand by and watch the diminution in their value as a result of unauthorized uses by others. All the plaintiff need show to prevail is that the contested use is likely to injure its commercial reputation or dilute the distinctive quality of its marks." *Id.*

n284 *Id.*

n285 *Id.*

n286 Mattel, Inc. v. Walking Mountain Prods., 353 F.3d 792, 796 (9th Cir. 2003). ("For example, 'Malted Barbie' features a nude Barbie

placed on a vintage Hamilton Beach malt machine. 'Fondue a la Barbie' depicts Barbie heads in a fondue pot. 'Barbie Enchiladas' depicts four Barbie dolls wrapped in tortillas and covered with salsa in a casserole dish in a lit oven.") *Id.*

n287 *Id.*

n288 *Id.* at 797 & n.3.

n289 *Id.* at 812.

n290 In addition to granting summary judgment in favor of the artist/defendant in this case, the district court also awarded defendant \$ 1.8 million in attorney fees and costs. *Id.* at 816. The court noted that "[p]laintiff had access to sophisticated counsel who could have determined that such a suit was objectively unreasonable and frivolous. Instead, it appears Plaintiff forced Defendant into costly litigation to discourage him from using Barbie's image in his artwork." *Mattel, Inc. v. Walking Mountain Prods.*, 2004 WL 1454100 (C.D. Cal. 2004).

n291 *See* Mark A. Lemley & Mark P. McKenna, *Owning Markets*, 109 MICH. L. REV. 137, 172 n.167 (2010) (noting that "the moral rights argument would be particularly unpersuasive in the trademark context, since moral rights are thought to derive from the intimate connection an author has with her work. The 'authors' of trademarks, which generally are corporate entities, have no human dignity at stake when others use their marks.")

n292 *See supra* notes 240-243 and accompanying text.

n293 *See supra* notes 142-186 and accompanying text.

n294 *See supra* notes 88-89 and accompanying text.

n295 See, e.g., Kenneth L. Port, *The Expansion Trajectory: Trademark Jurisprudence in the Modern Age*, 92 J. PAT. & TRADEMARK OFF. SOC'Y 474, 486 (2010) ("The trademark right in the United States has slowly come to be far more similar to the nature and extent of moral right protection, rather than the mere right to exclude."); see also Robert C. Bird, *Moral Rights: Diagnosis and Rehabilitation*, 46 AM. BUS. L. J. 407, 438-39 (2009) (comparing trademark dilution protection and moral rights); Kenneth L. Port, *Judging Dilution in the United States and Japan*, 17 TRANSNATIONAL LAW & CONTEMP. PROB. 667, 681 (2008) [hereinafter *Judging Dilution*] ("The only justification that makes sense [for U.S. dilution laws] is to say that the holders of famous marks obtain a personality right in and to that mark much like the notion of a moral right."); Roe, *supra* note 160, at 604 (characterizing dilution by tarnishment as "analogous to copyright law's moral rights doctrine").

n296 Professor Denicola has also observed that an imbalance of political power may at least be partially responsible for the expansion of trademark rights in recent years. See Robert C. Denicola, *Freedom to Copy*, 108 YALE L.J. 1661, 1683-84 (1999) (noting that, compared to copyright users, "[t]he users of others' trademarks. . . are less likely to be either influential or sympathetic").

n297 *BrandZ Top 100 Most Valuable Global Brands 2012*, MILLWARDBROWN, [HTTP://WWW.MILLWARDBROWN.COM/BRANDZ/2012/DOCUMENTS/2012_BRANDZ_TOP100_CHART.PDF](http://www.millwardbrown.com/brandz/2012/documents/2012_brandz_top100_chart.pdf) (last visited Aug. 31, 2012).

n298 On the Fortune 500 list for 2012, Apple ranked 17th; IBM was 19th; and Google was 73rd. *Fortune 500*, CNN MONEY, http://money.cnn.com/magazines/fortune/fortune500/2012/full_list/ (last visited Aug. 31, 2012).

n299 *Policy and Advocacy*, INTERNATIONAL TRADEMARK ASS'N, <http://www.inta.org/Advocacy/Pages/main.aspx> (last visited Aug. 15, 2012).

n300 *Overview*, INT'L TRADEMARK ASS'N, <http://www.inta.org/About/Pages/Overview.aspx> (last visited Aug. 15, 2012). INTA's members include "5,900 trademark owners, professionals and academics from more than 190 countries." *Id.*

n301 See, e.g., Federal Trademark Dilution Act Hearing of the Subcommittee on Courts, The Internet, and Intellectual Property of the Committee on the Judiciary, 107th Cong., 2d Sess., Serial No. 53 (Feb. 14, 2003) (statement of Kathryn Barrett Park, Executive Vice President, International Trademark Association, arguing in favor of a likelihood of dilution standard of proof); *id.* (statement of Michael K. Kirk, Executive Director of the American Intellectual Property Law Association).

n302 The Supreme Court summarized the legislative history of the FTDA as follows: "On July 19, 1995, the Subcommittee on Courts and Intellectual Property of the House Judiciary Committee held a 1-day hearing on H.R. 1295. No opposition to the bill was voiced at the hearing and, with one minor amendment that extended protection to unregistered as well as registered marks, the subcommittee endorsed the bill and it passed the House unanimously. . . . In the Senate an identical bill, S. 1513, 104th Cong., 1st Sess., was introduced on December 29, 1995, and passed on the same day by voice vote without any hearings." *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418, 431 (2003).

n303 See KWALL, *supra* note 240, at 28; see also David Goldberg & Robert J. Bernstein, *Legislation by the 101st Congress*, N.Y.L.J., Jan. 18, 1991, at 3 (noting "intense and extensive opposition to extending specific moral rights protection to audiovisual and other works").

n304 See KWALL, *supra* note 240, at 28 (describing VARA legislative history).

n305 See *supra* notes 247-255 and accompanying text.

n306 The legislative history of the Lanham Act specifies that "where the owner of a trade-mark has spent energy, time, and money in presenting to the public the product, he is protected in his investment from its misappropriation by pirates and cheats." S.Rep. No. 1333, 79th Cong., 2d Sess., 3 (1946).

n307 See Ilhyung Lee, *Toward an American Moral Right in Copyright*, 58 WASH. & LEE L. REV. 795, 814 (2001) (observing that, when an author objects to the alteration or use of his work in a context that may be characterized as "fair use," "implementation of the traditional *droit moral* may result in prohibiting actions based on the First Amendment's right of free expression") (emphasis added).

n308 The Lockean notion that one is entitled to the fruits of one's labor -- and the converse, that one is not entitled to profit from the results of someone's else's labor -- was dominant in the nineteenth century and prevalent in early trademark law. Mark P. McKenna, *The Normative Foundations of Trademark Law*, 82 NOTRE DAME L. REV. 1839, 1847, 1876 (2007).

n309 See, e.g., David J. Franklyn, *Debunking Dilution Doctrine: Toward a Coherent Theory of the Anti-Free-Rider Principle in American Trademark Law*, 56 HASTINGS L. J. 117, 119 (2004) ("A strong case can be made that free-riding on a famous mark is unfair and economically undesirable. The judicial inclination to punish free-riding deserves respect and refinement, not dismissive condemnation."); see also S. Rep. No. 1333, 79th Cong., 2d Sess. 3 (1946) ("Where the owner of a trade-mark has spent energy, time and money in presenting

to the public the product, he is protected in his investment from its appropriation by pirates and cheats.") (legislative history of 1946 Lanham Act).

n310 Oral Statement of Sherry L. Jetter, Vice President, Intellectual Property, Polo Ralph Lauren Corporation, before the Hearing of the Subcommittee on Courts, The Internet, and Intellectual Property of the Committee on the Judiciary, 107th Cong., 2d Sess., Serial No. 53 (Feb. 14, 2003).

n311 The anti-free riding impulse in U.S. unfair competition law historically has been tempered by the law's concurrent resistance to monopoly and devotion to the value of competition, which is inevitably restrained when the ability to copy is impeded. In the words of an iconic First Amendment scholar, "Most of us get along by developing the ideas of others. That is how the world progresses. . . . 'A dwarf standing on the shoulders of a giant can see farther than the giant himself.' Columbus discovered America, but here we are." Zechariah Chafee, *Unfair Competition*, 53 HARV. L. REV. 1289, 1318 (1940). Many commentators have deplored the dangers of "over-propertizing" trademark law. *See, e.g.,* Lemley & McKenna, *supra* note 291, at 187 (concluding that "a trademark law that is distorted into a right to own markets--one that seeks out and tries to forbid all free riding on a mark--ends up interfering with rather than enabling competition"); Glynn S. Lunney, Jr., *Trademark Monopolies*, 48 EMORY L. J. 367, 455 (1999) (concluding that "property-based trademark is likely to have a more substantial anticompetitive impact than deception-based trademark"); Stacey L. Dogan, *What is Dilution, Anyway?*, 105 MICH. L. REV. FIRST IMPRESSIONS 103, 106 (2006) (arguing in favor of retaining a dilution standard focused on preventing harm to the plaintiff, rather than punishing free riding by the defendant).

n312 In the European Union, "marks with a reputation" are protected from uses that take "unfair advantage of" or are "detrimental to the distinctive character or the repute of the trade mark." First Council Directive to Approximate the Laws of the Member States Relating to Trade Marks 89/104/EEC, art. 5, 1989 O. J. (L 40) 5 (EC). *See* Thomas J. McCarthy, *Dilution of a Trademark: European and United States Law Compared*, 94 TRADEMARK RPTR. 1163, 1165 (2004) (arguing that the phrase in the European Union's Trademark Directive, "without due cause takes unfair advantage," invokes the notion of free riding); Marcus H. Luepke, *Taking Unfair Advantage or Dilution of a Famous Mark--A 20/20 Perspective on the Blurred Differences Between U.S. and E.U. Dilution Law*, 98 TRADEMARK RPTR. 789, 813 (2008) (noting the "unfair advantage" cases recognized by the European Union include "instances where there is clear exploitation and free-riding"); *see also* Port, *Judging Dilution*, *supra* note 295, at 681-82 ("The concern in Japan centers around . . . whether a defendant simply is riding on the goodwill of another.").

n313 Media mogul Ted Turner, who undertook to colorize certain films that had originally been shot on black-and-white film, encountered resistance from the original directors of those films. In response to the controversy, he stated, "The last time I checked, I own those films." William H. Honan, *Artists, Newly Militant, Fight for their Rights*, N.Y. TIMES, Mar. 3, 1988, at C29.

n314 *See* 17 U.S.C. § 101 (2006) (defining a "transfer of copyright ownership" as "an assignment, mortgage, exclusive license, or any other conveyance, alienation, or hypothecation of a copyright or of any of the exclusive rights comprised in a copyright, whether or not it is limited in time or place of effect, but not including a nonexclusive license"); *see also* 17 U.S.C. § 204(a) (transfer of copyright must be in writing).

n315 See Lee, *supra* note 307, at 814 ("The notion that an artist may, in the name of the *personal* interests in the work, prevent the purchaser and holder of title in the work from doing with it what she wishes may run contrary to the American socio-legal culture and border on the heretical."); see also Roberta Kwall, *Copyright and the Moral Right: Is an American Marriage Possible?*, 38 VAND. L. REV. 1, 2 (1985) (referring to the "tradition of safeguarding only the *pecuniary* rights of a copyright owner" in the United States).

n316 See, e.g., Lawrence Adam Beyer, *Intentionalism, Art, and the Suppression of Innovation: Film Colorization and the Philosophy of Moral Rights*, 82 NW. UNIV. L. REV. 1011, 1071 (1988).

n317 See 17 U.S.C. § 302(a) (listing duration of copyright for various types of work); Eldred v. Ashcroft, 537 U.S. 186, 219 (2003) (upholding constitutionality of Copyright Term Extension Act, which extended the duration of most copyrights to the life of the author plus seventy years).

n318 VARA does not conflict with this aspect of copyright law, as it provides that its rights do not extend beyond the life of the author. 17 U.S.C. § 106A(d)(1).

n319 See *supra* note 307.

n320 But see NEIL WEINSTOCK NETANEL, COPYRIGHT'S PARADOX 216 (2008) (arguing that limited moral rights protections in the United States would enhance rather than detract from First Amendment values).

n321 See, e.g., *Mattel, Inc. v. MCA Records, Inc.*, 296 F.3d 894 (9th Cir. 2002) (holding that the use of the Barbie trademark in a song lampooning Barbie qualified as a non-commercial use under FTDA and therefore did not dilute the Barbie mark); *Mattel, Inc. v. Walking Mountain Prods.*, 353 F.3d 792 (9th Cir. 2003) (holding that the use of the Barbie trademark in photographic works of parody did not dilute or infringe).

n322 See *infra* notes 361-369 and accompanying text (analyzing constitutionality of dilution as a restriction on commercial speech).

n323 See, e.g., Mary LaFrance & Gail H. Cline, *Identical Cousins?: On the Road with Dilution and the Right of Publicity*, 24 SANTA CLARA COMP. & HIGH TECH. L. J. 641, 642-645 (2008) (discussing the parallels between dilution law and the right of publicity); Dogan & Lemley, *supra* note 89, at 1197-1200 (same).

n324 Compared to state law claims for dilution, state laws regarding the right of publicity are much less uniform. Moreover, there is no federal cause of action for infringement of the right of publicity. Therefore, although generalizations can be made about this tort, based on the rules adopted in the majority of states that recognize the cause of action, its application varies widely, depending on the jurisdiction.

n325 See RESTATEMENT (THIRD) OF UNFAIR COMPETITION § 47 (1995) (defining such "purposes of trade" relevant for the right of publicity claim); *Zacchini v. Scripps-Howard Broad. Co.*, 433 U.S. 562, 575 (1977) (holding that news broadcast of plaintiff's performance as a "human cannonball" violated plaintiff's right of publicity); *White v. Samsung Elecs. Am., Inc.*, 971 F.2d 1395, 1399 (9th Cir. 1992) (holding that use of a female-shaped robot in defendant's advertisement violated plaintiff's right of publicity); *Haelan Labs v. Topps Chewing Gum*, 202 F.2d 866, 868 (2d Cir. 1953) (recognizing a baseball player's right of publicity in his image); *Martin Luther King, Jr., Ctr for Social Change, Inc. v. Am. Heritage Prod., Inc.*, 296 S.E.2d 697, 702-03 (Ga. 1982) (holding that the manufacture and sale of plastic busts of Dr. Martin Luther King violated right of publicity held by Dr. King's heirs).

n326 See Dogan & Lemley, *supra* note 89, at 1180-84 (discussing moral rights theory underlying the right of publicity).

n327 See *White*, 971 F.2d at 1399 (holding that the defendant's advertisement, when viewed as a whole, violated Vanna White's right of publicity); see also Stacey L. Dogan, *An Exclusive Right To Evoke*, 44 B.C. L. REV. 291, 292 n.7 (2003) (discussing the *White* case).

n328 See *supra* notes 306-312 and accompanying text.

n329 See *supra* notes 313-316 and accompanying text.

n330 See, e.g., Sheldon Halpern, *The Right of Publicity: The Maturation of an Independent Right Protecting the Associative Value of Personality*, 46 HASTINGS L.J. 853, 873 (1995) ("There is, at bottom, recognition of the fact that there is something wrong, a manifest 'unfairness,' when one person seeks to trade on the personality of another. The right of publicity is the means to address and ameliorate that wrong."); but see Dogan & Lemley, *supra* note 89, at 1181-83 (critiquing "labor and unjust enrichment rationales" for the right of publicity).

n331 See Dogan & Lemley, *supra* note 89, at 1181-82 ("Even assuming that human dignity includes the right to prevent people from making true statements about you to sell a commercial product, it fits uneasily with a right of publicity that is only rarely about preventing such uses and almost always about maximizing the celebrity's profit from them.")

n332 Statutory damages are commonly available under right of publicity statutes. See, e.g., CAL. CIV. CODE § 3344(a) (West 2012) (providing for relief in the form of statutory damages of \$ 750 or actual damages, whichever is greater); WASH. REV. CODE. § 63.60.060(2) (2011) (providing for relief in the form of statutory damages of \$ 1500 or actual damages, whichever is greater); OHIO REV. CODE ANN. § 2741.07(A)(1)(a)&(b) (West 2011) (providing for relief in the form of statutory damages of \$ 2,500-\$ 10,000 or actual damages, at plaintiff's election). At least at common law, the right of publicity may also require proof of harm as an element of the cause of action. See, e.g., Slivinsky v. Watkins-Johnson Co., 270 Cal. Rptr. 585, 590 (Cal. App. 1990) ("Resulting injury is the *sine qua non* of a cause of action for misappropriation of name."); Cohen v. Facebook, Inc., 798 F. Supp. 2d 1090, 1097 (N.D. Cal. 2011) (same).

n333 See 15 U.S.C. § 1125(c)(1) (providing for injunctive relief when plaintiff proves likelihood of dilution); 15 U.S.C. § 1125(c)(5)(B)(i)&(ii) (providing for damages and potentially attorney fees when defendant's conduct is "willful"); see also CAL. BUS. & PROF. CODE §§ 14247(a) & (b) (West 2008) (providing for injunctive relief; damages available only when defendant's conduct is willful).

n334 See, e.g., OHIO REV. CODE ANN. § 2741.04 (West 2011) ("The right of publicity in an individual's persona is freely transferable and descendible. . ."); WASH. REV. CODE. § 63.60.030(1) (2011) (right of publicity "shall be freely transferable, assignable, and licensable, in whole or in part"); TENN. CODE ANN. § 47-25-1103(b) (2012) (right of publicity is "freely assignable and licensable"); NEV. REV. STAT. § 597.800(1) (2011) (right of publicity is "freely transferable"); IND. CODE § 32-36-1-16 (2012) (right of publicity is "freely transferrable and descendible, in whole or in part").

n335 Both naked licenses and assignments in gross (transfers of interest in a trademark without the accompanying goodwill) are considered forms of trademark abandonment. See 15 U.S.C. § 1060(a)(1) (allowing trademarks to be assigned "with goodwill"); *In re XMH Corp.*, 647 F.3d 690, 697 (7th Cir. 2011) ("A trademark owner . . . might delegate so much responsibility to the service provider as to lose the right or power to assure the quality of the trademarked brand, and then he would lose the trademark. . ."); *Twentieth Century Fox Film Corp. v. Marvel Enterprises, Inc.*, 277 F.3d 253, 259 (2d Cir. 2002) (noting that the licensor of a trademark must "maintain some control over the quality of the licensed property . . . or risk abandonment of its mark"); *Tumblebus, Inc. v. Cranmer*, 399 F.3d 754, 764-65 (6th Cir. 2005) (noting that one method for abandoning the trademark is through "naked licensing"); *Marshak v. Green*, 746 F.2d 927, 929-30 (2d Cir. 1984) (observing that courts have not allowed trade names or marks to be validly assigned in gross); but see Calboli, *The Sunset of Quality Control*, *supra* note 83, at 384 (arguing that recent practices involving assignments or licenses-back "profoundly deviate[] from the traditional view of trademark law"); Calboli, *Trademark Assignment with Goodwill*, *supra* note 83, at 774 (noting that "trademark practices have traditionally provided instruments to minimize, if not legally overcome, the effects" of the rule against assignment in gross).

n336 15 U.S.C. § 1125(c)(1) (2006).

n337 *Citizens United v. FEC*, 130 S. Ct. 876, 900 (2010) (holding that "political speech does not lose First Amendment protection 'simply because its source is a corporation'" (citation omitted)). The Court observed that "[c]orporations and other associations, like individuals, contribute to the 'discussion, debate, and the dissemination of information and ideas' that the First Amendment seeks to foster." *Id.* (internal quotations omitted); *see also id.* at 904 ("Political speech 'is indispensable to decisionmaking in a democracy, and this is no less true because the speech comes from a corporation rather than an individual.'" (internal quotations omitted)).

n338 *Id.* at 930 (Stevens, J., dissenting); *see generally* Randall P. Bezanson, *No Middle Ground? Reflections on the Citizens United Decision*, 96 IOWA L. REV. 649 (2011) (critiquing the *Citizens United* decision).

n373 *See supra* text accompanying notes 168-171.

n374 *Levi Strauss & Co. v. Abercrombie & Fitch Trading Co.*, 633 F.3d 1158 (9th Cir. 2011).

n375 Attachment A, appended to the end of this article, reproduces a photo of the parties' respective designs that was attached to the court's opinion in this case.

n376 *See supra* notes 97-105 and accompanying text (discussing empirical evidence of dilution and the limitations of that evidence).

n377 *See Am. Home Prods. Corp. v. Barr Labs., Inc.*, 834 F.2d 368, 371 (3d Cir. 1987) ("A response that one 'associates' a given product with the name of a competitive product may simply reflect the recognition that the two products are competitive and serve the same purpose.").

n378 *See supra* text accompanying notes 168-171 (describing evolution of substantial similarity standard under the TDRA).

n379 Professor Stacey Dogan has made this point as well: "[T]he public frequently benefits when a new market entrant uses product trade dress to evoke the strong trade dress of an entrenched market participant. So long as there is no confusion, however, the evocation serves an important public policy goal of market competition. With dilution protection for trade dress, some of this desirable activity might subside." Dogan, *supra* note 327, at 317; *see also* Robert G. Bone, *A Skeptical View of the Trademark Dilution Revision Act*, 11 INTELL. PROP. L. BULL. 187, 196-98 (2007) (criticizing TDRA for extending dilution protection to trade dress); Paul Heald, *Sunbeam Products, Inc. v. The West Bend Co.: Exposing the Malign Application of the Federal Dilution Statute to Protect Product Configuration*, 5 J. INTELL. PROP. L. 415, 423-24 (1998) (arguing that the FTDA should not be construed to apply to trade dress).

n380 For example, when Wallace Silversmiths claimed trade dress infringement of its Grand Baroque silverware pattern, it was not allowed to enjoin a competitor from producing similar-looking (although not identical) silverware, because the design was deemed aesthetically functional. The court reasoned that Wallace could not "exclude competitors from using those baroque design elements necessary to compete in the market for baroque silverware. It is a first principle of trademark law that an owner may not use the mark as a means of excluding competitors from a substantial market." *Wallace Int'l Silversmiths, Inc. v. Godinger Silver Art Co., Inc.*, 916 F.2d 76, 81 (2d Cir. 1990).

n381 *Id.*

n382 *Id.* at 81; *see also* *TraFFix Devices, Inc. v. Marketing Displays, Inc.*, 532 U.S. 23, 33 (2001) (noting that "[i]t is proper to inquire into a 'significant non-reputation-related disadvantage' in cases of esthetic functionality"); *Qualitex Co. v. Jacobson Prods. Co., Inc.*, 514 U.S. 159, 170 (1995) ("The 'ultimate test of aesthetic functionality' . . . 'is whether the recognition of trademark rights would significantly hinder competition.'"); *Christian Louboutin S.A. v. Yves Saint Laurent Am. Holdings, Inc.*, 2012 WL 3832285 at *9 (2d Cir. 2012) (noting that "Lanham Act protection does not extend to configurations of ornamental features which would *significantly* limit the range of competitive designs available") (citation omitted).

n383 *See Wallace*, 916 F.2d at 77 (noting that defendant admitted its designers were "inspired by and aware of" plaintiff's design).

n384 *See supra* text accompanying notes 236-238 (discussing comparative advertising fair use defense to claims of trademark infringement and dilution).

n385 The record in the *Starbucks* case demonstrated that defendant's intent in choosing the Charbucks mark was at least in part a desire to convey a message of comparative advertising. The Second Circuit characterized the Charbucks logo as a "beacon to identify Charbucks as a coffee that competes at the same level and quality as Starbucks in producing dark-roasted coffees." *Starbucks Corp. v. Wolfe's Borough Coffee, Inc.*, 588 F.3d 97, 113 (2d Cir. 2009).

n386 See generally Leah Chan Grinvald, *Shaming Trademark Bullies*, 2011 WISC. L. REV. 625 (2011); Kenneth L. Port, *Trademark Extortion: The End of Trademark Law*, 65 WASH. & LEE L. REV. 585 (2008); Kevin Greene, *Abusive Trademark Litigation and the Incredible Shrinking Confusion Doctrine -- Trademark Abuse in the Context of Entertainment Media and Cyberspace*, 27 HARV. J. L. & PUB. POL'Y 609 (2004); see also Desai & Rierison, *supra* note 17, at 1834-42 (discussing problems caused by over-policing of trademarks).

n387 See Long, *supra* note 340, at 1031 (acknowledging that "[i]t could well be the case that dilution law is a powerful bargaining chip in cease-and-desist letters and in negotiations outside the legislative arena").

n388 Desai & Rierison, *supra* note 17, at 1839-40.

n389 CHILLING EFFECTS, <http://chillingeffects.org/>.

n390 *Pork Board has a Cow Over Slogan Parody*, CHILLING EFFECTS, <http://chillingeffects.org/trademark/notice.cgi?NoticeID=6418> (letter from National Pork Board attorneys Faegre & Benson to The Lactivist Breastfeeding Blog, dated January 30, 2007). The letter also contains a somewhat humorous claim of dilution by tarnishment: "[Y]our use of this slogan also tarnishes the good reputation of National Pork Board's mark in light of your apparent attempt to promote the use of breastmilk beyond merely for infant consumption, such as with the following slogans on your website in close proximity to the slogan 'The Other White Milk': 'Dairy Diva,' 'Nursing, Nature's Own Breast Enhancement,' 'Eat at Mom's, fast-fresh-from the breast,' and 'My Milk is the Breast.'" *Id.*

n391 *Id.*

n392 15 U.S.C. § 1125(c)(5)(B)(i) (2006).

n393 The ambiguousness of the term "famous" itself makes it difficult to predict when a plaintiff may be entitled to sue under the TDRA, and hence even the holders of marks that are unlikely to qualify as famous may credibly threaten suit under the Act. Although the TDRA was supposed to codify a fame standard solely for marks that qualify as "household names," *see, e.g.*, Nissan Motor Co. v. Nissan Computer Corp., 378 F.3d 1002, 1011 (9th Cir. 2004), some of the trademarks that have been deemed "famous" under this Act objectively do not seem to meet this standard. *See, e.g.*, New York City Triathlon, LLC v. NYC Triathlon Club, Inc., 2010 WL 808885, *10 (S.D.N.Y. 2010); Dallas Cowboys Football Club, Ltd. v. America's Team Props., Inc., 616 F. Supp. 2d 622, 643 (N.D. Tex. 2009); Univ. of Kansas v. Sinks, 644 F. Supp. 2d 1287, 1307 (D. Kan. 2008); Harris Research, Inc. v. Lydon, 505 F. Supp. 2d 1161, 1166 (D. Utah 2007).

n394 *Pork Board has a cow over slogan parody*, CHILLING EFFECTS, <http://chillingeffects.org/trademark/notice.cgi?NoticeID=6418>.

n395 *See, e.g.*, Super Duper, Inc. v. Mattel, Inc., 2010 WL 2340250, *5-6 (4th Cir. 2010) (affirming district court's award of \$ 2,643,844.15 in attorney fees in case of "willful dilution").

n396 KWALL, *supra* note 240, at xiii.

n397 *Id.*

n398 Whether an automatic presumption of irreparable harm should persist in trademark infringement cases, in light of the Supreme Court's decision in eBay v. MercExchange, LLC, 547 U.S. 388 (2006), doing away with such presumptions in the patent infringement context is an interesting question which is beyond the scope of this article. *See* Sandra L. Rierison, *IP Remedies After eBay: Assessing the Impact on Trademark Law*, 2 AKRON INTELL. PROP. J. 163 (2008) (questioning the justification for a presumption of irreparable harm after *Ebay*).

n399 Although various names have been given to this type of tort (for example, "disparagement of property, slander of goods, commercial disparagement, and trade libel") it is "now generally referred to as injurious falsehood." *Bacchus Indus., Inc. v. Arvin Indus., Inc.*, 939 F.2d 887, 892 (10th Cir. 1991) (internal quotations omitted). A person is liable for the tort of injurious falsehood (and plaintiff's resulting damages) if she (1) "publishes a false statement harmful to the interests of another"; (2) "intends for publication of the statement to result in harm to interests of the other having a pecuniary value, or either recognizes or should recognize that it is likely to do so"; and (3) "knows that the statement is false or acts in reckless disregard of its truth or falsity." RESTATEMENT (SECOND) OF TORTS § 623A; *see also* W. KEETON, D. DOBBS, R. KEETON & D. OWEN, PROSSER AND KEETON ON THE LAW OF TORTS 963-64 (5th ed. 1984).

n400 See *supra* text accompanying notes 168-171 (describing evolution of substantial similarity standard under the TDRA).

n401 See Dogan, *supra* note 327, at 319 (arguing that "[e]xtending dilution rights to all marks bearing any associational relationship to famous ones exceeds the narrow objectives of the [FTDA], at a significant societal cost").

n402 15 U.S.C. § 1125(c)(1) (2006).

n403 See *supra* note 189 and accompanying text.

n404 Technically, this change to the Act would require deleting § 1125(c)(4), discussing the burden of proof in trade dress dilution cases, and adding trade dress claims to the list of exclusions in § 1125(c)(3).

n405 See *Cent. Hudson Gas & Elec. Corp. v. Pub. Serv. Comm'n of New York*, 447 U.S. 557, 565 (1980) ("[T]he First Amendment mandates that speech restrictions be 'narrowly drawn.'") (citations omitted).

n406 *Tommy Hilfiger Licensing, Inc. v. Nature Labs*, 221 F. Supp. 2d 410, 414 (S.D.N.Y. 2002) (emphasis added); see also *Harley Davidson, Inc. v. Grottanelli*, 164 F.3d 806, 813 (2d Cir. 1999) (noting that parodies "often lie within the substantial constitutional protection accorded noncommercial speech and may thus be the subject of liability only in the most narrow circumstances" (quoting RESTATEMENT (THIRD) OF UNFAIR COMPETITION § 25, cmt. i (1995))). Professor Lisa Ramsey has also argued that courts have a duty to "attempt to resolve any conflict between trademark law and the First Amendment by interpreting trademark claims narrowly and trademark defenses broadly in ways that protect expression." Ramsey, *supra* note 360, at 448; see also *id.* at 447-50 (discussing "contextual, speech-protective interpretations of trademark law").

n407 See *Cent. Hudson Gas & Elec. Corp. v. Pub. Serv. Comm'n of New York*, 447 U.S. 557, 561 (1980) ("The First Amendment, as applied to the States through the Fourteenth Amendment, protects commercial speech from unwarranted governmental regulation."); *New York State Rest. Ass'n v. New York City Bd. of Health*, 556 F.3d 114, 131 (2d Cir. 2009) ("[C]ommercial speech is entitled to the protection of the First Amendment."); *El Dia, Inc. v. Puerto Rico Dept. of Consumer Affairs*, 413 F.3d 110, 115-17 (1st Cir. 2005) (analyzing government regulation of commercial speech under *Central Hudson* test). See also *supra* notes 346-369 and accompanying text.

n408 *See* L.L. Bean, Inc. v. Drake Publishers, Inc., 811 F.2d 26, 30 n.2 (1st Cir. 1987) (noting that "[w]hen judicial enforcement of private personal rights touching forms of communication restricts freedom of speech, state action is implicated," in the context of analyzing trademark dilution claim); *see also* New York Times v. Sullivan, 376 U.S. 254, 265 (1964).

n409 15 U.S.C. § 1125(c)(2)(b) (2006).

n410 *See generally* Beebe, *supra* note 62 (discussing multi-factor balancing test for likelihood of confusion).

n411 15 U.S.C. § 1125(c)(1).

n412 V Secret Catalogue, Inc. v. Moseley, 605 F.3d 382, 388 (6th Cir. 2010).

n413 *Id.*; *see supra* notes 180-185 and accompanying text.

n414 *See, e.g.,* Conopco, Inc. v. Campbell Soup Co., 95 F.3d 187, 194-95 (2d Cir. 1996) (holding that any party must provide "evidence of fraud or bad faith" to recover attorney's fees under the Lanham Act); *but see* Scotch Whisky Ass'n v. Majestic Drilling Co., Inc., 958 F.2d 594, 599-600 (4th Cir. 1992) (holding that prevailing plaintiff must prove bad faith to recover attorney's fees in trademark infringement action, but prevailing defendant need not prove bad faith to demonstrate entitlement to fees).

n415 15 U.S.C. § 1125(c)(5) (2006).

n416 15 U.S.C. § 1117(a).

n417 What would constitute "bad faith" in the context of a trademark dilution suit is itself somewhat unclear. In the trademark infringement context, courts have defined bad faith as conduct that is "malicious, wanton, oppressive, or opprobrious." *Stephen W. Boney, Inc. v. Boney Servs., Inc.*, 127 F.3d 821, 825 (9th Cir. 1997). The key distinction between the current standard, which allows for enhanced penalties in cases of willful attempts to "trade on the recognition of the famous mark," 15 U.S.C. § 1125(c)(5)(B)(i), and "bad faith," would be the nature of the targeted intent. As discussed above, many if not most dilution defendants attempt to profit by making referential use of a famous mark, often by tapping into its expressive meaning. Bad faith should require proof of much more. Presumably, bad faith would entail a deliberate effort to undermine the famous mark's ability to identify the mark holder's goods or services. How a defendant could accomplish such a goal, without creating a likelihood of consumer confusion, is unclear. The possibility of bad faith is perhaps more evident in the context of a claim for dilution by tarnishment. The current statute targets the willful intent to "harm the reputation of the famous mark." 15 U.S.C. § 1125(c)(5)(B)(ii). Requiring a showing of bad faith would target defendants who deliberately attempt to injure the mark holder by implying association with offensive matter that has no connection to them or their goods and services, without the intent to criticize the famous trademark or the mark holder. By contrast, a defendant could attempt to harm the mark holder's reputation because the defendant could in fact believe that the reputation was unearned or undeservedly positive.

ARTICLE: THE RELATIONAL CONTINGENCY OF RIGHTS

NAME: Gideon Parchomovsky* and Alex Stein**

BIO: * Robert G. Fuller, Jr. Professor of Law, University of Pennsylvania Law School & Professor of Law, Bar Ilan University Faculty of Law, Israel.

** Professor of Law, Benjamin N. Cardozo School of Law, Yeshiva University. We thank Jade Allamby, Ian Ayres, Shyam Balganesh, Avi Bell, Yitzhak Benbaji, Rick Bierschbach, Guyora Binder, Miriam Bitton, Deborah Cantrell, Howard Chang, Bob Cooter, Joe Curran, Hadar Dancig-Rosenberg, Ben Depoorter, Michael Diamond, Miranda Fleischer, Erik Gerding, Mark Gergen, Myriam Gilles, Lisa Kern Griffin, Deb Gruen, Alon Harel, Erica Hashimoto, Adam Hirsch, Peter Huang, Osnat Jacobi, Jay Kesten, Derek Kiernan-Johnson, Greg Klass, Alexandra Lahav, Lisa Laplante, Adi Libson, Shahar Lifshitz, Jake Linford, Scott Moss, Jacob Nussim, Paul Ohm, Oren Perez, David Rosenberg, Barak Richman, Dan Rubinfeld, Maisie Rubinstein, Karen Sandrik, Gidi Sapir, Suzanne Scotchmer, Mark Seidenfeld, Benny Shmueli, Lawrence Solum, Girardeau Spann, Mark Spottswood, David Super, Josh Teitelbaum, Tom Ulen, Manuel Utset, Phil Weiser, Steven Wilf, Hannah Wiseman, and participants in workshops and seminars at the Twenty-Second American Law & Economics Association Annual Meeting, Bar-Ilan University School of Law, University of California, Berkeley, School of Law, University of Colorado Law School, University of Connecticut School of Law, Florida State University Law School, Georgetown University Law Center, and University of Pennsylvania Law School for helpful comments and suggestions. We are especially indebted to Maggie Lemos, Dan Markel, and Peter Siegelman for their invaluable contributions to previous drafts. Finally, we are grateful to Mario Lucero for outstanding research assistance.

LEXISNEXIS SUMMARY:

... Several leading scholars of Law and Economics have devised stylized models that analyze asymmetric litigation costs and their effect on settlements. ... As a consequence, certain entitlement holders will find themselves helpless in the face of meritless, and oftentimes downright extortionary, claims. ... The wellbeing theories of rights maintain that the state's allocation of freedoms and property-related entitlements across individuals determines what those individuals can and cannot enjoy as they go about their lives. ... Society's need to subsidize rights thus unravels the classic distinction between the so-called "negative rights" that fend off interference with the rights' holders and the so-called "positive rights" to welfare. ... According to widely held intuition, such entitlements are tantamount to a dead letter of the law unless they are sufficiently similar to each other to be consolidated into a class action - a proceeding that utilizes economies of scale and transforms many negative-value suits into a single action with a positive net value. ... First, they have to incur search and verification costs to ensure adequate representation. ... Absent proactive mechanisms that level the playfield between insurance companies and insured, the companies will use their cost advantage to force the insured

to forego the vindication of their rights in court and accept instead a cheap out-of-court settlement. ... Specifically, we will consider the options of increased court fees, fee-shifting rules, subsidization of disadvantaged litigants, and the intensified use of punitive damages, "bad faith," "unclean hands" and other equitable doctrines. ... As we explained, strategic litigants take advantage of differential cost structures to extort unmeritorious payments from entitlement holders.

TEXT:

[*1314]

Introduction

CONTRARY to conventional wisdom, in this Article we contend that all rights are relationally contingent. As we demonstrate, whether a right - indeed, any legal entitlement - is realizable will always critically depend on the relationship between two variables: (1) the cost a rightsholder would need to incur to vindicate the right; and (2) the cost faced by a challenger who wishes to attack and ultimately eliminate the right. In the real world, rights are meaningful only when the cost of protecting them is lower than the cost of attacking them. When the converse is true, the right becomes ineffective: it ceases to protect the rightsholder's underlying interest. The cost of challenging a right is not uniform for all potential challengers, but rather varies dramatically across the population. The rightsholder's cost of defending a right, on the other hand, remains constant. Consequently, rights will avail against certain challengers, but not against others. Or, succinctly put: rights are always relationally contingent. Furthermore, we show that the relational contingency of rights dominates all other factors that determine whether a rightsholder will realize her entitlement. When an entitlement is cheaper to attack than to vindicate, its holder will not be able to realize it.

To illustrate, consider the following examples. Assume that Brutus Inc., the owner of a large residential building, violates Anne's right of quiet enjoyment. Anne places a value of \$ 3000 on that right. However, it will cost her \$ 5000 to hire a lawyer and take legal action against the owner. Brutus Inc., by contrast, has a retainer agreement with a law firm. The firm is well versed in landlord-and-tenant law and can handle suits expeditiously. Consequently, Brutus Inc.'s expected cost of defense is only \$ 1000. Under these circumstances, Anne will choose to refrain from commencing legal action against Brutus Inc.

Diane suffers from ongoing discrimination by her employer. Unfortunately for Diane, employment discrimination suits are notoriously expensive to prosecute. The cost of the average suit is \$ 40,000. Diane's harm exceeds that amount. Diane estimates the harm at \$ 50,000, which means that her claim has a net value of [*1315] \$ 10,000. Her employer, on account of various economies of scale and scope, can litigate the case at \$ 30,000. Taking advantage of Diane's much higher litigation expenditures, the employer can offer her to settle her claim for \$ 20,000. If Diane is rational, she will agree; settling the case will guarantee her a net payoff of \$ 20,000, as opposed to the \$ 10,000 she will get from litigation.

Finally, consider the case of Ian, who has just received an ominous letter from Proprietary Images Inc., accusing him of a copyright infringement. Proprietary Images further informs Ian that the Copyright Act entitles successful plaintiffs to statutory damages of up to \$ 150,000 ⁿ¹ and then proceeds to offer him to settle the case out-of-court for the modest amount of \$ 3000. Ian is outraged by what he believes to be a baseless accusation, as he has a valid fair-use defense that he can prove in court. To do so, however, Ian would have to expend \$ 10,000 on legal representation. Hence, acting rationally, he will elect to accept Proprietary Images's settlement offer and forego litigation. ⁿ²

We can now formulate the conditions that allow a challenger who enjoys a litigation-cost advantage over the rightsholder to force the rightsholder into a settlement agreement that will surrender her entitlement or part thereof. The challenger will succeed at forcing out this surrender when the entitlement, net of the enforcement cost, yields the rightsholder a positive amount that exceeds the challenger's cost of attacking the entitlement. To illustrate, when Rita values her legal entitlement at \$ 10,000 and it costs her \$ 6000 to protect the entitlement in court, Carl will be able to challenge the entitlement and force Rita to give it up so long as he keeps his litigation expenses below \$ 4000. Notably,

Carl would not [*1316] be able to extort a similar settlement if Rita were to expend \$ 12,000 on vindicating her entitlement in court, which would make the net value of the entitlement \$ 2000 (a negative sum). However, Carl would be able to violate Rita's entitlement with impunity, a much worse outcome for those who believe that rights are an important legal and social institution.

An interesting and counter-intuitive result that emerges from our core claim is that sometimes negative value entitlements - that is, entitlements that cost more to defend than the value they yield to their holder - will nonetheless afford effective protection to their holders. Consider a person who values a certain right at \$ 5000. Assume that it would cost her \$ 7000 to vindicate the right in court. The right thus has a value of \$ 2000, which may lead one to conclude that this right is meaningless in the real world since it is not cost-effective for the entitlement holder to defend it in court.ⁿ³ Surprisingly, this cost structure on its own does not make the entitlement worthless or meaningless. The entitlement may prove both valuable and effective if the cost of challenging it is, say, \$ 10,000 and the expected return to the challenger is only \$ 6000. The net return from challenging the entitlement (\$ 4000) would fend off the challenger. Importantly, this negative sum also does not allow the challenger to pose a credible threat of litigation to the rightsholder.ⁿ⁴ The reason is simple: although the entitlement is costly to [*1317] defend, it is even costlier to attack, and the challenger therefore cannot rationally deliver on his threat to litigate. Under such circumstances, the entitlement will stay unchallenged and its holder will be able to realize it.

At this point, it is important to emphasize that our thesis about the relational contingency of rights addresses a completely different set of issues than Wesley Newcomb Hohfeld's famous scheme of "jural relations."ⁿ⁵ Both schemes allude to relationality, but each of them addresses a jurisprudentially distinct phenomenon. Hohfeld's scheme lays out the analytics of jural relations with a view to achieve conceptual clarity of diverse entitlements, generically identified as "rights."ⁿ⁶ Elaborating on the distinction between rights in personam - those that avail against a specific person - and rights in rem - those that avail against the rest of the world - Hohfeld suggested that rights in rem can be understood as aggregations of the underlying in personam rights. This characterization suggests that all rights - whether in personam or in rem - define people's jural relations as individual units.ⁿ⁷

Our core insight is very different. Unlike Hohfeld, we are not interested in rights as abstract legal concepts. Rather, we are interested in the way they operate in practice. Furthermore, Hohfeld's analysis was formal in nature in that it was confined to the legal specification of rights. We, by contrast, are not interested in the formal recognition of rights by the lawmaker, but rather in the ways rights and entitlements operate in real-world settings. For us, the act of formal recognition is a mere starting point. In fact, we show that formal legal recognition often falls short of affording meaningful protection to entitlement holders.

Our thesis also markedly differs from Marc Galanter's classic examination of how wealth disparities affect court decisions and, in particular, the formation of legal precedent. Galanter famously [*1318] showed that well-to-do litigants are able to achieve favorable outcomes in court and take the law in their desired direction due to the fact that they can afford superior legal representation.ⁿ⁸ The focal point of our inquiry is different. We focus on vindication and loss of entitlements that occur outside the courtroom.

This pivotal difference is best illustrated by cases in which the entitlement's vindication requires no assistance from courts. In any such case, the entitlement holder will realize her entitlement unilaterally: when the entitlement allows her to build a house, she will go ahead and build the house; when the entitlement permits her to rescind her contractual obligation, she will go ahead and rescind the obligation; and when the entitlement authorizes her to use another person's copyrighted work, she will go ahead and use the work. The entitlement's potential challenger will not be able to counter the holder's unilateral action by taking the case to court when the cost of doing so exceeds his expected return.

Oftentimes, an entitlement will be cheap to attack but costly to vindicate. This cost asymmetry will turn the entitlement into a dead letter of the law, viable in theory but unrealizable in practice. Asymmetric litigation costs that make entitlements unrealizable will be present whenever one of the litigants benefits from economies of scale or scope. For any such litigant, the marginal expenditure on every lawsuit drops as the number of cases increases. This condition

obtains for many large corporations, for the government, and for other repeat litigants. These litigants retain legal representation for a fixed amount that reflects the declining cost. When any of them confronts an opponent with no parallel ability to economize on the litigation costs, it will usually be able to eradicate the opponent's entitlement. The three examples with which we opened our discussion show how this deleterious dynamic unfolds. In each of those examples, a wealthy firm utilizes economies of scale and scope to destroy the legal entitlement of its weaker opponent.

In this Article, we seek to make four novel contributions to the theory of entitlements. Our first and least ambitious goal is to bring together two important threads in entitlement literature: economic analysis of entitlements and deontological accounts of rights. These [*1319] two threads coexist alongside one another without meaningful interaction. Several leading scholars of Law and Economics have devised stylized models that analyze asymmetric litigation costs and their effect on settlements.ⁿ⁹ These models demonstrated that a party with lower litigation costs can extort a favorable settlement from his opponent - a consequence that sometimes does and sometimes does not erode society's welfare.ⁿ¹⁰ This economic analysis has been highly abstract, insular and divorced from the broader jurisprudential context of legal rights. Critically, it paid no attention to the special role that rights play in our society as protectors of individuals' worth and wellbeing.

Deontological accounts of rights likewise suffer from isolationism. These accounts examine the nature, content, and justifications of rights from different philosophical perspectives.ⁿ¹¹ Collectively, they develop a broad and illuminating vision of rights as an important social institution.ⁿ¹² This vision underscores rights' role as constraining society's utilitarian pursuits, trumpeting rights as trumps.ⁿ¹³ Yet, deontological accounts pay virtually no attention to the economics of rights' enforcementⁿ¹⁴ and overlook the destructive effect of asymmetric litigation costs on entitlements. This oversight undermines these accounts' practical viability.

The holistic approach we adopt in this Article enables us to draw on the powerful insights of each of these bodies of literature and develop a more complete understanding of rights and their ability to promote social goals and values.

Our second contribution is conceptual. We demonstrate that, contrary to the conventional wisdom among rights theorists, all rights and entitlements are contingent in nature. Rights provide effective [*1320] protection to their holders only when they are cheaper to defend than to attack. When a right's challenge costs less than its vindication, the right's promised protection fades away up to the point of non-existence. Consequently, legal recognition of rights and other entitlements will result in no protection in some extreme cases and in full protection against all potential takers in other rare cases, while in the majority of cases its effect will be an effective protection against some takers and no protection against others. This critical insight is analytically robust and independent of the way in which legislatures and courts define and construe rights and entitlements.

Third, and relatedly, we show that in certain types of cases, the effects of asymmetric litigation costs are not randomly distributed across the population. Rather, they are systemic, favoring certain categories of litigants and disfavoring others. In such cases, asymmetric litigation costs often result in unrealizable entitlements: entitlements that are recognized de jure, but cannot be vindicated de facto. As a consequence, certain entitlement holders will find themselves helpless in the face of meritless, and oftentimes downright extortionary, claims. Or, if one prefers to look at it from the point of view of potential takers, it can be said that certain entitlements can be expropriated without their holders' consent and for an under-compensatory price. Worse yet, this phenomenon has regressive distributional effects because wealth and litigation expenditures are negatively correlated.ⁿ¹⁵ In addition to uncovering this systemic bias, we identify certain legal areas, both civil and criminal, in which it is prevalent.

Our fourth and final contribution is normative in nature. We propose several potential remedies that will protect entitlements against unmeritorious attacks by parties who enjoy a litigation cost [*1321] advantage. These remedies include fee shifting, punitive damages and special procedural safeguards. We explain each remedy's potential to level the litigation playfield and thereby afford better protection to entitlements. We also evaluate the relative strengths and weaknesses of each remedy, both in terms of its efficacy and in terms of its potential to be implemented. We conclude that the most promising solution resides in the revival and widespread use of equitable doctrines - misuse of rights,

unclean hands, and abuse of process - in combination with punitive damages. This set of remedies has the potential to deter strategic abuse of lower litigation costs and will go a long way toward restoring the integrity of rights.

Structurally, the Article unfolds as follows. In Part I, we review the economic and deontological accounts of rights and show how they both overlooked rights' intrinsic dependency on the cost of vindication as compared to the cost of challenge. In Part II, we present our core thesis that rights are relationally contingent and consequently prone to be taken over by expedient challengers. In Part III, we identify categories of cases in which this dynamic is pervasive as challengers with lower litigation costs can systematically force the weaker rightsholders into undeserved surrender of entitlements. In Part IV, we present several proposals for reform that aim at restoring the integrity of rights by weakening the power of parties with lower litigation costs. A short Conclusion follows.

I. Economic and Deontological Theories of Rights: A Critical Review

The principal difference between economic and deontological theories of rights can be summed in one sentence: deontological theories allocate entitlements to persons to protect intrinsic values of importance to the person, whereas economic theories match persons to entitlements in a way that maximizes aggregate wealth at any given time. Deontological theories are morality-driven endowers,ⁿ¹⁶ [*1322] while economic theories are welfare-oriented matchmakers.ⁿ¹⁷

For deontological theories, the key question is whether an individual deserves the entitlement in question. For economic theories, the key question is who is the entitlement's best user from a social welfare perspective. Deontological theories use moral desert as a sole criterion for determining entitlements and granting them to people. For economic theories, the sole criterion for identifying an entitlement's best user - an individual whose use of the entitlement will improve society's welfare - is utility.

As we will show, each theoretical approach, albeit for a different reason, overlooks the core insight that we identify in this Article as the relational contingency of rights. Deontological theories miss this insight because they end at the point at which the law recognizes legal entitlements. Deontologists do not look beyond this point and, consequently, do not consider the operation of entitlement-enforcing mechanisms. As a result, they fail to appreciate that a rightsholder will not be able to realize her entitlement against a challenger whose litigation costs are lower than hers.

Economic theories, by contrast, have no pre-set endpoint: for them, any entitlement is a fair game and a tradable unit in society's continual pursuit of welfare. For these theories, entitlements play no special role in cost-benefit tradeoffs carried out by policymakers and courts.ⁿ¹⁸ These theories consequently do not necessarily see special harm in the dissipation of legal entitlements whose owners cannot afford the cost of litigation against thrift challengers. We [*1323] posit, however, that dissipation of entitlements should not be a readily acceptable outcome even to efficiency scholars, as it brings about socially deleterious consequences. Economically minded scholars and policymakers should care about the relational contingency of rights.

In the following analysis, we develop these arguments in more detail. We first examine the relevant Law and Economics literature and then move to discuss the jurisprudential theories of rights.

A. Economic Literature

Economic theory, being amoral,ⁿ¹⁹ attributes no independent importance to rights as such. Economic literature uses the terms "rights" and "entitlements" interchangeably and does not define them with any particular degree of precision. For writers in the Law and Economics school of thought, legal entitlements are no more than bargaining "chips": legal commodities that can be bought or sold in the marketplace. The entitlements' content and meaning are of no consequence either. The only thing that matters is for entitlements to be clearly defined so as to make them fit for voluntary exchange.ⁿ²⁰ Indeed, voluntary exchange is the paramount value from an economic perspective, as it promotes allocative efficiency. More precisely, voluntary exchange ensures that entitlements gravitate to their

highest-value users in a process that is welfare enhancing. ⁿ²¹

With voluntary exchange being the norm, Law and Economics scholars view usurpations or takings of others' entitlements with disfavor. The reason is obvious: nonconsensual transfers can move entitlements to highest-value users only accidentally, rather than by design. More often than not, such transfers erode society's welfare [*1324] by benefiting encroachers who bypass the market. Thus, when X forcibly appropriates one of Y's rights, we cannot assume that the right is worth more to X than it is to Y. The only inference one can draw from these facts is that the net value of the right to X is positive, since otherwise he would not have appropriated it. But it is impossible to know whether X values the right more than Y, or vice versa. Voluntary transfers reveal information about the value the transacting parties ascribe to legal entitlements; involuntary transfers do not. ⁿ²²

Nonconsensual transfers not only suppress information about the value of entitlements; they also inflict substantive harm: the deprivation suffered by the rightsholder. Such deprivations would occur even in a world with perfect information about the entitlement's valuation by relevant actors. Self-interest maximizers will not hesitate to violate other peoples' entitlements when doing so improves their own utility. The rightsholders' deprivation would not affect the encroachers' decisions so long as they do not have to redress the loss or face criminal liability. Economically minded scholars consequently favor a legal regime that fends off nonconsensual transfers.

That said, legal entitlements make little difference for Law and Economics scholars. Consider the Coase Theorem, the progenitor of economic analysis of the law. ⁿ²³ In its strong form, this theorem stands for the proposition that entitlements do not matter. Under a more nuanced interpretation, it shows that in a world with perfect information and zero transaction costs, the efficient outcome will be reached irrespectively of the law's initial allocation of entitlements. ⁿ²⁴ Voluntary exchange will navigate entitlements to their most efficient users. ⁿ²⁵

[*1325] The mechanism envisioned by Coase en route to this economically happy end is voluntary exchange. Involuntary transfers, however, are capable of producing the same result. If there were a way to ensure that all involuntary transfers enhance welfare, Law and Economics champions would see no reason to oppose them. This worldview underlies the economic theory of efficient breach. ⁿ²⁶ Adherents of this theory see no harm in a breach of contract when it improves social welfare. ⁿ²⁷ As Professor Daniel Friedman astutely observed, it is but a small step from supporting efficient breaches to advocating efficient theft. ⁿ²⁸

Efficiency-minded scholars did not overlook the litigation cost asymmetry. Lucian Bebchuk, Steven Shavell, and other Law and Economics scholars have analyzed this phenomenon. ⁿ²⁹ Their analyses [*1326] demonstrated with rigor and precision that a party with lower litigation costs can secure a settlement more favorable than the one he would obtain under symmetrical costs. ⁿ³⁰ If that party is the plaintiff, the settlement amount he will recover from the opponent will exceed the expected value of the suit. If that party is the defendant, his settlement payment to the opponent will fall below the suit's expected value. ⁿ³¹ This outcome, however, is not inefficient in and of itself, as the savings in the trial costs may offset the overpayments and underpayments occasioned by extortionary settlements. ⁿ³²

Unfortunately, these important works have stopped short of analyzing the broader economic consequences of this phenomenon. An actor with a litigation cost advantage may abridge or altogether obliterate other people's entitlements when doing so is detrimental to welfare. Self-interest maximizers will tend to take advantage of rightsholders who cannot protect their entitlements in court at a comparable cost. Ex ante, therefore, asymmetrical litigation costs have a profoundly undesirable effect on society: they prompt actors with low litigation costs to bypass voluntary exchange, encroach on, or otherwise violate other people's entitlements and subsequently force these people - who must expend [*1327] more on litigation - into a full or partial surrender of their rights. This effect is far more severe than extortionary settlements.

Failure to attend to this broader issue is not the only shortcoming of the asymmetric-cost literature. This literature is highly abstract, insular and divorced from the broader jurisprudential context of legal rights. As a result, it pays no attention to the special role that rights play in our society as protectors of individuals' worth and wellbeing. This neglect

is not surprising: rights and other rudiments of analytical jurisprudence carry no weight in the Law and Economics literature. The economists' declination to take rights seriouslyⁿ³³ may well be the logical consequence of their all-encompassing cost-benefit tradeoffs.ⁿ³⁴ Yet, it puts the Law and Economics literature in tension with prevalent understanding of rights among jurists, courts, and laypeople as well.

The tension, or even disconnect, between the Law and Economics approach to rights and the prevalent conception thereof makes the former vastly incomplete, if not socially irrelevant. Our legal system is entitlement-based, and not accidentally so.ⁿ³⁵ The law grants people entitlements to protect their personhood,ⁿ³⁶ to secure their freedom to choose among different courses of action,ⁿ³⁷ to improve [*1328] their wellbeing,ⁿ³⁸ and to motivate their engagement in activities that benefit our society as a whole.ⁿ³⁹ Hence, when a person's entitlement cannot be actualized on account of high litigation costs, the underlying purpose of the entitlement is defeated as well. When an entitlement protects personhood and free choice, its unenforceability will make the person less autonomous, force her into insecurity, and might even cause her to experience unworthiness as a human being. When an entitlement protects its holders' wellbeing, its unavailability will erode the quality of the person's life. Finally, when an entitlement is designed to reward individuals who engage in a particular socially beneficial activity, its unavailability will deny individuals the benefit they labored to obtain and thereby compromise society's interest in encouraging individuals to pursue that activity. Furthermore, society's failure to redress the plight of the entitlement holder will incentivize encroachers who can litigate at a low cost to misappropriate others' entitlements instead of pursuing more productive activities.

B. Jurisprudential Literature

Theories of rights provide a useful vantage point for analyzing the effects of unrealizable entitlements. Theoretical writings on rights illuminate the importance of legal entitlements and the social benefits arising from their existence.ⁿ⁴⁰ Naturally, once an entitlement becomes unrealizable, the benefit it was supposed to generate is lost. Entitlements bring about diverse benefits, but the methodology [*1329] by which entitlements are identified stays invariant across different theories of rights and the ideologies they represent. Rights theorists compare a regime that recognizes and respects individuals' entitlements with one that does not. Theories associating entitlements with personhood, for example, emphasize the perniciousness of a rightless regime that exposes every individual to the omnipresent prospect of being used as a tool for promoting other people's goals.ⁿ⁴¹ Any such instrumentalization violates personhood by eroding the individual's intrinsic value as a human being. To forestall this erosion, the state must set up entitlements that will protect personhood.ⁿ⁴²

From another angle, autonomy-based theories of rights underscore the effect of entitlements on actors' freedom to choose the right course of action for themselves.ⁿ⁴³ In a world without legal rights, an actor's ability to form and act upon autonomous choices will crucially depend on the balance of power between her and other people whose interests clash with her endeavors. Other people may attempt to thwart the actor's endeavors or even coerce her into acting according to their will. Whether they will succeed in doing so will depend on how much power they have relative to the actor. The dependency on others and their decisions undermines the actor's self-governance and ability to live as a free individual. To free individuals of this dependency and grant them true freedom of choice, the state must grant individuals entitlements that will protect their autonomy.ⁿ⁴⁴

Another influential thread in the rights literature associates entitlements with their holders' wellbeing.ⁿ⁴⁵ The wellbeing theories of rights maintain that the state's allocation of freedoms and property-related [*1330] entitlements across individuals determines what those individuals can and cannot enjoy as they go about their lives. When rights are not recognized, an individual's ability to enjoy her freedoms and possessions will be severely compromised by the continual threat of their violation. Other individuals, and the state itself, may harbor interests and desires that conflict with the individual's freedoms and possessions and hence jeopardize her enjoyment of her freedom and property. If the threat is carried out, it will be damaging - sometimes even devastating - to the individual's wellbeing. To fend off this threat to the individual, the state must grant her entitlements that she can use as a shield against encroachments.

Finally, instrumental or consequentialist theories of rights emphasize the benefit of the rights' correlatives - namely,

the duties they impose on other people to act or avoid acting in a particular way.ⁿ⁴⁶ Under these theories, the state sets up entitlements to force or motivate the entitlements' subordinates (or duty bearers) to behave in a socially beneficial way.ⁿ⁴⁷ To this end, the state grants entitlements to its agencies and to private individuals. Those individuals are not the entitlements' ultimate beneficiaries. Rather, they receive their entitlements and the underlying proprietary and monetary rewards as an inducement to enforce the correlative duties of other people.ⁿ⁴⁸ Those individuals thus function as the state's agents and get their rewards in return.ⁿ⁴⁹ They are granted entitlements when private enforcement of the law is more cost-effective than public enforcement.ⁿ⁵⁰

[*1331] To illustrate the differences between these theories, consider a person who owns a house in which she lives. Assume that a trespasser takes over her house, drives her away and denies her the ability to use it. Under personhood-based theories of rights, when the state does not prevent the trespasser from encroaching and fails to remedy the wrong after its occurrence, it allows the trespasser to devalue the homeowner as a human being.

Autonomy-based theories highlight a different aspect of the homeowner's harm. By acting against the homeowner's will, the trespasser deprived her of the ability to make autonomous choices with regard to her property. The state's failure to redress the wrong further undermines the homeowner's self-governance.

Rights theories that put the premium on individual wellbeing will be concerned about the value the homeowner lost as a result of the deprivation she suffered. The state's failure to make her whole and reinstate her former status condones the erosion of her wellbeing.

Finally, consequentialist theories of rights would denounce the state's failure to intervene on the ground that it creates perverse economic incentives. The state's failure to protect property rights encourages intrusions of private property and induces excessive investment in private protection of property as well as suboptimal development of assets. This failure also dilutes the value of individuals' productive efforts and may even breed violence.ⁿ⁵¹

Our goal in this Article is not to determine which of the theories is normatively or descriptively superior.ⁿ⁵² Nor do we need to decide **[*1332]** which theory does a better job of capturing the harm occasioned by the denial of rights and entitlements. The only thing that is important for our purposes is the recognition that some distinct harm is inflicted whenever a person is denied her entitlement. Whether the main harm from the entitlement's denial comes from the erosion of the holder's personhood, autonomy, or wellbeing, or from the loss to society at large, is a question that need not be resolved here. All rights theorists agree that denial of rights invariably leads to harm, and we proceed from this premise as well.

The case of denial of a right, however, is not identical to the case of unrealizable entitlements. In the latter case, a person's entitlement is not denied. In fact, the legal system is ready to enforce it, but the person cannot afford to vindicate it in court. One might argue that although this result is unquestionably regrettable, it is morally and economically different from a deliberate denial or suppression of a person's right. Both analytically and as a matter of substance, unrealizability of entitlements presents a distinct problem that calls for independent analysis. In the case of unrealizable entitlements, the core problem is not the state's refusal to recognize a certain entitlement but rather the cost of enforcement. Yet from the vantage point of the entitlement holder, inability to enforce the entitlement will in many cases have the same effect as not having the entitlement to begin with.

Unrealizability of entitlements may not present a problem that calls for legal intervention when it happens accidentally in a small number of cases. Such cases, while unfortunate, do not threaten to unravel our entitlements-based system. However, when an entitlement is systematically turned into a dead letter of the law, policymakers have serious cause for concern. Accepting this state of affairs may bring about socially devastating consequences. This can be most readily seen in the case of criminal prosecutions. Consider the case of an unscrupulous prosecutor who files misdemeanor **[*1333]** charges against multiple defendants to induce guilty pleas.ⁿ⁵³ While the charges are baseless, defending oneself against them is expensive - indeed, costlier than pleading guilty to and getting punished for a relatively minor misdemeanor charge. Under these circumstances, all rational defendants - both guilty

and innocent - will likely plead guilty.

The same might happen in other areas of the law. Individuals and corporations may systematically use their relative cost advantages to erode entitlements that arise out of property and contractual arrangements, and even constitutional rights. In Part III, we illustrate this deleterious potential by providing examples that involved the entitlements of insurance holders, intellectual property users, and criminal defendants. But, of course, systematic asymmetries in litigation costs pervade other areas of the law as well. Taxpayers often face a similar problem in their dealings with the tax authorities.

Loss of entitlements on account of high enforcement costs should alarm policymakers for several reasons. First, and most obviously, it harms the entitlement holder. Rights theorists may disagree whether the harm is to her personhood, autonomy, or wellbeing, but none will contest the fact that she suffered some serious harm. Second, entitlement erosion undermines the goals of society at large since it upsets the balance of powers and freedoms within society. After all, entitlements are granted for a reason and their systematic non-enforcement therefore impairs policymaking. Third, the possibility of entitlements' erosion creates a perverse incentive for third parties to deliberately intrude on others' entitlements. Correspondingly, it induces inefficient changes in the behavior of entitlement holders who foresee the possibility that they will not be able to enforce their legal rights and privileges.

With one important exception, existing theories of rights have overlooked the cost of enforcing rights almost completely and have paid no heed to the social cost of enforcing rights. The exception is Professors Stephen Holmes and Cass Sunstein's analysis of rights that centers on the cost of enforcement.ⁿ⁵⁴ Specifically, Holmes and Sunstein demonstrated how the social cost of enforcing rights alters [*1334] our conventional understanding of rights. Their account begins with a simple observation that rights cannot vindicate themselves: they always require enforcement and are often contested. Society, therefore, needs to set up adjudicative procedures and other costly mechanisms for enforcing rights, and it will have to pay for those mechanisms with its taxpayers' money. Society's need to subsidize rights thus unravels the classic distinction between the so-called "negative rights" that fend off interference with the rights' holders and the so-called "positive rights" to welfare.ⁿ⁵⁵ Because society must (and does) subsidize the protection of negative rights, the enforcement of which is often costly,ⁿ⁵⁶ negative rights too are grounded in welfare.ⁿ⁵⁷ If society were to remove its welfare protection from negative rights, it would doom many of them to extinction.ⁿ⁵⁸

Holmes and Sunstein's account of rights is important both analytically and practically. It provides guidance as to real-world policies. However, it fails to notice a crucial dynamic that determines the effect of entitlements' enforcement cost on their holders' ability to realize them. Whether an entitlement holder will choose to protect an entitlement does not only depend on how much it costs her to vindicate it in court but also - indeed, primarily - on an attacker's cost of challenging the entitlement. When the cost of challenging an entitlement is prohibitive, the entitlement will not be challenged and its holder will be able to enjoy it for free. Hence, the fact that an entitlement is costly to enforce does not by itself imply that it will not be realized in the absence of a subsidy from the government. A state subsidy is required only when a third party is willing to expend money and effort to challenge the entitlement. As we showed, this will often happen when the challenger enjoys a significant cost advantage over the entitlement holder.

Contrariwise, when the cost of challenging (or taking over) an entitlement is systematically lower than the cost of defending it, the entitlement may become unrealizable. The entitlement holders will choose to forego its enforcement, effectively relinquishing it. This [*1335] insight has profound implications for law enforcement. The government must not rush to expend taxpayers' money on subsidizing the defense of entitlements. Instead, it can tax attacks on entitlements by imposing special procedural and evidentiary burdens upon anyone who deliberately seeks to deprive others of their entitlements by utilizing economies of scale or scope. In Part IV below, we make a number of proposals that follow this approach.

II. The Relational Contingency Thesis

In this Part, we present the core thesis of the Article, which holds that all entitlements are relationally contingent.

Accordingly, legal formalization of rights and entitlements does not guarantee their effectiveness against all intended duty holders. In the real world, rights will oftentimes fail to protect the underlying value they were enacted to defend, and, worse yet, may expose the rightsholder to predation by others. As we will show, this insight has far-reaching implications for the way policymakers and scholars think about rights and entitlements. However, before proceeding to analyze these implications, we will first position our core thesis within the larger framework of the rights literature and explain what causes rights and entitlements to be relationally contingent in the real world.

The conceptual literature on rights and entitlements is too vast to be summarized in a single article. At a risk of a mild overgeneralization, the literature may be divided into two categories. The first may be termed as "rights idealism."ⁿ⁵⁹ It consists of analytical examination of rights and entitlements as ideal legal concepts operating in a constraint-free world. The main contributions to this genre were made by legal philosophers seeking to understand and illuminate the concept of rights. This body of scholarship is largely divorced from real-world constraints and pragmatic concerns, such as cost and how rights and entitlements operate in reality. Scholars who work in this tradition see their mission as elucidating the essential characteristics of legal entitlements, offering typologies of entitlements, and positioning entitlements within the greater framework of legal concepts. These scholars are by and large [*1336] avowed deontologists, who proceed on the assumption that entitlements, once formalized, are readily capable of performing the tasks assigned to them by lawmakers.

Ronald Dworkin's highly influential workⁿ⁶⁰ provides a useful illustration. Characterizing rights as "trumps," Dworkin advances a powerful argument for why rights should prevail over utilitarian considerations. This argument develops a purist and highly abstracted conception of rights, unaffected by institutional constraints and real-world interactions. Dworkin postulates that rights have independent existence and viability and are also equipped with the special power to fend off utilitarian challenges.ⁿ⁶¹ Understandably, he does not even consider the possibility that the same utilitarian factors he dismisses may render rights ineffective on the ground in such a way that courts will not be able to salvage them. The cost of enforcing legal rights is the most significant of those factors. In other words, Dworkin and other rights idealists have ignored the basic fact that rights are not self-enforcing and hence inherently vulnerable to cost constraints.

The second thread in the rights literature is best described as "court-centered theories of entitlements." By contrast to "rights idealism," this body of scholarship focuses exclusively on how entitlements are implemented by courts. Contributors to this scholarship are predominantly pragmatists, who take an avowedly practical approach that seeks to explain how rights affect litigation outcomes. This approach to entitlements is taken by virtually all Law and Economics specialists and by a smaller number of Law and Society scholars. The celebrated "Cathedral" article by Guido Calabresi and Douglas Melamedⁿ⁶² vividly illustrates the Law and Economics scholars' approach. This article offers a fascinating account of how courts should protect legal entitlements - the Law and Economics equivalent of rights. Alas, as Carol Rose correctly observes, "Cathedral" at its core is an article about remedies rather than about entitlements as such.ⁿ⁶³ The article enumerates three remedial [*1337] modes of entitlements' protection - property rules, liability rules, and inalienability - and then moves on to tell readers how to choose the right mode of protection in order to maximize social welfare.ⁿ⁶⁴

Law and Society scholars, for their part, focus on the legal process more broadly. Specifically, they explore how inequalities in wealth distribution might distort legal processes and lead to socially inequitable results irrespective of the initial allocation of rights. This line of scholarly work builds on Marc Galanter's seminal essay "Why the 'Haves' Come Out Ahead," which demonstrates how affluent litigants can obtain more favorable outcomes in courts on account of superior legal representation.ⁿ⁶⁵

Surprisingly, scant attention has been paid to the role of entitlements outside the courts. Neither trend has consistently examined this important aspect of legal entitlements. Our analysis seeks to redress this omission. We would like to emphasize at this point that we do not intend to challenge any of the existing accounts of legal entitlements. Rather, our aspiration is to complement these accounts. We readily acknowledge the importance of legal formalization of entitlements. Formalization of entitlements lowers information costs for holders and duty bearers, economizes on

individuals' compliance costs, facilitates adjudication and dispute resolution expenses, and enables voluntary exchange. It also makes entitlements more valuable to their holders by giving them effect vis-a-vis the largest possible number of individuals and by putting the coercive powers of the state at the rightsholders' disposal.ⁿ⁶⁶ We likewise recognize the important role of courts and legal processes in protecting rights. Indeed, the fact that entitlements must be vindicated via legal process is what makes them relationally contingent.

Our account differs from the previous accounts of rights in that it focuses on the role that legal entitlements play in real-world interactions between actors. Accordingly, the discussion in the pages ahead aims to bridge the gap between rights idealism and the court-centered theories of entitlements. Temporally, we are interested in the period after an entitlement's formalization but before [*1338] it becomes the subject of litigation. To paraphrase a famous legal metaphor,ⁿ⁶⁷ we focus primarily on the unmaking of entitlements in the shadow of the litigation costs and on how to prevent this.

To illustrate, consider the famous jurisprudential distinction between rights in rem and rights in personam. As any person trained in the law knows, rights in rem avail against the rest of the world, while rights in personam are effective vis-a-vis a certain individual or a specified group of individuals. The accepted lore holds that an entitlement's formal recognition as a right in rem or a right in personam determines the group of individuals against whom the entitlement is effective. Rights and entitlements are not self-enforcing, however. Most of the time, their subordinates - the duty holders - will respect them. But there will be cases in which duty holders will fail to respect entitlements and may even violate them deliberately. In such cases, the entitlement holder will have to rely on the legal process to protect her entitlement. The legal process is not cost free. Litigation requires investment of resources - in many cases, a substantial investment. When an entitlement holder does not have the financial wherewithal to vindicate the entitlement in court, the entitlement will fail to protect her regardless of its classification as a right in personam or a right in rem. In reality, the group against which the right avails may be a null set.

This observation about the effectiveness of rights and legal entitlements is not confined to extreme cases. On the contrary, it can be generalized. Rightsholders who have the financial means to protect their entitlements may rationally choose not to do so as well when the cost of vindicating the entitlement in court exceeds the benefit thereof. One might think that this is not too troubling; after all, the owner should decide whether to vindicate her right and at what cost. However, this narrow view ignores the incentive effect of the cost-driven desertion of entitlements on their subordinates. Opportunists with low litigation costs can violate others' entitlements, thereby compromising the values that the entitlements are set to protect.

In reality, therefore, the effectiveness of a legal entitlement depends on two factors: (1) the cost of defending the entitlement in [*1339] court; and (2) the cost of challenging it. Consequently, actors with low litigation costs are able to force rightsholders to forfeit their entitlements. They can achieve this result by violating or misappropriating those entitlements and then offering the rightsholders an unconscionable settlement that the rightsholders have no choice but to accept.

Condoning misappropriation of others' entitlements on account of asymmetric litigation costs is neither fair nor efficient. From a moral standpoint, such misappropriations are akin to extortion or, at best, to unconscionable transactions. From an economic standpoint, they represent opportunistic transfers that are welfare diminishing. The existing state of affairs creates an incentive for actors to forego productive activities and search, instead, for entitlements that are prone for the taking. Social resources will systematically be wasted in this way. Worse yet, when any such wasteful predation endeavor compromises an entitlement originating from a productive endeavor of its holder (or the holder's predecessor), it breeds opportunism and extortion. By forcing transfers of wealth from the productive sector to opportunists, such endeavors will bring about a socially perverse regrouping of occupations and talent.ⁿ⁶⁸

Importantly, the relational contingency of entitlements cuts across wealth lines. The phenomenon is not confined to poor rightsholders, and can also strike the rich. The wealthy, too, may rationally elect to forfeit their rights in order to avoid litigation. To see one such scenario, consider again the fair-use dispute between Ian and Proprietary Images.ⁿ⁶⁹

Assume now that Ian is incredibly wealthy, indeed, wealthier than Proprietary Images. Proprietary Images, however, can litigate the dispute at a much lower cost owing to economies of scale that Ian does not enjoy. These economies accrue to Proprietary Images by dint of the fact that it has litigated multiple similar cases in the past and has ready access to all the legal resources - physical and human - necessary to litigate the case against Ian at a negligible cost. The law firm representing Proprietary Images has developed a standard method of prosecuting the [*1340] client's copyright suits against alleged infringers like Ian. Ian, by contrast, will incur a much greater expense if he decides to defend against Proprietary Images's claim. He will have to retain an attorney solely for the purpose of dealing with the infringement allegation. His attorney will then have to educate herself about the facts of the case and applicable legal rules without being able to reuse this knowledge in future cases and spread the cost of its acquisition across multiple clients. Ian's bill for attorney services therefore will not be discounted by economies of scale and scope. Importantly, the gap between the parties' expenses will only widen if the case goes to court, as the preparation time for Ian's attorney is likely to be more substantial than that for Proprietary Images's lawyers. Worse yet, Ian may be subject to hourly billing, which will further drive his cost up.

Being incredibly wealthy (by hypothesis), Ian can pay virtually any legal bill. Unlike most defendants in his position, he can afford sticking to his guns and fighting Proprietary Images in court even at the cost of \$ 10,000. This course of action, however, would only be rational if Ian valued his psychological satisfaction from the victory as worth \$ 7000 or more. Otherwise, it would still be most rational for him to surrender to Proprietary Images's demand and pay the company \$ 3000.

Our relational-contingency thesis has an interesting and counterintuitive implication that we mentioned in the Introduction. This implication concerns negative-value entitlements - ones that cost more to vindicate than the value they yield to their holders. According to widely held intuition, such entitlements are tantamount to a dead letter of the law unless they are sufficiently similar to each other to be consolidated into a class action - a proceeding that utilizes economies of scale and transforms many negative-value suits into a single action with a positive net value. However, this intuition is inaccurate as it ignores the relational contingency of entitlements. When the cost of an entitlement's vindication exceeds its value to the holder, she will not expend resources and effort on vindicating the entitlement in court. The entitlement, however, may nevertheless provide her with effective protection if the cost faced by potential challengers is higher still. To illustrate, assume that Anne values her entitlement to live in a nuisance-free environment at \$ 1000. However, Anne's expected cost of vindicating [*1341] this entitlement in court is \$ 1500. Thus, the entitlement has a net value of \$ 500. Nonetheless, it will afford Anne effective protection against her neighbor Ben if Ben's expected value from playing loud music is \$ 500 while his cost of defending himself, if sued, is \$ 3000. If Ben causes Anne a nuisance, she can credibly threaten litigation and offer Ben to settle for \$ 2000. Anticipating this result, Ben will abstain from violating Anne's entitlement ab initio.

This happy outcome, however, is far from typical. As we have shown, the relational contingency of rights will oftentimes lead to the opposite scenario: an individual or, more realistically, a large corporation will use its cost advantage in litigation to force out the surrender of a weaker opponent's entitlement. We now turn to identify and discuss the most recurrent of those scenarios.

III. The Destructive Consequence of Relational Contingency for Categories of Rights

Not all litigants are created equal - at least, not as far as litigation costs are concerned. While courts treat everyone equally in principle, some litigants enjoy a cost advantage over others. Two things need to be clarified at the outset in connection with this observation. First, cost advantage in litigation does not always positively correlate with wealth. Wealth allows people and firms to secure good legal representation for a price. But it does not, on its own, give a litigant a cost advantage. Cost advantage exists only when a party can litigate at a lower cost than her adversary. Second, cost advantage does not guarantee a victory in court. The actual outcome of a dispute depends on the merits of one's claims. The significance of lower litigation costs lies elsewhere: it enables a party who can litigate more cost-effectively to extract favorable settlements from its opponents. Or, to put it in contractual parlance, lower litigation costs improve a party's bargaining power. This is especially true under the American legal system under which each

litigant normally bears her own costs.

Asymmetry in litigation costs may arise by dint of the design of legal rules - substantive, procedural, or evidentiary. For example, the law can interpose heightened pleading and proof requirements in order to make it hard for plaintiffs to file and prosecute certain suits. Consider the legal rules governing securities fraud. Under the [*1342] Private Securities Litigation Reform Act of 1995 ("PSLRA"), ⁿ⁷⁰ a securities fraud action cannot survive motion to dismiss when the plaintiff does not provide a detailed account of the defendant's "scienter" or fails to substantiate his allegations of "scienter" by evidence. ⁿ⁷¹ This rule blocks potentially unmeritorious class actions that may unjustifiably erode the firm's stock value and reputation on the market. ⁿ⁷² At the same time, the rule makes it difficult for plaintiffs to commence securities fraud actions. ⁿ⁷³

Conversely, the law can make it easier for plaintiffs to prove their case. To this end, it may adopt various presumptions that favor plaintiffs (such as *res ipsa loquitur*) or employ procedural and evidentiary rules that economize on plaintiffs' costs. Similarly, the law can increase the relative cost of litigation for defendants by fashioning complex multifactor defenses that can only be proved at a significant cost. For example, Section 11(e) of the Securities Act of 1933 allows a defendant who made "any [false or misleading] statement [with respect to any material fact] in any application, report, or document filed pursuant to [the Act]" ⁿ⁷⁴ to avoid liability by proving that the alleged securities' drop in market price would have occurred anyway. ⁿ⁷⁵ This "negative causation" defense is complicated and very hard to establish. Courts have decided that "Congress' desire to allocate the risk of uncertainty to the defendants" ⁿ⁷⁶ calls for the imposition of stringent proof requirements upon defendants who invoke this defense. ⁿ⁷⁷ Specifically, any such defendant must prove by a preponderance of the evidence that the [*1343] decline in the stock's value "resulted 'solely' from factors other than the material omissions [or misstatements]." ⁿ⁷⁸ To establish the requisite disassociation, the defendant must furnish expert testimony that carries out an event study or other economic analysis of the affected stock's fluctuations. ⁿ⁷⁹ The cost of this testimony and the underlying expert work will usually be high. ⁿ⁸⁰ The prospect of [*1344] incurring this cost will exert deterrent effects on the primary behavior of affected parties. ⁿ⁸¹

A second source of the litigation-cost asymmetry concerns access to legal counsel and representation. Certain litigants have cheaper access to legal representation than others. Corporations and repeat litigants often pay retainer fees or employ in-house lawyers. Their adversaries, on the other hand, especially when they are private individuals, must expend considerably higher amounts of money and effort to secure adequate legal representation. First, they have to incur search and verification costs to ensure adequate representation. Second, they will be subject to hourly billing.

The cost advantage of repeat litigants is not based on volume alone, however. Such parties can often take advantage of economies of scale and scope that further lower their cost. A firm that faces multiple legal disputes can hire attorneys who will specialize in representing it after acquiring expertise in the relevant litigation areas. These attorneys will develop standard litigation methods that will maximize the firm's chances to prevail in court. Those methods may include repeated engagement of experts, document reviewers, and other specialists. These specialists, too, will set up working protocols that will apply in every case and help the firm achieve the best possible results. This litigation machinery will spread the firm's one-time investment in the dispute resolution across many cases. Consequently, the firm's expenditure on every individual case will steadily decline.

To illustrate, consider a company that holds a large portfolio of patents like IBM or an insurance company like AIG. Many of the legal disputes in which such companies are involved will share numerous common characteristics. Those commonalities allow such companies to rely on past cases in litigating new ones. The presence of recurring elements considerably lowers learning and drafting [*1345] costs, as well as the cost of legal research. First-time litigants and their representatives must, of course, do everything from scratch.

Asymmetry in the parties' litigation costs is not a rare spectacle in our legal system. In fact, such cases are ubiquitous. When asymmetrical litigation costs occur randomly in our legal system, they do not present a serious cause for concern. However, when they systematically favor one group of litigants over another, they can result in erosion of entitlements. The reason is simple and disturbing at once: the party who holds a cost advantage can always induce her

adversary to forego litigation and succumb to a settlement offer even when the law is on her side. A simple numerical example can demonstrate this point. Take a firm whose litigation cost is \$ 1000 per case and pit it against an individual entitlement holder whose parallel expenditure is \$ 5000. Under this recurrent scenario, the entitlement holder will be willing to avoid litigation - no matter how successful it promises to be, as far as merits are concerned - by paying the firm any sum up to \$ 5000. And if the entitlement holder values her entitlement below \$ 5000, she will surrender to the firm's pressure and forfeit her entitlement altogether, as did Anne in our introductory example. ⁿ⁸²

This decision of the entitlement holder is rational. Indeed, it is the only rational decision she can make. The firm's threat of going to court, given its low litigation cost, is credible. As a consequence of this threat, the entitlement holder stands to lose \$ 5000. Hence, it is only rational for her to remove the threat by paying the firm any ransom amount below \$ 5000. ⁿ⁸³

In the remainder of this Part, we discuss three representative cases. We extract those cases from three diverse areas: intellectual property, insurance, and criminal law.

A. Intellectual Property

The field of intellectual property is rife with examples of how asymmetrical litigation costs can lead to the erosion of entitlements. [*1346] Begin with copyright law. Many creative industries are highly centralized. The rights to the vast majority of musical works and films are held by a relatively small number of corporations. Furthermore, the field is characterized by central enforcement agencies - such as the American Society of Composers, Authors and Publishers ("ASCAP"), the Recording Industry Association of America ("RIAA"), and the Motion Picture Association of America ("MPAA") - that represent all relevant rightsholders and carry out their litigation initiatives. ⁿ⁸⁴

Although copyright law is supposed to balance the interests of copyright holders against those of users, numerous scholars have noted that the design of copyright law is slanted in favor of copyright holders. ⁿ⁸⁵ The Copyright Act bestows very broad rights and powers on copyright holders, while making painstaking efforts to define privileges very narrowly and carefully. ⁿ⁸⁶ The most important privilege, or defense, the Act grants to users is fair use. Fair use is supposed to be the bastion of users' rights and the most important counterweight to the broad powers of copyright owners. Unfortunately, fair use, on account of its complex design, has won itself the [*1347] dubious distinction of being the "most troublesome [doctrine] in the whole law of copyright." ⁿ⁸⁷ As one of us, together with Professor Philip Weiser, observed, fair use's ability to shield unauthorized users of works is greatly undermined by the uncertainty that has become the hallmark of the doctrine. ⁿ⁸⁸ Furthermore, as Professor James Gibson pointed out, the design of our copyright system allows copyright holders to expand their dominion at users' expense. ⁿ⁸⁹ Specifically, the vagueness and consequent uncertainty of fair use and other defenses prompt users to pay copyright owners license fees rather than risk litigation. ⁿ⁹⁰ This dynamic leads to accretion of rights by copyright owners. ⁿ⁹¹

But the vagueness of the fair use doctrine is only the beginning of the story. All copyright infringement actions share many basic characteristics. To succeed in an infringement suit, a copyright holder essentially needs to show ownership of a valid copyright and infringement by the alleged defendant. She then has to specify the remedies she requests. This is a common pattern in most copyright infringement suits. As a result, plaintiffs' attorneys who represent clients with large copyright portfolios face a downward sloping cost curve. This means that up to a certain number of cases, the cost of instituting each additional infringement suit will be lower than the cost of bringing the previous suit. Ultimately, the cost curve will flatten out, but even then the relative cost of litigation for plaintiffs' attorneys will be much lower than it is for defendants' attorneys.

[*1348] The use of central enforcement organizations not only lowers the infringement-detection cost for copyright owners; ⁿ⁹² it also guarantees them an inherent advantage in court. Enforcement organizations are repeat players in the copyright arena. As such, they can produce "cease and desist" letters and court briefs at a much lower cost than their adversaries, and then leverage this advantage into a favorable settlement. These settlements economize on litigation costs, but they also stunt the development of fair-use, misuse, and other copyright defenses, as courts are

increasingly denied the opportunity to consider these defenses. A corollary cost of this dynamic is that it sweeps problems under the rug and thereby prevents policymakers from adopting corrective measures. After all, disputes that have been settled privately between the parties rarely make policymakers' "to do" list.

Importantly, the cost advantage enjoyed by owners of large copyright portfolios has a profound effect on their primary behavior. First, it induces owners to create and acquire large portfolios of copyrighted works. For instance, Getty Images, Inc. recently acquired Flickr's entire collection of images. Following this acquisition, Getty established an international network of enforcement agencies and started asserting its rights against users of digital photos all over the world.ⁿ⁹³ This strategic move is consistent with our analysis, but it is not necessarily disconcerting. Second and much more troubling, certain corporations and individual actors reportedly adopted a "business model" under which they wait for certain works to become "viral," or in ordinary parlance, enjoy wide distribution over the Internet. Works typically attain this status due to the fact that they are initially distributed freely, often under permission from the original creators. At this point, profit-driven actors, typically corporations, acquire the rights to the works and launch an aggressive enforcement attack against unsuspecting [*1349] Internet users.ⁿ⁹⁴ The companies' cost advantage in litigation secures the attack's success in virtually every case.ⁿ⁹⁵

Strategic abuse of intellectual property rights is by no means restricted to the area of copyright. Holders of large patent portfolios enjoy the same cost advantage in litigation, as do owners of sizable copyright pools. In the world of patents, the advantage may be even more pronounced. A patent portfolio will often contain multiple individual patents that cover different aspects of the given technology or product. Due to this fact, a portfolio holder will often be able to make several infringement claims against its rival. Each additional claim will widen the parties' litigation cost differential, thereby dramatically increasing the defendants' motivation to settle.

In the patent context, large portfolios can help their owners avoid costly litigation, "serving to dissuade litigation (and threats thereof) by others in the field, because of the threat (real or implied) of retaliatory litigation."ⁿ⁹⁶ As Professor Polk Wagner and one of us pointed out, "the scale-effects of a portfolio mean that the broader array of possible infringement claims (and the concomitant greater net likelihood of success) allow significant patent portfolios to serve as important defensive mechanisms in a highly litigious environment."ⁿ⁹⁷ This dynamic has an important implication: inventors whose patents are infringed by holders of large [*1350] portfolios will choose not to sue them at all in order not to expose themselves to the risk of a retaliatory counter-suit which they can ill-afford.ⁿ⁹⁸

The abuse of cost advantages is not confined to large corporations. Consider the phenomenon of "patent trolling," the practice of holding patents solely for the purpose of extracting payments from others, without ever intending to commercialize the underlying invention. Jerome Lemelson, whose name is often mentioned in this context, amassed about six hundred patents during his lifetime and frequently asserted them against various corporations. He became famous in part for suing Japanese and European corporations for infringing his machine-vision patents. The merits of these suits are subject to a heated debate to this day.ⁿ⁹⁹ Yet the foreign corporations chose to settle the suits for \$ 100 million. Their decision to settle was driven in part by the fear of an unfavorable outcome in court.ⁿ¹⁰⁰ But Lemelson also enjoyed a substantial cost advantage over his opponents, as he could litigate more cheaply, and this advantage also helped him to extract the settlements.

Strategic litigation threats also pervade the domain of trademark law. The relative advantage in litigation costs enjoyed by large corporations enables them continuously to expand the scope of trademark protection at the expense of small businesses that can ill-afford to protect their rights in lengthy court battles. For example, Adidas, who owns the famous three-stripe mark, can assert its rights against smaller competitors who produce shoes whose designs incorporate two or four stripes, demanding that they cease producing and marketing their shoes even when the shoes' overall design is different and consumer confusion is highly unlikely. Over [*1351] time, this strategy can yield Adidas a near monopoly over the incorporation of stripes into the design of shoes and apparel.ⁿ¹⁰¹

Strategic assertion of trademarks is a broad phenomenon that encompasses all industries. This strategy characterizes large corporations and its typical victims are smaller businesses that dare to compete with the corporation.

In a recent article, Professor Leah Chan Grinvald aptly called this practice "trademark bullying." ⁿ¹⁰² Based on empirical evidence, she reported that

Large corporations send out multitudes of letters demanding small businesses or individuals cease and desist in their use of a trademark that has some resemblance to a large corporation's trademark(s). On many occasions, these letters appear to be sent out without any analysis of the purported infringement. These letters seem intended to simply intimidate the small business or individual into forgoing the use and/or registration of their trademark. ⁿ¹⁰³

These letters are so effective that recipients often choose to surrender their trademark entitlements or alter their marks without legal battle. These surrenders are particularly troubling in view of the high costs of a business's rebranding and readvertising. Professor Grinvald suggests that the source of the problem is that "victims do not have the wherewithal to fight legal battles." ⁿ¹⁰⁴ While we do not mean to underestimate the effect of wealth constraints on actors' decisions, we posit that asymmetrical litigation costs are [*1352] equally responsible for the loss of the trademark rights of small businesses. As we explained in Part II, an entitlement's vitality does not depend solely on the cost of defending it in court, but also on how much it will cost the denier to attack it.

B. Insurance

Insurance companies enjoy substantial economies of scale and scope in litigation. These economies stem from the companies' business organization and litigation setup. As far as the former is concerned, the companies systematically assemble and pool together information concerning the probability and the magnitude of the damages they insure against. The companies also elicit relevant personal data from the insured and develop standardized ways of juxtaposing the two sets of information - statistical and personal - against each other. This juxtaposition enables the companies to formulate and price the different policies they offer to individuals and organizations seeking to buy insurance and, subsequently, to assess the validity of policyholders' indemnification claims. ⁿ¹⁰⁵

The companies' litigation setup is equally standardized. By and large, it features policyholders who sue the company in court for failure to indemnify. Each of those plaintiffs complains that the company refuses to pay her for the damage that the policy she bought from it is supposed to cover. Some of those suits have merit, while others are unmeritorious or downright fraudulent. To defend against these multiple suits that have a virtually identical pattern, the companies retain (or employ) attorneys specializing in insurance law. To provide insurance companies with proper representation, those attorneys need to make a one-time investment: they need to study the standard terms of the relevant insurance policies and the information already assembled by the company. The attorneys also need to set up routine methods and protocols [*1353] for working with actuaries, private investigators and other experts. ⁿ¹⁰⁶

The resulting economies of scale and scope are enormous. They allow the company not only to take advantage of being a coveted client on an intensely competitive market for attorney services, but also to spread the cost of its representation and all other legal expenses across a very large number of cases. This cost-saving capacity gives the company litigation power that their policyholders cannot match. Any such policyholder, either rich or poor, will have to pay her attorney considerably more than what the company will expend on defending against the suit. The cost differential separating the two parties is vast, and so is the company's opportunity to drive the policyholder into an unfavorable settlement that will effectively obliterate her entitlements under the policy and insurance law. By seizing upon this opportunity, the company will systematically underpay its insured and profit at their expense.

Insurance companies also have a potentially legitimate reason for underpaying policyholders' indemnification claims. Many policyholders falsely exaggerate their losses, and it is not always easy for the company to detect such frauds. The company will consequently do well to factor in the possibility of fraud into its claim decisions and subsequent settlement offers. Under this framework, any indemnification claim that fits into the company's "suspicious" profile will be marked out as potentially fraudulent in calculating the company's claim-resolution proposal. By doing so,

the company will reduce its payout to policyholders and deter fraudulent claims. Hence, systematic underpayment of claims might also be an economically optimal strategy for insurance companies. ⁿ¹⁰⁷

For good or bad reasons, insurance companies take advantage of their superior cost-differential by underpaying policyholders' [*1354] claims. This practice is well-documented in academic literature ⁿ¹⁰⁸ and has given rise to suits filed by the government and consumer protection groups. ⁿ¹⁰⁹ The New Mexico Supreme Court decision in *Truong v. Allstate Insurance Co.* ⁿ¹¹⁰ provides both a recent and a remarkable illustration of those suits. ⁿ¹¹¹ This decision examined Allstate's use of a claim-processing computer software, programmed to undervalue and underpay policyholders' claims below their true value, against the state's prohibition of "unfair or deceptive and unconscionable trade practices." ⁿ¹¹² The court rejected Allstate's claim that its software fell under the "market conduct examination" permitted by a supervising agency (the Public Regulation Commission's Superintendent of Insurance). The court reasoned that such permission can only be granted expressly and formally, rather than implicitly, and reinstated the policyholders' class action. ⁿ¹¹³

Another good example is Louisiana's *parens patriae* action against Allstate, its provider of statistical, actuarial, and underwriting information, and the manufacturers of computer programs manipulated to reduce the value of policyholders' claims. ⁿ¹¹⁴ The [*1355] United States Court of Appeals for the Fifth Circuit categorized this action as an equivalent of a "class" or "mass" action ⁿ¹¹⁵ for purposes of the Class Action Fairness Act of 2005. ⁿ¹¹⁶ Based on this categorization, the court found "minimal diversity" between Allstate and the individuals represented by Louisiana's Attorney General ⁿ¹¹⁷ and removed the action to federal court pursuant to the Act's provisions. ⁿ¹¹⁸

These decisions raise both important and interesting questions of law that merit an independent discussion. ⁿ¹¹⁹ However, they are discussed here for a different reason. These decisions show how prevalent the insurance companies' underpayment strategies are and how hard it is for an individual policyholder facing those strategies to stand her ground. ⁿ¹²⁰ Indeed, it is no coincidence that one of those decisions involved a class action and another a *parens patriae* suit. Absent proactive mechanisms that level the playfield between insurance companies and insured, ⁿ¹²¹ the companies will use their cost advantage to force the insured to forego the vindication of their rights in court and accept instead a cheap out-of-court settlement. The contractual rights of policyholders will consequently become mute.

C. Criminal Law

Asymmetrical litigation costs can foil criminal justice as well. Consider a prosecutor who accuses numerous defendants of unlicensed work as contractors - a misdemeanor punishable by a fine not exceeding \$ 5000. ⁿ¹²² The prosecutor is one of several attorneys [*1356] on the government's payroll who specialize in prosecuting licensing violations. To be able to perform her job properly, the prosecutor had acquired the requisite legal and technical knowledge, which she employs in all cases she handles. The state can, consequently, prosecute contractors suspected of doing unlicensed work at a relatively low cost. For reasons we already explained, the state's cost of prosecuting every additional contractor gets lower relative to the cost of previous prosecutions. Any addition to the prosecutors' caseload spreads their effort across greater numbers of cases. Up to a certain point, it also helps prosecutors acquire experience and improve their efficiency, thus driving the state's costs further down. ⁿ¹²³

These economies of scale are one-sided. The prosecutor, for example, does not have to put much effort into prosecuting a general contractor for doing unlicensed electrical work. She knows from her and her colleagues' experience what electrical work is included in the general contractors' license. The contractor's attorney, on the other hand, will normally have to investigate this issue anew. The attorney will also have to familiarize himself with the relevant statutory and regulatory provisions, some of which are complex and not easy to understand. Consequently, in this and many other criminal cases, the gap between the cost of defense and the cost of prosecution is substantial.

Assume that the state's cost of prosecuting a contractor for doing unlicensed work is \$ 2000, while the cost of defense is typically \$ 10,000 per case. The prosecutor offers each defendant to plead guilty and receive a \$ 3000 fine. Under these circumstances, all defendants, including those who are innocent, will do well to accept the prosecutor's

offer.

Why would an innocent defendant accept this offer? The reason is simple: the defendant's conviction and punishment are costly but still cheaper than the defense. Even when the defendant's trial is completely risk-free - so that his acquittal at the end of the trial is guaranteed - he is still better off paying the state a fine of \$ 3000 [*1357] than paying an attorney a \$ 10,000 fee.ⁿ¹²⁴ The innocent defendant will consequently choose to accept the plea bargain. Contrary to some scholars' belief,ⁿ¹²⁵ the defendant's gain from the plea bargain does not fully account for this decision. His additional - and, indeed, dominant - reason for accepting the bargain is the prosecutor's cost advantage that lends credibility to her threat to litigate the case.ⁿ¹²⁶ Had the prosecutor's litigation cost been equal to the [*1358] defendant's, it would be much harder for her to threaten the defendant that she would take the case to court.ⁿ¹²⁷

Another factor that widens the gap between prosecutors' and defendants' litigation costs is the parties' unequal access to expert assistance. As attested by Professor Paul Giannelli in his comprehensive study of this area, "prosecutors ... have an overwhelming advantage when compared to defense counsel."ⁿ¹²⁸ Prosecutors can obtain expert assistance in virtually every case from government crime laboratories, both state and federal, and by relying on experts working in coroner and medical examiner offices, as well as federal agencies such as the Drug Enforcement Administration, Food and Drug Administration, Internal Revenue Service, and Bureau of Alcohol, Tobacco and Firearms.ⁿ¹²⁹ The enormous pool of government-employed experts is a perfect combination of scale and scope economies. This pool allows prosecutors to obtain expert assistance both cheaply and easily. Defendants have no free access to this, or a comparable pool, of experts.ⁿ¹³⁰ Consequently, they have to shop for their own experts and pay full market prices for expert services - something that only wealthy defendants can afford.ⁿ¹³¹

In our illustration, the prosecutor's cost advantage enabled her to force an innocent defendant into a guilty plea followed by fine. Unscrupulous prosecutors, however, can go much further by abusing their cost advantage. They can put financial pressure on defendants to extort guilty pleas that will lead to a prison sentence. For example, a prosecutor can inflate the indictment by accusing the defendant of multiple crimes that include conspiracy and other inchoate offences.ⁿ¹³² The high cost of defending against multiple accusations [*1359] and the credibility of the prosecutor's threat to go to trial may force innocent defendants to plead guilty. To be sure, prosecutors' cost advantage is not the only factor that gives them the upper hand in plea bargain negotiations. Other factors contributing to this imbalance are defendants' aversion to risk and uncertainty,ⁿ¹³³ financial constraints,ⁿ¹³⁴ bounded rationality,ⁿ¹³⁵ and prosecutors and defense attorneys' self-seeking motivations.ⁿ¹³⁶ Yet, prosecutors' cost advantage is a key element in their ability to extract guilty pleas from defendants. Unlike other factors that drive plea bargaining, the prosecution's cost advantage may lead to the silencing of entire categories of defendants who are accused of relatively minor violations in the sense that their voices will not be heard in the courtroom and their defense claims will never be given full consideration.

IV. Potential Solutions

In this Part of the Article, we propose several approaches that can potentially ameliorate the deleterious effect of asymmetrical litigation costs on entitlement. In theory, the solution is quite simple: it is necessary to level the legal playfield. This can be achieved either by raising litigation costs for parties who currently enjoy a cost advantage or by lowering litigation costs for disadvantaged parties.ⁿ¹³⁷ However, this is easier said than done. As is often the case, the devil is in the detailsⁿ¹³⁸ and there are no simple prophylactic solutions.

[*1360] Not every case in which one of the parties enjoys a cost advantage calls for leveling the playfield.ⁿ¹³⁹ In almost all cases, one of the parties has this advantage and the adoption of broad policies that seek to negate it would be both wasteful and futile. The cost of the fix may far outweigh the benefit. What is more, the fact that one of the parties enjoys a cost advantage is not a real concern as long as she does not seek to use it strategically. This can be most easily seen in the context of criminal prosecution. When the government prosecutes a person who clearly committed a crime, making the process more costly for the government only for the sake of leveling the playfield would work to society's detriment without producing any offsetting benefits.

The main challenge, therefore, is to fashion legal mechanisms that are capable of distinguishing strategic litigants from non-strategic ones. In the following paragraphs, we will discuss a number [*1361] of mechanisms that may be used to accomplish this task. Specifically, we will consider the options of increased court fees, fee-shifting rules, subsidization of disadvantaged litigants, and the intensified use of punitive damages, "bad faith," "unclean hands" and other equitable doctrines. We will assess these mechanisms' strengths and weaknesses and will try to rank them on the basis of this assessment.

A. Increasing Court Fees

The first remedial option we wish to consider is stricter ex ante screens that would make it more difficult for strategic litigants to file suits against disadvantaged defendants. The most conventional mechanism that may be employed toward this end is differential court fees that correlate with the number of suits one files. Under this mechanism, court fees will increase progressively with every additional lawsuit filed by a litigant suspected of being strategic. Serial litigants consequently will have to pay an increasingly high fee for each additional suit they file.

Rising court fees will increase litigation costs for serial litigants (both strategic and honest). The fee increments will gradually eliminate the serial litigants' cost advantage, which, in turn, will take away their ability to threaten potential defendants with suits. Note that strategic plaintiffs' capacity to extort settlements critically depends on their ability to make a credible threat to sue the defendant. Properly calibrated fee increases will gradually erode the credibility of those threats. Over time, those threats will become non-credible and the litigation playfield will be leveled.

But herein lies the main problem with the proposed mechanism. It takes time for it to take effect. This may appear to be a fairly inconsequential problem at first blush. But, in fact, the opposite is true. The time problem dooms the mechanism. To illustrate, assume that a five percent increase in court fees allows a strategic plaintiff to enjoy her cost advantage in the first ten suits she files, but not thereafter. Under the assumed rate, the plaintiff's cost advantage disappears at the eleventh suit. Seemingly, after winning ten suits in a row, the plaintiff will no longer be able to destroy her opponents' entitlements, and the unrealizability problem will fade away.

[*1362] In fact, it will not. The reason is simple: defendants one through ten will not litigate their cases. No reasonable person will agree to be among the first ten defendants to go to court. Instead, a reasonable person will prefer to settle the case by giving up her entitlement (or part of it). The next defendants will follow suit, thereby completely exempting the plaintiff from the duty to pay court fees. The fee-increase mechanism is therefore unlikely to remedy the problem.

The increased fees solution also raises fairness and efficiency concerns. As we already noted, not all serial litigants are strategic. Some of them are honest rightsholders who suffered multiple infringements of their rights, as is often the case with owners of copyright in musical works. Raising court fees for those litigants up the point of unaffordability would block their access to courts and allow infringers to misappropriate their works. This outcome is neither fair nor efficient.

The increased fees solution is also partial by design. This solution only works with strategic plaintiffs, but not with strategic defendants, as defendants pay no court fees. Moreover, a strategic litigant can often choose between being a plaintiff and being a defendant. Consider a landowner who tries to void her neighbor's right-to-way easement. Instead of filing a suit to void the easement, the landowner can conveniently turn herself into a fee-exempted defendant by destroying and occupying the pathway in question. If this action triggers the neighbor's suit, the landowner will realize her cost-advantage and obliterate the neighbor's entitlement without paying court fees. If the neighbor decides not to sue, the landowner will prevail without a fight.

Finally, the increased-fee mechanism can only work in civil litigation. In the context of criminal prosecutions, this mechanism is inapplicable. Once it becomes effective, it will stop the criminal justice system dead in its tracks, as it will prevent the government from prosecuting offenders.

B. Fee Shifting

Fee shifting is a second option that policymakers may adopt in order to combat strategic litigants. Across the United States, each civil litigant pays her own court costs and attorney's fees. This general principle is widely known as the "American rule." Most other [*1363] countries follow the so-called "English rule" that empowers the prevailing party to collect her court costs and attorney's fees from the losing party. Critics of the American rule claim that it promotes "wasteful litigation expenditures, implausible claims, strike suits, onerous discovery demands, and spurious defenses." n140 Champions of the American rule respond to this accusation by underscoring access to justice. They argue in this connection that the English rule "deters risk-averse plaintiffs from pursuing meritorious claims, especially against rich defendants who can afford expensive counsel." n141 Law and Economics scholars who have weighed in on the debate tend to favor the American rule on the ground that it best promotes out-of-court settlements. n142

But not all settlements are equally desirable from a social perspective. n143 While we do not challenge the conventional wisdom among Law and Economics scholars as to the incentive effect of the American rule on settlements, our analysis casts doubt on the assumption that maximizing the number of out-of-court settlements is necessarily a laudable goal. If our analysis is correct, not all settlements are socially desirable: some settlements, as Bentham [*1364] put it, are "repugnant to justice." n144 As we have shown, out-of-court settlements lead to the effacement of entitlements in certain contexts. After all, it is precisely the ability of parties with a cost advantage to craft settlements in a way that induces their adversaries to forego trial that causes the problem. Hence, the English rule may be desirable in the present context.

Forcing the losing party to pay the winner her court expenses and attorney's fees has the same effect as increasing court fees: it raises total litigation costs for strategic litigants. The two remedial mechanisms, however, differ from each other in four important respects. First, unlike the increased court fees that acquire their remedial power over time, the English rule takes effect immediately as of the very first case. The English rule thus avoids the main shortcoming of the increased court fees solution. Second, while under the increased court fees regime the money goes to the courts system, the English fee-shifting rule channels the money to successful defendants. This difference increases the incentive of potential defendants to defend their entitlements in court. Third, a fee-shifting mechanism is a more precise measure than increased court fees, as it reimburses defendants for their actual - or under most legal systems, reasonable - expenses. Lastly, the increased court-fees mechanism, as we already noted, can only affect the strategic filing of suits. The fee-shifting mechanism is universal: its adoption will affect not only plaintiffs in civil cases, but also defendants and criminal prosecutors. For all these reasons, the English rule clearly outperforms increased court fees as a mechanism for combating strategic lawsuits.

That said, the English rule is not a foolproof solution. This rule works best when the plaintiff's case is completely without merit. When the plaintiff has absolutely no chance of winning the case, adoption of the English rule will take away the plaintiff's ability to utilize her cost advantage as a means for extorting a favorable settlement [*1365] from the defendant - at least when the defendant also evaluates the plaintiff's probability of winning the case at zero. Under this scenario, it does not matter how significant the plaintiff's cost advantage is since the defendant knows that at the end of the process she will be fully reimbursed for her expenses. And the plaintiff knows it too. The English rule thus takes away the plaintiff's threat point.

The analysis changes, however, when a strategic plaintiff's chance of winning the case is not zero, but rather a small positive, say, thirty percent. In any such case, a strategic plaintiff will still be able to utilize her cost advantage to extract favorable out-of-court settlements from defendants. Naturally, the pool of potential targets will be smaller and the plaintiff's settlement gains will correspondingly shrink. Yet, with respect to certain defendants who must pay a steep price for legal representation, the cost advantage will be substantial enough to extort ransom payments. n145

Importantly, we do not argue that the English rule should be applied across the board simply because it does a better job of deterring strategic litigation that threatens to erode entitlements. The position we take is far less ambitious. What we did in this Section is to identify a previously-unnoticed factor that weighs in favor of the [*1366] English

rule. This factor may not be weighty enough to warrant the English rule's adoption in all cases, but it certainly supports the rule's application under appropriate circumstances that courts can determine on a case-by-case basis. We therefore recommend that courts be given a broad discretion to apply the English rule to lawsuits that have little merit and were brought by plaintiffs with an inherent cost advantage over the defendant.

C. Subsidization

The first two solutions we discussed are analogous to a tax: their goal is to increase litigation costs for strategic litigants. Another way to level the playfield is subsidization. Specifically, lawmakers may lower litigation costs for strategic litigants' targets by subsidizing the latter's litigation efforts. This result can be achieved either directly or indirectly. Direct subsidization consists of giving money to the litigants themselves. Indirect subsidization involves setting up legal aid organizations to represent the targets of strategic litigants.

Real world examples of direct subsidization are hard to find. In fact, we are not aware of any. The reason is straightforward. Direct subsidization presents a formidable challenge for the state in two respects. First, subsidizing all litigants is both impractical and inefficient. Any mechanism of direct subsidization will consequently require the state to set up a screening mechanism for identifying litigants who are eligible for subsidization. The cost of operating such a mechanism will likely be enormous, which calls into question the cost-effectiveness of the entire enterprise. Second, and equally important, a system of direct subsidization will create an acute moral hazard problem.ⁿ¹⁴⁶ Litigants who know that their legal bills would be paid by the state - in part or in full - will invest excessively in legal representation. Ex ante screening, careful though it may be, will not eliminate this problem since it is impossible to estimate upfront the precise cost of legal processes.

In light of the inherent problems with direct subsidization, it is not surprising that most jurisdictions prefer the indirect subsidization [*1367] route. Instead of channeling public money directly to litigants, states by and large prefer to institute public agencies that represent eligible litigants. The most common agency of this sort is the public defender's office that provides legal representation to criminal defendants who cannot afford an attorney.ⁿ¹⁴⁷

The state may also set up legal aid agencies to help civil litigants. Importantly, numerous private organizations help litigants in civil cases. These organizations include the Legal Services Corporation, National Consumer Law Center, Electronic Frontier Foundation, law school clinics, and many other institutions and centers (including law firms providing pro bono services). Legal aid organizations - both private and public - screen out applicants and determine their appropriate level of involvement in each individual case. By doing so, they solve most of the problems that arise in the context of direct subsidization.

Alas, the current demand for services offered by legal aid organizations far exceeds supply. The state can bridge the gap between supply and demand by setting up additional legal aid agencies or by funneling more taxpayers' money into existing ones. However, provision of the optimal amount of legal aid is a tricky task for the state. First, the state will be hard-pressed to determine the aggregate demand for legal aid as well as the particular areas of need. This challenge will be compounded by the fact that any attempt at estimating the overall demand for legal services must factor in the price (or co-pay) at which they will be offered. For example, if legal aid were to be given for free, there will be much greater demand for it than if it were offered for a price. Second, the state will have to supervise the quality of the services provided by legal aid institutions. As the number of institutions and employees grows, the task will become more complex. Third, and finally, the level of funding for legal aid is a function of political priorities. In the current economic environment, it would be difficult to convince politicians to commit considerable amounts of money to litigation subsidies. Any fair-minded person would agree that there are far more pressing needs at this time.

[*1368]

D. Equitable Measures and Punitive Damages

Another possible approach to the challenge posed by strategic litigants involves the use of various equitable doctrines, such as bad faith, misuse, and unclean hands. Equity constitutes a rich depository of various flexible doctrines that enabled judges to achieve just results in individual cases. Indeed, as Professor Henry Smith recently put it, the point and purpose of the law of equity was to combat opportunism.ⁿ¹⁴⁸ Strategic litigation falls squarely in this category. As we explained, strategic litigants take advantage of differential cost structures to extort unmeritorious payments from entitlement holders. This dynamic leads to results that are neither socially efficient nor equitable.

While the previous measures we discussed focus either on the litigants themselves or on their representatives (legal aid organizations), the current solution puts the premium on the courts - more precisely, on the courts and the legislature. We propose that courts be given broad discretion to rule in appropriate cases that litigants have acted in bad faith or misused their legal rights. In addition, courts will be empowered to order strategic litigants to pay their victims not just court and attorney's fees, but also punitive damages.ⁿ¹⁴⁹ We submit that courts should be able to exercise this power not only against private actors, but also against state and federal prosecutors and other governmental agents.

Giving judges broad discretion to counter strategic litigation with punitive damages will not only deter strategic litigants, but will also motivate the innocent party to take her case to court. The introduction of punitive damages will radically reshape the payoff structure faced by innocent entitlements' holders. Currently, they have no financial incentive to go to court. For the reasons we explained, from a pure financial standpoint, settling the case out-of-court always dominates litigation. However, once the possibility of [*1369] collecting punitive damages is introduced, it will make sense for many innocent litigants to defend their entitlements in court.

This measure should be applied with caution because an increase in the level of compensation normally triggers a parallel increase in the litigation's costs. As the stakes get higher, the parties' motivation to invest in litigation increases as well. Oftentimes, however, the parties' combined investment in litigation will fail to produce a matching social benefit. As Professors Mitchell Polinsky and Steven Shavell have recently demonstrated, the marginal improvement in deterrence (and other social benefits) brought about by increased compensation may fall way short of the increase in the parties' litigation costs.ⁿ¹⁵⁰ For that reason, courts should be sure to award punitive damages only in special cases. As Polinsky and Shavell have argued in their earlier work, these special cases include ones in which under-enforcement of the law creates a shortfall in deterrence.ⁿ¹⁵¹ Punitive damages can reduce, or even eliminate, this shortfall at a low social cost.ⁿ¹⁵² By the same token, punitive damages can also efficiently minimize the strategic abuse of rights when their use is limited to this goal.ⁿ¹⁵³

[*1370] Unlike the introduction of litigation subsidies, authorizing courts to award punitive damages is politically tenable. The concern that courts will award excessive punitive damages is not strong enough to block the introduction of this measure. This concern can only provide a reason for capping the amounts that courts will be authorized to award in punitive damages.ⁿ¹⁵⁴

That said, some might still criticize our proposal on the ground that it will lead to inconsistent court decisions. Some courts will routinely order strategic litigants to pay punitive damages, while others will not. Worse yet, some courts may overuse their power to penalize non-strategic litigants. We will deal with these objections in reverse order.

We believe that the second concern is greatly exaggerated. We are not aware of any empirical basis for raising it. In fact, we actually believe that courts will tend to be reluctant to rule that parties acted in bad faith and subject them to punitive damages. In an adversarial system, judges are generally predisposed to exercise restraint and hence are likely to use discretionary powers sparingly.

As for the first concern, while we agree that consistent application of the law is desirable, we do not share the view that fear of inconsistency should bar the introduction of discretionary powers. The issue at hand provides a useful illustration. Opportunism presents a challenge to lawmakers because it is largely impervious to broad generalizations and calls for the crafting of policies that rely on ad hoc determinations. Strategic litigation shares this characteristic. Judges are best positioned to identify opportunistic litigants. Their knowledge of the law and experience on the job

enables them to detect opportunism. No other institution is equally qualified to perform this task. Any legal doctrine that relies on case-by-case application will inevitably engender inconsistencies. But is there a viable alternative that will guarantee uniformity in the [*1371] courts' applications of legal rules without giving opportunism free reign and accepting the inequities it brings about? We believe there is no such alternative. Inconsistent application of the law is a small price to pay in order to preserve the integrity of legal entitlements.

At the end of the day, we posit that giving courts broader discretion and equipping them with the right doctrinal and remedial tools will go a long way toward remedying the problem of erosion of entitlements via strategic litigation. Admittedly, the judicial mechanism we propose is imperfect, but its virtues clearly outweigh its vices. Furthermore, based on our analysis, this mechanism outperforms all the other solutions we considered. Finally, it is the only solution that may be acceptable to judges, politicians, and the bar.

Conclusion

Theodore Roosevelt famously captured the fundamental tenet of our free society by saying that "no man is above the law and no man is below it" ⁿ¹⁵⁵ By making rights relationally contingent, asymmetrical litigation costs call into question our ability to attain this ideal. As we showed, a party who enjoys a cost advantage in litigation can effectively prevent her opponent from realizing her entitlement. When litigation costs favor one category of litigants over another, as we proved to be the case in multiple legal areas, it will gradually lead to erosion of entitlements. Existing accounts of legal rights largely overlooked the fact that entitlements are not self-enforcing. To actualize them in the real world, their holders must be able to enforce them cost-effectively. When this condition is not met, entitlements become dead letter of the law: they exist in theory, but not in practice. As a result, they may be ignored, taken, or compromised by strategic parties. The surrender of entitlements without legal battle impairs the legal equilibrium contemplated by policymakers. Our goal in this Article was to draw attention to the effect of asymmetrical litigation costs on legal entitlements. We also proposed several institutional responses to this problem. We [*1372] believe that of the various institutions that can effectively remedy the problem, courts are best suited for the task. Endowing courts with broad equitable discretion to penalize strategic litigants will go a long way toward alleviating the problem.

Commercial Law (UCC)Investment Securities (Article 8)Entitlement HoldersCommercial Law (UCC)Investment Securities (Article 8)Security EntitlementsCopyright LawCivil Infringement ActionsRemediesGeneral Overview

FOOTNOTES:

n1. See 17 U.S.C. § 504(c) (2006) (providing that a successful plaintiff in a copyright suit can elect to recover an award in any amount between \$ 750 and \$ 150,000 per infringed work in a case where the copyright owner sustains the burden of proof and the court finds willful infringement).

n2. This example also shows how a rightsholder's calculus changes when her entitlement is an affirmative defense against liability. Then, as in Ian's case, the defense's value equals the defender's expected liability. If Ian's defense fails, he might have to pay statutory damages in excess of Proprietary Images's actual harm. As a result, Ian will rationally choose to litigate even when his litigation cost is higher than the company's cost. As far as settlement is concerned, Ian will accept any offer that will require him to pay the company any sum below his litigation expenditure. By agreeing not to sue Ian if it pays it \$ 3000, Proprietary Images therefore does not make full use of its extortionary power.

n3. For definition of negative-value suits, see, e.g., Samuel Issacharoff, Preclusion, Due Process, and the Right To Opt Out of Class Actions, 77 Notre Dame L. Rev. 1057, 1059-60 (2002) (defining a negative-value suit as a "claim ... too small to justify the cost of prosecution.").

n4. This observation holds true in most cases, but there are exceptions. See Lucian Arye Bebchuk, A New Theory Concerning the Credibility and Success of Threats to Sue, 25 J. Legal Stud. 1, 5-9 (1996) (demonstrating that multistage litigation with divisible costs often allows a plaintiff with a negative-value suit to extract settlement from a defendant by expending - and thereby sinking - some of her costs and credibly threatening to go to trial that promises her a positive net return from the remaining expenditure); Lucian A. Bebchuk & Alon Klement, Negative-Expected-Value Suits, in 8 Encyclopedia of Law and Economics: Procedural Law and Economics 341, 341-44 (Chris William Sanchirico ed., 2d ed. 2012) (specifying circumstances in which divisibility of costs and informational advantage allow a plaintiff with a negative-value suit to extract settlement from defendant, and surveying relevant literature); Lucian Arye Bebchuk, Suing Solely To Extract a Settlement Offer, 17 J. Legal Stud. 437, 448 (1988) (showing that a plaintiff with a negative-value suit can sometimes exploit asymmetrical information to extract settlement from the less informed defendant); Joseph A. Grundfest & Peter H. Huang, The Unexpected Value of Litigation: A Real Options Perspective, 58 Stan. L. Rev. 1267, 1299-1315 (2006) (using option theory to demonstrate that negative-value suits can be viable in a regime that allows parties to make piecemeal investments in the litigation, gradually reveal information to each other, and negotiate a settlement at any given point in time).

n11. See generally *Theories of Rights* (Jeremy Waldron ed., 1984).

n12. See *infra* Section I.B.

n13. See Ronald Dworkin, *Rights as Trumps*, in *Theories of Rights*, *supra* note 11, at 153, 153; see also Joseph Raz, *Rights and Individual Well-Being*, in *Ethics in the Public Domain: Essays in the Morality of Law and Politics* 29, 30 (1994) (arguing that rights afford individuals' interests special protection that is more stringent than a requirement that state officials account for those interests in making decisions).

n14. For one exception, see Stephen Holmes & Cass R. Sunstein, *The Cost of Rights: Why Liberty Depends on Taxes* (1999) (factoring costs of enforcing rights into philosophy of entitlements). For specifics and shortcomings of this account, see *infra* notes 54-58 and accompanying text.

n15. Marc Galanter identified this negative correlation in his classic article *Why the "Haves" Come Out Ahead*. See *supra* note 8, at 103-04. As we already mentioned, this article does not address the entitlement destruction that occurs out of court. Instead, it focuses on the rule-making process in which wealthy "repeat players" use their cost advantage to defeat the unwealthy "one shotters" and shape legal precedent the way they want. See also Patricia Munch, *An Economic Analysis of Eminent Domain*, 84 J. Pol. Econ. 473, 495 (1976) (demonstrating that owners of high-valued properties, who spend more on eminent domain proceedings, receive compensation that exceeds their properties' market value, while owners of low-valued properties are undercompensated).

n16. See Robert Nozick, *Anarchy, State, and Utopia*, at ix-xi, 28-30 (1974) (favoring a strong deontological format of rights as unbending endowments).

n17. See Richard A. Posner, *Economic Analysis of Law* 40 (8th ed. 2011) ("The proper incentives are created by parceling out mutually exclusive rights to the use of particular resources among the members of society. If every piece of land is owned by someone - if there is always someone who can exclude all others from access to any given area - then individuals will endeavor by cultivation or other improvements to maximize the value of land. Land is just an example. The principle applies to all valuable resources."); see also Joe Mintoff, *Can Utilitarianism Justify Legal Rights with Moral Force?*, 151 U. Pa. L. Rev. 887, 901, 905-09 (2003) (justifying a utilitarian theory under which individuals are given rights in order to maximize human welfare); cf. David Lyons, *Utility and Rights*, in *Theories of Rights*, *supra* note 11, at 110, 111, 113-20 (arguing that utilitarian justifications of rights have no moral force).

n18. See generally Matthew D. Adler & Eric A. Posner, *New Foundations of Cost-Benefit Analysis* (2006).

n19. This feature looms large in Kaplow and Shavell's seminal juxtaposition of fairness against social welfare. See Louis Kaplow & Steven Shavell, *Fairness Versus Welfare* 11-12 (2002) (attesting that for purposes of economic theory, individuals' "taste for fairness is no different ... from a taste for a tangible good or for anything else").

n20. Another purpose of entitlements' clear demarcation is strengthening of ownership that incentivizes owners of valuable assets to put those assets to their best use. See generally Henry E. Smith, *Exclusion Versus Governance: Two Strategies for Delineating Property Rights*, 31 *J. Legal Stud.* S453 (2002).

n21. See R.H. Coase, *The Problem of Social Cost*, 3 *J.L. & Econ.* 1 (1960) (famously demonstrating that law can unlock movement of assets and entitlements to their most efficient users by reducing transaction costs that impede voluntary exchange).

n22. See, e.g., Munch, *supra* note 15, at 477 (showing that under the voluntary exchange system "competition among buyers ... will lead to the development of techniques to discover true seller reservation prices.").

n23. See Coase, *supra* note 21. For an insightful analysis of the theorem, see Robert Cooter, *The Cost of Coase*, 11 *J. Legal Stud.* 1 (1982).

n24. As explained by Cooter, *supra* note 23, at 14, "The [theorem's] basic idea ... is that the structure of the law which assigns property rights and liability does not matter so long as transaction costs are nil; bargaining will result in an efficient outcome no matter who bears the burden of liability."

n25. See *id.*

n26. For a both critical and comprehensive review of existing efficient-breach theories, see Daniel Markovits & Alan Schwartz, *The Myth of Efficient Breach: New Defenses of the Expectation Interest*, 97 *Va. L. Rev.* 1939, 1977-2005 (2011).

n27. *Id.* at 1943-45 (summarizing Law and Economics scholars' justification for efficient breach).

n28. See Daniel Friedmann, *The Efficient Breach Fallacy*, 18 J. Legal Stud. 1, 4 (1989). Theft, of course, is never efficient. See Richard L. Hasen & Richard H. McAdams, *The Surprisingly Complex Case Against Theft*, 17 Int'l Rev. L. & Econ. 367, 370-74 (1997) (explaining that society's unnecessary costs from theft include owners' defensive measures and thieves' operational investments that include expenditures on transactions with stolen goods); Gil Lahav, *A Principle of Justified Promise-Breaking and Its Application to Contract Law*, 57 N.Y.U. Ann. Surv. Am. L. 163, 184-85 (2000) ("Theft undermines the tremendous utility of certain intangible benefits associated with a theft-free society, such as: the ability to rely on the future presence of one's possessions; the ability to trust strangers not to steal one's personal property; and the ability to enjoy the privacy of a domicile that will not be invaded by thieves.").

n29. See Janet Cooper Alexander, *Do the Merits Matter? A Study of Settlements in Securities Class Actions*, 43 Stan. L. Rev. 497, 548-50 (1991) (attesting that plaintiffs in securities class actions extort favorable settlements from defendants because defendants' costs are much higher than theirs); Lucian Arye Bebchuk & Howard F. Chang, *The Effect of Offer-of-Settlement Rules on the Terms of Settlement*, 28 J. Legal Stud. 489, 510-12 (1999) (noting that settlement terms as compared with expected judgment tend to favor the party with lower litigation costs and explaining how fee-shifting rules can ameliorate this problem); John C. Coffee, Jr., *New Myths and Old Realities: The American Law Institute Faces the Derivative Action*, 48 Bus. Law. 1407, 1415 n.39 (1993) ("The existence of asymmetric litigation costs could allow some plaintiffs to exploit this cost differential to obtain a settlement unrelated to the merits."); James D. Hurwitz, *Abuse of Governmental Processes, the First Amendment, and the Boundaries of Noerr*, 74 Geo. L.J. 65, 71 (1985) (noting that predatory litigation can be successful when it imposes disproportionate legal costs on a rival); D. Rosenberg & S. Shavell, *A Model in Which Suits Are Brought for Their Nuisance Value*, 5 Int'l Rev. L. & Econ. 3, 3 (1985) (demonstrating that strike suits with negative-expected value are possible when plaintiff can exploit asymmetric litigation costs to extort settlement); see also William H. Wagener, Note, *Modeling the Effect of One-Way Fee Shifting on Discovery Abuse in Private Antitrust Litigation*, 78 N.Y.U. L. Rev. 1887, 1902-04 (2003) (summarizing literature that analyzes the effects of litigation cost asymmetries).

n30. See, e.g., Bebchuk & Chang, *supra* note 29, at 510-11.

n31. See *id.*

n32. Consider again the conflict between Brutus Inc. and Anne, but assume this time that Anne has found an incredibly inexpensive and capable attorney who can vindicate her entitlement to quiet enjoyment for a \$ 1000 fee. Aware of this circumstance, Brutus makes a proposal to recognize the entitlement if Anne pays it \$ 1000 in return. The parties' conflict, of course, would be best resolved if Brutus were to recognize Anne's entitlement for free. The company's extortion of that payment, however, still leads to the economically second-best state of affairs, vastly superior to the otherwise probable scenario in which the parties go to court to litigate quiet enjoyment. Under that scenario, Anne's entitlement will be redeemed at a much steeper price. Brutus' extortion of \$ 1000 consequently can be viewed as an efficient transaction that saves the parties and society at large the expense of the trial and opens up the possibility for Anne's attorney to apply his talent elsewhere. As the famous adage goes, "A bad settlement is better than a good trial." See, e.g., *Strong v. BellSouth Telecomm., Inc.*, 173 F.R.D. 167, 172 (W.D. La. 1997) ("In this case, I could hold my nose and accept the [suspicious class-action] settlement, after all, it is said that a bad settlement is better than a good trial.").

n33. This declination separates mainstream economists from rights deontologists. See Ronald Dworkin, *Taking Rights Seriously* 92-97, 200 (1978) (asserting and justifying rights' immunity from utilitarian trade-offs).

n34. See generally Kaplow & Shavell, *supra* note 19, at 5 (underscoring normative superiority of cost-benefit analysis).

n35. See Jack N. Rakove & Elizabeth Beaumont, *Rights Talk in the Past Tense*, 52 *Stan. L. Rev.* 1865, 1865 (2000) (reviewing Richard A. Primus, *The American Language of Rights* (1999)) ("Rights have been a staple of Anglo-American law and politics since at least the seventeenth century."); see also J. Harvie Wilkinson III, *The Dual Lives of Rights: The Rhetoric and Practice of Rights in America*, 98 *Calif. L. Rev.* 277, 281 (2010) (observing that rights "help[] to shape our most important legal institutions," while arguing that rights are absolute only in speech, but defeasible in practice when special circumstances call for their removal, and describing this duality as an example of "our nation's most admirable qualities").

n36. See James Griffin, *On Human Rights* (2008) (unfolding a comprehensive personhood-based account of human rights); Margaret Jane Radin, *Property and Personhood*, 34 *Stan L. Rev.* 957, 957 (1982) (developing a personhood account of entitlements that includes protection of property rights upon recognition that a person cannot properly develop herself without having some control over resources in the external environment).

n37. See Gerald Dworkin, *The Theory and Practice of Autonomy* (1988) (laying out autonomy theory); H.L.A. Hart, *Legal Rights*, in *Essays on Bentham: Studies in Jurisprudence and Political Theory* 162, 183-84 (1982) (advancing an autonomy-based account of rights); see also Charles Fried, *Modern Liberty and the Limits of Government* (2007) (offering an account of rights that underscores the primacy of individuals' autonomy over the government's vision of the good); Matthew D. Adler, *Rights Against Rules: The Moral Structure of American Constitutional Law*, 97 *Mich. L. Rev.* 1, 2-3 (1998) (recommending "moral reading" of the Constitution that perceives rights as limitations on the government's power to set up rules regulating individuals' conduct).

n38. See, e.g., Neil MacCormick, *Legal Right and Social Democracy: Essays in Legal and Political Philosophy* 143 (1982) ("Rights always and necessarily concern human goods, that is, concern what it is, at least in normal circumstances, good for a person to have.").

n39. See, e.g., John H. Garvey, *What Are Freedoms For?* (1996) (offering an account of freedoms consisting of rights that serve societal good).

n40. For a superb exposition of existing theories of rights, see Alon Harel, Theories of Rights, in *The Blackwell Guide to the Philosophy of Law and Legal Theory* (Martin P. Golding & William A. Edmundson eds., 2005).

n41. For an early statement of this idea, see 2 John Stuart Mill, *Principles of Political Economy with Some of Their Applications to Social Philosophy* 560 (D. Appleton & Co. 1909) (1848) ("Whatever theory we adopt respecting the foundation of the social union, and under whatever political institutions we live, there is a circle around every individual human being, which no government, be it that of one, of a few, or of the many, ought to be permitted to overstep There is, or ought to be, some space in human existence thus entrenched around, and sacred from authoritative intrusion").

n42. See Griffin, *supra* note 36, at 33-37; Radin, *supra* note 36, at 1014-15.

n43. See Dworkin, *supra* note 37; Hart, *supra* note 37.

n44. See, e.g., Matthew H. Kramer, Rights Without Trimmings, in *A Debate Over Rights: Philosophical Enquiries* 7, 75 (Matthew H. Kramer et al. eds., 1998).

n45. See MacCormick, *supra* note 38, at 143.

n46. The correlativity concept originates from Hohfeld, *supra* note 5, at 30 (introducing the concept of "jural correlatives" and explaining duties as correlatives of rights).

n47. Not all consequentialist theories of rights are utilitarian. See, e.g., Garvey, *supra* note 39, at 2 (arguing that rights exist to enable individuals to make virtuous choices and to impose corresponding moral duties on government).

n48. See Harel, *supra* note 40, at 197 (underscoring that, in some cases, "it is utilitarian or quasi-utilitarian considerations that determine who controls a duty").

n49. See Gary S. Becker & George J. Stigler, Law Enforcement, Malfeasance, and Compensation of Enforcers, 3 J. Legal Stud. 1, 13-16 (1974) (identifying conditions under which private enforcement of the law economically dominates public enforcement).

n50. See William M. Landes & Richard A. Posner, The Private Enforcement of Law, 4 J. Legal Stud. 1, 14-15 (1975) (arguing that private enforcement is economically suboptimal when government can intensify deterrence by increasing penalties without making expensive enforcement efforts, while self-interested private enforcers will make efforts to realize their entitlements).

n51. See, e.g., Jonathan R. Hay et al., Privatization in Transition Economies: Toward a Theory of Legal Reform, 40 Eur. Econ. Rev. 559, 562-64 (1996) (demonstrating that efficient enforcement of entitlements crowds out enforcement by mafia and vice versa).

n52. The four groups of theories described in the preceding paragraphs track the analytical divide between the "will" or "choice" theory of rights and the "interest" theory of rights. See Harel, *supra* note 40, at 194-95. Another important aspect of rights theories is whether rights should function as "trumps" that defeat competing interests even when those interests outscore the rights on the utility scale. The rights-as-trumps approach characterizes the personhood-and the autonomy-based theories of rights. *Id.* at 197-98. Some of the wellbeing theories of entitlements adopt this approach as well. See Dworkin, *supra* note 33, at 91-93, 199, 204-05 (arguing that violating one's right means "treating a man as less than a man, or as less worthy of concern than other men" and that rights constitute "the majority's promise to the minorities that their dignity and equality will be respected."). Under the prevalent - welfare-oriented - consequentialist accounts, rights are defeasible in the sense that a cost-benefit analysis can justify their removal. See, e.g., Richard A. Posner, Overcoming Law 387-405 (1995). These differences do not affect our discussion of entitlements' unrealizability.

Virginia Law Review Association).

n67. See Robert H. Mnookin & Lewis Kornhauser, *Bargaining in the Shadow of the Law: The Case of Divorce*, 88 Yale L.J. 950, 997 (1979).

n68. Cf. Daron Acemoglu, *Reward Structures and the Allocation of Talent*, 39 Eur. Econ. Rev. 17, 18, 20, 27, 32 (1995) (identifying similar dynamics in societies that tolerate corruption).

n69. See *supra* text accompanying note 1.

n70. Pub. L. No. 104-67, 109 Stat. 737 (codified as amended in scattered sections of 15 U.S.C.).

n71. For discussion of this rule and the relevant case law and literature, see Richard A. Bierschbach & Alex Stein, *Overenforcement*, 93 Geo. L.J. 1743, 1762-65 (2005).

n72. *Id.*

n73. See Stephen J. Choi, *Do the Merits Matter Less After the Private Securities Litigation Reform Act?*, 23 J.L. Econ. & Org. 598, 622-23 (2007) (demonstrating empirically that alongside their discouragement of frivolous suits, the PSLRA's heightened pleading and proof requirements have discouraged many meritorious suits by making them unprofitable).

n74. See 15 U.S.C. § 78r (2006) (codified version).

n75. Pub. L. No. 73-22, ch. 38, 48 Stat. 74, 83 (1933) (codified as amended at 15 U.S.C. § 77k(e) (2006)).

n76. *Akerman v. Oryx Commc'ns*, 810 F.2d 336, 341 (2d. Cir. 1987).

n77. *Alaska Elec. Pension Fund v. Flowserve Corp.*, 572 F.3d 221, 234 (5th Cir. 2009) (citing and quoting *Akerman*, 810 F.2d at 341).

n78. *Akerman v. Oryx Commc'ns*, 609 F. Supp. 363, 371 (S.D.N.Y. 1984) (quoting *Collins v. Signetics Corp.*, 605 F.2d 110, 115-16 (3d Cir. 1979) (emphasis added)). The *Akerman* trial court further observed that "the influence of general market factors ... entitles defendants only to an appropriate reduction of damages" and that "the legislative choice to impose the burden of proof on defendants under section 11(e) represents a judgment that the risk of any uncertainty as to causality must fall upon defendants in order to insure the full disclosure that is the primary goal of the Act." *Id.* at 371-72. The court referred in this connection to the Supreme Court's vision of burdens of proof as "[serving] to allocate the risk of error between the litigants and [indicating] the relative importance attached to the ultimate decision." *Id.* at 371 (quoting *Herman & MacLean v. Huddleston*, 459 U.S. 375, 389 (1983)). For similar interpretations of Section 11(e) of the Securities Act, see *In re Adams Golf, Inc., Sec. Litig.*, 618 F. Supp. 2d 343, 347 (D. Del. 2009) (requiring defendant asserting Section 11(e) defense to prove "negative causation" (citing *Akerman*, 810 F.2d at 340, and *Collins*, 605 F.2d at 114)); see also *In re DDI Corp. Sec. Litig.*, No. CV 03-7063 NM, 2005 WL 3090882, at 14 (C.D. Cal. July 21, 2005) (attesting that defendant's proof burden under Section 11(e) is "heavy" (citing *In re Dynegy, Inc. Sec. Litig.*, 339 F. Supp. 2d 804, 867-68 (S.D. Tex. 2004))).

n79. See *In re Enron Corp. Sec. Derivative & "ERISA" Litig.*, 529 F. Supp. 2d 644, 720 (S.D. Tex. 2006) (noting that "one method increasingly recognized by courts and mandated by some of them is an event study, a statistical method of measuring the effect of a particular event such as a press release ... or a prospectus, on the price of a company's stock" and citing court decisions (footnote omitted)); *In re N. Telecom Ltd. Sec. Litig.*, 116 F. Supp. 2d 446, 460, 468 (S.D.N.Y. 2000) (granting summary judgment for defendants where their expert's event study, uncontroverted by the plaintiffs, showed that none of the challenged statements caused increases in the stock price); see also Michael J. Kaufman & John M. Wunderlich, *Regressing: The Troubling Dispositive Role of Event Studies in Securities Fraud Litigation*, 15 *Stan. J.L. Bus. & Fin.* 183, 187-88, 260 (2009) (documenting and criticizing the prevalence of event studies in securities fraud litigation); Marc I. Steinberg & Brent A. Kirby, *The Assault on Section 11 of the Securities Act: A Study in Judicial Activism*, 63 *Rutgers L. Rev.* 1, 36-37 (2010) (documenting defendants' frequent resort to event studies in establishing "negative causation" under Section 11(e) of the Securities Act).

n80. See, e.g., *New Eng. Health Care Emp. Pension Fund v. Fruit of the Loom*, 234 F.R.D. 627, 634-35 (W.D. Ky. 2006) (finding that a "significant component" in plaintiffs' reimbursable expenses of more than two million dollars (not including attorneys' fees) "was the cost of experts and consultants"); Merritt B. Fox, *Why Civil Liability for Disclosure Violations When Issuers Do Not Trade?*, 2009 *Wis. L. Rev.* 297, 306-07 (including the high cost of experts among the factors that raise the social cost of securities fraud litigation).

n81. See generally Gideon Parchomovsky & Alex Stein, *The Distortionary Effect of Evidence on Primary Behavior*, 124 *Harv. L. Rev.* 518 (2010) (describing how the quest for favorable evidence affects - and oftentimes distorts - a party's primary behavior); see also Chris William Sanchirico, *A Primary-Activity Approach to Proof Burdens*, 37 *J. Legal Stud.* 273, 276-80 (2008) (showing how allocation of proof burdens can affect the cost and direction of underlying primary activity); Robert E. Scott & George G. Triantis, *Anticipating Litigation in Contract Design*, 115 *Yale L.J.* 814, 858-70 (2006) (showing how default and contractual allocations-of-proof burdens can improve

performance of contractual obligations).

n82. See *supra* note 32.

n83. From the entitlement holder's point of view, going to court will only be rational in a rather unusual scenario in which she values her satisfaction from vindicating her entitlement at more than \$ 5000.

n84. Recently, a private company made itself an assignee of multiple copyrights solely for the purpose of filing suits against alleged infringers and profiting from those suits by utilizing economies of scale. The company had no standing to file those suits, as only the legal or beneficial copyright owner can sue for infringement. See 17 U.S.C. §§106, 501(b) (2006); *Silvers v. Sony Pictures Entm't*, 402 F.3d 881, 884 (9th Cir. 2005) (en banc). For that reason, presumably, the company did not disclose its assignee status and the copyright owner's identity in two hundred actions for copyright infringement. The court dismissed the company from the case and ordered it to show cause why it should not be sanctioned for egregious litigation behavior. *Righthaven LLC v. Democratic Underground, LLC*, 791 F. Supp. 2d 968, 978-79 (D. Nev. 2011).

n85. See Gideon Parchomovsky & Alex Stein, *Originality*, 95 Va. L. Rev. 1505, 1509-16 (2009) and sources cited therein.

n86. See, e.g., Neil Weinstock Netanel, *Copyright's Paradox* 54-80 (2008) (criticizing "copyright's ungainly expansion"); Yochai Benkler, *Free as the Air to Common Use: First Amendment Constraints on Enclosure of the Public Domain*, 74 N.Y.U. L. Rev. 354, 354-60 (1999) (criticizing the "enclosure movement" in copyright law: the current tendency to outlaw uses of expressive works that were previously considered legitimate); Jessica Litman, *Billowing White Goo*, 31 Colum. J.L. & Arts 587, 587 (2008) (attesting that rights granted by copyright law underwent extraordinary expansion over the past fifty years); John Tehranian, *Infringement Nation: Copyright Reform and the Law/Norm Gap*, 3 Utah L. Rev. 537, 543-48 (2007) (observing that copyright protection and liability for copyright infringement are excessive); Pamela Samuelson, *The Copyright Grab*, *Wired*, Jan. 1996, at 134, 134 (describing the enclosure dynamic as "the copyright grab"). See generally Siva Vaidhyanathan, *Copyrights and Copywrongs: The Rise of Intellectual Property and How It Threatens Creativity* (2001).

n87. *Dellar v. Samuel Goldwyn, Inc.*, 104 F.2d 661, 662 (2d Cir. 1939).

n88. Gideon Parchomovsky & Philip J. Weiser, *Beyond Fair Use*, 96 Cornell L. Rev. 91, 100 (2010) ("The standard's vagueness prevents actors from discerning the optimal behavior that the law requires of them.").

n89. See James Gibson, Risk Aversion and Rights Accretion in Intellectual Property Law, 116 Yale L.J. 882, 884 (2007).

n90. *Id.* at 884, 887.

n91. *Id.* at 884. But see Steven J. Horowitz, Copyright's Asymmetric Uncertainty, 79 U. Chi. L. Rev. 333, 360-61 (2012) (arguing based on the prospect theory that uncertainty of users' liability stimulates use of copyrighted works as people generally prefer uncertain losses over certain ones).

n92. See Stanley M. Besen, Sheila N. Kirby & Steven C. Salop, An Economic Analysis of Copyright Collectives, 78 Va. L. Rev. 383, 390 (1992) (explaining how copyright collectives economize on monitoring and collection costs).

n93. See Wendy M. Grossman, Is a Picture Really Worth £ 1,000?, The Guardian, Nov. 27, 2008, at 1, available at <http://www.guardian.co.uk/technology/2008/nov/27/internet-photography> (same strategy used by a large picture company).

n94. See, e.g., Michelle Castillo, Law Firm Finds Success Targeting Those Who Post Copyrighted Images, Time Techland, Feb. 9, 2011, <http://techland.time.com/2011/02/09/law-firm-finds-success-targeting-those-who-post-copyrighted-images/> (describing a law firm whose strategy is to "buy out the copyrights for viral content and then sue bloggers and other people who violate copyright by reposting those images" and reporting that the firm's annual profits from these suits exceed \$ 300,000); Alison Frankel, Porn Copyright Troll Targets Strike Back in New Class Action, Reuters, July 6, 2012, <http://blogs.reuters.com/alison-frankel/2012/07/06/porn-copyright-troll-targets-strike-back-in-new-class-action/> (reporting that a company pressured thousands of users of the Internet into settlement payments after accusing them of unpermitted downloading of its copyrighted porn materials and that a class action was filed to fend off this practice and reimburse victims).

n95. Indeed, as Professor Jason Mazzone recently demonstrated, copyright owners oftentimes exploit their strategic advantage by filing suits for remedies they do not lawfully deserve. See Jason Mazzone, Copyfraud and Other Abuses of Intellectual Property Law (2011).

n96. Gideon Parchomovsky & R. Polk Wagner, Patent Portfolios, 154 U. Pa. L. Rev. 1, 36 (2005).

n97. *Id.*

n115. Id. at 430.

n116. Pub. L. No. 109-2, 119 Stat. 4 (codified at 28 U.S.C. § 1332(d) (2006)).

n117. Caldwell, 536 F.3d at 430.

n118. Id. at 423, 430.

n119. See, e.g., Dwight R. Carswell, Comment, CAFA and Parens Patriae Actions, 78 U. Chi. L. Rev. 345, 353-57 (2011) (discussing the Caldwell decision).

n120. See, e.g., David Dietz & Darrell Preston, Home Insurers' Secret Tactics Cheat Fire Victims, Hike Profits, Bloomberg, Aug. 3, 2007, <http://www.bloomberg.com/apps/news?pid=21070001&sid=aIOpZROwhvNI> (observing that insurance companies systematically underpay claims and providing examples).

n121. We discuss these mechanisms in Part IV below.

n122. See, e.g., Cal. Bus. & Prof. Code § 7028(a), (b) (West 2012) (providing that unlicensed work as a contractor is a misdemeanor punishable upon first conviction "by a fine not exceeding five thousand dollars (\$ 5,000) or by imprisonment in a county jail not exceeding six months, or by both that fine and imprisonment").

n123. See, e.g., Brandon L. Garrett, *Aggregation in Criminal Law*, 95 Calif. L. Rev. 383, 393 (2007) (noting that prosecutors, as repeat players, "can achieve economies of scale ... by coordinating, channeling and settling cases ... in the shadow of strict sentencing rules that routinize outcomes").

n124. Cf. Gabriel J. Chin & Richard W. Holmes, Jr., *Effective Assistance of Counsel and the Consequences of Guilty Pleas*, 87 Cornell L. Rev. 697, 703 (2002) ("In some cases defendants who might be acquitted after trial plead guilty to relatively minor offenses because the cost of defense exceeds seemingly minimal penalties and consequences.").

n125. See, e.g., *id.*

n126. Importantly, the defendant in our example cannot obtain legal representation at the state's expense. Because he is not poor, he is not entitled to a state-funded attorney under *Gideon v. Wainwright*, 372 U.S. 335 (1963). More crucially, *Gideon* entitles an indigent defendant to be represented by counsel at the government's expense only when he stands to receive prison sentence upon conviction. Hence, even if our defendant were poor, he would still be ineligible for *Gideon*'s protection as in the event of conviction he will only be fined rather than go to jail. See *Scott v. Illinois*, 440 U.S. 367, 373-74 (1979) (holding that only actual imprisonment prospect makes an indigent defendant eligible for *Gideon* protection). Note that a defendant's eligibility for a state-funded counsel under *Gideon* does not level the playfield. Criminal defense requires expert assistance and testimony in a variety of areas ranging from DNA and forensics to corporate accounting. See Paul C. Giannelli, *Ake v. Oklahoma: The Right to Expert Assistance in a Post-Daubert, Post-DNA World*, 89 Cornell L. Rev. 1305, 1307-10 (2004). Under extant doctrine, an indigent defendant can receive expert assistance at the government's expense only upon showing of necessity. See Criminal Justice Act of 1964, 18 U.S.C. § 3006A(e)(1) (2006) (entitling an indigent defendant to government-funded expert assistance when "necessary for adequate representation"); *Medina v. California*, 505 U.S. 437, 444-45 (1992) (interpreting *Ake v. Oklahoma* as "an expansion of earlier due process cases holding that an indigent criminal defendant is entitled to the minimum assistance necessary to assure him 'a fair opportunity to present his defense' and 'to participate meaningfully in [the] judicial proceeding.'" (quoting *Ake v. Oklahoma*, 470 U.S. 68, 76 (1985)); *Ake*, 470 U.S. at 76, 79-85; see also Giannelli, *supra*, at 1336, 1380-81 (attesting that courts use "necessity" and "particularized need" as governing standards and that "it is not clear that these two formulations differ in result."); David Alan Sklansky, *Hearsay's Last Hurrah*, 2009 Sup. Ct. Rev. 1, 7, 75-77 (proposing to expand the Sixth Amendment confrontation right to enable defendants to challenge prosecution's forensic evidence with the help of court-appointed experts); cf. *Commonwealth v. Serge*, 896 A.2d 1170, 1185 (Pa. 2006) (noting, in relation to expensive computer-generated animation that prosecution adduced as evidence of guilt, that defendant's financial inability to acquire computer-generated animation for exculpatory purposes weighs against admissibility).

n127. The defendant's difficulty is compounded by an agency problem. If the prosecutor were to spend her own money on prosecuting the case, she would likely not prosecute the defendant. However, since she is an agent of the state that uses public money under imperfect oversight of her superiors, she can afford prosecuting cases even when doing so is not cost-efficient.

n128. See Giannelli, *supra* note 126, at 1331.

n129. *Id.* at 1327-31.

n130. *Id.* at 1332.

n131. *Id.*

n132. See Russell D. Covey, Fixed Justice: Reforming Plea Bargaining with Plea-Based Ceilings, 82 Tul. L. Rev. 1237, 1254 (2008) (discussing strategic "horizontal overcharging," the widespread prosecutorial practice of charging defendants with multiple counts of the same or similar offense(s) when a criminal can be properly penalized by a single count); see also Frank O. Bowman, III, Debacle: How the Supreme Court Has Mangled American Sentencing Law and How It Might Yet Be Mended, 77 U. Chi. L. Rev. 367, 464 (2010) (attesting that prosecutors file multiple-count charges to achieve higher sentences).

n133. See generally Uzi Segal & Alex Stein, Ambiguity Aversion and the Criminal Process, 81 Notre Dame L. Rev. 1495 (2006) (explaining and illustrating criminal defendants' aversion toward risk and ambiguity).

n134. See Chin & Holmes, *supra* note 124, at 703.

n135. See Stephanos Bibas, Plea Bargaining Outside the Shadow of Trial, 117 Harv. L. Rev. 2464, 2496-527 (2004).

n136. *Id.* at 2470-86.

n137. Cf. Alan Wertheimer, *The Equalization of Legal Resources*, 17 *Phil. & Pub. Aff.* 303, 306-07 (1988) (advocating imposition of limits on parties' ability to litigate as a means for achieving equal distribution of legal resources).

n138. Cf. Margaret H. Lemos, *Special Incentives to Sue*, 95 *Minn. L. Rev.* 782, 782-83 (2011) (analyzing one-way attorneys' fee shifts and damage multipliers that function as special incentives to file suits in federal courts and expressing doubts about their efficacy on the ground as judges react negatively to increased caseload).

n139. In appropriate cases, pooling rightsholders into a class action will allow them to realize their entitlements. This pooling, however, is only possible when the rightsholders' suits exhibit commonality. Fed. R. Civ. P. 23(a)(2). Even then, the class attorney's self-seeking conduct (e.g., a collusive settlement with the defendant) might lead to the entitlements' erosion. See generally John C. Coffee, Jr., *Class Action Accountability: Reconciling Exit, Voice, and Loyalty in Representative Litigation*, 100 *Colum. L. Rev.* 370 (2000) (analyzing agency costs in class actions and ways to reduce those costs). Under certain conditions, state attorneys general and federal regulatory agencies may decide to seek legal redress for aggrieved citizens. These conditions typically include commonality of suits and presence of a strong public interest in prosecuting those suits. See Myriam Gilles & Gary Friedman, *After Class: Aggregate Litigation in the Wake of AT&T Mobility v. Concepcion*, 79 *U. Chi. L. Rev.* 623 (2012); Adam S. Zimmerman, *Distributing Justice*, 86 *N.Y.U. L. Rev.* 500, 518-39 (2011). Even then, there will be no alignment between the agencies' and the attorneys' general goals and the interests of the citizens they represent. For a superb analysis of this misalignment and its policy implications, see Margaret H. Lemos, *Aggregate Litigation Goes Public: Representative Suits by State Attorneys General*, 126 *Harv. L. Rev.* (forthcoming 2012) (unpublished manuscript, on file with the Virginia Law Review Association); see also Zimmerman, *supra*, at 541-53 (identifying agencies' limitations as protectors of individual rights). A class action still appears to be an economically superior solution for common question suits. See David Rosenberg & Kathryn E. Spier, *On Structural Bias in the Litigation of Common Question Claims* (June 20, 2012) (unpublished manuscript, available at <http://ssrn.com/abstract=1950196>) (identifying a structural bias in non-unified common question litigation: while each plaintiff invests in the litigation to promote his own case, the defendant spends to defeat all plaintiffs); see also David Rosenberg, *Mandatory-Litigation Class Action: The Only Option for Mass Tort Cases*, 115 *Harv. L. Rev.* 831, 831-33 (2002) (arguing that mandatory class action enhances social welfare).

n142. See Richard A. Posner, *Comment on Donohue*, 22 *Law & Soc'y Rev.* 927, 928 (1988) (claiming that "making the losing party pay the winning party's attorney's fees would reduce, not increase, the settlement rate"); Steven Shavell, *Suit, Settlement, and Trial: A Theoretical Analysis Under Alternative Methods for the Allocation of Legal Costs*, 11 *J. Legal Stud.* 55, 65-66 (1982) (arguing that there will be fewer settlements under a fee-shifting regime when parties' expected judgments are the same). But see John J. Donohue III, *Opting for the British Rule, or If Posner and Shavell Can't Remember the Coase Theorem, Who Will?*, 104 *Harv. L. Rev.* 1093 (1991). Full discussion of the "English Rule or American Rule?" debate is beyond the ken of this Article.

n143. See, e.g., Jules Coleman & Charles Silver, *Justice in Settlements*, 4 Soc. Phil. & Pol'y 102, 114-19 (1986) (arguing that the private and often secret character of settlements deprives society of the valuable information and public goods generated by adjudication); Ben Depoorter, *Law in the Shadow of Bargaining: The Feedback Effect of Civil Settlements*, 95 Cornell L. Rev. 957, 960 (2010) (demonstrating that some settlements create socially undesirable benchmarks for primary behavior); Owen M. Fiss, *Against Settlement*, 93 Yale L.J. 1073, 1075-76 (1984) (underscoring distortionary effects of settlements and describing settlement as a "capitulation to the conditions of mass society [that] should be neither encouraged nor praised").

n144. See Jeremy Bentham, *Scotch Reform; Considered, with Reference to the Plan, Proposed in the Late Parliament, for the Regulation of the Courts, and the Administration of Justice, in Scotland* 75-76 (London, R. Taylor & Co. 1808) (describing settlements as "repugnant to" and a "denial of" justice); see also Amalia D. Kessler, *Deciding Against Conciliation: The Nineteenth-Century Rejection of a European Transplant and the Rise of a Distinctively American Ideal of Adversarial Adjudication*, 10 Theoretical Inquiries L. 423, 438-41 (2009) (laying out an insightful historical account of Bentham's opposition to settlements).

n145. Allowing defendants to file early motions to dismiss the suit and requiring courts to decide those motions promptly may provide a partial solution to this problem. This approach is followed by the Anti-SLAPP (Strategic Lawsuit Against Public Participation) statutes, enacted by numerous states to protect citizens who petition the government against suits aiming to suppress their petitioning activities. Anti-SLAPP statutes allow aggrieved citizens to file an early motion to dismiss the suit. This motion will be granted and the plaintiff will be obligated to pay the citizen's legal fees if the court finds that the plaintiff sued the citizen because of her potentially meritorious petition to the government. See Paul D. Wilson & Noah C. Shaw, *Robber Barons, Back-Stabbers and Extortionists: How Far Does Anti-SLAPP Protection Go?*, 43 Urb. Law. 745, 745 (2011). Notably, courts recognize the cost advantage of SLAPP plaintiffs as one of the main reasons for granting early dismissal and cost-shifting remedies. See, e.g., *United States ex rel. Newsham v. Lockheed Missiles & Space Co.*, 190 F.3d 963, 970-71 (9th Cir. 1999) ("The hallmark of a SLAPP suit is that it lacks merit, and is brought with the goals of obtaining an economic advantage over a citizen party by increasing the cost of litigation to the point that the citizen party's case will be weakened or abandoned, and of deterring future litigation." (citing *Wilcox v. Superior Court*, 33 Cal. Rptr. 2d 446, 450 (Ct. App. 1994))); see also *Liberty Synergistics, Inc. v. Microflo Ltd.*, No. CV 11-0523, 2011 WL 4974832, at 10 (E.D.N.Y. Oct. 26, 2011) (acknowledging that "California has an interest in protecting its citizens from malicious [SLAPP], even when the only damage they suffer is the costs of litigating the underlying lawsuit").

n146. See generally Steven Shavell, *The Fundamental Divergence Between the Private and the Social Motive to Use the Legal System*, 26 J. Legal Stud. 575 (1997) (discussing misalignments between private and social incentives in litigation).

n147. See generally Barbara Allen Babcock, *Inventing the Public Defender*, 43 Am. Crim. L. Rev. 1267 (2006) (describing the history and the role of public defenders' offices across the United States).

n148. Henry E. Smith, *An Economic Analysis of Law Versus Equity* 17 (Oct. 22, 2010) (unpublished manuscript, available at http://www.law.yale.edu/documents/pdf/LEO/HSmith_LawVersusEquity7.pdf); see also Mark P. Gergen, John M. Golden & Henry E. Smith, *The Supreme Court's Accidental Revolution? The Test for Permanent Injunctions*, 112 Colum. L. Rev. 203, 242-49 (2012) (stating

and illustrating equity's rule in counteracting opportunistic behavior).

n149. For the goals and mechanics of punitive damages, see Dan Markel, *How Should Punitive Damages Work?*, 157 U. Pa. L. Rev. 1383 (2009).

n150. See A. Mitchell Polinsky & Steven Shavell, *Costly Litigation and Optimal Damages* (Jan. 24, 2012) (unpublished manuscript, available at <http://ssrn.com/abstract=1990786>). Tort litigation that consumes \$ 46 billion per year in litigation costs, *id.* at 2, vividly illustrates this point. Empirical evidence shows that for every dollar retained by the victim, the parties collectively expend one dollar on the litigation process. *Id.* Assume that litigation costs vary in proportion to damages and grant, for simplicity's sake, that plaintiffs and defendants expend on the litigation the same amount, $[\lambda]d$, that represents the relevant fraction ($[\lambda]$) of the plaintiff's damage (d). Because the parties' joint litigation expenditure, $2[\lambda]d$, equals the plaintiff's net recovery amount, $(1 - [\lambda])d$, then $[\lambda] = 1/3$. Hence, for every dollar retained by the plaintiff, the parties collectively expend on the litigation 67 cents (2/3). *Id.* at 10 & n.7. If so, every dollar that the torts system awards the victim must generate at least 67 cents in the marginal gain in deterrence. With every additional dollar that the system moves from defendants to plaintiffs, this condition becomes increasingly difficult to satisfy. *Id.*

n151. A. Mitchell Polinsky & Steven Shavell, *Punitive Damages: An Economic Analysis*, 111 Harv. L. Rev. 869, 896-97 (1998) (arguing that courts should take defendants' probability of escaping liability into account when calculating punitive damages).

n152. *Id.*

n153. *Cf. State Farm Mut. Auto. Ins. Co. v. Campbell*, 538 U.S. 408, 416-18, 425 (2003) (voiding on due process grounds award of \$ 145 million in punitive damages as an addition to \$ 1 million in compensatory damages against an insurance company that used strategic litigation to put unfair pressure on the insured, while indicating that a single-digit ratio between punitive and compensatory damages will pass constitutional muster).

n154. The Supreme Court has imposed constitutional limitations on state courts' power to award punitive damages. See *BMW of N. Am., Inc. v. Gore*, 517 U.S. 559 (1996). Specifically, the Court ruled that the Due Process Clause of the Fourteenth Amendment prohibits the imposition of punitive damages that are grossly excessive or arbitrary. *Id.* at 585-86. The Court explained that the amount of punitive damages must reflect the reprehensibility of the defendant's conduct. *Id.* at 575. The Court also set up a "single-digit ratio" benchmark for punitive damages: it held that due process normally prohibits any award of punitive damages that exceeds the plaintiff's compensatory damage award by ten times or more. *Id.* at 581-83.

LEXISNEXIS SUMMARY:

... By slightly adjusting trademark doctrine, presumptions (and the other approaches advocated in this Article) can simultaneously reduce the threat of frivolous lawsuits by trademark owners and ensure legitimate claims against an infringer proceeds without unnecessary hurdles. ... Infusion (Blurring Only) The previous Part demonstrated that courts analyzing traditional infringement actions let parody color the likelihood of confusion factors. ... Parody Cases Citing Campbell & Finding Trademark and/or Trademark Dilution Trademark No Trademark Infringement (%) Total (%) Infringement (%) * Trademark Dilution 0 (0) 1 (7) 1 (7) No Trademark Dilution 2 (100) 12 (93) 14 (93) Total 2 (100) 13 (100) 15 (100) *4*I excluded from this table one case that found no trademark *4*dilution, and then found both no trademark infringement and trademark *4*infringement as to two separate marks. ... "The Supreme Court's parody explication in Campbell as to expressive copyrightable works," the Grottanelli court stated, "is relevant to trademarks, especially a trademark parody that endeavors to promote primarily non-expressive products such as competing motorcycle repairs." ... We shall see that, due to a variety of differences between copyright and trademark, the protection afforded to parody and satire should be, as a matter of doctrine, broader in trademark law than in copyright. ... Courts should focus on the speech and not the harm to the trademark owner: hybrid speech will be noncommercial where noncommercial elements dominate or are inextricably intertwined with noncommercial expression. ... SEE FIGURE IN ORIGINAL SEE FIGURE IN ORIGINAL The Anheuser-Busch court concluded that tarnishment had occurred because consumers might think Michelob actually contained oil. ... Placing parodies under this rubric safeguards speech in the face of strong, non-traditional trademark rights - rights designed to protect only the trademark owners' interests, not the public's.

HIGHLIGHT:

Abstract: This Article suggests using existing doctrinal levers in trademark law to accommodate parodies in a more balanced fashion. To reach this conclusion, this Article examines the parody doctrine in U.S. trademark law using two lenses. The first lens is trademark doctrine itself. Here I explore the various approaches courts use to resolve trademark disputes involving parody. The other lens is copyright law. Through this lens I examine how courts deciding trademark parody disputes employ the Supreme Court's most recent decision on parody in copyright, *Campbell v. Acuff-Rose*

Music, Inc. (1994). I also use this decision to examine the relationship between copyright and trademark parody claims. In other words, I ask the following question: how, if at all, are copyright and trademark claims related in parody cases?

Each perspective reveals something different. The first perspective shows that most courts resolve infringement claims by evaluating parody within some form of the likelihood of confusion test. It also shows that most courts assess dilution claims by analyzing parody as a form of noncommercial speech. The second perspective shows that copyright and trademark claims are related in a positive direction: if a parody case involves both copyright and trademark claims, courts always find for the defendant (no infringement) on both claims. Filtering the analysis through these two lens, I seek to sketch two revised parody tests - one for infringement and one for dilution. Both tests attempt to differentiate parody analyses from the traditional likelihood of confusion and dilution tests. These new approaches - which strengthen speech protections but do not create absolute defenses - account for the legitimate interests of both trademark owners and parodists.

A parody [of a trademark] must convey two simultaneous - and contradictory - messages: that it is the original, but also that it is not the original and is instead a parody. ⁿ¹

- The United States Court of Appeals for the Second Circuit

For the purposes of copyright law, the nub of the definitions, and the heart of any parodist's claim to quote from existing material, is the use of some elements of a prior author's composition to create a new one that, at least in part, comments on that author's works. ⁿ²

- The Supreme Court of the United States

TEXT:

[*1023]

INTRODUCTION

This Article argues that the current parody doctrine in trademark law needs adjustment. Currently courts analyze parody claims, and often draw on copyright law to resolve trademark claims that involve parody. This has resulted in a distortion of trademark law when applied to parodies - in part because courts focus too much on an expanded notion of confusion, and in part because courts draw broadly, instead of narrowly, from copyright law's approach to parody. Nevertheless, the surgical procedure trademark law needs can be relatively painless. Some courts already use the tools to make the necessary nips and tucks.

Trademark law - indeed language itself - is responsible for at least part of the problem courts have confronted in the parody context. Comedian George Carlin recognized the force and confusion of language when he quipped, "I recently went to a new doctor and noticed he was located in something called the Professional Building. I felt better right away." ⁿ³ It is the underlying features of language that makes regulating trademark law difficult: words are powerful. They rouse emotions. They evoke memories. They move you. ⁿ⁴ With so much human potential, it is no wonder that people sue each other over them. "South Butt," ⁿ⁵ "Mutant of Omaha," ⁿ⁶ "Chewy Vuiton," ⁿ⁷ "Richard Grasso" ⁿ⁸: Each one of these phrases incited a lawsuit ⁿ⁹ - and in each one of these lawsuits the defendant claimed the use of the word(s) was **[*1024]** protected as a "parody." And so the nature of words and their meaning makes evaluating them difficult. Parodies are no exception.

The issue of what constitutes a parody in trademark law, and what legal effect that finding should have, has been confusing courts for decades. Before several recent attempts to tackle the issue of parody in trademark law, ⁿ¹⁰ the last

comprehensive attempt to do so occurred in a law review article nearly twenty years ago.ⁿ¹¹ Then, in 1994, there seemed to be hope for clarity: the United States Supreme Court decided *Campbell v. Acuff-Rose Music, Inc.*ⁿ¹² There, the Court held that a parodic use of a copyrighted work could qualify as a noninfringing fair use.ⁿ¹³ Parody, the Court stated, was a form of comment or criticism that ridicules the original work by, for example, mimicking its style.ⁿ¹⁴ It can be distinguished from satire, which does not target the original work but instead uses it as a vehicle to express some other (perhaps critical) message.ⁿ¹⁵ The Court reasoned that parody had a greater claim to fair use than satire.ⁿ¹⁶ Parodists require the original works to make their comment or criticism. Satirists, on the other hand, have a weaker claim because they are not commenting or criticizing directly the work they use. Immediately, lower courts and commentators sought to apply and criticize the Campbell decision both in copyright and trademark contexts.ⁿ¹⁷

[*1025] In a previous article, I explained how lower courts have applied Campbell's general holding - a parody is a use of the original work to ridicule, criticize, or comment on it - in the copyright context.ⁿ¹⁸ What I left out, however, was a discussion of parody in trademark law. This omission was intentional: Campbell was a decision about copyright law, and its implications for trademark law are uncertain.

This Article explores the gap left in my previous article, using Campbell as a guide to examine the parody doctrine in trademark. It argues that Campbell provides a few insights into parody that trademark law should consider incorporating. At the same time, the decision illustrates some pertinent differences between copyright and trademark that suggest trademark law might need to clarify and expand its current approach to parody. By collecting and analyzing all trademark cases that cite Campbell, this Article presents evidence that courts treat trademark and copyright parody claims similarly. It then questions whether this is a wise legal choice. In the process, this Article argues the existing dichotomy between likelihood of confusion and trademark defenses need not be so rigid. Such an inflexible division misses the valuable role that presumptions can play in analyzing trademark infringement claims involving parody. By slightly adjusting trademark doctrine, presumptions (and the other approaches advocated in this Article) can simultaneously reduce the threat of frivolous lawsuits by trademark owners and ensure legitimate claims against an infringer proceeds without unnecessary hurdles. Thus, this Article argues that presumptions and slight doctrinal adjustments can help adjust trademark law doctrine to accommodate the legitimate interests of both parodists and trademark owners.

The analysis, then, requires a comparison of parody and copyright and trademark law. And this begins, of course, with the meaning of the term "parody" itself. This starting point reveals, as the epigrams that begin this Article demonstrate, that copyright and trademark define parody similarly: both focus on how the parody both draws on and differentiates itself from the original.

The next obvious point of comparison is the legal analysis each regime uses to apply parody to its existing legal framework. Here [*1026] differences emerge. In copyright, the parody analysis occurs after the infringement analysis, as a defense. Parody in trademark law, by contrast, operates during the infringement analysis. It is not, as courts and commentators tell us, a real defense.ⁿ¹⁹ Because parody comes into play during the infringement analysis, the legal inquiry focuses on trademark infringement's staple concept: likelihood of confusion. Thus, it seems natural for courts to ask whether consumers are likely to be confused about the source of the parody's product,ⁿ²⁰ as infringement occurs when consumers are likely to be confused over a product's source.ⁿ²¹ The analysis of confusion is factor based, with courts looking to several factors, such as the similarity of the marks and marketing channels, the distinctiveness of the senior user's mark, and the user's intent.ⁿ²² Confusion, then, remains the watchword for parody analysis in trademark law.

Perhaps trademark law's focus on consumer confusion is unsurprising given that preventing confusion is one of its main functions. Yet it is [*1027] precisely this emphasis on confusion that raises questions about the parody doctrine itself. Parody is supposed to be a doctrine that insulates expressive speech from overzealous trademark owners. If instead it is merely a restated confusion test, then parody protects only so much speech as trademark law traditionally allows. That is odd for at least two reasons. First, it is superfluous for a legal doctrine to exist without having some effect. For this reason, the presence and recognition of the doctrine suggests that it is doing some extra work that

trademark law cannot alone handle. Second, parody is a recognized doctrine in copyright law. And here the effects of the doctrine are quite strong.ⁿ²³ Copyright and trademark law often cover - and claims are frequently brought regarding - the same objects. As a result, we have reason to think that parody may operate similarly in both legal regimes.

Yet on these facts, it is unclear whether parody is superfluous in trademark, or whether parody in practice operates similarly (in terms of outcome) in copyright and trademark. Using *Campbell* as a copyright lens, this Article analyzes this issue. First, this Article asks how courts citing *Campbell* have applied the parody doctrine in trademark law. If the commentators' conception of trademark parody is correct, we should find that courts merely restate the confusion tests in their parody analysis of trademark claims. The cases show that this is only partially true. Although most courts rely on the confusion test, few apply it without considering the parodic nature of the defendant's mark; parody, in other words, frequently influences how courts apply the confusion test. Yet, despite the diversity of methods used to analyze parody, not all are equally desirable. Some, however, provide valuable insights into what a better standard for parody might look like. The most promising approach appears in *Rogers v. Grimaldi*,ⁿ²⁴ in which the court held that titular parody of a trademark in an expressive work was entitled to a presumption of fairness.ⁿ²⁵

Although the lessons from *Rogers* and the other parody cases help describe the doctrinal tests, they do nothing to explain the relationship between copyright and trademark claims involving parody. To examine this relationship within the context of parody, *Campbell* again proves a useful way in. By focusing on cases that cite *Campbell*, this Article examines how courts have treated copyright and trademark claims when they appear in the same dispute. These cases show that trademark and [*1028] copyright claims are directly related. Of the fifteen cases involving copyright and trademark dilution claims, courts decided those claims identically 100% of the time. The same was true for all of the twenty-two cases involving copyright and trademark infringement claims. Put another way, in every case in which a court found copyright infringement, it also found trademark dilution and/or infringement. Likewise, in every case where the court found no copyright infringement existed, it also found that no trademark dilution or confusion existed. This provides evidence that copyright and trademark claims are related in parody cases.

Given this relationship, it seems likely that *Campbell*, its analysis, and its definition of parody are all shaping the way in which courts apply parody to trademark law. But should they be? *Campbell*, after all, was a copyright dispute - and copyright and trademark law are two different legal regimes calibrated to different sets of interests and goals. Their different features, both legal and normative, might make copyright and trademark law awkward bedfellows in the parody context. By analyzing some differences between copyright and trademark, we find the answer to the question above is both yes and no. The answer is yes because *Campbell* casts parody as a defense that protects expressive speech. The answer is no because *Campbell* is too narrow when applied to the infringement or dilution analyses in trademark law. This is particularly true in light of the expanding scope of trademark law and the noticeable dearth of trademark defenses. Thus, this Article proposes using *Campbell* to refine courts' approaches to parody in trademark law.

Drawing on all of the foregoing analysis, this Article proposes two new tests for parody in trademark law - one for infringement and one for dilution. For infringement, the proposed test presumes parodies are noninfringing. The plaintiff can rebut that presumption by showing that a direct competitor sells the parodic product, and the product competes directly with the plaintiff's goods or services. If the plaintiff succeeds, the court should evaluate the parody using a modified version of likelihood of confusion factors. In the dilution context, this Article proposes treating parody as "noncommercial," expanding the statutory exemption to dilution under the Lanham Act to cover uses that qualify as "as a mark." Each of these tests uses a definition of parody more expansive than the one laid out in *Campbell*. That is, "parody" includes satirical uses of trademarks.

This Article proceeds as follows. Part I sets the table for the subsequent discussion. It examines and evaluates how courts have [*1029] decided confusion and dilution questions when parody is involved. Although the discussion primarily focuses on published casesⁿ²⁶ that cite *Campbell*, it includes other cases as well. Next, Part II takes us in three interrelated directions. First, we evaluate how courts citing *Campbell* resolve trademark and copyright parody claims in the same case. Using *Campbell* as a lens, this Article then explores the differences between copyright and trademark law. Finally, we determine what aspects of *Campbell* should be incorporated into a parody trademark

doctrine. With a broad framework for trademark parody in view, Part III suggests two new defenses for parody - one for infringement and one for dilution.

I. THE CURRENT PARODY DOCTRINE IN TRADEMARK LAW

Parody analysis in trademark law has nuances that it lacks in copyright law. In copyright, parody shades the borders of the fair use defense, usually coloring the inquiry with a hue of fairness. In trademark, though, the story is complicated by courts' analytical techniques: although some courts use parody as a defense to infringement, most use parody to shade the infringement analysis. In this Part, I taxonomize each analytical approach courts take when resolving a traditional infringement (confusion) or dilution claim involving parody. Most - but not all - of these cases I analyze cite *Campbell*, for reasons I mentioned earlier. At the same time, I analyze these approaches, asking questions about their ability to adequately protect speech interests and trademark owners' rights. From this analysis I develop suggestions for how courts should address parody in trademark infringement and dilution claims.

A. Approaches to Trademark Infringement Actions Involving Parody

It turns out that, once courts find that a parody exists, they employ a variety of methods to determine whether and how that finding bears on the issue of confusion. Taking a certain approach can be determinative of infringement. Thus, it matters a great deal how courts approach the application of the parody finding. We start with the six approaches in cases citing *Campbell*.ⁿ²⁷ After this tour, we make two more stops, focusing on a few cases that did not cite *Campbell*.

[*1030]

1. Parody Approaches in Infringement Cases Citing *Campbell v. Acuff-Rose*

Courts citing *Campbell* use six different approaches to analyzing infringement claims that involve parodies. One method is the Infusion Approach, which uses a parody finding to alter how courts apply the traditional likelihood of confusion factors. Parody, in this category, narrows the scope of the confusion analysis. Second, courts use a Balancing Test when parody is at issue. The third approach does not require courts to alter their analyses at all; rather, it requires courts to apply the standard likelihood of confusion analysis. Under the fourth approach, courts treat parody as a form of Nominative Fair Use. Fifth, courts use the Alternative Means Approach, which asks whether the defendant could have made her point without using the plaintiff's trademark. Finally, some courts use the Separate Digit Approach, which characterizes parody as separate factor in the likelihood of confusion analysis.

As Table 1 shows, the majority of courts (53%) use the Infusion Approach. The next most popular approach is a Balancing Test, with 23% of courts using this method. A standard Confusion Test came in third, with 8% of courts using it. The last 16% of cases used three methods: 8% use Nominative Fair Use; 4% use an Alternative Means Test; and another 4% use a test that analyzes parody as a Separate Digit in the confusion analysis.

Table 1. Approaches to Trademark
Parody in Infringement Cases Citing
Campbell v. Acuff-Rose

Parody Approach	Times Used	%
Infusion	14	53%
Balancing/Rogers	6	23%
Confusion	2	8%
Nominative Fair Use	2*	8%
Alternative Means	1	4%

Separate Digit	1	4%
Total	26	100%

* One case, *Mattel v. Walking*

Mountain Productions, also

used a nominative fair use analysis to evaluate a parody trade dress claim. This was counted in both categories, which explains the total number of uses at 26, even though there are only 25 cases in the sample.

Raw numbers, of course, do not explain the benefits of any particular approach. That information comes only from examining each one.

[*1031]

a. The Infusion Approach

Some courts take the view that parody is not an affirmative defense, "but merely a way of phrasing the traditional response that customers are not likely to be confused as to the source, sponsorship or approval."ⁿ²⁸ This approach - the most dominant in the cases I examined - weaves a finding of parody into the analysis of the confusion factors.ⁿ²⁹ In some ways, it resembles how a parody finding in copyright affects the fair use inquiry.ⁿ³⁰ Typically, a finding of parody will swing in the parodist's favor certain traditional confusion factors: the strength of the mark,ⁿ³¹ the degree of similarity between the two marks,ⁿ³² the defendant's intent,ⁿ³³ product similarity,ⁿ³⁴ and, to a lesser extent, actual confusionⁿ³⁵ and [*1032] consumer sophistication.ⁿ³⁶

Louis Vuitton Malletier S.A. v. Haute Diggity Dog, LLC (*Louis Vuitton II*),ⁿ³⁷ is a good illustration of how a finding of parody colors the confusion factors. At issue in that case were the defendant's dog toys called "Chewy Vuiton," which mimicked the plaintiff's mark, "Louis Vuitton," under which the plaintiff sold luxury clothing and accessories (including dog accessories).ⁿ³⁸ The court first made an initial inquiry into whether a parody existed,ⁿ³⁹ much like *Campbell* instructed lower courts to do in copyright parody cases.ⁿ⁴⁰ After finding a parody, the court evaluated the factors with this finding in mind.ⁿ⁴¹

The court expressly discussed parody in relation to four factors. First, it noted parody was important in weighing the strength of the marks.ⁿ⁴² While a strong mark will usually favor the plaintiff, "the opposite may be true when a legitimate claim of parody is involved."ⁿ⁴³ This is because the parody needs to use a strong mark to be recognized as a parody; a weak mark would not likely be recognized as a parody.ⁿ⁴⁴ Because a mark is strong, the court reasoned, consumers know that the parody is not the original.ⁿ⁴⁵ Applying this framework to the mark at issue, the court found this factor favored the defendant.

Second, the court then explained that parody influenced its analysis of the marks' similarity.ⁿ⁴⁶ Indeed, what makes a parody qua parody is its ability to be similar enough to the original to evoke it and comment on it.ⁿ⁴⁷ This factor also favored the defendant because "[the defendant] appropriately mimicked a part of the LVM marks, but at the same time sufficiently distinguished its own product to communicate the satire."ⁿ⁴⁸

[*1033] The court also examined, thirdly, the defendant's intent, finding that the intent to parody "neutralized" this factor.ⁿ⁴⁹ Rather than evidencing bad faith, "the intent [to parody] is to do just the opposite - to evoke a humorous, satirical association that distinguishes the products."ⁿ⁵⁰ Finally, the court found the dissimilarity in products - was

important in the parody analysis - weighed against a finding of confusion.ⁿ⁵¹ Overall, the court found that the factors favored the defendant, and that "Haute Diggity Dog's marketing, sale, and distribution of 'Chewy Vuiton' dog toys [were] [not] likely to cause confusion ...[because the toys were] an obvious parody."ⁿ⁵²

Louis Vuitton II is not alone in using this test. Indeed, the Infusion Approach dominates the Campbell cases. Aside from being popular, this approach has some benefits. To some extent, it accounts for First Amendment considerations by altering the infringement analysis. When the court examines the similarity of the marks, for example, a parody can neutralize a factor that would otherwise weigh in favor of the plaintiff. This is similar to how Campbell treated parody with respect to section 107(2),ⁿ⁵³ which asks what kind of work the defendant used.ⁿ⁵⁴ Although highly expressive works typically receive more protection than factual ones, Campbell held that parodies must use highly expressive works; therefore, the defendant's use of a highly expressive work would not weigh in the plaintiff's favor.ⁿ⁵⁵ In both cases, First Amendment concerns alter how courts apply infringement (for trademark) and fair use (for copyright) factors.

Because the parody finding just alters the application of the infringement factors, it provides the First Amendment less weight than it could; instead, it simply finds that the work is not confusing.ⁿ⁵⁶ This becomes even clearer when one considers that these "altered" factors still may not tip the balance of parody in favor of noninfringement.ⁿ⁵⁷ **[*1034]** Indeed, the Infusion Approach is not a defense at all, as commentators repeatedly acknowledge.ⁿ⁵⁸ Thus, speech interests get shorter shrift under this approach than they would under a defense to infringement.

b. Parody as First Amendment Balancing

First Amendment jurisprudence often resorts to ad hoc balancing, weighing various interests against each other.ⁿ⁵⁹ Because parody implicates First Amendment concerns, some courts have used a Balancing Approach to resolve trademark claims that involve parody. Although the first court to use this approach (Rogers v. Grimaldi) did so prior to Campbell, it is important to review because post-Campbell cases have also used variants of the Rogers test in their analysis. In Rogers, the court applied a Balancing Approach to resolve a trademark infringement claim involving the title of a movie.ⁿ⁶⁰ "In general," the court wrote, "the [Lanham] Act should be construed to apply to artistic works only where the public interest in avoiding consumer confusion outweighs the public interest in free expression."ⁿ⁶¹ When the titular use of a mark included a celebrity's name, free expression would win "unless the title has no artistic relevance to the underlying work whatsoever, or, if it has some artistic relevance, unless the title explicitly misleads as to the source or the content of the work."ⁿ⁶²

Subsequent cases citing Campbell have followed and modified this approach, making it less speech friendly.ⁿ⁶³ In *Cliffs Notes, Inc. v. Bantam Doubleday Dell Publishing Group, Inc.*,ⁿ⁶⁴ for example, the court stated that "in deciding the reach of the Lanham Act in any case where an expressive work is alleged to infringe a trademark, it is appropriate to weigh the public interest in free expression against the public interest in **[*1035]** avoiding consumer confusion."ⁿ⁶⁵ But in applying the test,ⁿ⁶⁶ the court fell back into the confusion trap, concluding: "we do not believe that there is a likelihood that an ordinarily prudent purchaser would think that [the defendant's work,] *Spy Notes*[,] is actually a study guide produced by [the defendant], as opposed to a parody of [the plaintiff's work,] *Cliffs Notes*."ⁿ⁶⁷

Both cases illustrate the benefits and drawbacks of the Balancing Approach. Although balancing is often criticized as too vague to be protective,ⁿ⁶⁸ Rogers puts a free expression thumb on the infringement scale. Under Rogers, any expressive element will probably immunize a title from trademark infringement. Exceptions include titles that attempt to deceive - such as calling an unauthorized biography "an authorized biography."ⁿ⁶⁹

But balancing also has its drawbacks. Because the Rogers court had to hedge its bets, it allowed some infringement claims to go forward where the title was "explicitly misleading," an inquiry that could be resolved only through contextual analysis.ⁿ⁷⁰ But even more importantly, balancing often provides cover for old confusion memes to thrive. This is what happened in *Cliffs Notes*. There, the court found convincing the Rogers balancing approach but, in attempting to apply it, the court merely turned to an infusion-style likelihood of confusion assessment (without using the

factors).ⁿ⁷¹

So, if we are trying to learn from these approaches, the Balancing [*1036] Approach teaches us that presumptions are important, as are grounded, understandable standards and rules to apply should the presumption fail. Any First Amendment test must, therefore, incorporate some kind of strong presumption for speech interests, or else it risks fostering the growth of the confusion-centered memes.

c. Confusion

Although the Infusion and Balancing Approaches are popular, others exist. One such approach is not really a parody analysis at all. Instead, courts apply the likelihood of confusion in the standard way. As in *MasterCard International Inc. v. Nader* 2000,ⁿ⁷² courts never include a discussion of how parody alters the analysis.ⁿ⁷³ Although its copyright analysis included a discussion of parody, the court's trademark analysis did not mention parody. Ultimately, the court found no confusion based on the dissimilarities of the nature, purpose, and use of the mark by Ralph Nader's campaign for political purposes.ⁿ⁷⁴

As far as speech-protective tests go, this one is far from ideal. It does not expressly account for any speech-related interestsⁿ⁷⁵ (such as those of the speaker and the listener). Instead, it relies on the standard likelihood of confusion analysis. But the whole point of having a parody doctrine is to recognize that important interests besides confusion are at stake. When a use makes fun of or criticizes the mark (or some other issue), the First Amendment cautions against (private) censorship. Using a standard likelihood of confusion analysis does not account for these interests. Mark similarity, intent of the parties, and product similarity, for example, cut in favor of the mark owner in such cases. In parody cases, by contrast, they do not. Proposals to use a standard confusion analysis miss this very basic point.ⁿ⁷⁶ For this and other reasons discussed later, [*1037] the confusion test is inadequate.

d. Parody as Nominative Fair Use

Another approach - one taken by the court in *Mattel, Inc. v. Walking Mountain Productions*ⁿ⁷⁷ - analyzes parody under the judicially created doctrine of nominative fair use.ⁿ⁷⁸ This doctrine applies where the defendant uses the plaintiff's mark to refer to the plaintiff's mark, generally for comparison or criticism.ⁿ⁷⁹ So, for example, where an advertisement says, "Try our Product X. It has more ingredients than comparable Product Y(R)," nominative fair use would apply.

Nominative fair use, which replaces or supplements the factor-based confusion test, requires the plaintiff to show three elements.ⁿ⁸⁰ First, the plaintiff's product or service in question must be one not readily identifiable without use of the trademark. Second, only so much of the mark or marks may be used as is reasonably necessary to identify the plaintiff's product or service. And third, the user must not use the mark in a way that suggests sponsorship or endorsement by the trademark holder.

The *Walking Mountain* court applied this three-part test in the parody context as to trade dress.ⁿ⁸¹ In that case, the defendant had created a photography exhibit that used various Barbie dolls posing in sexually suggestive positions with food.ⁿ⁸² The court found that the defendant satisfied the first element of the nominative fair use doctrine, noting that it would have been "extremely difficult" to comment on the image of Barbie without using the image of Barbie.ⁿ⁸³ As to the second element, [*1038] the court found that the defendant satisfied this fact-intensiveⁿ⁸⁴ inquiry.ⁿ⁸⁵ Using Barbie's torso and body to comment on the sexuality of Barbie, the court found, was no more than reasonably necessary.ⁿ⁸⁶ Finally, the court found the last element was satisfied, dubbing it a "closer call" than the first two.ⁿ⁸⁷ This element, the court noted, does not require the defendant to use the mark to affirmatively endorse the product or service at issue. Nevertheless, the court focused on what the defendant did to reduce the risk that individuals would suspect endorsement. Important to the court were the promotional materials that the defendant distributed with his work, which included statements that the defendant's aim was to criticize the work.ⁿ⁸⁸ Critical commentaries, the court stated, were not likely to be sponsored by the trademark owner.ⁿ⁸⁹ For these reasons, this was nominative fair use.

Although seemingly a good candidate for a parody defense, nominative fair use faces at least two conceptual deficiencies. First, asking whether the defendant satisfied the third element - does the use suggest sponsorship or endorsement? - is a lot like asking whether consumers would be confused about the source of the product or service.ⁿ⁹⁰ In other words, the sponsorship/endorsement question is essentially the same question the confusion analysis seeks to answer, though framed in slightly different terms.ⁿ⁹¹

[*1039] Not all agree on this point. Stacey Dogan and Mark Lemley, for example, assert that nominative fair use contextualizes the inquiry in a way standard confusion analysis does not.ⁿ⁹² They argue it requires the court to "assess how the use measures up against" the purpose for which the mark is used.ⁿ⁹³ The confusion analysis, by contrast, is focused entirely on whether consumers are likely to be confused about the source or sponsorship of the mark.

It is not, however, entirely true that in the confusion analysis - at least as to parody - "the factfinder has no purpose against which to measure the nature of the use."ⁿ⁹⁴ As this Article demonstrates, courts repeatedly use parody as a way to shift the likelihood of confusion analysis. Under the Infusion Approach, for example, parody can alter the way courts apply the confusion factors. In such cases, courts apply those factors against the backdrop of parody and, consequently, its purpose. Additionally, it is not clear how merely having parody as a backdrop in the Nominative Fair Use Approach makes the inquiry into consumer perceptions any easier than it would be in another mode of analysis, such as the Infusion Approach. Indeed, the Infusion Approach achieves a similar goal with a more nuanced set of factors to apply.

Second, some courts have held that nominative fair use applies only when the defendant uses the plaintiff's mark exactly (or nearly exactly).ⁿ⁹⁵ This, of course, makes some sense, particularly if we import Campbell's requirement that a parody comment on the underlying mark. But even if we take that position, it seems odd to require near identity to avoid infringement. If the mark is not identical - or even closely similar - then consumers will not be confused about the source.ⁿ⁹⁶ All the more reason to allow parodies with non-identical marks - particularly if parody itself cannot overcome consumer confusion (or sponsorship/endorsement).

[*1040] The nominative fair use defense therefore seems particularly inadequate for parodic or satirical uses of trademarks. First Amendment interests are difficult to locate where the analysis resembles the traditional likelihood of confusion test. Instead of a real defense, the doctrine of nominative fair use is a recasting of the likelihood of confusion test; it is a confusion trap. For these reasons, nominative fair use does not adequately protect First Amendment interests.

e. Alternative Means Approach

Occasionally, a court will apply an Alternative Means Approach and hold that a defendant is liable for infringement where she could have made her statement without using the mark in a confusing manner. One mark user, for example, told the story of the O.J. Simpson murder trial using some of Dr. Seuss' trademarks.ⁿ⁹⁷ The court found the likelihood of confusion factors weighed in favor of infringement. As to what it called a "Possible First Amendment Defense," the court found none existed. Here, it adopted the Alternative Means Approach, which "dismisses First Amendment concerns where 'alternative avenues of communication' exist that might have been selected by the infringer to convey its message."ⁿ⁹⁸ The court found its fair use analysis of the copyright claim adequately captured the "alternative means" approach as applied to trademark claim: the defendant can take only so much as necessary for the use, and no more. For the court, the use of the trademarks was clearly satire, not parody. As such, the defendant could have used alternative means to comment on the O.J. Simpson trial, as the criticism and comment of it were not directed at Dr. Seuss' trademarks.ⁿ⁹⁹

Practically speaking, this approach is not different from the confusion analysis.ⁿ¹⁰⁰ But theoretically, it is actually much worse. Under this test, [*1041] the court purports to account for the First Amendment, but, in actuality, it subjugates that interest to the confusion doctrine. There will always be "alternative means of achieving a satirical or parodic ends"ⁿ¹⁰¹ that do not entail confusion. Much of the problem is rooted in a strict, but inapt, analogy to real propertyⁿ¹⁰²: trademarks are used to make speech that includes a statement about them; real property is used merely instrumentally to speak from some place. Yet courts treat trademarks as a location (i.e., as a parcel of real property)

rather than as speech itself. So they conclude that the defendant has no need to use the trademark when she can always say what she wants some other way. In other words, why stand on the plaintiff's mark to shout about the O.J. Simpson trial? Why not stand on some unowned parcel of land? Of course, this misses the important point that trademarks themselves are not merely owned "property," but also speech itself. This conclusion, however, coupled with the express rejection of First Amendment interests, makes the Alternative Means Approach inadequate. It, too, is a confusion trap.

f. Parody as a Separate Factor or Digit

Another way courts use parody is to weigh it as a separate "digit" in the confusion analysis.ⁿ¹⁰³ In other words, courts tack on the parody finding as something else to be weighed when determining likelihood of confusion.ⁿ¹⁰⁴ The problem with this approach is that it completely ignores how parody affects the likelihood of confusion factors.ⁿ¹⁰⁵ This is what happened in *Elvis Presley Enterprises, Inc. v. Capece* (*Elvis Presley II*).ⁿ¹⁰⁶ There, though, the court actually made a substantive finding about parody, rather than apply a parody test. It held that, although the defendant's mark was a parody, it was not a parody of the [*1042] plaintiff's mark.ⁿ¹⁰⁷ Therefore, the court said, the defendant did not need to use the plaintiff's mark for the parody.ⁿ¹⁰⁸ In this sense, the court's analysis resembled lessons from both *Campbell* (a need to target the mark itself) and from *Dr. Seuss Enterprises, L.P. v. Penguin Books USA, Inc.* (*Dr. Seuss I*)ⁿ¹⁰⁹ (a lack of alternative means of communicating the message). The court noted that "[the restaurant owner] himself conceded that the Defendants could have performed their parody without using Elvis's name. Without the necessity to use Elvis's name, parody does not weigh against a likelihood of confusion in relation to [the plaintiff's] marks."ⁿ¹¹⁰ Under this approach, the concept of parody not only fails to save the defendant, "it is simply irrelevant."ⁿ¹¹¹

This approach shares the same pitfalls as the Infusion and Alternative Means Approaches, but enjoys none of their benefits. As an initial matter, it seeks to divorce parody from the confusion analysis by making it a separate factor to be weighed. That, of course, neglects the nature of a parody and how it can influence the confusion analysis. But even worse, the Separate Digit Approach breaks down into an Alternative Means Approach that is not itself a defense. At least the Alternative Means Approach purported to be a defense to infringement (though it is not). And the standard could actually excuse the use in some cases: if "no alternative means" actually existed (though this is a tight standard), the parodist is not liable. Here, the test is merely a factor in the confusion analysis. Thus, even if a parody exists (and no alternative means exist), then theoretically infringement could still occur. Once again, we find ourselves in a confusion trap.

2. Other Approaches to Parody in Trademark Infringement Claims

Although there are twenty-three trademark cases citing *Campbell*, there are many more trademark cases involving parody. Within these cases two other parody tests exist. We explore those here. First, we [*1043] examine courts that characterized parody as a per se Affirmative Defense. Then we explore the initial interest confusion doctrine, focusing on parodic uniform resource locators (URLs).

a. Parody as a Per Se First Amendment Defense

The least traditional approach has been to use a finding of parody as determinative of First Amendment protection.ⁿ¹¹² In *GTSM, LLC v. Universal Studios, Inc.*,ⁿ¹¹³ the defendant had created a movie in which it showed a clothing line titled BUFU (By Us, Fuck You), which parodied the plaintiff's actual clothing line FUBU (For Us, By Us) designed for "multicultural youth."ⁿ¹¹⁴ The court analyzed only the parody issue, stating that parodies are "entitled to full protection under the First Amendment and pursuant to the substantial body of case law establishing 'safe harbors' for this form of comical expression."ⁿ¹¹⁵ The court then granted summary judgment "because [the defendant] used 'BUFU' as a parody."ⁿ¹¹⁶ The court cited a number of cases to support its legal holding - including *Yankee Publishing Inc. v. News America Publishing Inc.*,ⁿ¹¹⁷ *L.L. Bean, Inc. v. Drake Publishers, Inc.*,ⁿ¹¹⁸ and *Tommy Hilfiger Licensing, Inc. v. Nature Labs*ⁿ¹¹⁹ - but never explained the differences between these cases.ⁿ¹²⁰ The court also claimed to review the likelihood of confusion factors, but it was clear that the decisive issue was whether the defendant's work was a parody.

This approach seems deficient because it categorizes parody as protected without a thorough analysis of what a parody is. It also neglects to acknowledge or delineate what competing rights and interests are at stake. Thus, the conclusion is doubly bad. Not because it reached the wrong result (it did not) - but because it, first, fails to define parody [*1044] in any meaningful way, and, second, inappropriately applies First Amendment protection to any parody regardless of whether the speech is commercial or whether confusion exists.

b. Parodic URLs and Initial Interest Confusion

The last approach, ⁿ¹²² which sometimes involves trademark disputes over domain names, operates within the doctrine of initial interest confusion. This doctrine holds actionable confusion that occurs away from the point of sale - that is, when the consumer initially sees the product but prior to her buying it. ⁿ¹²³ The theory posits that some consumers' initial confusion, even if later dispelled, will cause them to buy the competing product. Why? Out of mere convenience. Notice no confusion exists at the point of sale; the confusion is actionable because it eventually could lead to lost sales. At least one court applying this doctrine in the context of domain names has found liability. On its view, initial interest confusion is tantamount to diverting future sales. ⁿ¹²⁴

Cases in the parody context are no different. The most prominent case in this area is *People for the Ethical Treatment of Animals (PETA) v. Doughney*. ⁿ¹²⁵ The plaintiff (PETA) was an organization that advocated [*1045] for animal rights. The defendant had registered the domain name "peta.org," which led the Internet surfer to a webpage containing a disclaimer that it was not the organization PETA, as well as information, and links to other pages, about eating meat and other carnivorous activities. ⁿ¹²⁶ The defendant also titled his webpage "People Eating Tasty Animals," which contained abundant commentary on eating meat. ⁿ¹²⁷

The defendant claimed his website was a parody and therefore not infringing under the Lanham Act. The Fourth Circuit disagreed. In finding infringement, the court relied on the doctrine of initial interest confusion. The court evaluated the domain name in isolation, focusing on how it conveyed only the message of affiliation with the plaintiff's organization. ⁿ¹²⁸ The court rejected the idea that the content of the website itself could negate confusion. ⁿ¹²⁹

At first glance, the court's decision seems understandable. Certain assumptions inherent in the court's analysis, though, are not fleshed out. And those assumptions show the court's conclusion is erroneous - that it fell into a variant of the confusion trap. First, the court assumes that the user is confused when she types in the URL. That could be true in some abstract sense. If I think that peta.org is the website for PETA, that is where I think I will be directed. But when I am not directed there - when I am sent to a parodic website, am I confused? Probably not. (The stronger argument is that consumers use domain names to verify that [*1046] they have reached the appropriate website.) This is important because the confusion question depends on how the consumer confronts the mark.

A consumer confronts the mark here in two ways. The first occurs in isolation as a URL that is typed in. In a basic way, however, the consumer is not confronting the mark at all here because the mark is not associated with anything - it is just a word or phrase. So if confusion occurs at this point, it is not really confusion as to any use of the mark; it just confusion that is taking place in the mind of the consumer as to where she might find the website she is looking for.

The actual confrontation, if it exists, takes place once the consumer gets to the website. It is at this point the prospective consumer wonders, is this website affiliated with the mark used in the URL? To use a products analogy: the consumer cannot be confused about the source of a product until she confronts the product. Just seeing the mark in isolation does not show confusion, and it is not part of the contextual confusion analysis. ⁿ¹³⁰

This kind of analysis is not foreign to traditional trademark law disputes. In *Cliffs Notes* - the case involving a potentially misleading cover page - the court noted that consumers do not merely see a product and make a monolithic decision about its source. As they confront marks and products, consumers' expectations shift - what seems like confusion at first is later dispelled. As to the potentially confusing cover page, the court noted that consumers would not merely accept ambiguity as the wrong source: "Even for those few readers who might be slightly confused by the cover,

the most likely reaction would be to open the book." ⁿ¹³¹

There are two other points worth mentioning. First, the court has assumed that people traditionally get to the websites they desire by typing in the URL. Many internet surfers, however, use search engines to search for sites. ⁿ¹³² People search for sites they do know, even those that they frequently visit. Additionally, many web browsers now save user history, so past websites visited "pop up" when particular letters are [*1047] entered into the URL bar by the user. ⁿ¹³³ Still other browsers and search engines use an "autocomplete" feature, which suggests websites the user may be looking for. ⁿ¹³⁴

Second, if this assumption is true - if users really try to get to websites (the content of which they know or are likely to know) by typing in a domain name (that they do not know) containing the defendant's mark - then many times there will not be confusion because the consumers have nothing to be confused about. They know what the likely content of the website will be, and, when they reach the "wrong" website, they know that it is not where they wanted to go. When, for example, I type "www.american.com," because I do not know the URL for American Airlines is "www.aa.com," I am not confused about the source. I just do not know the correct URL. What I do know is that the website I want is owned and operated by American Airlines. When I arrive at the American Enterprise Institute's online journal, The American, I am not confused; I know I have typed the wrong URL.

In such a case confusion cannot occur merely when I type in the URL; it can occur only once I have confronted the website. Websites - even with domain names - are experiential goods, though they do have some search good qualities. ⁿ¹³⁵ This leads to the corollary point: consumers who are looking for an American Airlines website will not be confused once they get to a website that is not American Airlines, despite the domain name "www.american.com."

Thus, the appropriate standard for assessing domain names - and claims of initial interest confusion - is to confront them as consumers do: in the context of the webpage to which they are linked. This, of course, is a statement about how the court should analyze confusion; that was the issue in the PETA case. But the reasoning applies aptly to any parody defense.

[*1048] Users confront parodic websites, not when they type in the URL, but rather when they visit the webpage displayed at a particular URL. Thus, initial interest confusion is a doctrine especially unsuited for parodies online. To resolve this problem, courts should evaluate initial parody claims over domain names by looking to the content of the website in conjunction with the URL. At least one older case has taken such an approach in a non-internet setting. ⁿ¹³⁶ Likewise, other parody claims of initial interest confusion must be particularly attuned to the way in which the consumer confronts the mark, not merely how the mark appears in isolation.

B. Approaches to Trademark Dilution Actions Involving Parody

Just as courts deciding infringement claims involving parody use a variety of approaches to resolve the claims, courts confronting dilution claims have their own methods for analyzing claims involving parody. The dilution cases citing Campbell ⁿ¹³⁷ use six approaches to analyzing parody in dilution. ⁿ¹³⁸ Because dilution can involve either actions for blurring (diminishing the distinctiveness of the mark) or tarnishment (causing associations to unsavory or inferior products or images), the approaches can vary by action. The most current dilution statute, ⁿ¹³⁹ for example, provides courts with six factors to analyze a dilution claim; ⁿ¹⁴⁰ [*1049] but no such factors exist to analyze a tarnishment claim. ⁿ¹⁴¹ For this reason, courts have used in blurring but not tarnishment cases the same kind of Infusion Approach they sometimes employ in the infringement-parody context. Other times, however, courts use identical analyses for both blurring and tarnishment claims. The current law governing dilution - the Trademark Dilution Revision Act (TDRA) ⁿ¹⁴² - for example, exempts from liability uses of marks in a "noncommercial" manner. ⁿ¹⁴³ Because this defense applies to dilution generally, courts have applied it to both blurring and tarnishment claims.

Table 2 shows how courts citing Campbell analyze dilution claims in parody cases. The most popular defense has been to rely on the TDRA defense of noncommercial use. Indeed, courts analyze 54% of all dilution claims using this

method. The approaches with the next highest usage rates are No Harm (15%) (for tarnishment only) and Per Se Non-Diluting findings (15%). The former occurs where the plaintiff fails to provide actual evidence that the defendant's use tarnished its mark. The latter occurs where the court simply finds that parodies, in and of themselves, are not capable of dilution. The other approaches - Infusion, No Confusion, and Standard Dilution - are used rather minimally. In what follows, I explain in more detail each of these approaches, as well as their desirability.

[*1050]

Table 2. Approaches to Trademark Parody in Dilution Cases Citing *Campbell v. Acuff-Rose*

Parody Approach	Blurring	Tarnishment	Times Used	%
Noncommercial	7*	7	14	54%
No Harm	0	4	4	15%
Per Se Non-Diluting	3	1	4	15%
Infusion	1	0	1	4%
No Confusion	1	1	2	8%
Standard Dilution	0	1	1	4%
Total	12	14	26	100%

*One case, *Mattel v. Walking Mountain Productions*, used the Noncommercial Approach for both the blurring and tarnishment claims. It is double counted, which explains the total of 26 total uses.

1. Noncommercial Use

As mentioned above, the Lanham Act provides three defenses to dilution - one of which is "noncommercial use of a mark."ⁿ¹⁴⁴ But just what constitutes a "noncommercial use"? Some courts have held that parody just is per se noncommercial use.ⁿ¹⁴⁵ Others have been more thorough in their explanation. The most complete explanation of why a parodic use is a noncommercial use comes from a trio of courts deciding the same case, which involved the use of the Barbie trademark in a song.ⁿ¹⁴⁶

To interpret the term "noncommercial use," these courts used the legislative history of the TDRA. In their view, the legislative history showed that the TDRA was not meant to "prohibit or threaten noncommercial expression, such as parody, satire, editorial and other forms of expression that are not a part of a commercial transaction."ⁿ¹⁴⁷ Taking cues from the committee reports, the cases found First Amendment jurisprudence - which defined "commercial speech" as [*1051] speech that "does no more than propose a commercial transaction"ⁿ¹⁴⁸ - to be the relevant interpretive tool.ⁿ¹⁴⁹ A parody, then, is usually expressive speech that is not encompassed within this definition. Even if a parody had a commercial purpose, that alone is not enough to make the use "commercial" where the commercial purpose is "inextricably entwined with ... expressive elements."ⁿ¹⁵⁰ In such a case, the speech "is not purely commercial."ⁿ¹⁵¹

These courts applied the noncommercial use exception to carry out Congress' intent in drafting the bill. The question is whether parody fits within the noncommercial exception. After all, there are other possible candidate defenses: the TDRA explicitly mentions parody as a defense to dilution (when the use is fair and is "other than as a designation of source").ⁿ¹⁵² To that end, some have argued that assessing parody under the noncommercial exemption would render the fair use provision superfluous because it expressly exempts parody.ⁿ¹⁵³ That is an overly narrow

reading of the statute. The fair use provision merely mentions parody as a type of fair use of a mark "other than as a designation of source." ⁿ¹⁵⁴ In other words, it exempts parody (and criticism and commentary) as fair use when the parodic use is not done as a mark; it says nothing about parodic uses that are source identifying. Parodies that act as source identifiers also have expressive value, as the committee report indicates. ⁿ¹⁵⁵

[*1052] The noncommercial use defense seems like a reasonably good place to situate parody for a few reasons. First, it is true to the legislative history of the TDRA. Second, rather than having to start from scratch, the noncommercial use exception capitalizes on existing First Amendment jurisprudence. Of course, there are still issues about what counts as "noncommercial," and how wide or narrow that definition is. Under the Ninth Circuit's approach, for example, expressive elements render commercial purpose effete. Other courts, as one commentator has noted, do the opposite, finding that any commercial purpose, despite its expressive elements, will render a use "commercial" for the purpose of dilution. ⁿ¹⁵⁶ Still, compared to the other analytical methods courts use, the noncommercial use exception is a suitable starting place for a parody analysis in the dilution context. The definition of "noncommercial" is something I take up in my proposal for a parody defense.

2. No Harm (Tarnishment Only)

Tarnishment claims are premised on two ideas. First, the owner of a famous mark has the right to decide what images, feelings, and notions people associate with it. Second, that right is violated by a use that creates an association with an inferior or unwholesome product or image. Even so, courts sometimes find under the No Harm Approach that no tarnishment occurs because the plaintiff has failed to produce evidence that the defendant's use caused harm. That is, the plaintiff usually fails to show that the defendant's use caused an association with an inferior or unsavory product.

In *Louis Vuitton II*, for example, the court dismissed the plaintiff's argument that the defendant's dog toys were potentially unsafe because "there [was] no record support ... that any dog has choked on a pet chew toy, such as a 'Chewy Vuiton' toy, or that there is any basis from which to conclude that a dog would likely choke on such a toy." ⁿ¹⁵⁷ Likewise, in *Elvis Presley Enterprises, Inc. v. Capece* (*Elvis Presley I*), ⁿ¹⁵⁸ "the court [found] [that] ... , without any evidence to the contrary, ... nude portraits hung in a bar for the purpose of mocking the tasteless decor of the sixties does not inspire negative or unsavory images of Elvis or Elvis related products or services in the minds of EPE **[*1053]** customers." ⁿ¹⁵⁹ Thus, dilution was not actionable in either case.

Although the No Harm Approach has worked in some cases, it lacks real speech protections. Proving harm is an element of a dilution claim, rather than a defense to one. Thus, requiring evidence of harm is an appropriate element of a dilution claim. But, by itself, the harm requirement does not protect parodies precisely because we expect (and at least one court found that) a parodic use to cause some kind of harm (tarnishment). ⁿ¹⁶⁰ If this is true, proving harm will be easy in many cases where the defendant uses the mark in a parodic fashion. So simply requiring a plaintiff to prove harm will provide no protection for parodic uses. For these reasons, the No Harm Approach is not suited to provide protective cover for parody.

3. Per Se Non-Diluting

In some cases, courts will find that a parodic use simply does not dilute a famous mark. In *World Wrestling Federation Entertainment, Inc. (WWE) v. Big Dog Holdings, Inc.*, ⁿ¹⁶¹ for example, the court was confronted with T-shirts that displayed caricatures (such as "Bone Cold Steve Pawstin") of World Wrestling Federation characters (such as Stone Cold Steve Austin). ⁿ¹⁶² Looking to other similar cases for guidance on the dilution claim, the court found that a parodic use was unlikely to erode the public's identification with the parodied (that is, the original) mark. ⁿ¹⁶³ To the contrary, the parodic use would likely increase such identification by reaffirming the original meaning to make a parody. ⁿ¹⁶⁴

This approach is similar to what I argued for in my previous article on parody in copyright: parody should be considered per se fair use. The Per Se Non-Diluting Approach proposes essentially the same thing: if the use is a

parody, it does not dilute the original. That is fine, as far as it goes. But a rigid parody defense might also have negative consequences. Because parody is often contrasted to satire (which is usually not protected), the defense may encourage courts to adopt a narrow definition of parody (as opposed to satire) to avoid the risk of allowing [*1054] or appearing to allow expansive uses of trademarks without the owner's permission. If that occurs, the defense could actually harm parodists, whose rights could decrease if the definition is cabined too much. (This scenario differs from copyright where a fair use defense is available even if the court finds the work is not a parody.)

Perhaps the biggest shortcoming of the per se defense, though, is also its strength: it immunizes all parodic uses from liability. Because the degree to which parody is immunized depends upon the term's definition, any balancing of interests occurs ex ante; that is, once we settle upon a definition, we cannot later reweigh the interests. That said, the per se defense has merit in recognizing a particular form of expressive speech that deserves protection from overzealous trademark owners. Below, I attempt to massage this virtue into a scheme that uses a presumption of fairness for parodies. To reduce the risk of speech suppression, I suggest we define parody in trademark more broadly than in copyright.

4. No Confusion

Other courts have decided that parody determinations should be the same for infringement and dilution. That was what the court did in *Kane v. Comedy Partners*,ⁿ¹⁶⁵ holding that the defendant's parodic use eliminated any potential confusion.ⁿ¹⁶⁶ After making that finding, the court held that no dilution existed (under state law) "for the same reasons identified in the discussion of plaintiff's federal trademark claim."ⁿ¹⁶⁷

This standard need not detour us long. Confusion is not an element of dilution under federal law (or state law). For this reason alone, we can discard the No Confusion Approach. Still, it is worth noting that the court was applying the same standard - whatever it was - to confusion and dilution parody defenses. Whether that is a good idea is an important question. Some have argued for identical standards.ⁿ¹⁶⁸ But like the differences between copyright law and trademark law, the differences between dilution and infringement are important.

Even a little digging shows that the two require different defenses, even if they define parody identically. In Part III.A, for example, I propose a parody presumption for the confusion analysis. The plaintiff [*1055] can rebut this presumption by showing that the defendant used the mark on closely related products sold by a direct competitor. That standard makes sense in the infringement context, where trademark law is worried about consumer confusion. But in the dilution context, trademark law is worried about the trademark's "image" - its distinctiveness - not confusion. Thus, the same kind of parody presumption makes little sense in dilution because dilution claims should not include parodic uses of marks on competing products. They will instead include claims where no consumer would be confused about who made the products or services on which the parodic mark appears. Thus, a new dilution test for parody should differ from the test used in the infringement analysis.

5. Infusion (Blurring Only)

The previous Part demonstrated that courts analyzing traditional infringement actions let parody color the likelihood of confusion factors. At least one court also has analyzed dilution by blurring in the same manner. In *Louis Vuitton II*, the court noted that "the fact that the defendant uses its marks as a parody is specifically relevant to several of the listed factors":

Factor (v) (whether the defendant intended to create an association with the famous mark) and factor (vi) (whether there exists an actual association between the defendant's mark and the famous mark) directly invite inquiries into the defendant's intent in using the parody, the defendant's actual use of the parody, and the effect that its use has on the famous mark. While a parody intentionally creates an association with the famous mark in order to be a parody, it also

intentionally communicates, if it is successful, that it is not the famous mark, but rather a satire of the famous mark. ⁿ¹⁶⁹

Parody similarly influenced the application of other factors, such as the similarity between the marks, the distinctiveness of the famous mark, and its famousness. ⁿ¹⁷⁰ "Indeed, by making the famous mark an object of the parody," the court reasoned, "a successful parody might actually enhance the famous mark's distinctiveness by making it an icon." ⁿ¹⁷¹

The Infusion Approach has some benefits as well as drawbacks. It [*1056] changes the dilution analysis to favor speech interests, just as the Infusion Approach does in the infringement analysis. The similarity of the two tests also means they share the same weakness: altering the factors is not a defense to dilution. Instead, it is a reframing of the dilution inquiry. For that reason, the test by itself is insufficient to protect speech interests.

6. Standard Dilution

Courts unconvinced by the merit of special treatment for parody will apply a standard dilution analysis. In other words, they will assess the dilution claim in parody cases as they would in any other case. The court in *Anheuser-Busch, Inc. v. Balducci Publications* ⁿ¹⁷² used this approach when deciding whether tarnishment existed from an ad depicting Michelob beer as containing oil, which appeared in a "humor magazine" called *Snicker*. ⁿ¹⁷³ The ad related to an oil spill affecting the water source that Anheuser-Busch used for its beer. ⁿ¹⁷⁴ Under Missouri state law dilution, the court held (based on "the majority of those surveyed") that the parodic advertisement "suggested that Michelob beer contains oil, [which] ... obviously tarnishes the marks' carefully-developed images." ⁿ¹⁷⁵

What is strange about this analysis is not that the court found tarnishment, but that it did so based expressly on the parodic nature of the use. That gets it wrong. One purpose of the First Amendment is to prevent others - in this case, trademark owners - from silencing speech that they do not like. ⁿ¹⁷⁶ Why that statement should be less true in a commercial setting, particularly when the use is "truthful" or non-misleading, is not clear. The fact that the ad was a parody and casted Michelob in a negative light is just the point. But the Balducci court did not assess the First Amendment interests at stake. In this way, it made a crucial analytical mistake.

[*1057] That mistake seems obvious when comparing other parody dilution cases. As Table 3 shows, no matter what method courts used, all of them found no dilution existed - all, that is, except the Balducci court.

Table 3. Parody Cases Citing Campbell & Finding Trademark and/or Trademark Dilution

	Trademark Infringe- ment (%)*	No Trademark Infringement (%)	Total (%)
Trademark Dilution	0 (0)	1 (7)	1 (7)
No Trademark Dilution	2 (100)	12 (93)	14 (93)
Total	2 (100)	13 (100)	15 (100)

*I excluded from this table one case ⁿ¹⁷⁷ that found no trademark dilution, and then found both no trademark infringement and trademark infringement as to two separate marks.

II. CAMPBELL AS A LENS: THE RELATIONSHIP BETWEEN PARODY CLAIMS IN COPYRIGHT AND

TRADEMARK LAW

A. Parody Cases Citing Campbell: Trademark Infringement and Dilution Cases

Part I examined a variety of approaches courts use to evaluate parody claims in trademark law. This Part examines how courts treat parody claims in trademark relative to parody claims in copyright. It does this first with a description of whether copyright and trademark parody claims relate to each other. Once that description is adumbrated, we can begin to examine how and why a relationship (if any) exists. To narrow our focus, we will again focus on cases citing Campbell.

Courts that cite or discuss Campbell's statements about parody use Campbell's pronouncements on parody differently. Of the twenty-five trademark cases that cite or discuss Campbell's statements about parody, ⁿ¹⁷⁸ only thirteen specifically cite Campbell in the trademark (or [*1058] First Amendment) analysis of parody. ⁿ¹⁷⁹ Some courts assert that Campbell is relevant to the parody determination in trademark. ⁿ¹⁸⁰ One court that mentioned Campbell expressly disclaimed reliance on it for trademark parody analysis, ⁿ¹⁸¹ another court distinguished Campbell in [*1059] passing, ⁿ¹⁸² and yet another implied that it was not relevant to trademark parody claims. ⁿ¹⁸³ No court cited Campbell in its dilution analysis.

Exactly how these courts analyze parody within each method is different. Some courts, for example, incorporate copyright case law by analyzing trademark parodies using Campbell. ⁿ¹⁸⁴ Other courts simply apply trademark case law to the parody question, ignoring Campbell altogether. ⁿ¹⁸⁵

More importantly, in cases with copyright and trademark infringement claims, some courts tend to decide the parody question (is the defendant's work a parody?) in the copyright context, and then apply that finding summarily to the remaining trademark-parody question (is the defendant's use of the plaintiff's mark confusing?). ⁿ¹⁸⁶ In these cases, courts will make a finding as to copyright parody, relying on Campbell, and then analyze the trademark parody claim as if the copyright analysis of whether a parody existed applied equally to the trademark parody claim, engaging in little or no analysis of the latter issue. Thus, the copyright parody question sometimes is determinative of the trademark parody question.

[*1060] Take, for example, the district court's decision in *Dr. Seuss I*. ⁿ¹⁸⁷ There the defendant had written a book about O.J. Simpson's trial and had used Dr. Seuss' style and trademarks - and similar images - to describe the story, which the defendant titled, *A Cat NOT in the Hat*. ⁿ¹⁸⁸ The plaintiff sued for copyright and trademark infringement.

Before reaching the trademark question, the court analyzed the parody issue in the copyright context. It found that one of the defendant's works was not a parody and two were. ⁿ¹⁸⁹ When analyzing the (various) trademarks at issue, the court seemed to assume that the defendant used the marks (but not the trade dress) in a parodic fashion, apparently letting the copyright finding flow into the trademark analysis. As a result, the copyright parody finding altered the trademark likelihood confusion factors - the strength of the marks, ⁿ¹⁹⁰ the marks' similarity, ⁿ¹⁹¹ and the defendant's intent ⁿ¹⁹² - in the defendant's favor. Of course, that did not save the defendant, ⁿ¹⁹³ as the district court granted a preliminary injunction, which the appeals court affirmed. ⁿ¹⁹⁴

Viewing all these approaches together, it becomes apparent that courts have developed three methods of parody analysis. Where the plaintiff alleges copyright and/or trademark infringement claims and the defendant asserts its work or mark is a parody, the courts:

(1) determine parody in its copyright analysis using Campbell and summarily applies that finding to its trademark (or First Amendment) analysis;

(2) determine parody in its trademark analysis, drawing on Campbell to define or articulate reasoning or conclusion; or

(3) determine parody using only trademark case law.

The question then becomes whether any of these approaches is more appropriate than the others. Answering that question requires us to determine to what extent copyright and trademark claims are linked.

The data show different relationships between copyright infringement [*1061] and trademark infringement and dilution. Table 4 shows the relationship between copyright and dilution infringement findings. There is only one case in which a court found dilution, and it occurred in a case where no copyright claim existed. In the seven cases where courts found copyright infringement, no court found dilution. Thus, it does not appear there is a relationship between dilution and copyright parody findings. It follows, then, that the data do not reveal a relationship between Campbell and dilution claims.

Table 4. Parody Cases Citing Campbell & Finding Copyright or Trademark Dilution

	Copyright Infringe- ment (%)	No Copyright Infringement (%)	No Copyright Claim (%)	Total (%)
Trademark Dilution	0 (0)	0 (0)	1 (12)	1 (6)
No Trademark Dilution	7 (100)	2 (100)	7 (88)	16 (94)
	7 (100)	2 (100)	8 (100)	17 (100)

*One case ⁿ¹⁹⁵ that found trademark infringement and no trademark infringement as to two separate marks. This decision was excluded from calculations

The story is different, however, for trademark infringement claims. As Table 5 shows, in every case where a plaintiff alleged both copyright and trademark infringement, courts made corresponding infringement findings: if a court found that no copyright infringement existed, it also found no trademark infringement - and vice versa.

[*1062]

Table 5. Parody Cases Citing Campbell Finding Copyright or Trademark Infringement

	Copyright Infringe- ment (%)	No Copyright Infringement (%)	No Copyright Claim (%)*	Total (%)
Trademark Infringement	2 (100)	0 (0)	3 (25)	5 (22)
No Trademark Infringement	0 (0)	9 (100)	9 (75)	18 (78)
Total	2 (100)	9 (100)	12 (100)	23 (100)

*I excluded from this table one case ⁿ¹⁹⁶ that found no copyright infringement then found both no trademark infringement and trademark infringement as to two separate marks.

More specifically, there were eight cases where courts found no copyright infringement. In all of these cases the courts also found no trademark infringement. By contrast, in the two cases where courts found copyright infringement, the courts also found trademark infringement. At least in trademark parody cases citing Campbell, some relationship exists between infringement findings in copyright and trademark - and between the use of Campbell and the parody doctrine in each.

What is occurring in the remaining twelve cases (citing Campbell) where only a trademark parody was at issue is less clear. Focusing on the three cases in which the defendant's parody defense failed might help clarify things. ⁿ¹⁹⁷ If these cases share similarities, they might tell us something about why, methodologically, the courts find parodies infringing. These cases also might give use clues as to how the incorporation or exclusion of Campbell influences courts' decisions.

These three cases teach two basic lessons. First, the outcomes in each case are a function of how extensively the court incorporates the parody into the likelihood of confusion analysis. Second, these courts have either expressly applied Campbell to trademark law, or disclaimed it. Just why they have done so raises important issues, as we will see in a moment.

[*1063] Let us start with *Schieffelin & Co. v. Jack Co. of Boca, Inc.* ⁿ¹⁹⁸ The product at issue was a Dom Poppingnon label, which the defendant had affixed to a plastic champagne bottle filled with popcorn seeds. ⁿ¹⁹⁹ When the owners of the Dom Perignon mark (used on Champagne) sued, the defendant claimed the use of the mark was to parody Dom Perignon. ⁿ²⁰⁰ The court held the Dom Poppingnon mark infringed. ⁿ²⁰¹ The question is, why?

The answer lies in the two lessons I mentioned above. First, the court minimally incorporated speech concerns. Although the court purported to use an "infusion" approach - weaving First Amendment/parody considerations into the likelihood of confusion analysis - it did so only with two of the eight Polaroid factors. ⁿ²⁰² As to the "good faith" Polaroid factor, the court analyzed it in light of the parody. ⁿ²⁰³ It found the defendant had an intent to parody, which meant that the factor did "not weigh against defendants." ⁿ²⁰⁴ As to the similarity of the marks, the court recognized that the defendant selected a well-known mark because "one would hardly make a spoof of an obscure or unknown product[.]" ⁿ²⁰⁵

Yet, in analyzing the other confusion factors, the court paid little attention to First Amendment (or parodic) considerations. So, for example, it did not apply any parody considerations to its analysis of the strength of the plaintiff's mark ⁿ²⁰⁶ - something other courts finding parody, such as *Louis Vuitton II* ⁿ²⁰⁷ (discussed in Part I) - have done. ⁿ²⁰⁸ The court also failed to discuss the issue of parody in its analysis of the similarity of the products, ⁿ²⁰⁹ the likelihood of bridging the gap, ⁿ²¹⁰ the [*1064] quality of the defendant's products, ⁿ²¹¹ or the sophistication of the purchasers. ⁿ²¹²

Second, the Schieffelin court explicitly held that Campbell did not apply to trademark law. "The [Campbell v.] Acuff-Rose decision," the court wrote, "does not impact the court's decision here" ⁿ²¹³ Why? Because "the interests protected under the Lanham Act are not identical to those of the copyright holder." ⁿ²¹⁴ But the court never went on to say how the interests of trademark users are different from copyright users. Nor, for that matter, did the court even mention the fact that the rights of a trademark owner may be different from the rights of a copyright owner. Finally, it didn't mention other possible interests, or how these rights and interests may interact or differ from those in copyright.

The two lessons from Schieffelin also can be seen in *Elvis Presley II* and *Harley-Davidson, Inc. v. Grottanelli*. ⁿ²¹⁵ *Elvis Presley II* involved defendants who owned a 1960s-themed nightclub called "The Velvet Elvis," which served

food, beer, and liquor, and which also featured live music.ⁿ²¹⁶ In *Grottanelli*, the defendant owned a motorcycle repair shop that used a bar-and-shield logo similar to Harley-Davidson's on his trademark/logo, which was used in advertisements.ⁿ²¹⁷

Recall the first lesson from *Schieffelin* was that the court tightly constrained the parody analysis to more easily find confusion. Likewise, in both *Elvis Presley II* and *Grottanelli*, we see similar kinds of analytical "constraining." In *Elvis Presley II*, for instance, the court - rather than focus on how the parody informed the confusion analysis (and restrict it tightly) - applied "parody" as "one ... other relevant factor that a court may consider in a likelihood-of-confusion analysis."ⁿ²¹⁸ This analytical maneuver allowed it to reverse both the lower court's finding of noninfringement and its "infusion" analysis.ⁿ²¹⁹

[*1065] Whereas *Elvis Presley II* limited the impact of parody by treating it as a separate factor, *Grottanelli* did so explicitly by explaining the competing product itself could not as readily function as a parody. It noted first that "the signage on [the defendant's] business is, in effect, trademark use for a competing service, since Harley-Davidson offers motorcycle repair services through its authorized dealers, and *Grottanelli*'s placement of his bar-and-shield logo on his newsletter and T-shirts promotes his repair and parts business."ⁿ²²⁰ Because the defendant offered a competing service, the court held that, "in this context, parodic use is sharply limited."ⁿ²²¹

In addition to narrowing their analyses, both courts, like *Schieffelin*, mentioned *Campbell*'s relevance to the trademark parody dispute before them. But unlike the *Schieffelin* court - which expressly disclaimed *Campbell* - the courts in *Grottanelli* and *Elvis Presley II* expressly endorsed and applied *Campbell*. "The Supreme Court's parody explication [in *Campbell*] as to [expressive] copyrightable works," the *Grottanelli* court stated, "is relevant to trademarks, especially a trademark parody that endeavors to promote primarily non-expressive products such as competing motorcycle repairs."ⁿ²²² In this context, the court found that that the defendant's parody was weak. It did not - as *Campbell* required - adequately target the original.ⁿ²²³

This same rationale was also used by the court in *Elvis Presley II*. Like in *Grottanelli*, the *Elvis Presley II* court first noted that, although it had "yet to consider parody in relation to trademark law[,] ... the Supreme Court [in *Campbell*] considered parody in the copyright context, which is relevant to the treatment of parody in the trademark context."ⁿ²²⁴ Then, unlike the *Schieffelin* court, the *Elvis Presley II* court explained what parts of *Campbell* applied. It claimed that, to render it noninfringing, parody in trademark - like parody in copyright - must target the original for comment or criticism.ⁿ²²⁵

What is interesting about *Elvis Presley II*, *Grottanelli*, and *Schieffelin* **[*1066]** is that they invoke similar analytical techniques, but disagree on the applicability of *Campbell*. This disagreement raises an important question for courts dealing with trademark parody: should *Campbell* apply and, if so, to what extent?

B. *Campbell*'s Lessons for Trademark Law

In this subpart I suggest that a trademark parody doctrine - while using a few basic lessons from *Campbell* - should be more expansive than the one announced by the Supreme Court. I suggest this because of several differences between copyright and trademark law.

In the first instance, it is helpful to say whether we should adopt a *Campbell*-like definition of parody. That is, should we provide a parody/satire-like framework from which to determine whether parody exists? The answer is both yes and no. The answer is "yes" because the parody/satire distinction can help define the relevant kind of uses the legal concept of parody covers - even if we decide, as I urge later, that the variety of uses covered by parody should expand. Part of this incorporation is also practical: for all the differences between copyright and trademark law, they both must account for similar speech interests - First Amendment interests.ⁿ²²⁶ Just how each regime accounts for each interest, however, will be different. And so here we can invoke the answer "no" to the previous question. We shall see that, due to a variety of differences between copyright and trademark, the protection afforded to parody and satire should be, as a

matter of doctrine, broader in trademark law than in copyright. Thus, although both copyright and trademark law ought to and do advance interests of expressive speech, their protection of each will look different legally.

The distinct purposes of copyright and trademark law suggest that the test - or at least the scope of the test - for each will be different. Trademark law, unlike copyright, is not designed to provide a monopoly right; it is designed to prevent, among other things, consumer deception. Indeed, trademark law has mechanisms that prevent monopoly control. Descriptive marks (with no secondary meaning),ⁿ²²⁷ or names that are,ⁿ²²⁸ or marks that become, genericⁿ²²⁹ are not given any rights whatsoever.ⁿ²³⁰ **[*1067]** Unlike copyrights, which are expressly designed to provide monopoly power for a limited time, trademarks serve the same purpose (preventing consumer fraud) throughout their entire existence. This is important because the key question for fair use is whether the parody causes market harm.ⁿ²³¹ If it does not, copyright excuses the use. That is, indeed, one of Campbell's lessons.ⁿ²³²

Although Campbell's specific focus on market harm to a monopoly right may not be appropriate for trademark, the idea of market harm itself is not foreign to trademark law. The difference between copyright and trademark is that each is concerned with a separate the kind of market harm, with trademark's harm being more narrowly cabined by the law's purpose. In copyright, the Campbell court worried about a substitution problem: will the work at issue provide an adequate alternative to the original? If so, then the copyright owner suffers harm and the work is not a parody. So, for example, the lyrics of 2-Live Crew's *Pretty Woman* did not risk substituting for those purchasing of Roy Orbison's *Oh Pretty Woman*.ⁿ²³³ Campbell's emphasis on substitution reflects copyright law's more general concern for the harm a potential work might cause to the entire market for the original. The concept of the entire market has grown to include markets for derivative works, and, indeed, markets for almost any potential use of the original.

Trademark, by contrast, is concerned with a different kind of harm than copyright, and it has two components: harm to the consumer (purchasing the wrong good) and harm to the markholder (lost or diverted sales). The consumer is harmed when she buys one product while intending to buy another. This means she may have bought goods of a quality other than she expected. As a result of such deception, she receives the "wrong" goods. Note this is different from the harm in copyright, which requires no likelihood of confusion; it requires only **[*1068]** that the good provide an adequate substitute for the original. Thus, the markholder is harmed not just because the competing product was an adequate substitute for the original. Rather, harm occurs because the consumer's confusion over the source of the product results in lost sales or reputation (particularly if the goods are of worse quality) of the markholder's product or service.

Lost sales and reputational harms do not necessarily occur when confusingly similar marks are used on products, services, or other objects not authorized by the mark owner.ⁿ²³⁴ The nature and context of the use in question is what makes the harm more or less likely to occur. So harm to sales and reputation based on confusion is most likely to occur when the plaintiff's and defendant's mark appear on similar goods sold to similar markets. Thus, a pair of moon boots bearing the mark Twizzies are less likely to cause consumer confusion with Twizzler's licorice than chewing gum bearing the same mark. So where consumers are most likely to be misled - on goods or services closely related to the ones on which the original mark appears - trademark harm occurs and the law seeks to prevent it.

But the market harm here is quite narrow, so that dissimilar goods or dissimilar purchasers make harm unlikely - even if there is a "potential" market for the mark. Thus, Campbell teaches that market harm can be a relevant component to any parody analysis of trademark law. It also demonstrates that "market harm" means something different - something narrower - in trademark than in copyright. Trademark "market harm" occurs only where goods are closely related, sold in similar markets, and using confusingly similar marks. Potential substitution - which copyright uses to determine infringement in the parody context - is not by itself the test for infringement in trademark law. Why? Because it is likely that for any given good, there are many competing goods, some or all of which may serve as adequate market substitutes. Trademark harm, then, occurs only when those similar products or services have affixed to them a confusingly similar mark, or when the use of a mark implies sponsorship or endorsement. This conclusion is also true for the concept of dilution, which is not concerned with market harm at all. Dilution is concerned, rather, with harm to the reputation of the mark, not the market in which it is sold. Thus, as Dogan and Lemley note, harm occurs when a

nearly identical mark appears on a good of lower quality (tarnishment) or on an [*1069] unrelated good (blurring).

Second, the constitutional basis for trademark law is weaker than the legal basis for copyright law. A specific Constitutional provision (Article I, Section 8, Clause 8) provides authors with legal rights (copyrights) to exploit their work for money.ⁿ²³⁵ But trademark law has no analogous provision. Instead, it grows from the Commerce Clauseⁿ²³⁶ - a clause that stands as the basis for numerous statutes and regulations, not just trademark law.ⁿ²³⁷ Indeed, it took the Supreme Court fifty-three years from the adoption of the U.S. Constitution (including the Bill of Rights) to grant relief on a trademark claim.ⁿ²³⁸

The Constitution empowers copyright law but gives no similar priority to trademark law. This suggests that trademark law should be weaker than copyright law with respect to how strongly it regulates speech. In many respects, this is true. But in other respects trademark rights are at least as strong as copyright rights. In the context of the First Amendment, in particular, this important difference has not attracted much judicial attention. Indeed, the idea that First Amendment safeguards exist in trademark law is usually deemed sufficient. The same is true in copyright, where a once-promising standard to ensure First Amendment limits on copyrightⁿ²³⁹ failed to materialize into anything [*1070] significant.ⁿ²⁴⁰ The point, however, is that trademark law's potential for overreaching isn't a function of a constitutional mandate. Given trademark's weaker Constitutional basis, additional speech safeguards are both legally less bothersome and more appropriate. In particular, it means that, for parody in trademark law, First Amendment interests should provide broader coverage than the standard articulated in *Campbell*.

One might counter that rights granted by the Copyright Act are stronger than those granted by the Lanham Act. Copyrights provide the owner with a wide range of tools to censor.ⁿ²⁴¹ Trademark law, by contrast, provides protection against only likely consumer confusion,ⁿ²⁴² sponsorship, and endorsement, and, in some cases, dilution of mark distinctiveness.ⁿ²⁴³ It follows, then, that trademark's speech protections would not be as robust as copyright's. But such comparisons are too simple. Copying a book or even a few minutes of a popular song is typically infringement. And the owner will be in a nice position to enforce her rights. But what about using a mark on a product in an advertisement, in a movie, or in a television or radio broadcast? The answer is not always clear - and, even when it is, the trademark owner likely can assert her rights because the costs of defending are so astronomically high.ⁿ²⁴⁴ Indeed, clearance rights are often required for the trademarks, just as for copyrighted works, used in movies and [*1071] television.ⁿ²⁴⁵ Thus, regardless of theory, trademarks can often be used like copyrights (that is, to censor), even though they are, in theory and historically, tools to control deceit.ⁿ²⁴⁶ Part of this may stem from dilution's rhetorical effect on trademark theory: the dilution right is premised on the theory the trademark owner must be able to protect and control the "property interest" in the mark.ⁿ²⁴⁷

Even assuming for the moment that there are significant and meaningful practical differences in the rights of copyright and trademark owners, there is still reason to think a parody doctrine needs to be broader in trademark than in copyright. Unlike copyright, trademark does not have the broad "fair use" provision that copyright law does. Instead, trademark's realⁿ²⁴⁸ fair use defense permits a use of a mark, "otherwise than as a mark, ... which is descriptive of and used fairly [*1072] and in good faith only to describe the goods or services of such party, or their geographic origin."ⁿ²⁴⁹ But beyond this provision and a few other specific defenses,ⁿ²⁵⁰ trademark safeguards consist largely as a patchwork designed to leave breathing space for speechⁿ²⁵¹ and, specifically, parody. (Copyright has these too.ⁿ²⁵²) Indeed, sometimes these "fair use defenses" are not defenses at all, but, as in the case of nominative fair use (for confusion), merely reformulations of the likelihood of confusion analysis trademark law already requires.

This lack of a catch-all, free-speech rule of reason is problematic, particularly in the parody space. In my previous article on parody in copyright, I proposed a narrow test that would immunize parodies from copyright infringement.ⁿ²⁵³ I argued this test given copyright law's free-speech safety-net: fair use. "Where the work fails the test," I wrote, "hand-wringers need not worry too much, as the fair use test still applies."ⁿ²⁵⁴ But with trademark law, no such fallback position exists. Where a defense of nominative fair use fails, a defendant infringes. [*1073] Worse still, this defense is not much different (if it all) from the likelihood of confusion inquiry.

Furthermore, the safeguards that do not wade into likelihood of confusion territory are often insufficient. Whether a mark is a "use in commerce," ⁿ²⁵⁵ for example, is a rather broad standard. ⁿ²⁵⁶ Even imposing a more demanding standard of whether the use is "commercial" or "as a mark" may not be strong enough. ⁿ²⁵⁷ Although this safeguard fares better than the "use in commerce" standard, it ultimately does not address the many cases where the use, although not advertising a product, is still used as a mark. Where, for example, a character in a movie plows a tree with a Caterpillar(R) tractor, does the Caterpillar trademark signify Caterpillar's sponsorship or endorsement of, or affiliation with, the movie? ⁿ²⁵⁸ Or, for a racier example, imagine a pornographic film where the star wears Dallas Cowboy cheerleader attire. ⁿ²⁵⁹ Depending on how Caterpillar or the Cowboys feel about such uses, they may decide to sue - and, depending on how the judge deciding the case feels, ⁿ²⁶⁰ they may win. ⁿ²⁶¹ It also fails as a safeguard because it has definitional problems that result in factual determinations similar to the likelihood of confusion analysis. ⁿ²⁶² These shortcomings work to discourage the [*1074] reworking and subsequent use of trademarks for expressive purposes.

ⁿ²⁶³

Growing trademark rights also counsel in favor of a broader parody defense. Since 1870, the potential trademark action has expanded from its original test of likelihood of confusion as to competing products. It now includes claims for initial interest confusion, ⁿ²⁶⁴ post-sale confusion, ⁿ²⁶⁵ likelihood of dilution for blurring ⁿ²⁶⁶ and for tarnishment, ⁿ²⁶⁷ trade dress infringement, ⁿ²⁶⁸ cybersquatting, ⁿ²⁶⁹ and infringement of merchandising rights. ⁿ²⁷⁰ And, although doctrines like dilution impose more requirements (like mark fame and identity), those requirements are spurious ⁿ²⁷¹ or ever expanding. ⁿ²⁷² Growing rights have become even more problematic as courts have found evidence of consumer confusion from surveys showing confusion rates as low as 6%, ⁿ²⁷³ 10%, ⁿ²⁷⁴ 11%, ⁿ²⁷⁵ [*1075] and 16%. ⁿ²⁷⁶ Dogan and Lemley point out that much of this evidence is founded on improperly crafted surveys ⁿ²⁷⁷ - but courts accepted it nonetheless.

This "rights expansion" has not gone unnoticed, at least by scholars. ⁿ²⁷⁸ Simultaneous with the growth of rights was the broadening of things subject to trademark protection, which grew to include colors, ⁿ²⁷⁹ notes or melodies, ⁿ²⁸⁰ buildings, ⁿ²⁸¹ facades, ⁿ²⁸² and the shape of golf courses. ⁿ²⁸³ Over-enforcement and licensing practices grew simultaneously - cease-and-desist letters are sent as a matter of course and licenses are generally sought for every use of a mark in movies. ⁿ²⁸⁴ [*1076] At the same time, a corresponding number of real defenses have remained noticeably absent from trademark law. Most of the defenses in trademark law are not defenses at all, ⁿ²⁸⁵ but safeguards (like "use as a mark") or merely reformulations of the confusion test (like nominative fair use). As a result, users have two options; pay or forgo the use. ⁿ²⁸⁶ For these reasons, some scholars argue that trademark law needs real defenses ⁿ²⁸⁷ - or even constitutional speech protections ⁿ²⁸⁸ or presumptive fair uses ⁿ²⁸⁹ - to rebalance the law. The parody doctrine provides an opportunity to craft such a real defense, and to make it broad enough to do more than protect against (low amounts of) consumer confusion.

Oddly enough, how courts have applied Campbell in trademark parody cases is instructive on how such a real defense should and should not be structured. Campbell, after all, was a decision about a kind of "real" copyright defense. Fair use applies after the court finds infringement rather than before, as KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc. ⁿ²⁹⁰ requires of fair use in trademark. Nevertheless, the guiding principle in both Campbell and KP Permanent is the same: a real defense immunizes conduct even if it is (or may be) infringing. Courts forget this important similarity when importing parody analyses from copyright to trademark. Consider how courts routinely note that Campbell merely altered the fair use analysis; the decision didn't even purport to address the copyright infringement analysis. In trademark law, however, courts have applied the Campbell decision to the trademark infringement analysis. ⁿ²⁹¹ In doing so, they have overlooked the important difference between a theory of liability and a defense to that theory. That oversight means that the parody doctrine in trademark law is not really a defense at all - but rather a way to avoid infringing the work. So, to the extent one wants a stronger trademark law parody defense, Campbell may actually show how to build one - by moving toward something resembling real defense.

For all of these reasons, the parody doctrine in trademark law should [*1077] be more robust than the one announced in Campbell and applied by lower courts. This means dispensing with the requirement that the parody must target the mark at issue. A broader parody defense, then, will include uses that do not merely target the mark, but use

the mark in some expressive way to ridicule or poke fun at any subject. That is, it will include what the Campbell court called "satire." To the extent that Campbell excused infringing conduct, trademark law could learn from that decision. I argue that we need a parody defense that can survive in spite of confusion in some cases. In the next Part, I explore what these defenses would look like.

III. CHANGING THE PARODY DOCTRINE IN TRADEMARK INFRINGEMENT ACTIONS

In the last Part, we saw that copyright and trademark law have different purposes, different sources of authority, different speech protections, and different strengths of rights. Real trademark defenses, I also argued, have not kept pace with expanding trademark rights. I argued that these differences and facts are relevant, and that parody in trademark law should be more attuned to them than it currently is. I briefly suggested some general approaches to broadening the trademark parody defense. What was missing, however, was a different, more directed normative discussion. Although Part I discussed the merits of various approaches, it didn't discuss which approach, if any, was best. In this Part, I engage in that normative discussion. In what follows, I propose two new parody defenses - one for infringement and one for dilution.

A. A Presumption-Based Defense for Parody

Recall that courts use around nine different analytical methods for evaluating parody in trademark law.ⁿ²⁹² Although each method purports to account for speech interests, all but two of these methods were merely restatements of the traditional confusion test. As scholars have pointed out, confusing speech does not necessarily equal (false or) misleading speech,ⁿ²⁹³ the latter being an important constitutional standard for regulation. But more importantly, I have already given a few reasons why we may not want to throw all our speech eggs in the confusion basket. Here is a recap:

[*1078]

Rights Expansion: The traditional concept of consumer confusion has grown to include initial interest confusion, post-sale confusion, merchandising rights, dilution (which no longer in practice requires fame or mark identity), and trademarks have expanded to include colors, melodies, golf courses, buildings, facades, etc.

Low Confusion Threshold: Although trademark law requires the plaintiff to show a likelihood of consumer confusion as to source, courts have accepted survey confusion rates as low as 6%, 10%, 11%, and 16%.ⁿ²⁹⁴

Quest to Stamp out All Confusion/Dilution: Courts have tried to eradicate all confusion or dilution, rather than appreciable confusion as to a particular source, or appreciable dilution as to famous and identical marks.

No Growth of Real Defenses: While trademark rights have expanded, real defenses (that don't depend on confusion) have not.

Confusion Approaches Are not Defenses: Courts altering the confusion factors - as Campbell has altered the fair use factors - fail to understand that fair use in copyright is a real defense, not a way of reframing the infringement issue.

Confusion is not Speech Friendly: The confusion test is unsympathetic to speech interests that also may be confusing.

Perhaps the most promising method of analyzing trademark parody was the Balancing Approach. As originally conceived, the Balancing Approach asked if the title of a work had any artistic relevance to the underlying work. If it did, then the use was presumptively noninfringing. This was a real defense. Its major advantage was placing a presumption in favor of speech. But it, too, had its own shortcomings. Namely, it was so broad and unruly that subsequent courts were able to hijack it, converting it into a standard likelihood of confusion analysis. In other words, it is a confusion trap.

1. The Presumption-Infusion Approach

The cases show that courts are attracted to the doctrine of confusion. It seems to easily account for all possible problems in one neat, little test. But we have seen that this is not true. So what to do? With a broader parody definition, we need to make some speech presumptively immune from trademark actions. That is, we should take the Court's [*1079] holding in *KP Permanent* and apply it to more than just "fair use," as defined by the Lanham Act. The Supreme Court in *KP Permanent* explained that "the common law of unfair competition also tolerated some degree of confusion from a descriptive use of words contained in another person's trademark." ⁿ²⁹⁵ And so, it held, does the Lanham Act's fair use defense.

This is what Graeme Dinwoodie means by a "real defense" - one that allows uses despite the potential infringement that may occur in its absence. ⁿ²⁹⁶ We should apply the lessons of *Campbell* and *KP Permanent* to parody in trademark law by making it more like a real defense. We should make parody and satire presumptively protected First Amendment speech. ⁿ²⁹⁷ Thus, if the court determines the defendant's use qualifies as a parody or satire, then a presumption of noninfringement applies. That view is generally in line with some First Amendment scholars, who presume all speech is protected unless shown otherwise. ⁿ²⁹⁸ Thus, it is incumbent on trademark owners to show that speech is not protected. ⁿ²⁹⁹ This approach avoids constitutional conflict: it erects a doctrine that accounts for first amendment interests, preventing a collision with a constitutional question. ⁿ³⁰⁰

But why treat parody as presumptively protected? Because parody is a type of speech that has value regardless of its potentially confusing nature. Without a robust parody doctrine, we risk incurring "a rather [*1080] significant [societal] cost Sometimes that cost takes the form of lost opportunities: important political and societal commentary and works of art may be suppressed entirely." ⁿ³⁰¹ The cost increases as judges use their discretion to deem infringing those parodies they find distasteful. ⁿ³⁰² That is doubly true given all of the aforementioned threats to social or political speech that threaten the interests of a trademark holder.

With courts continually trying to wipe out all confusion and dilution, the presumption reminds courts "that the Lanham Act is not a general anti-copying statute - and indeed that not all copying ... is bad." ⁿ³⁰³ Trademark law is not about preventing others from using trademarks; it is about preventing particularized harms (confusion and, to a lesser extent, dilution). ⁿ³⁰⁴ Something closer to a real parody defense will force courts to remind themselves that "free-riding" to make valuable social commentary is not the same thing as causing particularized harm to the public (or instrumentally to the trademark owner).

A presumption, though, is typically rebuttable, and I suggest that this also be true in a more limited way for trademark parody. Under my proposal, the plaintiff can rebut the parody presumption only by showing the following elements by a preponderance of evidence:

- [*1081] (1) the alleged parody of the mark appears on, or is, a closely related product or service; and
- (2) the product or service on which the mark appears is:

(i) offered for sale

(ii) by a direct competitor.

Once these elements are met the court should invoke an Infusion Approach, as stated in *Louis Vuitton II*. Put another way, if the plaintiff shows by a preponderance of evidence that the parodic mark appears on a direct competitor's closely related product, this partially rebuts the presumption of protection. The burden, however, remains on the plaintiff to show that there is a likelihood of confusion. In analyzing the claim, courts should adjust the confusion factors to account for parodic interests by taking the Infusion Approach. If they can show confusion in this context, the defendant will be liable for trademark infringement. Where the plaintiff cannot prove all of these elements exist, her infringement claim dies. I call this the Presumption-Infusion Approach, or PI.

Readers will quickly notice that I have used a variety of important terms without defining them. Any test that purports to achieve some goal must be properly defined, and this one is no exception. So in defining the important words - "parody," "closely related," and "direct competitor" - we must remember that the goal of the Presumption Approach is to carve out breathing space for speech where consumer fraud is unlikely to occur. The first task we undertook in Part I, where we noted that Campbell's definition was too narrow. Thus, parody here includes not only uses of a mark that comment on the original, but also those that use the mark as a vehicle to comment on society. In other words, it would include parody and satire as the Court defined those terms in *Campbell*. Thus, the court in *Dr. Seuss Enters., L.P. v. Penguin Books USA, Inc. (Dr. Seuss II)*ⁿ³⁰⁵ would have analyzed the trademark claim differently. Rather than assessing the likelihood of confusion (and ruling material issues of fact existed),ⁿ³⁰⁶ the court would have found the contested uses "Dr. Juice" and "A Cat NOT in the Hat" to be parodic and presumptively privileged.

Next we have to say what it means for a product or service to be "closely related." A defendant's product or service is "closely related" to the plaintiff's when it is intended to be used for the same purposes as the one to which the original mark is fixed. The divisions should be rather general, with uses being defined by traditional categories such as eating [*1082] and drinking, clothing, jewelry, furniture, etc., though the categories need not mirror those used by the USPTO. Where, for example, a company offers for sale Champagne in a bottle, a user's Champagne bottle filled with popcorn seeds would qualify. So would two books - such as the *Dr. Seuss* and *Dr. Juice* books - regardless of their content. Thus, a company that placed its trademark on motorcycles could reliably assert that a similar parodic mark placed on motorcycle parts was "closely related."ⁿ³⁰⁷

One caveat should be noted. Given the large-scale categories, some further divisions may be necessary. Two categories come to mind, though others may arise as the rule is implemented. One is the use of a mark on T-shirts and hats. Because markowners often leverage their brand to print T-shirts, hats, and the like, a more restrictive rule might be necessary in cases of these goods. Likewise, uses of marks on websites should not all be lumped together. Here, the websites themselves should be examined to determine whether the product or service they offer is closely related to the product or service offered by the markholder.

Even goods or services that are closely related, though, can be produced by entities that are not "direct competitors." And, although both concepts are linked to one another, the purpose of the "direct competitors" element is to further cabin the ability of large corporate interests to suppress speech. This tactic is neither revolutionary nor foreign to trademark law. In the past, some courts held that only direct competitors had standing to sue under the Lanham Act.
n308

Under this proposal, a "direct competitor" must be one who competes in the same market generally as the parodic user. That is, one asks whether the market the parodic user targets is the same as the market targeted by the mark owner, looking at all the goods on which both marks appear. Thus, in *Dr. Seuss II*, the plaintiff would not have been able to satisfy this element. While *Dr. Seuss* aimed his books primarily at children, the defendant used the trademarks in a book designed for adults. This disparity in consumer markets would prevent the plaintiff from rebutting the presumption. Contrast that scenario with *Grottanelli*, where the defendant sought to sell products to the same demographic - namely,

motorcycle enthusiasts.

[*1083] There is something peculiar about this proposal: it seems to use at least two of the likelihood of confusion factors. To ask whether products are "closely related," one might say, is merely to rephrase the confusion factor of "similarity of goods." Likewise, the "direct competitors" element may be merely a recasting of the "sophistication of consumers" factor in likelihood of confusion analysis. Although similarities between the two exist, pointing out these similarities misses a critical distinction between them. Whereas the "similarity of goods" and "sophistication of consumers" factors are part of the likelihood of confusion test, the elements used in PI operate as a trigger. If the plaintiff cannot satisfy them, then there is no likelihood of confusion analysis to undertake. A determination about the similarity of the goods on which the mark appears may in fact carry over into the confusion analysis. And even if the likelihood of confusion test does apply, the plaintiff's ability to rebut the presumption does not determine that confusion will exist. Indeed, the Infusion Approach may counsel against just such an outcome even where the goods are similar. It is an analysis the court will have to undertake during the infringement analysis.

2. Why Use This Presumption-Infusion Approach?

These definitions, combined with the Presumption-Infusion Approach, work to safeguard parodies and satire from overzealous or crotchety trademark owners (or irascible or humorless judges). This defense does not fall into the confusion trap; it carves out space for free speech even where some confusion may exist. At the same time, the Presumption-Infusion Approach does not neglect confusion or trademark rights either. What it does, instead, is apply an even-handed test to a limited situation where trademark harm is not likely to occur. So trademark owners do not have much trademark harm to worry about.

This approach provides several benefits. First, the Rogers-style presumption ensures that we err on the side of protecting speech, rather than trademark owners' interests. It cordons off a portion of speech that is likely to have social or political value (parody and satire). In this respect it resembles KP Permanent's non-confusion-based safeguard for speech. For even if some confusion is likely, it won't be recognized unless it has the potential to cause particularized harm to trademark owners.

Second, this test protects trademark owners' rights too: the presumption is not absolute; it extends only to speech not likely to cause trademark-style harms. Crafting the presumption this way ensure that simply calling a use a parody - or even a finding that a use is a parody - does not negate the rights of trademark owners. A presumption refocuses [*1084] trademark law on harms related to confusion about related products ⁿ³⁰⁹ - the narrower harm traditionally protected by trademark law. ⁿ³¹⁰ Where the parodic products are not related or in direct competition, the trademark law has no harm to protect against. The presumption has a built-in balance - the scale is tipped in favor of noncompetitive speech, even if it may be confusing.

As soon as we introduce direct competition, however, the scale automatically reweighs the interests at stake. Rebutting the presumption triggers an Infusion Approach (i.e., a modified confusion analysis), where the presence of a parodic or satirical use alters the court's analysis of whether confusion is likely. Thus, when a parodic or satirical use appears on a competing good or service, parody - though still given special treatment - may not be given as much leeway.

Using the Infusion Approach as a fallback has at least three benefits. First, it provides protection to speech interests and trademark owners at different places, and where both sets of interests are most important. Speech interests are weakest when the parodist seeks to confuse consumers into buying a closely related product sold by a competitor. Second, these circumstances are precisely the circumstances under which trademark rights are traditionally understood to operate - trademark law prevents confusion and consumer fraud. This approach accounts for this fact by narrowing protection for parody and satire when products compete directly. Finally, it achieves the objective without relying on the traditional confusion analysis. ⁿ³¹¹

The sum advantage of the Presumption-Infusion Approach is concomitantly to reduce trademark law's chilling effect on speech and to protect the markholder's legal interests. Creating presumptions - perhaps similar to those that exist in some aspects of libel law,ⁿ³¹² for [*1085] example - reduces the trademark owner's leverage to bully settlements for parodic or satirical uses. The plaintiff must be prepared to offer more than a theory of confusion. Indeed, she must show that there is even a threat that the parodic use will compete with the original product. These are demands trademark law typically makes, but often have been lost in the expansion of trademark rights and markowners' zeal for enforcement.

By now, it should be apparent how this could be applied to thwart claims against uses like Mutant of Omaha (Omaha Mutual), Michelob Oily (Michelob), and Barbie Girl (Barbie).ⁿ³¹³ The Mutant of Omaha mark, for example, would prevail without any inquiry into confusion. So would Michelob Oily and the use of Barbie Girl in the title of a song. The test can just as easily be applied to trade dress claims, such as using a Barbie Doll in photography (Food Chain Barbie).ⁿ³¹⁴

On the other hand, the Louis Vuitton II case - the one with the dog toy called Chewy Vuiton - would probably meet the PI test. The burden, of course, would be on Louis Vuitton to show that the parody appeared on a closely related product offered for sale by a direct competitor. A dog toy may be a "closely related product" vis-a-vis Louis Vuitton, which sells "pet accessories - collars, leashes, and dog carriers ...".ⁿ³¹⁵ There might be an argument that Chewy Vuiton would not qualify as a direct competitor, assuming Louis Vuitton made extremely high-end dog products. But even if Chewy Vuiton and Louis Vuitton were direct competitors and the PI elements were met, the court would fall back into the Infusion Approach. Here, as we say in the 4th Circuit's original decision, the factors cut in favor of Chewy Vuiton. These cases illustrate that the truly simple cases will be filtered out by the PI test, with the more debatable cases resolved in a reasonable manner with the Infusion Approach.

[*1086]

B. A Broad Noncommercial Defense for Parody in Dilution Actions

Although trademark infringement is the more traditional cause of action, trademark owners can use trademark dilution to quash parodic and satirical uses of their marks. If we break down dilution by kind (blurring and tarnishment), we can see that courts like to apply different tests where parodies are at issue. Yet, for both blurring and tarnishment claims, courts resolved 50% of all cases using section 1125(c)(3)(C), which exempts from dilution "any noncommercial use of a mark."ⁿ³¹⁶ For blurring and even tarnishment, this defense seems to be the best equipped to handle parody. I propose using this defense for noncommercial parodic uses of a mark in the dilution context. For commercial parodies, I argue that two separate standards should apply. For tarnishment, commercial parodies should be totally exempt from dilution actions. Blurring actions, however, need to evaluate commercial parodies using an infusion-style approach, altering the statutory factors used to evaluate dilution by blurring.

For noncommercial parodies, this means relatively broad protection. Unlike the Presumption-Infusion Approach I proposed for infringement, this test is not a presumption; it is a complete defense - a real defense. Noncommercial speech simply is not actionable dilution. This is probably better than the Presumption-Infusion Approach for at least two reasons. First, dilution imbues trademarks with more of a property-like quality than infringement actions.ⁿ³¹⁷ The action itself is premised on the idea that the trademark holder "owns" the image or brand of the mark. Thus, a stronger speech protection here - particularly one grounded in the First Amendment - is less threatening to the fundamental purpose of trademark law than it would be if it existed in the infringement context.

Second, a presumption that uses competition-criteria is misplaced in the dilution context. Dilution is aimed at uses of non-confusing marks on non-competing products. When a company uses Victoria's Secret on motor oil, or McDonald's on motorcycle parts, dilution is the appropriate remedy under current law. No one is confused by the use of the mark [*1087] because the products are so distant (everyone knows McDonald's does not make motorcycle parts and Victoria's Secret makes lingerie, not motor oil). At the same time, dilution protects McDonald's and Victoria's

Secret against just this kind of use because it is likely to "lessen [their marks'] distinctiveness." ⁿ³¹⁸

Yet mark owners often bring dilution claims for competing goods. Victoria's Secret, for example, brought a dilution claim against Victor's Secret, a small store selling lingerie and adult items. ⁿ³¹⁹ Starbucks sued a coffee company that marketed its charred roast coffee under the mark Charbucks, alleging dilution. ⁿ³²⁰ These are cases where dilution should not have a foothold; these are cases where plaintiffs use dilution to hedge confusion claims.

Theoretically, it should be impossible to win a dilution claim against a nearly identical mark on a competing product; that seems to be exactly the situation infringement (or counterfeiting ⁿ³²¹) was meant to cover. When no confusion exists, though, trademark owners seek to find liability any way they can, so they assert a dilution claim. Given dilution should not apply where competing products are at issue, the precise formulation of the Presumption-Infusion Approach I advocated for the parody defense in infringement doesn't apply to dilution.

So if my previous proposal doesn't translate to the dilution context, what approach should we take? Once we've settled on noncommercial use as the place for parody - and we've used the same definition for parody in both infringement and dilution actions - the next question is, what constitutes "noncommercial"?

Given the legislative history indicating the word "noncommercial" was meant to draw on First Amendment doctrine, that is the place we should look. ⁿ³²² As noted before, the Supreme Court has defined [*1088] commercial speech as speech that does "no more than propose a commercial transaction." This kind of speech is "expression related solely to the economic interests of the speaker and its audience." ⁿ³²³ To that end, commercial speech has a dual function: to make the speaker money but also to inform the consumer and society of a product by distributing information. ⁿ³²⁴ Thus, economic motivations alone are not the only question when it comes to deciding what is commercial speech. ⁿ³²⁵ An overwhelming discussion of important public issues may render speech noncommercial despite economic motivations. ⁿ³²⁶ A mere passing reference to social issues, however, will not. ⁿ³²⁷ Where commercial and noncommercial elements are "inextricably intertwined," the scale tips toward noncommercial. ⁿ³²⁸

Using this "framework," courts have taken different approaches to defining "noncommercial." One commentator has described two different types of analysis, which in a different setting some race theorists would call the rule of hypodescent: a drop of one "race" makes a mixed-race person from that race. ⁿ³²⁹ One set of courts (the "all is commercial" courts) take the view that any element of commerciality [*1089] renders speech commercial. ⁿ³³⁰ Another group of courts (the "all is protected" courts), by contrast, find that any drop of expression renders a use noncommercial. Criticizing this "all is commercial" approach, the commentator notes that courts frequently focus on economic harm to the mark holder, which although part of the dilution inquiry, is irrelevant to the First Amendment doctrine of commercial speech. ⁿ³³¹ At the same time, immunizing any speech with a hint of non-commerciality may go too far. ⁿ³³² So the commentator suggests courts pay more attention to the content of the speech and its benefits to the speaker, rather than its negative influence on the trademark holder. ⁿ³³³

Others have proposed various methods for discerning what constitutes commercial speech. Lisa Ramsey argues that trademarks are commercial speech when the reasonable consumer believes the "language partly or primarily identifies the source or licensor of the product." ⁿ³³⁴ On this view, where some speech is not purely commercial or noncommercial - that is, "hybrid" speech - courts should deem it noncommercial "where the noncommercial nature of the speech predominates, or the commercial and noncommercial components are inextricably intertwined." ⁿ³³⁵

Arlen Lanvardt has argued for a somewhat different standard. He proposes a framework for analyzing the commerciality of parodies based on three principles provided by the Supreme Court. First, "when the trademark parodist has used his version of a trademark to help market a good or service other than the parody itself, the parody is almost certainly commercial in nature." ⁿ³³⁶ Second, economic motive does not [*1090] render noncommercial speech commercial. ⁿ³³⁷ Third - similar to Lisa Ramsey's argument - courts should classify hybrid speech according to whether commercial or noncommercial aspects of the speech predominate. ⁿ³³⁸ In all cases, the law protects the speech of publishers and the press as noncommercial expression because of the social value (education, information, and

entertainment) of the speech.

Thus, when crafting a standard for non-commerciality, these commentators have some good advice. Courts should focus on the speech content, not the economic harm it may cause to the trademark holder. The question of harm, if it is taken up at all, is done so in the elements of dilution, not the exceptions to it. Additionally, courts should use First Amendment law to define commercial speech, as the Ninth Circuit did when it quoted *Central Hudson* to resolve a dilution claim under section 1125(c). That also means understanding that the definition of commercial speech is context-specific.ⁿ³³⁹

In light of these considerations, these scholars' approaches, when combined, seem quite palatable. Courts should focus on the speech and not the harm to the trademark owner: hybrid speech will be noncommercial where noncommercial elements dominate or are inextricably intertwined with noncommercial expression.

Under this definition the advertisement in *Anheuser-Busch, Inc. v. Balducci Publications*ⁿ³⁴⁰ would have qualified as a noncommercial parody. As I described above, the ads depicted Michelob beer as oily. To better inform the reader, I've displayed them here.

[*1091] Image 1

The *Anheuser-Busch* court concluded that tarnishment had occurred because consumers might think Michelob actually contained oil. But under this noncommercial test, we would ask not whether tarnishment occurred (that is a question of harm to the trademark owner). We would ask instead whether the use was noncommercial. The expression here **[*1092]** was for "mock advertisement."ⁿ³⁴¹ The point was to make a comment about a recent oil spill that may have contaminated Michelob beer's source water.ⁿ³⁴² There is not any evidence of economic motive of the speaker; indeed, the speech is primarily informative. Thus, it is noncommercial.

But what about a closer case - a case where the speech might seem commercial? Take the case *Langvardt* finds to be commercial speech and therefore unprotected: *Mutual of Omaha Insurance Co. v. Novak*.ⁿ³⁴³ There the defendant used the mark Mutual of Omaha (the name of an insurance company) to make t-shirts, mugs, and other paraphernalia with the mark "Mutant of Omaha" in a variety of phrases relating to nuclear war. The front of one T-shirt read, "Nuclear Holocaust Insurance" or "Sponsored by Mutant of Omaha Nuclear Holocaust Insurance Co."ⁿ³⁴⁴ The backside of the shirt read, "When the world's in ashes we'll have you covered."ⁿ³⁴⁵ *Langvardt* concludes the speech was commercial because the defendant produced a variety of goods, sold them in a variety of places, and used different designs on each shirt.ⁿ³⁴⁶ But the question here is not solely the economic benefit to the parodists. We also need to examine the expression itself, which makes a comment on important public issue: nuclear proliferation. Although the commercial gain may seem to make this commercial speech, it is not clear what element - commercial or noncommercial - predominates. Instead, it appears the two are mixed hybrid speech. In such a case, the use should be deemed noncommercial and, thus, nondiluting.

While seemingly broad, the definition of noncommercial I propose is appropriate in the dilution context. Because parodic marks are both expression and advertisement under my proposed definition, parodies may be less likely than other uses of marks to qualify as commercial **[*1093]** speech. As a result, parodies might enjoy more protection than other uses of marks. Although this brings parody close to a per se defense in dilution, there is reason to think that is just the appropriate standard: broad protection with some room for dilution claims. After all, dilution is not an attempt to regulate false or misleading commercial speech: even the weakest-but-successful dilution claims do not involve misleading speech - that is precisely why the dilution statute exists: to regulate nonconfusing (which courts have assumed is the same as misleadingⁿ³⁴⁷) "truthful" trademark uses that can dilute mark value. Dilution regulates nonmisleading commercial speech, which presents a fundamentally different proposition for First Amendment purposes.

Courts should not be making the same assumption for dilution that they make for infringement (i.e., confusion is

commensurate with misleading). No court analyzing dilution should fall into the lurking confusion traps: they should not analyze confusion, and they shouldn't use dilution as a way to circumvent a finding of no confusion. Thus, the regulation of diluting commercial speech is itself less than immune from constitutional challenge.

That argument has particular force in light of *44 Liquormart, Inc. v. Rhode Island*.ⁿ³⁴⁸ The Supreme Court's plurality opinionⁿ³⁴⁹ in *44 Liquormart* stated that a more rigorous review applies when laws regulate commercial speech "unrelated to consumer protection."ⁿ³⁵⁰ Although dilution laws might have some relevance to consumer protection (a stronger brand means consumers can find things more easily), they are not related to consumer protection in any strict sense. The purpose of dilution laws is brand-maintenance.

Further supporting a broad defense for commercial parody is its social value beyond mere consumer information; parody usually criticizes or comments on society or the trademark itself. For these reasons, even parodies designed to make a profit should have some protections - where, for example, the mark, or the product on which the mark appears, is the parody (or part of the parody),ⁿ³⁵¹ the commercial nature of the use should not affect the analysis. Additionally, parodies in the dilution context (with which we are concerned) will always be used as a mark [*1094] (otherwise they fall under the fair use defense). If a mark is used as a source identifier, courts will likely find the use to be commercial - because it is affixed to a good or service. There may be exceptions, such as nonprofits, but even those would be at risk. Consider again the *Anheuser-Bush* case. Imagine that instead of an advertisement in a magazine, the graphics had appeared on T-shirts, as in *Mutual of Omaha*. A court may find this use to be commercial. But, as noted before, dilution protection extends to truthful and nonmisleading commercial speech. Without it being tested constitutionally, at the very least expressive forms of communication like parody should be protected. To accomplish this task, we take a broad definition of noncommercial, including most parodic uses.

Even though the standard I propose would include more speech within the noncommercial parody heading, there is still a risk courts could narrow the scope of the defense. And, under my proposed framework, a commercial parody doesn't meet the TDRA exception - so at this point it would be considered diluting. But if our goal is to protect parodies in a systematic way, then we should limit courts' ability to curtail that protection. Indeed, even if courts abided by the interpretation I proposed, there's always a risk courts could narrow it at some later date.

In other words, I assume that, despite the broad definition I propose, some courts will inevitably narrow their conception of noncommercial speech. Imagine, for example, that *South Butt*, instead of selling clothes under the mark meant to parody *North Face*, sold toilet paper, diapers, or other hygienic products.ⁿ³⁵² Imagine further it coined a slogan, "never stop eating," "never stop sweating," or something to that effect. In this case, a court may be tempted to find the use "commercial" even under the broad definition I have proposed. That conclusion, I suggest, would be incorrect. Assuming this narrowing occurs, however, what would happen to the dilution claims?ⁿ³⁵³

For a tarnishment claim, it seems impossible to divorce the expression (the play on words and humor) from the harm (negative associations as a result of associating *North Face* with excretion). (Some argue that this is not the kind of harm at least tarnishment is designed to protect against.ⁿ³⁵⁴) That is just the point: any harm suffered by a parody will [*1095] result from the expressive component of the mark's use - either criticizing or commenting on the mark, or using it to comment on some other important social issue. It is impossible to sort out the harm from the expression. The mock advertisement in *Anheuser-Bush* claiming water source contamination was the harm - just as the message about nuclear warfare was the harm in *Mutual of Omaha*. Although one case targeted the mark owner and one did not, in both cases the harm derived from the expressive content. So too is it the case with my hypothetical: the *South Butt* mark is not just about toiletry products - it is about making fun of *North Face*, or being funny and using the *North Face* mark to do it.ⁿ³⁵⁵ The point is that expression and harm are tied together, and inseparable in the case of parody. Thus, to protect speech interests, I propose that parodies be totally exempt from liability in tarnishment actions.

Dilution by blurring, however, is a different story. Although commercial parodies could in theory dilute the mark, courts analyzing blurring claims involving parody have generally found this not to be the case.ⁿ³⁵⁶ In Part I.B, I explained the different approaches courts use to evaluate parody. While I have supported using the noncommercial use

exemption to protect parody, that method depends on courts correctly defining noncommercial speech broadly. Given the risk that they will do the opposite (i.e., courts may find parodies to be commercial when the parodies use the mark to sell a product commercial), another layer of protection is needed. Enter the Infusion Approach: in dilution cases, a parody finding colors the blurring factors, much as some courts do with the confusion factors. This adds another layer of protections for parodies that may have some commercial component.

While it is not a defense, the Infusion Approach should suffice as a further safeguard for expressive commercial parodies. The approach captures the reality that commercial parodies have expressive value - and that, even though commercial, this expressive value might actually enhance, rather than dilute, the famous mark's distinctiveness.ⁿ³⁵⁷ That might not be the case for every parody - but certainly for some. And it is much better for speech to allow courts to sort out whether that is the case [*1096] than it is to simply declare commercial parodies dilutive.

Thus, in the end, the test for dilution I propose is similar in form - and in some ways substance - to the Presumption-Infusion Approach I suggested for infringement. The main difference in my dilution approach - which I call the Defense-Infusion Approach - is that it includes, as the name implies, a defense to dilution claims. For tarnishment claims, the defense applies regardless of whether the parody is commercial. For blurring claims, however, the defense applies only to noncommercial parodies. Where a claim for blurring is based on a commercial parody, courts should, after finding by a preponderance of the evidence that the use is commercial, analyze the blurring factors in the TDRA colored by a finding of parody. This defense is quite strong - indeed, stronger than the Presumption-Infusion Approach. But a stronger defense makes sense in the context of dilution, where trademark owners are given more property-like interests and, thus, more ability to silence expressive speech.

CONCLUSION

When courts confront parody within trademark law, they typically use doctrine to accommodate the First Amendment interests it invokes. In traditional trademark infringement actions, courts sometimes alter their confusion analyses to account for parodic uses of trademarks. In dilution actions, courts sometimes find parodic uses to fall within the provision exempting from liability "noncommercial" uses of a trademark. In other cases, courts engage in ad hoc balancing, weighing quasi-property interests against the interests of the user (not necessarily even the interest in expression per se), or they may discuss the value of information.

Regardless of approach, courts typically characterize disputes as contests between a property right of the trademark holder and the user's ability to use (make speech with) that mark without infringing those rights. The question is set up to favor the trademark owner: does the use of the mark infringe on her rights, and to what extent? But surely users have rights too - rights apart from making nonconfusing uses of trademarks. Indeed, this characterization of trademark disputes as "property right" versus "privileged use" or "exceptions" can cloud the analysis, largely because the concept of a trademark right as property has galvanized courts to eliminate any and all confusion and dilution.ⁿ³⁵⁸ In [*1097] pursuit of that goal, trademark actions now include initial interest confusion, post-sale confusion, merchandizing rights, etc. Further narrowing the potential uses by non-mark-owners is courts' willingness to find liability for likelihood of confusion when surveys revealed confusion rates as low as 11%, 13%, and 16%, and dilution for less-than-famous marks. These facts mean that the burden of proof on the trademark owner is less than demanding.ⁿ³⁵⁹

Broadening trademark rights while free-speech defenses remain static poses real problems for expressive users, like parodists and satirists. Under this conception, a privileged "use" does not seem to carry much legal clout when compared to a "right" conferred by statute. After all, if you have a "right" to use a trademark, the other person has an affirmative obligation to refrain from violating your right.ⁿ³⁶⁰ With rightsholders constantly asserting those rights, and with the conceptual scale tilted in their favor, the law and the judiciary lose sight of the other interests at stake. Nearly sixty years ago, Thomas Emerson identified this problem eloquently:

The protection of property interests constitutes the day-to-day job of the government apparatus. Protection of freedom of expression is more abstract, more remote, less insistent. Furthermore, advancement of the competing social interest is more likely to be the direct concern of the groups which influence and control the government machinery. And the problem of self-control may be even more difficult in a government bureaucracy than in an individual. ⁿ³⁶¹

Although discussing express government regulation and enforcement, Emerson's point applies aptly to trademark law. Courts are in the business of resolving trademark disputes - and trademark holders are in the business of bringing those suits. As more trademark owners clamor for liability, courts (and Congress) have recognized new standards of [*1098] liability through legislation and judicial enforcement. In the courts, the trademark owner's influence is much more subtle. Indeed, the law itself sets up trademark disputes to favor owners. After all, it is much easier for courts to "enforce" the Lanham Act than to carefully consider any countervailing interests - interests that are not readily apparent simply by reading the Act's text in isolation.

But law - and courts - should be particularly attuned to First Amendment interests. The law plays a prominent role in protecting people's rights, not just trademark owners'. Expanding trademark rights marginalizes users in favor of large groups who exercise political control over the dimensions of trademark law and policy. ⁿ³⁶² Trademark owners - as evidenced by their lawsuits - attempt to censor others based on the content of their speech. Given the fact that confusion (or dilution) is the watchword even in parody cases, we should start to either move away from confusion or supplement the confusion analysis to provide more space for parodic uses.

To remedy this problem, I proposed we revise the parody doctrine in trademark law, both for traditional infringement and dilution. First, I explained how courts have taken a variety of approaches to analyzing infringement and dilution claims where the mark is used allegedly as a parody. Each approach had its deficiencies and benefits. The primary problem was that almost none of them fashioned a satisfactory safeguard for speech. Indeed, most approaches in the confusion analyses were merely confusion tests dressed up in different legal rhetoric.

To avoid the confusion trap, I proposed two new parody "safeguards," one for infringement and one for dilution. Both tests used the same definition of parody I suggested earlier in the article, encompassing both "parody" and "satire" as defined by Campbell. In the infringement analysis, I proposed avoiding the confusion trap by using a presumption. This defense would presume parody and satire are protected expression. The plaintiff, however, could rebut this presumption by showing that the parodic mark appears on closely related products or services sold by direct competitors. Once the plaintiff rebuts the presumption, a court should determine whether the parodic mark is likely to confuse, taking into account how the parodic nature of the use alters this analysis. For [*1099] dilution claims, I suggested courts analyze whether parodies qualify as "noncommercial uses" under the TDRA. For tarnishment claims, this meant parody was a per se defense. For blurring claims, parody altered the factors courts use to determine liability. Placing parodies under this rubric safeguards speech in the face of strong, non-traditional trademark rights - rights designed to protect only the trademark owners' interests, not the public's.

The aim of these alterations is to better protect expressive speech while simultaneously upholding the purposes of trademark law. And, because these modifications do not require any statutory alterations, courts can implement them immediately. If they do, the law will free up more expressive space within trademark law; users of those marks won't feel as chilled by the effects of expansive trademark rights. The result: More speech and fewer trademark lawsuits.

APPENDIX: METHODOLOGY: EXAMINING PARODY IN RECENT CASES

This Article focuses on the relationship between Campbell, parody, and trademark law. This Article studied trademark parody cases that cite or discuss *Campbell v. Acuff Rose, Inc.* ⁿ³⁶³ *Campbell* represented the Court's first major attempt to classify parody in over forty years. ⁿ³⁶⁴ To find all trademark parody cases citing *Campbell*, in March of 2010 I entered the citation into Westlaw and conducted a "Citing References" search. The search returned 4,254 documents citing *Campbell*. I narrowed these results by asking Westlaw to return only cases and administrative decisions citing *Campbell*. This returned 386 cases. I further narrowed the cases to those involving the words "parody & trademark,"

which returned seventy-three cases. On January 30, 2011, I re-performed this search for all cases after March 2010. The search revealed six new cases, only one of which was relevant and included in the results.ⁿ³⁶⁵

Next, I manually examined each case of the seventy-three cases to determine whether the trademark infringement claim - either traditional infringement or dilution claims - included a discussion of parody or an argument that involved parody.ⁿ³⁶⁶ This did not require the section [*1100] discussing trademark law and parody to directly cite Campbell. It was sufficient that Campbell was cited somewhere in the decision. The reason for this method was to include cases where Campbell may have been an underlying factor in the Court's decision, even if the case was not discussed in great detail. I completed this task moving circuit to circuit - that is, by examining manually all the cases starting with the United States Court of Appeals for the First Circuit and ending with the United States Court of Appeals for the Federal Circuit.

When examining these cases, I often encountered more than one decision from the same case: sometimes a district court would render a decision on trademark parody, which would then be appealed and decided by the appellate court. So, for example, a district court may grant summary judgment for the defendant, finding no trademark infringement on parody-related grounds. A party then appeals that decision, and the appellate court either reverses or affirms the decision below. In such situations, I included in my data multiple decisions by different courts in the same case. In other words, I included appeals and remanded decisions so long as they cited or discussed Campbell. If the district court cited Campbell but, on appeal, the appellate court did not, I included only the district court decision in my calculations.

After collecting and sorting cases in the manner described, twenty-three cases remained.

As far as content goes, I included only cases involving trademark or trade dress where parody was at issue. Thus, I excluded from discussion noninfringements based on nonparodic rationales, such as genericide. Excluding these cases avoided tapping into claims on which Campbell has no bearing. For an example, see *Harley-Davidson, Inc. v. Grottanelli*,ⁿ³⁶⁷ where the court found the word "Hog" had become generic as applied to motorcycles.ⁿ³⁶⁸ In that case, I focused only on the claim as to the valid trademark, which consisted of a bar and shield logo.

I used the same exclusionary practice for trade dress infringement claims: I did not count them in my tables if a court decided them on nonparodic grounds, such as when a court resolved the trade dress claim by a finding of no secondary meaning.ⁿ³⁶⁹ I excluded these because the [*1101] claims did not involve a discussion of parody and, therefore, were not relevant to this Article. Where a trade dress claim was resolved on the same grounds as the infringement claim, I counted them both as only one claim.ⁿ³⁷⁰

I also excluded from my calculations right of publicity claims because they do not bear on trademark law parody questions directly. Even in cases that involved trademark parody and some other claim such as right of publicity, I did not code for any part of the nontrademark claim.

I did, however, code for two variable trademark parody cases that involved copyright claims. I coded for (1) whether the case involved a copyright claim, and, if so, (2) whether that court found copyright infringement. I coded for copyright claims because they bore directly on whether trademark and copyright claims were related vis-a-vis Campbell. Claims were counted as "infringement" in both copyright and trademark cases where a court (1) granted summary judgment or (2) entered a preliminary injunction on the plaintiff's claim.

I also coded for how courts determined infringement, both for traditional infringement and dilution. For the sake of flow and argument, I explained these approaches when we confront them in Part III and IV. Here I'll briefly explain my general approach. First, I read all 23 decisions. I then found patterns in the courts' analyses. For traditional infringement claims, courts citing Campbell used six approaches when parody was present. I discovered three other approaches in cases not citing Campbell. For dilution claims, I again found six approaches to determining dilution in cases citing Campbell. Although I omitted from my survey all cases failing to cite Campbell, I did not find any other approaches in the cases I did examine. In Part II, I explain my findings and analysis as to each of these approaches. For the time being,

the particulars of the approaches are not relevant.

McCarthy, McCarthy on Trademarks and Unfair Competition § 31:156 (4th ed. 2012); Gary Meyers, Trademark Parody: Lessons from the Copyright Decision in *Campbell v. Acuff-Rose Music, Inc.*, 59 Law & Contemp. Probs. 181, 204-10 (1996) (arguing that Campbell's alteration of the fair use factors is instructive to trademark law, and parody should similarly alter the confusion factors in trademark law). See also Aaron F. Jaroff, Comment, Big Boi, Barbie, Dr. Seuss, and the King: Expanding the Constitutional Protections for the Satirical Use of Famous Trademarks, 57 Am. U. L. Rev. 641 (2008) (explaining how concepts from Campbell have been incorporated into trademark law). The analogy between copyright and trademark parody analyses had been made prior to Campbell. See, e.g., Robert J. Shaughnessy, Note, Trademark Parody: A Fair Use and First Amendment Analysis, 72 Va. L. Rev. 1079 (1986) (arguing that copyright fair uses and parody are relevant to parody analysis in trademark law).

n18. David A. Simon, Reasonable Perception and Parody in Copyright Law, 2010 Utah L. Rev. 779.

n19. 6 McCarthy, *supra* note 17, § 31:153 (noting that parody "is not an affirmative defense to an infringement charge" but "rather ... a way of arguing that there will be no trademark infringement because there will be no likelihood of confusion.").

n20. That said, the parody definition is not just a likelihood of confusion test. It has one further element that makes it similar to the definition of parody laid out in Campbell. The parodic mark must in some way associate itself with the original mark - it must use the original to show that it is not the original. Throughout this Article, I refer to the "likelihood of confusion" test as "confusion" or "infringement" for short hand. Thus, when I say "infringement" or "typical infringement" I do not mean to include dilution actions.

n21. 15 U.S.C. § 1125(a)(1)(A) (2006) (creating a cause of action for false designation of origin that is "likely to cause confusion ... mistake, or to deceive as to the affiliation, connection, or association ... as to the origin, sponsorship, or approval of his or her goods, services, or commercial activities by another person ..."); 4 McCarthy, *supra* note 17, § 23:1 ("'Likelihood of confusion' is the basic test of both common-law trademark infringement and federal statutory trade mark infringement." (footnotes omitted)); 1 McCarthy, *supra* note 17, §§3:8-3:9 (explaining that trademark law originally required products to emanate from a "physical source or origin," but has evolved to mean that "consumers [expect] all goods with the same mark to come from a single, but anonymous or indistinguishable source ...").

n22. 4 McCarthy, *supra* note 17, § 23:19 (explaining the factors listed by the Restatement (Third) of Unfair Competition §§20-23 (1995), which include "1. The degree of resemblance between the conflicting designations; 2. The similarity of the marketing methods and channels of distribution; 3. The characteristics of the prospective purchasers and the degree of care they exercise; 4. The degree of distinctiveness of the senior user's mark; 5. Where the goods or services are not competitive, the likelihood that prospective buyers would expect the senior user to expand into the field of the junior user; 6. Where the goods or services are sold in different territories, the extent to which the senior user's designation is known in the junior user's territory; 7. The intent of the junior user; and 8. Evidence of actual confusion."). See also Graeme B. Dinwoodie & Mark D. Janis, Trademarks and Unfair Competition: Law and Policy 470-71 fig. 7.1 (2004) (listing each circuit's approach to the factor analysis and showing courts use between six and thirteen factors to analyze likelihood of confusion).

F + W Media Inc.*, 819 F. Supp. 2d 1310, 1324 (N.D. Ga. 2011); *Smith v. Wal-Mart Stores, Inc.*, 537 F. Supp. 2d 1302, 1335-38 (N.D. Ga. 2008); *World Wrestling Fed'n Entm't Inc. (WWE) v. Big Dog Holdings, Inc.*, 280 F. Supp. 2d 413, 430-40 (W.D. Pa. 2003); *Charles Atlas, Ltd. v. DC Comics, Inc.*, 112 F. Supp. 2d 330, 337-40 (S.D.N.Y. 2000) (applying modified Rogers test from *Cliffs Notes* by assessing the expressive value of the defendant's work and then walking through the likelihood of confusion factors as colored by a finding of parody with expressive value). See also *New York Stock Exch., Inc. v. New York, New York Hotel LLC*, 293 F.3d 550, 555-56 (2d Cir. 2002) (holding that use of modified versions of New York Stock Exchange marks on a casino in Las Vegas that replicated parts of New York City was parodic and noninfringing, and using the nature of the parody to inform the analysis of the strength of the mark); *Cliffs Notes, Inc. v. Bantam Doubleday Dell Publ'g Grp., Inc.*, 886 F.2d 490, 493-94 (2d Cir. 1989) (applying a variation of the Rogers test to parody).

n30. See, e.g., Simon, *supra* note 18, at 821-37. There is an important difference here. Fair use is a doctrine that evaluates a use independent of the infringement analysis. That is, the court analyzes fair use only if the work infringes the plaintiff's copyright. Under the Infusion Approach, however, parody shapes the infringement analysis; it is not a defense to infringement. This is an important point, as we shall see, because it accentuates why the Infusion Approach alone is inadequate.

n31. Louis Vuitton II, 507 F.3d at 261-62; Hormel Foods, 73 F.3d at 503; WWE, 280 F. Supp. 2d at 435; Charles Atlas, 112 F. Supp. 2d at 340-41.

n85. *Id.*

n86. *Id.* ("Given the photographic medium and Forsythe's goal of representing the social implications of Barbie, including issues of sexuality and body image, Forsythe's use of the Barbie torso and head is both reasonable and necessary.").

n87. *Id.*

n88. *Id.* at 811-12.

n89. *Id.* at 812.

n90. See Graeme B. Dinwoodie, Lewis & Clark Law School Ninth Distinguished IP Lecture: Developing Defenses in Trademark Law, 13 Lewis & Clark L. Rev. 99, 111 (2009) ("The third part of the test looks very much [like] a proxy for an assessment of likely confusion as to association, sponsorship or endorsement."); Samuel M. Duncan, Note, Protecting Nominative Fair Use, Parody, and Other Speech-Interests by Reforming the Inconsistent Exemptions from Trademark Liability, 44 U. Mich. J.L. Reform 219, 239 (2010) ("Further, as in nominative fair use, in infringement cases the doctrine is, at its base, not that parody is protected speech, but that, if understood correctly, parodic speech is not likely to cause confusion." (emphasis added)).

n91. See 4 McCarthy, *supra* note 17, § 23:11 ("'"Nominative fair use' was created to be an alternative method for analyzing if there is the kind of likelihood of confusion that constitutes trademark infringement."); *id.* ("The 'nominative fair use' analysis is a 'defense' only in the sense that an accused infringer in certain cases can use the analysis to argue that there will be no infringement because there will be no likelihood of confusion."). But see *id.* (arguing that, "in the Third Circuit, 'nominative fair use' is indeed an affirmative defense. In its Century 21 case, the Third Circuit took the thinking behind the Ninth Circuit analysis and turned it into a much more potent defensive tool.").

n92. Dogan & Lemley, *supra* note 10, at 37-38.

n93. *Id.* at 38.

n94. *Id.*

n95. *E.S.S. Entm't 2000, Inc. v. Rock Star Videos, Inc.*, 444 F. Supp. 2d 1012, 1032-34 (C.D. Cal. 2006) (holding that the nominative fair use defense was not available to the defendant's video game rendition of the plaintiff's strip club because the defendant did not design the strip club in the video game to resemble plaintiff's actual strip club, and stating that "because the [defendant's] Game does not specifically identify the [plaintiff's strip club] as such, the elements of the [nominative fair use defense] cannot readily be applied.").

n96. Marks that are not closely similar, and thus fall outside the scope of nominative fair use, may still refer to the plaintiff's mark. To the extent that nominative fair use would not cover such instances when they involve parody, it would be unhelpful.

n97. *Dr. Seuss Enters., L.P. v. Penguin Books USA, Inc.* (Dr. Seuss I), 924 F. Supp. 1559 (S.D. Cal. 1996).

n98. *Id.* at 1571 (quoting *Dallas Cowboys Cheerleaders, Inc. v. Pussycat Cinema, Ltd.*, 604 F.2d 200, 206 (2d Cir. 1979)); *id.* ("The Court feels that the weight of Supreme Court authority indicates that it would favor adoption of the first approach as adequately accommodating the narrow instances when trademark protection cannot be viewed as a reasonable time, place, or manner restriction.").

n99. *Id.* at 1569 (finding on the copyright claim that the nature, character, and purpose of the defendant's use of the central character illustration of *The Cat in the Hat* and the central rhyme in *Horton Hatches the Egg* weighed against fair use, but also that defendant could not justify taking the central character illustration from *The Cat in the Hat*, yet the defendant could justify its taking from *Horton Hatches the Egg* and *One Fish Two Fish Red Fish Blue Fish*); *id.* at 1571 (finding that a First Amendment defense for the trademark claim was unlikely to succeed based on the Court's copyright analysis).

n100. *Id.* at 1573. Indeed, the court itself suggested that the confusion analysis is the only relevant inquiry: "Where alternative means of achieving the satiric or parodic ends exist that would not entail consumer confusion, the First Amendment will not protect the parodist from being held to infringe." *Id.* (footnote omitted).

n121. *Id.* at 3 ("An explicit consideration of each of the eight Polaroid factors tips the scales entirely in favor of the defendants, and need not be discussed here." (emphasis in original)).

n122. There is one other approach that appears in trademark disputes involving domain names, but it was rejected by the court that considered it. The approach was based on the requirement some courts impose that the defendant's use of a mark must be "commercial" to infringe. In one case, the court considered and rejected the argument that parody was a per se exception to the "commercial use" requirement, holding instead that it merely factored into the confusion test. *Utah Lighthouse Ministry, Inc. v. Discovery Computing, Inc.*, 506 F. Supp. 2d 889, 897-98 (D. Utah 2007) (stating that trademark law applies only to the use of a trademark in connection with a commercial transaction - i.e., a sale of a good or service (citing *Bosley Med. Inst., Inc. v. Kramer*, 403 F.3d 672, 674, 676-77 (9th Cir. 2005))), *aff'd*, 527 F.3d 1045, 1055, 1058 (10th Cir. 2008) (holding that "parody is another factor to consider in determining the likelihood of confusion, and casts several of the above-cited six factors in a different light," agreeing with the district court's noncommercial use conclusion in the context of the Anti-Cybersquatting Protection Act's (ACPA) fair use provision (citing 15 U.S.C. § 1125(d)(1)(B)(i)(IV) (2006))). A similar analysis has been applied to determining bad faith under the ACPA, where one factor in determining bad faith is whether the defendant's use is bona fide noncommercial or fair. See *id.*

n123. See 4 McCarthy, *supra* note 19, § 23:6.

n124. *Brookfield Commc'ns, Inc. v. W. Coast Entm't Corp.*, 174 F.3d 1036, 1064 (9th Cir. 1999) ("Suppose West Coast's competitor (let's call it 'Blockbuster') puts up a billboard on a highway reading - 'West Coast Video: 2 miles ahead at Exit 7' - where West Coast is really located at Exit 8 but Blockbuster is located at Exit 7. Customers looking for West Coast's store will pull off at Exit 7 and drive around looking for it. Unable to locate West Coast, but seeing the Blockbuster store right by the highway entrance, they may simply rent there.").

n125. 263 F.3d 359 (4th Cir. 2001). The Ninth Circuit has rejected the PETA court's approach as to a finding of commercial use because it would too greatly silence speech. *Contra Bosley Med. Inst., Inc. v. Kremer*, 403 F.3d 672, 679 (9th Cir. 2005) ("To the extent that the PETA court held that the Lanham Act's commercial use requirement is satisfied because the defendant's use of the plaintiff's mark as the domain name may deter customers from reaching the plaintiff's site itself, we respectfully disagree with that rationale. While it is true that www.BosleyMedical.com is not sponsored by Bosley Medical, it is just as true that it is about Bosley Medical. The PETA approach would place most critical, otherwise protected consumer commentary under the restrictions of the Lanham Act. Other courts have also rejected this theory as over-expansive." (emphasis in original)).

n126. PETA, 263 F.3d at 363 ("A viewer accessing the website would see the title 'People Eating Tasty Animals' in large, bold type. Under the title, the viewer would see a statement that the website was a 'resource for those who enjoy eating meat, wearing fur and leather, hunting, and the fruits of scientific research.' The website contained links to various meat, fur, leather, hunting, animal research, and other organizations, all of which held views generally antithetical to PETA's views. Another statement on the website asked the viewer whether he/she was 'Feeling lost? Offended? Perhaps you should, like, exit immediately.' The phrase 'exit immediately' contained a hyperlink to PETA's official website." (emphasis in original)).

n127. *Id.* at 362-63.

n128. *Id.* at 366 ("Looking at [the defendant's] domain name alone, there is no suggestion of a parody. The domain name peta.org simply copies PETA's Mark, conveying the message that it is related to PETA. The domain name does not convey the second, contradictory message needed to establish a parody - a message that the domain name is not related to PETA, but that it is a parody of PETA.").

n129. *Id.* ("This second message [(that the mark is not the original)] is not conveyed simultaneously with the first message, as required to be considered a parody." (emphasis in original)).

n130. See, e.g., *Int'l Ass'n of Machinists & Aerospace Workers v. Winship Green Nursing Ctr.*, 103 F.3d 196, 201 (1st Cir. 1996) ("Because the listed factors must be evaluated in context, any meaningful inquiry into the likelihood of confusion necessarily must replicate the circumstances in which the ordinary consumer actually confronts (or probably will confront) the conflicting mark.").

n178. *Louis Vuitton Malletier S.A. v. Haute Diggity Dog, LLC* (Louis Vuitton II), 507 F.3d 252 (4th Cir. 2007); *Mattel Inc. v. Walking Mountain Prods.*, 353 F.3d 792 (9th Cir. 2003); *Mattel, Inc. v. MCA Records, Inc.* (Mattel III), 296 F.3d 894 (9th Cir. 2002);

Harley-Davidson, Inc. v. Grottanelli, 164 F.3d 806 (2d Cir. 1999); Lyons P'ship v. Giannoulas (Giannoulas II), 179 F.3d 384 (5th Cir. 1999); Elvis Presley Enters., Inc. v. Capece (Elvis Presley II), 141 F.3d 188 (5th Cir. 1998); Dr. Seuss Enters., L.P. v. Penguin Books USA, Inc. (Dr. Seuss II), 109 F.3d 1394 (9th Cir. 1997); Cardtoons, L.C. v. Major League Baseball Players Ass'n, 95 F.3d 959 (10th Cir. 1996); Anheuser-Busch, Inc., 28 F.3d 769; CCA & B, LLC v. F + W Media Inc., 819 F. Supp. 2d 1310 (N.D. Ga. 2011); Protectmarriage.com v. Courage Campaign, 680 F. Supp. 2d 1225 (E.D. Cal. 2010); Burck v. Mars, Inc., 571 F. Supp. 2d 446 (S.D.N.Y. 2008); Burnett v. Twentieth Century Fox Film Corp., 491 F. Supp. 2d 962, 967-69 (C.D. Cal. 2007) (finding the work could be reasonably perceived as a parody and then holding use was fair); Louis Vuitton Malletier S.A. v. Haute Diggity Dog, LLC (Louis Vuitton I), 464 F. Supp. 2d 495 (E.D. Va. 2006); Mastercard Int'l Inc. v. Nader 2000 Primary Comm., Inc., No. 00 Civ.6068(GBD), 2004 WL 434404 (S.D.N.Y. Mar. 8, 2004); World Wrestling Fed'n Entm't, Inc. (WWE) v. Big Dog Holdings, Inc., 280 F. Supp. 2d 413 (W.D. Pa. 2003); Kane v. Comedy Partners, No. 00 Civ. 158(GBD), 2003 WL 22383387 (S.D.N.Y. Oct. 16, 2003); N.Y. Stock Exch., Inc. v. Gahary, 196 F. Supp. 2d 401 (S.D.N.Y. 2002); Charles Atlas, Ltd. v. DC Comics, Inc., 112 F. Supp. 2d 330 (S.D.N.Y. 2000); Lyons P'ship v. Giannoulas (Giannoulas I), 14 F. Supp. 2d 947 (N.D. Tex. 1998); Mattel, Inc. v. MCA Records, Inc. (Mattel II), 28 F. Supp. 2d 1120 (C.D. Cal. 1998); Mattel, Inc. v. MCA Records, Inc. (Mattel I), No. CV 97-6791 WMB, 1998 WL 422641 (C.D. Cal. Feb. 18, 1998); Dr. Seuss Enters., L.P. v. Penguin Books USA, Inc. (Dr. Seuss I), 924 F. Supp. 1559 (S.D. Cal. 1996); Elvis Presley I, 950 F. Supp. 783; Schieffelin & Co. v. Jack Co. of Boca, Inc., 850 F. Supp. 232 (S.D.N.Y. 1994).

n179. Mattel III, 296 F.3d at 901-02 (discussing parody and citing Campbell in its First Amendment analysis under the Rogers test, and not engaging in the confusion analysis); Grottanelli, 164 F.3d at 813; Giannoulas II, 179 F.3d at 388 (citing Campbell to define parody); Elvis Presley II, 141 F.3d at 199 (noting Campbell as relevant to the parody question in trademark law and using it to define parody); Balducci Publ'ns, 28 F.3d at 776 (citing Campbell in discussion of First Amendment principles explaining why it did not negate confusion); Protectmarriage.com, 680 F. Supp. 2d at 1228 n.3; Burck, 571 F. Supp. 2d at 455 (quoting Campbell for propositions that defendant's use must comment on the plaintiff's mark, and that a parody can shed new light on the original); N.Y. Stock Exch., 196 F. Supp. 2d at 411-12 (citing "reasonable perception" language and quoting Campbell for propositions as to First Amendment interests, and finding that a parody finding informs the trademark analysis); Charles Atlas, 112 F. Supp. 2d at 337-41 (defining parody using Campbell under the First Amendment analysis and having that inform its trademark analysis); Giannoulas I, 14 F. Supp. 2d at 953 (citing Campbell in good-faith intent portion of analysis); Mattel II, 28 F. Supp. 2d at 1134, 1142 (citing Campbell using "see also" signal for proposition that parody must focus on original, and also citing it in its discussion about how a parody can comment on associations people have with marks); Mattel I, 1998 WL 422641, at 12 (discussing Campbell and the definition of parody when analyzing the similarity of the marks in the confusion analysis); Elvis Presley I, 950 F. Supp. at 792 (quoting Campbell when defining parody when analyzing the strength of the mark).

n180. Elvis Presley II, 141 F.3d at 199 (noting that Campbell "is relevant to the treatment of parody in the trademark context"); Grottanelli, 164 F.3d at 813 ("Trademark parody must be informed by the Supreme Court's recent elucidation in the copyright context of parodies allegedly protected by the defense of fair use.").

n181. Schieffelin, 850 F. Supp. at 249 n.9 ("The Acuff-Rose decision does not impact the court's decision here, inasmuch as the interests protected under the Lanham Act are not identical to those of the copyright holder.").

n182. Protectmarriage.com, 680 F. Supp. 2d at 1228 n.3 ("In this regard, the Lanham Act is unlike the Copyright Act. The Copyright Act includes a specific statutory provision defining "fair use" as non-infringing, 17 U.S.C. § 107, and this statutory provision protects parody." (citing Campbell v. Acuff-Rose Music, 510 U.S. 569 (1994))).

n183. *Louis Vuitton II*, 507 F.3d at 269 ("Finally, LVM argues that the district court erred in finding that Haute Diggity Dog's use of the 'CV' and the background design was a fair use of LVM's copyrighted Multicolor design. Because LVM attempts to use a copyright claim to pursue what is at its core a trademark and trade dress infringement claim, application of the fair-use factors under the Copyright Act to these facts is awkward." (citing 17 U.S.C. § 107; *Campbell*, 510 U.S. at 577)).

n184. See, e.g., *Elvis Presley II*, 141 F.3d at 199; see also *supra* Tables 1 & 2 (including cases that cite *Campbell* but do not involve a copyright claim).

n185. E.g., *Schieffelin*, 850 F. Supp. at 249 n.9 (disclaiming reliance on *Campbell*).

n186. *World Wrestling Fed'n Entm't, Inc. (WWE) v. Big Dog Holdings, Inc.*, 280 F. Supp. 2d 413, 430 (W.D. Pa. 2003); *Dr. Seuss Enters., L.P. v. Penguin Books USA, Inc. (Dr. Seuss II)*, 109 F.3d 1394, 1400-01, 1405 (9th Cir. 1997) (finding a parody did not exist in the copyright realm, not examining parody in depth in the trademark analysis, and concluding the defendant infringed the plaintiff's mark); *Kane v. Comedy Partners*, No. 00 Civ. 158(GBD), 2003 WL 22383387, at 3-8 (S.D.N.Y. Oct. 16, 2003); *Lyons P'ship v. Giannoulas (Giannoulas I)*, 14 F. Supp. 2d 947, 952, 954-55 (N.D. Tex. 1998), *aff'd*, 179 F.3d 384, 388 (5th Cir. 1999). In *Kane*, the court spent a considerable amount of time analyzing whether the copyrighted work at issue parodied the underlying work - a clip from the plaintiff's show where she is dancing and singing the song, "I Love Dick." 2003 WL 22383387, at 2. Then, in its assessment of the Lanham Act claim for the mark "The Sandy Kane Comedy T.V. Show," which was displayed on the video, the court determined "clearly that someone else's work is being displayed and ridiculed." *Id.* at 8. At least one other court has analyzed parody using what it saw as different standards in copyright and trademark. *CCA & B, LLC v. F + W Media Inc.*, 819 F. Supp. 2d 1310 (N.D. Ga. 2011).

n187. 924 F. Supp. 1559 (S.D. Cal. 1996), *aff'd*, 109 F.3d 1394 (9th Cir. 1997).

n188. *Id.* at 1561.

n189. *Id.* at 1570.

n190. *Id.* ("The fact of copying, admitted in any parody case, is itself evidence of the strength of the marks.").

n191. *Id.* at 1570-71 (noting that the defendant's book had a subtitle of "A Parody" and the author's name as "Dr. Juice").

n192. *Id.* at 1571 (noting intent to parody does not weigh against the defendant and that "the prominent labeling of the work as 'A Parody,' and the disclaimer sticker on the back indicate that this factor should weigh in favor of Penguin").

n193. *Id.* at 1562.

n194. F.3d 1394 (9th Cir. 1997).

n217. 164 F.3d at 809.

n218. 141 F.3d at 194.

n219. Id. at 200 (noting that "the district court made determinations on five of the seven digits of confusion which either ignored relevant advertising evidence or relied upon the Defendants' parody of the sixties lounge scene. These errors have permeated the district court's findings of fact on the likelihood of confusion and on each of those digits of confusion.").

n220. Grottanelli, 164 F.3d at 812-13.

n221. *Id.* at 813.

n222. *Id.* (citation omitted).

n223. *Id.* ("Grottanelli's mark makes no comment on Harley's mark; it simply uses it somewhat humorously to promote his own products and services, which is not a permitted trademark parody use.").

n224. *Elvis Presley II*, 141 F.3d at 199 (citing *Anheuser-Busch, Inc. v. Balducci Publ'ns*, 28 F.3d 769, 776 (8th Cir. 1994); 6 McCarthy, *supra* note 17, § 31:153; Myers, *supra* note 17, at 181).

n225. *Id.* at 199-200 ("[A] parody of a mark needs to mimic the original mark and from this necessity arises the justification for mimicry, but this necessity wanes when the original mark is not the target of parody.").

n226. Others have explored these differences too. See Jaroff, *supra* note 17, at 664-66.

n227. 15 U.S.C. § 1052(e)(1) (2006) (stating that one cannot register a mark that is "merely descriptive or deceptively misdescriptive" of the goods to which it is affixed).

n228. 2 McCarthy, *supra* note 17, § 12:1 ("[A] generic name of a product can never function as a trademark to indicate origin." (citing Restatement (Third) of Unfair Competition § 15, cmt. a (1995))).

n229. David A. Simon, Register Trademarks and Keep the Faith, 49 IDEA 233, 247 (2009) ("Trademarks can also become generic by losing their source-identification value if used too often in inconsistent ways, or in ways that rob them of their source-identifying function.").

n230. Other limitations include things like marks that are functional. 15 U.S.C. § 1115(b)(8) (listing functionality as a defense to an incontestable mark).

n231. See, e.g., Harper & Row Publishers, Inc. v. Nation Enters., 471 U.S. 539, 566 (1985) ("This last factor [effect on the market] is undoubtedly the single most important element of fair use.").

n232. Campbell v. Acuff-Rose Music, Inc., 510 U.S. 569, 591 (1994) ("But when, on the contrary, the second use is transformative, market substitution is at least less certain, and market harm may not be so readily inferred. Indeed, as to parody pure and simple, it is more likely that the new work will not affect the market for the original in a way cognizable under this factor, that is, by acting as a substitute for it ('superseding [its] objects').").

n233. The Court remanded on the question of whether the defendant took more of the music than necessary. *Id.* at 589.

n234. For a recent exploration of confusion and its overgrowth in trademark law, see William McGeeveran & Mark McKenna, Confusion Isn't Everything, __Notre Dame L. Rev.__ (forthcoming 2013).

n235. U.S. Const. art. I, § 8, cl. 8 ("The Congress shall have power ... to promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries ...").

n236. See U.S. Const. art. I, § 8, cl. 3 ("The Congress shall have power ... to regulate commerce with foreign nations, and among the several states, and with the Indian tribes ..."); The Trade-Mark Cases, 100 U.S. 82, 93-94 (1879) (holding that Article I, Section 8, Clause 8 of the U.S. Constitution did not provide a basis for federal trademark law).

n237. See, e.g., Religious Land Use and Institutionalized Persons Act of 2000 (RLUIPA), 42 U.S.C. § 2000cc to -5 (2006); Federal Arbitration Act (FAA), 9 U.S.C. §§1-16 (2006).

n238. Hannibal Travis, *The Battle for Mindshare: The Emerging Consensus that the First Amendment Protects Corporate Criticism and Parody on the Internet*, 10 Va. J.L. & Tech. 3, 11 (2010). The Constitution was adopted on September 17, 1787. U.S. Const. And it wasn't until 1870 - eighty years after Congress enacted the first Copyright Act - that Congress enacted the first Federal Trademark Law. Compare Copyright Act of 1790, 1 Stat. 124, May 31, 1790, available at <http://www.copyright.gov/history/1790act.pdf>, with Trademark Act of 1870, ch. 230, 16 Stat. 198 (held unconstitutional by *The Trade-Mark Cases*, 100 U.S. 82). It's interesting to note that Congress enacted the first Copyright Act on May 30, 1790, and the Constitution was ratified by Rhode Island on May 29, 1790. Further still, the Bill of Rights was not ratified until December 15, 1791. U.S. Const. amend. I-X, pmbl.

n239. *Golan v. Gonzales*, 501 F.3d 1179, 1187-97 (10th Cir. 2007) (finding that Congressional action that alters the traditional contours of copyright protection should be analyzed under the First Amendment), remanded to 611 F. Supp. 2d 1165 (D. Colo. 2009) (holding that URAA violated the intermediate scrutiny standard to which content neutral regulations are subjected), rev'd sub nom. *Golan v. Holder*, 609 F.3d 1076 (10th Cir. 2010), aff'd, ___U.S.___, 132 S. Ct. 873 (2012).

n240. *Golan*, 132 S. Ct. at 885-91 (holding that the URAA's restoration to copyright works in the public domain did not alter the traditional contours of copyright protection because it left in place the idea/expression dichotomy and the fair use defense, and holding that Congress has the power to remove works from the public domain to comply with foreign obligations).

n241. Dilution occurs where the use weakens ("blurring") or makes unwholesome ("tarnishment") the consumer's association between the mark and goods to which it is affixed by the owner. Compare 15 U.S.C. § 1125(c)(2)(B) (2006) (describing dilution by blurring), with id. § 1125(c)(2)(C) (describing dilution by tarnishment); see also *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418, 419 (2003) (explaining dilution by blurring and by tarnishment).

n242. Copyrights provide the owner with six rights - reproduction, preparation of derivative works, distribution of copies, public performance, public display, public transmission (for sound recordings) - which essentially allow the owner to control where and how a work appears, and any adaptations of the work. 17 U.S.C. § 106 (2006).

n243. 15 U.S.C. § 1125(a); *Two Pesos, Inc. v. Taco Cabana, Inc.*, 505 U.S. 763, 769 (1992) (stating that "liability under § 43(a) requires proof of the likelihood of confusion").

n244. Mark Lemley, *The Modern Lanham Act and the Death of Common Sense*, 108 Yale L.J. 1687, 1696 (1999) (noting that, as a result of trademark properization, we require more trademark licensing, which "is expensive. The more we properize, the more transaction costs we impose on everyone."); McGeveran, *supra* note 68, at 61-64 (explaining the risks for artists and small businesses in using trademarks and how they avoid using them altogether to avoid liability, and also noting the increased costs to using trademarks, such as rights clearances).

n245. E.g., McGeveran, *supra* note 68, at 62-64.

n246. See, e.g., *Menezes v. Holt*, 128 U.S. 514, 523 (1888) ("The intentional use of another's trade-mark is a fraud."); *Taylor v. Carpenter*, 23 F. Cas. 742, 744 (C.C.D. Mass. 1844) (Story, J.) (holding that the defendant violated the plaintiff's trademark rights on black spools "in imitating and using any of the labels and spools, with a view to deceive the public"); *Southern v. How*, Popham 143, 79 Eng. Rep. 1243 (K.B. 1618); see also Sidney A. Diamond, *The Historical Development of Trademarks*, 65 Trademark Rep. 265, 287-88 (1975) ("The beginning of legal protection for trademarks as such generally is traced to a 1783 dictum in an English case, [*Singleton v. Bolton*, 3 Doug 293 (1783),] stating that an action for damages would lie based upon fraud."); Frank I. Schechter, *The Rational Basis of Trademark Protection*, 40 Harv. L. Rev. 813, 819 (1927) ("The protection of trademarks originated as a police measure to prevent 'the grievous deceit of the people' by the sale of defective goods, and to safeguard the collective good will and monopoly of the guild."); Frank Schechter, *The Historical Foundations of Law Relating to Trade-Marks* 4-6 (1925) (quoting Pollock on Torts 312-13 (12 ed. 1923) and other sources, including courts, to illustrate that trademarks were used to prevent fraud, and that, although disagreement existed, court decisions "tended to insist upon deception of the public as not merely a test of a violation of a trade-mark right but as the basis of relief against such violation ..."). Others have argued, however, that deceit was not the only interest trademark law sought to protect. See generally Mark McKenna, *The Normative Foundations of Trademark Law*, 82 Notre Dame L. Rev. 1839 (2007) (arguing that trademark law originally grew out of a desire to protect producers' interests, such as diversions of trade). Currently, at least, trademark can be said to have roughly three interests it seeks to promote: those of consumers, trademark holders, and competition.

n247. Schechter, *supra* note 246, at 822-30 (arguing that trademark protection should be broad in scope, should protect her rights beyond merely confusion as to anonymous source, and should include protection for use of trademark on nonrelated goods); *id.* at 831 (arguing that the "uniqueness or singularity [of a mark] is vitiated or impaired by its use upon either related or non-related goods[,] and that its uniqueness and 'degree of [the marks] protection depends ... upon the extent to which, through the efforts or ingenuity of its owner, it is actually unique and different from other marks").

n248. The Supreme Court in *KP Permanent* held that the fair use defense did not require the defendant to disprove confusion, and that the defense applied even when some confusion exists. *KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc.*, 543 U.S. 111, 121-22 (2004) ("Since the burden of proving likelihood of confusion rests with the plaintiff, and the fair use defendant has no free-standing need to show confusion unlikely, it follows (contrary to the Court of Appeals's view) that some possibility of consumer confusion must be compatible with fair use, and so it is.").

n249. 15 U.S.C. § 1115(b)(4) (2006).

n250. See *id.* § 1115(b)(1)-(9).

n251. Only certain kinds of words can be trademarked (arbitrary marks, fanciful marks, and descriptive marks that have acquired secondary meaning). *E.g.*, *Abercrombie & Fitch Co. v. Hunting World, Inc.*, 537 F.2d 4, 9-11 (2d Cir. 1975) (explaining the difference between arbitrary, fanciful, and descriptive marks). In fact, the Lanham Act bars some marks entirely from protection ("scandalous" or "disparaging" marks cannot be gain protection under U.S. law). 15 U.S.C. § 1052(a) (preventing registration of words or phrases on the principle register if they "consist[] of or comprises immoral, deceptive, or scandalous matter; or matter which may disparage or falsely suggest a connection with persons, living or dead, institutions, beliefs, or national symbols, or bring them into contempt, or disrepute"). Beyond that, trademark law can regulate uses only insofar as the commerce clause allows (it protects only trademarks used "in commerce") - and sometimes requires a particular kind of use in commerce (use "as a trademark," *i.e.*, used to identify the source of a product). 1 McCarthy, *supra* note 17, § 3:3. Even regulatable uses are subject to limitations: traditional infringement claims rely on a showing of likelihood of confusion; dilution claims require famous mark, near identity between the marks at issue, and a similar standard (likelihood of dilution). 15 U.S.C. § 1125(c). Finally, trademark law also has its own set of speech-sensitive defenses, including fair use, *id.* § 1115(b)(4), abandonment, *id.* § 1115(b)(2), and some protection for news reporting, commentary, and parody. *E.g.*, *id.* § 1125(c)(3) (providing exclusions from dilution).

n252. For those well-versed in copyright, trotting these out is rote: the idea/expression dichotomy (ideas aren't copyrightable, only expressions of ideas are copyrightable), 17 U.S.C. § 102(a) (2006), the inability to copyright facts (facts about the world are free for all, *Feist Publ'ns, Inc. v. Rural Tel. Serv. Co.*, 499 U.S. 340, 344 (1991), unless they are originally arranged, *id.*, or are facts about fictional works, *e.g.*, *Castle Rock Entm't, Inc. v. Carol Publ'g Group, Inc.*, 150 F.3d 132, 138-39 (2d Cir. 1998)); the originality requirement (a phonebook cannot be copyrighted, unless it's cleverly arranged, *Feist*, 499 U.S. at 345); and, of course, fair use (whatever is not covered by these other doctrines should fall within this catch-all defense). 17 U.S.C. § 107.

n253. See *Simon*, *supra* note 18, at 837-44.

n254. *Id.* at 848.

n255. 15 U.S.C. § 1125(a)(1) (providing a cause of action for infringement when "any person who, on or in connection with any goods or services, or any container for goods, uses in commerce" a mark in a way likely to cause confusion or deceive as to sponsorship or endorsement (emphasis added)); *id.* § 1125(c) (providing a cause of action for dilution when a person "commences use of a [famous] mark or trade name in commerce" that is likely to cause blurring or tarnishment).

n256. *Id.* § 1127 (defining "use in commerce" as "bona fide use of a mark in the ordinary course of trade, and not merely to reserve a right in a mark").

n257. 1 McCarthy, *supra* note 17, § 3:3.

n258. See Mark Lemley & Mark McKenna, Irrelevant Confusion, 62 Stan. L. Rev. 413, 416-22 (2010) (collecting cases of dubious claims of trademark infringement, including Caterpillar's claim that "use of Caterpillar tractors in the movie [Tarzan] to bulldoze the forest would cause consumers to think Caterpillar was actually anti-environment...."). See Caterpillar Inc. v. Walt Disney Co., 287 F. Supp. 2d 913 (C.D. Ill. 2003) (finding use of the Caterpillar trademark did not give rise to liability because it did not suggest Caterpillar sponsored or endorsed the movie or its message).

n259. Dallas Cowboys Cheerleaders, Inc. v. Pussycat Cinema, Ltd., 604 F.2d 200 (2d Cir. 1979).

n260. See, e.g., *id.* The Second Circuit at various points expressed disdain for the film, which colored its analysis of the infringement and dilution claims. The court, for example, described the film, ""Debbie Does Dallas," [as] a gross and revolting sex film whose plot, to the extent that there is one, involves a cheerleader at a fictional high school, Debbie, who has been selected to become a "Texas Cowgirl." *Id.* at 202. It goes on to state that "the movie consists largely of a series of scenes graphically depicting the sexual escapades of the "actors." *Id.* at 203.

n261. Indeed, the plaintiff won in Dallas Cowboys. *Id.* at 204-05 (upholding a preliminary injunction on the grounds that consumers would likely be confused as to the source of the Dallas Cowboys cheerleader uniform, which the court found to be a protectable mark).

n262. McGeveran, *supra* note 68, at 78-81 (explaining that "the ultimate question posed by the trademark use doctrine asks if a particular use invites an interpretation as a source identifier. The most straightforward basis to determine whether an expressive use carries source-identifying significance is to ask whether those who come into contact with it perceive it that way.").

n263. Cf. Peter Jaszi, On the Author Effect: Contemporary Copyright and Collective Creativity, in *The Construction of Authorship* 29, 47-48 (Martha Woodmansee & Peter Jaszi eds., 1994) (arguing that requiring parody to target the original work in copyright forces the law to "acknowledge[] [parody's] subordinate position in the hierarchy of works, and, by extension, the subordinate position of its creator in the hierarchy of "authors.' This ...operates to discourage artists whose methods entail reworking preexisting materials, while rewarding those whose dedication to "originality' qualifies them as true "authors' in the Romantic sense.").

n264. E.g., Checkpoint Sys., Inc. v. Check Point Software Tech., Inc., 269 F.3d 270, 294-95 (3d Cir. 2001) (recognizing initial interest confusion as "probative of a Lanham Act violation").

n265. E.g., *Gen. Motors Corp. v. Urban Gorilla, LLC*, 500 F.3d 1222, 1227 (10th Cir. 2007) (finding post-sale confusion "relevant to the trade dress infringement inquiry" where defendants sold "body kits," which were body-tops that could be affixed to the chassis of a truck to make it look like a Hummer).

n266. 15 U.S.C. § 1125(c)(2)(B) (2006).

n267. *Id.* § 1125(c)(2)(C).

n268. *Id.* § 1125(a)(3); *Wal-Mart Stores, Inc. v. Samara Bros. Inc.*, 529 U.S. 205, 209, 213-14 (2000) (noting that "marks registrable under § 2 [of the Lanham Act] ... has been held to embrace ... 'trade dress' - a category that originally included only the packaging, or 'dressing,' of a product, but in recent years has been expanded by many Courts of Appeals to encompass the design of a product," and holding trade dress protection for product designs that have acquired distinctiveness).

n269. 15 U.S.C. § 1125(d) (creating a cause of action for registering in bad faith or trafficking in domain names confusingly similar to existing trademarks).

n270. E.g., *Boston Prof'l Hockey Ass'n v. Dallas Cap & Emblem Mfg.*, 510 F.2d 1004, 1008, 1012 (5th Cir. 1975) (holding owner of Toronto Maple Leaves trademark could sustain a trademark infringement action based solely on the use of the mark on a product, regardless of confusion as to source).

n271. *Dinwoodie*, *supra* note 90, at 114 (noting that nonfamous marks may actually be more susceptible to dilution than famous marks).

n272. *Lemley*, *supra* note 244, at 1698-99 (observing that dilution now seemingly includes nonfamous and nonidentical marks).

n273. *Anheuser-Busch, Inc. v. Balducci Publ'ns*, 28 F.3d 769, 772-73 (8th Cir. 1994).

n274. *Mutual of Omaha Ins. Co. v. Novak*, 836 F.2d 397, 400 (8th Cir. 1987) (finding evidence of confusion based on survey where 10% of those surveyed agreed that Mutual of Omaha "goes along" with Novak's product); *James Burrough, Ltd. v. Sign of Beefeater, Inc.*, 540 F.2d 266, 278-79 (7th Cir. 1976) (finding significant for confusion a survey showing 15% of those surveyed "referred to Beefeater liquor" when shown the defendant's restaurant sign with the word Beefeater).

n275. *Humble Oil & Ref. Co. v. Am. Oil Co.*, 405 F.2d 803, 817 (8th Cir. 1969) (finding 11% confusion "not an insignificant percentage").

n276. *Quality Inns Int'l v. McDonald's Corp.*, 695 F. Supp. 198, 219 (D. Md. 1988) (finding 16.3% confusion "is an appreciable number that cannot be dismissed").

n277. *Dogan & Lemley*, *supra* note 10, at 10-11.

n278. See Dreyfuss, *supra* note 68, at 274-76; Leah Chan Grinvald, *Shaming Trademark Bullies*, 2011 *Wis. L. Rev.* 625, 632-41 (explaining how trademark rights have expanded); Lemley & McKenna, *supra* note 258 (criticizing trademark's expansion, which made actionable uses that are likely to confuse as to sponsorship or affiliation); McGeeveran & McKenna, *supra* note 234 (describing how and why the concept of confusion has grown with somewhat distant regard for the underlying harm for which confusion is supposed to serve as a proxy). See generally Dinwoodie, *supra* note 271; Lemley, *supra* note 244.

n279. See *Qualitex Co. v. Jacobson Prods. Co., Inc.*, 514 U.S. 159, 166 (1995) (holding that color of dry-cleaning press pads could serve as a trademark).

n280. See, e.g., *Trademark Reg. No. 916522, Serial No. 72349496* (3-note NBC Chime sound mark).

n281. See *Two Pesos, Inc. v. Taco Cabana, Inc.*, 505 U.S. 763, 763 (1992) (holding that building's layout and theme could qualify as trade dress by showing inherent distinctiveness); *White Tower Sys. v. White Castle Sys. of Eating Houses Corp.*, 90 F.2d 67, 69 (6th Cir. 1937) (finding that unfair competition law provided protection to the plaintiff's style of building); Andrew T. Spence, Note, *When a Landmark*

Cannot Serve as a Trademark: Trademark Protection for Building Designs in Light of Rock and Roll Hall of Fame and Museum, Inc. v. Gentile Productions, 2 Wash. U. J.L. & Pol'y 517 (2000).

n282. E.g., N.Y. Exch. v. N.Y., N.Y. Hotel, LLC, 293 F.3d 550, 557 (2d Cir. 2002) (finding that "NYSE's mark consisting of its architectural facade and name is inherently distinctive").

n283. Lemley, *supra* note 244, at 1713.

n284. See Grinvald, *supra* note 278, at 643-51 (arguing that large corporations are engaged in trademark "bullying," where they use their size and power to prevent (often legal) uses of their marks by smaller businesses); Lemley & McKenna, *supra* note 258, at 420 ("Whatever fraction of the total universe of trademark cases these cases constitute, there are enough of them that recipients of cease and desist letters from mark owners have to take the objections seriously."); McGeeveran, *supra* note 68, at 62-64.

n285. But see 15 U.S.C. § 1115(b)(4) (2006) (fair use defense); KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc., 543 U.S. 111 (2004).

n286. Grinvald, *supra* note 278, at 654-57.

n287. Dinwoodie, *supra* note 271.

n288. Lisa P. Ramsey, Increasing First Amendment Scrutiny of Trademark Law (Univ. of San Diego Sch. of Law, Research Paper No. 08-075, 2008), available at http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1273944.

n289. McGeeveran, *supra* note 68.

n290. 543 U.S. 111 (2004).

n291. See *supra* note 17; *infra* Part III.

n292. See *supra* Part I.

n293. See Ramsey, *supra* note 288.

n294. See *supra* notes 262-65.

n295. 543 U.S. 111, 119 (2004).

n296. Dinwoodie, *supra* note 271, at 134 (arguing that KP Permanent is important because "it shows that even where the harm that the *prima facie* cause of action seeks to prevent may be implicated, other concerns - for example, competition, or perhaps the protection of free speech - might warrant, on balance, that we live with some minor harm to the trademark owner in order to preserve those other values. That is a real defense.").

n297. Ramsey has argued that the burden of proof in First Amendment cases shouldn't be on the user but instead on the trademark owner, who must show that the speech is unprotected. Ramsey, *supra* note 288, at 421 ("Moreover, the burden of proof on the misleading or commercial nature of the speech should remain with the trademark holder or the government. In some cases, the court has erroneously stated that the burden of proof was on the defendant when it raised a First Amendment challenge, probably because the First Amendment was listed as an "affirmative defense."").

n298. See, e.g., Michael J. Perry, Freedom of Expression: An Essay on Theory and Doctrine, 78 Nw. U. L. Rev. 1137, 1146 (1983) (stating that "the principle of freedom of expression ... forbids presumptively, not absolutely... . If the principle is to be a strong one - and few would deny that it should be - only a strong justification for governmental interference can be acceptable. So, government may not interfere with information or ideas useful in evaluating public policy or performance unless it has a strong justification for doing so.").

n299. Ramsey, *supra* note 288, at 421.

n300. *Id.* at 448 ("Courts must first attempt to resolve any conflict between trademark law and the First Amendment by interpreting trademark claims narrowly and trademark defenses broadly in ways that protect expression.").

n301. Lemley, *supra* note 244, at 1696.

n302. Langvardt, *supra* note 11, at 93 ("Some courts in trademark parody cases have adopted a rather loose view of what constitutes likelihood of confusion, often because the courts' distaste for the defendant's parody."); see also Ann Bartow, *Likelihood of Confusion*, 41 *San Diego L. Rev.* 721, 812 (2004) ("When courts find parodies, satire, and other nonpermissive uses of trademarks objectionable for content-based reasons, they are very likely to find either trademark infringement, trademark dilution, or sometimes both. Courts have energetically enjoined unauthorized commercial uses or invocations of trademarks which include sex and drug references, and anything found to be 'unwholesome.'"); Dreyfuss, *supra* note 68, at 293 ("My examination of the current crop of cases disclosed another revealing factor. Judges who are attracted to arguments grounded in expressive concerns tend to be colorful writers. They characterize disputes as fights between Davids and Goliaths; they make reference to Umberto Eco, Samuel Johnson, Chaucer, Shakespeare, Pope, Voltaire, Fielding, Hemingway, and Faulkner. No one ever accused Alex Kozinski - the self-styled judge of the 'Court of Appeals for the Hollywood Circuit' - of writing turgid prose. In contrast, it is clear from the way certain judges write that they just don't get it - that they are not gripped by language and remain unworried by trademark holders' assault on the arsenal guarding 'the vibrancy of our culture.' I wonder, too, about their sense of humor."). A similar phenomenon has been documented in copyright. See, e.g., Rebecca Tushnet, *My Fair Ladies: Sex, Gender, and Fair Use in Copyright*, 15 *Am. U. J. Gender Soc. Pol'y & L.* 273 (2007).

n303. Lemley, *supra* note 244, at 1714.

n304. Dreyfuss, *supra* note 68, at 285 ("Intellectual property is not, however, about preventing free rides. If free riding were always actionable, we could not, for example, enjoy a neighbor's garden or learn from a colleague's teaching technique. One merchant could not benefit from the interest a rival generates for a product category. Intellectual property law is aimed at preventing more particularized kinds of harm. Thus, evidence that does no more than demonstrate that an economic benefit was derived from a use, such as a parodic use, of a mark should not suffice to establish trademark infringement.").

n305. 109 F.3d 1394 (9th Cir. 1997).

n306. *Id.* at 1403-05.

n307. *Harley-Davidson, Inc. v. Grottanelli*, 164 F.3d 806, 810-12 (2d Cir. 1999).

n308. See, e.g., *Shonac Corp. v. AMKO Int'l Inc.*, 763 F. Supp. 919, 933-34 (S.D. Ohio 1991). "Competition," though, could and was read more broadly than mere market competition, but also "competition for reputation and status." Randolph Stuart Sergeant, *Building Reputational Capital: The Right of Attribution Under Section 43 of the Lanham Act*, 19 Colum.-VLA J.L. & Arts 45, 53 (1995).

n309. See McGeeveran, *supra* note 68, at 71-72 ("The multifactor [likelihood of confusion] test was designed for use in the paradigmatic trademark dispute where the need to accommodate speech interests does not arise. If two merchants want to use similar identifiers for their products, both litigants' interests are primarily commercial rather than expressive, and neither one of them adds much additional speech to public discourse. Furthermore, both merchants' interests align with certain public interests in efficient markets: guarding against confusion and allowing the best or most informative brand names.").

n310. Lemley & McKenna, *supra* note 258, at 423.

n311. Other approaches have tried to make space for parody by increasing the plaintiff's burden of proof when the parody was of a commercial nature. See, e.g., Langvardt, *supra* note 11, at 93 (arguing that, in the case of commercial parody, courts should have a "disinclination to find confusion unless the evidence demonstrates a realistic probability of confusion, not merely some possibility of confusion" (emphasis in original)).

n312. See *N.Y. Times v. Sullivan*, 376 U.S. 254 (1964); 3 Rodney A. Smolla & David Nimmer, *Smolla & Nimmer on Freedom of Speech* § 23:1 (2011) ("It is worth noting that while the *New York Times* decision dealt largely with the fault standards that apply to defamation law, in its aftermath courts have frequently held that other common-law or statutory defamation doctrines may also reflect First Amendment values, and may indeed come to be understood as required by First Amendment principles."); David A. Elder, *Defamation: A Lawyer's Guide* § 1:9 (2011) ("At common law defamation per se (whether libel or slander) created a presumption of malice, a subterfuge for strict liability. This presumption has been displaced where First Amendment fault requirements for public persons or private persons as to matters of public concern apply but is probably still operational in the purely private-non public concern arena." (footnotes omitted)).

n313. *Mattel, Inc. v. MCA, Inc. (Mattel III)*, 296 F.3d 894 (9th Cir. 2002).

n314. *Mattel, Inc. v. Walking Mountain Prods.*, 353 F.3d 792 (9th Cir. 2003).

n315. *Louis Vuitton Malletier S.A. v. Haute Diggity Dog, LLC (Louis Vuitton II)*, 507 F.3d 252, 258 (4th Cir. 2007).

n316. 15 U.S.C. § 1125(c)(3)(C) (2006).

n317. Both opponents and supporters recognized dilution as a form of property interest. Compare 151 Cong. Rec. 6937 (2005) (statement of Rep. Wu) (arguing in opposition to the TDRA because "this bill will change trademark law to make it easier for large companies to sue individuals and businesses for trademark dilution, thus potentially creating rights in perpetuity for trademarks. This bill states that no actual harm will have to be proven; large companies will be able arbitrarily to file lawsuits against small businesses and private citizens."), with 152 Cong. Rec. 19,238 (2006) (statement of Rep. Smith) ("Diluting needs to be stopped at the outset. Once it occurs, the goodwill of a mark cannot be restored.").

n318. Actually, it may do just the opposite. See Dinwoodie, *supra* note 271, at 114 (noting famous marks may actually be less likely to be diluted than nonfamous ones). But, still, this seems like the prototypical case that dilution was meant to cover.

n319. *Moseley v. V Secret Catalogue, Inc.*, 537 U.S. 418 (2003).

n320. *Starbucks Corp. v. Wolfe's Borough Coffee, Inc.*, 588 F.3d 97 (2d Cir. 2009).

n321. See, e.g., 15 U.S.C. § 1115(1)(b) (2006) (providing liability for use of counterfeit mark); 18 U.S.C. § 2320 (2006) (making it a crime to knowingly use "a counterfeit mark on or in connection with goods services"); *id.* § 2318 (making criminal trafficking in counterfeit labels, documentation, or packaging).

n322. Trademark Dilution Revision Act of 2006, Pub. L. No. 109-312, § 2, 120 Stat. 1730 (2006); H.R. Rep. No. 104-374, at 4 (1995), reprinted in 1995 U.S.C.C.A.N. 1029, 1031 ("The bill will not prohibit or threaten 'noncommercial' expression, as that term has been defined by the courts."); 151 Cong. Rec. 6936 (2005) (statement of Rep. Berman) ("While not universally supported, this bill has now garnered the support of the ACLU for accommodating its first amendment concerns. In section 2(c)(3), the bill addresses the balance between the rights of trademark holders and the first amendment by providing an exemption for purposes of identifying and parodying, criticizing or commenting on the famous mark. The trade groups representing intellectual property owners, AIPLA, INTA and IPO, have all endorsed this bill."); 152 Cong. Rec. 19,238 (2006) (statement of Rep. Sensenbrenner) (noting that the proposed amendment to the FTDA, among other things, "creates a free-speech exclusion for noncommercial use of a mark"); 152 Cong. Rec. 2942 (2006) (statement of Sen. Leahy) ("Furthermore, Senator Hatch and I were successful in including language that definitively shelters important constitutionally protected first amendment freedoms from being caught up in the liability net.").

n323. *Cent. Hudson Gas v. Pub. Serv. Comm'n of N.Y.*, 447 U.S. 557, 561 (1980).

n324. *Id.* at 561-62 ("Commercial expression not only serves the economic interest of the speaker, but also assists consumers and furthers the societal interest in the fullest possible dissemination of information.").

n325. *Bolger v. Youngs Drug Prods. Corp.*, 463 U.S. 60, 67 (1983) ("The fact that [the speaker] has an economic motivation for [the speech] ... would clearly be insufficient by itself to turn the materials into commercial speech." (citation omitted)).

n326. *Id.* at 67-68.

n327. *Cent. Hudson*, 447 U.S. at 562 n.5 (rejecting Justice Stevens's view, which "would grant broad constitutional protection to any advertising that links a product to a current public debate. But many, if not most, products may be tied to public concerns with environment, energy, economic policy, or individual health and safety.... There is no reason for providing similar constitutional protection [for statements on public issues] when such statements are made only in the context of commercial transactions.").

n328. *Bd. of Trs. of State Univ. of N.Y. v. Fox*, 492 U.S. 469, 474 (1989) (finding that the subjects included in advertisement - which included discussion of topics such as economics and home life - were not inextricably intertwined with the advertisement and therefore were commercial speech).

n329. Marvin Harris, *Patterns of Race in the Americas* (1964).

n330. Curran, *supra* note 146, at 1078, 1082-87.

n331. *Id.* at 1096-97.

n332. *Id.* at 1098-99 (noting that a previous case, *Bolger*, "recognized that messages may "constitute commercial speech notwithstanding the fact that they contain discussions of important public issues[,] [and] thus reaffirmed the notion that "advertisers should not be permitted to immunize [commercial speech] from government regulation simply by including references to public issues.'" (quoting *Bolger v. Youngs Drug Prods. Corp.*, 463 U.S. 60, 67-68 (1983) (footnote omitted)).

n333. *Id.* at 1097 ("The 'all is commercial' cases imply that commercial harm to a trademark owner is an important element in determining the scope of the FTDA's 'noncommercial use' exemption. But the Court has never taken such an approach in its commercial speech decisions. To the contrary, the Court's precedents focus on the commercial benefits accruing to the speaker, and not the commercial detriment befalling other parties, when classifying speech as 'commercial' or 'noncommercial.'" (footnotes omitted)).

n334. Ramsey, *supra* note 288, at 401.

n335. *Id.*

n336. Langvardt, *supra* note 11, at 84.

n337. *Id.* ("The second principle[] [is] that speech otherwise appearing to be noncommercial is not transformed into less protected commercial speech simply because the speaker has an economic motive ...").

n338. *Id.* at 85 ("Under the third guiding principle, if the trademark parody possesses both commercial and noncommercial characteristics, it

should be treated as a commercial parody when the commercial aspects predominate and as a noncommercial parody when the noncommercial aspects weight more heavily.").

n339. Indeed, cases like *Fox* suggest that the test for hybrid speech is functional and fact-specific: if you could make the commercial aspect of the speech without the noncommercial elements, the speech is commercial. *Bd. of Trs. of State Univ. of N.Y. v. Fox*, 492 U.S. 469, 474-75 (1989) ("Including these home economics elements no more converted AFS's presentations into educational speech, than opening sales presentations with a prayer or a Pledge of Allegiance would convert them into religious or political speech. As we said in *Bolger*, communications can "constitute commercial speech notwithstanding the fact that they contain discussions of important public issues We have made clear that advertising which 'links a product to a current public debate' is not thereby entitled to the constitutional protection afforded noncommercial speech." (quoting *Bolger v. Youngs Drug Prods. Corp.*, 463 U.S. 60, 67-68 (1983) (citation omitted)). I would counsel against such an approach as it resembles the Alternative Means Approach.

n340. 28 F.3d 769, 776 (8th Cir. 1994).

n341. *Id.* at 772.

n342. *Id.*

n343. 648 F. Supp. 905 (D. Neb. 1986).

n344. *Id.* at 907.

n345. *Id.*

n346. *Langvardt*, *supra* note 11, at 88-89 ("The defendant did not sell the shirts as a one-time endeavor. Instead, he sold reasonably large quantities of them at various locations that were typical outlets for miscellaneous goods. He also sold various other items bearing his *Mutant of Omaha* designs. The fact that the defendant had several different designs which he used on the shirts and other items is also significant: it gives the impression that, in a business sense, he had launched a whole *Mutant of Omaha* "line." Consideration of these facts leads to a

conclusion that the parody in *Mutual of Omaha* was predominantly commercial despite having a significant noncommercial component. Therefore, though the call was close, the *Mutual of Omaha* court was probably correct in finding a commercial use." (footnotes omitted)).

n347. Scholars contest whether this is actually so. Ramsey, *supra* note 288.

n348. 517 U.S. 484 (1996).

n349. Plurality opinions are those in which five or more justices agree on a particular result but not the rationale for that result. For more on plurality opinions, see James F. Spriggs II & David R. Stras, *Explaining Plurality Decisions*, 99 *Geo. L.J.* 515 (2010).

n350. 44 *Liquormart*, 517 U.S. at 485-86.

n351. The Chewy Vuiton products are just one example of this.

n352. *North Face Apparel Corp. v. Williams Pharmacy, Inc.*, No. 4:09 CV2029RWS, 2010 WL 546921 (E.D. Mo. Feb. 9, 2009) (order denying South Butt's motion to dismiss).

n353. For this example we can assume a court finds the mark famous and nearly identical.

n354. Dogan & Lemley, *supra* note 10, at 11 (arguing that tarnishment does not mean "'saying something bad about the trademark owner,' rather ... [it means] 'branding your own inferior or noxious good with the plaintiff's mark'").

n355. Although I've advocated a broad definition of parody, many dilution claims against commercial parodies will more closely resemble the *Campbell* rationale - that is, they will target the mark itself. That is not always true.

n356. See, e.g., *supra* Tables 2, 3, & 4.

n357. *Louis Vuitton Malletier S.A. v. Haute Diggity Dog, LLC* (Louis Vuitton II), 507 F.3d 252 (4th Cir. 2007).

n358. See Dreyfuss, *supra* note 68, at 293 (arguing that courts have rejected strict interpretations of constitutional approaches because they are trying to safeguard all confusion and dilution); *id.* at 277 ("At the normative level, it shifts the focus from the pure signaling capacity of the mark (its ability to denote source and quality) to other functions (such as instilling cachet in the brand). Because it suggests that all of the value in a mark belongs to the trademark holder, this shift reinforces the notion that every free ride is actionable.").

n359. Bartow, *supra* note 302, at 769 ("The implication that a mark holder only has to convince a court that consumers are likely to be confused momentarily suggests the burden of proof on this issue can be feather-light indeed. In addition, the proposition that fleeting confusion cannot be effectively cured at any point in a transaction is confusing in its own right.").

n360. See generally Wesley Newcomb Hohfeld, *Some Fundamental Legal Conceptions as Applied in Judicial Reasoning*, 23 *Yale L.J.* 16 (1913).

n361. Thomas I. Emerson, *Toward a General Theory of the First Amendment*, 72 *Yale L.J.* 877, 928 (1962).

n362. *Id.* at 901 ("The expansion of organization in our society has left the unorganized sectors peculiarly vulnerable to infringement of their rights. Freedom of expression within the organized group (including the government) by the nonbelonging individual, by the small group, and in connection with the organization of new groups, faces overwhelming hazards. In our highly conformist society it is from these sources that much of the social value in freedom of expression springs. Yet these deviant individuals and groups, lacking any other base, must find vindication of their rights primarily in resort to the judicial process.").

ARTICLE: THE ADVENTURE OF THE SHRINKING PUBLIC DOMAIN

NAME: Elizabeth L. Rosenblatt*

BIO: * Associate Professor and Director, Center for Intellectual Property Law, Whittier Law School. The author is Legal Chair of the Organization for Transformative Works, a lifelong Sherlock Holmes enthusiast, and a pro bono consultant on behalf of Leslie Klinger in litigation discussed in this Article. I would like to thank Leslie Klinger, Jonathan Kirsch, Hayley Hughes, Hon. Andrew Peck, and Albert and Julia Rosenblatt for their contributions to the historical research contained in this Article. In addition, I would like to thank Dan Burk, Irene Calboli, Bryan Choi, Andrew Gilden, Paul Heald, Justin Hughes, Sheldon Lyke, Mark McKenna, Tyler Ochoa, Lisa Ramsey, Mark Schultz, Zahr Said, Eva Subotnik, Rebecca Tushnet, David Welkowitz, the participants at the 2013 Intellectual Property Scholars' Conference, the participants at the 2014 Works in Progress in Intellectual Property Conference, and my research assistants Margaret Rafter and Maxwell Shoemaker for their insights and suggestions.

HIGHLIGHT:

Several scholars have explored the boundaries of intellectual property protection for literary characters. Using as a case study the history of intellectual property treatment of Arthur Conan Doyle's fictional character Sherlock Holmes, this Article builds on that scholarship, with special attention to characters that appear in multiple works over time, and to the influences of formal and informal law on the entry of literary characters into the public domain. While copyright protects works of authorship only for a limited time, copyright holders have sought to slow the entry of characters into the public domain, relying on trademark law, risk aversion, uncertainty aversion, legal ambiguity, and other formal and informal mechanisms to control the use of such characters long after copyright protection has arguably expired. This raises questions regarding the true boundaries of the public domain and the effects of non-copyright influences in restricting cultural expression. This Article addresses these questions and suggests an examination and reinterpretation of current copyright and trademark doctrine to protect the public domain from formal and informal encroachment.

TEXT:

[*562]

Introduction

Sir Arthur Conan Doyle famously relinquished narrative control of his creation, Sherlock Holmes, to stage performer and playwright William Gillette. Gillette was writing a stage dramatization based on Conan Doyle's work, and cabled Conan Doyle to ask whether the play could include a plot in which (the famously unromantic) Holmes got married. "You may marry him, murder him or do what you like with him," Conan Doyle cabled back.ⁿ¹

But relinquishing narrative control is a far cry from relinquishing legal control. Various parties have been fighting over the legal rights to Holmes for over a century.ⁿ² In fact, the [*563] story about Conan Doyle's cable comes from his own testimony in 1923 litigation.ⁿ³ Although copyright protection has expired for the entire Holmes canon worldwide except in the United States,ⁿ⁴ and although United States copyright protection has expired for all but ten of the Sherlock Holmes stories, the battle over Holmes rages on today.ⁿ⁵

The most recent of these disputes centers on an entity known as the Conan Doyle Estate Ltd. (CDE), which claims a combination of copyright and trademark rights in Holmes and describes its business as "managing the fully developed [Sherlock Holmes] character's further promotion and development through licensing agreements."ⁿ⁶ The CDE gained attention in early 2013 when Sherlock Holmes scholar Leslie Klinger responded to a cease and desist letter from the CDE by challenging the CDE in court.ⁿ⁷ Klinger sought a declaration that seemed self-evident: that the contents of the Sherlock Holmes stories and novels first published in the United States before 1923, like all works first published in the United States before 1923, fall into the copyright public domain.ⁿ⁸ The case [*564] captured the attention of the press and public,ⁿ⁹ and for a time, the #FreeSherlock hashtag trended on Twitter.ⁿ¹⁰ The case took over a year and half to resolve: after Klinger prevailed in the Northern District of Illinois and the Seventh Circuit Court of Appeals,ⁿ¹¹ the CDE sought review in the Supreme Court.ⁿ¹² The Court denied certiorari in November, 2014.ⁿ¹³ Despite Klinger's victory, the CDE maintains that it owns both copyright and trademark rights in the character of Holmes. It has issued press releases claiming that it retains copyright in the "complete" character of Sherlock Holmes and making clear that "the [CDE]'s trademark rights in the SHERLOCK HOLMES name and image were not at issue in Mr. Klinger's lawsuit and remain unaffected."ⁿ¹⁴

[*565] Moreover, the CDE is only one piece of the intellectual property puzzle surrounding Sherlock Holmes. Others claim to own both copyright and trademark rights in the character. One purported owner, a socialite named Andrea Plunket who claims rights through a complicated chain of purchases and bequests,ⁿ¹⁵ threatened in 2010 to "withdraw permission for more [Warner Brothers] films to be made" if those films contained gay subtext regarding Holmes.ⁿ¹⁶ More recently, Plunket expressed plans to assert trademark claims against both the BBC (for Sherlock) and CBS (for Elementary), explaining: "I have the rights, that is clear No one has asked permission to use my trademarks and I am confident that, if and when I go to court, I will be able to prevent the BBC making any more 'Sherlocks.'" ⁿ¹⁷

To some extent, these threats are grounded in law. Although copyright protection expires, it does so incrementally.ⁿ¹⁸ As a result, claimants can argue for continued protection of character elements even after copyright has expired for the stories that introduced and defined the characters. Trademark law, which protects source identifiers (that is, brand names, logos, and the like), is less likely than copyright law to protect literary characters, and even less likely to bar expressive uses of those characters,ⁿ¹⁹ but trademark law provides appealing ammunition for claimants because unlike copyright, trademark protection can last forever.ⁿ²⁰

[*566] But while copyright and trademark law may provide claimants with a patina of legitimacy, their threats draw power less from formal doctrine than from informal forces such as pragmatism and fear. Formal law often permits adapters to create new works featuring preexisting literary characters, either because those characters are unprotected by law or because the adapters' activities are protected by doctrinal defenses.ⁿ²¹ But informal mechanisms can do at least as much to constrain behavior as formal law can, and the law's fuzzy boundaries invite overreaching claims that increase the risk or cost of making adaptations. While it may be difficult for a claimant to win litigation against an adapter, it is still easy to threaten litigation, and even the most meritorious litigation defense is expensive and uncertain. Adapters therefore find themselves at the mercy of publishers, distributors, and insurance carriers who are unwilling to invest in projects that may face costly litigation and possible injunction.ⁿ²² Threatening litigation can be an effective business model for putative rights holders, because paying for a license is more predictable, and likely cheaper, than fighting about whether a license is necessary.ⁿ²³ And there is little incentive for adapters to challenge claimants' allegations, even those that rest on thin legal reeds. Adapters, publishers, and distributors generally have acquiesced to the CDE's licensing demands,ⁿ²⁴ even for [*567] projects that do not draw at all from the few remaining copyrighted stories.ⁿ²⁵ The remarkable thing about the Klinger v. CDE case is not its outcome - it's that Mr. Klinger was willing to

expend the time and energy to pursue the case rather than caving to the CDE's licensing demand as so many others have. ⁿ²⁶

Doctrinal encroachment and informal forces thus combine to shrink the public domain. The law encumbers some uses and permits rights holders to assert claims over even more, so that even legally permitted uses become functionally barred. The result stifles creative expression and facilitates rent-seeking behavior by questionable claimants over material that would otherwise reside in the public domain.

This Article uses the literary character of Sherlock Holmes as a case study to explore the true boundaries of the public domain and the effects of non-copyright influences in restricting expression. Holmes is an ideal subject because his extensive litigation history demonstrates the web of formal and informal constraints that adapters may face in deciding to base new work on an existing literary character. But while Holmes may provide an excellent example, his legal history is far from unique. The problems surrounding Holmes are endemic to popular literary characters and are particularly acute for characters that appear in, and develop through, multiple works. These are the characters most likely to be beloved by fans and commercial adapters, and about whom fans and adapters are most likely to want to create new works. At the same time, their popularity and potential profitability make them the most likely to tempt putative rights holders to overreach. The same characteristics that have made Holmes such a fertile subject of disputes have done the same for many [*568] other characters. For example, copyright protection has expired for Tarzan, ⁿ²⁷ Zorro, ⁿ²⁸ John Carter of Mars, ⁿ²⁹ Conan the Barbarian, ⁿ³⁰ Peter Rabbit, ⁿ³¹ "Fatso" from Casper the Friendly Ghost, ⁿ³² and Betty Boop ⁿ³³ - yet for each, putative rights holders have sought to rely on trademark theories to extend protection. ⁿ³⁴

Therefore, while this Article examines Holmes in depth, its implications are much broader. The Article begins by defining the public domain and exploring the doctrinal and conceptual value of having a public domain in literary characters. In Part I, the Article addresses the contours that formal law provides to the public domain, first in a copyright context and then in a trademark context. Part I concludes that although formal copyright and trademark law are designed to create a robust public domain in literary characters, both bodies of law suffer from uncertainties that blur the boundaries of the public [*569] domain and permit overreaching by putative rights holders. In Part II, the Article addresses the informal forces that exploit formal doctrine to constrict the public domain in literary characters: doctrinal uncertainty, uncertainty surrounding rights ownership, and an incentive for putative rights holders to assert dubious or nonexistent rights. Finally, Part III suggests that the public interest would benefit from brighter-line copyright and trademark rules regarding when literary characters reside in the public domain, and proceeds to propose solutions based on existing copyright and trademark doctrines.

I. Formal Contours of the Public Domain in Literary Characters

Literary characters are part of a shared cultural vocabulary. Although their lives begin on the page, literary characters take up residence in cultural discourse, gaining symbolic and cultural significance. ⁿ³⁵ This may be even truer for serialized characters like Sherlock Holmes, who must be beloved enough to support the success of multiple works. As time passes and their canons build, the characters become like old friends, living on as "fixed points in a changing age" even after their creators die. ⁿ³⁶ Certainly, Sherlock Holmes has become far more than a fictional detective. He has so infused the cultural consciousness that the term "Sherlock Holmes" has become a generic term for detective or clever person - "she's a real Sherlock Holmes" - in addition to identifying the detective himself. Naturally, new creators want to tell stories about these culturally significant characters - to re-tell or reimagine their stories, to comment on their meaning, or to create new episodes in the characters' imagined-yet-familiar lives. ⁿ³⁷ As a subject of adaptation, Sherlock Holmes is ubiquitous; in addition to the "canon" of fifty-six short stories and four novels written by Conan Doyle, Holmes has also appeared in thousands of film and television adaptations, plays, and pastiches, and tens of thousands of works of non-commercial [*570] fiction, art, commentaries, and other works created by fans of the detective. ⁿ³⁸ Holmes and scores of other characters whose identities transcend their original stories have become symbols with meanings created not only by the characters' original creators, but also by the public at large. This shared cultural vocabulary is a rich source of communicative and expressive meaning. ⁿ³⁹

Because intellectual property law gives owners exclusive rights over protected information, it inevitably limits the pool of resources available to creators.ⁿ⁴⁰ For example, Harry Potter and his friends are undoubtedly part of shared culture, but it would be a copyright infringement to make and sell exact copies of J.K. Rowling's Harry Potter books.ⁿ⁴¹ But while the law places some limits on what creators can do and use, it also constrains those limits, so as to leave room for cultural expression. The law creates a public domain of material available to creators by expressly excluding certain information from protection and permitting certain uses of protected information.

The public domain encompasses free-to-use material across doctrinal lines - i.e., material unencumbered by copyright, trademark, patent, or other intellectual property doctrine. Scholars disagree, however, on a precise definition or scope for the term "public domain."ⁿ⁴² The narrowest definition includes only information outside the scope of formal intellectual property protection: inventions and works of authorship too old to be patented or copyrighted; information too generic, functional, or descriptive to serve as trademarks for particular [*571] goods or services; and abstract ideas, physical phenomena, and products of nature excluded from patentability.ⁿ⁴³ Other definitions include unprotectable elements of a protectable creation, such as the ideas or facts underlying a copyrighted work.ⁿ⁴⁴ Still other definitions would add adjacent concepts, such as use-based carve-outs from protection, like the fair use exceptions to copyright and trademark infringement.ⁿ⁴⁵ In operation, these use-based carve-outs are weaker safeguards of the public domain because they act as defenses to infringement rather than providing unbridled permission, but they are as important in defining the public domain as protectability restrictions are. Use-based carve-outs create a public domain defined not only by what information creators have the freedom to use, but also by what creators have the freedom to do with the information they want to use.

My own definition of the public domain goes a step further because, as a practical matter, the realm of the free-to-use is defined not only by law, but also by creator perception.ⁿ⁴⁶ If creators believe that particular information is off-limits, then it is off-limits, whether or not the prohibition is a function of formal law. This Article therefore defines the public domain as including any information that a creator would reasonably believe to be free to use for their purposes. This definition is both broader and narrower than those discussed above. On one [*572] hand, it includes not only information beyond the reach of intellectual property law, but also information available for a creator's particular (fair) use. On the other hand, it takes into account that although some works may be reasonably free from formal legal constraint, they are encumbered by less formal, but no less effective, constraints, such as uncertainty aversion and risk aversion.ⁿ⁴⁷ Thus, the functional public domain is not simply the remainder that intellectual property protection leaves behind. It is an affirmative body of information upon which creators may rely.ⁿ⁴⁸ As David Lange poetically described it, the public domain is a "refuge for creative expression, a place of individual no less than collective entitlement, dimensioned both physically and conceptually, and sanctioned by law. In short, the public domain would be a place like home, where, when you go there, they have to take you in and let you dance."ⁿ⁴⁹

Commentators have identified a number of concrete benefits stemming from a robust public domain, including easy dissemination of information, availability of information to poorly-funded users, a broad pool of material upon which creators may draw, and psychological benefits for creators.ⁿ⁵⁰ The latter two benefits are particularly central to this Article's focus on creators' freedom to use and build upon characters [*573] that reside in the public domain.

A more robust public domain reduces the cost of creating additional works, which not only permits a greater number of works to flourish, but also invites creators to engage with existing works without having to consider the need to ask permission. As Edward Liu explains, "[a] robust public domain, as a permission-free zone, can play an important role in supporting and encouraging [creators'] intrinsic motivations, in freeing up the artistic imagination."ⁿ⁵¹ This not only democratizes creativity and invites a broader range of perspectives as new creators engage with existing works, but also removes the constraints that originators might place on the expressions of these diverse new creators.ⁿ⁵² Thus, a robust public domain in characters not only facilitates, but also fosters, creativity by making culturally familiar source materials available to creators and adapters at no cost (either monetary or in the form of creative control).ⁿ⁵³

Yet, despite these myriad benefits, the public domain is under constant threat. Because information enters the public domain when protection expires, the public domain should grow over time. But, as scholars have noted,

copyright and trademark law are gradually encroaching upon the public domain as Congress and the courts have expanded them to last longer, protect more information, and prohibit more uses.ⁿ⁵⁴ In addition, informal pressures - such as overreaching demands from putative rights holders and concerns about the high cost [*574] and uncertainty of litigation - constrict the public domain even more. Understanding the boundaries of the practical public domain is therefore important to understanding not only what creators can and cannot do, but also the relationship between overlapping formal and informal intellectual property protections.

The following sections will address the formal boundaries of the public domain for literary characters, first for copyright and then for trademark. Section III of this Article will address the influence of informal forces on the public domain for literary characters.

A. Copyright Law's Public Domain

Four doctrinal concepts define the copyright public domain for literary characters. First, some characters are simply not susceptible to copyright protection. Second, protectable characters enter the public domain as their copyrights expire. Third, creators of derivative works featuring copyrighted characters generally receive narrow rights in their creations. Finally, even to the extent that a particular character is protected by extant copyright, the Copyright Act permits fair uses of the character. The following sections discuss each of these concepts in turn.

1. Copyrightability

Literary characters are protected by copyright law as elements of the stories in which they appear, and characters that cross from "idea" to "expression" may themselves be copyrightable.ⁿ⁵⁵ As Judge Learned Hand explained in *Nichols v. Universal Pictures*, "If *Twelfth Night* were copyrighted, it is quite possible that a second comer might so closely imitate Sir [*575] Toby Belch or Malvolio as to infringe," but to do so, the second comer would have to copy Shakespeare's expressions.ⁿ⁵⁶ "It would not be enough that for one of his characters he cast a riotous knight who kept wassail to the discomfort of the house, or a vain and foppish steward who became amorous of his mistress. These would be no more than Shakespeare's ideas."ⁿ⁵⁷ Judge Hand thus established a standard: for literary characters to be protectable, they must be distinctively delineated - that is, they must be described in sufficient detail to be distinctive, and must have consistent identifiable traits.ⁿ⁵⁸ In Judge Hand's words, "the less developed the characters, the less they can be copyrighted; that is the penalty an author must bear for marking them too indistinctively."ⁿ⁵⁹ Applying this standard, courts have held that Mickey Mouse, Superman, Tarzan, Jonathan Livingston Seagull, the Batmobile, and Freddy Krueger (as well as his glove) were sufficiently delineated to merit copyright protection.ⁿ⁶⁰

The present Article focuses on literary, rather than visual, characters, but it is notable that much of the law regarding character protection developed through case law involving characters that are either purely visual or are a hybrid of visual and textual (such as film or comic book characters).ⁿ⁶¹ The paucity of authority regarding text-based characters gives adapters less guidance regarding whether those characters are likely to be protectable. Conventional wisdom holds that visually-depicted characters are more likely to be copyrightable than purely textual ones because visual characters are defined by copyrightable images, which makes them more distinctive and more easily copied than purely textual characters.ⁿ⁶² Thus, [*576] creators may labor under inflated assumptions regarding the protectability of text-based characters, since the cases regarding visual characters could create the (possibly false) impression that characters in all media are readily copyrightable.

In fact, although copyright protection is available for literary characters, it is not guaranteed, even for iconic ones: in *Warner Brothers Pictures v. CBS*,ⁿ⁶³ the Ninth Circuit Court of Appeals held that Dashiell Hammett's hard-boiled detective, Sam Spade,ⁿ⁶⁴ was not protectable because he did not constitute "the story being told."ⁿ⁶⁵ The court explained that "if the character is only the chessman in the game of telling the story he is not within the area of the protection afforded by the copyright."ⁿ⁶⁶ The "story being told" standard remains good law,ⁿ⁶⁷ but courts more commonly apply Judge Hand's less stringent "distinctive delineation" standard.ⁿ⁶⁸

Literary characters are therefore more likely to be protectable if their characteristics are easily summed up and their personalities remain relatively static or predictable.ⁿ⁶⁹ Serialized characters are likely to be distinctively delineated even when they first appear, because the serial format [*577] demands that characters be sufficiently distinctive to attract readers or viewers across multiple stories. Although they often gain nuance over time, these characters' basic traits are set from the start. Sherlock Holmes's defining traits, for example, were established in 1887 in Conan Doyle's novel *A Study in Scarlet*.ⁿ⁷⁰ Although Holmes and his world became more richly detailed over the course of additional novels and stories, he remained essentially the same Holmes as when he began.ⁿ⁷¹ For this reason, courts have presumed (albeit without analysis) that Holmes is copyrightable.ⁿ⁷²

The distinct delineation doctrine creates a meaningful public domain in characters, but one with ill-defined borders. Although one is free to copy "stock" characters and those without sufficient delineation to merit protection,ⁿ⁷³ the test leaves many questions unanswered: How much detail is enough for protection? How many details can change before one character becomes another? How important is a character's name to its level of delineation?ⁿ⁷⁴ Courts are, of course, experienced at drawing lines in ambiguous situations. For [*578] generations, they have applied the Nichols test to define the idea/expression boundary.ⁿ⁷⁵ But as discussed below, that line-drawing exercise may be more difficult for prospective adapters than for courts.

The distinctive delineation test places particular limitations on adapters not only because they may have difficulty interpreting it, but also because it places the most adaptable characters within the bounds of copyright protection. Much of the appeal of adaptation is placing a known character in a new situation.ⁿ⁷⁶ For a literary character to be amenable to adaptation, it must be recognizable - precisely the trait that makes the character copyrightable.ⁿ⁷⁷ Therefore, the public domain is least likely to include the characters most amenable to adaptation, and adapters may need to wait until a character's copyright has expired before it becomes safe to make an adaptation. This makes expiration of copyright a particularly important boundary on the public domain for literary characters.

2. Copyright Expiration

Copyright expiration also creates a public domain as formerly copyrighted works become unencumbered. Like copyrightability, however, copyright expiration for literary characters can be both complicated and uncertain. The United States Constitution requires that copyright must last only "for limited times,"ⁿ⁷⁸ but over time, copyright terms have lengthened and different works are governed by different lengths of copyright.ⁿ⁷⁹ Copyright expiration is particularly complicated for serialized characters because copyrights in their stories may not expire all at once.ⁿ⁸⁰

Sherlock Holmes demonstrates the uncertainty of incremental copyright expiration. Copyright has expired in [*579] most of Conan Doyle's Sherlock Holmes works, but ten post-1923 short stories remain protected in the United States until at least 2022.ⁿ⁸¹ Since Holmes was delineated amply in 1887's *A Study in Scarlet* (or at least certainly within the other forty-nine stories and novels on which copyright has expired),ⁿ⁸² Holmes should reside in the public domain. As Professor Nimmer has explained in his treatise, as soon as "the first work that contained the character enters the public domain, then it is not copyright infringement for others to copy the character in works that are otherwise original with the copier."ⁿ⁸³ This is because, in essence, all of the stories that follow the first are "derivative works" of the first. In Nimmer's words:

Just as the copyright in a derivative work will not protect public domain portions of an underlying work as incorporated in the derivative work, so copyright in a particular work in a series will not protect the character as contained in such series if the work in the series in which the character first appeared has entered the public domain.ⁿ⁸⁴

[*580] Publishing a sequel or other derivative work cannot elongate copyright protection for elements of the original work. Otherwise, an author (or the author's heirs) could unconstitutionally maintain eternal copyright control over a character simply by producing new works featuring that character.

Courts have adopted Nimmer's view.ⁿ⁸⁵ In *Silverman v. CBS*, the Second Circuit Court of Appeals held that the characters of Amos and Andy fell into the public domain once copyright expired on early episodes of the Amos 'n' Andy radio show, because "whatever rights [CBS] may have in the [later] programs ... provide protection only for the increments of expression beyond what is contained in the pre-1948 radio scripts."ⁿ⁸⁶ The same principle applied to Conan the Barbarian in *Conan Properties v. Mattel*, where the court allowed a toymaker to replicate Conan despite the fact that newer works featuring the character remained protected,ⁿ⁸⁷ and in *Siegel v. Warner Brothers*, where the court explained that "the copyrightable aspects of a character ... are protected only to the extent the work in which that particular aspect of the character was first delineated remains protected, but not in the subsequent sequels in which that attribute is later repeated or used."ⁿ⁸⁸

Cases addressing copyright in Sherlock Holmes have articulated this rule,ⁿ⁸⁹ but added the complicating wrinkle of incremental copyright expiration. In *Klinger v. CDE*, for [*581] example, the CDE argued that because Holmes and Watson continued to develop as characters throughout the post-1923 stories, they would not enter the public domain until their last story did.ⁿ⁹⁰ The Seventh Circuit rejected this argument, explaining that "from the outset of the series ... in 1887 Holmes and Watson were distinctive characters and therefore copyrightable," and that to the extent Conan Doyle made alterations to the characters, "the resulting somewhat altered characters were derivative works, the additional features of which that [sic] were added in the ten stories being protected by the copyrights on those stories."ⁿ⁹¹ Because "the alterations [did] not revive the expired copyrights on the original characters," adapters are free to "copy the Holmes and Watson of the early stores [sic]."ⁿ⁹² Adapters are not, however, free to copy the Holmes whose characteristics were originally introduced in the ten still-protected stories. As the *Pannonia Farms* court explained, "storylines, dialogue, characters and character traits newly introduced by the [post-1923 s]tories are examples of added contributions susceptible to copyright protection."ⁿ⁹³ The *Klinger* court elaborated that only "additional features [qualifying as] 'original' in the generous sense that the word bears in copyright law, are protected by the unexpired copyrights on the late stories."ⁿ⁹⁴

The trouble lies in identifying protectable "storylines, dialogue, characters and character traits" introduced in later works.ⁿ⁹⁵ How distinctive or original does a "new character [*582] trait" have to be to create a new, protectable version of a character that would otherwise reside in the public domain? The rulings in *Klinger* highlight this line-drawing problem. The district court stated that any addition to a character would be copyrightable if it constituted "original expression" sufficient to "enable the new work to be readily distinguished from its predecessors."ⁿ⁹⁶ This ruling suggested that once a character was delineated, any new fact or trait about that character - no matter how generic, predictable, or insignificant - could create a new, protectable version of that character.ⁿ⁹⁷ Based on this reasoning, the district court identified three protected character traits of the post-1923 Holmes and Watson: (1) Dr. Watson's second marriage; (2) Dr. Watson's background as an athlete; and (3) Sherlock Holmes's retirement from his detective agency.ⁿ⁹⁸ The Seventh Circuit limited its ruling to the [*583] question of whether any elements of the pre-1923 stories were protected by copyright (holding they were not), and explicitly ignored the district court's ruling regarding what character traits, if any, remained protected by virtue of continuing copyright in the post-1923 stories.ⁿ⁹⁹ Nevertheless, the Seventh Circuit stated in dicta that in the post-1923 stories "we learn that Holmes's attitude toward dogs has changed - he has grown to like them - and that Watson has been married twice. These additional features, being (we may assume) 'original' ... are protected by the unexpired copyrights on the late stories."ⁿ¹⁰⁰

Although the two rulings disagree somewhat regarding which character traits might remain protected, they highlight the same problem. Under both courts' reasoning, each new work featuring an old character had the potential to create a new version of the character with a different copyright expiration from the original - a Holmes 1.0, for whom copyright protection had expired, and a Holmes 2.0 who was still protected. Certainly, no court would protect the basic idea of a "detective who has grown to like dogs" or a "doctor with a second wife."ⁿ¹⁰¹ Yet, although Holmes and Watson themselves have fallen into the public domain, the version of Holmes who is fond of dogs and the version of Watson who has a second wife may not have. This result is consistent with the law about protecting original "increments of expression" in derivative works,ⁿ¹⁰² but is inconsistent with the idea/expression dichotomy articulated in *Nichols* and with the law governing protectability of literary characters,ⁿ¹⁰³ which require a much higher level of

originality - "distinctive delineation" - for copyright to attach. It would be more logical, and more consistent with the principles of copyright in characters, to require the same degree of distinctiveness to protect Holmes 2.0 as was required to protect Holmes 1.0 in the first [*584] instance.ⁿ¹⁰⁴

As a practical matter, nearly every meaningful trait about Holmes and Watson was established in the pre-1923 stories, and thus is free to use. But Klinger still leaves room for the CDE to threaten adapters of Holmes by arguing that the adapters' versions of Holmes veer too close to a later version - whatever that version may be. Following the district court's ruling and the Seventh Circuit's dicta, an adapter would be taking a risk by creating a work in which the public domain Watson remarries or plays rugby.ⁿ¹⁰⁵ Where would TV's House, M.D. stand under this analysis?ⁿ¹⁰⁶ Would House, M.D.'s version of Watson, Dr. Wilson, have been infringing if we had learned he had a background as an athlete? Would Dr. House have been infringing if he had demonstrated any fondness for dogs? And should the writers have had to consider avoiding those trivial details when writing their show? More broadly, the Klinger reasoning provides a podium from which rights holders can challenge adapters of public domain characters and retain control over how those characters are used. Rights holders can demand that adapters avoid character traits that might be characterized as protected, even if those traits would not be independently protectable. This undermines the public domain's purpose of providing a common pool of cultural sources by encumbering adapters' expressive freedom.

In addition, the Klinger ruling may provide a mechanism for original creators and their heirs to extend copyright in literary characters - not only to those who appeared in works by their original authors both before and after 1923, but also to more recent characters. Corporate copyright owners, whose copyright expiration is based on a work's publication date, may attempt to extend protection indefinitely by making incremental changes to their characters over time.ⁿ¹⁰⁷ And although copyright protection for new works of individual authorship is tied to the date of the author's death rather than the date of publication,ⁿ¹⁰⁸ the Klinger case's reasoning may [*585] provide a mechanism for authors' heirs to maintain eternal ownership of copyrighted characters by continuing to publish new works featuring slight alterations to old characters.ⁿ¹⁰⁹

Protection for "original" contributions to derivative works also means that new adapters must be mindful of rights established by previous adapters. New adapters of Holmes therefore must consider not only the rights of the CDE, but also the rights of the creators of House, M.D., and other adaptations such as Warner Brothers' Sherlock Holmes, the BBC's Sherlock, and CBS's Elementary. The following section explores the rights of derivative work creators and the formal legal limitations on those rights.

3. Narrow Rights for Adapters

Copyright law safeguards the public domain by giving only narrow rights to the creators of derivative works. These safeguards take the form of two limitations on adapters' rights. First, copyright law affords creators of derivative works rights only in their unique contributions; they gain no rights in the underlying work on which their adaptations are based.ⁿ¹¹⁰ Second, derivative work creators gain rights over their original contributions only to the extent that those contributions are themselves copyrightable.ⁿ¹¹¹

[*586] Two cases from the 1950s demonstrate the first limitation. In Warner Brothers v. CBS, the United States District Court for the Central District of California considered whether a Sam Spade radio series, authorized by Dashiell Hammett, infringed Warner Brothers' copyright in its adaptation of The Maltese Falcon.ⁿ¹¹² The court held that CBS was allowed to use "all that had gone before," but could not copy elements original to the Warner Brothers' film.ⁿ¹¹³ Around the same time, the Second Circuit Court of Appeals addressed a case regarding adaptations of the novel Madame Butterfly by John Luther Long.ⁿ¹¹⁴ David Belasco adapted the novel into a play, and opera composer Puccini obtained licenses from both Long and Belasco in order to write his opera of the same name.ⁿ¹¹⁵ After copyright on Belasco's play expired, Paramount obtained a license from Long and released a movie based on both the novel and the newly public-domain play.ⁿ¹¹⁶ Puccini sued for copyright infringement.ⁿ¹¹⁷ The court held that Paramount's movie could rely on public domain material from the play and licensed material from the novel, but could not incorporate any elements created or added to the story by Puccini.ⁿ¹¹⁸

Litigation regarding Sherlock Holmes demonstrates the second limitation, that adapters' original contributions must rise to the level of protectability in order to support a suit.ⁿ¹¹⁹ Like original creators, adapters' ideas are not protectable - only their expressions of those ideas. And like original creators, it [*587] may be difficult for adapters to prove that their original contributions to a character are sufficiently original to merit copyright protection.ⁿ¹²⁰ This "idea/expression dichotomy" was central to *Musto v. Meyer*, which dealt with the book *The Seven Per Cent Solution*.ⁿ¹²¹ Based on the fact that Conan Doyle's Holmes engaged in the recreational use of cocaine,ⁿ¹²² David F. Musto published an article in the *Journal of the American Medical Association* entitled *A Study in Cocaine: Sherlock Holmes and Sigmund Freud*.ⁿ¹²³ Musto postulated that Holmes might have received drug treatment from Sigmund Freud during Holmes's (canonical) mysterious disappearance between 1891 and 1894.ⁿ¹²⁴ Subsequently, fiction writer Nicolas Meyer wrote *The Seven Per Cent Solution*, whose plot also included Holmes's cocaine dependency and treatment by Freud.ⁿ¹²⁵ The book, which acknowledged Meyer's conceptual debt to Musto's article and to other writers who had analyzed the Holmes canon, became a bestseller and a motion picture.ⁿ¹²⁶ Musto then sued for copyright infringement.ⁿ¹²⁷ The United States District Court for the Southern District of New York rejected Musto's claim, holding that to the extent that Meyer copied from Musto, he had copied the "idea" of Musto's article, and not its "expression."ⁿ¹²⁸ The Tenth Circuit Court of Appeals reached a similar result in the unpublished case of *Fisher v. United Features Syndicate*, which concerned United Features' use of a costumed "detective" version of Snoopy.ⁿ¹²⁹ Fisher, an independent cartoonist, claimed that he had been the first to dress a cartoon dog "in the role of a detective clad in a Sherlock Holmes hat and cape with a large horn pipe and magnifying glass," but the court held that doing so was "an expression of [the] idea [of a detective dog] which is ... common in the public [*588] domain."ⁿ¹³⁰

These limitations promote the public domain by preventing adapters from claiming rights in characters they merely augmented or made trivial contributions to. But, while adapters' rights are limited, they still pose challenges for later adapters. For example, new adapters are welcome to copy at will from the portions of Conan Doyle's Holmes canon that reside in the copyright public domain, but they are not permitted to copy protectable elements that were introduced by later adapters.ⁿ¹³¹ One may copy Holmes, but not Fox's *Dr. House*, nor the BBC's smart-phone-wielding Holmes, nor CBS's tattooed one. As Justice Holmes put it: "Others are free to copy the original. They are not free to copy the copy."ⁿ¹³²

This poses a special challenge for oft-adapted characters, because adaptation can change the public's perception of a character. James Bond was always a womanizer, but it was not until Sean Connery's film portrayal that he was an extremely promiscuous one.ⁿ¹³³ Likewise, our conception of Sherlock Holmes is deeply informed by sources other than Conan Doyle's original works. The deerstalker hat and Inverness cloak have come to symbolize Sherlock Holmes, although the detective never wore such an outfit in Conan Doyle's canon.ⁿ¹³⁴ Holmes's "signature" curved calabash pipe was an invention of later stage and screen performers.ⁿ¹³⁵ The more a character's stories are told, re-told, reinvented, and transformed, the more the character's most familiar features may originate from non-original sources.ⁿ¹³⁶ When a derivative work redefines a [*589] character, the older version may become obsolete. If someone wants to tell a story about Cinderella, they are welcome to draw on the public-domain, fairy-tale version, but must steer clear of Disney's copyrighted version - which is the version many people know best.ⁿ¹³⁷

Thus, even after the originator's version of a character enters the copyright public domain, the public's best-known version of a character - the womanizing version of James Bond, for example - may be owned by an adapter. *Metro-Goldwyn-Mayer v. American Honda Motor Co.* demonstrates this rule.ⁿ¹³⁸ Honda created an advertisement featuring a James-Bond-like character, and MGM sued.ⁿ¹³⁹ Honda argued that MGM did not own a copyright in Bond, who was created by author Ian Fleming and licensed, rather than assigned, to MGM for film adaptation.ⁿ¹⁴⁰ The United States District Court for the Central District of California rejected this argument and enjoined the advertisement, holding that the ad embodied the "spy thriller with the genres of adventure, comedy (particularly, social satire and slapstick), and fantasy" that originated in MGM's movies, rather than Fleming's original character.ⁿ¹⁴¹

This principle may have more subtle influences on creativity as well, influencing the content of adapters' expressions. For example, the creators of a 1950s comic strip featuring Sherlock Holmes made a conscious decision to make their Holmes look different from Basil Rathbone.ⁿ¹⁴² At the time, Rathbone's face was the cultural embodiment

of Holmes and by far the most well-known visual reference for the character, but the comic creators avoided using it because they feared that Rathbone's production studio would sue for [*590] copyright infringement.ⁿ¹⁴³

The previous three sections demonstrate that the copyright public domain in literary characters is defined by law, but can still create risks for adapters. It is not always clear which characters are protected by copyright law, when that protection attaches, when that protection expires, and who owns the most familiar version of a given character. These uncertainties make the doctrine of fair use particularly important in creating and defining the public domain in literary characters. Unfortunately, the fair-use boundary is even blurrier than the previous three.

4. Copyright Fair Use

The doctrine of copyright fair use permits certain uses of copyrighted characters before their copyrights expire, including uses that copyright holders might not be prone to license or approve.ⁿ¹⁴⁴ The Copyright Act sets forth four factors for courts to use in determining whether a particular use is fair: (1) the "purpose and character of the use," including whether the use is commercial and/or transforms the original's meaning or purpose;ⁿ¹⁴⁵ (2) the "nature of the copyrighted work"; (3) the "amount and substantiality of the portion" copied from the original; and (4) the "effect of the use upon the potential market for or value of the copyrighted work."ⁿ¹⁴⁶

Because the fair use analysis requires balancing multiple factors and examining potentially subjective facts, its results may be difficult to predict. Moreover, because fair use requires copying copyrighted material, it carries the inherent risks that even a fair use will generate litigation. Even when fair use outcomes are relatively predictable,ⁿ¹⁴⁷ the analysis still [*591] provides no guarantees, and litigation defense is daunting and expensive. It is virtually impossible for adapters to reduce litigation risk and uncertainty through anything but settlement or ex ante licensing.ⁿ¹⁴⁸ Thus, while copyright fair use marks a boundary of the public domain as a matter of law, it may not do so for the purpose of adapters' practical decision-making.

Three fair use cases demonstrate the difficulty that adapters face when attempting to predict whether a certain adaptation will be a fair use. The first concerned *The Wind Done Gone*, a retelling of *Gone with the Wind* that "exploit[ed] *Gone With the Wind*'s] copyrighted characters, story lines, and settings as the palette for [a] new story" told from the perspective of that book's slave characters.ⁿ¹⁴⁹ The second concerned *60 Years Later: Coming Through the Rye*, a book that tells the story of a seventy-six-year-old Holden Caulfield confronting a fictionalized version of J.D. Salinger.ⁿ¹⁵⁰ The third concerned *Lo's Diary*, a retelling of Vladimir Nabokov's *Lolita* from the perspective of its teenage namesake.ⁿ¹⁵¹ In each of these adaptations, authors retold or augmented existing works of fiction by transposing the narrative point of view and adding meaning to the original work. Yet, the three cases came out differently. In the first, the court analyzed the Copyright Act's four-factor test and held that *The Wind Done Gone* was likely fair use, noting the importance of encouraging creation and maintaining a robust public domain.ⁿ¹⁵² Using the same four-factor test, the court in the second example held that *60 Years Later: Coming Through the Rye* infringed the copyright in Salinger's original work and enjoined distribution of the book.ⁿ¹⁵³ The case concerning *Lo's Diary* settled prior to any judicial resolution.ⁿ¹⁵⁴

[*592] These cases demonstrate that fair use is far from a panacea for adapters. Because it creates a public domain based on characteristics of the adapter's use, rather than characteristics of the protected work, the doctrine denies adapters the full range of expression by funneling them into particular kinds of uses (for example, transformative or noncommercial uses, or both), while keeping copyrighted characters "off-limits" for other sorts of uses. In addition, as discussed below,ⁿ¹⁵⁵ adapters' own risk aversion and uncertainty aversion may also constrict their expression beyond what fair use principles would require. As many scholars have observed, the fact-intensive nature of the fair use test means that litigating fair use is uncertain and likely to be expensive.ⁿ¹⁵⁶ Many adapters will therefore accede to cease and desist letters or licensing demands, even when licensing would be unnecessary as a matter of law.ⁿ¹⁵⁷

Moreover, even when particular material or a particular use falls squarely within copyright's public domain, adapters may face trademark challenges - allegations that using a particular literary character in a new work is likely to

confuse consumers into believing that the character's original creator, or some other rights holder, is actually the source or sponsor of the new work. Trademark law, like copyright law, carves out a public domain of material and uses from which adapters are free to draw. The following section discusses the formal contours of this trademark public domain.

B. Trademark Law's Public Domain

Trademark law is designed principally to prevent confusion over brands and other source identifiers, rather than to provide exclusivity for works of authorship.ⁿ¹⁵⁸ Protecting works of authorship is copyright law's job.ⁿ¹⁵⁹ Conceptually, [*593] therefore, the role of trademark law in governing literary characters is dubious. Trademark protection is also, in theory, narrower than copyright because it does not prevent all uses of a mark, only those that are likely to dilute the value of the mark or confuse consumers into believing that goods or services originate with, or are sponsored or approved by, the markholder.ⁿ¹⁶⁰ But because of the potentially infinite duration of trademark protection and the ease of obtaining and asserting trademark rights, rights holders have turned to trademark law to keep literary characters out of the public domain.ⁿ¹⁶¹ In fact, adapters may be as likely to face trademark-based challenges as copyright-based ones, a situation dire enough that some have called trademark law "a blunt instrument of cultural intimidation and censorship."ⁿ¹⁶²

Trademark claims about literary characters and their names are nothing new. In fact, the first two reported cases over rights in Sherlock Holmes concerned uses of the detective's name as a trademark.ⁿ¹⁶³ The first case concerned the stage play *Sherlock Holmes*, an original story that William Gillette wrote after obtaining a license from Conan Doyle.ⁿ¹⁶⁴ In 1903, Hopkins Theatre advertised and "threatened to produce" a different play entitled *Sherlock Holmes, Detective*.ⁿ¹⁶⁵ Gillette and his co-producer Charles Frohman sued, relying on a quasi-trademark theory to argue that Hopkins's choice of [*594] titles would deceive the public into believing that the Hopkins production was associated with the Gillette/Frohman play.ⁿ¹⁶⁶ The Illinois appellate court enjoined Hopkins, reasoning that a consumer seeing the title of the Hopkins play "would naturally suppose, unless particularly advised to the contrary, that it is the same play" as Gillette and Frohman's.ⁿ¹⁶⁷ The second case, *Gillette v. Stoll*, continued along the same lines.ⁿ¹⁶⁸ By 1922, Gillette and Frohman were preparing to release a feature-film version of their play, but they faced competition: Conan Doyle had granted a license to the Stoll Film Company to adapt the Sherlock Holmes short stories into cinematic short subjects.ⁿ¹⁶⁹ Some theaters advertised the Stoll films collectively as *The Adventures of Sherlock Holmes*.ⁿ¹⁷⁰ Gillette and Frohman sued Stoll, again relying on a quasi-trademark theory.ⁿ¹⁷¹ And although the case settled in 1923 before a final resolution, the court was at least willing to entertain the proposition that Gillette owned sufficient quasi-trademark rights in the name "Sherlock Holmes" to maintain a suit.ⁿ¹⁷²

These two cases demonstrate the potential power of trademark law to constrict the public domain in literary characters. Because the Gillette/Frohman play was entitled "*Sherlock Holmes*," it effectively provided a quasi-trademark argument against any United States production, in any medium, that included the name Sherlock Holmes in its title. Moreover, the unfair competition and quasi-trademark claims would not expire with the time-limited license that Conan [*595] Doyle granted Frohman and Gillette. Thus, these two suits effectively introduced two possibilities: first, that trademark law could threaten adapters as much as, or more than, copyright law; and second, that exclusive and eternal control over adaptations featuring the Sherlock Holmes character could belong to someone other than Arthur Conan Doyle.

Like copyright law, however, trademark law provides certain doctrinal safeguards that should provide robust boundaries to the public domain. First, trademark protection only applies to "source identifiers" - that is, words and symbols that designate a single source for particular goods or services (for example, an author or publisher), rather than simply describing a type of good or service. Second, like copyright law, trademark law provides a number of use-based defensive doctrines that may protect adapters. Both types of boundaries, however, may be difficult to pin down. Each is discussed below in turn.

1. Trademark Protectability

Can trademark law even apply to a literary character such as Sherlock Holmes? The answer, as it often is in trademark law, is "maybe." Trademark protection can extend to "any word, name, symbol, or device, or any combination thereof ... [used] to indicate the source" of goods or services.ⁿ¹⁷³ This statutory language means that trademark law unquestionably encompasses certain characters, which I call "spokescharacters": those designed for advertisement and marketing, who represent and are associated with specific products or services, such as Ronald McDonald (McDonald's), Trix the Rabbit (Trix Cereal), and Mr. Whipple (Charmin). These characters act as marks when they appear in advertisements. But while spokescharacters are designed as source identifiers in the first instance, literary characters originate as tools for narrative storytelling.ⁿ¹⁷⁴ So can literary [*596] characters serve the same source-identifying function as their spokescharacter cousins?ⁿ¹⁷⁵

For a character or its name to be protected as a trademark, the consuming public must recognize it as indicating not only a type of thing (such as the character itself, or a work featuring the character) but also the source of the thing (such as the author or publisher of the work).ⁿ¹⁷⁶ In trademark parlance, this means it must be a "distinctive" source identifier for particular goods or services, either inherently or through the acquisition of "secondary meaning."ⁿ¹⁷⁷ It is possible for literary characters' names, like any names, to acquire secondary meaning, and perhaps it is even possible for them to acquire secondary meaning as sources of expressive goods (such as fiction).ⁿ¹⁷⁸ Therefore, whether the name "Sherlock Holmes" could be asserted as a trademark against an expressive adapter turns predominantly on whether consumers recognize it as a source identifier for expressive goods or services. Put differently, when people encounter a work featuring a character called "Sherlock Holmes," do they believe that it necessarily comes from a [*597] specific source? Or do they simply think it is a work that features the familiar character of Sherlock Holmes?ⁿ¹⁷⁹

The requirement that a mark must designate a single source for particular goods or services has thwarted a number of trademark claims regarding characters.ⁿ¹⁸⁰ For example, in *Universal City Studios v. Nintendo*, Universal sued the creators of the game "Donkey Kong."ⁿ¹⁸¹ Universal claimed that because it had produced "King Kong" films, it had trademark rights to the name and character of "King Kong" and the image of an enormous ape holding a woman aloft atop a building.ⁿ¹⁸² The United States District Court for the Southern District of New York rejected this argument, finding that the asserted marks had been used by too many other entities to be associated with Universal.ⁿ¹⁸³ Two other film companies had also made King Kong movies, and they, as well as the estate of character creator Merian C. Cooper, each had continuing rights in some shred of the King Kong media empire.ⁿ¹⁸⁴ The existence of those rights holders, and a large number of third-party uses of King Kong marks, tended to undermine the idea that consumers would understand the name, character, or image as designating a single product source.ⁿ¹⁸⁵ Similarly, in *Frederick Warne & Co. v. Book Sales Inc.*, the publisher of the Peter Rabbit books asserted trademark infringement when the [*598] defendant copied several illustrations to create his own book about Peter Rabbit.ⁿ¹⁸⁶ The court found no trademark infringement because the illustrations - while undoubtedly associated with the Peter Rabbit books - could equally indicate either the book's author or its publisher as a source.ⁿ¹⁸⁷

For Sherlock Holmes and other oft-adapted characters, the situation is similar. Courts have not addressed the secondary meaning question directly with regard to Sherlock Holmes, but the very existence of the Pannonia Farms and Klinger cases demonstrates that many different entities have used, and will continue to use, the names and characters of Holmes and Watson without permission from anyone.ⁿ¹⁸⁸ Holmes has appeared in scores of adaptations, including several different wide-release versions of Holmes in the last few years alone. And over time, there have been far more unauthorized uses of Sherlock Holmes than there have been authorized ones. Readers started creating fan fiction and mock-scholarly commentary on the Holmes canon even before Arthur Conan Doyle finished writing Holmes stories, and Internet fan fiction archives alone contain over 100,000 fanworks relating to Sherlock Holmes.ⁿ¹⁸⁹ How would consumers know whether a new Holmes was associated with any of those sources as opposed to the CDE, Ms. Plunket, a publisher, a film producer, or some other entity? The term "Sherlock Holmes" surely describes a product - a work featuring the fictional detective - but it does not indicate any particular source for that product. Holmes is therefore more like King Kong and Peter Rabbit [*599] than like spokescharacters.

The single-source requirement thus protects the public domain by limiting rights holders' ability to claim that frequently-adapted characters act as marks. Nevertheless, some litigants have successfully argued that literary characters

- or at least their names - are capable of acting as brands that identify the literary author (or its estate) as the source of a particular work. For example, when filmmakers used an abbreviated version of the name "Tarzan" in the title of the (X-rated) movie *Tarz & Jane & Boy & Cheeta*, a court held it was both likely to confuse viewers into believing that the film was provided or authorized by Edgar Rice Burroughs's estate, and likely to dilute the estate's TARZAN mark.ⁿ¹⁹⁰ The court held that even a disclaimer would not sufficiently diminish the likelihood of confusion regarding whether the defendants' film was authored or sponsored by Burroughs.ⁿ¹⁹¹ Similarly, in *Danjaq LLC v. Sony Corp.*, a district court granted an injunction to halt Sony's plan to make a series of James Bond films, finding that Sony's use of the name "James Bond," in any capacity, would likely result in trademark dilution.ⁿ¹⁹²

Rights holders (or rights seekers) may also seek to circumvent the single-source requirement by demanding licenses and actively promoting themselves as the sole "authorizers" of works. The CDE has taken this approach, demanding licenses from adapters and compiling a list of [*600] licensees in an effort to establish that it possesses secondary meaning in the "Sherlock Holmes" mark.ⁿ¹⁹³ That strategy exploits a possible synergy between copyright and trademark law, whereby copyright holders' de jure temporary exclusivity over commercial adaptations of a character could perpetuate secondary meaning, and with it de facto permanent trademark rights in the character.ⁿ¹⁹⁴ Because consumers may mistakenly believe that the CDE owns broad copyrights in the character of Sherlock Holmes, they may also believe that any adaptation must be authorized by the CDE.ⁿ¹⁹⁵ Since every non-fair use of a copyrightable character would have to be approved during the copyright period, this would mean that every legally authorized appearance of the character was approved by a single source and that the character could therefore be understood as a source identifier. Taken to its logical extreme, this would mean that every copyrighted character would automatically be subject to potentially eternal trademark protection even after the expiration of copyright.

Courts have addressed this synergistic problem in the industrial design context, holding that as a general matter, rights holders should not be able to use one branch of intellectual property law to extend exclusivity when another branch has expired. For example, Nabisco could not rely on trademark law to maintain the exclusive rights over pillow-shaped shredded wheat when its patent expired, even though the patent had made Nabisco the only source of pillow-shaped shredded wheat, thus generating a certain sort of secondary meaning in the shape.ⁿ¹⁹⁶

The same principle should apply to secondary meaning borne of copyright exclusivity. Scholars have suggested that this is the inevitable conclusion of the Supreme Court's ruling in *Dastar Corp. v. Twentieth Century Fox Film Corp.* and the Ninth Circuit Court of Appeals' ruling in *Comedy III Productions, Inc. v. New Line Cinema*.ⁿ¹⁹⁷ Both cases imply that [*601] copyright holders cannot rely on trademark law to perpetuate protection after the expiration of copyright, and Comedy III articulates the principle quite clearly, explaining that trademark law "cannot be used to circumvent copyright law. If material covered by copyright law has passed into the public domain, it cannot then be protected by [trademark law] without rendering the Copyright Act a nullity."ⁿ¹⁹⁸

But although the cases clearly articulate a policy reason why a formerly copyrighted literary character or its name should not act as a mark,ⁿ¹⁹⁹ neither case rules directly on the question. *Dastar* held that one company could re-package formerly copyrighted content and sell it without crediting the original copyright owner, but the court did not directly address whether the formerly copyrighted videos could themselves act as marks.ⁿ²⁰⁰ Thus, while the case proceeded under a passing-off theory, it was really concerned with the distributor's representation of itself as the "producer" of its videos.ⁿ²⁰¹ In other words, the *Dastar* holding provides no direct answer to whether "Sherlock Holmes" could function as a mark; only whether someone could pass themselves off as the creator of the first fifty Sherlock Holmes stories. Comedy III also sidesteps the question of whether formerly copyrighted material can act as a mark.ⁿ²⁰² In that case, the court presumed that the motion picture clip in the case could not act as a mark because Comedy III could not prove that the clip had secondary meaning as a source identifier.ⁿ²⁰³ Thus, the court reasoned, trademark law did not bar the incorporation of the clip into a larger narrative.ⁿ²⁰⁴ The case therefore does not answer whether the formerly copyrighted character or name of Sherlock Holmes could act as a mark, only whether incorporating a phrase or storyline from the first fifty Sherlock Holmes stories into a narrative work would pose a trademark [*602] problem. The Comedy III court could logically have held that a formerly copyrighted character or its name cannot act as a mark in an expressive context - but it did not. In fact, the court distinguished *Burroughs*, in which the film *Tarz & Jane & Boy &*

Cheeta infringed Burroughs's TARZAN mark, rather than overturning it. ⁿ²⁰⁵

Therefore, while *Dastar* and *Comedy III* provide a convincing rationale for denying trademark protection to formerly copyrighted characters, neither case renders that result a foregone conclusion. Indeed, even in a post-*Dastar*/*Comedy III* world, a leading trademark treatise calls it "erroneous and a nonsequitur to state that merely because a picture is out of copyright, it is therefore 'in the public domain' and may be freely copied by anyone for any purpose. Such a picture may have achieved trademark significance by use as a symbol of origin by another." ⁿ²⁰⁶ Trademark law therefore remains a powerful tool for claimants who wish to compel adapters to pay for the use of formerly copyrighted characters - even if those claimants have to interpret *Dastar* narrowly in order to make their threats. Entities like Ms. Plunket and the CDE insist that they own trademark rights in the Sherlock Holmes character and name, ⁿ²⁰⁷ and the law leaves just enough breathing room for them to make their claims, [*603] forcing adapters to consider the risks of resisting licensing.

Even if characters or their names may be protected by trademark law, however, the use-based dimension of the public domain may permit adapters to use those characters or names in certain ways. The following section explores this use-based aspect of the trademark public domain.

2. Trademark Fair Use and Related Defenses

The remaining boundaries of the trademark public domain relate not to whether a mark is protected, but to whether the use of a protected (or protectable) mark constitutes trademark infringement. Trademark fair use analyses are quite different from the copyright fair use analysis, but they all act to preserve public domain space for certain uses of protected information. Like copyright fair use, trademark fair use doctrines make room for uses that might be impractical or impossible to license, either because the transaction costs of licensing would be too high or because the trademark owner would be unlikely to approve of the use. ⁿ²⁰⁸

As a general rule, trademark infringement occurs when someone uses a mark in a way that is likely to (1) confuse consumers into believing that the trademark holder is the source of the product or service or that the trademark holder sponsored or approved the use; or (2) dilute a famous mark by creating an association that harms the distinctiveness or reputation of the mark. ⁿ²⁰⁹ Trademark fair use doctrines create exceptions to these "likelihood of confusion" and "likelihood of dilution" principles: use of a trademark does not infringe if the use constitutes "classic" (descriptive) fair use, nominative fair use, or an artistically relevant and non-misleading exercise of the user's First Amendment right to free speech. ⁿ²¹⁰ Each of these defenses contains significant gaps and uncertainties, however, creating risk and uncertainty for adapters even if they eliminate liability.

First, the statutory doctrine of "classic" fair use permits the use of descriptive marks in a descriptive manner. ⁿ²¹¹ One might argue that the name "Sherlock Holmes" describes the [*604] character Sherlock Holmes just as shoes might be described as feeling "like a sneaker" despite Easy Spirit's "feels like a sneaker" motto. ⁿ²¹² But for the same reason, the descriptive fair use defense would apply more readily to a story's description of a particularly clever character as being "a real Sherlock Holmes" than it would to a story about Sherlock Holmes that identified the character by name. More problematically, the defense only applies to uses "otherwise than as a mark," which means that identifying the character in the title of the work - that is, branding the work according to the character it contains - could render this defense unavailable. ⁿ²¹³

The common-law doctrine of "nominative fair use" is more applicable to adaptations. It permits the commercial use of a mark to describe a markholder's good or service when three conditions are met: (1) the use refers to a product or service that is not readily identifiable without use of the trademark; (2) the user employs no more of the mark than is reasonably necessary to identify the product or service; and (3) the user does nothing that would, in conjunction with the mark, suggest sponsorship or endorsement by the trademark holder. ⁿ²¹⁴ This doctrine permits, for example, stores to advertise what products they sell, and magazines to write news stories about branded products. ⁿ²¹⁵ Thus, the doctrine of nominative fair use should immunize many expressive uses of marks. To the extent that the term "Sherlock Holmes"

refers to a particular detective [*605] and an adapter wishes to refer to that particular detective, the adapter's use of the detective's name would qualify for nominative fair use analysis.

Thus, on its surface, the nominative fair use doctrine provides "heads I win, tails you lose" protection for adapters: if the term "Sherlock Holmes" is not a trademark representing the source of the fictional detective, then use of the name cannot constitute trademark infringement; but if it is, then referring to the detective by name constitutes nominative fair use. However, in practice, the nominative fair use doctrine may do little to mollify adapters' risk or uncertainty. One reason for this is ambiguity in the law. The third prong (i.e., that the user may do nothing beyond use of the mark to imply sponsorship or endorsement by the markholder) may force courts to analyze the context in which the mark is placed.ⁿ²¹⁶ Paradoxically, uses that portray the mark in a favorable light are less likely to qualify as fair uses than those that portray the mark in a negative light. This is because a positive use is one that the markholder would be more likely to endorse, while the markholder would be less likely to endorse a negative use.ⁿ²¹⁷ While this interpretation distorts the purpose of the nominative fair use doctrine (i.e., to give people the freedom to discuss branded products) it is relatively untested,ⁿ²¹⁸ and thus may chill expression. This uncertainty is particularly problematic since the nominative fair use analysis shifts the burden of proof from the markholder, who ordinarily must prove that a likelihood of confusion exists, to the content creator, who must prove that his or her use does not likely violate the third prong of the test.ⁿ²¹⁹ This makes it more [*606] difficult for adapters to escape litigation at an early stage and therefore presumably discourages adapters' and their publishers', distributors', and insurance carriers' willingness to bank on the doctrine when assessing the risk associated with investing in a new adaptation.

Finally, in the case of *Rogers v. Grimaldi*, the Second Circuit Court of Appeals considered the interplay between trademarks and the First Amendment, and held that the use of a mark in an expressive work, particularly in the title, triggers a First Amendment analysis if the use is (1) artistically relevant to the expression of the work and (2) not explicitly misleading as to the source of the work.ⁿ²²⁰ In such cases, courts balance the value of free expression against the likelihood of confusion.ⁿ²²¹ If the likelihood of confusion is not "particularly compelling," such uses will not infringe.ⁿ²²² Surely, there can be no question that the use of the character or words "Sherlock Holmes" to tell a story about the cultural icon Sherlock Holmes is artistically relevant. And barring a statement that the work originated with, or is sponsored or approved by, a particular markholder (such as the CDE), it is hard to imagine how such a use could be explicitly misleading. Rogers could therefore provide a sort of qualified immunity for adapters of characters in the copyright public domain, regardless of whether those characters or their names could be protected by trademark law. Thus, under current law, the Hopkins and Gillette cases discussed above, in which courts entertained quasi-trademark claims among producers of works titled "Sherlock Holmes," would likely come out differently.ⁿ²²³

But even this relatively liberal rule carries risk for adapters. First, Rogers is binding precedent only in the Second Circuit. Although most other circuits have adopted its balancing test, or one similar to it,ⁿ²²⁴ some circuit courts have [*607] refused to apply the test and others have interpreted it narrowly, holding that it may not apply to uses other than those in the titles of expressive works.ⁿ²²⁵ More problematically, the Rogers test does not create an automatic First Amendment defense to trademark infringement. Rather, Rogers provides only a balancing test that weighs likelihood of confusion against the First Amendment interest in free expression and provides that a "particularly compelling" likelihood of confusion may trump First Amendment interests even for uses that are artistically relevant and not explicitly misleading.ⁿ²²⁶ Thus, Rogers does not provide adapters with certainty or affordability, leading a number of scholars to criticize the test as unduly speech-chilling.ⁿ²²⁷ In fact, the test virtually [*608] guarantees that, if an adapter refuses to capitulate to a trademark demand, the adapter can expect fact-intensive, costly litigation.

As a matter of law, trademark defenses afford significant freedoms to adapters. As a practical matter, however, trademark defenses may do little to allay the chilling effect of risk aversion and uncertainty aversion on adapters and their publishers and distributors, and may even exacerbate it.ⁿ²²⁸ The following Part discusses these informal, yet powerful, influences on the public domain.

II. Uncertainty, Risk, and the Shrinking of the Public Domain

While the law explicitly carves out a public domain in literary characters through protectability limitations and infringement defenses, it remains fraught with risk and uncertainty for adapters. Adapters cannot easily know in advance whether a particular character is protected by copyright or trademark law, when any copyright protection expires, or whether a particular adaptive use of the character would constitute fair use or a noninfringing exercise of the adapter's First Amendment right of free expression. But they can know that they may face expensive litigation with potentially severe consequences. In addition, I contend, the law creates incentives for both rights holders and those without rights to assert claims, which further constricts the public domain. The risk aversion and uncertainty aversion of adapters' representatives, coupled with the consumer-driven nature of trademark protection, creates a "feedback loop" of rights assertion, capitulation, and rights accretion that promotes the gradual privatization of the public domain and threatens the scope of the cultural commons. I contend that this feedback loop is influenced by three forces working in tandem: doctrinal uncertainty, uncertain intellectual property ownership, and risk imbalances that create an incentive for rights holders to over assert their rights. The following sections discuss each in turn.

[*609]

A. Doctrinal Uncertainty and Risk Imbalance

Both risk and uncertainty influence decisions, and often people tend to try to avoid both. ⁿ²²⁹ Risk-averse people avoid behaviors that present known odds of a terrible loss, and uncertainty-averse people avoid behaviors for which the likelihoods of success or failure are unknown. ⁿ²³⁰ These operate independently of each other, although they may work synergistically: risk aversion may become more severe when odds are unknown, and uncertainty aversion may become more severe as possible consequences become more severe. ⁿ²³¹

There is a well-documented relationship between legal uncertainty, risk imbalance, and the privatization of the public domain. ⁿ²³² The blurry edges of copyright and trademark protectability doctrines and the flexibility of use-based exceptions not only open the door to fact-intensive and uncertain protection and infringement analyses, but also leave room for both rights holders and adapters to overestimate the scope of protection and underestimate the reach of fair use [*610] doctrines. Risk-averse and uncertainty-averse adapters, fearful of challenges from overreaching claimants, may seek permission to use "grey area" materials and uses for which the law would not require permission, or may simply refrain from such uses, believing permission to be too costly. These adapters' uncertainty and risk aversion thus effectively moves materials from the "legally safe to use" public domain into the "practically off-limits" zone. ⁿ²³³

Legal uncertainty need not automatically impinge upon the public domain. ⁿ²³⁴ It could, in theory, expand it: adapters might be tempted to push the boundaries of the public domain, electing to ask for forgiveness rather than permission. But when paired with aggressive enforcement, uncertainty permits risk aversion to creep in, and provides incentives for rights holders to overclaim. ⁿ²³⁵ Compounding the problem is the fact that people have varying responses to risk and uncertainty: brazen and/or privileged adapters may push the boundaries of what is permitted, while meek and/or poorly-funded adapters are more likely to refrain from creating as a result of fear, shame, or the belief that they are priced out of creating. ⁿ²³⁶ This means that uncertainty and risk aversion not only shrink the public domain, but also have a disproportionately harsh impact on those with the least power and fewest resources. This is inconsistent with the public domain's objective of permitting diversity in expression. ⁿ²³⁷

[*611] Constriction of the public domain is the nearly inevitable result of risk imbalance. ⁿ²³⁸ It is cheap and easy for putative rights holders to assert claims, but expensive and risky for adapters and their representatives to resist them. For an adapter-defendant, mounting even the most meritorious defense is costly, ⁿ²³⁹ there are no guarantees of success, and there is no way to end an ongoing lawsuit other than giving the putative rights holder what it wants. In addition, a finding of copyright infringement compels either statutory or compensatory damages, and may even result in an injunction. ⁿ²⁴⁰ In trademark law, where preliminary and permanent injunctions are common remedies for infringement, ⁿ²⁴¹ solid defenses that render a finding of infringement unlikely may not outweigh the existential threat to the adapter's work. The Digital Millennium Copyright Act (DMCA) can pose similarly existential risks for adaptations distributed online because putative rights holders can use its procedures to remove works from online distributors even without

having to establish the strength of their legal claims.ⁿ²⁴² In contrast, a claimant bears only the amount of risk it is willing to undertake: once it issues a nearly zero-cost threat or take-down notice, it can elect to walk away at any time, and if it pursues a claim further and loses, it has lost only its litigation expenses. Thus, rights holders have every incentive to overreach, and adapters and their representatives have every incentive to acquiesce.

This problem is compounded by the fact that adapters themselves are seldom the sole decision-makers regarding the [*612] feasibility and content of a commercial adaptation. Publishers, distributors, and insurance carriers often require adapters to warrant that they have all necessary rights and are unwilling to back works that lack such guarantees.ⁿ²⁴³ The *Klinger v. CDE* case demonstrates how both acquiescence and refusal to publish by these representatives can constrict the public domain.ⁿ²⁴⁴ *Klinger and King* edited a volume of original short stories by contemporary authors, inspired by the Holmes canon, entitled *A Study in Sherlock*.ⁿ²⁴⁵ As Random House prepared to publish the volume, the CDE demanded a license for it, even though its contents were based exclusively on the fifty public-domain Holmes stories.ⁿ²⁴⁶ Although *Klinger and King* believed the law did not require them to obtain a license, Random House obtained one - presumably, preferring to pay a fee rather than litigate or lose whatever costs it had already sunk into the volume.ⁿ²⁴⁷ Random House's decision to obtain a license for material that was legally unencumbered not only represented a straightforward constriction on the public domain, but also, as discussed below, has been used by the CDE as evidence of trademark secondary meaning.ⁿ²⁴⁸ When *Klinger and King* edited a second volume, their new publisher, Pegasus Books, received a similar threat from the CDE, but instead of acquiescing, Pegasus simply refused to publish the book.ⁿ²⁴⁹ Such refusals to publish represent a different, but equally expression-chilling, constriction of the public domain.

Thus, doctrinal uncertainty and risk imbalance conspire to constrict the public domain. But doctrinal uncertainty is not the only form of uncertainty adapters face: they also must consider the possibility of claims from multiple, sometimes [*613] conflicting, rights holders.

B. Uncertain Ownership

Even an adapter who believes he or she has obtained copyright and trademark permissions may be blind-sided by an unanticipated claimant. This compounds the challenge, discussed above, that adapters face in representing and warranting to publishers, distributors, and insurance carriers that they have obtained all necessary rights. Because of the irreducible risk that unidentifiable claimants may emerge from the woodwork, the risk of uncertain intellectual property ownership may be enough to scuttle adaptation projects.

Alternatively, adapters (or their representatives) may feel pressure to obtain licenses from multiple sources, even those with questionable ownership rights. As discussed above, paying for a license is surely less expensive, and likely less risky, than litigating a dispute. But the "just pay everyone" approach is no solution. First, it may not be possible to pay everyone since potential claimants may not be readily identifiable. And second, even if claimants are identifiable, paying everyone is only possible for adapters who have ample funds. Less well-funded adapters are left with a difficult choice: pay multiple entities what may be a prohibitively high price or face the risk and uncertainty of litigation.

Furthermore, obtaining a license also requires sacrificing a certain degree of creative control. Putative rights holders may want to influence the way "their" character is portrayed. Putative trademark holders may even feel they need to incorporate creative control into trademark licenses because permitting someone to use your trademark without exerting any quality control over that use - a practice known as "naked licensing" - undermines trademark validity.ⁿ²⁵⁰ Even the entertainment powerhouse Warner Brothers purportedly relinquished some creative control of their Sherlock Holmes [*614] character to Ms. Plunket,ⁿ²⁵¹ who in 2010 conspicuously threatened to "withdraw permission for more [Warner Brothers] films to be made" if those films contained gay subtext regarding Holmes.ⁿ²⁵² "Paying everyone," then, is only an option for those who are willing and able to bear whatever licensing conditions the rights holders may demand.

Finally, even if it were feasible and agreeable for all, the "pay everyone" approach would still constrict the public

domain by increasing transaction costs and encouraging rent-seeking behavior. The following sections discuss the causes and effects of uncertain rights ownership, first in the copyright context, and then for trademarks.

1. Copyright

Under the Copyright Act, only a "legal or beneficial owner of an exclusive right under a copyright is entitled ... to institute an action for any infringement of that particular right committed while he or she is the owner of it." ⁿ²⁵³ Courts have interpreted this to mean that standing to sue for copyright infringement is limited to two types of claimants: (1) copyright owners, and (2) exclusive copyright licensees. ⁿ²⁵⁴ It should be straightforward, therefore, to know whether or not a copyright demand is coming from a bona fide copyright claimant. Yet tracing the title of copyright ownership can be extremely difficult.

Indeed, the disputed history of copyright ownership in Sherlock Holmes demonstrates the extent of this difficulty. ⁿ²⁵⁵ This much is known: after Sir Arthur Conan Doyle's death, copyright in the Holmes canon transferred to Baskervilles Investments Ltd., an entity formed by the widow of Conan Doyle's son, Denis. ⁿ²⁵⁶ When Baskervilles Investments Ltd. fell [*615] into bankruptcy, Sheldon Reynolds purchased the rights from the receivership of the Royal Bank of Scotland. ⁿ²⁵⁷ From there, it gets complicated. The CDE traces its rights to a notice of termination of copyright transfer issued by Dame Jean Conan Doyle (the author's daughter) in 1981. ⁿ²⁵⁸ This termination (allegedly) reclaimed Dame Jean's interests in the copyright to the Holmes canon, and Dame Jean bequeathed these rights to the Royal National Institute of Blind People upon her death in 1997. ⁿ²⁵⁹ The Royal Institute then sold the rights to the CDE. ⁿ²⁶⁰

But the story told by Andrea Plunket is quite different: she claims that Dame Jean Conan Doyle issued her termination notice in 1979, and that the notice was ineffective because it was not served on Andre Milos (who, she argues, owned some portion of the rights as of 1979). ⁿ²⁶¹ Ms. Plunket alleges that she acquired the rights either by unrecorded assignment from an entity called Star Container Establishment, Ltd., or upon the intestate death of Sheldon Reynolds (after she and Mr. Reynolds were divorced). ⁿ²⁶² Neither of these scenarios seems legally plausible. Indeed, in 2004, a court held that if Ms. Plunket's rights had ever existed, she relinquished them as part of her divorce from Mr. Reynolds and that it was therefore "objectively unreasonable" for her to assert her alleged rights. ⁿ²⁶³ So who owns the remaining sliver of copyright in the [*616] Holmes canon? Andrea Plunket almost certainly does not. But it is not entirely clear that the CDE does either. A 1984 dispute that could have decided whether Dame Jean Conan Doyle's termination notice was effective ended instead in a finding that the court lacked personal jurisdiction over Dame Jean. ⁿ²⁶⁴ Considering Ms. Plunket's allegations that Dame Jean's termination was deficiently served, it is possible that the CDE owns no copyrights at all in the Holmes canon.

Notwithstanding this jumbled ownership situation, both the CDE and Ms. Plunket are vigorous in asserting their purported rights in Holmes. In fact, although the recent Warner Brothers Sherlock Holmes films have drawn almost entirely (if not entirely) on the fifty public domain stories, Warner Brothers reportedly paid both Ms. Plunket and the CDE to secure the "rights" for its films. Ms. Plunket reported that she was involved in making the film, ⁿ²⁶⁵ and Warner Brothers paid the CDE "the most lucrative single fee we've had to date on a project, with provisions for the same in the event of a sequel." ⁿ²⁶⁶

In addition to the difficulty of determining who owns the copyright in a character's original iteration, adapters also must consider the possibility of copyright claims from earlier adapters, as discussed above. ⁿ²⁶⁷ This risk is both irreducible and unpredictable unless one knows every adaptation that exists, which is almost certainly impossible for a frequently-adapted character like Holmes. Moreover, the array of possible claimants may also include entities that claim rights in characters and their names under trademark law. The following section discusses the uncertainty and plurality of [*617] possible trademark ownership.

2. Trademark

Unlike copyrights, there may be many legitimate "owners" of any given trademark. Because a trademark exists only in connection with particular goods or services, multiple users may exercise concurrent rights over the same mark, but for different purposes.ⁿ²⁶⁸ In addition, as with copyrights, competing entities may vie for rights in the same mark for the same types of goods or services.

At least three entities claim to own, manage, and license trademark rights in Sherlock Holmes, and many more claim "Sherlock"-related marks. The CDE claims common law rights to the word mark "Sherlock Holmes" for books and short stories in the field of detective fiction.ⁿ²⁶⁹ Andrea Plunket claims competing trademark rights in "the characters created by Sir Arthur Conan Doyle" including Holmes and Watson.ⁿ²⁷⁰ Another entity called The Sherlock Holmes Memorabilia Company owns the domain name www.sherlockholmes.com and describes itself as "managing the primary Sherlock Holmes brand."ⁿ²⁷¹ Adding to the complexity, the Memorabilia [*618] Company canceled a portion of its trademark registration after it was accused of being confusingly similar to marks owned by Hospitality USA, which owns Sherlock's Pub & Grill.ⁿ²⁷² Many more trademark registrations and applications include the word Sherlock or obvious homonyms.ⁿ²⁷³ And since registration is not required for trademark ownership,ⁿ²⁷⁴ there are likely scores of other harder-to-find entities using "Sherlock Holmes" and its variants as marks. In addition, just as adapters may gain copyright protection for their original contributions to derivative works, they also may claim trademark rights in any distinctive, source-identifying features of their new works, as happened in the Hopkins and Gillette cases.ⁿ²⁷⁵ This compounds the difficulty faced by potential adapters in predicting the sources of trademark risk.

Trademark law presumes - and I will not challenge here - that it is reasonable to require anyone who wishes to select a brand for use in commerce to conduct a thorough search to ensure that its chosen mark is not confusingly similar to someone else's existing mark.ⁿ²⁷⁶ But is it reasonable to demand the same search from someone who wishes to make a new expressive work adapting a public domain character? For the adapter, the question is not whether someone else has used the name "Sherlock Holmes" in a comparable way (e.g., as a character in an expressive work). It is a foregone conclusion [*619] that many have.ⁿ²⁷⁷ The question instead is who claims rights - and, more troublingly, what sorts of creative control those potential claimants might demand over an adaptation if they decided to assert their rights against the adapter.

In ordinary commerce, a competing markholder might demand that a competitor issue a disclaimer of non-association, or even change its mark. But in the expressive context, disclaimers are impractical,ⁿ²⁷⁸ and changing the mark would mean far more than changing the name or shape of a product - it would require not making an adaptation of Sherlock Holmes. Likewise, taking an "adapt first and ask questions later" approach requires sinking costs into a product that may later be enjoined - which, as discussed above, is unlikely to appeal to publishers, producers, distributors, and insurance companies.

One may argue that the sheer number of entities claiming rights in the character and his name, not to mention the name's use in common parlance to mean "detective" or "clever person," may make the term too widely used to act as a distinctive mark for anything. At the very least, the proliferation of claimants would narrow the potential scope of each markholder's rights - a video game maker would have rights only as against competing video games, and a pub would have rights only as against competing pubs. But, although that is likely true as a legal matter, as a practical matter, more potential claimants also mean more potential threats, however weak or narrow they may be. These potential threats, and the irreducible risk of challenges by multiple claimants, add an additional layer of risk and uncertainty for adapters and compound the public-domain shrinking impact of risk imbalance.

Moreover, the structure of the law encourages trademark assertions - even doubtful ones - not only as a mechanism for extracting payment, but also for attempting to strengthen or create a mark. The following section discusses how overreaching by putative trademark holders harms the public domain.

[*620]

C. Incentive to Assert and the Feedback Loop

Trademark over-assertion shrinks the public domain by triggering adapters' risk aversion, and putative trademark holders need not look far for excuses to over-assert their real or imagined rights. Because a mark's strength (and sometimes its very existence) depends partly on evidence of secondary meaning,ⁿ²⁷⁹ and because third-party acknowledgements of a putative markholder's rights can provide evidence of secondary meaning,ⁿ²⁸⁰ putative rights holders may seek to build their brands by granting third parties documented permission to use the claimant's "marks," whether or not such permission is actually required.

From a formal law standpoint, this is a dubious approach, at best. Courts recognize that third-party licenses do not necessarily constitute evidence of secondary meaning, particularly when the parties have entered into the license in order to resolve a dispute.ⁿ²⁸¹ Nevertheless, some courts have held that licenses to third parties tend to represent acknowledgement of an association between the mark and the licensor.ⁿ²⁸² This creates an incentive for putative markholders [***621**] to assert claims against adapters in an attempt to settle them and possibly create a mark where none existed before.

The CDE has taken precisely this approach with a licensing business that it claims constitutes evidence of secondary meaning in the word mark "Sherlock Holmes."ⁿ²⁸³ The CDE has submitted a declaration to the Trademark Trial and Appeal Board listing a series of licenses that, the CDE asserts, included a license for the use of the word mark "Sherlock Holmes."ⁿ²⁸⁴ The same declaration also describes the CDE's campaign to police the "Sherlock Holmes" mark.ⁿ²⁸⁵ The CDE no doubt hopes to create a "feedback loop" of rights accretion: by asserting and settling claims, the CDE obtains licenses that they hope will either strengthen their rights or create a public perception that such licenses are necessary, or both. Even if this strategy is ultimately ineffective in [***622**] establishing secondary meaning in a court of law,ⁿ²⁸⁶ it nevertheless shrinks the public domain by creating a perception of rights. The law lends just enough credibility to the putative rightsholders' claims to get the licensing ball rolling downhill, and once it starts rolling, it gains speed. Whether licensees acquiesce as a matter of legal requirement or risk aversion does not matter: either way, they pay. Thus, a character becomes trapped in a web of trademark law and risk aversion even though it could - and as a matter of copyright law, should - be in the public domain.

What is required to resolve this problem, therefore, is a doctrine that unequivocally forecloses claimants' ability to assert claims in the first place. The following section proposes such a doctrine.

III. Addressing the Problem

As the discussion above demonstrates, formal legal doctrine, at least in theory, provides a significant public domain in literary characters. Copyright protection reaches only some literary characters, and expiration and fair use doctrines create space for adapters to use even the protected characters. Trademark protection reaches only literary characters that serve as identifiers of a single source, and fair use doctrines similarly permit many uses of otherwise protected characters. But because these doctrines are riddled with ambiguities, uncertainty, and risk aversion, they create opportunities for claimants to overreach and shrink the public domain. I propose that the answer to this encroachment is brighter-line rules that are amenable to early adjudication.

Brighter-line rules would help alleviate uncertainty aversion. Current standards demand subjective judgments regarding whether a literary character is protected by copyright or trademark law and regarding when adapters are free to use the character in their works.ⁿ²⁸⁷ Although legal flexibility has virtue in some circumstances, the particular brand of flexibility here harms the public domain by fostering uncertainty about what creators are allowed to use as basic building blocks of expression.ⁿ²⁸⁸

[***623**] A rule permitting early adjudication of adaptation rights would help alleviate risk aversion by softening the risk imbalance between claimants and adapters.ⁿ²⁸⁹ Early adjudication would reduce the financial risks for accused infringers, for whom the cost of fact-intensive litigation is often far greater than the cost of a (possibly unnecessary) licensing fee.ⁿ²⁹⁰ If a case cannot be adjudicated early, adapters accused of infringement must either settle the case or

face potentially catastrophic loss in the form of high litigation costs, expensive or existential infringement remedies, and inevitable delay in releasing their works. My proposals therefore address protectability rather than infringement. Protectability is subject to ex ante assessment and, when litigation is necessary, can be decided as a threshold issue after minimum discovery. In contrast, while use-based defenses remain important to protecting expression, they do not necessarily clarify liability ex ante because they rest on multifactor tests (for copyright) and likely consumer perception (for trademark).ⁿ²⁹¹ Similarly, my proposals do not focus on procedural approaches that other scholars have suggested, such as judicial sanctions against claimants with weak or frivolous claims,ⁿ²⁹² more aggressive **[*624]** "loser pays" fee-shifting mechanisms,ⁿ²⁹³ and expanded availability of burden-shifting mechanisms such as anti-Strategic Lawsuit Against Public Participation (anti-SLAPP) remedies.ⁿ²⁹⁴ Each of these suggestions has advantages and disadvantages,ⁿ²⁹⁵ and each could help alleviate the public-domain shrinking impact of risk aversion, but even if implemented, these litigation-based mechanisms do little unless cases make it to court.ⁿ²⁹⁶ Thus, they still increase transaction costs for adapters, and they do little to address the legal uncertainties that make claimants' threats plausible.

By contrast, my proposals thus rely on existing copyright and trademark doctrines to create more predictable, protectability-based answers to the question of when a character enters the public domain. Since both proposals rely on existing law, both can be accomplished through judicial interpretation without legislative participation. I recognize that neither proposal is a panacea, and that adjusting protectability will not solve the problem that those who most need the public domain will have the least ability to defend it.ⁿ²⁹⁷ But these doctrinal adjustments provide legal tools that adapters can use to push back against overreaching claimants, and eliminate the uncertainties that make overreaching all too easy. I will address copyright and trademark in turn.

On the copyright side, adapters should be able to predict when a character will enter the copyright public domain, and rights holders should not be able to delay that entry. To accomplish this, I suggest that copyright in literary characters should expire simultaneously with the copyright in the first work in which the character was distinctively delineated. This will not eliminate uncertainty entirely - as discussed above, determining whether a character is copyrightable is not always **[*625]** easyⁿ²⁹⁸ - but it will eliminate nearly all uncertainty about copyright expiration. Once a character is known or presumed to be copyrightable, it should be a matter of simple arithmetic to determine when that copyright expires, but in the current incremental-expiration climate, it is not. Protecting "incremental expression," as the court did in *Klinger*, can have the same practical impact as extending copyright in characters, both by leaving room for claimants to overreach and by protecting versions of the character that are trivially different from, or predictable elaborations on, characters that have already entered the public domain.ⁿ²⁹⁹ I do not mean to suggest that derivative characters should never be protectable; rather, the threshold for protecting new "versions" of characters should be as demanding as the threshold for protecting original characters - echoing the rule that new material in derivative works must reach a threshold of originality and expression to be copyrightable.ⁿ³⁰⁰

On the trademark side, the existing doctrine of genericity should eliminate the ability to claim trademark rights in literary characters and character names that have entered the copyright public domain.ⁿ³⁰¹ Genericity embodies the basic principle that trademark law does not protect generic terms, which are defined as the "common descriptive name" for a type of product or service.ⁿ³⁰² As one court explained, "no matter how much money and effort the user of a generic term has poured into promoting the sale of its merchandise and what success it **[*626]** has achieved in securing public identification, it cannot deprive competing manufacturers ... of the right to call an article by its name."ⁿ³⁰³ Just as the term "apple juice" is the generic term for the juice of apples, the term "Sherlock Holmes" is the generic term for the detective Sherlock Holmes. Just as a bottle of apple juice can be marked with the term "apple juice" without fear of infringement, an adapter should be able to use the term "Sherlock Holmes" to identify the contents of expressive work featuring the character Sherlock Holmes without trademark repercussions.

I am not suggesting that literary characters or their names are or should be generic for all products or services. A sportswear company could adopt the trade name "apple juice" as a valid mark (although it might face allegations of confusing similarity from competitors Apple Bottoms and Juicy Couture). Along the same lines, characters' names would still be amenable to protection as marks for other goods and services - Sherlock Holmes pipe tobacco, Beowulf Pet Day Care, Samson & Delilah Hairdressers, and the like.ⁿ³⁰⁴ But for expressive goods and services, when characters

enter the copyright public domain, they and their names should be treated as generic for the fiction they represent. Indeed, they should be treated as generic during the period of copyright as well as after it. Regardless of whether copyright protection persists, characters and their names signal a type of goods (that is, expressive goods concerning that character) rather than a source of goods (such as a particular author, producer, or distributor of those expressive goods).

This proposal does not change the law, but it makes explicit the rules signaled by *Dastar* and *Comedy III* that trademark law should not perpetuate exclusive ownership of works of authorship after their copyright protection expires.ⁿ³⁰⁵ Moreover, it strengthens those cases by grounding their outcomes in the core trademark doctrine of genericity, rather than a vague "non-extension" principle.ⁿ³⁰⁶

Genericity also makes it immaterial whether or not consumers associate the name or character of Sherlock Holmes with a particular source such as the CDE, Ms. Plunket, the Sherlock Holmes Memorabilia Company, or anyone else, since a generic term is incapable of acquiring secondary meaning.ⁿ³⁰⁷ This principle is well-established at the intersection of trademark and patent law, where the generic names and shapes of patented objects cannot gain secondary meaning by virtue of their patent exclusivity even if consumers associate those names or shapes with the patentee or its product.ⁿ³⁰⁸ In 1896, the Supreme Court explained that when a patent expires the public gains an affirmative right to make the formerly patented product, and "it equally follows ... that along with the public ownership of the device there must also necessarily pass to the public the generic designation of the thing which has arisen during the monopoly" even if the public connects the name of the product with the patentee.ⁿ³⁰⁹ Thus, for example, the Supreme Court held that the formerly-patented pillow shape of shredded wheat cereal and the name "shredded wheat" to describe cereal made of shredded wheat were generic and could never serve as trademarks regardless of whether consumers ever associated them with Nabisco as a source.ⁿ³¹⁰ This was true even if consumers had come to associate the name with the source after the patent had expired.ⁿ³¹¹ The court explained that although Nabisco's predecessor "expended more than \$ 17,000,000 in making the name a household word and identifying the product with its manufacture" after the patent expired, that effort could not create a protectable mark, because "like every other member of the public, [Kellogg Company] was, and remained, free to make shredded wheat when it chose to do so; and to call the product by its generic name."ⁿ³¹² This holding reflects the principle that there is no amount of secondary meaning that can render a generic term protectable. No amount of licensing, nor public [*628] acknowledgement of rights, should be able to establish secondary meaning in formerly copyrighted characters like Sherlock Holmes for expressive goods or services.ⁿ³¹³

I recognize that applying the genericity doctrine to characters will create a certain degree of consumer confusion, because some consumers may mistakenly believe that a literary character's name is a source identifier. But courts have long recognized and deemed acceptable some degree of confusion.ⁿ³¹⁴ Indeed, even "total confusion" is irrelevant to protectability if an alleged mark is generic.ⁿ³¹⁵ In order to "permit the natural enrichment of the language and to prevent [putative markholders] from maintaining a monopoly" over the building blocks of expression,ⁿ³¹⁶ the genericity doctrine encompasses not only terms that began their lives as generic descriptors, but also former marks, such as "thermos," "aspirin," and "cellophane" that have lost their source-identifying function as consumers have come to understand them as identifying a type of good or service rather than a [*629] source.ⁿ³¹⁷ In this context, courts recognize that consumer understandings may shift at uneven rates, and some consumers will still carry a branded connotation in their minds even after a critical mass of consumers have adopted the generic understanding of a term.ⁿ³¹⁸ The same is surely true for literary characters: just as some consumers may believe that the terms "shredded wheat," "thermos," "aspirin," and "escalator" denote product sources, some people may believe that a formerly copyrighted literary character's name denotes a particular source. But to the extent confusion will occur, it is the sort of confusion that trademark law routinely tolerates in order to facilitate communication and expression.ⁿ³¹⁹ As the *Rogers* court explained, "in general the [Trademark] Act should be construed to apply to artistic works only where the public interest in avoiding consumer confusion outweighs the public interest in free expression."ⁿ³²⁰ The mere fact that some consumers may perceive characters or their names as source identifiers for literary goods does not outweigh their nature as generic identifiers of goods-types rather than goods-sources.

Conclusion

Literary characters are far from "generic" in the colloquial sense of the word. They are cherished by those who get to know them and may feel like "real," distinct people with real social impact. But it is precisely that cultural significance that makes the public domain in literary characters so important. Intellectual property incentives may encourage their creation, and moral intuition may demand that originators be rewarded for their efforts and recognized for their contributions. But [*630] those incentives and intuitions do not justify eternal or unlimited exclusivity at the expense of creation and expression. Like chicks leaving the nest, at some point, characters must be permitted to take on expressive lives of their own, to become part of a cultural vocabulary that is free to use for all purposes, without cost or content control.

In theory, copyright and trademark doctrines recognize that need, restricting which literary characters can be protected and providing wide fair-use latitude for adapters to incorporate those characters in new works even during the term of copyright exclusivity. But in practice, many forces conspire to shrink this public domain: ambiguity in the law regarding copyright and trademark protectability, irreducible uncertainty regarding who owns rights, and a potentially chilling synergy between copyright and trademark protection. Together, these provide an incentive for putative rights-holders to over-assert their rights and discourage adapters from fighting back. This risk imbalance makes literary characters "off-limits" to creators even when the law would almost certainly permit their use, moving the practical boundaries of the public domain and disproportionately harming the disempowered and poorly funded - those for whom the public domain is most crucial.

The answer, I suggest, is no mystery. Existing copyright expiration and trademark genericity doctrines provide tools for maintaining a robust public domain. But for these doctrines to work, courts must apply them to compel literary characters' public availability. This requires permitting characters' copyright to expire along with their underlying works and not allowing putative rights holders to perpetuate those copyrights by publishing derivative works. It requires treating literary characters and their names as they are: generic signals of a type of work - a work featuring those characters - rather than a particular source of the work, such as an author or publisher. And it requires applying these rules in a way that is reliable and predictable, and in such a way that overreaching is as risky for putative rights holders as it is for adapters. Creators should be able to draw on public domain characters with confidence - to marry them, murder them, or do what they like with them.

n22. See *id.*

n23. *Id.*

n24. See *Klinger v. Conan Doyle Estate, Ltd.*, 761 F.3d 789, 791-92 (7th Cir. 2014) (granting attorneys' fees to Klinger, describing CDE's business model of seeking license fees from adapters, and stating "it's time the estate, in its own self-interest, changed its business model"). For a partial listing of the CDE's licenses, see Affidavit of Jon Lellenberg at 2, U.S. Trademark Application Serial No. 85,229,790 (filed Jan. 31, 2011), available at <https://tsdr.uspto.gov/document-viewer?caseId=sn85229790&docId=RSI20111217183505#docIndex=4&page=2>.

n25. For example, the iPad adventure book *Steampunk Holmes: Legacy of the Nautilus* is an adaptation of the public-domain story *The Adventure of the Bruce-Partington Plans*. See P.C. Martin, *Steampunk Holmes: Legacy of the Nautilus* (2d ed. 2012), available at <http://www.smashwords.com/extreader/read/134422/1/steampunk-holmes-legacy-of-the-nautilus>, archived at <http://perma.cc/8N3F-73LX> (containing prominent notice that the makers received a license from the CDE).

n26. See *Klinger*, 761 F.3d at 792 (granting attorneys' fees to *Klinger*, describing differential between cost of license and cost of litigation); Affidavit of Jon Lellenberg, *supra* note 24, at 2 (identifying some who have obtained licenses from the CDE).

n27. See *Edgar Rice Burroughs, Inc. v. Manns Theatres*, No. 76-3612, 1976 WL 20994, 195 U.S.P.Q. 159 at 3 (C.D. Cal. Dec. 20, 1976); Complaint, *Edgar Rice Burroughs, Inc. v. Dynamic Forces Entm't, Inc.*, 1:12-cv-01192-ER (S.D.N.Y. Feb. 12, 2012) (alleging infringement of various Tarzan and John Carter of Mars marks without alleging infringement of United States copyright).

n28. See generally *Sony Pictures Entm't v. Fireworks Entm't Grp.*, 137 F. Supp. 2d 1177 (C.D. Cal. 2001) (claiming trademark rights in Zorro character after copyright had expired); *Sony Pictures Entm't v. Fireworks Entm't Grp.*, 156 F. Supp. 2d 1148 (C.D. Cal. 2001) (same); *Queen of Swords to Zorro: Take That!*, 7 Andrews Intell. Prop. Litig. Rep., no. 21, 5 (2001) (describing case).

n29. See Charlie Jane Anders, *Can You Trademark a Character from a Public Domain Story?*, *Io9* (Feb. 27, 2012, 5:00 PM), <http://io9.com/5888791/can-you-trademark-a-character-whos-in-the-public-domain>, archived at <http://perma.cc/KH3H-WMUT>; John Carter of Mars Series, *Edgar Rice Burroughs*, http://www.edgarriceburroughs.com/?page_id=18 (last visited Oct. 13, 2014), archived at <http://perma.cc/29HF-2LXJ> (noting that John Carter books were published in 1911 but describing claim of trademark rights in, among other things, character names); Complaint, *Edgar Rice Burroughs, Inc. v. Dynamic Forces Entm't, Inc.*, 1:12-cv-01192-ER (S.D.N.Y. Feb. 12, 2012) (alleging infringement of various Tarzan and John Carter of Mars marks).

n30. See generally *Conan Properties, Inc. v. Mattel, Inc.*, 712 F. Supp. 353, 355 (S.D.N.Y. 1989) (asserting both copyright and trademark claims against Mattel's He-Man although copyright had lapsed in Robert Howard's Conan character).

n31. See generally *Frederick Warne & Co., Inc. v. Book Sales Inc.*, 481 F. Supp. 1191 (S.D.N.Y. 1979) (asserting trademark rights in Peter Rabbit after copyright had expired); Viva R. Moffat, *Mutant Copyrights and Backdoor Patents: The Problem of Overlapping Intellectual Property Protection*, 19 Berkeley Tech. L.J. 1473 (2004).

n32. See *Harvey Cartoons v. Columbia Pictures Indus., Inc.*, 645 F. Supp. 1564 (S.D.N.Y. 1986).

n33. See generally *Fleischer Studios, Inc. v. A.V.E.L.A., Inc.*, 654 F.3d 958 (9th Cir. 2011).

n34. See *infra* notes 35-41 and sources cited therein.

n35. See Kurtz, *Independent Lives*, *supra* note 20, at 432-36 (discussing and providing examples of characters' entry into cultural vocabulary).

n36. Arthur Conan Doyle, *His Last Bow* 8 (1917) ("Good old Watson! You are the one fixed point in a changing age.").

n37. See Jacqueline Lai Chung, *Drawing Idea from Expression: Creating a Legal Space for Culturally Appropriated Literary Characters*, 49 *Wm. & Mary L. Rev.* 903, 913-17 (2007) (discussing cultural appropriation of characters).

n38. Betsy Rosenblatt, *Sherlock Holmes Fan Fiction*, 62 *Baker Street J.* 33 (2012).

n39. See Chung, *supra* note 37, at 931-32 (discussing sources of meaning and communicative value of culturally appropriated characters); Kurtz, *Independent Lives*, *supra* note 20, at 433-36.

n40. I use the term "creators" here and throughout to refer both to so-called "original" creators and follow-on creators such as adapters, recognizing that even the most original creator must inevitably draw on material that came before.

n41. See *Warner Bros. Entm't Inc. v. RDR Books*, 575 F. Supp. 2d 513, 546-49 (S.D.N.Y. 2008) (holding that work containing substantial portions of Harry Potter books infringed copyright).

n42. See Tyler T. Ochoa, *Origins and Meanings of the Public Domain*, 28 U. Dayton L. Rev. 215, 217-222 (2002) (describing history of public domain scholarship and defining public domain by enumerating its contents); Pamela Samuelson, *Enriching Discourse on Public Domains*, 55 Duke L.J. 783, 783 (2006) (describing disagreement regarding definitions and positing several types of public domain).

n43. See 17 U.S.C. §§301-305 (2012) (copyright expiration); 35 U.S.C. § 154 (2012) (patent expiration); 15 U.S.C. § 1052 (2012) (identifying bars to trademark registration); 35 U.S.C. § 101 (defining patentable subject matter); 17 U.S.C. § 102 (defining copyrightable subject matter).

n44. See, e.g., Edward Lee, *The Public's Domain: The Evolution of Legal Restraints on the Government's Power to Control Public Access Through Secrecy or Intellectual Property*, 55 Hastings L.J. 91, 102-116 (2003) (tracking history of public domain as a concept of intellectual property law; tying concept to the limits of intellectual property's subject matter and duration); Jessica Litman, *The Public Domain*, 39 Emory L.J. 965, 1010-11 (1990) (defining public domain as "a commons that includes those aspects of copyrighted works which copyright does not protect").

n45. See, e.g., Yochai Benkler, *Free as the Air to Common Use: First Amendment Constraints on Enclosure of the Public Domain*, 74 N.Y.U. L. Rev. 354, 361, 424 (1999); David Lange, *Reimagining the Public Domain*, 66 Law & Contemp. Probs. 463, 478-79 (2003) ("Consider copyright's fair use doctrine. Under the proposal I have advanced here, that doctrine should now be seen as an affirmative aspect of the public domain at large, rather than as a mere affirmative defense to an allegation of copyright infringement."); Samuelson, *supra* note 42, at 783-85 (suggesting multiple public domains premised on (1) the legal status of the content; (2) the freedom to use content; and (3) the accessibility of content).

n46. See Samuelson, *supra* note 42, at 783-85.

n47. This resembles, but is not identical to, Yochai Benkler's definition of the public domain, which includes straightforward fair uses but excludes fair uses that can only be vindicated by litigating complicated and fact-intensive litigation. See Benkler, *supra* note 45, at 361-63. It may more closely resemble the version of the public domain that Pamela Samuelson describes as "conferring a presumptive right of creative appropriation," although that version, too, is grounded in formal law. See Samuelson, *supra* note 42, at 803-04; see also Pamela Samuelson, *Mapping the Digital Public Domain: Threats and Opportunities*, 66 Law & Contemp. Probs. 147, 148-49 (2003) (acknowledging that certain intellectual creations may be in the public domain as a matter of law, but not as a practical matter).

n48. See Litman, *supra* note 44, at 968 ("The public domain should be understood not as the realm of material that is undeserving of protection, but as a device that permits the rest of the system to work by leaving the raw material of authorship available for authors to

use.").

n49. Lange, *supra* note 45, at 470.

n50. See *Festo Corp. v. Shoketsu Kinzoku Kogyo Kabushiki Co.*, 535 U.S. 722, 730-31 (2002) ("The monopoly is a property right; and like any property right, its boundaries should be clear. This clarity is essential to promote progress, because it enables efficient investment in innovation."); Joseph P. Liu, *The New Public Domain*, 2013 U. Ill. L. Rev. 1395, 1417-18 (2013) (identifying literature on benefits of public domain and discussing benefits). But see Anupam Chander & Madhavi Sunder, *The Romance of the Public Domain*, 92 Cal. L. Rev. 1331, 1332, 1334-35 (2004) (identifying risks of over-romanticizing benefits of public domain).

n51. Liu, *supra* note 50, at 1417 (citing David Fagundes, *Crystals in the Public Domain*, 50 B.C. L. Rev. 139, 143-44 (2009)).

n52. Liu, *supra* note 50, at 1418-19.

n53. See Elizabeth L. Rosenblatt, *A Theory of IP's Negative Space*, 34 Colum. J.L. & Arts 317, 360 (2011) (discussing relationship between negative spaces and "productive infringement"). Note that this argument presumes the policy objective of production rather than complete originality. It also privileges the values of quantity, diversified speakers, and diversified perspectives, over the value of maintaining coherent and consistent originators' visions. See Justin Hughes, *"Recoding" Intellectual Property and Overlooked Audience Interests*, 77 Tex. L. Rev. 923, 924, 984-87 (1999) (noting that diversifying perspectives has the effect of diminishing the coherence of a unified originators' vision).

n54. See, e.g., Lange, *supra* note 45, at 465-66 ("Now I saw that the public domain demanded recognition as an affirmative entity, conferring its own protection (which I imagined as in the nature of rights) upon individual creators; this would be necessary if creativity itself was to survive the tendency toward expansionism that seemed to be burgeoning everywhere among the intellectual property doctrines."); James Boyle, *The Second Enclosure Movement and the Construction of the Public Domain*, 66 Law & Contemp. Probs. 33 (2003); Benkler, *supra* note 45, at 411-12.

n55. A number of scholars have explored the circumstances under which, and the degree to which, copyright law protects literary characters. See generally, e.g., Zahr K. Said, *Fixing Copyright in Characters: Literary Perspectives on a Legal Problem*, 35 Cardozo L. Rev. 769 (2013); Samuel J. Coe, *The Story of a Character: Establishing the Limits of Independent Copyright Protection for Literary Characters*, 86 Chi.-Kent L. Rev. 1305 (2011); Foley, *supra* note 20; Jasmina Zecevic, *Distinctly Delineated Fictional Characters that Constitute the Story Being Told: Who Are They and Do They Deserve Independent Copyright Protection?*, 8 Vand. J. Ent. & Tech. L. 365 (2006); Nickles, *supra* note 20; Kurtz, *Independent Lives*, *supra* note 20; Francis M. Nevins, Jr., *Copyright + Character = Catastrophe*, 39 J. Copyright Soc'y

USA 303 (1992).

n58. *Id.*

n59. *Id.*

n60. *Walt Disney Prods. v. Air Pirates*, 581 F.2d 751, 754 (9th Cir. 1978) (Mickey Mouse); *Detective Comics, Inc. v. Bruns Publ'ns, Inc.*, 111 F.2d 432 (2d Cir. 1940) (Superman); *Burroughs v. Metro-Goldwyn-Mayer, Inc.*, 519 F. Supp. 388, 391 (S.D.N.Y. 1981) (Tarzan); *Bach v. Forever Living Prods. U.S., Inc.*, 473 F. Supp. 2d 1127, 1136 (W.D. Wash. 2007) (Jonathan Livingston Seagull); *New Line Cinema Corp. v. Easter Unlimited, Inc.*, 1989 U.S. Dist. LEXIS 17340 (E.D.N.Y. July 19, 1989) (Freddy Krueger); *DC Comics v. Towle*, 989 F. Supp. 2d 948, 965 (C.D. Cal. 2013) (Batmobile).

n61. See *supra* note 55 and sources cited therein.

n62. See *Anderson v. Stallone*, No. 87-0592 WDKGX, 1989 WL 206431, at 7 (C.D. Cal. Apr. 25, 1989) (stating that "a graphically depicted character is much more likely than a literary character to be fleshed out in sufficient detail so as to warrant copyright protection," but also concluding that "this fact does not warrant the creation of separate analytical paradigms for protection of characters in the two mediums"); *Gaiman v. McFarlane*, 360 F.3d 644, 661 (7th Cir. 2004) (holding that without the description behind it, a picture of comic book character Cogliostro would have been only a drawing, not a character, but not suggesting that the drawing would be uncopyrightable). A full discussion of visual characters, and whether they are actually more readily copyrightable than text-based characters, is beyond the scope of this Article. For a more thorough discussion of the latter question, see Rebecca Tushnet, *Worth a Thousand Words: The Images of Copyright*, 125 Harv. L. Rev. 683, 741-51 (2012) (discussing copyright law's propensity to privilege text over image and its impact on law of character copyright).

n63. 216 F.2d 945 (9th Cir. 1954).

n64. In the 1941 motion picture version of the *The Maltese Falcon*, Humphrey Bogart played Sam Spade. See *Warner Brothers Pictures v. Columbia Broad. Sys., Inc.* 102 F. Supp. 141, 148-49 (S.D. Cal. 1951).

n65. 216 F.2d at 950.

n66. *Id.*

n67. See *Olson v. NBC, Inc.*, 855 F.2d 1446, 1452 (9th Cir. 1988).

n68. See Said, *supra* note 55, at 784 (noting that the distinctive delineation test "has become the de facto majority approach in copyright's character jurisprudence").

n69. In classic literary analysis terms, characters with these traits are known as "flat." See E.M. Forster, *Aspects of the Novel* 67-68 (1955) (coining the terms "flat" and "round" characters); Said, *supra* note 55, at 789 (discussing the relationship between copyright protection and flatness/roundness of characters).

n70. See Complaint at 5, *Klinger v. Conan Doyle Estate, Ltd.*, 988 F. Supp. 2d 879 (N.D. Ill. 2013) (No. 1:13CV01226).

n71. See Memorandum of Law in Support of Plaintiff's Motion for Summary Judgment Pursuant to FRCP 56, *Klinger v. Conan Doyle Estate, Ltd.* at 9, 988 F. Supp. 2d 879 (N.D. Ill. 2013) (No. 1:13CV01226).

n72. See *Klinger v. Conan Doyle Estate, Ltd.*, 988 F. Supp. 2d 879, 893 n.8 (N.D. Ill. 2013) (declining to decide "the copyright status of the

Sherlock Holmes character" as a whole but strongly implying copyrightability); *Klinger v. Conan Doyle Estate, Ltd.*, 755 F.3d 496, 497 (7th Cir. 2014) (presuming copyrightability); *Pannonia Farms, Inc. v. USA Cable*, No. 03 Civ. 7841 (NRB), 2004 U.S. Dist. LEXIS 23015, at 27 (S.D.N.Y. June 7, 2004) (same); see also *Nash v. CBS, Inc.*, 899 F.2d 1537, 1541 (7th Cir. 1990) (distinguishing copyright in fact versus fiction by explaining that "the inventor of Sherlock Holmes controls that character's fate while the copyright lasts; the first person to conclude that Dillinger survived does not get dibs on history"); *Metro-Goldwyn-Mayer, Inc. v. Am. Honda Motor Co.*, 900 F. Supp. 1287, 1296 (C.D. Cal. 1995) ("Like Rocky, Sherlock Holmes, Tarzan, and Superman, James Bond has certain character traits that have been developed over time through the sixteen films in which he appears.") (internal footnotes and citations omitted).

n73. *Nichols v. Universal Pictures Corp.*, 45 F.2d 119, 121 (2d Cir. 1930).

n74. For example, television's Gregory House is a hyper-analytical investigator with uncanny attention to detail and poor personal skills, who lives in apartment 221B, plays a string instrument, and has a chemical dependency. Considering that the same are also true of Sherlock Holmes, is House the same character as Holmes, albeit under a different name? See David Mermelstein, *Germes, Jerks Infiltrate Primetime*, *Variety* (June 15, 2005), <http://www.variety.com/article/VR1117924498?refCatId=1945>, archived at <http://perma.cc/BNV4-4X9B> (pointing out that the show's creators explicitly intended House to be a modern day Sherlock Holmes).

n75. *Nichols*, 45 F.2d at 121.

n76. See *Metro-Goldwyn-Mayer, Inc. v. Am. Honda Motor Co.*, 900 F. Supp. 1287, 1296 (C.D. Cal. 1995) ("Audiences do not watch Tarzan, Superman, Sherlock Holmes, or James Bond for the story, they watch these films to see their heroes at work.").

n77. *Nichols*, 45 F.2d at 121.

n78. U.S. Const. art. I, § 8.

n79. See Sonny Bono Copyright Term Extension Act, Pub. L. No. 105-298, 112 Stat. 2827 (1998); *Golan v. Holder*, 132 S. Ct. 873 (2012); *Eldred v. Ashcroft*, 537 U.S. 186 (2003).

n80. See Hirtle, *supra* note 8.

n81. See *id.* (charting expiration dates of copyrighted works based on factors including publication date, registration, and renewal; concluding that copyright protection has expired for all works first published before 1923). United States copyright in the last of the Sherlock Holmes stories will expire 95 years after its date of publication, which will occur in 2022 or 2023. See *Klinger v. Conan Doyle Estate, Ltd.*, 988 F. Supp. 2d 879, 888 n.5 (N.D. Ill. 2013) (discussing difference of opinion regarding expiration of copyright in Conan Doyle's last Sherlock Holmes story).; see also Sonny Bono Copyright Term Extension Act, Pub. L. No. 105-298, 112 Stat. 2827 (1998). The remaining protected stories were all contained in the last Holmes short-story collection that Conan Doyle published, *The Case-Book of Sherlock Holmes*. The book, itself published in June 1927, compiled twelve works that had previously published between October 1921 and April 1927. Of these, ten stories were first published in the United States in 1923 or later: *The Adventure of the Creeping Man* (1923); *The Adventure of the Sussex Vampire* (1924); *The Adventure of the Three Garridebs* (1924); *The Adventure of the Illustrious Client* (1924); *The Adventure of the Retired Colourman* (1926); *The Adventure of the Lion's Mane* (1926); *The Adventure of the Blanched Soldier* (1926); *The Adventure of the Three Gables* (1926); and *The Adventure of Shoscombe Old Place* (1927). Assuming all of their copyright registrations were properly renewed, these ten stories retain copyright protection in the United States. See Hirtle, *supra* note 8.

n82. See Complaint at 4, *Klinger v. Conan Doyle Estate, Ltd.*, 988 F. Supp. 2d 879 (N.D. Ill. 2013) (No. 1:13CV01226) (listing character elements delineated in pre-1923 works).

n83. 4 Melville B. Nimmer & David Nimmer, *Nimmer on Copyright* § 2.12 (2002).

n84. *Id.*

n85. See, e.g., *Harvey Cartoons v. Columbia Pictures Indus.*, 645 F. Supp. 1564, 1570 (S.D.N.Y. 1986) (citing copyright professor Melville Nimmer and holding that later issues of Casper comic books afforded no copyright protection to a character first delineated in works whose copyright had expired, and who had "not changed to any appreciable degree since" those works: "Harvey's existing copyrights are valid only with respect to the storylines or other original contributions of the works to which they pertain. These copyrights cannot 'affect or enlarge the scope [or] duration' of copyright protection for the artwork which has long since entered the public domain.").

n86. 870 F.2d 40, 49-50 (2d Cir. 1989).

n87. See *Conan Props. v. Mattel, Inc.*, 712 F. Supp. 353, 357-61 (S.D.N.Y. 1989).

n88. Siegel v. Warner Bros. Entm't, 690 F. Supp. 2d 1048, 1058-59 (C.D. Cal. 2009).

n89. See Pannonia Farms, Inc. v. USA Cable, No. 03 Civ. 7841 (NRB), 2004 U.S. Dist. LEXIS 23015, at 27 (S.D.N.Y. June 7, 2004) ("The Holmes and Watson characters have been delineated in over fifty stories that no longer possess copyright protection ... Just as these many stories have passed into the public domain, so too have their delineated constituent elements, such as the Holmes and Watson characters that are the subject of this suit.").

n90. See Klinger v. Conan Doyle Estate, Ltd., 988 F. Supp. 2d 879, 888 (N.D. Ill. 2013) (describing this argument as "novel"); Klinger v. Conan Doyle Estate, Ltd., 755 F.3d 496, 503 (7th Cir. 2014) (describing this argument as "bordering on the quixotic").

n91. Klinger, 755 F.3d at 503.

n92. Id. at 502-03.

n93. Pannonia Farms, 2004 U.S. Dist. LEXIS 23015, at 29.

n94. Klinger, 755 F.3d at 502. See also Warner Bros. Entm't v. X One X Prods., 644 F.3d 584, 596-97 (8th Cir. 2011) ("If material related to certain characters is in the public domain, but later works covered by copyright add new aspects to those characters, a work ... infringes the copyrights in the later works to the extent that it incorporates aspects of the characters developed solely in those later works.").

n95. Pannonia Farms, U.S. Dist. LEXIS 23015, at 29. Neither the Pannonia Farms nor the Klinger court had to conduct this exercise. In Pannonia Farms, the court held that the accused film did not contain any character elements unique to the post-1923 stories, so it did not need to render an opinion on what, if any, portion of the character remained protected. Id. In Klinger, Klinger sought a declaratory judgment only as to elements of the character set forth in the pre-1923 stories, so the court likewise did not need to rule regarding protection of the post-1923 version of the character. Klinger, 755 F.3d at 503. Nevertheless, both courts made clear that protection for the post-1923 version of the character may exist.

n96. *Klinger v. Conan Doyle Estate, Ltd.*, 988 F. Supp. 2d 879, 892-93 (N.D. Ill. 2013).

n97. See Betsy Rosenblatt, Guest Post: Betsy Rosenblatt on the Case of Sherlock Holmes' Two Lives, Rebecca Tushnet's 43(B)log (Jan. 6, 2014, 9:11 AM), <http://tushnet.blogspot.com/2014/01/guest-post-betsy-rosenblatt-on-case-of.html>, archived at <http://perma.cc/KED-2ZVV>.

n98. *Klinger*, 988 F. Supp. 2d at 890. In addition to being "ignored" by the Seventh Circuit, this holding is also factually disputable. It is likely the result of the case's procedural idiosyncrasy: the CDE defaulted in response to *Klinger*'s Complaint, but the court permitted *Klinger* to move for summary judgment and permitted the CDE to respond. As a result, the court ruled without reviewing the actual text of Conan Doyle's writings. If it had, it would have observed, for example, that Holmes's retirement was actually first described in detail in a public domain story, *His Last Bow*. Likewise, Watson's second marriage is factually far from the concrete event the court may have assumed it was - presumably, the court was referring to Holmes's observation in *The Blanched Soldier* that Watson had in 1903 "deserted me for a wife, the only selfish action which I can recall in our association." 2 Leslie *Klinger*, *The New Annotated Sherlock Holmes* 1483-84 and n.5 (W.W. Norton, 2005). But whether that was the product of a second marriage, or a continued first, or a third, or even a sixth, has long been a matter of spirited Sherlockian debate. See, e.g., *id.* (describing Watson's 1903 marriage as his second); H.W. Starr, *Some New Light on Watson*, 1 *Baker Street J.* 55 (1946) (arguing that Watson's 1903 marriage was a continuation of his first); Belden Wigglesworth, *Many Nations and Three Separate Continents*, 2 *Baker Street J.* 273 (1947) (identifying Watson's 1903 marriage as his third); Brad Keefauver, *Counting Watson's Wives*, *Sherlock Peoria* (Mar. 9, 2002), http://www.sherlockpeoria.net/Who_is_Sherlock/WatsonsWives.html, archived at <http://perma.cc/9T6V-ZSG6> (identifying Watson's 1903 marriage as his sixth); Ronald B. De Waal, *The World Bibliography of Sherlock Holmes & Dr. Watson*, 213-15 (1974) (addressing the topic of Watson's wife or wives in entries 3407-35).

n99. *Klinger*, 755 F.3d at 500 (ruling on procedural grounds that "the summary judgment ruling on the last ten stories was a mistake, and can be ignored").

n164. *Hopkins Amusement*, 103 Ill. App. at 613. The opinion describes the Gillette play as the product of collaboration between Gillette and Conan Doyle, but as a matter of historical fact it appears to be almost entirely the work of Gillette. In a deposition relating to different litigation in 1923, Conan Doyle was asked whether he participated or collaborated with Mr. Gillette in creating the work, and Conan Doyle responded that he made no contribution "beyond the fact that [Gillette] drew some of his material from the stories. Apart from that, not." Doyle Dep. 6:15-16, Apr. 12, 1923 (on file with author).

n165. *Hopkins Amusement*, 103 Ill. App. at 614; see also *Hopkins Amusement Co. v. Frohman*, 67 N.E. 391, 392 (1903) (clarifying on appeal that regardless of whether or not Frohman had an "exclusive property right in the name 'Sherlock Holmes' as a trade-mark," the title of Hopkins's play was likely to result in consumer deception and confusion and harm to Frohman).

n166. Hopkins Amusement, 103 Ill. App. at 613; see also Recent Cases, *supra* note 163 (summarizing case).

n167. Hopkins Amusement, 103 Ill. App. at 617.

n168. 200 N.Y.S. 787 (N.Y. Sup. Ct. 1922), *aff'd*, 198 N.Y.S. 916 (N.Y. App. Div. 1923).

n169. *Id.* at 788.

n170. *Id.*

n171. *Id.* at 789.

n172. *Id.* at 790. In the intervening century, the law has changed somewhat. First, the federal enactment of trademark law into the Lanham Act would likely preempt a state-law unfair competition claim like Frohman's based on a quasi-trademark theory. Thus, a court would be forced to consider whether Frohman did, in fact, have a trademark right to the name "Sherlock Holmes" for performance entertainment, and would adjudicate any resulting claim based on likelihood of confusion or dilution. But this may be a semantic difference rather than a substantive one: The Gillette/Frohman production was the only one of its kind in 1903 (having been granted an exclusive license by Conan Doyle) and it is reasonable to assume that Frohman might have been able to prove that American consumers associated the title "Sherlock Holmes" with that particular play.

n173. 15 U.S.C. § 1127 (2012); see also 15 U.S.C. § 1125(a)(1) (defining false designation of origin).

n174. Some characters blur those boundaries. The Transformers, for example, began as spokescharacters (for Mattel's line of Transformer toys), narrative characters (as cartoon characters), and industrial designs (as toys) likely amenable to design patent or even utility patent protection. See BaCon, Hasbro Publishes Transformers Timeline to Movie, TFORMERS (Feb. 9, 2007), <http://tformers.com/Hasbro-Publishes-Transformers-Timeline-to-Movie/7132/news.html>, archived at <http://perma.cc/L9YS-CM3N>. The same is true of many other toy/cartoon crossover characters. But such characters are beyond the scope of this Article as their origins are visual rather than purely literary in nature.

n175. Here, as throughout the Article, I am focused on characters that are defined by text rather than images or the combination of text and images. Thus, I am not focused on cartoons or comic book characters, although many of the same arguments apply with equal force to them as to textual characters. An image of a visual character may or may not act as a logo, just as the name of a literary character may or may not act as a word mark. To the extent I draw a distinction between visual and literary characters, it is based on my presumption that visual characters are more readily usable as source identifiers in the merchandising context and thus are arguably more amenable to trademark treatment than textual characters. Whether that distinction is sound is a subject for further scholarly exploration.

n176. See *Frederick Warne & Co. v. Book Sales, Inc.*, 481 F. Supp. 1191, 1195 (S.D.N.Y. 1979) (holding that "it would not be enough that [illustrations of Peter Rabbit] have come to signify Beatrix Potter as author of the books; plaintiff must show that they have come to represent its goodwill and reputation as Publisher of those books").

n177. *Abercrombie & Fitch Co. v. Hunting World, Inc.*, 537 F.2d 4, 9-11 (2d Cir. 1976) (articulating rule that trademark protection requires that a mark not be generic and must be a distinctive source identifier, either inherently or through the acquisition of secondary meaning; defining taxonomy of marks requiring secondary meaning).

n178. In fact, although every court to consider the question of distinctiveness for a literary character has required a showing of secondary meaning, no court has expressly denied the possibility that a literary character may be inherently distinctive. See *Foley*, *supra* note 20, at 941.

n179. Cf. *Kurtz, Methuselah*, *supra* note 20, at 444 (noting "single source" problem, but also noting courts' lack of rigor on the matter: "There is a tendency to focus on the character itself, rather than on any information it provides about source or identification. When an easily identifiable character, or its elements, appears in unauthorized form, courts readily find infringement, with little inquiry, and assume the existence of likely confusion whenever a defendant exploits a market demand created by the plaintiff.").

n180. See, e.g., *Sony Pictures Entm't v. Fireworks Entm't Grp.*, 137 F. Supp. 2d 1177 (C.D. Cal. 2001) (denying preliminary injunction on ground that claimant had inadequately defined a protectable mark in the name or character of Zorro), vacated, No. 01-00723 (ABC) (JWJx), 2002 U.S. Dist. LEXIS 28457 (Nov. 5, 2002); *Sony Pictures Entm't v. Fireworks Entm't Grp.*, 156 F. Supp. 2d 1148 (C.D. Cal. 2001) (same), vacated, No. 01-00723 (ABC) (JWJx), 2002 U.S. Dist. LEXIS 28457 (Nov. 5, 2002); *Conan Props., Inc. v. Mattel, Inc.*, 712 F. Supp. 353 (S.D.N.Y. 1989) (noting that plaintiff had failed to establish secondary meaning in character of Conan the Barbarian); *Frederick Warne & Co. v. Book Sales, Inc.*, 481 F. Supp. 1191 (S.D.N.Y. 1979) (holding that genuine issue of material fact existed regarding whether character of Peter Rabbit had acquired secondary meaning as source identifier).

n192. 49 U.S.P.Q.2d 1341, 1343-44, 1348 (C.D. Cal. 1998) (granting injunction to halt Sony's plan to make a series of James Bond movies brought on behalf of assignee of all United States film and television rights in the James Bond character, finding a likelihood that Sony's use of the mark in any capacity would result in dilution by blurring); see also *Prouty v. Nat'l Broad. Co.*, 26 F. Supp. 265, 265-66 (D. Mass. 1939) (enjoining the use of the character Stella Dallas in skits created by NBC on a theory of unfair competition); *Chaplin v. Amador*, 269 P. 544, 546 (Cal. Ct. App. 1928) (enjoining actor from imitating Charlie Chaplin's famous eponymous character in deceptive manner). Although the Lanham Act's anti-dilution provision, 28 U.S.C. § 43(c) (2012), expressly excludes claims of dilution based on parodic references to famous marks, the *Burroughs* and *Danjaq* cases demonstrate that dilution remains a risk for adapters wishing to use character names in promoting their adaptations. Based on these cases, although dilution law purports to create a safe harbor for expressive uses, adapters may fairly fear that any use of a famous character's name in an expressive work could be held to constitute trademark dilution - assuming, as adapters inevitably will, that they plan to make public (i.e., promote) the presence of the character in their expressive works.

n207. See, e.g., U.S. Trademark Application Serial No. 86,126,503 (filed Nov. 22, 2013) (pending use-based application by CDE for mark SHERLOCK HOLMES for class of goods: "Organisation of exhibitions for cultural, educational, and entertainment purposes"); U.S. Trademark Application Serial No. 77,937,845 (filed Feb. 17, 2010) (pending/suspended ITU application by CDE for mark SHERLOCK HOLMES for class of goods: "Motion picture and television films featuring musical, dramatic, comedic and theatrical performance; prerecorded goods, namely prerecorded audio and video cassettes, compact discs, and digital versatile discs all featuring audio books and stories in the field of detective fiction, motion picture and television films, animated cartoons, radio programs, music, and games;

downloadable electronic publications in the nature of e-zines and electronic books in the field of detective fiction"); U.S. Trademark Application Serial No. 77,937,813 (filed Feb. 17, 2010) (pending/suspended ITU application by CDE for mark SHERLOCK HOLMES for class of goods: "Printed matter, namely books, short stories, magazines, and newsletters in the field of detective fiction; photographs; story books"); John van der Luit-Drummond, United Kingdom - The Game is Afoot in Sherlock Trademark Dispute, *World Trademark Rev.* (Jan. 16, 2014), <http://www.worldtrademarkreview.com/Blog/detail.aspx?g=645b6180-c549-4a61-8945-2a4239865fb2>, archived at <http://perma.cc/6ACU-CNPB> (regarding Plunket claims).

n208. See Gordon, *supra* note 144, at 1613-14.

n209. See 15 U.S.C. § 1125(a), (c) (2012).

n210. *Id.* § 1115(b)(4).

n211. *Id.*

n212. *United States Shoe Corp. v. Brown Grp., Inc.*, 740 F. Supp. 196, 197, 199-200 (S.D.N.Y. 1990), *aff'd*, 923 F.2d 844 (2d Cir. 1990); see also *KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc.*, 543 U.S. 111, 114-16, 124 (2004) (holding that "classic" fair use permits a permanent makeup company to describe its service as using "microcolor" despite a competitor's "Micro Colors" brand regardless of the potential that consumer confusion may result from the use).

n213. 15 U.S.C. § 1115(b)(4) (2012). The issues of descriptiveness and use "as a mark" could also be blended to eliminate this defense. To the extent that the name "Sherlock Holmes" acts as a character's brand rather than as a descriptor, use of the name anywhere in an adaptation (not just in the title) could be problematic. In *Films of Distinction, Inc. v. Allegro Film Prods., Inc.*, the court held that, by naming a fictional crime-focused television channel "the Crime Channel," the makers of the film *Relative Fear* infringed the plaintiff's "Crime Channel" mark. 12 F. Supp. 2d 1068 (C.D. Cal. 1998). The court rejected the defense of classic fair use on the ground that, by creating a fictitious brand, the creators of *Relative Fear* were not using the mark "otherwise than as a mark." *Id.* at 1076. The court rejected the nominative fair use defense for the same reason. *Id.* at 1076-77.

n214. *New Kids on the Block v. News Am. Publ'g, Inc.*, 971 F.2d 302, 308 (9th Cir. 1992).

n215. *Id.* at 307-08.

n216. See *id.* at 308-09 (examining context of use in analyzing third factor and determining that uses that cast mark in negative light did not imply sponsorship or endorsement).

n217. See *id.*

n218. Cases that have applied the nominative fair use doctrine to expressive uses of marks have generally addressed situations in which the markholder's brand was depicted in an unfavorable light. In *Wham-O, Inc. v. Paramount Pictures, Corp.*, 286 F. Supp. 2d 1254, 1255-57, 1263-64 (N.D. Cal. 2003), the film *Dickie Roberts: Former Child Star* depicted the main character misusing the Slip-n-Slide and injuring himself; in *Mattel Inc. v. Walking Mountain Prods.*, 353 F.3d 792, 796, 810-12 (9th Cir. 2003), the work at issue was critical of the ideal of vapid beauty the artist saw embodied by the Barbie doll; in *Mattel, Inc. v. MCA Records*, 296 F.3d 894, 901 (9th Cir. 2002), the song "Barbie Girl" depicted Barbie as flighty and promiscuous.

n219. See *E.S.S. Entm't 2000, Inc. v. Rock Star Videos, Inc.*, 444 F. Supp. 2d 1012, 1029 (C.D. Cal. 2006) (noting that nominative fair use concept of suggesting sponsorship can merge into likelihood of confusion, which shifts the burden to defendants) (citation omitted); see also *McGeveran*, *supra* note 155, at 90-92 (discussing burden-shifting effect and other flaws in nominative fair use test).

n220. 875 F.2d 994, 999, 1004-05 (2d Cir. 1989).

n221. See *id.* at 999.

n222. *Twin Peaks Prods. v. Publ'ns Int'l, Ltd.*, 996 F.2d 1366, 1379 (2d Cir. 1993).

n223. See *supra* notes 164-72 and accompanying text.

n224. The Second, Fifth, Sixth, and Ninth Circuits have adopted the Rogers test. See, e.g., *Parks v. LaFace Records*, 329 F.3d 437, 451-52 (6th Cir. 2003); *Mattel, Inc. v. MCA Records*, 296 F.3d 894, 902 (9th Cir. 2002); *Westchester Media v. PRL USA Holdings, Inc.*, 214 F.3d 658, 664-65 (5th Cir. 2000) (adopting Rogers standard with proviso that infringement will still be found if likelihood of confusion is "particularly compelling"); *Rogers*, 875 F.2d at 999.

n225. The Third Circuit has expressly declined to decide whether to adopt the Rogers test. See *Facenda v. N.F.L. Films, Inc.*, 542 F.3d 1007, 1018 (3d Cir. 2008). The question remains unsettled in other circuits. See, e.g., *American Dairy Queen Corp. v. New Line Prods.*, 35 F. Supp. 2d 727, 733-35 (D. Minn. 1998) (relying on "alternative avenues" test but referring to Rogers in discussion). Circuits that have adopted the test in some contexts have not uniformly applied the rule to all First Amendment claims. Compare *Dr. Seuss Enters., L.P. v. Penguin Books USA, Inc.*, 109 F.3d 1394, 1403-06 (9th Cir. 1997) (relying on pre-Rogers cases to reject a First Amendment defense to trademark infringement regarding a book about O.J. Simpson styled after *The Cat in the Hat*), and *Tri-Star Pictures, Inc. v. Leisure Time Prods., B.V.*, 749 F. Supp. 1243, 1252-53 (S.D.N.Y. 1990) (noting that Rogers does not apply to "confusingly similar titles" and holding that Rogers does not protect film *Return from the River Kwai* from claim by producers of *Bridge on the River Kwai*), with *Anheuser-Busch, Inc. v. Balducci Publ'ns*, 28 F.3d 769, 776 (8th Cir. 1994) (holding that First Amendment does not protect use of mark in parodic context when use was likely to confuse and the "confusion [as opposed to the use of the mark] is wholly unnecessary to [the alleged infringer's] stated purpose") (emphasis added), and *Cardtoons, L.C. v. Major League Baseball Players Ass'n*, 95 F.3d 959, 970, 976 (10th Cir. 1996) (suggesting the "likelihood of confusion" test "serves to avoid First Amendment concerns" for trademark parodies by holding that the First Amendment trumps likelihood of confusion regarding parody baseball cards without applying the Rogers standard).

n226. *Rogers*, 875 F.2d at 999 ("We believe that in general the Act should be construed to apply to artistic works only where the public interest in avoiding consumer confusion outweighs the public interest in free expression."). The Second Circuit adopted the "particularly compelling" formulation in *Twin Peaks*, 996 F.2d at 1379. The Fifth Circuit, and district courts in the Ninth, have followed suit. See, e.g., *Westchester Media*, 214 F.3d at 664-65 (5th Cir. 2000); *Toho Co. v. William Morrow & Co.*, 33 F. Supp. 2d 1206, 1212-13 (C.D. Cal. 1998) (rejecting First Amendment defense based in part on holding that likelihood of confusion regarding "Godzilla" title was particularly compelling); *No Fear, Inc. v. Imagine Films, Inc.*, 930 F. Supp. 1381, 1383-84 (C.D. Cal. 1995) (adopting Rogers test, including "particularly compelling" approach).

n227. See, e.g., *Rosenblatt*, supra note 155, at 1041-42; Mark A. Lemley & Mark McKenna, *Irrelevant Confusion*, 62 *Stan. L. Rev.* 413, 441-43 (2010).

n228. See *McGeeveran*, supra note 155, at 110-11 (arguing that overlapping and ill-defined trademark fair-use exceptions have made it difficult for attorneys to provide confident trademark fair-use advice, and have tended to exacerbate risk aversion).

n229. S.L. Hurley, *Natural Reasons: Personality and Polity* 374 (1989) (a "general preference to act on more information rather than less, on known risks rather than under uncertainty, is widespread and dependable").

n230. See Mark Moller, *Procedure's Ambiguity*, 86 *Ind. L.J.* 645, 708 (2011) (defining risk aversion and uncertainty aversion); Colin

Camerer & Martin Weber, Recent Developments in Modelling Preferences: Uncertainty and Ambiguity, 5 J. Risk & Uncertainty 325, 333-34 & tbl.3 (1992) (summarizing a number of studies); see also Ming Hsu et al., Neural Systems Responding to Degrees of Uncertainty in Human Decision-Making, *holding that g* (i.e., source). *ng it. T REACH SUBSTANTIVE ARGUMENTS FROM EITHER SIDE*], 310 Sci. *holding that g* (i.e., source). *ng it. T REACH SUBSTANTIVE ARGUMENTS FROM EITHER SIDE*] 1680, 1680 (2005) (finding neurological evidence of ambiguity aversion).

n231. See, e.g., Daniel A. Farber, Uncertainty, 99 Geo. L.J. 901, 901 (2011) ("Uncertainty is particularly pernicious in situations in which catastrophic outcomes are possible, but conventional decision tools are not equipped to cope with these potentially disastrous results.").

n232. See, e.g., Ben Depoorter & Robert Kirk Walker, Copyright False Positives, 89 Notre Dame L. Rev. 319, 341 (2013) (explaining that legal uncertainty promotes overzealous claims by putative rights holders, which "take on the appearance of legitimacy in a way roughly analogous to an unauthorized tenant accruing rights through adverse possession ... [and] reduce the amount of material that is per se available for use by others for expressive purposes. This chilling effect is especially strong for forms of creative expression, such as parody, which rely on imitation and copying for their efficacy."); David Fagundes, Crystals in the Public Domain, 50 B.C. L. Rev. 139, 195 (2009) (noting that a "property-like approach to constructing boundaries around information ... may provide the best bulwark against excessive privatization of ideas and inventions," and asserting that clearer boundaries would discourage line-testing threats and overreaching); Rosenblatt, *supra* note 155, at 1041-42; James Gibson, Risk Aversion and Rights Accretion in Intellectual Property Law, 116 Yale L.J. 882, 907 (2007).

n233. This, in turn, may move the boundaries of formal law. As Depoorter & Walker explain, the existence of unnecessary licensing markets not only burdens adapters who pay, but also shortens the reach of copyright fair use based on the fair use doctrine's "market harm" factor. Depoorter & Walker, *supra* note 231, at 341.

n234. See David Welkowitz, The Virtues and Vices of Clarity in Trademark Law, 81 Tenn. L. Rev. 145, 146-48, 178-80 (noting that trademark clarity is not always preferable to flexibility, but identifying expressive uses as an instance calling for greater legal predictability).

n235. For a more extensive discussion of the relationship between uncertainty and over enforcement of copyright, see generally Depoorter & Walker, *supra* note 231; Chris Guthrie, Framing Frivolous Litigation: A Psychological Theory, 67 U. Chi. L. Rev. 163 (2000) (developing a theory of frivolous litigation based on prospect theory's prediction that defendants will be risk averse with respect to low probability losses, while plaintiffs will be risk preferring in the same context).

n236. See Depoorter & Walker, *supra* note 231, at 340-44 (discussing the tendency of copyright "false positives" to obstruct creative expression and legitimate noninfringing uses); Elizabeth L. Rosenblatt, Fear and Loathing: Shame, Shaming, and Intellectual Property, 63 DePaul L. Rev. 1 (2014) (discussing relationship between shame and intellectual property compliance).

n237. See *supra* Part I.

n238. See Depoorter & Walker, *supra* note 231, at 338 (discussing relationship between litigation cost and rent-seeking behavior by rights holders).

n239. See William McGeeveran, Four Free Speech Goals for Trademark Law, 18 Fordham Intell. Prop. Media & Ent. L.J. 1205, 1220-22 (2008) (discussing expense of defending litigation).

n240. See 17 U.S.C. § 504 (2012); *Salinger v. Colting*, 607 F.3d 68, 71-72 (2d Cir. 2010) (remanding case and noting that plaintiff would likely be eligible for an injunction upon remand). *Salinger v. Colting* ultimately resulted in a permanent injunction by consent. See Docket, *Salinger v. John Doe et al.*, 1:09-CV-05095 (S.D.N.Y. Dec. 14, 2010).

n241. See *Century 21 Real Estate Corp. v. Sandlin*, 846 F.2d 1175, 1180 (9th Cir. 1988) (noting injunction is "the remedy of choice for trademark" cases).

n242. See 17 U.S.C. § 512 (providing a safe harbor for online service providers that remove allegedly infringing material upon notice of alleged infringement); see also Complaint for Declaratory Judgment at 12-13, *Klinger v. Conan Doyle Estate, Ltd.*, 988 F. Supp. 2d 879 (N.D. Ill. 2013) (No. 1:13-cv-01226) (describing CDE's threat to have works removed from online retailers under DMCA).

n256. See *Pannonia Farms, Inc. v. USA Cable*, No. 03 Civ. 7841(NRB), 2004 WL 1276842, at 2 (S.D.N.Y. June 8, 2004); see also Itzkoff, *supra* note 4.

n257. See *Plunket v. Doyle*, No. 99 Civ. 11006(KMW), 2001 WL 175252, at 1 (S.D.N.Y. Feb. 22, 2001); see also Itzkoff, *supra* note 4.

n258. See Itzkoff, *supra* note 4.

n259. See *id.*

n260. See Affidavit of Jon Lellenberg, *supra* note 24, at 2; *Plunket*, 2001 WL 175252, at 3 (describing a contract by Dame Jean's representative granting worldwide licensing rights for use of certain Sherlock Holmes characters in a Star Trek movie).

n261. See *Plunket*, 2001 WL 175252, at 2; see also The Official Website of the Sir Arthur Conan Doyle Literary Estate, *supra* note 255.

n262. See *Pannonia Farms, Inc. v. USA Cable*, No. 03 Civ. 7841(NRB), 2004 WL 1276842, at 3 (S.D.N.Y. June 8, 2004).

n263. *Id.* at 7; see also *Pannonia Farms, Inc. v. USA Cable*, No. 03 Civ. 7841(NRB), 2004 WL 1794504, at 1, 4 (S.D.N.Y. Aug. 10, 2004); *Pannonia Farms, Inc. v. USA Cable*, 426 F.3d 650 (2d Cir. 2005) (affirming); *Pannonia Farms, Inc. v. Re/Max Int'l*, 407 F. Supp. 2d 41, 46 (D.D.C. 2005) (again sanctioning Plunket for making "objectively unreasonable" claims based on the S.D.N.Y. case). That Ms. Plunket lost

any rights as part of the 1990 settlement is consistent with a separate ruling by the Southern District of New York, which dismissed a 2001 suit directly between Ms. Plunket and the CDE for a variety of pleading deficiencies, including the fact that Ms. Plunket, as an administrator rather than owner of any rights, lacked standing to sue. See *Plunket*, 2001 WL 175252, at 5, 7.

n264. *Granada Television Int'l, Ltd. v. Lorindy Pictures Int'l, Inc.*, 606 F. Supp. 68, 73 (S.D.N.Y. 1984) (holding that New York court had no personal jurisdiction over Dame Jean Conan Doyle).

n265. See Itzkoff, *supra* note 4 (describing Ms. Plunket's claimed involvement in the movie).

n266. Applicant/Registrant's Sur-Reply in Response to Opposer/Petitioner's Motion for Oral Deposition of Justin Shulman, Conan Doyle Estate, Ltd. v. The Sherlock Holmes Memorabilia Co., U.S. Trademark Application Serial No. 77,237,410, exhibit 1 (T.T.A.B. 2009), available at <http://ttabvue.uspto.gov/ttabvue/v?qt=adv&procstatus=All&pno=91192738&pro> pno=&q=&propnameop=&propname=&pop=&pn= &pop2=&pn2=&cop=&cn=, archived at <http://perma.cc/9VUL-HA8Y> (showing a May 3, 2009 e-mail from Jon Lellenberg, agent for the CDE, describing Warner Brothers' payment for a film starring Robert Downey, Jr., and adding that Warner Brothers "just paid us some more for a Sherlock Holmes 'Tom & Jerry' cartoon they're also making").

n267. See *supra* Part I.A.3.

n268. Consider, for example, Delta for air transportation (DELTA, Registration No. 654,915) and Delta for faucets (DELTA, Registration No. 2583761) or Apple for computers (APPLE, Registration No. 1,078,312) and Apple for educational books (APPLE, Registration No. 1,221,667).

n269. See Affidavit of Jon Lellenberg, *supra* note 24, at 2. The CDE has also filed applications indicating its intent to use the word mark "Sherlock Holmes" for many classes of goods, including various types of detective fiction. See U.S. Trademark Application Serial No. 77,937,863 (filed Feb. 17, 2010) (entertainment services, including motion pictures; television dramas; stage plays; radio plays; and electronic, computer, and video games); U.S. Trademark Application Serial No. 77,937,852 (filed Feb. 17, 2010) (games, puzzles, and action figures); Application No. 77,937,845 (filed Feb. 17, 2010) (motion pictures, television films, prerecorded goods, e-books, etc. in the field of detective fiction); U.S. Trademark Application Serial No. 77,937,813 (filed Feb. 17, 2010) (printed matter in the field of detective fiction).

n270. See The Sir Arthur Conan Doyle Literary Estate - Licensing, Sherlock Holmes Online, <http://www.sherlockholmesonline.org/LicensingInfo/index.htm> (last visited Sept. 6, 2014), archived at <http://perma.cc/UA3T-KMK5> (describing Ms. Plunket as the administrator of the "Sir Arthur Conan Doyle Literary Estate," which claims trademark rights).

n271. The Memorabilia Company has filed intent-to-use applications for the word mark "Sherlock Holmes" for a number of classes of goods, including books about the character Sherlock Holmes, recordings and videos of Sherlock Holmes stories, streaming video, and entertainment services. U.S. Trademark Application Serial No. 78,461,204 (filed Aug. 3, 2004). The CDE has opposed this application in the Trademark Trial and Appeal Board. Response to Suspension Inquiry or Letter of Suspension, U.S. Trademark Application Serial No. 78,461,204.

n272. Response to Suspension Inquiry or Letter of Suspension, U.S. Trademark Application Serial No. 78,461,204. In addition, a company called Frogwares Ireland, Ltd. has successfully registered the word mark "Sherlock Holmes" for video games, although the registration has been suspended. See U.S. Trademark Application Serial No. 77,802,236 (filed Aug. 11, 2009).

n273. These include "Sherloq" (SHERLOQ, Registration No. 4,471,710; intent-to-use registration for background checks and debt recovery); "EnergySherlock" (ENERGYSHERLOCK, Registration No. 4,163,915; use-based registration for energy audits); "Sherlock's" (SHERLOCK'S, Registration No. 4,201,713; use-based registration for live music performance); "Verras Sherlock" (VERRAS SHERLOCK, Registration No. 4,376,940; intent-to-use registration for hospital management consulting); and "Sherlock Gnomes" (SHERLOCK GNOMES, Registration No. 4,545,955; 44E registration for various types of games and toys).

n274. Compare 15 U.S.C. § 1125(a) (2012) (articulating infringement standard for trademarks, whether registered or not), with 15 U.S.C. § 1114(1) (articulating infringement standard for registered trademarks).

n275. See *supra* notes 163-72 and accompanying text.

n276. See 15 U.S.C. §§ 1114(1), 1125(a) (providing for infringement liability regardless of intent or knowledge of mark).

n277. See notes 188-189 and accompanying text.

n278. See Rosenblatt, *supra* note 155, at 1042; see also *Gilliam v. Am. Broad. Co.*, 538 F.2d 14, 25 (2d Cir. 1976) ("We are doubtful that a few words could erase the indelible impression that is made by a television broadcast ... [and] a disclaimer ... would go unnoticed by viewers who tuned into the broadcast a few minutes after it began.").

n279. See *Abercrombie & Fitch Co. v. Hunting World, Inc.*, 537 F.2d 4, 9-11 (2d Cir. 1976).

n280. See, e.g., *GamerModz, LLC v. Golubev*, No. 8:10-cv-1466-T-27TGW, 2011 WL 4753535, at 4 (M.D. Fla. Oct. 7, 2011) ("Although each separate piece of evidence offered by GamerModz may, standing alone, be insufficient to establish secondary meaning, when the totality of the evidence [is examined] ... a genuine issue of material fact [existed as to secondary meaning].").

n281. See *Sony Pictures Entm't. v. Fireworks Entm't. Grp.*, 137 F. Supp. 2d 1177, 1196 (C.D.Cal. 2001) ("Plaintiffs' argument that they have a trademark in Zorro because they licensed others to use Zorro, however, is specious. It assumes that ZPI had the right to demand licenses to use Zorro at all."); *Conan Props., Inc. v. Mattel, Inc.*, 712 F. Supp. 353, 362 (S.D.N.Y. 1989) (holding that licensing that "explicitly" recognized the great value of the goodwill associated with CONAN, and acknowledged that ... the name and trademark CONAN has a substantial secondary meaning in the mind of the public" was insufficient to establish secondary meaning); *Mktg. Displays, Inc. v. Traffix Devices, Inc.*, 971 F. Supp. 262, 280 n.4 (E.D. Mich. 1997) ("This court, however, does not consider a license agreement with a third party, entered into in settlement of litigation, to be persuasive evidence of secondary meaning."); *In re Ennco Display Sys., Inc.*, 56 U.S.P.Q.2d (BNA) 1279 (T.T.A.B. 2000) (finding that the license was not evidence of secondary meaning because it was unclear "whether the parties entered into the license agreements in recognition of the acquired distinctiveness of applicant's product configurations, in view of applicant's patents on the configurations, or in order to settle litigation.").

n282. See *LeSportsac, Inc. v. K Mart Corp.*, 754 F.2d 71, 78 (2d Cir. 1985) (establishing rule that "requests from third parties to license" mark may be evidence of secondary meaning); *Bd. of Supervisors for La. State Univ. Agric. & Mech. Coll. v. Smack Apparel Co.*, 550 F.3d 465, 476-77 (5th Cir. 2008) (including licenses to third parties among considerations establishing secondary meaning for school colors); *Ricks v. BMEzine.com, LLC*, 727 F. Supp. 2d 936, 955 (D. Nev. 2010) (holding that the license to a third party constituted evidence of secondary meaning); *Maher & Maher, Inc. v. Unisonic Prods. Corp.*, 719 F. Supp. 161, 164 (S.D.N.Y. 1989) ("Agreements permitting other producers to market" products embodying claimed trade dress constituted evidence of secondary meaning in trade dress).

n283. Affidavit of Jon Lellenberg, *supra* note 24, at 2.

n284. *Id.* at 2-6 (including one that even purports to license Holmes's signature garb of deerstalker and Inverness overcoat, neither of which was created by Conan Doyle). Since some of the licenses incorporate rights to use copyrighted material, it is not clear how heavily these licenses actually rely on or reflect trademark acknowledgements of any sort, and it is equally unclear whether or not the licensees believed they needed to obtain trademark licenses. But considering the lack of copyright protection for much of the Holmes canon, one must assume that at least some of the recited licenses proceeded at least partly on a trademark theory.

n285. See *id.* According to the affidavit, one such letter went to Red Bull, which invoked Sherlock Holmes in an advertising campaign. In response to the letter Red Bull apparently suspended its campaign. *Id.* The Memorabilia Company has also recognized that it may be easier (or less expensive) to back down than to fight. It offered give the CDE a 2 percent share of its company if the CDE would permit the Memorabilia Company to operate as "the official "Sherlock Holmes' Licensor," and give up its objections to the Memorabilia Company's efforts to create and exploit "any work, film, character or merchandise" using the Sherlock Holmes characters "on the grounds of copyright, design right, trade marks, passing off, unfair competition, moral rights, rights of privacy or any similar or overlapping ground or right under the law of any other country, or on any other ground whatsoever." Reply in Further Support of Motion for Oral Deposition of Justin Shulman, Exhibit 1 at 2-3, U.S. Serial Application No. 77,237,410 (filed May 10, 2010), available at <http://ttabvue.uspto.gov/ttabvue/v?pno=91192738&pty=OPP&eno=13>, archived at <http://perma.cc/H9LB-XLBM>.

n286. See *supra* note 281.

n287. See *supra* Part II.

n288. See, e.g., Welkowitz, *supra* note 234 (identifying certain advantages to legal uncertainty, particularly in trademark context, but identifying expressive uses as an area in which greater certainty is a benefit).

n289. See McGeveran, *supra* note 239, at 1220-22 (espousing early adjudication rules to alleviate risk imbalance).

n290. See *id.*; see also *supra* Part II.

n291. For example, some scholars have asserted that trademark law does, or at least should, impose a requirement that only uses of a mark "as a trademark" may infringe. See Robert C. Denicola, Trademarks as Speech: Constitutional Implications of the Emerging Rationales for the Protection of Trade Symbols, 1982 Wis. L. Rev. 158, 178, 193-207 (2005). But see Graeme B. Dinwoodie & Mark D. Janis, Confusion Over Use: Contextualism in Trademark Law, 92 Iowa L. Rev. 1597, 1600 (2007). They suggest that expressive uses are not "trademark uses" because the mark is not being used to brand (i.e., sell) the expressive work. For several reasons, this approach is not ideal for characters in the copyright public domain. First, adapters likely do want to trade on (or at least benefit from) consumers' familiarity with the character. This sort of "free-riding" on a character's popularity may not be confusing or dilutive in a trademark sense, but it would likely lead courts toward, rather than away from, fact-intensive confusion and dilution analyses. Second, adapters likely do want to associate their work with the character as "product." That is, an adapter of Sherlock Holmes may not want readers to believe that the adaptation was created, sponsored, or approved by Sir Arthur Conan Doyle but would want readers to presume that the Holmes in the adaptation is, indeed, the same Holmes that Conan Doyle created. In that context, it is difficult to separate "use as a mark" from "use as an expressive tool."

n292. See, e.g., Irina D. Manta, *Bearing Down on Trademark Bullies*, 22 *Fordham Intell. Prop. Media & Ent. L.J.* 853, 858-62 (2012); Grinvald, *supra* note 157, at 628-29.

n293. See, e.g., McGeeveran, *supra* note 155, at 123 (discussing option of fee-shifting presumption).

n294. See Manta, *supra* note 291, at 862-65; Eric Goldman, *Why I Support HR 4364, the Proposed Federal Anti-SLAPP Bill*, *Tech. & Marketing L. Blog* (Mar. 3, 2010, 9:43 AM), http://blog.ericgoldman.org/archives/2010/03/hr_4364.htm, archived at <http://perma.cc/PE8P-VJDM>.

n295. See generally Manta, *supra* note 291, at 858-65 (discussing existing options against trademark bullying).

n296. See Grinvald, *supra* note 157, at 656-57 (discussing lack of monetary resources preventing cases from making it to court).

n297. See *supra* Part II.A.

n298. See *supra* Part I.A.1.

n299. See *supra* Part I.A.2.

n300. See *supra* Part I.A.2.

n301. See Chung, *supra* note 37, at 933-34 (noting analogy to genericity). This proposal is specifically directed at literary characters rather than visual or hybrid characters. I steer clear of visual or hybrid characters here, and in this Article more generally, not because I believe the proposal might not apply to them, but because questions of genericism and secondary meaning may be slightly more complicated for them.

Unlike a text-based character, an image of a visual character might be used as a narratively-hollow logo in addition to being used as a narrative tool, so reproducing an image of that visual character, even in the expressive context, may be slightly more likely to raise questions of source identification and consumer confusion. Thus, visual characters and hybrid characters are topics for further scholarly exploration. Also in need of further exploration are characters that begin as marks and are subsequently used in expressive ways, and characters initially introduced as marks and narrative tools simultaneously (like the Transformers or other toy/cartoon hybrids).

n302. See 15 U.S.C. § 1064(3) (2012); *Abercrombie & Fitch Co. v. Hunting World, Inc.*, 537 F.2d 4, 9-10 (2d Cir. 1976).

n303. *Abercrombie & Fitch*, 537 F.2d at 9 (citing *J. Kohnstam, Ltd. v. Louis Marx & Co.*, 280 F.2d 437, 440 (C.C.P.A. 1960)).

n304. For the same reason, this proposal has no impact on the ability of literary characters to become spokescharacters for particular brands, as the Peanuts characters have done for MetLife Insurance. See *Snoopy Usage*, MetLife, <https://www.metlife.com/brandcenter/visual/snoopy/usage.html#overview> (last visited Oct. 15, 2014) (articulating rules for using the Snoopy and PEANUTS characters in connection with MetLife products and services).

n305. See *supra* notes 201-06 and accompanying text.

n306. See *supra* notes 194-99 and accompanying text.

n307. See *Abercrombie & Fitch*, 537 F.2d at 9-10.

n308. See *Singer Mfg. Co. v. June Mfg. Co.*, 163 U.S. 169, 185 (1896); *Kellogg Co. v. Nat'l Biscuit Co.*, 305 U.S. 111, 119-20 (1938).

n309. *Singer*, 163 U.S. at 185.

n310. Kellogg, 305 U.S. at 119-20.

n311. Id.

n312. Id. at 119.

n313. The parallel doctrine of trademark functionality would accomplish the same objective of rendering secondary meaning irrelevant to protectability, and may in fact be a good match for the situation. I rely on genericity, however, not only because I believe it is a better fit, but also because it requires less doctrinal adjustment. Although courts have applied the functionality doctrine in analogous circumstances - by, for example, denying protection to packet colors as functional identifiers of sweeteners' chemical composition rather than their sources (see, e.g., *Cumberland Packing Corp. v. Monsanto Co.*, 32 F. Supp. 2d 561, 568 (E.D.N.Y. 1999)) - functionality is more commonly associated with the functional features of product configurations and industrial designs than with character or word marks. In fact, "signaling" is an odd type of "function" to characterize as functional, since all valid trademarks function as signals of something (i.e., source). For that reason, courts might have done better to characterize sweetener packet colors as generic rather than functional. But that is a discussion for another article.

n314. See, e.g., Kellogg, 305 U.S. at 121 ("It is urged that all possibility of deception or confusion would be removed if Kellogg Company should refrain from using the name 'Shredded Wheat' and adopt some form other than the pillow-shape. But the name and form are integral parts of the goodwill of the article" which all are entitled to share).

n315. *Soc'y of Fin. Exam'rs v. Nat'l Ass'n of Certified Fraud Exam'rs*, 41 F.3d 223, 225 (5th Cir. 1995); see also, e.g., *Boston Duck Tours, LP v. Super Duck Tours, LLC*, 531 F.3d 1, 21 (1st Cir. 2008) (holding that trademark law is "not intended to prevent" confusion regarding competitors' use of generic terms); *Miller Brewing Co. v. Joseph Schlitz Brewing Co.*, 605 F.2d 990, 997 (7th Cir. 1979) (holding that use of a generic term cannot give rise to an unfair competition claim, even if some confusion had resulted and/or people had come to associate the term with the plaintiff).

n316. *King-Seeley Thermos Co. v. Aladdin Indus., Inc.*, 418 F.2d 31, 36 (2d Cir. 1969) (citing *Am. Thermos Prods. Co. v. Aladdin Indus., Inc.*, 207 F. Supp. 9, 27 (D. Conn. 1962)).

n317. See id. (holding that the lower-case term "thermos" had become generic); *Bayer Co. v. United Drug Co.*, 272 F. 505, 515-16 (S.D.N.Y. 1921) (holding that the term "aspirin" had become generic); *DuPont Cellophane Co. v. Waxed Prods. Co.*, 85 F.2d 75, 82 (2d Cir. 1936) (holding that the term "cellophane" had become generic); 15 U.S.C. § 1064(3) (2012).

n318. See, e.g., *King-Seeley*, 418 F.2d at 36 (recognizing possibility of confusion among "minority of consumers who know, recognize and use 'thermos' as a trade-mark").

n319. See, e.g., *KP Permanent Make-Up, Inc. v. Lasting Impression I, Inc.*, 543 U.S. 111, 121-22 (2004) (explaining that "some possibility of consumer confusion is compatible with fair use" to avoid "the undesirability of allowing anyone to obtain a complete monopoly on use of a descriptive term simply by grabbing it first"); *Rogers v. Grimaldi*, 875 F.2d 994, 999 (2d Cir. 1989).

n320. *Rogers*, 875 F.2d at 999.

ENNIS INC.

v.

JOEL L. BELING d/b/a
SUPA CHARACTERS PTY LTD

TELEPHONIC ORAL DEPOSITION OF

STEVEN KENNETH OSTERLOH, JR.

JANUARY 13, 2014

VOLUME 1 OF 1

TELEPHONIC ORAL DEPOSITION OF STEVEN KENNETH
OSTERLOH, JR., produced as a witness duly sworn by me at
the instance of the Applicant, was taken in the above
styled and numbered cause on JANUARY 13, 2014, from 1:11
PM to 2:58 PM, before Beth Howard, CSR in and for the
State of Texas, reported by Machine Shorthand, at
Continental Court Reporters, Inc., 1412 Main Street,
Suite 900, Dallas, Texas, pursuant to the Federal Rules
of Civil Procedure, Notice of Deposition, Protective
Order, and the provisions stated on the record or
attached hereto.

CONTINENTAL COURT REPORTERS, INC.
(214) 742-4949

13:16:03 1 attempt to obtain a registration for a trademark?

13:16:05 2 A. Yes.

13:16:07 3 Q. Okay. Ennis has acted with complete honesty in
13:16:29 4 all its filings with the USPTO, including the Trademark
13:16:35 5 Trial and Appeal Board, correct?

13:16:38 6 MR. CHALKER: Object to the question as
13:16:39 7 leading. Go ahead and answer.

13:16:45 8 A. Yes.

13:16:46 9 Q. (BY MR. BELING) Okay. Would you agree that
13:16:54 10 Ennis claims express trademark rights to portions of its
13:16:59 11 COLORWORX mark?

13:17:01 12 MR. CHALKER: Object to the question as
13:17:02 13 leading. Go ahead and answer.

13:17:05 14 A. Yes.

13:17:05 15 Q. (BY MR. BELING) Okay. What -- what aspects of
13:17:11 16 Ennis's COLORWORX mark does Ennis claim rights to?

13:17:19 17 A. The printing services aspect.

13:17:22 18 Q. Okay. But in terms of the actual mark, that
13:17:26 19 is, the term "COLORWORX" and the design elements,
13:17:32 20 what -- what aspects of -- of those two portions does
13:17:37 21 Ennis claim rights to?

13:17:40 22 A. The words "COLORWORX" and the design mark that
13:17:45 23 we've submitted and use in commerce.

13:17:48 24 Q. Okay. And what, if any, rights or claims
13:17:55 25 regarding the two distinct portions of the mark? Do

13:18:01 1 you -- do you claim the rights to each portion
13:18:06 2 separately, or how -- how would you characterize your
13:18:09 3 claims to the rights in the mark?

13:18:12 4 MR. CHALKER: Object to the question as
13:18:13 5 it's irrelevant, in that the trademark is the mark in
13:18:19 6 its entirety. Go ahead and answer.

13:18:24 7 MR. BELING: Okay.

13:18:24 8 THE WITNESS: Could you repeat that,
13:18:25 9 please?

13:18:26 10 MR. BELING: Yes.

13:18:27 11 THE WITNESS: No, I apologize.

13:18:32 12 MR. BELING: Sorry. What was that,
13:18:32 13 Mr. Chalker?

13:18:35 14 THE WITNESS: I asked the court reporter to
13:18:35 15 repeat the question, please.

13:18:35 16 MR. BELING: Okay. Will she repeat it or
13:18:35 17 do you want me to say it?

13:18:59 18 THE REPORTER: Just a moment, please.

13:18:59 19 (RECORD READ BY THE REPORTER.)

13:18:59 20 A. I believe, if I'm -- I'd have to go back and
13:19:02 21 check, but I believe that we have the rights to the
13:19:05 22 word, as well as the design mark. So we claim them
13:19:09 23 independently, yes.

13:19:11 24 Q. (BY MR. BELING) Okay.

13:19:13 25 A. But that's my recollection.

13:19:16 1 Q. Okay. So you're not claiming -- like, you are
13:19:20 2 claiming, obviously, rights to the mark as a whole, but
13:19:23 3 you are also claiming rights to the two distinct
13:19:27 4 portions?

13:19:29 5 A. I -- We claim the rights to the word,
13:19:33 6 "COLORWORX," all one word, as well as to the design mark
13:19:39 7 itself. Separately, yes.

13:19:41 8 Q. Separately. Okay. Thank you. Did Ennis
13:19:44 9 create its COLORWORX mark from scratch?

14:15:27 1 the COLORWORX mark?

14:15:27 2 MR. CHALKER: I believe he -- Objection. I
14:15:30 3 believe he's already answered that.

14:15:47 4 MR. BELING: If you'll bear with me for
14:15:51 5 just a moment. We're on to Exhibit 6, which hasn't
14:15:55 6 arrived yet, so I'm just going to have to ad lib my
14:15:59 7 questions.

14:16:08 8 Q. (BY MR. BELING) Mr. Osterloh, have you been
14:16:10 9 shown any of my discovery production from the 8th or 9th
14:16:16 10 of January by Mr. Chalker?

14:16:20 11 A. I don't recall specifically seeing anything
14:16:23 12 from the 8th or 9th. Have my -- has my counsel
14:16:28 13 submitted everything to me over the period of this
14:16:33 14 process? Yes, they have. Do I recall that one
14:16:36 15 specifically? No, I do not.

14:16:39 16 Q. I'll put it to you in more detail, so it may
14:16:44 17 jog your memory. Exhibit 6 is a printout of the website
14:16:50 18 colorworksnyc.com, and Colorworks is spelled with a K-S
14:17:00 19 and it's one word. And it's a printing and retouching
14:17:04 20 business, run by Joe Barna, B-A-R-N-A.

14:17:12 21 Do you recall reading any documents
14:17:14 22 pertaining to that website?

14:17:16 23 MR. CHALKER: I object to the question, as
14:17:17 24 the exhibit is not before Mr. Osterloh, so he can't
14:17:20 25 testify as to what that document may or may not contain.

14:17:28 1 MR. BELING: I was asking about his
14:17:29 2 memory of whether he's seen it in the past, not whether
14:17:33 3 he has it now.

14:17:34 4 A. Again, my attorneys have sent all these
14:17:37 5 documents to me. So have I received it? I would say
14:17:40 6 yes. Do I recall that specific document? No, I do not.

14:17:44 7 Q. (BY MR. BELING) Okay. Do you have any evidence
14:17:52 8 to contradict or dispute the fact that Joe Barna has
14:17:59 9 over 30 years' experience in photography and printing
14:18:06 10 using the name Colorworks with a K-S?

14:18:10 11 MR. CHALKER: Object to the question, as
14:18:11 12 it's irrelevant, in that whoever that is has no relation
14:18:15 13 to the -- this proceeding.

14:18:20 14 A. No, I'm not familiar with Mr. Barna or his
14:18:25 15 history.

14:18:26 16 MR. BELING: It's -- it's relevant to the
14:18:27 17 creation of the COLORWORX mark.

14:18:32 18 MR. CHALKER: I disagree, in that
14:18:33 19 Mr. Osterloh has already testified as to the creation of
14:18:36 20 the -- the mark.

14:18:40 21 MR. BELING: And I'm putting contrasting
14:18:42 22 versions to the witness to ascertain his response.

14:18:51 23 Q. (BY MR. BELING) Mr. Osterloh, do you have any
14:18:53 24 evidence to dispute the fact that the Colorworks New
14:18:59 25 York City company offers for sale services, including

14:19:05 1 prints, postcards, and business cards?

14:19:07 2 MR. CHALKER: Object to the question, as
14:19:09 3 it's irrelevant and outside the scope of this proceeding
14:19:14 4 or the Notice of Deposition.

14:19:15 5 A. Again, without looking at those documents, I --
14:19:17 6 I can't say that that is fact. I'm not aware of it.
14:19:21 7 Don't recall.

14:19:22 8 Q. (BY MR. BELING) Okay. All these documents were
14:19:30 9 produced to Mr. Chalker, your legal counsel, so -- and
14:19:35 10 you've given evidence that he's provided you with those
14:19:39 11 documents. So I'm just asking about your memory because
14:19:42 12 of the -- the technical difficulties we have in
14:19:44 13 obtaining the exhibits.

14:19:46 14 MR. CHALKER: I believe that he's testified
14:19:47 15 that he does not remember specifics about those
14:19:50 16 documents.

14:19:57 17 Q. (BY MR. BELING) I'll move on to Exhibit 7,
14:20:00 18 which is printouts from the website colorworx.ca, and
14:20:06 19 the Colorworx is spelled W-O-R-X, which I've served on
14:20:11 20 Mr. Chalker, and the printouts are made on the 7th of
14:20:15 21 January, 2014.

14:20:17 22 Mr. Osterloh, do you have any knowledge
14:20:18 23 about a Canadian company called Colorworx selling
14:20:23 24 printing services, including business cards, flyers,
14:20:29 25 envelopes, and posters?

14:20:31 1 MR. CHALKER: Object to the question, as
14:20:33 2 the exhibit is not before Mr. Osterloh; and also object
14:20:36 3 that it's not relevant to this proceeding and that it
14:20:40 4 falls outside the scope of the discovery notice.

14:20:44 5 A. Was that previously supplied or just supplied
14:20:48 6 as an exhibit?

14:20:49 7 Q. (BY MR. BELING) It was -- the document was
14:20:51 8 served on Mr. Chalker on the 8th or 9th of January 2014,
14:20:57 9 and you have given evidence that you've received all
14:21:02 10 those documents.

14:21:03 11 A. Yes, that is correct. No, but I do not recall
14:21:06 12 reviewing or have recollection of that document.

14:21:09 13 Q. Okay. From your general knowledge as
14:21:15 14 Vice President of Marketing, are you aware that there is
14:21:19 15 a Canadian company called Colorworx, with Colorworx
14:21:24 16 spelled as a single word with R-X, also offering
14:21:28 17 printing services, including business cards, flyers,
14:21:32 18 envelopes and posters, on-line --

14:21:35 19 A. No.

14:21:36 20 Q. -- to other countries, including the
14:21:37 21 United States?

14:21:38 22 A. No, I was not.

14:21:42 23 Q. Okay. Are you aware that Mr. Shawn Barrett, a
14:21:49 24 Canadian citizen, is CEO of Colorworx and that he has
14:21:56 25 owned the COLORWORX brand for 13 years?

14:21:59 1 MR. CHALKER: I object to this line of
14:22:01 2 questioning, as that it's outside the Notice of
14:22:03 3 Deposition and irrelevant.

14:22:04 4 A. No, I have already stated I -- I don't know
14:22:06 5 this company and have no knowledge of it or this Mr.
14:22:10 6 Shawn -- I don't recall his last name. -- that's the CEO
14:22:13 7 of it.

14:22:14 8 Q. (BY MR. BELING) Shawn Barrett.

14:22:16 9 A. No, I have no knowledge of him.

14:22:18 10 Q. Okay. I'll move on to Exhibit 8. And
14:22:31 11 Exhibit 8, which I've served on Mr. Chalker, contains
14:22:36 12 printouts which are made from the website
14:22:39 13 colorworksinc -- That Colorworks is spelled
14:22:42 14 W-O-R-K-S. -- inc.com, and the printout was on the 7th
14:22:50 15 of January.

14:22:53 16 And my question to you, Mr. Osterloh, is:
14:22:57 17 Are you aware of a company called Colorworks, that's
14:23:00 18 R-K-S, Graphics Services, Inc., which offers offset
14:23:07 19 printing, digital printing, and large-format display
14:23:11 20 printing?

14:23:12 21 MR. CHALKER: Object to the question as the
14:23:14 22 exhibit is not before Mr. Osterloh, the line of
14:23:16 23 questioning is irrelevant and out of the scope of the
14:23:20 24 Notice of Deposition.

14:23:22 25 A. No, I do not.

14:23:30 1 Q. (BY MR. BELING) But you've --

14:23:30 2 A. Again -- I apologize. To the best of my
14:23:32 3 recollection, no, I do not.

14:23:34 4 Q. Okay. But you've stated previously you were
14:23:37 5 served with all those -- my discovery production by
14:23:41 6 Mr. Chalker, but you may not have perused it; is that
14:23:45 7 correct?

14:23:45 8 A. No, I didn't say I didn't peruse it. I have
14:23:50 9 been given all those documents. As you can understand,
14:23:54 10 over this couple of year period, there's been hundreds
14:23:57 11 of pages. I don't recall each and every page that I've
14:24:00 12 read, and some of them have been read multiple times. I
14:24:04 13 do not recall this, though. No, I do not.

14:24:07 14 Q. Okay. If I was to say to you that there are
14:24:10 15 some pages out of "The Colorworks Story," and that this
14:24:16 16 particular company created the term "Colorworks" in the
14:24:19 17 early 1990s, would that jog your memory?

14:24:23 18 MR. CHALKER: Object to --

14:24:24 19 A. No, it would not.

14:24:26 20 MR. CHALKER: I object to the question, as
14:24:28 21 it is irrelevant and outside the scope of the Deposition
14:24:32 22 Notice, and Mr. Osterloh has testified that he does not
14:24:38 23 have knowledge about -- or recall specific things about
14:24:41 24 the documents that you have produced.

14:24:47 25 Q. (By MR. BELING) Mr. Osterloh?

14:24:53 1 A. No, I have not.

14:25:01 2 Q. I'll move on to Exhibit 9, which I've also
14:25:06 3 served on Mr. Chalker around the 8th or 9th of January,
14:25:10 4 2014. And Exhibit 9 is printouts which I made from the
14:25:14 5 website ilovetocreate.com.

14:25:19 6 And Mr. Osterloh, do you have any knowledge
14:25:22 7 about a company called I Love to Create, which is
14:25:28 8 selling services related to printed lesson plans and
14:25:36 9 classroom art projects under the term "Colorworks,"
14:25:40 10 "Colorworks" being spelled with a W-O-R-K-S?

14:25:45 11 MR. CHALKER: Object to the question, as
14:25:46 12 the exhibit is not before Mr. Osterloh. Objection to
14:25:49 13 the line of questioning, as it's outside the Notice of
14:25:52 14 Deposition, and it is irrelevant to the proceedings.

14:25:55 15 A. No, I do not have any recollection of that
14:25:58 16 company.

14:26:00 17 Q. (BY MR. BELING) Okay. Moving on to Exhibit 10,
14:26:09 18 which is printouts from the website folders4success.com,
14:26:15 19 on the 7th of January, 2014, which I've served on
14:26:19 20 Mr. Chalker on the 8th or 9th of January, 2014. And
14:26:25 21 this printout shows the term "ColorWorks," with a
14:26:32 22 W-O-R-K-S, being sold by Debbie Carney, who runs a
14:26:42 23 business called New Order Organizers.

14:26:46 24 Mr. Osterloh, are you aware of that
14:26:49 25 business run by Ms. Carney, New Order Organizers?

14:26:53 1 MR. CHALKER: Object to the exhibit, as
14:26:55 2 it's not before Mr. Osterloh. Object to the question,
14:26:59 3 in that it's outside the Notice of Deposition, and also
14:27:03 4 irrelevant to this proceeding.

14:27:06 5 A. I am not.

14:27:15 6 Q. (BY MR. BELING) Mr. Osterloh, are you aware of
14:27:18 7 your -- any obligation or practice to read any exhibits
14:27:22 8 or documents in production relating to the topics listed
14:27:27 9 in the Notice of Deposition prior to arriving today?

14:27:32 10 THE WITNESS: Could you repeat that
14:27:33 11 question, please, ma'am?

14:27:50 12 (RECORD READ BY THE REPORTER.)

14:27:50 13 A. Was I given notice that I needed to read and
14:27:53 14 study? No, I was not. Did I review the documents?
14:27:58 15 Yes, I did. Did I review all hundreds and hundreds of
14:28:04 16 pages? No, I did not. I primarily reviewed the
14:28:07 17 documents that we've submitted over the last few days
14:28:10 18 and over the weekend that we supplied. That was my
14:28:14 19 understanding that the questions would be surrounding
14:28:16 20 those specific topics. You're asking me about topics
14:28:20 21 that I was not expecting to answer.

14:28:23 22 Q. (BY MR. BELING) I'm asking about topics in
14:28:25 23 relation to the creation of the COLORWORX mark.

14:28:28 24 A. Understood.

14:28:29 25 MR. CHALKER: But Mr. Beling, it's our

14:30:15 1 and services, such as business cards, brochures,
14:30:19 2 envelopes and calendars?

14:30:20 3 MR. CHALKER: Object to the question --
14:30:21 4 Well, first object to the exhibit, as it is not before
14:30:25 5 Mr. Osterloh. Object to the question, as it is outside
14:30:29 6 the scope of the Notice of Deposition and irrelevant.

14:30:33 7 A. No, I do not recall it.

14:30:44 8 Q. (BY MR. BELING) Mr. Osterloh, how would you
14:30:46 9 describe the design portion of Ennis's COLORWORX mark?

14:30:53 10 A. I would design (sic) it as the four primary
14:30:57 11 colors that are used to -- or that, I'm sorry, that are
14:31:00 12 used in the process known as four-color process
14:31:04 13 printing, and surrounded -- I'm sorry, surrounding a
14:31:10 14 cross hair. I believe it's in a circle.

**REGISTRANT'S RESPONSE TO PETITIONER'S MOTION FOR LEAVE TO EXCEED
THE PAGE LIMIT IN ITS RESPONSE TO MOTION TO DISMISS**

COMES NOW, Registrant, Ennis, Inc. (“Registrant”), by and through its undersigned counsel and hereby files this Response to Petitioner’s Motion for Leave to Exceed the Page Limit in its Response to Registrant’s Motion to Dismiss Petitioner’s Second Amended Petition to Cancel and would respectfully show the Board as follows:

1. Following the filing of Registrant’s Motion to Dismiss Petitioner’s Second Amended Petition to Cancel [Doc. #19], Petitioner filed his Response to Petitioner’s Motion to Dismiss [Doc. #12-Cancellation] (hereinafter, the “Response”) contemporaneously with his Motion for Leave to Exceed Page Limit for his Response [Doc #12-Cancellation] (hereinafter, the “Motion for Leave”). Notably, Registrant failed to adhere to proper TTAB and Board protocol which requires seeking prior leave of court and conferring with Registrant’s counsel prior to filing such Motion for Leave.

2. Notwithstanding the Board’s admonitions and directives in its Orders, Petitioner’s Motion for Leave should be denied because: (i) the Motion for Leave violates the Board’s Orders and applicable Trademark Rules, and (ii) no good cause exists to allow Petitioner to file his Response at more than **double** the length of Registrant’s Motion to Dismiss.

I. PETITIONER’S MOTION FOR LEAVE VIOLATES THIS BOARD’S ORDER AND APPLICABLE TRADEMARK RULES

A. Petitioner Did Not Conference with Registrant’s Counsel Prior to Filing his Motion for Leave

3. Registrant hereby incorporates the argument contained in paragraph 4 of Registrant’s Reply in Support of Motion to Dismiss. *See* [Doc. #21].

B. Petitioner Ignores the Board’s Order to File his Motion with the Parent Case

4. Registrant hereby incorporates the argument contained in paragraph 5 of Registrant’s Reply in Support of Motion to Dismiss. *See* [Doc. #21].

II. NO GOOD CAUSE EXISTS TO ALLOW LEAVE TO EXCEED THE PAGE LIMIT

5. Registrant hereby incorporates the argument contained in paragraphs 6 and 7 of Registrant's Reply in Support of Motion to Dismiss. *See* [Doc. #21].

6. Registrant further submits that by granting Petitioner's Motion for Leave, the Board would contravene the very reason why TTAB generally discourages such motions. *See* 37 C.F.R. § 2.128(b). As seen in Petitioner's 55-page Response to Ennis' Motion to Dismiss, rather than *respond* to the contents of Registrant's Motion to Dismiss, Petitioner incessantly expounds upon arguments previously asserted in Petitioner's Second Amended Petition to Cancel and proffers arguments completely outside the scope of Registrant's Motion to Dismiss.

7. Registrant further submits that with respect to all motions and briefs, Registrant has complied with TTAB page limits and the Board's Orders required the designated page limitations be maintained. Regardless of its claims, Registrant was able to draft its Motion to Dismiss in compliance with requirements contained within TTAB Rules and Board Orders. Registrant sees no valid reason why Petitioner should not be expected to do the same.

8. Furthermore, Petitioner's claim that it is necessary to "exceed the page limit by 20 [sic] pages by reason of the egregious nature of Registrant's and Registrant's legal counsel's fraudulent conduct as particularized in Petitioner's Second Amended Petition to Cancel" is without merit and completely unfounded. *See* [Doc. #12-Cancellation, ¶3]. Nothing contained within Fed.R.Civ.P. 9(b) permits the extension of page limits for responses to motions to dismiss, nor does the conclusory label that the claims are "particularized" warrant additional pages be granted in the Response. Petitioner had ample opportunity to place all of his "particularized" allegations in his Second Amended Petition to Cancel, which is obvious given its 145-page length.

9. Although TTAB Rules occasionally permit over-length responses on the basis of reasonableness of the request in light of relevant fact, circumstances, and complexity of the issues, *see* TTAB Rule 537, nothing asserted in Petitioner's Response or other pleadings or motions provides a reasonable justification for granting his Motion for Leave. Instead, Petitioner presumptuously assumes that the Board will grant his Motion for Leave, again leaving Registrant and its counsel with an over-length, verbose, and incoherent brief to which it must attempt to intelligibly and completely respond—all while doing so within its own strict 10-page limitation.

PRAYER

WHEREFORE, PREMISES CONSIDERED, Registrant prays that the Board deny Registrant's Motion for Leave to Exceed the Page Limit in its Response to Registrant's Motion to Dismiss, and that Registrant be awarded all other relief to which it is entitled, both at law and in equity

Dated: September 14, 2012

v.

Ennis, Inc.

APPLICANT'S MOTION TO COMPEL DISCOVERY RESPONSES

To: Ennis Inc. ("Opposer"), 2441 Presidential Parkway, Midlothian, TX 76065, U.S.
Joel L. Beling d/b/a Supa Characters Pty Ltd ("applicant" or "petitioner") serves this Motion to Compel Discovery on Ennis Inc ("opposer" or "registrant") pursuant to Federal Rule of Civil Procedure 37 and Trademark Rule 2.120(e), 37 C.F.R. § 2.120(d).

On 10 May 2012, Applicant served Opposer with its First Request for Production and First Set of Interrogatories. Apart from some product samples featuring the COLORWORX mark, Opposer has flagrantly refused to comply with Applicant's Discovery requests (see Exhibits 1-29) and still refuses to comply. As at the date of this filing of this Motion to Compel, more than one year has elapsed, significantly prejudicing Applicant's right to a fair trial. In order to prepare for trial, applicant must have the cooperation of opposer as discovery is pursued. Opposer's cooperation is especially paramount to applicant because applicant is not a resident of the United States and, being a foreign resident residing in Australia, applicant has no access whatsoever, to any of the materials in the possession, custody and control of opposer. Applicant

has complied fully with his Discovery obligations whereas opposer has defiantly flaunted its Discovery obligations.

In general, opposer has offered the same identically-phrased, boilerplate objection for all of the Interrogatories and Requests it refused and failed to answer, that is, that “Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.” Applicant submits that this objection is in bad faith because it fails to particularize a single, relevant objection. Put simply, if Opposer had a bona fide objection to a particular Interrogatory or Request, it would have stated it in plain terms, without offering a blanket multi-faceted objection which in most cases has two or more of the four objections taken as irrelevant and inappropriate. Additionally, Applicant submits that Fed. R. Civ. P. 26(b)(1) provides for broad discovery. It is respectfully submitted that all of Applicant’s Discovery Requests and questions are relevant, proper, fair, probative and narrowly tailored. Finally, pursuant to TBMP §412.01 and the cases cited thereunder, opposer cannot object to complying with applicant’s discovery requests because it propounded the same requests on applicant. *See* Exhibits 28 and 29.

**MOTION TO COMPEL OPPOSER TO ANSWER INTERROGATORIES AND,
WHERE RELEVANT, PRODUCE DOCUMENTS**

For the following reasons, opposer has failed and indeed blatantly failed or refused to answer each and every one of the 19 interrogatories served on it and has provided satisfactory answers and/or produced documents to only eight of the 43 Requests for Production propounded by applicant. Fed. R. Civ. P. 37(a)(3) makes clear that an evasive or incomplete answer is to be considered, for purposes of subdivision (a), a failure to answer.

INTERROGATORY NO. 1: Specify the date and describe the details of Opposer’s first use of the “COLORWORX” mark on any works of color, including but not limited to business cards, letterhead, rack cards, postcards, brochures, and posters and identifying all persons involved and all materials referring or relating to the usage.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer has continuously used the COLORWORX mark in

interstate commerce as a trademark for a variety of printing goods and printing services, including but not limited to, business cards, letterhead, sell sheets, rack cards, postcards, brochures and posters since August of 2002. Opposer refers Applicant to Opposer's document production produced on May 24, 2012 showing various other items Opposer uses its COLORWORX mark on including, but not limited to, various advertising tools and promotional items, financial tools and promotional items, financial tools, hospitality products, award products and business products.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NO. 1 is relevant to this proceeding because it pertains to Opposer's use of the COLORWORX registration in commerce and the time of that use. While Opposer has stated that the documents produced on May 24, 2012 were used since August 2002, there is absolutely no breakdown or itemization of the date of use for each particular sample. Theoretically, this means that Opposer could have produced one sample in August 2002 and produced the rest of the samples in January 2011, thereby sustaining a fraud allegation that the COLORWORX mark and design, contrary to opposer's declaration to the USPTO in order to procure its registration, was not used in commerce at the time it applied for its registration.

The temporality of each use of Opposer's mark is also critical in determining the reputation and popularity of the COLORWORX mark in commerce, since, as Opposer alleges in its *Notice of Opposition*, "Opposer has established an outstanding reputation as to the quality of its products sold under the COLORWORX Mark" and "[b]y virtue of its sales of high-quality products bearing Opposer's Mark in interstate commerce, its expenditures of considerable sums for promotional activities and the excellence of its products, Opposer has developed significant goodwill in its Mark and a valuable reputation." Doc. #1, at 6.

In addition, in applicant/petitioner's petition to cancel the COLORWORX registration, opposer/registrant offered the following alleged Affirmative Defenses (hereinafter "Ennis' Affirmative Defenses"):

AFFIRMATIVE DEFENSES

30. Petitioner has not and will not be damaged by the mark COLORWORX and therefore lacks standing to petition for the cancellation of the registration at issue in this action.

31. Petitioner's Petition to Cancel fails to state any claim upon which relief may be granted.

32. Petitioner is barred from seeking cancellation of Registrant's mark COLORWORX under the doctrines of laches, estoppel and waiver.

33. *Through Registrant's long, substantial and widespread use, advertising and promotion in support of its mark COLORWORX, said mark has acquired a strong secondary meaning identifying the services provided by Registrant.*

34. *Petitioner has failed to state specifically and cannot state specifically any actual damages by virtue of Registrant's continued registration of its mark COLORWORX.*

35. *Petitioner has unclean hands and proceeds in bad faith because Petitioner is attempting to appropriate the goodwill of Registrant's mark COLORWORX* (emphasis added). Doc. #20, at 11.

In this document, opposer refers to its "long, substantial and widespread use, advertising and promotion in support of its mark, and the mark's "strong secondary meaning" and "goodwill." Moreover, the Interrogatory asks Opposer to "identify all persons involved" in Opposer's first use of the "COLORWORX" mark in commerce. Opposer refused to identify *any* person involved in the first use of the COLORWORX mark in commerce. The question is not overbroad and harassing because the COLORWORX brand was first offered for sale by Admore, a small subsidiary of Opposer, in 2002. In its 2003 Annual Report, Opposer states that the COLORWORX brand was designed by Admore to "serve the short run color needs of [Opposer's] distributors." See Exhibit 1, of applicant's Declaration, *infra*. In this action opposer has blatantly refused and failed to disclose *any* information about its company save and except for product samples bearing the COLORWORX mark and the Interrogatory's focus on identifying all persons involved in the first use of the COLORWORX mark is narrowly tailored, highly relevant and very specific.

INTERROGATORY NO. 2: Describe in detail the process, procedure, facts, material and information you use for each of the works of color offered for sale by you, including but not limited to business cards, letterhead, rack cards, postcards, brochures, and posters, from the point at which a customer first contacts you to the point at which your customer is satisfied, including any system, process or procedure for satisfying dissatisfied customers.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NO. 2 is relevant to the proceeding because Opposer has based its entire Opposition on the continuous use in interstate commerce of the mark COLORWORX “as a trademark for a variety of printing goods and printing services including, but not limited to, business cards, letterhead, rack cards, postcards, brochures, and posters (‘Opposer’s Goods’).” Doc #1, at 6. In addition, in Ennis’ Affirmative Defenses, Ennis refers to its “long, substantial and widespread use, advertising and promotion in support of its mark, and the mark’s “strong secondary meaning” and “goodwill.”

Opposer’s objections that the interrogatory is overbroad and harassing are invalid because Opposer itself identifies these products as “Opposer’s Goods” and there are only *six* goods identified, not ten or more. The interrogatory refers to these goods as “works of color,” a central issue in petitioner’s genericness and descriptiveness cancellation claims because Opposer’s Goods are in fact works of color. Moreover, Opposer claims its COLORWORX mark is “highly distinctive” and is “closely identified with Opposer’s Goods”. Doc. #1, at 6. Information about how each of Opposer’s six goods is manufactured is critical to ascertaining the extent of customer involvement in the use and choice of color in the printing process, since opposer itself advertises its printed goods as “economical four color process printing” and its printing process as a “gang run” commercial printing style. *See* ColorWorx website, Exhibit 1 of applicant’s Declaration, *infra*. Ascertaining who chooses the color of the goods and services (the customer or Ennis Inc), which colors are available, and at which stage of the printing process is highly relevant to the question of whether color is a descriptive and/or generic part of opposer’s printing business. The question is not overbroad because it can be answered in five or ten bullet points for each of Opposer’s Goods (e.g. customers brings in sample, sample is uploaded to a central computer system, etc).

INTERROGATORY NO. 3: Identify and describe in detail each possible color

choice, including black and white, you currently offer or have offered to your customers for each work of color you sell, advertise, promote or distribute, including but not limited to business cards, letterhead, rack cards, postcards, brochures, and posters.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 27: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 3 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NO. 3 and REQUEST TO PRODUCE NO.27 are relevant to this proceeding because Opposer's very business is printing goods and printing services. Its very business is producing printed works of color such as business cards, letterhead, rack cards, postcards, brochures, and posters. It has filed a Notice of Opposition based on the reputation, sales, advertising expenditure and reputation connected to the COLORWORX Mark and design, and confirmed these claims in its affirmative defenses to the cancellation petition. Doc #1, at 6; Doc #20, at 11.

The very trademark registration allegedly being confused, mistaken, deceived and/or diluted in this action bears the name COLORWORX. Therefore, it is obvious to any reasonable observer that color and the use of color are fair, reasonable and open subjects for investigation. Indeed, opposer's own advertising material for the COLORWORX brand self-markets as "economical, four color process printing." It is highly relevant, therefore, to inquire as to which four colors are being used, whether there are more than four colors being used in Opposer's printing business, and, if so, of which colors these consist. It is respectfully submitted that Opposer simply refused to answer the question because it would lead to evidence that the term COLORWORX is generic and/or descriptive and therefore ought to be cancelled as a registered trademark.

INTERROGATORY NO. 4: Define in detail your understanding of the phrases "color works" and "works of color."

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NO. 4 is relevant to this proceeding because, to state the strikingly obvious, Opposer's COLORWORX registration is the subject matter of the action and the name of Opposer's printing business. Answering questions about Opposer's understanding of the phrases "color works" and "works of color," which are the common understandings of the compound word COLORWORX, goes to the heart of the action. It simply defies logic to object to a question on the basis of ostensible irrelevancy, overbreadth, harassment and being not reasonably calculated to lead to the discovery of evidence admissible at trial. Opposer's refusal to answer questions about its understanding of the name of its own brand is simply ridiculous and the height of dishonesty.

INTERROGATORY NO. 5: Identify the media in or through which Opposer advertises or promotes its works of color, including but not limited to business cards, letterhead, rack cards, postcards, brochures, and posters, under or with the "COLORWORX" mark.

ANSWER: Opposer objects to this Interrogatory as it is irrelevant, harassing, and not reasonably calculated to lead to the discovery of evidence admissible at trial. Subject to, and without waiving, the foregoing objections, Opposer answers as follows: Opposer has continuously used the COLORWORX mark in interstate commerce as a trademark for a variety of printing goods and printing services, including but not limited to, business cards, letterhead, sell sheets, rack cards, postcards, brochures and posters since August of 2002. Opposer refers Applicant to Opposer's document production produced on May 24, 2012 showing various other items Opposer uses its COLORWORX mark on including, but not limited to, various advertising tools and promotional items, financial tools and promotional items, financial tools, hospitality products, award products and business products.

REQUEST TO PRODUCE NO. 28: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 5 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, and requires Opposer to marshal its evidence prior to trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Notice of Opposition and Opposer's document production produced on May 24, 2012.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NO. 5 and REQUEST TO PRODUCE NO. 28 are relevant to this proceeding because the media in or through which Opposer advertises or promotes its works of color will determine the nature and extent of the reputation and good will of the COLORWORX brand. Opposer filed a Notice of Opposition based on its use, sales, reputation, goodwill, and advertising expenditure under its

COLORWORX mark and design. Doc #1, at 6. Opposer's answer is evasive, non-responsive, and incomplete because it fails to identify the *media* in or through which Opposer advertises or promotes its goods. Rather, it simply lists the *date from which* Opposer's goods were sold and lists some *examples* of the type of goods sold. Furthermore, the interrogatory is not harassing because opposer propounded the same Interrogatory of applicant in Opposer's First Set of Interrogatories to Applicant. TBMP §412.01.

INTERROGATORY NO. 6: Identify each person or the entity whom distributed, circulated, sold, or advertised your works of color, including but not limited to business cards, letterhead, rack cards, postcards, brochures, and posters, in connection with the "COLORWORX" mark, including whether any contract exists for distribution, circulation, sale, or advertisement.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 29: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 6 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NO. 6 and REQUEST TO PRODUCE NO.29 are relevant to this proceeding because Opposer is a large corporation with over 5,000 employees across the United States and Mexico working through a number of subsidiaries. It has two segments: the Print Segment and Apparel Segment and ascertaining the precise distribution, advertising and/or promotional chain through which the COLORWORX brand is sold is central to its reputation, profitability and popularity in the marketplace. Applicant has subsequently learned through perusal of opposer's Annual Reports since this Interrogatory was served that the COLORWORX brand is sold, distributed and marketed through a subsidiary of Opposer called Admore. *See* Exhibit 1 of applicant's Declaration, *infra*. Admore is a small company specializing in presentation products and ascertaining which persons run the COLORWORX brand is highly relevant and necessary to discovering evidence admissible at trial. Opposer has simply refused to answer the question because its COLORWORX brand is a mere shadow of what it alleged in its pleadings.

Furthermore, the interrogatory is not harassing because opposer asked the same question of applicant in opposer's First Set of Interrogatories to Applicant. TBMP §412.01.

INTERROGATORY NO. 7: Identify all facts, laws, information, or materials that Opposer relies on to support the contention that all or part of the mark "COLOR WARS" is confusingly similar to the mark "COLORWORX[®]".

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, and requires Opposer to marshal its evidence prior to trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Notice of Opposition and Opposer's document production produced on May 24, 2012.

REQUEST TO PRODUCE NO. 30: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 7 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, and requires Opposer to marshal its evidence prior to trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Notice of Opposition and Opposer's document production produced on May 24, 2012.

INTERROGATORY NO. 8: Identify all facts, laws, information, or materials that Opposer relies on to support the contention that there is a likelihood of confusion and/or deception between any trademark, service mark, domain name, or other designation of Opposer and any trademark, service mark, domain name, or other designation of Applicant.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, and requires Opposer to marshal its evidence prior to trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Notice of Opposition and Opposer's document production produced on May 24, 2012.

REQUEST TO PRODUCE NO. 31: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 8 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, and requires Opposer to marshal its evidence prior to trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Notice of Opposition and Opposer's document production produced on May 24, 2012.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NOS. 7 and 8 and REQUESTS TO PRODUCE NOS.30 and 31 are not overbroad, harassing or premature because Opposer possesses a great deal of evidence which is readily available and accessible to Opposer but which it simply refuses to disclose. Such evidence includes its internal memoranda, internal emails, Annual Reports, tax returns filed with the Internal Revenue Service, internal marketing analyses, customer opinion surveys, and customer demographic data related to the COLORWORX mark, none of which opposer has served on applicant. Opposer has been in

business for 103 years and to suggest that Opposer has no accessible filing system or computerized storage facility which can easily store, save and send electronic documents such as those mentioned above is simply preposterous. Opposer is again concealing evidence because it has realized it has filed a frivolous action with no good faith basis or factual foundation. Furthermore, these interrogatories are not harassing because opposer asked the same questions of applicant in opposer's First Set of Interrogatories to applicant. TBMP §412.01.

INTERROGATORY NO. 9: Describe in detail the similarities and/or points of confusion and/or deception between the word "wars" and the word "works."

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 32: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 9 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NO. 9 and REQUEST TO PRODUCE NO. 32 are relevant to this proceeding because the words "wars" and "worx" are the dominant points of difference between the COLOR WARS and COLORWORX marks. Each mark shares the word "COLOR" and ascertaining Opposer's understanding of the similarities and/or points of confusion and/or deception between the word "wars" and the word "works" will assist Applicant in marshalling his evidence and understanding the basis of Opposer's case. Moreover, in Opposer's *Notice of Opposition*, Opposer states that "Applicant's Mark is the same as or substantially the same as, Opposer's Mark, including in visual appearance and in pronunciation" Doc #1, at 7. Ascertaining in greater detail the basis for such alleged similarities and/or sameness will assist Applicant in marshalling his evidence and understanding the basis of Opposer's case.

INTERROGATORY NO. 10: Identify all facts, laws, information, or materials that Opposer relies on to support the contention that Applicant's mark is the same as, or substantially the same as, Opposer's mark in visual appearance and in pronunciation.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, and requires Opposer to marshal its evidence prior to trial. Subject to, and

without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Notice of Opposition and Opposer's document production produced on May 24, 2012.

REQUEST TO PRODUCE NO. 33: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 10 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, and requires Opposer to marshal its evidence prior to trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Notice of Opposition and Opposer's document production produced on May 24, 2012.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NO. 10 and REQUEST TO PRODUCE NO. 33 are relevant to this proceeding for the same reasons identified in relation to INTERROGATORY NO. 9. Again, Opposer is being deliberately evasive in concealing evidence such as customer opinion surveys, customer geographical data, and customer demographic data which would shed light on Opposer's customers' knowledge, concerns and attitudes toward the COLORWORX brand. Furthermore, these interrogatories are not harassing because opposer asked the same questions of applicant in opposer's First Set of Interrogatories to applicant. TBMP §412.01.

INTERROGATORY NO. 11: Identify each officer of any company and/or business connected with the design, sale, marketing, advertising, promotion and distribution of works of color connected to the "COLORWORX" mark, including each officer's name, title, address, and job duties.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 34: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 11 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NO. 11 is relevant to this proceeding because the identification of officers connected to the "COLORWORX" mark will lead to the discovery of evidence admissible at trial. Such officers can provide evidence as to the creation of the COLORWORX concept, its commercialization in practice, sales figures, geographical areas, target markets, distribution practices, marketing and advertising strategies and

practices, and information about Opposer's competitors. In short, identification of the officers involved in managing and controlling the COLORWORX brand in commerce will shed a great deal of light on the brand's reputation and goodwill and whether applicant's COLOR WARS mark will be likely to cause confusion, mistake, deception and/or dilution in the marketplace. Furthermore, the interrogatory is not overbroad or harassing because Opposer asked a very similar question of Applicant in Opposer's First Set of Interrogatories to applicant. TBMP §412.01.

INTERROGATORY NO. 12: Identify each person who participated in the selection, design and adoption of the "COLORWORX" mark.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 9: Produce all documents and things relating to the creation, consideration, design, development, selection, adoption, and first use of the "COLORWORX" mark on any work of color (including black and white) or service.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 35: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 12 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

INTERROGATORY NO. 13: Describe in detail the role and contributions made that each person identified in Interrogatory number 12 played in the selection, design and adoption of the "COLORWORX" mark.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 36: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 13 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

INTERROGATORY NO. 14: Describe in detail the rationale, philosophy and ideas behind the selection, design and adoption of each feature and/or part of the "COLORWORX" mark, including the logo, words, style of lettering, visual appearance, sound, compound/composite nature and misspelling.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 37: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 14 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

INTERROGATORY NO. 15: Describe in detail your understanding of the connections between each aspect of your answer to Interrogatory No. 14 and the works of color you sell, promote, advertise and distribute, including but not limited to business cards, letterhead, rack cards, postcards, brochures, and posters.

ANSWER: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 38: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 15 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NOS. 12, 13, 14 & 15 and REQUESTS TO PRODUCE NOS. 35, 36, 37 & 38 are relevant to this proceeding because, quite simply, they pertain to particulars of the creation of the COLORWORX mark and design, which Opposer alleges forms the basis of its Opposition proceeding. If the questions and requests are overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial, then opposer's entire opposition is misconceived, frivolous, vexatious and unmeritorious. On the contrary, the questions and requests are highly relevant, narrowly tailored, and reasonably calculated to lead to the discovery of highly probative evidence admissible at trial. They also bear on the question of Opposer's alleged commission of fraud on the USPTO as particularized in the claims which the Board did not strike out in petitioner's second amended petition to cancel. Doc. #27. Finally, the interrogatories and requests are not overbroad or harassing because Opposer asked the same questions of Applicant in Opposer's First Set of Interrogatories to Applicant and First Requests for Production. TBMP §412.01.

INTERROGATORY NO. 16: Identify every opinion, legal or otherwise, requested or received by you, regarding the right to use the marks "COLORWORX," "COLOR WORX," "COLORWORKS," or "COLOR WORKS," including the identity of the

persons requesting the opinion, the date and substance of the opinion, and the persons receiving the opinion.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

INTERROGATORY NO. 19: Identify and describe all facts, laws, information, or materials that Opposer found, discovered, became aware of and/or knew about before, during and after its registration of the COLORWORX mark involving use of the marks “COLORWORX,” “COLOR WORX,” “COLORWORKS,” and “COLOR WORKS.”

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

REQUEST TO PRODUCE NO. 39: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 16 of Applicant’s First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

REQUEST TO PRODUCE NO. 42: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 19 of Applicant’s First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial. Additionally, Opposer asserts the attorney-client and work-product privileges.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NOS. 16 and 19 and REQUEST TO PRODUCE NOS. 39 and 42 are relevant to this proceeding because Opposer has received numerous sources of legal opinion and advice since it first commenced using the COLORWORX mark in commerce and especially during the time it applied for and obtained registration of the COLORWORX trademark. Opposer applied for and obtained registration of its mark with the law firm Pitts and Eckl, P.C., attorneys Conrad C. Pitts and Sean L. Collin the attorneys of record. Opposer then engaged Chalker Flores LLP, with attorney Edwin Flores the attorney of record, and, at least in this proceeding, attorneys Scott A. Myer and Thomas G. Jacks as lead counsel, which was followed by Daniel Chalker and Jesica Flores as lead counsel. Legal opinions relating to the COLORWORX mark are relevant to this proceeding because opposer rendered the validity of its COLORWORX registration a material fact in issue in its Notice of

Opposition pleadings, when it alleged that “Opposer is the owner of U.S. Trademark Registration No. 3,372,884 for the mark COLORWORX (‘Opposer’s Mark’). Opposer’s Mark is valid, subsisting, and in full force and effect.” Doc. #1, at 6. In addition, in Ennis’ Affirmative Defenses, Ennis refers to its “long, substantial and widespread use, advertising and promotion in support of its mark, and the mark’s “strong secondary meaning” and “goodwill.”

The interrogatories and requests also bear on the question of Opposer’s alleged commission of fraud on the USPTO as particularized in the claims which the Board did not strike out in petitioner’s second amended petition to cancel. Doc. #27. They are not overbroad or harassing because opposer asked the same questions of Applicant in Opposer’s First Set of Interrogatories to Applicant and First Requests for Production. TBMP §412.01.

As regards Opposer’s assertion of the attorney-client and work-product privileges, it is settled law that there is no blanket privilege covering all attorney-client communications. *Wesp v. Everson*, 33 P.3d 191, 197 (Colo. 2001). The privilege must be claimed with respect to each specific communication at issue, and the Board must examine each communication independently. Of course, the party asserting the privilege bears the burden of establishing its application to a particular communication. *Id.* at 198. Ennis has produced an incomplete and evasive privilege log dated August 27, 2012, which is now almost ten months old. *See* Exhibit 27. Applicant seeks a further and more definite statement of all documents in this privilege log as well as production of those documents. Further, under the control group test, the communication must be made by an employee of opposer who is in a position to control or take a substantial part in the determination of corporate action in response to legal advice for the privilege to attach. Only such employees qualify as the “client” for attorney-client privilege purposes. Under the subject matter test, a communication may be privileged if it is made for the purpose of securing legal advice for the corporation, the employee making the communication does so at a superior’s request or direction, and the employee’s responsibilities include the subject matter of the

communication with counsel. It is respectfully submitted that these matters must be addressed by opposer.

Additionally, it should be borne in mind that Courts narrowly construe the attorney-client privilege because it limits full disclosure of the truth. *PSE Consulting, Inc. v. Frank Mercede & Sons, Inc.*, 838 A.2d 135, 167 (Conn. 2004); *In re Bryan*, 61 P.3d 641, 656 (Kan. 2003); *E.I. du Pont de Nemours & Co. v. Forma-Pack, Inc.*, 718 A.2d 1129, 1138 (Md. 1998); *Whitehead v. Nev. Comm'n on Judicial Discipline*, 873 P.2d 946, 948 (Nev. 1994); *In re Grand Jury Subpoena Dated June 30, 2003*, 770 N.Y.S.2d 568, 572 (N.Y. Sup. Ct. 2003); *Callahan v. Nystedt*, 641 A.2d 58, 61 (R.I. 1994); *Lane*, 640 N.W.2d at 798 (quoting cases). Further, while the privilege protects the content of an attorney-client communication from disclosure, it does not protect from disclosure the facts communicated. *Mackey v. IBP, Inc.*, 167 F.R.D. 186, 200 (D. Kan. 1996). It is submitted that opposer ought to be compelled to reveal these facts.

Moreover, applicant relies on the crime-fraud exception to obviate both the attorney-client and work product privileges. While opinion work product receives almost absolute protection against discovery, in this case applicant has reasonable grounds for believing that Ennis has committed fraud on the USPTO as particularized in the portions of his second amended petition to cancel which were not struck out by the Board in its order of May 15, 2013; therefore, Ennis' attorneys' conclusions, mental impressions or opinions are at issue in the case and there is a compelling need for their discovery (see *Holmgren v. State Farm Mut. Auto. Ins. Co.*, 976 F.2d 573, 577 (9th Cir. 1992)). It is respectfully submitted that since, at the time of the lawyer-client communications the client, Ennis was participating in a fraud, the Board can find that there is no privilege protection. Through its refusal and failure to answer the overwhelming majority of applicant's Discovery requests, opposer has deliberately and egregiously attempted to evade and frustrate applicant's legitimate attempts to secure discovery. As demonstrated by Applicant's email correspondence to Opposer in the Exhibits, Opposer has been given numerous opportunities to disprove the allegation that it committed fraud on the USPTO in applying for and obtaining the

COLORWORX registration, yet it has steadfastly refused to produce any documents, thereby concealing relevant evidence.

As to the work product doctrine, Applicant relies on *Hickman v. Taylor*, 329 U.S. 495 (1947) and seeks an Order requiring Opposer to produce its tangible work product. The basis for the order is that applicant resides in Australia and has substantial need of the opinions, documents and things requested for the preparation of his case and that he is unable without undue hardship to obtain the substantial equivalent of the materials by other means. Moreover, as to the discoverability of trademark search reports, the Board has taken the position that while the contents of a search report are not privileged from discovery, an attorney's opinion as to the legal significance of the report is protected by the attorney-client privilege: *Fisons, Ltd v. Capability Brown, Ltd*, 209 U.S.P.Q. 167 (T.T.A.B 1980).

INTERROGATORY NO. 17: Describe in detail any instances in which you have been involved which have called into question, created conflict in respect of, or challenged the right to use the marks "COLORWORX," "COLOR WORX," "COLORWORKS," or "COLOR WORKS."

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 6: Produce copies of complaints or petitions in any action filed by or against You in which the allegations are similar to those of this suit.

RESPONSE: Opposer objects to this Request as Applicant has equal or greater access to the complaint or petition filed in *Joel L. Beling d/b/a Supa Characters Pty Ltd v. Ennis Inc.*; Cancellation No. 92055374.

REQUEST TO PRODUCE NO. 40: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 17 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NO. 17 and REQUESTS TO PRODUCE NOS. 6 & 40 are relevant to this proceeding because Opposer claims the exclusive right to use the mark COLORWORX in related to printing goods and services and has filed at least two Opposition proceedings with the USPTO against traders whose marks call into question, create conflict in respect of, or challenge Opposer's right to use the

COLORWORX mark. The two Opposition proceedings are the present one, Opposition No. 91203884, and Opposition No. 91203773, which Opposer filed against the "PSC COLOR WORKS" mark, which was applied for by the Pioneer Supply Company.

INTERROGATORY NO. 18: Describe in detail any plans for future expansion, including but not limited to, expansion of marketing lines, services, customer base or geographical areas served, and goods and services in international classes 16 and 41.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 18: Produce all documents and things concerning Your past, present, and future plans to advertise, market, sell, or promote works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 21: Produce documents and things relating to Opposer's intended and/or proposed works of color (including black and white) or services utilizing the "ColorWorx" mark.

RESPONSE: Opposer objects to this Request as it is overbroad, harassing, and requires Opposer to marshal its evidence prior to trial. Subject to, and without waiving, the foregoing objections, Opposer refers Applicant to Opposer's Notice of Opposition and Opposer's document production produced on May 24, 2012, which shows representative specimens. Opposer is continuously updating the goods and services it offers under the mark COLORWORX and reserves the right to supplement its Response during the pendency of discovery in this matter.

REQUEST TO PRODUCE NO. 41: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 18 of Applicant's First Set of Interrogatories to Opposer.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

In so answering, Opposer refuses to and fails to answer. INTERROGATORY NO. 18 and REQUESTS TO PRODUCE NOS. 18, 21 & 41 are relevant to this proceeding because nowhere in any Annual Report of Opposer for the previous 12 years is there even a single mention of expanding Opposer's goods and services to include goods and services listed in international class 41. See Applicant's Declaration, *infra*. Opposer has filed a Notice of Opposition opposing Applicant's use of the COLOR WARS mark in international classes 16 and 41 yet there is simply no basis, legal or factual, for Opposer

to have filed an Opposition to Applicant's class 41 trademark application. Opposer has filed a Notice of Opposition with respect to a large number of goods and services in which applicant has intended to trade in commerce in international classes 16 and 41. In addition, Applicant respectfully submits that opposer refuses to answer these Requests because Opposer has absolutely no intention to trade in commerce for the remaining goods and services in international class 16 which Opposer opposed, nor for any goods or service listed in international class 41. In addition, Applicant notes that Opposer's Notice of Opposition (Exhibit 38) and Opposer's document production produced on May 24, 2012 (Exhibit 36), which shows representative specimens, pertain to *past* goods produced under the COLORWORX mark. REQUEST TO PRODUCE NO. 21 seeks documents and things pertaining to Opposer's "intended and/or proposed" goods and services sold under the COLORWORX mark.

REQUEST TO PRODUCE NO. 5: Produce all photographs, videotapes, drawings, and other tangible things that pertain in any way to the subject matter of this suit.

RESPONSE: None at this time.

In so answering, Opposer refuses to and fails to answer. Request No. 5 is relevant to this proceeding because Opposer's COLORWORX mark contains a logo/design element which is clearly visible in all of Opposer's advertising and promotional material which bears the COLORWORX mark. In official correspondence with the USPTO, Opposer described its logo/design as a "crosshairs logo." Moreover, in Applicant's First Request for Admissions, Opposer answered that this logo/design, independent of the words COLORWORX, was "distinctive" and "highly distinctive" and capable of distinguishing Opposer's goods and services from the goods and services of other traders. Doc. #26. For Ennis to commence an opposition proceeding based on a trademark registration which involves a design and then to state that it has no drawings to produce, is the height of dishonesty.

REQUEST TO PRODUCE NO. 8: Produce all oral or written statements made by You or Your representatives concerning this suit.

RESPONSE: None.

In so answering, Opposer refuses to and fails to answer. Request to Produce No. 8 is relevant to this proceeding because Applicant is entitled to know the full case against him. Opposer's answer is patently false because, if true, it assumes there was never any written or email correspondence between Opposer's attorneys and between Opposer and Opposer's attorneys regarding any matter in this suit, especially when the fraud allegations were first raised. *See* applicant's Declaration, *infra*. A final reason the question is fair and relevant is because Opposer made the identical Request to Produce of Applicant in its First Request for Production to Applicant. Exhibit 28; TBMP §412.01.

REQUEST TO PRODUCE NO. 11: Produce all documents and things relating to the geographic areas where services or works of color (including black and white) relating to Opposer's "COLORWORX" mark are advertised, marketed, sold, or promoted and the length of time each work of color (including black and white) or service has been advertised, marketed, sold, or promoted in each area.

RESPONSE: Opposer is currently offering goods and services worldwide via the Internet and through qualified dealers. Opposer refers Applicant to Opposer's document production produced on May 24, 2012.

REQUEST TO PRODUCE NO. 12: Produce all documents and things relating to the distribution channels through which work of color (including black and white) or services relating to Opposer's "COLORWORX" mark are advertised, marketed, sold, or promoted.

RESPONSE: Opposer is currently offering goods and services worldwide via the Internet and through qualified dealers. Opposer refers Applicant to Opposer's document production produced on May 24, 2012.

REQUEST TO PRODUCE NO. 13: Produce all documents and things relating to the classes of customers to whom You advertise, market, sell, or promote works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer is currently offering goods and services worldwide via the Internet and through qualified dealers. Opposer refers Applicant to Opposer's document production produced on May 24, 2012.

In so answering, Opposer refuses to and fails to answer. Opposer has stated that it offers "goods and services worldwide via the Internet and through qualified dealers." These answers are incredibly evasive as Opposer certainly possesses sales figures, distribution lists and customer lists pertaining to the specific geographic areas where Opposer's "COLORWORX" mark is

advertised, marketed, sold, or promoted. Applicant reminded opposer of the fact that these documents were encompassed in applicant's Requests to Produce by email on the 15th June 2012 (*see* Exhibit 8), yet Opposer simply refused to respond. Another reason opposer has failed to answer Request to Produce No. 11, is that it fails to state the length of time each work of color (including black and white) or service has been advertised, marketed, sold, or promoted in each area. In this respect, opposer's dishonesty and evasiveness is simply breathtaking. Moreover, in Opposer's answer to Request to Produce No. 13, there is simply no mention of *customers*; there is reference, in a very general way, to *how* goods are sold and *what* is sold, yet no information in respect of to whom Opposer's goods are sold. Half of Opposer's entire business is predicated on the supply of printed goods and services to distributor-customers

REQUEST TO PRODUCE NO. 14: Produce all documents and things relating to the yearly dollar and unit volume of sales to date and projected future dollar and unit volume of sales for each of the works of color (including black and white) or services produced by Opposer in connection with the "COLORWORX" mark.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 15: Produce all documents and things relating to variable and fixed costs for sales of works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 16: Produce all documents and things relating to gross and net profits from sales of works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 17: Produce all documents and things relating to the yearly cost to You of advertising, marketing, selling, and promoting works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 20: Produce all documents and things relating to Your yearly expenses to date and planned future expenses corresponding to each type of advertising and promotion used for works of color (including black and white) or services relating to Opposer's "COLORWORX" mark.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

REQUEST TO PRODUCE NO. 43: Produce all documents and things relating to the financial health of the ColorWorx mark, including all documents and things submitted to and received from the Internal Revenue Service and all accounting documents.

RESPONSE: Opposer objects to this Interrogatory as it is overbroad, harassing, irrelevant and not reasonably calculated to lead to the discovery of evidence admissible at trial.

In so answering, Opposer refuses to and fails to answer. Requests to Produce Nos. 14, 15, 16, 17,

20 & 43 are relevant to this proceeding because Opposer expressly relied on its "sales,"

advertising expenditures," significant goodwill," and "valuable reputation" in its Notice of

Opposition, thereby opening the door to any discovery request about the past, current and futures

sales of goods and services connected to the COLORWORX mark and design. Opposer's refusal

to answer demonstrates a clear evasiveness, dishonesty and intent to conceal evidence. In

addition, in Ennis' Affirmative Defenses, Ennis refers to its "long, substantial and widespread

use, advertising and promotion in support of its mark, and the mark's "strong secondary

meaning" and "goodwill."

REQUEST TO PRODUCE NO. 23: Produce all documents and things You contend supports Your contention that registration of Applicant's "COLOR WARS" mark will injure Opposer by causing the trade/or purchasing public to be confused and/or deceived.

RESPONSE: Opposer refers Applicant to Opposer's Notice of Opposition and Opposer's document production produced on May 24, 2012.

REQUEST TO PRODUCE NO. 24: Produce all documents and things You contend supports Your contention that registration of Applicant's "COLOR WARS" mark will injure Opposer by causing the trade/or purchasing public to be confused and/or deceived into believing that Applicant's Goods are those of Opposer or are sponsored by Opposer.

RESPONSE: Opposer refers Applicant to Opposer's Notice of Opposition and Opposer's document production produced on May 24, 2012.

REQUEST TO PRODUCE NO. 25: Produce all documents and things You contend supports Your contention that registration of Applicant's "COLOR WARS" mark will injure Opposer by placing a cloud over Opposer's title to its "COLORWORX[®]" mark.

RESPONSE: Opposer refers Applicant to Opposer's Notice of Opposition and Opposer's document production produced on May 24, 2012.

REQUEST TO PRODUCE NO. 26: Produce all documents and things You contend supports Your contention that Applicant's "COLOR WARS" mark is the same, or substantially the same, as Opposer's mark "COLORWORX®" including in visual appearance and in pronunciation.

RESPONSE: Opposer refers Applicant to Opposer's Notice of Opposition and Opposer's document production produced on May 24, 2012.

In so answering, Opposer refuses to and fails to answer. Requests to Produce Nos. 23, 24, 25 & 26 are relevant to this proceeding because they seek documents and things pertaining to Opposer's reputation and goodwill in the COLORWORX brand. A number of types of documents in Opposer's possession, custody or control will easily answer this Request, including sales figures, advertising and promotional budgets, marketing plans, geographical financial and demographic data, customer lists, tax returns, and accounting statements. Opposer has been in business 103 years and is a public company; it has easy access to these documents yet simply refuses to produce anything connected to its reputation, which it relied on in its Notice of Opposition. Doc. #1. Opposer's Notice of Opposition refers to bald generalizations and has no concrete information or data, while Opposer's document production produced on May 24, 2012 consists of only product samples, nothing which will assist applicant gauge opposer's reputation in the COLORWORX brand. In so answering, Opposer has evaded the Request and failed to answer. In addition, with respect to REQUEST TO PRODUCE No. 26, Applicant respectfully submits that Opposer's documents pertaining to its customer base will shed significant light on this Request since the vast majority of Opposer's customers are in fact distributors and/or private printers who are specialists in the printing business. These distributors and/or private printers are the ones who deal with the public, who, it is submitted, are relatively more likely than professional distributors and/or private printers to be confused, mistaken and/or deceived by the COLOR WARS mark relative to the COLORWORX mark.

CERTIFICATE OF CONFERENCE

On June 12, 2012, Applicant sent Opposer's attorneys an e-mail entitled "Applicant's first good faith attempt to convince opposer to produce documents, answer interrogatories and admit or

deny questions,” reminding Opposer of its discovery obligations and asking it to provide responses (*see* Exhibit 2). Opposer refused to comply, stating that its responses were sufficient (*see* Exhibit 26). Other email correspondence ensued between the parties with applicant continually reminding opposer about its discovery obligations (*see* Exhibits 3, 5, 6, 8, 9). On June 19, 2012, applicant sent opposer’s attorneys an e-mail entitled “Applicant’s second good faith attempt to convince opposer to produce documents, answer interrogatories and admit or deny questions,” reminding opposer of its discovery obligations and asking it to provide responses (*see* Exhibit 11). Opposer did not reply at all. Further correspondence ensued between the parties (*see* Exhibits 19-25). On June 23, 2012, applicant sent opposer’s attorneys an e-mail entitled “Applicant’s third good faith attempt to convince opposer to produce documents, answer interrogatories and admit or deny questions,” reminding opposer of its discovery obligations and asking it to provide responses. Opposer replied on 27th June 2012 that it would attempt to supplement its discovery responses with further production (*see* Exhibit 23) but has failed to respond at all with further production.

PRAYER

WHEREFORE, PREMISES CONSIDERED, applicants prays that this applicant’s motion to compel discovery responses be granted and that the Board compel opposer to respond to the above Interrogatories and Requests for Production, without objection and within 30 days of this Board's Order. Applicant also seeks a further and more definite statement of all documents in Ennis’ privilege log dated August 27, 2012, and a privilege log of all documents over which Ennis claims privilege from August 27, 2012 to the date of the Board’s decision concerning the present motion, as well as production of those documents.

Dated: June 20, 2013

Respectfully submitted,

By: /Joel Beling/

Scott,

I'm not sure if it's assumed by the TTAB or we need to make a stipulation, but does your client consent to all evidence gathered in the Opposition proceeding to be admissable in the Petition to Cancel and vice versa?

Please advise.

If not, I'll be filing a motion to this effect.

Thanks

Joel

Scott,

Forsake of completeness, the documents and things stated in your First Supplement to Initial Disclosures are covered in my First Request for Production to Opposer.

In particular: the "Documents evidencing use of "COLORWORX" mark in commerce" is requested in, for example, Requests 8 and 18;

the "documents evidencing the products and services offered by Opposer utilising the "COLORWORX" is requested in, for example, Requests 8 and 18;

the "documents evidencing the geographic area where the "COLORWORX" mark is used" is requested in Requests 8, 11, 12, and 13;

the "documents evidencing filings with the USPTO related to registration 3372884 "COLORWORX" is requested in Requests 8, 9, 23, 24, 25 and 26.

I look forward to receiving those documents, in addition to my other discovery requests, on Tuesday 18th June 2012, Melbourne, Australia time.

I thank you in anticipation of your co-operation.

Joel

Subject: RE: Your responses to my Discovery Requests

Joel,

I do not understand why this is important. We should talk on the phone about the discovery issues that are going on. It is always beneficial to talk about the issues in person or on the phone rather than exchanging emails or letters. Are you free at 5:00 pm CST today or tomorrow? We can use the same conference call number that we've used in the past.

APPLICANT'S SECOND GOOD FAITH ATTEMPT TO CONVINCE OPPOSER TO
PRODUCE DOCUMENTS, ANSWER INTERROGATORIES AND ADMIT OR DENY
QUESTIONS

Dear Sirs,

Re: Color Wars Opposition; Opposition No. 91203884

I refer to your Opposer's Objections and Response to Applicant's First Request for Production, Opposer's Objections and Answers to Applicant's First Set of Interrogatories, and Opposer's Objections and Responses to Application's First Request for Admissions served on me by email on the 12th June, 2012, to my letter to you dated 12th June 2012 seeking full and complete disclosure pursuant to my Discovery requests, and to your letter dated 18th June 2012.

I reiterate and incorporate by reference all matters put to you in my letter of 12th June 2012 and refer you to *your* Notice of Opposition, to *your* Answers to my Petition to Cancel, and to *your* Opposer's First Request for Admissions wherein *you* raised the issues of, inter alia, the validity of your client's COLORWORX registration, your client's use in commerce of the COLORWORX mark since 2002, your client's "very valuable public recognition" of the COLORWORX mark, your client's "valuable reputation," your client's "sales of high-quality products bearing Opposer's Mark in interstate commerce," your client's "expenditures of considerable sums for promotional activities and the excellence of its products," your client's "significant goodwill in its mark," alleged claims of diminishment and dilution to your client's mark if my COLOR WARS mark was registered, alleged claims of placing a cloud over your mark if my COLOR WARS mark was registered, the likelihood of confusion, deception and mistake between our marks, and fraud (which you have denied but offered no evidence in support of such denials).

With respect to the last issue, fraud, it would seem obvious to any reasonable observer that if you and your client have not committed fraud on the United States Patent and Trademark Office in applying for and obtaining the COLORWORX registration, then surely the best way to prove your innocence is to disclose all documents concerning the registration and your client's communications to you. Refusing to answer all questions and requests in relation to possible

fraud smacks of a consciousness of guilt and an intent to conceal evidence of a crime and obstruct justice. Accordingly, I implore you to be honest and co-operate with all my requests in relation to fraud so as to enable me to prepare my case in the manner in which I am legally entitled and, more importantly, to preserve the integrity of the trademark registration process in the United States.

I note it has been eight (8) days since your statutory deadline to answer my Discovery requests has passed, and, save and except from samples of use of the COLORWORX mark in commerce, I have no material from you upon which I can prepare and base my case. I need not remind you that *you* commenced this action by filing a Notice of Opposition, alleging a number of serious allegations. Accordingly, I have a right under the Federal Rules of Civil Procedure to obtain documents and other things from you to examine the evidence upon which you based your allegation. To date, you have flagrantly violated your Discovery obligations and I have fully complied with mine, the commercially sensitive and top secret nature of my disclosures.

As regards your claims of attorney-client and work-product privilege, I respectfully request that you identify all documents and things in your possession that you say falls under these privileges and we let the Trademark Trial and Appeal Board decide if the privileges apply. I reiterate that I reside in Australia and have substantial need of the documents and things requested in my Discovery Requests for the preparation of my case and that I am unable without undue hardship to obtain the substantial equivalent of the materials by other means. I also seek that you produce – or at the very least *identify* - all documents and things I have requested from you in my Discovery requests not prepared in anticipation of litigation. I further seek all documents prepared by Chalker Flores and Ennis Inc's previous attorneys before this Opposition claim arose.

Please answer the following requests and questions in full detail by 5pm on Friday the 22nd June 2012.

Applicant's First Request for Production Request Numbers: 5, 6, 8, 9, 11, 12, 13, 14, 15, 16, 17, 18, 20, 21, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43
Applicant's First Set of Interrogatories Request Numbers: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19
Applicant's First Request for Admissions Request Numbers: 33, 38, 39, 40, 41

As regards your offer to discuss the above issues by telephone, I prefer to communicate in writing because it leaves a clear and unambiguous paper trail of your refusal to answer and co-operate in relevant and probative Discovery requests.

Please review your answers to all my Discovery Requests and advise if you cannot understand the precise evidence I seek from you. I am happy to explain my requests in detail if you cannot comprehend anything. From my point of view, my requests are clear and unambiguous. In your response to this letter, please confirm you understand each and every Discovery Request I have made of you.

I advise this document shall be relied on in a Motion to Compel Discovery and on the question of costs if you fail to answer the above requests. I further advise that I will be

seeking sanctions as well as costs for either my time or for an attorney's time in the event that you fail to co-operate. This action is significantly disrupting my ability to work in Australia as a lawyer and on my character licensing business through Supa Characters Pty Ltd and I sincerely hope you had and have a good faith basis for initiating it.

I look forward to your honesty and co-operation.

Regards,

/JOEL BELING/

Joel,

We respectfully disagree with your assertion that we failed to disclose documents and are more than willing to discuss your concerns on the phone. I still think a phone conversation is the best way to resolve disputes or misunderstandings. Unfortunately, email exchanges are usually detrimental to resolving issues. I hope that you will reconsider your position that you do not want to talk about your concerns on the phone.

Tom,

As a result of your failure to disclose I've had to do a great deal of additional work to attempt to compel discovery. This has significantly interfered with my normal job and cost me a lot of money, wasted my time and caused massive stress.

Please put your concerns and queries in writing. We can talk on the phone once we resolve the discovery issues.

Please produce all documents by 5pm Friday, CST time.

Thanks

Joel

Tom,

I've got NOTHING from you apart from a few product samples. That's 2 per cent of my case at best. You are concealing 98 per cent of the evidence I need for my case. That's not fair.

For whatever reasons, which I will get to the bottom of, you are violating the Federal Rules of Civil Procedure and obstructing justice and, as a result, I cannot prepare my case.

You may not want to produce the documents and answer my questions, but, as a matter of law, you have to. I didn't want to hand over my character material, which NOBODY in the world had seen yet, but I had to and did.

Now is the time to play ball before matters escalate. I look forward to receiving your documents and answers by 5pm Friday, CST.

You're wasting my time, costing me a lot of money and causing me massive stress. Unlike you, I don't work for a fancy law firm and cannot bill a rich corporate client for the work I'm doing. Please, do the right thing and disclose.

**APPLICANT'S THIRD GOOD FAITH ATTEMPT TO CONVINCE OPPOSER TO PRODUCE
DOCUMENTS, ANSWER INTERROGATORIES AND ADMIT OR DENY QUESTIONS**

Dear Sirs,

Re: Color Wars Opposition; Opposition No. 91203884

I refer to my numerous previous attempts to persuade you to comply with your Discovery obligations under the Federal Rules of Civil Procedure.

I note that you are still in flagrant violation of the Federal Rules of Civil Procedure and that you still refuse to co-operate and answer my relevant and probative requests.

I note it has been twelve (12) days since your statutory deadline to answer my Discovery requests has passed, and, save and except from samples of use of the COLORWORX mark in commerce, I have no material from you upon which I can prepare and base my case. I need not remind you that *you* commenced this action by filing a Notice of Opposition, alleging a number of serious allegations. Accordingly, I have a right under the Federal Rules of Civil Procedure to obtain documents and other things from you to examine the evidence upon which you based your allegation.

Please answer the following requests and questions in full detail by 5pm on Wednesday the 27th June 2012 (American CST time).

Applicant's First Request for Production Request Numbers: 5, 6, 8, 9, 11, 12, 13, 14, 15, 16, 17, 18, 20, 21, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43
Applicant's First Set of Interrogatories Request Numbers: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19
Applicant's First Request for Admissions Request Numbers: 33, 38, 39, 40, 41

I advise this document shall be relied on in a Motion to Compel Discovery and on the question of costs in recouping my reasonable expenses if you fail to answer the above requests. As you are aware, I have made many attempts to persuade you to do what you are legally required to do, to no avail. This action, initiated by you, is costing me massive amounts of money which I cannot afford, wasting my time, and causing me immeasurable stress.

I look forward to your honesty and co-operation.

Regards,

/JOEL BELING/

Tom,

Thank you. Please provide all your documents and answers to all interrogatories and requests for admissions by Tuesday 5pm, CST time.

Amongst other live issues, it should be borne in mind that fraud is a very, very serious allegation and I am giving your client the opportunity to clear its name. Concealing evidence and violating the Federal Rules of Civil Procedure only confirms suspicions of fraud. I'm sure Ennis Inc doesn't want to undo 103 years of hard work, destroy its public reputation and decimate its stock value with a couple of years of criminal activity perpetrated to offset the obscelensce of standard business forms and the resultant massive drop in profits.

Of course, I need not remind you of Chalker Flores' alleged role in conspiracy to commit fraud on the USPTO and other offences.

I fully disclosed my case when I absolutely did not want to. Please show me the same courtesy and abide by the law.

I will be relying on this correspondence in a Motion to Compel all discovery responses and requests not satisfactorily disclosed by you and on the question of my reasonable expenses in filing the motion.

This is the last time I will be communicating to you before filing my motion to compel on Tuesday evening, CST time. Please do the right thing and answer all my Discovery Requests completely.

Remember, this is YOUR action. Prove it.

Joel

Joel,

As we have done throughout this matter, we are actively searching for additional documents and will continue to supplement our production according to the Federal Rules of Civil Procedure. I cannot and will not promise that the supplementation, if any, will occur by Tuesday 5 pm, CST.

Additionally, I am extremely disappointed in the lack of professionalism demonstrated in your email below and throughout this matter. Your continued accusations that our client and our firm committed fraud on the USPTO and that we are trying to hide evidence are unfounded and reckless. We have treated you with respect and our actions have been ethical and professional. We understand that you are emotionally involved in this matter but respectfully request that you afford us the same professionalism that we have consistently shown you.

We would prefer not to involve the TTAB in this matter but if you continue to disparage our client and our firm, we will be forced to do so. As always, we are available to further discuss any issues with you by phone.

Re: Ennis, Inc. v. Joel L. Beling d/b/a Supa Characters Pty Ltd
Opposition No. 91203884, USPTO Trademark Trial and Appeal Board

Dear Mr. Beling,

In response to your letter dated June 12, 2012, we have reviewed our responses and objections to your various discovery and stand by the responses and objections as provided. We also believe that the objections made provide adequate explanation of the bases for our position.

Please be advised that, should you file a motion to compel based upon your reasoning set forth in your June 12, 2012 correspondence, we will seek attorney's fees from you for any time spent in relation to such a motion and for the time spent responding to your improper discovery requests in the first place.

We are happy to discuss this with you should you wish to call us.

Sincerely,

Scott A. Meyer

OPPOSER'S FIRST REQUEST FOR PRODUCTION TO APPLICANT

To: Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, 1 Mirboo Court, Dallas, Victoria 3047, Australia.

Ennis, Inc. ("Opposer") serves these Requests for Production on Joel L. Beling d/b/a Supa Characters Pty Ltd ("Applicant") as authorized by Federal Rule of Civil Procedure 34 and Trademark Rule 2.120(d), 37 C.F.R. § 2.120(d).

DEFINITIONS AND INSTRUCTIONS

The following terms have the following meanings, unless the context requires otherwise:

1. "Opposer" and/or "Ennis" as well as a party's full or abbreviated name or a pronoun referring to a party, means the party, and where applicable, the party's agents, representatives, officers, directors, employees, partners, corporate agents, subsidiaries,

affiliates, or any other person acting in concert with the party or under the party's control, whether directly or indirectly, including any attorney.

2. "You" or "your" means Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, as well as its agents, employees, and all other persons acting on behalf of Applicant or its successors, predecessors, heirs, beneficiaries or assigns.

3. "Communication" means the transmittal of information in the form of facts, ideas, inquiries, or otherwise.

4. "Identify (person)." When referring to a person, "identify" means to give, to the extent known, the person's full name, present or last known address, telephone number, and, when referring to a natural person, the present or last known place of employment. Once a person has been identified in compliance with this paragraph, only the name of that person needs to be listed in response to later discovery requesting the identification of that person.

5. "Identify (document)." When referring to a document, "identify" means to give, to the extent known, the following information: (a) the type of document; (b) the general subject matter of the document; (c) the date of the document; (d) the authors, addressees, and recipients of the document; (e) the location of the document; (f) the identity of the person who has custody of the document; and (g) whether the document has been destroyed, and if so, (i) the date of its destruction, (ii) the reason for its destruction, and (iii) the identity of the person who destroyed it.

6. "Any" should be understood in either its most or its least inclusive sense as necessary to bring within the scope of the discovery request all responses that might otherwise be construed to be outside of its scope.

7. "And/Or." The connectives "and" and "or" should be construed either disjunctively or conjunctively as necessary to bring within the scope of the discovery request all responses that might otherwise be construed to be outside of its scope.

8. "Number." The use of the singular form of any word includes the plural and vice versa.

9. "Possession, custody, or control" of an item means that the person either has physical possession of the item or has a right to possession equal or superior to that of the person who has physical possession of the item.

10. "Person" means any natural person, corporation, firm, association, partnership, joint venture, proprietorship, governmental body, or any other organization, business, or legal entity, and all predecessors or successors in interest.

11. "COLOR WARS" defines the mark COLOR WARS, U.S. Trademark Application Serial No. 85/324,443, applied for by Joel L. Beling d/b/a Supa Characters Pty Ltd.

12. "COLORWORX" defines the mark COLORWORX®, U.S. Trademark Registration No. 3,372,884 and includes a variety of printing goods and printing services that are international Class 40 products manufactured and put into the stream of commerce by Ennis, Inc.

13. "Identify" or "describe" when referring to a person, means you must state the following:

- a. The full name.
- b. The present or last known residential address and residential telephone number.
- c. The present or last known office address and office telephone number.
- d. The occupation, job title, employer, and employer's address at the time of the event or period referred to in each particular interrogatory.
- e. In the case of any entity, identify the officer, employee, or agent most closely connected with the subject matter of the interrogatory and the officer who is responsible for supervising that officer or employee.

14. "Identify" or "describe" when referring to a document, means you must state the following:

- a. The nature (e.g., letter, handwritten note) of the document.
- b. The title or heading that appears on the document.
- c. The date of the document and the date of each addendum, supplement, or other addition or change.
- d. The identity of the author and of the signer of the document, and of the person on whose behalf or at whose request or direction the document was prepared or delivered.
- e. The present location of the document, and the name, address, position or title, and telephone number of the person or persons having custody of the document.

15. "Document" means all written, typed, or printed matter and all magnetic, electronic, or other records or documentation of any kind or description in your actual possession, custody, or control, including those in the possession, custody, or control of any and all present or former directors, officers, employees, consultants, accountants, attorneys, or other agents, whether or not prepared by you, that constitute or contain matters relevant to the subject matter of the action.

16. Wherever in the following interrogatories Applicant is asked to identify documents, it is requested that the documents be identified by stating:

- a. general type of document, e.g., letter, memorandum, report, miscellaneous, notes, etc.;
- b. date;
- c. author;
- d. organization, if any, with which author was connected;
- e. addressee or recipient;
- f. other distributees;

g. organization, if any, with which addressee or recipient, or distributees were connected;

h. general nature of the subject matter to extent that Applicant can do so without divulging matter considered by it to be privileged;

i. present location of such document and each copy thereof known to Applicant, including the title, index number and location, if any, of the file in which the document is kept by the Applicant or the file from which such document was removed, if removed for the purposes of this case, and the identity of all persons responsible for the filing or other disposition of the document.

17. "Relate" or "relating to" as used herein includes, without limitation, referring to, alluding to, responding to, concerning, connected with, commenting on, in respect of, about, regarding, discussing, describing, measuring, reflecting, supporting, analyzing, explaining, constituting, evidencing, or pertaining to.

18. "Privilege." If Applicant relies on any privilege or the work product doctrine in objecting to these Requests or in failing to produce a requested document, please state in the response to the Request that the Applicant is invoking a privilege, specify which privilege or doctrine is being invoked and the nature and reasons supporting the claim of privilege.

19. "Attorney-Client Privilege." If Applicant invokes the attorney-client privilege, please provide the following additional information for each document not disclosed or information withheld, to the extent that providing this information will not destroy the privilege.

- a. the name and job title of the author of the document or communication;
- b. the name and job title of every person who received the document or a copy of it, or who was present when the communication was made or who overheard it;
- c. the relationship between the author(s) and each person who received the document or a copy of it or who was present when the communication was made or who overheard it;
- d. whether the primary purpose of the document or communication was to seek or provide legal advice or services;
- e. the date of the document or communication;
- f. the subject matter(s) addressed in the document or communication;
- g. whether the document or communication was transmitted in confidence; and
- h. a brief statement as to why the document or communication is protected by the attorney-client privilege.

REQUESTS FOR PRODUCTION

REQUEST 1: Produce working papers, notes, calculations, diagrams, photographs, models, exhibits, and other materials, including reports and factual observations, prepared or reviewed by any expert who will testify at trial on Applicant's behalf.

RESPONSE:

REQUEST 2: Produce copies of all transcripts of testimony previously provided by any individual listed by You as an expert witness.

RESPONSE:

REQUEST 3: Produce treatises, rules, regulations, guidelines, statutes, policies, procedures, and any other authoritative materials considered by any testifying expert in forming an opinion.

RESPONSE:

REQUEST 4: Produce invoices, bills, and other billing materials for each expert You expect will testify at trial.

RESPONSE:

REQUEST 5: Produce all photographs, videotapes, drawings, and other tangible things that pertain in any way to the subject matter of this suit.

RESPONSE:

REQUEST 6: Produce copies of complaints or petitions in any action filed by or against You in which the allegations are similar to those of this suit.

RESPONSE:

REQUEST 7: Produce copies of any claim made by or against You for damages similar to those alleged in this suit.

RESPONSE:

REQUEST 8: Produce all oral or written statements made by You or Your representatives concerning this suit.

RESPONSE:

REQUEST 9: Produce all documents and things relating to the creation, consideration, design, development, selection, adoption, and first use of the "COLOR WARS" mark on any product or service.

RESPONSE:

REQUEST 10: Produce representative specimens of each label, container, trade dress, wrapper, packaging, letterhead, sign, catalog, brochure, or other materials used to advertise, market, sell, promote, or otherwise commercialize any of Applicant's "COLOR WARS" mark products or services.

OPPOSER'S FIRST REQUEST FOR PRODUCTION TO APPLICANT

Page 5

RESPONSE:

REQUEST 11: Produce all documents and things relating to the geographic areas where products or services relating to Applicant's "COLOR WARS" mark are advertised, marketed, sold, or promoted and the length of time each product or service has been advertised, marketed, sold, or promoted in each area.

RESPONSE:

REQUEST 12: Produce all documents and things relating to the distribution channels through which products or services relating to Applicant's "COLOR WARS" mark are advertised, marketed, sold, or promoted.

RESPONSE:

REQUEST 13: Produce all documents and things relating to the classes of customers to whom You advertise, market, sell, or promote products or services relating to Applicant's "COLOR WARS" mark.

RESPONSE:

REQUEST 14: Produce all documents and things relating to the yearly dollar and unit volume of sales to date and projected future dollar and unit volume of sales for each of Applicant's "COLOR WARS" mark products or services.

RESPONSE:

REQUEST 15: Produce all documents and things relating to variable and fixed costs for sales of products or services relating to Applicant's "COLOR WARS" mark.

RESPONSE:

REQUEST 16: Produce all documents and things relating to gross and net profits from sales of products or services relating to Applicant's "COLOR WARS" mark.

RESPONSE:

REQUEST 17: Produce all documents and things relating to the yearly cost to You of advertising, marketing, selling, and promoting products or services relating to Applicant's "COLOR WARS" mark.

RESPONSE:

REQUEST 18: Produce all documents and things concerning Your past, present, and future plans to advertise, market, sell, or promote products or services relating to Applicant's "COLOR WARS" mark.

OPPOSER'S FIRST REQUEST FOR PRODUCTION TO APPLICANT

Page 6

RESPONSE:

REQUEST 19: Produce representative specimens of all advertising and other promotional materials for products or services relating to Applicant's "COLOR WARS" mark.

RESPONSE:

REQUEST 20: Produce all documents and things relating to Your yearly expenses to date and planned future expenses corresponding to each type of advertising and promotion used for products or services relating to Applicant's "COLOR WARS" mark.

RESPONSE:

REQUEST 21: Produce documents and things relating to Opposer's products or services utilizing the "Color Wars" mark.

RESPONSE:

REQUEST 22: Produce all documents and things You contend supports Your contention that Applicant's "COLOR WARS" mark does not resemble "COLORWORX[®]" when used on or in connection with Your goods and services.

RESPONSE:

REQUEST 23: Produce all documents and things You contend supports Your contention that registration of Applicant's "COLOR WARS" mark will not injure Opposer by causing the trade/or purchasing public to be confused and/or deceived.

RESPONSE:

REQUEST 24: Produce all documents and things You contend supports Your contention that registration of Applicant's "COLOR WARS" mark will not injure Opposer by causing the trade/or purchasing public to be confused and/or deceived into believing that Applicant's Goods are those of Opposer or are sponsored by Opposer.

RESPONSE:

REQUEST 25: Produce all documents and things You contend supports Your contention that registration of Applicant's "COLOR WARS" mark will not injure Opposer by placing a cloud over Opposer's title to its "COLORWORX[®]" mark.

RESPONSE:

OPPOSER'S FIRST REQUEST FOR PRODUCTION TO APPLICANT

Page 7

REQUEST 26: Produce all documents and things You contend supports Your contention that Applicant's "COLOR WARS" mark is not the same, or substantially the same, as Opposer's mark "COLORWORX[®]" including in visual appearance and in pronunciation.

RESPONSE:

REQUEST 27: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 5 of Opposer's First Set of Interrogatories to Applicant.

RESPONSE:

REQUEST 28: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 6 of Opposer's First Set of Interrogatories to Applicant.

RESPONSE:

REQUEST 29: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 7 of Opposer's First Set of Interrogatories to Applicant.

RESPONSE:

REQUEST 30: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 8 of Opposer's First Set of Interrogatories to Applicant.

RESPONSE:

REQUEST 31: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 9 of Opposer's First Set of Interrogatories to Applicant.

RESPONSE:

REQUEST 32: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 10 of Opposer's First Set of Interrogatories to Applicant.

RESPONSE:

REQUEST 33: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 11 of Opposer's First Set of Interrogatories to Applicant.

RESPONSE:

REQUEST 34: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 12 of Opposer's First Set of Interrogatories to Applicant.

RESPONSE:

REQUEST 35: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 13 of Opposer's First Set of Interrogatories to Applicant.

RESPONSE:

REQUEST 36: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 14 of Opposer's First Set of Interrogatories to Applicant.

RESPONSE:

REQUEST 37: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 15 of Opposer's First Set of Interrogatories to Applicant.

RESPONSE:

REQUEST 38: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 16 of Opposer's First Set of Interrogatories to Applicant.

RESPONSE:

REQUEST 39: Produce all documents and things relating to the information requested to be identified in Interrogatory No. 17 of Opposer's First Set of Interrogatories to Applicant.

RESPONSE:

OPPOSER'S FIRST SET OF INTERROGATORIES TO APPLICANT

To: Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, 1 Mirboo Court, Dallas, Victoria 3047, Australia.

Ennis, Inc. ("Opposer") serves these interrogatories on Joel L. Beling d/b/a Supa Characters Pty Ltd ("Applicant") as authorized by Federal Rule of Civil Procedure 33 and Trademark Rule 2.120(d), 37 C.F.R. § 2.120(d). Applicant must serve an answer to each Interrogatory separately and fully, in writing and under oath, within 30 days after service.

DEFINITIONS AND INSTRUCTIONS

The following terms have the following meanings, unless the context requires otherwise:

OPPOSER'S FIRST SET OF INTERROGATORIES TO APPLICANT

PAGE 1

1. "Opposer" and/or "Ennis" as well as a party's full or abbreviated name or a pronoun referring to a party, means the party, and where applicable, the party's agents, representatives, officers, directors, employees, partners, corporate agents, subsidiaries, affiliates, or any other person acting in concert with the party or under the party's control, whether directly or indirectly, including any attorney.
2. "You" or "your" means Joel L. Beling d/b/a Supa Characters Pty Ltd, Applicant, as well as its agents, employees, and all other persons acting on behalf of Applicant or its successors, predecessors, heirs, beneficiaries or assigns.
3. "Communication" means the transmittal of information in the form of facts, ideas, inquiries, or otherwise.
4. "Identify (person)." When referring to a person, "identify" means to give, to the extent known, the person's full name, present or last known address, telephone number, and, when referring to a natural person, the present or last known place of employment. Once a person has been identified in compliance with this paragraph, only the name of that person needs to be listed in response to later discovery requesting the identification of that person.
