**CONSENT MOTION TO AMEND APPLICATION  
AND BRIEF IN SUPPORT THEREOF**

Applicant NexID Biometrics LLC (“NexID”) hereby moves, with consent of Opposer, to amend Application Serial No. 86/234,336 (the “Application”) as follows:

1. Applicant moves to amend the services listed in the Application for Class 009 to read as follows:

Computer software for processing digital images, such software only to be offered as embedded technology for use by fingerprint sensor manufacturers and their system-integration customers, and only to be offered or sold to manufacturers of biometric sensor technologies; manufacturers of biometric devices that scan, capture, or otherwise collect biometric information; manufacturers of devices that incorporate biometric sensor technologies; or integrators of the above manufactured products and technologies to create stand-alone products

Amending the services listed for Class 009 of the Application will not require republication. As originally filed, the description for class 009 reads:

Computer software for processing digital images

In contrast, the amended description for class 009 reads:

Computer software for processing digital images, such software only to be offered as embedded technology for use by fingerprint sensor manufacturers and their system-integration customers, and only to be offered or sold to manufacturers of biometric sensor technologies; manufacturers of biometric devices that scan, capture, or otherwise collect biometric information; manufacturers of devices that incorporate biometric sensor technologies; or integrators of the above manufactured products and technologies to create stand-alone products

As shown, the amended description is directed to the same services, including the original exact verbiage, “computer software for processing digital images”, but is now being narrowed in scope. Therefore, amending the description of services listed for Class 009 in the Application would not change the commercial impression of the applied-for mark, and re-publication of the mark is not necessary.

For at least the foregoing reasons, Applicant respectfully requests that the proposed amendment to the applied-for mark listed above be accepted.

Dated this 19<sup>th</sup> day of November, 2015.
