MASONRY-METAL

continued from page 16

is used, allowances must be made for internal gutters to allow the roof to drain.

In addition to the control and expansion joints normally required in a masonry wall, other movement joints must be constructed at a metal building's corners. The movement joints should be sized to allow one wall to deflect at its hinge without interference from the adjacent wall, which, acting in shear, would restrict such movement. Without movement joints, masonry corners in metal buildings would crack.

Coordination is crucial

When masonry and steel framing are used together in conventional building, a single entity is responsible for detailing and engineering both materials. The situation is different, however, when the steel framing is "pre-engineered." In a hybrid building, the masonry may be engineered and detailed by a consulting architectural or engineering firm and the steel by a metal building system manufacturer. This requires careful attention to coordinate the project and make sure the separately designed elements work together. While all members of the design and construction team must cooperate, ultimate responsibility for coordination could reside with either the project architect/engineer or the metal building dealer/builder; their contractual obligations in this area must be carefully spelled out with the project owner.

Who determines erection sequence and whether or not the masonry walls will act as shear walls? Who details footings and connections? How can you assure that masonry walls are plumb and square when metal building standards permit relatively broad dimensional tolerances? These are just a few of the questions that must be answered in preconstruction conferences and shop drawings. Your first experience with a masonry-metal hybrid may take a little extra time upfront for coordination. But like planning a dinner party, attention to details will assure that everyone involved has a satisfying experience. □

There's still time to register for seminars

You can still register for seminars offered at this year's World of Concrete. Stop by the registration area and fill out the proper form. The cost is $115 per person, per seminar.

There were 27 new seminars added this year, 16 of which were held Sunday, Monday, and yesterday.

Only 11 seminars left

The remaining seminars are:

- Basics & Repair of Post-Tensioned Concrete Structures (Seminar 23-58)
- Getting the Most From Your Power Trowel (Seminar 23-62)
- Roller Compacted Concrete Pavements (Seminar 23-63)
- How to Turn Your Crew Into a High Performance Team (Seminar 23-66)
- How to Find and Hire Top Talent (Seminar 23-67)
- Repairing Residential Walls (Seminar 24-70)
- Successful Use of Troubleshooting Techniques (Seminar 24-71)
- Shotcrete Repair (Seminar 24-73)
- Scaffold Erection, Use and Dismantling (Seminar 24-74)
- How to Build Competitively and Profitably With Insulated Concrete Forms (ICF's) (Seminar 24-78)
- How to Motivate and Retain Employees (Seminar 24-82)

What you learn at the seminars you can put to work immediately—giving you an advantage over the competition.□

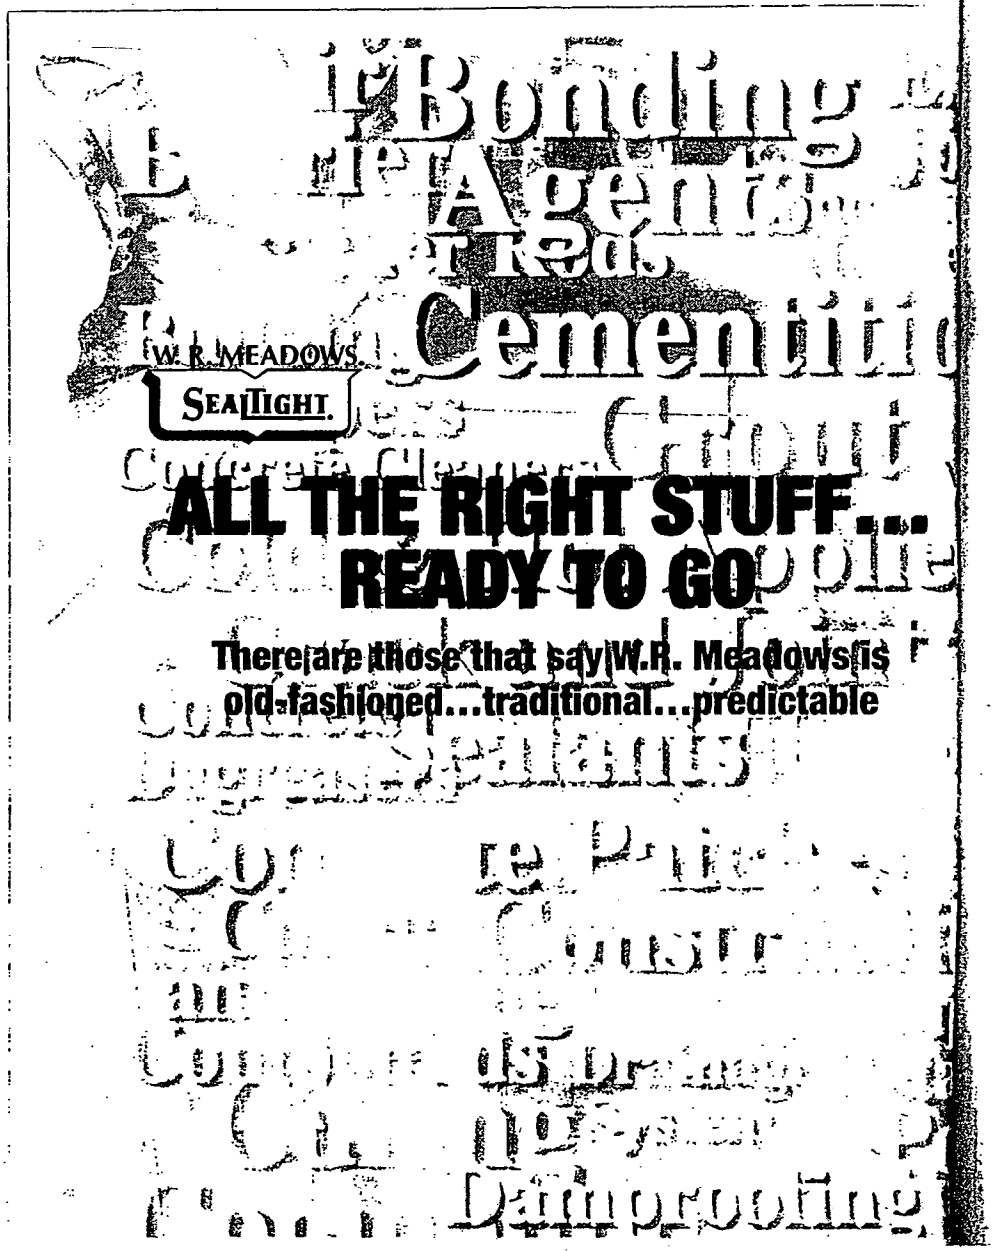

Exhibit News

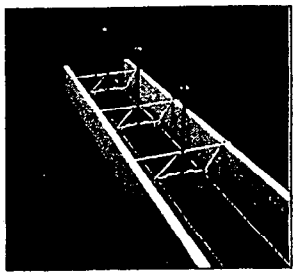
PROTECTS MIXER DRUM FINISH

RoMix Chemical & Brush Inc. (Booth 9344) has developed Brighten-Up #50, a spray-applied foam that seals, protects, cleans, and brightens the finish of a mixer drum. This product also can be used on hoppers, chutes, rear-support structures, truck framework, and inside the back rings. It works best when applied with the company's Mega-H O System, designed to assure proper dilution and give maximum coverage and vertical cling to the drum. The system operates from water pressure and provides a

powerful jet stream with rinse setting. A 3-foot spray wand and 50-foot hose are standard. Options include wall- or drum-mount units and multiproduct valves (up to 4).

DEVICE KEEPS REBAR IN PLACE

By holding #4 and #5 horizontal rebar in place and #4 and #5 vertical rebar in multiple positions, the Rebar Buddy is said to reduce labor and material requirements for placing reinforcement in continuous-spread footings. It also eliminates the need for brace work, allowing quicker concrete placement and rodding, according to the manufacturer *Northwest Accessories Inc. (Booth 8586).*



Models are available for four footing depths and widths: 6x12 inches, 8x16 inches, 10x18 inches, and 12x24 inches. The 10x18-inch model can be adapted also to work in a 10x20-inch footing. The company seeks distributors from across the nation for the product.

ACHIEVE ACCURATE GRADE, SLOPE

AGL Lasers (Booth 4025) showcases the EZ-Blade system, which automatically adjusts the grader blade during operation to achieve proper slope or uniform grade over an entire job. Set the desired percent of slope by positioning a patented Sonic-Ski over the reference (a

stringline, curb, or existing pavement) and pressing the "set" button. With a proportional laser receiver, which is used in place of the ski for parking lot and street jobs, the operator can easily set a reference from inside the cab without having to find the on-grade area. Within the cab is a compact control box with large, dual LED displays that show slope or elevation for each side of the blade even during manual operation.

MIXER DRUM

This mixer drum for concrete trucks from *TEMCO (Outside Exhibits, Booth 11023)* is powered by a Sundstrand

Sauer or Eaton ZF drive system, warranted for 5 years. Drivers can control both drum speed and direction with the flick of a switch on the hand-held pen-

"Our customers say: "What a relief"

In today's chaotic economic market, there is a battle going on in America's construction industry. Off-shore firms are swallowing up the old line product manufacturers. Long-established, local construction distributors are giving way to regional players. Ever changing company names, unproven service from people you don't know at all add to uncertainty and frustration for our customers. Fancy business policies and philosophies don't cut it in our industry. W.R. Meadows believes that "Just in Time" just isn't good enough! Dedicated, independent distribution is still this country's most cost efficient means of getting products and services to the professional contractor.

At W.R. Meadows, our word is a bond... a handshake is a commitment. In this time of turmoil, you need something stable you can count on...we strive to provide a beacon of light in the darkness. Like the gasoline station of yesteryear, we're still full-service...and have been since 1926. It works well for us and for our network of valued independent distributors. We firmly believe that all business is local. For this reason, W.R. Meadows provides fully stocked branch facilities with manufacturing capabilities and warehouses strategically located across North America to provide instant product access and service to our distributors and their customers.

From a technological standpoint, we can expound on an impressive list of innovative and unique SEALTIGHT® Product "firsts" in the industry. W.R. MEADOWS' popular GREEN LINE® of over 60 VOC compliant, environmentally-friendly and responsible products preceded the 1999 Federal EPA Architectural Coatings Rule by nearly twenty years. We'll be opening the new millennium with a major technological breakthrough in a cold-applied random crack and joint sealant. It promises to meet specification requirements unattained by any other sealant on the market. More new products and innovations will follow in 2000.

Old fashioned?...
Traditional?...Predictable?...

You be the Judge!

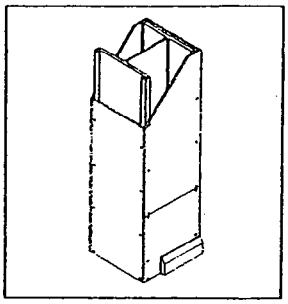
EXHIBIT NEWS

continued from page 45

dant, which comes standard. The lighting system features Trucklite sealed lights, a junction box, and an electrical harness. Chute cradles are available for vertical storage and fender and side mounting. Other standard features are a 20-gallon oil tank integrated into the front pedestal, hydraulic hoist-chute controls, and an air actuary locking system. Options include fender taillights, chute control, air-operated chute lock, and roll-formed steel or aluminum fenders.

FIRE-PROTECTION BOARDS

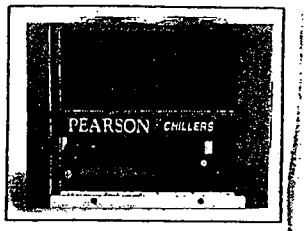
Parker International Ltd. (Booth 6569) offers two Knauf brand products, said to



provide excellent natural fire resistance and fire tested to BS 476: Part 4. Superpanel is a tough, moisture-resistant board (6- to 12-mm thick) suitable for fire-rated systems up to 4 hours. Fireboard (shown) is made from glass-reinforced gypsum (15- to 30-mm thick) and is suitable for frameless cladding to structural steel. It provides up to 2 hours fire rating and can be fixed to itself, eliminating the need for internal steel framing. Both products are available in 4x8-foot and 4x12-foot sheets. They are designated as Class O building materials under the Building Regulations Approved Document B.

AIR-COOLED WATER CHILLERS

Encompassing 14 models, the HC Series can chill from 1,100 to 6,000 yards of concrete batch water or aggregate per day at an operating cost as low as 10 cents per yard, according to *Pearson Heating Systems Inc. (Booth 7694)*. All units feature a low-temperature cutoff with electric heaters to protect against freeze-up conditions. They are rated for outdoor operation at 125 F and have en-



ergy-efficiency ratios up to 10.4 for full loads and 13.5 for partial loads. The chillers come with dual-refrigerant circuits, a self-diagnostic module with display, and an air-cooled condenser. Other features include multiple compressors, a compressor oil safety switch, and electronic expansion valves with 15 psig pressure differential.

ALL-NATURAL SEALER FOR CONCRETE, WOOD

NMW Inc. (Booth 8596) makes Pro-Tech 2000, an all-natural sealer for concrete and wood decks that is water-based and contains no solvents. The sealer's patented formulation uses a proprietary base material that makes it environmentally safe enough to spray on all surfaces without damaging vegetation or harming small animals, claims the manufacturer. Applications include pool decks, patios, lattice, piers, boat decks, and interior sealing jobs. The sealer has a natural yellow tint, can be spray- or brush-applied, and dries to a clear finish within 30 to 90 minutes. It covers 100 to 300 square feet per gallon, depending on surface porosity, and comes in a 5-gallon container.

LONG-REACHING BOOM PUMP

The 46X-Meter is the longest-reaching concrete boom pump under 80,000 pounds GVW, claims *Putzmeister America (Booth 1901)*, enabling it to be mounted on a four-axle chassis. The four-section, roll-and-fold machine pumps up to 260 cubic yards per hour and offers 149-foot vertical and 138-foot horizontal

reaches, making it ideal for both major construction projects and long-reach above- or below-grade pours. A 0.16 pump cell, delivering up to 210 cubic yards per hour, is also available. All sections are equipped with 5-inch-wide delivery lines induction-hardened for longer wear and peak performance. According to the company, the 46X-Meter is the first and only unit in the 150-foot class to feature a compact, 27-foot diagonal X-outrigger design.

HEAVY-DUTY-FRAME CAULKING GUNS

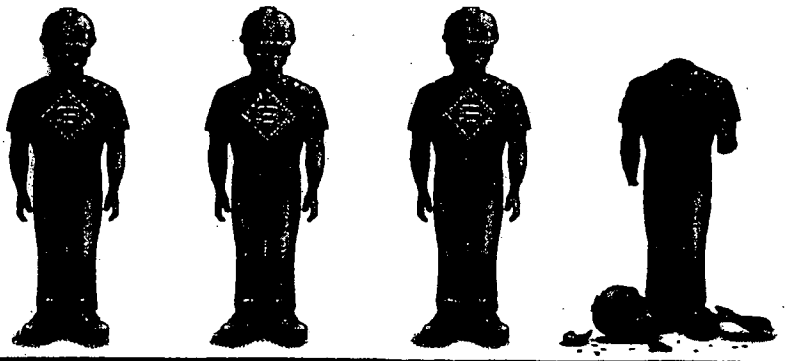
VISIT BOOTH #3251-3451

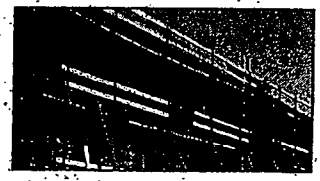


CONTRACTORS PREFER SYMONS 3 TO 1*

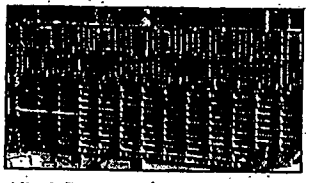
Symons is the solid choice in labor-saving concrete forming systems for almost any application. Visit the Symons booth 3251/3451 for cost-effective solutions that can improve your forming operation.

Symons is the acknowledged leader for forming systems with innovative features that increase profitability and productivity at jobsites around the world. In addition to our standard line of concrete forming systems, Symons is proud to introduce two new waterless systems: the Alisply™ and Logo™ Forming Systems. You can see these new systems, the Steel-Ply Layout CD-ROM and other cost-effective solutions at the Symons booth #3251-3451 at the World of Concrete.

NEW QUICK-CLAMP SYSTEMS FOR FAST-PACED GANGFORMING



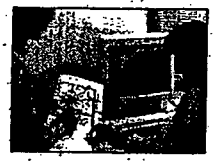
Logo™ Forming System
A high-strength, waterless system featuring a wedge clamp connection that eliminates the need for nuts and bolts. Its extremely durable form design is assembled and stripped quickly and accurately.



Alisply™ Forming System
A heavy-duty galvanized steel frame provides the strength for large contact areas and fast pour rates. A hand-operated clamp connection eliminates the need for tools and alignment walers.

NEW STEEL-PLY® LAYOUT AND BILL OF MATERIAL CD

Planning Software simplifies forming operations. This quick and easy to use Windows-based program provides complete Steel-Ply layouts, without extensive training or CAD experience. Wall dimensions, footing steps and construction joints are entered and the layout is determined automatically. The program will even design a bill of material from available inventory to maximize equipment utilization.



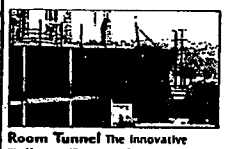
SYMONS
A Dayton Superior Company

200 East Touhy Avenue, Des Plaines, IL 60018 800 800 7966 · www.symons.com

Steel-Ply® The most popular modular forming system, with over 80 different panel and filler sizes available.

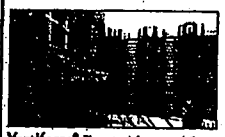
Max-A-Form® The self-spanning system for forming almost any column, pier cap, wall or plate girder application.

Symons Silver® 2000 The lightweight aluminum forming system preferred by more residential contractors.



Room Tunnel The innovative "half tunnel" system for productive forming of repetitive room designs.

Garage Beam A comprehensive planning and forming system for economical, post-tensioned parking structures.



Versiform® The steel frame, 3/4" plywood face gangforming system for commercial and industrial construction.

Design-Crete™ Permanently imprint any newly poured concrete surface with stone, brick, or tile textures in a variety of colors.

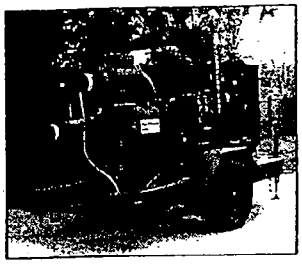
Line with the 59RCT caulking gun, featuring a full-barrel design (2-inch inside diameter) that accepts sausage packs or bulk loads up to 1 quart or 30 ounces. It comes standard with a ¾- or ½-inch nozzle and can apply even the most viscous materials (caulk, sealant, mastic, grease, ink, and paste). The gun's rigid one-piece frame is constructed of heavy-duty (.060) steel. A pneumatic model, 59A, is available. According to the company, all guns in this line provide high pressure with minimal trigger movement.

CLIP-ON TOOL HOLDER

By clipping the Bigg Lugg to his or her toolbelt, waistbelt, or pants pocket, a contractor can hang a heavy tool at his or her side without worrying that it will drop and be damaged. According to *Prazi U.S.A. (Booth 8589)*, the patented device is strong enough to hold a cordless drill, nail or staple gun, or hammer securely in place and can be used by left- and right-handed people. Its adjustable soft aluminum hook allows different sized tools to be snapped in and out easily. When not in use, the hook can be moved to the side so it won't get hung up on a ladder or obstruction.

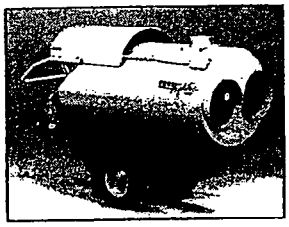
COMPRESSOR-ASSISTED PUMPS

Thompson Pump & Mfg. Co. Inc. (Booth 7288) introduces a new line of pumps featuring the EnviroPrime system, which effectively and efficiently handles dry prime applications without any discharge of pumping effluent onto the ground. The key system component is a mechanical air/water separator device that installs on a centrifugal pump and prevents carryover of the pumping fluid into the venturi and consequently onto the ground. Five pump models are available (3-, 4-, 6-, 8-, 10, and 12-inch-wide outlets), with maximum capacities ranging from 25,500 to 380,000 GPH and lift heights to 28 feet. All units handle large solids up to 3 inches in diameter, feature include automatic dry priming and re-priming, and come with tungsten or silicon carbide mechanical seals.



INDIRECT-FIRED HEATERS

Both models of portable Frost Fighter heaters (OHV 350 and OHV 500) are now available as oil-fired units or units modified to burn either propane or natural gas. According to *Industrial Commercial Equipment Mfg. Ltd. (Booth 7870)*, the LP/NG models are quieter and more efficient with a higher CFM output (350,000-BTU and 450,00-BTU capacities, respectively). A switchover valve lets operators change from propane to natural gas easily. Quick-connect ducts attach to the front cap outlets and enable the user to disperse heated air over a large area with an optional remote thermostat for maintaining desired temperature levels.



ELIMINATES CONCRETE BUILDUP

Prime-A-Pac (Booth 2570) introduces Crete-Buster, created specifically to remove built-up concrete on tools and equipment. The biodegradeable product contains no muriatic acid, salts, or chlorides and should be used undiluted. Brush- or spray-apply it to mixer drums, back rings, hoppers, and any other area needing cleaning. Wait 15-20 minutes then brush all surfaces thoroughly. Reapply and let stand, then brush again to eliminate heavier buildup. Keep repeating the process until all the buildup is gone, then rinse completely. When used properly, the product is nonhazardous to paint, chrome, glass, rubber, and skin. It shouldn't be used in the cab as a regular cleaner but can be used occasionally to remove cement dust and light buildup.

PREVENTS EXCESS MORTAR DROPPINGS AT WALL BOTTOM

Because it lets mortar droppings accumulate on two different overlapping levels, the Hook Shield prevents excess buildup at the flashing level of a cavity wall. *Masonry Reinforcing Corp. of America (Booth 7648)* says the Shield maintains 16 inches of clearance between courses,

Booth 1772

Darrell Thomas, General Manager of Alaska Power and Telephone Wireless, Inc. has been using Isuzu engines to power an 800 MHz repeater site located atop a high mountain on Prince of Wales Island in southeast Alaska.

"We've had no problems with our Isuzu engines in 8 years. It's a good thing too, because the only way to reach the site is by helicopter, and we often have to dig down through 8 feet of snow to do routine service. We love the Isuzu engine's reliability, because at $500 to $695 an hour for helicopter time, you definitely want to make the fewest number of trips possible.

"We have two Isuzu engines at the site, one runs 24-hours a day for 30 days, and then we switch over to the other engine for the next 30.

"We figure each engine has racked up well over 34,000 hours in 8 years, and we've never touched them except for routine maintenance. As far as I'm concerned, these engines are close to perfection."

Need a 15 hp to over 300 hp engine you can depend on? Call us at (800) 492-5065 ext. 6080 for the name of your Isuzu distributor, or visit us online at www.isuzuengines.com.

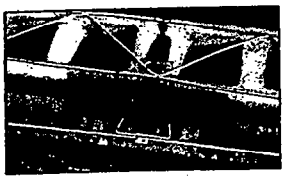
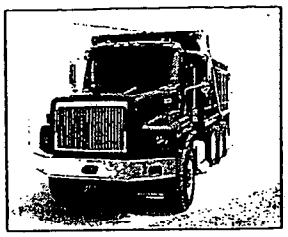
so it will not compress like mesh products and will allow free air flow. The standard Shield is a piece of plastic 12 inches long by 3 inches wide, although a 16-inch-long version is available for use on brick-and-steel stud backup walls. Brick hooks are inserted into the



Shield's punchouts so the bent-up edges rest over the hooks, and the assembly is installed in the eyelets protruding from the block or insulation. The shield should be spaced so it overlaps 4 inches and its front edge inserted into the brick mortar joint as much as necessary.

INTEGRATED DUMP TRUCK

Navistar International Transportation Corp. (Booth 461) says its Series 5000i dump truck is an integrated machine—its dump body, hydraulic components, and controls are built as a complete product. The benefit of concurrently designing, engineering, and assembling a truck, according to the company, is increased reliability and durability. Shipped within 60 days of ordering, the truck is available with a steel dump



body from 15 to 17½ feet, a 24-inch cab shield, 10-inch dump aprons, and rigid and steerable third axle and quad axle configurations. Model 5600i features a set-back front axle for optimum maneuverability, and model 5500i features a 28-inch bumper-to-axle setting for maximum bridge formula payload.

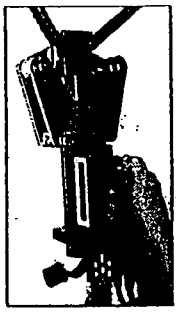
COMBINATION FORMING SYSTEM

Made of extruded aluminum, the Combination Form can be easily adapted for caps, footings, or conventional slabs, according to *Western Forms Inc. (Booth 1635)*. The form can be adjusted to grade and then held there with the

use of a standard straight wedge and #4 rebar or ½-inch grade stake. It is 2.125 inches wide and 7.874 inches high, although form height can be adapted by the use of different sizes of dimensional lumber. Lumber can be placed across the top of the footing to act as a spreader to maintain footing width. Clips hold the cap form in place. The form will not bow under pressure, lays flat for easy stacking and transporting, and is available in any length.

REBAR PULL BENDER

EZE Bend Inc. (Booth 3488) has added the RBBB-10 to its line of hydraulic bending tools for in-place rebar. Unlike traditional benders, the RBBB-10 features a cradle in its powerhead that pulls against the rebar to bend it, increasing operator safety by preventing rebar ends from moving towards the operator. Bending action stops instantly when the operating switch is released. By rotating the powerhead (up to 90 degrees), operators can bend in-place vertical rebar quickly and easily. The portable and lightweight (19 pounds) tool handles #3 to #6 rebar and is designed to operate in any position and in sand, dust, and mud. Ten- and 25-foot extension hoses are optional.



WATERPROOFING SEALER

Tuff Deck is an acrylic silicone sealer formulated to provide a low-sheen, hard protective finish on unpainted, etched concrete or porous masonry surfaces. Made by *DYCO Paints Inc. (Booth 7570)*, the product resists fading, cracking, peeling, and mildew. Recommended uses include patios, sidewalks, driveways, stucco, concrete block, pool decks, and tennis and shuffleboard courts. The sealer should be stirred vigorously before being applied with a brush, roller, or spray. Two coats are recommended, the first one thinned with a company reducer at a 1:8-ratio. Allow it to dry at least 4 hours before applying the second coat.

FORM RELEASE AGENT

Pameroy FreForm (Booth 8291) offers contractors FreForm BICI #200, a water-based release agent that contains less

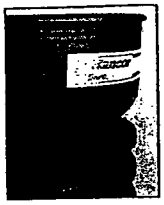
continued from page 50

than 450 grams/liter of VOC and complies with new EPA regulations (effective last September). A concentrate that

mixes with water, BICI #200 can be sprayed on forms, molds, or equipment. Once applied, the water evaporates and leaves the chemical concentrate on the forms as a waxy appearance. This concentrate reacts chemically with alkali in the concrete poured against the treated surface, forming a temporary soapy film that prevents sticking and provides a clean release without staining or leaving residual. Forms can be coated 2 weeks prior to use, according to the company.

REDESIGNED DRAINAGE PIPE OFFERS QUICKER INSTALLATION

Sure-Lok corrugated polyethylene pipe features a Rolled Rim coupling system that strengthens the outer edge of the pipe's bell and increases its flair, allowing for faster, easier installation. Made by *Hancor Inc. (Booth 8389)*, the redesigned pipe comes in 20-foot-long sections and diameters of 10 to 30 inches (F477) or 12 to 30 inches (WT). Both types meet AASHTO M294, Type S specifications and are HS-25 (highway traffic load) rated with a minimum of 12 inches of cover. The pipe will not rust or crumble, can withstand repeated freeze-thaw cycles and sub-zero temperatures, and resists chemicals, road salts, motor oil, and gasoline. Original Sure-Lok pipe is available in 4- to 8-inch and 36- to 60-inch diameters.

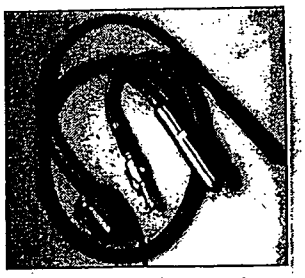


EPOXY COATING/ADHESIVE

Abatron Inc. (Booth 5991) makes a two-component epoxy system for bonding new and old concrete; bonding aggregates to wet, underwater, or cold surfaces; and casting resin for filling, embedding, and resurfacing concrete and masonry. System components are Abocast 8005-6 resin and Abocure 8005-6 converter, which are mixed seven parts to three, respectively. This formulation has a pot life of 30-40 minutes and can be applied in any thickness by trowel, squeegee, paint roller, spraygun, brush, or broom. It can be extended with fillers like sand, gravel, or chips. Full-strength cure is reached in 2-7 days at room temperature or in 30-60 minutes at 80 to 120 C. Heat cure is not needed.

EXTERNAL AND INTERNAL CONCRETE VIBRATORS

Recently introduced by *Vibco Inc. (Booth 2990)* are the SVRL-5500 external vibrator and KA Series of internal vibrators (shown). The SVRL-5500 has 5,500 pounds of force with a frequency of 12,000 vpm and is designed for use on all forms and pipes. It features a chamber to limit air consumption and spring-



steel wearplates that eliminate maintenance of end covers and rotors. KA vibrators come in head sizes of 1¼, 1¾, 2½, and 3 inches and have a frequency up to 15,000 vpm. A spinning steel rotor within the head, the vibrators' lone moving part, creates the centrifugal force and high frequency. Air circulating through the head always maintains a cool operating temperature—even when the vibrator is not submerged in concrete.

BUSINESS MANUAL FOR PAVER CONTRACTORS

The *Interlocking Concrete Pavement Institute (Booth 1246)* is selling The Complete Business Manual for Concrete Paver Contractors, the first book about operating a paver-installation contracting business. Written by Charles Vander Kooi, a construction-industry consultant, the book is 270 pages long and contains 45 figures and tables. It contains four main sections: estimating, people management and field performance, charting a course, and administration/management/finances. The soft-cover book costs $60 for ICPI members, $100 for nonmembers.

FIBERGLASS WALL FOR CONSTRUCTING POOLS

When reinforced with pockets of concrete, Uniwall fiberglass is strong enough to support a pool of circulating water before soil has been backfilled against it, says *Uniwall/Family Fun Corp.*

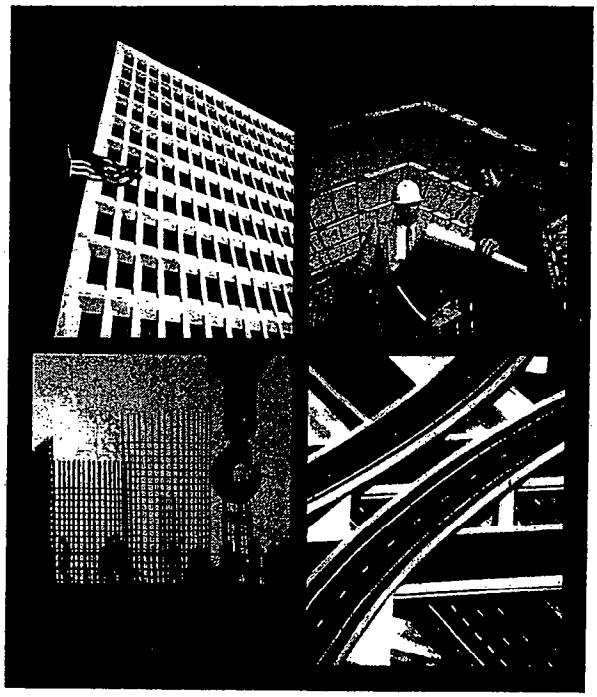
In a World of Concrete...



We Make a World of Difference

For over 28 years Conspec has been making its mark on the concrete construction industry by providing chemicals, cementitious technology, Conflex® expansion joint and epoxies for a wide variety of applications. Conspec is an industry leader in the development and manufacturing of technologically advanced, contractor proven products – products that meet the most stringent specifications including all federal V.O.C. standards. Conspec is more than just a chemical provider, they are a business partner for all your concrete needs. Whether you are a distributor, architect, engineer, or general contractor, Conspec has the expertise and proven products that provide end users excellent value, and ensure our distributors a strong bottom line. For more information on Conspec's full line of concrete products, call 1-800-877-CONSPEC.

EXHIBIT NEWS

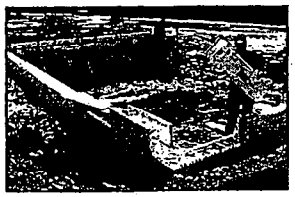
continued from page 52

(Booth 8383). The flexible fiberglass can withstand expansion and contraction and severe horizontal pressure, and it

offers contractors the design freedom of gunite. Made of a polyester-resin material (standard or commercial grades), the fiberglass comes in rolls up to 400 linear feet. The standard grade is 43 inches high and comes in blue or white; commercial grade is 48 inches high and comes in blue. After Uniwall is uncoiled and set in place, the concrete floor, footing, and pockets are poured. Then the floor is coated and preparation made for the deck.

INSULATING CONCRETE FORMS

Lite-Form Intl. (Booth 8077) says its Fold-Form insulating forms offer several benefits to concrete construction contractors. Forms come in pre-assembled 1x4-foot sections that have fully interlocking edges for a precise fit. Their design allows a steel stiffener to be snapped quickly into forming ties to assure a straight, precise wall requiring a



minimum of outside braces. Also, patented tie designs insure that every assembled form can take the abuse of pumped or poured concrete, and that precise 90- and 45-degree corners are self-contained within the form. When in place, the forms produce smooth, monolithic walls that quickly accept all types of residential and commercial rebar.

WATERSTOP SEALANT

Sika Corp. (Booth 2535) says its SikaSwell S sealant is caulked onto both horizontal and vertical construction joints and pipe penetrations in lieu of conventional waterstops. When contacted by water, the sealant swells up to 100% greater than its initial volume to create a compression seal within the joint to prevent water flow. The one-part sealant also is said to eliminate heat welding, special fittings, split-forming, and tying-off to rebar. Its easy installation with a standard caulking gun makes the product ideal for watertight construction joints between new and existing concrete. SikaSwell S is polyurethane-based and contains no bentonite, eliminating risks due to washout, wet/dry cycling, and uncontrolled swelling. It is packaged in 20-ounce uni-pac sausages.

STAIN NOW COMES IN MORE THAN 150 COLORS

Users of the PERMA-CRETE system can now purchase the component tint-base sealer stain in any of more than 150 colors: an impressive array of reds, greens, blues, and yellows, along with the still-standard basic earth tones. According to *PERMA-CRETE Resurfacing Products (Booth 7883)*, the sealer stain also has enhanced application properties, durability, and shelf life. Other system components are a matrix mix of high early-strength concrete compounds and additives, and a bonding additive that is mixed with the matrix. Applied over existing concrete, masonry, wood, and other surfaces, the system is said to have a compressive strength of over 6000 psi once cured.

CONTROL FLOW OF CONCRETE POUR

ShuteValve, a flow-control device that attaches to the end of a truck chute, helps contractors pour concrete more cost-effectively by eliminating waste and cleanups, claims *Forjam Inc. (Booth 7238).* Attached and detached at the jobsite, the device is said to provide more precise control over concrete flow than that offered by controlling the barrel speed of the mixer truck. Simply by locking and unlocking the device's door, an operator or contractor can totally stop concrete flow whenever necessary—such as when forms or walls are full or the truck or chute are moving. Intermediate positions allow fine tuning of the flow. All components of the device are made of aircraft alloy aluminum and carbon steel for long life.

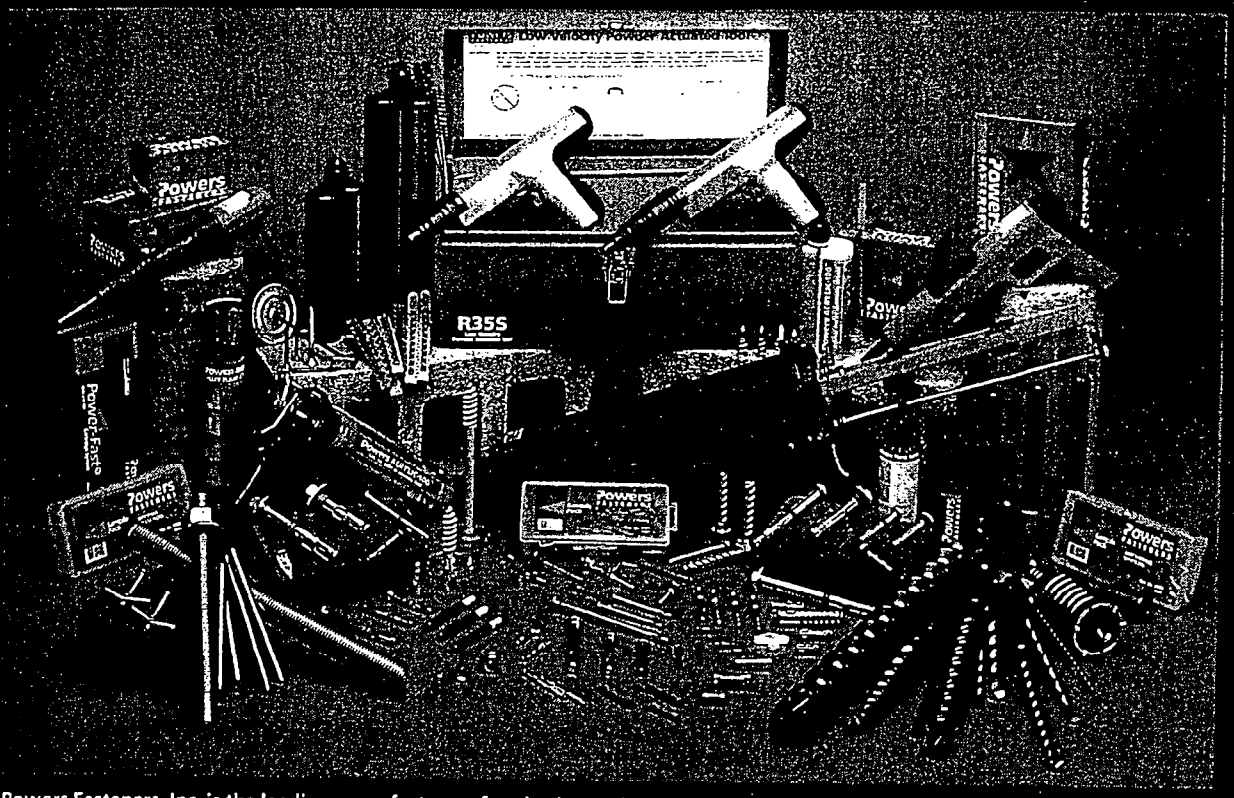
ONE COMPLETE SOURCE FOR ALL YOUR ANCHORING AND POWDER FASTENING NEEDS



Powers Fasteners, Inc. is the leading manufacturer of anchoring and powder fastening systems. Originally founded as the Rawlplug Company in 1921, Powers offers the industry's broadest selection of anchoring products along with an ever growing line of powder and gas actuated fastening systems. Our company's mission is to provide the industry with the best innovative fastening products for concrete, masonry, and other construction base materials. To better reflect our mission today, we've transformed our identity to Powers Fasteners. For the new millennium, Powers is introducing the Wedge-Bolt anchor, a product that will revolutionize the field of anchoring.

The Powers line is distributed through a network of select distributors who can service your every need. They are supported at the job site level by a fleet of Powers Training Vehicles and at the design level by specially trained field engineers and technical representatives. Powers Fasteners provides the widest choice of innovative products for both the designer and constructor along with the best product support!

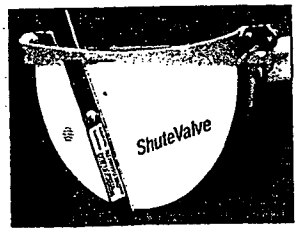
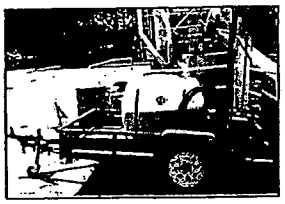
continued from page 54



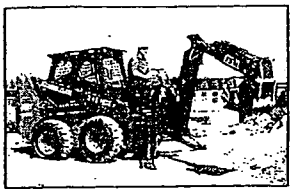
SYSTEMS DISPENSE ADMIXTURES ON THE JOBSITE

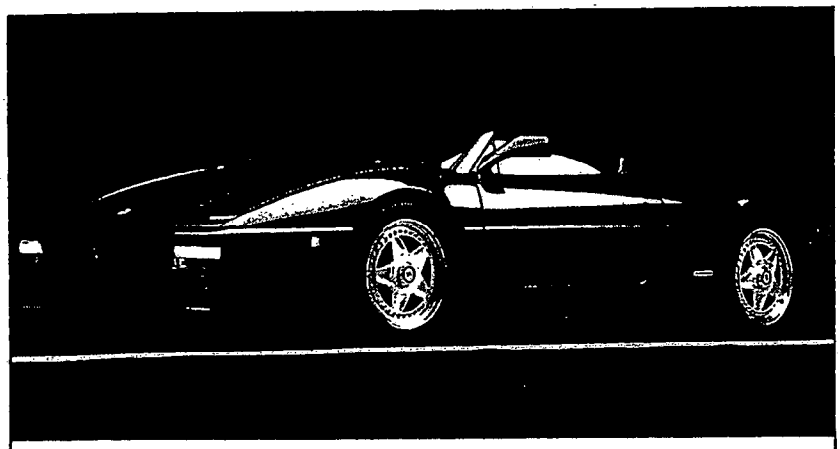
The Euclid Chemical Co. (Booth 6761) introduces two trailer-mounted systems that help ready-mix companies dispense admixtures on the jobsite more efficiently and accurately. The Super Trailer (shown) is designed primarily to dispense admixtures, especially superplasticizers, into ready-mix trucks and can transport up to 225 gallons. Its 50-foot hose and 50-foot power cord let it operate within a 100-foot radius of an electric power supply, or it can be built to operate on compressed air. The Portable Jobsite Trailer is designed for jobs ranging from 100 yards of concrete poured from trucks to 2,500 yards or more mixed at a portable concrete plant. It features tanks for three admixtures, and a fourth can be added.



BACKHOE ATTACHMENT FOR SKIDSTEERS

Thomas Equipment Ltd. (Booth 2577) says its XR911 Xtreme Reach backhoe attachment is retractable, allowing the operator to select either a standard (9 foot) or extended (11 foot) extension. To extend the dipper to 11 feet, the user simply presses down a foot pedal on the operator's platform. The backhoe offers high breakout for excellent productivity in tough conditions, according to the manufacturer. The unit also features smooth-operating, two-lever control and outrigger-type stabilizers. The backhoe mounts to a skid-steer loader's quick-attach system in seconds and comes with four different size buckets.





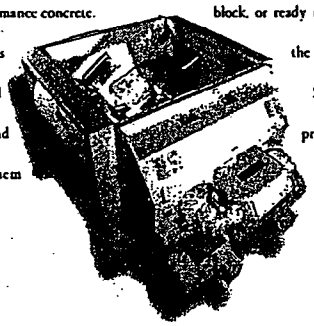
WE'RE CHANGING THE DEFINITION

OF HIGH PERFORMANCE.

When it comes to technologically driven concrete production equipment, Simem twin-shaft mixers give new meaning to the term high performance concrete.

With the fastest mixing times available, as well as unparalleled cement dispersion, shear, and homogenous conversion, Simem mixers and plants provide everything required of today's high performance concrete. From precast, prestress, pipe, block, or ready mix, Simem single-handledly offers the industry's ultimate mixing machines.

Simem mixers and batch plants provide power and precision that are clearly redefining high performance.

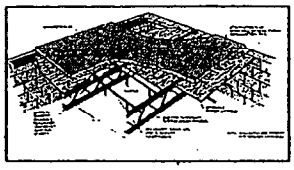


Booth 789

Contact us at Simem North America 8[illegible]-729[illegible], e-mail, or www.simemnorthamerica.com.

COMPOSITE FLOORING SYSTEM

This system consists of hybrid concrete/steel T-beams running in one direction and an integrated continuous slab in the other, according to *Hambro Structural Systems, Div. of Canam Steel (Booth 8477)*. It also features a web system that ties top and bottom chords (bent rods) together and resists vertical shear in a conventional truss manner. The bottom chord (fy 50,000 psi min.)



acts as a tension member in the concreting stage and during the service life of the floor. The patented 13-gauge top chord (fy 50,000 psi min.) acts as a compression member during the noncomposite stage, but in the composite stage is embedded in the concrete, and functions as a continuous shear connector.

LINE OF EPOXY ADHESIVES

Five Star Products Inc. (Booth 6853) announces a complete line of adhesives for repairing and restoring concrete. LV Adhesive is a low-viscosity product used for filling cracks and sealing concrete. Injection Gel, an epoxy gel, fills cracks up to ½-inch wide. Bonding Adhesive bonds fresh concrete to hardened concrete or steel. Anchor Gel is a rapid-setting product for anchoring bolts, dowels, and rods. And Fluid Epoxy is a

high-performance, all-purpose formulation used for skid-resistant surfaces and anchoring. The manufacturer is ISO-9001 certified.

BELOW-GRADE WATERPROOFING MEMBRANE

Install high-strength *Soco-Shield (Booth 8174)* polyolefin film against below-grade concrete walls, under floor slabs, and on footings or horizontal concrete surfaces to shield against water, moisture vapor, soil contaminants, and hydrostatic pressure. The key to the film's

strength is its components—a blend of virgin resins (polyethylene co-polymers) that produce molecular cross-linking. The product has almost twice the puncture resistance of extruded-foam board,

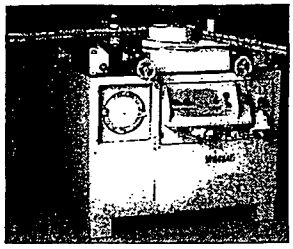
claims the manufacturer. Proper installation requires taping the seams with polyethylene tape (sold in rolls 4 inches wide and 180 feet long). The lightweight film comes in 10- and 15-mil thicknesses and can be knife-cut for quick installation.

PORTFOLIO/PROJECT MANAGEMENT SOFTWARE

Meridian Project Systems Inc. (Booth 3986) has launched Prolog Manager 5.0, a full 32-bit application that lets a company manage all aspects of a project (purchasing, cost controlling, document control, field documentation) in one database. Prolog Manager 5.0 also lets users maintain a master vendor database and create specific project databases in order to import detailed scopes of work into the Buyout Items feature. With the Select Bidders and Send Bid Notices wizards, users can walk through the selection of qualified bidders and the creation of all invitations to bid, as well as the distribution of invitations via e-mail or fax. Prolog Manager 5.0 is Internet-enabled through the company's Prolog Web site.

MACHINES BEND, CUT REBAR

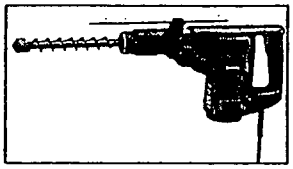
Identical in their outer dimensions, the Model 320 and 400 machines can handle up to 32- and 40-mm-diameter reinforcement bars, respectively, according to *Wedu AB (Booth 8288)*. The control panel is easily visible and accessible and set within its own frame. Both machines can be operated with either a foot pedal or hand-held remote device. An anti-



crushing device, mounted on the counter part roll (or counter part for slim bars), is now optional. The device requires very little space and does not interfere with the actual bending operation. If the operator's hand is close enough to get jammed between the counter part roll and the bar, the hand will touch the contact plate of the anti-crushing device stopping the machine immediately.

ROTARY HAMMER

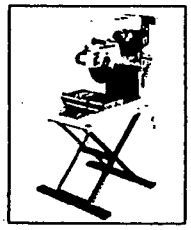
Makita U.S.A. Inc. (Booth 1051) showcases its HR4040C rotary hammer (with spline), capable of drilling holes up to 4¼ inches deep and hammering 1,250 to 2,500 blows per minute. The 13.6-pound tool has an electronic variable-speed-control dial and a no-load speed of 230 to 450 rpm. Its side grip swivels 360 degrees and adjusts to eight positions forward and back. One-touch sliding chuck allows easy bit installation and removal,



and a light indicates when carbon brushes need to be replaced. Other features include double insulation, a large comfortable trigger, and a soft-start electronic switch for smooth starts and constant speed control. Bit grease and a plastic tool case also are standard.

REDESIGNED MASONRY SAW

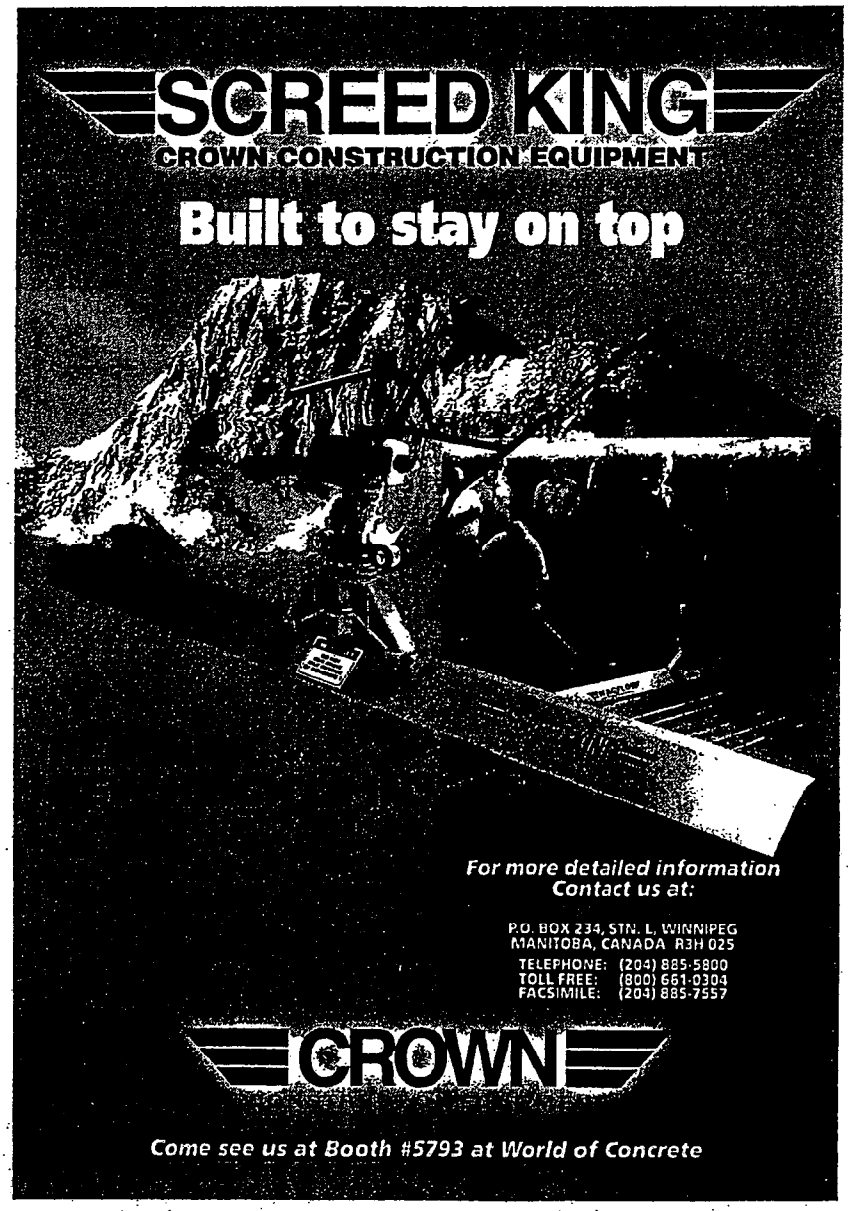
Key features added to the Trak-14 saw include a water tray providing 3 inches more of cutting length and a relocated cutting head pivot arm for cutting of longer pieces of material in a single pass. According to *STOW-Bomag Light Equipment Div. (Booth 801)*, the slide handles and a removable cutting head reduce setup time and allow portability. The saw has a 14-inch blade capacity and 5-inch cutting depth. A high-impact plastic belt guard and cast aluminum conveyor cart reduce the unit's weight. Power options include a 1.5- or 2-hp, dual-voltage electric motor or a 5.5-hp Honda gasoline engine.



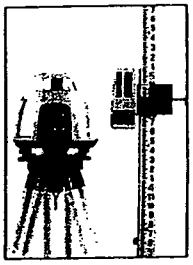
BEAM LASER WITH COMPENSATOR LOCK

David White LLC (Booth 3693) introduces the AutoLaser 900, featuring an

continued on page 59



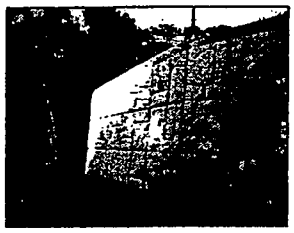
exclusive lock that protects the compensator during laser transport to ensure continuous trouble-free performance. This horizontal beam laser, accurate to ¼ inch at 100 feet, has an automatic



compensation range of 60 arc minutes, exterior range of more than 1500 feet diameter, and interior range of 200 feet diameter. Other standard features include variable-speed beacon rotation of 0 to 600 rpm, an out-of-level LED indicator, a continuous LED battery capacity indicator, durable-plastic housing, and enclosed beacon. Optional accessories include detectors, reflective targets, wall/ceiling mount, tripods, and leveling rods.

FORMLINERS

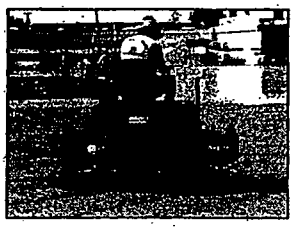
Available from *Concreface International Co. Ltd. (Booth 8386)*, these liners reportedly mount easily to form panels and can be removed without any special tools. They are made of exploded polypropylene (EPP), a lightweight, flexible, reusable material that cuts easily so contractors can create forms with curved surfaces. According to the com-



pany, the liners are ideal for prefabricated panels, beams, columns, retaining walls, bridges, and tunnels because they strip easily and do not leave any flash or form lines on the concrete surface. Standard textures include split stone block, aged sand stone block—random and weaved—river rock, exposed aggregate, split brick, split rock, and split rock random.

RIDE-ON TROWEL

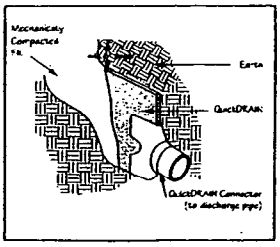
Allen Engineering Corp. (Booth 4645) showcases the Super Pro 450 Rider, a nonoverlapping ride-on trowel that weighs just 1,178 pounds. The trowel features dual 46-inch-diameter rotors that are spun at speeds of up to 185 rpm by a single 42-hp Nissan Engine. It also is equipped with the company's new Super Heavy Duty (SHD) drive line, gear boxes, and spiders for maximum uptime, as well as ergonomically de-



signed steering levers for easy operation. The operator seat adjusts a full 7 inches front to back for maximum comfort, and the seat frame flips up for easy access to the engine, clutch, belts, and drive line.

GEOCOMPOSITE SHEET DRAIN

QuickDRAIN offers a more cost-effective way to drain foundation and retaining walls than conventional perforated pipe/aggregate collection systems, claims *TC MiraDRI (Booth 6083)*. Installed against walls and footings, the product consists of a high-strength geotextile filter fabric with a prefabricated dimple core. The filter allows inward passage of water while retaining soil particles without clogging; the core functions as an edge drain/pipe collec-

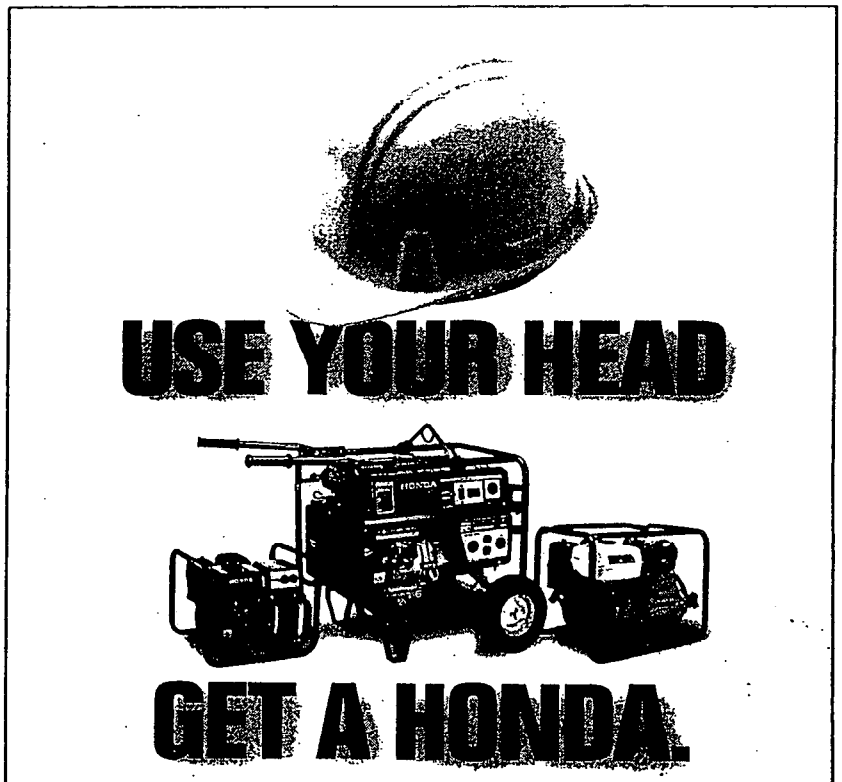


tor to transport groundwater. Dimple configuration is three rows of graduated dimples and eight rows of 1-inch-high dimples. Available in 16-inch-wide by 50-foot-long rolls, QuickDRAIN can be installed in an "L" configuration due to a patented hinged design.

SHEET-METAL CUTTING HEAD

Rodman & Co. Inc. (Booth 7894) makes the Rodman Nibbler, a sheet-metal cutting head that cuts steel, brass, copper, aluminum, plastics, and fiberglass to a 4mm width without distortion, jagged edges, or sparks. Mounted on an electric or pneumatic drill (1,500 to 3,000 rpm), the head adjusts 360 degrees for any application. It cuts corrugated, round, or flat stock and any shape to a ½-inch radius. The user turns the die to the desired position and tightens the die screw before operating. The drill should be run both before and after cutting the material and be in motion when withdrawn from the cut.

continued on page 61



It should really come as no surprise that Honda generators and water pumps have become legends in the construction industry. For more than 20 years, no matter how demanding the job, thousands have relied on Honda to pull them through. When you choose from Honda's 28 portable generators and 19 water pumps, you can rest assured that an easy start, fuel efficiency, quiet operation and emission compliance all come as standard equipment. For a complete brochure and the Honda dealer nearest you, call 1-800-426-7701 today.

Environmental Excellence.

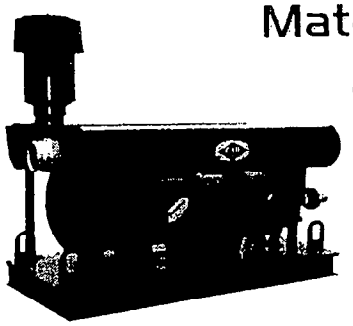
Now on Display! Booth #1391

Cartridge Pulse Collectors

C & W's CP-Series dust collectors offer you technology with a pulse. The advanced Cartridge Pulse Jet technology is combined with our 99.99% efficient cartridges to provide a highly effective, yet inexpensive dust control system.

Featuring:

- Tool-less Exchange of Filter Media
- Solid State Adjustable Timers w/ LED display
- Top Entry, Clean Side Exchange of Cartridges
- Electrical Control Panel
- Vertical, Wide-Pleat Cartridge Design for Effective Cleaning
- Ladders, Platforms, and Handrails
- Spun-Bound Polyester Filter Media for Greater Efficiency
- Hopper Vibrator
- Magnehelic Gauge
- 10 Gauge, Corrugated Steel Construction



Material Handling Systems

Increased productivity and reduced costs are just a few advantages of using C & W's AirMac Material Handling Systems. The AirMac is available as a blower package or a fully automatic transfer system.

The AirMac Blower Package includes the blower, motor, relief valve, check valve, air pressure gauge, inlet filter, lubricant gauge, and rugged steel base!

The Automatic Transfer System includes the blower package, 12" rotary vane feeder, slide gate, control panel, blow-through box, bin adapter, bin indicators, and transfer line!

Available in sizes from 20-75 horsepower.

The Slump Master

The Slump Master inspection platform offers you an easy way to check your concrete's slump, add fiber additives, and wash your trucks, while assuring your procedures meet OSHA regulations.

Build for harsh environments, the Slump Master has been designed for long-lasting durability.

Featuring:

- All Galvanized Equipment & Fastening Hardware
- Adjustable Counterweight
- Swinging Platform Lock
- Easy Assembly
- 1 1/4" x 3/16" Stair Tread w/ Checker Plate Nose
- 36" Wide OSHA-Compliant Stairway
- 1 1/2" Sq. Tubing Handrails
- 4" Sq. Tubing Supports
- Heavy-Duty Steel Construction
- Complete with Safety Decals

EXHIBIT NEWS

continued from page 59

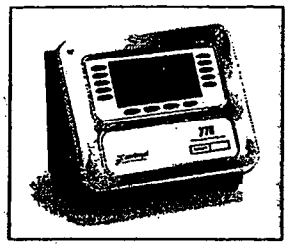
SLIPFORMER FOR CURB-AND-GUTTERS, BARRIERS

Compact and maneuverable, the 5500-B slipformer can produce curb-and-gutters or sidewalks up to 5 feet wide and barriers up to 32 inches tall. *Power Curbers Inc. (Booth 1501)* says this machine—the second in the B Series—allows optimum visibility of the mold and hopper areas, and the chute man. The

slipformer has a 30-inch-wide trimmer, with extensions up to 42 inches wide, and weighs only 14,725 pounds. It also has hydraulic side shift up to 2 feet and 1 foot of vertical hydraulic lift. A belt conveyor is standard, with an auger optional.

WEIGHING ACCURACY FOR TRUCKS

Cardinal Scale Mfg. Co. (Booth 7440) says the 778 digital weight indicator offers several features that simplify the scalemaster or operator's job: easy-to-read graphics, large "soft touch" keys, and programming flexibility. The unit integrates easily into any weighing system, as it fits a variety of eight-channel optional input/output boards for software systems. Printing formats can be



customized to feature special tickets, end-of-day reports, and other information. An accompanying standard keyboard allows the addition of a laser scanner for bar code reading, and six expansion slots allow multiple scale connection.

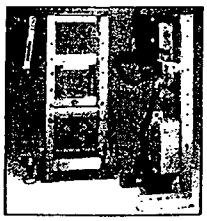
PRESLOPED DRAIN SYSTEM

A bulb-shaped design and continuous 1% slope help the POLYCAST 3000 system handle more than 3,000 gallons per minute (or 6.73 cubic feet per seconds) of water for 120 feet of drain, says *Strongwell (Booth 1048)*. This high-flow-rate capability makes the drain ideal for airports, roadways, and industrial

plants. It comes in 8-foot sections and has a coefficient of thermal expansion similar to that of concrete. The drain is made of a pultruded fiberglass-reinforced plastic, which reportedly is durable enough to incur very little sidewall deflection during the concrete pour. This polymer material also is said to limit water absorption to less than 1% and provide excellent chemical resistance. POLYCAST 3000 is engineered to fit standard PVC plumbing and use off-the-shelf grating.

POWER WINCHES FOR VIBRATORY SCREEDS

M-B-W Inc. (Booth 3831) introduces its new hydraulic power winches, designed to attach easily to the end frame of its Blitzscreed. The winches feature adjustable travel speed (0.5 fpm to 7.5 fpm) and a top-mounted engagement lever for instant activation and deactivation. Each end operates independently, allowing for maneuverability around columns and other obstacles, and an adjustable auto-stop valve disengages the winches if they hit an obstruction. Other features include a hydraulic direct-shaft drive pump that performs without adjustments, belts, or pulleys, and a quick-attach handle that allows for manual operation. Sixty feet of aircraft-quality cable comes standard with each winch.



TELESCOPIC CRANE

Recently introduced by *Stellar Industries Inc. (Booth 8261)*, the 6620 crane comes standard with a proportional ra-

continued from page 61

dio remote—allowing for mobile engine starting/stopping, precise crane control, and emergency engine shut-off. The crane also features two hydraulic extensions (to 20 feet of reach), eliminating the need to manually pull out extensions. It has a maximum lifting capacity of 6,000 pounds at 6.3 feet and can reach line pull speeds of 60 fpm thanks to a planetary winch system featuring mechanical and hydraulic brakes for added security. The crane is rated at 38,000 foot-pounds. Maximum horizontal reach is 20 feet 9 inches (from CL of crane), and maximum vertical lift is 22 feet.

SAW ATTACHMENT COLLECTS SLURRY

Cushion Cut (Booth 2625) introduces the Slurry Containment System (SCS), a

patented product available as an option on the company's Road Warrior II saw or an add-on kit on its 35- and 65-hp saws for cutting concrete or asphalt. The SCS disperses water onto the cutting blade during normal saw operation, then collects it directly at the cutting area with a vacuum bar. It then collects the slurry and separates the air, pumping it out through a dispersal hose. The cut pavement usually dries within 3 minutes, according to the manufacturer. The system has a 12-inch cutting depth, adds only 10½ inches to the normal width of the saw, and can be attached or detached within 5 minutes. Vacuum is generated by belts from the blade drive shaft.

WEATHER SHELTER

Tornado Guard—an integrated, one-piece weather shelter designed to be placed with the home's slab foundation—provides a clean, accessible safety zone below ground as recommended by weather emergency experts. According to *HydroProducts LLC (Booth 8751)*, the Tornado Guard can be installed under a covered patio, inside a storage building, or on any small, weight-sensitive soil area not conducive to large, heavy shelters. It is made of durable fiberglass and can safely hold six to eight people, as its exterior measures 80x80x48½ inches high, its interior measures 69½x69½x41¼ inches high, and it has a 28½x28½-inch porthole. The Tornado Guard can be equipped with the optional GuardAlert system, which provides inside ventilation, telephone, and direct-line "panic" systems so users can contact the outside world for rescue.

MORTAR REINFORCEMENT MATERIAL

Colbond Inc. (formerly Akzo Nobel Geosynthetics) (Booth 5777) makes Enkasonic 7918R, a strong nylon material used in place of wire reinforcement (mesh, lathe) in horizontal self-leveling applications. Measuring _ inch thick, the product's chemical-resistant fibers bind mortar together and hold it in place when cracking occurs, while its geomet-

ric structure prestresses the mortar. The main benefit of Enkasonic 7918R, according to the manufacturer, is sound control. It can be used with gypsum flooring, traditional concrete, poured lightweight concrete, and self-leveling mortars. Recommended applications include commercial buildings, fire-rated flooring assemblies, sound studios, athletic floors, and radiant heating. One roll equals 10 wire mesh sheets.

SCAFFOLDING/ALIGNMENT SYSTEM

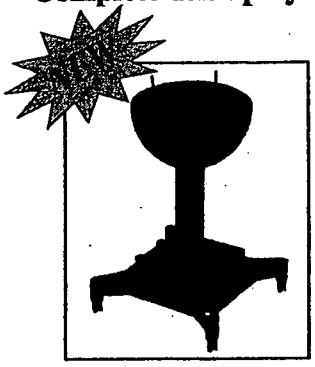
According to *West Arc Inc. (Booth 8796)*, its Sea Systems provide contractors a stable working surface from which to build ICF walls and align the walls before and after concrete placement so they always come out straight and plumb. This dual alignment results

from the system frame being secured to both the floor and block wall after the first three or four rows of block are laid. The system features an alignment channel and turnbuckle with swivel footpad, and can be used with 8- to 24-foot-high walls. It is sold with or without walking planks and safety railing. All system components meet or exceed OHSA standards and are interchangeable, letting contractors use them for both short and tall walls.

Your Complete Solution

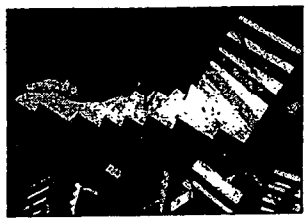
Advanced Technology at Great Savings

Complete Tilt up System



- Lifting Anchor
- Quick Release Lifting Unit
- Full Line of Braces
- Brace Inserts
- Plastic Rebar Chairs
- Full Line of Chemicals
  - Bond Breakers, Exposed Aggregate Retarders, Release Agents and Form Liners

* SOME DISTRIBUTION OPPORTUNITIES ARE AVAILABLE



Threaded Lifting System

- Provides the most effective solutions for edge lifting and backstripping thin concrete elements.
- Can be used with either minimal or no patching.

Wire Rope Lifting System

- Simple & effective method for backstripping or edge lifting.
- Anchors can project from the concrete or be recessed.

DR Lifting System

- Basic lifting technology for many applications.
- Wide range of anchor capacities (with matching clutch system).

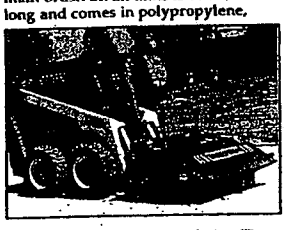
SWEEPER ATTACHMENT SERIES

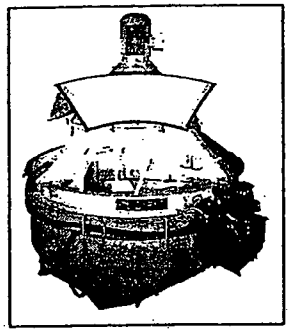
Sweepster Inc. (Booth 2290) showcases its HBB pick-up sweepers, a three-model line of direct hydraulic-drive attachments for all skidsteers and loaders. Models HB48B, HB60B, and HB72B feature a main brush that is 4, 5, and 6 feet wide, respectively, and hopper capacities of 12, 15, and 16 cubic feet. The main brush on all units is 26 inches long and comes in polypropylene,



wire, or combination poly/wire. The skidsteer or loader hydraulics control brush speed. All models have a single-drive hydraulic requirement of 8 to 15 gpm at 800 to 2200 psi. The HB60B and HB72B have a dual-drive requirement of 15 to 25 gpm at 800 to 2200 psi. Options include dual gutter brooms and a sprinkler system.

PLANETARY PAN MIXERS

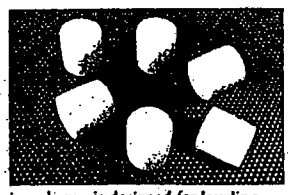
SUN mixers—according to *Simem N. America (Booth 789)*—produce perfectly homogenous concrete within 30 to 40 seconds because of "stars" that mix in a planetary rotation. The whole motion is driven through the transmission, which is concentrated in the center of the mixing tank, so the whole peripheral area is available for aggregates/cement inlets. Steel inspection gates, located all around



the tank, allow facilitated access for inspection and cleaning operations. Mixing panels have a steel frame coated with a special anti-wear rubber, and the internal frame of the tank is covered with interchangeable, anti-wear panels.

GRINDING PLUGS

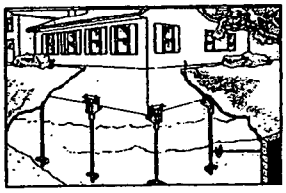
Diamond Productions Canada Ltd. (Booth 7039) makes a variety of diamond products for cutting, grinding, polishing, and shaping hard surfaces. One line of products—diamond grind-



ing plugs—is designed for leveling concrete and terrazzo floors and other natural stone surfaces. Plugs are available in two types: solid section and segmented.

SCREW ANCHORING SYSTEM

Designed for use in both renovation projects and new construction, Helical Pier Foundation Systems stop settling



and related foundation problems by transferring structural loads to stable strata beneath the foundation. *A.B. Chance Co. (Booth 6147)* says the system involves hydraulically driving steel screw anchors into stable subsoil and attaching them to the foundation by special brackets that permit the lifting of the structure. The weight of the home then shifts to the screw anchors, in the process repositioning foundations, walls, and floors, and retaining them from further movement. Only certified contractors may install this system, according to the manufacturer.

MODULAR SCAFFOLD

Bartlett Services Inc. (Booth 6977) showcases its Excel modular scaffold, featuring an automatic locking mechanism that eliminates the need for tools during setup or dismantling. Excel also is said to offer more vertical attachment points than any other modular scaffold on the market. Diagonal corner braces on all horizontal bars and a stable tower provide scaffold strength and durability. The scaffold is lightweight with user-friendly components and features an integral external or internal ladder system.

EXHIBIT NEWS

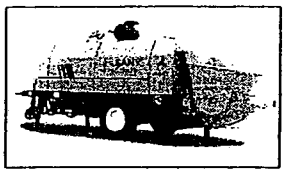
continued from page 63

COMPOUND SEALS COLORED CONCRETE

The Polyseal Tint system consists of a ½-gallon unit of concentrated color (inorganic pigment) mixed into a 5-gallon container of clear Polyseal, a curing and sealing compound. Made by *ChemMasters Inc. (Booth 6471)*, the mixed formulation creates a consistent, medium-gloss membrane that penetrates up to ¼ inch to tint plain concrete or enhance color and eliminate variations in colored concrete. The system is easy to apply, quick-drying, protects against deicing chemicals and organic acids, and reportedly even helps minimize premature cracking. It can be used on new or existing concrete and meets ASTM C309 Type 1 Class A and B.

CONCRETE PUMPS

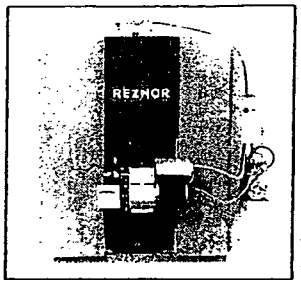
Sany Heavy Duty Industry Group Co. Ltd. (Booth 9745) presents its HBT Series of S-valve concrete pumps, designed for use in a range of applications—including restricted-space construction sites. The three models (50C, 60C, and 80C) can discharge concrete in a high-pressure mode for small amounts or a low-pressure mode for large amounts. Respective pump capacities are about 31, 42, and 52 cubic meters per hour (without lever) and 52, 62½, and 80 cubic meters per hour (with lever), according to the manufacturer. The units have hopper capacities of 0.55, 0.6, and 0.7 cubic meters, respectively, and all feature an



outlet concrete pipe 195 mm in diameter and 1400 mm long. A conversion function automatically prevents material blockage in tubes and pipes.

HEATER REGULATES FLOW OF WASTE OIL TO BURNER

An automatically regulating flow-control pump, developed and patented by *Reznor Waste Oil Heating Products (Booth 8696)*, is the key feature in the company's four-model line of self-adjusting waste oil heaters ranging from 140,000 to 500,000 Btus. The pump delivers the correct amount of oil to the burner regardless of viscosity and handles any kind of waste oil up to 50 weight (crankcase, gearcase, transmission, No. 2 fuel, etc.). It is designed to produce a



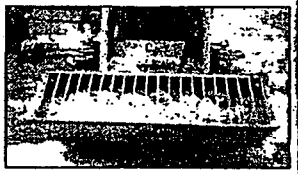
consistent flame with predictable combustion and neither over- or underfiring. Other features include an onboard compressor, quick-access combustion chamber, oil preheating system, and operating hour counter.

LOW-PROFILE DIESEL ENGINE

Hatz Diesel of America Inc. (Booth 3477) introduces the second compact diesel engine in its B Series: the 1B30V. According to the company, this streamlined engine is ideal for portable construction equipment because it weighs 25% less and is much smaller than horizontal PT shaft models. The engine also offers one of the lowest profiles in the 3- to 7-hp class, is very quiet, and features an automatic, fuel-assist feature for cold starting with one hand. It is totally sealed, preventing any fluids from leaking out. Other features include a permanent washable oil filter, an oil drain on both sides of the engine, dry-type air filter, recoil or electric starting, in-tank fuel filter, and directable exhaust outlet.

ATTACHMENT MIXES AND TRANSPORTS MATERIALS

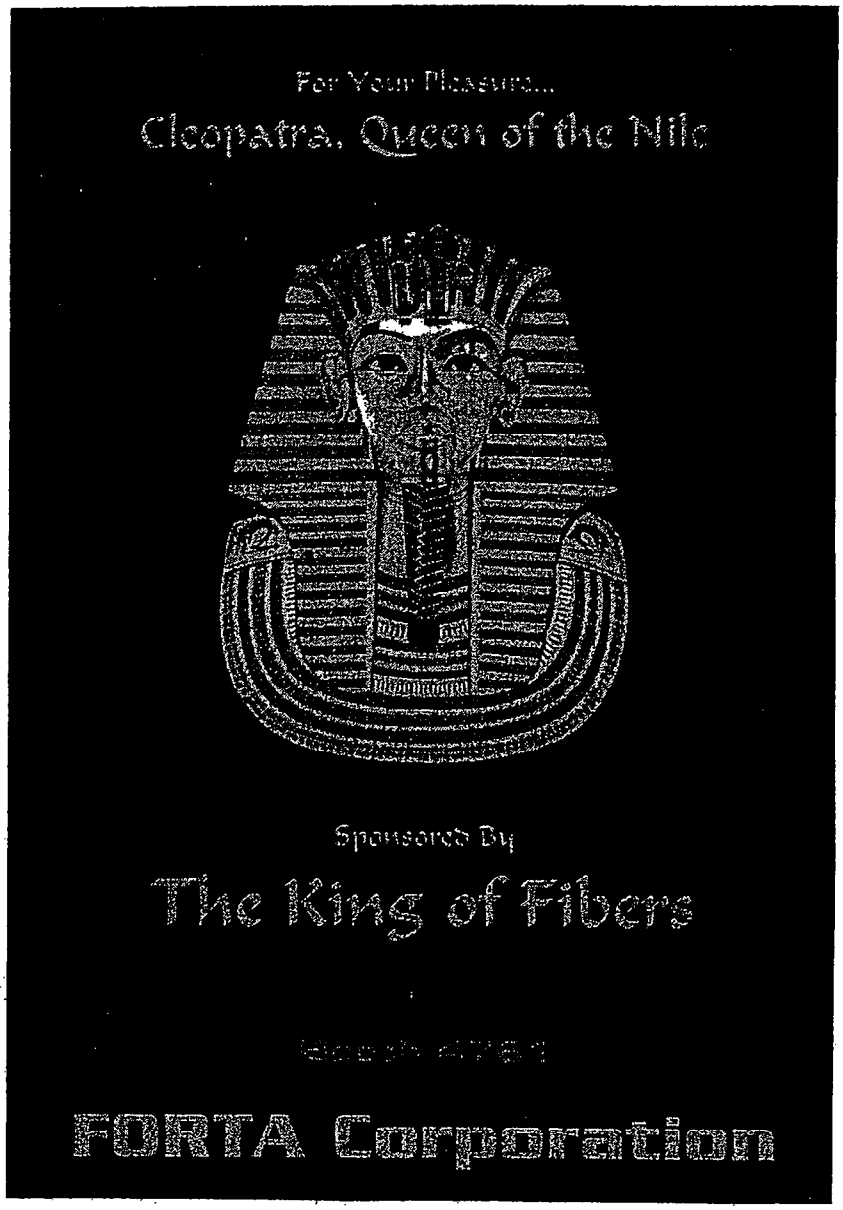
The Till-A-Mix attachment from *Cook Tool Co. (Booth 7790)* increases skidsteer versatility because it can both mix and transport concrete, cement, aggregate (sand, rock), and other materials. When



fitted with an optional chute, Till-A-Mix lets contractors effectively transport ready-mix concrete to hard-to-reach places. The attachment can also be transformed into a tiller in a matter of seconds, giving contractors the capability to grade driveways and patios. According to the company, swimming pool contractors use the attachment to mix sand and cement for hard-bottom pools.

THREE-PHASE GENERATOR

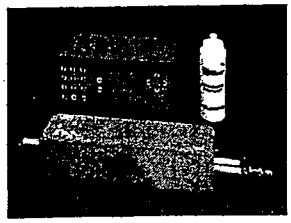
Robin America Inc. (Booth 5675) unveils the RGV13000T three-phase generator, a 13,000-watt heavy-duty unit that offers multiple outlets. These outlets include a Twist-Lock receptacle (with 208V three-phase and 120V single-phase), a Twist-Lock with a 30-amp 120V, and a 20V 20-



amp GFCI duplex receptacle. Powered by an 18-hp industrial V-twin engine, the generator features a transformer voltage regulator to maintain constant voltage for sensitive equipment and an easy-to-read monitoring voltmeter. The engine reportedly can provide a full day's work on one tank of fuel. Other standard features include easy electric start, USFS-approved spark arrester, large muffler for reduced noise, tubular steel frame, and two- or four-wheel kit.

NONDESTRUCTIVE EVALUATION OF CONCRETE

Pundit Plus, from the *Gilson Co. Inc. (Booth 3277)*, is the updated version of the Pundit pulse velocity meter—a tool designed for nondestructive evaluation of concrete and quality checks on many other materials. The Pundit Plus evaluates quality and detects irregularities by measuring how long it takes ultrasonic



pulses to travel through materials. Its electronic improvements include transducer-mounted switches and memory capable of 100 readings. Users can select transit time, velocity, limits, or elastic modulus to be displayed in either metric or English units. The full product kit also includes a power supply, AC cord, two 54kHz transducers, two 12-foot cables, an ultrasound couplant, and an operating manual.

STAIN 'ETCHES' COLOR INTO CONCRETE

Decorative Concrete Supply Inc. (Booth 9542) showcases ChemTone stain, which contains water and metallic compounds that "etch" color into concrete or a polymer overlayment after reacting with substances already present in the surface. This chemical reaction differs with each application, producing inconsistent color variations resembling marble or natural stone. According to the manufacturer, the stain contains no hydrochloric acid and can be shipped as a nonhazardous material. All curing agents, coatings, oils, grease, waxes, or water repellents must be removed from existing concrete prior to stain application, and new concrete must be cured for at least 14 days. Two coats of stain are required, applied at full strength; coverage rate is 150 to 200 square feet per gallon.

WHEELBARROW IS DURABLE YET LIGHTWEIGHT

This 50-pound wheelbarrow from *Cariola Wheelbarrow Co. Ltd. (Booth 9451)* has a 7-cubic-foot capacity and is durable enough to haul concrete, rock, and gravel under harsh jobsite conditions. It features a heavy-gauge, four-ply tire on a 1-inch solid-steel axle and ¼-inch-thick polyethylene tub with pouring mouth. The tubed tire is studded and contains a puncture-resistant sealant. Other features include a powder-coated aluminum square-tube frame, two precision bearings sealed for life, steel nosepiece, and replaceable maple hardwood handles.

LASER-LEVELING SYSTEM

Featuring a gravity-controlled pendulum, the RoboLaser from *RoboToolz (Booth 1993)* is designed to constantly and automatically level itself regardless of surface irregularities or jobsite vibration. If the tool is disturbed after being set, a sensor light blinks to alert the user. The motor-driven tool's laser is visible indoors or out (even in direct sunlight) and accurate to within ¼ inch at 100 feet, according to the manufacturer. A remote control rotates the laser at three speeds, allowing one-person operation and layout.

REDESIGNED SLIPFORM CURBER

GOMACO Corp. (Booth 3801) showcases the updated GT-3600 slipform curber, featuring a new telescoping beam, redesigned conveyor, larger receiving hopper, and wider slide adjustment. The beam supports the mold holddown and drawbar assemblies and also allows the operator's platform to telescope with the mount so the operator can walk farther out over the mold for better visibility. The conveyor now ac-

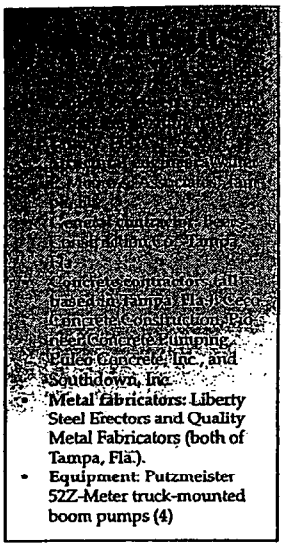
PUTZMEISTER

continued from page 10

geography also affected his concrete supplier, Southdown, Inc., in mixing the concrete and washing the trucks. "We used a 5,000 psi super plasticized mix and used remote stations to add it. Wash-down also was a challenge because there was no lot nearby; we used 12 roll-off containers to wash the trucks. A total of 260 ready-mix truck drivers participated, some from as far away as Brunswick, Ga.," he said.

Units provided precise pour

Each of the four Putzmeister 52Z-Meter truck-mounted units was



- **Concrete contractors:** All Seasons Concrete Pumping, Inc., Tampa, Fla.; Cosco Concrete Construction Inc., Tampa; Crete Concrete Pumping, Inc., Tampa; Gulf Coast Concrete, Inc., Tampa; and Southdown, Inc.
- **Metal fabricators:** Liberty Steel Erectors and Quality Metal Fabricators (both of Tampa, Fla.).
- **Equipment:** Putzmeister 52Z-Meter truck-mounted boom pumps (4)

equipped with a 16-cell pump that moves up to 210 cubic yards of concrete an hour at a pressure of 1,233 psi. The units' exclusive five-section Multi-Z booms reached 170 feet, and this, coupled with the units' radio remote controls, provided precise and efficient concrete placement.

Collier confirmed the choice. "I like the 52Z-Meter units. We've been using them a lot. After we waterproofed underneath the whole footprint, we poured a 1,000-cubic-yard working slab with them," he said.

When the last of the concrete was placed in the early evening, a smooth, 4-foot-thick foundation lay ready for the 56-day curing process.

An estimated 2,000 people watched the concrete work from the Church of Scientology-owned Fort Harrison Hotel. The church opened the hotel for the spectators, provided complimentary coffee and donuts for the guests and catered meals for the workers.

Visit Putzmeister America in Booth 1901 to learn about its 46X-Meter pump; also see the writeup on page 46.

EXHIBIT NEWS

continued from page 65

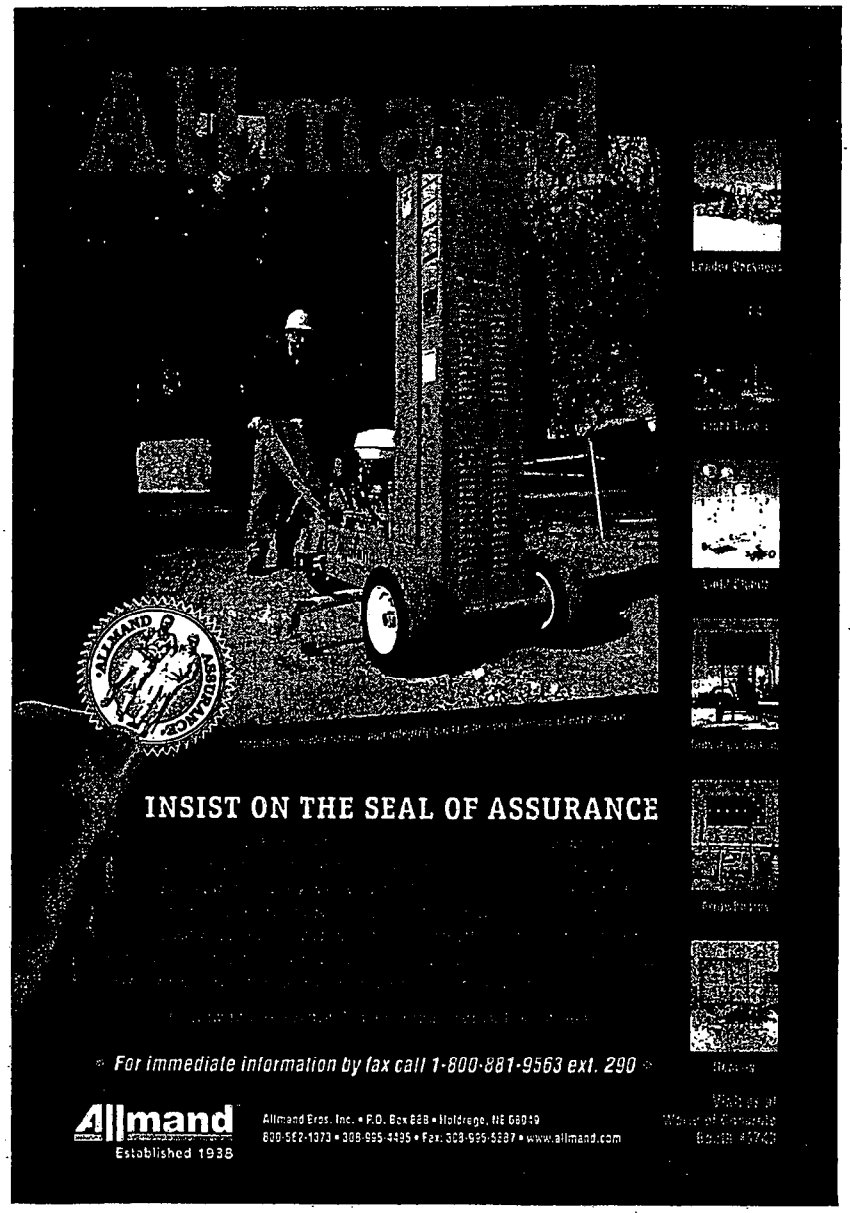
commodates the manufacturer's COMMANDER III conveyor system and is 24 inches wide. According to the company, the hopper easily accepts concrete from ready-mix trucks and provides more-efficient handling of the material to the slipform mold. Slide adjustment distance has been doubled, from 18 to 36 inches.

MASONRY DETERGENT

Diamond Chemicals Inc. (Booth 6970) introduces Safe 'N Easy Masonry Detergent, designed to remove smears, stains, and dirt from new brick, CMUs, pavers, and precast masonry surfaces. The product also can be used on concrete and tile. Containing a concentrated blend of wetting agents and acidic compounds, the detergent cleans without streaking, etching, pitting, or burning the surface. It can be sprayed, rolled, or brushed on and rinses with clean water.

ALSO ON THE FLOOR...

- **Construction Products...** *Optim Products Inc. (Booth 8677)* manufactures anchors, masonry drill bits, diamond blades, hammer bits, saw blades, circular saw blades, screwdriver bits and nut setters, cable ties, connectors, knives, scrapers, razor blades, and rivets.
- **Spray System...** *Arrow Magnolia Intl. (Booth 1161)* introduces a new spray system for applying concrete-removal products, as well as a stick-free coating.
- **Nondestructive Testing Instruments...** *Olson Engineering Inc. (Booth 6886)* makes the Freedom NDT PC for sonic, ultrasonic, and seismic nondestructive testing of buildings and infrastructure.
- **Concrete Finishing Products...** *Bon Tool Co. (Booth 5538)* offers a 48x5 Fresno, jet groover, rebar cutter-bender, and a magnesium float with comfort grip handle.
- **Pumps...** *The Gorman-Rupp Co. (Booth 4389)* presents the Prime-Aire engine-driven pump.



Orlando restaurant guide

Variety, more than any other word, summarizes the Orlando area restaurant scene. No matter if you're looking for a sumptuous all-you-can-eat buffet, an intimate candlelight dinner for two or a restaurant with entertainment and activities for the entire family, Orlando has it all.

The following list is excerpted from the *Official Visitors Guide, Fall/Winter 1999* (published by the Orlando/Orange County Convention & Visitors Bureau Inc.). All phone area codes are 407 unless otherwise indicated.

This list contains hundreds of restaurants, and will run in every issue of *Show Daily*.

AMERICAN OR CALIFORNIA CUISINE

Art's Premium Cigars & Cafe, 1235 N. Orange Ave., 895-9772. A friendly, casual cafe featuring indoor and outdoor dining on Lake Ivanhoe. Live entertainment Wednesday, Friday, and Saturday nights.

B-Line Diner, at The Peabody Hotel Orlando, 9801 International Dr., 352-4000. A 1950s diner featuring favorites from years gone by and creations for today's trends. Full take-out window. Four menu changes daily.

Bamboo Room, at Langford Resort Hotel, 300 E. New England Ave., 644-3400. Excellent American cuisine. Chef's specials daily. Nightly live entertainment and dancing.

Baskervilles, at Grosvenor Resort, 1850 Hotel Plaza Blvd. Tueday, Thurday, Saturday Disney Character Breakfast. Saturday nights feature Murder Watch Mystery Theater.

Bennigan's. Enjoy a fun, casual atmosphere with a variety of specialties including burgers, steaks, pastas, and salads. Full bar with daily happy hour from 2 p.m. to 7 p.m., and 10 p.m. to 12 a.m. It's better at Bennigan's! Five locations:

- Airport, 7055 S. Semoran Blvd., 852-1871
- Bee Line/Convention Center, 6109 Westwood Blvd., 352-5657
- Disney, 5877 W. Irlo Bronson Memorial Hwy., 390-0687
- International Drive, 6324 International Drive, 351-4435
- Lake Buena Vista, 13520 S. Apopka-Vineland Rd., 938-9090

Bermuda Onion Restaurant, at Hotel Royal Plaza, 1905 Hotel Plaza Blvd., 828-2828. Casual, all-day dining, featuring breakfast buffet with made-to-order specialty dishes, sandwiches, lunch and dinner entrees, flavored coffees, and a delicatessen for takeout service.

Cabana Bar & Grill, at Walt Disney World Dolphin Hotel, 1200 Epcot Resorts Blvd., 934-4000. Cabana Bar & Grille is a poolside paradise with a fun and tasty menu for adults and kids alike. We can mix up any tropical drink blend for your day in the sun.

Cafe Gauguin, at Omni Rosen Hotel, 9840 International Dr., 996-9840. Family and casual dining. Buffet and menu service, three meals daily. Prime rib buffet nightly. Conveniently located near the Convention Center.

Cafe Matisse, at Clarion Plaza Hotel, 9700 International Dr., 996-9700. All-You-Care-To-Eat buffet and a la carte service. Three meals daily. Sunday brunch. Con-

veniently located near the Convention Center.

Chalet Suzanne Restaurant, at Chalet Suzanne Country Inn & Restaurant, 3800 Chalet Suzanne Dr., Lake Wales, 941-676-6011. Breakfast, lunch, and six-course candlelight dinners served daily 8 a.m. to 8 p.m. Historic, 5-star restaurant features romantic dining, full bar, award-winning wine list, gifts and antiques. Family owned and operated since 1931.

Chelsea's Cafe at Wyndham Orlando Resort, 8001 International Dr., 351-2420. One of the best dining values in Orlando. Check out our breakfast buffet or dinner specials.

Coral Cafe, at Walt Disney World Dolphin Hotel, 1500 Epcot Resorts Blvd., 934-4320. A colorful undersea themed family-style eatery. Dine a la carte or buffet. Serving breakfast, lunch, and dinner.

Dan Marino's Town Tavern, at Pointe*Orlando, 9101 International Dr., Suite 1300, 363-1013. Great casual atmosphere. Owned by Dan Marino. Home of legendary food, steaks, chops, pasta, and salads. Located at Pointe*Orlando, across from the Convention Center.

Darryl's Restaurant International Drive, 8282 International Dr., 351-1883. Perfect setting for business or family entertainment. Outstanding food served in turn-of-the-century decor. Serving lunch and dinner.

Dux, at The Peabody Orlando Hotel, 9801 International Dr., 352-4000. Dinner, cocktails. Jackets requested. Orlando's only Mobil 4-Star restaurant featuring a globally inspired menu. Mesquite grilled specialty meats, game, and seafood. Nonsmoking restaurant.

Everglades Restaurant, at Omni Rosen Hotel, 9840 International Dr., 996-9840. Feast on prime steaks and fresh Florida seafood. Explore the incredible flavors of gator chowder, wild boar, venison pepper steak, and other unique regional specialties.

Finn's Grill, at Hilton in the Walt Disney World Resort, 1751 Hotel Plaza Blvd., 827-3838. Great steaks, fresh seafood, Finn-omenal fun, food, and drinks in the relaxed atmosphere of Old Key West. Weekly entertainment with traditional Saturday Seafood Buffet. Free valet parking.

Friday's American Bar, 55 W. Church St., 649-7778. Open daily from 11 a.m. to 2 a.m. serving a variety of pasta, steaks, burgers at an excellent value. The atmosphere is casual and fun.

Friday's Front Row Sports Grill, 8126 International Dr., 363-1414. Orlando's premier sports theme restaurant featuring an All-American menu, interactive game room, over 80 TVs with satellite hookup and sports memorabilia. Banquet space available.

Front Street Grill, in The Town of Celebration, 721 Front St., 566-1141. Voted Orlando's Best 2 years in a row by *Orlando Magazine* for great American food with a casual dining atmosphere. Featuring herb marinated chicken from our wood-burning rotisserie.

Garden Grove, at Walt Disney World Swan Hotel, 1200 Epcot Resorts Blvd., 934-1609. Garden Grove features breakfast a la carte or buffet and delicious salads and sandwiches in a bright, casual atmosphere. Join us for a Disney character breakfast every Saturday.

Giraffe Tavern & Grille, at Hotel Royal Plaza, 1905 Hotel Plaza Blvd., 828-2828. Fine dining in a charming Eurapean setting featuring an array of American and European cuisine. A wide selection of wines and table service desserts available.

Hard Rock Cafe, at Universal Studios CityWalk, 6050 Universal Blvd., 351-7625. Hard Rock Live ... Orlando's New Coliseum of Rock. A 140,000-square-foot custom-designed facility with concert seating for 2,000 guests, and the world's largest Hard Rock Cafe with seating for more than 600 guests.

Harry's Safari Bar & Grille, at Walt Disney World Dolphin Hotel, 1500 Epcot Resorts Blvd., 934-1609. Harry's collection of herbs and spices from the world over impart a special magic to our grilled beef and seafood specialties.

Harvey's Bistro, located in the Nationsbank Building, 390 N. Orange Ave., 246-6560. Harvey's Bistro offers creative foods that are European in tradition, prepared with a modern flair. Full bar and extensive wine list are available. We also offer exclusive onsite banquets.

Hooters of Pointe*Orlando, 9101 International Dr., Suite 2210, 355-7711. A fun, upbeat atmosphere where the beer is fresh, the wings are hot, and the girls are spicy.

Houlihan's Restaurant, 9150 International Dr., 856-0122. Houlihan's is a celebration of old favorites and new traditions, from hearty, healthy salads and creative pasta dishes, to classic entrees, fanciful desserts, and beverages.

Johnny Rockets, at Pointe*Orlando, 9101 International Dr., Suite 1100, 903-0762. Johnny Rockets serves up juicy hamburgers, classic sandwiches, piping hot fries, and hand-dipped shakes and malts. Snappy, happy service and nickel tunes included!

Jungle Jim's Church Street Restaurant & Bar, 55 W. Church St., Suite 220, 872-3111. Over 100 menu items—gourmet burgers, chicken, steak, and more. Unique tropical drinks and sinful desserts. Voted Orlando's "Best Burgers" and "Best Place for Kids" for 1996 by *Orlando Magazine*.

Jungle Jim's Lake Buena Vista, 12501 State Road 535, 827-1257. Experience an epic dining adventure with the earth's medley of world-class burgers, dinners, and the lost shrine of forbidden drink and dessert pleasures.

Lando Sam's, at Radisson Plaza Hotel Orlando, 60 S. Ivanhoe Blvd., 425-4455. Enjoy plentiful portions of select meats and seafood prepared with a Florida flair. Our staff pampers you with expert service and fine cuisine in an upscale, casual at-

mosphere.

Le Jardin, at Adam's Mark Hotel, 1500 Sand Lake Rd., 859-1500. A relaxing garden setting. International themed luncheon buffet Monday through Friday. Breakfast, lunch, and dinner 7 days a week.

Mangos Restaurant & Lounge, at Delta Orlando Resort, 5715 Major Blvd., 351-3340. Affordable family dining offering a full service casual atmosphere, serving steak to seafood. Kids 12 and under eat free with adult.

McCoy's Bar & Grill, at Hyatt Regency, Orlando International Airport, 9300 Airport Blvd., 825-1234. Serving lunch and dinner. American food served from a show kitchen with a 60-foot bar and TV monitors. Overlooks airport runways.

Meg's Tavern/Leopard Lounge/Ybor's Martini Bar, 41 W. Church St., 843-5825. Meg's Tavern features elegant dining from burgers to specialty pastas. Leopard Lounge—a funky, retro dance club. Ybor's—a sophisticated place to savor classic martinis.

Motown Cafe Orlando, at Universal Studios CityWalk, 6000 Universal Blvd., Suite 735, 351-4993. Offering three sensational levels of dining and entertainment. Featuring American regional cuisine, daily live entertainment, and the "Shop Around Shop" with unique merchandise. Guests can enjoy memorabilia and lifelike statues of famous Motown artists.

NBA City, at Universal Studios CityWalk, 6068 Universal Blvd., 363-5919. Contemporary American cuisine, unique interactive games and proprietary NBA City and licensed NBA merchandise. Immersive programming featuring the NBA's greatest moments and performances.

NASCAR Cafe, Orlando, at Universal Studios Citywalk, 6000 Universal Studios Plaza, Suite 743, 224-7223. It's 200-m.p.h. thrills at the only officially sanctioned NASCAR-themed eatery. You'll find yourself bumper to bumper with visiting NASCAR drivers, rows of racing machines, and a high-performance menu of steaks, chops, and more.

Official All Star Cafe, at Disney's Wide World of Sports, 690 S. Victory Way, 827-8326. Official All Star Cafe is a larger-than-life tribute to sports—the events, athletes, and great moments—that transformed athletes into legends and games into national pastimes.

Park Avenue Grill, 358 Park Ave. N., 647-4556. Located on historic Park Avenue across the street from the world-renowned Morse Museum. Serving fresh Florida seafood, prime rib, and creative American cuisine.

Park Plaza Gardens, 319 Park Ave. S., 645-2475. Award-winning fresh Florida cuisine served in a New Orleans style courtyard. Excellent wine selections. A local favorite for 20 years.

Passport Cafe, at Days Inn Maingate West, 7980 W. Irlo Bronson Memorial Hwy., 997-1000. Featuring a bountiful breakfast buffet and dinner selections from around the globe.

Pebbles Downtown, 17 W. Church St., 839-0892. Casual gourmet cuisine including lite bites, pizzas, pasta, and seafood. Wines by the bottle or glass.

Perkins Family Restaurant and Bakery. Enjoy all of your breakfast, lunch, and dinner favorites any time of the day. In-store bakery full of freshly baked pies, cookies, muffins, and more. Five locations:

- 7000 Kirkman Road, 363-9622
- 7451 Irlo Bronson Memorial Hwy., 896-3725
- 5170 Irlo Bronson Memorial Hwy., 396-8960
- 12559 State Rd. 535, 827-1060
- 6813 Sand Lake Rd., 351-0373

Pizzeria Uno, Chicago Bar & Grill, 8250 International Dr., 351-8667. Famous for the original deep dish piza. Offering a variety of other great menu items, full bar service. Daily lunch specials.

Planet Hollywood, 1506 E. Buena Vista Dr., 827-7836. Internationally famous, movie-themed restaurant inspired by the world of film and television. Restaurant and retail at the entrance to Pleasure Island with spectacular architecture. American cuisine and movie memorabilia display.

The Players Grill—Official Restaurant of the NFL Players, at Pointe Orlando, 9101 International Dr., Suite 1004, 903-1974. Experience casual, fine dining in a relaxed, fun atmosphere. Featuring a classic American menu and memorabilia from hundreds of past and present NFL players.

Race Rock Supercharged Restaurant, 8986 International Dr., 248-9876. Experience the Taste of Victory at this Shrine to Motorsports featuring stock cars, hydroplanes, dragsters, indycars, motorcycles, and more. Owners are Jeff Gordon, Richard Petty, Michael Andretti, Rusty Wallace, and John Force.

Rachel's Men's Club & Restaurant—South, 8701 S. Orange Ave., 858-9800. Experience a new level of status where fantasies become reality. Two locations. Monday through Friday—All-You-Can-Eat luncheon buffet. Fine dining.

Rainforest Cafe, at Downtown Disney Marketplace, 1800 E. Buena Vista Dr., 827-8309. A tropical rainforest re-created through a combination of live and animated wildlife and special effects. An assortment of casual dining menu items for the entire family. Enjoy our retail village. Also at Disney's Animal Theme Park, 505 N. Rainforest Rd., 938-9100.

Shoney's Restaurant—Wildwood, 973 State Rd. 44 (I-75 Exit 66), 352-748-0757. All-You-Can-Eat breakfast buffet and soup, salad, and fruit bar. Kids' and seniors' menus. Private dining room with TV and VCR. Buses welcome.

Shoney's Inc. A family restaurant serving breakfast, lunch, and dinner 7 days a week. Shoney's menu includes breakfast and salad bars, burgers, sandwiches, chicken, steaks, pasta, and seafood. Value

Gain valuable industry information, resources and contacts that will help you build your business.
Visit the American Society of Concrete Contractors at booth #4686.

A non-profit organization, the American Society of Concrete Contractors is an association committed to providing information, recognition and leadership to contractors in the concrete industry.

ASCC offers its members a range of services, including an extensive safety program, problem-solving assistance, networking opportunities and educational materials. Specific tools include:

- safety manuals, videotapes and handbooks
- telephone hotline assistance
- Management Information eXchange groups
- free registration for World of Concrete 2001
- and much more!

If you join the ASCC at the World of Concrete, you'll receive a complimentary copy of *Guide For Surface Finish of Formed Concrete For Vertical Cast-In-Place Concrete*. This book, a $24.95 value, is a unique industry tool that provides a method for defining acceptability of a vertically cast concrete surface, both in quality and appearance, among those responsible for specification, supervision and execution.

Just for stopping by the ASCC booth, you'll receive a copy of the new *Pre-Construction Checklist*, a joint publication of the ASCC and the National Ready Mixed Concrete Association, which helps define responsibilities and establish procedures for construction projects that use concrete

Become a member of the American Society of Concrete Contractors today and join the ranks of contractors made even more successful. For more information, visit ASCC at booth #4686, or call 800-877-2753.

Fantasy of Flight brings aviation history to life

For anyone who ever fantasized about piloting a fighter in a WWII aerial dogfight over the Pacific or what it was like as a crew member aboard a B-17 Flying Fortress bombing run, the vision now comes to life at Fantasy of Flight. The aviation-themed attraction completely immerses visitors in aviation history, featuring many of the planes that have become aviation legend. Through realistic flight simulators, a tethered helium gas balloon ascension, and sight and sound "immersion experience" re-creations, Fantasy of Flight brings to life the romance, nostalgia, and captivating trill of flight.

Located halfway between Orlando and Tampa in Polk City, Florida, Fantasy of Flight is a 300-acre aviation-themed attraction that takes visitors back to WWI, aviation's Golden Era during the 1920s-1930s, WWII and beyond, including some of the very airplanes that made aviation history. Featured is a part of the world's largest private collection of vintage aircraft, personally assembled by lifelong aviation historian and enthusiast Kermit Weeks.

For aviation buffs, Fantasy of Flight's vintage planes and air memorabilia make the attraction a "must-see" stop in Florida. For visitors less concerned about aviation history, but who dream and fantasize about the sensation of piloting an aircraft, the appeal of Fantasy of Flight's realistic WWII flight simulators, and the Great Balloon Experience, a tethered gas balloon ride, are powerful lures.

The aircraft in Weeks' collection are, by themselves, worthy of a visit to Fantasy of Flight. Just a partial listing of the aircraft reads like an aviation "Who's Who," including a Ford Tri-Motor, the world's most accurate replica of the renowned Ryan "Spirit of St. Louis," a Japanese Zero, Corsair F4U, B-17 Flying Fortress and a B-24J Liberator. The centerpiece of Fantasy of Flight's fleet of more than 30 airplanes is a huge Short Sunderland, the last airworthy four-engine civilian flying boat in the world.

The re-creation of the experience of flying distinguishes Fantasy of Flight from museum-styled aviation exhibits. Re-enactments of bomber missions, actual gas balloon rides, and introductory Ultralight flights, combined with exhibition of part of the world's largest collection of vintage aircraft, set Fantasy of Flight apart from any aviation-themed exhibition facility in the world.

During their visit, guests experience the different eras of aviation through a series of themed sight-and-sound immersion experiences that tell the story of aviation through the ages. The experiences range from the Fantasy of Flight, where visitors soar through the clouds and a trip back in time to WWI's Western Front, to a reenacted WWII bombing mission aboard a B-17 Flying Fortress. Guests can step aboard and feel for themselves the tension, danger, and thrill of roaring above enemy territory. From the vibrations and sounds of the Flying Fortress's four Wright R-1820 engines to the sights and sensations of dropping 500-pound bombs from 25,000 feet amid heavy flak, the B-17 "mission" is an experience that makes visitors feel like aviation combat veterans.

Realistic flight simulators

For the even more adventurous, realistic flight simulators allow visitors to feel the sensation of piloting an F4U Corsair and other WWII aircraft in mid-air combat with enemy aircraft over the blue waters of the Pacific. Using simulation technology blending high speed graphics and a sense of fluid motion, the aerodynamic characteristics of the simulated flight are uncannily realistic.

Simulator aviators begin their mission with a flight briefing that orients simulator pilots to the aircraft they will fly and explains what to expect once they take to the air. Basic flying techniques, fundamental air combat techniques, low-level flying, takeoffs, and landings are all covered in the initial flight briefing.

Then, step into the cockpit and head airborne. In moments, simulator aviators fly back in time more than a half-century and feel what it was like to be at the controls of a WWII fighter.

The simulators themselves offer a never-ending variety of WWII Pacific Theater missions. Adding to the intense realism of the flight simulator experience is the inter-relational capability of the different simulator aircraft. Pilots can not only experience what is like to fly, but must maneuver their aircraft in relation to those of the simulated enemy. Simulator-pilots must be quick learners, however, because the simulator skies are crowded with enemy aircraft. Pilots must also be careful to avoid colliding with their own squadron mates.

The simulator technology in each aircraft blends high-speed graphics and a sense of fluid motion. The aerodynamic characteristics of the simulated combat mission are uncannily realistic. The simulator experience recreates the same flying characteristics of many of the different aircraft that were used extensively in the WWII Pacific Theater. Some of the different aircraft in Fantasy of Flight's WWII simulator

RESTAURANTS

continued from page 77

our 8th year of fine cuisine and good service. Full bar. Open 5 p.m. daily.

The Outback Restaurant, at Wyndham Palace Resort & Spa, 1900 Buena Vista Dr., 827-3430. Featuring the finest prime beef, freshest seafood, and 6-pound Maine lobsters in an atmosphere of Aboriginal designs, open-hearth grill, and a 3-story waterfall. Australian storyteller tells tales about life "down under."

Ponderosa Steakhouse, 8200 World Center Dr., 238-2526. Featuring our famous "All-You-Care-To-Eat Grand Buffet." Serving steak, chicken, and seafood in a family-style dining atmosphere.

Ponderosa Steakhouse. Breakfast, lunch, and dinner buffets. Excellent service and value with hot and cold buffet and large choice of main entrees and meals. Five locations:

- 6362 International Dr., 352-9343
- 5771 W. Irlo Bronson Memorial Hwy., 397-2100
- 5535 S. Kirkman Rd., 345-0200
- 7598 W. Irlo Bronson Memorial Hwy., 396-7721
- 8510 International Dr., 354-1477

Roadhouse Grill, 4155 W. Vine St. (Hwy 192), 932-4401. There's a time and a place to get rambunctious, and it's called Roadhouse Grill. A casual family dining experience featuring mouthwatering baby back ribs, mesquite grilled steaks, tender grilled chicken, and seafood. Four Orlando area locations.

Ruth's Chris Steak House, 999 Douglas Ave., Suite 3329, 682-6444. We serve only the best U.S. prime, the top 2% of U.S. beef, as well as the freshest seafood, chicken, lamb chops, and more. Banquet room.

Sizzler Restaurant, 12195 S. Apopka-Vineland Rd., 238-1551. Breakfast, lunch, and dinner. Hand-cut steaks, chicken, fresh seafood. Children's menu. All-You-Can-Eat fresh fruit and salad bar. Beer and wine. Banquet room and group rates. Also located at 9142 International Dr., 351-5369, and 6308 International Dr., 248-9711.

Steak'& Ale, 6115 Westwood Blvd., 352-0526. A casually elegant restaurant featuring signature steaks, herb-roasted prime rib, fresh seafood, a full-service bar, and a freshsalad bar—at moderate prices.

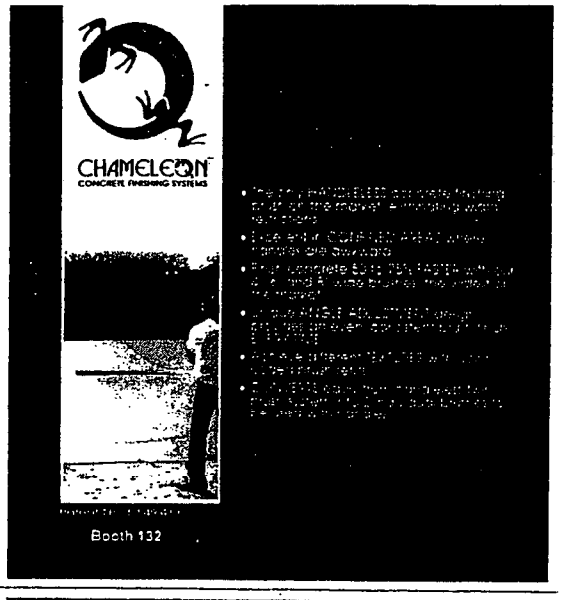
Wild Jack's Steaks & BBQ, 7364 International Dr., 352-4407. Authentic Western atmosphere serving chuck wagon grub. Entrees include smoked prime rib, filet mignon, and smokin' BBQ.

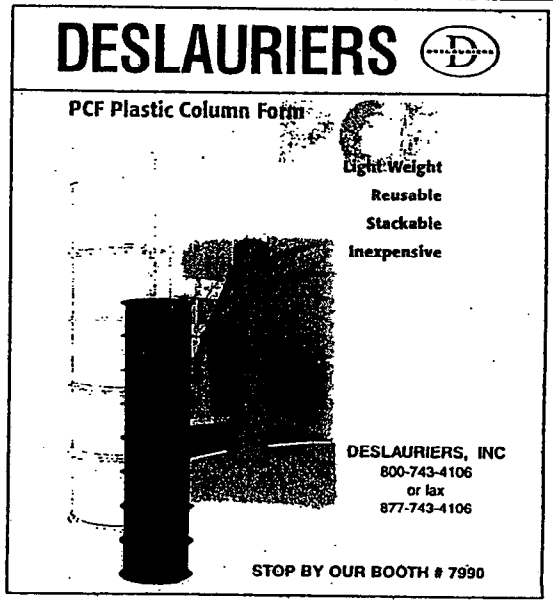
THAI CUISINE

Siam Orchid Restaurant, 7575 Universal Blvd., 351-0821. Authentic, fine-dining restaurant offering superb Thai cuisine and ambience.

RESTAURANT RESERVATION MENUS & SERVICE

Dine Around, 3652 Becontree Pl., 977-7618. Restaurant referral service found at the front desk of Central Florida hotels and attractions. Ask for the Dine Around Display or call for more information. □





FANTASY OF FLIGHT

continued from page 77

environment include the Grumman Wildcat at the most basic level and, on the more advanced side, the P-38 Lightning, P-51 Mustang, and F4U Corsair. Fliers can even take to the controls of a Japanese Zero and other WWII fighters.

Depending on an individual's experience level, aircraft are assigned to best meet one's simulator flying skills. According to Jim Stewart, Fightertown Entertainment, Inc., Lake Forest, Calif., the technical developers of the Fightertown flight simulator facilities, "The skill levels of different pilots are adjusted to allow everyone to compete equally. Beginning pilots start in low-level aircraft that are less complex to fly. As fliers acquire skills, their degree of difficulty increases. At the most sophisticated level, aircraft characteristics include, for example, features like engaging the tailhook while landing. Beginners will deal only with the most basic features of flying."

Each flight simulator combat mission experience requires a modest charge. Simulator flight passes can be purchased at the Fantasy of Flight main entrance complex.

Simulator pilots can experience a wide variety of different missions at Fantasy of Flight. Land-based flights or carrier operations, day or night and variable weather conditions are just some of the different scenarios that make each mission distinctly different. As many as eight different aircraft simulators can be operational at the same time within the Fantasy of Flight.

The Great Balloon Experience

Guests can actually take to the air in The Great Balloon Experience, a tethered gas balloon ride that carries as many as 25 guests skyward aboard the Fantasy of Flight. Guests can fly as often as they wish in the helium-filled balloon, weather and prevailing winds permitting.

The Great Balloon Experience provides visitors with an aviation experience reminiscent of some of man's earliest flying experiences. The spherical balloon contains 200,000 square feet of nonflammable helium and will rise as high as 500 feet, enabling visitors to see as far as the Gulf of Mexico and downtown Orlando on clear days.

Guests will ride the balloon in an octagon-shaped wicker-paneled basket. When aloft, the basket is large enough to permit guests to walk from one side of the balloon to the other. Rides are approximately 15 minutes long.

The white balloon is 115 feet tall and 70 feet in diameter. Its great size makes it clearly visible to passersby on I-4. The balloon is moored by 16 anchor points that can secure the balloon in wind speeds up to 80 knots. Operation is subject to weather-related restrictions. Wind gusts of 25 knots or more can ground the balloon, primarily because of turbulence that might prove unsettling to riders.

The balloon ride is also available to groups, can operate at night or for champagne breakfast flights and special evening flights.

Ultralight flights

Fantasy of Flight also offers introductory flights aboard ultralight aircraft. The flights aboard Flightstar Ultralights are offered in varying costs and flight lengths and are conducted with experienced FAA Certified Flight Instructors. Guests as young as 6 years old can actually take over the controls of the aircraft.

Visitors to the Fantasy of Flight complex feel as if they have stepped back in time. The entire complex has an Art Deco architectural motif that reflects the feel of airports of aviation's Golden Era of the late 1930s and early '40s. From its red-and-white checkerboard design water tower to tasty home-cooked food in the Compass Rose restaurant, the entire complex projects the same characteristics of a small airport more than a half-century old. The attraction's gift shop features historic aviation souvenirs, vintage one-of-a-kind aviation memorabilia and Fantasy of Flight themed gifts.

Fantasy of Flight is located in Polk City, Fla., on I-4 (exit #21), halfway between Orlando and Tampa, 20 minutes west of Walt Disney World. A visit takes approximately two to three hours. The attraction is open daily from 9 a.m. to 5 p.m. No admission is required to visit the Compass Rose restaurant or browse in the gift shop. MasterCard and Visa credit cards are accepted. Discounts for groups are available. For more information, call 941-984-3500. □

Master Certificates offered at World of Concrete

Attend four seminars in a subject area and receive a Master Certificate. Order your Master Certificate using the order form in your seminar handout book. Copies of the certificates can be attached to bid documents to show attendance at seminars on specialized construction methods required for a particular job.

Master Certificate in Basics. Technologia del Cemento y del Concrete (Seminar 20-01); Concrete Basics, Part I (Seminar 20-09); Basics of Concrete Floors on Ground (Seminar 20-17); Concrete Basics, Part II (Seminar 21-24); Concrete Basics, Part III (Seminar 22-39); Producing Durable Concrete (Seminar 23-53); High Performance Concrete With Specialty Admixtures (Seminar 24-68).

Master Certificate in Troubleshooting. Troubleshooting Heavy Construction (Seminar 20-10); Troubleshooting Parking Lot Construction (Seminar 21-25); Troubleshooting Fresh Concrete (Seminar 22-40); Troubleshooting Hardened Concrete (Seminar 23-54); Troubleshooting Residential Flatwork (Seminar 23-55); Troubleshooting Masonry, Part I: Challenges of Water Resistance (Seminar 23-60); Troubleshooting Concrete Cracks (Seminar 24-69); Successful Use of Troubleshooting Techniques (Seminar 24-71); Troubleshooting Masonry, Part II: Accommodating Movement in Masonry Walls (Seminar 24-75).

Master Certificate in Residential. Residential Flatwork (Seminar 20-02); Repairing Residential Flatwork (Seminar 20-11); Constructing Residential Walls (Seminar 21-26); Residential Waterproofing (Seminar 22-41); Troubleshooting Residential Flatwork (Seminar 23-55); Repairing Residential Walls (Seminar 24-70).

Master Certificate in Ready Mix. How to Increase Ready Mixed Plant Productivity (Seminar 20-12); Concrete Mix Design, Part I: Evaluation of Mixtures (Seminar 21-27); Concrete Mix Design, Part II: Adjusting With Aggregates and Admixtures (Seminar 22-42); Producing Durable Concrete (Seminar 23-53); Concrete Mix Design, Part III: Air Entrained Concrete (Seminar 23-56); Successful Use of Troubleshooting Techniques (Seminar 24-71).

MORE ...

World of Concrete has more exhibits than ever! Make sure you enjoy all the products, education and interaction that World of Concrete offers by walking outside where a world of excitement continues.

MEGASTRUCTURE EXHIBITS

Visit the 9000 to 9800 series of booths filled with equipment, materials, tools and services to help you do your job better.
Open daily 9:30 – 5:00
(Thursday 9:30 – 1:00)

MEGA DEMOS

Field techniques come to life in the Mega Demo arena. This year's topics include concrete placement, decorative flatwork and building with precast concrete. Action starts at 2:00, but arrive early for best seating.

WIN! WIN! WIN!

Visit the raffle booth in either of the Megastructures between 9:30 and noon to have your Expocard scanned. You could win a trip for two to World of Concrete 2001 in Las Vegas. Prize includes roundtrip airfare, hotel and $1000 in spending money. See booth attendants for details. Raffle is limited to attendees only*.

to Fabulous LAS VEGAS NEVADA

OUTDOOR and ACTION EXHIBITS

Try before you buy! See, test, and operate equipment from a range of manufactures. Booth series 10,000 – 33,000 are located in these active areas.
Open 9:30 – 5:00
(Thursday 9:30 – 1:00)

BEER GARDENS

Sponsored by Putzmeister America, Ironmax.com and Multiquip Inc., the Beer Gardens combine brews, soft drinks and pub food in a relaxed atmosphere. Two locations open daily
9:30 – 5:00

13 ways to get the money you're owed

By David F. Dorsch

How many times have you been a victim of slow payments from owners or general contractors? I hear this complaint often—and have been a victim, too. For some strange reason, many owners are far less diligent in making payments than they are in negotiating the contract and insisting on timely, high-quality work. Fortunately, there are some things you can do to ensure that you get paid on time for your work.

1 Negotiate just as hard for a prompt payment schedule as you do for a reasonable price. Just because the owner or general contractor hands you a standard preprinted contract to sign does not mean that you have to accept it. Insist that you be paid within a reasonable period (perhaps 10 days) after your work is completed.

2 Discuss the pay-request procedure at the preconstruction meeting. If it is not already spelled out in the contract, find out if the owner requires a special request-for-payment form to process your invoice. Also, find out what day of the month the owner must receive the invoice, and determine who will actually approve the request. Then set up a time to review the preliminary requisition with this person.

3 Don't include unapproved items such as change orders in your pay request—especially if they are relatively small in comparison to the total requisition. This can cause the requisition to be held up or returned to you.

4 Double check the math for accuracy. If items don't add up right, the processing will be delayed.

5 Send your pay request by registered mail or hand-deliver it personally to the approving authority. This eliminates the popular "we-never-received-your-invoice" excuse.

6 Find out the names and phone numbers of all the people who process the requests—especially the administrative assistants—and consider calling them when a payment is overdue.

7 Create an accounts-aging list, and review it every week. As soon as a payment is overdue, call and ask if your request was received or if there is some

problem with it. Keep a written record of the answers.

8 Make sure you know your lien rights in the various locations that you work. Some areas have a very short time in which to file the required notices. If you miss the time period, you may lose your rights.

9 Consider offering a discount for prompt or early payment. Some clients will take the discount, but still not pay the bill for 60 days. Then you have to bill them for the discount. But when it works, you could get your money in 10 days instead of 30 to 60 days.

10 Some organizations are set up to transfer the funds directly to your bank account. This can save from one to five days on the wait for your money, and it's cheaper than sending someone over to pick up the check.

11 In some cases, you may have to visit the owner personally. If you have been promised a check that never arrives, the next time tell the client not to mail it. Go to his office and pick it up.

12 Establish exactly what you must do to have the final retention released, and agree on the time that you will receive the retention. Also, try to get retention waived on change-order work. If you are making only 10% profit on the entire job—and the retention is 10%—the owner is holding your profits.

13 Make final closeout a detailed item on your work schedule, and allow a reasonable amount of time to complete it. Contractors usually get all the up-front paperwork such as submittals to the owner, but they are often not as diligent about getting the final documents such as as-built drawings to the owner. This delays the final payments and retention releases. □

SKW-MBT

Continued from page 1

tivities in North and South America, with 2,000 employees and 1999 total sales of more than US $500 million.

Roni Rutz

In North America, the individual companies of SKW-MBT Management, Inc. market their products through distinct channels, and the companies have separate sales organizations. In South America, direct sales forces in seven Latin American countries have access to the full breadth of SKW-MBT products, and work within their countries to promote the technologies and expertise of the entire group.

In 1997, SKW Trostberg AG, which already owned ChemRex Inc., acquired Master Builders, Inc. In March 1999, SKW purchased Harris Specialty Chemicals. Last September, SKW rearranged the product offerings of the companies, consolidating products sold through similar channels.

The manufacturing activities of all of the companies have been combined, reportedly creating the largest network of plants (34) and warehouses in the construction chemicals industry in the Americas.

Show News

Ironmax.com teams up with PRIME Equipment

PRIME Equipment is taking to the Internet with the help of Ironmax.com (Booth 9520), the online marketplace for construction equipment buyers and suppliers. Ironmax.com will assist PRIME Equipment in making its online presence known by making it easy for users to get Requests for Quotes (RFQs) directly from PRIME. When a registered buyer sends a RFQ to the Ironmax.com site, the RFQ is sent to suppliers within the buyer's market.

"PRIME agreed to enlist us to help them expand their Internet marketing and we won the opportunity because of our deep understanding of the industry," said Steven Paradis, president and CEO of Ironmax.com. "This agreement with PRIME will escalate the momentum Ironmax.com is experiencing."

CAMILLO'S CORNER

continued from page 4

in the concrete mix with entrapped microscopic air bubbles (foam) that act as a virtually weightless aggregate. Created by a foam generator, the air bubbles are extremely small and very uniform in size, unlike air-entraining admixtures. The cellular concrete can be used in both precast and cast-in-place applications, according to the company.

MultiQuip (Booth 2831) has introduced its new FS line of concrete saws, consisting of nearly 20 models in four series. All models feature an outboard shaft bearing that reportedly eliminates vibration and a heavy-gauge steel box frame chassis that prevents flex.

Finally, stop by **Ravensforge (Booth 9653)** and check out its SkateBlock product that is anchored in concrete to protect it from damage by skateboarders. Precision cast from bass, bronze, or aluminum, the item helps prevent cracking, discoloration, and chipping.

MEGA DEMO

Continued from page 1

ics as the base preparation, setting the sand bed, screeding, material handling, installation of pavers and edging, this demo will show you the ABCs of building with interlocking concrete pavers.

Bobcat/Ingersoll-Rand (Booth 7561) will be helping the Pave Tech workers by supplying an 864 G-Series compact track loader and a 963 skid-steer loader. The Bobcat 864 has a track system that improves flotation, traction, and maneuverability. It has a rated capacity of 2,000 pounds at 35 percent of its 5,715-pound tipping load. Track widths come in either 12.6 or 17.7 inches. While the narrow track provides better traction for general digging and excavating, the wide track provides improved flotation on soft ground.

The largest Bobcat available, the 963 has an operating capacity of 3,000 lbs. and a top speed of nine mph. The 963 weighs in at 9,900 pounds and is powered by a turbo-charged, 105-hp Perkins diesel engine.

probst "PAVERCAT" Universal Machine

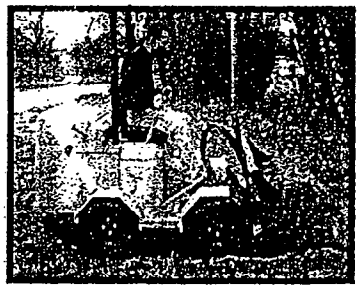
Designed to take a large amount of 'back breaking' work out of block paving.

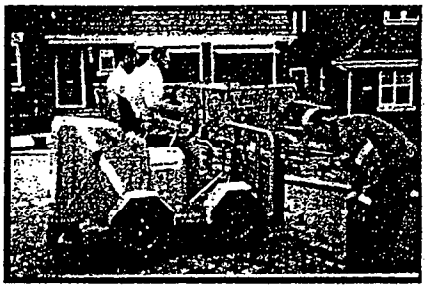
The *probst* 'PAVERCAT' comes in 2 designs, a 4x4 and a 4x2 model. Both can be fitted with a hydraulic paver clamp, a sand bucket, a sand broom, a rotary sand/cleaning brush and many other attachments for the handling of concrete products.

With a lifting capacity of 400 kg the *probst* 'PAVERCAT' is a powerful aid yet it is still fast and manoeuvrable, because of this it is capable to provide 5 to 6 workers with enough sand and blocks to see through a days work.

Remember the probst 'PAVERCAT' will still be working at the same speed at the end of the day as at the beginning.

Once you become proficient in the use of the probst 'PAVERCAT' (a very short learning time) you will ask your-self how you ever managed without one.





Bonuses of owning a *probst* "PAVERCAT":

- Use the bucket to move your screeding sand into position and level it. No need for wheel barrows or a larger machine for moving your sand.
- Moving your paving blocks to the laying face quickly, as the rollmops can run on loose pavers. No need for a forklift
- Use the brush to sweep your jointing sand.
- Better standard of working, i.e. less injury's due to less handling of the paving blocks.
- With efficiency there becomes the chance of larger block paving contracts.
- The Probst 'PAVERCAT' can do the work of at least three workers, therefor reducing your labour costs.
- The Probst 'PAVERCAT' is the ideal machine for the block paving industry, wether a small, medium or large job. It is economical and user friendly; the perfect compliment to your team.

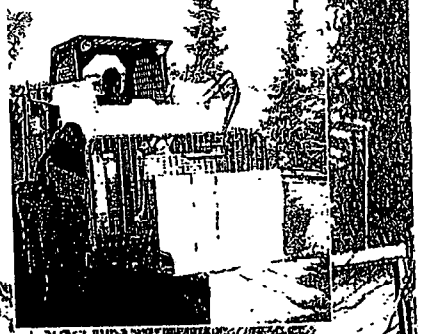
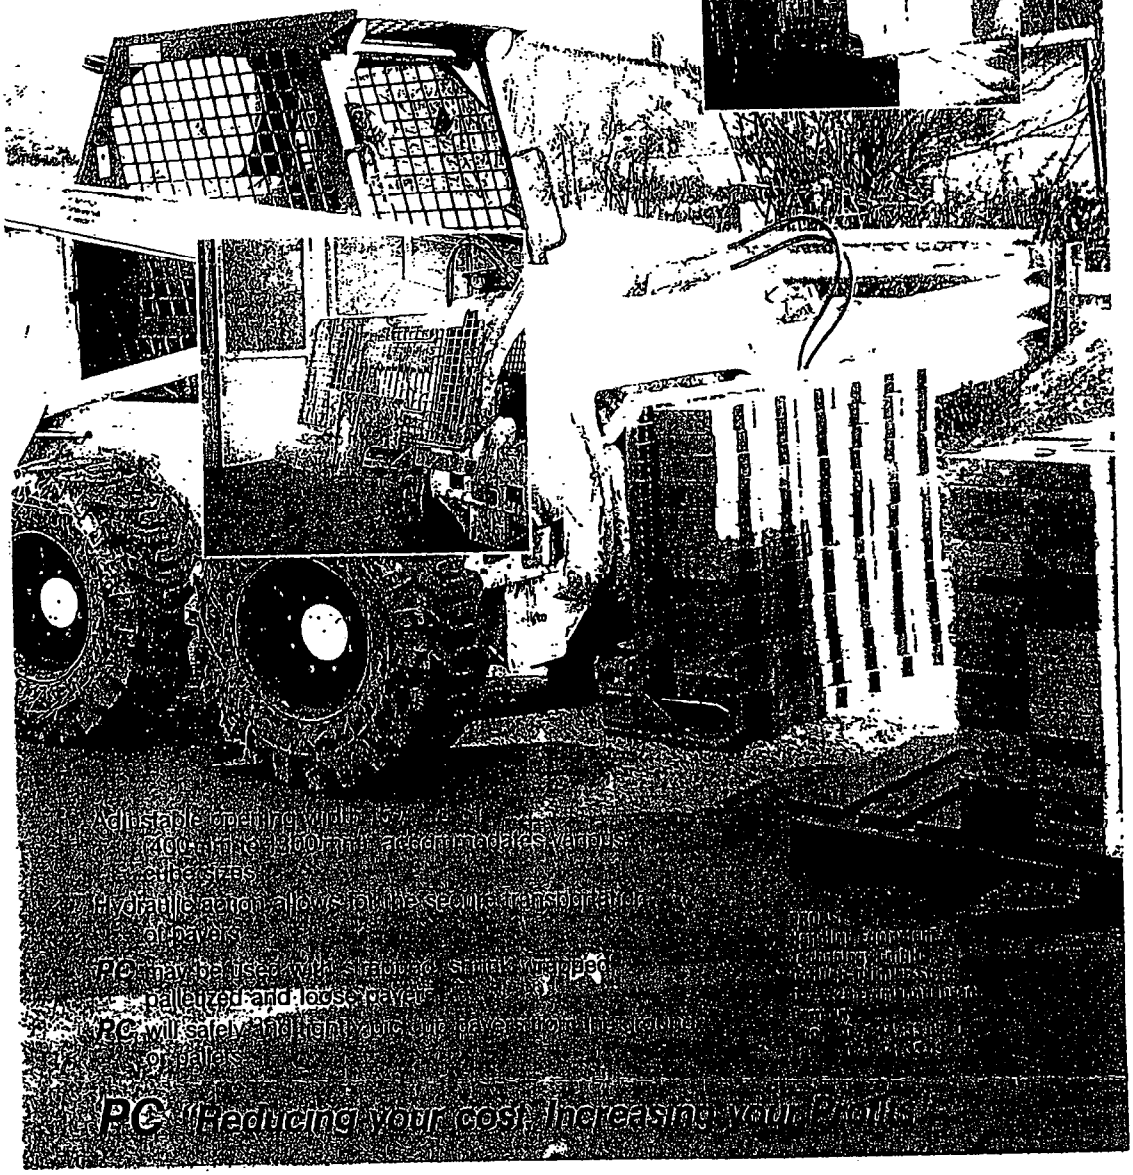
Handling Equipment

Probst "Paver Cat PC"
"Getting a firm grip on your pavers"

PC fits all Bobcats, making paver transportation and distribution, at the job site, less time consuming and more cost effective.





- Adjustable opening width to [illegible] accommodates various pallet sizes
- Hydraulic action allows for the secure transportation of pavers
- *PC* may be used with a variety of shrink wrapped palletized and loose pavers
- *PC* will safely and tightly pick up pavers from the ground or pallet

PC "Reducing your cost, increasing your profits"

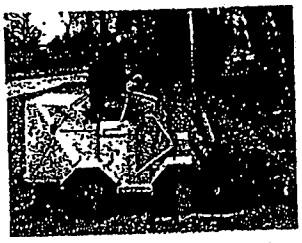
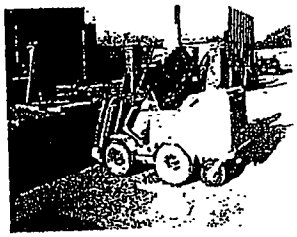
"PAVERCAT" UNIVERSAL MACHINE

The probst pavercat is a 4 wheel driven machine. Additionally, 2 supporting wheels can be folded down hydraulically in order to not shift the loose pavers when driving on the surface. On the front of the machine, a hydraulic paver clamp, a sand bucket, a sand broom, a rotary sand cleaning brush and many other attachments for handling of concrete products can be fitted.





Beauties of owning a Probst PAVERCAT

With a lifting capacity of 400 kg the *probst* pavercat is a powerful aid yet it is still fast and manoeuvrable, because of this it is capable to provide 5 to 6 workers with enough sand and blocks to see through a days work.

Remember the probst pavercat will still be working at the same speed at the end of the day as at the beginning.

Once you become proficient in the use of the probst pavercat (a very short learning time) you will ask your-self how you ever managed without one.

Use the bucket to move your screeding sand into position and level it. No need for wheel barrows or a larger machine for moving your sand.

- Moving your paving blocks to the laying face quickly, as the pavercat can run on loose pavers. No need for a forklift.

Use the brush to sweep your jointing sand.

- Better standard of working, i.e. less injury's due to less handling of the paving blocks. With efficiency there becomes the chance of larger block paving contracts.
- The Probst pavercat can do the work of at least three workers, therefore reducing your labour costs.
- The Probst pavercat is the ideal machine for the block paving industry, wether a small, medium or large job. It is economical and user friendly; the perfect compliment to your team.

PAVE TECH INC.

PAVE EDGE

U.S. Patent No. 4863307 and Foreign Patents

Paver Edge Restraint System

for interlocking paver and brick pavements

The Competitive Edge . . .

The *only* self supporting edge restraint designed *exclusively* for Pavers!

Made of a *strong* environmentally safe PVC compound.

Available in both rigid and flexible 15' long sections for straight or curved edges.

Totally invisible when in place; will not heave from frost. Will not rust, warp, or deteriorate.

Lightweight, simple to install.

MOST MAJOR PAVER MANUFACTURERS AND CONTRACTORS IN NORTH AMERICA DISTRIBUTE OR USE PAVE EDGE!

PT 01114

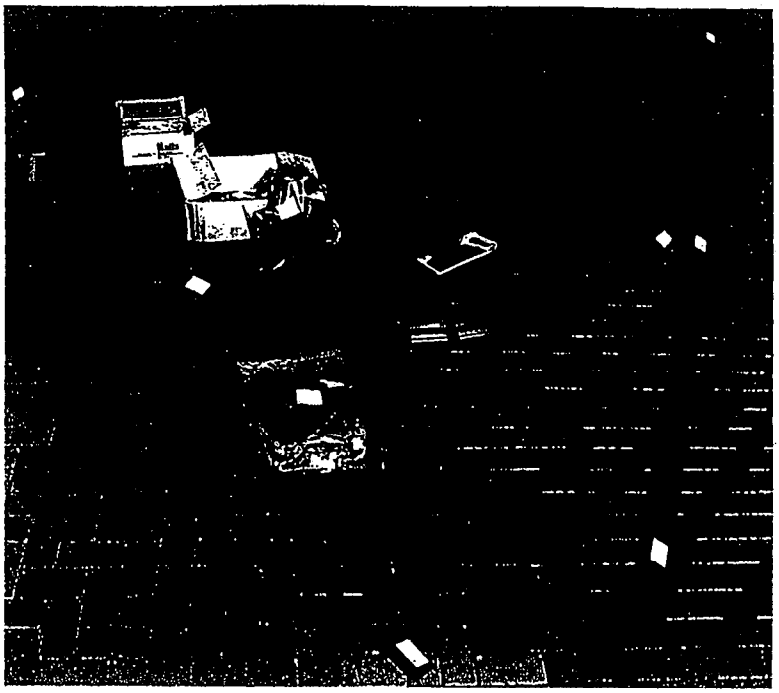
PAVE TECH INC.

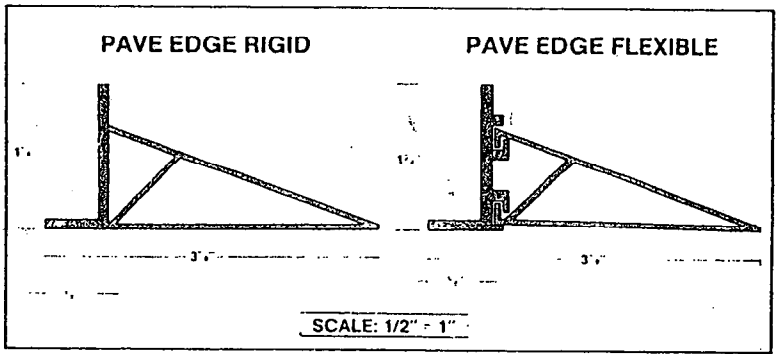
. . . was started as a paver installation firm several years ago and has become a major paving stone contractor in the Minneapolis area today. Experience with traditional edge restraints was unsatisfactory and led to the early development of a PAVE TECH PVC paver edge restraint system.

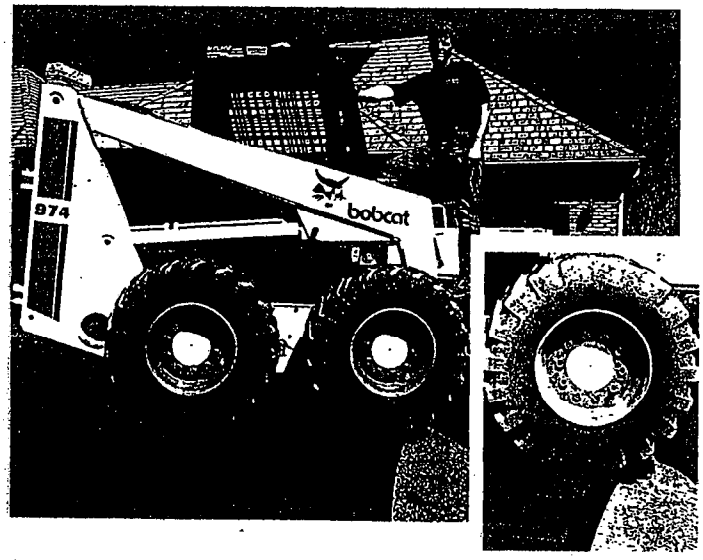
Working with the edging on paver projects, PAVE TECH made several significant design and material improvements. The patented edging offered today under the registered trade mark PAVE EDGE is the result of this on-the-job trial and improvement process by PAVE TECH crews with input from contractors and paver manufacturers as well.

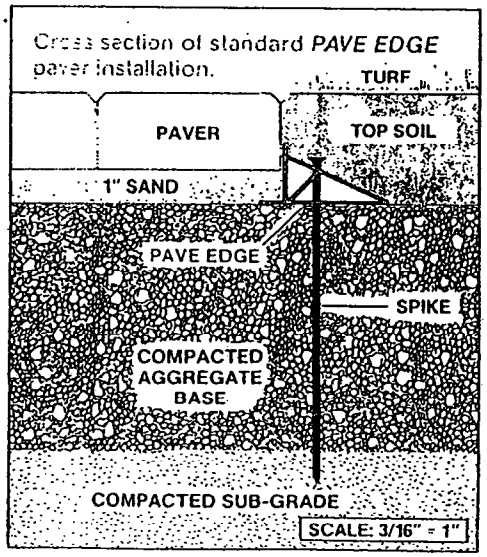
Due to its unique design, PAVE EDGE reinforces the edging face while spreading vehicular loads over a wide area of the sub base. A frost heave lip on all PAVE EDGE sections is a feature that allows it to lift and settle with the pavement during annual freeze-thaw cycles. By moving with the pavers, PAVE EDGE remains an integral part of the installation and continually imparts its structural strength across the pavers and the sub base. Another unique feature of PAVE EDGE Rigid and Flexible edging is its ability to flex over contours. Although paver surfaces will adapt to land features, traditional strip edging does not.

PAVE EDGE offers unchallenged design flexibility, simple installation requirements, lightness in weight, superior strength and durability. Because it is the only edging designed *exclusively* for pavers, it is the most widely accepted and used paver edge restraint system in use today!









GUIDE SPECIFICATIONS — PAVING STONE EDGE RESTRAINT

PART I GENERAL

A. DESCRIPTION:

Provide a PVC paver edge restraint system, consisting of 15 ft. long sections of both Rigid and Flexible edging. **Rigid** edging is a self-contained, one-piece section; **Flexible** edging is a two-component system, consisting of a vertical flex strip and back supports which are packaged and supplied with each order of Flexible edging. Sections are joined to each other with a PVC connecting pipe, also provided with each order. Spikes are needed to anchor the edge restraint system to the base.

B. RELATED WORK:

For related work specified elsewhere see:

02240 — Soil compaction methods
02510 — Walks, roads and parking paving
02515 — Unit Pavers
02550 — Highway/runway paving
02710 — Subsurface draining materials
04200 — Unit masonry

C. DELIVERY, STORAGE AND HANDLING:

Delivery of PAVE EDGE Rigid and/or Flexible edging shall be accepted in bundles of twelve 15 ft. sections, (180 lin. ft.) Storage of all components of the system shall be in a safe place to prevent construction site damage prior to installation.

PART II PRODUCTS

A. ACCEPTABLE MANUFACTURERS:

Paver edge restraint system shall be PAVE EDGE PVC Rigid and/or PAVE EDGE PVC Flexible edging as manufactured by PAVE TECH, INC. Follow manufacturer's recommendations as to installation.

B. MATERIALS:

PAVE EDGE edge restraint system to be furnished for work under Part 3 of this Section, consists of:

1. Rigid PVC edging — 15 ft. long, straight one-piece section, with pre-drilled holes spaced 1 ft. apart for spiking.
2. Flexible PVC edging — 15 ft. long, two-piece component, consisting of a vertical flex strip and 24 back supports, with a pre-drilled hole in each support for spiking.
3. Edging connector — 3/4" diameter PVC pipe; shipped one 4 ft. long piece per bundle of edging to connect sections of PAVE EDGE.

PART III EXECUTION

A. INSPECTION:

Inspection of base preparation prior to installing PAVE EDGE edging shall be the responsibility of the paving stone contractor. Proper grade, slope and elevation shall be verified by the paving stone contractor so that surfaces to receive materials or pavers have no defects which would result in poor or defective application or workmanship.

B. BASE PREPARATION:

Unsuitable, unstable or unconsolidated subgrade material shall be excavated to reach solid sub grade. Excavation should exceed the perimeter of the pavement area by a minimum of 8"-12".

Base course aggregate shall be 3/4"-minus crushed limestone or equivalent and consist of sound, durable particles, free from clay, organic material or other deleterious matter, with 100% passing a 1" sieve size and a maximum of 5% passing a #200 sieve.

Thickness of base course shall be dependent on type of sub grade soil and intended pavement use. For light vehicular use, minimum thickness of base course will vary from 6" (good sand and gravel soil) to 12" (poor, heavy clay or peat soil.) Base course material should be spread in 4" lifts and compacted with suitable vibratory compaction equipment to reach 95% Proctor density of ASTM 1557. Moisture content of base material should be kept at optimum during compaction.

C. INSTALLATION:

1. Layout — Place PAVE EDGE on top of compacted and uniformly graded gravel base per pavement design, and spike through pre-drilled holes in the edging into the compacted base using 10"-12" x 3/8" diameter steel spikes.

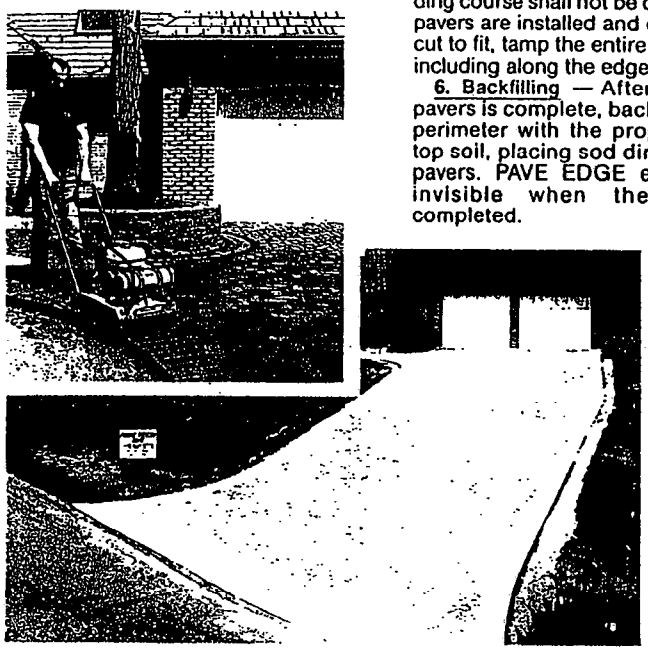
2. Curves and Radiuses — Provide PAVE EDGE Flexible edging for all radii. Flex the 15 ft. strip to match the radius, cut or add to desired length. Slide in adjustable back supports from the end (24 supports every 15 ft. section of PAVE EDGE flex strip) with one on each end to hold the edging connectors when joining pieces. **Do not use PAVE EDGE Flexible edging on straight areas, only on the curved areas.** In the event Flexible edging is not on hand, use Rigid edging by cutting the back side with a hack saw; a straight cut for outside radii and a wedge shaped cut for inside radii. The more frequent the cuts, the tighter the curve.

3. Joining Sections — Cut the 4 ft. section of edging connector pipe into 5" lengths. Insert into the smallest cavity of the edging. Having started the connector in one piece, use a twisting motion to slide two sections together.

4. Staking — Pound in spikes only part way every 4 ft. (to accommodate edging adjustment) using 10"-12" x 3/8" diameter brite steel spikes. After final edging placement, finish setting spikes so that the heads of spikes are level with the edging material. When using PAVE EDGE Flexible edging, one spike must be used in every support section. As a guide, use one spike every 3-4 ft. on patio/sidewalks; every 2 ft. on driveways and medium duty pavements; every support section on radiuses/curves; every 1 ft. on commercial/industrial applications.

5. Sand Bedding Course — Spread coarse, washed sand evenly over the area to be paved and screed loosely (no compaction) to a uniform 1" thickness before the paving stones are placed. Use PAVE EDGE edging for exterior screed guides and 1" diameter pipes for interior guides. After screeding, this sand bedding course shall not be disturbed. When pavers are installed and edge pieces are cut to fit, tamp the entire pavement area, including along the edge.

6. Backfilling — After installation of pavers is complete, backfill around the perimeter with the proper amount of top soil, placing sod directly up to the pavers. PAVE EDGE edging will be invisible when the project is completed.

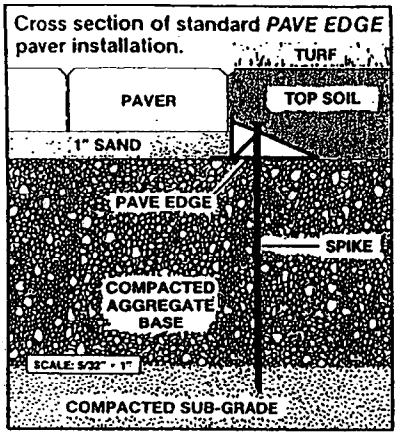


PAVE EDGE **INDUSTRIAL**

International Patents Pending

New *PAVE EDGE* INDUSTRIAL has a stronger new design made especially for heavy commercial and industrial applications. Designed for 8 cm - 10 cm pavers. INDUSTRIAL EDGING can withstand repeated heavy usage from continual loading along the edges without failure and breakdown. Experience the tremendous cost savings compared to poured-in-place concrete.

Call Pave Tech 1-800-728-3832 for more details about ***PAVE*** EDGE **INDUSTRIAL.**



PAVE TECH SERVICES TO THE PAVING INDUSTRY

VHS VIDEOS...

PAVE EDGE Edge Restraint System — Installation Instructions. Recommended Practices for Paving Stone Installation (14 min.) A residential driveway paver project that includes visual step-by-step instruction on placing PAVE EDGE edging.

Paving Stone Protection Treatment Program — Contains recommended practices for removing all types of stains from interlocking concrete and brick paving surfaces. Describes sealing techniques to achieve long lasting protection of your paver installation; how to "seal in" colors and textures of pavers and achieve the desired "wet look."

PAVE TECH *EDGE*
INDUSTRY NEWSLETTER

A quarterly publication that includes, among several other features, articles of interest written by industry leaders covering all aspects of the current paving stone industry. Design professionals, landscapers, paving stone contractors, manufacturers, all industry participants, are encouraged to send in their name to receive this national newsletter.

SEMINARS/DEMONSTRATIONS...

PAVE TECH's distributor service includes on-site seminars and demonstrations of paver installation, base preparation, edge restraint placement, etc. Held for the benefit of local architects, installers, and distributor personnel as well, these seminars include on-site paver installations.

TECHNICAL BULLETINS...

Periodical instruction sheets describing "how to" application of PAVE TECH paver products. These bulletins are written for the installer/contractor, and will be of interest to the architect and landscape professional as well.

PRODUCT INFO SHEETS...

Announcements of new additions to the PAVE TECH line, design improvements and changes made to existing products.

ACCESSORY PRODUCTS FOR THE PAVING INDUSTRY

PAVE TECH PAVING STONE PROTECTION TREATMENT PROGRAM

PAVER PREP® Efflorescence Cleaner — For effectively removing efflorescence stains from paving stone and brick pavements.

PAVER GUARD® — Exterior acrylic pavement sealer for all interlocking concrete and brick paver installations.

PAVER DE-STAINER® — A heavy duty cleaner for removing dirty oil, grease and rust stains from pavers.

PAVE TECH/LEXEL®
CLEAR POLYMER ADHESIVE

For bonding concrete or brick pavers to concrete steps, sidewalks, glass, steel or just about anything else. Lexel is a completely waterproof adhesive that remains flexible under *all* temperature extremes. Has high elasticity, does not become brittle, yet has an unexcelled bond with surfaces of many different materials. Lexel withstands sharp impacts and will stretch up to six times its original size.

LPS Brings Mechanical Installation of Pavers One Step Further!

This article was prepared by LPS Pavement Company. Bill Schneider, President. 33W 480 Fabyan Parkway, Suite 101, West Chicago, IL.

LPS Pavement Company began mechanical installation work last November in Northbrook on the first all-paver project in the United States, where concrete interlocking paving stones are being used for every paved surface. The Northbrook townhome project, The Courts of Northbrook, is the first major project in the Midwest to utilize the exclusive mechanical installation technique offered by LPS.

The Courts of Northbrook, located just west of the Northbrook Court Shopping Center, will include approximately 200,000 square feet of paving stones. LPS is installing the pavers for all streets, sidewalks, patios, driveways and off-street parking related to the project, plus all curb and sub-base work for the development.

Bill Schneider is regarded as North America's mechanical installation expert.

LPS President Bill Schneider says, "This project is quite a dramatic breakthrough for LPS since we are the only company in the Midwest using

(Continued on page 2)

LPS Pavement Company, the oldest full-time paving installation company in the country, installs concrete interlocking paving stones with its exclusive mechanical installation technique. Based out of West Chicago, LPS is the only company in the Midwest providing mechanical installations.

1990 will be a SWEET's year for *PAVE TECH* ...

SWEET'S CATALOG Will Bring Specifiers and *PAVE EDGE*® Distributors Together!

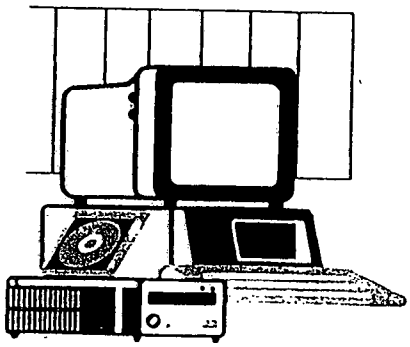
Starting with the next distribution of Sweet's Catalog, which will be early next year, *PAVE TECH* will broaden its overall marketing program by inclusion of a new *PAVE EDGE*® four-color brochure in the Sweet's system.

Sweet's catalog since 1906 has been considered the premium construction industry marketing tool for buyers seeking sellers and vice versa! A newly designed *PAVE EDGE*® brochure, written specifically for architects, engineers, specifiers, municipal officials and contractors, will be distributed across the USA and Canada into over 100,000 offices for the first time!

In the Sweet's file, *PAVE EDGE*® edging information will be in the hands of the right people. . . those who evaluate, compare and select the type of edging for their paving projects. Over 95% of architects in the USA named Sweet's as their primary source for detailed product information!

Since this catalog plays such an important role in the design and build

(Continued on page 3)



PAVE EDGE® Makes BIA News!

BIA NEWS, official publication of the Brick Institute of America, published a Special Issue: "Focus on Paving" in April, 1989 that included a major article on the *PAVE EDGE*® edge restraint system.

In its full page coverage, the publication illustrated components of the system and showed a cross-section cut-a-way of a typical paver installation. Also included were recommended steps for base preparation and edging placement, as well as a short history of the development of *PAVE EDGE*® and the company's efforts to encourage quality paver installation through its educational and promotional programs.

In this special paving issue, Nelson Cooney, BIA President, in his message to the brick manufacturing industry, re-emphasized the readiness and willingness of his organization to increase promotion and marketing of brick pavers, noting that during 1987 only 2.6% of total brick shipments that year were full size pavers. A second article paid tribute to another organization's commitment (NCMA) to promotion and technological advancement of the paving stone industry through their efforts on a broad marketing front.

The BIA performs the same function for the brick industry that NCMA does for concrete block manufacturers and NPCA for its precast concrete producer members. Charles Farley, Publisher, and especially Kathryn Gord, Editor of the monthly publication, are to be congratulated for BIA's emphasis on member communication through this newly refurbished, professionally written and edited newsletter! *PAVE TECH* is now an Associate member of BIA.

LPS *(Continued from page 1)*

mechanical installation. Offering this technique was the key to making this completely-paved project economically feasible."

According to Schneider, concrete paving stones are traditionally installed by hand. The mechanical installation method drastically reduces the time and effort involved, and makes the pricing more comparable to other paved surfaces. Schneider adds, "When properly installed by a qualified contractor, paving stones will outlast and out perform any other paving surface available today."

LPS has signed the contract for this project with developers Optima, Inc. Optima President David Hovey comments, "We had several reasons for selecting LPS and the paving system. First, the aesthetics of the texture and color provide a rich look for our development that would be lacking in concrete and blacktop surfaces. Second, the long-term durability of the installation will result in overall less maintenance. And, finally, based on their past work, LPS can provide us with the mass production techniques that make this option very competitive with other surfaces."

"The finished streets and sidewalks will look good for a very long time," Hovey continues. "Virtually all of our projects in the past have won architectural awards for design. We always place the emphasis on quality and, through mechanical paving installation, LPS is helping us to continue in that direction." The Courts of Northbrook are currently 75% leased, with occupancy expected in February, 1989.

LPS Pavement Company, the oldest full-time paving installation company in the United States, has been in the paving business since 1976. Other recent LPS projects include the first fully paved city street in Cincinnati, Ohio, the Inner Harbor project in Cleveland, OH, and the Wildwood project completed last year in New Jersey which used pavers for both the street and sidewalks in a downtown improvement project.

We are pleased to announce ...

. . . an addition to our *PAVE TECH* team. **Dale Sopkowiak** (just call him Dale!) has joined us as our new Operations Manager. Dale comes with a 24-year career in office management which has centered around the computer field and includes developing customer support help desks for Gelco and other major corporations. Additionally, he has worked for smaller paving companies, where he would also assist in installations and servicing of the equipment. With this broad background, Dale is a positive addition to our team.

Dale's initial goals are to beef up our computer systems to better support you and your needs. Our intent is to build a data base that will provide answers to most questions at a moments notice. Don't be surprised if he calls you to get your input. If he doesn't call you first, give him a call. The more information we can gather, the better we can serve you!

Dale Sopkowiak

Architect's and Paving Contractor's Names Wanted!!!

One of the special features of the *EDGE* newsletter is timely articles about subjects which we feel are of interest to architects and paving stone contractors, ie: proper design and construction techniques, technical data on soil compaction and base preparation, types, sizes and shapes of pavers and their application in pavement patterns, etc. . .the list is long.

Our mailing list is short, however. We want to reach as many ARCHITECTS who design pavements and, PAVING STONE CONTRACTORS who lay them, as possible, and you are the key!

If you send us your list of these key people, we will add them to our newsletter mailing list. However, if you prefer, we will send you an extra quantity of the publication and you can mail them out yourself . . . but you have to let us know how many. Thanks for your help!

To the Editor,
PAVE TECH EDGE
P.O. Box 31126
Bloomington, MN 55431

Re: Newsletter mailing list

I am sending a list of architects who design paving stone installations and/or a list of paving stone contractors. Please add them to the *EDGE* newsletter mailing list, or call 1-800 PAVE TEC (728-3832) or FAX: 612/881-2169.

PAVE TECH Announces Entry into Paving Stone Cleaner/Sealer Market!

PAVE TECH is proud to announce the addition of a tested, high quality line of efflorescence cleaners and pavement sealers to its rapidly expanding group of paving stone industry products.

As of April 1st, *PAVE TECH* will be the EXCLUSIVE United States distributor of Cimtech Ciment Products, Canada, a leading supplier of detergents and sealers in Canada.

PAVE TECH's Pavement Protection Program includes two primary products. The cleaner is referred to as EF-900 Efflorescence Cleaner. It is the ideal detergent for interlocking pavers. It rapidly removes efflorescence and, unlike muriatic acid, will not etch nor bleach the paver surface.

The sealer is referred to as SC-610 Sealer; an excellent protector for pavers. The SC-610 will not blister nor turn yellow with age, and effectively seals in depth. It provides long-wearing resistance from staining by oil, gasoline and other solvent based stains. It also greatly enhances the color and leaves the "wet look" that many customers like. The sealer needs reapplication only every two-three years.

Full details, including ordering requirements, prices etc., for the above mentioned *PAVE TECH* products, and the specially formulated Rust Stain Remover and Degreaser products, can be obtained by contacting *PAVE TECH* distributors in the USA.

A *PAVE TECH* paver treatment brochure has been included in this mailing for your information.

PAVE TECH Paver Treatment Products

Efflorescence Cleaner
(EF-900) Concentrate

The perfect detergent for efflorescence removal. Rapidly neutralizes efflorescence (white chalky deposits on paver surfaces). Contains no solvents and no muriatic acid. *PAVE TECH* Efflorescence Cleaner will not etch surface of pavers like other harsh acids.

The efflorescence cleaner is shipped as a concentrate. Each gallon of concentrate must be diluted with 3 gallons of water. The 1 gallon + 3 gallon mixed volume should clean from 150 to 200 square feet of pavement, depending on the amount of efflorescence present. Available in 5 gallon pails, or cases of four 1 gallon containers.

CAUTION: This product is to be sold only to properly trained, experienced contractors. It is not for resale to the general public.

Paver Sealer/Acrylic, Solvent Based
(SC-610)

The heavy-duty paver sealer that doesn't peel, crack or turn yellow. It ensures excellent protection for all paving stones, concrete or brick. It is ideal for use in residential, commercial and industrial applications. It offers long-wearing resistance against stains from oil, gas and grease, and, is highly recommended when quick drying is required.

This product is also packaged in 5 gallon pails and cases of four 1 gallon containers and is ready for use. Coverage is approximately 150 square feet per gallon of sealer.

CAUTION: This product is to be sold only to properly trained and experienced contractors. It is not for resale to the general public.

Paver Sealer/Water Based (SC-620)

This superior concrete paver sealer contains no solvents. It offers, long-lasting protection for paver surfaces. It is ideal for residential/commercial applications, ie: driveways, walkways, patios, etc. It provides effective protection against oil stains, rust, deicing salts, etc. For maximum protection, *PAVE TECH* recommends reapplication every two to three years. This sealer requires special application.

This product is packaged in 5 gallon pails and cases of four 1 gallon containers ready to use. Coverage should be approximately 150 square feet per gallon of sealer.

CAUTION: This product is to be sold only to properly trained, experienced contractors. It is not for resale to the general public.

PAVE TECH Announces Entry into Paving Stone Cleaner/Sealer Market!

PAVE TECH is proud to announce the addition of a tested, high quality line of efflorescence cleaners and pavement sealers to its rapidly expanding group of paving stone industry products.

As of April 1st, *PAVE TECH* will be the EXCLUSIVE United States distributor of Cimtech Ciment Products, Canada, a leading supplier of detergents and sealers in Canada.

PAVE TECH's Pavement Protection Program includes two primary products. The cleaner is referred to as EF-900 Efflorescence Cleaner. It is the ideal detergent for interlocking pavers. It rapidly removes efflorescence and, unlike muriatic acid, will not etch nor bleach the paver surface.

The sealer is referred to as SC-610 Sealer; an excellent protector for pavers. The SC-610 will not blister nor turn yellow with age, and effectively seals in depth. It provides long-wearing resistance from staining by oil, gasoline and other solvent based stains. It also greatly enhances the color and leaves the "wet look" that many customers like. The sealer needs reapplication only every two-three years.

Full details, including ordering requirements, prices etc., for the above mentioned *PAVE TECH* products, and the specially formulated Rust Stain Remover and Degreaser products, can be obtained by contacting *PAVE TECH* distributors in the USA.

A *PAVE TECH* paver treatment brochure has been included in this mailing for your information.

PAVE TECH Paver Treatment Products

Efflorescence Cleaner
(EF-900) Concentrate

The perfect detergent for efflorescence removal. Rapidly neutralizes efflorescence (white chalky deposits on paver surfaces). Contains no solvents and no muriatic acid. *PAVE TECH* Efflorescence Cleaner will not etch surface of pavers like other harsh acids.

The efflorescence cleaner is shipped as a concentrate. Each gallon of concentrate must be diluted with 3 gallons of water. The 1 gallon + 3 gallon mixed volume should clean from 150 to 200 square feet of pavement, depending on the amount of efflorescence present. Available in 5 gallon pails, or cases of four 1 gallon containers.

CAUTION: This product is to be sold only to properly trained, experienced contractors. It is not for resale to the general public.

Paver Sealer/Acrylic, Solvent Based
(SC-610)

The heavy-duty paver sealer tha doesn't peel, crack or turn yellow. ensures excellent protection for a paving stones, concrete or brick. It i ideal for use in residential, commercia and industrial applications. It offer long-wearing resistance against stain from oil, gas and grease, and, is highl recommended when quick drying i required.

This product is also packaged in ! gallon pails and cases of four 1 gallor containers and is ready for use Coverage is approximately 150 square feet per gallon of sealer.

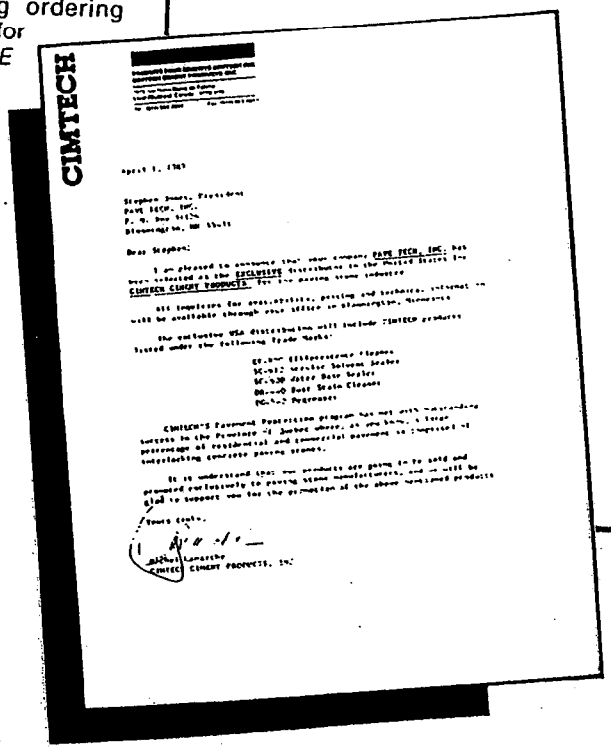
CAUTION: This product is to be sold only to properly trained anc experienced contractors. It is not for resale to the general public.

Paver Sealer/Water Based (SC-620)

This superior concrete paver sealer contains no solvents. It offers, long-lasting protection for paver surfaces. It is ideal for residential/commercial applications, ie: driveways, walkways, patios, etc. It provides effective protection against oil stains, rust, deicing salts, etc. For maximum protection, *PAVE TECH* recommends reapplication every two to three years. This sealer requires special application.

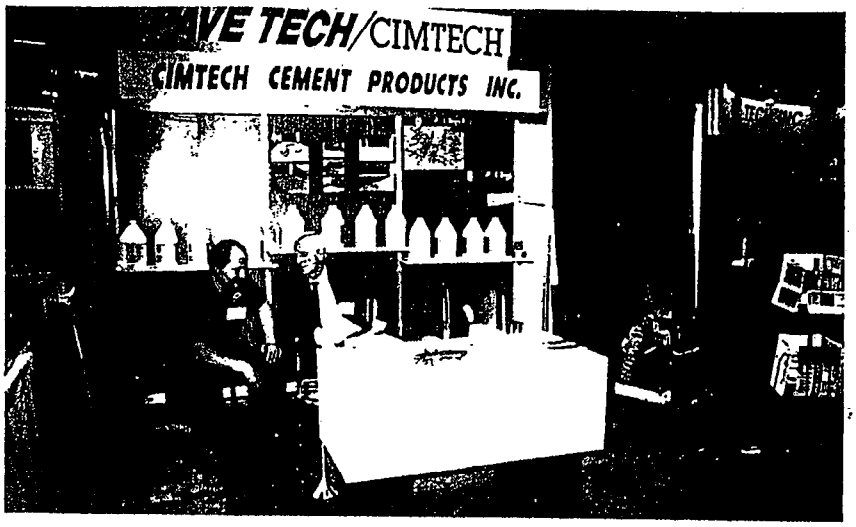
This product is packaged in 5 gallon pails and cases of four 1 gallon containers ready to use. Coverage should be approximately 150 square feet per gallon of sealer.

CAUTION: This product is to be sold only to properly trained, experienced contractors. It is not for resale to the general public.



CIMTECH

PAVE TECH/CIMTECH combined booth at the National Precast Concrete Convention in Indianapolis featured pavers, edge restraints and sealers (top right).



Rust Stain Cleaner (DR-440)

PAVE TECH's highly effective rust cleaner removes stubborn metal stains rapidly from all concrete paver and brick surfaces. It leaves no film after treatment and will not alter paver colors.

The Rust Stain Cleaner is packaged in cases of twelve 1 quart containers only.

CAUTION: This product is to be sold only to properly trained and experienced contractors. It is not for resale to the general public.

Degreaser (DG-540)

This specially formulated product will quickly remove all kinds of motor, brake or transmission oil from concrete paver and brick pavements. It is easy to apply, has fast action and leaves the surface looking new again with professional results.

PAVE TECH degreaser is packaged in cases of four 1 gallon containers only.

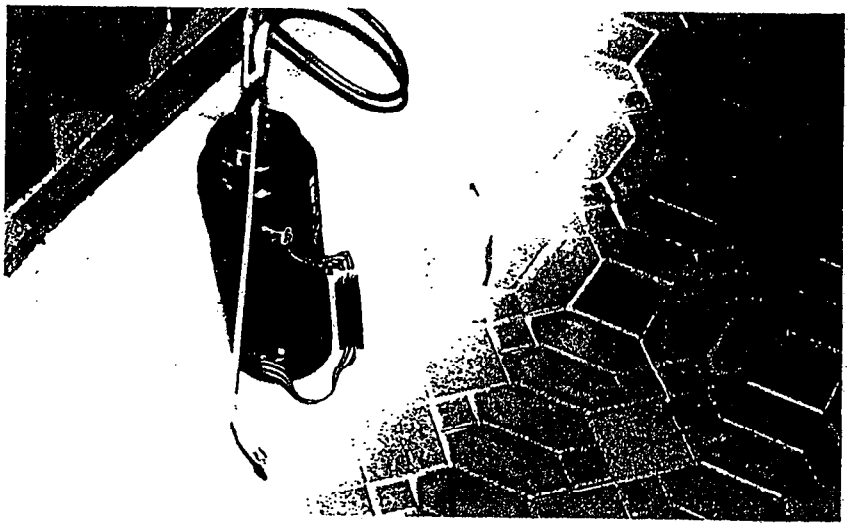
CAUTION: This product is to be sold only to properly trained and experienced contractors. It is not for resale to the general public.

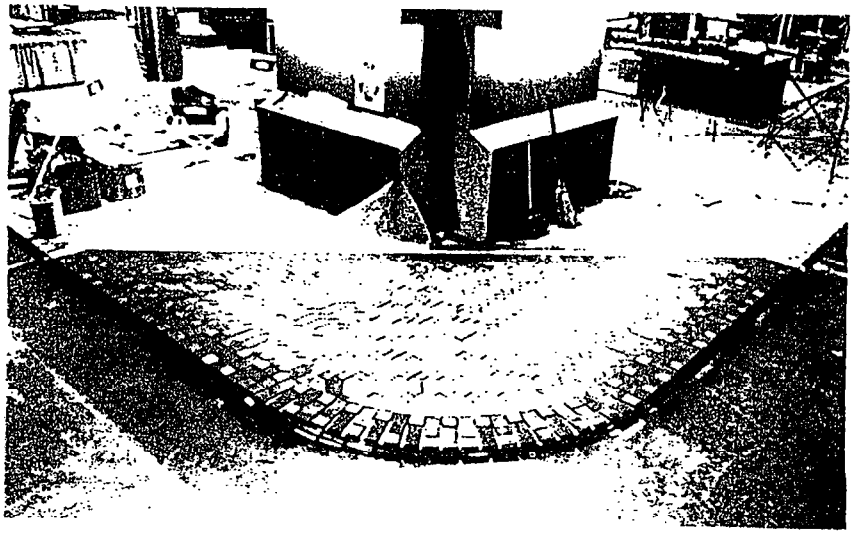
NOTE:

The manufacturer reserves the right to change formulation of these products without advance notification.

These paver treatment products will be sold through paver manufacturers only.

Safety data sheets will be supplied to distributors as needed.





A vivid example of an unfinished paver surface (left) compared to the portion sealed with *PAVE TECH's* new SC-610 sealer (center right).

PAVE TECH's exhibit at the NCMA show featured a new paver design pattern sealed with two coats of SC-610 (bottom right).

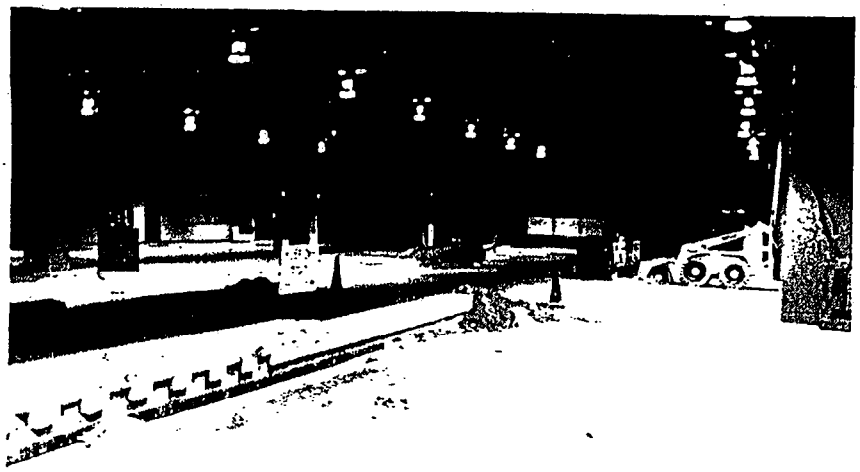
NATIONAL CONCRETE MASONRY ASSOCIATION

Two Great Conventions for the Paving Industry

NATIONAL PRECAST CONCRETE ASSOCIATION

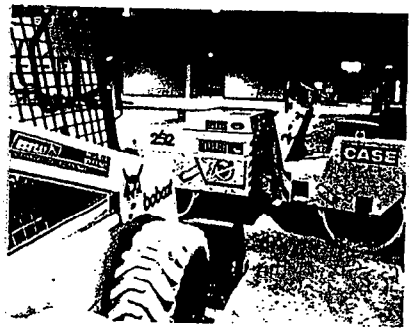
"Confronting Challenge in the 1990's" (NCMA's Convention theme) and "The Greatest Spectacle in Precasting" (NPCA's theme for its annual meeting/exposition) set the pace for both Associations' annual conventions, and provided what were called the most exciting programs for the paving industry yet!

Speakers, round-table discussions, committee meetings, actual paver demonstrations and dozens of exhibiting firms from the paving stone and related industries — all participating in what was the greatest effort ever to expand and improve the production and the marketing of concrete paving stones, — played a major role at both conventions.



Several thousand square feet of the Cincinnati Convention Center floor area was roped off for a *PAVE TECH* base preparation seminar during the NCMA Exposition.

PAVE TECH was part of the action in both Cincinnati (NCMA) and Indianapolis (NPCA), not only as an exhibitor, but as part of the program and a base preparation demonstration held during the Cincinnati show (see photo). *PAVE TECH* installed over 900 square feet of pavers, furnished by PAVERLOCK, Inc. of Cincinnati, for NCMA's paver theme park. In addition, 900 square feet of pavers furnished by INTERPAVE CORP., also of Cincinnati, were laid for the Zenith Equipment and *PAVE TECH* exposition booths!

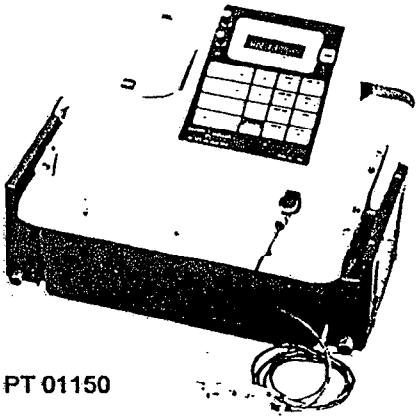


Sincere thanks are extended to three participating firms who loaned equipment to *PAVE TECH* to help make the seminar/demonstration a success. Those three are:

- MELROE . . . Bobcat Enterprises, Inc., Mr. Glenn Free, P.O. Box 46345, Cincinnati, OH 45246 for the Model 843 Bobcat.

- CASE . . . Southeastern Equipment Co., Inc., Bill Baker, Jr., 301 Breaden Road, Monroe, OH 45050, for the Case 252 Roller Compactor and AV1300 Plate Compactor. A special thanks also goes to Udo Boersch, Case Company's Western North American Compaction expert.

- SEAMAN NUCLEAR CORP., Mr. Donald Seaman, 7315 South 1st Street, Oak Creek, WI 53514. Seaman loaned a Nuclear Density Meter for measuring moisture and compacted density of the paving stone base.



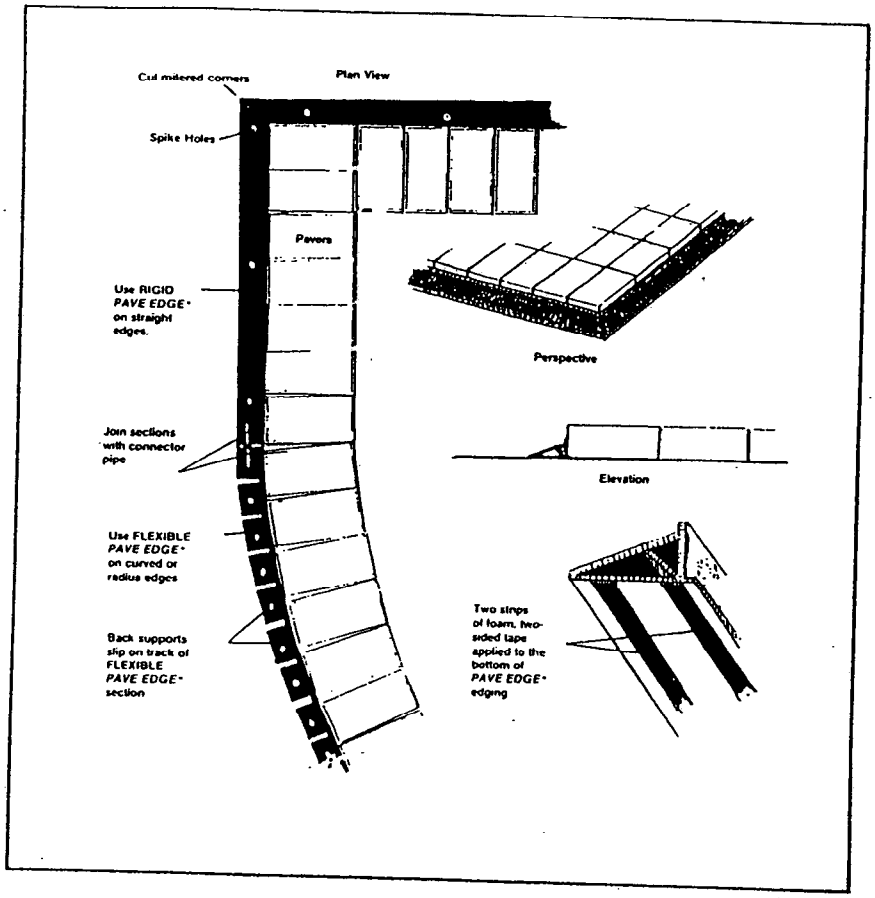
PT 01150

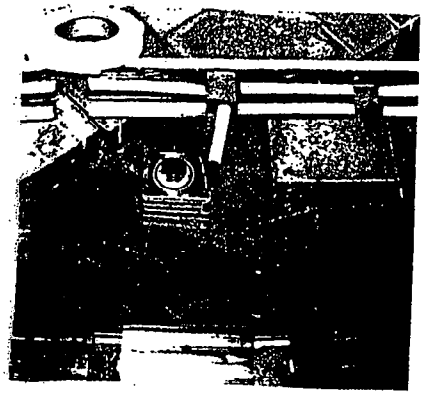
Distributors Find that *PAVE EDGE*® "Works" at Shows!

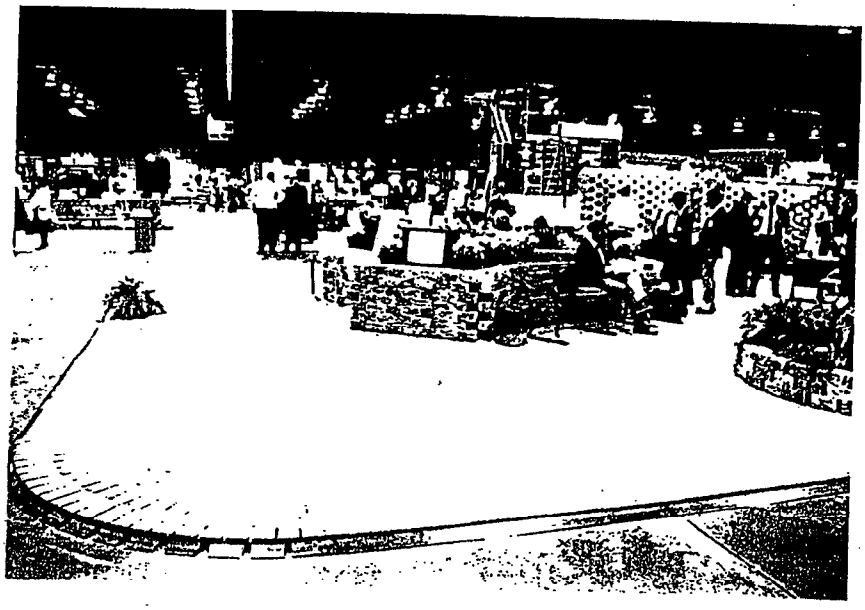
PAVE EDGE® Edging has proven to be a simple, low cost and permanent solution to an annoying trade show problem . . . that of stopping paving stone displays from collapsing.

Because several inquiries have been received regarding our Fall '88 newsletter article on how *PAVE EDGE*® can be used to effectively hold paver displays together on concrete floors at shows and expositions, we are repeating the instructions on how to use the edging for this purpose.

Using 2-sided foam tape underneath the edging, and following a few simple preparatory steps, you'll find *PAVE EDGE*® does a great job . . . see instructions below! You can obtain a high quality two-sided foam tape by writing or calling BrownCor International, 14101 N.W. 4th Street, Sunrise, FL 33325, phone: 1-800-327-2278 or FAX. 305/370-7168. Ask for Model 4-5555, 1" x 50' Double Coated White Foam Tape. You can charge it using Master Card, Visa or American Express; they will also rush delivery if needed!







TOP LEFT: Lay out *PAVE EDGE*® and cut to fit display area.. Use window cleaner and paper towel to clean floor and underside of edging.

BOTTOM LEFT: Apply two strips of two-sided foam tape on the underside of the edging. Use short strips under back supports of flexible edging as shown above.

ABOVE: NCMA's Paver Park at the recent annual convention in Cincinnati drew large crowds. *PAVE TECH* installed the pavers, using what else but *PAVE EDGE*® to surround the display area!

Welcome to New USA Distributors. . .

. . . **San Luis Obispo, CA — Airvol Block Company** — P.O. Box 931, phone: 805/543-1314. Thanks to Jim Irwin for the edging order from California's newest *PAVE TECH* distributor.

. . . **Denver, CO — Clalite, Inc.** — 5050 Race Street, phone: 303/292-2345. Sales representative Scott Coalman reports that Clalite's first order for edging placed on April 10th, is already sold out!

. . . **Eau Claire, WI — Fehr Concrete Products** — 1111 Menomonie Street, phone: 715/834-7701. Fehr's Vice President Tom Baumgartner started out by ordering not only edging, but *PAVE TECH* spikes and Lexel adhesives as well!

. . . **Algonquin, IL — Paveloc Industries** — 842 W. Algonquin Road, phone: 312/658-0934. Paveloc's order for edging and spikes from Brad LeGare, comes from one of the busiest paver markets in the USA — Chicago and surrounding metro area.

. . . **Tucson, AZ — Stewart Block Company** — 9311 N. Casa Grande Highway, phone: 602/744-3890. An active marketing company, Stewart distributes paver portfolios to their architects, contractors, etc. and has already held a paver installation seminar since Mike Stewart's first order in March!

Birmingham, AL — Superock Block Company — 3301 - 27th Avenue North, phone: 205/324-8624. Mike Hornsby, Sales Manager, started an aggressive paver promotion program at Superock with the help of *PAVE TECH* video and brochures.

. . . **Eugene, OR — Willamette-Graystone, Inc.** — 3700 Franklin Boulevard, phone: 503/726-7666. Don Jones, Jr. of the Eugene office, first called *PAVE TECH* in late 1988, visited at the Company booth during the NCMA February '89 Show, ordered shortly after that, and has done a great job of promoting *PAVE EDGE*® since!

Welcome to New Canadian Distributors. . .

. . . **Montreal, Quebec — Cimtech Ciment Products** — 1973 rue Notre Dame-de-Fatima, phone: 514/663-2863. A new *PAVE TECH* distributor, first in the Province, opens the door for Quebec paving contractors to *PAVE EDGE*®. Michel Lamarche of Cimtech reports that Quebec is a very busy paving stone market.

. . . **Regina, Saskatchewan — Cindercrete Products Ltd.** — Victoria Avenue and Fleet Street, phone: 306/789-2636. On February 24th, a letter from Russ Lebell, included this paragraph: "After having viewed the video tape on *PAVE TECH* edge system and having discussed it with installers, we would like to place an order." Thanks Russ, for the nice order.

. . . **Spruce Grove, Alberta — Expocrete, Inc.** — Highway 16 West at Devon Overpass, phone: 403/962-4010. Norman Dick and Gary Lecuyer have become active promoters of *PAVE EDGE*® edging. Over 10 videos and hundreds of brochures are being used in this firm's areawide sales campaign. A large order, placed in March is moving out well!

. . . **Bridgewater, Nova Scotia — South Shore Ready Mix Ltd.** — P.O. Box 247, phone: 902/543-4639. *PAVE TECH's* first Atlantic Province distributor, is introducing the edge restraint system to Nova Scotia contractors! Located southwest of Halifax, South Shore is headed by John Parnell who first ordered *PAVE EDGE*® in March of this year.

. . . **Yorkton, Saskatchewan — Yorkton Concrete Products Ltd.** — Highway 9 & York Road, phone: 306/782-2264. Yorkton is located north and west of Regina. Manager Jim Logan is another marketing-minded member of the paver industry who is using several videos to help promote and sell, not only edging but pavers as well!

WELCOME to *PAVE TECH* Distributors Across North America!

Since our last issue of the *EDG* newsletter (NCMA & NPCA Convention issue), paver manufacturers ha gotten serious about hopping on t *PAVE TECH* bandwagon! From No Scotia to California, from Alberta Alabama, twelve additional maj paver producers are now offerin *PAVE EDGE*® edging, and more, their customers! They're not on helping save their customers time (an that means money) . . . but they're als helping to improve the quality an permanence of paving projec through a quality edge restrai system!

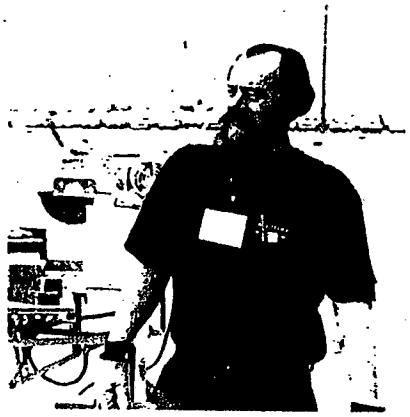
Distributor/Contractor/ Installer ALERT!

Technical Tips from Bob Lindstrom, *PAVE TECH's* Manager of Paver Installation

FLEXIBLE EDGING DOES NOT FUNCTION AS STRAIGHT EDGING.

Do not use flexible edging in place of rigid edging on straight paver runs! It's costly, time-consuming and difficult, if not impossible to line up properly. In other words, it just doesn't pay!

Installers will spend too much time slipping back supports onto the flexible upright section. Several times the number of nails will be needed, as it is necessary to nail every back support (24 per 15 foot section) to achieve stability instead of the normal every two feet as recommended on rigid edging. Third, rigid edging is designed to resist stresses and to spread the loads over a large area. Flexible edging is designed to resist these same loads only when it is used in a curved or radius situation.



Bob Lindstrom

Flexible edging is ideal for curves, islands, serpentine and other radius applications, but not for straight runs. When used for that purpose on a vehicular pavement, it will fail!

When Cutting *PAVE EDGE*® Edging...

. . .Use a 32 tooth-per-inch hacksaw blade for quick, easy and smooth cuts on rigid edging. Although flexible *PAVE EDGE*® is most practical for use on curved applications, it may be necessary to use rigid when flexible edging is not available.

A simple straight cut on the vertical back section will allow the material to bend to an outside radius. A wedge shaped cut will allow it to bend for an inside radius. The more frequent the cuts, the tighter the curve.

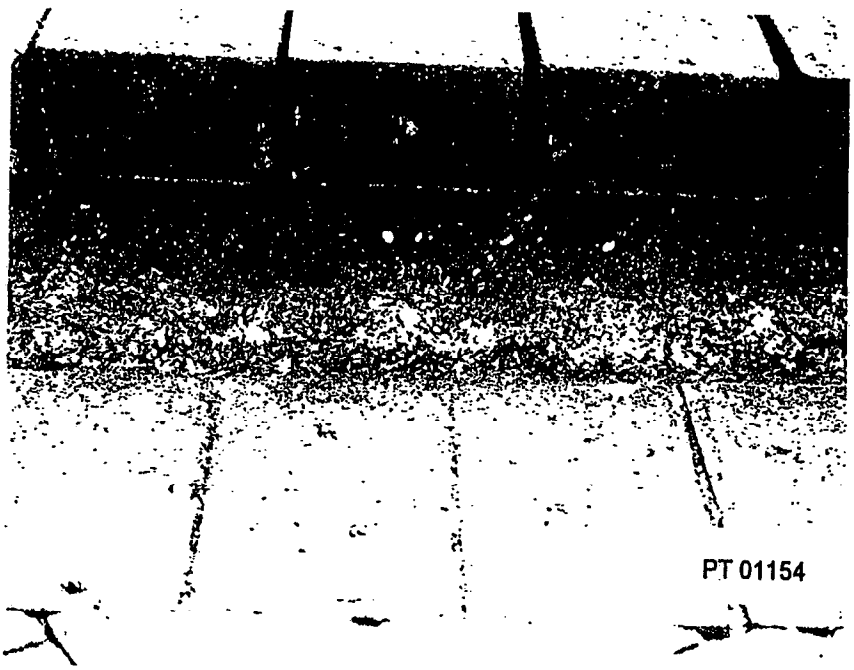
In any case, the right choice of hacksaw blade will make the job easy!

Goodbye Efflorescence!! . . .

Retaining Walls Look New Again

Masonry contractors who build brick and block buildings know it!... paving contractors who lay pavers and build masonry retaining walls know it!... landscapers, architects and building owners certainly know it!... they're the ones who generally call attention to what is one of masonry's biggest nuisances ... Efflorescence!

The white chalky residue on paver and masonry surfaces is not a permanent problem, even though it is often a very unsightly blemish! Pavers won't deteriorate because of it... brick and block walls won't come tumbling down because of it either. One thing is certain however, masonry in all its forms, shapes, sizes, types and colors, including the best made paving stones, are all potential ugly ducklings when the soluble salts present in most masonry materials, reacts with moisture and is drawn to the surface during the process of water evaporation.



PT 01154

A quick and easy way to remove these surface stains on retaining walls is to use *PAVE TECH's* EF-900 Efflorescence Cleaner, using recommended guidelines. Later, a protective coat of *PAVE TECH* SC-610 Solvent Sealer will help keep the surface looking new, directing salts, that want to migrate, elsewhere than the exposed face of the wall!!

Attention
PAVE TECH Distributors. . .

Get into *Our* Pants!

When you're down on your knees laying pavers, you'll be in great shape if you're wearing Skillers paver pants! Skillers, Europe's largest clothier for workmen, were inspired by PAVE TECH to custom design pants for paver installers with built-in pockets for removable knee pads, and pockets for holding tools of the trade as well! They're also great pants for brick and block masons, your production and yard people too!

Built of high-quality materials . . . a combination of poly-cotton and Dupont CORDURA (an extremely tough and durable fabric that handles the abrasion of paver surfaces well) these charcoal colored pants feature a weave and weight that makes them comfortable to wear in summer's heat and they're waterproof, too!

PAVE TECH distributors who are interested in offering these pants to their customers, should contact Skillers of America, Inc. direct. *PAVE TECH* will subsidize $4.00 of the cost of each pair of pants sold! An equal subsidy by the manufacturer (sorry, only *PAVE TECH* distributors eligible) will guarantee an attractive low price to the customer. In return, both the distributor's and *PAVE TECH's* name will be permanently "engraved" on the leather patch on the pants, creating a unique advertising opportunity!

ADVANCED TROUSER TECHNOLOGY! Call Skillers of America, Inc. direct 1-800-325-8707 or 612/379-3243. TELL THEM YOU'RE A *PAVE TECH* DISTRIBUTOR. If you need help in ordering, call the *PAVE TECH* office.

Distributor NEWS

From Edmonton, Alberta . . .

Several paver manufacturers effectively use telephone waiting time to promote their various products. What better way to make the wait seem short and to acquaint customers calling in with the entire line of paver products and accessories?

Expocrete Inc., a new *PAVE EDGE*® distributor from Alberta, Canada, uses the following friendly message . . . **"Thank you for calling Expocrete! We sincerely appreciate your business and ask that you please hold until someone is free to assist you! We've been serving Albertans for over a decade now, providing interlocking concrete paving stones for commercial and residential use, and a whole lot more! Ask us about our dealers throughout Edmonton and Alberta."**

A second message pleasantly surprised us at *PAVE TECH* during a recent call from our office . . . **"Get the competitive edge with new *PAVE EDGE*® the hidden paver edge restraint system! *PAVE EDGE*® eliminates the need for wood or concrete edging when installing paving stones. Inquire about *PAVE EDGE*® rigid edging, flexible edging, and edging connectors. We'd be pleased to give you all the pertinent details and all the advice you might need!"**

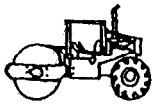
Thanks to Gary Lecuyer of Expocrete for sending us this bit of distributor news!

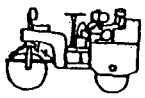
Attention Paving Stone Contractors:

Watch for compaction equipment roundup in our next issue!

What kind of compaction equipment is being offered by today's construction machinery industry to properly prepare aggregate base for paving stones?

Look for answers in our next *EDGE* newsletter. We'll carry a complete roundup of what's new in compaction equipment to keep you up to date!!





New CASE 252 Compactor Arrives!

PAVE TECH accepted delivery of a new CASE Model 252 Vibratory Roller Compactor, April 14th, JUST in time to start the 1989 Twin City paver laying season rolling!

Bruce Wagner, *PAVE TECH* crew supervisor, rolls the 252 off one of the equipment trailers. CASE POWER AND EQUIPMENT COMPANY, 6340 E. Highway 101, Shakopee, MN — Phone: 612/445-5400, supplied the new compactor. Many thanks to Roger Jones of CASE for his invaluable assistance.

Because the proper type and size equipment plays such an important role in actual paving stone installation construction, *PAVE TECH* will publish in its next newsletter, a COMPACTION EQUIPMENT ROUNDUP. . . WATCH FOR IT!

Shipment of *PAVE EDGE*® Lost or Damaged!

Call the *PAVE TECH* office immediately upon receipt of any shipment of damaged edging, or if part of the order is missing!

Truckers do a good job about 95% of the time in proper handling and delivery of *PAVE EDGE*® Edging. When there is a problem, please call either 1-800-PAVETECH (728-3832) or our regular number 612/881-5773. We will put a tracer on lost orders, help you file a damaged goods claim and see that damaged edging is replaced immediately!

We can assist you more efficiently if you call us upon delivery . . . DO NOT wait several days or months, because *PAVE TECH* **cannot** accept any responsibility if you do not notify us immediately!

Cimtech Ciment Products To Represent *PAVE TECH* in Province of Quebec!

PAVE TECH is announcing, elsewhere in this issue, the appointment of Cimtech Ciment Products, Laval, Quebec, as a new *PAVE EDGE* distributor in Quebec. A long-standing *PAVE TECH* policy of distributing *PAVE EDGE* edging only through paver manufacturers was waived in the afore-mentioned case and therefore, an explanation is due.

In the past two years, a large number of inquiries regarding *PAVE EDGE* have been received from contractors, landscapers, building material/masonry supply distributors, private citizens, etc. from throughout the Province of Quebec. Our effort to establish a paver manufacturer distributorship in Quebec, to handle this potential business, has not produced any results.

In order to properly service the rapidly expanding paver market in Quebec, it was necessary to appoint a non-manufacturer whose territory is confined within Provincial borders only!

It is the only exception to the paver manufacturer pre-requisite for a *PAVE EDGE*® distributorship that will be made.

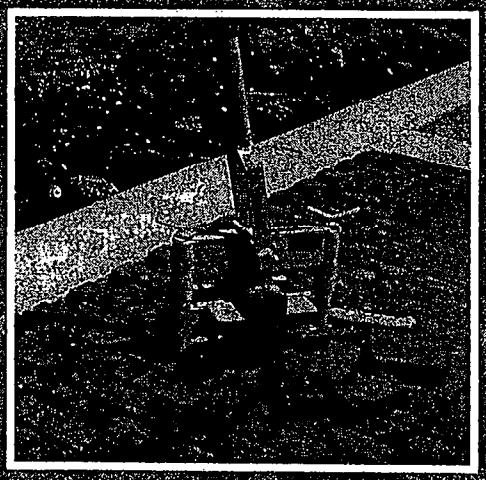
Tools and Equipment

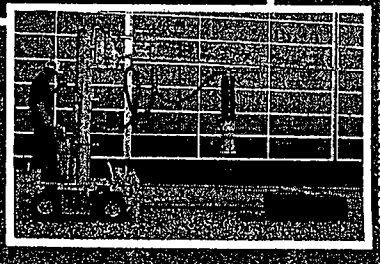
"Professional's Choice"



Cutting Tools and Accessories

Installation Tools

Lifting/Clamping Equipment



Mechanical / Vacuum Installation Equipment

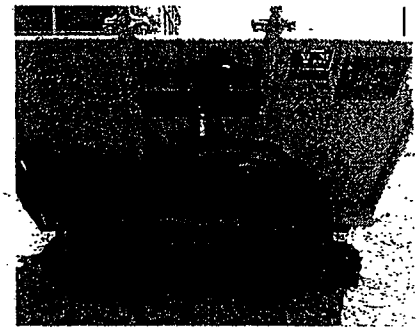
PHOTOS BY W. BURR BENNETT

World's finest paver, retaining wall, and pre-cast equipment.

PT 01730

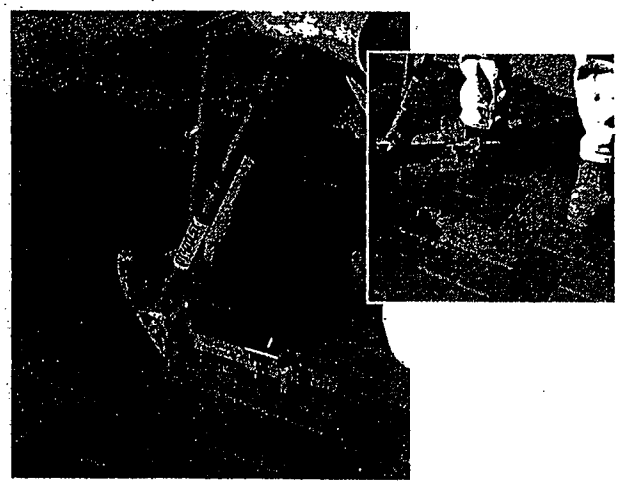
PAVERCART

- Large 12" diameter tires.
- Adjustable clamping shoes fit most paver shapes.
- High tensile steel.
- Adjustable clamping width 23"–41¾" (580mm-1060mm).
- Well balanced.
- Pallet roller.
- Superior gold zinc plated finish .



CARTTRAY to transport compactors or retaining walls.

- Lightweight, only 16 lbs.
- One hand drop-in attachment and removal.



PHOTOS BY W. BURR BENNETT

PAVEREXTRACTOR

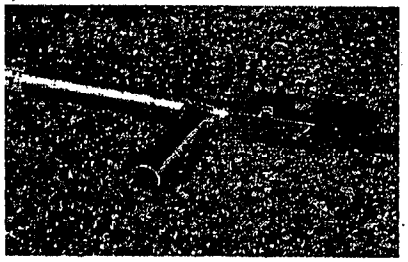
The professional's answer to paver removal.
Goodbye screwdrivers!

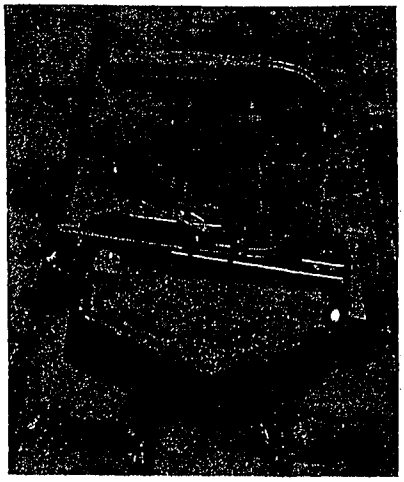
- Hammering surfaces to drive teeth into joints.
- QuickADJUST accommodates almost every paver shape and size.
- Replaceable serrated spring steel teeth.
- Gold zinc plated finish.
- Rubber grip handles.
- Built to last.

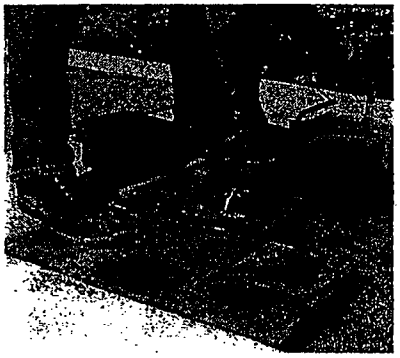
PAVERADJUSTER

The efficient way to adjust paver bond lines.

- Designed to be used standing up.
- Replaceable spring steel tooth.
- Hand and foot rests to drive into joint.
- Rubber grip handles.
- Gold zinc plated finish.







PAVERPAW

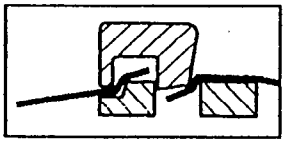
The only one handed option for two handed pavers. ***PAVERPAW's*** used in each hand actually will speed up installation over 300%.

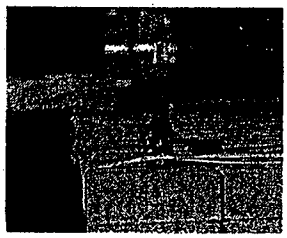
- Replaceable serrated spring steel teeth.
- Rubber grip handle.
- QuickADJUST allows for fast easy size adjustment for most pavers.
- Size range 6"–10" (150-255 mm).

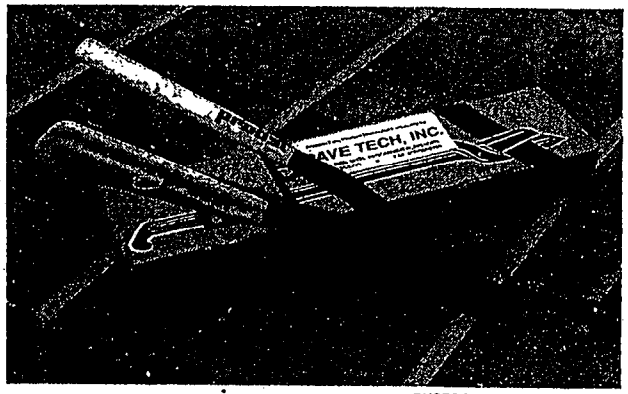
BANDCUTTER

Absolutely world's finest band cutters.

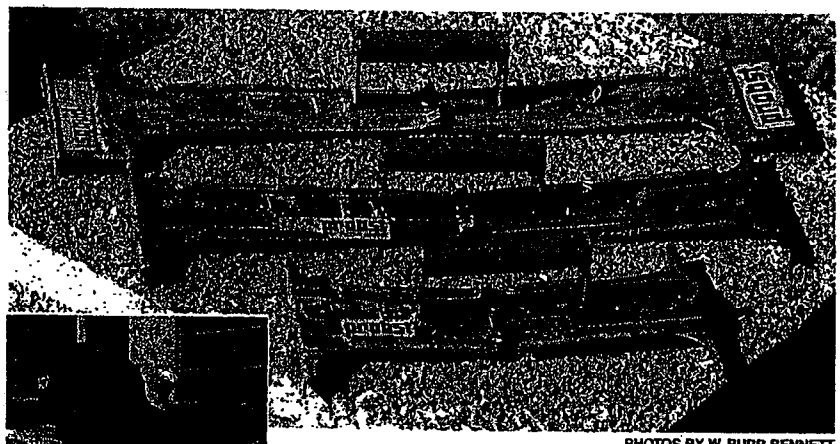
- Cuts and holds both ends of strap.
- Wedge shaped head allows easy use even on tight bands.
- Simple but rugged.
- No springs or latches to break.
- Entire tool hardened steel.



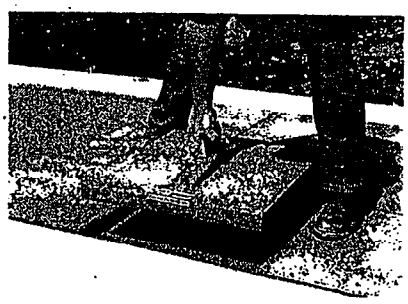




PHOTOS BY W. BURR BENNETT



PHOTOS BY W. BURR BENNETT



SLABGRABBER's I & II

The answer to laying 12"–24" (290-610mm) slab pavers. A simple but excellent tool to allow one handed setting of large slabs and paving units, can be used singly or in pairs. Can easily increase laying speed by up to 300-500% and a cleaner job.

- Simple rugged construction.
- Plastic hand grip.
- QuickADJUST sizing:
  #I 11½"–19" (290-480mm)
  #II 15½"–23⅝" (395-610mm)

INSTALLATION TOOLS

PAVERPERSUADER

The only hammer designed specifically for the paver contractor to adjust and tighten pavers.

- Replaceable rubber heads.
- Flat top design allows hammer to be freestanding.
- Long hardwood handle eliminates bending over.

FIELDCLAMP (SG)

Scissor Style

Perfect for contractors and dealers for site/yard handling. Excellent value clamp for deliveries and handling of strapped pavers/slabs and many other precast products.

- QuickADJUST 4 position width adjustment.
- Long wearing replaceable rubber grippers.
- Custom grippers on request.
- Light weight construction.
- High tensile steel.
- Automatic lock and release mechanism.
- Can be used with either pallet forks or chain.

Weight	440 lb	200 kg

Mechanical

PRODUCTION/YARDCLAMP (MPZ)

Excellent heavy duty clamp for use with pavers/slabs etc. in production and yard handling situations.

- Used with either crane hooks or pallet forks.
- QuickADJUST width adjustment.
- Extra heavy duty construction.
- High tensile steel.
- Automatic lock and release mechanism.

F 1555		
Opening range	15¾-43½ in	400-1100 mm
Height	23½ in	600 mm
Gripper length	45 in	1150 mm
Carrying capacity	3300 lb	1500 kg
Weight	540 lb	245 kg

Other configurations and sizes, call for your application.

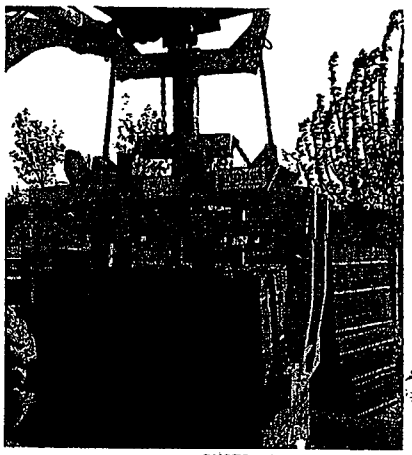

PHOTO BY W. BURR BENNETT

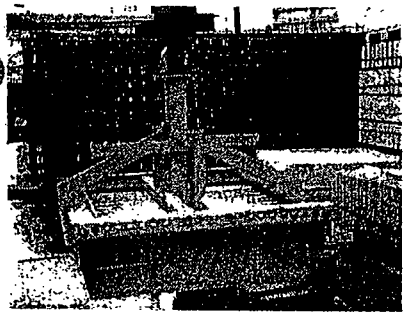

Mechanical

SLABCLAMP (MPG)

Useful clamp to handle large slabs and banded slabs or specialty precast products.

- Crane or chain shackle.
- Automatic lock and release mechanism.
- Rugged construction.
- Long wearing replaceable rubber grippers.

F 2010		
Opening range	11¾-39 in	300-1000 mm
Height	6 in	150 mm
Gripper length	39 in	1000 mm
Carrying capacity	1750 lb	800 kg
Weight	240 lb	110 kg

F 2011		
Opening range	11¾-39 in	300-1000 mm
Height	6 in	150 mm
Gripper length	47 in	1200 mm
Carrying capacity	2200 lb	1000 kg
Weight	310 lb	140 kg

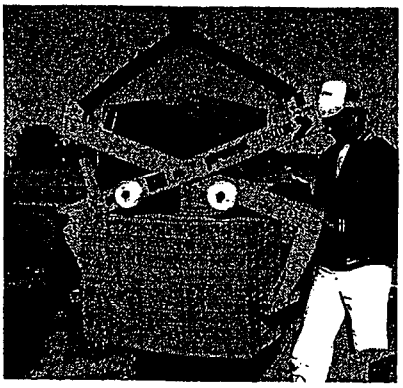

PHOTO BY W. BURR BENNETT

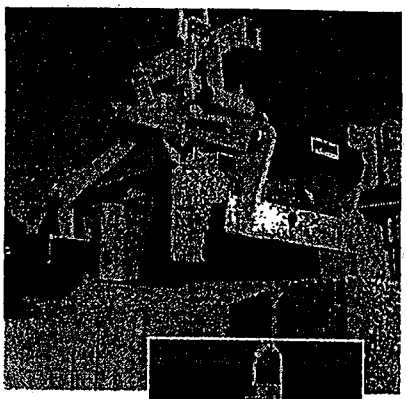
Mechanical

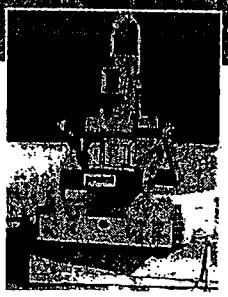
BANDCLAMP (MSZ)

A heavy duty multi-use clamp that can be used for 1-2 bands of pavers, curbs and other precast products. Can be lifted with pallet forks or chain.

- Automatic lock and release mechanism.
- *NEW* more stable 4 roller deisgn.
- Long wearing replaceable rubber grippers.

F 2100		
Opening range	29½-39 in	750-1000 mm
Height	11¾ in	300 mm
Gripper length	15¾ in	400 mm
Carrying capacity	1760 lb	800 kg
Weight	110 lb	50 kg





PHOTOS BY W. BURR BENNETT

Mechanical

QUICKCLAMP's (FTZ)

Heavy duty multi-purpose clamp. Works well with large segment retaining walls/step units, MONUMENTS and NATURAL STONE. Also works well with large precast units.

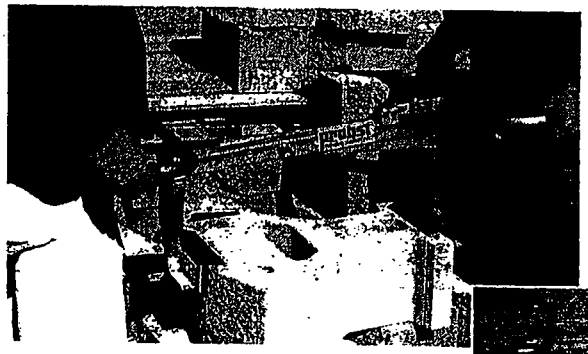
- Well suited for at the plant or on the job site.
- Automatic lock and release mechanism.
- QuickADJUST width adjustment.
- Long wearing replaceable rubber grippers.
- Gold zinc plated finish.
- Crane or chain shackle operation.

G 1110 – FTZ I		
Opening Range	2-18½ in	50-470 mm
Height	7 in	180 mm
Gripper length	16½ in	420 mm
Carrying capacity	2000 lb	900 kg
Weight	84 lb	40 kg

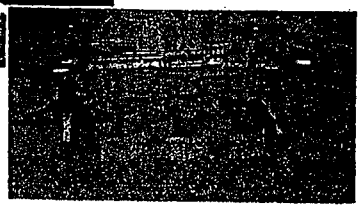
G 1120 – FTZ II		
Opening Range	7¾-24 in	200-600 mm
Height	7 in	180 mm
Gripper length	16½ in	420 mm
Carrying capacity	2000 lb	900 kg
Weight	120 lb	55 kg

G 1130 – FTZ III		
Opening Range	7¾-24 in	200-600 mm
Height	7 in	180 mm
Gripper length	28½ in	720 mm
Carrying capacity	2000 lb	900 kg
Weight	136 lb	62 kg

G 1140 – FTZ IIII		
Opening Range	4-31½ in	100-800 mm
Height	7 in	180 mm
Gripper length	28½ in	720 mm
Carrying capacity	6600 lb	3000 kg
Weight	330 lb	150 kg



PHOTOS BY W. BURR BENNETT



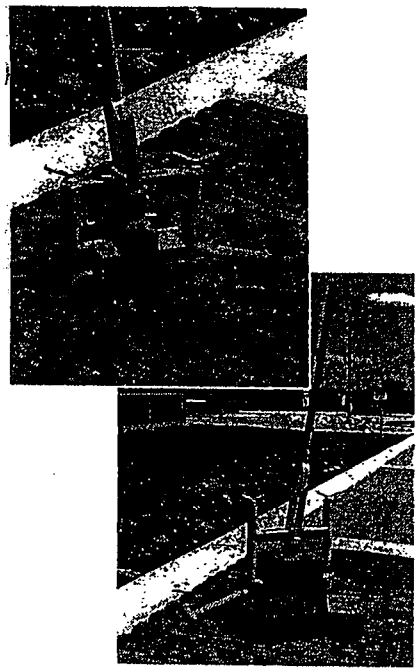
Manual & Mechanical

MANGRAB (BVZ)

Useful all-purpose Grab designed to operate with 2 men to lift almost any product. Great for nurseries and landscape yards. Also good for ornamental concrete, retaining walls, natural stone; uses are almost endless.

- QuickADJUST width adjustment.
- Rugged long life construction.
- Gold zinc finish.

H 2000 – BVZ		
Opening range	0-24 in	0-500 mm
Height	8¼ in	210 mm
Gripper length	8 in	200 mm
Carrying capacity	330 lb	150 kg
Weight	22 lb	10 kg



PAVERSPLITTER

WALLSPLITTER

SLABSPLITTER

The world's best splitters when your needs demand it. Pavers, paving slabs, and especially retaining walls, how could a contractor or rental yard live without them!

- Spring loaded cutting table allows for undercut or double angle cuts.
- Both upper and lower cutting edges are four sided and are easily changed in the field.
- Extension handles and concentric cam gives awesome cutting power and leverage.
- Easy and quick height adjustment.
- Heavy duty durable construction.

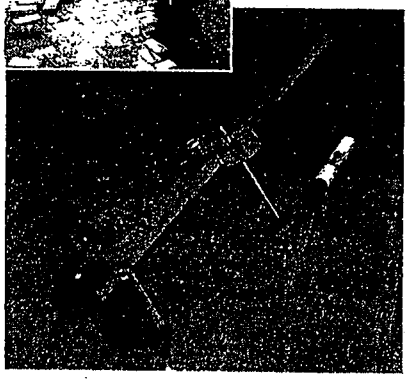
H 7000 – SPL 13		
Cutting length	13 in	330 mm
Cutting height	¾-4¾ in	10-120 mm
Weight	77 lbs	35 kg
H 7002 – SPL 16H		
Cutting length	16¾ in	430 mm
Cutting height	¾-12 in	10-300 mm
Weight	143 lbs	65 kg
H 7004 – SPL 25		
Cutting length	25½ in	650 mm
Cutting height	¾-4¾ in	10-120 mm
Weight	220 lbs	100 kg

PHOTOS BY W. BURR BENNETT

SAWCART *Original design by LGT Hydraulics*

Is the ideal attachment for masonry table and tub saws.

- All aluminum construction.
- Large diameter pneumatic tires.
- Wide range adjustment allows for universal fit to any saw.
- Drop down padded knee rest.
- Easy portability keeps saw close to the work.
- Telescoping transport handle.
- *(optional) Seat for owner operators, helps saw fatigue, improves quality and safety.



QUICKDRAW

Original Design by Mike Mariani, Stonescape Construction

A refined marking instrument designed specifically to mark concrete or clay pavers. Unit glides easily along most egde restraints (like PAVE EDGE) or flip unit and guide wheel rolls along curbs, walls, you name it!

- Solid, permanent all aluminum and stainless steel construction.
- Can hold carbide scriber or permanent marker or almost anything to mark.
- Replaceable carbide marker.
- Increase marking speed easily by 400-600%!
- Increase marking accuracy and consistency.

SANDPULL PRO

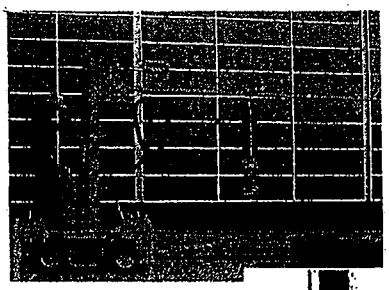
VACUUM / MECHANICAL

FOR DETAILED INFORMATION ON THESE PRODUCTS CALL.



Vacuum

MAMMOTH

Designed specifically to increase efficiency of laying paving slabs. Works well with exposed aggregate, shot blast textures, and all natural stone.

- Can lift and set slabs up to 265 lbs. (120 kg).
- One man operation, two finger operation.
- Large diameter tires.
- Gas or electric (220V) powered.
- Fewer damaged slabs.
- Hand operated parking brake.
- When collapsed for travel is only 82" high.
- Unbelieveable production rates.
- Pillar swing crane extends from 6 ft.-12 ft. (2-4m) and swivels 360°.
- Mast extends 9 ft. (3m) high.
- Hand parking brake.
- Ballast counterweight holders for stability on long reach jobs.
- Fork pockets for easier loading.
- Folding telescoping supports at all 4 corners.
- Easy removal and replacing of slabs when shimming on roof decks.
- Light enough for roof deck applications.
- Unit weighs only 1585 lbs. (720 kg).
- No more need to drop and slop disturbing sand bedding.
- No more smashed fingers.

Vacuum

MAMMOTH MINI I

PHOTO BY W. BURR BENNETT

(Optional attachment for MIDI).

- Lifting capacity 60 lbs. (27 kg).
- Powered by MAMMOTH MIDI unit.
- Hose connects directly to MIDI.
- Allows for fast setting and removal of slabs.
- Production facilities enjoy ability to strip molds quickly and cleanly.

Vacuum

MAMMOTH MIDI

PHOTO BY W. BURR BENNETT

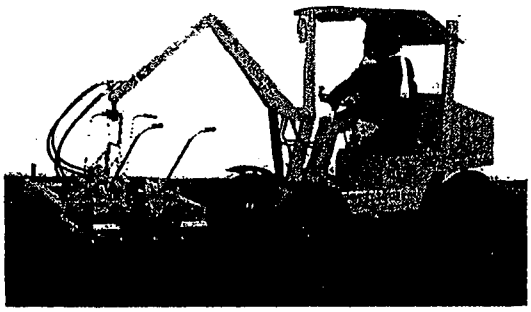
Excellent for production and site handling of large precast units. Can be operated by crane, chain, loader bucket, excavator, etc.

- Lifting capacity is 2200 lbs. (1000 kg).
- Unit weight is only 121 lbs. (55 kg).
- Many optional suction plates for various applications.
- Electric (110V) or hydraulic motors.
- Optional transport wheel kit.

Mechanical

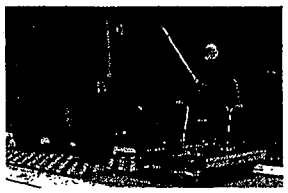
PAVERMAX

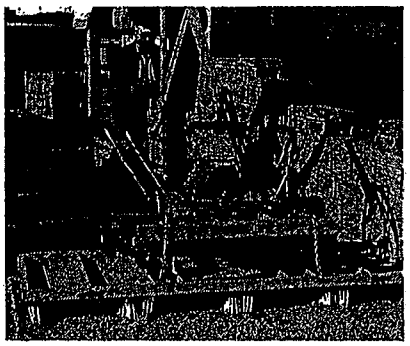
A state of the art mechanical paver laying machine. Designed to lay an entire layer of pavers (approx. 10 sq. ft.) at a time. This machine can easily lay many times faster than by hand. If speed and efficiency is what you're after on large jobs then this is the answer.



Standard equipment features:

- Three-cylinder high-performance diesel engine.
- Front wheel drive designed for use in any terrain and on any uncompacted paving surface.
- Low height for operation in parking garages.
- Maneuverability in tight spaces.
- Ability to pick up from doublestacked cubes up to 63" (1600 mm) high with no loss of stability.
- Unobstructed driver view and excellent driver ergonomics.
- Universally-adjustable paver clamp.
- Individually-adjustable.
- Optional enclosed cabin (not shown).





Mechanical

SANDMAX I, II

Two models of sand screeding devices, #I Medium Duty, #II Heavy Duty, these devices can mean the difference between real production and high labor costs on medium and large scale paver jobs.

- High tensile steel construction.
- Infinitely adjustable rollers on each side.
- Rollers can ride on screed rails or on existing curbs.
- Can be operated with almost any motorized construction equipment.
- Screed bucket holds excess material for removal.
- Bolt on segments allow widths from 39"-196" (1m-5m) for HEAVY DUTY #II.
- QuickPINs allow fast configuration and size changing with widths from 36"-108" (1m-3m) for MEDIUM DUTY #I.

Mechanical

SCATTERMAX

A simple but extremely effective tool to spread a proper thickness of joint sand onto pavers to prepare for final tamping and joint filling can increase efficiency of final spreading by at least 300%, more on larger areas! Just attach to any machine and you're off!

- Fork pockets.
- Bucket attachment.
- Long wearing replaceable brushes.

Coral, class No. 2, soft	1760	2900	65	.61
Coral, class No. 1, hard	2030	2900	67	.60

Percent of swell times the bank (in place) cubic yards equals the loose cubic yards to be moved.

Swell factor times the loose cubic yards equals bank cubic yards being moved.

Excavation Factors

Depth	Cubic Yards per Square Foot
2"	.00617
4"	.01235
6"	.01852
8"	.02469
10"	.03086
1'-0"	.03704
1'-6"	.05555
2'-0"	.07407
2'-6"	.09259
3'-0"	.111111
3'-6"	.13333
4'-0"	.14815
4'-6"	.16667
5'-0"	.18519
5'-6"	.20370
6'-0"	.22222
6'-6"	.24074
7'-0"	.25926
7'-6"	.27777
8'-0"	.29630
8'-6"	.31481
9'-0"	.33333
9'-6"	.35185
10'-0"	.37037

Multiply the excavation factor by the area in square feet to find the cubic yards of soil to be excavated. **Example:** Assume an excavation 24 ft. x 30 ft. and 6 ft. deep. 24 x 30 = 720. In the table the 6 ft. depth has a factor of .22222 (the number of cu. yd. in an excavation 1 ft. square and 6 ft. deep). 720 x .22222 = 160 Cu. Yds.

Area and Circumference of Circles (Inches)

Miscellaneous Useful Information

Area of circle: Multiply square of diameter by .7854.
Area of rectangle: Multiply length by breadth.
Area of triangle: Multiply base by 1/2 perpendicular height.
Area of ellipse: Multiply product of both diameters by .7854.
Area of sector of circle: Multiply arc by 1/2 radius.
Area of segment of circle: Subtract area of triangle from area of sector of equal angle.
Area of surface of cylinder: Area of both ends plus length by circumference.
Area of surface of cone: Add area of base to circumference of base multiplied by 1/2 slant height.
Area of surface of sphere: Multiply diameter by 3.1416.
Circumference of circle: Multiply diameter by 3.1416.
Cubic inches in ball or sphere: Multiply cube of diameter by .5236.
Cubic contents of cone or pyramid: Multiply area of base by 1/3 the altitude.
Cubic contents of cylinder or pipe: Multiply area of one end by length.
Cubic contents of wedge: Multiply area of rectangular base by 1/2 height.
Diameter of circle: Multiply circumference by .31831.

Phone: (602) 438-9000 • www.pointesouthmtn.com

The desert is a traditional place of contemplation. Of illumination. Of inspiration. A place where the doors of thought, idea and perspective can be opened.

In that spirit, the Brick Industry Association invites you to join us for Brick Show 2002. For three days in the heart of the beautiful, tranquil Sonoran desert, it's where you'll find the top executives from the brick industry's most important manufacturers, distributors and suppliers. It's where you'll discover the cutting-edge manufacturing and managerial techniques that are taking the brick industry into the 21st Century. It's where you'll rediscover the time-tested methods and philosophies that got us there.

Come to the desert to offer perspective. Come to the desert to gain perspective. Come to the desert for Brick Show 2002, and discover all the doors that our industry can open for you.

WHY EXHIBIT?

Last year's Brick Show was our most successful ever, with more exhibitors than ever before. And this year, we expect even more. So if you're a brick manufacturer or distributor, or in one of the many industries that do business with them, you don't want to miss Brick Show 2002.

And this year, we'll be making a special marketing effort—such as games and puzzles with prizes—to increase attendee circulation. So no matter where your booth is located at Brick Show 2002, it will get the traffic that makes your effort worthwhile.

TO RESERVE SPACE

- Select your preferred booth location from the floor plan located to the right.
- Call Brick Show management immediately at (703) 620-0010, EXT. 113 to hold this space. Remember that space is reserved on a first come, first served basis.
- Complete the enclosed Exhibit Space Contract and return it with the required deposit to Brick Show management. The contract and deposit must be received within two weeks of calling to reserve your booth space.

WILL YOUR EQUIPMENT FIT?

The exhibit hall is located in the Pavilion—no elevators or hallways to worry about—with direct access through the dock. Loading docks are located at the rear of the pavilion. 2,000 lb. per square foot floor load. Additional questions can be answered by calling Amy Bowen, Shepard Exposition Services at 407-888-9669.

Go to **www.brickinfo.org** and click on Brick Show to get forms, see the exhibit hall and get additional information.

BRICK SHOW 2002
EXHIBIT SPACE CONTRACT
April 7 – April 9, 2002
Pointe South Mountain · Phoenix, Arizona

Brick Show 2002 Hours
April 7 - 6:00 p.m. - 8:30 p.m.
April 8 - 8:00 a.m. - 11:30 a.m.
April 9 - 8:00 a.m. - 11:30 a.m.

THIS INFORMATION WILL BE USED TO RESERVE BOOTH SPACE ONLY. THIS FORM DOES NOT REGISTER PERSONNEL FOR THE SHOW. THE REGISTRATION FORMS NEEDED CAN BE FOUND IN THE *EXHIBITOR SERVICE MANUAL* WHICH WILL BE SENT TO THE ADDRESS YOU LIST BELOW AT A LATER DATE.

Company Name: PAVE TECH Company Contact: BOB CRAMER

Address: PO Box 576 City: PRIOR LAKE State: MN Zip Code: 5537

Phone: 952-226-6400 Fax: 952-226-6406 E-Mail: bob@paveedge.co

I. For publication in the Pocket Schedule, in 25 words or less, describe the products or services to be exhibited at Brick Show 2002: PAVE EDGE PAVER EDGE RESTRAINT SYSTEM, PROBST TOOLS & EQUIPMENT, PAVE CHEM CHEMICALS & ADHESIVES, ENVIROPAVE PAVER JOINT SPACERS, SANDLOCK JOINT SAND STABILIZER, REVO COMPACTORS, DEEP ROOT.

II. Exhibit Space Fees and Booth Selection: (BIA Member - $1,300 ($13 per square foot)) Non-Member - $3,900 ($39 per square foot)

All booths are 10' x 10' (100 sq. ft.). Multiple booths are available. Booth configurations can be changed to accommodate special needs or requirements. Please refer to the floor plan on the exhibitor prospectus for booth selection or go to the exhibitor's section of www.brickinfo.org. Booth space is assigned on a first-come, first-served basis.

First Choice: (103) Second Choice: 101 Third Choice: 402

Any special requirements (e.g., size, weight?) ☒ No ☐ Yes (please describe): _____

III. Deposit Calculations - A $500 non-transferable deposit per booth is required to reserve space. An invoice for the remaining balance due will be mailed to you. After December 31, 2001, full payment is required with contract.

Number of 10' x 10' booths reserved: 1 x $500 deposit = $ 500

The balance due will be the number of booths reserved times the member or non-member rate, less the deposit (if paid) with the contract. To hold space, please send or fax to the address and fax number below. A confirmed contract will be returned to you.

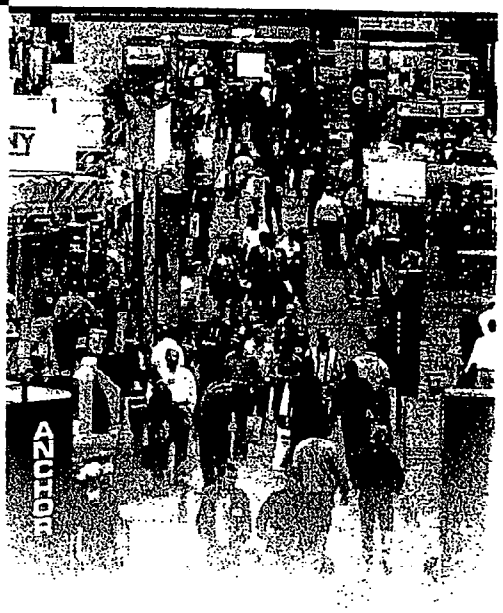
SOLID

CORPORATE SPONSORSHIP OPPORTUNITIES



- **Brand recognition.**
- **Credibility.**
- **New accounts and bigger sales.**
- **A steady stream of qualified traffic at your booth.**

The largest annual event for the commercial construction industry draws 40,000 participants with solid purchasing power and serious intent.

To make sure you see them—and they see you—use one of the most effective promotional tools available. Take advantage of these Corporate Sponsorship Opportunities to **separate your company** from the competition and **position your name** high in the minds of your buyers.

To determine the sponsorship strategies right for your company, review the menu of opportunities on the reverse side. Then contact Randy Nicholson at 800-837-0870 ext. 2565 for more information and to reserve your sponsorship(s).

■ Corporate sponsors will receive **additional exposure** before, during and after the show with listings in both the Show Daily and Program & Exhibits Guide highlighting your Corporate Sponsor status.
(To be included, sign up by September 28, 2001.)

EXHIBITOR PERSONNEL ADVANCE REGISTRATION FORM

DEADLINE FOR RECEIPT OF THIS FORM: December 7, 2001

Badge packets will be mailed (only to US & Canadian addresses) for registrations received by December 7, 2001. Personnel with packets do not have to check in at the exhibitor registration counters. Badges will be mailed only between December 7 and December 14.

MAIL THIS COMPLETED FORM TO: WOC/WOM, c/o ExpoExchange Registration; P.O. Box 590, Frederick, MD 21705 or fax this form to: 301.694.5124 or register online at www.worldofconcrete.com or www.worldofmasonry.com.

1. **MAIL BADGE PACKETS TO:** (Individual below is responsible for distributing badges to personnel before their arrival at the convention center.)

Company PAVE TECH Attention Bob Cramer

Address PO Box 576

City Prior Lake State MN Zip/Postal code 55372 Country USA

Phone 952-226-6400 Fax 952-226-6406 E-mail bob@paveedge.com

2. **BADGE ALLOTMENTS:** Each exhibiting firm is allotted free badges based on their booth's total square footage. Additional personnel badges are available at $15.00 each. Please check your allotted number of free badges.

*BOOTH NUMBER 2711

TOTAL SQUARE FEET 600

Booth Sq. Ft.	Badge Allotment (check one)
100-399	7 ___
400-799	12 X
800-1499	18 ___
1500-2999	25 ___
3000 & over	35 ___

***Exhibitors with multiple booths must complete a separate form for each booth.**

3. **PERSONNEL REGISTRATION:** Using caps, print or type the names of personnel working the exhibit. All personnel must be registered under the exhibiting firm's name. Indicate if individuals should receive an EXPOCARD, used to gather information from exhibitors (seminar registrants receive automatically). Indicate any seminars and include payment with this form. Spouse badges are complimentary and do not count against allotment. However, spouses attending seminars must register as booth personnel and are deducted from allotment.

World of Masonry Debuts with 15,500 in Attendance

Addison, Illinois - March 19, 2001 –The atmosphere was one of excitement at the World of Masonry trade show held February 26 to March 2 at the Las Vegas Convention Center. The five-day event finished strong with attendance figures that exceeded all expectations. Overall attendance at World of Masonry 2001—those indicating business interest in masonry—reached 15,500.

World of Masonry ran side by side World of Concrete, the largest annual international construction trade show, and The Producer Center. The five-day event included more than 1,600 indoor and outdoor exhibits, four, full-scale product and equipment demonstrations and a 94 session seminar program. The combined registration for the three shows posted an all-time record of 77,225.

"After three successful years with our Masonry Pavilion in World of Concrete, we knew it was the right time to launch World of Masonry as an independent show. We set our exhibitor and attendance goals high and developed a promotional campaign that produced results. In its first year World of Masonry has become the largest masonry show in the United States and a great foundation on which to build this annual event," said Chuck Simanek, Vice President, World of Masonry and World of Concrete.

-more-

Those attending World of Masonry took full advantage of the many programs the show had to offer. Two new Mega Demos filled the outdoor masonry arena with attendees eager to see a wide variety of materials and equipment demonstrated in a jobsite setting. On Tuesday, hundreds of onlookers watched as cavity walls were constructed using the latest in scaffolding, preblended grouts, grout dispensers, foam insulation and rough terrain forklifts. Thursday's Block Laying Extravaganza presented a complete automated block building system including de-palletizing, block assembly, placing of the mortar bed, and block hoisting and laying.

More live action features included the Action Seminars. Action Seminars were a popular new feature that combined the live-action experience with educational content. The Retrofitting Masonry for Seismic Loading Action Seminar was presented to a near capacity crowd. The session covered the vulnerability of unreinforced masonry buildings, demonstrated nondestructive testing as a means of evaluating masonry and presented methods for strengthening or retrofitting masonry. Ironically, this session was held at World of Masonry the same day a major earthquake hit the Seattle area.

The 13-session seminar track in masonry provided a comprehensive educational program for masonry professionals. Sales for masonry seminars more than tripled in 2001, with 1,641 sold. Repair and Maintenance of Aging Masonry Structures, Repair of Design and Construction Problems in Young Masonry Structures and the Troubleshooting Masonry series were some of the most well attended sessions of the week.

-more-

Participating in the first-ever World of Masonry were 150 exhibitors, occupying 45,000 net square feet of space. With displays ranging from anchor bolts and flashing to mortar mixers and weep holes, attendees found the full range of products and equipment used in masonry construction.

"Having this many exhibitors in one place creates a focused marketplace where attendees can meet face to face with industry leaders and network with peers. The positive reports we have received from both exhibitors and attendees is evidence that the industry enthusiastically supports a major event like World of Masonry," said Beth Gassen, Show Director.

World of Masonry and World of Concrete are produced by Hanley-Wood, LLC. For more information on World of Masonry visit www.worldofmasonry.com; send e-mail to wom@hanley-wood.com; call 1-800-837-0870, extension 2653, (outside the United States, call 630-705-2653); fax to 630-543-3112; or write Hanley-Wood Exhibitions at 426 South Westgate Street, Addison, IL 60101, U.S.A.

Hanley-Wood is the leading business-to-business information provider in the residential and commercial construction industry and is owned by VS&A Communications Partners III, the private equity affiliate of media industry merchant bank Veronis Suhler.

Hanley-Wood publishes leading magazines including Concrete Construction, The Concrete Producer, Masonry Construction, Builder, The Journal of Light Construction, Building Products and Tools of the Trade.

-more-

World of Masonry Debuts with 15,500 (page 4)

From its Exhibitions Division based in Dallas, Hanley-Wood produces eight trade shows, including World of Concrete, Surfaces and Custom Home. Hanley-Wood Integrated Marketing is based in Minneapolis and the Home Planners Division, based in Tucson, is the leading publisher of house plan magazines and Special Interest Publications, and, also operates eplans.com. Hanley-Wood's Internet Division has a major Internet presence through its sites including World of Concrete Online, Builder Online and its new company, ebuild, the housing industry's comprehensive guide to building products.

GREEN INDUSTRY EXPO

November 14-17, 2002
Opryland Convention Center
Nashville, Tennessee

2002 Exhibit Contract

Return contract and payment to:
GIE, 1000 Johnson Ferry Road, NE
Suite C-135, Marietta, GA 30068-2112
Phone: (888) 303-3685 ❖ Fax: (770) 579-3835

Rate Schedule:	(Member discounts apply)
Exhibit Rental Rate:	$ 1,395.00 / 10' x 10' booth
Corner Assignments:	$ 75.00 / corner
Product Field Day:	$ 295.00

Payment Schedule: *After August 1, 2002, payment must accompany contract.*	
Minimum deposit with application:	50% of booth fees
Early-bird & Priority Point period ends:	February 28, 2002
Remaining balance due:	August 1, 2002

Application for Space

Exhibiting company (exhibitor) agrees to pay a lease fee at the established rate (plus $75 per corner booth assignment) which must be paid by August 1, 2002. After August 1, 2002, payment must accompany contract. If exhibitor holds a company membership to a GIE sponsor association (ALCA, PGMS, PLCAA), a $100 discount per 10' x 10' booth may be applied. Exhibitor further agrees to comply with the Rules and Regulations for Exhibitors which are included. Booth assignments will be based on a priority point system for contracts received prior to February 28, 2002, as noted in the exhibitor prospectus information. After that date, assignments will be made in order of date payment is received with contract.

GIVES ME THE FINISH I'M LOOKING FOR.

The perfect balance of engine and suspension. That's what it takes to win in NASCAR competition; and that's exactly what the new Ferris IS® 5000Z gives you. With its powerful Caterpillar® diesel engine and Ferris 4-wheel Independent Suspension, you'll mow faster, ride smoother and keep mowing longer without stops for refueling. Plus, with Caterpillar's legendary reputation for power and long life, you'll be getting more performance and better fuel economy for year after productive year. To learn more about the new CAT® powered Ferris IS® 5000Z, call 1-800-686-3128 ext. 138 or visit www.ferrisindustries.com. We'll answer all your questions and match you up with your nearest Ferris dealer. And we'll show you how you can start driving the only commercial mower made that's powered by CAT!

President's Welcome

Welcome to Opryland and the13th Annual Green Industry Expo. The GIE Board, PLCAA, PGMS and ALCA, join me in welcoming you to this year's Expo and Conferences, where "Professional Products, People and Ideas" come together.

While you are here, be sure to take advantage of all that GIE has to offer:

- Inspiring Keynote Speaker
- Informative Educational Tracks
- Tremendous Product Field Day
- Largest Trade Show to Date
- Limitless Networking Opportunities

The GIE Board has worked very hard to bring you the best Green Industry trade show in the country. With a new, business-friendly schedule, we want you to get re-energized with fresh ideas about business strategies, employees, products, and equipment that will grow your business and enhance your professional development.

Enjoy your time exploring Nashville and the Opryland Resort. Try not to get lost!!!!! It has been my privilege to serve as your GIE President this year and an honor to work with the professional representatives on the GIE Board.

We will see you in St. Louis for GIE/2003.

Have a great event.

Jon Cundiff
President, Green Industry Expo/2002

GREEN INDUSTRY EXPO MISSION STATEMENT

The Green Industry Expo is the leading national forum for Lawn, Landscape and Grounds Professionals.

Providing unlimited networking opportunities for today's and tomorrow's industry leaders.

Assuring the highest quality educational and learning experiences through the combined efforts of partner organizations.

Being committed to long-term profit and growth for our exhibitors, lawn, landscape and grounds professionals, and independent partner organizations.

SPECIAL THANKS!
Company logos throughout this directory give credit to organizations that have invested in more than exhibit space. These sponsors have contributed money and resources to help bolster the green industry conferences and trade show activities resulting in a benefit to the entire industry. Please show these companies your appreciation with "thank you's" and your patronage.

GIE HIGHLIGHTS
Product Field Day and Tennessee Barbecue
10:30 a.m.- 4:30 p.m., Thursday, Nov. 14
The Hermitage, Hermitage, TN

GIE's Product Field Day is the perfect way to gain the knowledge and experience of how products will perform in actual landscape settings. Approximately 100 exhibitors will be on hand for your test-drives and hands-on comparisons.

The Tennessee Barbecue at the Product Field Day is included with a conference registration. The barbecue buffet will be served from 12 to 2:30 p.m. Expo-only registrants may purchase meals on-site.

Free round-trip shuttle service will depart the Presidential Portico of the Opryland Resort & Convention Center. Shuttles to the Field Day will be available from 10 a.m to 5 p.m. on Thursday, Nov. 14.

Contributing sponsor:

GIE Keynote Address
10:30 a.m. -12 p.m., Friday, Nov. 15
Delta Ballroom A

Peter Vidmar became the premier male gymnast for the United States at the 1984 Olympics. A member of the US Olympic Hall of Fame, Peter is the highest scoring U.S. male gymnast in Olympic History. What separates the best from the rest? How do you work harder when you think you're already giving it your all? How do you deal with setbacks when you know "you could have won?" How much of a risk should you take? Peter's presentation on Risk, Originality and Virtuosity answers these questions and vividly describes the requirements for "The Perfect 10." His is truly a world-class performance.

New Product Showcase
Cut straight to the chase! Find out what's new and where to find it. The GIE New Product Showcase located in front of the exhibit hall provides you with one easy stop to find information on the industry's newest introductions.

Grand Prize Ceremonies - More Ways to Win at GIE
Association Plaza, Ryman Exhibit Hall B
1:15 p.m. Saturday, Nov. 16

$500 Grand Prize Drawings
Be sure to be present to win GIE's $500 Cash Prize. A name will be drawn at 1:15 p.m., Saturday, Nov. 16. The winner will have five minutes from the time their name is announced to claim their cash. (Sorry exhibitors, the Cash Prize Drawings are limited to attendees. Exhibitor personnel are not eligible to win.)

$300 Air Travel Voucher from Travel Worldwide Network
Register for a $300 travel voucher on Delta Airlines by visiting GIE's sponsors — ALCA, PLCAA and PGMS — in the Association Plaza. You do not have to be present to win. Special thanks to GIE's Convention Planning Partner, Travel Worldwide Network.

St. Louis Gift Package
A unique gift prize full of items from St. Louis, Mo. — site of GIE/2003 — will be awarded during the Grand Prize Ceremonies. Stop by Booth #3227 to register.

Registration
Name badges are required at all functions. In addition, tickets are required for many special events. Please check with the registration desk of the event's sponsor located in the Delta Foyer or with the GIE registration desk in the Ryman C Foyer.

GIE Registration Desk Hours
Wednesday, Nov. 13 . . . .7:30 a.m. - 5 p.m.
Thursday, Nov. 14 . . . . .7:30 a.m. - 5 p.m.
Friday, Nov. 15 . . . . . .7:30 a.m. - 5 p.m.
Saturday, Nov. 16 . . . . . .7:30 a.m. - 1 p.m.

(In addition to the hours noted above, registration for the Product Field Day will also be available on location at The Hermitage from 8 a.m. to 3 p.m., Thursday, Nov. 14.)

Product Field Day Details
Product Field Day Shuttle
Departing from Opryland's Presidential Portico
Thursday, Nov. 14 . . . . .10 a.m. - 5 p.m.
Continuous round-trip bus service is provided between the Opryland Resort & Convention Center and the Product Field Day location at The Hermitage.

Directions to the Product Field Day
To drive from Opryland Resort & Convention Center to The Hermitage, site of the Product Field Day, head south on Briley Parkway. Take Exit #18 to Lebanon Pike traveling east. Remain on Lebanon Pike until you reach Old Hickory Boulevard. Take a left onto Old Hickory Boulevard traveling north. The Hermitage will be on your right. Follow the signs to the Field Day location.

Conference Session Recordings
Audio CD and tape recordings of ALCA and PLCAA educational sessions are available through A.V.E.R. Associates. A service desk to purchase recorded sessions is located in the Delta Foyer Registration Lobby.

Exhibitor Lounge
A lounge open exclusively to exhibitors is located on the show floor of the Ryman B Exhibit Hall. The lounge opens each day one hour prior to the exhibits. Beverage refreshments are sponsored by Lawn & Landscape Media Group and Interior Business Magazine.

Exhibitor Lounge Hours:
Friday, Nov. 15 . . . . . .11 a.m. - 5 p.m.
Saturday, Nov. 16 . . . . . .8 a.m. - 1 p.m.

PT 02767

GIE GREEN INDUSTRY EXPO

First Aid
During all conference and trade show hours, a paramedic will be on duty. In the event of an emergency, please call from any house phone.

Lost & Found
Bring any found items to the GIE Registration Desk. At the close of the event, all unclaimed items will be turned over to Opryland Resort & Convention Center Security.

Message Service
A message billboard is located adjacent to the GIE Registration Desk in the Ryman C Foyer. Personal paging services are available only in the event of an emergency.

Speaker Ready
A speaker ready room is located in Governor's Chamber A of the Opryland Convention Center. The Ready Room will be open from 7:30 a.m. to 4:30 p.m., Wednesday, Nov. 13 through Sunday, Nov. 17.

The Boys in Green are Back.
And they're coming to a job-site near you.

Since 9/11, the Immigration and Nationalization Service (INS) has been more determined and diligent than ever before.

Are you prepared?

You must know that your workers are authorized to stay and work in this country. Why? Because you cannot afford to lose your workforce to an INS raid during your busiest season.

You need Amigos to stay ahead of the Feds.

Since 1988, Amigos Labor Solutions, Inc. has placed almost 30,000 legal, dependable seasonal workers throughout the U.S.
We are H-2B specialists — the first, and still the best.

Call Amigos today.

Satisfy new emissions standards without changing the way you do business. Now that's smart.

With new Power Boost Tornado™ Technology, you can meet all EPA requirements and CARB standards with a 2-stroke engine you're already selling! That means no big parts inventory overhauls, no major service team re-training and no special tools. Power Boost Tornado™ Engines can simplify your business and improve your bottom line — and that makes them an intelligent choice.

Call 1-800-432-ECHO (3246) for more information, or visit www.echo-usa.com.

ECHO. Ask Any Pro!™

Tired of worrying whether you'll have enough workers?

Worker quality a problem?

Mid-Atlantic Resources Association can furnish seasonal workers through foreign H-2A/H-2B visa programs as well as by recruitment of U.S. workers.

MARA is a full-service labor compliance and supply company. Competent workers are available for a wide range of orchard, greenhouse, nursery, landscape, groundskeeper, and other jobs.

If you were short on workers last season and want to find out more about how the federal H-2A and H-2B programs can meet your labor needs, please call Libby Whitley at 434-263-8790. Fax us at 434-263-8799. E-mail us at labor@marainc.net or visit our website www.marainc.net.

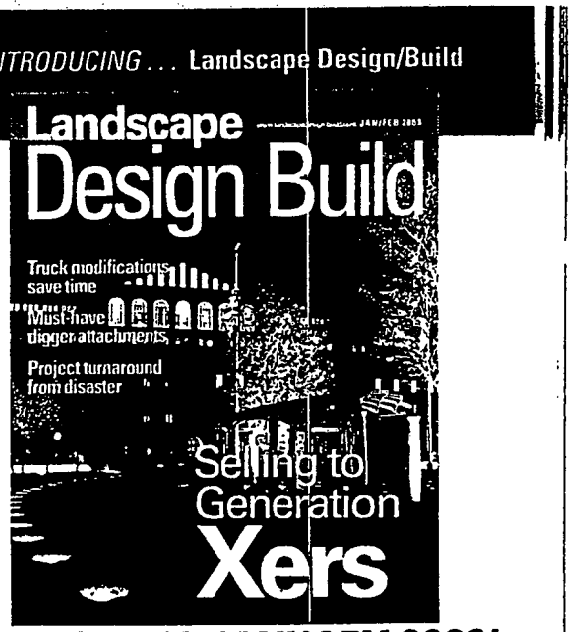
INTRODUCING . . . Landscape Design/Build



COMING JANUARY 2003!

From the publishers of Landscape Management and Golfdom, is a brand new magazine with a fresh approach.

CIRCULATION: *Landscape Design/Build* will reach 31,500 select landscape contractors, architects and designers who provide landscape construction and design services.

BUYING POWER: *Landscape Design/Build* reaches a buying audience that spends in excess of $3.1 billion annually on equipment, lighting, surfacing materials, irrigation, erosion control, water features, plant materials and accessories.

READERSHIP: *Landscape Design/Build* will tap the talents of the industry's best editorial/design team and an Editorial Advisory Board representing some of the industry's best-known experts and analysts.

For charter rates, contact:

JOHN D. PAYNE, Group Publisher
PHONE: 1-800-225-4569

ADVANSTAR LANDSCAPE GROUP

PT 02786

An Aeration Revolution!

Finally the aerator you and your staff have wanted. The TurnAer 26 is Turfcos' Direct answer to your aeration needs. The TurnAer's revolutionary differential with dual brake action allows you to turn with the tines in the ground. No longer do you have to lift and turn.

- Aerate a lawn like you mow it
- Turns while in the ground—no stopping at the end of each pass
- Less work on you and your staffs back, no lifting
- 30% more productive then conventional aerators

This highly-productive aerator will be sure to increase your profits and make your staff happier. Learn more about this by turning in the right direction to page 9 in the catalog.

Our fertilizer comes with a built-in insurance policy.

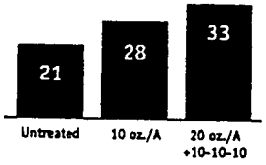
UHS Signature Brand Fertilizers with Prospect® Plus not only provide quality nutrients, they also work to:

- Help turf establish or withstand environmental stresses
- Develop a more fibrous, extensive root system
- Enhance early plant growth and vigor
- Build greater shoot mass
- Increase uptake of soil nutrients and moisture
- Increase photosynthesis

PROSPECT PLUS
PREMIUM FERTILIZER ADDITIVE

UHS Signature Brand Fertilizers with Prospect® Plus have been impregnated with a proprietary nutrient solution that has shown a remarkable ability to improve vigor, quality and stress tolerance in turf, trees and ornamentals. Studies have consistently shown a positive effect on early plant growth and development and with mature plants under stress.

Root Development - 36 Days After Treatment
Prospect Plus on Established Kentucky Bluegrass
Virginia Tech Turgrass Research Center - 1994



Study Results:
"... urea with Prospect Plus significantly increased rooting."

A 57% improvement over untreated turf!

fertilizer applied at a rate of 1 lb. per 1000 sq. ft. Critical difference of .10 equals 8

November 13 – 17, 2002
Gaylord Opryland Hotel and Convention Center
Nashville, TN

Message from the Conference Chair

It is a thrill to welcome you to the 2002 Green Industry Conference in the stunning Gaylord Opryland Convention Center in Nashville, Tennessee. This pocket program is filled with possibility and opportunity – to learn, to place yourself in situations where others just like you have questions equally as pressing as yours, where the exchange of ideas and knowledge can flow as freely as the river in the Delta. Please seek out ALCA staff, ALCA leadership, and each other, to ensure that you make the most of these five days in Opryland. I hope that the variety and novelty of the educational offerings are beneficial, that the GIE delivers all that you expect, and that you find time to kick back and reflect on the great profession in which we are all involved.

Sincerely,

Peter Howe, CLP
Green Industry Conference Chair
Engledow Group
Carmel, Indiana

The Associated Landscape Contractors of America (ALCA) is an association comprised of people who are just like you—a unique blend of landscape maintenance, installation, design/build contractors, interior landscape contractors, industry suppliers, landscape architects and educators—unified with a powerful voice and a strong position to make a difference.

Since 1961, ALCA has been attracting savvy landscape contractors who desire to gain a network of associates to share and adapt field experiences. In fact, ALCA members rate networking as their number one association benefit. Ask any of them ... give a little of your time and receive a whole lot in return. It's as easy as picking up a phone and reaching out to peers across the country.

Why reinvent the wheel? More than 2,000 landscape contracting firms have made ALCA their business advisor. This network of young, mid-sized, and mature businesses is serious about their business future and have chosen to invest in the association that can take them to new business heights, not to mention improve their bottom line.

The professional landscape industry is continually evolving. Staying ahead requires a strong business acumen, a viable business plan and an entrepreneurial drive. Let the Associated Landscape Contractors of America be your partner for a solid business future.

2002 ALCA Officers

President: Rick Doesburg, CCLP, Thornton Landscape
President Elect: Michael Byrne, CLP, ELM Landscape & Golf Company
Secretary/Treasurer: Kurt Kluznik, CCLP, Yardmaster, Inc.
Past President: Drew St. John, II, CLP, Symbiot Business Group

ALCA Staff

Debra Holder, Executive Vice President
Bill Sheehan, Vice President
Vicki Bendure, Public Relations Consultant
Kerry Brooks, Receptionist/Administrative Assistant
Kirsten Combs, Education Programs Coordinator
Sandi Del Rosario, Finance & Executive Assistant
Maria Fernandez, Certification Assistant
Sherry Grimm, Marketing Assistant
Joan Haller, Education Programs Manager
Marcia Higgins, Professional Standards Manager
Beth Jameson, Systems Coordinator
Lisa Klare, Director of Finance/Administration
Judy McCloud, Membership Manager
Gail Rogers, Customer Service Representative/Publications
Laurie Saunders, Director of Marketing and Communications
Kathy Wemhoff, Communications Manager/Editor, Landscape Contractor News

ALCA leadership has determined that in the best interest of the membership, it is unethical to solicit employees during ALCA events.

PT 02792

REGISTRATION HOURS

The ALCA staff will be at the ALCA registration desk located in the Delta Lobby of the Gaylord Opryland during the following times:

Wednesday	11:00 am – 7:00 pm
Thursday	7:30 am – 12:30 pm
Friday	7:30 am – 12:30 pm and 3:30 pm – 6:30 pm
Saturday	12:30 pm – 4:00 pm
Sunday	7:30 am – 8:30 am

ALCA is pleased to provide to you, as a full conference registrant, the following complimentary conference materials. Simply stop by the ALCA registration desk to redeem your conference binder ticket.

Educational Binder Sponsored by: TEXTRON GOLF, TURF & SPECIALTY PRODUCTS

Tote Bag Sponsored by: Husqvarna

Portfolio Sponsored by: CATERPILLAR®

Badge Holder Sponsored by:

Travel Mug Sponsored by:

ADMITTANCE TO FUNCTIONS

Please wear your badge at all times. Tickets for the Optional Seminars, Networking Party, Breakfast with Champions and the Awards Banquet will be collected at each event. Tickets for these optional events are available at the ALCA Registration Desk. Be sure to purchase your tickets early, as our events sell out quickly. Please note that registrants from all three participating associations (ALCA, PLCAA, and PGMS) may gain admittance into any ALCA educational session during the conference, as well as access to the GIC Resource Room.

PUBLICATION DISCOUNTS!

Come by the ALCA booth and the GIC Resource Room to learn about the special conference discounts on ALCA publication orders that are placed during the trade show. Special discounts apply for many publications, including marketing materials to help your business become more profitable and successful! Free luggage tags will be available at the booth!

ALCA BOOTH NUMBER: 3405 *(Association Plaza)*

Visit us at the ALCA booth at the Green Industry Expo to learn more about ALCA, view sample publications, and chat with ALCA staff.

CNA BOOTH NUMBER: 3003

Please be sure to inquire about the ALCA endorsed insurance programs through the CNA Insurance Companies.

General Information

GIC RESOURCE ROOM: *Presidential Chamber A, Gaylord Opryland*

Sponsored by: TORO.

The Green Industry Conference Resource Room features the industry's latest publications, videos, and CDs to keep your company one step ahead of the competition. ALCA offers several new Spanish resources, including the *Spanish Phrases for Landscape Professionals, Construction Spanish Pocket Dictionary* and the *Interactive Language Tutorial.* (Many of ALCA's popular employee training videos are also available in Spanish.) And, don't forget to pick up copies of ALCA's best-selling publications, such as *Pricing for the Green Industry, Operating Cost Study,* and *The Guide to Operating a Successful Maintenance Business.* Visit the Green Industry Conference Resource Room and discover an abundance of new resources to boost your profits.

For a wealth of information and ideas, visit the **GIC Resource Room** during the following times:

Wednesday	3:00 pm – 7:00 pm
Thursday	7:30 am – 12:00 pm
Friday	7:30 am – 12:00 pm
Saturday	2:00 pm – 6:00 pm

CD/CASSETTE SALES

CDs and cassette tapes for most educational sessions are available for sale by A.V.E.R. Associates.

TWIN NETWORK and WIN!

* Come by the ALCA registration area and pick up your FREE "Twin" number sticker.
* Find your Twin with the same number.
* Visit the GIC Resource Room with your Twin to receive your prize.

- You and your Twin are then eligible to enter the GRAND PRIZE DRAWING:

- Grand Prize – (1) Executive Forum Registration and (1) round-trip airfare to Florida
- 2nd Place – (2) Executive Forum Registrations
- 3rd Place – (1) Executive Forum Registration

You need not be present to win. Grand prizes will be announced at the ALCA booth at the Green Industry Expo on Saturday, November 16, at 12:00 pm. Contest is open to all ALCA, PLCCA, and PGMS conference registrants.

PT 02793

President's Welcome

PLCAA

PLCAA Green Industry Conference & GIE
November 13-16, 2002
Nashville, TN

Dear Colleagues:

Welcome to Nashville and the beautiful Gaylord Opryland Resort & Convention Center! What a spectacular setting for our 23rd Green Industry Conference and the Green Industry Expo.

And what a conference and show we have in store for you. As a long-time PLCAA conference attendee, I can say that this is our best lineup yet! We've got winning quarterback and football analyst **Joe Theismann** as PLCAA's guest speaker. He'll relate his successful career as an NFL quarterback to us in his presentation "Managing to Win." Don't miss this special presentation on Thursday at 8:30 a.m. in the Tennessee Ballroom.

Our program is jam-packed with top speakers, sessions and fun events along with a trade show featuring over 300 exhibitors and an ever-popular Product Field Day. My hat's off to the Conference Committee and Education Committee Chairman **Ewald Altstadt** for pulling together such an in-depth program filled with variety and important business issues. Our goal is to grow your business...*PLCAA is your business partner.*

Don't forget that if you're a PLCAA full-conference attendee, you should stay for the whole show and be at the **PLCAA $1,000 cash prize drawing** at 5 p.m. on Saturday in Tennessee Ballroom C. You have three chances to win $1,000 but you must be present at the drawing to win. Who knows...you could go home $1,000 richer. Be there for a shot at the big cash.

Thank you for coming to our top industry event of the year. On behalf of the Board and staff, we're glad you're here and hope you have a wonderful show experience. Please stop by the PLCAA booth—a great place to get to know your association, and its benefits and services.

Enjoy the show!

Sincerely,

Bill Hoopes

Bill Hoopes, 2002 PLCAA President
Director of Training & Development
Scotts LawnService, Marysville, Ohio

About PLCAA

PLCAA

PLCAA: Your Business Partner

The Professional Lawn Care Association of America (PLCAA) is the premier global trade association for people like you—residential and commercial lawn care professionals. With members across the U.S., Canada and abroad, PLCAA is your ultimate resource for everything you need to assist you in starting, running and growing your lawn care business. PLCAA's mission is "growing the business of lawn care professionals."

PLCAA

As a PLCAA member, you get instant support with everyday business issues and challenges, access to business and legal experts to answer your questions, peer networking opportunities with other PLCAA members and suppliers across the globe, trade industry news and publications, and Green Industry legislative representation.

Interested in joining PLCAA? Stop by PLCAA Booth #3407 for membership information and specials. Call PLCAA at (800) 458-3466 or visit us online at www.plcaa.org.

2002 PLCAA Leaders

PLCAA Registration Schedule

Delta Lobby

Wednesday, November 13
8:30 a.m.-5 p.m.
Thursday, November 14
6:30 a.m.-2 p.m.
Friday, November 15
6:30 a.m.-2 p.m.
Saturday, November 16
8:30 a.m.-2 p.m.

New Schedule

Don't forget, the show is on a different schedule this year—use this guide to help you plan your days. The GIE Product Field Day is Thursday and the trade show is Friday and Saturday. Refer to the GIE section of this program for a complete GIE schedule including Product Field Day & lunch shuttle hours, and exhibitor listing.

$1,000 Cash Prize

PLCAA full-conference registrants only are eligible for the $1,000 cash prize drawing to be held Saturday at 5 p.m. in Tennessee Ballroom C. There will be three drawings of $1,000 each but you must be present at the drawing to win. Good luck!

Audio Tape Sales

Tapes of most sessions will be on sale during the conference through A.V.E.R. Associates at a service desk located in the Delta Lobby.

Certification Opportunities

Impress your customers by enrolling in PLCAA's two national home-study programs. PLCAA offers two certifications—the CTP (Certified Turfgrass Professional) designation through the University of Georgia and the COLP (Certified Ornamental Landscape Professional) designation. **Stop by PLCAA's booth #3407 for details.**

Grand Opening Session
"Managing to Win"
Joe Theismann, Winning Quarterback

PLCAA is pleased to present Joe Theismann. You may be familiar with his story. After a 12-year NFL career, Joe left the Redskins during the 1985 NFL season due to a severe leg injury. His career was highlighted by many outstanding performances including a 27-17 Redskins victory over the Miami Dolphins in Super Bowl XVII. Now a football analyst for ESPN and author of *The Complete Idiot's Guide to Understanding Football Like a Pro*, Joe shares the hard-earned lessons of life on the field, stressing the importance of teamwork, and motivating individuals to take ownership of team goals. In his charismatic and entertaining style, Joe draws parallels between his successful career as an NFL quarterback and you with the goal of Managing to Win!

The Change Revolution!
Moving Beyond "Change" in Revolutionary Times
Mark Mayfield, Lesco Sales Rep
Tennessee Ballroom B

Mark's dynamic program, "The Change Revolution," will give you answers to questions like "How do I overcome the resistance to 'change' in my organization?"... "How do I get past the 'That's the way we've always done it' mentality?"... "How much 'change' is necessary in my lawn care company?"... "What steps can I take to revolutionize my business?" This session will show you an entrepreneurial approach to bringing about change in your organization.

Sponsor: LESCO

Tennessee Ballroom A

Session leader Gerry Sweda shares with the audience a very simple, but highly effective selling system that he has developed based on more than 20 years of training sales people in all phases of the green industry. You will leave this session with a clear picture of how successful sales reps maximize their sales-call efficiency and improve their sales-to-call ratios. You'll hear what works, why it works, and more importantly—how it can work for you.

President's Welcome

On behalf of your Board of Directors, PGMS Executive Director - Thomas Shaner, CAE and his administrative team, it is my pleasure to welcome you to our 91st annual PGMS conference and Green Industry Expo. This has been an exciting year for the PGMS with many people working very hard to improve the programs and benefits of PGMS membership. This conference is just one example of those cutting edge efforts.

Our conference is an ideal opportunity to renew old friendships, have some fun, ne' work with hundreds of other professional grounds managers, do some comparison shopping for equipment, and of course, attend a variety of educational sessions. Speaking of educational sessions, this year the PGMS sessions are formatted to provide you with more in-depth information and additional opportunities to interact with our speakers. Also remember that being registered for the conference entitles you to attend any of the 60 educational sessions presented by all three GIE partners. While visiting the Expo, be sure to stop by the PGMS booth for a special treat, visit with representatives from the PGMS Board and meet our dynamic staff.

Plan to attend our annual business meeting-held at 6:45 a.m. on Friday. This year there will be some exciting news about initiatives being proposed by the board of directors as well as the annual elections. This is also an ideal opportunity to learn more about the workings of your society.

If you should require anything or have any questions, please stop by the registration booth and talk with our staff. I know that they would be happy to hear from you.

I hope we have the opportunity to meet during the next few days. Have a great time while in Nashville and thank you for being a part of the 91st Annual PGMS Conference!

Sincerely,

Matthew Vehr
PGMS President

About PGMS

PGMS is a professional society, established in 1911, of grounds managers of all specialties and disciplines who have joined together for the purpose of educational and economic advancement. PGMS serves the total range of professionals in the industry, and is comprised primarily of on-staff grounds professionals (with one sort of institution or another), and the remainder of independent landscape contractors.

PGMS is not comprised of organization members, it is specifically designed for you, the individual. The ultimate goal is to assist the individual manager in developing techniques and management skills to assure outstanding grounds management programming, and upgrade the level of the profession. Toward these ends, the Society provides or engages in a wide range of services and activities.

- *Annual Conference and Green Industry Expo.
- *Regional Conferences, plus meetings with other organizations.
- *Publication of the Grounds Management FORUM newsletter.
- *Provides each member with a certificate of membership and an annual membership card.
- *Provides a program of preparing, testing and conferring of the Certified Grounds Manager (CGM) and Certified Grounds Keeper (CGK) recognitions.
- *O[illegible]rs a specially designed Professional Landscaper's Course through Thomson Education Direct.
- *Arranges free subscriptions to key Green Industry publications.
- *Provides awards for outstanding achievement in grounds management, including the annual Green Star Grounds Management Awards.
- *Publishes a range of professional publications, with topics including management supervision, estimating guidelines, forms and job descriptions and maintenance management.
- *Provides a best rate travel service through agent Travel Worldwide Network.
- *Offers members a wide variety of promotional aids and ID items.
- *Provides a clearing house for information and referral services on all phases of grounds management.
- *Keeps members informed and takes positive action on government affairs. At the local levels, PGMS branches often band together to influence state, regional and local regulations.
- *Originates and coordinates industry research and surveys, including salary.
- *Provides a complete hazard communication program.

PGMS BUSINESS MEETING

Attend the PGMS Annual Business Meeting, Friday, November 15 from 6:45 a.m. to 8:15 a.m. in Canal A of the Gaylord Opryland Resort & Hotel, and be eligible to receive one of the following prizes to be held at the end of the meeting (two-part ticket given away as you enter the meeting room).

PT 02807

The Meeting

Included on the program will be:

- *Election of officers
- *Voting on proposed Bylaw changes
- *Official reporting of the Society's business, fresh from the Fall Board Meeting
- *Branch reports

*The chance to ask questions of the Officers and the Board.

The Prizes

Those in attendance will have a chance to win their choice of the following door prizes, leaving the other prizes for each successive winner:

- *Free PGMS dues for 2003
- *One of two free registrations for the 2003 conference in St. Louis, MO
- *Two free tickets to this year's Awards Banquet on Saturday evening, November 16

PT 02808

Conference Program

WEDNESDAY, NOVEMBER 13

7:30 a.m. - 12:00 p.m.
PGMS Board Meeting *Gaylord Opryland Resort - Canal A*

11:00 a.m. - 5:00 p.m.
Registration Open

12:30 p.m. - 5:00 p.m.
Pre-Conference Tour
A Ticketed Event. Begin your tour in Bayou E of the Gaylord Opryland Resort Hotel. You will view a video/ slide show, hear a short lecture and then be whisked away on your tour of the Opryland Facilities. Also, there will be a lunch provided.

THURSDAY, NOVEMBER 14

6:45 a.m. - 5:00 p.m.
Registration Open *Gaylord Opryland Resort - Delta D Ballroom Lobby*

6:45 a.m. - 8:00 a.m.
CGM Breakfast *Gaylord Opryland Resort - Canal B*

6:45 a.m. - 8:15 a.m.
Business over Breakfast *Gaylord Opryland Resort - Canal A*
(Optional Ticketed Event)
Network with fellow grounds professionals and members of PGMS. Each day your table will be assigned a topic to informally discuss while you enjoy your breakfast.

8:30 a.m. - 10:00 a.m.
Education Sessions *Gaylord Opryland Resort - Bayous D & E*

Planting Trees & Shrubs So They Survive & Thrive *Bayou D*
Eric Vorodi
Acquaint yourself with the current and appropriate methods used to insure success when planting trees and shrubs. Learn how your planting techniques affect both the short-term survival of newly planted trees and shrubs and the long-term successful growth of those same plants. Learn how to help plants survive the transplanting process and thrive in the landscape.

Maintaining A Mountain of Horticulture at a National Historic Landmark *Bayou E*
John Van Etten, CGM
Go on a journey through a year in his award-winning gardens and grounds with a holistic approach. Included will be IPM, cultural practices, organic gardening, plant diversity, long term planning and environmental ideals with their grounds, golf course and greenhouse growing complex. He will discuss their company - the wide recycling efforts, composting facilities as well as environmental issues, their role in the community, local and national organizations, outreach and educational programs.

9:00 a.m.
Spouse Gathering *Gaylord Opryland Resort - Canal B*

PT 02809

10:00 a.m. - 10:15 a.m.
Break

10:15 a.m. - 12:00 p.m.
Education Sessions *Gaylord Opryland Resort - Bayous D & E*

Weed Control in the Landscape *Bayou D*
Scott Guiser
Insects and diseases come and go but weeds are a constant pest in landscapes. This presentation will address common landscape weed control challenges and describe a solution to them. Hard-to-control weeds such as Canada thistle, yellow nutsedge, and annual grass infestations will be covered. Many new herbicides are available to grounds managers. Their strengths and weaknesses will be part of the presentation. Turfgrass weeds will not be discussed.

Characteristics of a Great Leader *Bayou E*
Dr. Stan Jensen
- *The roles and attributes of leaders
- *More the coach and less the judge
- *Listening is hard work...
- *The power of questions
- *Giving clear feedback
- *Taking charge of what you can do...
- *Two kinds of Pain...you get to choose.

10:30 p.m. - 4:30 p.m.
Product Field Day
Take a hands-on look at the equipment the exhibitors have for sale. Busses will leave from the Gaylord Opryland Resort Hotel & Convention Center.

6:00 p.m. - 7:30 p.m.
PGMS Welcoming Reception *Gaylord Opryland Resort - 2nd Floor Old Hickory*

FRIDAY, NOVEMBER 15

6:45 a.m. - 8:15 a.m.
PGMS Annual Business Meeting/
Continental Breakfast *Gaylord Opryland Resort - Canal A*
The PGMS Annual Business Meeting is held in conjunction with the Annual Conference. This enables as many members as possible a practical chance to attend. Included in the Annual Business Meeting agenda are the following:
- *The election of Officers
- *Official reporting of the Society's business, fresh from the Fall Board Meeting
- *Branch Reports
- *The chance to ask questions of the officers and the board members

There will also be a continental breakfast served.

7:00 a.m. - 5:00 p.m.
Registration Open *Gaylord Opryland Resort - Delta D Ballroom Lobby*

8:30 a.m. - 10:00 a.m.
Education Sessions *Gaylord Opryland Resort - Bayous D & E*

Plant Health Care - 101: Part 1 - Above Ground *Bayou D*
Dr. Donald H. Marx
Discuss photosynthesis, canopy health, carbon storage/allocation, water management and drought effects.

Efficient Irrigation System Management *Bayou E*
Mike Prevost, ASLA
Learn about the following:
- *Availability, quality and limitations of various water supplies
- *Irrigation application as it relates to climate, soils and plant water needs
- *Efficient irrigation management as a revenue source
- *Irrigation system review, from residential to sports turf facilities

10:30 a.m. - 12:00 p.m.
GIE Keynote Speaker
Peter Vidmar

12:00 p.m. - 6:00 p.m.
Green Industry Expo
Convention Show Exposition
This is a 2-day showcase of more than 250 exhibitors. You are able to talk to suppliers and network with fellow landscape professionals.

4:00 p.m. - 6:00 p.m.
PGMS Branch Program *Gaylord Opryland Resort - Canal A*
Discover what it takes to become a successful branch. Network with PGMS branch leadership. Learn how to create a branch in your area.

6:00 p.m.
Dinner on Own

SATURDAY, NOVEMBER 16

6:45 a.m. - 8:30 a.m.
PGMS Business Over Breakfast *Gaylord Opryland Resort - Canal A*
(Optional Ticketed Event)
Network with fellow grounds professionals and members of PGMS. Each day your table will be assigned a topic to informally discuss while you enjoy your breakfast.

6:45 a.m. - 8:00 a.m.
PGMS Past Presidents Breakfast *Gaylord Opryland Resort - Canal B*

7:00 a.m. - 5:00 p.m.
Registration Open *Gaylord Opryland Resort - Delta D Ballroom Lobby*

9:00 a.m. - 2:00 p.m.
Green Industry Expo
Convention Show Exposition
This is a 2-day showcase of more than 250 exhibitors. You are able to talk to suppliers and network with fellow landscape professionals

PT 02810

1:30 p.m. - 3:00 p.m.
Education Sessions *Gaylord Opryland Resort - Bayous D & E*

"Wine and Dine" Your Policy Makers & Have Them Pick Up The Check *Bayou D*
Wolfgang Albrecht, Jr., M.Ed., M.P.A., R.A.
This interactive session will provide methods for effectively working with budget and policy makers: selling them on the value of leisure services and park maintenance, and establishing listening sessions, budget hearing meetings, and public forums to persuade non-supporting officials.

Leadership and Resolving Conflicts *Bayou E*
Dr. Stan Jensen
Different Goals and Different Agendas = Conflict
Focus on the situation, not the person
Understanding the force fields
Conflict is part of normal human interaction...Not the fun Part

3:00 p.m. - 3:15 p.m.
Break

3:15 p.m. - 5:00 p.m.
Education Sessions *Gaylord Opryland Resort - Bayou D & E*

Plant Health Care - 101: Part 2 - Below Ground *Bayou D*
Dr. Donald H: Marx
Discuss root function, water/minerals/absorption, manmade vs. natural landscapes, soil microbiology, and beneficial fungi - mycorrhizae and beneficial bacteria.

Harassment & Discrimination Issues in the Workplace *Bayou E*
Esther Nevarez
This training will review the protected bases and the areas of protection covered in the Law Against Discrimination. It will identify both types of sexual harassment as identified by the courts and will review the corresponding liabilities for the employer. The discussion on sexual harassment will review immediate and long term preventative solutions managers and business owners should use to mitigate liability. This course is valuable because only real-life situations are used as illustrations and because the trainer presents the material in a highly interactive manner which encourages participants to ask difficult questions.

6:30 p.m.
PGMS Awards/Installation Dinner Reception *Gaylord Opryland Resort Canal ABCD Foyer*

7:15 p.m. - 10:00 p.m.
PGMS Awards/ Installation Dinner *Gaylord Opryland Resort - Canal ABC*
(Optional Ticketed Event)
Each year the PGMS recognizes those businesses or schools that excel in grounds management. We celebrate their success at the Annual Awards Banquet. Please join us in showing your support as we view slides of the entries and enjoy a dinner. We will also say goodbye to the current president and officers of the PGMS and crown new individuals.

10:00 p.m.
Post Awards Reception *President's Suite*

PGMS thanks the following organizations for their support in sponsoring portions of the 91st Annual Conference, and recommends their products, services, and partnering attitudes to its members and other specifying professionals in the Green Industry.

We encourage all attending the Green Industry Expo to stop by their respective booths at the show and at your local distributorship, or otherwise contact and thank them for their participation.

And, when we say "participation", we really mean an on-going PARTNERSHIP with these organizations, rather than just once-and-gone isolated support for something. As those who have been members of PGMS for a while know, the Society has not historically lightly entered into relationships with supplier organizations. We believe that the following organizations are committed and are working hard to establish a WIN-WIN relationship with your Society and are meeting your needs as an individual professional.

A Picture Is Worth...

How much do idle crews cost you?

Get idle crews back to work in minutes–even when you're miles away.

PHOTO*TREK*™ wireless imaging lets you view multiple sites at once!

No more lost hours as crews wait while you drive... and the clock keeps ticking.

No more costly overruns.

No more guesswork via phone as as you try to "picture in your mind" what a crew member is trying to explain.

Advanced **PHOTO*TREK*™** wireless technology puts picture-perfect job site views in the palm of your hand!

You can see for yourself. Show (as well as tell) them what to do right on the photo.

Then "**PHOTO*TREK*™**" it back with wireless ease and speed!

All with PHOTO*TREK*™ wireless imaging!

RESEARCH | PRODUCTS | PEOPLE | STEWARDSHIP Syngenta

Quite a few supporters you've got there.

Syngenta leads the way in supporting the turf, ornamental, and pest control industries, from our dedicated technical and field sales reps to the hundreds working in R&D. Creating new technologies. Conducting seminars. Initiating web-based pest forecasting. Providing industry association leadership. Whether it's to control pests, nurture ornamentals, or improve turf quality, the Syngenta team is there with the knowledge and tools you need.

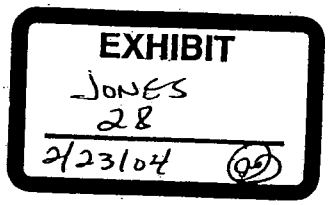
DEPOSITION EXHIBIT 28



GIE

2000

GREEN INDUSTRY EXPO

November 10-13, 2001
Tampa Convention Center
Tampa, Florida

2001 Exhibit Contract

Return contract and payment to:
GIE, 1000 Johnson Ferry Road, NE
Suite C-135, Marietta, GA 30068-2112
Phone: (770) 973-2019 ❖ Fax: (770) 578-6071

Rate Schedule:	(Member discounts apply)	Payment Schedule:	
Exhibit Rental Rate:	$ 1,295.00 / 10' x 10' booth	Minimum deposit with application:	50% of booth fees
Corner Assignments:	$ 75.00 / corner	Priority Point period ends:	February 28, 2001
Outdoor Demonstration:	$ 295.00	Remaining balance due:	August 1, 2001

Application for Space

Exhibiting company (exhibitor) agrees to pay a lease fee at the established rate (plus $75 per corner booth assignment) which must be paid by August 1, 2001. If exhibitor holds a company membership to a GIE sponsor association (ALCA, PGMS, PLCAA), a $100 discount per 10' x 10' booth may be applied. Exhibitor further agrees to comply with the Rules and Regulations for Exhibitors which are included in the prospectus. Booth assignments will be based on a priority point system for contracts received prior to February 28, 2001, as noted in the exhibitor prospectus information. After that date, assignments will be made in order of date payment is received with contract.

Educational Sessions	8:30 - 10 am

❖❖❖

Questions?

Contact GIE

Phone: (770) 973-2019
Fax: (770) 578-6071
E-mail: gie@gieonline.com

Exhibitor Personnel Name Badges

OCT 25 2000

Enclosed are your exhibitor booth personnel name badges.

If you have changes or need to make corrections to your badges, please bring the information or incorrect badge with you to Indianapolis. Adjustments will be made at the GIE Registration Counter. We cannot make changes or edits between now and the show, so please wait until arriving at the show site to make any corrections.

Holders will be available in the trade show registration center located in the Exhibit Hall Lobby of the Indiana Convention Center & RCA Dome. During show days, exhibitors may enter the exhibit hall one hour before the show opens to the industry. Badges are required for entrance into the Exhibit Hall.

Product Field Day Buffet Lunch Tickets

If you ordered lunch tickets and they are not enclosed, please call or E-mail Eleanor Ellison (eleanor@gieonline.com). Additional buffet tickets may be purchased for $15 the day of the event at the Indiana State Fairgrounds.

GIE Exhibitor Registration Center

Exhibit Hall Lobby, Indiana Convention Center & RCA Dome

Registration Hours of Operation:

Saturday, November 4	7:30 am - 6 pm
Sunday, November 5	7:30 am - 6 pm
Monday, November 6	7:30 am - 5 pm
Tuesday, November 7	7:30 am - 2 pm

Voter Alert!

Tuesday, November 7 is Election Day. Act quickly to get your absentee ballot - many states require 2 weeks advance notice. For voter Information in your state visit www.insuredemocracy.com/state.htm

Exhibitor Lounge

GIE, *Lawn & Landscape* magazine and *Interior Business* magazine invite you to relax in the exhibitor lounge located on the exhibit hall floor. The lounge will have complimentary beverages available and will open one hour prior to the exhibits. Exhibitor badges required.

Hours: ***11 am - 5 pm, Monday, November 6***
8 am - 2 pm, Tuesday, November 7

Private Meeting Rooms

Do you need to escape for just an hour to conduct private business with a distributor or dealer? Contact Trade Show Manager Eleanor Ellison to arrange for a small meeting room available for up to 12 people. You can reach Eleanor via E-mail at eleanor@gieonline.com or during the show call her by radio from the GIE Registration Center.

5 More Ways You'll Benefit:

4 Learn new tips, techniques, ideas and innovations from renowned speakers and industry leaders.

Interact with and learn from respected professional speakers and experienced leaders in the Green Industry who have been in your shoes. They know and understand the challenges you face every day. You'll learn technique after practical technique for making your business even more successful. Whether you are new to the industry or a "seasoned veteran," this unique conference will provide instructions and innovations tailored to your business to boost your success personally and professionally.

3 Network with your peers.

You'll find time is built into this conference specifically for you to meet and share insights with other cutting-edge companies and landscape professionals. Your peers are an invaluable source of professional expertise that you can profit from not only at the conference but in the future. As an added bonus, this year's conference features both exterior and interior landscape professionals in one place. Take advantage of this opportunity to explore future partnerships and cooperative efforts. Learn about successes other landscape companies have experienced through interior/exterior partnerships that have expanded their businesses, providing one-stop shopping for their clients.

2 Design your own educational schedule to meet your unique needs.

We've packed an incredible amount of information into just a few short days ... so feel free to move in and out of these six information-packed educational tracks and over 60 dynamic sessions. Plus, you have the opportunity to attend any sessions offered at the Professional Grounds Management Society Conference or the Professional Lawn Care Association of America Conference. It's your conference. Don't miss a thing — bring more than one person and you can cover it all!

1 See What's New — at the Green Industry Expo!

See the most comprehensive display of new products and services in the industry at the one and only Green Industry Expo (GIE). This outstanding display of Green Industry products and services features over 300 exhibitors ranging from the newest in power equipment and protective wear to irrigation supplies as well as a new focus on interior plant products and services. Another must-see feature of the GIE is the Product Field Day on Sunday from 1:00 p.m.- 5:00 p.m. Attend this hands-on demonstration of the latest equipment and systems the industry has to offer.

5 Get refreshed and recharged.

Taking a few days away from your routine to attend this conference will have a powerful, positive effect on your performance. You'll return to work with renewed confidence and energy ... and scores of new ideas and techniques that you can use immediately.
