The Petitioner previously requested CANCELLATION of the above registration under 15 U.S.C. 1064 (3) on the grounds that the registration has been abandoned, which were delivered to the U.S. Patent and Trademark Office on March 3, 2003.

Petitioner previously enclosed a cheque for \$200.00, which was the incorrect amount, and the Petitioner's cheque has been returned. The required fee of \$300.00 accompanies this petition.

control/display unit, a computerized valve control module, and air control valves that enable a vehicle's tire pressure to be increased or decreased while the vehicle is moving".

The Petitioner's pending Applications currently stand rejected in view of a likelihood of confusion with the Registered Trademark. As a result of inquiries, the Petitioner has been unable to find use of the mark by the Registrant and, therefore, believes that the Registered Trademark **BOSS** has been abandoned.

The Petitioner believes that it is being damaged by the registration, as the registration stands as an impediment to registering its pending Trademark.

Wherefore the Petitioner prays for cancellation.
