Mark PEEL N STICK U.S. Reg. No. 1,384,270

Dear Commissioner:

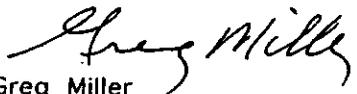

This letter is on behalf of KEL-EEZ® Weather Stripping, our supplier of ToughPile™ PEEL N STICK Weather strip, which we have used as an OEM component of our SunPipe® product since 1998.

The SunPipe® is a tubular skylight, a product that brightens dark, sun-starved areas of residential, commercial and industrial buildings (without the solar heat gain that traditional skylights would provide) by piping natural light through the roof and attic space and then diffusing it throughout the room below. Other details about SunPipe® are available at www.sunpipe.com.

We sell SunPipes direct to the consumer or through our network of Authorized SunPipe® Contractor Dealers, world-wide. The Sun Pipe Company has made three purchases of ToughPile™ PEEL N STICK Weather strip since 1998, most recently in June 2006.

I originally found the ToughPile™ PEEL N STICK Weather strip product through their listing in the Thomas Register back in 1998. The product has been fulfilling our requirements since that time. The "Peel N Stick" aspect of their product is crucial to our use of the product.

Sincerely Yours,

Greg Miller
