MOTION FOR LEAVE TO AMEND PETITION FOR PARTIAL CANCELLATION

Petitioner respectfully moves the Board, under TBMP §§ 315 and 507 and Federal Rules of Civil Procedure 15(a) for leave to amend its Petition for Partial Cancellation, primarily to correct recently discerned errors and ambiguities in its original pleading. A copy of the [Proposed] First Amended Petition for Partial Cancellation is attached hereto as Exhibit "A."

I. Procedural Background

Petitioner, QinetiQ Limited ("QinetiQ"), filed its Petition for Partial Cancellation on November 22, 2005. On January 31, 2006, Registrant filed its Answer in response to the petition.

Upon reviewing Registrant's Answer, Petitioner became aware of certain inadvertent errors and ambiguities in the original Petition for Partial Cancellation. Specifically, the present proposed amended pleading corrects the spelling of

02-09-2006

U.S. Patent & TMO/TM Mail Rcpt Dt. #26

Petitioner's name and its address. It further clarifies Paragraphs 10 and 13 of the original Petition to indicate that the Section 8 & 15 Declaration referred to is Registrant's rather than Petitioner's, and similarly that Paragraph 25 refers to Registrant's Response of July 24, 1986. Further, it clarifies Paragraphs 11 and 20 of the original Petition to delete the term "commonly commercially understood," which may be ambiguous.

The Registrant has been advised of this motion, and by a telephone call from counsel for Registrant to counsel for Petitioner on February 8, 2006, Registrant indicated that they will not oppose this motion. Therefore, Registrant would not be prejudiced in any cognizable way by Petitioner's Proposed Amended Petition for Partial Cancellation.

II. Argument

A. The Standard

The Board has the discretion to permit or deny a motion to amend. Leave to amend is to be "freely given when justice so requires." Fed.R.Civ.P. 15(a). In this case, justice requires that Petitioner's Petition for Partial Cancellation be permitted to be amended to make the minor corrections noted above. The Board liberally grants leave to amend pleadings at any stage of the proceeding when justice requires, unless entry of the proposed amendment would violate settled law or be prejudicial to the rights of the adverse party or parties. See, for example, *Commodore Electronics Ltd. v. CBM Kabushiki Kaisha*, 26 USPQ2d 1503 (TTAB 1993); and *United States Olympic Committee v. O-M Bread Inc.*, 26 USPQ2d 1221 (TTAB 1993).

The general standard for granting leave to amend is stated in the Supreme Court's decision in *Foman v. Davis*, 371 U.S. 178 (1962):

If the underlying facts or circumstances relied upon by a plaintiff may be a proper subject of relief, he ought to be afforded an opportunity to test his claim on the merits. In the absence of any apparent or declared reason - - such as undue delay, bad faith or dilatory motive on the part of the movant, repeated failure to cure deficiencies by amendments previously allowed, undue prejudice to the opposing party by virtue of allowance of the amendment, futility of amendment, etc. - - the leave sought should, as the rules require, be "freely given."

Id. at 182. Thus, under *Foman*, courts should, in determining whether to grant leave to amend, look to such factors as: (1) "undue delay" on the part of the moving party; (2) "bad faith" on the part of the moving party; (3) a "dilatory motive" on the part of the moving party; (4) the moving party's repeated failure to cure deficiencies by previously allowed amendments; (5) "undue prejudice" to the opposing party; and (6) "futility." *Foman*, 371 U.S. at 182. None of these factors are present here.

B. The Liberal Policy of 15(a) Should Apply to Permit Amendment

First, this request will not alter any scheduling order deadlines, and it would not delay the proceeding at all. Petitioner's motion will not impact the discovery deadlines, since fact discovery is still ongoing and the parties have not yet even identified experts or begun expert discovery. Nor will it impact the testimony period, since Registrant's is not set to close until at least December 7, 2006. Registrant will not be prejudiced in any legally cognizable way by Petitioner's proposed amendment. Discovery is still ongoing until at least July 10, 2006, no witnesses have yet been deposed and discovery documents have not yet been exchanged. Further, no dispositive motions have been filed by either side.

Additionally, Petitioner provided Registrant's counsel with a courtesy copy of the proposed Amended Petition for Partial Cancellation, which as indicated above, Registrant has accepted.

Second, this motion was not brought in bad faith. Petitioner is not attempting to make changes on the eve of trial. Rather, Petitioner is acting conscientiously to correct recently perceived deficiencies in its pleading.

The third *Foman* factor does not apply here as there is clearly no dilatory motive on Petitioner's part. Moreover, because there have been no previous amendments, the fourth factor obviously does not apply either. *See e.g., Lone Star Ladies Investment Club*, 363 F.3d at 368 ("This is not a case where plaintiffs have already had multiple opportunities to amend their pleadings.").

Fifth, Registrant has been on notice of the proposed changes by Petitioner's letter dated February 3, 2006. Petitioner has acted promptly to correct the perceived deficiencies in its original Petition for Partial Cancellation.

Finally, the amendment proposed is obviously not futile.

III. Conclusion

This motion for leave to amend is presented in good faith with good cause, was not unduly delayed, and unduly prejudices no one. Consistent with the directive of FED.R.CIV.P. 15(a) that such leave be freely given, Petitioner requests that this motion be granted.

Respectfully submitted,

QinetiQ LIMITED

FIRST AMENDED PETITION FOR PARTIAL CANCELLATION

QinetiQ Limited, a corporation of England of 85 Buckingham Gate, London UNITED KINGDOM SW1 6PD, believes that it is and will be damaged by the registration of the mark KINETIC in Registration No. 1,454,926 for the goods in International Class 9, and hereby petitions to partially cancel the registration.

As grounds for cancellation, it is alleged that:

Registrant's Rights

1. Registration No. 1,454,926 issued on September 1, 1987 to Kinetic Marketing Inc., a corporation of New York with a place of business at 1133 Broadway, New York, New York 10010, and covers the mark KINETIC for "computers, computer programs, radios and pedometers" in International Class 9; "handbags and luggage" in international Class 18; and "typewriters" in International Class 16.

2. Registration No. 1,454,926 alleges a date of first use of the mark on the goods in Class 9 of May 1, 1984 and a first use in commerce of the mark on those goods of July 1, 1984.

3. On information and belief, Registrant sells its goods in a completely different market from the intended market of Petitioner. Specifically, Registrant is primarily in the business of supplying low-cost consumer products, with custom imprinting, which are sold for use as promotional products by others. Printouts from Registrant's website pages show that the current price point of their products range from \$1.95-\$33.95, with most being on the mid-low end. Registrant's market is targeted to vendors who want to add their logo or customized wording to Registrant's products for promotional reasons. See Exhibit A (printouts from Registrant's website), to Scharmach Declaration, which is attached as Tab 1 to this Petition.

Petitioner's Rights

4. QinetiQ, in comparison, is a supplier of highly sophisticated high performance equipment and services for use by businesses. Petitioner's goods are for use in connection with business, scientific and technical applications and are not intended for use as logo items. See Exhibit B, to Scharmach Declaration (printouts from Petitioner's website).

5. Petitioner has filed Application Serial No. 76/288,427 in the Patent & Trademark Office on July 18, 2001 to register the mark QINETIQ for the following goods¹:

¹ Petitioner initially included certain other goods and services in Classes 9, 36, 37, 41 and 42 in the Application which was assigned Serial No. 76/288,427. However, Petitioner subsequently requested division out of those goods (for which no conflict was found by the trademark examiner). The USPTO acted on Petitioner's request and placed those divided out goods in Serial No. 76/977,556.

COMPUTER SOFTWARE FOR USE IN DATABASE MANAGEMENT;
COMPUTER SOFTWARE FOR MANAGING COMPONENT
OBSCOLESCENCE; COMPUTER SOFTWARE FOR CREATING
COMPUTER SIMULATIONS FOR TRAINING PURPOSES; COMPUTER
SOFTWARE FOR TELECOMMUNICATIONS MANAGEMENT;
COMPUTER SOFTWARE FOR INFORMATION TECHNOLOGY
SECURITY; ALL THE ABOVE ARE NOT FOR USE IN CONNECTION
WITH OR FOR FACTORY AUTOMATION, MATERIAL HANDLING
AND/OR THE AUTOMOTIVE INDUSTRIES IN INTERNATIONAL CLASS
9.

6. The Patent and Trademark Office ("PTO") rejected Application Serial No. 76/288,427 on September 19, 2001, under Section 2(d) based in part on Registration No. 1,454,926. The Trademark Examining Attorney found that the mark of Registration No. 1,454,926 is "the same phonetically and therefore will create similar commercial impressions." It also found that:

Applicant's goods and services are, in part, . . . computers, computer software . . . Registrant's goods . . . are computer programs . . . The applicant's goods . . . as filed, include many of the registrant's goods. As such, they are likely to travel through the same channels of trade to the class of purchasers. Therefore, with the contemporaneous use of both marks, consumers are likely to reach the mistaken conclusion that the goods of the parties originate from a common source.

Office Action at 2, Exhibit C to Scharmach Declaration. After considering a response by Applicant, the Trademark Examiner issued another Office Action dated May 28, 2004, wherein as to the '926 Registration, the Examiner adhered to the decision that the goods description did not distinguish the marks, e.g., finding that ("computer hardware products are so related to computer software products that their marketing under the same or similar marks may be likely to cause source confusion"). Office Action at 3, Exhibit D to Scharmach Declaration. In further Office Actions dated March 21, 2005

and October 7, 2005, the refusal under Section 2(d) as to Registration No. 1,454,926 was continued and maintained.

7. On information and belief, the only software that Registrant offers or has offered under the KINETIC mark is a "ST-7 Software CD Program & Driver," which functions as a photo program and a driver program for a digital camera. See Scharmach Declaration, Exhibit E. Registrant currently offers this product on its website for the following prices: \$11.95 for a quantity of 50, \$11.45 for a quantity of 100, \$10.95 for a quantity of 200, \$10.45 for a quantity of 300, and \$9.95 for a quantity of 500. It's website also states its imprint service information. See *Id.*

Relevant Trademark Office Authorities

8. The current guidelines in the Trademark Manual of Examining Procedure (TMEP) Section 1402.03(d) states the following:

Any identification of goods for computer programs must be sufficiently specific to permit determinations with respect to likelihood of confusion. The purpose of requiring specificity in identifying computer programs is to avoid the issuance of unnecessary refusals of registration under 15 U.S.C. §1052(d) where the actual goods of the parties are not related and there is no conflict in the marketplace. See *In re Linkvest S.A.*, 24 USPQ2d 1716 (TTAB 1992). Due to the proliferation of computer programs over recent years and the degree of specialization that these programs have, broad specifications such as "computer programs in the field of medicine" or "computer programs in the field of education" should not be accepted unless the particular function of the program in that field is indicated. For example, "computer programs for use in cancer diagnosis" or "computer programs for use in teaching children to read" would be acceptable.

Typically, indicating only the intended users, field, or industry will not be deemed sufficiently definite to identify the nature of a computer program. However, this does not mean that user, field or industry indications can never be sufficient to specify the nature of the computer program adequately. For example, "computer programs in the field of geographical information systems" would be acceptable. Geographical information systems, also known in the industry as GIS, are well-defined computer applications that do not need further definition. If the identification in the application does not adequately specify the nature of a computer program, further information may be requested. Any questions concerning the recognition of a term of art for a computer program should be discussed with the senior attorneys or other examining attorneys who are knowledgeable in the computer field.

If an applicant asserts that the computer programs at issue serve a wide range of diverse purposes, the applicant must submit appropriate evidence to substantiate such a broad identification of goods. See 37 C.F.R. §2.61(b); TMEP §§1402.03(b) and (c) .

Generally, an identification of "computer software" will be acceptable as long as both the function/purpose and the field are set forth. Some general wording is allowed. The following wording is acceptable:

(1) *Computer game software.*

(2) *Computer operating programs or computer operating systems:* Software under this category comprises master control programs that run the computer itself. They are the first programs loaded when the computer is turned on and set the standards for the application programs that run in the operating system or operating program.

(3) *Computer utility programs:* These programs must be designed to perform maintenance work on a computer system or components thereof, such as file management (sorting, copying, comparing, listing, and searching files), as well as diagnostic and measurement routines that check the health and performance of the computer system. Beware of identifications that read "Computer utility programs, namely, business software." - This is NOT a utility program!

(4) *Software development tools:* These programs are designed to create other computer programs. This is one of the few exceptions in which use of the term "tools" is acceptable.

(5) *Database management software [indicate for general use or specific field]:* Software that controls the organization, storage, retrieval, security, and integrity of data in a database (an electronically stored collection of data). For example:

General purpose database management software.

- Database management software for use by financial advisors.
- Database management software in the field of baseball cards.

(6) *Spreadsheet software [indicate for general use or specific field]:* Software that simulates a paper spreadsheet, or worksheet, in which columns or individual cells of numbers are summed, subtracted, multiplied or divided with the contents of other columns or cells for budgets and plans. For example:

- General purpose spreadsheet software.
- Spreadsheet software for use by budget analysts.

(7) *Word processing programs [indicate for general use or specific field]:* Software used to create text documents.

(8) *Computer aided design (CAD) software [indicate for general use or specific field]:* Computer Aided Design software is generally used to design products. CAD software is available for generic design or specialized uses, such as architectural, electrical and mechanical design. For example:

- Computer aided design (CAD) software for general use.
- Computer aided design (CAD) software used for designing integrated circuits.
- Computer aided design (CAD) software for architectural use.

(9) *Computer aided manufacturing (CAM) software [indicate for general use or specific field]:* Computer Aided Manufacturing software automates manufacturing systems and techniques, including numerical control, process control, robotics and materials requirements planning. For example:

- Computer aided manufacturing (CAM) software for general use.

- Computer aided manufacturing (CAM) software used in the manufacture of airplane components.
- Computer aided manufacturing (CAM) software for integrated circuits.

(10) *CAD/CAM software [indicate for general use or specific field]:* Computer Aided Design/Computer Aided Manufacturing software integrates functions of CAD and CAM software in that products designed by the CAD systems are directly inputted into the CAM systems for manufacture.

Indefinite and unacceptable wording include the following:

- (1) Computer programs featuring multimedia (unless the applicant specifies the content, *e.g.*, motion pictures in the field of [specify], recorded on computer media).
- (2) Computer firmware (unless the applicant specifies the function/purpose of the program, and, if the program is content or field specific, the field of use).
- (3) Computer devices (must specify the common commercial name therefor).
- (4) Computer accessories (must specify the common commercial name therefor).

See **TMEP §1402.11(a)** regarding identification and classification of computer services.

TMEP Section 1402.03(d) (emphasis added).

9. Under Section 18 of the Trademark Act, the U.S. Patent and Trademark Office, Trademark Trial and Appeal Board has authority to cancel registrations, in whole or in part, to restrict the goods or services identified therein, or to “otherwise restrict or rectify . . . the registration of a registered mark.” See 15 U.S.C. § 1068 (1988).

“Computer Programs” Issue

10. In connection with Registration No. 1,454,926, Registrant submitted a Declaration under Section 8 & 15 on July 1, 1993, which alleges that the mark was in use for the goods “computers, radios, pedometers.” See Exhibit F to the Scharmach Declaration. The specimen of use submitted only evidenced use on “radios.” No specimen of use was submitted showing use on “computers.” Further, Registrant’s Section 8 & 15 Declaration did not even allege that use was being made for “computer programs.”

11. On information and belief, Registrant has not offered any "computer programs" as that term was defined by Registrant in the Response submitted July 24, 1986 ("The Computer is an electronic device that accepts and processes data and employs a keyboard for typing onto the screen and a printer. Computer programs are sets of instructions or information on disks utilized by the computer.") (See Exhibit G to the Scharmach Declaration) under the KINETIC mark in the last two years and thus, should be deemed to have abandoned the mark as to computer programs.

12. Printouts of Registrant's web pages dated October 19, 2005 and November 29, 2004 show that "computer programs" are not among the categories of goods offered by Registrant on its web site. See Exhibit A to Scharmach Declaration.

13. As noted above, Registrant's Section 8 & 15 Declaration did not allege that use was being made of "computer programs."

14. On information and belief, Registrant discontinued use of the registered mark KINETIC in connection with *computer programs* for a period of more than two years with no intent to resume said use and, therefore, has abandoned KINETIC as a trademark for computers within the meaning of § 45 of the Trademark Act.

15. Registration No. 1,454,926 of the mark KINETIC accordingly is invalid as a matter of law and is subject to partial cancellation with respect to *computer programs* at any time under § 14 of the Trademark Act of 1946.

16. As Registrant has abandoned KINETIC as a trademark for the aforesaid goods, Petitioner has now established superior rights in the mark QINETIQ for computer programs, either by its application of by actual use of the mark.

17. Alternatively, the term "computer programs" in U.S. Registration No. 1,454,926 is overbroad and/or indefinite because it encompasses a very broad range of goods, which does not permit a proper determination with respect to likelihood of confusion and has caused an unnecessary refusal of registration under 15 U.S.C. Section 1052(d) in Application Serial No. 76/288,427, where the actual goods of Registrant and Petitioner are not related and there is no conflict in the marketplace.

18. Due to the overbroad term "computer programs" in U.S. Registration No. 1,454,926, the trademark examining attorneys assigned to Serial No. 76/288,427 have been unable to make a finding that the goods of Petitioner and Registrant are distinguishable.

19. In view of the overbreadth and indefiniteness of the term "computer programs" in Registration No. 1,454,926, that registration is defective and invalid unless it is restricted to a more specific definition of the scope of its "computer programs," namely to that actually used, *i.e.*, "computer programs for use as promotional items, namely, computer programs for a photo program for digital cameras and computer programs for a driver program for digital cameras." See Scharmach Declaration, Exhibit E (showing such goods and the "imprint" information listed for each).

"Computers" Issue

20. On information and belief, Registrant has not offered any computers as that term was defined by Registrant in the Response submitted July 24, 1986 ("The Computer is an electronic device that accepts and processes data and employs a keyboard for typing onto the screen and a printer. An illustration of the Kinetic computer was annexed to the application") (See Exhibits G and H to the Scharmach Declaration)

under the KINETIC mark in the last two years and thus, should be deemed to have abandoned the mark as to computers.

21. Printouts of Registrant's web pages dated October 19, 2005 and November 29, 2004 show that "computers" are not among the categories of goods offered by Registrant on its web site. See Exhibit A to Scharmach Declaration.

22. On information and belief, Registrant discontinued use of the registered mark KINETIC in connection with *computers* for a period of more than two years with no intent to resume said use and, therefore, has abandoned KINETIC as a trademark for computers within the meaning of § 45 of the Trademark Act.

23. Registration No. 1,454,926 of the mark KINETIC accordingly is invalid as a matter of law and is subject to partial cancellation with respect to *computers* at any time under § 14 of the Trademark Act of 1946.

24. As Registrant has abandoned KINETIC as a trademark for the aforesaid goods, Petitioner has now established superior rights in the mark QINETIQ for computers.

25. Alternatively, if the Board permits the term "computers" to be broadly defined (despite Registrant's narrow definition in its Response of July 24, 1986), then, as with "computer programs," the term "computers" in U.S. Registration No. 1,454,926 is overbroad and/or indefinite because it encompasses a very broad range of goods, which does not permit a proper determination with respect to likelihood of confusion and has caused an unnecessary refusal of registration under 15 U.S.C. Section 1052(d), where the actual goods of Registrant and Petitioner are not related and there is no conflict in the marketplace.

26. Due to the overbroad term “computers” in U.S. Registration No. 1,454,926, the trademark examining attorneys assigned to Serial No. 76/288,427 have been unable to make a finding that the goods of Petitioner and Registrant are distinguishable.

27. In view of the overbreadth and indefiniteness of the term “computers” in Registration No. 1,454,926, that Registration is defective and invalid unless Registrant is restricted to a more specific definition of the scope of its “computer”-related goods namely to the common commercial names of those goods that are actually used, namely “computers, namely computers peripherals and accessories for use as promotional items, namely mouse pads, web cameras, card readers and card editors, USB hubs, WiFi sensors and WiFi sensor pens.” See Exhibit I to Scharmach Declaration (additional printouts from Registrant’s website).

Injury

28. For the reasons set forth above, Petitioner is likely to be damaged by the continued existence of Registration No. 1,454,926, and the business and goodwill of Petitioner is further damaged in that said registration tends to create or maintain statutory rights in violation and derogation of Petitioner’s rights. A finding of likelihood of confusion will be avoided by entry of the restriction of “computer programs” and cancellation of “computers” (or alternatively, to limit the term “computers”) sought in this petition to cancel based on the differences in the marks and the differences in the goods.

29. On information and belief, Registrant is not using the mark KINETIC on the goods sought to be excluded by the proposed restriction of “computer programs” and deletion or restriction of “computers.”

A duplicate copy of this Petition for Cancellation is filed herewith, along with a check for the cancellation fee of \$300.00.

WHEREFORE, since Registrant has not used its mark in connection with the broad scope of goods claimed in United States Trademark Registration No. 1,454,926 and has not used its mark in connection with goods similar to those identified in Applicant’s Serial No. 76/288,427 in connection with its mark, Petitioner prays judgment be entered herein partially canceling Registration No. 1,454,926 for the mark KINETIC by deleting the goods “computers” and “computer programs” from the identifications or limiting the identification of “computer programs” to “computer programs for use as promotional items, namely, computer programs for a photo program for digital cameras and computer programs for a driver program for digital cameras,” and limiting the identification of “computers” to “computers, namely computers peripherals and accessories for use as promotional items, namely mouse pads, web cameras, card readers and card editors, WiFi sensor pens,” and for such other and further relief as may be just and proper. If necessary, the identification of goods in Petitioner’s involved Application Serial No. 76/288,427 could be further restricted as “not for use as promotional items.”

Respectfully submitted,

TAB 1 TO FIRST AMENDED PETITION FOR PARTIAL CANCELLATION

**Declaration of Sheryl Scharmach
in Support of QinetiQ Limited's
Petition for Partial Cancellation**

I, Sheryl L. Scharmach, declare as follows:

1. I am employed as an attorney by NIXON & VANDERHYE P.C. I am submitting this declaration in support of QinetiQ Limited's Petition for Partial Cancellation of Registration No. 1,454,926
2. Attached as Exhibit A hereto are true and correct copies of printouts from Registrant's website at www.kineticmarketing.com.
3. Attached as Exhibit B hereto are true and correct copies of printouts from Petitioner's website at www.qinetiq.com.
4. Attached as Exhibit C hereto is a true and correct copy of the Office Action dated September 19, 2001 in Application Serial No. 76/288,427.

5. Attached as Exhibit D hereto is a true and correct copy of the Office Action dated May 28, 2004 in Application Serial No. 76/288,427.

6. Attached as Exhibit E hereto is a true and correct copy of a printout of Registrant's website pertaining to "ST-7 Software CD Program & Driver."

7. Attached as Exhibit F hereto is a true and correct copy of Registrant's Declaration under Section 8 & 15 for Registration No. 1,454,926.

8. Attached as Exhibit G hereto is a true and correct copy of a Response dated July 24, 1986 submitted by Registrant in the prosecution of Application Serial No. 73/565,607 (Registration No. 1,454,926).

9. Attached as Exhibit H hereto is a true and correct copy of specimens showing computers submitted by Registrant with is Application Serial No. 73/565,607 (Registration No. 1,454,926) on October 28, 1995.

10. Attached as Exhibit I hereto are true and correct copies of additional printouts from Registrant's website pertaining to computer-related goods.

I declare under penalty of perjury that the foregoing is true and correct to the best of my knowledge, information and belief.

Kinetic Marketing, I

Welcome to Kinetic Marketing. Located in the heart of the Big Apple
 in the City of New York, Kinetic Marketing is the nation's premiere
 provider of direct response marketing services. We have been in business for
 over 25 years and have a proven track record of helping our clients
 achieve their marketing goals. Our services include direct response
 advertising, telemarketing, and more. We are committed to providing
 our clients with the highest quality service and results. We
 maintain our commitment to our clients and our products
 while retaining the same professionalism we had 25 years ago. We
 invite you to take a look at our product line as well as our specials.
 Please feel free to call or email us with any questions concerning
 Kinetic, Kinetic Color, KMI, our products or our prices. Thank you
 for visiting us at www.kineticmarketing.com

- [Site Locations](#)
- [Subsidiaries](#)

QinetiQ is one of the world's leading defence technology and security companies. In today's world the challenges faced by governments to detect, identify and respond to both defence and homeland security threats requires the most advanced technical capabilities science can offer.

QinetiQ was founded from the world's first top flight national defence laboratory to transition to the private sector. It gives customers access to the output of 50 years of national investment at the forefront of technology. Today, the Group has grown to offer its global customer base technology rich services and solutions, from an expanding base of leading capabilities in both Europe and North America.

We operate at the leading edge of technology which enables us to give our civil customers access to solutions that are often beyond those readily available in commercial markets.

From integrating legacy weapons systems with state of the art sensors and software for the British MOD, to fielding advanced robotic systems for the US Department of Defense; providing port security products for the US Department of Homeland Security, or designing advanced security systems for many of the City's computer systems, QinetiQ is committed to delivering **Brilliant Solutions to Important Problems.**

QinetiQ's business is all about innovation and solutions. Its heritage is well-founded in developing intellectual property and applying it, providing a wealth of available expertise. This position gives the organisation a unique angle to take on important problems for its customers, providing them with tailored solutions.

From using weapons expertise to facilitate border patrols for an overseas navy to using human science expertise in the provision of more secure travel environments, the science and skills offered by QinetiQ is put to task to solve a wide range of real problems.

The winning edge

Whether you are a government looking to enhance your defence capabilities or a supplier working to win a complex defence project, we can help give you the edge across all fields - land, air and maritime

> Air

We bring years of experience, acknowledged world-class facilities and unmatched expertise to our work with systems, architectures and people.

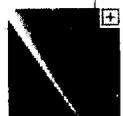

> Land

We have been specialising in integrated systems for many years - designing the systems and the software needed to deliver operational requirements on time, and on budget.

DCSA Catalogue

> We now offer services to MoD customers under the DCSA Catalogue.

> Maritime

With our experience and facilities, we're ideally placed to provide a comprehensive service for maritime development.

> Interoperability & Network Enabled Capability

We have the experience and facilities needed for all aspects of interoperability and network centric warfare.

Contact us

> If you wish to contact us click here for email, or telephone on:

> Weapons

Our experience and facilities match any situation - from airspace to close combat systems ...to upgrading established capabilities

> Test & Evaluation

As technology becomes more complex, test and evaluation is critical to reducing risk and improving reliability.

+44(0)8700 100 942

> Working with MOD

We help our Ministry of Defence customers achieve their goals, by providing technical solutions and services.

> DCSA Catalogue

Providing support services in various categories through the DCSA catalogue.

Today's international climate puts security high on the business agenda. While there's a growing awareness of the need to address the more obvious security issues, like protecting data and networks against cyber attack, there are still many other important areas where businesses may be at risk. Areas could involve anything from terrorism and site security to complex fraud.

What's needed is a broader, properly integrated approach - One where QinetiQ has unique capabilities.

Areas in Business Security

> Contingency Planning

At the foundation of all contingency planning and resilience building is a clear understanding of your organisation's physical, personnel and data dependencies.

Pioneering value from space

QinetiQ delivers advanced technology solutions and services to space institutions, industry and end users. Our research and development programmes cover the widest spectrum from an individual component on a satellite to the delivery of a complete space segment, or from the unique exploitation of space data to the modelling of the space environment.

> Overview

QinetiQ has a pedigree of space research, development and operations that goes back to the early 1960s. Today, we are a leading commercial space technology organisation in Europe.

> Space Missions & Systems

QinetiQ is playing a significant role in current space missions such as ESA Mars Express, leads collaborations such as the TopSat and STRV small satellite programmes.

> Space Services & Facilities

QinetiQ possesses thermal vacuum, vibration, solar cell, radiation and ion thruster test facilities, as well as a range of spacecraft design, analysis and consultancy services.

> Links

Links to organisations in the Space Industry

> Space Technology

QinetiQ space technologies include ion propulsion systems, data handling and communications units, antennas and instruments. R&D that draws upon other areas within QinetiQ includes extreme environment batteries, space robotics and laser applications.

> Geospatial Data Exploitation Services

QinetiQ provides the full range of geographical information services including consulting, ground segment infrastructure and end-user applications.

> History

QinetiQ Space Division has existed for over 40 years. In that time it has been involved in virtually all aspects of space, from the earliest UK involvements in launchers and satellites, to the most recent.

FORM PTO-1525 (5-90)				Commissioner for Trademarks 2900 Crystal Drive Arlington, VA 22202-3513 www.uspto.gov If no fees are enclosed, the address should include the words "Box Responses - No Fee" Please provide in all correspondence: 1. Filing Date, serial number, mark and Applicant's name. 2. Mailing date of this Office action. 3. Examining Attorney's name and Law Office number. 4. Your telephone number and ZIP code.	

A PROPER RESPONSE TO THIS OFFICE ACTION MUST BE RECEIVED WITHIN 6 MONTHS FROM THE DATE OF THIS ACTION IN ORDER TO AVOID ABANDONMENT. For your convenience and to ensure proper handling of your response, a label has been enclosed. Please attach it to the upper right corner of your response. If the label is not enclosed, print or type the Trademark Law Office No., Serial No., and Mark in the upper right corner of your response.

RE: Serial Number: 76/288427 QINETIQ

The assigned examining attorney has reviewed the referenced application and determined the following:

LIKELIHOOD OF CONFUSION - SECTION 2(d) REFUSAL

Registered Marks

The examining attorney refuses registration under Trademark Act Section 2(d), 15 U.S.C. Section 1052(d), because the applicant's mark, when used on or in connection with the identified goods, so resembles the mark in U.S. Registration Nos. 1281319, 1454926, 1703987, 2098744, and 2158214 as to be likely to cause confusion, to cause mistake, or to deceive. TMEP section 1207. See the enclosed registrations.

The examining attorney must analyze each case in two steps to determine whether there is a likelihood of confusion. First, the examining attorney must look at the marks themselves for similarities in appearance, sound, connotation and commercial impression. *In re E. I. DuPont de Nemours & Co.*, 476 F.2d 1357, 177 USPQ 563 (CCPA 1973). Second, the examining attorney must compare the goods or services to determine if they are related or if the activities surrounding their marketing are such that confusion as to origin is likely. *In re August Storck KG*, 218 USPQ 823 (TTAB 1983); *In re International Telephone and Telegraph Corp.*, 197 USPQ 910 (TTAB 1978); *Guardian Products Co., v. Scott Paper Co.*, 200 USPQ 738 (TTAB 1978).

The examining attorney must compare the marks for similarities in sound, appearance, meaning or connotation. *In re E. I. DuPont de Nemours & Co.*, 476 F.2d 1357, 177 USPQ 563 (CCPA 1973). Similarity in any one of these elements is sufficient to find a likelihood of confusion. *In re Mack*, 197 USPQ 755 (TTAB 1977).

In this case, the registered marks are KINETIC or the phonetic equivalent. The Applicant's mark is QINETIQ. All marks are the same phonetically and therefore will create similar commercial impressions.

Applicant's goods and services are, in part, ammunition and projectiles, computers, computer software, and quality control services. Registrant's goods and services are computer programs, an ammunition puller that will be used with ammunition, and quality assurance of systems that include the manufacturing of biotechnology. The applicant's goods and services, as filed, include many of the registrant's goods and services. As such, they are likely to travel through the same channels of trade to the class of purchasers. Therefore, with the contemporaneous use of both marks, consumers are likely to reach the mistaken conclusion that the goods of the parties originate from a common source.

Although the examining attorney has refused registration, the applicant may respond to the refusal to register by submitting evidence and arguments in support of registration.

Prior Pending Application

Please note that the examining attorney has found a potentially conflicting pending application. The examining attorney encloses information regarding pending Application Serial No. 76/165637. The filing date of the referenced application precedes the applicant's filing date. There may be a likelihood of confusion between the two marks under Trademark Act Section 2(d), 15 U.S.C. Section 1052(d). If the referenced application matures into a registration, the examining attorney may refuse registration in this case under Section 2(d). 37 C.F.R. Section 2.83; TMEP section 1208.01.

If the applicant believes that there is no potential conflict between this application and the earlier-filed application, the applicant may present arguments relevant to the issue in a response. The election to file or not to file such a request at this time in no way limits the applicant's right to address this issue at a later point.

If the applicant chooses to respond to the refusal to register noted above, the applicant must also respond to the following informality.

IDENTIFICATION

The identification of goods and services is unacceptable as indefinite. TMEP sections 804 and 1301.05. The wording "*computer installations*" is a service, not a good. The function of the software and programs must be given. The term "computer database" is not recognized as a good. The types of discs and tapes must be given, i.e. blank. The phrase "*electronically, optically or magnetically recorded data all for use with computers*" sounds like a program or software. The type of scientific components and equipment must be given. The term "*simulation and operational modeling*" sounds like a service and not a good.

The applicant may adopt the following identification, if accurate:

International Class 9

~~Computers, computer terminals; interfaces for computers; computer software [specify the function of the programs, e.g., for use in database management, for use as a spreadsheet, for word processing, etc. and, if software is content- or field-specific, the field of use]; blank discs and tapes~~ all for the recording and storage of data; scientific components and equipment, namely [then name the equipment, e.g. microscopes] scientific and engineering apparatus and instruments; [give the common commercial name of the apparatus and equipment] instruments for the analysis and testing of materials, namely [then name the instruments, e.g. probes, and the types of materials tested] engineering and scientific components and equipment, namely [then state the types of components and equipment] chemical and biochemical detectors and sensors, namely [describe the type of chemical, e.g. oxygen, carbon dioxide, etc.]; scientific and electrical apparatus all for recording, transmission or reproduction of images, namely [then name the apparatus, e.g. video camera] signaling and communication apparatus and instruments, namely [then name the signaling and communication apparatus, e.g. telephones, radio pagers, etc.]; electronic, electromechanical and electro optical devices, namely [then name the devices, e.g. televisions]; parts and fittings for all of the aforesaid goods

International Class 13

Firearms; ammunition and projectile weapons; explosives; fireworks

International Class 36

leasing of land and scientific and engineering facilities

International Class 41

Training services, namely providing training courses, seminars, conferences and exhibitions in the field of [indicate field or subject matter]

International Class 42

Engineering; scientific research, technical consultation in the field of [indicate specific field, e.g. aerospace engineering, geology]; development of new technology for others in the field of [indicate field, e.g., genomics, biotechnology]; design and testing for new product development; leasing of scientific and engineering equipment; quality control services for others; Computer project management services; Consulting services in the field of design, selection, implementation and use of computer hardware and software systems for others

For additional guidance, the applicant may wish to consult the online versions of Acceptable Identification of Goods and Services at <http://www.uspto.gov/web/offices/tac/doc/gsmannual/> and the TMEP at <http://www.uspto.gov/web/offices/tac/tmep/>.

Please note that, while an application may be amended to clarify or limit the identification, additions to the identification are not permitted. 37 C.F.R. Section 2.71(a); TMEP section 804.09. Therefore, the applicant may not amend to include any goods or services that are not within the scope of the goods or services recited in the present identification.

REQUIREMENTS FOR MULTIPLE CLASS APPLICATION

If the applicant adds classes to this application, the applicant must comply with each of the following.

- (1) The applicant must list the goods and services by international class with the classes listed in ascending numerical order. TMEP section 1113.01.
- (2) The applicant must submit a filing fee for each international class of \$325 not covered by the fee already paid. 37 C.F.R. Sections 2.6(a)(1) and 2.86(b); TMEP sections 810.01 and 1113.01. Effective January 10, 2000, the fee for filing a trademark application is \$325 for each class. This applies to classes added to pending applications as well as to new applications filed on or after that date.

BASIS

The applicant has claimed priority under Section 44(d), 15 U.S.C. Section 1126(d), as the basis for filing. When an application is filed pursuant to Section 44(d), this Office presumes, unless otherwise indicated, that the applicant intends to rely upon the resulting foreign registration as a basis for registration in the U.S. TMEP sections 1005 and 1006.01. Under such circumstances, the application may not be approved for publication until a certification or certified copy of the foreign registration and, if appropriate, an English translation have been filed. It is customary for the translator to sign the translation.

QUESTIONS AND ASSISTANCE

If the applicant has any questions or needs assistance in responding to this Office Action, please telephone the assigned examining attorney.

OFFICE ACTION

TO AVOID ABANDONMENT, WE MUST RECEIVE A PROPER RESPONSE TO THIS OFFICE ACTION WITHIN 6 MONTHS OF OUR MAILING OR E-MAILING DATE.

RE: Serial Number 76/288427

On December 16, 2003, this application was suspended pending registration of application serial number 76165637. That application has been abandoned. Thus the remaining issues are now addressed.

In prior office actions, registration was refused under Trademark Act Section 2(d), 15 U.S.C. §1052(d), because the mark for which registration is sought so resembles the marks shown in U.S. Registration Nos. 1281319, 1454926, 1703987, 2098744, and 2158214 as to be likely, when used in connection with the identified goods/services, to cause confusion, or to cause mistake, or to deceive. Registration No. 1703987 was cancelled under Section 8 of the TMEP. Thus refusal with regards to this application is hereby withdrawn. Refusal regarding Reg.No. 2158214 is hereby withdrawn.

The examining attorney has considered the applicant's arguments with respect to Registration Nos. 1281319, 1454926 and 2098744 carefully but has found them unpersuasive. For the reasons below, the refusal under Section 2(d) is maintained and made FINAL.

Registration Refused: Likelihood of Confusion – Final Action

Registration of the proposed mark was refused because of a likelihood of confusion with the marks in U.S. Registration Nos. 1281319, 1454926 and 2098744. Trademark Act Section 2(d), 15 U.S.C. §1052(d); TMEP §§1207.01 *et seq.* See the previously enclosed registrations.

A likelihood of confusion determination requires a two-part analysis. First the marks are compared for similarities in appearance, sound, connotation and commercial impression. *In re E. I. DuPont de Nemours & Co.*, 476 F.2d 1357, 177 USPQ 563 (C.C.P.A. 1973). Second, the goods or services are compared to determine whether they are similar or related or whether the activities surrounding their marketing are such that confusion as to origin is likely. *In re August Storck KG*, 218 USPQ 823 (TTAB 1983); *In re Int'l Tel. and Tel. Corp.*, 197 USPQ 910 (TTAB 1978); *Guardian Prods. Co., v. Scott Paper Co.*, 200 USPQ 738 (TTAB 1978); TMEP §§1207.01 *et seq.*

Registration No. 1281319

The applicant has applied to register the mark QINETIC for “interfaces for computers; computer software for use in database management, creating computer simulations, educational or training purposes, telecommunications management and security, and in non-destructive testing and evaluation of materials; scientific and engineering equipment, namely, radar, radar detectors, radar reflectors, scanners working at optical radar and millimetric wave frequency, integrated circuits and substrates therefore, data processors, satellite processors, signal processors, satellite ground stations; satellite navigational systems, namely, satellite tracking and global positioning systems; mine detectors, detectors operating by processing of radar, sonar or video signals; satellites for scientific purposes, equipment for growing crystals; instruments for the analysis and testing of materials, namely, scanners; chemical and biochemical detectors and sensors for monitoring metal ion concentrations in water; scientific and electrical apparatus all for recording, transmission or reproduction of images, namely, digital cameras, photographic cameras and video cameras,” “firearms, ammunition and projectiles for projectile weapons; explosives; fireworks,” “engineering, scientific research, technical development, consultation and project management in the fields of aerospace, defence, electronics, finance, healthcare, offshore and marine, public sector, security, space, transport, service solutions, human performance, information technology, business services, technology testing, technology transfer and whole life management; design and testing for new product development; quality control services for others; computer project management services; consulting services in the field of design, selection, implementation and use of computer hardware and software systems; maintenance of computer software; provision and maintenance of computer installations and infrastructure for others,” “leasing of land and of scientific and engineering test equipment and facilities,” and “training services, namely, providing training courses, seminars, conferences and exhibitions in the fields of aerospace, defence, electronics, finance, healthcare, offshore and marine, public sector, security, space, transport, service solutions, human performance, information technology, business services, technology testing, technology transfer and whole life management.”

The registrant's mark is KINETIC for ammunition reloading tool, namely, a bullet puller. The marks are phonetic equivalents. Similarity in sound alone is sufficient to find a likelihood of confusion. *Molenaar, Inc. v. Happy Toys Inc.*, 188 USPQ 469 (TTAB 1975); *In re Cresco Mfg. Co.*, 138 USPQ 401 (TTAB 1963). The applicant argues that the marks are spelled differently and have different meanings – in particular as the applicant claims the proposed mark has a coined meaning. See page 5 of Response. The test of likelihood of confusion is not whether the marks can be distinguished when subjected to a side-by-side comparison. The issue is whether the marks

create the same overall impression. *Visual Information Institute, Inc. v. Vicon Industries Inc.*, 209 USPQ 179 (TTAB 1980). The focus is on the recollection of the average purchaser who normally retains a general rather than specific impression of trademarks. *Chemetron Corp. v. Morris Coupling & Clamp Co.*, 203 USPQ 537 (TTAB 1979); *Sealed Air Corp. v. Scott Paper Co.*, 190 USPQ 106 (TTAB 1975); TMEP §1207.01(b).

If the goods or services of the respective parties are closely related, the degree of similarity between marks required to support a finding of likelihood of confusion is not as great as would apply with diverse goods or services. *ECI Division of E Systems, Inc. v. Environmental Communications Inc.*, 207 USPQ 443 (TTAB 1980). Here, the goods are closely related because both parties sell ammunition, which could include the registrant's more specific goods. While the registrant's goods may be classified differently, the goods are clearly in the same channels of trade, contrary to the applicant's suggestion otherwise. See Response p. 5. It is well settled that the issue of likelihood of confusion between marks must be determined on the basis of the goods or services as they are identified in the application and the registration. *Canadian Imperial Bank of Commerce v. Wells Fargo Bank*, 811 F.2d 1490, 1 USPQ2d 1813 (Fed. Cir. 1987); *Paula Payne Products Co. v. Johnson Publishing Co.*, 473 F.2d 901, 177 USPQ 76 (CCPA 1973). Since the identification of the applicant's goods and services is very broad, it is presumed that the application encompasses all goods and services of the type described, including those in the registrant's more specific identification, that they move in all normal channels of trade and that they are available for all potential customers.

Registration No. 1454926

The registrant's mark is for the typed word KINETIC. The marks are phonetic equivalents. Similarity in sound alone is sufficient to find a likelihood of confusion. *Molenaar, Inc. v. Happy Toys Inc.*, 188 USPQ 469 (TTAB 1975); *In re Cresco Mfg. Co.*, 138 USPQ 401 (TTAB 1963).

The goods/services of the parties need not be identical or directly competitive to find a likelihood of confusion. They need only be related in some manner, or the conditions surrounding their marketing be such, that they could be encountered by the same purchasers under circumstances that could give rise to the mistaken belief that the goods/services come from a common source. *In re Martin's Famous Pastry Shoppe, Inc.*, 748 F.2d 1565, 223 USPQ 1289 (Fed. Cir. 1984); *In re Corning Glass Works*, 229 USPQ 65 (TTAB 1985); *In re Rexel Inc.*, 223 USPQ 830 (TTAB 1984); *Guardian Products Co., Inc. v. Scott Paper Co.*, 200 USPQ 738 (TTAB 1978); *In re International Telephone & Telegraph Corp.*, 197 USPQ 910 (TTAB 1978).

The applicant argues that the goods do not include computers themselves but rather computer software, distinguishing the goods. See Response p. 6. The examining attorney respectfully disagrees. The Trademark Trial and Appeal Board has held that computer hardware products are so related to computer software products that their marketing under the same or similar marks may be likely to cause source confusion under Trademark Act Section 2(d), 15 U.S.C. §1052(d). *In re Emulex Corporation*, 6 USPQ2d 1312 (TTAB 1987) (JAVELIN for computer peripheral software storage unit held likely to be confused with JAVELIN for "prerecorded computer programs in machine readable form"); *In re ITE/Communications, Inc.*, 5 USPQ2d 1457 (TTAB 1987) (likelihood of confusion found for DATA STAR used in connection with both registrant's "computer programs recorded on magnetic media" and applicant's "voice/data communications terminals and parts thereof"); *In re Digital Research Inc.*, 4 USPQ2d 1242 (TTAB 1987) (likelihood of confusion found in connection with CONCURRENT PC-DOS and CONCURRENT

TECHNOLOGIES CORPORATION for "printed electronic circuit boards"); *In re Epic Systems Corp.*, 228 USPQ 213 (TTAB 1985) (likelihood of confusion between EPIC for computer software for use in health care facilities and EPIC DATA for "electronic data collection terminals and electronic data collection units"); *In re Graphics Technology Corp.*, 222 USPQ 179 (TTAB 1984) (AGILE for computer programs held likely to be confused with AGILE for computer data terminals); *In re Compagnie Internationale Pour L'Informatique-Cii Honeywell Bull*, 223 USPQ 363 (TTAB 1984) (QUESTAR for computer hardware held likely to be confused with QUESTAN for computer programs); *In re Teradata Corp.*, 223 USPQ 361, 362 (TTAB 1984) (Y NET for computer hardware found likely to be confused with XYNET for computer software when channels of trade are unlimited by identification of goods in both application and registration); *Alpha Industries, Inc. v. Alpha Microsystems*, 220 USPQ 67 (TTAB 1983) (ALPHA MICRO for digital computer equipment and programs held likely to be confused with ALPHA MICROWAVE for microwave components and sub assemblies); *See Octocom Systems Inc. v. Houston Computer Services, Inc.*, 918 F.2d 937, 16 USPQ2d 1783 (Fed. Cir. 1990) (affirming TTAB decision on summary judgment that found computer modems and computer programs highly related); *Cf. In re Quadram Corp.*, 228 USPQ 863, 865 (TTAB 1985) (there is no "per se" rule for determining likelihood of confusion of marks in connection with software and hardware).

Registration No. 2098744

The registrant's mark is for the typed word KINETIX. The marks are phonetic equivalents in that the registered mark is the plural form of the phonetic equivalent of the proposed mark. The overall commercial impression is the same. Similarity in sound alone is sufficient to find a likelihood of confusion. *Molenaar, Inc. v. Happy Toys Inc.*, 188 USPQ 469 (TTAB 1975); *In re Cresco Mfg. Co.*, 138 USPQ 401 (TTAB 1963).

If the goods or services of the respective parties are closely related, the degree of similarity between marks required to support a finding of likelihood of confusion is not as great as would apply with diverse goods or services. *ECI Division of E Systems, Inc. v. Environmental Communications Inc.*, 207 USPQ 443 (TTAB 1980). Here, the goods are closely related because both parties sell computer software. The applicant's goods are more broadly defined as to function and field making it possible for the goods to encompass the registrant's more specifically defined goods. The applicant argues that the Class 9 goods differ in function and type and that any relation between the registrant's class 9 goods and the applicant's class 9 goods and 36 services are entirely different based on the descriptions. The examining attorney respectfully disagrees. Any goods or services in the registrant's normal fields of expansion must also be considered in order to determine whether the registrant's goods or services are related to the applicant's identified goods or services for purposes of analysis under Section 2(d). *In re General Motors Corp.*, 196 USPQ 574 (TTAB 1977). The test is whether purchasers would believe the product or service is within the registrant's logical zone of expansion. *CPG Prods. Corp. v. Perceptual Play, Inc.*, 221 USPQ 88 (TTAB 1983); TMEP §1207.01(a)(v).

It is well settled that the issue of likelihood of confusion between marks must be determined on the basis of the goods or services as they are identified in the application and the registration. *Canadian Imperial Bank of Commerce v. Wells Fargo Bank*, 811 F.2d 1490, 1 USPQ2d 1813 (Fed. Cir. 1987); *Paula Payne Products Co. v. Johnson Publishing Co.*, 473 F.2d 901, 177 USPQ 76 (CCPA 1973). Since the identification of the applicant's goods and services is very broad, it is presumed that the application encompasses all goods and services of the type described, including those in the registrant's more specific identification, that they move in all normal channels of trade

and that they are available for all potential customers. The Trademark Trial and Appeal Board has held that computer hardware products are so related to computer software products that their marketing under the same or similar marks may be likely to cause source confusion under Trademark Act Section 2(d), 15 U.S.C. §1052(d). *In re Emulex Corporation*, 6 USPQ2d 1312 (TTAB 1987) (JAVELIN for computer peripheral software storage unit held likely to be confused with JAVELIN for "prerecorded computer programs in machine readable form"); *In re ITE/Communications, Inc.*, 5 USPQ2d 1457 (TTAB 1987) (likelihood of confusion found for DATA STAR used in connection with both registrant's "computer programs recorded on magnetic media" and applicant's "voice/data communications terminals and parts thereof"); *In re Digital Research Inc.*, 4 USPQ2d 1242 (TTAB 1987) (likelihood of confusion found in connection with CONCURRENT PC-DOS and CONCURRENT TECHNOLOGIES CORPORATION for "printed electronic circuit boards"); *In re Epic Systems Corp.*, 228 USPQ 213 (TTAB 1985) (likelihood of confusion between EPIC for computer software for use in health care facilities and EPIC DATA for "electronic data collection terminals and electronic data collection units"); *In re Graphics Technology Corp.*, 222 USPQ 179 (TTAB 1984) (AGILE for computer programs held likely to be confused with AGILE for computer data terminals); *In re Compagnie Internationale Pour L'Informatique-Cii Honeywell Bull*, 223 USPQ 363 (TTAB 1984) (QUESTAR for computer hardware held likely to be confused with QUESTAN for computer programs); *In re Teradata Corp.*, 223 USPQ 361, 362 (TTAB 1984) (Y NET for computer hardware found likely to be confused with XYNET for computer software when channels of trade are unlimited by identification of goods in both application and registration); *Alpha Industries, Inc. v. Alpha Microsystems*, 220 USPQ 67 (TTAB 1983) (ALPHA MICRO for digital computer equipment and programs held likely to be confused with ALPHA MICROWAVE for microwave components and sub assemblies); *See Octocom Systems Inc. v. Houston Computer Services, Inc.*, 918 F.2d 937, 16 USPQ2d 1783 (Fed. Cir. 1990) (affirming TTAB decision on summary judgment that found computer modems and computer programs highly related); *Cf. In re Quadram Corp.*, 228 USPQ 863, 865 (TTAB 1985) (there is no "per se" rule for determining likelihood of confusion of marks in connection with software and hardware).

The same consumers will be exposed to goods identified with the registered marks and the applicant's mark. The similarities among the marks and the goods of the parties are so great as to create a likelihood of confusion. The examining attorney must resolve any doubt as to the issue of likelihood of confusion in favor of the registrant and against the applicant who has a legal duty to select a mark which is totally dissimilar to trademarks already being used. *Burroughs Wellcome Co. v. Warner-Lambert Co.*, 203 USPQ 191 (TTAB 1979).

This requirement is maintained and made FINAL.

Classification and Identification of Goods/Services Require Amendment – Final Requirement

The identification of goods/services is unacceptable as indefinite because the wording does not adequately specify the nature of the goods/services. The amendment to Class 13 is the only acceptable class and wording. Additionally, if the applicant accepts the suggested wording below, the applicant must also amend the classification as indicated. The applicant may adopt the following identification, if accurate:

INTERFACES FOR COMPUTERS; COMPUTER SOFTWARE FOR USE IN DATABASE MANAGEMENT, CREATING COMPUTER SIMULATIONS, FOR [APPLICANT MUST SPECIFY A FUNCTION OF THE SOFTWARE WITH REGARDS TO THE FOLLOWING

FIELDS] FOR EDUCATIONAL OR TRAINING PURPOSES, TELECOMMUNICATIONS MANAGEMENT AND SECURITY, AND IN NON-DESTRUCTIVE TESTING AND EVALUATION OF MATERIALS; SCIENTIFIC AND ENGINEERING EQUIPMENT, NAMELY, RADAR, RADAR DETECTORS, RADAR REFLECTORS, SCANNERS WORKING AT OPTICAL RADAR AND MILLEMETRIC WAVE FREQUENCY, INTEGRATED CIRCUITS AND SUBSTRATES THEREFORE, DATA PROCESSORS, SATELLITE PROCESSORS, SIGNAL PROCESSORS, SATELLITE GROUND STATIONS; SATELLITE NAVIGATIONAL SYSTEMS, NAMELY, SATELLITE TRACKING AND GLOBAL POSITIONING SYSTEMS; MINE DETECTORS, DETECTORS OPERATING BY PROCESSING OF RADAR, SONAR OR VIDEO SIGNALS; SATELLITES FOR SCIENTIFIC PURPOSES, ~~EQUIPMENT FOR GROWING CRYSTALS~~; INSTRUMENTS FOR THE ANALYSIS AND TESTING OF MATERIALS, NAMELY, SCANNERS; CHEMICAL AND BIOCHEMICAL DETECTORS AND SENSORS FOR MONITORING METAL ION CONCENTRATIONS IN WATER; SCIENTIFIC AND ELECTRICAL APPARATUS ALL FOR RECORDING, TRANSMISSION OR REPRODUCTION OF IMAGES, NAMELY, DIGITAL CAMERAS, PHOTOGRAPHIC CAMERAS AND VIDEO CAMERAS in Class 9;

Class 36

LEASING OF LAND, **NAMELY, [APPLICANT MUST SPECIFY TYPE OF LAND, E.G. FARM, REAL ESTATE, REAL PROPERTY, APARTMENTS]**

Class 41

TRAINING SERVICES, NAMELY, PROVIDING TRAINING COURSES, SEMINARS, CONFERENCES AND EXHIBITIONS IN THE FIELDS OF AEROSPACE, DEFENCE, ELECTRONICS, FINANCE, HEALTHCARE, **OFFSHORE and MARINE, PUBLIC SECTOR, SECURITY, SPACE, TRANSPORT, SERVICE SOLUTIONS, HUMAN PERFORMANCE, INFORMATION TECHNOLOGY, BUSINESS SERVICES, TECHNOLOGY TESTING, TECHNOLOGY TRANSFER AND WHOLE LIFE MANAGEMENT, NAMELY, [THE APPLICANT MUST SPECIFY/FURTHER EXPLAIN THE NATURE OF TRAINING AND THE FIELDS/SUBJECT MATTERS MORE CLEARLY];**

Class 42

ENGINEERING, SCIENTIFIC RESEARCH, TECHNICAL DEVELOPMENT, CONSULTATION AND **PROJECT MANAGEMENT, NAMELY, [THE APPLICANT MUST FURTHER SPECIFY WHAT IS MEANT BY PROJECT MANAGEMENT]** IN THE FIELDS OF AEROSPACE, DEFENCE, ELECTRONICS, FINANCE, HEALTHCARE, **OFFSHORE and MARINE, PUBLIC SECTOR, SECURITY, SPACE, TRANSPORT, SERVICE SOLUTIONS, HUMAN PERFORMANCE, INFORMATION TECHNOLOGY, NAMELY, [THE APPLICANT MUST SPECIFY THE NATURE OF THE SERVICES MORE CLEARLY WITH REGARDS TO THESE FIELDS]** ~~BUSINESS SERVICES,~~ **TECHNOLOGY TESTING, TECHNOLOGY TRANSFER AND WHOLE LIFE MANAGEMENT, NAMELY, [THE APPLICANT MUST SPECIFY THE NATURE OF THIS SERVICE/FIELD]**; DESIGN AND TESTING FOR NEW PRODUCT DEVELOPMENT;

QUALITY CONTROL SERVICES FOR OTHERS; COMPUTER PROJECT MANAGEMENT SERVICES; CONSULTING SERVICES IN THE FIELD OF DESIGN, SELECTION, IMPLEMENTATION AND USE OF COMPUTER HARDWARE AND SOFTWARE SYSTEMS, **NAMELY, [THE APPLICANT MUST SPECIFY WHAT IS MEANT BY “IMPLEMENTATION AND USE OF; MAINTENANCE OF COMPUTER SOFTWARE; LEASING OF SCIENTIFIC AND ENGINEERING TEST EQUIPMENT AND FACILITIES, NAMELY, [THE APPLICANT MUST SPECIFY THE NATURE OF THE FACILITIES, E. G. RESEARCH LABORATORIES, COMPUTER FACILITIES] BELONGS IN CLASS 42;**

THE APPLICANT MUST SPECIFY WHAT IS MEANT BY “PROVISION AND MAINTENANCE OF COMPUTER INSTALLATIONS AND INFRASTRUCTURE FOR OTHERS.”

--INSTALLATION AND REPAIR OF COMPUTERS BELONGS IN CLASS 37;

--WHAT IS MEANT BY INFRASTRUCTURE?

NOTE: CONSULTATION IN BUSINESS SERVICES BELONGS IN CLASS 35; IF THE APPLICANT IS PROVIDING SCIENTIFIC RESEARCH OR TECHNICAL DEVELOPMENT CONSULTATION TO BUSINESS SERVICES, THE APPLICANT MAY SO AMEND AND THE IDENTIFICATION WILL BELONG IN CLASS 42.

The applicant may wish to consult the on-line identification manual on the USPTO homepage for a searchable database of acceptable identifications for goods and services. The manual is available at www.uspto.gov/web/offices/tac/doc/gsmmanual.

Please note that, while an application may be amended to clarify or limit the identification, additions to the identification are not permitted. 37 C.F.R. Section 2.71(b); TMEP section 1402.06. Therefore, the applicant may not amend to include any goods/services that are not within the scope of goods set forth in the present identification.

Multiple Class Application Requirements – Intent to Use Application

Applicant must clarify the number of classes for which registration is sought. The submitted filing fees are insufficient to cover all the classes in the application. Specifically, the application identifies goods and/or services that are classified in at least SIX international classes, however applicant paid the fee for only FIVE class(es).

Applicant must either: (1) restrict the application to the number of class(es) covered by the fee already paid, or (2) pay the required fee for each additional class(es). 37 C.F.R. §2.86(a)(2); TMEP §§810.01, 1401.04, 1401.04(b) and 1403.01.

If applicant prosecutes this application as a combined, or multiple-class application, then applicant must comply with each of the following for those goods and/or services based on <an intent to use the mark in commerce under Trademark Act Section 1(b)/a foreign registration under Trademark Act Section 44(e)/an intent to use the mark under Trademark Act Section 1(b) and/or a foreign registration under Trademark Act Section 44(e)>:

- (1) (1) Applicant must list the goods and/or services by international class with the classes listed in ascending numerical order. TMEP § 1403.01; and
- (2) (2) Applicant must submit a filing fee for each international class of goods and/or services not covered by the fee already paid. 37 C.F.R. §2.86(a)(2); TMEP §§810.01 and 1403.01.

If applicant fails to respond to this final action within six months of the mailing date, the application will be abandoned. 15 U.S.C. §1062(b); 37 C.F.R. §2.65(a). Applicant may respond to this final action by:

- (1) submitting a response that fully satisfies all outstanding requirements, if feasible (37 C.F.R. §2.64(a)); and/or
- (2) filing an appeal to the Trademark Trial and Appeal Board, with an appeal fee of \$100 per class (37 C.F.R. §§2.6(a)(18) and 2.64(a); TMEP §§715.01 and 1501 *et seq.*; TBMP Chapter 1200).

In certain circumstances, a petition to the Director may be filed to review a final action that is limited to procedural issues, pursuant to 37 C.F.R. §2.63(b)(2). 37 C.F.R. §2.64(a). *See* 37 C.F.R. §2.146(b), TMEP §1704, and TBMP Chapter 1201.05 for an explanation of petitionable matter. The petition fee is \$100. 37 C.F.R. §2.6(a)(15).

UNITED STATES

DECLARATION UNDER SECTION 8 AND 15
(PROOF OF USE FOR 5 CONSECUTIVE YEARS)

Mark	KINETIC
No.	1,454,926
Class(es)	9

Handwritten signature and the number 7.

Charles Beyda
(Name of Person authorized to sign for Registrant or name of Individual Registrant)

states that Kinetic Marketing Inc.
(Name of Registrant)

owns the above identified registration, issued on September 1, 1987
(Date of Registration)

as shown by records in the Patent and Trademark Office; that the mark shown therein has been in continuous use in interstate commerce for five consecutive years from the date of the registration to the present on each of the following goods (services) recited in the registration:

CLASS 9: COMPUTERS, RADIOS, Pedometers

that said mark is still in use as evidenced by the specimen (or facsimile) included, showing the mark as currently used, that there has been no final decision adverse to registrant's claim of ownership of said mark for such goods or services, or to registrant's right to register the same or to keep the same on register, and that there is no proceeding involving any of said rights pending and not disposed of either in the Patent and Trademark Office or in the Courts.

RESPONSE SUBMITTED ON BEHALF OF TRADEMARK APPLICATION
OF KINETIC MARKETING INC.

Mark: "Kinetic"
Serial No.: 73/565607
Applicant: Kinetic Marketing Inc.
1133 Broadway
New York, New York 10010
Attorneys for Applicant:
Goldstein, Lieberman & Peltz
132 Nassau Street
New York, New York 10038
212-267-8957

2/11

A. Resemblance to other marks.

1) Trademark No. 1,313,207, which includes umbrellas, is owned by Kinetic Marketing, Inc., 1133 Broadway, New York, New York 10010 which is in fact the present applicant. As such, registration of "Kinetic" for handbags and luggage cannot be refused on this basis.

2) Trademark No. 1,127,553 refers to men's and women's sportswear and should not be the basis of refusal of a mark to Kinetic Marketing Inc. for luggage and handbags. It is submitted that sportswear is not "in the same channels of trade" as handbags and luggage. Annexed hereto are excerpt from the Manhattan Yellow Pages under the headings of "Luggage-Retail" and "Handbags-Retail". It can be noted that the sale of luggage is generally conducted by specialty stores ("A to Z Luggage", "Lexington Luggage Ltd.", "Herman's Luggage") without any indication as to the sale of sportswear. Similarly, handbags are sold by specialty shops ("La Bagagerie", "Donny Handbags, Inc." and "Robins Bags, Inc.") without any mention of sportswear.

3) Trademarks No. 1,087,398 and 1,181,304 refer to racket frames and golf shafts which are only elements of certain sports items (tennis rackets, golf clubs). The specific piece of sports equipment for which Kinetic seeks a trademark is a "Personal Pedometer" (see application). This is a complete unit used to measure distance traveled. This item is completely distinguishable from tennis rackets or golf clubs and granting of a mark to "Kinetic" under this category would not cause confusion in the marketplace. (Alternatively, the applicant requests that this item be considered under Class 9 as a measuring instrument)

B. IDENTIFICATION OF GOODS

Class 9
Class 9--Computers, computer programs, radios and pedometers

Class 16--Typewriters

Class 18--Handbags and Luggage

~~Class 25--Footwear~~

~~Class 28--Pedometer~~

Note: Pedometer has been listed in Class 9 as an alternate to Class 28.

N/A The dates of use contained on Kinetic's application dated October 2, 1985 apply to each class.

C. GOODS SOLD BY THE APPLICANT

The Pedometer cited above is a small electronic device worn by an individual to measure the distance he has walked. An illustration of the item and its instruction manual were annexed to the application. The Computer is an electronic device that accepts and processes data and employs a keyboard for typing onto the screen and a printer. Computer programs are sets of instructions or information on disks utilized by the computer. An illustration of the Kinetic computer was annexed to the application. The nature and function of typewriters, radios, handbags, luggage and footwear are exactly as their common definitions would indicate.

Respectfully submitted,
GOLDSTEIN, LIEBERMAN AND PELTZ
