RE: Application Serial No. 76/054632
Pub Date: June 29, 2004
Mark: B

The request for reconsideration of the extension of time to oppose and request for additional extension of time to oppose filed August 16, 2004 on behalf of BioWare Corp. is noted.

On July 22, 2004, BioWare Corp. filed an extension of time to oppose with a caption which mis-identified the subject application as application serial no. 76054532. The serial number of the application which BioWare Corp. intended to oppose was serial no. 76054632. After making an attempt to obtain the application serial no. that matched the mark; the Board in its letter of August 5, 2004 denied the request for extension of time.

Since a notice of allowance has not been issued for the correct application serial no. **76054632**. The Board will allow the request for extension of time to oppose filed on July 22, 2004 by potential opposer to be granted until **08/28/2004** (30 day period). Potential opposer has requested a further request for extension of time in the request for reconsideration filed on August 16, 2004. This is also granted until **10/27/2004** (120 day period).

See Patent and Trademark Office Rule 1.5(c) ("A letter about a trademark application should identify the serial number, the name of the applicant, and the mark."); and *Quality S.*

Manufacturing, Inc. v. Tork Lift Central Welding of Kent, Inc., 2000 Commr. Pat. LEXIS 66 (April 19, 2000) (issuance of registration held not to be inadvertent where would-be opposer mis-identified the serial number associated with application).¹
