REQUEST FOR AMENDMENT OF APPLICATION

Pursuant to Trademark Board Manual of Procedure 212.01 and Trademark Manual of Examining Procedure 1505.01 (a) and 1505.02(c), applicant Searchspace Limited respectfully requests that its application for registration of SENTINEL, Serial No. 76/145,024, be amended by limiting the identification of goods. The identification of goods in the application as published is as follows.

Computer software for use in the field of business management to survey electronic transactions and detect, report, and automate the business response to pre-defined unusual activities, and printed materials sold as a unit therewith, in International Class 9.

Applicant respectfully requests that the foregoing identification be limited by addition of the language printed in bold below.

Computer software for use in the field of business management to survey electronic transactions and detect, report, and automate the business response to pre-defined unusual activities, **namely, money laundering, check fraud, debit card fraud, ATM fraud, electronic fund transfer fraud, wire payment fraud, and sudden cash influxes**, and printed materials sold as a unit therewith, in International Class 9.

Since the amendment requested herein is clearly a limitation of the existing identification, applicant respectfully submits that the amendment should be accepted without re-publication.

The amendment requested herein is pursuant to an agreement between applicant and potential opposer Rainbow Technologies, Inc., which has made an opposition by Rainbow unnecessary. Applicant therefore respectfully submits that acceptance of the amendment is in the best interests of the Board and the Office as well as the parties.

Respectfully submitted,

Date: April 6, 2004
