**GENERAL TRADEMARK INFORMATION:**  
<http://www.uspto.gov/main/trademarks.htm>

**APPLICANT:** True Value Company

**CORRESPONDENT'S REFERENCE/DOCKET NO:**

**CORRESPONDENT E-MAIL ADDRESS:**

**REQUEST FOR RECONSIDERATION DENIED**

**ISSUE/MAILING DATE:**

Applicant is requesting reconsideration of a final refusal issued/mailed April 24, 2009

After careful consideration of the law and facts of the case, the examining attorney must deny the request for reconsideration and adhere to the final action as written since no new facts or reasons have been presented that are significant and compelling with regard to the point at issue.

Applicant's mark is STERLING FASTENERS for "metal fasteners for general hardware use, namely, nails, bolts, screws, anchors, nuts, washers, staples, tin tabs" and registrant's mark is STERLING HARDWARE (stylized) with an oval design for "various items of builders hardware-namely, door hangers, door tracks, door stops, door latches, door pulls, door guides" essentially convey the same commercial impression. Thus the question of registrability of the mark turns on the relationship between the goods, namely fasteners and door hardware. Applicant traverses the evidence provided by the Office as insufficient. Please find attached 16 Internet stories showing how these goods are sold. The Internet attachments show cost, merchandising and relationship between fasteners and door hardware. The goods tend to be complementary and occasionally directly competitive. Most door hardware require fasteners and though the trade does show a slight differentiation on how some of these goods move in the trade the relationship is close to warrant the refusal. Both items can be found at a relatively inexpensive price but door hardware tends to be more aesthetic. However, the goods move side-by side in that one cannot buy hardware without fasteners and internet providers list both types of merchandise in the same page. Contractors and do-it-yourself types would have a hard differentiating the source for these types of products.

The risk of likelihood of confusion is increased for inexpensive products that are purchased on impulse. Therefore, in a likelihood of confusion determination, purchasers of such products are held to a lesser standard of purchasing care. *Recot, Inc. v. M.C. Becton*, 214 F.3d 1322, 1329, 54 USPQ2d 1894, 1899 (Fed. Cir. 2000); *Specialty Brands, Inc. v. Coffee Bean Distribs., Inc.*, 748 F.2d 669, 672, 223 USPQ

1281, 1282 (Fed. Cir. 1984).

Applicant has made reference to third-party registrations for the term STERLING. Third-party registrations for seemingly similar marks featuring goods dissimilar or unrelated to those in the application and the cited registration are of little probative value in determining the weakness of a mark or portions of a mark. Weakness or dilution is generally determined in the context of the number and nature of similar marks in use in the marketplace on similar goods. See *Nat'l Cable Television Ass'n, Inc. v. Am. Cinema Editors, Inc.*, 937 F.2d 1572, 1579-80, 19 USPQ2d 1424, 1430 (Fed. Cir. 1991); *In re E. I. du Pont de Nemours & Co.*, 476 F.2d 1357, 1361, 177 USPQ 563, 567 (C.C.P.A. 1973). Moreover, the existence on the register of other seemingly similar marks does not provide a basis for registrability for the applied-for mark. *AMF Inc. v. Am. Leisure Prods., Inc.*, 474 F.2d 1403, 1406, 177 USPQ 268, 269 (C.C.P.A. 1973); *In re Total Quality Group, Inc.*, 51 USPQ2d 1474, 1477 (TTAB 1999).

Accordingly, applicant's request for reconsideration is *denied*. The time for appeal runs from the date the final action was issued/mailed. 37 C.F.R. Section 2.64(b); TMEP Section 715.03(c). If applicant has already filed a timely notice of appeal, the application will be forwarded to the Trademark Trial and Appeal Board (TTAB).

**STATUS CHECK:** Check the status of the application at least once every six months from the initial filing date using the USPTO Trademark Applications and Registrations Retrieval (TARR) online system at <http://tarr.uspto.gov>. When conducting an online status check, print and maintain a copy of the complete TARR screen. If the status of your application has not changed for more than six months, please contact the assigned examining attorney.

reputation as the industrial fastener and component experts.

## Custom Engineered Fasteners and Components

At GLF Technical, our staff has helped companies throughout North America solve problems related to their fastener's design. We work across all industries, processes and materials providing specialty fasteners, aerospace fasteners, mil-spec fasteners, plastic fasteners, metric fasteners, automotive fasteners etc. From exotic metals to fasteners for plastic, we know what works and can often consolidate multiple components to a single assembly.

Our technical staff welcomes the opportunity to consult with you on your next fastener project or provide fastener information to solve the challenges that you face. We have extensive experience reengineering parts to improve their functionality and to decrease costs. We can also help you to consolidate your parts into families to leverage your buying.

### Cost-Reducing Stocking Programs

At GLF, we have developed unique programs to lower the overall costs associated with the procurement of industrial components.

We are a full-line, stocking fastener distributor which allows our customers to consolidate vendors through one-stop shopping. This also guarantees that critical parts are in our warehouse and available on a just-in-time basis.

**Amazon.com** - Well known for selling books, videos, and CD's, this leading online shopping site offers visitors a large selection of tools, hardware, and home improvement supplies. As a member of their associates program, we earn a small commission from every sale that results from a link on our site. You receive the same low prices and great service for which they are both known. So, please bookmark this page and start your online hardware shopping from here.

**Rockler Woodworking and Hardware** - In 1954, Nurdy Rockler started a mail order woodworking supply company in Minneapolis, known as Minnesota Woodworkers Supply Company. Their first retail store was opened in Minneapolis in 1978 and today, they have a total of 21 stores across the country. They offer cabinet knobs, pulls and handles, kitchen cabinet accessories, drawer slides, hinges, fasteners, levelers, castors, glides, shelving, specialty hardware, tools, workbenches, wood shop supplies, wood moldings and project plans.

**Amerock** - Manufacturers of cabinet knobs, door & drawer pulls, surface mount & mortise hinges, drawer slides, catches and related hardware. As of this writing, their Web site is undergoing a major renovation.

Kwikset Corporation - Founded in 1946 by Adolf Schoepe and Karl Rhinehart, the company was named after their new tubular lock, called "Kwikset", which was quick and easy to install. According to their Web site, they became the number one manufacturer of residential locksets in 1957 and they continue to hold that title today. Now owned by Black & Decker, they have expanded their product line to include higher-quality locks, sold under The Society Brass Collection<sup>™</sup> and TITAN<sup>™</sup> brand names, which offer more security and remote keyless entry deadbolts and handlesets.

Liquid Nails - this site contains information about dozens of adhesive products, produced by Macco Adhesives, under the brand name of Liquid Nails<sup>®</sup>

W. H. Maze - When a lumber company in Peru, Illinois needed an alternative to the bright steel cut nails that were causing their cedar shingle roofs to fail, they bought a used nail machine and started making longer lasting nails from pure zinc strips. Today, the Maze Group, which consists of Maze Nails, Tremont Nail and Independent Nail, offers double hot-dipped zinc-coated nails for all types of exterior applications, stainless steel nails and screws, collated nails for pneumatic tools, masonry nails, flooring nails, post framing nails, log home spikes, pressure treated lumber nails, and other specialty nails.

Schlage - Walter Schlage was a German born inventor and adventurer who's first invention, in 1909, was a door lock that turned lights on and off. Several years later, he developed and mass produced a door knob with a push-button locking device in the center. Today, Schlage is part of the Ingersoll-Rand Door Hardware Group. If you are interested in the history of locks, from knotted ropes, to wooden tumbler locks, to castle locks, padlocks and fancy antique keys, be sure to look through the history of locks

**Simsten Strong-Tie Company Inc.** - Designers, engineers and manufacturers of joist hangers, post anchors, hurricane straps, truss plates, brick ties, connectors for use with light gauge steel construction and composite wood products, as well as other structural metal straps, connectors and anchoring systems. Their site contains pictures of almost all of their products and they offer a free CD-ROM that features all of their catalogs.

**USP Lumber Connectors** - In about 1950, TECO of Chevy Chase, MD, became the first company to manufacture and market joist hangers and other lumber connectors. In 1954, United Steel Products (USP) began selling lumber connectors and established the "Kant-Sag" tradename. Over the years, and after several other companies were rounded, consolidated, and purchased, Kant-Sag was dropped and TECO was liquidated. However, for many of us older builders, TECO is still synonymous with joist hangers. The current USP product line "includes a full range of connectors for high wind resistance, earthquake resistance, engineered lumber, plated truss, glulam and standard lumber."

**Weiser Lock, Inc.** - Another Masco company, Weiser products include the Powerbolt 9000® Home Access System, which can link door locks, garage door openers and an interior lighting system to one remote control. They also offer an electronic keyless entry system, which uses a 4 to 8 digit code to open doors.
