CAO-1289-T
CORRESPONDENT E-MAIL ADDRESS:
TM@cantorcolburn.com

REQUEST FOR RECONSIDERATION DENIED

ISSUE/MAILING DATE: 2/26/2008

Applicant is requesting reconsideration of a final refusal issued/mailed July 5, 2007.

After careful consideration of the law and facts of the case, the examining attorney must deny the request for reconsideration and adhere to the final action as written since no new facts or reasons have been presented that are significant and compelling with regard to the point at issue.

Final Likelihood of Confusion Refusal - Maintained

The trademark examining attorney has considered applicant's arguments and evidence carefully and found them unpersuasive for the reasons below. The examining attorney has made a *prima facie* case that applicant's mark is likely to be confused with the cited registrant's mark. The arguments and evidence in applicant's request for reconsideration are insufficient to overcome the examining attorney's *prima facie* case. Consequently, the final likelihood of confusion refusal is maintained.

Applicant's and Registrant's Marks Are Identical in Every Aspect

Applicant's and registrant's mark are identical in sight, sound and connotation. In fact, applicant does not even argue this point, thereby conceding that applicant's and registrant's marks are identical in sight, sound and connotation.

The applicant states in its request for reconsideration that, "The Examining Attorney bases her refusal to register the instant application on the relatedness of the goods covered by the cited registration and this application." This assertion is misleading and only partially true. The relevant *du Pont* factors in this case are the similarity of the marks *as well as* the relatedness of the goods. *See, In re DuPont de Nemours & Co.*, 476 F.2d 1357 (CCPA 1973).

The applicant does not mention the similarity of the marks as a factor in the likelihood of confusion analysis of this case because applicant's and registrant's marks are completely identical in every aspect, namely, sight, sound and meaning.

Applicant's mark is "SEAHAWK". Registrant's mark is "SEAHAWK". Both marks are completely identical in sight, sound and meaning. Thus, the commercial impressions of applicant's and registrant's marks are absolutely identical.

The fact that applicant's and registrant's marks are completely identical in every aspect, namely, sight, sound and meaning, weighs very heavily in favor of a finding of a likelihood of confusion and against registration of applicant's mark.

Applicant's and Registrant's Goods Are Highly Related

The applicant's sole argument is that applicant's and registrant's goods are sufficiently unrelated to obviate a likelihood of confusion. However, applicant's and registrant's goods are very highly related.

Even if applicant's and registrant's goods were not so highly related, the fact that applicant's and registrant's marks are completely identical in every respect means the relationship between the goods of the respective parties need not be as close to support a finding of likelihood of confusion as might apply where differences exist between the marks. Century 21 Real Estate Corp. v. Century Life of America, 970 F.2d 874, 877, 23 USPQ2d 1698, 1701 (Fed. Cir. 1992), cert. denied 506 U.S. 1034 (1992); In re Opus One Inc., 60 USPQ2d 1812, 1815 (TTAB 2001); Amcor, Inc. v. Amcor Industries, Inc., 210 USPQ 70 (TTAB 1981); TMEP §1207.01(a).

In this case, applicant's and registrant's marks are completely identical in every respect, namely, sight, sound and connotation. Therefore, even though applicant's and registrant's goods are highly related, the fact that applicant's marks are completely identical means that the goods do not have to be as related as they in fact are for a likelihood of confusion to exist.

In the instant case, applicant's and registrant's goods are related, the conditions surrounding their marketing such that they could be encountered by the same purchasers under circumstances that could give rise to the mistaken belief that the parties' goods come from a common source.
In the instant case, the fact that "protective eyewear" and "binoculars" are complementary goods, follow through similar trade channels and are offered together is not a mere supposition as the applicant argues.
The applicant's and registrant's goods are not related in a nebulous manner, as the applicant implies.
In the request for reconsideration the applicant correctly notes that the goods of the parties need not be identical or directly competitive to find a likelihood of confusion. They need only be related in ***some*** manner, or the conditions surrounding their marketing be such, that they ***could*** be encountered by the same purchasers under circumstances that ***could*** give rise to the mistaken belief that the goods come from a common source. *In re Martin's Famous Pastry Shoppe, Inc.*, 748 F.2d 1565, 223 USPQ 1289 (Fed. Cir. 1984); *In re Corning Glass Works*, 229 USPQ 65 (TTAB 1985); *In re Rexel Inc.*, 223 USPQ 830 (TTAB 1984); *Guardian Products Co., Inc. v. Scott Paper Co.*, 200 USPQ 738 (TTAB 1978); *In re International Telephone & Telegraph Corp.*, 197 USPQ 910 (TTAB 1978). TMEP §1207.01(a)(i). This standard is well-settled precedent.
In the very next paragraph in the request for reconsideration the applicant changes the standard for finding goods sufficiently related, stating, "Consumers ***must be likely*** to encounter the marks in a context that gives rise to a likelihood of confusion." (emphasis added). Moreover, the applicant bases this higher standard solely on *In re The W.W. Henry Co.*, Serial No. 78401595 (TTAB 2007), which is an unpublished decision and therefore carries no weight, especially in contrast to well-settled law and the precedential decisions cited above.

In fact, in previous Office Actions the examining attorney submitted copious evidence that applicant's and registrant's goods are highly related. In contrast, the applicant has submitted very little evidence which is mostly irrelevant.
The applicant encloses evidence that attempts to demonstrate that applicant's and registrant's goods inherently differ. The applicant alleges that its "Protective eyewear; safety eyewear; safety goggles; and parts and components thereof" are fundamentally different products from the registrant's "binoculars", arguing that these inherent differences make the parties' goods unrelated.
However, as discussed previously, the nature of applicant's and registrant's goods is irrelevant to the likelihood of confusion analysis in this case. Rather, it is a matter of settled law that the issue is solely whether applicant's and registrant's goods ***could*** be related in ***some*** manner, or the conditions

surrounding their marketing be such, that they ***could*** be encountered by the same purchasers under circumstances that ***could*** give rise to the mistaken belief that the goods come from a common source. *In re Martin's Famous Pastry Shoppe, Inc.*, 748 F.2d 1565, 223 USPQ 1289 (Fed. Cir. 1984); *In re Corning Glass Works*, 229 USPQ 65 (TTAB 1985); *In re Rexel Inc.*, 223 USPQ 830 (TTAB 1984); *Guardian Products Co., Inc. v. Scott Paper Co.*, 200 USPQ 738 (TTAB 1978); *In re International Telephone & Telegraph Corp.*, 197 USPQ 910 (TTAB 1978). TMEP §1207.01(a)(i).

In this case, applicant's and registrant's goods are manufactured by the same businesses, and marketed and sold by the same types of businesses, all to the same types of consumers. Therefore, the "fundamental nature" of the parties' goods is irrelevant to the likelihood of confusion analysis.

With the final Office Action the examining attorney enclosed several pages from the Tasco company web site. This one company sells ***only*** equipment for shooting; it is a specialty business. Tasco sells binoculars for use in connection with seeing targets more clearly. Tasco also sells protective eyewear to gun owners. This evidence demonstrates that the conditions surrounding the marketing of applicant's and registrant's goods are such, that they ***could*** be encountered by the same purchasers under circumstances that ***could*** give rise to the mistaken belief that the goods come from a common source.

Moreover, the examining attorney herewith encloses printouts from another company's web site, namely, "RADARGUNS.COM." This one company sells both applicant's and registrant's goods and is a specialty distributor. This evidence demonstrates that the conditions surrounding the marketing of applicant's and registrant's goods are such, that they ***could*** be encountered by the same purchasers under circumstances that ***could*** give rise to the mistaken belief that the goods come from a common source.

With the final Office Action the examining attorney also submitted numerous copies of printouts from the U.S. Company Reports database from the online Lexis-Nexis database that display third-party specialty manufacturers and distributors that make or sell both applicant's and registrant's goods.

The following third-party manufacturer listed in the U.S. Company Reports database is a specialty manufacturer that makes both applicant's and registrant's goods. Luzerne Optical Laboratories, Inc. manufactures both applicant's and registrant's goods and specializes in the manufacture of specific optical goods.

The following third-party distributors listed in the U.S. Company Reports database are specialty distributors that sell both applicant's and registrant's goods. Trinity Optical Company sells both applicant's and registrant's goods and specializes in the sale of eyewear. Ducal Trading Corp. is a wholesale supplier of both applicant's and registrant's goods and specializes in the sale of eyeglass products.

All of this evidence from the U.S. Company Reports database in the online Lexis-Nexis database demonstrates that the conditions surrounding the marketing of applicant's and registrant's goods are such, that they ***could*** be encountered by the same purchasers under circumstances that ***could*** give rise to the mistaken belief that the goods come from a common source.

With the final Office Action the examining attorney also submitted several articles from the online Lexis-Nexis database demonstrating that applicant's and registrant's goods are complementary. In the articles entitled "Soldiers Have Eyes for Special Specs" and "Ring of Fire" binoculars are shown to come with, or to have attached to binoculars, protective eyewear. These articles demonstrate that applicant's and registrant's goods are complementary and would therefore be sold in marketing conditions in which the parties' goods ***could*** be encountered by the same purchasers under circumstances that ***could*** give rise to the mistaken belief that the goods come from a common source. Prospective purchasers looking for

binoculars would also look for protective eyewear.

The examining attorney also submits another article from the online Lexis-Nexis database entitled "D.O.C. Launches First Sports Vision Eyewear Store in U.S." in which binoculars are sold for use in sports and protective eyewear is sold for use with sports. This article demonstrates that the conditions surrounding the marketing and sale of applicant's and registrant's goods are such, that they ***could*** be encountered by the same purchasers under circumstances that ***could*** give rise to the mistaken belief that the goods come from a common source.

In previous Office Actions the examining attorney submitted copies of printouts from the USPTO X-Search database evidence all of which serve to suggest that applicant's and registrant's goods are similar, follow through similar trade channels and are offered together. These printouts have probative value to the extent that they serve to suggest that the goods listed therein, namely binoculars and protective eyewear, safety eyewear, and safety goggles, are of a kind that may emanate from a single source. *See In re Infinity Broad. Corp.*, 60 USPQ2d 1214, 1217-1218 (TTAB 2001); *In re Albert Trostel & Sons Co.*, 29 USPQ2d 1783, 1785-86 (TTAB 1993); *In re Mucky Duck Mustard Co., Inc.*, 6 USPQ2d 1467, 1470 at n.6 (TTAB 1988).

Despite the precedent cited in the previous paragraph, the applicant argues that this evidence is irrelevant. However, it is well-settled that such evidence does serve to suggest that applicant's and registrant's goods are of a kind that may emanate from a single source. *Id.* The applicant attempts to corroborate its allegation by citing *In re Waterstone Capital Mgmt., L.P.*, Serial No. 78223503 (TTAB 2005). However, this decision was not published and therefore does not carry any weight.

The applicant then attempts to argue that the enclosed X-Search evidence is not able even to suggest that applicant's and registrant's goods are of a kind that may emanate from a single source. However, the applicant does discusses only a few of the X-Search submissions, leaving most unrebutted. Moreover, the examining attorney herewith encloses considerably more USPTO X-Search database printouts to demonstrate that applicant's and registrant's goods are of a kind that may emanate from a single source.

With this Office Action and all previous Office Actions the examining attorney has submitted copious evidence that applicant's and registrant's goods are highly related. The evidence submitted is extensive, varied and credible. In contrast, the applicant has submitted very little evidence. Furthermore, the evidence the applicant has submitted is mostly irrelevant. Therefore, the evidence of record overwhelmingly demonstrates that applicant's and registrant's goods are substantially related. This substantial relatedness, especially in light of the fact that applicant's and registrant's marks are identical, weighs very heavily in favor of a likelihood of confusion and against registration of applicant's mark.

Conclusion

For all of the reasons listed above, applicant's arguments and evidence are insufficient to rebut the examining attorney's *prima facie* case of a likelihood of confusion. In fact, the examining attorney has made of record considerable evidence to corroborate the finding of a likelihood of confusion, while the applicant has submitted very little evidence. Consequently, the arguments and evidence of record weigh very heavily in favor of a finding of likelihood of confusion and against registration of applicant's mark.

Response to Denial of Request for Reconsideration

Accordingly, applicant's request for reconsideration is *denied*. The time for appeal runs from the date the final action was issued/mailed. 37 C.F.R. Section 2.64(b); TMEP Section 715.03(c). If applicant has already filed a timely notice of appeal, the application will be forwarded to the Trademark Trial and

Appeal Board (TTAB).

The **X-Tricator** is compact and will be easily stored in a pocket as well as deployed in seconds and mounted on helmet in seconds via **Snap-On/Snap-Off helmet mounting system. ESS X-Tricator Goggles ESS01CB-EX** also includes Tear-Off Lens Covers that are very helpfull in dirty conditions, such us when ash and dirt keeps on sticking to your lens, you can easily peal it off with out wasting precious time that can be very coastly, just peal lens cover off in second and your sight is clear of any vision disturbances.

Available Options:

- Eye Safety Systems X-Tricator Goggles ESS01CB-EX, Fire and Rescue Protective Eyewear

Full compliance with the following standards and regulations:

- ANSI Z87.1+2003
- Impact requirements of US MIL-V-43511C
- US Federal OSHA standards
- CE EN 166 (B)

Key Features of ESS X-Tricator Fire Rescue Goggles ESS01CB-EX:

- Snap-on/Snap-off Brackets
- Speed-Clip Straps
- 2.4mm Lenses
- Durable Face Padding
- ANSI-Compliant
- 2-Piece Strap System
- Fits Over Glasses

ESS Fire and Rescue Goggles Mounting System:

- Patented Snap-on/Snap-off mounting system allows goggles to be stowed on front or rear of helmet, or quickly removed and stored in pocket.
- High heat-resistant mounting brackets carry a lifetime warranty and securely attach to helmet brim, no drilling required.
- Strap grommets snap on and off the mounting brackets.
- Functions well with all major structural firefighting helmet designs.
- The X-Tricator can be used on a helmet alone or together with flip-downs or a face shield.

Strap System:

IMPORTANT NOTICE

USPTO OFFICE ACTION HAS ISSUED ON 2/26/2008 FOR APPLICATION SERIAL NO. 78903884

Please follow the instructions below to continue the prosecution of your application:

VIEW OFFICE ACTION: Click on this link **http://tmportal.uspto.gov/external/portal/tow?DDA=Y&serial_number=78903884&doc_type=REC&mail_date=20080226** (or copy and paste this URL into the address field of your browser), or visit **http://tmportal.uspto.gov/external/portal/tow** and enter the application serial number to **access** the Office action.

PLEASE NOTE: The Office action may not be immediately available but will be viewable within 24 hours of this notification.

RESPONSE MAY BE REQUIRED: You should carefully review the Office action to determine (1) if a response is required; (2) how to respond; and (3) the applicable **response time period**. Your response deadline will be calculated from **2/26/2008**.

Do NOT hit "Reply" to this e-mail notification, or otherwise attempt to e-mail your response, as the USPTO does NOT accept e-mailed responses. Instead, the USPTO recommends that you respond online using the Trademark Electronic Application System response form at http://www.uspto.gov/teas/eTEASpageD.htm.

HELP: For *technical* assistance in accessing the Office action, please e-mail **TDR@uspto.gov**. Please contact the assigned examining attorney with questions about the Office action.

WARNING

1. The USPTO will NOT send a separate e-mail with the Office action attached.

2. Failure to file any required response by the applicable deadline will result in the ABANDONMENT of your application.
