World Safety
Conference
& Exhibition
comes to Boston

THE 2007 WORLD SAFETY CONFERENCE & EXPOSITION® (WSC&E®) will begin at 1 p.m. on Sunday, June 3 at the Boston Convention and Exposition Center in Boston, Massachusetts. More than 5,000 attendees are expected to attend the opening general session where the keynote speaker will be famed historian and Pulitzer Prize-winning author David McCullough. During the opening program remarks will be made by Warren McDaniels, NFPA chairman of the board of directors and James M. Shannon, president of the international association that has been promoting life safety and protecting the public from fire and other hazards for more than 100 years. Awards will be given to industry leaders in recognition of achievements in fire safety education, research, development of codes and distinguished service.

The 2007 WSC&E is comprised of more than 150 education sessions, a series of one- and two-day pre-conference seminars, and a three-day exposition highlighting some of the most cutting-edge products available. Hundreds of experts including engineers, architects and municipal officials gather at this conference to share insights. Continuing Education Units are available for most sessions.

A few compelling topics at WSC&E:

- Featured presentation on the Station nightclub fire will examine code changes, research, and legislation issues related to this tragic fire that killed 100 people in West Warwick, Rhode Island in 2003;
- Spotlight presentation on the Cocoanut Grove nightclub fire that claimed 492 lives in 1942 in Boston;
- Questions on the World Trade Center investigations;
- NFPA's New Emergency Evacuation Planning Guide for People with Disabilities;
- A look back at the history of *NFPA Journal®*, the authority on fire, electrical, and building safety, as it celebrates 100 years;
- Emergency Response Issues Associated with Pandemic Avian Influenza and Other Animal Borne Diseases, and
- Analysis of changes—2008 NEC.

NFPA members will have an opportunity to vote on proposed new safety and building codes that will be adopted around the world.

A wide range of state-of-the-art products from more than 250 exhibitors will be on display including, sprinkler systems and services, fire detection and extinguishing equipment, and alarm and control panels.

WSC&E is co-produced by NFPA and ROC Exhibitions, Inc. Conference partners include *NFPA Journal* and necdigest®. To register and learn more about World Safety Conference & Exposition visit the conference Web site (www.nfpa.org/wsce), or call +1 617 984-7312.

ROC Exhibitions, Inc., a multi-show management firm based in Lisle, Ill., is a partner with NFPA in the production of the World Safety Conference & Exposition. NFPA and ROC also partner and co-produce two additional fire protection industry events: Americas' Fire and Security Expo in Miami Beach and NFPA Fire Expo Mexico held in Mexico City.

Electrical Safety, OSHA, and NFPA 70E®
Kenneth Mastrullo, OSHA
This session will explore the perceptions and reality of electrical safety from different perspectives. The key to worker safety is being a qualified person. A qualified person has a combination of experience, knowledge, training, and discipline. To better analyze what makes a person qualified, this session incorporates case studies of electrical accidents to explore their root causes and the importance of personal discipline for individual worker safety.

Using Risk Concepts in Codes and Standards Development
Milosh Puchovsky, NFPA
The Fire Protection Research Foundation has been developing guidelines on introducing risk concepts into the codes and standards making process. The outcome of this project is to provide a tool for technical committees in considering the concept of risk informed decision-making when revising or developing their committee documents.
