Garmin Integration

You already know the benefit of Garmin Navigation Systems. Now, combined with SkyGuard, you not only get the benefit of turn-by-turn navigation, you also have your work schedule and a messaging device sitting on your dash.

SkyGuard provides a low-cost solution that makes Garmin units work twice as hard for you - doubling as both a navigation tool and a mobile messaging device.

See how SkyGuard can improve your fleet management

[Download the Brochure](#)

How?

EASY-TO-USE SKYGUARD INTERFACE

Send text messages to Garmin units using SkyGuard's easy to use web site. Drivers can easily reply, letting you know their status. Also use variety of reports, alerts, and map views to keep in the know and in control of your fleet. Also, via the website, dispatchers create optimized routes for the drivers to ensure the least amount of miles driven for each customer stop.

PRELOAD ADDRESSES

All stops or addresses on a driver's route can be loaded into the Garmin device, in advance, wirelessly from SkyGuard's web site. With just a few taps, the driver can let the dispatcher know the status of the job.

ROUTE OPTIMIZATION

From the website, the dispatcher can schedule the stops in a preferred order or they can select to have the routes arranged in an optimized order. Once they've selected that option, the order of the route is modified so that the fewest miles are accumulated.

CLEAR TURN-BY-TURN DIRECTIONS

Garmin devices, powered by SkyGuard, provide drivers with accurate turn by turn directions, creating the shortest, most productive routes. The driver simply selects one of the preloaded addresses or stops and lets Garmin do the rest!

IN-VEHICLE MESSAGING

Dispatchers send text messages to the Garmin unit in the vehicle using the SkyGuard website. Quick text replies lets the driver respond letting the dispatcher know when they're on their way and when they've completed their work. Get through the entire day without ever picking up the phone! And the added bonus of enhanced communication results in a lower rate of personal use.

POLICY COMPLIANT MESSAGING

Garmin devices, powered by SkyGuard, provide you with an ability to communicate with the dispatchers when use of cell phones is prohibited. The dash mounted device displays text messages and allows the driver to send pre-set messages and responses with minimal effort.

QUALITY GARMIN DEVICES

Fleet Management Interface version 2.0 (FMI 2.0) and above are supported by SkyGuard.

Why?

REDUCED STRESS

Meeting deadlines is stressful to drivers so knowing where they are going is important. Studies have shown that using a GPS device like Garmin results in less stress for the drivers.

INCREASED EFFICIENCY

Combining SkyGuard and Garmin ensures drivers have the communications tools, optimized routes and clear driving directions to get where they need to go faster and more efficiently.

LOWERED COST

Fuel and overtime eat away at a company's bottom line. SkyGuard powered Garmin devices ensure the drivers are taking the shortest routes to their daily destinations, reducing the amount of fuel needed and lowering the average overtime required to get the job done.

ENHANCED CUSTOMER RELATIONS

Getting to more customers quickly keeps business running smoothly. And with SkyGuard and Garmin, you know where your drivers are and when they will get to a location so you can provide accurate arrival information, which keeps customers happy.

IMPROVED SAFETY RECORD

Drivers need to keep their eyes on the road and hands on the wheel. SkyGuard lets drivers do just that by letting dispatchers send messages, addresses, and preloaded responses with little interaction required from the driver.

Putting you in the know & in control

RECOVER STOLEN VEHICLES

TRACK AND LOCATE VEHICLES

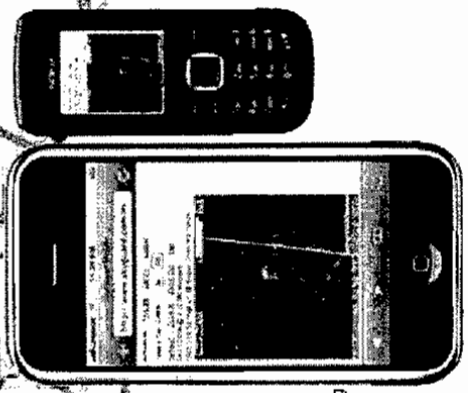

VEHICLE INFO ALERTS

GET MAINTENANCE REMINDERS

Track and monitor your vehicle.

You can access your cars location no matter where you are with SkyGuard Mobile. You will always be able to know where your vehicle is, if it's moving and even where it's going. SkyGuard Mobile also allows you to remotely control your vehicle with features like enabling starter, opening locks, and activating your lights.

The next generation of GPS auto security.

Total protection for your vehicle and family

Unlike security systems that simply enable police to locate stolen cars, SkyGuard uses advanced GPS and wireless technology to provide a whole new level of proactive protection for families. Click on the links above to learn more about all the ways SkyGuard keeps your family and your vehicle safe.

SkyGuard could earn you an insurance discount!

Download our insurance inquiry form to find out.

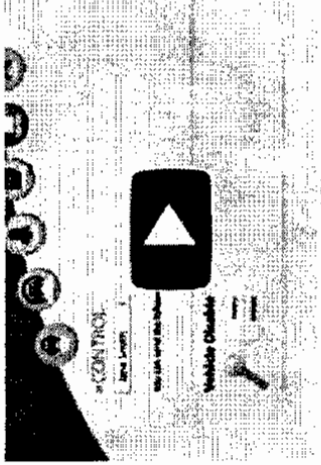

I want to protect my family with SkyGuard!

Additional cable Skypine connects the [navigation box CS9100RV](#) to Skypine touch screen AV receivers, allowing you to transmit the image (RGB) and sound (stereo) from the CS9100RV navigation box to the AV receiver and run the navigation system through a touch screen interface.

Supported Skypine Multimedia Receivers:

- SD-6800
- SD-6802
- SD-6810
- SD-9218
- SD-9218T
- SD-9228
- SD-9228T
- SD-9320
- SD-9525
- SD-9822
- All Skypine AV receivers with RGB input*

Before you connect CS9100RV to a Skypine multimedia receiver, make sure to activate a corresponding protocol. For this, hook up CS9100RV to a power source and connect it to a TV or any other video signal receiver through a composite output. Then configure CS9100RV using the control panel:
