CHOOSE YOUR ROAD GLIDE® HANDLEBAR

Just about every model of Harley-Davidson® motorcycle features a different stock handlebar. Selected to complement the style or use of the bike, the handlebar may be the ideal shape for many riders, but of course, not everyone has the same physical characteristics.

Choosing a bar for your Road Glide® model is about more than just style – it's about how you approach the road. Where the bar positions your hands, wrists, and arms directly affects how you feel on your motorcycle. For every set of bars, there are three factors at work: Rise, Pullback and width. These three measurements determine your reach to the hand controls and, therefore your overall feeling of comfort and control.

D. ROAD GLIDE HANDLEBAR – GLOSS BLACK*

Come over to the dark side. This gloss black 1.25" handlebar features the same shape, rise and pull back dimensions as the Original Equipment bar, so no additional cables or lines are required.

RISER BASICS

You may think you are perfectly happy with the way your bike is adjusted. But that doesn't mean that it is correctly set up for you. We get used to our bikes — our muscles become trained and we end up accommodating the bike. It is far better to take the time to make the bike accommodate you.

If you are satisfied with your handlebar's width and wrist position, but wish it was just a little higher, lower or closer to you, your dealer can recommend a set of handlebar risers that move the bar into your comfort zone.

ADJUSTING YOUR HAND POSITION

STOCK HANDLEBAR

Just about every model of Harley-Davidson® motorcycle comes with a different stock handlebar. Selected to complement the style of the bike, the handlebar may be the ideal shape for many riders, but of course, not everyone has the same physical characteristics.

STOCK HANDLEBAR WITH RISERS

If the stock handlebar has the correct width and hand position for you, but seems just a little too far away, we offer riser kits that bring the controls within reach. Straight and curved risers are available for many model and handlebar combinations.

FIT SHOP TIPS

Here are a few options to consider when outfitting your bike to fit you. Find your model and flip to the pages for more information. For more details, visit h-d.com/fitshop.

Getting the fit right may be as simple as adjusting the Original Equipment handlebar and controls. With the bike blocked in the upright position and you in the saddle, your Dealer can loosen the handlebar clamp and rotate the bar for a closer match to your ideal fit.

Once the grips fall naturally to hand, your Dealer can also adjust the hand control lever position. Rotating the switches and levers to a level position puts your wrists in a relaxed position and reduces the strain of lifting your fingers to reach a too-high lever.

*NOTE: Installation of some handlebars and risers may require a change in clutch and/or throttle cable and brake hose for some models. Handlebar height is regulated in many areas. Check local laws before installation.

BOOM!™ AUDIO—THE CHOICE IS CLEAR

Harley-Davidson® Boom!™ Audio is an exciting collection of integrated audio components designed to combine the maximum number of features with an easy-to-use interface. And because your bike's Original Equipment radio is designed for plug-and-play integration of Boom! Audio equipment, you can easily create the custom sound experience you've always wanted.

Our goal is to deliver exceptional products that create a deep emotional connection between music and riding. We don't take the easy way out by assuming that louder is better. Instead, we find ways to optimize bass while keeping distortion low. Our audio specialists work hand in hand with our vehicle engineers to optimize speaker enclosures and locations for both the standard and Boom! Audio speakers.

Boom! Audio systems are designed to be loud enough to cut through road noise without sacrificing accurate sound reproduction. All you hear is musical balance and clarity. Each combination of speakers relies on a unique equalization curve programmed into the amplifier to maximize the system's performance. This gives Boom! Audio a clear advantage over other aftermarket systems.

FAIRING SPEAKERS

Capture every note. Designed for maximum performance in the harsh motorcycle environment, these waterproof speakers feature increased sensitivity for 25% louder output, reduced distortion and improved clarity at speed.

BOOM!™ BOX 6.5GT RADIO

The Boom! Box 6.5GT Touchscreen Infotainment System is the ideal upgrade for models equipped with the standard Boom! Box 4.3 radio. The 6.5GT features AM/FM radio, weather alert, integrated iPod and USB audio device playback, map-based GPS navigation and Bluetooth pairing of mobile phones.

BOOM! AUDIO SPEAKERS

Feature advanced rare earth magnets made with neodymium compounded with iron and boron. Neo magnets are light, small and very powerful. They are roughly 10 times stronger than equivalent ferrite magnets, so neo magnets achieve the same strength with one-tenth the size and weight of traditional magnets.

TOUR-PAK® SPEAKERS

Surround yourself with sound. Forward-facing speakers feature waterproof tweeters and injection-molded woofer cones with high-flux Neodymium magnets and are sized to be a direct replacement for the factory speakers.

For a complete tour of the Boom! Audio Infotainment system, log on to:
www.H-D.com/Owners

AMPLIFIERS

When loud just isn't loud enough. Rugged Fairing, Tour-Pak® and Saddlebag-mounted amplifiers provide increased volume, lower distortion, reduced clipping and fuller sound that cuts through wind and road noise.

FAIRING LOWER SPEAKERS

Nestled into the glove boxes of your vented fairing lowers, these vibration-tested waterproof speakers feature rider directed tweeters for clear, crisp sound.

BIKE-TO-BIKE COMMUNICATIONS KIT

Bike-to-Bike system allows you and your passenger to talk with other riders, even when you are miles apart. Integrated CB features easy to use handlebar controls and will mute the radio while in transmit or receive mode.

HIDDEN ANTENNA

Hide the antenna inside the fairing for a clean, uncluttered look. Perfect for your slick custom bagger, the Hidden Antenna is the ideal addition to models equipped with H-D® Detachables™ Tour-Pak® luggage.

ULTRA CLASSIC® ELECTRA GLIDE® WITH STAGE1 BOOM! AUDIO SHOWN

SADDLEBAG LID SPEAKERS

652 AUDIO & GAUGES

Boom!™ Audio – '14-'16 Touring

A. BOOM!™ AUDIO AMPLIFIER KIT

Take your music to the streets. Boom!™ Audio Amplifier Kits allow you to crank up the volume with significantly less distortion. The amplifier provides more power than Original Equipment radio alone, resulting in increased volume, fuller sound reproduction, reduced clipping and lower Total Harmonic Distortion (THD) than head unit alone. Unlike after-market amplifiers that connect between the radio and the speakers, the Boom! Audio amplifier bypasses the radio's internal power amp to produce the cleanest sound possible. The Boom! Audio Amplifier boosts the pure source signal, minimizing any distortion generated through the speaker output. The system-matched high-output signal features optimized sound equalization for crisp, clear vocals and maximum bass response and the strong midrange response cuts through wind and road noise. The waterproof 4-channel, 75-watts/channel amplifier (300-watt total) has been designed from the ground-up for the harsh motorcycle environment. Fairing Mounted kit includes all mounting hardware and wiring harness. Note: The use of the Boom! Audio Amplifier turns off the radio's internal amplifier.

STAGE II BOOM!™ AUDIO SYSTEMS

Boom!™ Audio Stage II systems give you the very best motorcycle sound experience. Stage II systems are based on a bi-amplified, three-way speaker design. Each Stage II speaker features a separate woofer, mid-range, and tweeter element that allow frequencies to be delivered with the optimum driver design. Each speaker is powered by two channels from the amplifier – one for the woofer, and the second for the mid-range/tweeter combination – for a total output of 150 watts/speaker. This doubling of the power allows you to play your music louder with far less distortion than traditional systems.

BOOM!™ AUDIO STAGE II COMPONENTS*

Headline your own concert tour. Big and bold is the best way to describe the musical performance you will experience when listening to your favorite band through a Boom!™ Audio Stage II sound system. The weather-proof 3-way speakers feature high-excursion woofers for extended bass performance, and separate mid- and high-frequency drivers for rich vocals and startlingly real treble notes. Powered by a dedicated 300 watt amplifier, each pair of speakers is capable of producing “filling-rattling” volume. Designed to work seamlessly with the factory installed Boom! Audio infotainment head unit, the Boom! Stage II components are system matched and feature custom tuned static and dynamic equalization that dial in the ideal setup for your ride. And you can choose how far you want to go. From a single pair of fairing mounted speakers and a 300 watt amp to a full bore 8 speaker, 4 amp, 1200 watt system, we’ve got you covered.

A. BOOM! AUDIO STAGE II SPEAKER KIT – FAIRING*

Stage II Fairing Speakers feature a 6.5" long-throw woofer for low frequencies, a bridge mounted mid-frequency driver, and a separate tweeter for high-frequencies. Like true audio-ophile components, each speaker is powered by two channels from our 300 watt amplifier – one channel powers the woofer, and another powers the mid/tweeter combo. When powered by separate dedicated bass and high-frequency amplifier channels, you are doubling the power to each speaker when compared to our Boom! Audio Stage I system. The results? You get thumping bass response, sizzling vocals and clean, distortion free performance at all volume levels. Built with composite speaker frames, powerful magnets and protective perforated metal grills, these weather and vibration resistant speakers are designed for life on the road. And because your bike's Advanced Audio Radio is designed for plug-and-play integration of Boom! Audio equipment, you can easily create the custom sound experience you've always wanted.

FAIRING LOWER SPEAKERS

Nestled into the glove boxes of your vented fairing lowers, these vibration-tested waterproof two-way speakers feature rider directed tweeters for clear, crisp sound.

IPOD® INTERFACE

Access your iPod® playlists, artists, songs and albums while you keep your hands on the handlebar. At the touch of your fingertips, you can use the factory audio hand controls to scan through the iPod menus and view the selections on the radio face.

BASS BOOST PORTS

Boost bass response without adding a subwoofer. The open ports permit the rear speaker pods to "breathe," using the Tour-Pak air space for a 21% increase in bass response and an 82% reduction in distortion.

AMPLIFIERS

When loud just isn't loud enough. Rugged Fairing, Tour-Pak® and Saddlebag-mounted amplifiers provide increased volume, lower distortion, reduced clipping and fuller sound that cuts through wind and road noise.

FAIRING SPEAKERS

Capture every note. Designed for maximum performance in the harsh motorcycle environment, these waterproof two-way speakers feature increased sensitivity for 25% louder output, reduced distortion and improved clarity at speed.

SADDLEBAG LID SPEAKERS

Directionally optimized for improved rider acoustics, these waterproof 5" x 7" two-way speakers turn the latched and gasket-sealed saddlebags into large speaker enclosures for enhanced bass response.

TOUR-PAK® SPEAKER PODS

Surround yourself with sound. Forward-facing two-way speakers feature waterproof grill-mounted tweeters and injection-molded woofer cones with high-flux Neo-dymium magnets and are sized to be a direct replacement for the factory speakers.

A BRIGHT IDEA

Whether you want to grab a little more attention on the boulevard or light up the dark desolate highway, Harley-Davidson® LED lighting will get you noticed. Available for most models, LED headlamps feature high- and low-beam performance that provides a focused beam of light down the road and a pool in front of the motorcycle. Solid-state LEDs are designed for long life and the shock- and vibration-resistant lamp assemblies mount into existing housings for easy installation.

DARE TO COMPARE

Harley-Davidson® LED Headlamps offer low- and high-beam performance that is superior to traditional halogen bulbs. The wide curb-to-curb low-beam pattern provides a great around-town view and the focused high-beam adds extra punch down the center of the lane.

LED performance characteristics you can see:

- 1 Clarity and direction of beam
- 2 Brightness and depth of light
- 3 Focused or wasted light
- 4 Full coverage or gaps in light
- 5 Curb-to-curb coverage
- 6 Illumination of reflective markings

DAYMAKER™ PROJECTOR LED HEADLAMPS

Daymaker™ LED Lamps are brighter and provide a superior light pattern than standard incandescent bulbs. These LED lamps produce a whiter noon-day sun color impression that is easy on the eyes and appears more natural to the rider. The night-time beam pattern is focused on the road ahead, and is engineered to reduce wasted light that impacts oncoming traffic. The solid-state LEDs are designed for long life and low energy draw, and installation of the shock- and vibration-resistant lamp assembly is quick and easy with a plug-in connection to the factory headlamp wiring.

SOLID OPTICS LENSES

Projector LED Headlamps feature separate high- and low-beam lenses that provide a controlled beam of light ahead, and horizontal “D-shaped” lenses that focus light into a pool in front of the motorcycle.

A. DAYMAKER™ REFLECTOR LED FOG LAMPS

Compact 2.5" bullet-shaped reflector-optics fog lamps produce a bright white pool of light near the vehicle and fill in the dark area between the bike and the low-beam pattern. The fog lamps project a smooth light pattern spread without distracting "hot spots" and the natural "daylight" lamp color enhances and amplifies the reflective character of lane markers. Unlike some traditional fog lamps, the low-draw LED lamps do not burden the bike's electrical system. The long-life solid-state LED lamps are sealed in shock and vibration-resistant housings that mount to the engine guard or the Road Glide® fairing for a clean appearance. Fog lamps are DOT and ECE compliant.

HARLEY-DAVIDSON MOTOR CO.

WHEELS

IT'S AMAZING HOW FAR TWO WHEELS CAN TAKE YOU WHEN IT COMES TO INDIVIDUAL STYLE. FROM CLASSIC LACED TO CUTTING-EDGE FORGED MODELS, YOU CAN ALWAYS FIND THE PERFECT PAIR TO ROUND OUT A BIKE THAT COULD ONLY BELONG TO YOU.

GENUINE MOTOR PARTS & ACCESSORIES

HD-007927

STRENGTH AND STYLE

From a visual perspective, the wheels, sprocket and brake rotors make up almost half of the motorcycle's profile, and they set the styling direction for the whole bike. Choose wisely. Harley-Davidson® forged, cast and laced wheels undergo thousands of hours of real-world testing to meet the highest standards of performance and durability.

HD-007929

SEEING THE DIFFERENCE

MIRROR CHROME

Looking for the ultimate flash? Choose Mirror Chrome wheels. To achieve this rich look, our dedicated team of polishers spends hours preparing the wheel for its finish. All visible wheel surfaces are micro-polished to a glass smooth finish, and special masking is applied to prevent contamination to threads and bearing bores.

CONTRAST CHROME

Can't make up your mind? Choose Contrast Chrome wheels. We start with a hand polished wheel, and add a proprietary finish that features both gloss black paint and chrome highlights. The combination produces a stunning contrast that lightens the wheel's profile by visually thinning the spokes, rim and hub.

BLACK ICE

Want the blacked-out look but unwilling to give up the shine? Choose Black Ice wheels. First, we polish all the surfaces. Then we apply the exclusive Black Ice coating for a finish with incredible depth and shimmer—impossible to achieve with ordinary "black chrome." These wheels look perfect on a blacked-out bike, but the wet-look holds its own in the company of chrome.

CUT BACK

Looking for a cool, hard-edged style? Choose Cut Back wheels. We start with a raw wheel, polish all the exposed surfaces, and coat the wheel in a durable easy-to-clean gloss black finish. But we don't stop there. We machine an intricate pattern into the wheel to the raw aluminum surface below. The resulting mix of machined edges and add a tough look to your ride's profile.

ORDERING PROCESS

Step 1: Select a wheel part number for your specific fitment.

Step 2: Select the wheel installation kit for your specific application (model, year, and front or rear). Note: If your model is not specified in the wheel fitment, a wheel installation kit will not make the wheel fit your model.

Step 3: Refer to the instruction sheet included in your wheel kit to determine the necessary parts required from the installation kit.

Step 4: Use only Harley-Davidson specified tires. See a Harley-Davidson® dealer. Using non-specified tires can adversely affect stability, handling or braking, which could result in death or serious injury.

COLOR-MATCHED STRETCHED SADDLEBAG BOTTOMS*

Add the long low “slammed” look to your Touring bike without compromising the suspension travel and ride height. These Stretched Saddlebag Bottoms wrap around the exhaust to add visual length to the bike and hide the muffler bracket and hanger from view. Stretched Bottoms are predrilled to accept your existing saddlebag lids and latches. Simply attach the extended saddlebag bottom to your saddlebag lids with the included hardware and install on the bike like the original bags.

Available to fit:

Fits '14-later Touring models with Color-Matched Hard Saddlebags.

Fits '93-'13 Touring models with Color-Matched Hard Saddlebags.

CLEANING TIPS FROM THE MOTOR COMPANY

We understand how important a clean ride is to you. That's why we've spent thousands of hours formulating cleaning and care products designed specifically for H-D® surfaces and finishes. Unlike common "auto parts store" brands, these products are designed to protect your investment and will work together without adverse reactions.

CHECKLIST FOR COMMON CLEANING ISSUES:

- ☑ Before applying any protective or cosmetic product, you should always start off by washing your motorcycle with Sunwash® Bike Soap.
- ☑ Don't detail your bike in the direct light of the day. Sun-warmed clearcoat and hot surfaces may streak and swirl when drying.
- ☑ To soften melted-on boot marks and tar from exhaust pipes, apply Boot Mark Remover and let it set for a few minutes. Then scrape away the gunk with a Softcloth.
- ☑ The natural acid in bug splatter is damaging to surface finishes, so be sure to act quickly. Apply Bug Remover, wait a minute to soften the residue, and rinse away the debris.
- ☑ To remove adhesives, tar, tree sap and pollutants, dab on Glaze™ Poly Sealant, wait, then wipe it clean with a Softcloth.
- ☑ Is your leather looking dull? Black Leather Rejuvenator's pigmented formula restores the luster, and Leather Protectant weatherproofs the surfaces.
- ☑ Whitewalls a little dirty? Apply Harley® Wheel & Tire Cleaner with the Soft Detailing Pad to make them gleam.
- ☑ To revive dull seats, inner fairings and plastic surfaces, mist on Seat, Saddlebag & Trim Cleaner and wipe away the dust and grime.
- ☑ To protect plastic, painted, and chrome-plated surfaces, apply Glaze Poly Sealant. This cream combats fading and oxidation, and its ultrafine leveling agent removes minor blemishes.
- ☑ Don't have time for a complete detailing session? Use Gloss Detailer or Harley Spray Cleaner & Polish for quick jobs between applications of Glaze Poly Sealant.

A. HARLEY-DAVIDSON® HELMET LOCK¹

This carabineer-style universal helmet lock protects your helmet, jacket or bag from casual grab-and go theft. The lock is small enough to fit into your pocket, but big enough to fit around most any handlebar or engine guard (1.5"/38mm max). No keys are required. Simply set your own 4-digit code, slip the carabineer through your helmet D-ring, and close the outward-opening lock. The aluminum and zinc alloy carabineer is covered with a tough rubber coating to protect the surrounding finishes.

52200003 **\$24.95**

B. HARLEY-DAVIDSON HELMET/JACKET SECURITY CABLE²

This handy cable is a great complement to the Harley-Davidson Helmet Lock. Slide one end through your jacket sleeve or luggage, hook the loops at the end of the cable onto the Helmet Lock and attach it to your bike. And, if your helmet does not have D-rings, you can pass the cable through your helmet's chin piece, loop the ends through your Helmet Lock and lock it to your bike. Now your jacket, luggage and helmet are locked to your bike. When you're finished, it will recoil back to its original length and will slip easily into your pocket. The cable is made from 3mm thick nickel plated steel cable, is only 4.5 inches (11cm) long when coiled, stretches up to 6ft (180 cm) and has a load capacity of 200 lbs (100 kg).

52200004 **\$12.95**

C. BAR & SHIELD LOGO PADLOCK¹

Classic round-body lock is perfect for use as a fork lock, or to secure protective cables or chains. This high-security lock features a tough case-hardened boron alloy shackle and easy-to-operate quarter-turn five-pin tumbler cylinder, housed in a beautiful chrome-plated lock body with textured surfaces and embossed Bar & Shield logo. Kit includes 2 keys.

45737-72A **\$22.95**

D. UNIVERSAL MOUNT HELMET LOCK¹

To limit grab-and-run theft, just unlock the hinged clasp, hang your helmet by its strap, and relock with the included key. Your helmet is held securely in place. In addition, hanging your helmet reduces the risk of impact damage if the helmet slipped off the seat or the handlebar. Designed to be installed to .875" to 1.25" diameter tubing engine guards, saddlebag guards and frame tubes, the Helmet Lock is secured to the bike with tamper-proof hardware that cannot be easily removed. Note: Do not use lock when vehicle is in motion. Helmet Lock should only be used when motorcycle is parked and locked. Duplicate keys are not available.

MORE THAN AN OIL CHANGE

Maintaining your Harley® motorcycle can be almost as enjoyable as riding it. The hours spent in the driveway inspecting every part and every surface keeps you in touch with the bike. But when it comes to major service, remember that your Harley-Davidson® dealership's technicians are specially trained to properly diagnose and maintain your bike. Whether it's your first 1,000-mile checkup or a 20,000-mile service, a Harley-Davidson dealership should be your destination.

THE WELL-EQUIPPED GARAGE

Adventure comes at a price. As mileage adds up, moisture, dust and road debris can take their toll on the bike's wear-prone surfaces. But, if you have the right tools for fighting through miles and miles of the highway's abuse, you'll be more than ready to keep your bike in top running condition.

MAINTENANCE

Keeping your bike road-ready takes a special touch. Topping off the fluids, checking the tire pressure, and keeping the battery fully charged are no problem when you have the right Harley-Davidson maintenance tools in your garage.

TOOLS

Every bit as rugged as our motorcycles, Harley-Davidson tools and tool kits boast a compact, lightweight design developed specifically for use on your Harley.

FLUIDS

Whether it's oil, brake fluid or Screamin' Eagle® SYN3™ Synthetic Motorcycle Lubricant, all Harley-Davidson fluids are developed exclusively for use in Harley-Davidson motorcycles, making them a must-have in your garage.

FILTERS

Don't overlook the essentials. Harley-Davidson air and oil filters keep debris out of your engine to help keep it healthy. So replace them routinely and insist on using only the Genuine article.

BATTERIES

Genuine H-D® Batteries are engineered for the harsh motorcycle environment, and feature AGM technology for higher cold cranking amps, longer life and improved rechargeability.

TIRES

Harley-Davidson co-branded Dunlop® and Michelin tires are ready to go the distance. Extensively tested in real-world conditions, our recommended tires are engineered for long life, comfortable ride and competent handling.

Tire Inflators

A. TIRE PRESSURE GAUGE AND FILL VALVE

Simplify checking the air pressure level and filling the tires on your motorcycle. This Tire Pressure Gauge features a an 18" flexible hose and 2-way air chuck with both a 45° fill port and a unique side fill port that provides easy straight-in access to hard-to-reach motorcycle valve stems. The dual-range instant-read gauge measures pressures from 0-60 psi and 0-400 kPa, and is protected from impact and abrasion by a thick rubber collar. Designed to fit an air compressor with a standard 1/4" quick-disconnect coupler, this gauge allows you to check the pressure and fill the tire without removing the chuck from the tire. Just apply the chuck to the valve stem, read the pressure, and add air by depressing the comfortable trigger lever. And for checking tire pressure on the road, you can use this tool like any standard tire gauge.

12700096 \$79.95

B. COMPACT AIR COMPRESSOR WITH LIGHT

Correct tire pressure is crucial to safe operation and long tire life, but checking the pressure, finding a gas station with a working air pump, and filling the tire is a chore that many of us ignore. The Compact Air Compressor is designed to simplify this necessary procedure. The compact, lightweight 12V pump is designed for life on the road. The all-in-one pump plugs into your bike's battery charging harness, and features a built-in 0-160 psi pressure gauge and bright LED work light. The 11" air hose and 6' fuse-protected power cord easily reach the front and rear wheels, and are stored in convenient compartments when not in use. The lightweight pump features durable, impact-resistant construction, and is small enough to fit easily in a saddlebag or strap-on luggage. Kit includes pump, valve stem extension, and nylon carrying bag.

12700020 \$42.95

C. VALVE STEM EXTENSION

Sometimes there's just not enough space around the tire's valve stem for the gas station air chuck and hose to reach. Brake rotors, sprockets and saddlebags get in the way and keep the air chuck from making an airtight seal. When that happens, this Valve Stem Extension provides easy access. Simply screw the extension in place on the stem, fill the tire to the proper pressure, remove the extension, and replace the valve stem cap. Then toss the extension in your saddlebag or tool roll for the next time.

WHY USE GENUINE HARLEY-DAVIDSON® OILS, FILTERS AND SERVICE PARTS?

When it comes to parts and service, there are a lot of people vying for your business and a confounding array of products to choose from. Why should you use Harley-Davidson® products? Here are a few of the many reasons.

HARLEY-DAVIDSON QUALITY CARE

FIT, FUNCTION AND SYNERGY

All Genuine Harley-Davidson® service parts have been designed, tested and manufactured as part of the complete motorcycle and created to work in harmony with the entire vehicle. Our parts are made of the same materials and to the same exacting standards as those that were installed during the manufacture of your motorcycle.

TESTING

Harley-Davidson has invested vast resources in state-of-the-art design, testing, manufacturing technology and facilities. From the Motor Company's renowned Product Development Center to its test track in Arizona, Genuine H-D® parts are evaluated individually against their design specifications as well as on the test track as part of the complete motorcycle.

DURABILITY AND CONTINUOUS IMPROVEMENT

H-D engineers monitor the durability and performance of most components on every model, gathering hard data to identify any improvements that can be incorporated. In addition, many parts are put through exhaustive tests. This process identifies any aspect of a part that needs improvement long before it becomes a retail product.

SURFACE FINISH

Whether chromed, painted, powder-coated or polished, all Harley-Davidson service parts receive the same exacting surface finish as the original components.

WATERPROOFING

All electrical and ignition parts are subjected to exhaustive water testing to ensure that they will perform perfectly even in the worst downpour. These high standards apply to all Harley-Davidson electrical and ignition service parts, making them reliable and durable.

CORROSION RESISTANCE

Harley-Davidson parts are required to pass the most demanding anti-corrosion standards. Processes and materials are evaluated constantly to ensure they remain state of the art.

THE BOTTOM LINE

No other brand provides the long-term value and reliability of Genuine Harley-Davidson parts. Using these products helps ensure that your Harley-Davidson motorcycle will continue to operate as intended, no matter how many miles you ride.

ENGINE OIL FAQ'S

How often should I change my motorcycle engine oil?

You should change your motorcycle engine oil and engine oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter. If you ride your motorcycle hard, under dusty conditions, or in cold weather, the engine oil and filter should be changed more often. You should always change your engine oil and filter prior to winter storage (or any extended storage) so that your engine oil is clean and free of contaminants during this time period.

Can I go longer between oil changes by changing the filter?

NO! The job of the oil filter is to remove dust, soot and other solid matter. Filters cannot remove water, gasoline or acids and cannot do the job of oil additives that have been used up. You should change your oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter or prior to winter or extended storage periods.

What viscosity grade should I use in my Harley Motorcycle?

The recommended viscosity grade for all temperature conditions is SAE 20W50 Harley-Davidson® Motor Oil. SAE 10W40 H-D® Motorcycle Oil is also available and appropriate for low temperature climates. The SAE 50 H-D Motorcycle Oil is satisfactory in ambient temperatures of 60-80°F, and the SAE 60 H-D Motorcycle Oil in ambient temperatures above 80°F. SAE 20W50 covers the broadest range of operating temperatures.

SYN3® ENGINE, PRIMARY AND TRANSMISSION OIL FAQ'S

What are the key benefits to using SYN3® Motorcycle Lubricant?

- SYN3® Lubricant offers improved film strength for superior wear protection at high temperatures, and improved deposit control for a cleaner engine, transmission, and primary chaincase.
- SYN3 Lubricant can be used in the engine, primary chaincase, and transmission.
- SYN3 Lubricant is formulated for reduced oil consumption, improved wear protection, high-temperature stability, and superior overall field performance.

What's the difference between synthetic and petroleum-based lubricants?

Both synthetic and petroleum-based lubricants are derived from the same crude oils. But that's pretty much where the similarities end. Unlike their petroleum-based counterparts, which inherit physical components (including contaminants) of the source crude oil in the refining process, synthetic lubricants are manufactured from basestocks that are custom-designed from scratch to have desired properties for specific purposes, meaning that engineers have complete control of the lubricant from start to finish – at the molecular level.

What does SYN3 full Synthetic Motorcycle Lubricant do for my drivetrain?

SYN3 Full Synthetic Motorcycle Lubricant offers all the benefits of Genuine Harley-Davidson® 360 Motorcycle Oil, and:

- Offers superior wear protection at higher temperatures
- Keeps engines, transmissions and primary chaincases cleaner
- Meets the anti-wear lubricity requirements of all transmission gears
- Lubricates all primary chaincase components
- Delivers smooth, sure clutch operation
- Provides long-term protection of all internal components
- Improves seal and gasket performance
- Offers superior performance in high-output engines

SCREAMIN' EAGLE® SYN3® FULL SYNTHETIC MOTORCYCLE LUBRICANT

TESTED-CERTIFIED for use in Harley-Davidson® engine, primary chaincase and transmission applications, Screamin' Eagle® SYN3® Full Synthetic Lubricant makes changing and topping off fluids a simple, one-product process. Developed with a proprietary three synthetic basestock formula, Screamin' Eagle SYN3 Lubricant is formulated to provide for long-term protection and engine cleanliness requirements, and to provide superior high-temperature protection for high-output engines. SYN3 Lubricant is formulated to maintain the coefficient of friction for proper clutch operation and to provide the proper lubrication to the primary chain drive. In addition, SYN3 Lubricant is designed to provide the correct lubricity for the anti-wear requirements of transmission gears and for improved seal protection. This formula is approved by Harley-Davidson for use in all stages of engine life and is not detrimental to the break-in stage of engines.

Formulated for use in Harley-Davidson engines, transmissions and the following primary chaincase applications: '71-later XL, '83-'84 XR1000, '08-'13 XR and '84-later Big Twin models with wet-type diaphragm spring clutch.

Spark Plugs

Terminal construction ensures solid watertight connection with standard or performance spark plug wires.

Built-in suppressor/resistor reduces radio noise and interference.

Plated jacket helps prevent corrosion in harsh weather and temperature conditions.

RCT (Ribbed Core Technology) provides improved resistance to plug fouling. The rib's proximity promotes spark discharge to the shell on plugs that are starting to foul, allowing the air/fuel charge in the cylinder to ignite and clear the plug.

Fine Wire Center Electrode promotes ignitability and enhances start up.

Platinum pads on both electrodes reduce gap erosion for longer plug life.

"V-trimmed" ground electrode reduces shrouding to promote flame propagation.

A. SCREAMIN' EAGLE® ST PERFORMANCE SPARK PLUGS

A. SCREAMIN' EAGLE® ST PERFORMANCE SPARK PLUGS

Screamin' Eagle® ST Spark Plugs feature double platinum coating for superior erosion resistance and extended life. The "V" trimmed ground electrode reduces shrouding of the flame front to promote flame propagation, and the fine wire center electrode enhances start ups and ignitability. Screamin' Eagle ST Plugs feature Ribbed Core Technology (RCT) that provides resistance to fouling, and are designed with Original Equipment-style noise suppression to prevent electrical interference with radios and CB communication equipment. Works great in racing applications where rich air/fuel conditions are required. Unique style with Screamin' Eagle logo. Sold in pairs.

High Compression Applications

B. HARLEY-DAVIDSON® GOLD SPARK PLUGS

A special thread and shell coating ensures quick and easy removal from aluminum heads and resists corrosion. A gold palladium insert extends life and improves resistance to corrosion. The tapered tip provides better spark exposure to air/fuel mixture and allows the mixture to flow more easily through gap area for maximum combustibility. Fouling resistance is improved with smaller diameter center electrode wire and insulator tip. Plus, a copper-cored ground electrode runs cooler for extended life.

NOTE: Please check with your dealer to confirm the year and model of your motorcycle. Not all models are available in all markets, and model configurations may differ by country.

ONE-YEAR OVER-THE-COUNTER PARTS AND ACCESSORIES WARRANTY

Harley-Davidson warrants that street legal Genuine Motor Parts ("Parts") and street legal Genuine Motor Accessories ("Accessories") that are purchased on or after January 1, 2012 through an authorized dealer will be free from factory defects, under normal use and service, for a period of one year starting from the date of retail sale and delivery (not date of installation). Because this limited warranty covers only Parts and Accessories, labor is not covered. This limited parts warranty does not cover defects or damage due to abuse, misuse or improper installation. This parts warranty applies to Parts and Accessories you or an aftermarket shop have installed, but only for defects in manufacturing — not conditions caused by the improper installation.

This Parts and Accessories warranty is separate and distinct from the limited factory warranty that applies to your stock motorcycle. This Parts and Accessories warranty does not extend or modify the factory warranty that applies to your motorcycle. It only covers the street legal Genuine Motor Parts and street legal Genuine Motor Accessories added to your motorcycle.

This Parts and Accessories warranty does not cover defects, damage or premature wear to your motorcycle that are caused by the installation or use of Parts and Accessories, even those installed by an authorized dealership. Examples include, but are not limited to performance-enhancing powertrain components or software, exhaust systems, non-approved tires, lowering kits, handlebars, add-ons connected to the factory electrical system, etc.

The fact that Parts or Accessories are labeled or branded Harley-Davidson, or are sold or installed by an authorized dealership, does not necessarily make them appropriate or warranted for the make and model of your motorcycle. The use of Parts and Accessories not designed and tested for your motorcycle may have negative consequences on the performance of your motorcycle and may create conditions not covered by the limited factory warranty.

The remedy for breach of this limited Parts and Accessories warranty is expressly limited to the repair or replacement of any component that proves to be defective, and does not extend or create liability for consequential damages, costs or expenses, including loss of time, inconvenience, or loss of use of the motorcycle. Any implied warranty, including warranty of merchantability or fitness for a particular purpose, is expressly limited to the duration of this limited one-year Parts and Accessories warranty, or to the shortest duration permitted by the laws in your state.

EXCLUDED COMPONENTS:

All Genuine Motor Parts & Accessories will qualify for the one-year over-the-counter warranty, with the following exceptions:

- Tires
- Chemicals
- Premium Luggage (two years)
- Audio and Navigation (two years where applicable)
- Non-street legal components (including Screamin' Eagle® Pro)
- Anything with a manufacturer/factory warranty
- Other disposable and consumable items

To obtain warranty service, return the affected component(s) with proof of purchase, at your expense, within the limited warranty period to an authorized Harley-Davidson® dealer.
