Opposition No. 91254939

SafeNet, Inc.

v.

Microsoft Corporation

By the Trademark Trial and Appeal Board:

On November 18, 2020, Applicant filed a proposed amendment of its involved application Serial No. 88319298, with Opposer's consent, and Opposer's withdrawal with prejudice of the opposition, contingent upon entry of the amendment.

By the proposed amendment, Applicant seeks to amend the identification of goods and services in the subject application as follows (additions in bold):

- **International Class 9**

From:

Downloadable computer software for security information and event management (SIEM) employing artificial intelligence and machine learning to enable automated responses in real time to security vulnerabilities, threats and events; downloadable computer software for collection, storage, analysis and presentation of data for forensic analysis of security events and for security compliance

To:

Downloadable computer software for security information and event management (SIEM) employing artificial intelligence and machine learning to enable automated responses in real time to security vulnerabilities, threats and events; downloadable computer software for collection, storage, analysis and presentation of data for forensic analysis of security events and for security compliance; **Excluding hardware and software for software copy protection and software license management, both locally and across a network, and computer software used to track, monitor, and manage application software usage in the field of software licensing management**

- **International Class 42**

From:

Software as a service (SaaS) services featuring software for security information and event management (SIEM) employing artificial intelligence and machine learning to enable automated responses in real time to security vulnerabilities, threats and events; providing temporary use of non-downloadable computer software for collection, storage, analysis and presentation of data for forensic analysis of security events and for security compliance

To:

Software as a service (SaaS) services featuring software for security information and event management (SIEM) employing artificial intelligence and machine learning to enable automated responses in real time to security vulnerabilities, threats and events; providing temporary use of non-downloadable computer software for collection, storage, analysis and presentation of data for forensic analysis of security events and for security compliance; **Excluding software as a service (SaaS) featuring software for software copy protection and software license management, and software as a service (SaaS) services featuring software used to track, monitor, and manage application software usage in the field of software licensing management**

Because the amendment is limiting in nature, as required by Trademark Rule 2.71(a), and because Opposer consents to its entry, the amendment is approved and entered. *See* Trademark Rule 2.133(a).

The contingency in Opposer's withdrawal having now been met, the opposition is dismissed with prejudice in accordance with the agreement of the parties.
