Opposition No. TBD

Mark: ACRYLLOY

NOTICE OF OPPOSITION

Roehm America LLC (“Opposer” or “Roehm”), a Delaware limited liability company having an address of 299 Jefferson Road, Parsippany, New Jersey 07054, believes that it will be damaged by registration by Spartech LLC (“Applicant”) of the mark ACRYLLOY in Application Serial No. 90/874,098 in International Class 17, and hereby opposes the same.

As grounds of opposition, it is alleged that:

1. Applicant seeks to register the mark ACRYLLOY in standard characters, for plastics in extruded form for use in further manufacturing in International Class 17.
2. The application to register the ACRYLLOY mark for such goods was filed based on August 10, 2021, claiming a use in commerce filing basis under Section 1(a) of the Trademark Act. The application was published for opposition on June 14, 2022, making the present Notice of Opposition timely.

3. Opposer is the owner of U.S. Registration Nos. 649,532 for the mark **ACRYLITE**, 825,930 for the mark ACRYLITE, and 6,739,914 for the mark **ACRYLITE**.

4. U.S. Registration No. 649,532 has been registered since August 6, 1957, and claims a date of first use in commerce for “plain and decoratively embedded acrylic building panel sheets” since at least as early as December 15, 1955. The registration has achieved incontestable status, and has been retroactively been assigned to International Classes 6, 17, and 19 by the United States Patent & Trademark Office (“USPTO”).

5. U.S. Registration No. 825,930 has been registered since March 21, 1967, and claims a date of first use in commerce for “acrylic molding compound” since at least as early as July 19, 1961. The registration has achieved incontestable status, and has been retroactively assigned to International Class 1 by the USPTO.

6. U.S. Registration No. 6,739,914 was applied for on December 12, 1999, and has been registered since January 12, 2021. The registration claims the following goods and services, all with a date of first use in commerce at least as early as 2021:

- International Class 1 – “Chemical preparations for use in industry; Chemical preparations used in science; Chemical preparations for use in camera film, photography and printing; Chemical substances, chemical materials and chemical preparations, namely, acrylic molding compounds; Chemicals used in science; Chemical compositions for use in construction; Synthetic resins, unprocessed; Unprocessed plastics; Unprocessed synthetic resins; Chemical and organic compositions and substances, namely, unprocessed artificial resins as raw materials in the form of powders.”
- International Class 17 – “Plastics for use in manufacture, in extruded form; Packing and insulating materials; Insulation materials and barrier panels for acoustical insulation; Semi-worked synthetic resins; Semi-worked plastics; decorative plastic films being semi-finished products, namely, reflective plastic films for use on windows; Semi-processed decorative plastic in the form of films; semi-finished decorative plastic film for industrial and commercial packing use; semi-processed decorative adhesive plastic film for use in commercial or industrial manufacturing.”

- International Class 19 – “Building and construction materials and elements, not of metal, namely, wall panels, glass panels, non-metallic cladding, casings and trim; Building and construction materials and elements, namely, non-metal casings for use in building or construction; Rigid pipes, not of metal, for building.”

7. A copy of Opposer’s registration certificates, most recent renewals, and USPTO TSDR statuses are attached as **Exhibit A**. Collectively, the marks in Opposer’s aforementioned registrations are referred to as the “ACRYLITE Marks.”

8. Opposer has used the **ACRYLITE** and ACRYLITE marks for acrylic sheets and molding compounds in the United States for more than 60 years. Opposer has promoted its ACRYLITE goods through various media, including online advertising. As a result, on information and belief, Opposer has developed and enjoys significant goodwill and common law rights under the ACRYLITE Marks.

9. Applicant’s specimen of record in Application Serial No. 90/874,098, attached as **Exhibit B**, indicates that Applicant is using its ACRYLLOY Mark in connection with acrylic products.

10. On information and belief, Opposer’s use of ACRYLITE as a name or mark in connection with its goods predates trademark use by Applicant of its ACRYLLOY Mark by over four decades.

11. Applicant’s use of the ACRYLLOY Mark, when used for the goods identified in the application, so resembles Opposer’s ACRYLITE Marks as to be likely to cause confusion, mistake, or deception.

12. If Applicant is granted registration of the applications herein opposed, it would thereby obtain at least a *prima facie* exclusive right to the use of the designation ACRYLLOY for the goods identified in its application. Such registration would be a source of damage and injury to Opposer.

Wherefore, Opposer prays that this Opposition be sustained and that the mark of Application Serial No. 90/874,098 be refused registration.

If the requisite filing fee associated with filing the present Notice of Opposition is inadvertently omitted, or the amount is insufficient, or should any additional fees under 37 C.F.R. §2.6 be required for any reason relating to the present Notice of Opposition, or should an overpayment be included herein, the Commissioner for Trademarks is authorized to deduct or credit said fees from or to Smith Gambrell & Russell's Deposit Account No. 024300, Ref: 033888-072OPP.

Acryloyl™ Acrylic Films

The ultimate enhancement for plastic surface protection, Acryloyl™ is a modified thermoplastic acrylic resin formulated for extrusion applications. It combines the toughness associated with other high impact plastics and the outstanding transparency and UV resistance of conventional acrylic materials.

Highlights

- High-clarity, transparent, translucent or opaque
- Custom colors available
- Good color stability, UV resistance & weatherability
- Tough and scratch resistant

Typical Applications:

- Automotive
- Lighting diffusers
- Sanitary products
- Displays

Acryloyl™ Acrylic Films
Impact toughness meets the clarity and UV protection of acrylic

ALSO OF INTEREST

Outdoor performance sheet: WeatherPro™

These multi-layer thermoplastic sheets combine carefully engineered properties and paint-like aesthetics.

Printed Films: SurfaceChoice™

Discover how these films bring versatile and vibrant designs to a wide variety of substrate materials.

Weatherable Acrylic Films: Korad™

This specially designed proprietary film is composed of several acrylic monomers to protect plastic surfaces.
