ANSWER & AFFIRMATIVE DEFENSES

Applicant, Sunshine Trading Organization LLC (“Sunshine”), through Counsel, and pursuant to the Board’s Order entered December 21, 2023, for its Answer and Affirmative Defenses to the Notice of Opposition filed on November 16, 2023 by Opposer, Top Tobacco LP (“Opposer”) responds as follows, with the following paragraph numbers corresponding to the paragraph numbers of the Notice of Opposition:

Regarding the introductory paragraph of the Notice of Opposition, Sunshine admits that it filed U.S. Application No. 97/593,402 for the mark TOPSHINE & Design for use with Electronic cigarettes; Electronic cigarettes as substitutes for traditional cigarettes; Electronic cigarettes for use as an alternative to traditional cigarettes. Sunshine is without sufficient knowledge or information to form a belief as to the truth of the remaining allegations of the introductory paragraph of the Notice of Opposition and therefore denies those allegations.

1. Sunshine is without sufficient knowledge or information to form a belief as to the truth of the allegations of Paragraph 1 of the Notice of Opposition and therefore denies those allegations.

2. Sunshine is without sufficient knowledge or information to form a belief as to the truth of the allegations of Paragraph 2 of the Notice of Opposition and therefore denies those allegations.

3. Sunshine is without sufficient knowledge or information to form a belief as to the truth of the allegations of Paragraph 3 of the Notice of Opposition and therefore denies those allegations.

4. Sunshine admits that Opposer appears to be the owner of record of the registrations identified in Paragraph 4 of the Notice of Opposition, that printouts from the USPTO database appear to be attached as Exhibits to the Notice of Opposition, and that the registration records indicate the filing of the Section 8 and 15 declarations and statements. Sunshine otherwise is without sufficient knowledge or information to form a belief as to the truth of the remaining allegations of Paragraph 4 of the Notice of Opposition and therefore denies those allegations.

5. Applicant admits that on September 15, 2022, Applicant filed U.S. Application No. 97593402 to register the following mark, TOPSHINE & Design, under Section 1(A) of the Trademark Act, 15 U.S.C. § 1051(a) for Electronic cigarettes; Electronic cigarettes as substitutes for traditional cigarettes; Electronic cigarettes for use as an alternative to traditional cigarettes in Class 34 stating dates of first use and first use in commerce of January 1, 2021:

Sunshine otherwise is without sufficient knowledge or information to form a belief as to the truth of the remaining allegations of Paragraph 5 of the Notice of Opposition and therefore denies those allegations.

6. Sunshine denies the allegations of Paragraph 6 of the Notice of Opposition.

7. Sunshine denies the allegations of Paragraph 7 of the Notice of Opposition.

Sunshine further avers that as Opposer successfully argued to the USPTO regarding U.S. Application No. 76/074,186 for the mark TOP, which then matured into U.S. Reg. 2739466, prior TOP formative marks covering tobacco, cigars and related products are “extremely weak,” “exist in an extremely crowded field,” and as a result “should only be entitled to a comparably narrow scope of protection.” See Exhibit 1, p. 2. Opposer successfully asserted this argument before the USPTO in overcoming the citation of the prior mark, TOP STONE, U.S. Reg. 550,786, which remains registered today. Applicant further avers that Opposer’s hypocrisy in its heavy handed enforcement efforts regarding the “extremely weak” mark TOP has been called out by the Seventh Circuit Court of Appeals which recognized: “When Top Tobacco obtained a federal registration for its brand of loose cigarette tobacco, it assured the Patent and Trademark Office that it was claiming only limited rights to the word ‘top.’” *Top Tobacco, L.P. v. North Atl. Operating Co.*, 509 F.3d 380, 383 (7th Cir. 2007).

8. Sunshine denies the allegations of Paragraph 8 of the Notice of Opposition.

FIRST AFFIRMATIVE DEFENSE

The Notice of Opposition fails to state a claim upon which relief can be granted.

SECOND AFFIRMATIVE DEFENSE

Opposer’s claim is barred by the doctrine of judicial estoppel because Opposer previously and successfully argued to the USPTO in seeking registration of one or more of its pleaded

registrations that TOP formative marks for tobacco and related products are “extremely weak,” exist in an “extremely crowded field,” and therefore “should only be entitled to a comparably narrow scope of protection” such that such marks should not bar registration other TOP marks.

THIRD AFFIRMATIVE DEFENSE

Opposer's claim is barred by the doctrine of file wrapper estoppel because Opposer previously and successfully argued to the USPTO in seeking registration of one or more of its pleaded registrations that TOP formative marks for tobacco and related products are “extremely weak,” “exist in an extremely crowded field,” and therefore “should only be entitled to a comparably narrow scope of protection” such that such marks should not bar registration of other TOP marks.

FOURTH AFFIRMATIVE DEFENSE

Opposer's claim is barred by the doctrine of equitable estoppel because Opposer previously and successfully argued to the USPTO in seeking registration of one or more of its pleaded registrations that TOP formative marks for tobacco and related products are “extremely weak,” “exist in an extremely crowded field,” and therefore “should only be entitled to a comparably narrow scope of protection” such that such marks should not bar registration of other TOP marks.

FIFTH AFFIRMATIVE DEFENSE

Opposer's claim is barred by the doctrine of third party use in that there are numerous third party TOP formative marks for tobacco and related products in use in commerce such that such marks are extremely weak, exist in an extremely crowded field, and those marks, Opposer's TOP marks, and Applicant's TOPSHINE & Design Mark are entitled only to a comparably narrow scope of protection such that Opposer's TOP Marks can easily coexist with Applicant's

TOPSHINE & Design mark without any risk of consumer confusion in the marketplace as can be seen through the differences in the marks in use which are highly germane to their differing appearance, sound, meaning, commercial impression and connotation:

Indeed, the Seventh Circuit previously found: “When Top Tobacco obtained a federal registration for its brand of loose cigarette tobacco, it assured the Patent and Trademark Office that it was claiming only limited rights to the word ‘top.’” *Top Tobacco, L.P. v. North Atl. Operating Co.*, 509 F.3d 380, 383 (7th Cir. 2007). Many of these third party TOP formative marks are shown in the search report attached as Exhibit 2.

SIXTH AFFIRMATIVE DEFENSE

Opposer’s claim is barred by the doctrine of unclean hands in that Opposer previously represented to the USPTO that TOP formative marks for tobacco and related products were “extremely weak,” “existed in a crowded field” and thus, were only entitled to a very narrow scope of protection, and then, once it obtained its registration, Opposer began enforcing its TOP mark against third parties having TOP formative marks notwithstanding that Opposer’s TOP marks are extremely weak, exist in a crowded field, and only enjoy a very narrow scope of protection.

SEVENTH AFFIRMATIVE DEFENSE

There is no likelihood of confusion between Opposer’s Marks and Applicant’s Mark when the marks are considered as a whole given that Opposer’s Marks are “extremely weak,” “exist in a very crowded field,” and are entitled only to a very narrow scope of protection, and

Applicant's Answer & Affirmative Defenses
Opp. No. 91288272

consumers can easily distinguish between TOP formative marks for tobacco and related products based on very minor distinctions between the marks.

WHEREFORE, Sunshine requests that judgment in the Opposition should be entered for Applicant, the Notice of Opposition should be dismissed with prejudice, and Application No. 97593402 should proceed to registration in due course.

Respectfully submitted via ESTTA, this 25th day of January, 2024.

MOTION FOR RECONSIDERATION OF FINAL REFUSAL

In response to the Office Action relating to the above-captioned mark which was mailed on November 13, 2001, and which made final a refusal to register, Applicant, Top Tobacco, L.P., respectfully requests that the Examiner reconsider its final refusal and permit Applicant's mark to proceed to publication for the reasons set forth below:

I. INTRODUCTORY COMMENTS

Applicant and its predecessors have used the TOP mark in connection with tobacco and cigarette paper for over a century, and Applicant has previously obtained several federal registrations for the mark, including one for the same goods covered by the instant application. In each of these prior cases, the Trademark Office necessarily found that Applicant's TOP marks created a distinct enough commercial impression to avoid a likelihood of confusion with the marks now cited as impediments to the registration of the instant application. On this basis, and for the additional reasons set forth below, Applicant respectfully requests that the Examiner

reconsider its refusal by reaching the same conclusion that was reached with respect to these prior applications and allowing the instant mark to proceed to publication.

II. APPLICANT'S MARK DOES NOT CONFLICT WITH THE MARKS CITED AS IMPEDIMENTS BY THE EXAMINER.

The Examiner rendered its refusal to register Applicant's mark on the grounds that, pursuant to § 2(d) of the Trademark Act, the mark is likely to be confused with the registered marks bearing Registration Nos. 299,361 (TIP TOP [stylized]), 514,140 (TOP STONE EW W. WAEGEMANS & SON, INC. and design), 550,786 (TOP STONE [stylized]), 717,423 (FLIP TOP [stylized]), 717,424 (FLIP TOP), 816,880 (TOP STONE BOUQUET and design), 821,418 (TOPCO), 1,350,948 (TULSA TOPS), 1,364,827 (TOPS), 1,411,593 (TOP VALUE), 1,873,381 (TOP BUY), 1,946,971 (TOP VALUE ALWAYS THE BEST and design), and 2,115,847 (TOP CREST) (collectively referred to hereinafter as the "Cited Marks"), notwithstanding the fact that these registrations have coexisted with one another for many years. Applicant respectfully maintains that, as more fully set forth below: (i) the Examiner's position does not account for the extreme weakness of the Cited Marks; (ii) the Trademark Office has previously determined that the foregoing TOP marks could coexist with the subject mark; and (iii) Applicant's mark creates a sufficiently distinct commercial impression to avoid any likelihood of confusion with the Cited Marks. Accordingly, Applicant respectfully requests that the Examiner reconsider its final refusal and permit the Applicant's mark to proceed to publication.

A. The Cited Marks are extremely weak, and, as such, in denying Registrant's application, the Examiner has afforded the Cited Marks an unjustifiably wide scope of protection.

In instances such as this, where the Cited Marks exist in an extremely crowded field, the marks in question should only be entitled to a comparably narrow scope of protection. See, e.g., *IDV North America, Inc. v. S&M Brands, Inc.*, 26 F. Supp. 2d 815 (E.D. Va. 1998) (because

derivatives of the word “bailey” were used in 52 active third-party federal trademark applications, BAILEYS was found to be a weak mark); see also Petro Shopping Centers L.P. v. James River Petroleum, Inc., 130 F.3d 88, 93 (5th Cir. 1997) (the frequency with which a term is used in other trademark registrations is relevant in determining likelihood of confusion, especially where the number of third-party registrations is great). Thus, marks like the Cited Marks which incorporate very common terms such as TOP are entitled to only a very narrow scope of protection, and the addition of any matter which could distinguish one mark from another in sight, sound or meaning, or a slight difference in the goods and services with which the respective marks are used should be sufficient to distinguish one mark from the next for the purposes of avoiding consumer confusion.

Here, there are not only 13 Cited Marks which incorporate the term “TOP,” but an online search of the Trademark Office’s records using the TESS system on May 10, 2002, revealed no less than 2,360 live applications and registrations comprised of “TOP.” The overwhelming frequency of applications and registrations comprised of “TOP” in the Trademark Office’s records coupled with the longstanding coexistence of the Cited Marks, all in Class 34, demonstrates the Trademark Office’s recognition that the scope of protection that should be afforded to these marks is *extremely* narrow. The fact that the Trademark Office has granted coexisting registrations for TOP STONE and TOP VALUE, both for cigars (see Registration Nos. 550,786 and 1,411,593, respectively), and TOPCO and TOPS, both for book matches (see Registration Nos. 821,418 and 1,364,827, respectively) further bolsters this point. Indeed, insofar as these marks are used with the same products, these marks are far more likely to be confused with one another in the marketplace than with Applicant’s mark. Accordingly, Applicant respectfully requests that the Examiner reassess the scope of protection that should be

afforded to the Cited Marks, and, in doing so, reconsider its final refusal in this matter and permit the Applicant's mark to proceed to publication.

B. The Examiner's determination that the Cited Marks conflict with Registrant's application is inconsistent with previous determinations of the Trademark Office.

As noted above and as discussed in greater detail in Applicant's Office Action Response dated April 24, 2001, Applicant and its predecessors have used the TOP mark for tobacco and cigarette paper since 1900 and have previously obtained a number of federal registrations for the mark. In 1969, Applicant's predecessor successfully registered TOP and Design for cigarette paper, and the registration subsisted for over twenty years, until 1992 (Registration No. 876, 316). Likewise, Applicant's predecessor registered TOP and Design for smoking tobacco in 1988, and this registration remained valid until 1996 (Registration No. 1,512,015).

In 1993, Applicant itself successfully registered the mark TOP CANADIAN CROWN for cigarettes and tobacco, and this registration remains in full force and effect. Then, significantly, in 1999, Applicant successfully registered TOP and Design for smoking tobacco. That registration, which also remains valid, is for the identical goods and covers virtually the same mark as the application at issue here; the only difference is that Registration No. 2,293,958 includes a design component, notably the same design component as that reflected on Applicant's specimen for the instant mark.

The Cited Marks bearing Registration Nos. 299,361, 514,140, 550,786, 717,423, 717,424, 816,880, and 821,418 were all registered prior to the filing and registration of each of Applicant's current registrations comprised of the term TOP, including Registration No. 2,293,958 for TOP and Design. In each of those cases, the Trademark Office necessarily found that Applicant's TOP marks created a distinct enough commercial impression to avoid a

likelihood of confusion. Similarly, applications to register the Cited Marks bearing Registration Nos. 1,350,948, 1,64,827, 1,411,593, 1,873,381, 1,946,971, and 2,115,847 were filed and became registered subsequent to and notwithstanding Applicant's prior TOP registrations, meaning that the Trademark Office necessarily found that these marks did not conflict with Applicant's marks either, including Registration No. 2,293,958 for TOP and Design. Here, the Applicant respectfully requests that the Examiner reconsider its refusal by reaching the same conclusion that was reached with respect to these prior applications and, in particular, with respect to Registration No. 2,293,958 for TOP and Design by allowing the instant mark to proceed to publication.¹

C. Applicant's mark creates a sufficiently different commercial impression to avoid any likelihood of confusion.

The Office Action dated November 13, 2001 reflects that the Examiner continues to focus upon the notion that "the dominant portions of [the marks in question] are nearly identical."² However, the evaluation of whether marks are confusingly similar is dependent

¹ In addition, Applicant respectfully submits that the Examiner's treatment of the instant application is inconsistent with the Examiner's treatment of Applicant's simultaneously filed applications to register TOP and TOP and Design (App. Nos. 76/033,943 and 76/074,182, respectively) in connection with cigarette papers in Class 34. With respect to each of those applications, the Examiner cited only the third-party registrations of TIP TOP (Reg. No. 299,361) and TULSA TOPS (Reg. No. 1,350,948) as §2(d) impediments, both of which are for use in connection with the same goods as Application Nos. 76/033,943 and 76/074,182, namely cigarette papers. Applying that logic to the instant application, particularly in light of the extremely narrow scope of protection to which the Cited Marks are entitled, the only potential impediments to the instant TOP application would be marks used in connection with the same goods, namely smoking tobacco. Nevertheless, in the instant case, the Examiner has deemed ostensibly all Class 34 registrations comprised of TOP to be §2(d) impediments.

² Applicant respectfully disagrees with the Examiner's assertion that TOP is the "dominant" component of each of the Cited Marks. For instance, with respect to TOP STONE BOUQUET (Reg. No. 816,880), Applicant submits that "TOP" is merely used as a superlative term, rendering the remainder of the mark the "dominant" portion (i.e., "STONE BOUQUET").

upon a comparison of the marks in their entireties. See, e.g., Massey Junior College, Inc. v. Fashion Institute of Technology, 492 F.2d 1399, 1402, 181 U.S.P.Q. 272, 273 (C.C.P.A. 1974) (“a mark should not be dissected and considered piecemeal; rather, it must be considered as a whole in determining likelihood of confusion”). Indeed, it is contrary to this “anti-dissection” rule to assess the likelihood of confusion by breaking marks into their component parts. See, e.g., McCarthy on Trademarks and Unfair Competition, § 23:41 (1998). Nevertheless, given the Examiner’s comments in its November 13, 2001 Office Action, and inferring from the Examiner’s finding of a likelihood of confusion between Applicant’s mark and the Cited Marks despite the extremely narrow scope of protection to which the Cited Marks are entitled, Applicant believes that, in rendering its final refusal, the Examiner may have been improperly focused upon the fact that each of the Cited Marks contains the term TOP, rather than focusing upon the overall commercial impression of the respective marks.

Examining the marks as a whole, none of the Cited Marks create the same commercial impression as Applicant’s mark. As reflected by Applicant’s specimen as well as by the design component of Applicant’s prior registration of TOP in connection with smoking tobacco (see Reg. No. 2293958), Applicant’s TOP mark connotes a toy top. See Burns Philp Food, Inc. v. Modern Products, Inc., 1 F.3d 1252, 28 U.S.P.Q.2d 1687 (Fed. Cir. 1993) (it is appropriate to consider commercial context when examining the commercial impression of a word mark); In re Nationwide Industries, Inc., 6 U.S.P.Q.2d 1882 (T.T.A.B. 1988) (in determining the commercial impression of a trademark, it is appropriate to examine the context in which the mark is used); see also Sun Maid Raisin Growers v. Sunaid Food Products, Inc., 356 F.2d 467, 149 U.S.P.Q. 238 (5th Cir. 1966) (“[t]rademarks cannot be isolated from the labels on which they appear”).

To the contrary, none of the Cited Marks employ the term “TOP” in the same or even a similar fashion. They either use “TOP” as a superlative describing their product as “the best” or “above all others” or to refer to a lid or closure. Accordingly, these differing commercial impressions weigh strongly in favor of a finding of no likelihood of confusion and further merit reconsideration of the Examiner’s final refusal.

III. EVEN IF EXAMINED ONE BY ONE, NONE OF THE CITED MARKS SHOULD BE CONSIDERED AN IMPEDIMENT TO APPLICANT’S MARK.

Beyond the foregoing reasons warranting reconsideration of the Examiner’s final refusal, as set forth in detail below, there are additional reasons why *each one* of the Cited Marks should not be considered an impediment to the registration sought by Applicant. These additional distinguishing features between Applicant’s mark and the Cited Marks should only serve to further alleviate the Examiner’s concerns regarding confusion.

A. The registrant of the first Cited Mark, TIP TOP (Reg. No. 299,361), has consented to the registration of Applicant’s mark.

Applicant and the registrant of the TIP TOP mark, P.T.C. Brands, Inc., have entered into a Consent and Coexistence Agreement (the “Agreement”). A true and correct copy of the Agreement is attached hereto as Exhibit A. Pursuant to the terms of the Agreement, P.T.C. Brands, Inc., not only expressly consents to the use and registration of Applicant’s mark, but P.T.C. Brands, Inc., and Top Tobacco, L.P., mutually acknowledge: (i) that their respective marks have been in use in connection with smoking articles for over 100 years without any actual confusion; and (ii) that they believe that “there is no likelihood of confusion between their use of their respective marks on their respective products because of the long period of coexistence between the two marks in the marketplace.” In addition, by the Agreement, the

parties have agreed to “work together to avoid confusion by the purchasing public in packaging, advertising, and use of their respective marks on their respective goods.”

The overwhelming weight of T.T.A.B. and Federal Circuit authority dictates that this Agreement should be determinative of the issue of whether there is a likelihood of confusion between Applicant’s mark and the TIP TOP mark. See, e.g., In re N.A.D., Inc., 754 F.2d, 996, 224 U.S.P.Q. 969 (Fed. Cir. 1985) (reversing T.T.A.B. decision denying registration due to consent agreement) (“[w]e think it highly unlikely that [the consenting parties] would have deliberately created a situation in which the sources of their respective products would be confused by their customers”); see also In re Leonard, S.A., 2 U.S.P.Q.2d 1800 (T.T.A.B. 1987) (consent from owner of LEONARD for jewelry and silver flatware dispositive of no likelihood of confusion with applicant’s mark LEONARD SWISS for watches in light of several years’ concurrent use without actual confusion); In re American Management Ass’n, 218 U.S.P.Q. 477 (T.T.A.B. 1983) (consent from the registrant of PERSONNEL periodical to the registration of PERSONNEL JOURNAL found to be determinative of no likelihood of confusion, particularly given the lack of any actual confusion for over 50 years). Accordingly, this Agreement coupled with the already well-founded arguments set forth above should render TIP TOP no longer an impediment to the registration of Applicant’s mark.

B. The “TOP STONE” marks (Reg. Nos. 514,140, 550,786, and 816,880) differ greatly from Applicant’s mark in sight, sound, and meaning, and connote an entirely different meaning.

Each of the three registered “TOP STONE” marks incorporate matter which, examining the marks as a whole, serve to distinguish the marks from Applicant’s mark. Indeed, Applicant submits that it is highly suspect to believe that consumers are likely to confuse TOP STONE EW W. WAEGEMANS & SON, INC. with Applicant’s mark based upon the wide variance between

the marks in sight and sound. Furthermore, the respective design components of these registrations are another differentiating factor. See, e.g., First Sav. Bank, F.S.B. v. First Bank System, Inc., 101 F.3d 645, 40 U.S.P.Q.2d 1865 (10th Cir. 1996) (defendant's display of nearly identical word mark along with a different design component found not to be likely to cause confusion). Moreover, each of the "TOP STONE" marks employ "TOP" in a fashion unlike Applicant's mark. The "TOP STONE" marks each use "TOP" in a manner describing their products as "above all others" rather than as a toy top. Accordingly, these distinguishing factors weigh further in favor of no confusion and a reconsideration of the Examiner's final refusal of the application in question.

C. FLIP TOP (Reg. No. 717,423) and FLIP TOP (Reg. No. 717,424) create a vastly different commercial impression than Applicant's mark.

Both of these registrations are for use in connection with cardboard boxes containing cigarettes. As such, the registrants' use of "Flip Top" describes the manner in which the registrant's cardboard boxes containing cigarettes are opened. Thus, not only do the goods in question vary greatly from Applicant's loose smoking tobacco, but, critically, this creates a vastly different commercial impression than Applicant's mark, which, as discussed in greater detail above, connotes a toy top, and further merits a finding of no likelihood of confusion. Burns Philp Food, 1 F.3d 1252, 28 U.S.P.Q.2d 1687 (it is appropriate to consider commercial context when examining the commercial impression of a word mark).

- D. The goods for which TOPCO (Reg. No. 821,418), TOPS (Reg. No. 1,364,827), and TOP CREST (Reg. No. 2,115,847) are registered do not travel in the same channels of trade as the goods with which Applicant's mark is used.**

TOPCO, TOPS, and TOP CREST are all registered for use in connection with book matches.³ Typically, book matches are given out at such establishments as restaurants, bars, pubs, and the like. Thus, these marks are unlikely to travel in the same channels of trade as Applicant's mark, and, as such, this a further factor weighing in favor of no likelihood of confusion and warranting reconsideration of the Examiner's final refusal. See, e.g., Oxford Indus., Inc. v. JBJ Fabrics, Inc., 6 U.S.P.Q.2d 1756 (S.D.N.Y. 1988) (no likelihood of confusion between JBJ for wearing apparel and JBJ for fabric printing because the parties' respective goods moved in different channels of trade).

- E. Applicant has petitioned to cancel the registration of TULSA TOPS (Reg. No. 1350948).**

The registrant of the TULSA TOPS mark, Robert Associates, Ltd., has abandoned its mark with no intention to resume use. On that basis, Applicant has filed a Petition to Cancel the registration of the TULSA TOPS mark. A true and correct copy of the Petition to Cancel is attached hereto as Exhibit B. Though Applicant maintains that the arguments set forth above should be sufficient to permit Applicant's mark to proceed to publication regardless of the outcome of Applicant's cancellation action, it may be appropriate to suspend the instant application pending the outcome of the Applicant's cancellation action. Then, upon an outcome resulting in the cancellation of the TULSA TOPS mark, Applicant's mark should be permitted to proceed to publication.⁴

³ TOP CREST (Reg. No. 2,115,847) is also registered for use in connection with cigarette lighters (not made of precious metal).

⁴ In that regard, it is Applicant's understanding that no answer has yet been filed in its cancellation action concerning TULSA TOPS, notwithstanding that the Respondent's

F. TOP VALUE (Reg. No. 1,411,593) and TOP VALUE ALWAYS THE BEST and Design (Reg. No. 1,946,971) merely employ “TOP” as a part of a superlative phrase.

Unlike Applicant’s mark, which, as discussed in greater detail above, connotes a toy top, TOP VALUE (Reg. No. 1,411,593) and TOP VALUE ALWAYS THE BEST are used in connection with products other than those with which Applicant uses TOP, and, critically, these marks employ “TOP” in a fundamentally different fashion, namely as a superlative as a part of a mark which advises consumers that the products with which the marks are used are “the best value.” Accordingly, beyond the other well-founded arguments set out above, this also weighs in favor of a finding of no likelihood of confusion. See, e.g., McCarthy on Trademarks and Unfair Competition, § 23:26 (1998) (the overall meaning of a mark is a factor to be considered and can be determined from standard dictionary definitions).

G. The registration of the final Cited Mark, TOP BUY (Reg. No. 1873381), has been cancelled.

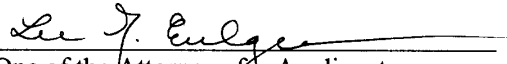

A recent review of Trademark Office records indicates that on January 19, 2002, the registration of TOP BUY became cancelled pursuant to Section 8 of the Trademark Act. Accordingly, in addition to the well-founded arguments weighing in favor of reconsideration set forth above, this development should dictate that this mark is no longer an impediment to Applicant’s requested registration.

answer was due on or before April 8, 2002. Accordingly, judgment may soon be rendered in Applicant’s favor in that proceeding, which would of course result in the cancellation of TULSA TOPS.

IV. CONCLUSION

For the numerous reasons set forth above, Applicant respectfully requests that the Examiner reconsider its final refusal and permit Applicant's TOP mark to proceed to publication.

Respectfully submitted,

CONSENT AND COEXISTENCE AGREEMENT

This consent and coexistence agreement (the "Agreement") is entered into this ____ day of December, 2001, by and between P.T.C. Brands, Inc. ("P.T.C. Brands"), a Delaware corporation with a place of business at 204 Weldin Building, 3411 Silverside Road, Wilmington, Delaware 19810, and Top Tobacco, L.P. ("Top Tobacco"), a Delaware Limited Partnership with a place of business at 2301 Ravine Way, Glenview, Illinois 60025.

WHEREAS, P.T.C. Brands and/or its predecessors in interest have been using the mark TIP TOP for cigarette rolling papers since in or about 1869 and received a federal registration of the mark on November 29, 1932 (Reg. No. 0299361);

WHEREAS, Top Tobacco and/or its predecessors in interest: (i) have been using the mark TOP for smoking tobacco since in or about 1900 and for cigarette rolling papers since in or about 1942; and (ii) recently reapplied for federal registration of the mark (App. Nos. 76-033,943, 76-074,182, and 76-074,186); and

WHEREAS, P.T.C. Brands and Top Tobacco know of no actual confusion between use of their respective marks on their respective products and are of the opinion that there is no likelihood of confusion between their use of their respective marks on their respective products because of the long period of coexistence between the two marks in the marketplace.

NOW, THEREFORE, in consideration of the covenants enumerated herein, the parties agree as follows:

1. P.T.C Brands agrees not to object to Top Tobacco's use and registration of the mark TOP, in word form or in the stylized form shown in App. No.76-074,182, in connection with smoking tobacco and cigarette rolling papers.

2. Top Tobacco agrees not to object to P.T.C Brands' use and registration of the mark TIP TOP in connection with cigarette rolling papers.

3. P.T.C Brands consents to Top Tobacco's registration of the mark TOP in connection with smoking tobacco and cigarette rolling papers, and particularly to App. Nos. 76-033,943, 76-074,182, and 76-074,186.

4. Top Tobacco consents to P.T.C. Brands' registration of the mark TIP TOP in connection with cigarette rolling papers.

5. The parties agree to work together to avoid confusion by the purchasing public in packaging, advertising, and use of their respective marks on their respective goods, and to execute such other and further agreements as are necessary to facilitate the parties' registration of their respective marks, including App. Nos. 76-033,943, 76-074,182, and 76-074,186.

6. The parties agree that neither party nor their respective licensees or related companies (as defined in 15 U.S.C. § 1127) shall advertise or otherwise represent or hold itself or its goods and/or services out as sponsored, associated or in any way approved by the other party.

7. This Agreement shall be binding on both parties and their affiliated companies worldwide.

8. This Agreement is freely assignable or transferable by either of the parties without the consent of the other, provided that such assignment is made in conjunction with the assignment of that party's respective mark.

9. This Agreement constitutes the entire Agreement between the parties with respect to the subject matter addressed herein and supercedes any and all prior agreements between the parties relating hereto.

TOP TOBACCO, L.P.,)

ROBERT BURTON ASSOCIATES. LTD.,)

 Respondent.)

This Petition to Cancel is submitted in the matter of Registration No. 1350948, which is owned by Robert Burton Associates, Ltd., a New York Corporation located, upon information and belief, at 100 Passaic Ave., Fairfield, New Jersey 07004. Registration No. 1350948 is for the trademark TULSA TOPS for cigarette paper in International Class 34 and became registered on July 23, 1985. Top Tobacco, L.P., a Delaware Limited Partnership, having its principal offices and place of business at 2301 Ravine Way, Glenview, Illinois 60025, believes that it would be damaged by the continued registration of Registration No. 1350948 and, therefore, petitions to cancel the same.

The grounds for this Petition are as follows:

1. For many years, and long prior to the acts of Respondent herein alleged, Petitioner has been engaged in, inter alia, the distribution and sale of smoking-related goods, namely, cigarette papers and smoking tobacco. Petitioner distributes such goods to consumers across the United States through tobacco shops, novelty, convenience and other retail stores, and select

restaurants and clubs. Since at least 1900, Petitioner and its predecessors in interest have used the mark TOP (Petitioner's "TOP mark") in connection with the distribution and sale of such goods and on product labels and other printed material distributed to the public.

2. As a result of the continuous and extensive use and promotion of Petitioner's TOP mark in connection with the goods distributed and sold in connection therewith, and as a result of the care and skill exercised by Petitioner and its predecessors in ensuring that such goods are of the highest quality, Petitioner's TOP mark has acquired a distinctiveness and secondary meaning signifying Petitioner and Petitioner's goods. Petitioner has thus built up and now owns valuable goodwill which is symbolized by its TOP mark.

3. As a result of the foregoing, Petitioner has duly registered in the United States Patent and Trademark Office the mark TOP for smoking tobacco, Registration No. 2,293,958.

4. Long subsequent to Petitioner's extensive use and promotion of Petitioner's TOP mark, and long after its acquisition of secondary meaning and goodwill therein, Respondent sought and received a federal registration of the mark TULSA TOPS for cigarette paper (Registration No. 1350948) based upon alleged use in commerce since September 1984.

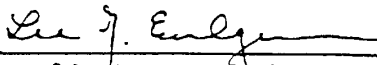

5. However, Respondent has since abandoned said registered mark by discontinuing use of TULSA TOPS with no intent to resume use. Petitioner is likely to be damaged by the continued maintenance of Respondent's registration of TULSA TOPS in that Petitioner's continued and legal use of its TOP mark will be impaired by Respondent's continued registration of TULSA TOPS.

WHEREFORE, Petitioner requests that Registration No. 1350948 be canceled and that this Petition for Cancellation be sustained.

Petitioner requests that the requisite filing fee of \$300.00 be charged to the deposit account of Katten Muchin Zavis, Account No. 50-1214.

Please address all communications to Antony J. McShane and Lee J. Eulgen, Katten Muchin Zavis, 525 West Monroe Street, Suite 1600, Chicago, Illinois 60661-3693, (312) 902-5200.

Search strategy - Trademarks

Chosen search strategy: Comprehensive

Description of accuracy

The Comprehensive search algorithm is built with a statistical method, using more than 1 million official cases where two marks have been found confusingly similar by a government official in the US and the EU.

This means that the Comprehensive search and watch reports cover all the usual search strategies applied in manual searching, such as:

- identical
- phonetic similarity
- orthographic similarity and misspellings
- prefix, infix and suffix variations
- vowel and consonant similarity
- plurals and stemming
- abbreviations and acronyms
- other similarities

The Comprehensive algorithm also applies unique "noise" reduction techniques. This results in a lower number of results without affecting the overall quality (reaching more than 99% of potential conflicts).

Statistical Risk Analysis - Trademarks

The ranking of results is based on a statistical analysis of more than 1 million official cases of confusingly similar trademarks in the EU or the US.

The four "Risk levels" indicate statistically where you will find potential conflicts.

Level 1 - Very high risk.

Of all conflicts, 20% have these types of similarities.

Level 2 - High risk.

Of all conflicts in Europe or the US, 40% have these types of similarities.

Level 3 - Medium risk.

Of all conflicts in Europe or the US, 25% have these types of similarities.

Level 4 - Low risk.

Of all conflicts in Europe or the US, 15% have these types of similarities.

Common law sources - Scope of search

An automated search, with the described limitations, has been done for the following common law sources:

US businesses names

Scope of search: A search among more than 20 million secretary of state business records from all US states and Washington DC.

Domain names

Scope of search: Identical and very similar results from more than 1000 TLD's.

Web search

Scope of search: An automated web search where known biases as region and personal search history have been eliminated. The search combines the trademark name with important keywords provided during the order (or just the trademark name if no keywords were provided). The top 30 results are included.

Images

Scope of search: The same search settings as the Web search. The top 30 results are included.

Social media search

Scope of search: A search of the use of the trademark name in the world's largest social networks: Facebook, LinkedIn, Twitter, Instagram, YouTube and Pinterest. The top 10 results from each social network are included.

Social names

Scope of search: A search if the trademark name is registered as a user name in any of {\$number_of_services} social networks.

App names

A search if the trademark name is used in Google Play and App Store application names. The top 30 results are included.

Goods & Services:

7 - Apparatus, namely, machines used in orthopedics, podiatry and pedicure for the reproduction by molding of the shape of the foot, footprints and the manufacture of orthopedic insoles; lifting apparatus for invalids, namely, stair lifts
 10 - Orthopedic apparatus, namely, orthoses and artificial limbs; orthopedic shoes; orthopedic sole; compression stockings; medical apparatus used as aids for walking, namely, ambulatories for the disabled; orthopedic apparatus for club feet; medical fasteners for attaching body joints; splints; orthopedic holding bandages for knee, support; orthopedic knee, support, bandages; orthopedic bandages for joints; plaster bandages for orthopedic use for knee, support; tubular holding bandages for knee, support; elastic bandages; plaster strips for orthopedic use, namely, strips of compression bandages; exercise shoes for the purpose of medical rehabilitation; orthopedic exercise shoes; orthopedic pads for shoes; orthopedic pads for slippers; orthopedic pads for arch; orthopedic fixation devices, namely, biodegradable implants made from artificial materials for bone fixation; medical devices for supporting the body, namely, arch supports for shoes, foot arch supports for shoes, medical support stockings; orthopedic knee pads; orthopedic knee braces; knee pads for medical purposes; toe inserts for orthopedic shoes, namely, orthotics for insertion into shoes, orthopedic insoles; orthopedic instruments, namely, surgical instruments used in orthopedic surgery; compression materials for medical purposes, namely, compression jerseys, compression stockings, compression socks, compression vests, compression stockings for medical purposes; foot orthotics; orthoses to be inserted in shoes; orthopedic toe straighteners; corrective insoles for the treatment of lower limb diseases; insoles for footwear for orthopedic use; orthopedic insoles with arch; insoles for corrective treatment of the position of the foot; removable orthopedic insoles; heel-pieces for orthopedic use; toe separators for orthopedic use; arch supports for orthopedic shoes; arch supports for orthopedic boots; orthopedic supports for flat feet; toe supports for orthopedic use; knee supports for medical purposes; ankle supports for medical purposes; arch supports for flat feet; orthopedic supports for arch; orthopedic supports for heels; orthopedic supports for feet; orthopedic supports; ankle supports for medical purposes; arch support for shoes; soft inner orthopedic insoles; inner and outer orthopedic insoles; orthopedic insoles of leather; orthopedic hip prostheses; orthopedic bone implants composed of artificial materials; armchairs for medical purposes, namely, dentists' armchairs; physical rehabilitation apparatus, namely, walking paths for physical rehabilitation
 28 - Athletic training apparatus, namely, walking paths
 35 - Retail store services featuring orthopedic apparatus, prostheses, supports and orthopedic shoes, footwear, medical devices, medical instruments; wholesale retail store services featuring medical device, medical instruments, and shoes; retail store and wholesale retail store services featuring pharmaceutical, veterinary and hygienic preparations and medical supplies
 40 - Information in the field of systems for the manufacture of custom shoe insoles for professional use in the field of orthopedics
 41 - Teaching and training in the fields of orthopedics and biomechanics, design of shoe insoles and shoe liners, and systems for the manufacture of custom shoe insoles for professional use in the field of orthopedics
 42 - Information in the field of design of shoe insoles and shoe liners; engineering in the field of orthopedics and biomechanics; scientific and technological studies and research in the fields of orthopedics, podiatry and biomechanics
 44 - Rental of orthopedic apparatus, prostheses, supports and orthopedic shoes; advisory services relating to the adoption, namely, use of medical equipment, orthopedic apparatus, prostheses, support brackets and orthopedic shoes; expert services, namely, providing information in the field of orthopedics; information in the fields of orthopedics and biomechanics in the nature of medical testing

Goods & Services:

7 - Machines and machine tools for material processing and production, namely, stone shaping installations, concrete part manufacturing installations, concrete stone manufacturing installations, concrete slab manufacturing installations, aerated concrete production installations, gas concrete production installations, lime sandstone production installations; Plate conveyor installations, tile printing machines, wet cast installations being a type of casting machine, industrial machine presses, wet presses being a type of industrial machine press, element presses being a type of industrial machine press, hermetic presses being a type of industrial machine press, radial presses being a type of industrial machine press, kerbstone presses being a type of industrial machine press, slab presses being a type of industrial machine press, turntable presses being a type of industrial machine press, lime sandstone presses being a type of industrial machine press, industrial machines for manufacturing pipe and manhole rings, installations for the manufacture of fitting stones, automatic stamping machines, super-smoothing installations in the nature of smoothing presses; Mixing machines, concrete mixing plant in the nature of mixing machines, double-shaft concrete mixers; Machine parts for metering installations being a type of concrete mixer, namely, load cells, weighing belts, liquid dosing stations, screw conveyors, batching belts as parts of machines, hose dosing valves, partial disc dosator systems, namely, discs for dosing concrete and colour, colour metering belts and installations, namely, load cells, weighing belts, liquid dosing stations, screw conveyors, transmission belts for dosing the colour as parts of machines, distribution pumps, machines for distributing concrete, dosing valves, dosing pumps, machines for filling containers and moulds; Net hauling machines; Backing concrete feeder installations being a type of concrete finishing machine; Installations in the nature of concrete mixers for marbling and colouring concrete plates; Comminution installations being a type of crusher machine, ball mill installations being a type of milling machine, sand mills being a type of milling machine; Drying installations being a part of stone manufacturing machines; Stone manufacturing reactors being a type of industrial chemical reactor; Vacuum pumps for cubing of stone layers; Autoclaves as parts of plants and machines for concrete production machinery; Jarring machines, namely, machines for vibrating concrete; Machine tools for the cutting of materials, namely, rotary tables; Sawing installations being a type of power-driven saw, main saw installations being a type of power-driven saw, resaw installations being a type of power-driven saw, longitudinal and transverse saw installations being a type of power-driven saw, profiling installations being a type of polishing system for use in single-head machines comprising grinding and polishing discs for stone profiling, side cutter installations being a type of cutting machine, high-frequency cutting frames being machine parts for cutting machines, oscillating cutting wires being machine parts for cutting machines; separating machines for separating target materials from mixtures of materials; Green cake separating machines for separating target materials from mixtures of materials, green separating table installations being a type of machine for separating target materials from mixtures of materials; Soil section removal installations in the nature of turf removing ploughs; Stone splitting machines; Stone-working machines; Machines for pocket grip production; Surface treatment machines for cleaning surfaces using high pressure water, surface grinding machines, sand blasting machines; Finishing installations being concrete finishing machines for concrete moulded parts; Tube and shaft machining systems in the nature of compression moulding machines; Electric reinforcement welding machines; Filter presses for chemical processing; Steamrollers; Concrete block hardening installations being a type of concrete finishing machine, surface hardening machines being a type of concrete finishing machine, electric bush hammers; Aging machines being a type of concrete finishing machine; Electric brushes being parts of machines; Lifting installations for the transport of persons and goods, elevating apparatus in the nature of a lifting installation for the transport of persons and goods, lifting and lowering scaffolding installations being a type of lifting work platform, vacuum lifters being a type of lifting installation for the transport of stone and concrete goods; Sliding platform installations being a type of elevating work platform; Carriage installations being a type of concrete placing machine; Belt conveyors and lifting installations for the transport of stones, belt conveyors, belt conveyors for the transport of stones, belt conveyors for the transport of concrete, walking beam conveyors being machines; Stone gripper installations in the nature of grapple attachments for stone moving machines; Centring installations in the nature of centring drilling bits being parts of machine; Forming installations being machines and machine tools for the forming of materials; Splitter installations being stone splitting machines; Setting machines being a type of concrete finishing machine; Machines for removing pallets during industrial processes; Pallet storage installations being material handling machines in the nature of automatic pallet dispensing machines for storing loaded and unloaded pallets; Pallet gripper installations being material handling machines in the nature of automatic pallet dispensing machines; Strapping installations; Foil winder installations being mechanical winders and machines for forming coils with pipes made of foil; Concrete binding machines; Packing machines; Board buffer installations being a type of power-operated buffer tool; Board buffers being parts of industrial machines; Board packet grippers being parts of machines; Forging moulds being parts of machines; Parts of machines, namely, molds for use in the manufacture of mouldings of concrete; Parts of machines, namely, formwork being a type of mold for use in the manufacture of concrete; Matrices being parts of industrial machines; Matrix retaining sheets being parts of industrial machines; Wear frames being parts of industrial machines; Wear plates being parts of industrial machines; Pre-distribution wear plates being parts of industrial machines; Extrusion punch plates being parts of industrial machines; Moulding tables being parts of industrial machines; Ejectors being parts of industrial machines; Brushes being parts of machines; Diamond sections in the nature of glaziers' diamonds being parts of machines, grinding segments being grinding tool parts for grinding machines; Power hammers being parts of industrial machines; Leaching installations being a type of machine for separating target materials from mixtures of materials, washing machines for washing out industrial parts in the nature of hermetic plates; Automatic cleaner in the nature of a steam cleaning machine; Extracting machines for chemical processing; Driving devices being drives for motors of machines, engines and electrical engines; Components for machines and machine tools, namely, pump-motors; Cooling radiators for motors; Filters being parts of concrete machines and engines; Automotive parts, namely, engine seals; Torque converters other than for land vehicles; Gears for machines; Engine bearings; Ball-bearings for use in machines, namely, concrete paving machines; Ball rings for bearings for machines, namely, concrete finishing machines; Pneumatic air preparation equipment, namely, lubricators being parts of machines; Control devices, namely, mechanical control apparatus for automated machines; Stopping mechanism being machine parts; Regulators being parts of machines; Joysticks being parts of machines other than game machines; Pneumatic conveyor; Pressure reducing valves being parts of machines; Pressure regulators being parts of machines; Pressure valves being parts of machines; Machine parts, namely, bearing housings; Bearing housings for machines and motors; Racks being parts for mixing machines; All the aforesaid goods for shaped stone, concrete part, concrete stone, concrete plate, aerated concrete, gas concrete and lime sandstone production installations

35 - Retail and wholesale store services featuring shaped stone, concrete part, concrete stone, concrete plate, aerated concrete, gas concrete and lime sandstone production installations; Online retail and wholesale store services featuring shaped stone, concrete part, concrete stone, concrete plate, aerated concrete, gas concrete and lime sandstone production installations; Retail and wholesale store services featuring spare and wear parts and tools for shaped stone, concrete part, concrete stone, concrete plate, aerated concrete, gas concrete and lime sandstone production installations; Online retail and wholesale store services featuring spare and wear parts and tools for shaped stone, concrete part, concrete stone, concrete plate, aerated concrete, gas concrete and lime sandstone production installations

37 - Installation, cleaning, repair, and maintenance of shaped stone, concrete part, concrete stone, concrete plate, aerated concrete, gas concrete and lime sandstone production installations; Maintenance services, namely, maintenance of shaped stone, concrete part, concrete stone, concrete plate, aerated concrete, gas concrete and lime sandstone production installations; Machinery conversion services for shaped stone, concrete part, concrete stone, concrete plate, aerated concrete, gas concrete and lime sandstone production installations; Consultancy relating to the aforesaid services

Goods & Services:

- 7 - Machines for spraying; Machines and machine tools for treatment of materials and for manufacturing, namely, drilling machines, trueing machines for metalworking parts, turning machines in the nature of lathes, lathes, milling machines, power drills, involute, internal, screw, rotary, word, vibratory, and centrifugal grinding machines, dust collector being vacuum machinery, power drill chucks and power drill bits, spindle tapping machines, thread milling cutters, metalworking machine tools, gear cutters; Shaping and moulding machines, namely, Shaping machines for metalworking, injection plastic, compression, injection, and extrusion moulding machines; Machines, machine tools, and power operated tools and apparatus, for fastening and joining, namely, machines, machines tools and power operated tools, namely, electric power drills for fastening and connecting moldings, plastics, wood used with machines and machine tools for manufacturing; Material production and processing machines, namely, grinding machines, material handling machines, semiconductor wafer processing machines; Cutting, drilling, abrading, sharpening and surface treatment machines and apparatus, namely, cutting machines, sharpening machines, power drills, power-operated machine tool for abrasive jet cutting and machining; Machines utilizing rotational motion for high energy surface finishing and material treatment; Folding machine, namely, industrial paper folding machines, industrial carton folding machines; Moulding machines, namely, extrusion moulding machines

es, injection moulding machines, plastic jet moulding machines; Blowing machines, namely, blow molding machines, blowing machines for the compression, exhaustion and transport of gases, fiber blowing machines; Etching apparatus for use in manufacturing display panels; Hydraulic tools, hand-held battery actuated hydraulic crimp tool, hydraulically actuated hammers, hydraulically actuated pliers; Hydraulic hammers; Honing machines for metalworking; Tempering machines; Industrial robots for working plastic material; Machines for making tools, namely, machines for making machine tools, hand-operated tools, pneumatic tools; Mechanical system control instruments, namely, pressure transducers and transmitters that convert hydraulic or pneumatic pressure into analog electrical signals for monitoring and controlling hydraulic or pneumatic systems sold as a unit with manufacturing machines; Industrial pneumatic tools, namely, pneumatic shears, pneumatic screwdrivers, pneumatic hammers; Pneumatic process control instruments, namely, pneumatic controls for machines, motors and engines; Pneumatic process control units, namely, pneumatic controls for machines, motors and engines; Pneumatic system control instruments, namely, pneumatic controls for machines, motors and engines; Air-powered tools, namely, impact wrenches, ratchet wrenches, drills, grinders; Pneumatic machine tools, namely, vices for use in the precision clamping of work pieces, jaws for use in the precision clamping of work pieces, clamps for use in the precision clamping of work pieces; Precision machine tools for machining workpieces, namely, vices for use in the precision clamping of work pieces, jaws for use in the precision clamping of work pieces, clamps for use in the precision clamping of work pieces; Precision machine tools being parts of sets, namely, vices, clamps, vices, and jaws for use in the precision clamping of work pieces sold as a set; Precision machine tools, namely, hard metal tools, high speed steel (HSS) tools, carbide tools, ceramic tools, polycrystalline diamond (PCD) tools, and diamond-coated and diamond-uncoated tools, and hard metal tools, all for use in the cutting and forming of materials by others; Industrial robots for machine tools; Robotic finishing machines, namely, straw rope finishing machines with industrial robots, gear cutting and finishing machines with industrial robots; Robotic mechanisms for working metal, namely, metal working machines with industrial robots; Rotary machine tools, namely, rotary dies for cutting boxes for packaging in dust, rotary compressors, rotary blowers, rotary pumps; Compacting machines, namely, Machine tools for compacting powder materials; Tools for machine tools, namely, tool bits for metalworking machines, dies for use with machine tools; Machine tools, namely, machine tools for forming, riveting, swaging, and flaring of metal and plastics, machine tools being powered machines for cutting or shaping or finishing metals or other materials; Robotic separators, namely, robotic oil separators, robotic centrifugal separators, separating machines for chemical processing; Separators for liquid solutions, namely, separating machines for chemical processing, oil-water separators for pneumatic controls being part of machines; Speed governors for machines, engines and motors; Die-cutting and nut-tapping machines; Threading machines; Parts of machines or engines, namely, housings in the nature of bearing housings; Hydraulic controls for machines; Pumps, namely, pumps for cooling engines, rotary pumps, reverse osmosis pumps; Parts of machines and engines, namely, pistons; Machines for use in assembly lines, namely, a series of machines for assembling machines and machine tools for treatment of materials and for manufacturing in successive stages; Transporting machines, namely, conveyor belts, conveyers being machines, conveying system equipment in the nature of blower; Linear transfer machines, namely, industrial robots for transferring manufactured goods between machine tools, ball transfer table units for use in conveyor systems; Filtering machines, separators and centrifuges, namely, filtering machines for chemical processing, sand, chemical and reverse osmosis filters, air filters for pneumatic controls being part of machines, centrifugal machine, separating machines for chemical processing; Industrial robots for welding; Transportation robots, namely, industrial robots for transferring manufactured goods between machine tools; Industrial robots; Moving and handling equipment, namely, power-operated lifting and moving equipment in the nature of pipe layers, fork lifts, telehandlers, and lifts, oil field equipment in the nature of drilling rig mechanical handling machines and devices; Couplings for machines

9 - Recorded content, namely, sound recordings, audio recordings, video recordings, and prerecorded DVD's, all featuring operation and performance instructions regarding machine tools for metal parts; Databases, namely, electronic database in the field of machine tools for metal parts recorded on computer media; Media content, namely, sound recordings, audio recordings, video recordings, and prerecorded DVD's, all featuring operation and performance instructions regarding machine tools for metal parts; Software, namely, downloadable software for operation, maintenance and control of machine tools for making metal parts, data storage; Recording apparatus, namely, apparatus for recording of sound or images; Information technology and audiovisual equipment, namely, audiovisual receivers, computers data processors; Calculating devices, namely, calculators; Data processing apparatus; Computers; Fire extinguishers; Testing and quality control devices, namely, devices for testing and quality control of the use and configuration of machines and machine tools for the treatment of materials and production, and parts thereof; Measuring devices, namely, rulers, devices for measuring the length and width of tools, devices for measuring the functionality and performance of tools, devices for measuring length, rotation, angular velocity and displacement; Monitoring instruments, namely, electronic carbon dioxide monitors, other than for medical use, electric, electronic, or electrochemical oxygen monitors and sensors for environmental use; Acceleration sensors; Screw-thread measuring machines and instruments; Tool measuring instruments; Instruments for measuring angles, namely, angular velocity measuring instruments; Instruments for surveying physical data, namely, levelling staffs being rods, surveying instruments, surveying apparatus and instruments; Pressure gauges; Measuring apparatus, namely, resistance measuring apparatus, rotational measuring apparatus, angular velocity measuring apparatus, displacement measuring apparatus, motion measuring apparatus, power consumption measuring apparatus, voltage measuring apparatus, amperage measuring apparatus, pressure measuring apparatus, fluid levels measuring apparatus; Gauges with digital readout, namely, digital torque gauges, digital force gauges; Measuring instruments, namely, resistance measuring instruments, rotational measuring instruments, angular velocity measuring instruments, displacement measuring instruments, motion measuring instruments, power consumption measuring instruments, voltage measuring instruments, amperage measuring instruments, pressure measuring instruments, fluid levels measuring instruments; Precision measuring apparatus, namely, derived unit measuring machines and apparatus, astronomical measuring machines; Teaching apparatus, namely, video and slide projectors, and safety training simulators for use with machines and machine tools for treatment of materials and for manufacturing; Scientific research and laboratory apparatus, educational apparatus and simulators, namely, scientific research and laboratory apparatus for use with machines and machine tools for treatment of materials and for manufacturing, namely, betatrons, capillary tubes, chemistry apparatus, namely, burners, tubes, chromatography apparatus for laboratory use, containers for microscope slides, crucibles, cyclotrons, diaphragms for scientific apparatus, diffraction apparatus, distillation apparatus for scientific purpose, furnaces for laboratory use, ovens for laboratory use, microscopes, microtomes, particle accelerators, Pitot tubes, probes for scientific purposes, telescopes, test tubes, teaching apparatus, namely, video and slide projectors, and safety training simulators for use with machines and machine tools for treatment of materials and for manufacturing; Weighing machines; Safety, security, protection and signalling devices, namely, safety, protective and signalling devices and equipment for use with machines and machine tools for treatment of materials and for manufacturing, namely, smoke detectors, luminous beacons, warning bells, electric buzzers, flashing lights as luminous signals, signalling bells, signal lanterns, signalling panels, signalling whistles; Security control apparatus, namely, Security alarm controllers, Wireless controllers to remotely monitor and control the function and status of other electrical, electronic, and mechanical devices or systems in the nature of security systems; Protective and safety equipment, namely, protective work gloves, safety goggles; Mechanical system control instruments, namely, control and regulating instruments on electrical basis for controlling apparatus for use with machines and machine tools for treatment of materials and for manufacturing

16 - Bags and articles for packaging, wrapping and storage of paper, cardboard or plastics, namely, Bags and pouches of paper for use in the packaging, wrapping and storage of machines and machine tools that are used for treatment of materials and for manufacturing; cardboard containers for use in the packaging, wrapping and storage of machines and machine tools that are used for treatment of materials and for manufacturing; plastic bags and pouches of plastic for packaging, wrapping of machines and machine tools that are used in the treatment of materials and for manufacturing; Stationery and educational supplies, namely, stationery and printed instructional and teaching material in the field machines and machine tools for treatment of materials and for manufacturing; Printed matter, namely, printed books, magazines, pamphlets in the field of machines and machine tools for treatment of materials and for manufacturing; Paper and cardboard; Folding machines, namely, paper folding machines as office requisites

35 - Advertising, marketing and promotional services; Business assistance in the nature of business management assistances; Business management and administrative services; Administrative data processing; Office functions services; Business consultancy and advisory services; Administrative support, namely, business support staff services, and data processing services; Assistance with business planning; Data processing, systematization and management, namely, data compiling and analyzing relating to business management, systematization of data in computer databases

37 - Building, construction and demolition, namely, Construction, and demolition work of buildings, offices, manufacturing plants for use with machines and machine tools for treatment of materials and for manufacturing; Installation, cleaning, repair and maintenance of machines and machine tools for the treatment of materials and production and parts thereof; Construction and commissioning of machine tools, namely, installation of machine tools for material processing and production, except for the commissioning of honing machines, honing tools and related accessories; Rental of science and technology equipment, namely, rental of machines and machine tools for the treatment of materials and production and parts thereof; rental of industrial robots and robots for building construction; IT services, namely, installation, maintenance, and repair of computer hardware

41 - Training, namely, training in the field of maintenance, repair, commissioning, operation of machines and machine tools for material processing and production, and parts thereof; Vocational training services, namely, providing training in the form of classes and video seminars in the field of the maintenance, repair, commissioning and operation of machines and machine tools for the treatment of materials and production, and parts thereof; Further education, namely, providing live and on-line continuing professional education seminars in the field of setup operations, repair and maintenance of machines for making metal parts; Teaching, namely, providing classes and seminars in the field of setup operations, repair and maintenance of machines for making metal parts; Exercise classes, namely, providing exercise classes in the field of setup operations, repair and maintenance of machines for making metal parts; Correspondence courses, namely, providing education services in the field of machine tools for making metal parts rendered through correspondence courses; Conducting instructional courses, namely, providing instructional courses in the field of machine tools for making metal parts; Software, namely, non-downloadable software for operation, maintenance and control of machine tools for making metal parts, data storage

42 - Measurement evaluation services, namely, evaluation of measurement devices to determine conformity with certification standards, quality evaluation and analysis, assurance and control, in the field of machine tools for making metal parts; Engineering services in the field of designing machines and assembly production lines for the productions of machine tools for making metal machine parts; scientific and technological services in the field of design and development of machines and machine tools for treatment of materials and for manufacturing, namely, scientific and manufacturing machinery research, and technological consultancy in connection with the use and configuration of machines and machine tools for material processing and production, and parts thereof; Surveying and exploration services, namely, oil explorations services, mining exploration and mineral exploration services, engineering surveying; Consultancy services relating to the design of engineering products; Technology assessment in the field of technology provided by engineer, namely, assessing longevity of machines, efficiency of machines and the need for machine replacement, in the field of machine performance for machining metal parts; Engineering services, namely, assessment provided by engineers in the fields of longevity of machines, efficiency of machines and the need for machine replacement, in the field of machine performance for machining metal parts; Computer assisted engineering design services; Computer-aided engineering design services; Computer-aided engineering design and drawing services in the nature of design and drawing in the nature of conceptual construction in the field of machining and assembly lines and machine installations; Electrical engineering services; Draftsman's services in the nature of technical drawing, namely, engineering drawing services for others; Engineering consultancy services, namely, consulting services in the field of industrial engineering, designing and development of engineering processes; Provision of information relating to industrial engineering; Research in the field of electrical engineering; Research relating to mechanical engineering; Software engineering services relating to automatic data processing; Mechanical engineering; Engineering services for the design of buildings; Software engineering services relating to data processing technology; Engineering consulting services relating to information technology; Engineering services relating to the design and development of robots; Engineering consultation services for the design of machinery; Technological engineering analysis, namely, technological advisory services relating to machine design engineering analysis; Engineering consultancy relating to the design of data-processing equipment; Engineering consultancy, namely, engineering consultancy related to manufacture, use and configuration of machines and machine tools for material processing and production; Technological advisory services relating to machine design engineering analysis; Engineering services in the field of the design and development of machines and machine tools for treatment of materials and for manufacturing of machine tools; IT consulting services; Testing, authentication and quality control, namely, product testing, document authentication and quality control services in the field of machines and machine tools for treatment of materials and for manufacturing; Engineering services, namely, machine tool design and development, and inspection of machine tools for quality control purposes; Technical support services, namely, technical administration of servers for others and troubleshooting in the nature of diagnosing server problems, and administration and troubleshooting of web and database applications; Providing temporary use of non-downloadable software for use in the operation, maintenance and control of machine tools for making metal parts, data storage

Goods & Services:

- 1 - Chemicals used in industry; chemicals used in science; chemicals for use in the biochemical and chemical industry; industrial gases; hydrogen; ammonia; methanol; catalysts for chemical processes; catalysts for use in the oil processing industry; catalysts for use in control of hydrocarbon emissions; catalysts for use in the manufacture of industrial chemicals; catalysts for use in the manufacture of polymers; catalysts for air and off gas purification processes; chemical catalysts used in industry, namely, within processing and production of ammonia, biofuels, cement, chemicals, coke and coal, dimethyl ether (DME), power-to-chemicals, biomass-to-chemicals, fertilizer, flue and waste gas cleaning, fuel synthesis, hydrogen, methanol, oil and gas, petrochemicals, polymers and plastics, refining, shale gas, shale oil, ships and marine, steel, sulfuric acid, substitute natural gas, syngas, waste disposal, air pollution control in chemical processing, hydroprocessing and emissions management; bioglycols; ethylene glycol, monoethylene glycol; polyethylene terephthalate; propylene glycol, monopropylene glycol; biopolymers, polymers for industrial use; polymers, biopolymers, polymeric additives and biopolymeric additives for use in the manufacture of industrial products, consumer and household products, sealants or packaging
- 4 - Fuels; electrical energy from non-renewable and renewable sources; liquefied gases
- 7 - Electrolysis apparatus for industrial use, namely, for generating gases
- 9 - Scientific and research apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling the distribution or use of electricity; fuel cells and fuel cell components; fuel cell stacks; solid oxide electrolysis cells; electrolysis cell stacks; electric batteries and battery components; anode batteries; anodes; anticathodes; cathodes; monitoring, measuring, detecting and controlling apparatus, instruments, sensors or detectors for use in industrial plants; safety monitoring apparatus in industrial plants; computer software for monitoring, measuring, detecting and controlling in industrial plants; downloadable computer software for remote monitoring and analysis in industrial plants; electric reactors
- 11 - Chemical processing equipment, namely, recuperators for chemical processing, stills for chemical processing, evaporators for chemical processing, distillation apparatus for chemical processing, heat exchangers for chemical processing; reactors for gas-gas reactions, reactors for gas-solids reactions, biological reactors for clarifying industrial effluents; apparatus for heating, cooking, refrigerating and drying, namely, reaction vessels, including electrically heated reaction vessels, and reactor equipment for use in industry; reactor equipment, namely, burners for heating reactors and partial oxidation of gasses; reactor equipment, namely, equipment for loading catalyst particles into reactors; industrial boilers; furnace boilers; heat exchangers for chemical processing; hydrogen-generation equipment and components, namely, hydrogen generators, hydrogen purifiers, hydrogen purification membranes, fuel processors, and steam reformers; steam generators; steam generating installations; steam reformers; electrically heated steam reformers; industrial furnaces; filters for industrial installations, namely, air filters for industrial installations, water filters for industrial installations, filters for industrial waste water installations, filters for waste gas purification
- 37 - Building construction services; building construction consultancy; building construction supervision; machinery installation, maintenance and repair; construction, repair, maintenance and installation services in connection with apparatus, installations and plants for production, refining and processing of chemicals, coal, fuel, oil, gases and gaseous mixtures, biomass; construction, repair, maintenance and installation services in connection with apparatus, installations and plants for production or processing of ammonia, hydrogen, methanol; repair, maintenance and installation services in connection with waste handling and recycling; repair, maintenance and installation of energy generating equipment and installations; repair, maintenance and installation of electrolysis apparatus, electrolysis cells and electrolysis cell stacks, fuel cells and fuel cell stacks and the components of the aforementioned goods; construction of plants for production of renewable energy; erection, construction, installation, maintenance and repair services in connection with electrolysis apparatus and equipment and components for the production of hydrogen; installation, maintenance and repair of measuring and testing apparatus and instruments; provision of information and consultancy services in connection with all of the aforesaid services
- 40 - Refining, processing or treatment of chemicals, biochemicals, biobased materials, biofuels, oil, gases or gasified products; production of hydrogen, ammonia or methanol; hydrogen generation services; hydrotreatment and hydroprocessing of chemicals, oil, gases or gasified products; catalytic processing in industry within processing or production of ammonia, biofuels, chemicals, coke and coal, dimethyl ether (DME), energy and power, fertilizer, fuel synthesis, hydrogen, methanol, oil and gas, petrochemicals, polymers and plastics, sulfuric acid, nitric acid, substitute natural gas, syngas; catalytic processing within refining, cement, shale gas, shale oil, marine, steel, waste disposal, renewable energy, biomass processing industries; production and processing of fuels; fuel synthesis; production of fuel based on oxygenates; conversion of synthesis gas to chemicals; steam cracking; steam reforming; chemical treatment of exhaust gases from fossil fuel combustion; chemical treatment of waste products; processing of waste oil; processing of waste plastics; treatment of biomass; production of plastic or fuels from biomass; transformation of organic substances to plastics or fuels; polymerization; production of electrical power from renewable energy sources; conversion of renewable energy into hydrogen; consulting in the field of generation of electrical energy from renewable sources; treatment of semi-manufactured products by means of electrolysis; processing of hydrocarbons; treatment of greenhouse gases; conversion and removal of contaminants in exhaust gasses and waste gasses; chemical processing of effluent gas streams from power plants and other sources that generate carbon dioxide to reduce greenhouse gas emissions; catalytic conversion of chemical compounds
- 42 - Scientific research, technological consulting services in the field of chemical processes; industrial research in the field of chemical processes; development and design of process technologies or chemical processes; design and development of computer software; engineering; engineering design services; chemical engineering; industrial research and analysis; technical project planning; technical project studies; research in the reduction of carbon emissions; providing scientific information, advice and consultancy relating to carbon offsetting; installation, maintenance, repair and servicing of software; design and development of testing and analysis methods; design and testing for new product development; greenhouse gas emission measuring and analysis; design and development of products in the field of chemical industry; research and development of new products in the field of renewable technologies and renewable chemicals or fuels; development and design of industrial processes; development and design of industrial processes in the field of fuels and chemicals; development and design of bio-based chemical processes; development and design of industrial installation and machinery; design, technical project studies and research in the field of construction; technical consultation for process quality control and optimization methods; technological consultation relating to production, processing or treatment of chemicals, biochemicals, biobased materials, biofuel, oil, gases or gasified products; technological consultation relating to processing of waste products, treatment of biomass or production of plastic or fuels from biomass; pollution emissions testing in connection with the control of air or off-gas pollution in industrial plants
- 45 - Licensing of intellectual property; technology licensing; safety evaluations; safety evaluation of industrial plants or industrial installations

<p>1 - Chemicals used in industry and science; tempering and soldering preparations; artificial resins, unprocessed plastics in the form of powders, liquids, pastes and granules; adhesives used in industry; biochemical catalysts for flue gas decontamination and exhaust gas exhaust air purification</p> <p>3 - Chemical cleaning preparations for cleaning electric and electronic apparatus, equipment, instruments and installations</p> <p>5 - Disinfectants; medical diagnostic reagents</p> <p>6 - Sleeves of metal; wrought and semi-wrought common metals and their alloys for industrial purposes; pipes and tubes of metal, storage containers of metal and metal alloys; materials of metal for railway tracks</p> <p>7 - Electric motors, not for land vehicles; electric generators, turbines other than for land vehicles; air compressors; motor starters; compressors as parts of machines, motors and engines; catalytic converters for combustion engines; appliances and equipment for the production, control, distribution and delivery of compressed air, namely, compressed air pumps; electrically powered manual pumps, namely, vacuum pumps, centrifugal pumps, water pumps for use in motors and engines; steam engine boilers; machine tools, namely, material flow and handling machines, packaging machines, sorting machines, pipe shaping machines; chemical processing machines, namely, chemical dissolving, emulsifying and extracting machines; engine fuel rails; vehicle fuel injection valves; air, oil and fuel filters; electrical kitchen machines and equipment for food preparation and processing, namely, dejuicers, centrifuges, grinding machines, mixing and blending machines; cutting and grinding machines for grinding meat and other food products; dishwashers; electric machines and devices for cleaning laundry and clothing, namely, sewing machines, washing machines, spin dryers, clothes ironing machines and laundry presses, electric can openers; electric knife sharpeners; catalytic metal converters; garbage disposals, waste compacting machines, waste crushing machines, waste grinding machines to make waste more compact; electric vacuum cleaners and parts therefor, in particular vacuum cleaner nozzles and brushes; electric tools, namely, electric motor driven drills, screw drivers and saws; electric beaters; catalytic converters and catalyst carriers for land, air and water vehicle drives</p> <p>9 - Electric switchgear and control cabinets; mounting racks for computer hardware and electronic devices comprised of side panels, connecting bars, locking, support bars and guide rails in any combination; plug-in modules comprised primarily of parts in any combination to locate and combine printed circuit boards; thermostats; lasers for technical purposes and not for medical use; electron microscopes; remote electrical controllers; electrical devices, namely, remote controls for household appliances and remote controls for operating industrial automation equipment; automatic machines which are coin or token operated, namely, vending machines; electric conduits and cables; cable accessories, namely, cable connectors; electric cables and insulated electric wires; electric installation material, namely, electric switches, dimmers, electrical sockets, switched socket outlets, splitting boxes, aerial sockets, loudspeaker outlets and junction boxes, electrical plugs and electrical sockets; window louver pushbuttons and electrical switches; thermometers; hygrometers; fuse boxes; plug and socket connections, namely, switchboards, time switches, electricity meters, fuses, screw-in miniature circuit breakers, proximity switches, residual current operated circuit breakers, relays, contacts, cable lugs, cable junction boxes, cable cabinets; ultrasonic and infrared transmitters and receivers and associated relay stations for switching, dimming and momentary contact switching functions; modules for switching and dimming; time delay switches; synchro-generators; filament transformers with electric starting aid for brightness control of fluorescent lamps; switching and control gear for building services management systems; emergency signal transmitters; distribution, ducting and laying systems, namely, electrical ducts and electrical cables for electrical installations; electric and electronic alarms and site security devices and systems, particularly, intruder detection sensors and alarms and police alarms, anti-theft sensors and alarms, not including alarms for vehicles; security access systems, namely, security cameras, security alarms, entry cards and keys, computer hardware and software for security access systems; and video monitoring systems, namely, video cameras and video monitors; infrared pass-key systems, namely, infrared cameras, infrared pass keys and infrared key readers; electronic warning bells, luminous beacons for safety or warning purposes; personal identification devices, namely, electronic readers and recorders for use with bands and cards to identify authorized personnel, encoded electronic chip cards for use to identify authorized personnel, electronic chip card readers; servicing equipment and automated machinery for power plant applications, namely, pipe testing equipment; equipment for non-destructive testing of materials in power plants, eddy current test equipment, ultrasound test equipment, leakage detectors, manipulators, equipment for decontaminating power plant components that have become contaminated with radioactivity; electric recording and measuring equipment for air, water and soil pollution, and for noise, vibrations, radioactivity and meteorological data; X-ray machines for technical non-medical purposes; weighing technology devices and systems, namely, scales and balances, computer hardware and computer software for use in weighing technology devices; programmable logic controllers, particularly for machine tools, manipulators, industrial robots, assembly and materials processing machines; electrical equipment for machine tools and special purpose machines, namely, electrical controllers for machine tools and special purpose machines, devices and their components and systems consisting of such devices and components for the identification and localization of leaks in tanks and containers holding solid, liquid and gaseous substances, namely, leak detectors; equipment for non-destructive materials testing, namely, scanners; high-voltage, medium-voltage and low-voltage circuit breakers and switchgear; h.v.d.c. transmitters; electric rectifiers and inverters; instrument transformers; lightning arresters; vacuum tubes for switchgear; specially designed cabinets for holding switchgear; metering devices for use in conjunction with electricity, gas, liquids and heat; electrical controls for switchgear and power system control, namely, electrical controllers, electronic devices, namely, remote controls for operating switchgears and electrical power supply equipment; transformers; electrical power cables; electronic dynamometers and torque measuring equipment; electronic load indicators; solar collectors for power generation; electric batteries; fuel cells; accumulator cells; solar cells; electrical heat and motion sensors; optoelectronic components and subassemblies consisting of such components; optocouplers; electric resistors; electric capacitors; electrical inductors;</p>							

electric coils; NTC and PTC thermistors; filters, namely, optical filters; printed, etched, potted and integrated circuits; blank electronic chip cards; chip card readers; magnets and resonators; electron tubes; surge voltage protectors; communication devices and systems made up of such devices, namely, radio transmitters and radio receivers; data switching devices and data transmitters, namely, data receivers, data transmitters; electronic telecommunication switches; mobile radio communications transmitters and receivers; devices and systems for the transmission of voice, data and images, namely, transmitters and receivers; satellite earth stations; telecommunication cables and optical fibers for electrical and optical transmission of voice, data and images; telephones; videophones; car phones; telephone answering machines; telephone charge indicators; paging systems, namely, pagers and accessories for pagers, namely, batteries, charging cables, and charging units; telephones with integral fax machines; two-way radios and radio sets; intercom and two-way intercom systems; modems; television cameras; radios; car radios; television sets; record players; CD players; cassette recorders; video recorders; aeri-als and aerial systems comprised of aeri-als and aerial cables; radar sets; short-wave transmitter and receiver stations; ground-air communication systems comprised of computer hardware and software for the transmission of data between two points; radio link equipment, namely, radio receivers, radio transmitters; satellite communications equipment, namely, satellite-broadcast receivers; computer hardware, satellite terminals; encoding devices, namely, data encoders; thermal imaging devices; laser distance measuring equipment; Identification Friend or Foe IFF systems for aircraft comprised of devices for reception, localization, and classification of electromagnetic signals; navigational devices for land vehicles, watercraft and aircraft, namely, global positioning devices; traffic decoders; pilot computers; on-board computers; devices for airbag diagnosis, namely, level gauges; temperature sensors; cable harnesses; vehicle wiring systems for electrical distribution comprised of electrical wires; electric switching devices for motor control; ignition control and ignition trigger devices; electric devices for fuel injection control and central fuel injection; resonators for automotive engineering; electronic control devices for gear, drive, differential, braking, antiskid, four-wheel steering, damping, self level suspension and clutch systems; automobile diagnostic equipment, namely, electronic sensors, electronic scanners, electronic meters, electronic gauges; railway signal transmitters and receivers and structural parts therefor; loudspeakers, loudspeaker cabinets, microphones; headphones; electronic amplifiers; electric irons; electronic timers; kitchen weighing scales; personal weighing scales; electric contacts made of sinter metal

10 - Electromedical appliances and devices, and systems and their components consisting of such for diagnostic radiology and radiotherapy; angiography, cardiography, neuroradiology, and subtraction angiography DSA equipment; apparatus for medical and surgical use, namely, patient monitoring systems, telemetry systems and parts for the foregoing, medical diagnostic imaging systems, namely, magnetic resonance systems, tomography systems, and components and parts for the foregoing; mobile medical apparatus, namely, truck transported magnetic resonance imaging systems, and parts for magnetic resonance imaging systems; apparatus for medical and surgical use, namely, radiography, fluoroscopy, angiography arrhythmia, x-ray, mammography, lithotripsy and physiological recording apparatus and structural parts for the foregoing; nuclear medicine imaging apparatus; tomography apparatus and structural parts for the foregoing; apparatus for oncology care, namely, radiation therapy treatment apparatus; portal magnetic imaging machines and structural parts for the foregoing; diagnostic ultrasound apparatus; hearing aids, auditory training devices for use in the treatment of hearing loss and parts for the foregoing; professional audiology products, namely, apparatus for examination and diagnosis of hearing problems, hearing diagnostic testing and recording apparatus, and structural parts for the foregoing; electronic and battery operated voice boxes and parts for the foregoing; digital recorders for contrast medium examinations with real time imaging; devices for medical diagnostics

11 - Lamps; gas water heaters, immersion heaters, solar water heaters, electric floor heating systems, namely, cables, electric mats and sensors for floor heating systems sold as a unit; heat pumps; water purification units; water treatment equipment, namely, reverse osmosis filtration units; clothes dryers, namely, tumble dryers; domestic cooking ovens, microwave ovens, electric ice cream makers

12 - Land vehicles, water vehicles, namely, boats; air vehicles, namely, airplanes; restraining systems for land vehicles, namely airbags, belt tighteners

14 - Clocks and watches, alarm clocks, precious metals and their alloys

16 - Paper, paperboard and goods made from these materials, namely, looseleaf paper, paper and cardboard for packaging; printed materials, namely, books, booklets, magazines, and printed teaching and instructional materials in the nature of books, booklets and magazines all in the fields of electrical engineering, electronics, information technology, medical engineering, physics, chemistry, and mechanical engineering; photographs, stationery; adhesives for paper and stationery for household applications; paint brushes, electric typewriters, plastic packing material, namely, plastic bags and plastic wrap; printing letters; printing blocks

21 - Containers for household and kitchen use not of precious metal; household and kitchen utensils not of precious metal, namely, spatulas; combs and cleaning sponges; bath brushes; material brush making; unworked or semi-worked glass, not for building; beverage glassware, porcelain and earthenware doorknob; electric toothbrushes; apparatus for cleaning teeth and gums using high pressure water for home use; cleaning brushes for musical instruments; garden sprayers

25 - Clothing headgear, namely, hats and caps

28 - Games and playthings, namely, playing cards, balls for sports, balls for games, board games, action skill games, plush toys

35 - Advertising; business management services; business administration; providing office functions

36 - Insurance brokerage; financial affairs, namely, financial information, management and analysis services; real estate agencies; credit card transaction processing services

37 - Building construction; repair of sound equipment and parts; repair of heating equipment and parts; electrical appliance installation and repair

38 - Telecommunication access services; rental of message sending apparatus and installations; providing access to databases; message sending, receiving and forwarding; telecommunication consultation

39 - Transport of persons and goods; freight transportation by truck, train, air and boat; transporting and storing equipment and parts for industrial plants; packaging articles to the order and specification of others; storage of goods; electronic storage of messages and data; storage of electronic media, namely, images, text and audio data; storage services for archiving databases, images and other electronic data

40 - Machining shop services, namely, machining parts for others; hardening and treatment of metal surfaces

41 - Teaching services, namely, arranging, organization and conducting of courses, lectures and seminars in the field of medicine; providing of training; publication of books and magazines

42 - Research and development, for others, in the field of electrical engineering, electronics, information technology, medical engineering, physics, chemistry and mechanical engineering, technical and scientific consultancy services and engineering services in the fields of electrical engineering, electronics, information technology, medical engineering, physics, chemistry and mechanical engineering; construction drafting; development of data processing computer programs; renting of devices and equipment pertaining to electrical engineering, information technology and medical engineering, namely, medical equipment, computer hardware and computer software; material testing; technical consultancy in the setting up and operation of data processing systems, databases and telecommunication networks; planning, development and design engineering of telecommunications and information processing services and facilities and telecommunications networks and pertinent network tools; planning, consultancy, testing and technical supervision/monitoring in the field of the systems and product integration of telecommunications networks and data processing networks; electronic services, namely, providing temporary use of on-line non-downloadable software for collecting, storing, translating, and distributing of data, information, images, video and audio sequences, by means of a global computer network; development, generation and renting of data processing computer programs; civil engineering services

44 - Medical and veterinary services, rental of medical equipment

Goods & Services:

7 - Drive belts, power transmission belts to be used in industrial applications and machines, fan belts for motors and engines
